Τὰ δὲ πάχη τῶν τριχῶν καὶ αἱ λεπτότητες καὶ τὰ μεγέθη διαφέρουσι κατὰ τοὺς τόπους, ἐν οἷς ἂν ὦσι τῶν μερῶν, καὶ ὅποιον ἂν ᾖ τὸ δέρμα· ὥς γὰρ ἐπὶ τὸ πολὺ ἐν τοῖς παχυτέροις δέρμασι σκληρότεραι αἱ τρίχες καὶ παχύτεραι, πλείους δὲ καὶ μακρότεραι ἐν τοῖς κοιλοτέροις καὶ ὑγροτέροις, ἅνπερ ὁ τόπος ἢ τοιοῦτος οἷος ἔχειν τρίχας. Ὅμοίως δὲ καὶ περὶ τῶν λεπιδωτῶν ἔχει καὶ τῶν φολιδωτῶν. Ὅσα μὲν οὖν μαλακὰς ἔχει τὰς τρίχας, εὐβοσίᾳ χρώμενα σκληροτέρας ἴσχει, ὅσα δὲ σκληράς, μαλακωτέρας καὶ ἐλάττους. Διαφέρουσι δὲ καὶ κατὰ τοὺς τόπους τοὺς θερμότερους καὶ ψυχροτέρους, οἷον αἱ τῶν ἀνθρώπων τρίχες ἐν μὲν τοῖς θερμοῖς σκληραί, ἐν δὲ τοῖς ψυχροῖς μαλακαί. Εἰσὶ δ' αἱ μὲν εὐθεῖαι μαλακαί, αἱ δὲ κεκαμμέναι σκληραί.

Κεφάλαιο 11

Ἡ δὲ φύσις τῆς τριχὸς ἐστὶ σχιστή. Τῷ μᾶλλον δὲ καὶ ἥττον διαφέρουσι πρὸς ἀλλήλας. Ἐνῆναι δὲ τῇ σκληρότητι μεταβαίνουσαι κατὰ μικρὸν οὐκέτι θριξίν ἐοίκασιν ἀλλ' ἀκάνθαις, οἷον αἱ τῶν ἐχίνων τῶν χειρσαίων, παραπλησίως τοῖς ὄνυξιν· καὶ γὰρ τὸ τῶν ἀνύχων γένος ἐν ἐνίοις τῶν ζώων οὐδὲν διαφέρει τὴν σκληρότητα τῶν ὀστέων.

Δέρμα δὲ πάντων λεπτότατον ἄνθρωπος ἔχει κατὰ λόγον τοῦ μεγέθους. Ἐνεστί δ' ἐν τοῖς δέρμασι πᾶσι γλισχρότης μυζώδης, ἐν μὲν τοῖς ἐλάττων ἐν δὲ τοῖς πλείων, οἷον ἐν τοῖς τῶν βοῶν, ἐξ ἧς ποιοῦσι τὴν κόλλαν· ἐνιαχοῦ δὲ καὶ ἐξ ἰχθύων ποιοῦσι κόλλαν. Ἀναίσθητον δὲ τὸ δέρμα τεμνόμενόν ἐστὶ καθ' αὐτό· μάλιστα δὲ τοιοῦτον τὸ ἐν τῇ κεφαλῇ, διὰ τὸ τὸ μεταξὺ ἀσαρκότατον εἶναι πρὸς τὸ ὀστοῦν. Ὅπου δ' (518a.) ἂν ἡ καθ' αὐτὸ δέρμα, ἂν διακοπῇ, οὐ συμφύεται, οἷον γνάθου τὸ λεπτὸν καὶ ἀκροποσθία καὶ βλεφαρίς. Τῶν συνεχῶν δ' ἐστὶ τὸ δέρμα ἐν ᾧ πᾶσι τοῖς ζώοις, καὶ ταύτῃ διαλείπει ἡ καὶ οἱ κατὰ φύσιν πόροι ἐξικμάζονται, καὶ κατὰ τὸ στόμα καὶ ὄνυχας. Δέρμα μὲν οὖν ᾧ παντ' ἔχει τὰ ἔναιμα ζῶα, τρίχας δ' οὐ πάντα, ἀλλ' ὥσπερ εἴρηται πρότερον.

Μεταβάλλουσι δὲ τὰς χροὰς γηρασκόντων καὶ λευκαίνονται ἐν ἀνθρώπῳ· τοῖς δ' ἄλλοις γίνεται μὲν, οὐκ ἐπιδήλως δὲ σφόδρα, πλὴν ἐν ἵππῳ. Λευκαίνεται δὲ καὶ ἀπ' ἄκρας ἢ θρίξ. Αἱ δὲ πλεῖσται εὐθύς φύονται λευκαὶ τῶν πολιῶν. Ἦναι καὶ δῆλον ὅτι οὐχ αὐότης ἐστὶν ἡ πολιότης, ὥσπερ τινὲς φασιν· οὐδὲν γὰρ φύεται εὐθύς αἶον. Ἐν δὲ τῷ ἐξανθήματι ὃ καλεῖται λεύκη, πᾶσαι πολιαὶ γίνονται· ἥδη δὲ τισὶ κάμνουσι μὲν πολιαὶ ἐγένοντο, ὑγιασθεῖσι δὲ ἀπορρυσσῶν μέλαιναί ἀνεφύησαν. Γίνονται τε μᾶλλον πολιαὶ σκεπαζομένων τῶν τριχῶν ἢ διαπνεομένων. Πρῶτον δὲ πολιοῦνται οἱ κρόταφοι τῶν ἀνθρώπων, καὶ τὰ πρόσθια πρότερα τῶν ὀπισθεν· τελευταῖον δ' ἡ ἦβη.

Εἰσὶ δὲ τῶν τριχῶν αἱ μὲν συγγενεῖς, αἱ δ' ὕστερον κατὰ τὰς ἡλικίας γινόμεναι ἐν ἀνθρώπῳ μόνῳ τῶν ζώων, συγγενεῖς μὲν αἱ ἐν τῇ κεφαλῇ καὶ ταῖς βλεφαρίσι καὶ ταῖς ὀφρύσιν, ὕστερογενεῖς δ' αἱ ἐπὶ τῆς ἦβης πρῶτον, ἔπειτα δ' αἱ ἐπὶ τῆς μασχάλης, τρίται δ' αἱ ἐπὶ τοῦ γενείου· ἴσοι γὰρ οἱ τόποι εἰσὶν ἐν οἷς αἱ τρίχες ἐγγίνονται αἱ τε συγγενεῖς καὶ αἱ ὕστερογενεῖς.

Λείπουνσι δὲ καὶ ῥέουσιν κατὰ τὴν ἡλικίαν αἱ ἐκ τῆς κεφαλῆς καὶ μάλιστα καὶ πρῶται. Τούτων δ' αἱ ἔμπροσθεν μόναι· τὰ γὰρ ὀπισθεν οὐδεὶς γίνεται φαλακρός. Ἡ μὲν οὖν κατὰ κορυφὴν λειότης φαλακρότης καλεῖται, ἡ δὲ κατὰ τὰς ὀφρὺς ἀναφаланθίσις· οὐδέτερον δὲ τούτων συμβαίνει οὐδενὶ πρὶν ἢ ἀφροδισιάζειν ἄρξῃται. Οὐ γίνεται δ' οὔτε παῖς φαλακρός οὔτε γυνὴ οὐθ' οἱ ἐκτετμημένοι· ἀλλ' ἐὰν μὲν ἐκτμηθῇ πρὸ ἥβης, οὐ φύονται αἱ ὑστερογενεῖς, ἐὰν δ' ὕστερον, αὗται μόναι ἐκρέουσιν, πλην τῆς ἥβης. Γυνὴ δὲ τὰς ἐπὶ τῷ γενεῖῳ οὐ φύει τρίχας· πλην ἐνίαις γίνονται ὀλίγαι, ὅταν τὰ καταμήνια στῶσι, καὶ οἶον ἐν Καρία ταῖς ἱερείαις, ὃ δοκεῖ συμβαίνειν (518b.) σημεῖον τῶν μελλόντων. Αἱ δ' ἄλλαι γίνονται μὲν, ἐλάττους δέ. Γίνονται δὲ καὶ ἄνδρες καὶ γυναῖκες ἐκ γενετῆς ἐνδεεῖς τῶν ὑστερογενῶν τριχῶν ἅμα καὶ ἄγονοι, ὅσοι περ ἂν καὶ ἥβης στερηθῶσιν.

Αἱ μὲν οὖν ἄλλαι τρίχες αὐξάνονται κατὰ λόγον ἢ πλεον ἢ ἔλαττον, μάλιστα μὲν αἱ ἐν τῇ κεφαλῇ, εἴτα πώγωνι, καὶ οἱ λεπτότριχοι μάλιστα. Δασύνονται δὲ τισὶ καὶ αἱ ὀφρὺς γινομένοις πρεσβυτέροις, οὕτως ὥστ' ἀποκείρεσθαι, διὰ τὸ ἐπὶ συμφύσει ὀστέων κεῖσθαι, ἃ γηρασκόντων διστάμενα διῷσι πλείῳ ὑγρότητα. Αἱ δ' ἐν ταῖς βλεφαρίσιν οὐκ αὐξάνονται, ῥέουσιν δέ, ὅταν ἀφροδισιάζειν ἄρξωνται, καὶ μᾶλλον τοῖς μᾶλλον ἀφροδισιαστικοῖς· πολιοῦνται δὲ βραδύτατα αὗται. Ἐκτιλλόμεναι δ' αἱ τρίχες μέχρι τῆς ἀκμῆς ἀναφύονται, εἴτα οὐκέτι. Ἐχει δὲ πᾶσα θρὶς ὑγρότητα πρὸς τῇ ρίζῃ γλίσχραν, καὶ ἔλκει εὐθὺς ἐκτιλθεῖσα τὰ κοῦφα θιγγάνουσα.

Ὅσα δὲ ποικίλα τῶν ζώων κατὰ τὰς τρίχας, τούτοις καὶ ἐν τῷ δέρματι προϋπάρχει ἡ ποικιλία καὶ ἐν τῷ τῆς γλώττης δέρματι.

Περὶ δὲ τὸ γένειον τοῖς μὲν συμβαίνει τὴν ὑπὴν ἢ καὶ τὸ γένειον δασὺ ἔχειν, τοῖς δὲ ταῦτα μὲν λεῖα τὰς σιαγόνας δὲ δασείας· ἥττον δὲ γίνονται φαλακροὶ οἱ μαδιγένειοι.

Αὐξοῦνται δ' αἱ τρίχες ἐν τε νόσοις τισίν, οἶον ἐν ταῖς φθίσεσι μᾶλλον, καὶ ἐν γήρᾳ καὶ τεθνεώτων, καὶ σκληρότεραι γίνονται ἀντὶ μαλακῶν· τὰ δ' αὐτὰ ταῦτα συμβαίνει καὶ περὶ τοὺς ὄνυχας.

Ῥέουσιν δὲ μᾶλλον αἱ τρίχες τοῖς ἀφροδισιαστικοῖς αἱ συγγενεῖς· αἱ δ' ὑστερογενεῖς γίνονται θάπτον. Οἱ δ' ἰξίαν ἔχοντες ἥττον φαλακροῦνται, κἂν ὄντες φαλακροὶ λάβωσιν, ἐνιοὶ δασύνονται.

Οὐκ αὐξάνεται δὲ θρὶς ἀποτμηθεῖσα, ἀλλὰ κάτωθεν ἀναφυομένη γίνεται μείζων. Καὶ αἱ λεπίδες δὲ τοῖς ἰχθύσι σκληρότεραι γίνονται

καὶ παχύτεραι, τοῖς δὲ λεπτυνομένοις καὶ τοῖς γηράσκουσι
σκληρότεραι. Καὶ τῶν τετραπόδων δὲ γινομένων πρεσβυτέρων τῶν
μὲν αἱ τρίχες τῶν δὲ τὰ ἔρια βαθύτερα μὲν γίνεται, ἐλάττω δὲ τῷ
πλήθει· καὶ τῶν μὲν αἱ ὀπλαὶ τῶν δ' αἱ χηλαὶ γίνονται γηρασκόντων
μείζους, καὶ τὰ ῥύγχη τῶν ὀρνίθων. Αὐξάνονται δὲ καὶ αἱ χηλαί,
ὥσπερ καὶ οἱ ὄνυχες.

Κεφάλαιο 12

Περὶ δὲ τὰ πτερωτὰ τῶν (519a.) ζώων, οἷον τοὺς ὄρνιθας, κατὰ μὲν τὰς ἡλικίας οὐδὲν μεταβάλλει, πλὴν γέρανος· αὕτη δ' οὔσα τεφρὰ μελάντερα γηράσκουσα τὰ πτερὰ ἴσχει· διὰ δὲ τὰ πάθη τὰ γινόμενα κατὰ τὰς ὥρας, οἷον ὅταν ψύχη γίνηται μᾶλλον, ἐνίστε γίνεται τῶν μονοχρόων ἐκ μελάνων τε καὶ μελαντέρων λευκά, οἷον κόραξ τε καὶ στρουθὸς καὶ χελιδόνες· ἐκ δὲ τῶν λευκῶν γενῶν οὐκ ὥπται εἰς μέλαν μεταβάλλον. Καὶ κατὰ τὰς ὥρας δ' οἱ πολλοὶ τῶν ὀρνίθων μεταβάλλουσι τὰς χροάς, ὥστε λαθεῖν ἂν τὸν μὴ συνήθη.

Μεταβάλλουσι δὲ τινα τῶν ζώων τὰς χροάς τῶν τριχῶν κατὰ τὰς τῶν ὑδάτων μεταβολάς· ἔνθα μὲν γὰρ λευκὰ γίνονται, ἔνθα δὲ μέλανα ταυτά. Καὶ περὶ τὰς ὀχείας δ' εἰσὶν ὕδατα πολλαχοῦ τοιαῦτα, ἃ πiónτα καὶ ὀχεύσαντα μετὰ τὴν πόσιν τὰ πρόβατα μέλανας γεννῶσι τοὺς ἄρνας, οἷον καὶ ἐν τῇ Χαλκιδικῇ τῇ ἐπὶ τῆς Θράκης ἐν τῇ Ἀσσυρίτιδι ἐποίει ὁ καλούμενος ποταμὸς Ψυχρός. Καὶ ἐν τῇ Ἀντανδρία δὲ δύο ποταμοὶ εἰσιν, ὧν ὁ μὲν λευκὰ ὁ δὲ μέλανα ποιεῖ τὰ πρόβατα.

Δοκεῖ δὲ καὶ ὁ Σκάμανδρος ποταμὸς ξανθὰ τὰ πρόβατα ποιεῖν· διὸ καὶ τὸν Ὅμηρον φασιν ἀντὶ Σκαμάνδρου Ξάνθον προσαγορεύειν αὐτόν.

Τὰ μὲν οὖν ἄλλα ζῶα οὗτ' ἐντὸς ἔχει τρίχας, τῶν τ' ἀκρωτηρίων ἐν τοῖς πρᾶνέσιν ἄλλ' οὐκ ἐν τοῖς ὑπτίοις· ὁ δὲ δασύπους μόνος καὶ ἐντὸς ἔχει τῶν γνάθων τρίχας καὶ ὑπὸ τοῖς ποσίν. Ἔτι δὲ καὶ ὁ μῦς τὸ κῆτος ὀδόντας μὲν ἐν τῷ στόματι οὐκ ἔχει, τρίχας δ' ὁμοίως ὑείαις.

Αἱ μὲν οὖν τρίχες αὐξάνονται ἀποτμηθεῖσαι κάτωθεν, ἄνωθεν δ' οὐ· τὰ δὲ πτερὰ οὗτ' ἄνωθεν οὔτε κάτωθεν, ἀλλ' ἐκπίπτει.

Οὐκ ἀναφύεται δὲ ἐκτιλθὲν οὔτε τῶν μελιττῶν τὸ πτερόν οὔθ' ὅσα ἄλλα ἔχει ἄσχιστον τὸ πτερόν· οὐδὲ τὸ κέντρον, ὅταν ἀποβάλλῃ ἢ μέλιττα, ἀλλὰ θνήσκει.

Κεφάλαιο 13

Εἰσὶ δὲ καὶ ὑμένες ἐν τοῖς ζώοις ἅπασι τοῖς ἐναίμοις.

Ὅμοιος δ' ἐστὶν ὁ ὑμὴν δέρματι πυκνῷ καὶ λεπτῷ, ἔστι δὲ τὸ γένος ἕτερον· οὔτε γάρ ἐστι σχιστὸν οὔτε τατόν. Περὶ ἕκαστον δὲ τῶν ὀστέων καὶ περὶ ἕκαστον τῶν σπλάγχνων ὁ ὑμὴν ἐστὶ καὶ ἐν τοῖς μείζοσι καὶ ἐν τοῖς ἐλάττοσι ζώοις· ἀλλ' (519b.) ἄδηλοι ἐν τοῖς ἐλάττοσι διὰ τὸ πάμπαν εἶναι λεπτοὶ καὶ μικροί.

Μέγιστοι δὲ τῶν ὑμένων εἰσὶν οἳ τε περὶ τὸν ἐγκέφαλον δύο, ὧν ὁ περὶ τὸ ὀστοῦν ἰσχυρότερος καὶ παχύτερος τοῦ περὶ τὸν ἐγκέφαλον, ἔπειθ' ὁ περὶ τὴν καρδίαν ὑμὴν. Διακοπεῖς δ' οὐ συμφύεται ψιλὸς ὑμὴν, ψιλούμενά τε τὰ ὀστᾶ τῶν ὑμένων σφακελίζει.

Κεφάλαιο 14

Ἦστί δὲ καὶ τὸ ἐπίπλοον ὑμῖν. Ἦχει δ' ἐπίπλοον ἅπαντα τὰ ἔναιμα· ἀλλὰ τοῖς μὲν πῖον τοῖς δ' ἀπίμελόν ἐστίν.

Ἦχει δὲ καὶ τὴν ἀρχὴν καὶ τὴν ἐξάρτησιν ἐν τοῖς ζωοτόκοις καὶ ἀμφώδουσιν ἐκ μέσης τῆς κοιλίας, ἣ ἐστὶν οἶον ῥαφή τις αὐτῆς· καὶ τοῖς μὴ ἀμφώδουσι δ' ἐκ τῆς μεγάλης κοιλίας ὡσαύτως.

Κεφάλαιο 15

Ἔστι δὲ καὶ ἡ κύστις ὑμενοειδὴς μὲν, ἄλλο δὲ γένος ὑμένος· ἔχει γὰρ τάσιν· ἔχει δὲ κύστιν οὐ πάντα, ἀλλὰ τὰ μὲν ζωοτόκα πάντα, τῶν δ' ὠτοτόκων ἢ χελώνη μόνον. Διακοπεῖσα δ' οὐδ' ἡ κύστις συμφύεται ἀλλ' ἢ παρ' αὐτὴν τὴν ἀρχὴν τοῦ οὐρητῆρος, εἰ μὴ τι πάμπαν σπάνιον· γέγονε γάρ τι ἤδη τοιοῦτον. Τεθνεώτων μὲν οὖν οὐδὲν διήσιν ὑγρόν, ἐν δὲ τοῖς ζῶσι καὶ ξηρὰς συστάσεις, ἐξ ὧν οἱ λίθοι γίνονται τοῖς κάμνουσιν. Ἐνίοις δ' ἤδη καὶ τοιαῦτα συνέστη ἐν τῇ κύστει ὥστε μὴδὲν δοκεῖν διαφέρειν κογχυλίων.

Περὶ μὲν οὖν φλεβὸς καὶ νεύρου καὶ δέρματος, καὶ περὶ ἰνῶν καὶ ὑμένων, ἔτι δὲ καὶ περὶ τριχῶν καὶ ὀνύχων καὶ χηλῆς καὶ ὀπλῆς καὶ κεράτων καὶ ὀδόντων καὶ ῥύγχους καὶ χόνδρου καὶ ὀστέων καὶ τῶν ἀνάλογον τούτοις τοῦτον ἔχει τὸν τρόπον.

Κεφάλαιο 16

Σὰρξ δὲ καὶ τὸ παραπλησίαν ἔχον τὴν φύσιν τῇ σαρκὶ ἐν τοῖς ἐναίμοις ἐν πᾶσιν ἐστὶ μεταξύ τοῦ δέρματος καὶ τοῦ ὀστοῦ καὶ τῶν ἀνάλογον τοῖς ὀστοῖς· ὥς γὰρ ἡ ἄκανθα ἔχει πρὸς τὸ ὀστοῦν, οὕτω καὶ τὸ σαρκῶδες πρὸς τὰς σάρκας ἔχει τῶν ἐχόντων ὅστ᾽ αὐτὴ καὶ ἄκανθαν.

Ἦστι δὲ διαιρετὴ ἡ σὰρξ πάντη, καὶ οὐχ ὥσπερ τὰ νεῦρα καὶ αἱ φλέβες ἐπὶ μῆκος μόνον. Λεπτυνομένων μὲν οὖν τῶν ζώων ἀφανίζονται, καὶ γίνονται φλέβια καὶ ἴνες· εὐβοσία δὲ πλείονι χρωμένων πιμελὴ ἀντὶ σαρκῶν. Εἰσὶ δὲ τοῖς μὲν ἔχουσι (520a.) τὰς σάρκας πολλὰς αἱ φλέβες ἐλάττους καὶ τὸ αἷμα ἐρυθρότερον καὶ τὰ σπλάγχνα καὶ κοιλία μικρά· τοῖς δὲ τὰς φλέβας ἔχουσι μεγάλας καὶ τὸ αἷμα μελάντερον καὶ σπλάγχνα μεγάλα καὶ κοιλία μεγάλη, αἱ δὲ σάρκες ἐλάττους. Γίνονται δὲ κατὰ σάρκα πίονα τὰ τὰς κοιλίας ἔχοντα μικράς.

Κεφάλαιο 17

Πιμελή δὲ καὶ στέαρ διαφέρουσιν ἀλλήλων.

Τὸ μὲν γὰρ στέαρ ἐστὶ θραυστὸν πάντη καὶ πήγνυται ψυχόμενον, ἡ δὲ πιμελή χυτὸν καὶ ἄπηκτον· καὶ οἱ μὲν ζωμοὶ οἱ τῶν πiónων οὐ πήγνυνται, οἷον ἵππου καὶ ὑός, οἱ δὲ τῶν στέαρ ἐχόντων πήγνυνται, οἷον προβάτου καὶ αἰγός. Διαφέρουσι δὲ καὶ τοῖς τόποις· ἡ μὲν γὰρ πιμελή γίνεται μεταξὺ δέρματος καὶ σαρκός, στέαρ δ' οὐ γίνεται ἀλλ' ἢ ἐπὶ τέλει τῶν σαρκῶν. Γίνεται δὲ καὶ τὸ ἐπίπλοον τοῖς μὲν πιμελωδέσι πιμελωδες, τοῖς δὲ στεατώδεσι στεατώδες. Ἔχει δὲ τὰ μὲν ἀμφώδοντα πιμελήν, τὰ δὲ μὴ ἀμφώδοντα στέαρ.

Τῶν δὲ σπλάγχων τὸ ἥπαρ ἐν ἐνίοις τῶν ζῶων γίνεται πιμελωδες, οἷον τῶν ἰχθύων ἐν τοῖς σελάχεσιν· ποιοῦσι γὰρ ἔλαιον ἀπ' αὐτῶν, ὃ γίνεται τηκομένων· αὐτὰ δὲ τὰ σελάχη ἐστὶν ἀπιμελώτατα καὶ κατὰ σάρκα καὶ κατὰ κοιλίαν κεχωρισμένη πιμελή. Ἔστι δὲ καὶ τὸ τῶν ἰχθύων στέαρ πιμελωδες, καὶ οὐ πήγνυται.

Πάντα δὲ τὰ ζῶα τὰ μὲν κατὰ σάρκα ἐστὶ πiónα τὰ δ' ἀφωρισμένως. Ὅσα δὲ μὴ ἔχει κεχωρισμένην τὴν πiónτητα, ἥτιόν ἐστι πiónα κατὰ κοιλίαν καὶ ἐπίπλοον, οἷον ἔγχελυς· ὀλίγον γὰρ στέαρ ἔχουσι περὶ τὸ ἐπίπλοον. Τὰ δὲ πλεῖστα γίνεται πiónα κατὰ τὴν γαστέρα, καὶ μάλιστα τὰ μὴ ἐν κινήσει ὄντα τῶν ζῶων. Οἱ δ' ἐγκέφαλοι τῶν μὲν πιμελωδῶν λιπαροί, οἷον ὑός, τῶν δὲ στεατωδῶν αὐχμηροί. Τῶν δὲ σπλάγχων περὶ τοὺς νεφροὺς μάλιστα πiónα γίνεται τὰ ζῶα· ἔστι δ' αἰεὶ ὁ δεξιὸς ἀπιμελώτερος, κἂν σφόδρα πiónες ᾧσιν, ἐλλείπει τι αἰεὶ κατὰ τὸ μέσον. Περίνεφρα δὲ γίνεται τὰ στεατώδη μᾶλλον, καὶ μάλιστα τῶν ζῶων πρόβατον· τοῦτο γὰρ ἀποθνήσκει τῶν νεφρῶν πάντη καλυφθέντων. Γίνεται δὲ περίνεφρα δι' (520b.) εὐβοσίαν, οἷον τῆς Σικελίας περὶ Λεοντίνους· διὸ καὶ ἐξελαύνουσιν ὅψε τὰ πρόβατα τῆς ἡμέρας, ὅπως ἐλάττω λάβωσι τὴν τροφήν.

Κεφάλαιο 18

Πάντων δὲ τῶν ζώων κοινόν ἐστι τὸ περὶ τὴν κόρην ἐν τοῖς ὀφθαλμοῖς· ἔχουσι γὰρ τοῦτο τὸ μόριον στεατῶδες πάντα ὅσα ἔχουσι τὸ τοιοῦτον μόριον ἐν τοῖς ὀφθαλμοῖς καὶ μὴ εἰσι σκληρόφθαλμα.

Ἔστι δ' ἀγονώτερα πάντα τὰ πιμελώδη καὶ ἄρρενα καὶ θήλεα. Πιαίνεται δὲ πάντα πρεσβύτερα μᾶλλον ἢ νεώτερα ὄντα, μάλιστα δ' ὅταν καὶ τὸ πλάτος καὶ τὸ μῆκος ἔχη τοῦ μεγέθους καὶ εἰς βάθος ἀνέξεται.

Κεφάλαιο 19

Περὶ δ' αἵματος ὧδε ἔχει· τοῦτο γὰρ πᾶσιν ἀναγκαιότατον καὶ κοινότατον τοῖς ἐναίμοις, καὶ οὐκ ἐπίκτητον, ἀλλ' ὑπάρχει πᾶσι τοῖς μὴ φθειρομένοις. Πᾶν δ' αἷμά ἐστιν ἐν ἀγγείῳ, ἐν ταῖς καλουμέναις φλεψίν, ἐν ἄλλῳ δ' οὐδενὶ πλὴν ἐν τῇ καρδίᾳ μόνον. Οὐκ ἔχει δ' αἰσθησιν τὸ αἷμα ἀπτομένων ἐν οὐδενὶ τῶν ζώων, ὥσπερ οὐδ' ἡ περίττωσις ἢ τῆς κοιλίας· οὐδὲ δὴ ὁ ἐγκέφαλος οὐδ' ὁ μυελὸς οὐκ ἔχει αἰσθησιν ἀπτομένων. Ὅπου δ' ἂν τις διέλῃ τὴν σάρκα, γίνεται αἷμα ἐν ζῶντι, ἂν μὴ διεφθαρμένη ἢ σὰρξ ᾗ. Ἔστι δὲ τὴν φύσιν τὸ αἷμα τὸν τε χυμὸν ἔχον γλυκύν, ἐὰν περ ὑγιὲς ᾗ, καὶ τὸ χρῶμα ἐρυθρόν· τὸ δὲ χεῖρον ἢ φύσει ἢ νόσῳ μελάντερον. Καὶ οὔτε λίαν παχὺ οὔτε λίαν λεπτὸν τὸ βέλτιστον, ἐὰν μὴ χεῖρον ἢ διὰ φύσιν ἢ διὰ νόσον. Καὶ ἐν μὲν τῷ ζῳῳ ὑγρὸν καὶ θερμὸν αἰεὶ, ἐξίον δὲ ἐξω πηγνυται πάντων πλὴν ἐλάφου καὶ προκοῦς καὶ εἴ τι ἄλλο τοιαύτην ἔχει τὴν φύσιν· τὸ δ' ἄλλο αἷμα πηγνυται, ἐὰν μὴ ἐξαιρεθῶσιν αἶνες. Τάχιστα δὲ πηγνυται τὸ τοῦ ταύρου αἷμα πάντων.

Ἔστι δὲ τῶν ἐναίμων ταῦτα πολυαιμότερα ἃ καὶ ἐν αὐτοῖς καὶ ἐξω ζωοτοκεῖ τῶν ἐναίμων μὲν φωτοκούντων δέ. Τὰ δ' εὖ ἔχοντα ἢ φύσει ἢ τῷ ὑγιαίνειν οὔτε πολὺ λίαν ἔχει, ὥσπερ τὰ πεπωκότα πόμα πρόσφατον, οὔτ' ὀλίγον, ὥσπερ τὰ πίονα λίαν· τὰ γὰρ πίονα καθαρὸν μὲν ἔχει ὀλίγον δὲ τὸ αἷμα, καὶ γίνεται πióτερα γινόμενα ἀναιμότερα· ἀναιμον γὰρ τὸ πῖον. Καὶ (521a.) τὸ μὲν πῖον ἄσηπτον, τὸ δ' αἷμα καὶ τὰ ἐναιμα τάχιστα σήπεται, καὶ τούτων τὰ περὶ τὰ ὀστά.

Ἔχει δὲ λεπτότατον μὲν αἷμα καὶ καθαρώτατον ἄνθρωπος, παχύτατον δὲ καὶ μελάντατον τῶν ζωοτόκων ταῦρος καὶ ὄνος, Καὶ ἐν τοῖς κάτω δὲ μορίοις ἢ ἐν τοῖς ἄνω παχύτερον τὸ αἷμα γίνεται καὶ μελάντερον. Σφύζει δὲ τὸ αἷμα ἐν ταῖς φλεψίν ἅπασιν πάντῃ ἅμα τοῖς ζώοις, καὶ ἔστι τῶν ὑγρῶν μόνον καθ' ἅπαν τε τὸ σῶμα τοῖς ζώοις καὶ αἰεὶ, ἕως ἂν ζῇ, τὸ αἷμα μόνον. Πρῶτον δὲ γίνεται τὸ αἷμα ἐν τῇ καρδίᾳ τοῖς ζώοις, καὶ πρὶν ὅλον διηρθῶσθαι τὸ σῶμα. Στερισκομένου δ' αὐτοῦ καὶ ἀφιεμένου ἐξω πλείονος μὲν ἐκθνήσκουσι, πολλοῦ δ' ἄγαν ἀποθνήσκουσιν. Ἐξυγραιομένου δὲ λίαν νοσοῦσιν· γίνεται γὰρ ἰχωροειδές, καὶ διορροῦται οὕτως ὥστε ἤδη τινὲς ἴδισαν αἱματώδη ἰδρῶτα. Καὶ ἐξίον ἐνίοις οὐ πηγνυται παντελῶς ἢ διορισμένως καὶ χωρὶς. Τοῖς δὲ καθεύδουσιν ἐν τοῖς

ἐκτὸς μέρεσιν ἔλαττον γίνεται τὸ αἷμα, ὥστε καὶ κεντουμένων μὴ ῥεῖν ὁμοίως.

Γίνεται δὲ πεττόμενον ἐξ ἰχῶρος μὲν αἷμα, ἐξ αἵματος δὲ πιμελή· νενοσηκός δ' αἵματος αἰμορροῖς ἢ τ' ἐν ταῖς ῥίσι καὶ ἡ περὶ τὴν ἔδραν, καὶ ἰξία. Σηπόμενον δὲ γίνεται τὸ αἷμα ἐν τῷ σώματι πύον, ἐκ δὲ τοῦ πύου πῶρος.

Τὸ δὲ τῶν θηλειῶν πρὸς τὸ τῶν ἀρρένων διαφέρει· παχύτερόν τε γὰρ καὶ μελάντερόν ἐστιν ὁμοίως ἐχόντων πρὸς ὑγίειαν καὶ ἡλικίαν ἐν τοῖς θήλεσιν, καὶ ἐπιπολῆς μὲν ἔλαττον ἐν τοῖς θήλεσιν, ἐντὸς δὲ πολυαιμότερον. Μάλιστα δὲ καὶ τῶν θηλέων ζῶων γυνὴ πολυαιμον, καὶ τὰ καλούμενα καταμήνια γίνεται πλεῖστα τῶν ζῶων ταῖς γυναιξίν. Νενοσηκὸς δὲ τοῦτο τὸ αἷμα καλεῖται ῥοῦς. Τῶν δ' ἀνδρῶν τῶν νοσηματικῶν ἦττον μετέχουσιν αἱ γυναῖκες· ὀλίγαις δὲ γίνεται ἰξία καὶ αἰμορροῖς καὶ ἐκ ῥινῶν ῥύσις· ἐὰν δέ τι συμβαίνει τούτων, τὰ καταμήνια χεῖρω γίνεται.

Διαφέρει δὲ καὶ κατὰ τὰς ἡλικίας πλήθει καὶ εἶδει τὸ αἷμα· ἐν μὲν γὰρ τοῖς πάμπαν νέοις ἰχωροειδὲς ἐστὶ καὶ πλέον, ἐν δὲ τοῖς γέρουσι παχὺ καὶ μέλαν καὶ ὀλίγον, ἐν ἀκμάζουσιν δὲ μέσως· καὶ πηγνυται (521b.) ταχὺ τὸ τῶν γερόντων, κἂν ἐν τῷ σώματι ἢ ἐπιπολῆς· τοῖς δὲ νέοις οὐ γίνεται τοῦτο.

Ἰχώρ δ' ἐστὶν ἄπεπτον αἷμα, ἢ τῷ μήπω πεπέφθαι ἢ τῷ διωρρῶσθαι.

Κεφάλαιο 20

Περὶ δὲ μυελοῦ· καὶ γὰρ τοῦτο ἐν τῶν ὑγρῶν ἐνίοις τῶν ἐναίμων ὑπάρχει ζῶων. Πάντα δ' ὅσα φύσει ὑπάρχει ὑγρὰ ἐν τῷ σώματι, ἐν ἀγγείοις ὑπάρχει, ὥσπερ καὶ αἷμα ἐν φλεβῇ καὶ μυελὸς ἐν ὀστοῖς, τὰ δ' ἐν ὑμενώδεσι, καὶ δέρμασι καὶ κοιλίαις. Γίνεται δ' ἐν μὲν τοῖς νέοις αἱματώδης πάμπαν ὁ μυελός, πρεσβυτέρων δὲ γενομένων ἐν μὲν τοῖς πιμελώδεσι πιμελώδης, ἐν δὲ τοῖς στεατώδεσι στεατώδης. Οὐ πάντα δ' ἔχει τὰ ὀστέα μυελόν, ἀλλὰ τὰ κοῖλα, καὶ τούτων ἐνίοις οὐκ ἔνεστιν· τὰ γὰρ τοῦ λέοντος ὀστέα τὰ μὲν οὐκ ἔχει πάμπαν, τὰ δ' ἔχει μικρόν, διόπερ ἐνιοὶ οὗ φασιν ὅλως ἔχειν μυελὸν τοὺς λέοντας, ὥσπερ εἴρηται καὶ πρότερον. Καὶ ἐν τοῖς ὑέίοις δ' ὀστοῖς ἐλάττων ἐστίν, ἐνίοις δ' αὐτῶν πάμπαν οὐκ ἔνεστιν.

Ταῦτα μὲν οὖν τὰ ὑγρὰ σχεδὸν ἀεὶ σύμφυτα τοῖς ζώοις ἐστίν, ὑστερογενῇ δὲ γάλα τε καὶ γονή. Τούτων δὲ τὸ μὲν ἀποκεκριμένον ἅπασιν, ὅταν ἐνῇ, ἐστὶ τὸ γάλα· ἡ δὲ γονή οὐ πᾶσιν ἀλλ' ἐνίοις οἱ καλούμενοι θοροὶ οἷον τοῖς ἰχθύσιν.

Ἔχει δέ, ὅσα ἔχει τὸ γάλα, ἐν τοῖς μαστοῖς. Μαστοὺς δ' ἔχει ὅσα ζωοτοκεῖ καὶ ἐν αὐτοῖς καὶ ἔξω, οἷον ὅσα τε τρίχας ἔχει, ὥσπερ ἄνθρωπος καὶ ἵππος, καὶ τὰ κήτη, οἷον δελφίς καὶ φώκαινα καὶ φάλαινα· καὶ γὰρ ταῦτα μαστοὺς ἔχει καὶ γάλα. Ὅσα δ' ἔξω ζωοτοκεῖ μόνον ἢ ὠοτοκεῖ, οὐκ ἔχει οὔτε μαστοὺς οὔτε γάλα, οἷον ἰχθὺς καὶ ὄρνις.

Πᾶν δὲ γάλα ἔχει ἰχώρα ὑδατώδη, ὃ καλεῖται ὀρρός, καὶ σωματῶδες, ὃ καλεῖται τυρός· ἔχει δὲ πλείω τυρὸν τὸ παχύτερον τῶν γαλάκτων. Τὸ μὲν οὖν τῶν μὴ ἀμφωδόντων γάλα πηγνυται (διὸ καὶ τυρεύεται τῶν ἡμέρων), τῶν δ' ἀμφωδόντων οὐ πηγνυται, ὥσπερ οὐδ' ἡ πιμελή, καὶ ἔστι λεπτόν καὶ γλυκύ. Ἔστι δὲ λεπτότατον μὲν γάλα καμήλου, δεύτερον δ' ἵππου, τρίτον δ' ὄνου· παχύτατον δὲ τὸ βόειον. Ὑπὸ μὲν οὖν τοῦ ψυχροῦ οὐ πηγνυται τὸ γάλα, ἀλλὰ διορροῦται (522a.) μᾶλλον· ὑπὸ δὲ τοῦ πυρὸς πηγνυται καὶ παχύνεται.

Οὐ γίνεται δὲ γάλα, πρὶν ἢ ἐγκυον γένηται, οὐδενὶ τῶν ζώων ὡς ἐπὶ τὸ πολὺ. Ὅταν δ' ἐγκυον ᾗ, γίνεται μὲν, ἀχρηστον δὲ τὸ πρῶτον καὶ ὕστερον. Μὴ ἐγκύοις δ' οὔσαις ὀλίγον μὲν ἀπ' ἐδεσμάτων τινῶν, οὐ μὴν ἀλλὰ καὶ βδαλλομέναις ἤδη πρεσβυτέραις προῆλθε, καὶ

τοσοῦτον ἤδη τισὶν ὥστ' ἐκτιθεῖσθαι παιδίον.

Καὶ οἱ περὶ τὴν Οἴτην δέ, ὅσαι ἂν μὴ ὑπομένωσι τὴν ὀχείαν τῶν αἰγῶν, λαμβάνοντες κνίδην τρίβουσι τὰ οὔθατα βία διὰ τὸ ἀλγεινὸν εἶναι· τὸ μὲν οὖν πρῶτον αἱματῶδες ἀμέλγονται, εἴθ' ὑπόπυον, τὸ δὲ τελευταῖον γάλα ἤδη οὐδὲν ἔλαττον τῶν ὀχευομένων.

Τῶν δ' ἄρρῶνων ἓν τε τοῖς ἄλλοις ζώοις καὶ ἐν ἀνθρώπῳ ἐν οὐδενὶ μὲν ὥς ἐπὶ τὸ πολὺ γίνεται γάλα, ὅμως δὲ γίνεται ἓν τισιν, ἐπεὶ καὶ ἐν Λήμνῳ αἷξ ἐκ τῶν μαστῶν, οὓς ἔχει δύο ὁ ἄρρην παρὰ τὸ αἰδοῖον, γάλα ἡμέλγετο τοσοῦτον ὥστε γίνεσθαι τροφαλίδα, καὶ πάλιν ὀχεύσαντος τῷ ἐκ τούτου γενομένῳ συνέβαινε ταυτόν. Ἀλλὰ τὰ μὲν τοιαῦτα ὥς σημεῖα ὑπολαμβάνουσιν, ἐπεὶ καὶ τῷ ἐν Λήμνῳ ἀνέιλεν ὁ θεὸς μαντευομένῳ ἐπὶ κτησὶν ἔσεσθαι κτημάτων. Ἐν δὲ τοῖς ἀνδράσι μεθ' ἥβην ἐνίοις ἐκθλίβεται ὀλίγον· βδαλλομένοις δὲ καὶ πολὺ ἤδη τισὶ προῆλθεν.

Ἐπάρχει δ' ἐν τῷ γάλακτι λιπαρότης, ἥ καὶ ἐν τοῖς πεπηγόσι γίνεται ἐλαιώδης. Εἰς δὲ τὸ προβάτειον ἐν Σικελίᾳ, καὶ ὅπου πλείον, αἷγιον μιγνύουσιν. Πήγνυται δὲ μάλιστα οὐ μόνον τὸ τυρὸν ἔχον πλεῖστον, ἀλλὰ καὶ τὸ αὐχμηρότερον ἔχον.

Τὰ μὲν οὖν πλεόν ἔχει γάλα ἢ ὅσον εἰς τὴν ἐκτροφὴν τῶν τέκνων, καὶ χρήσιμον εἰς τύρευσιν καὶ ἀπόθεσιν, μάλιστα μὲν τὸ προβάτειον καὶ τὸ αἷγιον, ἔπειτα τὸ βόειον· τὸ δ' ἵππειον καὶ ὄνειον μίγνυται εἰς τὸν Φρύγιον τυρόν. Ἔστι δὲ τυρὸς πλείων ἐν τῷ βοεῖῳ ἢ ἐν τῷ αἰγείῳ· γίνεσθαι γὰρ φασιν οἱ νομεῖς ἐκ μὲν ἀμφορέως αἰγείου γάλακτος τροφαλίδας ὀβολιαίας μιᾶς δεούσης εἴκοσιν, ἐκ δὲ βοείου τριάκοντα.

Τὰ δ' ὅσον τοῖς τέκνοις ἱκανόν, πλῆθος δ' οὐδὲν οὔτε χρήσιμον εἰς τύρευσιν, οἷον πάντα τὰ πλείους ἔχοντα (522b.) μαστοὺς δυοῖν· οὐδενὸς γὰρ τούτων οὔτε πλῆθός ἐστι γάλακτος οὔτε τυρεύεται τὸ γάλα.

Πήγνυσσι δὲ τὸ γάλα ὁπὸς τε συκῆς καὶ πυετίας. Ὁ μὲν οὖν ὁπὸς εἰς ἔριον ἐξοπισθεῖς, ὅταν ἐκπλυθῇ πάλιν τὸ ἔριον εἰς γάλα ὀλίγον· τοῦτο γὰρ κεραννύμενον πήγνυσιν. Ἡ δὲ πυετία γάλα ἐστίν· τῶν γὰρ ἔτι θηλαζόντων γίνεται ἐν τῇ κοιλίᾳ.

Κεφάλαιο 21

Ἔστιν οὖν ἡ πυετία γάλα ἔχον ἐν ἑαυτῷ πῦρ ὃ ἐκ τῆς τοῦ ζώου θερμότητος πεττομένου τοῦ γάλακτος γίνεται. Ἔχει δὲ πυετίαν τὰ μὲν μηρυκάζοντα πάντα, τῶν δ' ἀμφωδόντων δασύπους. Βελτίων δ' ἐστὶν ἡ πυετία ὅσῳ ἂν ᾗ παλαιότερα· συμφέρει γὰρ πρὸς τὰς διαρροίας ἡ τοιαύτη μάλιστα καὶ ἡ τοῦ δασύποδος· ἀρίστη δὲ πυετία νεβροῦ.

Διαφέρει δὲ τῷ πλέον ἱμᾶσθαι γάλα ἢ ἔλαττον τῶν ἐχόντων γάλα ζώων κατὰ τε τὰ μεγέθη τῶν σωμάτων καὶ τὰς τῶν ἐδεσμάτων διαφοράς, οἷον ἐν Φάσει μὲν ἐστὶ βοῖδια μικρὰ ὧν ἕκαστον βδάλλεται γάλα πολὺ, αἱ δ' Ἑπειρωτικαὶ βόες αἱ μεγάλαι βδάλλονται ἐκάστη ἀμφορέα καὶ τούτου τὸ ἥμισυ κατὰ τοὺς δύο μαστούς· ὁ δὲ βδάλλων ὀρθὸς ἔστηκεν, μικρὸν ἐπικύπτων, διὰ τὸ μὴ δύνασθαι ἂν ἐφικνεῖσθαι καθήμενος. Γίνεται δ' ἔξω ὄνου καὶ τᾶλλα μεγάλα ἐν τῇ Ἑπείρῳ τετράποδα, μέγιστοι δ' οἱ βόες καὶ οἱ κύνες. Νομῆς δὲ δέονται τὰ μεγάλα πλείονος· ἀλλ' ἔχει πολλήν ἡ χώρα τοιαύτην εὐβοσίαν, καὶ καθ' ἐκάστην ὥραν ἐπιτηδεῖους τόπους. Μέγιστοι δ' οἱ τε βόες εἰσὶ καὶ τὰ πρόβατα τὰ καλούμενα Πυρρικά, τὴν ἐπωνυμίαν ἔχοντα ταύτην ἀπὸ Πύρρου τοῦ βασιλέως.

Τῆς δὲ τροφῆς ἡ μὲν σβέννυσι τὸ γάλα, οἷον ἡ Μηδικὴ πόα, καὶ μάλιστα τοῖς μηρυκάζουσιν· ποιεῖ δὲ πολὺ ἕτερα, οἷον κύτισος καὶ ὄροβοι, πλὴν κύτισος μὲν ὁ ἀνθὼν οὐ συμφέρει (πίμπρησι γάρ), οἱ δ' ὄροβοι ταῖς κυούσαις οὐ συμφέρουσι (τίκτουσι γὰρ χαλεπώτερον). Ὅλως δὲ τὰ φαγεῖν δυνάμενα τῶν τετραπόδων, ὥσπερ καὶ πρὸς τὴν κύησιν συμφέρει, καὶ βδάλλεται πολὺ τροφήν ἔχοντα. Ποιεῖ δὲ γάλα καὶ τῶν φουσῶδων ἓνια προσφερόμενα, οἷον καὶ κυάμων πλῆθος οἷ καὶ αἰγὶ καὶ βοῖ (523a.) καὶ χιμαίρα· ποιεῖ γὰρ καθιέναι τὸ οὖθαρ. Σημεῖον δὲ τοῦ γάλα πλεῖον ἱμῆσεσθαι, ὅταν πρὸ τοῦ τόκου τὸ οὖθαρ βλέπη κάτω. Γίνεται δὲ πολὺν χρόνον γάλα πᾶσι τοῖς ἔχουσιν, ἂν ἀνόχευτα διατελῇ καὶ τὰ ἐπιτήδεια ἔχωσι, μάλιστα δὲ τῶν τετραπόδων πρόβατον· ἀμέλγεται γὰρ μῆνας ὀκτώ.

Ὅλως δὲ τὰ μηρυκάζοντα γάλα πολὺ καὶ χρήσιμον εἰς τυρείαν ἀμέλγεται. Περὶ δὲ Τορώνην αἱ βόες ὀλίγας ἡμέρας πρὸ τοῦ τόκου διαλείπουσι, τὸν δ' ἄλλον χρόνον πάντα ἔχουσι γάλα. Τῶν δὲ γυναικῶν τὸ πελιώτερον γάλα βέλτιον τοῦ λευκοῦ τοῖς

τιτθευομένοις· καὶ αἱ μέλαιναι τῶν λευκῶν ὑγιεινότερον ἔχουσιν.
Τροφιμώτατον μὲν οὖν τὸ πλεῖστον ἔχον τυρόν, ὑγιεινότερον δὲ τοῖς
παιδίοις τὸ ἔλαττον.

Κεφάλαιο 22

Σπέρμα δὲ προΐενται πάντα τὰ ἔχοντα αἷμα. Τί δὲ συμβάλλεται εἰς τὴν γένεσιν καὶ πῶς, ἐν ἄλλοις λεχθήσεται.

Πλεῖστον δὲ κατὰ τὸ σῶμα ἄνθρωπος προΐεται. Ἔστι δὲ τῶν μὲν ἐχόντων τρίχας γλίσχρον, τῶν δ' ἄλλων ζώων οὐκ ἔχει γλίσχρότητα. Λευκὸν δὲ πάντων· ἀλλ' Ἡρόδοτος διέψευσται γράψας τοὺς Αἰθίοπας προΐεσθαι μέλαιναν τὴν γονὴν. Τὸ δὲ σπέρμα ἐξέρχεται μὲν λευκὸν καὶ παχύ, ἂν ἥ ὑγιαῖνον, θύραζε δ' ἐλθὼν λεπτὸν γίνεται καὶ μέλαν. Ἐν δὲ τοῖς πάγοις οὐ πῆγνυται, ἀλλὰ γίνεται πάμπαν λεπτὸν καὶ ὕδατῶδες καὶ τὸ χρῶμα καὶ τὸ πάχος· ὑπὸ δὲ τοῦ θερμοῦ πῆγνυται καὶ παχύνεται. Καὶ ὅταν ἐξίη χρονίσαν ἐν τῇ ὑστέρα, παχύτερον ἐξέρχεται, ἐνίοτε δὲ ξηρὸν καὶ συνεστραμμένον. Καὶ τὸ μὲν γόνιμον ἐν τῷ ὕδατι χωρεῖ κάτω, τὸ δ' ἄγονον διαχεῖται. Ψευδὲς δ' ἐστὶ καὶ ὁ Κτησίας γέγραφε περὶ τῆς γονῆς τῶν ἐλεφάντων.

Βιβλίο 4

Κεφάλαιο 1

Περὶ μὲν οὖν τῶν ἐναίμων ζώων, ὅσα τε κοινὰ ἔχουσι μέρη καὶ ὅσα ἴδια ἕκαστον γένος, καὶ τῶν ἀνομοιομερῶν καὶ τῶν ὁμοιομερῶν, καὶ ὅσα ἐκτὸς καὶ ὅσα ἐντὸς, εἴρηται (523b.) πρότερον· περὶ δὲ τῶν ἀναίμων νῦν λεκτέον.

Ἔστι δὲ γένη ταῦτα πλείω, ἔν μὲν τὸ τῶν καλουμένων μαλακίων· ταῦτα δ' ἐστὶν ὅσα ἄναιμα ὄντα ἐκτὸς ἔχει τὸ σαρκῶδες, ἐντὸς δ' εἴ τι ἔχει στερεόν, καθάπερ καὶ τὰ ἔναιμα τῶν ζώων, οἷον τὸ τῶν σηπιδίων γένος. Ἐν δὲ τὸ τῶν μαλακοστράκων· ταῦτα δ' ἐστὶν ὅσων ἐκτὸς τὸ στερεόν, ἐντὸς δὲ τὸ μαλακὸν καὶ σαρκῶδες· τὸ δὲ σκληρὸν αὐτῶν ἐστὶν οὐ θραυστὸν ἀλλὰ θλαστὸν, οἷον ἐστὶ τό τε τῶν καράβων γένος καὶ τὸ τῶν καρκίνων. Ἔτι δὲ τὰ ὀστρακόδερμα· τοιαῦτα δ' ἐστὶν ὧν ἐντὸς μὲν τὸ σαρκῶδες, ἐκτὸς δὲ τὸ στερεόν, θραυστὸν ὃν καὶ κατακτόν, ἀλλ' οὐ θλαστὸν· τοιοῦτον δὲ τὸ τῶν κοχλιδίων γένος καὶ τὸ τῶν ὀστρέων ἐστίν. Τέταρτον δὲ τὸ τῶν ἐντόμων, ὃ πολλὰ καὶ ἀνόμοια περιείληφεν εἶδη ζώων. Ἔστι δ' ἔντομα ὅσα κατὰ τοῦνομά ἐστιν ἐντομὰς ἔχοντα ἢ ἐν τοῖς ὑπτίοις ἢ ἐν τοῖς πρηνέσιν ἢ ἐν ἀμφοῖν, καὶ οὔτε ὀστῶδες ἔχει ἔν κεχωρισμένον οὔτε σαρκῶδες, ἀλλὰ μέσον ἀμφοῖν· τὸ σῶμα γὰρ ὁμοίως καὶ ἔσω καὶ ἔξω σκληρόν ἐστὶν αὐτῶν. Ἔστι δ' ἔντομα καὶ ἅπτερα, οἷον ἰουλος καὶ σκολόπενδρα, καὶ περωτά, οἷον μέλιττα καὶ μηλολόνη καὶ σφήξ· καὶ ταῦτ' ὃ γένος αὐτῶν ἐστὶ καὶ περωτὸν καὶ ἅπτερον, οἷον μύρμηκες εἰσι καὶ περωτοὶ καὶ ἅπτεροι, καὶ αἱ καλούμεναι πυγολαμπίδες.

Τῶν μὲν οὖν μαλακίων καλουμένων τὰ μὲν ἔξω μόρια τὰδ' ἐστίν, ἔν μὲν οἱ ὀνομαζόμενοι πόδες, δεῦτερον δὲ τούτων ἐχομένη ἡ κεφαλή, τρίτον δὲ τὸ κύτος, ὃ περιέχει τὰντός, καὶ καλοῦσιν αὐτὸ κεφαλὴν τινες, οὐκ ὀρθῶς καλοῦντες· ἔτι δὲ περύγῃα κύκλῳ περὶ τὸ κύτος.

Συμβαίνει δ' ἐν πᾶσι τοῖς μαλακίοις μεταξὺ τῶν ποδῶν καὶ τῆς γαστρὸς εἶναι τὴν κεφαλὴν. Πόδας μὲν οὖν ὀκτὼ πάντ' ἔχει, καὶ τούτους δικοτύλους πάντα, πλὴν ἐνὸς γένους πολυπόδων. Ἰδίᾳ δ' ἔχουσιν αἱ τε σηπιδίαι καὶ αἱ τευθίδες καὶ οἱ τευθοὶ δύο προβοσκίδας μακράς, ἐπ' ἁκρῶν τραχύτητα ἐχούσας δικότυλον, αἷς προσάγονται τε καὶ λαμβάνουσιν εἰς τὸ στόμα τὴν τροφήν, καὶ ὅταν χειμῶν ᾦ,

βαλλόμεναι πρὸς τινὰ πέτραι ὥσπερ ἀγκύρας ἀποσαλεύουσιν.

(524a.) Τοῖς δ' ὥσπερ πτερυγίοις, οἷς ἔχουσι περὶ τὸ κύτος, νέουσιν. Ἐπὶ δὲ τῶν ποδῶν αἱ κοτυληδόνες ἅπασιν εἰσίν.

Ὁ μὲν οὖν πολύπους καὶ ὡς ποσὶ καὶ ὡς χερσὶ χρῆται ταῖς πλεκτάναις. Προσάγεται δὲ ταῖς δυσὶ ταῖς ὑπὲρ τοῦ στόματος· τῇ δ' ἐσχάτῃ τῶν πλεκτανῶν, ἣ ἐστὶν ὀξυτάτῃ τε καὶ μόνῃ παράλευκος αὐτῶν καὶ ἐξ ἄκρου δικρόα (ἔστι δ' αὕτη ἐπὶ τῇ ῥάχει· καλεῖται δὲ ῥάχιν τὸ λεῖον, οὗ πρόσω αἱ κοτυληδόνες εἰσίν), ταύτῃ δὴ τῇ πλεκτάνῃ χρῆται ἐν ταῖς ὀχεύαις. Πρὸ τοῦ κύτους δ' ὑπὲρ τῶν πλεκτανῶν ἔχουσι κοῖλον αὐλόν, ᾧ τὴν θάλατταν ἀφῖασι δεξάμενοι τῷ κύτει, ὅταν τι τῷ στόματι λαμβάνωσιν. Μεταβάλλει δὲ τοῦτον ὅτε μὲν εἰς τὰ δεξιὰ ὅτε δ' εἰς τὰ ἀριστερά· ἀφίησι δὲ καὶ τὸν θολὸν ταύτῃ.

Νεῖ δὲ πλάγιος, ἐπὶ τὴν καλουμένην κεφαλὴν, ἐκτείνων τοὺς πόδας· οὕτω δὲ νέοντι συμβαίνει προορᾶν μὲν εἰς τὸ πρόσθεν (ἐπάνω γὰρ εἰσιν οἱ ὀφθαλμοί), τὸ δὲ στόμα ἔχει ὀπισθεν. Τὴν δὲ κεφαλὴν, ἕως ἂν ζῇ, σκληρὰν ἔχει καθάπερ ἐμπεφυσημένην. Ἄπτεται δὲ καὶ κατέχει ταῖς πλεκτάναις ὑπταῖς, καὶ ὁ μεταξὺ τῶν ποδῶν ὑμὴν διατέταται πᾶς· ἐὰν δ' εἰς τὴν ἄμμον ἐμπέσῃ, οὐκέτι δύναται κατέχειν.

Ἔχουσι δὲ διαφορὰν οἱ τε πολυπόδες καὶ τὰ εἰρημένα τῶν μαλακίων· τῶν μὲν γὰρ πολυπόδων τὸ μὲν κύτος μικρόν, οἱ δὲ πόδες μακροὶ εἰσι, τῶν δὲ τὸ μὲν κύτος μέγα, οἱ δὲ πόδες βραχεῖς, ὥστε μὴ πορεύεσθαι ἐπ' αὐτοῖς. Αὐτῶν δὲ πρὸς αὐτά, τὸ μὲν μακρότερόν ἐστιν ἢ τευθίς, ἢ δὲ σηπία πλατύτερον. Τῶν δὲ τευθίδων οἱ τεῦθοι καλούμενοι ἐπὶ πολὺ μείζους· γίνονται γὰρ καὶ πέντε πήχεων τὸ μέγεθος. Γίνονται δὲ καὶ σηπία ἔναι διπήχεις, καὶ πολυπόδων πλεκτάναι τηλικαῦται καὶ μείζους ἔτι τὸ μέγεθος. Ἔστι δὲ τὸ γένος ὀλίγον τῶν τεύθων. Διαφέρει δὲ τὸ σχῆμα τῶν τευθίδων ὁ τεῦθος· πλατύτερον γὰρ ἐστὶ τὸ ὀξὺ τῶν τεύθων, ἔτι δὲ τὸ κύκλῳ πτερύγιον περὶ ἅπαν ἐστὶ τὸ κύτος· τῇ δὲ τευθίδι ἐλλείπει. Ἔστι δὲ πελάγιον, ὥσπερ καὶ ἡ τευθίς.

Μετὰ δὲ τοὺς πόδας ἡ κεφαλὴ ἐστὶν (524b.) ἀπάντων ἐν μέσῳ τῶν ποδῶν τῶν καλουμένων πλεκτανῶν. Ταύτης δὲ τὸ μὲν ἐστὶ στόμα, ἐν ᾧ ἔνεισι δύο ὀδόντες· ὑπὲρ δὲ τούτων ὀφθαλμοὶ μεγάλοι δύο, ὧν τὸ μεταξὺ μικρὸς χόνδρος ἔχων ἐγκέφαλον μικρόν. Ἐν δὲ τῷ στόματι ἐστὶ μικρὸν σαρκῶδες· γλῶτταν δ' οὐκ ἔχει αὐτῶν οὐδέν,

ἀλλὰ τούτῳ χρῆται ἀντὶ γλώττης.

Μετὰ δὲ τοῦτο ἔξωθεν μὲν ἔστιν ἰδεῖν τὸ φαινόμενον κύτος. Ἔστι δ' αὐτοῦ ἡ σὰρξ σχιστή, οὐκ εἰς εὐθὺ μέντοι ἀλλὰ κύκλῳ· δέρμα δ' ἔχουσι πάντα τὰ μαλάκια περὶ ταύτην.

Μετὰ δὲ τὸ στόμα ἔχουσιν οἰσοφάγον μακρὸν καὶ στενόν, ἐχόμενον δὲ τούτου πρόλοβον μέγαν καὶ περιφερῆ ὀρνιθώδη. Τούτου δ' ἔχεται ἡ κοιλία οἶον ἥνυστρον· τὸ δὲ σχῆμα ὅμοιον τῇ ἐν τοῖς κήρυξιν ἐλίκη. Ἀπὸ δὲ ταύτης ἄνω πάλιν φέρει πρὸς τὸ στόμα ἔντερον λεπτόν· παχύτερον δ' ἐστὶ τοῦ στομάχου τὸ ἔντερον.

Σπλάγχχον δ' οὐδὲν ἔχει τῶν μαλακίων, ἀλλ' ἦν καλοῦσι μύτιν, καὶ ἐπὶ ταύτῃ θολόν. Τοῦτον δὲ πλεῖστον αὐτῶν καὶ μέγιστον ἡ σηπία ἔχει· ἀφήσι μὲν οὖν ἅπαντα, ὅταν φοβηθῇ, μάλιστα δ' ἡ σηπία. Ἡ μὲν οὖν μύτις κεῖται ὑπὸ τὸ στόμα, καὶ διὰ ταύτης τείνει ὁ στόμαχος· ἡ δὲ τὸ ἔντερον ἀνατείνει, κάτωθεν ὁ θολός, καὶ τῷ αὐτῷ ὑμένι περιεχόμενον ἔχει τὸν πόρον τῷ ἐντέρῳ, καὶ ἀφήσι κατὰ ταῦτόν τόν τε θολόν καὶ τὸ περίττωμα· ἔχουσι δὲ καὶ τριχώδη ἄττα ἐν τῷ σώματι.

Τῇ μὲν οὖν σηπία καὶ τῇ τευθίδι καὶ τῷ τεύθῳ ἐντός ἐστι τὰ στερεὰ ἐν τῷ πρανεῖ τοῦ σώματος, ἃ καλοῦσι τὸ μὲν σήπιον, τὸ δὲ ξίφος. Διαφέρει δέ· τὸ μὲν γὰρ σήπιον ἰσχυρόν καὶ πλατὺ ἐστὶ, μεταξὺ ἀκάνθης καὶ ὀστοῦ, ἔχον ἐν αὐτῷ ψαθυρότητα σομφήν, τὸ δὲ τῶν τευθίδων λεπτὸν καὶ χονδρωδέστερον. Τῷ δὲ σχήματι διαφέρουσιν ἀλλήλων ὥσπερ καὶ τὰ κύτη. Οἱ δὲ πολύποδες οὐκ ἔχουσιν εἴσω στερεὸν τοιοῦτον οὐδὲν, ἀλλὰ περὶ τὴν κεφαλὴν χονδρῶδες, ὃ γίνεται, ἐάν τις αὐτῶν παλαιωθῇ, σκληρόν.

Τὰ δὲ θήλεα τῶν ἄρρένων διαφέρουσιν· οἱ μὲν γὰρ ἄρρενες ἔχουσι πόρον ὑπὸ τὸν στόμαχον, ἀπὸ τοῦ ἐγκεφάλου τείνοντα πρὸς τὸ κάτω τοῦ κύτους· ἔστι δὲ πρὸς ὃ τείνει, ὅμοιον μαστῶ· (525a.) ἐν δὲ ταῖς θηλείαις δύο τε ταῦτ' ἐστὶ καὶ ἄνω. Ἀμφοτέροις δ' ὑπὸ ταῦτα ἐρυθρὰ ἄττα σωμάτια πρόσσεστιν.

Τὸ δ' ὅν ὁ μὲν πολύπους ἐν καὶ ἀνώμαλον ἔξωθεν καὶ μέγα ἴσχει· ἔσω δὲ τὸ ὑγρόν, ὁμόχρουν ἅπαν καὶ λεῖον, χρῶμα δὲ λευκόν· τὸ δὲ πλῆθος τοῦ ὧστος τοσοῦτον ὥστε πληροῦν ἀγγεῖον μεῖζον τῆς τοῦ πολύποδος κεφαλῆς. Ἡ δὲ σηπία δύο τε τὰ κύτη καὶ πολλὰ ὧὰ ἐν τούτοις, χαλάζαις ὅμοια λευκαῖς. Ἐκαστα δὲ τούτων ὡς κεῖται τῶν μορίων, θεωρεῖσθω ἐκ τῆς ἐν ταῖς ἀνατομαῖς διαγραφῆς.

Πάντα δὲ τὰ ἄρρενα ταῦτα τῶν θηλειῶν διαφέρει, καὶ μάλιστα ἡ

σηπία· τά τε γὰρ πρᾶνῃ τοῦ κύτους, ὄντα μελάντερα τῶν ὑπτίων, τραχύτερά τ' ἔχει ὁ ἄρρην τῆς θηλείας, καὶ διαποίκιλα ῥάβδοις, καὶ τὸ ὀρροπύγιον ὀξύτερον.

Ἔστι δὲ γένη πλείω πολυπόδων, ἔν μὲν τὸ μάλιστ' ἐπιπολάζον καὶ μέγιστον αὐτῶν (εἰσὶ δὲ πολὺ μείζους οἱ πρόσγειοι τῶν πελαγίων), ἔτι δ' ἄλλοι μικροί, ποικίλοι, οἳ οὐκ ἐσθίονται. Ἄλλα τε δύο, ἥ τε καλουμένη ἐλεδώνη, μήκει τε διαφέρουσα τῷ τῶν ποδῶν καὶ τῷ μονοκότυλον εἶναι μόνην τῶν μαλακίων (τὰ γὰρ ἄλλα πάντα δικότυλά ἐστι), καὶ ἦν καλοῦσιν οἱ μὲν βολίταιναν οἱ δ' ὄζολιν. Ἔτι δ' ἄλλοι δύο ἐν ὀστρείοις, ὃ τε καλούμενος ὑπὸ τινων ναυτίλος καὶ ποντίλος, ὑπ' ἐνίων δ' ὦδον πολypoδος· τὸ δ' ὀστρακον αὐτοῦ ἐστιν οἶον κτεῖς κοῖλος καὶ οὐ συμφυής. Οὗτος νέμεται πολλάκις παρὰ τὴν γῆν, εἴθ' ὑπὸ τῶν κυμάτων ἐκκλύζεται εἰς τὸ ξηρόν, καὶ περιπεσόντος τοῦ ὀστρέου ἀλίσκεται καὶ ἐν τῇ γῇ ἀποθνήσκει. Εἰσὶ δ' οὗτοι μικροί, τὸ εἶδος ὅμοιοι ταῖς βολιταίναις. Καὶ ἄλλος ἐν ὀστράκῳ οἶον κοχλίας, ὃς οὐκ ἐξέρχεται ἐκ τοῦ ὀστράκου, ἀλλ' ἔνεστιν ὥσπερ ὁ κοχλίας, καὶ ἔξω ἐνίοτε τὰς πλεκτάνας προτείνει. Περὶ μὲν οὖν τῶν μαλακίων εἴρηται.

Κεφάλαιο 2

Τῶν δὲ μαλακοστράκων ἓν μὲν ἐστὶ γένος τὸ τῶν καράβων, καὶ τούτῳ παραπλήσιον ἕτερον τὸ τῶν καλουμένων ἀστακῶν· οὗτοι δὲ διαφέρουσι τῶν καράβων τῷ ἔχειν χηλὰς καὶ ἄλλας τινὰς διαφορὰς οὐ πολλάς. Ἐν δὲ τὸ τῶν καρίδων, καὶ ἄλλο τὸ τῶν καρκίνων. Γένη δὲ πλείω τῶν (525b.) καρίδων ἐστὶ καὶ τῶν καρκίνων, τῶν μὲν καρίδων αἱ τε κυφαὶ καὶ αἱ κράγγονες καὶ τὸ μικρὸν γένος (αὗται γὰρ οὐ γίνονται μείζους), τῶν δὲ καρκίνων παντοδαπώτερον τὸ γένος καὶ οὐκ εὐαρίθμητον. Μέγιστον μὲν οὖν ἐστὶν ἃς καλοῦσι μαίας, δεύτερον δ' οἱ τε πάγουροι καὶ οἱ Ἑρακλεωτικοὶ καρκίνοι, ἔτι δ' οἱ ποτάμιοι· οἱ δ' ἄλλοι ἐλάττους καὶ ἀνωθυμώτεροι.

Περὶ δὲ τὴν Φοινίκην γίνονται ἐν τῷ αἰγιαλῷ οὓς καλοῦσιν ἵππους διὰ τὸ οὕτω ταχέως θεῖν ὥστε μὴ ῥάδιον εἶναι καταλαβεῖν· ἀνοιχθέντες δὲ κενοὶ διὰ τὸ μὴ ἔχειν νομήν. Ἔστι δὲ καὶ ἕτερον γένος μικρὸν μὲν ὥσπερ οἱ καρκίνοι, τὸ δ' εἶδος ὅμοιον τοῖς ἀστακοῖς.

Πάντα μὲν οὖν ταῦτα, καθάπερ εἴρηται πρότερον, τὸ μὲν στερεὸν καὶ ὀστρακῶδες ἐκτὸς ἔχει ἐν τῇ χώρᾳ τῇ τοῦ δέρματος, τὸ δὲ σαρκῶδες ἐντός, τὰ δ' ἐν τοῖς ὑπτίοις πλακωδέστερα, εἰς ἃ καὶ ἐκτίκτουσιν αἱ θήλειαι.

Πόδας δ' οἱ μὲν κάραβοι ἑφ' ἐκάτερα ἔχουσι πέντε σὺν ταῖς ἐσχάταις χηλαῖς· ὁμοίως δὲ καὶ οἱ καρκίνοι δέκα τοὺς πάντας σὺν ταῖς χηλαῖς. Τῶν δὲ καρίδων αἱ μὲν κυφαὶ πέντε μὲν ἑφ' ἐκάτερα ἔχουσιν, ὅξεῖς τοὺς πρὸς τῇ κεφαλῇ, ἄλλους δὲ πέντε ἑφ' ἐκάτερα κατὰ τὴν γαστέρα, τὰ ἄκρα ἔχοντας πλατέα· πλάκας δ' ἐν ὑπτίοις οὐκ ἔχουσι, τὰ δ' ἐν τοῖς πρανεσὶν ὅμοια τοῖς καράβοις. Ἡ δὲ κραγγὼν ἀνάπαλιν· τοὺς πρώτους γὰρ ἔχει τέτταρας ἑφ' ἐκάτερα, εἴτ' ἄλλους ἐχομένους λεπτοὺς τρεῖς ἑφ' ἐκάτερα, τὸ δὲ λοιπὸν πλεῖον μόριον τοῦ σώματος ἄπουν ἐστίν. Κάμπτονται δ' οἱ μὲν πόδες πάντων εἰς τὸ πλάγιον, ὥσπερ καὶ τῶν ἐντόμων, αἱ δὲ χηλαί, ὅσα ἔχει χηλὰς, εἰς τὸ ἐντός. Ἐχει δ' ὁ κάραβος καὶ κέρκον, περυγία δὲ πέντε· καὶ ἡ καρὶς ἡ κυφὴ τὴν οὐρὰν καὶ περυγία τέτταρα. Ἐχει δὲ καὶ ἡ κραγγὼν περυγία ἑφ' ἐκάτερα ἐν τῇ οὐρᾷ· τὸ δὲ μέσον αὐτῶν ἀμφοτέραι ἀκανθῶδες, πλὴν αὕτη μὲν πλατὺ, ἡ δὲ κυφὴ ὀξύ. Ὁ δὲ καρκίνος μόνος τῶν τοιούτων ἀνορροπύγιον· καὶ τὸ σῶμα τὸ μὲν

τῶν καρίδων καὶ τῶν καράβων πρόμηκες, τὸ δὲ τῶν καρκίνων στρογγύλον.

Διαφέρει δ' ὁ κάραβος ὁ ἄρρην τῆς θηλείας· τῆς μὲν γὰρ θηλείας ὁ πρῶτος (526a.) ποὺς δίκρους ἐστὶ, τοῦ δ' ἄρρενος μῶνυξ, καὶ τὰ πτερύγια τὰ ἐν τῇ ὑπτίῳ ἢ μὲν θήλεια μεγάλα ἔχει καὶ ἐπαλλάττοντα πρὸς τῇ τραχήλῳ, ὁ δ' ἄρρην ἐλάττω καὶ οὐκ ἐπαλλάττοντα· ἔτι τοῦ μὲν ἄρρενος ἐν τοῖς τελευταίοις ποσὶ μεγάλα καὶ ὀξέα ἐστὶν ὥσπερ πληκτρα, τῆς δὲ θηλείας ταῦτα μικρὰ καὶ λεῖα. Ὅμοίως δ' ἔχουσιν ἀμφοτέρα κεραίας δύο πρὸ τῶν ὀφθαλμῶν μεγάλας καὶ τραχείας, καὶ ἄλλα κεράτια μικρὰ ὑποκάτω λεῖα.

Τὰ δ' ὄμματα πάντων τούτων ἐστὶ σκληρόφθαλμα, καὶ κινεῖται καὶ ἐκτὸς καὶ ἐντὸς καὶ εἰς τὸ πλάγιον· ὁμοίως δὲ καὶ τοῖς καρκίνοις τοῖς πλείστοις, καὶ ἔτι μᾶλλον.

Ὁ δ' ἄστακὸς τὸ μὲν ὅλον ὑπόλευκον ἔχει τὸ χρῶμα, μέλανι δὲ διαπεπασμένον. Ἔχει δὲ τοὺς μὲν ὑποκάτω πόδας τοὺς ἄχρι τῶν μεγάλων ὀκτώ, μετὰ δὲ ταῦτα τοὺς μεγάλους πολλῶ μείζους καὶ ἐξ ἄκρου πλατυτέρους ἢ ὁ κάραβος, ἀνωμάλους δ' αὐτούς· ὁ μὲν γὰρ δεξιὸς τὸ πλατὺ τὸ ἔσχατον πρόμηκες ἔχει καὶ λεπτόν, ὁ δ' ἀριστερὸς παχὺ καὶ στρογγύλον. Ἐξ ἄκρου δ' ἐκάτερος ἐσχισμένος ὥσπερ σιαγὼν ὀδόντας ἔχων καὶ κάτωθεν καὶ ἄνωθεν, πλὴν ὁ μὲν δεξιὸς μικροὺς ἅπαντας καὶ καρχαρόδοντας, ὁ δ' ἀριστερὸς ἐξ ἄκρου μὲν καρχαρόδοντας, τοὺς δ' ἐντὸς ὥσπερ γομφίους, ἐκ μὲν τοῦ κάτω μέρους τέτταρας καὶ συνεχεῖς, ἄνωθεν δὲ τρεῖς καὶ οὐ συνεχεῖς. Κινοῦσι δὲ τὸ ἄνω μέρος ἀμφοτέροι, καὶ προσπιέζουσι πρὸς τὸ κάτω· βλαιοῖ δ' ἀμφοτέροι τῇ θέσει, καθάπερ πρὸς τὸ λαβεῖν καὶ πιέσαι πεφυκότες. Ἐπάνω δὲ τῶν μεγάλων ἄλλοι δύο δασεῖς, μικρὸν ὑποκάτω τοῦ στόματος, καὶ ὑποκάτω τούτων τὰ βραγχιώδη τὰ περὶ τὸ στόμα, δασέα καὶ πολλά. Ταῦτα δ' αἰεὶ διατελεῖ κινῶν· κάμπτει δὲ καὶ προσάγεται τοὺς δύο πόδας πρὸς τὸ στόμα τοὺς δασεῖς. Ἔχουσι δὲ καὶ παραφυάδας λεπτὰς οἱ πρὸς τῇ στόματι πόδες.

Ὁδόντας δ' ἔχει δύο καθάπερ ὁ κάραβος, ἐπάνω δὲ τούτων τὰ κέρατα μακρά, βραχύτερα δὲ καὶ λεπτότερα πολὺ ἢ ὁ κάραβος, καὶ ἄλλα τέτταρα τὴν μὲν μορφήν ὅμοια τούτοις, βραχύτερα δὲ καὶ (526b.) λεπτότερα. Τούτων δ' ἐπάνω τοὺς ὀφθαλμοὺς μικροὺς καὶ βραχεῖς, οὐχ ὥσπερ ὁ κάραβος μεγάλους. Τὸ δ' ἐπάνω τῶν ὀφθαλμῶν ὀξὺ καὶ τραχύ, καθαπερεὶ μέτωπον, μείζον ἢ ὁ κάραβος. Ὅλως δὲ τὸ μὲν πρόσωπον ὀξύτερον, τὸν δὲ θώρακα εὐρύτερον ἔχει

πολὺ τοῦ καράβου, καὶ τὸ ὅλον σῶμα σαρκωδέστερον καὶ μαλακώτερον. Τῶν δ' ὀκτὼ ποδῶν οἱ μὲν τέτταρες ἐξ ἄκρου δίκροοί εἰσιν, οἱ δὲ τέτταρες οὐ. Τὰ δὲ περὶ τὸν τράχηλον καλούμενον διήρηται μὲν ἑξῶθεν πενταχῆ, καὶ ἕκτον ἐστὶ τὸ πλατὺ τὸ ἔσχατον, πέντε πλάκας ἔχον· τὰ δ' ἐντός, εἰς ἃ προεντίκτουσιν αἱ θήλειαι, δασέα τέτταρα.

Καθ' ἕκαστον δὲ τῶν εἰρημένων πρὸς τὰ ἔξω ἄκανθαν ἔχει βραχεῖαν καὶ ὀρθήν. Τὸ δ' ὅλον σῶμα καὶ τὰ περὶ τὸν θώρακα λεῖτα, οὐχ ὥσπερ ὁ κάραβος τραχύς· ἀλλ' ἐν τοῖς μεγάλοις ποσὶ τὰ ἑξῶθεν ἀκάνθας ἔχει μεΐζους. Τῆς δὲ θηλείας πρὸς τὸν ἄρρενα οὐδεμία διαφορὰ φαίνεται· καὶ γὰρ ὁ ἄρρην καὶ ἡ θήλεια ὁποτέραν ἂν τύχη τῶν χηλῶν ἔχουσι μεΐζω, ἴσας μέντοι ἀμφοτέρας οὐδέτερος οὐδέποτε.

Τὴν δὲ θάλατταν δέχονται μὲν παρὰ τὸ στόμα πάντα τὰ τοιαῦτα, ἀφιᾶσι δ' ἐπιλαμβάνοντα μικρὸν τούτου μόριον οἱ καρκίνοι, οἱ δὲ κάραβοι παρὰ τὰ βραγχιοειδῆ· ἔχουσι δὲ τὰ βραγχιοειδῆ πολλὰ οἱ κάραβοι.

Κοινὸν δὲ πάντων τούτων ἐστίν· ὀδόντας τε πάντ' ἔχει δύο (καὶ γὰρ οἱ κάραβοι τοὺς πρώτους δύο ἔχουσι) καὶ ἐν τῷ στόματι σαρκωδέστερον ἀντὶ γλώττης, εἴτα κοιλίαν τοῦ στόματος ἐχομένην εὐθύς, πλὴν οἱ κάραβοι μικρὸν στόμαχον πρὸ τῆς κοιλίας, εἴτ' ἐκ ταύτης ἔντερον εὐθύ. Τελευτᾷ δὲ τοῦτο τοῖς μὲν караβοειδέσι καὶ καρίσι κατ' εὐθυωρίαν πρὸς τὴν οὐράν, ἥ τὸ περίττωμα ἀφιᾶσι καὶ τὰ ὧὰ ἐκτίκτουσιν, τοῖς δὲ καρκίνοις, ἥ τὸ ἐπίπτυγμα ἔχουσι, κατὰ μέσον τὸ ἐπίπτυγμα, ἥ τὰ ὧὰ ἐκτίκτουσιν (ἐκτὸς δὲ καὶ οὗτοι). Ἔτι τὰ θήλεα αὐτῶν παρὰ τὸ ἔντερον τὴν τῶν ὧων χώραν ἔχουσιν. Καὶ τὴν καλουμένην δὲ μύτιν ἢ μήκωνα πλεῖω ἢ ἐλάττω πάντ' ἔχει ταῦτα.

Τὰς δ' ἰδίας ἤδη διαφορὰς καθ' ἕκαστον δεῖ (527a.) θεωρεῖν. Οἱ μὲν οὖν κάραβοι, ὥσπερ εἴρηται, δύο ἔχουσιν ὀδόντας μεγάλους καὶ κοίλους, ἐν οἷς ἔνεστι χυμὸς ὅμοιος τῇ μύτιδι, μεταξὺ δὲ τῶν ὀδόντων σαρκίον γλωττοειδές. Ἀπὸ δὲ τοῦ στόματος ἔχει οἰσοφάγον βραχὺν καὶ κοιλίαν τούτου ἐχομένην ὑμενώδη, ἥς πρὸς τῷ στόματι ὀδόντες εἰσὶ τρεῖς, οἱ μὲν δύο κατ' ἀλλήλους, ὁ δ' εἰς ὑποκάτω. Τῆς δὲ κοιλίας ἐκ τοῦ πλαγίου ἔντερον ἀπλοῦν καὶ ἰσοπαχὲς δι' ὅλου μέχρι πρὸς τὴν ἑξοδὸν τοῦ περιττώματος. Ταῦτα μὲν οὖν πάντα ἔχουσι καὶ οἱ κάραβοι καὶ αἱ καρίδες καὶ οἱ καρκίνοι· καὶ γὰρ

ὀδόντας δύο ἔχουσιν οἱ καρκίνοι.

Ἔτι δ' οἱ γε κάραβοι πόρον ἔχουσιν ἀπὸ τοῦ στήθους ἡρτημένον μέχρι πρὸς τὴν ἔξοδον τοῦ περιτώματος· οὗτος δ' ἐστὶ τῇ μὲν θηλείᾳ ὑστερικός, τῷ δ' ἄρρени θορικός. Ἔστι δ' ὁ πόρος οὗτος πρὸς τῷ κοίλῳ τῆς σαρκός, ὥστε μεταξὺ εἶναι τὴν σάρκα· τὸ μὲν γὰρ ἔντερον πρὸς τῷ κυρτῷ ἐστίν, ὁ δὲ πόρος πρὸς τῷ κοίλῳ, ὁμοίως ἔχοντα ταῦτα ὥσπερ τοῖς τετράποσιν.

Διαφέρει δ' οὐδὲν ὁ τοῦ ἄρρενος ἢ τῆς θηλείας· ἀμφοτέροι γάρ εἰσι λεπτοὶ καὶ λευκοὶ καὶ ὑγρότητα ἔχοντες ἐν αὐτοῖς ὠχράν, ἔτι δ' ἡρτημένοι ἀμφοτέροι ἐκ τοῦ στήθους.

Ἔχουσι δ' οὕτω τὸ φόν καὶ αἱ καρίδες καὶ τὰς ἐλίκας.

Ἰδίᾳ δ' ἔχει ὁ ἄρρην πρὸς τὴν θήλειαν ἐν τῇ σαρκὶ κατὰ τὸ στήθος δύο λεύκ' ἄττα καθ' αὐτά, ὅμοια τὸ χρῶμα καὶ τὴν σύστασιν ταῖς τῆς σηπίας προβοσκίσιν· εἰλιγμένα δ' ἐστὶ ταῦτα ὥσπερ ἡ τοῦ κήρυκος μήκων. Ἡ δ' ἀρχὴ τούτων ἐστὶν ἀπὸ τῶν κοτυληδόνων, αἱ εἰσιν ὑποκάτω τῶν ἐσχάτων ποδῶν. Ἔχει δὲ καὶ ἐν τούτῳ σάρκα ἐρυθρὰν καὶ αἱματώδη τὴν χροάν, τῇ δ' ἀφῇ γλίσχραν καὶ οὐχ ὁμοίαν τῇ σαρκί. Ἀπὸ δὲ τοῦ περὶ τὰ στήθη κηρυκώδους ἄλλος ἐστὶν ἐλιγμός, ὥσπερ ἀρπεδόνη τὸ πάχος· ὧν ὑποκάτω δύο ἄττα ψαθυρά ἐστι προσηρτημένα τῷ ἐντέρῳ θορικά. Ταῦτα μὲν οὖν ὁ ἄρρην ἔχει· ἡ δὲ θήλεια ὧν ἔχει τὸ χρῶμα ἐρυθρά, ὧν ἡ πρόσφυσις ἐστὶ πρὸς τῇ κοιλίᾳ καὶ τοῦ ἐντέρου ἐκατέρωθι μέχρι εἰς τὸ σαρκῶδες, ὑμένι λεπτῷ περιεχόμενα. Τὰ μὲν οὖν μόρια ὅσα ἐντὸς καὶ ἐκτὸς ἔχουσι, ταῦτά ἐστιν.

Κεφάλαιο 3

(527b.) Συμβέβηκε δὲ τῶν μὲν ἐναίμων τὰ ἐντὸς μόρια ὀνόματα ἔχειν· πάντα γὰρ σπλάγχνα ἔχει τὰ ἔσωθεν· τῶν δ' ἀναίμων οὐδέν, ἀλλὰ κοινὸν τούτοις καὶ ἐκείνοις πᾶσι κοιλία καὶ στόμαχος καὶ ἔντερον.

Οἱ δὲ καρκίνοι, περὶ μὲν τῶν χηλῶν καὶ τῶν ποδῶν, ὅτι ἔχουσι καὶ πῶς ἔχουσιν, εἴρηται πρότερον· ὥς δ' ἐπὶ τὸ πολὺ πάντες τὴν δεξιὰν ἔχουσι μείζω χηλὴν καὶ ἰσχυροτέραν. Εἴρηται δὲ πρότερον καὶ περὶ ὀφθαλμῶν, ὅτι εἰς τὸ πλάγιον βλέπουσιν οἱ πλεῖστοι. Τὸ δὲ κύτος τοῦ σώματος ἔν ἐστιν ἀδιόριστον, ἔτι δὲ κεφαλὴ, καὶ εἴ τι ἄλλο μόριον. Ἔχουσι δ' ὀφθαλμοὺς οἱ μὲν ἐκ τοῦ πλαγίου ἄνω ὑπὸ τὸ πρηνὲς εὐθύς πολὺ διεστῶτας, ἔνιοι δ' ἐν μέσῳ καὶ ἐγγὺς ἀλλήλων, οἷον οἱ Ἡρακλεωτικοὶ καὶ αἱ μαῖαι. Ὑποκάτω δὲ τὸ στόμα τῶν ὀφθαλμῶν, καὶ ἐν αὐτῷ ὀδόντας δύο ὥσπερ ὁ κάραβος, πλὴν οὐ στρογγύλοι οὗτοι ἀλλὰ μακροί. Καὶ ἐπὶ τούτων ἐπικαλύμματά ἐστι δύο, ὧν μεταξύ ἐστιν οἷα περ ὁ κάραβος ἔχει πρὸς τοῖς ὁδοῦσιν. Δέχεται μὲν οὖν τὸ ὕδωρ παρὰ τὸ στόμα, ἀπωθὼν τοῖς ἐπικαλύμμασιν, ἀφίησι δὲ κατὰ τοὺς ἄνω πόρους τοῦ στόματος, ἐπιλαμβάνων τοῖς ἐπικαλύμμασιν, ἧ εἰσῆλθεν· οὗτοι δ' εἰσὶν εὐθύς ὑπὸ τοὺς ὀφθαλμούς· καὶ ὅταν δέξηται τὸ ὕδωρ, ἐπιλαμβάνει τὸ στόμα τοῖς ἐπικαλύμμασιν ἀμφοτέροις, ἔπειθ' οὕτως ἀποπνίξει τὴν θάλατταν.

Ἐχόμενος δὲ τῶν ὀδόντων ὁ στόμαχος βραχὺς πάμπαν, ὥστε δοκεῖν εὐθύς εἶναι μετὰ τὸ στόμα τὴν κοιλίαν. Καὶ κοιλία τούτου ἐχομένη δικρόα, ἥς ἐκ μέσης μὲν τὸ ἔντερόν ἐστιν ἀπλοῦν καὶ λεπτόν· τελευτᾷ δὲ τὸ ἔντερον ὑπὸ τὸ ἐπικάλυμμα τὸ ἔξω, ὥσπερ εἴρηται καὶ πρότερον. Ἔχει δὲ τὰ μεταξὺ τῶν ἐπικαλυμμάτων, οἷα περ ὁ κάραβος, πρὸς τοῖς ὁδοῦσιν.

Ἐν δὲ τῷ κύτει ἔσω χυμὸς ἐστιν ὠχρὸς, καὶ μίκρ' ἄττα προμήκη λευκά, καὶ ἄλλα πυρρὰ διαπεπασμένα. Διαφέρει δ' ὁ ἄρρην τῆς θηλείας τῷ τε μεγέθει καὶ τῷ πλάτει καὶ τῷ ἐπικαλύμματι· μείζον γὰρ τοῦτο ἔχει ἢ θήλεια, καὶ πλεον ἀφεστηκὸς καὶ συνηρεφέστερον, καθάπερ καὶ ἐπὶ τῶν θηλειῶν καράβων.

Τὰ μὲν οὖν τῶν μαλακοστράκων μόρια τοῦτον ἔχει τὸν τρόπον.

Κεφάλαιο 4

Τὰ δ' ὀστρακόδερμα τῶν ζώων, οἷον οἱ τε κοχλίας (528a.) καὶ οἱ κόχλοι καὶ πάντα τὰ καλούμενα ὄστρεα, ἔτι δὲ τὸ τῶν ἐχίνων γένος, τὸ μὲν σαρκῶδες, ὅσα σάρκας ἔχει, ὁμοίως ἔχει τοῖς μαλακοστράκοις (ἐντὸς γὰρ ἔχει), τὸ δ' ὄστρακον ἐκτὸς, ἐντὸς δ' οὐδὲν σκληρόν. Αὐτὰ δὲ πρὸς αὐτὰ διαφορὰς ἔχει πολλὰς καὶ κατὰ τὰ ὄστρακα καὶ κατὰ τὴν σάρκα τὴν ἐντὸς.

Τὰ μὲν γὰρ αὐτῶν οὐκ ἔχει σάρκα οὐδεμίαν, οἷον ἐχῖνος, τὰ δ' ἔχει μὲν, ἐντὸς δ' ἔχει τὴν σάρκα ἀφανῆ πᾶσαν πλὴν τῆς κεφαλῆς, οἷον οἱ τε χερσαῖοι κοχλίας καὶ τὰ καλούμενα ὑπὸ τινων κοκάλια καὶ τῶν ἐν τῇ θαλάττῃ αἱ τε πορφύραι καὶ οἱ κήρυκες καὶ ὁ κόχλος καὶ τᾶλλα τὰ στρομβώδη. Τῶν δ' ἄλλων τὰ μὲν ἐστὶ δίθυρα τὰ δὲ μονόθυρα· λέγω δὲ δίθυρα τὰ δυσὶν ὀστράκοις περιεχόμενα, μονόθυρα δὲ τὰ ἐνί· τὸ δὲ σαρκῶδες ἐπιπολῆς, οἷον ἡ λεπὰς. Τῶν δὲ διθύρων τὰ μὲν ἐστὶν ἀναπτυκτά, οἷον οἱ τε κτένες καὶ οἱ μύες· ἅπαντα γὰρ τὰ τοιαῦτα τῇ μὲν συμπέφυκε τῇ δὲ διαλέλυται, ὥστε συγκλείεσθαι καὶ ἀνοίγεσθαι. Τὰ δὲ δίθυρα μὲν ἐστὶν, ὁμοίως δὲ συγκέκλεισται ἐπ' ἀμφοτέρα, οἷον οἱ σωλῆνες. Ἔστι δ' ἅ ὅλα περιέχεται τῷ ὀστράκῳ καὶ οὐδὲν τῆς σαρκὸς ἔχει εἰς τὸ ἔξω γυμνόν, οἷον τὰ καλούμενα τήθυα.

Ἔτι δ' αὐτῶν τῶν ὀστράκων διαφοραὶ πρὸς ἀλλήλα εἰσιν. Τὰ μὲν γὰρ ἐστὶ λειόστρακα, ὥσπερ σωλὴν καὶ μύες καὶ κόγχαι ἔναιαι αἱ καλούμεναι ὑπὸ τινων γάλακες, τὰ δὲ τραχύστρακα, οἷον τὰ λιμνόστρεα καὶ πίννα καὶ γένη κόγχων ἔνια καὶ κήρυκες· καὶ τούτων τὰ μὲν ῥαβδωτά ἐστὶν, οἷον κτεῖς καὶ κόγχων τι γένος, τὰ δ' ἀρράβδωτα, οἷον αἱ τε πίνναι καὶ κόγχων τι γένος.

Καὶ πάχει δὲ καὶ λεπτότητι τῶν ὀστράκων διαφέρουσιν, ὅλων τε τῶν ὀστράκων καὶ κατὰ μέρος, οἷον περὶ τὰ χεῖλη· τὰ μὲν γὰρ λεπτοχειλῆ ἐστὶν, οἷον οἱ μύες, τὰ δὲ παχυχειλῆ, οἷον τὰ λιμνόστρεα. Ἔτι τὰ μὲν κινητικὰ αὐτῶν ἐστὶν, οἷον ὁ κτεῖς (ἐνιοὶ γὰρ καὶ πέτεσθαι λέγουσι τοὺς κτένας, ἐπεὶ καὶ ἐκ τοῦ ὀργάνου ᾧ θηρεύονται ἐξάλλονται πολλάκις), τὰ δ' ἀκίνητά ἐστὶν ἐκ τῆς προσφυῆς, οἷον ἡ πίννα. Τὰ δὲ (528b.) στρομβώδη πάντα κινεῖται καὶ ἔρπει· νέμεται δ' ἀπολυομένη καὶ ἡ λεπὰς. Κοινὸν δὲ καὶ τούτων καὶ τῶν ἄλλων τῶν σκληροστράκων τὸ λεῖον εἶναι ἐντὸς τὸ ὄστρακον.

Τὸ δὲ σαρκῶδες τοῖς μὲν μονοθύροις καὶ διθύροις προσπέφυκε τοῖς ὀστράκοις, ὥστε βίᾳ ἀποσπᾶσθαι, τοῖς δὲ στρομβώδεσιν ἀπολέλυται μᾶλλον.

Ἴδιον δὲ τούτοις κατὰ τὸ ὄστρακον ὑπάρχει πᾶσι τὸ ἐλίκην ἔχειν τὸ ὄστρακον τὸ ἔσχατον ἀπὸ τῆς κεφαλῆς. Ἔτι δ' ἐπίπτυγμα πάντ' ἔχει ἐκ γενετῆς. Ἔστι δὲ πάντα τὰ στρομβώδη τῶν ὀστρακοδέρμων δεξιὰ, καὶ κινεῖται οὐκ ἐπὶ τὴν ἐλίκην ἀλλ' ἐπὶ τὸ καταντικρύν.

Τὰ μὲν οὖν ἔξωθεν μόρια τούτων τῶν ζώων τοιαύτας ἔχει τὰς διαφοράς· τῶν δ' ἐντὸς τρόπον μὲν τινα παραπλήσιος ἢ φύσις ἐστὶ πάντων, καὶ μάλιστα τῶν στρομβωδῶν (μεγέθει γὰρ ἀλλήλων διαφέρει καὶ τοῖς καθ' ὑπεροχὴν πάθεσιν), οὐ πολὺ δὲ διαφέρει οὐδὲ τὰ μονόθυρα καὶ δίθυρα, συγκλειστὰ δέ· διαφορὰν γὰρ ἔχει πρὸς ἀλλήλα μὲν μικράν, πρὸς δὲ τὰ ἀκίνητα πλείω. Τοῦτο δ' ἔσται φανερόν ἐκ τῶν ὕστερον μᾶλλον.

Ἡ δὲ φύσις τῶν στρομβοειδῶν ἀπάντων ὁμοίως ἔχει, διαφέρει δ' ὥσπερ εἴρηται, καθ' ὑπεροχὴν (τὰ μὲν γὰρ μείζω μόρια καὶ ἐνδηλότερα ἔχει αὐτῶν, τὰ δ' ἐλάττω τοῦναντίον), ἔτι δὲ σκληρότητι καὶ μαλακότητι καὶ τοῖς ἄλλοις τοῖς τοιούτοις πάθεσιν. Ἔχει γὰρ πάντα τὴν μὲν ἐξωτάτω ἐν τῷ στόματι τοῦ ὀστράκου σάρκα στιφράν, τὰ μὲν μᾶλλον τὰ δ' ἦττον. Ἐκ μέσου δὲ τούτου ἡ κεφαλὴ καὶ κεράτια δύο· ταῦτα δ' ἐν μὲν τοῖς μείζοσι μεγάλα, ἐν δὲ τοῖς ἐλάττωσι πάνπαν μικρά ἐστίν. Ἡ δὲ κεφαλὴ ἐξέρχεται πᾶσι τὸν αὐτὸν τρόπον· κἄν τι φοβηθῇ, συσπᾶται πάλιν εἰς τὸ ἐντός. Ἔχει δὲ στόμα καὶ ὀδόντας ἓνια, οἷον ὁ κοχλίας, ὀξεῖς καὶ μικροὺς καὶ λεπτούς. Ἔχουσι δὲ καὶ προβοσκίδας, ὥσπερ καὶ αἱ μυῖαι· τοῦτο δ' ἐστὶ γλωττοειδές. Ἔχουσι δὲ καὶ οἱ κήρυκες τοῦτο καὶ αἱ πορφύραι στιφρόν, καὶ ὥσπερ οἱ μύωπες καὶ οἱ οἷστροι τὰ δέρματα διατρυνπῶσι τῶν τετραπόδων, ἔτι τὴν ἰσχὺν τοῦτ' ἔστι σφοδρότερον· τῶν γὰρ δελεάτων τὰ ὄστρακα διατρυνπῶσιν.

(529a.) Τοῦ δὲ στόματος ἔχεται εὐθὺς ἡ κοιλία. Ὅμοία δ' ἐστὶν ἡ κοιλία προλόβῳ ὄρνιθος ἢ τῶν κόχλων. Κάτω δ' ἔχει δύο λευκὰ στιφρά, ὅμοια μαστοῖς, οἷα ἐγγίνεται καὶ ἐν ταῖς σηπείαις, πλὴν στιφρὰ ταῦτα μᾶλλον. Ἀπὸ δὲ τῆς κοιλίας στόμαχος ἀπλοῦς μακρὸς μέχρι τῆς μήκωνος, ἥ ἐστὶν ἐν τῷ πυθμένι. Ταῦτα μὲν οὖν δῆλα καὶ ἐπὶ τῶν πορφυρῶν καὶ τῶν κηρύκων ἐστὶν ἐν τῇ ἐλίκῃ τοῦ ὀστράκου.

Τοῦ δὲ στομάχου τὸ ἐχόμενόν ἐστιν ἔντερον· συνεχές δ' ὃ τε στόμαχος καὶ τὸ ἔντερον, καὶ ἅπαν ἀπλοῦν μέχρι τῆς ἐξόδου. Ἡ δ'

ἀρχὴ τοῦ ἐντέρου περὶ τὴν ἐλικὴν τῆς μήκωνος, καὶ ταύτη ἐστὶν εὐρύτερον (ἔστι γὰρ ἡ μήκων οἶονεὶ περίττωμα πᾶσι τοῖς ὀστρακηροῖς τὸ πολὺ αὐτῆς), εἴτ' ἐπικάμψαν ἄνω φέρεται πάλιν πρὸς τὸ σαρκῶδες, καὶ ἡ τελευτὴ τοῦ ἐντέρου παρὰ τὴν κεφαλὴν ἐστίν, ἥ ἀφίᾳσι τὸ περίττωμα, πᾶσιν ὁμοίως τοῖς στρομβώδεσι καὶ τοῖς χερσαίοις καὶ τοῖς θαλαττίοις. Παρύφανται δ' ἀπὸ τῆς κοιλίας τῷ στομάχῳ ἐν τοῖς μεγάλοις κόχλοις συνεχόμενος ὑμένιῳ μακρὸς πόρος καὶ λευκός, ὁμοίος τὴν χροάν τοῖς ἄνω μαστοειδέσιν· ἔχει δ' ἐντομὰς ὥσπερ τὸ ἐν τῷ καράβῳ ῥόν, πλὴν τὴν χροάν τὸ μὲν λευκόν, ἐκεῖνο δ' ἐρυθρόν. Ἐχει δ' οὐδεμίαν ἐξοδὸν τοῦτο οὐδὲ πόρον, ἀλλ' ἐν ὑμένι ἐστὶ λεπτῷ, κοιλότητα ἔχον ἐν ἑαυτῷ στενήν. Ἀπὸ δὲ τοῦ ἐντέρου κάτω παρατείνει μέλانا καὶ τραχέα συνεχῇ, οἷα καὶ ἐν ταῖς χελώναις, πλὴν ἥττον μέλانا.

Ἐχουσι δὲ καὶ οἱ θαλάττιοι κόχλοι ταῦτα καὶ τὰ λευκά, πλὴν ἐλάττω οἱ ἐλάττους.

Τὰ δὲ μονόθυρα καὶ δίθυρα τῇ μὲν ὁμοίως ἔχει τούτοις τῇ δ' ἐτέρως. Κεφαλὴν μὲν γὰρ καὶ κεράτια καὶ στόμα ἔχουσι καὶ τὸ γλωττοειδές· ἀλλ' ἐν μὲν τοῖς ἐλάττοσι διὰ μικρότητα αὐτῶν ἄδηλα, τὰ δὲ καὶ ἐν τεθνεῶσιν ἢ μὴ κινουμένοις οὐ δῆλα. Τὴν δὲ μήκωνα πάντα ἔχει, ἀλλ' οὐκ ἐν τῷ αὐτῷ οὐδ' ἴσην οὐδ' ὁμοίως φανεράν, ἀλλ' αἱ μὲν λεπάδες κάτω ἐν τῷ βάθει, τὰ δὲ δίθυρα ἐν τῷ γιγλυμῶδει. Καὶ τὰ τριχῶδη πᾶσιν ὑπάρχει κύκλῳ (529b.) τούτοις, οἷον καὶ τοῖς κτεσίν. Καὶ τὸ λεγόμενον ῥόν τοῖς ἔχουσιν, ὅταν ἔχωσιν, ἐν τῷ ἐπὶ θάτερα κύκλῳ τῆς περιφερείας ἐστίν, ὥσπερ καὶ τὸ λευκὸν τοῖς κόχλοις· καὶ γὰρ ἐκείνοις τοῦτο ὁμοίον ὑπάρχει.

Ἀλλὰ πάντα τὰ τοιαῦτα μόρια, ὥσπερ εἴρηται, ἐν μὲν τοῖς μεγάλοις δῆλὰ ἐστίν, ἐν δὲ τοῖς μικροῖς ἢ οὐδὲν ἢ μόλις. Διὸ μάλιστα ἐν τοῖς μεγάλοις κτεσὶ φανερά ἐστίν· οὗτοι δ' εἰσὶν οἱ τὴν ἐτέραν θυρίδα πλατεῖαν ἔχοντες, οἷον ἐπίθεμα. Ἡ δὲ τοῦ περιττώματος ἐξοδὸς τοῖς μὲν ἄλλοις ἐστὶν ἐκ πλαγίου· ἔστι γὰρ πόρος ἥ πορεύεται ἔξω· ἡ γὰρ μήκων, ὥσπερ εἴρηται, περίττωμά ἐστι πᾶσιν ἐν ὑμένι. Τὸ δὲ καλούμενον ῥόν οὐκ ἔχει πόρον ἐν οὐδενί, ἀλλ' αὐτῆς τῆς σαρκὸς ἐπανοιδεῖ· ἔστι δ' οὐκ ἐπὶ ταὐτὸ τῷ ἐντέρῳ, ἀλλὰ τὸ μὲν ῥόν ἐν τοῖς δεξιῷς, τὸ δ' ἔντερον ἐν τοῖς ἀριστεροῖς. Τοῖς μὲν οὖν ἄλλοις τοιαύτη ἡ ἐξοδὸς τῆς περιττώσεως, τῇ δ' ἀγρία λεπάδι, ἣν τινες καλοῦσι θαλάττιον οὖς, ὑποκάτω τοῦ ὀστράκου ἢ περιττώσις ἐξέρχεται· τετρύπηται γὰρ τὸ ὀστρακον. Φανερά δὲ καὶ ἡ κοιλία

μετὰ τὸ στόμα οὕσα ἐν ταύτῃ καὶ τὰ ῥοειδῆ. Πάντα δὲ ταῦτα τίνα τρόπον τῇ θέσει ἔχει, ἐκ τῶν ἀνατομῶν θεωρεῖσθω.

Τὸ δὲ καλούμενον καρκίνιον τρόπον μὲν τίνα κοινόν ἐστι τῶν τε μαλακοστράκων καὶ τῶν ὀστρακοδέρμων. Αὐτὸ μὲν γὰρ τὴν φύσιν ὅμοιον τοῖς караβοειδέσι, καὶ γίνεται αὐτὸ καθ' αὐτό, τῷ δ' εἰσδύεσθαι καὶ ζῆν ἐν ὀστράκῳ ὅμοιον τοῖς ὀστρακοδέρμοις, ὥστε διὰ ταῦτα ἔοικεν ἐπαμφοτερίζειν. Τὴν δὲ μορφήν ὡς μὲν ἀπλῶς εἰπεῖν ὁμοίον ἐστι τοῖς ἀράχναις, πλὴν τὸ κάτω τῆς κεφαλῆς καὶ τοῦ θώρακος μεῖζον ἔχει ἐκείνου.

Ἐχει δὲ κεράτια δύο λεπτὰ πυρρά, καὶ ὀφθαλμοὺς ὑποκάτω τούτων δύο μακροῦς, οὐκ εἰσδυομένους οὐδὲ κατακλινομένους ὥσπερ οἱ τῶν καρκίνων ἀλλ' ὀρθοῦς, ὑποκάτω δὲ τούτων τὸ στόμα καὶ περὶ αὐτὸ καθαπερεὶ τριχῶδη ἄττα πλείω, τούτων δ' ἐχομένους δύο πόδας δικρούς, οἷς προσάγεται, καὶ ἄλλους ἐφ' ἐκάτερα δύο, καὶ τρίτον μικρόν. Τὸ δὲ κάτω τοῦ (530a.) θώρακος μαλακὸν ἅπαν ἐστὶ καὶ διοιγόμενον ὠχρὸν ἐνδοθεν. Ἀπὸ δὲ τοῦ στόματος πόρος εἷς ἄχρι τῆς κοιλίας· τῆς δὲ περιττώσεως οὐ δῆλος ὁ πόρος. Οἱ δὲ πόδες καὶ ὁ θώραξ σκληρὰ μὲν, ἥττον δ' ἢ τῶν καρκίνων. Πρόσφυσιν δ' οὐκ ἔχει πρὸς τὰ ὀστρακα ὥσπερ αἱ πορφύραι καὶ οἱ κήρυκες, ἀλλ' εὐαπόλυτόν ἐστιν. Προμηκέστερα δ' ἐστὶ τὰ ἐν τοῖς στρόμβοις τῶν ἐν τοῖς νηρείταις. Ἔτερον δὲ γένος ἐστὶ τὸ τῶν νηρειτῶν, τὰ μὲν ἄλλα παραπλήσιον, τῶν δὲ δικρῶν ποδῶν τὸν μὲν δεξιὸν ἔχει μικρὸν τὸν δ' ἀριστερὸν μέγαν, καὶ ποιεῖται τὴν βάδισιν μᾶλλον ἐπὶ τούτῳ. Λαμβάνεται δὲ καὶ ἐν ταῖς κόγχαις τοιοῦτον, ὧν ἐστὶν ἡ πρόσφυσις παραπλησία, καὶ ἐν τοῖς ἄλλοις. Τοῦτον δὲ καλοῦσι κύλλарον.

Ὁ δὲ νηρείτης τὸ μὲν ὀστρακὸν ἔχει λεῖον καὶ μέγα καὶ στρογγύλον, τὴν δὲ μορφήν παραπλησίαν τοῖς κήρυξι, πλὴν οὐχ ὥσπερ ἐκείνοι τὴν μήκωνα μέλαιναν ἀλλ' ἐρυθράν· προσπέφυκε δὲ νεανικῶς κατὰ τὸ μέσον.

Ἐν μὲν οὖν ταῖς εὐδαίαις ἀπολυόμενα νέμεται ταῦτα, πνευμάτων δ' ὄντων τὰ μὲν καρκίνια ἡσυχάζει πρὸς τοῖς λίθοις, οἱ δὲ νηρεῖται προσέχονται καθάπερ αἱ λεπάδες· ὡσαύτως δὲ καὶ αἱ αἰμορροΐδες καὶ πᾶν τὸ τοιοῦτον γένος. Προσφύονται δὲ ταῖς πέτραις, ὅταν ἀποκλίνωσι τὸ ἐπικάλυμμα· τοῦτο γὰρ ἔοικεν εἶναι ὥσπερ εἰ πῶμα· ὁ γὰρ τοῖς διθύροις ἄμφω, τοῦτο τοῖς στρομβώδεσι τὸ ἕτερον μέρος. Τὸ δ' ἐντὸς σαρκῶδες ἐστὶ, καὶ ἐν τούτῳ τὸ στόμα. Τὸν αὐτὸν δὲ

τρόπον ἔχει ταῖς αἰμορροΐσι καὶ ταῖς πορφύραις καὶ πᾶσι τοῖς τοιούτοις.

Ὅσα δ' ἔχει μείζω τὸν ἀριστερὸν πόδα, ταῦτα ἐν μὲν τοῖς στρόμβοις οὐκ ἐγγίνεται, ἐν δὲ τοῖς νηρείταις ἐγγίνεται. Εἰσὶ δὲ τινες κόχλοι οἱ ἔχουσιν ἐν ἑαυτοῖς ὅμοια ζῶα τοῖς ἀστακοῖς τοῖς μικροῖς, οἱ γίνονται καὶ ἐν τοῖς ποταμοῖς· διαφέρουσι δ' αὐτῶν τῷ μαλακὸν ἔχειν τὸ ἔσω τοῦ ὀστράκου. Τὴν δ' ιδέαν οἱοί εἰσιν, ἐκ τῶν ἀνατομῶν θεωρεῖσθωσαν.

Κεφάλαιο 5

Οἱ δ' ἐχῖνοι τὸ μὲν σαρκῶδες οὐκ ἔχουσιν, ἀλλ' ἴδιον αὐτῶν τοῦτ' ἔστιν· ἐστέρηνται γὰρ πάντες, καὶ οὐκ ἔχουσι σάρκα ἐντὸς οὐδεμίαν· τὰ δὲ μέλανα πάντες. Ἔστι δὲ γένη πλείω (530b.) τῶν ἐχίνων, ἐν μὲν τὸ ἐσθιόμενον· τοῦτο δ' ἐστὶν ἐν ᾧ τὰ καλούμενα φά μεγάλα ἐγγίνεται καὶ ἐδώδιμα, ὁμοίως ἐν μείζοσι καὶ ἐλάττοσιν· καὶ γὰρ εὐθὺς ἔτι μικροὶ ὄντες ἔχουσι ταῦτα. Ἄλλα δὲ δύο γένη τό τε τῶν σπατάγγων καὶ τὸ τῶν καλουμένων βρύσσων· γίνονται δ' οὗτοι πελάγιοι καὶ σπάνιοι. Ἔτι αἱ ἐχينوμήτραι καλούμεναι, μεγέθει πάντων μέγισται. Πρὸς δὲ τούτοις ἄλλο γένος μεγέθει μὲν μικρόν, ἀκάνθας δὲ μεγάλας ἔχει καὶ σκληράς, γίνεται δ' ἐκ τῆς θαλάττης ἐν πολλαῖς ὀργυιαῖς, ᾧ χρῶνται πρὸς τὰς στραγγουρίας τινές. Περὶ δὲ Τορώνην εἰσὶν ἐχῖνοι λευκοὶ θαλάττιοι καὶ τὰ ὄστρακα καὶ τὰς ἀκάνθας καὶ τὰ φά, μείζους δὲ τῶν ἄλλων εἰς μήκος· ἡ δ' ἄκανθα οὐ μεγάλη οὐδ' ἰσχυρά ἀλλὰ μαλακωτέρα, τὰ δὲ μέλανα τὰ ἀπὸ τοῦ στόματος πλείω, καὶ πρὸς μὲν τὸν ἔξω πόρον συνάπτοντα πρὸς ἑαυτὰ δὲ ἀσύναπτα· τούτοις δ' ὥσπερ διειλημμένος ἐστίν. Κινοῦνται δὲ μάλιστα καὶ πλειστάκις οἱ ἐδώδιμοι αὐτῶν· καὶ σημεῖον δ' <ὅτι> αἰετὶ ἐχουσιν ἐπὶ ταῖς ἀκάνθαις.

Ἔχουσι μὲν οὖν ἅπαντες φά, ἀλλ' ἔνιοι ἀμπαν μικρὰ καὶ οὐκ ἐδώδιμα. Συμβαίνει δὲ τὴν μὲν λεγομένην κεφαλὴν καὶ τὸ στόμα τὸν ἐχῖνον κάτω ἔχειν, ἥ δ' ἀφίησι τὸ περίττωμα, ἄνω. Ταῦτο δὲ τοῦτο συμβέβηκε τοῖς τε στρομβώδεσι πᾶσι καὶ ταῖς λεπάσιν· ἡ γὰρ νομὴ ἐκ τῶν κάτωθεν, ὥστε τὸ μὲν στόμα πρὸς τὴν νομῇ, τὸ δὲ περίττωμα ἄνω πρὸς τοῖς πρανεσί τοῦ ὀστράκου. Ἔχει δ' ὁ ἐχῖνος ὀδόντας πέντε κοίλους ἐνδοθεν, ἐν μέσῳ δὲ τούτων σῶμα σαρκῶδες ἀντὶ γλώττης. Τούτου δ' ἔχεται ὁ στόμαχος, εἴτα ἡ κοιλία εἰς πέντε μέρη διηρημένη, πλήρης περιττώματος· συνέχουσι δὲ πάντες οἱ κόλποι αὐτῆς εἰς ἓν πρὸς τὴν ἔξοδον τῆς περιττώσεως, ἥ τετρύπηται τὸ ὄστρακον. Ὑπὸ δὲ τὴν κοιλίαν ἐν ἄλλῳ ὑμένι τὰ καλούμενα φά ἐστίν, ἴσα τὸν ἀριθμὸν ὄντα ἐν ἅπασιν (πέντε γάρ ἐστι τὸ πλῆθος) καὶ περιττά. Ἄνω δὲ τὰ μέλανα ἀπὸ τῆς ἀρχῆς τῶν ὀδόντων ἥρτηται, ἃ ἐστὶ πικρὰ καὶ οὐκ ἐδώδιμα. Ἐν πολλοῖς δὲ τῶν ζώων τὸ τοιοῦτόν ἐστιν ἢ τὸ ἀνάλογον· καὶ γὰρ ἐν ταῖς χελώναις καὶ φρύναις καὶ βατράχοις καὶ ἐν (531a.) τοῖς στρομβώδεσι καὶ τοῖς μαλακίοις· ἀλλὰ

τῷ χρώματι διαφέρει, καὶ ἄβρωτά ἐστιν ἐν πᾶσι τὰ τοιαῦτα ἢ πάνπαν
ἢ μᾶλλον. Κατὰ μὲν οὖν τὴν ἀρχὴν καὶ τελευτὴν συνεχὲς τοῦ ἐχίνου
τὸ στόμα ἐστί, κατὰ δὲ τὴν ἐπιφάνειαν οὐ συνεχὲς ἀλλ' ὅμοιον
λαμπτήρι μὴ ἔχοντι τὸ κύκλω δέρμα. Ταῖς δ' ἀκάνθαις χρῆται ὁ
ἐχῖνος ὥς ποσίν· ταύταις γὰρ ἐπερειδόμενος καὶ κινούμενος
μεταβάλλει τὸν τόπον.

Κεφάλαιο 6

Τὰ δὲ καλούμενα τήθυα τούτων πάντων ἔχει τὴν φύσιν περιττοτάτην. Κέκρυπται γὰρ αὐτῶν μόνων τὸ σῶμα ἐν τῷ ὀστράκῳ πᾶν, τὸ δ' ὀστρακὸν ἐστὶ μεταξὺ δέρματος καὶ ὀστράκου, διὸ καὶ τέμνεται ὥσπερ βύρσα σκληρά. Προσπέφυκε μὲν οὖν ταῖς πέτραις τῷ ὀστρακῷ, δύο δ' ἔχει πόρους ἀπέχοντας ἀπ' ἀλλήλων, πᾶμπαν μικροὺς καὶ οὐ ραδίους ἰδεῖν, ἧ ἀφίησι καὶ δέχεται τὸ ὑγρόν· περίττωμα γὰρ οὐδὲν ἔχει φανερόν, ὥσπερ τῶν ἄλλων ὀστρέων τὰ μὲν ὥσπερ ἐχῖνος, τὰ δὲ τὴν καλουμένην μήκωνα. Ἀνοιχθέντα δ' ἔσωθεν πρῶτον μὲν ὑμένα ἔχει νευρώδη περὶ τὸ ὀστρακῶδες· ἐν δὲ τούτῳ αὐτὸ ἐστὶ τὸ σαρκῶδες τοῦ τηθίου, οὐδενὶ ὅμοιον τῶν ἄλλων· αὕτη μέντοι ἢ σὰρξ πᾶσα ὁμοία. Προσπέφυκε δὲ τοῦτο κατὰ δύο τόπους τῷ ὑμένι καὶ τῷ δέρματι ἐκ τοῦ πλαγίου· καὶ ἡ προσπέφυκε, ταύτη ἐστὶ στενότερον ἐφ' ἐκάτερα, οἷς τείνει πρὸς τοὺς πόρους τοὺς ἔξω διὰ τοῦ ὀστράκου φέροντας, ἧ ἀφίησι καὶ δέχεται τὴν τροφήν καὶ τὸ ὑγρόν, ὡς ἂν εἰ τὸ μὲν στόμα εἴη, τὸ δὲ τῇ περιττώσει ἐξοδος· καὶ ἔστιν αὐτῶν τὸ μὲν παχύτερον τὸ δὲ λεπτότερον. Ἔσω δὲ κοῖλον ἐφ' ἐκάτερα, καὶ διείργει μικρόν τι συνεχές· ἐν θατέρῳ δὲ τῶν κοίλων ἢ ὑγρότης ἐγγίνεται. Ἄλλο δ' οὐδὲν ἔχει μόριον οὔτε ὀργανικὸν οὔτε αἰσθητήριον οὔτε, ὥσπερ ἐλέχθη πρότερον ἐν τοῖς ἄλλοις, τὸ περιττωματικόν. Χρῶμα δὲ τοῦ τηθίου ἐστὶ τὸ μὲν ὠχρὸν τὸ δ' ἐρυθρόν.

Ἔστι δὲ καὶ τὸ τῶν ἀκαληφῶν γένος ἴδιον· προσπέφυκε μὲν γὰρ ταῖς πέτραις ὥσπερ ἓνια τῶν ὀστρακοδέρμων, ἀπολύεται δ' ἐνίοτε. Οὐκ ἔχει δ' ὀστρακον, ἀλλὰ σαρκῶδες (531b.) τὸ σῶμα πᾶν ἐστὶν αὐτῆς. Αἰσθάνεται δὲ καὶ συναρπάζει προσφερομένης τῆς χειρὸς καὶ προσέχεται, καθάπερ ὁ πολύπους ταῖς πλεκτάναις, οὕτως ὥστε τὴν σάρκα ἐπανοιδεῖν. Ἔχει δὲ τὸ στόμα ἐν μέσῳ, καὶ ζῆ ἀπὸ τῆς πέτρας ὥσπερ ἀπ' ὀστρέου. Κἂν τι προσπέση τῶν μικρῶν ἰχθυδίων, ἀντέχεται ὥσπερ τῆς χειρὸς· οὕτω κἂν τι προσπέση αὐτῇ ἐδώδιμον, κατεσθίει. Καὶ ἀπολύεται δὲ γένος τι αὐτῶν, ὃ ἐάν τι προσπέση κατεσθίει καὶ ἐχίνους καὶ κτένας. Περίττωμα δὲ παντελῶς οὐδὲν φαίνεται ἔχουσα, ἀλλ' ὁμοία κατὰ τοῦτο τοῖς φυτοῖς ἐστίν.

Γένη δὲ τῶν ἀκαληφῶν ἐστὶ δύο, αἱ μὲν ἐλάττους καὶ ἐδώδιμοι μᾶλλον, αἱ δὲ μεγάλαι καὶ σκληραί, οἷαι γίνονται καὶ περὶ Χαλκίδα.

Τοῦ μὲν οὖν χειμῶνος τὴν σάρκα στιφρὰν ἔχουσι (διὸ καὶ θηρεύονται καὶ ἐδώδιμοί εἰσι), τοῦ δὲ θέρους ἀπόλλυνται· γίνονται γὰρ μαδαραί, καὶ ἐάν τις θίγῃ, διασπῶνται ταχέως καὶ ὅλαι ἀφαιρεῖσθαι οὐ δύνανται, πονοῦσαί τε ταῖς ἀλέαις εἰς τὰς πέτρας εἰσδύονται μᾶλλον.

Περὶ μὲν οὖν τῶν μαλακίων καὶ τῶν μαλακοστράκων καὶ τῶν ὀστρακοδέρμων, ὅσα τ' ἔχουσιν μέρη ἐκτὸς καὶ ὅσα ἐντός, εἴρηται.

Κεφάλαιο 7

Περὶ δὲ τῶν ἐντόμων λεκτέον τὸν αὐτὸν τρόπον. Ἔστι δὲ τοῦτο τὸ γένος πολλὰ εἶδη ἔχον ἐν ἑαυτῷ, καὶ ἐνίοις πρὸς ἄλληλα συγγενικοῖς οὖσιν οὐκ ἐπέξευκται κοινὸν ὄνομα οὐδέν, οἷον ἐπὶ μελίττῃ καὶ ἀνθρήνῃ καὶ σφηκὶ καὶ πᾶσι τοῖς τοιούτοις, καὶ πάλιν ὅσα τὸ πτερόν ἔχει ἐν κολεῷ, οἷον μηλολόνη καὶ κάραβος καὶ κανθαρίς καὶ ὅσα τοιαῦτα ἄλλα.

Πάντων μὲν οὖν κοινὰ μέρη ἐστὶ τρία, κεφαλὴ τε καὶ τὸ περὶ τὴν κοιλίαν κύτος καὶ τρίτον τὸ μετὰ τὸν τούτων, οἷον τοῖς ἄλλοις τὸ στήθος καὶ τὸ νῶτόν ἐστιν. Τοῦτο δὲ τοῖς μὲν πολλοῖς ἐν ἐστίν· ὅσα δὲ μακρὰ καὶ πολύποδα, σχεδὸν ἴσα ταῖς ἐντομαῖς ἔχει τὰ μετὰ.

Πάντα δ' ἔχει διαιρούμενα ζῶν τὰ ἔντομα, πλὴν ὅσα ἢ λίαν κατέψυκται ἢ διὰ μικρότητα ταχὺ καταψύχεται, ἐπεὶ καὶ οἱ σφήκες διαιρεθέντες ζῶσιν. Μετὰ μὲν οὖν τοῦ μέσου καὶ ἡ κεφαλὴ καὶ ἡ (532a.) κοιλία ζῇ, ἄνευ δὲ τούτου ἡ κεφαλὴ οὐ ζῇ. Ὅσα δὲ μακρὰ καὶ πολύποδά ἐστι, πολὺν χρόνον ζῇ διαιρούμενα, καὶ κινεῖται τὸ ἀποτμηθὲν ἐπ' ἀμφοτέρω τὰ ἔσχατα· καὶ γὰρ ἐπὶ τὴν τομὴν πορεύεται καὶ ἐπὶ τὴν οὐράν, οἷον ἡ καλουμένη σκολόπενδρα.

Ἔχει δ' ὀφθαλμοὺς μὲν ἅπαντα, ἄλλο δ' αἰσθητήριον οὐδέν φανερόν, πλὴν ἔνια οἷον γλῶτταν (ἦν καὶ τὰ ὀστρακόδερμα ἔχει πάντα), ἣ καὶ γεύεται καὶ εἰς αὐτὸ τὴν τροφὴν ἀνασπᾷ. Τοῦτο δὲ τοῖς μὲν μαλακόν ἐστι, τοῖς δ' ἔχει ἰσχὺν πολλήν, ὥσπερ ταῖς πορφύραις. Καὶ οἱ μύωπες δὲ καὶ οἱ οἴστροι ἰσχυρόν τοῦτ' ἔχουσι, καὶ τᾶλλα σχεδὸν τὰ πλεῖστα· ἐν πᾶσι γὰρ τοῖς μὴ ὀπισθοκέντροις τοῦτο ὥσπερ ὄπλον ἔχει ἕκαστον. Ὅσα δ' ἔχει τοῦτο, ὀδόντας οὐκ ἔχει, ἔξω ὀλίγων τινῶν, ἐπεὶ καὶ αἱ μυῖαι τούτῳ θιγγάνουσαι αἱματίζουσι καὶ οἱ κώνωπες τούτῳ κεντοῦσιν.

Ἔχουσι δ' ἔνια τῶν ἐντόμων καὶ κέντρα. Τὸ δὲ κέντρον τὰ μὲν ἔχει ἐν αὐτοῖς, οἷον αἱ μέλιτται καὶ οἱ σφήκες, τὰ δ' ἐκτός, οἷον σκορπίος· καὶ μόνον δὴ τοῦτο τῶν ἐντόμων μακρόκεντρον ἐστίν.

Ἔτι δὲ χηλὰς ἔχει τοῦτό τε καὶ τὸ ἐν τοῖς βιβλίοις γινόμενον σκορπιῶδες.

Τὰ δὲ πτηνὰ αὐτῶν πρὸς τοῖς ἄλλοις μορίοις καὶ πτερὰ ἔχει. Ἔστι δὲ τὰ μὲν δίπτερα αὐτῶν, ὥσπερ αἱ μυῖαι, τὰ δὲ τετράπτερα, ὥσπερ αἱ μέλιτται· οὐθὲν δ' ἐστὶν ὀπισθοκέντρον δίπτερον μόνον. Ἔτι δὲ τὰ

μὲν ἔχει τῶν πτηνῶν ἔλутρον τοῖς περοῖς, ὥσπερ ἡ μηλολόνθη, τὰ δ' ἀνέλутρά ἐστιν, ὥσπερ ἡ μέλιττα· ἀνορροπύγιος δ' ἡ πτησίς αὐτῶν ἀπάντων ἐστί, καὶ τὸ περὸν οὐκ ἔχει καυλὸν οὐδὲ σχίσιν. Ἔτι κεραίας πρὸ τῶν ὀμμάτων ἔχει ἓνια, οἷον αἶ τε ψυχαὶ καὶ οἱ κάραβοι.

Ὅσα δὲ πηδητικὰ αὐτῶν ἐστί, τούτων τὰ μὲν ἔχει τὰ ὀπισθεν σκέλη μείζω, τὰ δὲ πηδάλια καμπτόμενα εἰς τοῦπισθεν ὥσπερ τὰ τῶν τετραπόδων σκέλη.

Πάντα δ' ἔχει τὰ πρηνῇ πρὸς τὰ ὕπτια διάφορα, ὥσπερ καὶ τᾶλλα ζῶα. Ἡ δὲ τοῦ σώματος σὰρξ οὐτ' ὀστρακώδης ἐστὶν οὐθ' οἷον τὸ ἐντὸς τῶν ὀστρακωδῶν, οὐτε σαρκώδης, ἀλλὰ μετὰξύ. Διὸ καὶ οὐτ' ἄκανθαν ἔχουσιν οὐτ' (532b.) ὀστοῦν οὐθ' οἷον σήπιον οὐτε κύκλω ὀστρακον· αὐτὸ γὰρ αὐτὸ τὸ σῶμα διὰ τὴν σκληρότητα σώζει, καὶ οὐ προσδεῖται ἐτέρου ἐρείσματος. Δέρμα δ' ἔχουσι μὲν, ἀάμπαν δὲ τοῦτο λεπτόν.

Τὰ μὲν οὖν ἔξωθεν αὐτῶν μόρια ταῦτα καὶ τοιαῦτ' ἐστίν, ἐντὸς δ' εὐθύς μετὰ τὸ στόμα ἔντερον τοῖς μὲν πλείστοις εὐθὺ καὶ ἀπλοῦν μέχρι τῆς ἐξόδου ἐστίν, ὀλίγοις δ' ἔλιγμόν ἔχει. Σπλάγχνον δ' οὐδὲν ἔχει τῶν τοιούτων οὐδὲ πιμελήν, ὥσπερ οὐδ' ἄλλο τῶν ἀναίμων οὐδέν. Ἔνια δ' ἔχει καὶ κοιλίαν, καὶ ἀπὸ ταύτης τὸ λοιπὸν ἔντερον ἢ ἀπλοῦν ἢ εἰλιγμένον, ὥσπερ αἱ ἀκρίδες.

Ὁ δὲ τέττιξ μόνον τῶν τοιούτων καὶ τῶν ἄλλων ζῶων στόμα οὐκ ἔχει, ἀλλ' οἷον τοῖς ὀπισθοκέντροις τὸ γλωττοειδές, τοῦτο μακρὸν καὶ συμφυές καὶ ἀδιάσχιτον, δι' οὗ τῇ δρόσῳ τρέφεται μόνον· ἐν δὲ τῇ κοιλίᾳ οὐκ ἴσχει περίττωμα. Ἔστι δ' αὐτῶν πλείω εἶδη, καὶ διαφέρουσι μεγέθει τε καὶ μικρότητι καὶ τῷ τοὺς μὲν καλουμένους ἀχέτας ὑπὸ τὸ διάζωμα διηρησθαι καὶ ἔχειν ὑμένα φανερόν, τὰ δὲ τεττιγόνια μὴ ἔχειν.

Ἔστι δ' ἓνια ζῶα περιττὰ καὶ ἐν τῇ θαλάττῃ, ἃ διὰ τὸ σπάνια εἶναι οὐκ ἔστι θεῖναι εἰς γένος. Ἦδη γάρ φασί τινες τῶν ἐμπειρικῶν ἀλίεων [οἱ μὲν] ἑωρακεῖν ἐν τῇ θαλάττῃ ὅμοια δοκίοις, μέλανα, στρογγύλα τε καὶ ἰσοπαχῇ· ἕτερα δὲ καὶ ἀσπίσιν ὅμοια, τὸ μὲν χρῶμα ἐρυθρά, περύγια δ' ἔχοντα πυκνά· καὶ ἄλλα ὅμοια αἰδοίῳ ἀνδρὸς τό τ' εἶδος καὶ τὸ μέγεθος, πλὴν ἀντὶ τῶν ὄρχεων περύγια ἔχειν δύο, καὶ λαβέσθαι ποτὲ τοῦ πολυαγκίστρου τῷ ἄκρῳ.

Τὰ μὲν οὖν μέρη τῶν ζῶων ἀπάντων τά τ' ἐκτὸς καὶ τὰ ἐντὸς περὶ ἕκαστον γένος καὶ ἰδίᾳ καὶ κοινῇ τοῦτον ἔχει τὸν τρόπον.

Κεφάλαιο 8

Περὶ δὲ τῶν αἰσθήσεων νῦν λεκτέον· οὐ γὰρ ὁμοίως ἀπᾶσιν ὑπάρχουσιν, ἀλλὰ τοῖς μὲν πᾶσαι τοῖς δ' ἐλάττους εἰσίν. Εἰσὶ δ' αἱ πλεῖσται, καὶ παρ' ἃς οὐδεμία φαίνεται ἴδιος ἐτέρα, πέντε τὸν ἀριθμόν, ὄψις, ἀκοή, ὄσφρησις, γεῦσις, ἀφή. Ἄνθρωπος μὲν οὖν καὶ τὰ ζωοτόκα καὶ πεζά, (533a.) πρὸς δὲ τούτοις καὶ ὅσα ἔναιμα καὶ φωτόκα, πάντα φαίνεται ἔχοντα ταύτας πάσας, πλὴν εἴ τι πεπῆρωται γένος ἔν, οἷον τὸ τῶν ἀσπαλάκων. Τοῦτο γὰρ ὄψιν οὐκ ἔχει· ὀφθαλμοὺς γὰρ ἐν μὲν τῷ φανερῷ οὐκ ἔχει, ἀφαιρεθέντος δὲ τοῦ δέρματος ὄντος παχέος ἀπὸ τῆς κεφαλῆς κατὰ τὴν χώραν τὴν ἔξω τῶν ὀμμάτων ἔσωθέν εἰσιν οἱ ὀφθαλμοὶ διεφθαρμένοι, πάντ' ἔχοντες ταῦτα τὰ μέρη τοῖς ἀληθινοῖς· ἔχουσι γὰρ τό τε μέλαν καὶ τὸ ἐντὸς τοῦ μέλανος, τὴν καλουμένην κόρην, καὶ τὸ κύκλω πῖον, ἐλάττω μέντοι ταῦτα πάντα τῶν φανερῶν ὀφθαλμῶν. Εἰς δὲ τὸ ἔξωθεν οὐδὲν σημαίνει τούτων διὰ τὸ τοῦ δέρματος πάχος, ὥς ἐν τῇ γενέσει πηρουμένης τῆς φύσεως· εἰσὶ γὰρ ἀπὸ τοῦ ἐγκεφάλου, ἧ συνάπτει τῷ μυελῷ, δύο πόροι νευρώδεις καὶ ἰσχυροὶ παρ' αὐτὰς τείνοντες τὰς ἑδρας τῶν ὀφθαλμῶν, τελευτῶντες δ' εἰς τοὺς ἄνω χαυλιόδοντας.

Τὰ δ' ἄλλα καὶ τῶν χρωμάτων αἰσθησιν ἔχει καὶ τῶν ψόφων, ἔτι δ' ὁσμῆς καὶ χυμῶν. Τὴν δὲ πέμπτην αἰσθησιν τὴν ἀφὴν καλουμένην καὶ τᾶλλα πάντ' ἔχει ζῷα.

Ἐν μὲν οὖν ἐνίοις [καὶ] τὰ αἰσθητήρια φανερώτατά ἐστι, τὰ μὲν τῶν ὀμμάτων καὶ μᾶλλον. Διωρισμένον γὰρ ἔχει τὸν τόπον τῶν ὀφθαλμῶν καὶ τὸν τῆς ἀκοῆς· ἓν μὲν γὰρ ὧτα ἔχει, ἓν δὲ τοὺς πόρους φανερούς. Ὅμοίως δὲ καὶ περὶ ὀσφρήσεως· τὰ μὲν γὰρ ἔχει μυκτῆρας, τὰ δὲ τοὺς πόρους τῆς ὀσφρήσεως, οἷον τὸ τῶν ὀρνίθων γένος. Ὅμοίως δὲ καὶ τὸ τῶν χυμῶν αἰσθητήριον, τὴν γλῶτταν. Ἐν δὲ τοῖς ἐνύδροις, καλουμένοις δ' ἰχθύσι, τὸ μὲν τῶν χυμῶν αἰσθητήριον, τὴν γλῶτταν, ἔχουσι μὲν, ἔχουσι δ' ἀμυδρῶς· ὁστώδη γὰρ καὶ οὐκ ἀπολελυμένην ἔχουσιν. Ἀλλ' ἐνίοις τῶν ἰχθύων ὁ οὐρανός ἐστι σαρκώδης, οἷον τῶν ποταμίων ἐν τοῖς κυπρίνοις, ὥστε τοῖς μὴ σκοπομένοις ἀκριβῶς δοκεῖν ταύτην εἶναι γλῶτταν.

Ὅτι δ' αἰσθάνονται γεύόμενα, φανερόν· ἰδίους τε γὰρ πολλὰ χαίρει χυμοῖς, καὶ τὸ τῆς ἀμίας λαμβάνουσι μάλιστα δέλεαρ καὶ τὸ τῶν πiónων ἰχθύων, ὥς χαίροντες ἐν τῇ γεύσει καὶ ἐδωδῇ τοῖς

τοιούτοις δελέασιν. Τῆς δ' ἀκοῆς καὶ τῆς (533b.) ὀσφρήσεως οὐδὲν ἔχουσι φανερόν αἰσθητήριον· ἃ γὰρ ἂν τισιν εἶναι δόξειε κατὰ τοὺς τόπους τῶν μυκτῆρων, οὐδὲν περαίνει πρὸς τὸν ἐγκέφαλον, ἀλλὰ τὰ μὲν τυφλά, τὰ δὲ φέρει μέχρι τῶν βραγχίων. Ὅτι δὲ καὶ ἀκούουσι καὶ ὀσφραίνονται, φανερόν· τοὺς τε γὰρ ψόφους φεύγοντα φαίνεται τοὺς μεγάλους, οἷον τὰς εἰρεσίας τῶν τριήρων, ὥστε λαμβάνεσθαι ῥαδίως ἐν ταῖς θαλάμαις· καὶ γὰρ ἂν μικρὸς ἦ ὁ ἔξω ψόφος, ὅμως τοῖς ἐν τῷ ὑγρῷ τὴν ἀκοὴν ἔχουσι χαλεπὸς καὶ μέγας καὶ βαρὺς φαίνεται πᾶσιν. Ὁ συμβαίνει καὶ ἐπὶ τῆς τῶν δελφίνων θήρας· ὅταν γὰρ ἀθρόως περικυκλώσωσι τοῖς μονοξύλοις, ψοφοῦντες ἐξ αὐτῶν ἐν τῇ θαλάττῃ ἀθρόους ποιοῦσιν ἐξοκέλλειν φεύγοντας εἰς τὴν γῆν, καὶ λαμβάνουσιν ὑπὸ τοῦ ψόφου καρηβαροῦντας.

Καίτοι οὐδ' οἱ δελφῖνες τῆς ἀκοῆς φανερόν οὐδὲν ἔχουσιν αἰσθητήριον. Ἔτι δ' ἐν ταῖς θήραις τῶν ἰχθύων ὅτι μάλιστα εὐλαβοῦνται ψόφον ποιεῖν ἢ κώπης ἢ δικτύων οἱ περὶ τὴν θήραν ταύτην ὄντες· ἀλλ' ὅταν κατανοήσωσιν ἓν τινι τόπῳ πολλοὺς ἀθρόους ὄντας, ἐκ τοσούτου τόπου τεκμαιρόμενοι τὰ δίκτυα καθιᾶσιν, ὅπως μήτε κώπης μήτε τῆς ῥύμης τῆς ἀλιάδος ἀφίκηται πρὸς τὸν τόπον ἐκείνον ὁ ψόφος· παραγγέλλουσί τε πᾶσι τοῖς ναύταις ὅτι μάλιστα σιγῇ πλεῖν, μέχρι περ ἂν κυκλώσωσιν. Ἐνίστε δ' ὅταν βούλωνται συνδραμεῖν, ταῦτόν ποιοῦσιν ὅπερ ἐπὶ τῆς τῶν δελφίνων θήρας· ψοφοῦσι γὰρ λίθοις, ἵνα φοβηθέντες συνθέωσιν εἰς ταῦτόν καὶ τοῖς δικτύοις οὕτω περιβάλλωνται. Καὶ πρὶν μὲν συγκλεῖσαι, καθάπερ εἴρηται, κωλύουσι ψοφεῖν, ὅταν δὲ κυκλώσωσι, κελεύουσιν ἤδη βοᾶν καὶ ψοφεῖν· τὸν γὰρ ψόφον καὶ τὸν θόρυβον ἀκούοντες ἐμπίπτουσι διὰ τὸν φόβον.

Ἔτι δ' ὅταν ἴδωσιν οἱ ἀλιεῖς ἐκ πάνυ πολλοῦ νεμομένους ἀθρόους πολλοὺς ἐν ταῖς γαλήναις καὶ εὐδίαις ἐπιπολάζοντας, καὶ βουλευθῶσιν ἰδεῖν τὰ μεγέθη καὶ τί τὸ γένος αὐτῶν, ἂν μὲν ἀποφῇτι προσπλεύσωσι, λανθάνουσι καὶ καταλαμβάνουσιν ἐπιπολάζοντας ἔτι, ἐὰν δὲ τις τύχῃ ψοφήσας πρότερον, φανεροὶ εἰσι φεύγοντες.

Ἔτι δ' ἐν τοῖς (534a.) ποταμοῖς εἰσιν ἰχθύδια ἄττα ἃ καλοῦσιν τινες κόττους· ταῦτα θηρεύουσιν τινες διὰ τὸ ὑπὸ ταῖς πέτραις ὑποδεδυκέναι κόπτοντες τὰς πέτρας λίθοις· τὰ δ' ἐκπίπτει παραφερόμενα ὡς ἀκούοντα καὶ καρηβαροῦντα ὑπὸ τοῦ ψόφου.

Ὅτι μὲν οὖν ἀκούουσιν, ἐκ τῶν τοιούτων ἐστὶ φανερόν· εἰσὶ δὲ τινες οἳ φασὶ καὶ μάλιστα ὀξυηκόους εἶναι τῶν ζώων τοὺς ἰχθῦς, ἐκ

τοῦ διατρίβοντα περὶ τὴν θάλατταν ἐντυγχάνειν τοιοῦτοις πολλοῖς. Μάλιστα δὲ τῶν ἰχθύων εἰσὶν ὀξυήκοοι κεστρεύς, λάβραξ, σάλπη, χρομὶς, καὶ ὅσοι ἄλλοι τοιοῦτοι τῶν ἰχθύων· οἱ δ' ἄλλοι τούτων ἦττον, διὸ μᾶλλον πρὸς τῷ ἐδάφει τῆς θαλάττης ποιοῦνται τὰς διαγωγάς.

Ὅμοίως δὲ καὶ περὶ ὀσφρήσεως. Τοῦ τε γὰρ μὴ προσφάτου δελέατος οὐκ ἐθέλουσιν ἄπτεσθαι οἱ πλεῖστοι τῶν ἰχθύων, τοῖς τε δελέασιν οὐ τοῖς αὐτοῖς ἀλίσκονται πάντες ἀλλ' ἰδίους, διαγινώσκοντες τῷ ὀσφραίνεσθαι· ἕνια γὰρ δελεάζεται τοῖς δυσώδεσιν, ὥσπερ ἡ σάλπη τῇ κόπρῳ. Ἔτι δὲ πολλοὶ τῶν ἰχθύων διατρίβουσιν ἐν σπηλαίοις, οὓς ἐπειδὴν βούλονται προκαλέσασθαι εἰς τὴν θήραν οἱ ἀλιεῖς, τὸ στόμα τοῦ σπηλαίου περιαλείφουσι ταριχηραῖς ὀσμαῖς, πρὸς ἃς ἐξέρχονται ταχέως. Ἀλίσκεται δὲ καὶ ἡ ἔγγελυς τοῦτον τὸν τρόπον· τιθέασι γὰρ τῶν ταριχηρῶν τι κεραμίων, ἐνθέντες εἰς τὸ στόμα τοῦ κεραμίου τὸν καλούμενον ἡθμόν. Καὶ ὅλως δὲ πρὸς τὰ κνισώδη φέρονται πάντες θᾶπτον. Καὶ τῶν σπηλιῶν δὲ τὰ σαρκία σταθεύσαντες ἔνεκα τῆς ὀσμῆς δελεάζουσι τούτοις· προσέρχονται γὰρ μᾶλλον. Τοὺς δὲ πολύπους φασὶν ὀπτήσαντες εἰς τοὺς κύρτους ἐντιθέσθαι οὐδενὸς ἄλλου χάριν ἢ τῆς κνίσης.

Ἔτι δ' οἱ ρυάδες ἰχθύες, ὅταν ἐκχυθῇ τὸ πλῦμα τῶν ἰχθύων, ἢ τῆς ἀντλίας ἐκχυθείσης, φεύγουσιν ὡς ὀσφραινόμενοι τῆς ὀσμῆς αὐτῶν. Καὶ τοῦ αὐτῶν δὴ αἵματος (534b.) τάχιστα ὀσφραίνεσθαι φασιν αὐτούς· δηλὸν δὲ ποιοῦσι φεύγοντες καὶ ἐκτοπίζοντες μακράν, ὅταν αἷμα γένηται ἰχθύων. Καὶ ὅλως δ' ἐὰν μὲν σαπρῷ τις δελέατι δελεάσῃ τὸν κύρτον, οὐκ ἐθέλουσιν εἰσδύνειν οὐδὲ πλησιάζειν, ἐὰν δὲ νεαρῷ δελέατι καὶ κεκνισμένῳ, εὐθὺς φερόμενοι πόρρωθεν εἰσδύνουσιν.

Μάλιστα δὲ φανερόν ἐστι περὶ τῶν εἰρημένων ἐπὶ τῶν δελφίνων· οὗτοι γὰρ τῆς ἀκοῆς αἰσθητήριον μὲν οὐδὲν ἔχουσι φανερόν, ἀλίσκονται δὲ διὰ τὸ κερηβαρεῖν ὑπὸ τοῦ ψόφου, καθάπερ εἴρηται πρότερον. Οὐδὲ δὴ τῆς ὀσφρήσεως αἰσθητήριον οὐδὲν ἔχει φανερόν, ὀσφραίνεται δ' ὀξέως.

Ὅτι μὲν οὖν πάσας τὰς αἰσθήσεις ἔχει ταῦτα τὰ ζῷα, φανερόν· τὰ δὲ λοιπὰ γένη τῶν ζώων ἐστὶ μὲν τέτταρα διηρημένα εἰς γένη, ἃ περιέχει τὸ πλῆθος τῶν λοιπῶν ζώων, τὰ τε μαλάκια καὶ τὰ μαλακόστρακα καὶ τὰ ὀστρακόδερμα καὶ ἔτι τὰ ἔντομα.

Τούτων δὲ τὰ μὲν μαλάκια καὶ τὰ μαλακόστρακα καὶ τὰ ἔντομα

ἔχει πάσας τὰς αἰσθήσεις· καὶ γὰρ ὄψιν ἔχει καὶ ὄσφρησιν καὶ γεῦσιν.

Τὰ τε γὰρ ἔντομα ὄντα πόρρω συναισθάνεται, καὶ τὰ πτερωτὰ καὶ τὰ ἅπτερα, οἷον αἱ μέλιτται καὶ οἱ κνῖπες τοῦ μέλιτος· ἐκ πολλοῦ γὰρ αἰσθάνονται ὡς τῇ ὁσμῇ γινώσκοντα. Καὶ ὑπὸ τῆς τοῦ θεοῦ ὁσμῆς πολλὰ ἀπόλλυται.

Ἔτι δ' οἱ μύρμηκες ὑπ' ὀριγάνου καὶ θεοῦ περιπαττομένων λείων ἐκλείπουσι τὰς μυρμηκίας, καὶ ἐλαφείου κέρατος θυμιωμένου τὰ πλεῖστα φεύγει τῶν τοιούτων· μάλιστα δὲ φεύγουσι θυμιωμένου τοῦ στύρακος.

Ἔτι δ' αἱ σηπία καὶ οἱ πολύποδες καὶ οἱ κάραβοι τοῖς δελέασιν ἀλίσκονται· καὶ οἱ γε πολύποδες οὕτω μὲν προσέχονται ὥστε μὴ ἀποσπᾶσθαι ἀλλ' ὑπομένειν τεμνόμενοι· ἐὰν δέ τις κόνυζαν προσενέγκῃ, ἀφιασιν εὐθέως ὁσμώνενοι.

Ὁμοίως δὲ καὶ περὶ (535a.) γεύσεως· τὴν τε γὰρ τροφὴν ἑτέραν διώκουσι, καὶ οὐ τοῖς αὐτοῖς πάντα χαίρει χυμοῖς, οἷον ἡ μέλιττα πρὸς οὐδὲν προσιζάνει σαπρὸν ἀλλὰ πρὸς τὰ γλυκέα, ὁ δὲ κώνωψ πρὸς οὐδὲν γλυκὺ ἀλλὰ πρὸς τὰ ὀξεᾶ. Τὸ δὲ τῇ ἀφῇ αἰσθάνεσθαι, ὥσπερ καὶ πρότερον εἴρηται, πᾶσιν ὑπάρχει τοῖς ζώοις.

Τὰ δ' ὀστρακοδέρμα ὄσφρησιν μὲν καὶ γεῦσιν ἔχει, φανερόν δ' ἐκ τῶν δελεασμῶν, οἷον ἐπὶ τῆς πορφύρας· αὕτη γὰρ δελεάζεται τοῖς σαπροῖς, καὶ προσέρχεται πρὸς τὸ τοιοῦτον δέλεαρ ὡς αἰσθήσιν ἔχουσα πόρρωθεν. Καὶ τῶν χυμῶν δ' ὅτι αἰσθήσιν ἔχει, φανερόν ἐκ τῶν αὐτῶν· πρὸς ἃ γὰρ διὰ τὰς ὁσμάς προσέρχεται κρίναντα, τούτων χαίρει καὶ τοῖς χυμοῖς ἕκαστα. Ἔτι δ' ὅσα ἔχει στόμα, χαίρει καὶ λυπεῖται τῇ τῶν χυμῶν ᾄψει.

Περὶ δ' ὄψεως καὶ ἀκοῆς βέβαιον μὲν οὐδὲν ἐστίν οὐδὲ λίαν φανερόν, δοκοῦσι δ' οἱ τε σωλῆνες, ἂν τις ψοφήσῃ, καταδύεσθαι, καὶ φεύγειν κατωτέρω, ὅταν αἰσθωνται τὸ σιδήριον προσίόν (ὑπερέχει γὰρ αὐτῶν μικρόν, τὸ δ' ἄλλο ὥσπερ ἐν θαλάμῃ ἐστίν), καὶ οἱ κτένες, ἐὰν τις προσφέρῃ τὸν δάκτυλον, χάσκουσι καὶ συμμύουσιν ὡς ὁρῶντες. Καὶ τοὺς νηρείτας δ' οἱ θηρεύοντες οὐ κατὰ πνεῦμα προσιόντες θηρεύουσιν, ὅταν θηρεύσωσιν αὐτοὺς εἰς τὸ δέλεαρ, οὐδὲ φθεγγόμενοι ἀλλὰ σιωπῶντες ὡς ὁσφραινομένων καὶ ἀκουόντων· ἐὰν δὲ φθέγγωνται, φασὶν ὑποφεύγειν αὐτούς. Ἦκιστα δὲ τὴν ὄσφρησιν τῶν ὀστρακοδέρμων φαίνεται ἔχειν τῶν μὲν πορευτικῶν ἐχθίος, τῶν δ' ἀκινήτων τήθυα καὶ βάλανοι.

Περὶ μὲν οὖν τῶν αἰσθητηρίων τοῦτον ἔχει τὸν τρόπον τοῖς ζώοις
πᾶσιν, περὶ δὲ φωνῆς τῶν ζώων ὧδ' ἔχει.

Κεφάλαιο 9

Φωνή καὶ ψόφος ἕτερόν ἐστι, καὶ τρίτον διάλεκτος. Φωνεῖ μὲν οὖν οὐδενὶ τῶν ἄλλων μορίων οὐδὲν πλὴν τῷ φάρυγγι· διὸ ὅσα μὴ ἔχει πλεύμονα, οὐδὲ φθέγγεται· διάλεκτος δ' ἡ τῆς φωνῆς ἐστὶ τῇ γλώττῃ διάρθρωσις. Τὰ μὲν οὖν φωνήεντα ἢ φωνὴ καὶ ὁ λάρυγξ ἀφήσιν, τὰ δ' ἄφωνα ἢ (535b.) γλῶττα καὶ τὰ χεῖλη· ἐξ ὧν ἡ διάλεκτός ἐστιν. Διὸ ὅσα γλῶτταν μὴ ἔχει ἢ μὴ ἀπολελυμένην, οὐ διαλέγεται. Ψοφεῖν δ' ἔστι καὶ ἄλλοις μορίοις. Τὰ μὲν οὖν ἔντομα οὔτε φωνεῖ οὔτε διαλέγεται, ψοφεῖ δὲ τῷ ἔσω πνεύματι, οὐ τῷ θύραζε· οὐδὲν γὰρ ἀναπνεῖ αὐτῶν, ἀλλὰ τὰ μὲν βομβεῖ, οἷον μέλιττα καὶ τὰ πτηνὰ αὐτῶν, τὰ δ' ἄδειν λέγεται, οἷον οἱ τέττιγες. Πάντα δὲ ταῦτα ψοφεῖ τῷ ὑμένι τῷ ὑπὸ τὸ ὑπόζωμα, ὅσων διήρηται, οἷον τῶν τεττίγων τι γένος τῇ τρίψει τοῦ πνεύματος. Καὶ αἱ μυῖαι δὲ καὶ αἱ μέλιττα καὶ τᾶλλα πάντα, τῇ πτήσει αἶροντα καὶ συστέλλοντα· ὁ γὰρ ψόφος τρίψις τοῦ ἔσω πνεύματος ἐστίν. Αἱ δ' ἀκρίδες τοῖς πηδαλίοις τρίβουσαι ποιοῦσι τὸν ψόφον.

Οὐδὲ δὴ τῶν μαλακίων οὐδὲν οὔτε φθέγγεται οὔτε ψοφεῖ οὐδένα φυσικὸν ψόφον, οὐδὲ τῶν μαλακοστράκων. Οἱ δ' ἰχθύες ἄφωνοι μὲν εἰσιν (οὔτε γὰρ πλεύμονα οὔτ' ἀρτηρίαν καὶ φάρυγγα ἔχουσι), ψόφους δὲ τινὰς ἀφιάσι καὶ τριγμοὺς οὓς λέγουσι φωνεῖν, οἷον λύρα καὶ χρομῖς (οὔτοι γὰρ ἀφιάσιν ὥσπερ γρυλισμόν) καὶ ὁ κάπρος ὁ ἐν τῷ Ἀχελῷ, ἔτι δὲ χαλκίς καὶ κόκκυξ· ἡ μὲν γὰρ ψοφεῖ οἷον συριγμόν, ὁ δὲ παραπλήσιον τῷ κόκκυγι ψόφον, ὅθεν καὶ τούνομα ἔχει. Πάντα δὲ ταῦτα τὴν δοκοῦσαν φωνὴν ἀφιάσι, τὰ μὲν τῇ τρίψει τῶν βραγχίων (ἀκανθώδεις γὰρ οἱ τόποι), τὰ δὲ τοῖς ἐντὸς τοῖς περὶ τὴν κοιλίαν· πνεῦμα γὰρ ἔχει τούτων ἕκαστον, ὃ προστρίβοντα καὶ κινοῦντα ποιεῖ τοὺς ψόφους. Καὶ τῶν σελαχῶν δ' ἔνια δοκεῖ τρίζειν. Ἀλλὰ ταῦτα φωνεῖν μὲν οὐκ ὀρθῶς ἔχει φάναι, ψοφεῖν δέ. Καὶ γὰρ οἱ κτένες ὅταν φέρωνται ἀπereiδόμενοι τῷ ὑγρῷ, ὃ καλοῦσι πέτεσθαι, ῥοιζοῦσι, καὶ αἱ χελιδόνες αἱ θαλάττιαι ὁμοίως· καὶ γὰρ αὗται πέτονται μετέωροι, οὐχ ἀπτόμεναι τῆς θαλάττης· τὰ γὰρ πτερύγια ἔχουσι πλατέα καὶ μακρά. Ὡσπερ οὖν τῶν ὀρνίθων πετομένων ὁ γινόμενος ταῖς πτέρυξι ψόφος οὐ φωνή ἐστίν, οὕτως οὐδὲ τῶν τοιούτων οὐδενός.

Ἀφήσι δὲ καὶ ὁ δελφὶς τριγμόν καὶ μύζει, (536a.) ὅταν ἐξέλθῃ, ἐν

τῷ ἀέρι, οὐχ ὁμοίως δὲ τοῖς εἰρημένοις· ἔστι γὰρ τούτῳ φωνή· ἔχει γὰρ καὶ πλεύμονα καὶ ἀρτηρίαν, ἀλλὰ τὴν γλῶτταν οὐκ ἀπολελυμένην οὐδὲ χεῖλη ὥστε ἄρθρον τι τῆς φωνῆς ποιεῖν.

Τῶν δ' ἐχόντων γλῶτταν καὶ πλεύμονα ὅσα μὲν φωτόκα ἐστὶ καὶ τετράποδα, ἀφήσι μὲν φωνήν, ἀσθενῇ δέ, καὶ τὰ μὲν συριγμόν, ὥσπερ οἱ ὄφεις, τὰ δὲ λεπτήν καὶ ἀσθενῇ φωνήν, τὰ δὲ σιγμὸν μικρόν, ὥσπερ αἱ χελῶναι. Ὁ δὲ βάτραχος ἰδίαν ἔχει τὴν γλῶτταν· τὸ μὲν γὰρ ἔμπροσθεν προσπέφυκεν ἰχθυωδῶς, ὃ τοῖς ἄλλοις ἀπολέλυσται, τὸ δὲ πρὸς τὸν φάρυγγα ἀπολέλυσται καὶ πέπτυκται, ᾧ τὴν ἰδίαν ἀφήσι φωνήν. Καὶ τὴν ὀλολυγὸνα δὲ τὴν γινομένην ἐν τῷ ὕδατι οἱ βάτραχοι οἱ ἄρρενες ποιοῦσιν, ὅταν ἀνακαλῶνται τὰς θηλείας πρὸς τὴν ὀχείαν· εἰσὶ γὰρ ἐκάστοις τῶν ζώων ἴδια φωναὶ πρὸς τὴν ὀμιλίαν καὶ τὸν πλησιασμόν, οἷον καὶ τράγοις καὶ ὑσὶ καὶ προβάτοις.

Ποιεῖ δὲ τὴν ὀλολυγὸνα, ὅταν ἰσοχειλῇ τὴν κάτω σιαγὸνα ποιήσας ἐπὶ τῷ ὕδατι περιτείνῃ τὴν ἄνω. Δοκεῖ δὲ διαλαμπουσῶν τῶν σιαγόνων ἐκ τῆς ἐπιτάσεως ὥσπερ λύχνοι φαίνεσθαι οἱ ὀφθαλμοί· ἡ γὰρ ὀχεία τὰ πολλὰ γίνεται νύκτωρ.

Τὸ δὲ τῶν ὀρνίθων γένος ἀφήσι φωνήν· καὶ μάλιστα ἔχει διάλεκτον ὅσοις ὑπάρχει ἡ γλῶττα πλατεῖα, καὶ ὅσα ἔχουσι τὴν γλῶτταν αὐτῶν λεπτήν. Ἐνια μὲν οὖν τὴν αὐτὴν ἀφιάσι φωνήν τὰ τε θήλεα καὶ τὰ ἄρρενα, ἔνια δ' ἐτέραν.

Πολύφωνα δ' ἐστὶ καὶ λαλίστερα τὰ ἐλάττω τῶν μεγάλων· καὶ μάλιστα περὶ τὴν ὀχείαν ἕκαστον γίνεται τῶν ὀρνέων τοιοῦτον. Καὶ τὰ μὲν μαχόμενα φθέγγεται, οἷον ὄρνυξ, τὰ δὲ πρὸ τοῦ μάχεσθαι προκαλούμενα <οἷον πέρδικες>, ἡ νικῶντα, οἷον ἀλεκτρυόνες. Ἄδουσι δ' ἔνια μὲν ὁμοίως τὰ ἄρρενα τοῖς θήλεσιν, οἷον καὶ ἀηδὼν ἄδει καὶ ὁ ἄρρην καὶ ἡ θήλεια, πλὴν ἡ θήλεια παύεται ὅταν ἐπφάξῃ καὶ τὰ νεόττια ἔχῃ· ἐνίων δὲ τὰ ἄρρενα μᾶλλον, οἷον ἀλεκτρυόνες καὶ ὄρνυγες, αἱ δὲ θήλειαι οὐκ ἄδουσιν.

Τὰ δὲ ζωτόκα καὶ τετράποδα ζῶα ἄλλο (536b.) ἄλλην φωνήν ἀφήσι, διάλεκτον δ' οὐδὲν ἔχει, ἀλλ' ἴδιον τοῦτ' ἀνθρώπου ἐστίν· ὅσα μὲν γὰρ διάλεκτον ἔχει, καὶ φωνήν ἔχει, ὅσα δὲ φωνήν, οὐ πάντα διάλεκτον. Ὅσοι δὲ γίνονται κωφοὶ ἐκ γενετῆς, πάντες καὶ ἐνεοὶ γίνονται· φωνήν μὲν οὖν ἀφιάσι, διάλεκτον δ' οὐδεμίαν. Τὰ δὲ παιδία ὥσπερ καὶ τῶν ἄλλων μορίων οὐκ ἐγκρατὴ ἐστίν, οὕτως οὐδὲ τῆς γλώττης τὸ πρῶτον, καὶ ἔστιν ἀτελής, καὶ ἀπολύεται ὀψιαίτερον,

ὥστε ψελλίζουσι καὶ τραυλίζουσι τὰ πολλά.

Διαφέρουσι δὲ κατὰ τοὺς τόπους καὶ αἱ φωναὶ καὶ αἱ διάλεκτοι. Ἡ μὲν οὖν φωνὴ ὀξύτητι καὶ βαρύτητι μάλιστα ἐπίδηλος, τὸ δ' εἶδος οὐδὲν διαφέρει τῶν αὐτῶν γενῶν· ἡ δ' ἐν τοῖς ἄρθροις, ἣν ἂν τις ὥσπερ διάλεκτον εἴπειεν, καὶ τῶν ἄλλων ζώων διαφέρει καὶ τῶν ἐν ταῦτῳ γένει ζώων κατὰ τοὺς τόπους, οἷον τῶν περδίκων οἱ μὲν κακκαβίζουσιν οἱ δὲ τρίζουσιν. Καὶ τῶν μικρῶν ὀρνιθίων ἓνια οὐ τὴν αὐτὴν φωνὴν ἀφίησι ἐν τῷ ἄδειν τοῖς γεννήσασιν, ἂν ἀπότροφα γένωνται καὶ ἄλλων ἀκούσωσιν ὀρνιθίων ὀδόντων. Ἦδη δ' ὥπται καὶ ἀηδῶν νεοττὸν προδιδάσκουσα, ὥς οὐχ ὁμοίας φύσει τῆς διαλέκτου οὔσης καὶ τῆς φωνῆς, ἀλλ' ἐνδεχόμενον πλάττεσθαι. Καὶ οἱ ἄνθρωποι φωνὴν μὲν τὴν αὐτὴν ἀφιᾶσι, διάλεκτον δ' οὐ τὴν αὐτήν. Ὁ δ' ἐλέφας φωνεῖ ἄνευ μὲν τοῦ μυκτῆρος αὐτῷ τῷ στόματι πνευματῶδες ὥσπερ ὅταν ἄνθρωπος ἐκπνέῃ καὶ αἰάζῃ, μετὰ δὲ τοῦ μυκτῆρος ὅμοιον σάλπιγγι τετραχυσμένη.

Κεφάλαιο 10

Περὶ δ' ὕπνου καὶ ἐγρηγόρσεως τῶν ζώων, ὅτι μὲν ὅσα περὶ αὐτὰ καὶ ἔναιμα πάντα καθεύδει καὶ ἐγρήγορεν, φανερόν ποιοῦσι κατὰ τὴν αἴσθησιν. Πάντα γὰρ ὅσα ἔχει βλεφαρίδας, μύοντα ποιεῖται τὸν ὕπνον. Ἔτι δ' ἐνυπνιάζειν φαίνονται οὐ μόνον ἄνθρωποι, ἀλλὰ καὶ ἵπποι καὶ κύνες καὶ βόες, ἔτι δὲ πρόβατα καὶ αἰγες καὶ πᾶν τὸ τῶν ζωοτόκων καὶ τετραπόδων γένος· δηλοῦσι δ' οἱ κύνες τῷ ὕλαγμῳ. Περὶ δὲ τῶν φωτοκούντων τοῦτο μὲν ἄδηλον, ὅτι δὲ καθεύδουσι, φανερόν. Ὅμοίως δὲ καὶ τὰ ἐνυδρα, οἷον οἱ τ' ἰχθύες καὶ τὰ (537a.) μαλάκια καὶ τὰ μαλακόστρακα, κάραβοι τε καὶ τὰ τοιαῦτα. Βραχύπνυα μὲν οὖν ἐστὶ πάντα ταῦτα, φαίνεται δὲ καθεύδοντα. Σημεῖον δὲ κατὰ μὲν τὰ ὄμματα οὐκ ἔστι λαβεῖν (οὐδὲν γὰρ ἔχει βλέφαρα αὐτῶν), ἀλλὰ ταῖς ἀτρεμίαις.

Ἀλίσκονται γὰρ οἱ ἰχθύες, εἰ μὴ διὰ τοὺς φθειρας καὶ τοὺς καλουμένους ψύλλους, κἂν ὥστε τῇ χειρὶ λαμβάνειν ῥαδίως· νῦν δ', ἂν χρονίζωσιν, οὗτοι τῆς νυκτὸς κατεσθίουσι προσπίπτοντες, πολλοὶ τὸ πλῆθος ὄντες. Γίνονται δ' ἐν τῷ βυθῷ τῆς θαλάττης, καὶ τοσοῦτοι τὸ πλῆθος ὥστε καὶ τὸ δέλεαρ, ὃ τι ἂν ἰχθύος ᾖ, ἐὰν χρονίσῃ ἐπὶ τῆς γῆς, κατεσθίουσιν· καὶ ἀνέλκουσι πολλάκις οἱ ἀλιεῖς περὶ τὸ δέλεαρ ὥσπερ σφαῖραν συνεχομένων αὐτῶν.

Ἄλλ' ἐκ τῶν τοιῶνδε μᾶλλον ἔστι τεκμήρασθαι ὅτι καθεύδουσιν· πολλάκις γὰρ ἔστιν ἐπιτεσόντα τοῖς ἰχθύσι λαθεῖν οὕτως ὥστε καὶ τῇ χειρὶ λαβεῖν ἢ πατάξαντα λαθεῖν· ὑπὸ δὲ τὸν καιρὸν τοῦτον ἡρεμοῦσι σφόδρα, καὶ κινοῦσιν οὐδὲν πλὴν ἡρέμα τὸ οὐραῖον. Δῆλον δὲ γίνεται ὅτι καθεύδει καὶ ταῖς φοραῖς, ἂν τι κινηθῇ ἡσυχαζόντων αὐτῶν· φέρεται γὰρ ὥσπερ ἐξ ὕπνου ὄντα. Ἔτι δ' ἐν ταῖς πυρίαις ἀλίσκονται διὰ τὸ καθεύδειν. Πολλάκις δὲ καὶ οἱ θυννοσκόποι περιβάλλονται καθεύδοντας· δῆλον δ' ἐκ τοῦ ἡσυχαζόντος καὶ τὰ λευκὰ ὑποφαίνοντας ἀλίσκεσθαι. Καθεύδουσι δὲ τῆς νυκτὸς μᾶλλον ἢ τῆς ἡμέρας οὕτως ὥστε βαλλόντων μὴ κινεῖσθαι. Τὰ δὲ πλεῖστα καθεύδουσι τῆς γῆς ἢ τῆς ἄμμου ἢ λίθου τινὸς ἐχόμενοι ἐν τῷ βυθῷ, ἢ ἀποκρύψαντες ὑπὸ πέτρῃ ἢ θῖνᾳ ἑαυτούς, οἱ δὲ πλατεῖς ἐν τῇ ἄμμῳ· γινώσκονται δὲ τῇ σχηματίσει τῆς ἄμμου, καὶ λαμβάνονται τυπτόμενοι τοῖς τριώδουσιν. Λαμβάνονται δὲ καὶ λάβραξ καὶ χρύσοφρυς καὶ κεστρεὺς καὶ ὅσοι τοιοῦτοι τριώδοντι ἡμέρας

πολλάκις διὰ τὸ καθεύδειν· εἰ δὲ μή, οὐδὲν δοκεῖ τῶν τοιούτων ληφθῆναι ἢν τριώδοντι. Τὰ δὲ σελάχη οὕτω καθεύδει ἐνίοτε ὥστε καὶ λαμβάνεσθαι τῇ χειρί. Δελφίς δὲ καὶ (537b.) φάλαινα, καὶ ὅσα αὐλὸν ἔχει, ὑπερέχοντα τὸν αὐλὸν καθεύδει τῆς θαλάττης, δι' οὗ ἀναπνεύουσιν ἡρέμα κινουῦντες τὰς πτέρυγας· καὶ δελφῖνός γε καὶ ἐγγχοντος ἤδη ἠκρόανταί τινες.

Καθεύδει δὲ καὶ τὰ μαλάκια τὸν αὐτὸν τρόπον ὥνπερ οἱ ἰχθύες· ὁμοίως δὲ καὶ τὰ μαλακόστρακα τούτοις.

Καὶ τὰ ἔντομα δὲ τῶν ζώων ὅτι τυγχάνει ὕπνου, διὰ τοιούτων σημείων ἐστὶ φανερόν· ἡσυχάζουσιν τε γὰρ καὶ ἀκίνητιζουσιν ἐπιδήλως.

Μάλιστα δ' ἐπὶ τῶν μελιττῶν τοῦτο δῆλον· ἡρεμοῦσι γὰρ καὶ παύονται βομβοῦσαι τῆς νυκτός. Δῆλον δὲ καὶ ἐπὶ τῶν ἐν ποσὶ μάλιστα τῶν τοιούτων· οὐ γὰρ μόνον διὰ τὸ μὴ ὀξὺ βλέπειν ἡσυχάζουσι τῆς νυκτός (ἅπαντα γὰρ ἀμυδρῶς βλέπει τὰ σκληρόφθαλμα), ἀλλὰ καὶ πρὸς τὸ φῶς τῶν λύχνων ἡσυχάζοντα φαίνονται οὐδὲν ἥττον.

Ἐνυπνιάζει δὲ τῶν ζώων μάλιστα ἄνθρωπος. Καὶ νέοις μὲν οὔσι καὶ παιδίοις ἔτι πάμπαν οὐ γίνεται ἐνύπνιον, ἀλλ' ἄρχεται τοῖς πλείστοις περὶ τέτταρα ἔτη ἢ πέντε· ἤδη δὲ γεγόνασι καὶ ἄνδρες καὶ γυναῖκες οἱ ὅλως οὐδὲν πώποτε ἐνύπνιον εἶδον. Συνέβη δέ τισι τῶν τοιούτων προϊούσης τῆς ἡλικίας ἰδεῖν ἐνύπνιον, καὶ μετὰ ταῦτα γενέσθαι περὶ τὸ σῶμα μεταβολὴν τοῖς μὲν εἰς θάνατον τοῖς δ' εἰς ἀρρωστίαν.

Περὶ μὲν οὖν αἰσθήσεως καὶ ὕπνου καὶ ἐγρηγόρσεως τοῦτον ἔχει τὸν τρόπον.

Κεφάλαιο 11

Τὸ δ' ἄρρεν καὶ θῆλυ τοῖς μὲν ὑπάρχει τῶν ζώων, τοῖς δ' οὐχ ὑπάρχει, ἀλλὰ καθ' ὁμοιότητά τινα καὶ τίκτειν λέγονται καὶ κύειν. Ἔστι δ' οὐδὲν ἄρρεν καὶ θῆλυ ἐν τοῖς μονίμοις, οὐδ' ὅλως ἐν τοῖς ὀστρακοδέρμοις. Ἐν δὲ τοῖς μαλακίοις καὶ τοῖς μαλακοστράκοις ἔστι τὸ μὲν θῆλυ τὸ δ' ἄρρεν, καὶ ἐν τοῖς πεζοῖς καὶ ἐν τοῖς δίποσι καὶ τετράποσι καὶ πᾶσιν ὅσα ἐκ συνδυασμοῦ τίκτει ζῶον ἢ ῥὸν ἢ σκώληκα. Ἐν μὲν οὖν τοῖς ἄλλοις γένεσιν ἀπλῶς ἢ ἔστιν ἢ οὐκ ἔστιν, οἷον ἐν μὲν τοῖς τετράποσι πᾶσιν ἔστι τὸ μὲν θῆλυ τὸ δ' ἄρρεν, ἐν δὲ τοῖς ὀστρακοδέρμοις οὐκ ἔστιν, ἀλλ' ὥσπερ ἐν φυτοῖς τὰ (538a.) μὲν εὐφορά ἐστι τὰ δ' ἄλλ' ἄφορα, οὕτω καὶ ἐν τούτοις.

Ἐν δὲ τοῖς ἐντόμοις καὶ τοῖς ἰχθύσιν ἐστὶ τὰ μὲν ὅλως οὐκ ἔχοντα ταύτην τὴν διαφορὰν ἐπ' οὐδέτερον, οἷον ἐγγέλους οὐτ' ἄρρεν ἐστὶν οὔτε θῆλυ, οὐδὲ γεννᾷ ἐξ αὐτῆς οὐδὲν, ἀλλ' οἱ μὲν φάσκοντες ὅτι τριχῶδη καὶ ἐλμινθῶδη προσπεφυκότες ἔχουσαι ποτέ τινες φαίνονται, οὐ προσθεωρήσαντες τὸ ποῦ ἔχουσιν ἀσκέπτως λέγουσιν. Οὔτε γὰρ ζωοτοκεῖ ἄνευ ῥοτοκίας οὐδὲν τῶν τοιούτων, ῥὸν δ' οὐδεμία πώποτε ὥπται ἔχουσα· ὅσα τε ζωοτοκεῖ, ἐν τῇ ὑστέρα ἔχει καὶ προσπεφυκότες, ἀλλ' οὐκ ἐν τῇ γαστρί· ἐπέττετο γὰρ ἂν ὥσπερ ἡ τροφή. Ἦν δὲ λέγουσι διαφορὰν ἄρρενος ἐγγέλους καὶ θηλείας τῷ τὸν μὲν μείζω κεφαλὴν ἔχειν καὶ μακροτέραν, τὴν δὲ θήλειαν μικρὰν καὶ σιμοτέραν, οὐ τοῦ θήλεος ἢ ἄρρενος λέγουσιν, ἀλλὰ τοῦ γένους.

Εἰσὶ δὲ τινες ἰχθύες οἱ καλοῦνται ἐπιτραγίαί, γίνονται δὲ τοιοῦτοι τῶν ποταμίων κυπρίνος καὶ βάλαγρος· οὐκ ἔχουσι δ' οἱ τοιοῦτοι οὔτε ῥὸν οὔτε θορὸν οὐδέποτε, ἀλλ' ὅσοι στερεοὶ εἰσι καὶ πίνονες, ἔντερον μικρὸν ἔχουσι, καὶ δοκοῦσιν ἄριστοι οὗτοι εἶναι.

Ἔτι δ' ἔνια, καθάπερ ἐν τοῖς ὀστρακοδέρμοις καὶ φυτοῖς τὸ μὲν τίκτον ἐστὶ καὶ γεννῶν, τὸ δ' ὀχεῦον οὐκ ἔστιν, οὕτως ἐν τοῖς ἰχθύσι τὸ τῶν ψηττῶν γένος καὶ τὸ τῶν ἐρυθρίνων καὶ αἱ χάνναι· πάντα γὰρ τὰ τοιαῦτα ῥὰ φαίνεται ἔχοντα.

Ἐν μὲν οὖν τοῖς πεζοῖς καὶ ἐναίμοις τῶν ζώων ὅσα μὴ ῥοτοκεῖ, τὰ πλεῖστα μείζω καὶ μακροβιώτερα τὰ ἄρρενα τῶν θηλειῶν ἐστὶ, πλὴν ἡμίονος, τούτων δ' αἱ θήλειαι μακροβιώτεραι καὶ μείζους· ἐν δὲ τοῖς ῥοτόκοις καὶ τοῖς σκωληκοτόκοις, οἷον ἐν τε τοῖς ἰχθύσι καὶ ἐπὶ τῶν ἐντόμων, μείζω τὰ θήλεα τῶν ἄρρένων ἐστίν, οἷον ὄφεις καὶ

φαλάγγια καὶ ἀσκαλαβῶται καὶ βάτραχοι. Καὶ ἐπὶ τῶν ἰχθύων δ' ὡσαύτως, οἷον τὰ τε σελάχη τὰ μικρὰ καὶ τῶν ἀγελαίων τὰ πλεῖστα, τὰ δὲ πετραῖα πάντα. Ὅτι δὲ μακροβιώτεροι τῶν (538b.) ἰχθύων αἱ θήλειαι τῶν ἄρρένων, δηλὸν ἐκ τοῦ παλαιότερα ἀλίσκεσθαι τὰ θήλεα τῶν ἄρρένων.

Ἔστι δὲ τὰ μὲν ἄνω καὶ πρόσθια πάντων τῶν ζώων τὰ ἄρρενα κρεῖττω καὶ ἰσχυρότερα καὶ εὐοπλότερα, τὰ δ' ὡς ἂν ὀπίσθια καὶ κάτω λεχθέντα τῶν θηλέων. Τοῦτο δὲ καὶ ἐπ' ἀνθρώπων καὶ ἐπὶ τῶν ἄλλων ζώων τῶν πεζῶν καὶ ζωοτόκων πάντων ἔχει τὸν αὐτὸν τρόπον. Καὶ ἀνευρότερον δὲ καὶ ἀναρθρότερον τὸ θήλυ μᾶλλον, καὶ λεπτοτριχώτερον, ὅσα τρίχας ἔχει· τὰ δὲ μὴ τρίχας ἔχοντα κατὰ τὸ ἀνάλογον. Καὶ ὑγροσαρκότερα δὲ τὰ θήλεα τῶν ἄρρένων καὶ γονυκροτώτερα, καὶ αἱ κνήμαι λεπτότεραι· τοὺς δὲ πόδας γλαφυρωτέρους, ὅσα τὰ μόρια ταῦτ' ἔχει τῶν ζώων.

Καὶ περὶ φωνῆς δέ, πάντα τὰ θήλεα λεπτοφωνότερα καὶ ὀξυφωνότερα, πλὴν βοός, ὅσα ἔχει φωνήν· οἱ δὲ βόες βαρύτερον φθέγγονται αἱ θήλειαι τῶν ἄρρένων. Τὰ δὲ πρὸς ἀλκὴν ἐν τῇ φύσει ὑπάρχοντα μόρια, οἷον ὀδόντες καὶ χαυλιόδοντες καὶ κέρατα καὶ πλῆκτρα καὶ ὅσα ἄλλα τοιαῦτα μόρια, ἐν ἐνίοις μὲν γένεσιν ὅλως τὰ μὲν ἄρρενα ἔχει τὰ δὲ θήλεα οὐκ ἔχει, οἷον κέρατα ἔλαφος θήλεια οὐκ ἔχει καὶ τῶν ὀρνίθων τῶν πλῆκτρα ἐχόντων ἐνίων αἱ θήλειαι ὅλως πλῆκτρα οὐκ ἔχουσιν· ὁμοίως δὲ καὶ χαυλιόδοντας αἱ θήλειαι οὐκ ἔχουσι τῶν ὑδν. Ἐν ἐνίοις δ' ὑπάρχει μὲν ἀμφοῖν, ἀλλὰ κρεῖττω καὶ μᾶλλον τοῖς ἄρρεσιν, οἷον τὰ κέρατα τῶν ταύρων ἰσχυρότερα τῶν θηλειῶν βοῶν.

Βιβλίο 5

Κεφάλαιο 1

Ὅσα μὲν οὖν ἔχουσι μόρια τὰ ζῷα πάντα καὶ τῶν ἐντὸς καὶ τῶν ἐκτὸς, ἔτι δὲ περὶ τε τῶν αἰσθήσεων καὶ φωνῆς καὶ ὕπνου, καὶ ποῖα θήλεα καὶ ποῖα ἄρρενα, πρότερον (539a.) εἴρηται περὶ ἀπάντων· περὶ δὲ τῶν γενέσεων αὐτῶν λοιπὸν διελθεῖν, καὶ πρῶτον περὶ τῶν πρώτων.

Εἰσὶ δὲ πολλαὶ καὶ πολλὴν ἔχουσαι ποικιλίαν, καὶ τῇ μὲν ἀνόμοιοι, τῇ δὲ τρόπον τινὰ προσεοίκασιν ἀλλήλαις. Ἐπεὶ δὲ διήρηται τὰ γένη πρότερον, τὸν αὐτὸν τρόπον καὶ νῦν πειρατέον ποιεῖσθαι τὴν θεωρίαν· πλὴν τότε μὲν τὴν ἀρχὴν ἐποιούμεθα σκοποῦντες περὶ τῶν μερῶν ἀπ' ἀνθρώπου, νῦν δὲ περὶ τούτου τελευταῖον λεκτέον διὰ τὸ πλείστην ἔχειν πραγματείαν.

Πρῶτον δ' ἀρκτέον ἀπὸ τῶν ὀστρακοδέρμων, μετὰ δὲ ταῦτα περὶ τῶν μαλακοστράκων, καὶ τὰ ἄλλα δὴ τοῦτον τὸν τρόπον ἐφεξῆς· ἔστι δὲ τὰ τε μαλάκια καὶ τὰ ἔντομα, καὶ μετὰ ταῦτα τὸ τῶν ἰχθύων γένος, τό τε ζωοτόκον καὶ τὸ ὠοτόκον αὐτῶν, εἴτα τὸ τῶν ὀρνίθων· μετὰ δὲ ταῦτα περὶ τῶν πεζῶν λεκτέον, ὅσα τ' ὠοτόκα καὶ ὅσα ζωοτόκα. Ζωοτόκα δ' ἐστὶ τῶν τετραπόδων ἑνία, καὶ ἄνθρωπος τῶν διπόδων μόνον.

Κοινὸν μὲν οὖν συμβέβηκε καὶ ἐπὶ τῶν ζώων, ὥσπερ καὶ ἐπὶ τῶν φυτῶν· τὰ μὲν γὰρ ἀπὸ σπέρματος ἐτέρων φυτῶν, τὰ δ' αὐτόματα γίνεται, συστάσης τινὸς τοιαύτης ἀρχῆς, καὶ τούτων τὰ μὲν ἐκ τῆς γῆς λαμβάνει τὴν τροφήν, τὰ δ' ἐν ἐτέροις ἐγγίνεται φυτοῖς, ὥσπερ εἴρηται ἐν τῇ θεωρίᾳ τῇ περὶ φυτῶν. Οὕτω καὶ τῶν ζώων τὰ μὲν ἀπὸ ζώων γίνεται κατὰ συγγένειαν τῆς μορφῆς, τὰ δ' αὐτόματα καὶ οὐκ ἀπὸ συγγενῶν, καὶ τούτων τὰ μὲν ἐκ γῆς σηπομένης καὶ φυτῶν, ὥσπερ πολλὰ συμβαίνει τῶν ἐντόμων, τὰ δ' ἐν τοῖς ζώοις αὐτοῖς ἐκ τῶν τοῖς μορίοις περιττωμάτων. Τῶν δὴ τὴν γένεσιν ἐχόντων ἀπὸ συγγενῶν ζώων ἐν οἷς μὲν αὐτῶν ἐστὶ τὸ θῆλυ καὶ τὸ ἄρρεν, ἐκ συνδυασμοῦ γίνονται· ἐν δὲ τῷ τῶν ἰχθύων γένει ἑνία γίνεται οὐτ' ἄρρενα οὐτε θήλεα, τῷ γένει μὲν ὄντα ἐτέροις τῶν ἰχθύων τὰ αὐτά, τῷ εἶδει δ' ἕτερα, ἑνία δὲ καὶ πάμπαν ἴδια. Τὰ δὲ θήλεα μὲν ἐστίν, ἄρρενα δ' οὐ· ἐξ ὧν γίνεται ὥσπερ ἐν τοῖς ὀρνίσι τὰ ὑπηνέμια. Τὰ μὲν οὖν τῶν ὀρνίθων ἄγονα πάντα ἐστὶ ταῦτα (μέχρι γὰρ τοῦ ῥὸν γεννῆσαι δύναται ἢ φύσις αὐτῶν ἐπιτελεῖν), ἂν μὴ τις (539b.) αὐτοῖς

συμβῆ τρόπος ἄλλος τῆς κοινωνίας πρὸς τοὺς ἄρρενας· περὶ ὧν ἀκριβέστερον ἔσται δῆλον ἐν τοῖς ὕστερον. Τῶν δ' ἰχθύων ἐνίοις, ὅταν αὐτόματα γεννήσωσιν ῥά, συμβαίνει ἐκ τούτων καὶ ζῶα γίνεσθαι, πλὴν τῶν μὲν καθ' αὐτά, τῶν δ' οὐκ ἄνευ ἄρρενος· ὃν δὲ τρόπον, καὶ περὶ τούτων ἐν τοῖς ἐχομένοις ἔσται φανερόν· σχεδὸν γὰρ παραπλήσια συμβαίνει καὶ ἐπὶ τῶν ὀρνίθων.

Ὅσα δ' ἀπὸ ταῦτομάτου γίνεται ἐν ζώοις ἢ γῇ ἢ φυτοῖς ἢ τοῖς τούτων μορίοις, ἔχουσι δὲ τὸ ἄρρεν καὶ τὸ θῆλυ, ἐκ τούτων συνδυαζομένων γίνεται μὲν τι, οὐ ταῦτ' ὅμως ἐξ οὐδενὸς ἄλλ' ἀτελές, οἷον ἔκ τε τῶν φθειρῶν ὀχευομένων αἱ καλούμεναι κονίδες καὶ ἐκ τῶν μυιῶν σκώληκες καὶ ἐκ τῶν ψυλλῶν σκώληκες ῥοειδεῖς, ἐξ ὧν οὔτε τὰ γεννήσαντα γίνεται οὔτε ἄλλο οὐδὲν ζῶον, ἀλλὰ τὰ τοιαῦτα μόνον.

Πρῶτον μὲν οὖν περὶ τῆς ὀχείας λεκτέον, ὅσα ὀχεύεται, εἴτα μετὰ ταῦτα περὶ τῶν ἄλλων ἐφεξῆς, τά τε καθ' ἕκαστα καὶ τὰ κοινῇ συμβαίοντα περὶ αὐτῶν.

Κεφάλαιο 2

Ὅχεύεται μὲν οὖν ταῦτα τῶν ζώων ἐν οἷς ὑπάρχει τὸ θῆλυ καὶ τὸ ἄρρεν, εἰσὶ δ' αἱ ὀχεῖαι οὗθ' ὅμοιαι πᾶσιν οὗθ' ὁμοίως ἔχουσαι. Τὰ μὲν γὰρ ζωοτόκα καὶ πεζὰ τῶν ἐναίμων ἔχει μὲν ὄργανα πάντα τὰ ἄρρενα πρὸς τὴν πρᾶξιν τὴν γεννητικὴν, οὐ μὴν ὁμοίως γε πάντα πλησιάζουσιν, ἀλλὰ τὰ μὲν ὀπισθοιητικὰ συνιόντα πυγῆδόν, οἷον λέοντες τε καὶ δασυπόδες καὶ λύγκες· τῶν δὲ δασυπόδων καὶ πολλάκις ἡ θήλεια προτέρα ἀναβαίνει ἐπὶ τὸν ἄρρενα. Τῶν δ' ἄλλων τῶν μὲν πλείστων ὁ αὐτὸς τρόπος· τὸν ἐνδεχόμενον γὰρ ποιοῦνται συνδυασμὸν τὰ τε πλείστα τῶν τετραπόδων, ἐπιβαίνοντος ἐπὶ τὸ θῆλυ τοῦ ἄρρενος, καὶ τὸ τῶν ὀρνίθων ἅπαν γένος οὕτω τε καὶ μοναχῶς. Εἰσὶ δὲ διαφοραὶ τινες καὶ περὶ τοὺς ὀρνίθους· τὰ μὲν γὰρ συγκαθείσης τῆς θηλείας ἐπὶ τὴν γῆν ἐπιβαίνει τὸ ἄρρεν, ὥσπερ αἱ ὠτίδες καὶ οἱ ἀλεκτρυόνες, τὰ δ' οὐ συγκαθείσης τῆς θηλείας, οἷον αἱ γέρανοι· ἐν τούτοις γὰρ ὁ ἄρρην ἐπιτηδῶν ὀχεύει τὴν θήλειαν, καὶ συγγίνεται ὥσπερ καὶ τὰ στρουθία ὁξέως.

Τῶν δὲ τετραπόδων αἱ ἄρκτοι (540a.) παρακεκλιμέναι τὸν αὐτὸν τρόπον ὄνπερ τᾶλλα ἐπὶ τῶν ποδῶν ποιούμενα τὴν ὀχείαν, πρὸς τὰ πρηνῆ τῶν θηλειῶν τὰ ὑπτια τῶν ἄρρένων· οἱ δὲ χερσαῖοι ἐχῖνοι ὀρθοὶ τὰ ὑπτια πρὸς ἄλληλα ἔχοντες. Τῶν δὲ ζωοτόκων καὶ μέγεθος ἐχόντων οὐτε τοὺς ἄρρενας ἐλάφους αἱ θήλειαι ὑπομένουσιν, εἰ μὴ ὀλιγάκις, οὐτε τοὺς ταύρους αἱ βόες διὰ τὴν τοῦ αἰδοίου συντονίαν, ἀλλ' ὑπάγοντα τὰ θήλεα δέχονται τὴν γονὴν· καὶ γὰρ ἐπὶ τῶν ἐλάφων ὥπται τοῦτο συμβαῖνον, τῶν γε τιθασσῶν. Λύκος δ' ὀχεύει καὶ ὀχεύεται τὸν αὐτὸν τρόπον ὄνπερ καὶ κύων. Οἱ δ' αἰλουροὶ οὐκ ὀπισθεν συνιόντες, ἀλλ' ὁ μὲν ὀρθός, ἡ δὲ θήλεια ὑποτίθησιν αὐτήν· εἰσὶ δὲ τὴν φύσιν αἱ θήλειαι ἀφροδισιαστικάι, καὶ προσάγονται τοὺς ἄρρενας εἰς τὰς ὀχείας, καὶ συνοῦσαι κράζουσιν. Αἱ δὲ κάμηλοι ὀχεύονται τῆς θηλείας καθημένης· περιβεβηκῶς δ' ὁ ἄρρην ὀχεύει, οὐκ ἀντίπυγος, ἀλλὰ καθάπερ καὶ τὰ ἄλλα τετράποδα· καὶ διημερεύει τὸ μὲν ὀχεῦον τὸ δ' ὀχευόμενον. Ἀποχωροῦσι δ' εἰς ἐρημίαν, ὅταν ποιῶνται τὴν ὀχείαν, καὶ οὐκ ἔστι πλησιάζειν ἀλλ' ἢ τῷ βόσκοντι. Τὸ δ' αἰδοῖον ἔχει ὁ κάμηλος νεῦρον οὕτως ὥστε καὶ νευρὰν ποιοῦνται ἐκ τούτου τοῖς τόξοις. Οἱ δ' ἐλέφαντες ὀχεύονται μὲν ἐν ταῖς ἐρημίαις, μάλιστα δὲ περὶ τοὺς ποταμοὺς καὶ οὗ

διατρίβειν εἰώθασιν· ὀχεύεται δ' ἡ μὲν θήλεια συγκαθειῖσα καὶ διαβαίνουσα, ὁ δ' ἄρρην ἐπαναβαίνων ὀχεύει. Ὅχεύεται δὲ καὶ ἡ φώκη καθάπερ τὰ ὀπισθουρητικὰ τῶν ζώων, καὶ συνέχονται ἐν τῇ ὀχείᾳ πολὺν χρόνον, ὥσπερ αἱ κύνες· ἔχουσι δὲ καὶ τὸ αἰδοῖον οἱ ἄρρενες μέγα.

Κεφάλαιο 3

Τὸν αὐτὸν δὲ τρόπον καὶ τῶν πεζῶν τὰ τετράποδα καὶ ῥοτόκα ποιεῖται τὴν ὀχείαν. Τὰ μὲν γὰρ ἐπιβαίνοντα καθάπερ τὰ ζῳοτόκα, οἷον χελώνη καὶ ἡ θαλαττία καὶ ἡ χερσαία. Ἔχουσι δέ τι εἰς ὃ οἱ πόροι συνάπτουσιν καὶ ὅ ἐν τῇ ὀχείᾳ πλησιάζουσιν, οἷον φρῦναι καὶ βάτραχοι καὶ πᾶν τὸ τοιοῦτον γένος.

Κεφάλαιο 4

Τὰ δ' ἄποδα καὶ μακρὰ τῶν ζώων, οἷον ὄφεις τε καὶ (540b.) σμύραιναι, περιπλεκόμεναι τοῖς ὑπτίοις πρὸς τὰ ὕπτια.

Οὕτω δὲ σφόδρα οἱ γ' ὄφεις περιελίττονται ἀλλήλοις, ὥστε δοκεῖν ἐνὸς ὄφεως δικεφάλου τὸ σῶμα εἶναι ἅπαν. Τὸν αὐτὸν δὲ τρόπον καὶ τὸ τῶν σαύρων γένος· ὁμοίᾳ γὰρ περιπλοκῇ ποιοῦνται τὴν ὀχείαν.

Κεφάλαιο 5

Οἱ δ' ἰχθύες ἅπαντες, ἔξω τῶν πλατέων σελαχῶν, παραπίπτοντες τὰ ὕπτια πρὸς τὰ ὕπτια ποιοῦνται τὸν συνδυασμόν. Τὰ δὲ πλατέα καὶ κερκοφόρα, οἷον βάτος καὶ τρυγῶν καὶ τὰ τοιαῦτα, οὐ μόνον παραπίπτοντα ἀλλὰ καὶ ἐπιβαίνοντα τοῖς ὑπτίοις ἐπὶ τὰ πρηνῇ τῶν θηλειῶν, ὅσοις μὴ ἐμποδίζει τὸ οὐραῖον δεινὸν ἔχον πάχος. Αἱ δὲ ῥῖναι, καὶ ὅσοις τῶν τοιούτων πολλὸ τὸ οὐραῖον, παρατριβόμενα μόνον ὀχεύεται τὰ ὕπτια πρὸς τὰ ὕπτια. Εἰσὶ δέ τινες οἱ ἑωρακέναι φασὶ καὶ συνεχόμενα τῶν σελαχῶν ἔνια ὀπισθεν, ὥσπερ τοὺς κύνας.

Ἔστι δ' ἐν πᾶσι τοῖς σελαχώδεσι μείζον τὸ θῆλυ τοῦ ἄρρενος· σχεδὸν δὲ καὶ ἐν τοῖς ἄλλοις ἰχθύσι τὰ θήλεα μείζω τῶν ἀρρένων. Σελάχη δ' ἐστὶ τὰ τ' εἰρημένα καὶ βοῦς καὶ λάμια καὶ ἀετὸς καὶ νάρκη καὶ βάτραχος καὶ πάντα τὰ γαλεῶδη. Τὰ μὲν οὖν σελάχη πάντα τεθεώρηται ὑπὸ πολλῶν τούτους ποιοῦμενα τοὺς τρόπους τὴν ὀχείαν· χρονιωτέρα γὰρ ἢ συμπλοκὴ πάντων τῶν ζωοτόκων ἐστὶν ἢ τῶν φωτόκων. Καὶ δελφῖνες δὲ καὶ πάντα τὰ κητώδη τὸν αὐτὸν τρόπον· παραπίπτοντα γὰρ ὀχεύει παρὰ τὸ θῆλυ τὸ ἄρρεν, καὶ χρόνον οὕτ' ὀλίγον οὔτε λίαν πολύν. Διαφέρουσι δ' ἔνιοι τῶν σελαχῶδων ἰχθύων οἱ ἄρρενες τῶν θηλειῶν τῷ τοὺς μὲν ἔχειν ἀποκρεμώμενα ἅττα δύο περὶ τὴν ἔξοδον τῆς περιττώσεως, τὰς δὲ θηλείας ταῦτα μὴ ἔχειν, οἷον ἐν τοῖς γαλεῶδεσιν· ἐπὶ γὰρ τούτων ὑπάρχει πάντων τὸ εἰρημένον. Ὅρχεις μὲν οὖν οὕτ' ἰχθύες οὕτ' ἄλλο τῶν ἀπόδων ἔχει οὐδέν, πόρους δὲ δύο καὶ οἱ ὄφεις καὶ οἱ ἰχθύες οἱ ἄρρενες ἔχουσιν, οἱ γίνονται θοροῦ πλήρεις περὶ τὴν τῆς ὀχείας ὥραν, καὶ προΐενται ὑγρότητα γαλακτώδη πάντες. Οὗτοι δ' οἱ πόροι εἰς ἓν υνάπτουσιν, ὥσπερ καὶ τοῖς ὄρνισιν· οἱ γὰρ ὄρνιθες ἐντὸς ἔχουσι τοὺς (541a.) ὄρχεις, καὶ τὰ ἄλλα πάντα ὅσα φωτοκεῖ πόδας ἔχοντα.

Τοῦτο δὴ συμπεραίνει καὶ ἐπεκτείνεται εἰς τὴν τοῦ θήλεος χώραν καὶ ὑποδοχὴν. Ἔστι δὲ τοῖς μὲν ζωοτόκοις καὶ πεζοῖς ὁ αὐτὸς πόρος τοῦ τε σπέρματος καὶ τῆς τοῦ ὑγροῦ περιττώσεως ἔξωθεν, ἔσωθεν δ' ἕτερος πόρος, ὥσπερ ἐλέχθη καὶ πρότερον ἐν τῇ διαφορᾷ τῇ τῶν μορίων. Τοῖς δὲ μὴ ἔχουσι κύστιν ὁ αὐτὸς καὶ τῆς ξηρᾶς περιττώσεως πόρος ἔξωθεν· ἔσωθεν δὲ σύνεγγυς ἀλλήλων. Ὅμοίως δὲ ταῦτα ἔχει τοῖς θήλεσιν αὐτῶν καὶ τοῖς ἄρρεσιν· οὐ γὰρ ἔχουσι

κύστιν πλὴν ἐπὶ χελώνης, τούτων δ' ἡ θήλεια ἓνα πόρον ἔχει, καίτοι κύστιν ἔχουσα· αἱ χελῶναι δὲ τῶν φωτόκων εἰσὶν.

Ἡ δὲ τῶν φωτόκων ἰχθύων ὀχεία ἤττον γίνεται κατάδηλος· διόπερ οἱ πλεῖστοι νομίζουσι πληροῦσθαι τὰ θήλεα τὸν τῶν ἄρρένων ἀνακάπτοντα θορόν.

Τοῦτο γὰρ πολλάκις ὁράται γινόμενον· περὶ μὲν γὰρ τὴν τῆς ὀχείας ὥραν αἱ θήλειαι τοῖς ἄρρεσιν ἐπόμεναι τοῦτο δρῶσι, καὶ κόπτουσιν ὑπὸ τὴν γαστέρα τοῖς στόμασιν, οἱ δὲ θᾶττον προΐενται καὶ μᾶλλον· κατὰ δὲ τὸν τόκον οἱ ἄρρενες τοῖς θήλεσι, καὶ ἀποτικτουςὼν δ' ἀνακάπτουσι τὰ ὠά· ἐκ δὲ τῶν παραλειπομένων γίνονται οἱ ἰχθύες. Περὶ δὲ τὴν Φοινίκην καὶ θήραν ποιοῦνται δι' ἀλλήλων· ἄρρενας μὲν γὰρ ὑπάγοντες κεστρέας τὰς θηλείας περιβάλλονται συνάγοντες, θηλείας δὲ τοὺς ἄρρενας. Τοῦτο μὲν οὖν διὰ τὸ πολλάκις ὁρᾶσθαι τὴν δόξαν ἐποίησε τῆς ὀχείας ταύτην, ποιεῖ δέ τι τοιοῦτον καὶ τὰ τετράποδα τῶν ζώων· περὶ γὰρ τὴν ὥραν τῆς ὀχείας ἀπορραίνουσι καὶ τὰ ἄρρενα καὶ τὰ θήλεα, καὶ τῶν αἰδοίων ὀσμῶνται ἀλλήλων. Αἱ δὲ πέρδικες ἂν κατ' ἄνεμον στῶσιν αἱ θήλειαι τῶν ἄρρένων, ἔγκυοι γίνονται· πολλάκις δὲ καὶ τῆς φωνῆς <ἀκούουσαι>, ἐὰν ὀργῶσαι τύχωσι, καὶ ὑπερπετομένων ἐκ τοῦ καταπνεῦσαι τὸν ἄρρενα· χάσκει δὲ καὶ ἡ θήλεια καὶ ὁ ἄρρην, καὶ τὴν γλῶτταν ἔξω ἔχουσι περὶ τὴν τῆς ὀχείαςποίησιν.

Ἡ δ' ἀληθινὴ σύνοδος τῶν φωτόκων ἰχθύων ὀλιγάκις ὁράται διὰ τὸ ταχέως ἀπολύεσθαι παραπεσόντας, ἐπεὶ ὥπται ἡ ὀχεία καὶ ἐπὶ τούτων γινομένη τὸν εἰρημένον τρόπον.

Κεφάλαιο 6

(541b.) Τὰ δὲ μαλάκια, οἷον πολύποδες καὶ σηπίαι καὶ τευθίδες, τὸν αὐτὸν τρόπον πάντα πλησιάζουσιν ἀλλήλοις· κατὰ τὸ στόμα γὰρ συμπλέκονται, τὰς πλεκτάνας πρὸς τὰς πλεκτάνας συναρμόττοντες. Ὁ μὲν οὖν πολύπους ὅταν τὴν λεγομένην κεφαλὴν ἐρείσῃ πρὸς τὴν γῆν καὶ διαπετάσῃ τὰς πλεκτάνας, ἄτερος ἐφαρμόττει ἐπὶ τὸ πέτασμα τῶν πλεκτανῶν, καὶ συνεχεῖς ποιοῦνται τὰς κοτυληδόνας πρὸς ἀλλήλας. Φασὶ δέ τινες καὶ τὸν ἄρρενα ἔχειν αἰδοιωδές τι ἐν μιᾷ τῶν πλεκτανῶν, ἐν ἧ δύο αἱ μέγισται κοτυληδόνες εἰσίν· εἶναι δὲ τὸ τοιοῦτον ὥσπερ νευρῶδες, μέχρι εἰς μέσῃ τὴν πλεκτάνην προσπεφυκὸς ἅπαν, ἧ ἐσπιφράνει εἰς τὸν μυκτῆρα τῆς θηλείας. Αἱ δὲ σηπίαι καὶ αἱ τευθίδες νέουσιν ἅμα συμπεπλεγμέναι, τὰ στόματα καὶ τὰς πλεκτάνας ἐφαρμόττουσαι καταντικρὺ ἀλλήλαις, νέουσαι ἐναντίως· ἐναρμόττουσι δὲ καὶ τὸν καλούμενον μυκτῆρα εἰς τὸν μυκτῆρα. Τὴν δὲ νεῦσιν ἢ μὲν ἐπὶ τὸ ὀπισθεν, ἢ δ' ἐπὶ τὸ στόμα ποιεῖται.

Ἐκτίκει δὲ κατὰ τὸν φυσητῆρα καλούμενον, καθ' ὃν ἔνιοι καὶ ὀχεύεσθαί φασιν αὐτάς.

Κεφάλαιο 7

Τὰ δὲ μαλακόστρακα ὀχεύεται, οἷον κάραβοι καὶ ἀστακοὶ καὶ καρίδες καὶ τὰ τοιαῦτα, ὥσπερ καὶ τὰ ὀπισθοιρητικὰ τῶν τετραπόδων, ὅταν ὁ μὲν ὑπτίαν ὁ δ' ἐπὶ ταύτης ποιήσῃ τὴν κέρκον. Ὀχεύεται δὲ τοῦ ἔαρος ἀρχομένου πρὸς τῇ γῇ (ἤδη γὰρ ὤπται ἡ ὀχεία πάντων τῶν τοιούτων), ἐνιαχοῦ δὲ καὶ ὅταν τὰ σῦκα ἄρχηται πεπαίνεσθαι. Τὸν αὐτὸν δὲ τρόπον καὶ οἱ ἀστακοὶ καὶ αἱ καρίδες ὀχεύονται.

Οἱ δὲ καρκίνοι κατὰ τὰ πρόσθια ἀλλήλων συνδυάζονται, τὰ ἐπικαλύμματα τὰ πτυχώδη πρὸς ἀλλήλα συμβάλλοντες. Πρῶτον δ' ὁ καρκίνος ἀναβαίνει ὁ ἐλάττων ἐκ τοῦ ὀπισθεν· ὅταν δ' ἀναβῇ οὗτος, ὁ μείζων πλάγιος ἐπιστρέφει. Ἄλλο μὲν οὖν οὐδὲν ἢ θήλεια τοῦ ἄρρενος διαφέρει· τὸ δ' ἐπικάλυμμα μεῖζόν ἐστι τὸ τῆς θηλείας καὶ μᾶλλον ἀφροστικὸς καὶ συνηρεφέστερον, εἰς ὃ ἐκτίκτουσι καὶ ἡ τὸ περίττωμα ἐξέρχεται. Μόριον δ' οὐδὲν προῖεται θάτερον εἰς θάτερον.

Κεφάλαιο 8

Τὰ δ' ἔντομα συνέρχεται μὲν ὀπισθεν, εἴτ' ἐπιβαίνει (542a.) τὸ ἔλαττον ἐπὶ τὸ μείζον· τοῦτο δ' ἐστὶ τὸ ἄρρεν. Ἐναφίησι δὲ τὸν πόρον κάτωθεν τὸ θῆλυ εἰς τὸ ἄρρεν τὸ ἐπάνω, ἀλλ' οὐ τὸ ἄρρεν εἰς τὸ θῆλυ, ὥσπερ ἐπὶ τῶν ἄλλων. Καὶ τοῦτο τὸ μόριον ἐπὶ μὲν ἐνίων καὶ φαίνεται μείζον ὃν ἢ κατὰ λόγον τοῦ ὅλου σώματος, καὶ πάνυ μικρῶν ὄντων, ἐπ' ἐνίων δ' ἦττον. Τοῦτο δ' ἐστὶ φανερόν, ἂν τις διαιρῇ τὰς ὀχευομένας μυίας. Ἀπολύονται δ' ἀπ' ἀλλήλων μόλις· πολὺν γὰρ χρόνον ὁ συνδυασμός ἐστὶ τῶν τοιούτων. Δῆλον δ' ἐπὶ τῶν ἐν ποσίν, οἷον μυιῶν τε καὶ κανθαρίδων. Πάντα δὲ τὸν τρόπον τοῦτον ὀχεύεται, αἶ τε μυῖαι καὶ αἱ κανθαρίδες καὶ αἱ σπονδύλαι καὶ τὰ φαλάγγια, καὶ εἴ τι ἄλλο τοιοῦτόν ἐστι τῶν ὀχευομένων. Ποιοῦνται δὲ τὰ φαλάγγια τὴν ὀχείαν τόνδε τὸν τρόπον, ὅσα γε ὑφαίνει ἀράχνια· ὅταν ἡ θήλεια σπάσῃ τῶν ἀποτεταμένων ἀραχνίων ἀπὸ τοῦ μέσου, πάλιν ὁ ἄρρην ἀντισπᾷ· τοῦτο δὲ ποιήσαντα πολλάκις οὕτω συνέρχεται καὶ συμπλέκεται ἀντίπυγα· διὰ γὰρ τὴν περιφέρειαν τῆς κοιλίας οὗτος ἀρμόττει ὁ συνδυασμός αὐτοῖς.

Ἡ μὲν οὖν ὀχεία τῶν ζώων τοῦτον γίνεται τὸν τρόπον πάντων, ὥραι δὲ καὶ ἡλικίαι τῆς ὀχείας ἐκάστοις εἰσὶ διωρισμέναι τῶν ζώων. Βούλεται μὲν οὖν ἡ φύσις τῶν πλείστων περὶ τὸν αὐτὸν χρόνον ποιεῖσθαι τὴν ὁμιλίαν ταύτην, ὅταν ἐκ τοῦ χειμῶνος μεταβάλλῃ πρὸς τὸ θέρος· αὕτη δ' ἐστὶν ἡ τοῦ ἔαρος ὥρα, ἐν ἣ τὰ πλεῖστα καὶ πτηνὰ καὶ πεζὰ καὶ πλωτὰ ὁρμᾷ πρὸς τὸν συνδυασμόν. Ποιεῖται δ' ἕνια τὴν ὀχείαν καὶ τὸν τόκον καὶ μετοπώρου καὶ χειμῶνος, οἷον τῶν τ' ἐνύδρων γένη ἅττα καὶ τῶν πτηνῶν· ἄνθρωπος δὲ μάλιστα πᾶσαν ὥραν, καὶ τῶν συνανθρωπευομένων ζώων πολλὰ διὰ τὴν ἀλέαν καὶ εὐτροφίαν, ὅσων καὶ αἱ κυήσεις ὀλιγοχρόνιοί εἰσιν, οἷον ὑδὸς καὶ κυνός, καὶ τῶν πτηνῶν ὅσα πλεονάκις ποιοῦνται τοὺς τόκους. Πολλὰ δὲ καὶ πρὸς τὰς ἐκτροφὰς τῶν τέκνων στοχαζόμενα ποιεῖται τὸν συνδυασμόν ἐν τῇ ἀπαρτιζούσῃ ὥρᾳ. Ὅργᾳ δὲ πρὸς τὴν ὁμιλίαν τῶν ἀνθρώπων τὸ μὲν (542b.) ἄρρεν ἐν τῷ χειμῶνι μᾶλλον, τὸ δὲ θῆλυ ἐν τῷ θερεί.

Τὸ δὲ τῶν ὀρνίθων γένος, ὥσπερ εἴρηται, τὸ πλεῖστον περὶ τὸ ἔαρ ποιεῖται καὶ ἀρχομένου τοῦ θέρους τὴν ὀχείαν καὶ τοὺς τόκους, πλὴν ἀλκυόνος. Ἡ δ' ἀλκυὼν τίκτει περὶ τροπὰς τὰς χειμερινάς. Διὸ καὶ

καλοῦνται, ὅταν εὐδιδεῖναι γένωνται αἱ τροπαί, ἄλκυονίδες ἡμέραι
ἑπτὰ μὲν πρὸ τροπῶν, ἑπτὰ δὲ μετὰ τροπᾶς, καθάπερ καὶ Σιμωνίδης
ἐποίησεν ὡς ὁπότεν χειμέριον κατὰ μῆνα πινύσκη Ζεὺς ἡματα
τεσσαρακαίδεκα, λαθάνεμόν τέ μιν ὥραν καλέουσιν ἐπιχθόνιοι,
ἱερὰν παιδοτρόφον ποικίλας ἄλκυόνος. Γίνονται δ' εὐδιδεῖναι, ὅταν
συμβῇ νοτίους γίνεσθαι τὰς τροπᾶς, τῆς Πλειάδος βορείου
γενομένης. Λέγεται δ' ἐν ἑπτὰ μὲν ἡμέραις ποιεῖσθαι τὴν νεοττιάν, ἐν
δὲ ταῖς λοιπαῖς ἑπτὰ ἡμέραις τίκτειν καὶ ἐκτρέφειν τὰ νεόττια. Περὶ
μὲν οὖν τοὺς ἐνταῦθα τόπους οὐκ ἀεὶ συμβαίνει γίνεσθαι ἄλκυονίδας
ἡμέρας περὶ τὰς τροπᾶς, ἐν δὲ τῷ Σικελικῷ πελάγει σχεδὸν ἀεὶ.
Τίκτει δ' ἡ ἄλκυὼν περὶ πέντε ὥα.

Κεφάλαιο 9

Ἡ δ' αἶθυια καὶ οἱ λάροι τίκτουσι μὲν ἐν ταῖς περὶ θάλατταν πέτραις, τὸ δὲ πλῆθος δύο ἢ τρία· ἄλλ' ὁ μὲν λάρος τοῦ θέρου, ἡ δ' αἶθυια ἀρχομένου τοῦ ἔαρος εὐθύς ἐκ τροπῶν, καὶ ἐπικαθεύδει ὥσπερ αἱ ἄλλαι ὄρνιθες.

Οὐδέτερον δὲ φωλεῖ τούτων τῶν ὀρνέων. Πάντων δὲ σπανιώτατον ἰδεῖν ἀλκυόνα ἐστίν· σχεδὸν γὰρ περὶ Πλειάδος δύσιν καὶ τροπᾶς ὁρᾶται μόνον, καὶ ἐν τοῖς ὑφόρμοις ὅσον περιπταμένη περὶ τὸ πλοῖον ἀφανίζεται εὐθύς, διὸ καὶ Στησίχορος τοῦτον τὸν τρόπον ἐμνήσθη περὶ αὐτῆς. Τίκει δὲ καὶ ἡ ἀηδὼν τοῦ θέρου ἀρχομένου, τίκει δὲ πέντε καὶ ἕξ ὥα· φωλεῖ δ' ἀπὸ τοῦ μετοπώρου μέχρι τοῦ ἔαρος.

Τὰ δ' ἔντομα καὶ τοῦ χειμῶνος ὀχεύεται καὶ γίνεται, ὅταν εὐημερίαι γένωνται καὶ νότια, ὅσα μὴ φωλεῖ αὐτῶν, οἷον μυῖαι καὶ μύρμηκες.

Τίκει δ' ἅπαξ τοῦ ἐνιαυτοῦ τὰ πολλὰ τῶν ἀγρίων, ὅσα μὴ ἐπικυῖσκειται ὥσπερ δασύπους.

Ὅμοίως δὲ καὶ τῶν ἰχθύων οἱ πλεῖστοι ἅπαξ, οἷον οἱ (543a.) χυτοὶ (καλοῦνται δὲ χυτοὶ οἱ τῷ δικτύῳ περιεχόμενοι), θύννος, πηλαμύς, κεστρεύς, χαλκίδες, κολῖαι, χρομῖς, ψῆττα καὶ τὰ τοιαῦτα, πλὴν ὁ λάβραξ· οὗτος δὲ δις τούτων μόνος, γίνεται δ' ὁ τόκος αὐτῷ ὁ ὕστερος ἀσθενέστερος. Καὶ ὁ τριχίας δὲ καὶ τὰ πετραῖα δίς, ἡ δὲ τρίγλη μόνη τρίς.

Τεκμαίρονται δ' ἐκ τοῦ γόνου· τρίς γὰρ φαίνεται ὁ γόνος περὶ τινος τόπους. Ὁ δὲ σκορπίος τίκει δίς. Τίκει δὲ καὶ ὁ σαργὸς δίς, ἔαρος καὶ μετοπώρου· ἡ δὲ σάλπη τοῦ μετοπώρου ἅπαξ. Ἡ δὲ θυννὶς ἅπαξ τίκει, ἀλλὰ διὰ τὸ τὰ μὲν πρώϊα τὰ δ' ὄψια προῖεσθαι δις δοκεῖ τίkein· ἔστι δ' ὁ μὲν πρῶτος τόκος περὶ τὸν Ποσειδεῶνα πρὸ τροπῶν, ὁ δ' ὕστερος τοῦ ἔαρος.

Διαφέρει δ' ὁ θύννος ὁ ἄρρην τοῦ θήλεος, ὅτι ἡ μὲν ἔχει ὁ δ' οὐκ ἔχει ὑπὸ τῇ γαστρὶ πτερύγιον, ὃ καλοῦσιν ἀφαρέα.

Κεφάλαιο 10

Τῶν δὲ σελαχῶν ἡ ῥίνη μόνη τίκει δις· τίκει γὰρ καὶ ἀρχομένου τοῦ φθινοπώρου καὶ περὶ Πλειάδος δύσιν, εὐήμερεϊ δ' ἐν τῷ φθινοπώρῳ μᾶλλον· ὁ δ' εἰς τόκος γίνεται περὶ ἑπτὰ ἢ ὀκτώ. Δοκοῦσι δ' ἔνιοι τῶν γαλεῶν, οἷον ὁ ἀστερίας, δις τοῦ μηνὸς τίκτειν· τοῦτο δὲ συμβαίνει, ὅτι οὐχ ἅμα πάντα λαμβάνει τελέωσιν τὰ ῥά. Ἐνια δὲ τίκει πᾶσαν ὥραν, οἷον ἡ σμύραινα. Τίκει δ' αὕτη ῥὰ πολλά, καὶ ἐκ μικροῦ ταχεῖαν τὴν αὔξησιν λαμβάνουσι τὰ γενόμενα, ὥσπερ καὶ τὰ τοῦ ἵππου· καὶ γὰρ ταῦτα ἐξ ἐλαχίστου μέγιστα γίνεται τάχιστα, πλὴν ἡ μὲν σμύραινα πᾶσαν ὥραν τίκει, ὁ δ' ἵππουρος ἕαρος. Διαφέρει δ' ὁ σμῦρος καὶ ἡ σμύραινα· ἡ μὲν γὰρ σμύραινα ποικίλον καὶ ἀσθενέστερον, ὁ δὲ σμῦρος ὁμόχρους καὶ ἰσχυρός, καὶ τὸ χρῶμα ἔχει ὅμοιον τῇ πίτυϊ, καὶ ὀδόντας ἔχει καὶ ἔσωθεν καὶ ἔξωθεν. Φασὶ δ' ὥσπερ καὶ τᾶλλα, τὸν μὲν ἄρρενα τὴν δὲ θήλειαν εἶναι. Ἐξέρχονται δὲ ταῦτα εἰς τὸ ξηρόν, καὶ λαμβάνονται πολλάκις.

Συμβαίνει μὲν οὖν σχεδὸν πᾶσι ταχεῖαν γίνεσθαι τὴν αὔξησιν τοῖς ἰχθύσιν, οὐχ ἥκιστα δὲ κορακίνῳ τῶν μικρῶν· τίκει δὲ (543b.) πρὸς τῇ γῇ καὶ τοῖς βρυώδεσι καὶ δασέσιν. Ταχὺ δὲ καὶ ὁ ὀρφῶς ἐκ μικροῦ γίνεται μέγας. Αἱ δὲ πηλαμύδες καὶ οἱ θύννοι τίκτουσιν ἐν τῷ Πόντῳ, ἄλλοθι δ' οὐ· κεστρεῖς δὲ καὶ χρυσόφρυες καὶ λάβρακες μάλιστα οὐ ἂν ποταμοὶ ῥέωσιν· οἱ δ' ὄρκυνες καὶ σκορπίδες καὶ ἄλλα πολλὰ γένη ἐν τῷ πελάγει.

Κεφάλαιο 11

Τίκτουν δ' οἱ πλεῖστοι τῶν ἰχθύων ἐν μηνὶ τρισί, Μουνυχιῶνι, Θαργηλιῶνι, Σκιρροφοριῶνι· μετοπώρου δ' ὀλίγοι, οἷον σάλπη καὶ σαργὸς καὶ ὅσα ἄλλα τοιαῦτα μικρὸν πρὸ ἰσημερίας τῆς φθινοπωρινῆς, καὶ νάρκη καὶ ρίνη. Τίττει δ' ἔνια καὶ χειμῶνος καὶ θέρους, ὥσπερ ἐλέχθη πρότερον, οἷον χειμῶνος μὲν λάβραξ, κεστρεύς, βελόνη, θέρους δὲ περὶ τὸν Ἑκατομβαιῶνα θυννίς, περὶ τροπὰς θερινάς· τίττει δὲ θυλακοειδές, ἐν ᾧ πολλὰ ἐγγίνεται καὶ μικρὰ ψά. Καὶ οἱ ῥυάδες τοῦ θέρους τίκτουν.

Ἄρχονται δὲ κύειν τῶν κεστρέων οἱ μὲν χελῶνες τοῦ Ποσειδεῶνος καὶ ὁ σαργὸς καὶ ὁ σμύζων καλούμενος καὶ ὁ κέφαλος· κύουσι δὲ τριάκοντα ἡμέρας.

Ἐνιοὶ δὲ τῶν κεστρέων οὐ γίνονται ἐκ συνδυασμοῦ, ἀλλὰ φύονται ἐκ τῆς ἰλύος καὶ τῆς ἄμμου.

Ὡς μὲν οὖν ἐπὶ τὸ πολὺ τοῦ ἔαρος τὰ πλεῖστα κυῖσκειται, οὐ μὴν ἀλλά, καθάπερ εἴρηται, καὶ θέρους ἔνια καὶ φθινοπώρου καὶ χειμῶνος· ἀλλ' οὐθ' ἅπασιν ὁμοίως τοῦτο συμβαίνει οὐθ' ἀπλῶς οὔτε καθ' ἕκαστον γένος, ὥσπερ τοῖς πλείστοις τοῦ ἔαρος· οὐδὲ δὴ κύουσι πολλὰ κυήματα ὁμοίως ἐν τοῖς ἄλλοις χρόνοις. Ὅλως δὲ δεῖ μὴ λεληθῆναι ὅτι, ὥσπερ καὶ τῶν φυομένων καὶ τῶν ζώων τῶν τετραπόδων πολλὴν αἰ χῶραι ποιοῦσι διαφορὰν οὐ μόνον πρὸς τὴν ἄλλην τοῦ σώματος εὐημερίαν ἀλλὰ καὶ πρὸς τὸ πλεονάκις ὀχεύεσθαι καὶ γεννᾶν, οὕτω καὶ περὶ τοὺς ἰχθύς πολλὴν ποιοῦσι τὴν διαφορὰν αὐτοὶ οἱ τόποι οὐ μόνον κατὰ μέγεθος καὶ εὐτροφίαν ἀλλὰ καὶ κατὰ τοὺς τόκους καὶ τὰς ὀχείας, τοῦ ἔνθα μὲν πλεονάκις ἔνθα δ' ἐλαττονάκις γεννᾶν τὰ αὐτά.

(544a.) Τίκει δὲ καὶ τὰ μαλάκια τοῦ ἔαρος, καὶ ἐν τοῖς πρώτοις τίκει τῶν θαλαττίων ἢ σηπία. Τίκει δὲ πᾶσαν ὥραν, ἀποτίκει δ' ἐν ἡμέραις πέντε καὶ δέκα. Ὅταν δὲ τέκη τὰ ὤα, ὁ ἄρρην παρακολουθῶν καταφυσᾷ τὸν θορόν, καὶ γίνεται στιφρά. Βαδίζουσι δὲ κατὰ ζυγά· ἔστι δ' ὁ ἄρρην τῆς θηλείας ποικιλώτερος καὶ μελάντερος τὸν νῶτον.

Ὁ δὲ πολύπους ὀχεύεται τοῦ χειμῶνος, τίκει δὲ τοῦ ἔαρος, ὅτε καὶ φωλεῖ περὶ δύο μῆνας. Τίκει δὲ τὸ ὦν καθάπερ βοστρύχιον, ὅμοιον τῷ τῆς λεύκης καρπῷ. Ἔστι δὲ πολύγονον τὸ ζῶον· ἐκ γὰρ τοῦ ἀποτικτομένου ἄπειρον γίνεται τὸ πλῆθος. Διαφέρει δ' ὁ ἄρρην τῆς θηλείας τῷ τε τὴν κεφαλὴν ἔχειν προμηκεστέραν καὶ τὸ καλούμενον ὑπὸ τῶν ἀλιέων αἰδοῖον ἐν τῇ πλεκτάνῃ λευκόν. Ἐπώζει δέ, ὅταν τέκη· διὸ καὶ χεῖριστοι γίνονται· οὐ γὰρ νέμονται κατὰ τὸν καιρὸν τοῦτον.

Γίνονται δὲ καὶ αἱ πορφύραι περὶ τὸ ἔαρ, καὶ οἱ κήρυκες λήγοντος τοῦ χειμῶνος. Καὶ ὅλως τὰ ὀστρακόδερμα ἔν τε τῷ ἔαρι φαίνεται τὰ καλούμενα ὤα ἔχοντα καὶ ἐν τῷ μετοπώρῳ, πλὴν τῶν ἐχίνων τῶν ἐδωδίων· οὗτοι δὲ μάλιστα μὲν ἐν ταύταις ταῖς ὥραις, οὐ μὲν ἀλλὰ καὶ αἰεὶ ἔχουσι, καὶ μάλιστα ταῖς πανσελήνοις καὶ ταῖς ἀλειναῖς ἡμέραις, πλὴν τῶν ἐν τῷ εὐρίπῳ τῶν Πυρραίων· ἐκεῖνοι δ' ἀμείνους τοῦ χειμῶνος. Εἰσὶ δὲ μικροὶ μὲν, πλήρεις δὲ τῶν ὠν. Κύνοντες δὲ φαίνονται καὶ οἱ κοχλῖαι πάντες ὁμοίως τὴν αὐτὴν ὥραν.

Κεφάλαιο 13

Τῶν δ' ὀρνέων τὰ μὲν ἄγρια, ὥσπερ εἴρηται, ἅπαξ ὀχεύεται καὶ τίκτει τὰ πλείστα, χελιδὼν δὲ δις τίκτει καὶ κόττυφος. Τὰ μὲν οὖν πρῶτα τοῦ κοττύφου ὑπὸ χειμῶνος ἀπόλλυται (πρωϊαίτατα γὰρ τίκτει τῶν ὀρνέων ἀπάντων), τὸν δ' ὕστερον τόκον εἰς τέλος ἐκτρέφει. Ὅσα δ' ἢ ἡμερα ἢ ἡμεροῦσθαι δύναται, ταῦτα δὲ πλεονάκις, οἷον αἱ περιστερὰ καθ' ἅπαν τὸ θέρος, καὶ τὸ τῶν ἀλεκτορίδων γένος· ὀχεύουσι γὰρ οἱ ἄρρενες καὶ ὀχεύονται αἱ θήλειαι τῶν ἀλεκτορίδων καὶ τίκτουςιν αἰεὶ, πλὴν τῶν ἐν χειμῶνι τροπικῶν ἡμερῶν. Τῶν (544b.) δὲ περιστεροειδῶν πλείω τυγχάνει ὄντα γένη· ἔστι γὰρ ἕτερον περιστερὰ καὶ πελειάς. Ἐλάττων μὲν οὖν ἡ πελειάς, τιθασσὸν δὲ γίνεται μᾶλλον ἢ περιστερὰ· ἡ δὲ πελειάς καὶ μέλαν καὶ μικρὸν καὶ ἐρυθρόπουν καὶ τραχύπουν, διὸ καὶ οὐδεὶς τρέφει. Μέγιστον μὲν οὖν τῶν τοιούτων ἡ φάττα ἐστὶ, δεύτερον δ' ἡ οἰνάς· αὕτη δὲ μικρῶ μείζων ἐστὶ τῆς περιστερᾶς· ἐλάχιστον δὲ τῶν τοιούτων ἡ τρυγών. Τίκτουςι δ' αἱ περιστερὰὶ πᾶσαν ὥραν καὶ ἐκτρέφουσιν, ἂν τόπον ἔχωσιν ἀλεινὸν καὶ τὰ ἐπιτήδεια· εἰ δὲ μή, τοῦ θέρους μόνον. Τὰ δ' ἔκγονα τοῦ ἔαρος βέλτιστα καὶ τοῦ φθινοπώρου· τὰ δὲ τοῦ θέρους καὶ ἐν ταῖς θερμοημερίαις χεῖριστα.

Κεφάλαιο 14

Διαφέρουσι δὲ καὶ κατὰ τὴν ἡλικίαν τὰ ζῷα πρὸς τὴν ὀχείαν. Πρῶτον μὲν οὖν οὐχ ἅμα τοῖς πολλοῖς ἄρχεται τε τὸ σπέρμα ἐκκρίνεσθαι καὶ γεννᾶν δύναται, ἀλλ' ὕστερον· τὸ γὰρ τῶν νέων ἐν πᾶσι τοῖς ζῷοις τὸ μὲν πρῶτον ἄγονον, γονίμων δ' ὄντων ἀσθενέστερα καὶ ἐλάττω τὰ ἔκγονα. Τοῦτο δὲ μάλιστα δῆλον ἐπὶ τε τῶν ἀνθρώπων καὶ τῶν ζωοτόκων τετραπόδων καὶ ἐπὶ τῶν ὀρνίθων· τῶν μὲν γὰρ τὰ ἔκγονα ἐλάττω, τῶν δὲ τὰ ὠά. Αἱ δ' ἡλικίαι τοῖς ὀχεύουσιν αὐτοῖς μὲν πρὸς αὐτὰ τοῖς γένεσι τοῖς πλείστοις σχεδὸν κατὰ τὸν αὐτὸν γίνονται χρόνον, ἐὰν μὴ τι προτερῇ διὰ τι τερατώδες πάθος ἢ διὰ βλάβην τῆς φύσεως.

Τοῖς μὲν οὖν ἀνθρώποις ἐπισημαίνει κατὰ τε τὴν τῆς φωνῆς μεταβολὴν καὶ τῶν αἰδοίων οὐ μόνον μεγέθει ἀλλὰ καὶ εἶδει, καὶ ἐπὶ τῶν μαστῶν ὡσαύτως, μάλιστα δὲ τῇ τριχώσει τῆς ἥβης. Ἀρχεται δὲ φέρειν τὸ σπέρμα περὶ τὰ δις ἑπτὰ ἔτη, γεννητικὸς δὲ περὶ τὰ τρις ἑπτὰ. Τοῖς δ' ἄλλοις ζῷοις ἥβη μὲν οὐ γίνεται (τὰ μὲν γὰρ ὅλως οὐκ ἔχει τρίχας, τὰ δ' οὐκ ἔχει ἐν τοῖς ὑπτίοις, ἢ ἐλάττους τῶν ἐν τοῖς πρανεσί), ἢ δὲ φωνὴ μεταβάλλουσα ἐν ἐνίοις ἐπίδηλός ἐστιν· τοῖς δ' ἕτερα τοῦ σώματος μόρια ἐπισημαίνει τὴν τ' ἀρχὴν τοῦ σπέρματος ἔχειν καὶ τοῦ τὸ γόνιμον ἦδη.

Τὴν δὲ φωνὴν ὅλως ἔχει τὸ θῆλυ ἐν τοῖς πλείστοις ὀξυτέραν, καὶ τὰ νεώτερα τῶν (545a.) πρεσβυτέρων, ἐπεὶ καὶ οἱ ἔλαφοι οἱ ἄρρενες τῶν θηλειῶν φθέγγονται βαρύτερον. Φθέγγονται δ' οἱ μὲν ἄρρενες, ὅταν ἡ ὥρα τῆς ὀχείας ᾗ, αἱ δὲ θήλειαι, ὅταν φοβηθῶσιν. Ἔστι δ' ἢ μὲν τῆς θηλείας φωνὴ βραχεῖα, ἢ δὲ τοῦ ἄρρενος ἔχει μῆκος. Καὶ ἢ τῶν κυνῶν δὲ γηρασκόντων γίνεται βαρυτέρα φωνή. Καὶ τῶν ἵππων δὲ διαφέρουσιν αἱ φωναί· εὐθὺς μὲν γὰρ γενόμεναι ἀφιασι φωνὴν λεπτὴν καὶ μικρὰν αἱ θήλειαι, οἱ δ' ἄρρενες μικρὰν μὲν, μεῖζω μέντοι γε καὶ βαρυτέραν τῆς θηλείας· τοῦ δὲ χρόνου προϊόντος μεῖζονα· διετὴς δ' ἐπειδὰν γένηται καὶ τῆς ὀχείας ἄρξεται, φωνὴν ἀφήσιν ὁ μὲν ἄρρην μεγάλην καὶ βαρεῖαν, ἢ δὲ θήλεια μεῖζω καὶ λαμπρότεραν ἢ τέως, ἄχρι ἐτῶν εἴκοσιν ὥς ἐπὶ τὸ πολὺ· μετὰ μὲντοι τὸν χρόνον τοῦτον ἀσθενεστέραν ἀφιασι καὶ οἱ ἄρρενες καὶ αἱ θήλειαι.

Ὡς μὲν οὖν ἐπὶ τὸ πολὺ, καθάπερ εἵπομεν, διαφέρει ἡ φωνὴ τῶν ἄρρένων καὶ τῶν θηλειῶν ἐν τῷ βαρύτερον φθέγγεσθαι τὰ ἄρρενα

τῶν θηλειῶν, ὅσων ἐστὶν ἀπότασις τῆς φωνῆς· οὐ μὴν ἐν πᾶσι γε τοῖς ζώοις, ἀλλ' ἐνίοις τούναντίον, οἷον ἐπὶ τῶν βοῶν· ἐπὶ γὰρ τούτων τὸ θῆλυ τοῦ ἄρρενος βαρύτερον φθέγγεται, καὶ οἱ μόσχοι τῶν τελείων. Διὸ καὶ τὰς φωνὰς τὰ ἐκτεμνόμενα μεταβάλλουσιν ἐναντίως· εἰς τὸ θῆλυ γὰρ μεταβάλλουσι τὰ ἐκτεμνόμενα.

Οἱ δὲ χρόνοι τῆς ὀχείας κατὰ τὴν ἡλικίαν ἔχουσιν ὥδε τοῖς ζώοις. Πρόβατον μὲν καὶ αἷξ αὐτοετὲς ὀχεύεται καὶ κύει, μᾶλλον δ' ἢ αἷξ· καὶ οἱ ἄρρενες δ' ὀχεύουσιν ὡσαύτως. Τὰ δ' ἔκγονα τῶν ἀρρένων διαφέρει ἐπὶ τούτων καὶ τῶν ἄλλων· οἱ γὰρ ἄρρενες βελτίους γίνονται τῷ ὕστερον ἔτει, ὅταν γηράσκωσιν. Ὑς δ' ὀχεύεται μὲν καὶ ὀχεύει πρῶτον ὀκτάμηνος, τίκτει δ' ἢ θήλεια μὲν ἐνιαυσία (οὕτω γὰρ συμβαίνει ὁ χρόνος τῆς κυήσεως). Ὁ δ' ἄρρην γεννᾷ μὲν ὀκτάμηνος, φαῦλα μέντοι πρὶν γενέσθαι ἐνιαύσιος. Οὐ πανταχοῦ δέ, ὥσπερ εἴρηται, ὁμοίως συμβαίνουσιν αἱ ἡλικίαι· ἐνιαχοῦ μὲν (545b.) γὰρ αἱ ὕες ὀχεύονται μὲν καὶ ὀχεύουσι τετράμηνοι, ὥστε δὲ γεννᾶν καὶ ἐκτρέφειν ἐξάμηνοι, ἐνιαχοῦ δ' οἱ κάπροι δεκάμηνοι ἄρχονται ὀχεύειν, ἀγαθοὶ δὲ μέχρι ἐπὶ τριετές. Κύων δ' ὡς ἐπὶ τὸ πολὺ μὲν ὀχεύεται ἐνιαυσία καὶ ὀχεύει ἐνιαύσιος, ἐνίοτε δὲ συμβαίνει ταῦτα καὶ ὀκταμήνοις· μᾶλλον δὲ τοῦτο γίνεται ἐπὶ τῶν ἀρρένων ἢ τῶν θηλειῶν. Κύει δ' ἐξήκοντα καὶ μίαν ἢ καὶ δύο ἢ τρεῖς ἡμέρας τὸ μακρότατον· ἔλαττον δ' οὐ φέρει τῶν ἐξήκονθ' ἡμερῶν, ἀλλ' ἂν τι καὶ γένηται, οὐκ ἐκτρέφεται εἰς τέλος. Τεκούσα δὲ πάλιν ὀχεύεται ἔκτω μηνί, καὶ οὐ πρότερον.

Ἴππος δ' ὀχεύειν ἄρχεται διετῆς καὶ ὀχεύεσθαι, ὥστε καὶ γεννᾶν· τὰ μέντοι ἔκγονα τὰ κατὰ τούτους τοὺς χρόνους ἐλάττω καὶ ἀσθενικώτερα.

Ὡς δ' ἐπὶ τὸ πλεῖστον τριετῆς ὀχεύει καὶ ὀχεύεται. Καὶ ἐπιδίδωσι δ' αἰεὶ ἐπὶ τὸ βελτίω τὰ ἔκγονα γεννᾶν μέχρι ἐτῶν εἴκοσιν. Ὅχεύει δ' ὁ ἵππος ὁ ἄρρην μέχρι ἐτῶν τριάκοντα καὶ τριῶν, ἢ δὲ θήλεια ὀχεύεται μέχρι τετταράκοντα ἐτῶν, ὥστε συμβαίνει σχεδὸν διὰ βίου γίνεσθαι τὴν ὀχείαν· ζῆ γὰρ ὡς ἐπὶ τὸ πολὺ ὁ μὲν ἄρρην περὶ πέντε καὶ τριάκοντα ἔτη, ἢ δὲ θήλεια πλείω τῶν τετταράκοντα· ἤδη δὲ τις ἐβίωσεν ἵππος ἔτη ἐβδομήκοντα καὶ πέντε.

Ὅνος δὲ τριακοντάμηνος ὀχεύει καὶ ὀχεύεται. Οὐ μέντοι γεννᾷ σί γ' ὡς ἐπὶ τὸ πολὺ ἀλλ' ἢ τριετῆς ἢ τριετῆς καὶ ἐξάμηνος. Ἦδη δὲ καὶ ἐνιαυσία ἐκύησεν ὥστε καὶ ἐκτραφῆναι. Καὶ βοῦς ἐνιαυσία ἔτεκεν ὥστε καὶ ἐκτραφῆναι· καὶ τὸ μέγεθος ηὐξήθη ὅσον ἔμελλε, καὶ

οὐκέτι. Αἱ μὲν οὖν ἀρχαὶ τοῖς ζώοις τούτοις τῆς γεννήσεως τοῦτον ἔχουσι τὸν τρόπον.

Γεννᾷ δ' ἄνθρωπος μὲν τὸ ἔσχατον μέχρι ἐβδομήκοντα ἐτῶν ὁ ἄρρην, γυνὴ δὲ μέχρι πενήκοντα. Ἀλλὰ τοῦτο μὲν σπάνιον· ὀλίγοις γὰρ γεννᾶται ἐν ταύταις ταῖς ἡλικίαις τέκνα· ὥς δ' ἐπὶ τὸ πολὺ τοῖς μὲν πέντε καὶ ἐξήκοντα ὅρος, ταῖς δὲ πέντε καὶ τετταράκοντα.

Πρόβατον δὲ τίκτει μέχρι ἐτῶν ὀκτώ, ἐὰν δὲ θεραπεύηται καλῶς, καὶ μέχρι ἑνδεκα· σχεδὸν δὲ διὰ βίου (546a.) συμβαίνει ὀχεύειν καὶ ὀχεύεσθαι ἀμφοτέροις. Οἱ δὲ τράγοι πίονες ὄντες ἤττον γόνιμοί εἰσιν (ἀφ' ὧν καὶ τὰς ἀμπέλους, ὅταν μὴ φέρωσι, τραγᾶν καλοῦσιν), ἀλλὰ παρὶσχανιόμενοι δύνανται ὀχεύοντες γεννᾶν. Ὀχεύουσι δ' οἱ κριοὶ τὰς πρεσβυτάτας πρῶτον, τὰς δὲ νέας οὐ διώκουσιν. Τίκτουσι δ', ὥσπερ εἴρηται ἐν τοῖς πρότερον, αἱ νέαι ἐλάττω τὰ ἔκγονα τῶν πρεσβυτέρων.

Κάπρος δ' ἀγαθὸς μὲν ὀχεύειν μέχρι ἐπὶ τριετές, τῶν δὲ πρεσβυτέρων χεῖρω τὰ ἔκγονα· οὐ γὰρ ἔτι γίνεται αὐτῷ ἐπίδοσις οὐδὲ ρώμη. Ὀχεύειν δ' εἴωθε χορτασθεὶς καὶ μὴ προβιβάσας ἄλλην· εἰ δὲ μή, ὀλιγοχρονιωτέρα ἢ ὀχεία γίνεται καὶ μικρότερα τὰ ἔκγονα.

Τίκτει δ' ἐλάχιστα μὲν ὕς, ὅταν ἡ πρωτοτόκος· δευτεροτόκος δ' οὕσα ἀκμάζει· γηράσκουσα δὲ τίκτει μὲν ὁμοίως, ὀχεύεται δὲ βραδύτερον· ὅταν δὲ πεντεκαίδεκαετεῖς ὦσιν, οὐκέτι γεννῶσιν ἀλλὰ γραῖαι γίνονται. Ἐὰν δ' εὐτραφὴς ἦ, θᾶττον ὁρμᾷ πρὸς τὰς ὀχείας καὶ νέαι καὶ γηράσκουσα· ἔγκυος δ' οὕσα ἐὰν πιαίνεται σφόδρα, ἔλαττον ἴσχει τὸ γάλα μετὰ τὸν τόκον. Τὰ δ' ἔκγονα κατὰ μὲν τὴν ἡλικίαν βέλτιστα <ᾱ> ἐν ἀκμῇ, κατὰ δὲ τὰς ὥρας, ὅσα τοῦ χειμῶνος ἀρχομένου γίνεται· χεῖριστα δὲ τὰ θερινά· καὶ γὰρ μικρὰ καὶ λεπτά καὶ ὑγρά. Ὁ δ' ἄρρην, ἐὰν μὲν εὐτραφὴς ἦ, πᾶσαν ὥραν ὀχεύειν δύνανται, καὶ μεθ' ἡμέραν καὶ νύκτωρ· εἰ δὲ μή, μάλιστα τό γ' εἴωθεν· καὶ γηράσκων ἤττον αἰεῖ, ὥσπερ εἴρηται καὶ πρότερον. Πολλάκις δ' οἱ ἀδύνατοι ἢ διὰ τὴν ἡλικίαν ἢ δι' ἀσθένειαν, οὐ δυνάμενοι ταχέως ὀχεύειν, κατακλινομένης τῆς θηλείας διὰ τὸ κάμνειν τῇ στάσει συγκατακλιθέντες πλησιάζουσιν. Κυῖσκειται δὲ μάλιστα ἡ ὕς, ἐπειδὴν θυῶσα καταβάλλῃ τὰ ὄτα· εἰ δὲ μή, ἀναθῶ ἄλιν.

Αἱ δὲ κύνες ὀχεύονται οὐ διὰ βίου ἀλλὰ μέχρι τινὸς ἀκμῆς ὥς μὲν οὖν ἐπὶ τὸ πολὺ μέχρι ἐτῶν δώδεκα αἱ τ' ὀχεῖαι συμβαίνουσι καὶ αἱ κυήσεις αὐτῶν· οὐ μὴν ἄλλ' ἤδη τισὶ καὶ ὀκτωκαίδεκα ἔτη γεγονόσι καὶ εἴκοσι συνέβη καὶ θηλείαις ὀχευθῆναι καὶ ἄρρεσι γεννῆσαι.

Ἀφαιρεῖται δὲ καὶ τὸ γῆρας ὥστε μὴ γεννᾶν μηδὲ τίκτειν, καθάπερ καὶ (546b.) ἐπὶ τῶν ἄλλων.

Ἡ δὲ κάμηλός ἐστι μὲν ὀπισθοιθητικόν, καὶ ὀχεύεται ὥσπερ εἴρηται πρότερον· τῆς δ' ὀχείας ὁ χρόνος ἐν τῇ Ἀραβίᾳ κατὰ τὸν Μαιμακτηριῶνα μῆνα. Κύει δὲ δώδεκα μῆνας, τίκτει δ' ἕν· ἔστι γὰρ μονοτόκον. Ἄρχεται δὲ τῆς ὀχείας ἡ θήλεια τριετὴς οὔσα καὶ ὁ ἄρρην τριετὴς ὢν· μετὰ δὲ τὸν τόκον ἐν ἔτος διαλιποῦσα ὀχεύεται ἡ θήλεια.

Ὁ δ' ἐλέφας ἄρχεται μὲν βαίνεισθαι ὁ μὲν νεώτατος δέκ' ἐτῶν, ὁ δὲ πρεσβύτατος πεντεκαίδεκα· ὁ δ' ἄρρην βαίνει πεντέτης ὢν ἢ ἐξέτης. Χρόνος δὲ τῆς ὀχείας τὸ ἔαρ. Πάλιν δὲ βαίνει μετὰ τὴν ὀχείαν διὰ τρίτου ἔτους· ὃν δ' ἂν ἐγκύμονα ποιήσῃ, τούτου πάλιν οὐχ ἄπτεται. Κύει δ' ἔτη δύο, τίκτει δ' ἕν· ἔστι γὰρ μονοτόκον· τὸ δ' ἔμβρυον γίνεται ὅσον μόσχος δίμηνος ἢ τρίμηνος.

Κεφάλαιο 15

Περὶ μὲν οὖν τῆς ὀχείας τῶν ζώων τῶν ὀχευομένων τοῦτον ἔχει τὸν τρόπον. Περὶ δὲ τῆς γενέσεως καὶ τῶν ὀχευομένων καὶ τῶν ἀνοχεύτων λεκτέον, καὶ πρῶτον περὶ τῶν ὀστρακοδέρμων· τοῦτο γὰρ ἐστὶν ἀνόχευτον μόνον ὡς εἰπεῖν ὅλον τὸ γένος. Αἱ μὲν οὖν πορφύραι τοῦ ἔαρος συναθροίζονται εἰς ταὐτὸ ποιοῦσι τὴν καλουμένην μελίκηραν. Τοῦτο δ' ἐστὶν οἶον κηρίον, πλὴν οὐχ οὕτω γλαφυρόν, ἀλλ' ὥσπερ ἂν εἰ ἐκ λεπυρίων ἐρεβίνθων λευκῶν πολλὰ συμπαγεῖη. Οὐκ ἔχει δ' ἀνεωγμένον πόρον οὐδὲν τούτων, οὐδὲ γίνονται ἐκ τούτων αἱ πορφύραι, ἀλλὰ φύονται καὶ αὗται καὶ τᾶλλα τὰ ὀστρακόδεσμα ἐξ ἱλύος καὶ συσσήψεως. Τοῦτο δὲ συμβαίνει ὥσπερ ἀποκάθαρμα καὶ ταύταις καὶ τοῖς κήρυξιν· κηριάζουσι γὰρ καὶ οἱ κήρυκες. Γίνονται μὲν οὖν καὶ τὰ κηριάζοντα τῶν ὀστρακοδέρμων τὸν αὐτὸν τρόπον τοῖς ἄλλοις ὀστρακοδέρμοις, οὐ μὴν ἀλλὰ μᾶλλον ὅταν προϋπάρχη τὰ ὁμοιογενῆ· ἀφίᾳσι γὰρ ἀρχόμενα κηριάζειν γλισχρότητα μυξώδη, ἐξ ἧς τὰ λεπυριώδη συνίσταται. Ταῦτα μὲν οὖν ἅπαντα διαχεῖται, ἀφίᾳσι δ' ὃ εἶχεν εἰς τὴν γῆν· καὶ ἐν τούτῳ τῷ τόπῳ γίνεται ἐν τῇ γῇ συστάντα πορφύρια μικρά, ἃ ἔχουσαι ἀλίσκονται αἱ πορφύραι ἐφ' αὐτῶν, ἓνια δ' οὐπω διηκριβωμένα (547a.) τὴν μορφήν. Ἐὰν δὲ πρὶν ἐκτεκεῖν ἀλῶσιν, ἐνίστε ἐν ταῖς φορμίσις οὐχ ὅπου ἔτυχεν ἐκτίκτουσιν, ἀλλ' εἰς ταὐτὸ ἰοῦσαι, ὥσπερ καὶ ἐν τῇ θαλάττῃ, καὶ διὰ τὴν στενοχωρίαν γίνονται οἰονεὶ βότρυς.

Εἰσὶ δὲ τῶν πορφυρῶν γένη πλείω, καὶ ἓναι μὲν μεγάλοι, οἶον αἱ περὶ τὸ Σίγειον καὶ Λεκτόν, αἱ δὲ μικραί, οἶον ἐν τῷ Εὐρίπῳ καὶ περὶ τὴν Καρίαν, καὶ αἱ μὲν ἐν τοῖς κόλποις μεγάλοι καὶ τραχεῖαι, καὶ τὸ ἄνθος αὐτῶν αἱ μὲν πλεῖσται μέλαν ἔχουσιν, ἓναι δ' ἐρυθρόν καὶ μικρόν. Γίνονται δ' ἓναι τῶν μεγάλων καὶ μναῖαι· αἱ δ' ἐν τοῖς αἰγιαλοῖς καὶ περὶ τὰς ἀκτὰς τὸ μὲν μέγεθος γίνονται μικραί, τὸ δ' ἄνθος ἐρυθρόν ἔχουσιν. Ἔτι δ' ἐν μὲν τοῖς προσβορείοις μέλαιναι, ἐν δὲ τοῖς νοτίοις ἐρυθραὶ ὡς ἐπὶ τὸ πλεῖστον εἰπεῖν. Ἀλίσκονται δὲ τοῦ ἔαρος, ὅταν κηριάζωσιν· ὑπὸ κύνα δ' οὐχ ἀλίσκονται· οὐ γὰρ νέμονται, ἀλλὰ κρύπτουσιν ἑαυτὰς καὶ φωλοῦσιν. Τὸ δ' ἄνθος ἔχουσιν ἀνὰ μέσον τῆς μήκωνος καὶ τοῦ τραχήλου· τούτων δ' ἐστὶν ἡ σύμφυσις πυκνή, τὸ δὲ χρῶμα ἰδεῖν ὥσπερ ὑμὴν λευκός, ὃν

ἀφαιροῦσιν· θλιβόμενος δὲ βάπτει καὶ ἀνθίζει τὴν χεῖρα. Διατείνει δ' αὐτὴν οἷον φλέψ· τοῦτο δὲ δοκεῖ εἶναι τὸ ἄνθος.

Ἡ δ' ἄλλη φύσις οἷον στυπτηρία. Ὅταν δὲ κηριάζωσιν αἱ πορφύραι, τότε χεῖριστον ἔχουσι τὸ ἄνθος. Τὰς μὲν οὖν μικρὰς μετὰ τῶν ὀστράκων κόπτουσιν· οὐ γὰρ ῥάδιον ἀφελεῖν· τῶν δὲ μειζόνων περιελόντες τὸ ὄστρακον ἀφαιροῦσι τὸ ἄνθος.

Διὸ καὶ χωρίζεται ὁ τράχηλος καὶ ἡ μήκων· μεταξὺ γὰρ τούτων τὸ ἄνθος, ἐπάνω τῆς καλουμένης κοιλίας· ἀφαιρεθέντος οὖν ἀνάγκη διηρηῆσθαι. Σπουδάζουσι δὲ ζώσας κόπτειν· ἐὰν γὰρ πρότερον ἀποθάνῃ, συνεξεμεῖ τὸ ἄνθος· διὸ καὶ φυλάττουσιν ἐν τοῖς κύρτοις, ἕως ἂν ἀθροίσωσι καὶ σχολάσωσιν. Οἱ μὲν οὖν ἀρχαῖοι πρὸς τοῖς δελέασιν οὐ καθίεσαν οὐδὲ προσῆπτον τοὺς κύρτους, ὥστε συνέβαινε ἀνεσπασμένην ἤδη πολλάκις ἀποπίπτειν· οἱ δὲ νῦν προσάπτουσιν, ὅπως ἐὰν ἀποπέσῃ, μὴ ἀπολλύηται. Μάλιστα δ' ἀποπίπτει, ἐὰν πλήρης ᾖ· κενῆς δ' οὐσης καὶ ἀποσπάσαι χαλεπόν. Ταῦτα μὲν οὖν τὰ (547b.) συμβαίνοντα ἴδια περὶ τὰς πορφύρας ἐστίν.

Τὸν αὐτὸν δὲ τρόπον γίνονται ταῖς πορφύραις καὶ οἱ κήρυκες, καὶ τὴν αὐτὴν ὥραν. Ἐχουσι δὲ καὶ τὰ ἐπικαλύμματα κατὰ ταῦτα ἀμφοτέρα, καὶ τᾶλλα τὰ στρομβώδη, ἐκ γενετῆς ἅπαντα· νέμονται δ' ἐξείροντα τὴν καλουμένην γλῶτταν ὑπὸ τὸ κάλυμμα. Τὸ δὲ μέγεθος τῆς γλώττης ἔχει ἡ πορφύρα μείζον δακτύλου, ὧν νέμεται καὶ διατρυπᾷ τὰ κογχύλια καὶ τὸ αὐτῆς ὄστρακον.

Ἔστι δὲ καὶ ἡ πορφύρα καὶ ὁ κήρυξ ἀμφοτέρα μακρόβια· ζῆ γὰρ ἡ πορφύρα περὶ ἔτη ἑξ, καὶ καθ' ἕκαστον ἐνιαυτὸν φανερά ἐστιν ἡ αὐξησης τοῖς διαστήμασι τοῖς ἐν τῷ ὀστράκῳ τῆς ἑλικος.

Κηριάζουσι δὲ καὶ οἱ μύες. Τὰ δὲ λιμνόστρεα καλούμενα, ὅπου ἂν βόρβορος ᾖ, ἐνταῦθα συνίσταται πρῶτον αὐτῶν ἡ ἀρχή. Αἱ δὲ κόγχαι καὶ αἱ χῆμαι καὶ οἱ σωλῆνες καὶ οἱ κτένες ἐν τοῖς ἀμμώδεσι λαμβάνουσι τὴν σύστασιν. Αἱ δὲ πίνειν ὀρθαὶ φύονται ἐκ τοῦ βυσσοῦ ἐν τοῖς ἀμμώδεσι καὶ βορβορώδεσιν. Ἐχουσι δ' ἐν αὐταῖς πινοφύλακα, αἱ μὲν καρίδιον αἱ δὲ καρκίνιον· οὗ στερισκόμεναι διαφθεύρονται θᾶπτον. Ὅλως δὲ πάντα τὰ ὀστρακώδη γίνεται ἐν τῇ ἰλύϊ καὶ αὐτόματα, κατὰ τὴν διαφορὰν τῆς ἰλύος ἕτερα, ἐν μὲν τῇ βορβορώδει τὰ ὄστρεα, ἐν δὲ τῇ ἀμμώδει κόγχαι καὶ τὰ εἰρημένα, περὶ δὲ τὰς σήραγγας τῶν πετριδίων τήθηα καὶ βάλανοι καὶ τὰ ἐπιπολάζοντα, οἷον αἱ λεπάδες καὶ οἱ νηρεῖται. Ἄπαντα μὲν οὖν τὰ τοιαῦτα τὴν αὐξησιν ἔχει ταχεῖαν, μάλιστα δ' αἱ τε πορφύραι καὶ οἱ

κτένες· ταῦτα γὰρ ἐν ἐνιαυτῷ γίνεται τέλεια.

Ἐμφύονται δ' ἐν ἐνίοις τῶν ὀστρακοδέρμων καρκίνοι λευκοί, τὸ μέγεθος μικροὶ πάμπαν, πλεῖστοι μὲν ἐν τοῖς μυσὶ τοῖς πυελώδεσιν, ἔπειτα καὶ ἐν ταῖς πίνναις οἱ καλούμενοι πιννοτῆραι. Γίνονται δὲ καὶ ἐν τοῖς κτεσὶ καὶ ἐν τοῖς λιμνοστρέοις· αὐξησιν δ' ἐπίδηλον οὐδεμίαν οὔτοι λαμβάνουσιν. Φασὶ δ' αὐτοὺς οἱ ἀλιεῖς ἅμα συγγίνεσθαι γινομένοις. Ἀφανίζονται δὲ τινα χρόνον ἐν τῇ ἄμμῳ καὶ οἱ κτένες, ὥσπερ καὶ αἱ πορφύραι.

Φύεται μὲν οὖν τὰ ὄστρεα καθάπερ εἴρηται, φύεται δὲ τὰ μὲν αὐτῶν (548a.) ἐν τοῖς τενάγεσι, τὰ δ' ἐν τοῖς αἰγιαλοῖς, τὰ δ' ἐν τοῖς πηλώδεσι τόποις, ἓνα δ' ἐν τοῖς σκληροῖς καὶ τραχέσι, τὰ δ' ἐν τοῖς ἀμμώδεσιν. Καὶ τὰ μὲν μεταβάλλει τοὺς τόπους, τὰ δ' οὔ. Τῶν δὲ μὴ μεταβαλλόντων αἱ μὲν πίνναι ἐρρίζωνται, οἱ δὲ σωλῆνες καὶ αἱ κόγχαι ἀρρίζωτοι διαμένουσιν· ὅταν δ' ἀνασπασθῶσιν, οὐκέτι δύνανται ζῆν.

Ὁ δὲ καλούμενος ἀστήρ οὕτω θερμός ἐστι τὴν φύσιν, ὥσθ' ὅ τι ἂν λάβῃ, παραχρῆμα ἐξαιρούμενον δίεφθον εἶναι. Φασὶ δὲ καὶ σίνος μέγιστον εἶναι τοῦτο ἐν τῷ εὐρίπῳ τῷ τῶν Πυρραίων. Τὴν δὲ μορφήν ὁμοίον ἐστι τοῖς γραφομένοις.

Γίνονται δὲ καὶ οἱ κανούμενοι πνεύμονες αὐτόματα. Ὡς δ' οἱ γραφεῖς ὀστρέῳ χρῶνται, πάχει τε πολὺ ὑπερβάλλει, καὶ ἔξωθεν τοῦ ὀστράκου τὸ ἄνθος ἐπιγίνεται· εἰσὶ δὲ τὰ τοιαῦτα μάλιστα περὶ τοὺς τόπους τοὺς περὶ Καρίαν.

Τὸ δὲ καρκίνιον γίνεται μὲν τὴν ἀρχὴν ἐκ τῆς γῆς καὶ ἰλύος, εἴτ' εἰς τὰ κενὰ τῶν ὀστράκων εἰσδύεται, καὶ αὐξανόμενον μετεισδύνει πάλιν εἰς ἄλλο μεῖζον ὄστρακον, οἷον εἰς τε τὸ τοῦ νηρείτου καὶ τὸ τοῦ στρόμβου καὶ τὸ τῶν ἄλλων τῶν τοιούτων, πολλάκις δ' εἰς τοὺς κήρυκας τοὺς μικροὺς. Ὅταν δ' εἰσδύσῃ, συμπεριφέρει τοῦτο καὶ ἐν τούτῳ τρέφεται πάλιν· καὶ αὐξανόμενον πάλιν εἰς ἄλλο μετεισδύνει μεῖζον.

Κεφάλαιο 16

Τὸν αὐτὸν δὲ τρόπον γίνονται τοῖς ὄστρακοδέρμοις καὶ τὰ μὴ ἔχοντα ὄστρακον, οἷον αἶ τε κνῖδαι καὶ οἱ σπόγγοι, ἐν ταῖς σήραγγι τῶν πετρῶν. Ἔστι δὲ τῶν κνιδῶν δύο γένη· αἱ μὲν οὖν ἐν τοῖς κοίλοις οὐκ ἀπολύονται τῶν πετρῶν, αἱ δ' ἐπὶ τοῖς λείοις καὶ πλαταμώδεσιν ἀπολύμεναι μεταχωροῦσιν. Καὶ αἱ λεπάδες δ' ἀπολύονται καὶ μεταχωροῦσιν.

Τῶν δὲ σπόγγων ἐν ταῖς θαλάμαις γίνονται πιννοφύλακες.

Ἔπεστι δ' οἷον ἀράχνιον ἐπὶ τῶν θαλαμῶν, ὃ διοίγοντες καὶ συνάγοντες θηρεύουσι τὰ ἰχθύδια τὰ μικρά, πρὸς μὲν τὸ εἰσελθεῖν διοίγοντες αὐτά, ὅταν δ' εἰσέλθῃ, συνάγοντες. Ἔστι δὲ τῶν σπόγγων τρία γένη, ὃ μὲν μανός, ὃ δὲ πυκνός, (548b.) τρίτος δ' ὃν καλοῦσιν Ἀχίλλειον λεπτότατος καὶ πυκνότατος καὶ ἰσχυρότατος· ὃν ὑπὸ τὰ κράνη καὶ τὰς κνημίδας ὑποτιθέασι, καὶ ἥττον ἢ πληγὴ ψοφεῖ. Σπανιώτατος δὲ γίνεται οὗτος. Τῶν δὲ πυκνῶν οἱ σκληροὶ σφόδρα καὶ τραχεῖς τράγοι καλοῦνται. Φύονται δ' ἢ πρὸς πέτρα πάντες ἢ ἐν ταῖς θισί, τρέφονται δ' ἐν τῇ ἰλύϊ. Σημεῖον δέ· ὅταν γὰρ ληφθῶσι, φαίνονται μεστοὶ ἰλύος· ὅπερ συμβαίνει καὶ τοῖς ἄλλοις τοῖς φυομένοις ἀπὸ τῆς προσφύσεως οὔσα ἢ τροφή. Ἀσθενέστεροι δ' εἰσὶν οἱ πυκνοὶ τῶν μανῶν διὰ τὸ τὴν πρόσφυσιν εἶναι κατ' ἔλαττον.

Ἔχει δὲ καὶ αἴσθησιν, ὥς φασίν. Σημεῖον δέ· ἐὰν γὰρ μέλλοντος ἀποσπᾶν αἰσθηται, συνάγει ἑαυτὸν καὶ χαλεπὸν ἀφελεῖν ἐστιν. Ταῦτο δὲ τοῦτο ποιεῖ καὶ ὅταν ἢ πνεῦμα πολὺ καὶ κλύδων, πρὸς τὸ μὴ ἀποπίπτειν. Εἰσὶ δὲ τινες οἱ περὶ τούτου ἀμφισβητοῦσιν, ὥσπερ οἱ ἐν Τορώνῃ.

Τρέφει δ' ἐν ἑαυτῷ ζῶα, ἔλμινθάς τε καὶ ἕτερ' ἄττα, ἃ κατεσθίει, ὅταν ἀποσπασθῇ, τὰ ἰχθύδια τὰ πετραῖα, καὶ τὰς ρίζας τὰς ὑπολοίπους· ἐὰν δ' ἀπορραγῇ, φύεται πάλιν ἐκ τοῦ καταλοίπου καὶ ἀναπληροῦται. Μέγιστοι μὲν οὖν γίνονται οἱ μανοί, καὶ πλεῖστοι περὶ τὴν Λυκίαν, μαλακώτατοι δ' οἱ πυκνοί· οἱ γὰρ Ἀχίλλειοι στιφρότεροι τούτων εἰσίν. Ὅλως δ' οἱ ἐν τοῖς βαθέσι καὶ εὐδιεινοῖς μαλακώτατοί εἰσιν· τὸ γὰρ πνεῦμα καὶ ὁ χειμῶν σκληρύνει, καθάπερ καὶ τᾶλλα τὰ φυόμενα, καὶ ἀφαιρεῖται τὴν αὔξισιν· διὸ καὶ οἱ ἐν Ἑλλησπόντῳ τραχεῖς εἰσι καὶ πυκνοί, καὶ ὅλως οἱ τ' ἐπέκεινα Μαλέας καὶ οἱ ἐντὸς διαφέρουσι μαλακότητι καὶ σκληρότητι. Δεῖ δὲ μὴδ' ἀλέαν εἶναι

σφόδρα· σήπεται γάρ, ὥσπερ τὰ φυόμενα. Διὸ οἱ πρὸς ταῖς ἀκταῖς εἰσι κάλλιστοι, ἂν ὧσιν ἀγγιβαθεῖς· εὖ γὰρ κέκρανται πρὸς ἄμφω διὰ τὸ βάθος. Ἄπλυτοι δ' ὄντες καὶ ζῶντες ἰδεῖν μὲν εἰσι μέλανες. Ἡ δὲ πρόσφυσις ἐστὶν οὔτε καθ' ἓν οὔτε κατὰ πᾶν· μεταξὺ γάρ εἰσι πόροι κενοί. Περιτέταται δ' ὥσπερ ὑμὴν περὶ τὰ κάτω· κατὰ (549a.) πλείω δ' ἐστὶν ἢ πρόσφυσις. Ἄνωθεν δ' οἱ μὲν ἄλλοι πόροι συγκεκλεισμένοι, φανεροὶ δ' εἰσὶ τέτταρες ἢ πέντε· διό φασιν ἔνιοι τούτους εἶναι καθ' οὓς δέχεται τὴν τροφήν.

Ἔστι δ' ἄλλο γένος ὃ καλοῦσιν ἀπλυσίας διὰ τὸ μὴ δύνασθαι πλύνεσθαι· τοῦτο δὲ τοὺς μὲν μεγάλους πόρους ἔχει, τὸ δ' ἄλλο πυκνὸν ἐστὶ πᾶν· διατμηθὲν δὲ πυκνότερόν ἐστι καὶ γλισχρότερον τοῦ σπόγγου, καὶ τὸ σύνολον πνευμονῶδες. Ὁμολογεῖται δὲ μάλιστα παρὰ πάντων τοῦτο τὸ γένος αἰσθησὶν ἔχειν καὶ πολυχρόνιον εἶναι. Διάδηλοι δ' εἰσὶν ἐν τῇ θαλάττῃ πρὸς τοὺς σπόγγους τῷ τοὺς σπόγγους μὲν εἶναι λευκοὺς ἐφίζούσης τῆς ἰλύος, τούτους δ' ἀεὶ μέλανας. Τὰ μὲν οὖν περὶ τοὺς σπόγγους καὶ τὴν τῶν ὀστρακοδέρμων γένεσιν τοῦτον ἔχει τὸν τρόπον.

Κεφάλαιο 17

Τῶν δὲ μαλακοστράκων οἱ κάραβοι μετὰ τὴν ὀχείαν κύουσι καὶ ἴσχουσι τὰ ῥὰ περὶ τρεῖς μῆνας, Σκιρροφοριῶνα καὶ Ἑκατομβαιῶνα καὶ Μεταγεινιῶνα· μετὰ δὲ ταῦτα προεκτίκτουσιν ὑπὸ τὴν κοιλίαν εἰς τὰς πτύχας, καὶ αὐξάνεται αὐτῶν τὰ ῥὰ ὥσπερ οἱ σκώληκες. Τὸ δ' αὐτὸ τοῦτο καὶ ἐπὶ τῶν μαλακίων ἐστὶ καὶ τῶν ἰχθύων, ὅσοι φωτοκοῦσιν· αὐξάνεται γὰρ πάντων τὸ ῥόν. Τὸ μὲν οὖν ῥόν γίνεται ψαθυρὸν τῶν καράβων, διηρημένον εἰς ὀκτὼ μοίρας. Καθ' ἕκαστον γὰρ τῶν ἐπικαλυμμάτων τῶν ἐκ τοῦ πλαγίου πεφυκῶτων ἐστὶ χονδρῶδές τι πρὸς ὃ περιφύεται, καὶ τὸ ὅλον γίνεται ὥσπερ βότρυς· σχίζεται γὰρ ἕκαστον εἰς πλείω τῶν χονδρῶδων. Ταῦτα δὲ διαστέλλοντι μὲν γίνεται φανερά, προσβλέποντι δὲ συνεστηκός τι φαίνεται· καὶ γίνεται δὲ μέγιστα οὐ τὰ πρὸς τῷ πόρῳ ἀλλὰ τὰ κατὰ μέσον, ἐλάχιστα δὲ τὰ ἔσχατα. Τὸ δὲ μέγεθος τῶν ῥῶν τῶν μικρῶν ἐστὶν ἡλικὸν κεγχαμῖς. Οὐκ ἔστι δ' εὐθὺς ἐχόμενα τοῦ πόρου, ἀλλὰ κατὰ μέσον· ἐκατέρωθεν γὰρ ἀπὸ τῆς κέρκου καὶ ἀπὸ τοῦ θώρακος δύο διαστήματα ἐπέχει μάλιστα· οὕτω γὰρ καὶ τὰ ἐπικαλύμματα πέφυκεν. Αὐτὰ μὲν οὖν τὰ ἐκ τοῦ πλαγίου οὐ δύναται συμπεριλαμβάνειν, τοῦ δ' ἄκρου προσεπιτεθέντος καλύπτει πάντα, καὶ γίνεται τοῦτ' αὐτοῖς οἷον πῶμα. Ἔοικε (549b.) δὲ τὰ ῥὰ τίκτουσα προσάγειν πρὸς τὰ χονδρῶδη τῷ πλάτει τῆς κέρκου προσαναπτυττομένης, καὶ προσπιέσασα εὐθὺς καὶ κεκαμμένη ἀποτίκτειν. Τὰ δὲ χονδρῶδη κατὰ τοὺς καιροὺς τούτους αὐξάνεται καὶ δεκτικὰ γίνεται τῶν ῥῶν· πρὸς τὰ χονδρῶδη γὰρ ἀποτίκτουσι, καθάπερ αἱ σηπῖαι πρὸς τὰ κλήματα καὶ τὸν φορυτόν. Ἀποτίκτει μὲν οὖν τοῦτον τὸν τρόπον, συμπέσασα δ' ἐνταῦθα μάλιστα ἐν εἴκοσιν ἡμέραις ἀποβάλλει συνεστηκός καὶ ἀθρόον, ὥσπερ φαίνεται καὶ ἐκτός· εἴτ' ἐκ τούτων γίνονται οἱ κάραβοι ἐν ἡμέραις μάλιστα πεντεκαίδεκα, καὶ λαμβάνονται πολλάκις ἐλάττους ἢ δακτυλῖοι. Προεκτίκτει μὲν οὖν πρὸ ἄρκτούρου, μετὰ δ' ἄρκτουρον ἀποβάλλει τὰ ῥὰ. Τῶν δὲ κυφῶν καρίδων ἡ κύησίς ἐστι περὶ τέτταρας μῆνας.

Γίνονται δ' οἱ μὲν κάραβοι ἐν τοῖς τραχέσι καὶ πετρώδεσιν, οἱ δ' ἄστακοὶ ἐν τοῖς λείοις· ἐν δὲ τοῖς πηλώδεσιν οὐδέτεροι· διὸ καὶ ἐν Ἑλλησπόντῳ μὲν καὶ περὶ Θάσον ἄστακοὶ γίνονται, περὶ δὲ τὸ Σίγειον καὶ τὸν Ἄθων κάραβοι. Διασημαίνονται δὲ τοὺς τόπους οἱ

άλιεις τούς τε τραχεῖς καὶ τοὺς πηλώδεις ταῖς τ' ἀκταῖς καὶ τοῖς ἄλλοις τοῖς τοιούτοις σημείοις, ὅταν βούλονται ἐν τῷ πελάγει ποιεῖσθαι τὴν θήραν. Γίνονται δ' ἐν μὲν τῷ χειμῶνι καὶ τῷ ἔαρι πρὸς τῇ γῇ μᾶλλον, τοῦ δὲ θέρους ἐν τῷ πελάγει, διώκοντα ὅτε μὲν τὴν ἀλέαν ὅτε δὲ τὸ ψῦχος.

Τοῖς δὲ χρόνοις παραπλησίως καὶ αἱ καλούμεναι ἄρκτοι τίκτουσι τοῖς καράβοις· διὸ καὶ τοῦ χειμῶνος καὶ πρὶν ἐκτεκεῖν τοῦ ἔαρος ἄρισταί εἰσιν, ὅταν δ' ἐκτέκωσι, χεῖρισταί.

Ἐκδύνουσι δὲ τὸ κέλυφος τοῦ ἔαρος, ὥσπερ οἱ ὄφεις τὸ καλούμενον γῆρας, καὶ εὐθὺς γενόμενοι καὶ ὕστερον καὶ οἱ καρκίνοι καὶ οἱ κάραβοι. Εἰσὶ δ' οἱ κάραβοι μακρόβιοι πάντες.

Κεφάλαιο 18

Τὰ δὲ μαλάκια ἐκ τοῦ συνδυασμοῦ καὶ τῆς ὀχείας φὸν ἴσχει λευκόν· τοῦτο δὲ γίνεται τῷ χρόνῳ, ὥσπερ τὰ τῶν σκληροδέρμων, ψαθυρόν. Καὶ ἀποτίκτει ὁ μὲν πολύπους εἰς τὰς θαλάμας ἢ εἰς κεράμιον ἢ τι ἄλλο κοῖλον ὅμοιον βοστρυχίοις οἰνάνθης καὶ λεύκης καρπῷ, καθάπερ εἴρηται πρότερον. Ἐκκρεμάννυνται δὲ περὶ τὴν θαλάμην τὰ ψά, ὅταν (550a.) ἐκτέκη. Τὸ δὲ πλῆθος ἔχει τοσαῦτα ψά ὥστ' ἐξαιρεθέντων ἐμπίπλῃται ἀγγεῖον πολλῷ μείζον τῆς κεφαλῆς, ἐν ᾗ ἔχει τὰ ψά.

Τὰ μὲν οὖν τῶν πολυπόδων μεθ' ἡμέρας μάλιστα πεντήκοντα γίνεται ἐκ τῶν ἀπορραγόντων πολυπόδια, καὶ ἐξέρπει, ὥσπερ τὰ φαλάγγια, πολλὰ τὸ πλῆθος· ὧν ἡ μὲν καθ' ἕκαστα φύσις τῶν μελῶν οὐπω διάδηλος, ἡ δ' ὅλη μορφή φανερά. Διὰ δὲ τὴν μικρότητα καὶ τὴν ἀσθένειαν φθείρεται τὸ πλῆθος αὐτῶν. Ἦδη δ' ὥπται καὶ οὕτω πάμπαν μικρὰ ὥστ' ἀδιάρθρωτα μὲν εἶναι, ἀποτομένων δὲ κινεῖσθαι.

Αἱ δὲ σηπία ἀποτίκτουσι, καὶ γίνεται ὅμοια μύρτοις μεγάλοις καὶ μέλασιν· καὶ ἀλλήλων ἐχόμενά ἐστιν, οἷον βότρυς τὸ πᾶν, περιπεπλεγμένα τινὶ ἐνί, καὶ οὐκ εὐαπόσπαστα ἀλλήλων. Ἐπαφίησι γὰρ ὁ ἄρρην ὑγρότητα τινα μυζώδη· ὃ τὴν γλισχρότητα παρέχει. Καὶ αὐξάνεται δὲ ταῦτα τὰ ψά, καὶ εὐθύς μὲν ἐστὶ λευκά, ὅταν δ' ἀφῇ τὸν θορόν, καὶ μείζω καὶ μέλανα. Ὅταν δὲ σηπίδιον γένηται, ὅλον ἐκ τοῦ λευκοῦ γενόμενον ἔσω, τούτου περιρραγέντος ἐξέρχεται. Γίνεται δ' ὅταν πρῶτον ἀπορράνη ἡ θήλεια, οἶονεὶ χάλαζα· ἐκ γὰρ τούτου τὸ σηπίδιον φύεται ἐπὶ κεφαλὴν, ὥσπερ οἱ ὄρνιθες κατὰ τὴν κοιλίαν προσηρτημένοι. Ποία δὲ τίς ἐστὶν ἡ πρόσφυσις ἡ ὁμφαλώδης, οὐπω ὥπται, πλὴν ὅτι αὐξανομένου τοῦ σηπιδίου αἰεὶ ἔλαττον γίνεται τὸ λευκόν, καὶ τέλος, ὥσπερ τὸ ὠχρόν τοῖς ὄρνισι, τούτοις τὸ λευκὸν ἀφανίζεται. Μέγιστοι δὲ φαίνονται πρῶτον, ὥσπερ καὶ ἐν τοῖς ἄλλοις, καὶ ἐν τούτοις οἱ ὀφθαλμοί. Ὡδὸν ἐφ' οὗ τὸ Α, ὀφθαλμοὶ ἐφ' ὧν τὸ ΒΓ, τὸ σηπίδιον αὐτὸ ἐφ' οὗ Δ.

Κύει δὲ τοῦ ἔαρος, ἀποτίκτει δ' ἐν ἡμέραις πεντεκαίδεκα· ὅταν δ' ἀποτέκη τὰ ψά, γίνεται ἐν ἄλλαις πεντεκαίδεκα ἡμέραις οἷον ράγες βότρυς, ὧν περιρραγόντων ἐκδύεται ἔσωθεν τὰ σηπίδια. Ἐὰν δὲ τις περισχίσῃ πρότερον ἢ ἤδη τετελειωμένων, προῖενται κόπρον τὰ σηπίδια, καὶ τὸ χρῶμα μεταβάλλει ἐρυθρότερον γινόμενον ἐκ λευκοῦ

διὰ τὸν φόβον.

Τὰ μὲν οὖν μαλακόστρακα αὐτὰ (550b.) ὑφ' αὐτὰ θέμενα τὰ ῥὰ ἐπωάζει, ὁ δὲ πολύπους καὶ ἡ σηπία καὶ τᾶλλα τὰ τοιαῦτα ἐκτεκόντα, οὗ ἂν τὰ κυήματα αὐτῶν ᾗ, μάλιστα μὲν ἡ σηπία· πολλάκις γὰρ ὑπερφαίνεται πρὸς τῇ γῇ τὸ κύτος αὐτῆς. Ὁ δὲ πολύπους ὁ θῆλυς ὅτε μὲν ἐπὶ τοῖς ῥοῖς ὅτε δ' ἐπὶ τῷ στόματι προκάθεται τῆς θαλάμης, τὴν πλεκτάνην ἐπέχων. Ἡ δὲ σηπία πρὸς τὴν γῆν ἐκτίκει περὶ τὰ φυκία καὶ τὰ καλαμώδη, κἄν τι ᾗ τοιοῦτον ἐκβεβλημένον, οἷον ὕλη <ἡ> κλήματα ἢ λίθοι· καὶ οἱ ἄλιεῖς δὲ κλήματα τιθέασιν ἐπίτηδες· καὶ πρὸς ταῦτα ἐκτίκει μακρὸν καὶ συνεχές ἐκ τῶν ῥῶν, οἷον τὸ τῶν βοστρύχων.

Ἀποτίκει δὲ καὶ ἀπορραίνει ἐξ ἀναγωγῆς, ὥς μετὰ πόνου γινομένης τῆς προέσεως. Αἱ δὲ τευθίδες πελάγαι ἀποτίκτουσιν· τὸ δ' ῥόν, ὥσπερ ἡ σηπία, ἀποτίκει συνεχές. Ἔστι δὲ καὶ ὁ τευθος καὶ ἡ σηπία βραχύβιον· οὐ γὰρ διετίζουσιν, εἰ μὴ τινες ὀλίγαι αὐτῶν· ὁμοίως δὲ καὶ οἱ πολύποδες. Γίνεται δ' ἐξ ἐνὸς ῥοῦ ἓν σηπίδιον· ὁμοίως δὲ καὶ ἐπὶ τῶν τευθίδων ἔχει. Διαφέρει δ' ἡ ἄρρην τευθὶς τῆς θηλείας· ἔχει γὰρ ἡ θήλεια, ἐάν τις διαστείλας θεωρήσῃ τὴν κόμην εἶσω, ἐρυθρὰ δύο οἷον μαστούς, ὁ δ' ἄρρην οὐκ ἔχει. Ἡ δὲ σηπία τοῦτό τ' ἔχει διάφορον, καὶ ὅτι ποικιλωτέρως ἐστὶν ὁ ἄρρην τῆς θηλείας, καθάπερ εἴρηται πρότερον.

Κεφάλαιο 19

Τὰ δ' ἔντομα τῶν ζώων ὅτι μὲν ἐλάττω ἐστὶ τὰ ἄρρενα τῶν θηλειῶν καὶ ἐπιβαίνει ἄνωθεν, καὶ πῶς ποιεῖται τὴν ὀχείαν, καὶ ὅτι διαλύεται μόλις, εἰρηται πρότερον· ὅταν δ' ὀχευθῇ, ταχέως ποιεῖται τὰ πλεῖστα τὸν τόκον. Τίκει δὲ πάντα ὅσα ὀχεύεται σκώληκας πλὴν γένος τι ψυχῶν· αὗται δὲ σκληρόν, ὅμοιον κνήκου σπέρματι, ἔσω δὲ χύμα.

Ἐκ δὲ τῶν σκωλήκων οὐκ ἐκ μέρους τινὸς γίνεται τὸ ζῶον, ὥσπερ ἐκ τῶν ὤων, ἀλλ' ὅλον αὐξάνεται καὶ διαρθρούμενον γίνεται τὸ ζῶον.

Γίνεται δ' αὐτῶν τὰ μὲν ἐκ ζώων τῶν συγγενῶν, οἷον φαλαγγία τε καὶ ἀράχνια ἐκ φαλαγγίων καὶ ἀραχνίων, καὶ ἀττέλαβοι καὶ ἀκρίδες καὶ τέττιγες· τὰ δ' (551a.) οὐκ ἐκ ζώων ἀλλ' αὐτόματα, τὰ μὲν ἐκ τῆς δρόσου τῆς ἐπὶ τοῖς φύλλοις πιπτούσης, κατὰ φύσιν μὲν ἐν τῷ ἔαρι, πολλάκις δὲ καὶ τοῦ χειμῶνος, ὅταν εὐδία καὶ νοτία γένηται πλείω χρόνον· τὰ δ' ἐν βορβόρῳ καὶ κόπρῳ σηπομένοις, τὰ δ' ἐν ξύλοις, τὰ μὲν φυτῶν, τὰ δ' ἐν αὐοῖς ἤδη, τὰ δ' ἐν θριζὶ ζώων, τὰ δ' ἐν σαρκὶ τῶν ζώων, τὰ δ' ἐν τοῖς περιττώμασι, καὶ τούτων τὰ μὲν ἐκκεχωρισμένων, τὰ δ' ἔτι ὄντων ἐν τοῖς ζώοις, οἷον αἱ καλούμεναι ἔλμινθες. Ἔστι δ' αὐτῶν γένη τρία, ἥ τε ὀνομαζομένη πλατεῖα, καὶ αἱ στρογγύλαι, καὶ τρίται αἱ ἀσκαρίδες. Ἐκ μὲν οὖν τούτων ἕτερον οὐδὲν γίνεται· ἡ δὲ πλατεῖα προσπέφυκὲ τε μόνῃ τῷ ἐντέρῳ καὶ ἀποτίκει οἷον σικύου σπέρμα, ὃ γινώσκουσι σημειῶ οἱ ἰατροὶ τοὺς ἔχοντας αὐτήν.

Γίνονται δ' αἱ μὲν καλούμεναι ψυχαὶ ἐκ τῶν καμπῶν, αἱ γίνονται ἐπὶ τῶν φύλλων τῶν χλωρῶν, καὶ μάλιστα ἐπὶ τῆς ράφανου, ἣν καλοῦσιν τινες κράμβην, πρῶτον μὲν ἔλαττον κέγχρου, εἴτα μικροὶ σκώληκες αὐξανόμενοι, ἔπειτα ἐν τρισὶν ἡμέραις κάμπαι μικραί· μετὰ δὲ ταῦτα αὐξηθεῖσαι ἀκινητίζουσι, καὶ μεταβάλλουσι τὴν μορφήν, καὶ καλοῦνται χρυσαλλίδες, καὶ σκληρόν ἔχουσι τὸ κέλυφος, ἀπτομένου δὲ κινοῦνται. Προσέχονται δὲ πόροις ἀραχνιώδεσιν οὔτε στόμα ἔχουσαι οὔτ' ἄλλο τῶν μορίων διάδηλον οὐδέν. Χρόνου δ' οὐ πολλοῦ διελθόντος περιρρήγνυται τὸ κέλυφος, καὶ ἐκπέτεται ἐξ αὐτῶν πτερωτὰ ζῷα, ἃς καλοῦμεν ψυχάς. Τὸ μὲν οὖν πρῶτον, ὅταν ὦσι κάμπαι, τρέφονται καὶ περιττωμα ἀφιᾶσιν·

ὅταν δὲ γένωνται χρυσαλλίδες, οὐδενὸς οὔτε γεύονται οὔτε προΐενται περίττωμα. Τὸν αὐτὸν δὲ τρόπον καὶ τᾶλλα ὅσα γίνεται ἐκ σκωλήκων, καὶ ὅσοι ἐκ συνδυασμοῦ γίνονται ζώων σκώληκες, καὶ ὅσοι ἄνευ ὀχείας. Καὶ γὰρ οἱ τῶν μελιττῶν καὶ ἀνθρηνῶν καὶ σφηκῶν ὅταν μὲν νέοι σκώληκες ᾧσι, (551b.) τρέφονται τε καὶ κόπρον ἔχοντες φαίνονται· ὅταν δ' ἐκ τῶν σκωλήκων εἰς τὴν διατύπωσιν ἔλθωσι, καλοῦνται μὲν νύμφαι τότε, οὐ λαμβάνουσι δὲ τρυφὴν οὐδὲ κόπρον ἔτ' ἔχουσιν, ἀλλὰ περιειργμένοι ἀκίνητίζουσιν ἕως ἂν αὐξηθῶσιν· τότε δ' ἐξέρχονται διακόψαντες ᾧ καταλήλειπται ὁ κύτταρος. Γίνονται δὲ καὶ τὰ ὑπερα καὶ τὰ πηνία ἐκ τινων τοιούτων ἄλλων, αἱ κυμαίνουσι τῇ πορείᾳ καὶ προβάσαι τῷ ἐτέρῳ κάμψασαι ἐπιβαίνουσιν· ἕκαστον δὲ τῶν γινομένων τὸ οἰκεῖον χρῶμα λαμβάνει ἀπὸ τῆς κάμπης.

Ἐκ δὲ τινος σκώληκος μεγάλου, ὃς ἔχει οἶον κέρατα καὶ διαφέρει τῶν ἄλλων, γίνεται πρῶτον μὲν μεταβάλλοντος τοῦ σκώληκος κάμπη, ἔπειτα βομβυλῖς, ἐκ δὲ τούτου νεκύδαλος· ἐν ἑξ δὲ μηνὶ μεταβάλλει ταύτας τὰς μορφὰς πάσας. Ἐκ δὲ τούτου τοῦ ζώου καὶ τὰ βομβύκια ἀναλύουσι τῶν γυναικῶν τινὲς ἀναπνηζόμεναι, κάπειτα ὑφαίνουσιν· πρώτη δὲ λέγεται ὑφῆναι ἐν Κῶ Παμφίλῃ Πλάτεω θυγάτηρ.

Ἐκ δὲ τῶν σκωλήκων τῶν ἐν τοῖς ξύλοις τοῖς αὐοῖς οἱ καράμβιοι γίνονται τὸν αὐτὸν τρόπον· πρῶτον μὲν ἀκίνητισάντων τῶν σκωλήκων, εἴτα περιρραγέντος τοῦ κελύφους ἐξέρχονται οἱ καράμβιοι. Ἐκ δὲ τῶν κραμβῶν ... γίνονται αἱ πρασοκουρίδες· ἴσχουσι δὲ περὰ καὶ αὐταί. Ἐκ δὲ τῶν ἐν τοῖς ποταμοῖς πλατέων ζωδαρίων τῶν ἐπιθεόντων οἱ οἶστροι· διὸ καὶ οἱ πλείστοι περὶ τὰ ὕδατα γίνονται οὗ τὰ τοιαῦτα ζῷά ἐστιν. Ἐκ δὲ μελαινῶν τινων καὶ δασειῶν οὐ μεγάλων καμπῶν πρῶτον γίνονται πυγολαμπίδες, οὐχ αἱ πετόμεναι· αὗται δὲ πάλιν μεταβάλλουσι, καὶ γίνονται πτερωτὰ ζῷα ἐξ αὐτῶν, οἱ καλοῦμενοι βόστρυχοι.

Αἱ δ' ἐμπίδες γίνονται ἐκ τῶν ἀσκαρίδων. Αἱ δ' ἀσκαρίδες γίνονται ἐν τε τῇ ἰλύϊ τῶν φρεάτων καὶ ὅπου ἂν σύρρευσις γένηται ὕδατος γεώδη ἔχουσα ὑπόστασιν. Τὸ μὲν οὖν πρῶτον αὐτὴ ἡ ἰλὺς σηπομένη χρῶμα λαμβάνει λευκόν, εἴτα (552a.) μέλαν, τελευτῶσα δ' αἱματῶδες· ὅταν δὲ τοιαύτη γένηται, φύεται ἐξ αὐτῆς ὥσπερ τὰ φυκία μικρὰ σφόδρα καὶ ἐρυθρά· ταῦτα δὲ χρόνον μὲν τινα κινεῖται προσπεφυκότα, ἔπειτ' ἀπορραγέντα φέρεται κατὰ τὸ ὕδωρ, αἱ

καλούμεναι ἀσκαρίδες. Μεθ' ἡμέρας δ' ὀλίγας ἴστανται ὀρθαί ἐπὶ τοῦ ὕδατος ἀκινήτίζουσαι καὶ σκληραί, κάπειτα περιρραγέντος τοῦ κελύφους ἢ ἐμπὶς ἄνω ἐπικάθηται, ἕως ἂν ἥλιος ἢ πνεῦμα κινήσῃ· τότε δ' ἡδη πέτεται. Πᾶσι δὲ καὶ τοῖς ἄλλοις σκώληξι καὶ τοῖς ζώοις τοῖς ἐκ τῶν σκωλήκων περιρρηγνυμένοις ἡ ἀρχὴ γίνεται τῆς γενέσεως ὑφ' ἡλίου ἢ ὑπὸ πνεύματος. Μᾶλλον δὲ καὶ θᾶπτον γίνονται αἱ ἀσκαρίδες ἐν τοῖς ἔχουσι παντοδαπὴν ὑπόστασιν, οἷον ἐν μαγειρείοις τε γίνεται καὶ ἐν τοῖς ἔργοις· σήπεται γὰρ τὰ τοιαῦτα θᾶπτον. Καὶ μετοπώρου δὲ γίνονται μᾶλλον· τότε γὰρ τὸ ὑγρὸν συμβαίνει εἶναι ἔλαττον.

Οἱ δὲ κρότῳνες γίνονται ἐκ τῆς ἀγρώστεως, αἱ δὲ μηλολόνθαι ἐκ τῶν σκωλήκων τῶν ἐν τοῖς βολίτοις καὶ τῶν ὀνίδων. Οἱ δὲ κάνθαροι ἦν κυλίουσι κόπρον, ἐν ταύτῃ φωλοῦσί τε τὸν χειμῶνα καὶ ἐντίκτουσι σκωλήκια, ἐξ ὧν γίνονται κάνθαροι. Γίνονται δὲ καὶ ἐκ τῶν σκωλήκων τῶν ἐν τοῖς ὀσπρίοις πτερωτὰ ζῶα ὁμοίως τοῖς εἰρημένοις.

Αἱ δὲ μυῖαι ἐκ τῶν σκωλήκων τῶν ἐν τῇ κόπρῳ τῇ χωριζομένη κατὰ μέρος· διὸ καὶ οἱ περὶ ταύτην τὴν ἐργασίαν ὄντες μηχανῶνται χωρίζειν τὴν ἄλλην τὴν μεμιγμένην, καὶ λέγουσι τότε κατειργάσθαι τὴν κόπρον. Ἡ δ' ἀρχὴ τῶν σκωληκίων μικρά· πρῶτον μὲν γὰρ καὶ ἐνταῦθα ἐρυθραίνεται καὶ ἐξ ἀκινήσιας λαμβάνει κίνησιν οἷον πεφυκότα· εἴτα σκωλήκιον ἀποβαίνει ἀκίνητον· εἴτα κινηθὲν ὕστερον γίνεται ἀκίνητον πάλιν· ἐκ δὲ τούτου μυῖα ἀποτελεῖται, καὶ κινεῖται πνεύματος ἢ ἡλίου γενομένου. Οἱ δὲ μύωπες γίνονται ἐκ τῶν ζύλων. Αἱ δ' ὀρσοδάκναι ἐκ τῶν σκωληκίων μεταβαλλόντων· τὰ δὲ σκωλήκια ταῦτα γίνεται ἐν τοῖς καυλοῖς τῆς κράμβης. Αἱ (552b.) δὲ κανθαρίδες ἐκ τῶν πρὸς ταῖς συκαῖς καμπῶν καὶ ταῖς ἀπίοις καὶ ταῖς πεύκαις (πρὸς πᾶσι γὰρ τούτοις γίνονται σκώληκες) καὶ ἐκ τῶν ἐν τῇ κυνακάνθῃ· ὁρμῶσι δὲ καὶ πρὸς τὰ δυσώδη διὰ τὸ ἐκ τοιαύτης γεγονένα ὕλης. Οἱ δὲ κόνωπες ἐκ σκωλήκων οἱ γίνονται ἐκ τῆς περὶ τὸ ὄξος ἰλύος· καὶ γὰρ ἐν τοῖς δοκοῦσιν ἀσηπτοτάτοις εἶναι ἐγγίνονται ζῶα, οἷον ἐν χιόνι τῇ παλαιᾷ. Γίνεται δ' ἡ παλαιὰ ἐρυθροτέρα, διὸ καὶ οἱ σκώληκες τοιοῦτοι καὶ δασεῖς· οἱ δ' ἐκ τῆς ἐν Μηδία χιόνος μεγάλοι καὶ λευκοί· δυσκίνητοι δὲ πάντες. Ἐν δὲ Κύπρῳ, οὗ ἡ χαλκίτις λίθος καίεται, ἐπὶ πολλὰς ἡμέρας ἐμβαλλόντων, ἐνταῦθα γίνεται θηρία ἐν τῷ πυρί, τῶν μεγάλων μυῶν μικρόν τι μείζονα, ὑπόπτερα, ἃ διὰ τοῦ πυρὸς πηδᾷ καὶ βαδίζει.

Ἀποθνήσκουσι δὲ καὶ οἱ σκώληκες καὶ ταῦτα χωριζόμενα τὰ μὲν τοῦ πυρός, οἱ δὲ τῆς χιόνος. Ὅτι δ' ἐνδέχεται καὶ μὴ καίεσθαι συστάσεις τινὰς ζώων, ἡ σαλαμάνδρα ποιεῖ φανερόν· αὕτη γάρ, ὥς φασί, διὰ τοῦ πυρὸς βαδίζουσα κατασβέννυσι τὸ πῦρ.

Περὶ δὲ τὸν Ὑπανιν ποταμὸν τὸν περὶ Βόσπορον τὸν Κιμμέριον ὑπὸ τροπᾶς θερινὰς καταφέρονται ὑπὸ τοῦ ποταμοῦ οἶον θύλακοι μείζους ῥαγῶν, ἐξ ὧν ῥηγνυμένων ἐξέρχεται ζῶον περωτὸν τετράπουν· ζῇ δὲ καὶ πέτεται μέχρι δείλης, καταφερομένου δὲ τοῦ ἡλίου ἀπομαραίνεται, καὶ ἅμα δυομένου ἀποθνήσκει βιώσαν ἡμέραν μίαν, διὸ καὶ καλεῖται ἐφήμερον.

Τὰ πλεῖστα δὲ τῶν γινομένων ἔκ τε καμπῶν καὶ σκωλήκων ὑπὸ ἀραχνίων κατέχεται τὸ πρῶτον. Ταῦτα μὲν οὖν γίνεται τοῦτον τὸν τρόπον.

Κεφάλαιο 20

Οἱ δὲ σφηκες οἱ ἰχνεύμονες καλούμενοι (εἰσὶ δ' ἐλάττους τῶν ἐτέρων) τὰ φαλάγγια ἀποκτείναντες φέρουσι πρὸς τειχίον ἢ τι τοιοῦτον τρώγλιν ἔχον, καὶ πηλῶ προσκαταλείψαντες ἐντίκτουσιν ἐνταῦθα, καὶ γίνονται ἐξ αὐτῶν οἱ σφηκες οἱ ἰχνεύμονες. Ἐνια δὲ τῶν κολεοπτέρων καὶ μικρῶν καὶ ἀνωνύμων ζώων τοῦ πηλοῦ τρώγλας ποιοῦνται (553a.) μικρὰς ἢ πρὸς τάφοις ἢ τειχίοις, καὶ ἐνταῦθα τὰ σκωλήκια ἐντίκτουσιν.

Ὁ δὲ χρόνος τῆς γενέσεως ἀπὸ μὲν τῆς ἀρχῆς μέχρι τοῦ τέλους σχεδὸν τοῖς πλείστοις ἐπτάσι μετρεῖται τρισὶν ἢ τέτταρσιν. Τοῖς μὲν οὖν σκώληξι καὶ τοῖς σκωληκοειδέσι τοῖς πλείστοις τρεῖς γίνονται ἐπτάδες, τοῖς δ' ὠτοκοῦσι τέτταρες ὡς ἐπὶ τὸ πολὺ. Τούτων δ' ἀπὸ μὲν τῆς ὀχείας ἐν ταῖς ἐπτά ἢ σύστασις γίνεται, ἐν δὲ ταῖς λοιπαῖς τρισὶν ἐπωάζουσι καὶ ἐκλέπουσιν ὅσα γόνῳ τίκεται, οἷον ὑπ' ἀράχνου ἢ ἄλλου τινὸς τοιούτου. Αἱ δὲ μεταβολαὶ γίνονται τοῖς πλείστοις κατὰ τριήμερον ἢ τετραήμερον, ὥσπερ καὶ αἱ τῶν νόσων συμβαίνουσι κρίσεις.

Τῶν μὲν οὖν ἐντόμων οὗτος ὁ τρόπος ἐστὶ τῆς γενέσεως· φθείρονται δ' ἐρρικνωμένων τῶν μορίων, ὥσπερ γήρᾳ τὰ μείζω τῶν ζώων· ὅσα δὲ περωτά, καὶ τῶν πτερῶν συσπωμένων περὶ τὸ μετόπωρον· οἱ δὲ μύωπες καὶ τῶν ὀμμάτων ἐξυδρωπιώντων.

Κεφάλαιο 21

Περὶ δὲ τὴν γένεσιν τὴν τῶν μελιττῶν οὐ τὸν αὐτὸν τρόπον πάντες ὑπολαμβάνουσιν. Οἱ μὲν γάρ φασιν οὐ τίκτειν οὐδ' ὀχεύεσθαι τὰς μελίττας, ἀλλὰ φέρειν τὸν γόνον, καὶ φέρειν οἱ μὲν ἀπὸ τοῦ ἄνθους τοῦ καλλύντρου, οἱ δ' ἀπὸ τοῦ ἄνθους τοῦ καλάμου, ἄλλοι δ' ἀπὸ τοῦ ἄνθους τῆς ἐλαίας· καὶ σημεῖον λέγουσιν ὅτι, ἂν ἐλαιῶν φορὰ γένηται, τότε καὶ ἐσμοὶ ἀφίενται πλεῖστοι. Οἱ δὲ φασι τὸν μὲν τῶν κηφήνων γόνον αὐτὰς φέρειν ἀπὸ τινος ὕλης τῶν προειρημένων, τὸν δὲ τῶν μελιττῶν τίκτειν τοὺς ἡγεμόνας. Τῶν δ' ἡγεμόνων ἐστὶ γένη δύο, ὁ μὲν βελτίων πυρρός, ὁ δ' ἕτερος μέλας καὶ ποικιλώτερος, τὸ δὲ μέγεθος διπλάσιος τῆς χρηστῆς μελίττης· τὸ δὲ κάτω τοῦ διαζώματος ἔχουσιν ἡμιόλιον μάλιστα τῷ μήκει, καὶ καλοῦνται ὑπὸ τινων μητέρες ὡς γεννῶντες. Σημεῖον δὲ λέγουσιν ὅτι ὁ μὲν τῶν κηφήνων ἐγγίνεται γόνος κἂν μὴ ἐνῇ ἡγεμόν, ὁ δὲ τῶν μελιττῶν οὐκ ἐγγίνεται. Οἱ δὲ φασιν ὀχεύεσθαι, καὶ εἶναι ἄρρενας μὲν (553b.) τοὺς κηφήνας, θηλείας δὲ τὰς μελίττας.

Ἔστι δὲ τῶν μὲν ἄλλων ἡ γένεσις ἐν τοῖς κοίλοις τοῦ κηρίου, οἱ δὲ γ' ἡγεμόνες γίνονται κάτω πρὸς τῷ κηρίῳ, ἀποκρεμάμενοι χωρίς, ἕξ ἢ ἐπτά, ἐναντίως τῷ ἄλλῳ γόνῳ πεφυκότες. Κέντρον δ' αἱ μὲν μέλιται ἔχουσιν, οἱ δὲ κηφήνες οὐκ ἔχουσιν· οἱ δὲ βασιλεῖς καὶ ἡγεμόνες ἔχουσι μὲν κέντρον, ἀλλ' οὐ τύπτουσι, διὸ ἐνιοὶ οὐκ οἶονται ἔχειν αὐτούς.

Κεφάλαιο 22

Εἰσὶ δὲ γένη τῶν μελιττῶν, ἡ μὲν ἀρίστη μικρὰ καὶ στρογγύλη καὶ ποικίλη, ἄλλη δὲ μακρά, ὁμοία τῇ ἀνθρώπῃ, τρίτος δ' ὁ φῶρ καλούμενος (οὗτος δ' ἐστὶ μέλας καὶ πλατυγαστῶρ), τέταρτος δ' ὁ κηφήν, μεγέθει μὲν μέγιστος ἀπάντων, ἄκεντρος δὲ καὶ νωθρός· διὸ καὶ πλέκουσί τινες περὶ τὰ σμήνη ὥστε τὰς μὲν μελίττας εἰσδύεσθαι, τοὺς δὲ κηφήνας μὴ διὰ τὸ εἶναι αὐτοὺς μεΐζους.

Ἡγεμόνων δὲ γένη δύο ἐστίν, ὥσπερ εἴρηται καὶ πρότερον. Εἰσὶ δὲ πλείους ἐν ἐκάστῳ σμήνῃ ἡγεμόνες, καὶ οὐχ εἷς μόνος· ἀπόλλυται δὲ τὸ σμήνος, ἂν τε ἡγεμόνες μὴ ἱκανοὶ ἐνῶσιν (οὐχ οὕτω διὰ τὸ ἄναρχοι εἶναι, ἀλλ' ὥς φασίν, ὅτι συμβάλλονται εἰς τὴν γένεσιν τὴν τῶν μελιττῶν) ἂν τε πολλοὶ ὦσιν οἱ ἡγεμόνες· διασπῶσι γάρ.

Ὅταν μὲν οὖν ἕαρ ὅσιον γένηται, καὶ ὅταν αὐχμοὶ καὶ ἐρυσίβη, ἐλάττων γίνεται ὁ γόνος· ἀλλ' αὐχμοῦ μὲν ὄντος μέλι ἐργάζονται μᾶλλον, ἐπομβρίας δὲ γόνον, διὸ καὶ ἅμα συμβαίνει ἐλαιῶν φορὰ καὶ ἐσμῶν.

Ἐργάζονται δὲ πρῶτον μὲν τὸ κηρίον, εἶτα τὸν γόνον ἐναφιᾷσιν, ὥς μὲν ἔνιοι λέγουσιν, ἐκ τοῦ στόματος, ὅσοι φέρειν φασὶν ἄλλοθεν, εἴθ' οὕτω τὸ μέλι τροφήν τὴν μὲν τοῦ θέρους τὴν δὲ τοῦ μετοπώρου· ἄμεινον δ' ἐστὶ τὸ μετοπωρινὸν μέλι. Γίνεται δὲ κηρίον μὲν ἐξ ἀνθέων, κήρῳσιν δὲ φέρουσιν ἀπὸ τοῦ δακρύου τῶν δένδρων, μέλι δὲ τὸ πίπτον ἐκ τοῦ ἀέρος, καὶ μάλιστα ἐν ταῖς τῶν ἄστρον ἐπιτολαῖς, καὶ ὅταν κατασκήψῃ ἡ Ἥρις· ὅλως δ' οὐ γίνεται μέλι πρὸ Πλειάδος ἐπιτολῆς.

Τὸ μὲν οὖν κηρίον ποιεῖ, ὥσπερ εἴρηται, ἐκ τῶν ἀνθέων· τὸ δὲ μέλι ὅτι οὐ (554a.) ποιεῖ, ἀλλὰ φέρει τὸ πίπτον, σημεῖον· ἐν μιᾷ γὰρ ἢ δυσὶν ἡμέραις πλήρη εὐρίσκουσι τὰ σμήνη οἱ μελιττουργοὶ μέλιτος. Ἔτι δὲ τοῦ μετοπώρου ἄνθη μὲν γίνεται, μέλι δ' οὐ, ὅταν ἀφαιρεθῇ. Ἀφηρημένου οὖν ἤδη τοῦ γενομένου μέλιτος, καὶ τροφῆς ἢ οὐκ ἐνούσης ἔτι ἢ σπανίας, ἐνεγίνετο ἂν, εἴπερ ἐποίουν ἐκ τῶν ἀνθέων.

Συνίσταται δὲ τὸ μέλι πεττόμενον· ἐξ ἀρχῆς γὰρ οἶον ὕδωρ γίνεται, καὶ ἐφ' ἡμέρας μὲν τινας ὑγρόν ἐστὶ (διὸ καὶ ἀφαιρεθῇ ἐν ταύταις ταῖς ἡμέραις, οὐκ ἔχει πάχος), ἐν εἴκοσι δὲ μάλιστα συνίσταται.

Δήλον δ' ἐστὶν εὐθέως τὸ ἀπὸ τοῦ χυμοῦ· διαφέρει γὰρ τῇ γλυκύτητι καὶ τῷ πάχει. Φέρει δ' ἀπὸ πάντων ἢ μέλιττα ὅσα ἐν κάλυκι ἀνθεῖ, καὶ ἀπὸ τῶν ἄλλων δ' ὅσα ἂν γλυκύτητα ἔχῃ, οὐδένα βλάπτουσα καρπὸν· τοὺς δὲ χυμοὺς τούτων τῷ ὁμοίῳ τῇ γλώττῃ ἀναλαμβάνουσα κομίζει.

Βλίσσεται δὲ τὰ σμήνη, ὅταν ἐρίνεον σῦκον φανῇ· σχάδονας δ' ἀρίστας ποιοῦσιν, ὅταν μέλι ἐργάζωνται. Φέρει δὲ κηρὸν μὲν καὶ ἐριθάκην περὶ τοῖς σκέλεσι, τὸ δὲ μέλι ἐμεῖ εἰς τὸν κύτταρον. Τὸν δὲ γόνον ὅταν ἀφῇ, ἐπώαζει ὥσπερ ὄρνις. Ἐν δὲ τῷ κηρίῳ τὸ σκωλήκιον μικρὸν μὲν ὃν κεῖται πλάγιον, ὕστερον δ' ἀνίσταται αὐτὸ ὑφ' ἑαυτοῦ καὶ τρέφεται, πρὸς δὲ τῷ κηρίῳ ἔχεται ὥστε καὶ ἀντειλῆσθαι. Ὁ δὲ γόνος ἐστὶ τῶν μελιττῶν καὶ τῶν κηφήνων λευκός, ἐξ οὗ τὰ σκωλήκια γίνεται· αὐξανόμενα δὲ γίνονται μέλιτται καὶ κηφήνες. Ὁ δὲ τῶν βασιλέων γόνος τὴν χροάν γίνεται ὑπόπυρρος, τὴν δὲ λεπτότητά ἐστιν οἶον μέλι παχύ· τὸν δ' ὄγκον εὐθέως ἔχει παραπλήσιον τῷ γινομένῳ ἐξ αὐτοῦ.

Σκώληξ δ' οὐ γίνεται πρότερον ἐκ τούτου, ἀλλ' εὐθέως ἢ μέλιττα, ὡς φασίν. Ὅταν δὲ τέκῃ ἐν τῷ κηρίῳ, μέλι ἐκ τοῦ ἀπαντικρὺ γίνεται. Φύει δ' ἢ σχάδων πόδας καὶ πτερά, ὅταν καταλειφθῇ· ὅταν δὲ λάβῃ τέλος, τὸν ὑμένα (554b.) περιρρήξας· ἐκπέταται. Κόπρον δὲ προῖεται, ἕως ἂν ἡ σκωλήκιον, ὕστερον δ' οὐκέτι, πλὴν ἐὰν μὴ ἐξέλθῃ, ὥσπερ ἐλέχθη πρότερον.

Ἐὰν δέ τις ἀφέλῃ τὰς κεφαλὰς τῆς σχάδονος πρὶν πτερὰ ἔχειν, ἐξεσθίουσιν αὐταὶ αἱ μέλιτται· καὶ κηφήνος πτερὸν ἂν ἀποκνίσας ἀφῇ τις, τῶν λοιπῶν αὐταὶ τὰ πτερὰ ἀπεσθίουσιν. Βίος δὲ τῶν μελιττῶν ἔτη ἕξ· ἔνιαι δ' ἐπτα ζῶσιν. Σμήνος δ' ἂν διαμείνῃ ἔτη ἐννέα ἢ δέκα, εὐδοκεῖ διαγεγενῆσθαι.

Ἐν δὲ τῷ Πόντῳ εἰσὶ τινες μέλιτται λευκαὶ σφόδρα, αἱ τὸ μέλι ποιοῦσι δις τοῦ μηνός. Αἱ δ' ἐν Θεμισκύρᾳ περὶ τὸν Θερμώδοντα ποταμὸν ἐν τῇ γῇ καὶ ἐν τοῖς σμήνεσι ποιοῦσι κηρία οὐκ ἔχοντα κηρὸν πολὺν ἀλλὰ πάνυ σμικρόν, μέλι δὲ παχύ· τὸ δὲ κηρίον λεῖον καὶ ὁμαλόν ἐστιν. Οὐκ αἰεὶ δὲ τοῦτο ποιοῦσιν, ἀλλὰ τοῦ χειμῶνος· ὁ γὰρ κιττὸς πολὺς ἐν τῷ Πόντῳ ἐστίν, ἀνθεῖ δὲ ταύτην τὴν ὥραν, ἀφ' οὗ φέρουσι τὸ μέλι. Κατάγεται δὲ καὶ εἰς Ἀμισὸν μέλι ἄνωθεν λευκὸν καὶ παχὺ σφόδρα, ὃ ποιοῦσιν αἱ μέλιτται ἄνευ κηρίων πρὸς τοῖς δένδρεσιν· γίνεται δὲ καὶ ἄλλοθι τοιοῦτον ἐν τῷ Πόντῳ. Εἰσὶ δὲ καὶ μέλιτται αἱ ποιοῦσι κηρία τριπλᾶ ἐν τῇ γῇ· ταῦτα δὲ μέλι μὲν

ἴσχει, σκόληκας δ' οὐκ ἴσχει. Ἔστι δ' οὔτε τὰ κηρία πάντα τοιαῦτα,
οὔτε πᾶσαι αἱ μέλιτται τοιαῦτα ποιοῦσιν.

Κεφάλαιο 23

Αἱ δ' ἀνθρῆναι καὶ οἱ σφῆκες ποιοῦσι κηρία τῷ γόνῳ, ὅταν μὲν μὴ ἔχωσιν ἡγεμόνα ἀλλ' ἀποπλανηθῶσι καὶ μὴ εὐρίσκωσιν, αἱ μὲν ἀνθρῆναι ἐπὶ μετεώρου τινός, οἱ δὲ σφῆκες ἐν τρώγλαις, ὅταν δ' ἔχωσιν ἡγεμόνα, ὑπὸ γῆν. Ἐξάγωνά μὲν οὖν πάντα ἐστὶ τὰ κηρία αὐτῶν, ὥσπερ καὶ τὰ τῶν μελιττῶν, σύγκειται δ' οὐκ ἐκ κηροῦ ἀλλ' ἐκ φλοιώδους καὶ ἀραχνιώδους ὕλης τὸ κηρίον· γλαφυρώτερον δὲ πολλῷ τὸ τῶν ἀνθρηνῶν ἐστὶν ἢ τὸ τῶν σφηκῶν κηρίον. Ἐναφιάσι δὲ γόνον, ὥσπερ αἱ μέλιτται, ὅσον σταλαγμὸν εἰς τὸ πλάγιον (555a.) τοῦ κυττάρου, καὶ ἔχεται πρὸς τῷ τοίχῳ. Οὐχ ἅμα δὲ πᾶσι τοῖς κυττάροις ἔνεστι γόνος, ἀλλ' ἐνίοις μὲν ἤδη μεγάλα ἔνεστιν ὥστε καὶ πέτεσθαι, ἐνίοις δὲ νύμφαι, ἐν τοῖς δὲ σκώληκες ἔτι. Κόπρος δὲ μόνον περὶ τοῖς σκώληξιν, ὥσπερ καὶ ταῖς μελίτταις. Καὶ ἔστ' ἂν νύμφαι ὦσιν, ἀκινήτιζουσιν καὶ ἐπαλήλιπται ὁ κύτταρος. Καταντικρὺ δ' ἐν τῷ κυττάρῳ τοῦ γόνου ὅσον σταλαγμὸς μέλιτος ἐγγίνεται ἐν τοῖς τῆς ἀνθρήνης κηρίοις. Γίνονται δ' αἱ σχάδονες οὐκ ἐν τῷ ἔαρι τούτων, ἀλλ' ἐν τῷ μετοπώρῳ· τὴν δ' αὖξισιν ἐπίδηλον λαμβάνουσι μάλιστα ἐν ταῖς πανσελήνοις. Ἔχεται δὲ καὶ ὁ γόνος καὶ οἱ σκώληκες οὐ κάτωθεν τοῦ κυττάρου, ἀλλ' ἐκ τοῦ πλαγίου.

Κεφάλαιο 24

Ἐνια δὲ τῶν βομβυλιοειδῶν πρὸς λίθῳ ἢ τοιούτῳ τινὶ ποιοῦσι πῆλινον ὀξύ, ὥσπερ σιάλῳ καταλείφοντα· τοῦτο δὲ σφόδρα καὶ παχὺ καὶ σκληρόν· λόγχῃ γὰρ μόλις διαιροῦσιν. Ἐνταῦθα δὲ τίκτουσι, καὶ γίνεται σκωλήκια λευκὰ ἐν ὑμένι μέλανι. Χωρὶς δὲ τοῦ ὑμένος ἐν τῷ πηλῷ ἐγγίνεται κηρός· οὗτος δ' ὁ κηρὸς πολὺ ἐστὶν ὠχρότερος τοῦ τῶν μελιττῶν.

Κεφάλαιο 25

Ὅχεύονται δὲ καὶ οἱ μύρμηκες καὶ τίκτουσι σκωλήκια, ἃ οὐ προσπέφυκεν οὐδενί· αὐξανόμενα δὲ ταῦτα ἐκ μικρῶν καὶ στρογγύλων τὸ πρῶτον μακρὰ γίνεται καὶ διαρθροῦται· ἡ δὲ γένεσις ἐστὶ τούτοις τοῦ ἔαρος.

Κεφάλαιο 26

Τίκτουσι δὲ καὶ οἱ σκορπίοι οἱ χερσαῖοι σκολήκια ὠοειδῇ πολλά, καὶ ἐπφάζουσιν. Ὅταν δὲ τελειωθῇ, ἐκβάλλονται, ὥσπερ οἱ ἀράχνη, καὶ ἀπόλλυνται ὑπὸ τῶν τέκνων· πολλάκις γὰρ γίνονται περὶ ἕνδεκα τὸν ἀριθμόν.

Κεφάλαιο 27

Τὰ δ' ἀράχνια ὀχεύεται μὲν πάντα τὸν εἰρημένον τρόπον, γεννᾷ δὲ σκωλήκια μικρὰ πρῶτον· ὅλα γὰρ μεταβάλλοντα γίνεται ἀράχνια, καὶ οὐκ ἐκ μέρους, ἐπεὶ στρογγύλα ἐστὶ κατ' ἀρχάς· ὅταν δὲ τέκη, ἐπφάζει τε καὶ ἐν (555b.) τρισὶν ἡμέραις διαρθροῦται. Τίττει δὲ πάντα μὲν ἐν ἀραχνίῳ, ἀλλὰ τὰ μὲν ἐν λεπτῷ καὶ μικρῷ, τὰ δ' ἐν παχεῖ, καὶ τὰ μὲν ὅλως ἐν κύτει στρογγύλῳ, τὰ δὲ μέχρι τινὸς περιέχεται ὑπὸ τοῦ ἀραχνίου.

Οὐχ ἅμα δὲ πάντα <τὰ> ἀράχνια, γίνεται· πηδᾷ δ' εὐθὺς καὶ ἀφίησιν ἀράχνιον. Ὁ δὲ χυμὸς ὅμοιος ἐν τοῖς σκώληξι θλιβομένοις καὶ ἐν αὐτοῖς νέοις οὔσι, παχύς καὶ λευκός.

Αἱ δὲ λειμώνια ἀράχνια προαποτίκτους εἰς ἀράχνιον, οὗ τὸ μὲν ἥμισυ πρὸς αὐταῖς ἐστὶ, τὸ δ' ἥμισυ ἔξω· καὶ ἐν τούτῳ ἐπφάζουσαι ζωοποιοῦσιν. Τὰ δὲ φαλάγγια τίττει εἰς γύργαθον πλεξάμενα παχύν, ἐφ' ᾧ ἐπφάζουσιν. Τίττους δ' αἱ μὲν γλαφυραὶ ἐλάττω τὸ πλῆθος, τὰ δὲ φαλάγγια πολὺ τὸ πλῆθος· καὶ αὐξηθέντα περιέχει κύκλῳ τὸ φαλάγγιον, καὶ ἀποκτείνει τὴν τεκοῦσαν ἐκβάλλοντα, πολλάκις δὲ καὶ τὸν ἄρρενα, ἐὰν λάβωσιν· συνεπφάζει γὰρ τῇ θηλείᾳ. Ἐνίστε δὲ τὸ πλῆθος γίνονται καὶ τριακόσια περὶ ἓν φαλάγγιον. Ἐκ δὲ μικρῶν τέλειοι οἱ ἀράχναι γίνονται περὶ τὰς ἐπτάδας τὰς τέτταρας.

Κεφάλαιο 28

Αἱ δ' ἀκρίδες ὀχεύονται μὲν τὸν αὐτὸν τρόπον τοῖς ἄλλοις ἐντόμοις, ἐπιβαίνοντος τοῦ ἐλάττονος ἐπὶ τὸ μείζον (τὸ γὰρ ἄρρεν ἐλαττόν ἐστι), τίκτουσι δ' εἰς τὴν γῆν καταπήξασαι τὸν πρὸς τῇ κέρκῳ καυλόν, ὃν οἱ ἄρρενες οὐκ ἔχουσιν.

Ἀθρόα δὲ τίκτουσι καὶ κατὰ τὸν αὐτὸν τόπον, ὥστε εἶναι καθαπερεὶ κηρίον. Εἴθ' ὅταν τέκωσιν, ἐνταῦθα γίνονται σκώληκες ῥοειδεῖς, οἳ περιλαμβάνονται ὑπὸ τινος γῆς λεπτῆς ὥσπερ ὑμένος· ἐκ ταύτης δ' ἐκπέττονται. Γίνεται δὲ μαλακὰ τὰ κυήματα οὕτως ὥστ' ἂν τις ἄψηται συνθλίβεσθαι. Ταῦτα δ' οὐκ ἐπιπολῆς ἀλλὰ μικρὸν ὑπὸ γῆς ἐστίν. Ὅταν δ' ἐκπεφθῶσιν, ἐκδύνουσιν ἐκ τοῦ γεοειδοῦς τοῦ περιέχοντος ἀκρίδες μικραὶ καὶ μέλαιναι· εἴτα περιρρήγνυται αὐταῖς τὸ δέρμα καὶ γίνονται εὐθύς μείζους. Τίκτουσι δὲ λήγοντος τοῦ θέρους, (556a.) καὶ τεκοῦσαι ἀποθνήσκουσιν· ἅμα γὰρ τικτούσαις σκώληκες ἐγγίνονται περὶ τὸν τράχηλον. Καὶ οἱ ἄρρενες δ' ἀποθνήσκουσι περὶ τὸν αὐτὸν χρόνον. Ἐκδύνουσι δ' ἐκ τῆς γῆς τοῦ ἔαρος. Οὐ γίνονται δ' ἀκρίδες οὔτ' ἐν τῇ ὀρεινῇ οὔτ' ἐν τῇ λυπρᾷ, ἀλλ' ἐν τῇ πεδιάδι καὶ κατερρωγίᾳ· ἐν ταῖς ῥωγμαῖς γὰρ ἐκτίκτουσιν. Διαμένει δὲ τὰ ῥᾶ τὸν χειμῶνα ἐν τῇ γῇ· ἅμα δὲ τῷ θέρει γίνονται ἐκ τῶν περυσινῶν κυημάτων ἀκρίδες.

Κεφάλαιο 29

Ὅμοίως δὲ τίκτουσι καὶ οἱ ἀπτέλαβοι, καὶ τεκόντες ἀποθνήσκουσιν. Φθείρεται δ' αὐτῶν τὰ ῥὰ ὑπὸ τῶν μετοπωρινῶν ὑδάτων, ὅταν πολλὰ γένηται· ἂν δ' αὐχμὸς συμβῇ, τότε γίνονται μᾶλλον πολλοὶ οἱ ἀπτέλαβοι διὰ τὸ μὴ φθείρεσθαι ὁμοίως, ἐπεὶ ἄτακτός γε δοκεῖ ἡ φθορὰ αὐτῶν, καὶ γίνεσθαι ὅπως ἂν τύχη.

Κεφάλαιο 30

Τῶν δὲ τεττίγων γένη μὲν ἐστὶ δύο, οἱ μὲν μικροί, οἱ πρῶτοι φαίνονται καὶ τελευταῖοι ἀπόλλυνται, οἱ δὲ μεγάλοι, [οἱ ἄδοντες] οἱ καὶ ὕστερον γίνονται καὶ πρότερον ἀπόλλυνται. Ὅμοίως δ' ἐν τε τοῖς μικροῖς καὶ τοῖς μεγάλοις οἱ μὲν διηρημένοι εἰσὶ τὸ ὑπόζωμα, οἱ ἄδοντες, οἱ δ' ἀδιαίρετοι, οἱ οὐκ ἄδοντες. Καλοῦσι δὲ τοὺς μὲν μεγάλους καὶ ἄδοντας ἀχέτας, τοὺς δὲ μικροὺς τεττιγόνια· ἄδουσι δὲ μικρὸν καὶ τούτων οἱ διηρημένοι.

Οὐ γίνονται δὲ τέττιγες ὅπου μὴ δένδρα ἐστίν· διὸ καὶ ἐν Κυρήνῃ οὐ γίνονται ἐν τῷ πεδίῳ, περὶ δὲ τὴν πόλιν πολλοί, μάλιστα δ' οὐ ἐλαῖαι· οὐ γὰρ γίνονται παλίνσκιοι. Ἐν γὰρ τοῖς ψυχροῖς οὐ γίνονται τέττιγες, διὸ οὐδ' ἐν τοῖς συσκίοις ἄλσεσιν.

Ὅχεύονται δ' ὁμοίως οἱ μεγάλοι ἀλλήλοις καὶ οἱ μικροί, ὕπτιοι συνδουζόμενοι πρὸς ἀλλήλους· ἐναφίησι δ' ὁ ἄρρην εἰς τὴν θήλειαν, ὥσπερ καὶ τᾶλλα ἔντομα. Ἔχει δὲ καὶ ἡ θήλεια αἰδοῖον ἐσχισμένον· θήλεια δ' ἐστὶν εἰς ἣν ἀφίησιν ὁ ἄρρην. Τίκτουσι δ' ἐν τοῖς ἀργοῖς, τρυπῶντες ὧ ἔχουσιν ὀπισθεν ὀξεῖ, καθάπερ καὶ οἱ (556b.) ἀττέλαβοι· καὶ γὰρ οἱ ἀττέλαβοι τίκτουσιν ἐν τοῖς ἀργοῖς, διὸ πολλοὶ ἐν τῇ Κυρηναίᾳ γίνονται. Ἐντίκτουσι δὲ καὶ ἐν τοῖς καλάμοις ἐν οἷς ἰστάσι τὰς ἀμπέλους, διατρυπῶντες τοὺς καλάμους, καὶ ἐν τοῖς τῆς σκίλλης καυλοῖς. Ταῦτα δὲ τὰ κυήματα καταρρεῖ εἰς τὴν γῆν.

Γίνονται δὲ πολλοὶ ὅταν ἐπομβρία γένηται. Ὁ δὲ σκώληξ αὐξηθεὶς ἐν τῇ γῇ γίνεται τεττιγομήτρα· καὶ εἰσὶ τότε ἡδιστοί, πρὶν περιρραγῆναι τὸ κέλυφος. Ὅταν δ' ἡ ὥρα ἔλθῃ περὶ τροπᾶς, ἐξέρχονται νύκτωρ, καὶ εὐθὺς ῥήγνυταί τε τὸ κέλυφος καὶ γίνονται τέττιγες ἐκ τῆς τεττιγομήτρας, καὶ γίνονται μέλανες καὶ σκληρότεροι εὐθὺς καὶ μείζους, καὶ ἄδουσιν. Εἰσὶ δ' ἄρρενες μὲν οἱ ἄδοντες ἐν ἀμφοτέροις τοῖς γένεσι, θήλεις δ' οἱ ἕτεροι. Καὶ τὸ μὲν πρῶτον ἡδίους οἱ ἄρρενες, μετὰ δὲ τὴν ὀχείαν αἱ θήλεια· ἔχουσι γὰρ ῥὰ λευκά. Ἀναπετόμενοι δ' ὅταν σοβήσῃ τις, ἀφιάσιν ὑγρὸν οἶον ὕδωρ, ὃ λέγουσιν οἱ γεωργοὶ ὡς κατουρούντων καὶ ἐχόντων περίττωμα καὶ τρεφομένων τῇ δρόσῳ.

Ἐὰν δέ τις κινῶν τὸν δάκτυλον προσίῃ ἀπ' ἄκρου ἐπικάμπτων τε καὶ ἐπεκτείνων πάλιν, μᾶλλον ὑπομένουσιν ἢ ἐὰν εὐθὺς ἐκτείνας, καὶ ἀναβαίνουσιν ἐπὶ τὸν δάκτυλον· διὰ τὸ ἀμυδρῶς γὰρ ὄρᾶν ὡς ἐπὶ

φύλλον αναβαίνουνσι κινούμενον.

Κεφάλαιο 31

Τῶν δ' ἐντόμων ὅσα σαρκοφάγα μὲν μὴ ἐστι, ζῆ δὲ χυμοῖς σαρκὸς ζώσης, οἷον οἱ τε φθεῖρες καὶ αἱ ψύλλαι καὶ κόρεις, ἐκ μὲν τῆς ὀχείας πάντα γεννᾷ τὰς καλουμένας κόνιδας, ἐκ δὲ τούτων ἕτερον οὐδὲν γίνεται πάλιν.

Αὐτῶν δὲ γίνονται τούτων αἱ μὲν ψύλλαι ἐξ ἐλαχίστης σηπεδόνης (ὅπου γὰρ ἂν κόπρος ξηρὰ γένηται, ἐνταῦθα συνίστανται), αἱ δὲ κόρεις ἐκ τῆς ἱκμάδος τῆς ἀπὸ τῶν ζώων συνισταμένης ἐκτός, οἱ δὲ φθεῖρες ἐκ τῶν σαρκῶν. Γίνονται δ' ὅταν μέλλωσιν, οἷον ἰονθοὶ μικροί, οὐκ ἔχοντες πύον· τούτους ἂν τις κεντήσῃ, ἐξέρχονται φθεῖρες. Ἐνίοις δὲ τοῦτο συμβαίνει τῶν ἀνθρώπων (557a.) νόσημα, ὅταν ὑγρασία πολλὴ ἐν τῷ σώματι ᾗ· καὶ διεφθάρησάν τινες ἤδη τοῦτον τὸν τρόπον, ὥσπερ Ἀλκμᾶνά τέ φασι τὸν ποιητὴν καὶ Φερεκύδην τὸν Σύριον. Καὶ ἐν νόσοις δὲ τισι γίνεται πλῆθος φθειρῶν. Ἔστι δὲ γένος φθειρῶν οἱ καλοῦνται ἄγριοι, καὶ σκληρότεροι τῶν ἐν τοῖς πολλοῖς γινομένων· εἰσὶ δ' οὗτοι καὶ δυσσαφαίρετοι ἀπὸ τοῦ χρωτός.

Παισὶ μὲν οὖν οὖσιν αἱ κεφαλαὶ γίνονται φθειρώδεις, τοῖς δ' ἀνδράσιν ἥττον. Γίνονται δὲ καὶ αἱ γυναῖκες τῶν ἀνδρῶν μᾶλλον φθειρώδεις. Ὅσοις δ' ἂν ἐγγίνωνται ἐν τῇ κεφαλῇ, ἥττον πονοῦσι τὰς κεφαλὰς.

Ἐγγίνονται δὲ καὶ τῶν ἄλλων ζώων ἐν πολλοῖς φθεῖρες. Καὶ γὰρ οἱ ὄρνιθες ἔχουσι, καὶ οἱ καλούμενοι φασιανοὶ ἐὰν μὴ κονιῶνται, διαφθείρονται ὑπὸ τῶν φθειρῶν. Καὶ τῶν ἄλλων δ' ὅσα πτερὰ ἔχει ἔχοντα καυλόν, καὶ τῶν ἐχόντων τρίχας. Πλὴν ὄνος οὐκ ἔχει οὔτε φθεῖρας οὔτε κρότωνα. Οἱ δὲ βόες ἔχουσιν ἄμφω· τὰ δὲ πρόβατα καὶ <αἱ> αἶγες κρότωνα, φθεῖρας δ' οὐκ ἔχουσιν· καὶ αἱ ὕες φθεῖρας μεγάλους καὶ σκληροῦς. Ἐν δὲ τοῖς κυσὶν οἱ καλούμενοι γίνονται κυνοραῖσταί. Πάντες δ' οἱ φθεῖρες ἐν τοῖς ἔχουσιν ἐξ αὐτῶν γίνονται τῶν ζώων. Γίνονται δ' οἱ φθεῖρες μᾶλλον ὅταν μεταβάλλωσι τὰ ὕδατα οἷς λούονται, ὅσα ἔχει τῶν λουομένων φθεῖρας.

Ἐν δὲ τῇ θαλάττῃ γίνονται μὲν ἐν τοῖς ἰχθύσι φθεῖρες, οὗτοι δ' οὐκ ἐξ αὐτῶν τῶν ἰχθύων ἀλλ' ἐκ τῆς ἰλύος· εἰσὶ δὲ τὰς ὄψεις ὅμοιοι τοῖς ὄνοις τοῖς πολύποσι, πλὴν τὴν οὐρὰν ἔχουσι πλατεῖαν. Ἐν δ' εἶδός ἐστι τῶν φθειρῶν τῶν θαλαττίων, καὶ γίνονται πανταχοῦ,

μάλιστα δὲ περὶ τὰς τρίγλας. Πάντα δὲ πολύποδα ταῦτ' ἐστὶ καὶ ἄναιμα καὶ ἔντομα. Ὁ δὲ τῶν θύνων οἶστρος γίνεται μὲν περὶ τὰ πτερύγια, ἔστι δ' ὅμοιος τοῖς σκορπίοις, καὶ τὸ μέγεθος ἡλίκος ἀράχνης. Ἐν δὲ τῇ θαλάττῃ τῇ ἀπὸ Κυρήνης πρὸς Αἴγυπτον ἔστι περὶ τὸν δελφῖνα ἰχθὺς ὃν καλοῦσι φθεῖρα· ὃς γίνεται πάντων πιότατος διὰ τὸ ἀπολαύειν τροφῆς ἀφθόνου θηρεύοντος τοῦ δελφῖνος.

Κεφάλαιο 32

(557b.) Γίνεται δὲ καὶ ἄλλα ζωδάρια, ὥσπερ ἐλέχθη καὶ πρότερον, τὰ μὲν ἐν ἐρίοις καὶ ὅσα ἐξ ἐρίων ἐστίν, οἷον οἱ σῆτες, οἱ ἐμφύονται μᾶλλον ὅταν κονιορτώδῃ τὰ ἔρια ἧ, μάλιστα δὲ γίνονται ἂν ἀράχνης συγκατακλεισθῇ· ἐκπίνων γάρ, ἂν τι ἐνῇ ὑγρόν, ξηραίνει. Γίνεται δὲ καὶ ἐν χιτῶνι ὁ σκώληξ οὗτος. Καὶ ἐπὶ κηρίῳ δὲ γίνεται παλαιουμένῳ, ὥσπερ ἐν ξύλῳ ζῶον, ὃ δὴ δοκεῖ ἐλάχιστον εἶναι τῶν ζώων πάντων καὶ καλεῖται ἀκαρί, λευκὸν καὶ μικρόν. Καὶ ἐν τοῖς βιβλίοις ἄλλα γίνεται, τὰ μὲν ὅμοια τοῖς ἐν τοῖς ἱματίοις, τὰ δὲ τοῖς σκορπίοις ἄνευ τῆς οὐρᾶς, μικρὰ πάνπαν· καὶ ὅλως ἐν πᾶσιν ὡς εἰπεῖν, ἐν τε τοῖς ξηροῖς ὑγραιομένοις καὶ ἐν τοῖς ὑγροῖς ξηραιομένοις, ὅσα ἔχει αὐτῶν ζωήν.

Ἔστι δὲ τι σκωλήκιον ὃ καλεῖται ξυλοφθόρον, οὐδενὸς ἦττον ἄτοπον τῶν ζώων. Ἡ μὲν γὰρ κεφαλὴ ἔξω τοῦ κελύφους προέρχεται ποικίλῃ, καὶ οἱ πόδες ἐπ' ἄκρου, ὥσπερ τοῖς ἄλλοις σκώληξιν, ἐν χιτῶνι δὲ τὸ ἄλλο σῶμα ἀραχνιώδει, καὶ περὶ αὐτὸ κάρφη, ὥστε δοκεῖν προσέχεσθαι βαδίζοντι· ταῦτα δὲ σύμφυτα τῷ χιτῶνί ἐστιν· ὥσπερ κοχλία τὸ ὄστρακον, οὕτω τὸ ἅπαν τῷ σκώληκι, καὶ οὐκ ἀποπίπτει ἀλλ' ἀποσπᾶται ὥσπερ προσπεφυκότα· καὶ ἐάν τις τὸν χιτῶνα περιέλῃ, ἀποθνήσκει καὶ γίνεται ὁμοίως ἀχρεῖος ὥσπερ ὁ κοχλίας περιαιρεθέντος τοῦ ὀστράκου. Χρόνου δὲ προϊόντος γίνεται καὶ οὗτος ὁ σκώληξ χρυσαλλίς ὥσπερ αἱ κάμπαι, καὶ ζῇ ἀκίνητίζων· ὃ τι δ' ἐξ αὐτοῦ γίνεται τῶν πτερωτῶν ζώων, οὕτω συνῶπται.

Τὰ δ' ἐρίνεα τὰ ἐν τοῖς ἐρίνεοις ἔχουσι τοὺς καλουμένους ψῆνας. Γίνεται δὲ τοῦτο πρῶτον σκωλήκιον, εἴτα περιρραγέντος τοῦ δέρματος ἐκπέτεται τοῦτο ἐγκαταλιπὼν ὁ ψῆν, καὶ εἰσδύεται εἰς τὰ τῶν συκῶν ἐρίνεα, καὶ διὰ στιγμάτων ποιεῖ μὴ ἀποπίπτειν τὰ ἐρίνεα· διὸ περιάπτουσί τε τὰ ἐρίνεα πρὸς τὰς συκάς οἱ γεωργοί, καὶ φυτεύουσι πλησίον ταῖς συκαῖς ἐρινεούς.

Κεφάλαιο 33

Τῶν δὲ τετραπόδων καὶ ἐναίμων καὶ φωτόκων αἱ μὲν (558a.) γενέσεις εἰσὶ τοῦ ἔαρος, ὀχεύεται δ' οὐ πάντα τὴν αὐτὴν ὥραν, ἀλλὰ τὰ μὲν ἔαρος τὰ δὲ θέρους τὰ δὲ περὶ τὸ μετόπωρον, ὥς ἐκάστοις πρὸς τὴν γένεσιν τῶν ἐγγόνων ἢ ἐπιούσα ὥρα συμφέρει.

Ἡ μὲν οὖν χελώνη τίκτει ὥα σκληρόδερμα καὶ δίχροα ὥσπερ τὰ τῶν ὀρνίθων, τεκοῦσα δὲ κατορύττει καὶ τὸ ἄνω ποιεῖ ἐπίκροτον· ὅταν δὲ τοῦτο ποιήσῃ, φοιτῶσα ἐπ' ὠάζει ἄνωθεν· ἐκλέπεται δὲ τὰ ὥα τῷ ὑστέρῳ ἔτει. Ἡ δ' ἐμὺς ἐξιοῦσα ἐκ τοῦ ὕδατος τίκτει, ὀρύξασα βόθυνον πιθώδῃ, καὶ ἐντεκοῦσα καταλείπει· ἐάσασα δ' ἡμέρας ἐλάττους ἢ τριάκοντα ἀνορύττει καὶ ἐκλέπει ταχύ, καὶ ἀπάγει τοὺς νεοττοὺς εὐθὺς εἰς τὸ ὕδωρ. Τίκτουσι δὲ καὶ αἱ θαλάττιαι χελῶναι ἐν τῇ γῇ ὥα ὅμοια τοῖς ὀρνίσι τοῖς ἡμέροις, καὶ κατορύξασαι ἐπ' ὠάζουσι τὰς νύκτας. Τίκτουσι δὲ πολὺ πλῆθος ὧν· καὶ γὰρ εἰς ἑκατὸν τίκτουσιν ὥα.

Τίκτουσι δὲ καὶ σαῦροι καὶ κροκόδειλοι οἱ χερσαῖοι καὶ οἱ ποτάμιοι εἰς τὴν γῇν. Ἐκλέπεται δὲ τὰ τῶν σαύρων αὐτόματα ἐν τῇ γῇ· οὐ γὰρ διετίζει ὁ σαῦρος· λέγεται γὰρ ἔκμηνος εἶναι βίος σαύρας. Ὁ δὲ ποτάμιος κροκόδειλος τίκτει μὲν ὥα πολλὰ, τὰ πλεῖστα περὶ ἐξήκοντα, λευκὰ τὴν χροάν, καὶ ἐπικάθηται δ' ἡμέρας ἐξήκοντα (καὶ γὰρ καὶ βιοῖ χρόνον πολύν), ἐξ ἐλαχίστων δ' ὧν ζῶον μέγιστον γίνεται ἐκ τούτων· τὸ μὲν γὰρ ὦν οὐ μεῖζόν ἐστι χηνείου, καὶ ὁ νεοττὸς τούτου κατὰ λόγον, αὐξανόμενος δὲ γίνεται καὶ ἑπτακαίδεκα πήχων. Λέγουσι δὲ τινες ὅτι καὶ αὐξάνεται ἕως ἄν ζῇ.

Κεφάλαιο 34

Τῶν δ' ὄφεων ὁ μὲν ἔχισ ζῳοτοκεῖ ἔξω, ἐν αὐτῷ πρῶτον
ῳοτοκήσας· τὸ δ' ὤόν, ὥσπερ τῶν ἰχθύων, μονόχρουν ἐστὶ καὶ
μαλακόδερμον. Ὁ δὲ νεοττὸς ἄνω ἐπιγίνεται, καὶ οὐ περιέχει φλοιὸς
ὀστρακώδης, ὥσπερ οὐδὲ τὰ τῶν ἰχθύων. Τίκτει δὲ μικρὰ ἐχίδια ἐν
ὑμέσιν, οἷ περιρρήγγνυνται τριταῖοι· ἐνίστε δὲ καὶ τὰ ἔσω διαφαγόντα
αὐτὰ ἐξέρχεται. Τίκτει δ' ἐν μιᾷ ἡμέρᾳ καθ' ἓν, τίκτει δὲ πλείω ἢ
εἴκοσιν.

(558b.) Οἱ δ' ἄλλοι ὄφεις ῳοτοκοῦσιν ἔξω, τὰ δ' ὠὰ ἀλλήλοις
συνεχῇ ἐστὶν ὥσπερ αἱ τῶν γυναικῶν ὑποδερίδες· ὅταν δὲ τέκη εἰς
τὴν γῆν, ἐπφάζει. Ἐκλέπεται δὲ καὶ ταῦτα τῷ ὑστέρῳ ἔτει.

Βιβλίο 6

Κεφάλαιο 1

Αἱ μὲν οὖν τῶν ὄφεων καὶ τῶν ἐντόμων γενέσεις, ἔτι δὲ τῶν τετραπόδων καὶ φωτόκων, τοῦτον ἔχουσι τὸν τρόπον.

Οἱ δ' ὀρνιθες φωτοκοῦσι μὲν ἅπαντες, ἡ δ' ὥρα τῆς ὀχείας καὶ οἱ τόκοι οὐ πᾶσιν ὁμοίως ἔχουσιν. Τὰ μὲν γὰρ καὶ ὀχεύεται καὶ τίκτει κατὰ πάντα τὸν χρόνον ὡς εἰπεῖν, οἷον ἀλεκτορὶς καὶ περιστέρα, ἡ μὲν ἀλεκτορὶς ὅλον τὸν ἐνιαυτὸν ἔξω δύο μηνῶν τῶν ἐν τῷ χειμῶνι τροπικῶν. Πλήθος δὲ τίκτουσιν ἔναι καὶ τῶν γενναίων πρὸ ἐπ' αὐτοῦ καὶ ἐξήκοντα· καίτοι ἦττον πολυτόκοι αἱ γενναῖαι τῶν ἀγεννῶν εἰσιν. Αἱ δ' Ἀδριαναὶ ἀλεκτορίδες εἰσὶ μὲν μικραὶ τὸ μέγεθος, τίκτουσι δ' ἂν' ἐκάστην ἡμέραν· εἰσὶ δὲ χαλεπαί, καὶ κτείνουσι τοὺς νεοττοὺς πολλάκις· χρώματα δὲ παντοδαπὰ ἔχουσιν.

Τίκτουσι δὲ καὶ οἰκογενεῖς ἔναι δις τῆς ἡμέρας· ἤδη δὲ τινες λίαν πολυτοκήσασα ἀπέθανον διὰ ταχέων.

Αἱ μὲν οὖν ἀλεκτορίδες τίκτουσιν, ὥσπερ εἴρηται, συνεχῶς· περιστέρα δὲ καὶ φάττα καὶ τρυγῶν καὶ οἰνὰς διτοκοῦσι μὲν, ἀλλ' αἱ περιστερὰ καὶ δεκάκις τοῦ ἐνιαυτοῦ τίκτουσιν.

Οἱ δὲ πλείστοι τῶν ὀρνίθων τίκτουσι τὴν ἑαρινὴν ὥραν, καὶ εἰσιν οἱ μὲν πολύγονοι αὐτῶν, πολύγονοι δὲ διχῶς, οἱ μὲν τῷ πολλάκις, ὥσπερ αἱ περιστερὰ, οἱ δὲ τῷ πολλά, ὥσπερ αἱ ἀλεκτορίδες. Τὰ δὲ γαμψώνυχα πάντα ὀλιγόγονα ἐστίν, ἔξω κεγχρίδος· αὕτη δὲ πλείστα τίκτει τῶν γαμψωνύχων. Ὡπταὶ μὲν οὖν καὶ τέτταρα ἤδη, τίκτει δὲ καὶ πλείω.

Τίκτουσι δὲ τὰ μὲν ἄλλα ἐν νεοττιαῖς, τὰ δὲ μὴ πτητικὰ ἐν νεοττιαῖς οὐδαμῶς, οἷον οἱ τε (559a.) πέρδικες καὶ οἱ ὀρτυγες, ἀλλ' ἐν τῇ γῇ, ἐπηλυγαζόμενα ὕλην. Ὡσαύτως δὲ καὶ κόρυδος καὶ τέτριξ. Ταῦτα μὲν οὖν ὑπηνέμους ποιεῖται τὰς νεοττεύσεις· ὃν δ' οἱ Βοιωτοὶ καλοῦσιν εἵροπα, εἰς τὰς ὅπας ἐν τῇ γῇ καταδυόμενος νεοττεύει μόνος. Αἱ δὲ κίχλαι νεοττιὰν μὲν ποιοῦνται ὥσπερ αἱ χελιδόνες ἐκ πηλοῦ ἐπὶ τοῖς ὑψηλοῖς τῶν δένδρων, ἐφεξῆς δὲ ποιοῦσιν ἀλλήλαις καὶ ἐχομένας, ὥστ' εἶναι διὰ τὴν συνέχειαν ὥσπερ ὀρμαθὸν νεοττιῶν. Ὁ δ' ἔποψ μόνος οὐ ποιεῖται νεοττιὰν τῶν καθ' ἑαυτὰ νεοττευόντων, ἀλλ' εἰσδυόμενος εἰς τὰ στελέχη ἐν τοῖς κοίλοις αὐτῶν τίκτει, οὐδὲν συμφορούμενος. Ὁ δὲ κόραξ καὶ ἐν οἰκίᾳ νεοττεύει καὶ ἐν πέτραις. Ἡ δὲ τέτριξ, ἣν καλοῦσιν Ἀθηναῖοι οὔραγα,

οὐτ' ἐπὶ τῆς γῆς νεοττεύει οὐτ' ἐπὶ τοῖς δένδρεσιν, ἀλλ' ἐπὶ τοῖς
χαμαιζήλοις φυτοῖς.

Κεφάλαιο 2

Τὸ δ' ὦν ἀπάντων ὁμοίως τῶν ὀρνίθων σκληρόδερμόν ἐστιν, ἐὰν γόνῳ γένηται καὶ μὴ διαφθαρή (ἕνια γὰρ μαλακὰ τίκτουσιν αἱ ἀλεκτορίδες), καὶ δίχροα τὰ ὦα τῶν ὀρνίθων, ἐκτὸς μὲν τὸ λευκόν, ἐντὸς δὲ τὸ ὠχρόν. Διαφέρουσι δὲ καὶ τὰ τῶν περὶ ποταμοὺς καὶ λίμνας γινομένων ὀρνέων πρὸς τὰ τῶν ξηροβατικῶν· πολλαπλάσιον γὰρ ἔχει τὰ τῶν ἐνύδρων κατὰ λόγον τὸ ὠχρόν πρὸς τὸ λευκόν. Καὶ τὰ χρώματα δὲ τῶν ὦων διαφέρει κατὰ τὰ γένη τῶν ὀρνίθων· τῶν μὲν γὰρ λευκά ἐστι τὰ ὦα, οἷον περιστερᾶς καὶ πέρδικος, τῶν δ' ὠχρά, οἷον τῶν περὶ τὰς λίμνας, τῶν δὲ κατεστιγμένα, οἷον τὰ τῶν μελεαγρίδων καὶ φασιανῶν· τὰ δὲ τῆς κεγχρίδος ἐρυθρά ἐστιν ὥσπερ μίλτος.

Ἔχει δὲ τὸ ὦν διαφοράν· τῇ μὲν γὰρ ὀξὺ τῇ δὲ πλατύτερόν ἐστιν· ἐξίοντος δ' ἡγεῖται τὸ πλατύ. Ἔστι δὲ τὰ μὲν μακρὰ καὶ ὀξέα τῶν ὦων θήλεια, τὰ δὲ στρογγύλα καὶ περιφέρειαν ἔχοντα κατὰ τὸ ὀξὺ ἄρρενα.

Ἐκλέπεται μὲν οὖν ἐπαζόντων τῶν ὀρνίθων, (559b.) οὐ μὴν ἀλλὰ καὶ αὐτόματα ἐν τῇ γῇ ὥσπερ ἐν Αἰγύπτῳ, κατορυπτόντων εἰς τὴν κόπρον· καὶ ἐν Συρακούσαις δὲ φιλοπότης τις ὑποτιθέμενος ὑπὸ τὴν ψίαθον εἰς τὴν γῆν τοσοῦτον ἔπινεν, ὥς φασί, χρόνον συνεχῶς, ἕως ἐκλέποι τὰ ὦα. Ἦδη δὲ καὶ κείμενα ἐν ἀγγείοις ἀλεινοῖς ἐξεπέφθη καὶ ἐξῆλθεν αὐτόματα.

Ἡ μὲν οὖν γονὴ πάντων τῶν ὀρνίθων λευκή, ὥσπερ καὶ τῶν ἄλλων ζώων· ὅταν δ' ὀγευθῇ, ἄνω πρὸς τὸ ὑπόζωμα λαμβάνει ἡ θήλεια. Καὶ τὸ μὲν πρῶτον λευκὸν καὶ μικρὸν φαίνεται, ἔπειτα ἐρυθρὸν καὶ αἱματῶδες, αὐξανόμενον δ' ὠχρόν καὶ ξανθὸν ἅπαν· ὅταν δ' ἤδη γίνηται ἀδρότερον, διακρίνεται, καὶ ἔσω μὲν τὸ ὠχρόν ἔξω δὲ τὸ λευκὸν περιίσταται. Ὅταν δὲ τελειωθῇ, ἀπολύεται τε καὶ ἐξέρχεται οὕτω τῷ καιρῷ ἐκ τοῦ μαλακὸν εἶναι μεταβάλλον ἐπὶ τὸ σκληρόν, ὥστ' ἐξέρχεται μὲν οὕπῳ πεπηγός, ἐξελθὼν δ' εὐθὺς πηγνυται καὶ γίνεται σκληρόν, ἂν μὴ ἐξίη νενοσηκός. Ἐφάνη δ' ἤδη, οἷον ἐν τινι καιρῷ γίνεται τὸ ὦν (ἅπαν γὰρ ὠχρόν ὁμοίως ἐστίν, ὥσπερ ὕστερον ὁ νεοττός), τοιαῦτα καὶ ἐν ἀλεκτρύονι διαιρουμένῳ ὑπὸ τὸ ὑπόζωμα, οὐπὲρ αἱ θήλειαι ἔχουσι τὰ ὦα, τὸ μὲν εἶδος ὠχρά ὅλα, τὸ δὲ μέγεθος ἡλίκα ὦα· ἃ ἐν τέρατος λόγῳ τιθέασιν.

Οἱ δὲ λέγοντες ὅτι ὑπολείμματά ἐστι τὰ ὑπηνέμια τῶν ἔμπροσθεν ἐξ ὀχείας γενομένων, οὐκ ἀληθῆ λέγουσιν· ὥπται γὰρ ἱκανῶς ἤδη ἀνόχευτοι νεοττίδες ἀλεκτορίδων καὶ χηνῶν τίκτουσαι ὑπηνέμια. Τὰ δ' ὡὰ τὰ ὑπηνέμια ἐλάττω μὲν τῷ μεγέθει γίνεται καὶ ἥττον ἡδέα καὶ ὑγρότερα τῶν γονίμων, πλήθει δὲ πλείω· ὑποτιθεμένων δὲ τῇ ὀρνιθι οὐδὲν παχύνεται τὸ ὑγρόν, ἀλλὰ τό τ' ὥχρον διαμένει καὶ τὸ λευκὸν ὅμοια ὄντα. Γίνεται δ' ὑπηνέμια πολλῶν, οἷον ἀλεκτορίδος, πέρδικος, περιστερᾶς, ταῶνος, χηνός, χηναλώπεκος. Ἐκλέπεται δ' ἐπωαζουσῶν ἐν τῷ θέρει θάπτον ἢ ἐν τῷ χειμῶνι· ἐν (560a.) ὀκτωκαίδεκα γὰρ ἡμέραις αἱ ἀλεκτορίδες ἐν τῷ θέρει ἐκλέπουσιν, ἐν δὲ τῷ χειμῶνι ἐνίot' ἐν πέντε καὶ εἴκοσιν. Διαφέρουσι μέντοι καὶ ὀρνιθες ὀρνίθων τῷ ἐπωαστικώτεροι εἶναι ἕτεροι ἐτέρων. Ἐὰν δὲ βροντήσῃ ἐπωαζούσης, διαφθείρεται τὰ ὡὰ.

Τὰ δὲ καλούμενα ὑπὸ τινων κυνόσουρα καὶ οὔρια γίνεται τοῦ θέρους μᾶλλον. Ζεφύρια δὲ καλεῖται τὰ ὑπηνέμια ὑπὸ τινων, ὅτι ὑπὸ τὴν ἑαρινὴν ὥραν φαίνονται δεχόμεναι τὰ πνεύματα αἱ ὀρνιθες· τοιοῦτον δὲ ποιοῦσι καὶ τῇ χειρὶ πως ψηλαφώμεναι.

Γίνεται δὲ τὰ ὑπηνέμια γόνιμα καὶ τὰ ἐξ ὀχείας ἤδη ἐνυπάρχοντα μεταβάλλει τὸ γένος εἰς ἄλλο γένος, ἐὰν πρὶν μεταβαλεῖν ἐκ τοῦ ὥχρου εἰς τὸ λευκὸν ὀχεύηται ἢ τὰ ὑπηνέμια ἔχουσα ἢ τὰ γόνω εἰλημμένα ἐξ ἐτέρου ὀρνιθος· καὶ γίνεται τὰ μὲν ὑπηνέμια γόνιμα, τὰ δὲ προϋπάρχοντα κατὰ τὸν ὕστερον ὀχεύοντα ὀρνιθα.

Ἐὰν δ' ἤδη μεταβαλλόντων εἰς τὸ λευκόν, οὐδὲν μεταβάλλει οὔτε τὰ ὑπηνέμια ὥστε γίνεσθαι γόνιμα, οὔτε τὰ γόνω κυούμενα ὥστε μεταβαλεῖν εἰς τὸ τοῦ ὀχεύοντος γένος. Καὶ ἐὰν ὑπαρχόντων δὲ μικρῶν διαλείπῃ ἢ ὀχεία, οὐδὲν ἐπαυξάνεται τὰ προϋπάρχοντα· ἐὰν δὲ πάλιν ὀχεύηται, ταχεῖα γίνεται ἢ ἐπίδοσις εἰς τὸ μέγεθος.

Ἐχει δὲ φύσιν τοῦ ὡοῦ τὸ ὥχρον καὶ τὸ λευκὸν ἐναντίαν οὐ μόνον τῷ χρώματι ἀλλὰ καὶ τῇ δυνάμει· τὸ μὲν γὰρ ὥχρον ὑπὸ τοῦ ψύχους πήγνυται, τὸ δὲ λευκὸν οὐ πήγνυται ἀλλ' ὑγραίνεται μᾶλλον· ὑπὸ δὲ τοῦ πυρὸς τὸ μὲν λευκὸν πήγνυται, τὸ δ' ὥχρον οὐ πήγνυται ἀλλὰ μαλακὸν διατελεῖ, ἂν μὴ κατακαυθῇ, καὶ μᾶλλον ἐψόμενον ἢ πυρούμενον συνίσταται καὶ ξηραίνεται.

Ἐκάτερον δὲ χωρὶς ὑμένι διείληπται ἀπ' ἀλλήλων. Αἱ δὲ πρὸς τῇ ἀρχῇ τοῦ ὥχρου χάλαζαι οὐδὲν συμβάλλονται πρὸς τὴν γένεσιν, ὥσπερ τινὲς ὑπολαμβάνουσιν· εἰσὶ δὲ δύο, ἢ μὲν κάτωθεν ἢ δ' ἄνωθεν. Συμβαίνει δὲ περὶ τὸ ὥχρον καὶ τὸ λευκὸν καὶ <τόδε> ὅταν

ἐξαιρεθέντα συνεράση (560b.) τις πλείω τοιαῦτα εἰς κύστιν καὶ ἔψη μαλακῶς καὶ μὴ συντόνῳ τῷ πυρί, τὸ ὥχρον εἰς τὸ μέσον συνέρχεται πᾶν, κύκλῳ δὲ τὸ λευκὸν περίσταται.

Τῶν δ' ἄλεκτορίδων αἱ νεοττίδες πρῶτον τίκτουσιν εὐθὺς ἀρχομένου τοῦ ἔαρος, καὶ πλείω τίκτουσιν ἢ αἱ πρεσβύτεραι· ἐλάττω δὲ τῷ μεγέθει τὰ ἐκ τῶν νεωτέρων.

Ὅλως δ' ἐὰν μὴ ἐπφάζωσιν αἱ ὄρνιθες, διαφθείρονται καὶ κάμνουσιν. Ὁχευθεῖσαι δ' αἱ μὲν ὄρνιθες φρίττουσί τε καὶ ἀποσεύονται καὶ πολλάκις κάρφος περιβάλλονται (ποιοῦσι δὲ τὸ αὐτὸ τοῦτο καὶ τεκοῦσαι ἐνίοτε) αἱ δὲ περιστερὰ ἐφέλκουσι τὸ ὄρροπύγιον, οἱ δὲ χῆνες κατακολυμβῶσιν.

Αἱ δὲ κυήσεις καὶ αἱ τῶν ὑπηνεμίων ῥῶν συλλήψεις ταχεῖαι γίνονται ταῖς πλείσταις τῶν ὀρνίθων, οἷον καὶ τῇ πέρδικι, ὅταν ὀργᾷ πρὸς τὴν ὀχείαν· ἐὰν γὰρ κατὰ πνεῦμα στή τοῦ ἄρρενος, κυῖσκειται καὶ εὐθὺς ἄχρηστος γίνεται πρὸς τὰς θήρας· ὁσφρησιν γὰρ δοκεῖ ἔχειν ἐπίδηλον ὁ πέρδιξ.

Ἡ δὲ τοῦ ῥοῦ γένεσις μετὰ τὴν ὀχείαν καὶ ἐκ τοῦ ῥοῦ πάλιν συμπεττομένου ἢ τοῦ νεοττοῦ γένεσις οὐκ ἐν ἴσοις χρόνοις συμβαίνει πᾶσιν, ἀλλὰ διαφέρει κατὰ τὰ μεγέθη τῶν γεννώντων. Συνίσταται δὲ τὸ τῆς ἄλεκτορίδος ῥὸν μετὰ τὴν ὀχείαν καὶ τελειοῦται ἐν δέχ' ἡμέραις ὥς ἐπὶ τὸ πολὺ· καὶ τῆς περιστερᾶς δ' ἐν μικρῷ ἐλάττονι. Δύνανται δ' αἱ περιστερὰ καὶ ἤδη τοῦ ῥοῦ ἐν ὠδίνι ὄντος κατέχειν· ἐὰν γάρ τι ἐνοχληθῇ ὑπὸ τινος ἢ περὶ τὴν νεοττείαν ἢ πτερὸν ἐκτιλθῇ ἢ ἄλλο τι πονήσῃ καὶ δυσαρρεστήσῃ, κατέχει καὶ οὐ τίκει μελλήσασα.

Ἰδια δὲ περὶ τὰς περιστερὰς συμβαίνει καὶ τάδε περὶ τὴν ὀχείαν. Κυνοῦσί τε γὰρ ἀλλήλας, ὅταν μέλλῃ ἀναβαίνειν ὁ ἄρρην, ἢ οὐκ ἂν ὀχεύσειεν· ὁ μὲν πρεσβύτερος τὸ πρῶτον, ὕστερον μέντοι ἀναβαίνει καὶ μὴ κύσας· οἱ δὲ νεώτεροι αἰεὶ τοῦτο ποιήσαντες ὀχεύουσιν. Τοῦτό [τε] δὴ ἴδιον ποιοῦσι. Καὶ ἔτι αἱ θήλειαι ἀλλήλαις ἀναβαίνουνσιν, ὅταν ἄρρην μὴ παρῇ, κύσασαι ὥσπερ οἱ ἄρρενες· καὶ οὐδὲν προῖεμεναι (561a.) εἰς ἀλλήλας τίκτουσιν ῥὰ πλείω ἢ τὰ γόνῳ γινόμενα, ἐξ ὧν οὐ γίνεται νεοττὸς οὐδεὶς, ἀλλ' ὑπηνέμια πάντα τὰ τοιαῦτά ἐστιν.

Κεφάλαιο 3

Ἡ δὲ γένεσις ἐκ τοῦ φύου τοῖς ὄρνισι συμβαίνει μὲν τὸν αὐτὸν τρόπον πᾶσιν, οἱ δὲ χρόνοι διαφέρουσι τῆς τελειώσεως, καθάπερ εἴρηται. Ταῖς μὲν οὖν ἀλεκτορίσι τριῶν ἡμερῶν καὶ νυκτῶν παρελθουσῶν ἐπισημαίνει τὸ πρῶτον, ταῖς δὲ μείζουσιν αὐτῶν ὄρνισιν ἐν πλείονι χρόνῳ, ταῖς δ' ἐλάττωσιν ἐν ἐλάττονι. Γίνεται δ' ἐν τούτῳ τῷ χρόνῳ ἤδη τό τ' ὥχρον ἄνω προσεληλυθὸς πρὸς τὸ ὀξύ, ἥπερ ἐστὶν ἡ ἀρχὴ τε τοῦ φύου καὶ ἐκλέπεται τὸ φόν, καὶ ὅσον στιγμὴ αἱματίνῃ ἐν τῷ λευκῷ ἡ καρδιά. Τοῦτο δὲ τὸ σημεῖον πηδᾷ καὶ κινεῖται ὥσπερ ἔμψυχον, καὶ ἀπ' αὐτοῦ δύο πόροι φλεβικοὶ ἔναιμοι ἐλίσσόμενοι φέρουσιν αὐξανόμενου εἰς ἐκάτερον τῶν χιτώνων τῶν περιεχόντων. Καὶ ὑμὴν δ' αἱματικὰς ἵνας ἔχων ἤδη περιέχει τὸ λέκιθον κατὰ τὸν χρόνον τοῦτον ἀπὸ τῶν πόρων τῶν φλεβικῶν. Ὀλίγον δ' ὕστερον καὶ τὸ σῶμα ἤδη ἀποκρίνεται, μικρὸν τὸ πρῶτον πᾶμπαν καὶ λευκόν. Δήλη δ' ἡ κεφαλὴ, καὶ ταύτης οἱ ὀφθαλμοὶ μάλιστ' ἐμπεφυσημένοι· καὶ τοῦτο μέχρι πόρρῳ διατελεῖ· ὥπὲ γάρ ποτε μικροὶ γίνονται καὶ συμπίπτουσιν. Τοῦ δὲ σώματος τὸ κάτω μέρος οὐδὲν φαίνεται μῶριον πρὸς τὸ ἄνω τὸ πρῶτον. Τῶν δὲ πόρων τῶν ἐκ τῆς καρδίας τεινόντων ὁ μὲν φέρει εἰς τὸ κύκλῳ περιέχον χόριον, ὁ δ' εἰς τὸ ὥχρον ὥσπερ ὀμφαλὸς ὢν. Ἡ μὲν οὖν ἀρχὴ τοῦ νεοττοῦ ἐστὶν ἐκ τοῦ λευκοῦ, ἡ δὲ τροφὴ διὰ τοῦ ὀμφαλοῦ ἐκ τοῦ ὥχροῦ.

Δεκαταίου δ' ἤδη ὄντος ὁ νεοττὸς ὅλος διάδηλος καὶ τὰ μέρη πάντα. Ἔχει δ' ἔτι τὴν κεφαλὴν μείζω τοῦ ἄλλου σώματος, καὶ τοὺς ὀφθαλμοὺς τῆς κεφαλῆς, οὐκ ἔχοντάς πω ὄψιν. Γίνονται δ' οἱ ὀφθαλμοὶ περὶ τὸν χρόνον τοῦτον ἐξαιρόμενοι μείζους κυάμων καὶ μέλανες· ἀφαιρουμένου δὲ τοῦ δέρματος ὑγρὸν ἔνεστι λευκὸν καὶ ψυχρόν, σφόδρα στίλβον πρὸς τὴν αὐγὴν, στερεὸν δ' οὐδέν. Τὰ μὲν οὖν περὶ τὰ (561b.) ὅμματα καὶ τὴν κεφαλὴν τοῦτον διάκειται τὸν τρόπον.

Ἔχει δ' ἐν τῷ χρόνῳ τούτῳ καὶ τὰ σπλάγχχνα ἤδη φανερά καὶ τὰ περὶ τὴν κοιλίαν καὶ τὴν τῶν ἐντέρων φύσιν, καὶ αἱ φλέβες αἱ ἀπὸ τῆς καρδίας φαινόμεναι τείνουν πρὸς τῷ ὀμφαλῷ ἤδη γίνονται. Ἀπὸ δὲ τοῦ ὀμφαλοῦ τέταται φλέψ ἡ μὲν πρὸς τὸν ὑμένα τὸν περιέχοντα τὸ ὥχρον (τὸ δ' ὥχρον ἐν τούτῳ τῷ χρόνῳ ὑγρὸν ἤδη ἐστὶ καὶ πλεῖον

ἢ τὸ κατὰ φύσιν), ἡ δ' ἑτέρα εἰς τὸν ὑμένα τὸν περιέχοντα ὅλον τὸν θ' ὑμένα ἐν ᾧ ὁ νεοττός, καὶ τὸν τοῦ ὠχροῦ ὑμένα καὶ τὸ μεταξὺ τούτων ὑγρόν. Αὐξανομένου γὰρ τοῦ νεοττοῦ κατὰ μικρὸν τοῦ ὠχροῦ τὸ μὲν ἄνω γίνεται τὸ δὲ κάτω, ἐν μέσῳ δὲ τὸ λευκὸν ὑγρόν· τοῦ δὲ κάτω ὠχροῦ τὸ λευκὸν κάτωθεν, ὥσπερ τὸ πρῶτον ὑπῆρχεν. Δεκαταίου δ' ὄντος τὸ λευκὸν ἔσχατον γίνεται, ὀλίγον ἤδη ὄν καὶ γλίσχρον καὶ παχὺ καὶ ὑπωχρον. Τέτακται γὰρ τῇ θέσει ἕκαστα τόνδε τὸν τρόπον. Πρῶτος μὲν καὶ ἔσχατος πρὸς τὸ ὄστρακον ὁ τοῦ ὥου ὑμῆν, οὐχ ὁ τοῦ ὀστράκου, ἀλλ' <ὁ> ὑπ' ἐκείνῳ. Ἐν δὲ τούτῳ λευκὸν ἔνεστιν ὑγρόν, εἴτα ὁ νεοττός, καὶ περὶ αὐτὸν ὑμῆν χωρίζων, ὅπως μὴ ἐν ὑγρῷ ὁ νεοττός ᾗ· ὑπὸ δὲ τὸν νεοττὸν τὸ ὠχρόν, εἰς ὃ τῶν φλεβῶν ἔφερεν ἡ ἑτέρα, ἡ δ' ἑτέρα εἰς τὸ περιέχον λευκόν. Τὸ δὲ πᾶν περιέχει ὑμῆν μεθ' ὑγρότητος ἰχωροειδοῦς. Εἴτ' ἄλλος ὑμῆν περὶ αὐτὸ ἤδη τὸ ἔμβρυον, ὥσπερ εἴρηται, χωρίζων πρὸς τὸ ὑγρόν. Ὑποκάτω δὲ τούτου τὸ ὠχρόν ἐν ἐτέρῳ ὑμένι περιειλημμένον, εἰς ὃ τείνει ὀμφαλὸς ὁ ἀπὸ τῆς καρδίας καὶ τῆς μεγάλης φλεβὸς φέρων, ὥστε μὴ εἶναι τὸ ἔμβρυον ἐν μηδετέρῳ τῶν ὑγροτήτων.

Περὶ δὲ τὴν εἰκοστήν ἤδη φθέγγεται τε κινούμενος ἔσωθεν, ἐάν τις κινῇ διελὼν, καὶ ἤδη δασύς γίνεται, ὅταν ὑπὲρ τὰς εἰκοσιν ἡ ἐκκόλαψις γίνηται τῶν ὥων. Ἔχει δὲ τὴν κεφαλὴν ὑπὲρ τοῦ δεξιοῦ σκέλους ἐπὶ τῇ λαγόνι, τὴν δὲ πτέρυγα ὑπὲρ τῆς κεφαλῆς· καὶ φανερός κατὰ τοῦτον τὸν χρόνον ὃ τε χοριοειδὴς ὑμῆν ὁ μετὰ τὸν τοῦ ὀστράκου ὑμένα (562a.) τὸν ἔσχατον, εἰς ὃν ἔτεινεν ὁ ἕτερος τῶν ὀμφαλῶν (καὶ ὁ νεοττός ἐν τούτῳ δὴ γίνεται τότε ὅλος), καὶ ὁ ἕτερος ὑμῆν χοριοειδὴς ὢν, ὁ περὶ τὸ ὠχρόν εἰς ὃ ἔτεινεν ὁ ἕτερος ὀμφαλός· ἄμφω δ' ἦσθιν ἀπὸ τε τῆς καρδίας καὶ τῆς φλεβὸς τῆς μεγάλης. Ἐν δὲ τούτῳ τῷ χρόνῳ ὁ μὲν πρὸς τὸ ἔξω χόριον ὀμφαλὸς τείνων ἀπολύεται τοῦ ζώου συμπεπτωκώς, ὁ δ' εἰς τὸ ὠχρόν φέρων συνήρηται τοῦ νεοττοῦ πρὸς τὸ ἔντερον τὸ λεπτόν, καὶ ἔσω τοῦ ὠχροῦ πολὺ ἤδη γίνεται ἐν τῷ νεοττῷ, καὶ ὑπόστημα ἐν τῇ κοιλίᾳ ὠχρόν. Καὶ περίττωμα δ' ἀφήσι περὶ τὸν χρόνον τοῦτον πρὸς τὸ ἔξω χόριον, καὶ ἐν τῇ κοιλίᾳ ἔχει· λευκὸν δὲ καὶ τὸ ἔξω περίττωμα, καὶ ἔσω τι ἐγγίνεται λευκόν. Τέλος δὲ τὸ ὠχρόν ἀεὶ ἔλαττον γινόμενον καὶ προῖδὸν ἀναλίσκεται ἀμπαν καὶ ἐμπεριλαμβάνεται ἐν τῷ νεοττῷ, ὥστ' ἡδὴ ἐκκεκολαμμένου δεκαταίου, ἂν τις ἀνασχίσῃ, ἔτι πρὸς τῷ ἐντέρῳ μικρόν τι τοῦ ὠχροῦ λείπεται, ἀπὸ δὲ τοῦ ὀμφαλοῦ ἀπολέλνται, καὶ οὐδὲν γίνεται μεταξὺ ἀλλ' ἀνήλωται πᾶν.

Περὶ δὲ τὸν χρόνον τὸν πρότερον ῥηθέντα καθεύδει μὲν ὁ νεοττός, ἐγείρεται δὲ καὶ ἀναβλέπει κινούμενος καὶ φθέγγεται· καὶ ἡ καρδία ἅμα τῷ ὀμφαλῷ ἀναφυσᾷ ὡς ἀναπνέοντος. Ἡ μὲν οὖν γένεσις ἐκ τοῦ ὥου τοῖς ὄρνισι τοῦτον ἔχει τὸν τρόπον.

Τίκτουσι δ' αἱ ὄρνιθες ἔνια ἄγωνα τῶν ὥων καὶ [τὰ] ἐξ ὀχείας γινόμενα, καὶ ἐπφαζουσῶν οὐδὲν γίνεται ἔκγονον· τεθεώρηται δὲ τοῦτο μάλιστα ἐπὶ τῶν περιστερῶν.

Τὰ δὲ δίδυμα τῶν ὥων δύο ἔχει λεκίθους, ὧν τὰ μὲν διείργει τοῦ μὴ εἰς ἄλληλα συγκεχύσθαι τὰ ὠχρὰ τοῦ λευκοῦ λεπτὴ διάφυσις, τὰ δ' οὐκ ἔχει ταύτην τὴν διάφυσιν, ἀλλὰ συμψάουσιν. Εἰσὶ δ' ἔνιαι ἀλεκτορίδες αἱ πάντα δίδυμα τίκτουσιν, καὶ ἤδη ἐπὶ τούτων ὥπται τὸ περὶ τὴν λέκιθον συμβαῖνον· ὀκτωκαίδεκα γάρ τις τεκοῦσα ἐξέλεγε δίδυμα, πλὴν ὅσα οὔρια ἐγένετο. Τὰ μὲν οὖν ἄλλα γόνιμα (πλὴν ὅτι τὸ μὲν μεῖζον (562b.) τὸ δ' ἔλαττον γίνεται τῶν διδύμων), τὸ δὲ τελευταῖον τερατῶδες.

Κεφάλαιο 4

Τίκτουσι δὲ πάντα μὲν τὰ περιστεροειδῆ δύο, οἷον φάττα καὶ τρυγών, ὥς ἐπὶ τὸ πολὺ, τὰ δὲ πλείστα τρία [τρυγών καὶ φάττα]. Τίκει δ' ἡ μὲν περιστερὰ, ὥσπερ εἴρηται, πᾶσαν ὥραν, τρυγών δὲ καὶ φάττα ἐν τῷ ἔαρι, οὐ πλεονάκις ἢ δῖς· τίκει δὲ τὰ δεύτερα, ὅταν τὰ πρότερον γεννηθέντα διαφθαρή· πολλὰ γὰρ διαφθείρουσιν αὐτὰ τῶν ὀρνίθων. Τίκει μὲν οὖν, ὥσπερ εἴρηται, καὶ τρία ποτέ· ἀλλ' ἐξάγει οὐδέποτε δυοῖν πλεον νεοττοῖν, ἐνίοτε δὲ καὶ ἓνα μόνον· τὸ δ' ὑπολειπόμενον τῶν ῥῶν ἀεὶ οὐρίον ἐστίν.

Τῶν δὲ πλείστων ὀρνέων οὐδὲν αὐτοετὲς γεννᾷ. Ἄπαντες δ' οἱ ὀρνιθες, ἐπειδὴν ἅπαξ ἄρξωνται τίκειν, διὰ τέλους ὥς εἰπεῖν ἔχουσιν φά, ἀλλ' ἐν ἐνίοις διὰ μικρότητα οὐ ῥάδιον ἰδεῖν.

Ἡ δὲ περιστερὰ ὥς ἐπὶ τὸ πολὺ ἄρρεν καὶ θῆλυ, καὶ τούτων ὥς τὸ πολὺ πρότερον τὸ ἄρρεν τίκει· καὶ τεκοῦσα μίαν ἡμέραν διαλείπει εἴτα πάλιν τίκει θάτερον. Ἐπφάζει δὲ καὶ ὁ ἄρρην ἐν τῷ μέρει τῆς ἡμέρας, τὴν δὲ νύκτα ἡ θήλεια. Ἐκπέττεται τε καὶ ἐκλέπεται ἐντὸς εἴκοσιν ἡμερῶν τὸ γενόμενον πρότερον τῶν ῥῶν· τιτρώσκει δὲ τὸ ῥὸν τῇ προτεραιᾷ ἢ ἐκλέπει.

Καὶ συνθερμαίνουσι τοὺς νεοττοὺς ἀμφότεροι ἐπὶ τινα χρόνον τὸν αὐτόν γε τρόπον ὅνπερ καὶ τὰ φά. Χαλεπωτέρα δ' ἡ θήλειά ἐστι περὶ τὴν τεκνοτροφίαν τοῦ ἄρρενος, ὥσπερ καὶ τὰ ἄλλα ζῶα μετὰ τὸν τόκον. Τίκτουσι δὲ τοῦ ἐνιαυτοῦ καὶ δεκάκις, ἥδη δὲ τινες καὶ ἐνδεκάκις, αἱ δ' ἐν Αἰγύπτῳ καὶ δωδεκάκις. Ὅχευει δὲ καὶ ὀχεύεται ἡ περιστερὰ ἐντὸς ἐνιαυτοῦ· καὶ γὰρ ἔκμηνος ὀχεύει καὶ ὀχεύεται.

Τὰς δὲ φάττας καὶ τὰς τρυγόνας ἐνιοὶ φασὶν ὀχεύεσθαι καὶ γεννᾶν καὶ τρίμηνα ὄντα, σημεῖον ποιούμενοι τὴν πολυπλήθειαν αὐτῶν. Ἐγκυα δὲ γίνεται δέκα καὶ τέτταρας ἡμέρας, καὶ ἐπφάζει ἄλλας τοσαύτας· ἐν ἐτέραις δὲ δέκα καὶ τέτταρσι πτεροῦνται οὕτως ὥστε (563a.) μὴ ῥαδίως καταλαμβάνεσθαι. Βιοὶ δὲ φάττα, ὥς φασί, καὶ τετταράκοντα ἔτη· καὶ αἱ πέρδικες δὲ πλείω ἢ ἔτη ἐκκαίδεκα. Τίκει δὲ ἡ περιστερὰ ἀπονεοττεύουσα πάλιν ἐν τριάκονθ' ἡμέραις.

Κεφάλαιο 5

Ὁ δὲ γὺψ νεοττεύει μὲν ἐπὶ πέτραις ἀπροσβάτοις· διὸ σπάνιον ἰδεῖν νεοττιὰν γυπὸς καὶ νεοττούς. Καὶ διὰ τοῦτο καὶ Ἡρόδωρος ὁ Βρύσωνος τοῦ σοφιστοῦ πατήρ φησιν εἶναι τοὺς γῦπας ἀφ' ἐτέρας γῆς, ἀδήλου ἡμῖν, τοῦτό τε λέγων τὸ σημεῖον, ὅτι οὐδεὶς ἐώρακε γυπὸς νεοττιάν, καὶ ὅτι πολλοὶ ἐξαίφνης φαίνονται ἀκολουθοῦντες τοῖς στρατεύμασιν. Τὸ δ' ἐστὶ χαλεπὸν μὲν ἰδεῖν, ὥπται δ' ὅμως. Τίκτουσι δὲ δύο ᾧ οἱ γῦπες.

Τὰ μὲν οὖν ἄλλα ὅσα σαρκοφάγα οὐκ ὥπται πλεονάκεις ἢ ἅπαξ τίκτοντα, ἡ δὲ χελιδὼν δις νεοττεύει μόνον τῶν σαρκοφάγων· τῶν δὲ νεοττῶν ἂν τις ἔτι νέων ὄντων τῆς χελιδόνος τὰ ὄμματα ἐκκεντήσῃ, γίνονται ὑγιεῖς καὶ βλέπουσιν ὕστερον.

Κεφάλαιο 6

Ὁ δ' αὐτὸς φὰ μὲν τίκει τρία, ἐκλέπει δὲ τούτων τὰ δύο, ὥσπερ ἐστὶ καὶ ἐν τοῖς Μουσαίου λεγομένοις ἔπεσιν, “ὅς τρία μὲν τίκει, δύο δ' ἐκλέπει, ἐν δ' ἀλεγίζει”.

Ὡς μὲν οὖν τὰ πολλὰ οὕτω συμβαίνει, ἤδη δὲ καὶ τρεῖς νεοττοὶ ὁμμένοι εἰσίν. Ἐκβάλλει δ' αὐξανομένων τὸν ἕτερον τῶν νεοττῶν ἀχθόμενος τῇ ἐδωδῇ. Ἄμα δὲ καὶ λέγεται ἐν τῷ χρόνῳ τούτῳ ἅπαστος γίνεσθαι, ὅπως μὴ ἀρπάξῃ τοὺς τῶν θηρίων σκύμνους· οἱ τε οὖν ὄνυχες αὐτοῦ διαστρέφονται ὀλίγας ἡμέρας, καὶ τὰ πτερὰ λευκαίνεται, ὥστε καὶ τοῖς τέκνοις τότε γίνονται χαλεποί. Τὸν δ' ἐκβληθέντα δέχεται καὶ ἐκτρέφει ἡ φήνη. Ἐπφάζει δὲ περὶ τριάκονθ' ἡμέρας. Καὶ τῶν ἄλλων δὲ τοῖς μεγάλοις ὁ χρόνος τοσοῦτός ἐστι τῆς ἐπφάσεως, οἷον χηνὶ καὶ ὠτίδι· τοῖς δὲ μέσοις περὶ εἴκοσιν, οἷον ἰκτίνῳ καὶ ἱέρακι. Τίκει δ' ὁ ἰκτῖνος τὰ μὲν πλεῖστα δύο, ἐνίῳτε δὲ καὶ τρεῖς ἐξάγει νεοττούς· ὁ δ' αἰγώλιος καλούμενος ἔστιν ὅτε καὶ τέτταρας. Τίκει δὲ καὶ ὁ (563b.) κόραξ οὐ μόνον δύο, ὥσπερ φασί τινες, ἀλλὰ καὶ πλείω· ἐπφάζει δὲ περὶ εἴκοσιν ἡμέρας καὶ ἐκβάλλει τοὺς νεοττούς ὁ κόραξ. Ποιεῖ δὲ καὶ ἄλλα τῶν ὀρνέων τὸ αὐτὸ τοῦτο· πολλάκις γάρ, ὅσα πλείω τίκει, ἓνα ἐκβάλλουσιν.

Οὐ πάντα δὲ τὰ τῶν αὐτῶν γένη ὅμοια περὶ τὰ τέκνα, ἀλλ' ὁ πύγαργος χαλεπός, οἱ δὲ μέλανες εὐτεκνοὶ περὶ τὴν τροφήν εἰσιν, ἐπεὶ πάντες γ' ὥς εἰπεῖν οἱ γαμψώνυχες, ὅταν θάττον οἱ νεοττοὶ δύνωνται πέτεσθαι, ἐκβάλλουσι τύπτοντες ἐκ τῆς νεοττιᾶς. Καὶ τῶν ἄλλων δέ, ὥσπερ εἴρηται, σχεδὸν οἱ πλεῖστοι τοῦτο δρῶσι καὶ θρέψαντες οὐδεμίαν ἐπιμέλειαν ποιοῦνται τὸ λοιπόν, πλὴν κορώνης· αὕτη δ' ἐπὶ τινὰ χρόνον ἐπιμελεῖται· καὶ γὰρ ἤδη πετομένων σιτίζει παραπετομένην.

Κεφάλαιο 7

Ὁ δὲ κόκκυξ λέγεται μὲν ὑπὸ τινων ὡς μεταβάλλει ἐξ ἱέρακος, διὰ τὸ ἀφανίζεσθαι τὸν ἱέρακα, περὶ τοῦτον τὸν χρόνον, ᾧ ὁμοίός ἐστιν· σχεδὸν δὲ καὶ τοὺς ἄλλους ἱέρακας οὐκ ἔστιν ἰδεῖν, ὅταν θᾶπτον φθέγγηται ὁ κόκκυξ, πλὴν ὀλίγας ἡμέρας. Ὁ δὲ κόκκυξ φαίνεται ἐπ' ὀλίγον χρόνον τοῦ θέρους, τὸν δὲ χειμῶνα ἀφανίζεται. Ἔστι δ' ὁ μὲν ἱέραξ γαμψώνυχος, ὁ δὲ κόκκυξ οὐ γαμψώνυχος. Ἔτι δ' οὐδὲ τὰ περὶ τὴν κεφαλὴν ἔοικεν ἱέρακι, ἀλλ' ἄμφω ταῦτα περιστερᾶ μᾶλλον· ἀλλ' ἢ κατὰ τὸ χρῶμα μόνον προσέοικεν ἱέρακι, πλὴν τοῦ μὲν ἱέρακος τὰ ποικίλα οἷον γραμμαῖ εἰσι, τοῦ δὲ κόκκυγος οἷον στιγμαί. Τὸ μέντοι μέγεθος καὶ ἡ πτῆσις παραπλησία τῷ ἐλαχίστῳ τῶν ἱεράκων, ὅς κατὰ τὸν χρόνον τοῦτον ἀφανής ἐστιν ὡς ἐπὶ τὸ πολὺ ὄν φαίνεται ὁ κόκκυξ, ἐπεὶ ἤδη γ' ὠμμένοι εἰσὶν ἄμφω. Καὶ κατεσθιόμενος δ' ὥπται κόκκυξ ὑπὸ ἱέρακος· καίτοι οὐδὲν ποιεῖ τοῦτο τῶν ὁμογενῶν ὀρνέων. Νεοττοὺς δὲ κόκκυγος λέγουσιν ὡς οὐδεὶς ἐώρακεν· ὁ δὲ τίκτει μὲν, ἀλλ' οὐ ποιησάμενος νεοττιάν, ἀλλ' ἐνίστε μὲν ἐν τῇ τῶν ἐλαττόνων ὀρνίθων ἐντίκτει καταφαγὼν τὰ ῥα τὰ ἐκείνων, μάλιστα δ' ἐν ταῖς τῶν φαβῶν νεοττιαῖς, (564a.) καταφαγὼν καὶ τὰ τούτων ῥα. Τίκτει δ' ὀλιγάκις μὲν δύο, τὰ δὲ πλεῖστα ἓν. Ἐντίκτει δὲ καὶ τῇ τῆς ὑπολαΐδος νεοττιᾶ· ἢ δ' ἐκπέττει καὶ ἐκτρέφει. Γίνεται δὲ πίων καὶ ἡδύκρεως κατὰ τοῦτον τὸν καιρὸν μάλιστα. Γίνονται δὲ καὶ τῶν ἱεράκων οἱ νεοττοὶ ἡδύκρεοι σφόδρα καὶ πiones. Νεοττεύει δὲ γένος τι αὐτῶν πόρρω καὶ ἐν ἀποτόμοις πέτραις.

Κεφάλαιο 8

Ἐπφάζει δὲ τὰ πολλὰ τῶν ὀρνέων, ὥσπερ εἴρηται περὶ τῶν περιστερῶν, διαδεχόμενα τὰ ἄρρενα τοῖς θήλεσι, τὰ δὲ τοσοῦτον χρόνον ὅσον ἀπολείπει τὸ θῆλυ τροφήν αὐτῷ ποριζόμενον. Τῶν δὲ χηνῶν αἱ θήλειαι ἐπφάζουσι μόναι, καὶ διαμένουσι διὰ παντός ἐφεδρεύουσαι, ὅτανπερ ἄρξωνται τοῦτο ποιεῖν. Πρὸς δὲ τόποις ἐλώδεσί τε καὶ πόαν ἔχουσι πάντων τῶν λιμναίων ὀρνίθων αἱ νεοττιαὶ γίνονται· διόπερ καὶ ἡσυχίαν ἔχοντες ἐπὶ τῶν ῥῶν δύνανται τροφήν τινα αὐτοῖς πορίζεσθαι καὶ μὴ παντάπασιν ἄσιτοι εἶναι.

Ἐπφάζουσι δὲ καὶ τῶν κορωνῶν αἱ θήλειαι μόναι, καὶ διατελοῦσιν ἐπ' αὐτῶν οὔσαι διὰ παντός· τρέφουσι δ' αὐτάς οἱ ἄρρενες κομίζοντες τὴν τροφήν αὐταῖς καὶ σιτίζοντες. Τῶν δὲ φαβῶν ἢ μὲν θήλεια ἀπὸ δείλης ἀρξαμένη τὴν τε νύχθ' ὅλην ἐπφάζει καὶ ἕως ἀκρατίσματος ὥρας, ὃ δ' ἄρρην τὸ λοιπὸν τοῦ χρόνου. Οἱ δὲ πέρδικες δύο ποιοῦνται τῶν ῥῶν σηκούς, καὶ ἐφ' ᾧ μὲν ἡ θήλεια ἐπὶ δὲ θατέρῳ ὃ ἄρρην ἐπφάζει, καὶ ἐκλέψας ἐκτρέφει ἑκάτερος ἑκάτερα· καὶ τοὺς νεοττοὺς ὅταν πρῶτον ἐξάγῃ, ὀχεύει αὐτούς.

Κεφάλαιο 9

Ὁ δὲ ταῶς ζῆ μὲν περὶ πέντε καὶ εἴκοσιν ἔτη, γεννᾷ δὲ τριετὴς μάλιστα, ἐν οἷς καὶ τὴν ποικιλίαν τῶν πτερῶν ἀπολαμβάνει· ἐκλέπει δ' ἐν τριάκονθ' ἡμέραις ἢ μικρῷ πλείοσιν. Ἄπαξ δὲ τοῦ ἔτους μόνον τίκτει· τίκτει δ' ὥα δώδεκα ἢ μικρῷ ἐλάττω· τίκτει δὲ διαλείπων δύο ἢ τρεῖς ἡμέρας καὶ οὐκ ἐφεξῆς· αἱ δὲ πρωτοτόκοι μάλιστα περὶ ὀκτῶ ὥα. Τίκτουσι δ' οἱ ταῶ καὶ ὑπηνέμια. Ὁχεύονται δὲ περὶ τὸ ἔαρ· γίνεται δὲ καὶ ὁ τόκος εὐθέως μετὰ τὴν ὀχείαν. Πτερορρυεῖ (564b.) δ' ἅμα τοῖς πρώτοις τῶν δένδρων καὶ ἄρχεται αὐθις ἀπολαμβάνειν τὴν πτέρωσιν ἅμα τῇ τούτων βλαστήσει. Ἀλεκτορίδι δ' ὑποτιθέασιν αὐτῶν τὰ ὥα ἐπφάζειν οἱ τρέφοντες διὰ τὸν ἄρρενα τῆς θηλείας τοῦτο δρώσης ἐπιπετόμενον συντρίβειν· διὰ ταύτην δὲ τὴν αἰτίαν καὶ τῶν ἀγρίων ἔνιοι ὀρνίθων ἀποδιδράσκοντες τοὺς ἄρρενας τίκτουσι καὶ ἐπφάζουσιν.

Ὑποτίθεται δὲ τῇ ὀρνιθι μάλιστα δύο ὥα· τοσαῦτα γὰρ μόνα δύναται ἐπφάζουσα ἐξάγειν. Ἐπιμελοῦνται δ' ὅπως μὴ καταβαίνουσα διαλίπη τὸν ἐπφασμόν, παρατιθέντες τροφήν.

Οἱ δ' ὀρνιθες περὶ τὴν ὀχείαν τοὺς ὄρχεις μείζους ἴσχουσιν [ἐπιδήλως], οἱ μὲν μᾶλλον ὀχευτικοὶ καὶ μᾶλλον ἐπιδήλως, οἷον ἀλεκτρούνες καὶ πέρδικες, οἱ δὲ μὴ συνεχῶς, ἥττον.

Κεφάλαιο 10

Περὶ μὲν οὖν τῆς τῶν ὀρνίθων κυήσεως καὶ γενέσεως τοῦτον ἔχει τὸν τρόπον, οἱ δ' ἰχθύες ὅτι μὲν οὐ πάντες φωτοκοῦσιν, εἴρηται πρότερον. Τὰ μὲν γὰρ σελάχη ζωοτοκεῖ, τὸ δὲ τῶν ἄλλων γένος ἰχθύων φωτοκεῖ. Ζωοτοκεῖ δὲ τὰ σελάχη πρότερον φωτοκήσαντα ἐν αὐτοῖς, καὶ ἐκτρέφουσιν ἐν αὐτοῖς, πλὴν βατράχου.

Ἔχουσι δὲ καὶ τὰς ὑστέρας, ὥσπερ ἐν τοῖς ἄνω ἐλέχθη, διαφορὰς οἱ ἰχθύες· τὰ μὲν γὰρ φωτοκοῦντα δικρόας ἔχει καὶ κάτω, τὰ δὲ σελάχη ὀρνιθοδεστέρας. Διαφέρει δὲ τῆς τῶν ὀρνίθων ὑστέρας, ὅτι οὐ πρὸς τῷ ὑποζώματι ἐνίοις συνίσταται τὰ ῥά, ἀλλὰ μεταξὺ κατὰ τὴν ράχιν, ἐκεῖθεν δ' αὐξανόμενα μεταβαίνει.

Τὸ δ' ὦν γίνεται πάντων τῶν ἰχθύων οὐ δίχρων ἀλλὰ μονόχρων, λευκότερον δ' ἢ ὠχρότερον, καὶ πρότερον καὶ ὅταν ἐνῇ ὁ νεοττός. Διαφέρει δ' ἡ γένεσις ἢ ἐκ τοῦ ὦς τοῦ τῶν ἰχθύων καὶ τῶν ὀρνίθων, ἧ οὐκ ἔχει τὸν ἕτερον ὀμφαλὸν τείνοντα πρὸς τὸν ὑμένα τὸν ὑπὸ τὸ ὄστρακον· τὸν δ' εἰς τὸ ὠχρὸν τοῖς ὀρνισι τείνοντα πόρον, τοῦτον ἔχει τοῖν δυοῖν μόνον. Ἡ δ' ἄλλη γένεσις ἤδη πᾶσα ἢ αὐτὴ ἢ ἐκ τοῦ ὦς τῶν τ' ὀρνίθων καὶ τῶν ἰχθύων· ἐπ' ἅκρῳ τε γὰρ τούτου γίνεται, καὶ αἱ φλέβες ὁμοίως τείνουσιν ἐκ τῆς καρδίας πρῶτον, καὶ ἡ κεφαλὴ καὶ τὰ ὄμματα καὶ (565a.) τὰ ἄνω μέγιστα γίνεται τὸ πρῶτον· ὁμοίως δ' αὐξανόμενου αἰεὶ ἔλαττον γίνεται τὸ ὦν, καὶ τέλος ἀφανίζεται καὶ εἰσδύεται ἔσω, καθάπερ ἐν τοῖς ὀρνισιν ὁ νεοττός καλούμενος. Προσπέφυκε δὲ καὶ ὁ ὀμφαλὸς μικρὸν κατώτερον τοῦ στόματος τῆς γαστρὸς. Ἔστι δὲ νέοις μὲν οὖσιν ὁ ὀμφαλὸς μακρός, αὐξανόμενοις δ' ἐλάττων, καὶ τέλος μικρός, ἕως ἂν εἰσέλθῃ, καθάπερ ἐλέχθη ἐπὶ τῶν ὀρνίθων. Περιέχεται δὲ τὸ ἔμβρυον καὶ τὸ ὦν ὑμένι κοινῷ· ὑπὸ δὲ τοῦτον ἄλλος ἐστὶν ὑμὴν, ὃς περιέχει ἰδίᾳ τὸ ἔμβρυον· μεταξὺ δὲ τῶν ὑμένων ἐνεστιν ὑγρότης. Καὶ ἡ τροφή δ' ὁμοία γίνεται τοῖς ἰχθυοῖς ἐν τῇ κοιλίᾳ ὥσπερ τοῖς τῶν ὀρνίθων νεοττοῖς, ἢ μὲν λευκὴ ἢ δ' ὠχρά.

Τὸ μὲν οὖν σχῆμα τῆς ὑστέρας ὡς ἔχει, ἐκ τῶν ἀνατομῶν θεωρεῖσθω· διαφορὰ δ' ἐστὶν αὐτοῖς πρὸς αὐτούς, οἷον τοῖς γαλεώδεσι καὶ πρὸς αὐτούς καὶ πρὸς τὰ πλατέα. Ἐνίοις μὲν γὰρ ἐν τῷ μέσῳ τῆς ὑστέρας περὶ τὴν ράχιν προσπέφυκε τὰ ῥά, ὥσπερ εἴρηται, οἷον τοῖς σκυλίοις· αὐξανόμενα δὲ περιέρχεται. Οὕσης δὲ

δικρόας τῆς ὑστέρας καὶ προσπεφυκυίας πρὸς τῷ ὑποζώματι, ὥσπερ καὶ τῶν ἄλλων τῶν τοιούτων, περιέρχεται εἰς ἐκάτερον τὸ μέρος. Ἔχει δ' ἡ ὑστέρα καὶ αὕτη καὶ ἡ τῶν ἄλλων τῶν γαλεοειδῶν μικρὸν προελθόντι ἀπὸ τοῦ ὑποζώματος οἶον μαστοὺς λευκοὺς, οἱ κυνημάτων μὴ ἐνόντων οὐκ ἐγγίνονται. Τὰ μὲν σκύλια καὶ αἱ βατίδες ἴσχουσι τὰ ὀστρακῶδη, ἐν οἷς ἐγγίνεται φώδης ὑγρότης· τὸ δὲ σχῆμα τοῦ ὀστράκου ὅμοιον ταῖς τῶν αὐλῶν γλώτταις, καὶ πόροι τριχῶδεις ἐγγίνονται τοῖς ὀστράκοις. Τοῖς μὲν οὖν σκυλίοις, οὓς καλοῦσί τινες νεβρίας γαλεούς, ὅταν περιρραγῇ καὶ ἐκπέσῃ τὸ ὀστρακον, γίνονται οἱ νεοττοί· ταῖς δὲ βατίσιν, ὅταν ἐκτέκωσι, τοῦ ὀστράκου περιρραγέντος ἐξέρχεται ὁ νεοττός. Ὁ δ' ἀκανθίας γαλεὸς πρὸς τῷ ὑποζώματι ἔχει τὰ φά ἄνωθεν τῶν μαστῶν· ὅταν δὲ καταβῇ τὸ φόν, ἐπὶ τούτῳ ἀπολελυμένῳ γίνεται ὁ νεοττός. Τὸν αὐτὸν δὲ τρόπον (565b.) συμβαίνει ἡ γένεσις καὶ ἐπὶ τῶν ἀλωπέκων.

Οἱ δὲ καλούμενοι λεῖοι τῶν γαλεῶν τὰ μὲν φά ἴσχουσι μεταξὺ τῶν ὑστερῶν ὁμοίως τοῖς σκυλίοις, περιόντα δὲ ταῦτα εἰς ἐκατέραν τὴν δικρόαν τῆς ὑστέρας καταβαίνει, καὶ τὰ ζῶα γίνεται τὸν ὀμφαλὸν ἔχοντα πρὸς τῇ ὑστέρᾳ, ὥστε ἀναλίσκομένων τῶν φῶν ὁμοίως δοκεῖν ἔχειν τὸ ἔμβρυον τοῖς τετράποσιν. Προσπέφυκε δὲ μακρὸς ὢν ὁ ὀμφαλὸς τῆς μὲν ὑστέρας πρὸς τῷ κάτω μέρει, ὥσπερ ἐκ κοτυληδόνης ἕκαστος ἡρτημένος, τοῦ δ' ἐμβρύου κατὰ τὸ μέσον, ἧ τὸ ἦπαρ. Ἡ δὲ τροφή ἀνατεμνομένου, κἄν μηκέτ' ἔχη τὸ φόν, φώδης. Χόριον δὲ καὶ ὑμένες ἴδιοι περὶ ἕκαστον γίνονται τῶν ἐμβρύων, καθάπερ ἐπὶ τῶν τετραπόδων. Ἔχει δὲ τὰ ἔμβρυα τὴν κεφαλὴν νέα μὲν ὄντα ἄνω, ἀδρυνόμενα δὲ καὶ τέλεα ὄντα κάτω. Ἐγγίνεται δὲ καὶ ἐν τῇ ἀριστερᾷ ἄρρενα καὶ ἐν τῇ δεξιᾷ θήλεα, καὶ ἐν τῇ αὐτῇ ἅμα θήλεα καὶ ἄρρενα. Καὶ τὰ ἔμβρυα διαιρούμενα, ὁμοίως ὥσπερ ἐπὶ τῶν τετραπόδων, ἔχει τῶν σπλάγχχνων ὅσα ἔχει μεγάλα, οἶον τὸ ἦπαρ, καὶ αἱματώδη. Πάντα δὲ τὰ σελαχῶδη ἅμα ἔχουσιν ἄνω μὲν πρὸς τῷ ὑποζώματι φά, τὰ μὲν μείζω τὰ δ' ἐλάττω, πολλά, κάτω δ' ἔμβρυα ἤδη· διὸ πολλοὶ κατὰ μῆνα τίκτειν καὶ ὀχεύεσθαι οἶονται τοὺς τοιούτους τῶν ἰχθύων, ὅτι οὐχ ἅμα πάντα προΐενται, ἀλλὰ πολλάκις καὶ πολὺν χρόνον. Τὰ δὲ κάτω ἐν τῇ ὑστέρᾳ ἅμα πέττεται καὶ τελεσιουργεῖται.

Οἱ μὲν οὖν ἄλλοι γαλεοὶ καὶ ἐξαφιᾷσι καὶ δέχονται εἰς ἑαυτοὺς τοὺς νεοττούς, καὶ αἱ ῥῖναι καὶ αἱ νάρκαι (ἤδη δ' ὥφθη νάρκη μεγάλη περὶ ὀγδοήκοντα ἔχουσα ἐν ἑαυτῇ ἔμβρυα), ὁ δ' ἀκανθίας

οὐκ εἰσδέχεται μόνος τῶν γαλεῶν διὰ τὴν ἄκανθαν.

Τῶν δὲ πλατέων τρυγῶν καὶ βάτος οὐ δέχονται διὰ τὴν τραχύτητα τῆς κέρκου. Οὐκ εἰσδέχεται δ' οὐδὲ βάτραχος τοὺς νεοττοὺς διὰ τὸ μέγεθος τῆς κεφαλῆς καὶ τὰς ἀκάνθας· οὐδὲ γὰρ ζφωτοκεῖ μόνος τούτων, ὥσπερ εἴρηται πρότερον. Αἱ μὲν (566a.) οὖν πρὸς ἄλληλα διαφοραὶ τοῦτον ἔχουσι τὸν τρόπον αὐτῶν, καὶ ἡ γένεσις ἢ ἐκ τῶν ῥῶν.

ἀποτίκτει γὰρ δις τοῦ μηνός. Ἀρχονται δ' ὀχεύεσθαι μηνὸς
Μαιμακτηριῶνος. Οἱ δ' ἄλλοι γαλεοὶ δις τίκτουσι, πλην τοῦ
σκυλίου· οὗτος δ' ἅπαξ τοῦ ἐνιαυτοῦ. Τίκτουσι δὲ τὰ μὲν τοῦ ἔαρος
αὐτῶν, ρίνη δὲ καὶ τοῦ μετοπώρου πρὸς δύσιν Πλειάδος χειμερινὴν
τὸ ὕστερον, τὸ δὲ πρῶτον τοῦ ἔαρος· εὐθηνεῖ δ' αὐτῆς μάλιστα μὲν ὁ
γόνος ὁ ὕστερος· αἱ δὲ νάρκαι περὶ τὸ φθινόπωρον. Ἐκτίκτει δὲ τὰ
σελάχη πρὸς τὴν γῆν ἐκ τοῦ πελάγους καὶ τῶν βαθέων ἐπανιόντα διά
τε τὴν ἀλέαν καὶ διὰ τὸ φοβεῖσθαι περὶ τῶν τέκνων.

Τῶν μὲν οὖν ἄλλων ἰχθύων παρὰ τὰς συγγενείας οὐδὲν ὥπται
συνδυαζόμενον, ρίνη δὲ δοκεῖ μόνη τοῦτο ποιεῖν καὶ βάτος· ἔστι γάρ
τις ἰχθὺς ὃς καλεῖται ῥινόβατος· ἔχει γὰρ τὴν μὲν κεφαλὴν καὶ τὰ
ἔμπροσθεν βάτου, τὰ δ' ὀπισθεν ρίνης, ὡς γινόμενος ἐξ ἀμφοτέρων
τούτων. Οἱ μὲν οὖν γαλεοὶ καὶ οἱ γαλεοειδεῖς, οἷον ἀλώπηξ καὶ κύων,
καὶ οἱ πλατεῖς ἰχθύες, νάρκη καὶ βάτος καὶ λειόβατος (566b.) καὶ
τρυγὼν, τὸν εἰρημένον τρόπον ζωοτοκοῦσιν ὥοτοκήσαντες.

Κεφάλαιο 12

Δελφίς δὲ καὶ φάλαινα καὶ τὰ ἄλλα κήτη, ὅσα μὴ ἔχει βράγχια ἀλλὰ φυσητήρα, ζωοτοκοῦσιν, ἔτι δὲ πρίστις καὶ βοῦς· οὐδὲν γὰρ τούτων φαίνεται ἔχον ὥα, ἀλλ' εὐθέως κῆμα, ἐξ οὗ διαρθρουμένου γίνεται τὸ ζῶον, καθάπερ ἄνθρωπος καὶ τῶν τετραπόδων τὰ ζωοτόκα. Τίττει δ' ὁ μὲν δελφίς τὰ μὲν πολλὰ ἔν, ἐνίοτε δὲ καὶ δύο· ἡ δὲ φάλαινα ἢ δύο τὰ πλεῖστα καὶ πλεονάκις, ἢ ἔν. Ὅμοίως δὲ τῷ δελφῖνι καὶ ἡ φώκαινα· καὶ γὰρ ἔστιν ὅμοιον δελφῖνι μικρῷ, γίνεται δ' ἐν τῷ Πόντῳ. Διαφέρει δὲ φώκαινα δελφίνος· ἔστι γὰρ τὸ μέγεθος ἔλαττον, εὐρύτερον δ' ἐκ τοῦ νώτου· τὸ χρῶμα ἔχει κυανοῦν. Πολλοὶ δὲ δελφίνων τι γένος εἶναι φασὶ τὴν φώκαιναν. Ἀναπνεῖ δὲ πάντα ὅσα ἔχει φυσητήρα, καὶ δέχεται τὸν ἀέρα· πλεύμονα γὰρ ἔχουσιν. Καὶ ὁ γε δελφίς ὥπται, ὅταν καθεύδῃ, ὑπερέχων τὸ ῥύγχος, καὶ ῥέγγει καθεύδων. Ἔχει δ' ὁ δελφίς καὶ ἡ φώκαινα γάλα, καὶ θηλάζονται· καὶ εἰσδέχονται δὲ τὰ τέκνα μικρὰ ὄντα. Τὴν δ' αὖξισιν τὰ τέκνα τῶν δελφίνων ποιοῦνται ταχεῖαν· ἐν ἔτεσι γὰρ δέκα μέγεθος λαμβάνουσι τέλεον. Κύει δὲ δέκα μῆνας. Τίττει δ' ὁ δελφίς ἐν τῷ θέρει, ἐν ἄλλῃ δ' ὥρα οὐδεμιᾷ· συμβαίνει δὲ καὶ ἀφανίζεσθαι αὐτὸν ὑπὸ κύνα περὶ τριάκονθ' ἡμέρας. Παρακολουθεῖ δὲ τὰ τέκνα πολὺν χρόνον, καὶ ἔστι τὸ ζῶον φιλότεκνον. Ζῇ δ' ἔτη πολλὰ· δηλοὶ γὰρ ἔνιοι γεγόνασι βιοῦντες οἱ μὲν πλείω ἔτη ἢ πέντε καὶ εἴκοσιν, οἱ δὲ τριάκοντα· ἀποκόπτοντες γὰρ ἐνίων τὸ οὐραῖον οἱ ἀλειεῖς ἀφιᾷσιν, ὥστε τούτῳ γνωρίζουσι τοὺς χρόνους αὐτῶν.

Ἡ δὲ φώκη ἐστὶ τῶν ἐπαμφοτερίζοντων ζώων· οὐ δέχεται μὲν γὰρ τὸ ὕδωρ, ἀλλ' ἀναπνεῖ καὶ καθεύδει καὶ τίττει ἐν τῇ γῇ μὲν, πρὸς αἰγιαλοῖς δέ, ὡς οὐσα τῶν πεζῶν, διατρίβει δὲ τοῦ χρόνου τὸν πολὺν καὶ τρέφεται ἐκ τῆς θαλάττης, διὸ μετὰ τῶν ἐνὺδρων περὶ αὐτῆς λεκτέον. Ζωοτοκεῖ μὲν οὖν εὐθὺς ἐν αὐτῇ, καὶ τίττει ζῶα, καὶ χόριον καὶ (567a.) τᾶλλα προῖεται ὥσπερ πρόβατον. Τίττει δ' ἐν ἡ δύο, τὰ δὲ πλεῖστα τρία. Καὶ μαστοὺς δ' ἔχει δύο καὶ θηλάζεται ὑπὸ τῶν τέκνων καθάπερ τὰ τετράποδα. Τίττει δ' ὥσπερ ἄνθρωπος πᾶσαν ὥραν τοῦ ἔτους, μάλιστα δ' ἅμα ταῖς πρώταις αἰξίν. Ἄγει δὲ περὶ δωδεκαταῖα ὄντα τὰ τέκνα εἰς τὴν θάλατταν πολλακίς τῆς ἡμέρας, συνθερίζουσα κατὰ μικρόν· τὰ δὲ κατάντη φέρεται, ἀλλ' οὐ βαδίζει, διὰ τὸ μὴ δύνασθαι ἀπερείδεσθαι τοῖς ποσίν. Συνάγει δὲ καὶ

συστέλλει ἐαυτήν· σαρκῶδες γάρ ἐστι καὶ μαλακόν, καὶ ὅστ᾽ αὐτὴ χονδρῶδη ἔχει. Ἀποκτεῖναι δὲ φώκην χαλεπὸν βιαίως, ἐὰν μὴ τις πατάξῃ παρὰ τὸν κρόταφον· τὸ γὰρ σῶμα σαρκῶδες αὐτῆς ἐστίν. Ἀφίησι δὲ φωνὴν ὁμοίαν βοῖ. Ἔχει δὲ καὶ τὸ αἰδοῖον ἢ θήλεια ὅμοιον προβάτῳ, πάντα δὲ τᾶλλα γυναικί.

Περὶ μὲν οὖν τῶν ἐνύδρων καὶ ζωοτοκούντων ἢ ἐν αὐτοῖς ἢ ἔξω ἢ γένεσις καὶ τὰ περὶ τὸν τόκον τοῦτον ἔχει τὸν τρόπον.

Κεφάλαιο 13

Οἱ δ' ὀτοκοῦντες τῶν ἰχθύων τὴν μὲν ὑστέραν δικρόαν ἔχουσι καὶ κάτω, καθάπερ ἐλέχθη πρότερον (ὀτοκοῦσι δὲ πάντες οἱ τε λεπιδωτοί, οἷον λάβραξ, κεστρεύς, κέφαλος, ἐτελὶς, καὶ οἱ λευκοὶ καλούμενοι πάντες, καὶ οἱ λεῖοι πλὴν ἐγγέλυος), ὧν δ' ἴσχουσι ψαθυρόν. Τοῦτο δὲ φαίνεται διὰ τὸ τὴν ὑστέραν εἶναι πλήρη πᾶσαν ὥν, ὥστ' ἐν γε τοῖς μικροῖς τῶν ἰχθύων δοκεῖν ὡς μόνον εἶναι δύο· διὰ τὴν μικρότητα γὰρ καὶ τὴν λεπτότητα ἄδηλος ἐν αὐτοῖς ἡ ὑστέρα.

Περὶ μὲν οὖν τῆς ὀχείας πάντων τῶν ἰχθύων εἴρηται πρότερον. Εἰσὶ δὲ τῶν ἰχθύων οἱ μὲν πλεῖστοι ἄρρενες καὶ θήλειες, περὶ δ' ἐρυθρίνου καὶ χάννης ἀπορεῖται· πάντες γὰρ ἀλίσκονται κυήματα ἔχοντες. Συνίσταται μὲν οὖν καὶ ὀχευομένων ὡς τοῖς συνδουαζομένοις τῶν ἰχθύων, ἴσχουσι δὲ καὶ ἄνευ ὀχείας.

Δηλοῦσι δ' ἐνίοι τῶν ποταμίων· εὐθὺς γὰρ γεννώμενοι ὥς εἰπεῖν καὶ μικροὶ ὄντες οἱ φοξῖνοι κυήματ' ἔχουσιν.

Ἀπορραίνουσι δὲ τὰ ὡς καί, καθάπερ λέγεται, τὰ μὲν πολλὰ οἱ ἄρρενες ἀνακάπτουσι, τὰ δ' ἀπόλλυται ἐν τῷ ὑγρῷ· ὅσα (567b.) δ' ἂν ἐκτέκωσιν εἰς τοὺς τόπους εἰς οὓς ἐκτίκτουσι, ταῦτα σώζεται· εἰ γὰρ πάντα ἐσώζετο, παμπληθὲς ἂν τὸ γένος ἦν ἐκάστων. Καὶ τούτων δ' οὐ γίνεται τὰ πολλὰ γόνιμα, ἀλλ' ὅσα ἂν ἐπιρράνη ὁ ἄρρην τῷ θορῷ· ὅταν γὰρ ἐκτέκη, παρεπόμενος ὁ ἄρρην ἐπιρραίνει ἐπὶ τὰ ὡς τὸν θορόν, καὶ ὅσα μὲν ἂν ἐπιρρανθῇ, ἐκ πάντων γίνεται ἰχθύδια, ἐκ δὲ τῶν ἄλλων ὅπως ἂν τύχη. Ταῦτό δὲ συμβαίνει τοῦτο καὶ ἐπὶ τῶν μαλακίων· ὁ γὰρ ἄρρην τῶν σηπιδῶν, ὅταν ἐκτέκη ἡ θήλεια, ἐπιρραίνει τὰ ὡς. Ὅπερ εὐλογον καὶ ἐπὶ τῶν ἄλλων συμβαίνειν μαλακίων, ἀλλ' ἐπὶ τῶν σηπιδῶν ὥπται ἐν τῷ παρόντι μόνον.

Ἐκτίκτουσι δὲ πρὸς τῇ γῇ, οἱ μὲν κωβιοὶ πρὸς τοῖς λίθοις, πλὴν πλατὺ καὶ ψαθυρὸν τὸ ἀποτικτόμενόν ἐστιν. Ὅμοίως δὲ καὶ οἱ ἄλλοι· ἀλεεινά τε γὰρ ἐστὶ τὰ περὶ τὴν γῆν, καὶ τροφήν ἔχει μᾶλλον, καὶ πρὸς τὸ μὴ κατεσθίεσθαι ὑπὸ τῶν μεζόνων τὰ κυήματα. Διὸ καὶ ἐν τῷ Πόντῳ περὶ τὸν Θερμῳδόντα ποταμὸν οἱ πλεῖστοι τίκτουσιν· νήνεμος γὰρ ὁ τόπος καὶ ἀλεεινὸς καὶ ἔχων ὕδατα γλυκέα. Τίκτουσι δ' οἱ μὲν ἄλλοι τῶν ὀτοκόων ἰχθύων ἅπαξ τοῦ ἐνιαυτοῦ, πλὴν τῶν μικρῶν φυκίδων· αὐταὶ δὲ δίς. Διαφέρει δ' ὁ ἄρρην φύκης τῆς θηλείας τῷ μελάντερος εἶναι καὶ μείζους ἔχειν τὰς λεπίδας.

Οἱ μὲν οὖν ἄλλοι ἰχθύες γόνῳ τίκτουσι καὶ τὰ ῥὰ ἀφιάσιν· ἦν δὲ καλοῦσί τινες βελόνην, ὅταν ἤδη ὥρα ἦ τοῦ τίκτειν, διαρρήγνυται, καὶ οὕτω τὰ ῥὰ ἐξέρχεται. Ἔχει γάρ τινα ὁ ἰχθύς οὗτος διάφυσιν ὑπὸ τὴν γαστέρα καὶ τὸ ἥτρον, ὥσπερ οἱ τυφλῖναι ὄφεις· ὅταν δ' ἐκτέκη, συμφύεται ταῦτα πάλιν.

Ἡ δὲ γένεσις ἐκ τοῦ ῥοῦ ὁμοίως συμβαίνει ἐπὶ τε τῶν ἔσω φωτοκούντων καὶ ἐπὶ τῶν ἔξω· ἐπ' ἄκρου τε γὰρ γίνεται καὶ ὑμένι περιέχεται, καὶ πρῶτον διάδηλοι οἱ ὀφθαλμοὶ μεγάλοι καὶ σφαιροειδεῖς ὄντες. Ἦι καὶ δῆλον ὅτι οὐχ ὥσπερ τινές φασιν, ὁμοίως γίνονται τοῖς ἐκ τῶν σκωλήκων γινομένοις· τούναντίον γὰρ συμβαίνει ἐπ' ἐκείνων, τὰ κάτω μείζω πρῶτον, οἱ δ' ὀφθαλμοὶ καὶ ἡ κεφαλὴ ὕστερον. Ὅταν δ' (568a.) ἀναλωθῇ τὸ ῥόν, γίνονται γυρινώδεις, καὶ τὸ μὲν πρῶτον οὐδεμίαν τροφήν λαμβάνοντα αὐξάνονται ἐκ τῆς ἀπὸ τοῦ ῥοῦ ἐγγινομένης ὑγρότητος, ὕστερον δὲ τρέφονται ἕως ἂν αὐξηθῶσι τοῖς ποταμίοις ὕδασι.

Τοῦ δὲ Πόντου καθαιρομένου ἐπιφέρεται τι κατὰ τὸν Ἑλλήσποντον ὁ καλοῦσι φῦκος· ἔστι δ' ὠχρὸν τοῦτο. Οἱ δὲ τινές φασι τοῦτο ἄνθος εἶναι τοῦ φύκου, ἀφ' οὗ τὸ φυκίον εἶναι. Ἀρχομένου δὲ γίνεται τοῦ θέρους. Τούτῳ τρέφεται καὶ τὰ ὄστρεα καὶ τὰ ἰχθύδια τὰ ἐν τοῖς τόποις τούτοις. Φασὶ δὲ τινες τῶν θαλαττίων καὶ τὴν πορφύραν ἴσχειν ἀπὸ τούτου τὸ ἄνθος.

Κεφάλαιο 14

Οἱ δὲ λιμναῖοι καὶ οἱ ποτάμιοι τῶν ἰχθύων κῆματα μὲν ἴσχουσι πεντάμηνοι τὴν ἡλικίαν ὄντες ὥς ἐπὶ τὸ πολὺ, τίκτουσι δὲ τοῦ ἐνιαυτοῦ περιόντος ἅπαντες· ὥσπερ δὲ καὶ οἱ θαλάττιοι, καὶ οὗτοι οὐκ ἐξαφιάσιν οὐδέποτε ἅμα πᾶν, οὐθ' αἱ θήλειαι τὸ ῥὸν οὐθ' οἱ ἄρρενες τὸν θορόν, ἀλλ' ἔχουσιν αἰ πλείω ἢ ἐλάττονα αἱ μὲν ῥὰ οἱ δὲ θορόν. Τίκτουσι δ' ἐν τῇ καθηκούσῃ ὥρᾳ κυπρίνος μὲν πεντάκις ἢ ἐξάκις (ποιεῖται δὲ τὸν τόκον μάλιστα ἐπὶ τοῖς ἄστροις), χαλκίς δὲ τίκτει τρίς, οἱ δ' ἄλλοι ἅπαξ ἐν τῷ ἐνιαυτῷ πάντες. Τίκτουσι δ' ἐν ταῖς προλιμνάσι τῶν ποταμῶν καὶ τῶν λιμνῶν πρὸς τὰ καλαμώδη, οἷον οἷ τε φοξῖνοι καὶ αἱ πέρκαι. Οἱ δὲ γλάνεις καὶ αἱ πέρκαι συνεχῆς ἀφιάσι τὸ κῆμα, ὥσπερ οἱ βάτραχοι· οὕτω δὲ συνεχῆς ἐστὶ τὸ κῆμα περιειλιγμένον, ὥστε τό γε τῆς πέρκης διὰ πλατύτητα ἀναπηνίζονται ἐν ταῖς λίμναις οἱ ἀλιεῖς ἐκ τῶν καλάμων. Οἱ μὲν οὖν μείζους τῶν γλανίων ἐν τοῖς βαθέσι ἐκτίκτουσιν, ἔνιοι καὶ κατ' ὀργυῖαν τὸ βάθος, οἱ δ' ἐλάττους αὐτῶν ἐν τοῖς βραχυτέροις, μάλιστα πρὸς ρίζαις ἰτέας ἢ ἄλλου τινὸς δένδρου, καὶ πρὸς τῷ καλάμῳ δὲ καὶ πρὸς τῷ βρύῳ. Συμπλέκονται δὲ πρὸς ἀλλήλους ἐνίστε καὶ πάνυ μέγας πρὸς μικρόν· καὶ προσαγαγόντες τοὺς πόρους πρὸς ἀλλήλους, οὓς καλοῦσιν τινες (568b.) ὀμφαλοῦς, ἢ τὸν γόνον ἀφιάσιν, ὁ μὲν τὸ ῥὸν ὁ δὲ τὸν θορόν ἐξίσιν. Ὅσα δ' ἂν τῷ θορῷ μιχθῇ τῶν ῥῶν, εὐθύς τε λευκότερα φαίνεται καὶ μείζω ἐν ἡμέρᾳ ὥς εἰπεῖν. Ὑστερον δ' ἐν ὀλίγῳ χρόνῳ δῆλόν ἐστι τὰ ὄμματα τοῦ ἰχθύος· τοῦτο γὰρ ἐν πᾶσι τοῖς ἰχθύσιν, ὥσπερ καὶ ἐν τοῖς ἄλλοις ζώοις, ἐπιδηλότατόν ἐστιν εὐθύς καὶ φαίνεται μέγιστον. Ὅσων δ' ἂν ῥῶν ὁ θορός μὴ θίγῃ, καθάπερ καὶ ἐπὶ τῶν θαλαττίων, ἀχρεῖον τὸ ῥὸν τοῦτο καὶ ἄγονόν ἐστιν. Ἀπὸ δὲ τῶν γονίμων ῥῶν αὐξανομένων τῶν ἰχθυδίων ἀποκαθαίρεται οἷον κέλυφος· τοῦτο δ' ἐστὶν ὑμὴν περιέχων τὸ ῥὸν καὶ τὸ ἰχθυδίων.

Ὅταν δὲ μιγῇ τῷ ῥῷ ὁ θορός, σφόδρα γίνεται κολλῶδες τὸ συνεστηκὸς ἐξ αὐτῶν πρὸς ταῖς ρίζαις ἢ ὅπου ἂν ἐκτέκωσιν.

Οὗ δ' ἂν πλεῖστον τέκωσιν, φοφυλακεῖ ὁ ἄρρην, ἡ δὲ θήλεια ἀπέρχεται τεκοῦσα. Ἔστι δὲ βραδυτάτη μὲν ἐκ τῶν ῥῶν ἢ τῶν γλανίων αὐξησις, διὸ προσεδρεύει ὁ ἄρρην καὶ τετταράκοντα καὶ πεντήκοντα ἡμέρας, ὅπως μὴ κατεσθῇται ὁ γόνος ὑπὸ τῶν παρατυχόντων ἰχθυδίων· δευτέρα δὲ βραδυτέτη ἢ τοῦ κυπρίνου

γένεσις, ὅμως δὲ ταχέως καὶ τούτων ὁ σωζόμενος διαφεύγει γόνος. Τῶν δ' ἐλαττόνων ἐνίων καὶ τριταίων ὄντων ἤδη ἰχθύδιά ἐστιν. Λαμβάνει δ' αὖξισιν τὰ ῥά, ὧν ἂν ἐπιψαύσῃ ὁ θορός, καὶ αὐθημερὸν καὶ ὕστερον ἔτι. Τὸ μὲν οὖν τοῦ γλάνιος γίνεται ὅσον ὄροβος, τὰ δὲ τῶν κυπρίνων καὶ τῶν τοιούτων ὅσον κέγχρος.

Ταῦτα μὲν οὖν τοῦτον τὸν τρόπον τίκει καὶ γεννᾷ, χαλκίς δὲ τίκει ἐν τοῖς βαθέσιν ἄθροα καὶ ἀγελαῖα, ὃν δὲ καλοῦσι τίλωνα, πρὸς τοῖς αἰγιαλοῖς ἐν ὑψηλέμοις· ἀγελαῖος δὲ καὶ οὔτος. Κυπρίνος δὲ καὶ βάλερος καὶ οἱ ἄλλοι πάντες ὥς εἰπεῖν ὠθοῦνται μὲν εἰς τὰ βραχέα πρὸς τὸν τόκον, μιᾷ δὲ θηλείᾳ πολλάκις ἀκολουθοῦσιν ἄρρενες καὶ τρισκαίδεκα καὶ τεσσαρεσκαίδεκα· τῆς θηλείας δ' ἀφείσης τὸ ῥὸν καὶ ὑποχωρούσης ἐπακολουθοῦντες ἐπιρραίνουσι τὸν θορόν. Ἀπόλλυται δὲ τὰ πλεῖστ' αὐτῶν· (569a.) διὰ τε γὰρ τὸ ὑποχωροῦσαν τίκειν τὴν θήλειαν σκεδάννυται τὸ ῥόν, ὃ τι ἂν ὑπὸ ῥεύματος ληφθῇ καὶ μὴ προσπέσῃ πρὸς ὕλην· καὶ γὰρ οὐδ' ὠφυλακεῖ τῶν ἄλλων ἔξω γλάνιος οὐδεὶς, πλὴν ἂν ἀθρόω γόνω ἑαυτοῦ περιτύχῃ ὁ κυπρίνος· τοῦτον δὲ φασιν ὠφυλακεῖν. Θορόν δὲ πάντες ἔχουσιν οἱ ἄρρενες πλὴν ἐγγέλους· αὕτη δ' οὐδέτερον οὔτ' ῥόν οὔτε θορόν. Οἱ μὲν οὖν κεστρεῖς ἐκ τῆς θαλάττης ἀναβαίνουσιν εἰς τὰς λίμνας καὶ τοὺς ποταμούς, αἱ δ' ἐγγέλους τοῦναντίον ἐκ τούτων εἰς τὴν θάλατταν.

Κεφάλαιο 15

Οἱ μὲν οὖν πλεῖστοι, ὥσπερ εἴρηται, τῶν ἰχθύων γίνονται ἐξ ὧδων. Οὐ μὴν ἀλλ' ἐνιοὶ καὶ ἐκ τῆς ἰλύος καὶ ἐκ τῆς ἄμμου γίνονται, καὶ τῶν τοιούτων γενῶν ἃ γίνεται ἐκ συνδυασμοῦ καὶ ὧδων, ἐν τέλμασιν ἄλλοις τε, καὶ οἷον περὶ Κνίδον φασὶν εἶναι ποτε, ὃ ἐξηραίνετο μὲν ὑπὸ κύνα καὶ ἡ ἰλὺς ἅπασα ἐξηρεῖτο, ὕδωρ δ' ἤρχετο ἐγγίνεσθαι ἅμα τοῖς ὄμβροις γινομένοις. Ἐν τούτῳ ἰχθύδια ἐνεγίνετο ἀρχομένου τοῦ ὕδατος. Ἦν δὲ κεστρέων τι γένος τοῦτο, ὃ οὐδὲ γίνεται ἐξ ὀχείας, μέγεθος ἡλικία μαινίδια μικρά· ὧδὸν δὲ τούτων εἶχεν οὐδὲν οὐδὲ θορόν. Γίνεται δὲ καὶ ἐν ποταμοῖς ἐν τῇ Ἀσίᾳ, οὐ διαρρέουσιν εἰς τὴν θάλατταν, ἰχθύδια μικρά, ἡλίκοι ἐψητοί, ἕτερα τὸν αὐτὸν τρόπον τούτοις. Ἐνιοὶ δὲ καὶ ὅλως φασὶ τοὺς κεστρεῖς φύεσθαι πάντας, οὐκ ὀρθῶς λέγοντες· ἔχουσαι γὰρ φαίνονται καὶ ὡὰ αἱ θήλειαι αὐτῶν καὶ θορόν οἱ ἄρρενες.

Ἀλλὰ γένος τί ἐστὶν αὐτῶν τοιοῦτον, ὃ φύεται ἐκ τῆς ἰλύος καὶ τῆς ἄμμου. Ὅτι μὲν οὖν γίνεται αὐτόματα ἐνια οὗτ' ἐξ ὧδων οὗτ' ἐξ ὀχείας, φανερόν ἐκ τούτων. Ὅσα δὲ μήτ' ὠτοκεῖ μήτε ζωτοκεῖ, πάντα γίνεται τὰ μὲν ἐκ τῆς ἰλύος τὰ δ' ἐκ τῆς ἄμμου καὶ τῆς ἐπιπολαζούσης σήψεως, οἷον καὶ τῆς ἀφύης ὁ καλούμενος ἀφρός γίνεται ἐκ τῆς ἀμμόδους γῆς· καὶ ἔστιν αὕτη ἡ ἀφύη ἀναυξῆς καὶ ἄγονος, καὶ ὅταν (569b.) πλείων γένηται χρόνος, ἀπόλλυται, ἄλλη δὲ πάλιν ἐπιγίνεται, διὸ ἔξω χρόνου τινὸς ὀλίγου πᾶσαν ὥς εἰπεῖν τὴν ἄλλην γίνεται ὥραν· διαμένει γὰρ ἀρξάμενος ἀπὸ ἀρκτούρου μετοπωρινοῦ μέχρι τοῦ ἔαρος. Σημεῖον δ' ὅτι ἐνίῳτ' ἐκ τῆς γῆς ἀνέρχεται· ἀλιευομένων γάρ, ἐὰν μὲν ἦ ψυχρός, οὐχ ἀλίσκεται, ἐὰν δ' ἦ εὐδία, ἀλίσκεται, ὥς ἐκ τῆς γῆς ἀνιούσα πρὸς τὴν ἀλέαν. Καὶ ἐλκόντων καὶ ἀναξυομένης τῆς γῆς πλεονάκις πλείων γίνεται καὶ βελτίων. Αἱ δ' ἄλλαι ἀφύαι χεῖρους διὰ τὸ ταχὺ λαμβάνειν αὐξῆσιν.

Γίνονται δ' ἐν τοῖς ἐπισκίοις καὶ ἐλώδεσι τόποις, ὅταν εὐημερίας γενομένης ἀναθερμαίνηται ἡ γῆ, οἷον περὶ Ἀθήνας ἐν Σαλαμῖνι καὶ πρὸς τῷ Θεμιστοκλείῳ καὶ ἐν Μαραθῶνι· ἐν γὰρ τούτοις τοῖς τόποις γίνεται ὁ ἀφρός. Φαίνεται δ' ἐν μὲν τόποις τοιούτοις καὶ εὐημερίαις τοιαύταις, γίνεται δ' ἐνιαχοῦ καὶ ὁπότεν ὕδωρ πολὺ ἐξ οὐρανοῦ γένηται, ἐν τῷ ἀφρῷ τῷ γινομένῳ ὑπὸ τοῦ ὀμβρίου ὕδατος, διὸ καὶ καλεῖται ἀφρός· καὶ ἐπιφέρεται ἐνίῳτε ἐπιπολῆς τῆς θαλάττης, ὅταν

εὐημερία ἦ, ἐν ᾧ συστρέφεται, οἷον ἐν τῇ κόπρῳ τὰ σκωλήκια, οὕτως ἐν τούτῳ ὁ ἀφρός, ὅπου ἂν συστῇ ἐπιπολῆς· διὸ πολλαχοῦ προσφέρεται ἐκ τοῦ πελάγους ἡ ἀφύη αὕτη. Καὶ εὐθηνεῖ δὲ καὶ ἀλίσκεται πλείστη, ὁπόταν ἔνυγρον καὶ εὐδιδεινὸν γένηται τὸ ἔτος.

Ἡ δ' ἄλλη ἀφύη γόνος ἰχθύων ἐστίν, ἡ μὲν καλουμένη κωβίτις κωβιῶν τῶν μικρῶν καὶ φαύλων, οἱ καταδύνουσιν εἰς τὴν γῆν· ἐκ δὲ τῆς φαληρικῆς γίνονται μεμβράδες, ἐκ δὲ τούτων τριχίδες, ἐκ δὲ τῶν τριχίδων τριχίαι, ἐκ δὲ μιᾶς ἀφύης, οἷον τῆς ἐν τῷ Ἀθηναίων λιμένι, οἱ ἐγκρασίχολοι καλούμενοι. Ἔστι δὲ καὶ ἄλλη ἀφύη, ἡ γόνος ἐστὶ μαινίδων καὶ κεστρέων.

Ὁ δ' ἀφρὸς ὁ ἄγονος ὑγρὸς ἐστι καὶ διαμένει ὀλίγον χρόνον, καθάπερ εἴρηται πρότερον· τέλος γὰρ λείπεται κεφαλὴ καὶ ὀφθαλμοί. Πλὴν (570a.) νῦν εὔρηται τοῖς ἀλιεῦσι πρὸς τὸ διακομίζειν· ἀλιζομένη γὰρ πλείω μένει χρόνον.

Κεφάλαιο 16

Αἱ δ' ἐγγέλως οὐτ' ὀχείας γίνονται οὐτ' ὥτοκοῦσιν, οὐδ' ἐλήφθη πώποτε οὔτε θορόν ἔχουσα οὐδεμία οὐτ' ὦά, οὐτ' ἀνασχισθεῖσαι ἐντὸς θορικοὺς πόρους οὔθ' ὑστερικοὺς ἔχουσιν· ἀλλὰ τοῦτο ὅλον τὸ γένος τῶν ἐναίμων οὐ γίνεται οὐτ' ἐξ ὀχείας οὐτ' ἐξ ὦων. Φανερόν δ' ἐστὶν ὅτι οὕτως ἔχει· ἐν ἐνίαις γὰρ τελματώδεσι λίμναις τοῦ θ' ὕδατος παντὸς ἐξαντληθέντος καὶ τοῦ πληοῦ ξυσθέντος γίνονται πάλιν, ὅταν ὕδωρ γένηται ὄμβριον· ἐν δὲ τοῖς αὐχμοῖς οὐ γίνονται, οὐδ' ἐν ταῖς διαμενούσαις λίμναις· καὶ γὰρ ζῶσι καὶ τρέφονται ὀμβρίῳ ὕδατι. Ὅτι μὲν οὖν οὐτ' ἐξ ὀχείας οὐτ' ἐξ ὦων γίνονται, φανερόν ἐστιν.

Δοκοῦσι δὲ τισι γεννᾶν, ὅτι ἐν ἐνίαις τῶν ἐγγέλων ἐλμίνθια ἐγγίνεται· ἐκ τούτων γὰρ οἶονται γίνεσθαι ἐγγέλως. Τοῦτο δ' ἐστὶν οὐκ ἀληθές, ἀλλὰ γίνονται ἐκ τῶν καλουμένων γῆς ἐντέρων, ἃ αὐτόματα συνίσταται ἐν τῷ πληῷ καὶ ἐν τῇ γῇ τῇ ἐνίκμῳ. Καὶ ἤδη εἰσὶν ὠμμένοι αἱ μὲν ἐκλυόμεναι ἐκ τούτων, αἱ δ' ἐν διακνιζομένοις καὶ διαιρουμένοις γίνονται φανεραί. Καὶ ἐν τῇ θαλάττῃ δὲ καὶ ἐν τοῖς ποταμοῖς γίνεται τὰ τοιαῦτα, ὅταν ἢ μάλιστα σῆψις, τῆς μὲν θαλάττης πρὸς τοῖς τοιούτοις τόποις οὗ ἂν ἢ φύκος, τῶν δὲ ποταμῶν καὶ λιμνῶν περὶ τὰ χεῖλη· ἐνταῦθα γὰρ ἡ ἀλέα ἰσχύουσα σήπει. Περὶ μὲν οὖν τῆς τῶν ἐγγέλων γενέσεως τοῦτον ἔχει τὸν τρόπον.

Κεφάλαιο 17

Τοὺς δὲ τόκους οὔτε πάντες οἱ ἰχθύες ποιοῦνται τὴν αὐτὴν ὥραν οὔθ' ὁμοίως, οὔτε κύουσι τὸν ἴσον χρόνον. Πρὸ μὲν οὖν τῆς ὀχείας ἀγέλαι γίνονται ἀρρένων καὶ θηλειῶν· ὅταν δὲ περὶ τὴν ὀχείαν καὶ τοὺς τόκους ᾧσι, συνδυάζονται. Κύουσι δὲ τούτων ἔνιοι μὲν οὐ πλείους τριάκονθ' ἡμερῶν, οἱ δ' ἐλάττω χρόνον, πάντες δ' ἐν χρόνοις διαιρουμένοις εἰς τὸν τῶν ἐβδομάδων ἀριθμόν. Κύουσι δὲ πλεῖστον χρόνον οὓς καλοῦσί τινες μαρίνους. Σαργὸς δὲ κυῖσκεται μὲν περὶ τὸν (570b.) Ποσειδεῶνα μῆνα, κύει δ' ἡμέρας τριάκοντα· καὶ ὃν καλοῦσί τινες χελῶνα τῶν κεστρέων, καὶ ὁ μύζων τὴν αὐτὴν ὥραν καὶ ἴσον χρόνον κύουσι τῷ σαργῷ.

Πονοῦσι δὲ τῇ κήσει πάντες, διὸ μάλιστα τὴν ὥραν ταύτην ἐκπίπτουσιν· φέρονται γὰρ οἰστρῶντες πρὸς τὴν γῆν. Καὶ ὅλως ἐν κινήσει περὶ τὸν χρόνον τοῦτον διατελοῦσιν ὄντες, ἕως ἂν ἐκτέκωσιν· καὶ μάλιστα ὁ κεστρεὺς τοῦτο ποιεῖ τῶν ἰχθύων· ὅταν δ' ἐκτέκωσιν, ἡσυχάζουσιν. Πολλοῖς δὲ τῶν ἰχθύων πέρας ἐστὶ τοῦ τίκτειν, ὅταν ἐγγένηται σκολήκια ἐν τῇ γαστρὶ· ἐγγίνεται γὰρ μικρὰ καὶ ἔμψυχα, ἃ ἐξελαύνει τὰ κήματα.

Οἱ δὲ τόκοι γίνονται τοῖς μὲν ρύασι τοῦ ἥαρος, καὶ τοῖς πλείστοις δὲ περὶ τὴν ἑαρινὴν ἰσημερίαν· τοῖς δ' ἄλλοις οὐχ ἡ αὐτὴ ὥρα τοῦ ἔτους, ἀλλὰ τοῖς μὲν τοῦ θέρους, τοῖς δὲ περὶ τὴν φθινοπωρινὴν ἰσημερίαν. Τίκει δὲ πρῶτον τῶν τοιούτων ἀθερίνη (τίκει δὲ πρὸς τῇ γῇ), κέφαλος δ' ὕστατος· δῆλον δ' ἐκ τοῦ πρῶτον ταύτης φαίνεσθαι τὸν γόνον, τοῦ δ' ὕστατον. Τίκει δὲ καὶ κεστρεὺς ἐν τοῖς πρώτοις, καὶ σάλπη τοῦ θέρους ἀρχομένου ἐν τοῖς πλείστοις, ἐνιαχοῦ δὲ μετοπώρου.

Τίκει δὲ καὶ ὁ αὐλωπίας, ὃν καλοῦσί τινες ἀνθίαν, τοῦ θέρους. Μετὰ δὲ τούτους χρύσοφρυς καὶ λάβραξ καὶ μόρμυρος καὶ ὅλως οἱ καλούμενοι δρομάδες. Ὑστατοὶ δὲ τῶν ἀγελαίων τρίγλη καὶ κορακίνος· τίκτουσι δ' οὗτοι περὶ τὸ μετόπωρον.

Τίκει δ' ἡ τρίγλη ἐπὶ τῷ πηλῷ, διὸ ὅψε τίκει· πολὺν γὰρ χρόνον ὁ πηλὸς ψυχρὸς ἐστίν. Ὁ δὲ κορακίνος ὕστερον τῆς τρίγλης ἐπὶ τῶν φυκίων ἐκπορευόμενος, διὰ τὸ βιοτεῦειν ἐν τοῖς πετραίοις χωρίοις· κύει δὲ πολὺν χρόνον. Αἱ δὲ μαινίδες τίκτουσι μετὰ τροπὰς χειμερινὰς. Τῶν δ' ἄλλων ὅσοι πελάγιοι, οἱ πολλοὶ θέρους τίκτουσιν·

σημεῖον δ' ὅτι οὐχ ἀλίσκονται τὸν χρόνον τοῦτον.

Πολυγωνώτατον δ' ἐστὶ τῶν ἰχθύων μαινίς, τῶν δὲ σελαχῶν βάτραχος· ἀλλὰ σπάνιοί εἰσι διὰ τὸ ἀπόλλυσθαι ῥαδίως· τίκτει γὰρ ἄθροα καὶ πρὸς τῇ γῇ. Ὅλως δ' ὀλιγογονώτερα μὲν ἐστὶ τὰ σελάχη (571a.) διὰ τὸ ζωοτοκεῖν, σώζεται δὲ μάλιστα ταῦτα διὰ τὸ μέγεθος. Ὀψίγονον δ' ἐστὶ καὶ ἡ καλουμένη βελόνη, καὶ αἱ πολλαὶ αὐτῶν πρὸ τοῦ τίκτειν διαρρήγνυνται ὑπὸ τῶν ῥῶν· ἴσχει δ' οὐχ οὕτω πολλὰ ὡς μεγάλα. Καὶ ὥσπερ τὰ φαλάγγια δέ, περικέχυνται καὶ περὶ τὴν βελόνην· ἐκτίκτει γὰρ πρὸς αὐτῇ, κἂν τις θίγῃ, φεύγουσιν. Ἡ δ' ἀθερίνη τίκτει τρίβουσα τὴν κοιλίαν πρὸς τὴν ἄμμον.

Διαρρήγνυνται δὲ καὶ οἱ θύννοι ὑπὸ τῆς πιμελῆς, ζῶσι δ' ἔτη δύο. Σημεῖον δὲ τούτου ποιοῦνται οἱ ἀλιεῖς· ἐκλιπουσῶν γάρ ποτε τῶν θυννίδων ἐνιαυτόν, τῷ ἐχομένῳ ἔτει καὶ θύννοι ἐξέλιπον. Δοκοῦσι δ' ἐνιαυτῷ εἶναι πρεσβύτεροι τῶν πηλαμύδων.

Ὁχεύφθίνοντα, τίκτουσι δὲ περὶ τὸν Ἑκατομβαιῶνα ἀρχόμενον· τίκτουσι δ' οἷον ἐν θυλάκῳ τὰ ῥά. Ἡ δ' αὔξησις ἐστὶ τῶν θυννίδων ταχεῖα· ὅταν γὰρ τέκωσιν οἱ ἰχθύες ἐν τῷ Πόντῳ, γίνονται ἐκ τοῦ ῥου ἅς καλοῦσιν οἱ μὲν σκορδύλας, οἱ δὲ Βυζάντιοι αὐξίδας διὰ τὸ ἐν ὀλίγαις αὐξάνεσθαι ἡμέραις, καὶ ἐξέρχονται μὲν τοῦ φθινοπώρου ἅμα ταῖς θυννίσιν, εἰσπλέουσι δὲ τοῦ ἔαρος ἤδη οὔσαι πηλαμύδες. Σχεδὸν δὲ καὶ οἱ ἄλλοι πάντες ἰχθύες ταχεῖαν λαμβάνουσι τὴν αὔξησιν, πάντες δ' ἐν τῷ Πόντῳ θᾶπτον· παρ' ἡμέραν γὰρ καὶ αἱ ἁμῖαι πολὺ ἐπιδήλως αὐξάνονται. Ὅλως δὲ δεῖ νομίζειν τοῖς αὐτοῖς ἰχθύσι μὴ ἐν τοῖς αὐτοῖς τόποις μήτε τῆς ὀχείας καὶ τῆς κύησης εἶναι τὴν αὐτὴν ὥραν μήτε τοῦ τόκου καὶ τῆς εὐημερίας, ἐπεὶ καὶ οἱ καλούμενοι κορακῖνοι ἐνιαχοῦ τίκτουσι περὶ τὸν πυραμητόν· ἀλλὰ τοῦ ὡς ἐπὶ τὸ πολὺ γινομένου ἐστόχασται τὰ εἰρημένα.

Ἰσχοῦσι δὲ καὶ οἱ γόγγροι κύηματα· ἀλλ' οὐκ ἐν πᾶσι τοῖς τόποις ὁμοίως τοῦτο ἐπίδηλον, οὐδὲ τὸ κύημα σφόδρα φανερόν διὰ τὴν πιμελήν· ἴσχει γὰρ μακρόν, ὥσπερ καὶ οἱ ὄφεις. Ἀλλ' ἐπὶ τὸ πῦρ τιθέμενον διάδηλον ποιεῖ· ἡ μὲν γὰρ πιμελὴ θυμιᾶται καὶ τήκεται, τὰ δὲ πηδᾶ καὶ ψοφεῖ ἐκθλιβόμενα.

Ἐτι δ' ἂν τις ψηλαφᾷ καὶ τρίβῃ τοῖς δακτύλοις, τὸ μὲν στέαρ λεῖον φαίνεται, τὸ δ' ῥὸν τραχύ. Ἐνιοὶ μὲν οὖν (571b.) γόγγροι στέαρ μὲν ἔχουσιν ῥὸν δ' οὐδέν, οἱ δὲ τούναντίον στέαρ μὲν οὐδέν, ῥὸν δὲ τοιοῦτον οἷον εἴρηται νῦν.

Κεφάλαιο 18

Περὶ μὲν οὖν τῶν ἄλλων ζώων καὶ πτηνῶν καὶ πλωτῶν, καὶ περὶ τῶν πεζῶν ὅσα ὥτοκεῖ, σχεδὸν εἴρηται περὶ πάντων, περὶ τ' ὀχείας καὶ κυήσεως καὶ τῶν ἄλλων τῶν ὁμοιοτρόπων τούτοις· περὶ δὲ τῶν πεζῶν ὅσα ζωτοκεῖ καὶ περὶ ἀνθρώπου λεκτέον τὰ συμβαίνοντα τὸν αὐτὸν τρόπον.

Περὶ μὲν οὖν ὀχείας εἴρηται καὶ ἰδία καὶ κοινῇ κατὰ πάντων. Πάντων δὲ κοινὸν τῶν ζώων τὸ περὶ τὴν ἐπιθυμίαν καὶ τὴν ἡδονὴν ἐπτοῆσθαι τὴν ἀπὸ τῆς ὀχείας μάλιστα. Τὰ μὲν οὖν θήλεα χαλεπώτατα, ὅταν ἐκτέκωσι πρῶτον, οἱ δ' ἄρρενες περὶ τὴν ὀχείαν. Οἱ τε γὰρ ἵπποι δάκνουσι τοὺς ἵππους καὶ καταβάλλουσι καὶ διώκουσι τοὺς ἱππέας, καὶ οἱ ὕες οἱ ἄγριοι χαλεπώτατοι, καίπερ ἀσθενέστατοι περὶ τὸν καιρὸν τοῦτον ὄντες, διὰ τὴν ὀχείαν, καὶ πρὸς ἀλλήλους δὲ ποιοῦνται μάχας θαυμαστάς, θωρακίζοντες ἑαυτοὺς καὶ ποιοῦντες τὸ δέρμα ὡς παχύτατον ἐκ παρασκευῆς, πρὸς τὰ δένδρα τρίβοντες καὶ τῷ πηλῷ μολύνοντες πολλάκις καὶ ξηραίνοντες ἑαυτούς· μάχονται δὲ πρὸς ἀλλήλους, ἐξελαύνοντες ἐκ τῶν συοφορβίων, οὕτω σφοδρῶς ὥστε πολλάκις ἀμφοτέρω ἀποθνήσκουσιν. Ὡσαύτως δὲ καὶ οἱ ταῦροι καὶ οἱ κριοὶ καὶ οἱ τράγοι· πρότερον γὰρ ὄντες σύννομοι ἕκαστοι περὶ τοὺς καιροὺς τῆς ὀχείας μάχονται διστάμενοι πρὸς ἀλλήλους. Χαλεπὸς δὲ καὶ ὁ κάμηλος περὶ τὴν ὀχείαν ὁ ἄρρην, ἐάν τ' ἄνθρωπος ἐάν τε κάμηλος πλησιάζῃ· ἵππῳ μὲν γὰρ ὅλως αἰεὶ πολεμεῖ.

Τὸν αὐτὸν δὲ τρόπον καὶ ἐπὶ τῶν ἀγρίων· καὶ γὰρ ἄρκτοι καὶ λύκοι καὶ λέοντες χαλεποὶ τοῖς πλησιάζουσιν γίνονται περὶ τὸν καιρὸν τοῦτον, πρὸς ἀλλήλους δ' ἦττον μάχονται διὰ τὸ μὴ ἀγελαῖον εἶναι μηδὲν τῶν τοιούτων ζώων. Χαλεπαὶ δὲ καὶ αἱ θήλειαι ἄρκτοι ἀπὸ τῶν σκύμνων, ὥσπερ καὶ αἱ κύνες ἀπὸ τῶν σκυλακίων.

Ἐξαγριαίνονται δὲ καὶ οἱ ἐλέφαντες περὶ τὴν ὀχείαν, διόπερ φασὶν οὐκ εἶναι αὐτοὺς ὀχεύειν τὰς θηλείας τοὺς τρέφοντας ἐν τοῖς Ἰνδοῖς· ἐμμανεῖς γὰρ γινομένους ἐν τοῖς χρόνοις τούτοις (572a.) ἀνατρέπουν τὰς οἰκίσεις αὐτῶν ἅτε φαύλως ὥκοδομημένας, καὶ ἄλλα πολλὰ ἐργάζεσθαι. Φασὶ δὲ καὶ τὴν τῆς τροφῆς δαψίλειαν πραοτέρους αὐτοὺς παρέχειν· καὶ προσάγοντες δ' αὐτοῖς ἐτέρους κολάζουσι καὶ δουλοῦνται προστάττοντες τύπτειν τοῖς προσαγομένοις.

Τὰ δὲ πολλάκις ποιούμενα τὰς ὀχείας καὶ μὴ κατὰ μίαν ὥραν, οἷον τὰ συνανθρωπεύόμενα, ὕες τε καὶ κύνες, ἤττον τοιαῦτα φαίνεται διὰ τὴν ἀφθονίαν τῆς ὁμιλίας.

Τῶν δὲ θηλειῶν ὀρμητικῶς ἔχουσι πρὸς τὸν συνδυασμὸν μάλιστα μὲν ἵππος, ἔπειτα βοῦς. Αἱ μὲν οὖν ἵπποι αἱ θήλειαι ἵππομανοῦσιν· ὅθεν καὶ ἐπὶ τὴν βλασφημίαν τὸ ὄνομα αὐτῶν ἐπιφέρουσιν ἀπὸ μόνου τῶν ζώων τούτου τὴν ἐπὶ τῶν ἀκολάστων περὶ τὸ ἀφροδισιάζεσθαι. Λέγονται δὲ καὶ ἐξανεμοῦσθαι περὶ τὸν καιρὸν τοῦτον· διὸ ἐν Κρήτῃ οὐκ ἐξαιροῦσι τὰ ὀχεῖα ἐκ τῶν θηλειῶν. Ὅταν δὲ τοῦτο πάθωσι, θέουσιν ἐκ τῶν ἄλλων ἵππων. Ἔστι δὲ τὸ πάθος ὅπερ ἐπὶ τῶν ὑῶν λέγεται τὸ καπρίζειν. Θέουσι δὲ οὔτε πρὸς ἑὼ οὔτε πρὸς δυσμάς, ἀλλὰ πρὸς ἄρκτον ἢ νότον. Ὅταν δ' ἐμπέσῃ τὸ πάθος, οὐδένα ἐῷσι πλησιάζειν, ἕως ἄν ἡ ἀπείπωσι διὰ τὸν πόνον ἢ πρὸς θάλατταν ἔλθωσιν· τότε δ' ἐκβάλλουσί τι. Καλοῦσι δὲ καὶ τοῦτο, ὥσπερ ἐπὶ τοῦ τικτομένου, ἵππομανές· ἔστι δ' οἷον ἡ καπρία, καὶ ζητοῦσι τοῦτο μάλιστα πάντων αἱ περὶ τὰς φαρμακείας.

Περὶ δὲ τὴν ὥραν τῆς ὀχείας συγκύπτουσί τε πρὸς ἀλλήλας μᾶλλον ἢ πρότερον, καὶ τὴν κέρκον κινοῦσι πυκνά, καὶ τὴν φωνὴν ἀφιᾶσιν ἀλλοιοτέραν ἢ κατὰ τὸν ἄλλον χρόνον· ρεῖ δ' αὐταῖς ἐκ τοῦ αἰδοίου ὅμοιον γονῇ, λεπτότερον δὲ πολὺ ἢ τὸ τοῦ ἄρρενος· καὶ καλοῦσί τινες τοῦτο ἵππομανές, ἀλλ' οὐ τὸ ἐπὶ τοῖς πώλοις ἐπιφυόμενον· ἐργῶδες δ' εἶναι φασὶ λαβεῖν· κατὰ μικρὸν γὰρ ρεῖν. Καὶ οὐροῦσι δὲ πολλάκις, ὅταν σκυζῶσι, καὶ πρὸς αὐτὰς παίζουσιν.

Τὰ μὲν οὖν περὶ τοὺς ἵππους τοῦτον ἔχει τὸν τρόπον, αἱ δὲ βόες ταυρῶσιν· οὕτω δὲ σφόδρα κατακώχμῃ τῇ πάθει γίνονται, ὥστε μὴ δύνασθαι αὐτῶν κρατεῖν μηδὲ λαμβάνεσθαι τοὺς βουκόλους. (572b.) Δῆλαι δ' εἰσὶ καὶ αἱ ἵπποι καὶ αἱ βόες, ὅταν ὀργῶσι πρὸς τὴν ὀχείαν, καὶ τῇ ἐπάρσει τῶν αἰδοίων, καὶ τῇ πυκνὰ οὐρεῖν αἱ βόες ὥσπερ αἱ ἵπποι. Ἔτι δ' αἱ γε βόες ἐπὶ τοὺς ταύρους ἀναβαίνουσι, καὶ παρακολουθοῦσιν αἰεὶ, καὶ παρεστᾶσιν. Πρότερα δὲ τὰ νεώτερα ὀργᾷ πρὸς τὴν ὀχείαν καὶ ἐν τοῖς ἵπποις καὶ ἐν τοῖς βουσίν· καὶ ὅταν εὐημερίαι γίνωνται καὶ τὰ σώματα εὖ ἔχωσι, μᾶλλον ὀργῶσιν.

Αἱ μὲν οὖν ἵπποι ὅταν ἀποκείρωνται, ἀποπαύονται τῆς ὀρμῆς μᾶλλον καὶ γίνονται κατηφέστεραι. Οἱ δ' ἄρρενες ἵπποι διαγινώσκουσι τὰς θηλείας τὰς συννόμους ταῖς ὁσμαῖς, κἂν ὀλίγας ἡμέρας ἅμα γένωνται πρὸ τῆς ὀχείας· κἂν ἀναμιχθῶσιν ἀλλήλοις, ἐξελαύνουσι δάκνοντες, καὶ νέμονται χωρὶς, ἕκαστοι τὰς ἑαυτῶν

ἔχοντες. Διδόασι δ' ἐκάστω περὶ τριάκοντα ἢ μικρῷ πλείους. Ὅταν δὲ προσίῃ τις ἄρρην, συστρέψας εἰς ταὐτὸ καὶ περιδραμῶν κύκλῳ, προσελθὼν μάχεται· κἄν τις κινῆται, δάκνει καὶ κωλύει.

Ὁ δὲ ταῦρος, ὅταν ὥρα τῆς ὀχείας ᾗ, τότε γίνεται σύννομος καὶ μάχεται τοῖς ἄλλοις, τὸν δὲ πρότερον χρόνον μετ' ἀλλήλων εἰσίν, ὃ καλεῖται ἀτιμαγελεῖν· πολλάκις γὰρ οἱ γ' ἐν τῇ Ἠπειρῷ οὐ φαίνονται τριῶν μηνῶν. Ὅλως δὲ τὰ ἄρρενα πάντα ἢ τὰ πλείστα οὐ συννέμονται τοῖς θήλεσι πρὸ τῆς ὥρας τοῦ ὀχεύειν, ἀλλ' ἐκκρίνονται, ὅταν εἰς ἡλικίαν ἔλθωσι, καὶ χωρὶς βόσκονται τὰ ἄρρενα τῶν θηλειῶν.

Καὶ αἱ ὕες δ' ὅταν ἔχωσι πρὸς τὴν ὀχείαν ὀρμητικῶς, ὃ καλεῖται καπρᾶν, ὠθοῦνται καὶ πρὸς τοὺς ἀνθρώπους. Περὶ δὲ τὰς κύνας τὸ τοιοῦτον πάθος καλεῖται σκυζᾶν.

Ἐπαρσις μὲν οὖν τοῖς θήλεσιν γίνεται τῶν αἰδοίων, ὅταν πρὸς τὴν ὀχείαν ὀργῶσι, καὶ ὑγρασία περὶ τὸν τόπον· αἱ δ' ἵπποι καὶ ἀπορραίνουσι λευκὴν ὑγρότητα περὶ τὸν καιρὸν τοῦτον. Καθάρσεις δὲ γίνονται μὲν καταμηνίων, οὐ μὴν ὅσαι γε ταῖς γυναῖξιν οὐθενὶ τῶν ἄλλων ζῴων. Τοῖς μὲν οὖν προβάτοις καὶ αἰξίν, ἐπειδὴν ὥρα ἢ ὀχεύεσθαι, ἐπισημαίνει πρὸ τοῦ ὀχεύεσθαι· καὶ ἐπειδὴν ὀχευθῶσι, γίνεται τὰ σημεῖα, εἴτα διαλείπει, μέχρι οὗ ἂν (573a.) μέλλωσι τίκτειν. Τότε δ' ἐπισημαίνει, καὶ οὕτω γινώσκουσιν ὅτι ἐπίτοκοι οἱ ποιμένες. Ἐπειδὴν δὲ τέκη, κάθαρσις γίνεται πολλή, τὸ μὲν πρῶτον οὐ σφόδρα αἱματώδης, ὕστερον μέντοι σφόδρα. Βοῖ δὲ καὶ ὄνῳ καὶ ἵπῳ πλείῳ μὲν τούτων διὰ τὸ μέγεθος, ἐλάττω δὲ κατὰ λόγον πολλῷ. Ἡ μὲν οὖν βοῦς ὅταν ὀργᾷ πρὸς τὴν ὀχείαν ἢ θήλεια, καθαίρεται κάθαρσιν βραχεῖαν ὅσον ἡμικοτύλιον ἢ μικρῷ πλεόν· καιρὸς δὲ γίνεται τῆς ὀχείας μάλιστα περὶ τὴν κάθαρσιν. Ἴππος δὲ τῶν τετραπόδων ἀπάντων εὐτοκώτατον καὶ λογίων καθαρώτατον, καὶ ἐλαχίστην προῖεται αἵματος ρύσιν, ὥς κατὰ τὸ τοῦ σώματος μέγεθος.

Μάλιστα δὲ καὶ ταῖς βουσί καὶ ταῖς ἵπποις τὰ καταμήνια ἐπισημαίνει διαλείποντα δίμηνον καὶ τετράμηνον καὶ ἐξάμηνον· ἀλλ' οὐ ράδιον γνῶναι μὴ παρεπομένῳ μηδὲ συνήθει σφόδρα, διὸ ἔνιοι οὐκ οἶονται γίνεσθαι αὐτοῖς.

Τοῖς δ' ὀρεῦσι τοῖς θήλεσιν οὐδὲν γίνεται καταμήνιον, ἀλλὰ τὸ οὔρον παχύτερον τὸ τῆς θηλείας.

Ὅλως μὲν οὖν τὸ τῆς κύστεως περίττωμα τοῖς τετράποσι

παχύτερον ἢ τὸ τῶν ἀνθρώπων, τὸ δὲ τῶν προβάτων καὶ τῶν αἰγῶν τῶν θηλειῶν παχύτερον ἔτι ἢ τὸ τῶν ἀρρένων· ὄνου δὲ λεπτότερον τὸ τῶν θηλειῶν, βοὸς δὲ δριμύτερον τὸ τῆς θηλείας. Μετὰ δὲ τοὺς τόκους ἀπάντων τῶν τετραπόδων παχύτερον τὸ οὖρον γίνεται, καὶ μᾶλλον τῶν ἐλάττω προΐεμένων κάθαρσιν.

Τὸ δὲ γάλα γίνεται, ὅταν ὀχεύεσθαι ἄρχωνται, πυοειδές· χρήσιμον δὲ γίνεται, ἐπειδὴν τέκωσιν ὕστερον. Κύοντα δὲ καὶ πρόβατα καὶ αἰγες πιότερα γίνονται καὶ ἐσθίουσι μᾶλλον· καὶ βόες δὲ ὡσαύτως καὶ τᾶλλα τὰ τετράποδα πάντα.

Ὀρμητικώτερα μὲν οὖν ὥς ἐπὶ τὸ πᾶν εἰπεῖν τὴν ὀχείαν τὴν ἑαρινὴν ὥραν ἐστίν· οὐ μὴν ἅπαντά γε ποιεῖται τὸν αὐτὸν καιρὸν τῆς ὀχείας, ἀλλὰ πρὸς τὴν ἐκτροφὴν τῶν τέκνων ἐν τοῖς καθήκουσι καιροῖς.

Αἱ μὲν οὖν ἡμεροὶ ὕες κύουσι τέτταρας μῆνας, τίκτουσι δὲ τὰ πλεῖστα εἴκοσιν· πλὴν ἂν πολλὰ τέκωσιν, οὐ δύνανται ἐκτρέφειν πάντα. Γηράσκουσαι δὲ τίκτουσι μὲν ὁμοίως, ὀχεύονται δὲ βραδύτερον· κυῖσκονται δ' ἐκ μιᾶς ὀχείας, ἀλλὰ (573b.) πολλάκις ἐπιβιβάσκουσι διὰ τὸ ἐκβάλλειν μετὰ τὴν ὀχείαν τὴν καλουμένην ὑπὸ τινων καπρίαν. Τοῦτο μὲν οὖν συμβαίνει πάσαις, ἔνιαι δ' ἅμα τούτῳ καὶ τὸ σπέρμα προΐενται. Ἐν δὲ τῇ κυήσῃ ὃ ἂν βλαφθῇ τῶν τέκνων καὶ τῷ μεγέθει πηρωθῇ, καλεῖται μετάχοιρον· τοῦτο δὲ γίνεται ὅπου ἂν τύχῃ τῆς ὑστέρας. Ὅταν δὲ γεννήσῃ, τῷ πρώτῳ τὸν πρῶτον παρέχει μαστόν. Θυῶσαν δ' οὐ δεῖ εὐθὺς βιβάζειν, πρὶν ἂν μὴ τὰ ὦτα καταβάλλῃ· εἰ δὲ μή, ἀναθυᾷ πάλιν· ἐὰν δ' ὀργῶσαν βιβάσῃ, μία ὀχεία, ὥσπερ εἴρηται, ἀρκεῖ. Συμφέρει δ' ὀχεύοντι μὲν τῷ κάπρῳ παρέχειν κριθάς, τετοκυῖα δὲ τῇ ὑὶ κριθὰς ἐφθάς. Εἰσὶ δὲ τῶν ὑῶν αἱ μὲν εὐθὺς καλλίχοιροι μόνον, αἱ δ' ἐπαυξανόμεναι τὰ τέκνα καὶ τὰς δέλφακας χρηστὰς γεννῶσιν. Φασὶ δὲ τινες, ἐὰν τὸν ἕτερον ὀφθαλμὸν ἐκκοπῇ ἢ ὕς, ἀποθνήσκειν διὰ ταχέων ὥς ἐπὶ τὸ πολὺ. Ζῶσι δ' αἱ πλεῖστοι μὲν περὶ ἑτὶ πεντεκαίδεκα, ἔνιαι δὲ καὶ τῶν εἴκοσιν ὀλίγων ἀπολείπουσιν.

Κεφάλαιο 19

Τὰ δὲ πρόβατα κυΐσκεται μὲν ἐν τρισὶν ἢ τέτταρσιν ὀχείαις, ἐὰν δ' ὕδωρ ἐπιγένηται μετὰ τὴν ὀχείαν, ἀνακυΐσκει· ὁμοίως δὲ καὶ αἱ αἶγες. Τίττουσι δὲ τὰ μὲν πλεῖστα δύο, ἐνίοτε δὲ καὶ τρία ἢ τέτταρα. Κύει δὲ πέντε μῆνας καὶ πρόβατον καὶ αἶξ· διὸ ἐν ἐνίοις τόποις, ὅσοι ἄλσεινοὶ εἰσι καὶ ἐν οἷς εὐήμεροῦσι καὶ τροφὴν ἄφθονον ἔχουσι, δις τίττουσιν.

Ζῇ δ' αἶξ μὲν περὶ ἔτη ὀκτώ, πρόβατον δὲ δέκα, τὰ δὲ πλεῖστα ἐλάττω, πλὴν οἱ ἡγεμόνες τῶν προβάτων· οὗτοι δὲ καὶ πεντεκαίδεκα. Ἐν ἐκάστη δὲ ποιμνῇ κατασκευάζουσιν ἡγεμόνα τῶν ἀρρένων, ὃς ὅταν ὀνόματι κληθῇ ὑπὸ τοῦ ποιμένου προηγείται· συνεθίζουσι δὲ τοῦτο δρᾶν ἐκ νέων. Τὰ δὲ περὶ τὴν Αἰθιοπίαν πρόβατα ζῇ καὶ δώδεκα καὶ τριακαίδεκα ἔτη, καὶ αἶγες δὲ καὶ δέκα καὶ ἑνδεκα. Ὀχεύει δὲ καὶ ὀχεύεται, ἕως ἂν ζῇ, καὶ πρόβατον καὶ αἶξ. Διδυμοτοκοῦσι δὲ καὶ πρόβατα καὶ αἶγες διὰ τε εὐβοσίαν, καὶ ἐὰν ὁ κριὸς ἢ ὁ τράγος ἢ διδυμοτόκος ἢ ἡ μήτηρ. Θηλυγὼνα δέ, τὰ δ' ἀρρενογὼνα γίνεται διὰ τε τὰ ὕδατα (ἔστι γὰρ τὰ μὲν θηλυγὼνα τὰ δ' ἀρρενογὼνα) καὶ διὰ τὰς ὀχείας ὡσαύτως, καὶ (574a.) βορείοις μὲν ὀχευόμενα ἀρρενοτοκεῖ μᾶλλον, νοτίοις δὲ θηλυτοκεῖ. Μεταβάλλει δὲ καὶ τὰ θηλυτοκοῦντα καὶ ἀρρενοτοκεῖ· δεῖ δ' ὁρᾶν ὀχευόμενα πρὸς βορέαν. Τὰ δ' εἰωθότα πρῶτ' ὀχεύεσθαι, ἐὰν ὀψὲ ὀχεύῃ τις, οὐχ ὑπομένουσι τοὺς κριούς.

Λευκὰ δὲ τὰ ἔκγονα γίνεται καὶ μέλανα, ἐὰν ὑπὸ τῇ τοῦ κριοῦ γλώττῃ λευκαὶ φλέβες ὧσιν ἢ μέλαιναι, λευκὰ μὲν ἐὰν λευκαί, ἐὰν δὲ μέλαιναι μέλανα· ἐὰν δ' ἀμφότεραι, ἄμφω· πυρρὰ δ' ἐὰν πυρραῖ. Τὰ δὲ τὸ ἀλυκὸν ὕδωρ πίνοντα πρότερον ὀχεύεται· δεῖ δ' ἀλίζειν πρὶν τεκεῖν καὶ ἐπειδὰν τέκη, καὶ ἕαρος αὐθις.

Αἰγῶν δ' ἡγεμόνα οὐ καθιστᾷσιν οἱ νομεῖς διὰ τὸ μὴ μόνιμον εἶναι τὴν φύσιν αὐτῶν, ἀλλ' ὀξεῖαν καὶ εὐκίνητον. Τῶν δὲ προβάτων ἐὰν μὲν τὰ πρεσβύτερα ὀρμᾷ πρὸς τὴν ὀχείαν κατὰ τὴν τεταγμένην ὥραν, φασὶν οἱ ποιμένες σημεῖον εὐετηρίας εἶναι τοῖς προβάτοις, ἐὰν δὲ τὰ νεώτερα, κακοθηγεῖν τὰ πρόβατα.

Κεφάλαιο 20

Τῶν δὲ κυνῶν ἔστι μὲν γένη πλείω, ὀχεύει δὲ κύων ἡ Λακωνικὴ μὲν ὀκτάμηνος καὶ ὀχεύεται· καὶ τὸ σκέλος δ' αἶροντες οὐροῦσιν ἤδη ἔνιοι περὶ τὸν χρόνον τοῦτον. Κυῖσκειται δὲ κύων ἐκ μιᾶς ὀχείας· δῆλον δὲ τοῦτο γίνεται μάλιστα ἐν τοῖς κλέπτουσι τὰς ὀχείας· ἅπαξ γὰρ ἐπιβάντες πληροῦσιν.

Κύει δ' ἡ μὲν Λακωνικὴ ἕκτον μέρος τοῦ ἐνιαυτοῦ (τοῦτο δ' ἐστὶν ἡμέραι ἐξήκοντα), κἂν ἄρα μιᾷ ἢ δυσὶν ἢ τρισὶ πλείονας ἡμέρας καὶ ἐλάττους μιᾷ. Τυφλὰ δὲ γίνεται αὐτῇ τὰ σκυλάκια, ὅταν τέκη, δώδεκα ἡμέρας. Τεκούσα δὲ πάλιν ὀχεύεται ἕκτω μηνί, καὶ οὐ πρότερον. Ἐνῖαι δὲ κύουσι τῶν κυνῶν τὸ πέμπτον μέρος τοῦ ἐνιαυτοῦ (τοῦτο δ' ἐστὶν ἡμέραι ἐβδομήκοντα καὶ δύο), τυφλὰ δὲ γίνεται τὰ σκυλάκια τούτων τῶν κυνῶν ἡμέρας δεκατέτταρας. Ἐνῖαι δὲ κύουσι μὲν τέταρτον μέρος τοῦ ἐνιαυτοῦ (τοῦτο δ' ἐστὶ τρεῖς μῆνες ὅλοι), τυφλὰ δὲ τὰ σκυλάκια τούτων γίνεται ἑπτακαίδεχ' ἡμέρας. Δοκεῖ δὲ σκυζᾶν τὸν ἴσον χρόνον κύων.

Τὰ δὲ καταμήνια ταῖς κυσὶν ἐπτὰ ἡμέραις γίνεται· συμβαίνει δ' ἅμα καὶ ἔπαρσις αἰδοίου. Ἐν δὲ τῷ χρόνῳ τούτῳ οὐ προσίενται ὀχείαν, ἀλλ' ἐν ταῖς μετὰ (574b.) ταῦτα ἐπτὰ ἡμέραις· τὰς γὰρ πάσας δοκεῖ σκυζᾶν ἡμέρας τέτταρας καὶ δέκα ὡς ἐπὶ τὸ πολὺ, οὐ μὴν ἀλλὰ τισι καὶ περὶ ἑκκαίδεχ' ἡμέρας γεγένηται τοῦτο τὸ πάθος. Ἡ δ' ἐν τοῖς τόκοις κάθαρσις γίνεται ἅμα τοῖς σκυλακίοις τικτομένοις, ἔστι δ' αὕτη παχεῖα καὶ φλεγματώδης· καὶ τὸ πλῆθος δ', ὅταν ἐκτέκωσιν, ἀπισχναίνεται ἔλαττον ἢ κατὰ τὸ σῶμα.

Τὸ δὲ γάλα αἱ κύνες ἴσχουσι πρὸ τοῦ τεκεῖν ὡς ἐπὶ τὸ πολὺ ἡμέρας πέντε· οὐ μὴν ἀλλ' ἐνίαις καὶ ἐπτὰ γίνεται πρότερον καὶ τέτταρσιν. Χρήσιμον δ' εὐθύς ἐστι τὸ γάλα, ὅταν τέκωσιν. Ἡ δὲ Λακωνικὴ μετὰ τὴν ὀχείαν τριάκονθ' ἡμέραις ὕστερον. Τὸ μὲν οὖν πρῶτον παχύ ἐστι, χρονιζόμενον δὲ γίνεται λεπτότερον. Διαφέρει δὲ παχύτητι τὸ κύνειον τῶν ἄλλων ζώων μετὰ τὸ ὕειον καὶ δασυπόδειον.

Γίνεται δὲ σημεῖον καὶ ὅταν ἡλικίαν ἔχωσι τοῦ ὀχεύεσθαι· ὥσπερ γὰρ τοῖς ἀνθρώποις, ἐπὶ ταῖς θηλαῖς τῶν μαστῶν ἐπιγίνεται ἀνοίδησις τις καὶ χόνδρον ἴσχουσιν· οὐ μὴν ἀλλ' ἔργον μὴ συνήθει ὄντι ταῦτα καταμαθεῖν· οὐ γὰρ ἔχει μέγεθος οὐδὲν τὸ σημεῖον.

Τῇ μὲν οὖν θηλείᾳ τοῦτο συμβαίνει, τῷ δ' ἄρρενι οὐδὲν τούτων. Τὸ δὲ σκέλος αἶροντες οὐροῦσιν οἱ ἄρρενες ὥς μὲν ἐπὶ τὸ πολὺ ὅταν ἐξάμηνοι ᾖσιν· ποιοῦσι δὲ τινες τοῦτο καὶ ὕστερον, ἤδη ὀκτάμηνοι ὄντες, καὶ πρότερον ἢ ἐξάμηνοι· ὥς γὰρ ἀπλῶς εἰπεῖν, ὅταν ἰσχύειν ἄρξωνται, αὐτὸ ποιοῦσιν. Αἱ δὲ θήλειαι πᾶσαι καθεζόμεναι οὐροῦσιν· ἤδη δὲ τινες καὶ τούτων ἄρασαι τὸ σκέλος οὔρησαν.

Τίτκει δὲ κύων σκυλάκια τὰ πλεῖστα δώδεκα, ὥς δ' ἐπὶ τὸ πολὺ πέντε ἢ ἕξ· ἤδη δὲ καὶ ἐν ἑτεκί τις· αἱ δὲ Λακωνικαὶ ὥς ἐπὶ τὸ πολὺ ὀκτώ. Καὶ ὀχεύονται δ' αἱ θήλειαι καὶ ὀχεύουσιν οἱ ἄρρενες ἕως ἂν ζῶσιν. Ἰδιον δ' ἐπὶ τῶν Λακωνικῶν συμβαίνει πάθος· πονήσαντες γὰρ μᾶλλον δύνανται ὀχεύειν ἢ ἀργοῦντες.

Ζῇ δ' ἡ μὲν Λακωνικὴ κύων ὁ μὲν ἄρρην περὶ ἔτη δέκα, ἡ δὲ θήλεια περὶ ἔτη δώδεκα, τῶν δ' ἄλλων κυνῶν αἱ μὲν πλεῖσται περὶ ἔτη τετταρακαίδεκα ἢ πεντεκαίδεκα, ἔνιαι δὲ καὶ εἴκοσιν· διὸ καὶ Ὅμηρον οἶονταί τινες ὀρθῶς ποιῆσαι τῷ (575a.) εἰκοστῷ ἔτει ἀποθανόντα τὸν κύνα τοῦ Ὀδυσσέως. Ἐπὶ μὲν οὖν τῶν Λακωνικῶν διὰ τὸ πονεῖν τοὺς ἄρρενας μᾶλλον μακροβιώτεροι αἱ θήλειαι τῶν ἀρρένων· ἐπὶ δὲ τῶν ἄλλων λίαν μὲν οὐκ ἐπίδηλον, μακροβιώτεροι δ' ὅμως οἱ ἄρρενες τῶν θηλειῶν εἰσιν.

Ὀδόντας δὲ κύων οὐ βάλλει πλὴν τοὺς καλουμένους κυνόδοντας· τούτους δ' ὅταν ᾖσι τετράμηνοι, ὁμοίως αἱ τε θήλειαι καὶ οἱ ἄρρενες. Διὰ δὲ τὸ τούτους μόνους βάλλειν ἀμφισβητοῦσί τινες· οἱ μὲν γὰρ διὰ τὸ δύο μόνους βάλλειν ὅλως οὐ φασὶ (χαλεπὸν γὰρ ἐπιτυχεῖν τούτοις), οἱ δ' ὅταν ἴδωσι τούτους, ὅλως οἶονται βάλλειν καὶ τοὺς ἄλλους. Τὰς δ' ἡλικίας ἐκ τῶν ὀδόντων σκοποῦσιν· οἱ μὲν γὰρ νέοι λευκοὺς καὶ ὀξεῖς ἔχουσιν, οἱ δὲ πρεσβύτεροι μέλανας καὶ ἀμβλεῖς.

Κεφάλαιο 21

Βοῦς δὲ πληροῖ μὲν ὁ ἄρρην ἐκ μιᾶς ὀχείας, βαίνει δὲ σφοδρῶς ὥστε συγκάμπτεσθαι τὴν βοῦν· ἐὰν δ' ἀμάρτη τῆς ὀρμῆς, εἴκοσιν ἡμέρας διαλείπουσα προσίεται πάλιν ἡ θήλεια τὴν ὀχείαν. Οἱ μὲν οὖν πρεσβύτεροι τῶν ταύρων οὐδ' ἀναβαίνουνσι πλεονάκις ἐπὶ τὴν αὐτὴν τῆς αὐτῆς ἡμέρας, ἐὰν μὴ ἄρα διαλιπόντες· οἱ δὲ νεώτεροι καὶ τὴν αὐτὴν βιάζονται πλεονάκις καὶ ἐπὶ πολλὰς ἀναβαίνουνσι διὰ τὴν ἀκμήν. Ἦκιστα δὲ τῶν ἄρρένων λάγνον ἐστὶ βοῦς. Ὀχεύει δ' ὁ νικῶν τῶν ταύρων· ὅταν δ' ἐξαδυνατήσῃ διὰ τὴν λαγνείαν, ἐπιτίθεται ὁ ἡττώμενος, καὶ κρατεῖ πολλάκις. Ὀχεύει δὲ τὰ ἄρρενα καὶ ὀχεύεται τὰ θήλεα ἐνιαύσια ὄντα πρῶτον, ὥστε καὶ γεννᾶν· οὐ μὴν ἀλλὰ τό γ' ὥς ἐπὶ τὸ πολὺ ἐνιαύσιοι καὶ ὀκτάμηνοι, τὸ δὲ μάλισθ' ὁμολογούμενον διετεῖς.

Κύει δ' ἐννέα μῆνας, δεκάτῳ δὲ τίκτει· ἔνιοι δὲ δισχυρίζονται δέκα μῆνας κύειν ἡμερολογδόν. Ὅ τι δ' ἂν ἔμπροσθεν ἐξενεχθῇ τῶν εἰρημένων χρόνων, ἐκβόλιμόν ἐστι καὶ οὐ θέλει ζῆν· μαλακαὶ γὰρ καὶ ἀτελεῖς γίνονται αἱ ὀπλαί. Τίκτει δ' ἐν τὰ πλεῖστα, ὀλιγάκις δὲ δύο· καὶ τίκτει καὶ ὀχεύει ἕως ἂν ζῇ.

Ζῶσι δ' ὥς ἐπὶ τὸ πολὺ περὶ πεντεκαίδεκα ἔτη αἱ θήλειαι· καὶ οἱ ἄρρενες δ', ἂν ἐκτμηθῶσιν. Ἐνιοι δὲ ζῶσι καὶ εἴκοσιν ἔτη καὶ ἔτι πλείω, ἐὰν εὐφορον ἔχωσι τὸ σῶμα· καὶ γὰρ (575b.) τῶν βοῶν τοὺς τομίας ἐθίζουσι, καὶ καθιστᾶσι τῶν βοῶν ἡγεμόνας ὥσπερ τῶν προβάτων, καὶ ζῶσιν οὗτοι πλείω χρόνον τῶν ἄλλων διὰ τε τὸ <μῆ> πονεῖν καὶ διὰ τὸ νέμεσθαι ἀκέραιον νομῆν. Ἀκμάζει δὲ μάλιστα πεντετῆς ὢν, διὸ καὶ Ὅμηρόν φασι πεποιηκέναι τινὲς ὀρθῶς ποιήσαντα “ἄρσена πενταέτηρον” καὶ τὸ “βοὸς ἐννεώροιο”· δύνασθαι γὰρ ταυτόν.

Τοὺς δ' ὀδόντας βάλλει βοῦς διετῆς, καὶ οὐκ ἀθρόους ἀλλ' ὥσπερ ἵππος· τὰς δ' ὀπλάς, ὁπότεν ποδαγρᾷ, οὐκ ἀποβάλλει, ἀλλ' οἰδεῖ μόνον σφόδρα τοὺς πόδας.

Τὸ δὲ γάλα, ὅταν τέκῃ, χρήσιμον γίνεται· ἔμπροσθεν δ' οὐκ ἔχει γάλα. Τὸ δὲ πρῶτον γινόμενον γάλα ὅταν παγῇ, οὕτω γίνεται σκληρὸν ὥσπερ λίθος· τοῦτο δὲ συμβαίνει, ἐὰν μὴ τις μίξῃ ὕδατι.

Νεώτεραι δ' ἐνιαυσίων οὐκ ὀχεύονται, πλὴν ἐὰν τι τερατῶδες ᾗ· ἥδη δὲ τινες καὶ δεκάμηνοι ὠχεύθησαν καὶ ὠχευσαν. Ἀρχονται δὲ

τῆς ὀχείας περὶ τὸν Θαργηλιῶνα μῆνα καὶ τὸν Σκιρροφοριῶνα αἱ
πλεῖσται· οὐ μὴν ἄλλ' ἔναι καὶ μέχρι τοῦ μετοπώρου κυῖσκονται.
Ὅταν δὲ πολλὰ κύωσι καὶ προσδέχονται τὴν ὀχείαν, σφόδρα δοκεῖ
σημεῖον εἶναι καὶ χειμῶνος καὶ ἐπομβρίας. Αἱ δὲ συνήθειαι γίνονται
μὲν ταῖς βουσὶν ὥσπερ ταῖς ἵπποις, ἥττον δέ.

Κεφάλαιο 22

Ἴππος δ' ἄρχεται ὀχεύειν ὁ μὲν ἄρρην διετῆς, καὶ ἡ θήλεια διετῆς ὀχεύεσθαι· ταῦτα μέντοι ὀλίγα ἐστί, καὶ τὰ ἔκγονα τούτων ἐλάττω καὶ ἀσθενικώτερα· ὥς δ' ἐπὶ τὸ πολὺ ἄρχονται ὀχεύειν τριετείς ὄντες, καὶ αἱ ἵπποι ὀχεύεσθαι, καὶ ἐπιδιδόασιν δ' αἰεὶ πρὸς τὸ βελτίω τὰ ἔκγονα γίνεσθαι μέχρι ἐτῶν εἴκοσιν. Κύει δ' ἑνδεκα μῆνας, δωδεκάτῳ δὲ τίκτει. Πληροῖ δ' ὁ ἵππος οὐκ ἐν τεταγμέναις ἡμέραις, ἀλλ' ἐνίοτε μὲν ἐν μιᾷ ἢ δυσὶν ἢ τρισίν, ἐνίοτε δ' ἐν πλείοσιν· θᾶττον δὲ πληροῖ ἐπιβαίνων ὄνος ἢ ἵππος. Ἡ δ' ὀχεία οὐκ ἐπίπονος τῶν ἵππων, ὥσπερ ἡ τῶν βοῶν. Λαγνίστατον δὲ καὶ τῶν θηλειῶν καὶ τῶν ἄρρένων μετ' ἄνθρωπον ἵππος ἐστίν. Ἡ δὲ τῶν νεωτέρων ὀχεία γίνεται παρὰ τὴν ἡλικίαν, ὅταν εὐβοσία καὶ ἀφθονία γένηται τροφῆς. Ἔστι μὲν οὖν ὥς ἐπὶ τὸ (576a.) πολὺ μονοτόκος, τίκτει μέντοι ποτὲ καὶ δύο τὰ πλεῖστα. Καὶ ἡμιόνους δ' ἤδη ἔτεκε τις δύο· ἃ κρίνουσιν ἐν τέρασιν.

Ὀχεύει μὲν οὖν ἵππος καὶ τριακοντάμηνος· ὥστε δὲ καὶ γεννᾶν ἀξίως, ὅταν παύσηται βάλλων (ἤδη δέ τινες καὶ βάλλοντες ἐπλήρωσαν, ὥς φασίν), ἐὰν μὴ φύσει ἄγονοι τυγχάνωσιν ὄντες. Ἐχει μὲν οὖν ὀδόντας τετταράκοντα, βάλλει δὲ τοὺς μὲν πρῶτους τέτταρας τριακοντάμηνος, τοὺς μὲν δύο ἄνωθεν τοὺς δὲ δύο κάτωθεν· ἐπειδὴν δὲ γένηται ἐνιαυτός, βάλλει τὸν αὐτὸν τρόπον τέτταρας, δύο μὲν ἄνωθεν δύο δὲ κάτωθεν, καὶ πάλιν ὅταν ἄλλος ἐνιαυτός γένηται, ἐτέρους τέτταρας τὸν αὐτὸν τρόπον· τεττάρων δ' ἐτῶν παρελθόντων καὶ ἕξ μηνῶν οὐκέτι βάλλει οὐδένα. Ἦδη δέ τις τὸ πρῶτον εὐθύς ἅμα πάντας ἐξέβαλε, καὶ ἄλλος ἅμα τοῖς τελευταίοις ἅπαντας· ἀλλὰ τὰ τοιαῦτα γίνεται ὀλιγάκις. Ὡστε σχεδὸν συμβαίνει, ὅταν τεττάρων ἐτῶν ἦ καὶ ἕξ μηνῶν, χρήσιμον εἶναι πρὸς τὴν γέννησιν μάλιστα. Εἰσὶ δ' οἱ πρεσβύτεροι τῶν ἵππων γονιμώτεροι, καὶ οἱ ἄρρενες τῶν ἄρρένων καὶ αἱ θήλειαι τῶν θηλειῶν. Αναβαίνουσι δὲ καὶ ἐπὶ τὰς μητέρας οἱ ἵπποι καὶ ἐπὶ τὰς θυγατέρας· καὶ τότε δοκεῖ τέλος εἶναι τὸ ἵπποφόρβιον, ὅταν ὀχεύωσι τὰ ἑαυτῶν ἔκγονα.

Οἱ δὲ Σκύθαι ἱππεύουσι ταῖς κυούσαις ἵπποις, ὅταν θᾶττον στραφῇ τὸ ἔμβρυον, καὶ φασὶ γίνεσθαι αὐτὰς εὐτοκωτέρας. Τὰ μὲν οὖν ἄλλα τετράποδα κατακείμενα τίκτει, διὸ καὶ πλάγια προέρχεται

τὰ ἔμβρυα πάντων· ἡ δ' ἵππος ἡ θήλεια ὅταν ἤδη πλησίον ᾖ τῆς ἀφέσεως, ὀρθὴ στᾶσα προῖεται τὸ ἔκγονον.

Ζῶσι δὲ τῶν ἵππων οἱ μὲν πλεῖστοι περὶ ὀκτωκαίδεκα ἔτη καὶ εἴκοσιν, ἔνιοι δὲ πεντεκαεῖκοσι καὶ τριάκοντα· ἐὰν δέ τις ἐπιμελῶς θεραπεύῃ, ἐκτείνει καὶ πρὸς τὰ πεντήκοντα. Ὁ δὲ μακρότατος βίος τῶν πλείστων ἐστὶν ὡς ἐπὶ τὸ πολὺ τριακοντετῆς· ἡ δὲ θήλεια ὡς ἐπὶ τὸ πολὺ μὲν πέντε (576b.) καὶ εἴκοσιν ἔτη, ἡδὴ δέ τινες καὶ τετταράκοντα ἔτη βεβίωκασιν. Ἐλάττω δὲ χρόνον βιοῦσιν οἱ ἄρρενες τῶν θηλειῶν διὰ τὰς ὀχείας, καὶ οἱ ἰδίᾳ τρεφόμενοι τῶν ἐν τοῖς ἵπποφορβίοις. Ἡ μὲν οὖν θήλεια πέντ' ἐτῶν τέλος λαμβάνει μήκους καὶ ὕψους, ὁ δ' ἄρρην ἐξ ἐτῶν· μετὰ δὲ ταῦτα ἐν ἄλλοις ἐξ ἔτεσι τὸ πλῆθος λαμβάνει τοῦ σώματος, καὶ ἐπιδίδωσι μέχρι ἐτῶν εἴκοσιν. Ἀποτελειοῦται δὲ τὰ θήλεα τῶν ἀρρένων ἔμπροσθεν, ἐν δὲ τῇ γαστρὶ τὰ ἄρρενα τῶν θηλειῶν, καθάπερ καὶ ἐπὶ τῶν ἀνθρώπων· ταῦτό δὲ τοῦτο συμβαίνει καὶ ἐπὶ τῶν ἄλλων ζώων ὅσα <μῃ> πλείω τίκτει.

Θηλάζειν δὲ φασὶ τὸν μὲν ἡμίονον ἐξάμηνον, εἴτ' οὐκέτι προσίσσθαι διὰ τὸ σπᾶσθαι καὶ πονεῖν· τὸν δ' ἵππον πλείω χρόνον.

Ἀκμάζει δὲ καὶ ἵππος καὶ ἡμίονος μετὰ τοὺς βόλους· ὅταν δὲ πάντας ὧσι βεβληκότες, οὐ ῥάδιον γνῶναι τὴν ἡλικίαν. Διὸ καὶ λέγουσι γνώμην ἔχειν, ὅταν ἄβολος ᾖ· ὅταν δὲ βεβληκῶς, οὐκ ἔχειν.

Ὅμως δὲ μάλιστα γνωρίζεται ἡ ἡλικία μετὰ τοὺς βόλους τῷ κυνόδοντι· τῶν μὲν γὰρ ἵππαστῶν γίνεται μικρὸς διὰ τὴν τρίψιν (κατὰ τοῦτον γὰρ ἐμβάλλεται ὁ χαλινός), τῶν δὲ μὴ ἵππαστῶν μέγας μὲν ἄλλ' ἀπηρτημένος, τῶν δὲ νέων ὀξὺς καὶ μακρός.

Ὀχεύει δ' ὁ μὲν ἄρρην πᾶσαν τε ὥραν καὶ ἕως ζῆ· καὶ ἡ θήλεια δ' ὀχεύεται ἕως ἂν ζῇ, οὐπω δὲ πᾶσαν ὥραν, ἐὰν μὴ τις δεσμὸν ἢ ἄλλην τινὰ προσενέγκῃ ἀνάγκην· ὥρα δ' οὐκ ἀφαιρεῖται οὐδεμία τεταγμένη τοῦ ὀχεύεσθαι καὶ ὀχεύειν. Οὐ μέντοι γε, ὅτ' ἔτυχε γενομένης τῆς ὀχείας, δύνανται ἂν γεννήσωσιν ἐκτρέφειν. Ἐν Ὀποῦντι δ' ἐν ἵπποφορβίῳ ἵππος ἐγένετο ὃς ὥχευεν ἐτῶν ὦν τετταράκοντα· ἔδει δὲ τὰ πρόσθια σκέλη συνεπαίρειν.

Ἀρχονται δ' ὀχεύεσθαι αἱ ἵπποι τοῦ ἔαρος. Ὅταν δὲ τέκῃ ἡ ἵππος, οὐκ εὐθὺς μετὰ τοῦτο πίμπλαται ἀλλὰ διαλείπει χρόνον, καὶ τίκτει ἄμεινον τετάρτῳ ἢ πέμπτῳ ἔτει μετὰ τὸν τόκον. Ἐνα δ' (577a.) ἐνιαυτὸν καὶ ἀμπαν ἀνάγκη διαλείπειν καὶ ποιεῖν ὥσπερ νεῖον.

Ἴππος μὲν οὖν διαλείπουσα τίκτει, ὥσπερ εἴρηται, ὄνος δὲ συνεχῶς. Γίνονται δὲ τῶν ἵππων αἱ μὲν καὶ ἄτεκνοι ὅλως, αἱ δὲ

συλλαμβάνουσι μέν, οὐ δύνανται δ' ἐκφέρειν· σημεῖον δὲ τῶν τοιούτων λέγουσιν εἶναι, τὸ ἔμβρυον ἀνασχίζόμενον ἔχειν ἄλλα νεφροειδῆ περὶ τοὺς νεφρούς, ὥστε δοκεῖν τέτταρας ἔχειν νεφρούς. Ὅταν δὲ τέκη ἡ ἵππος, τό τε χόριον εὐθὺς κατεσθίει, καὶ ἀπεσθίει τοῦ πώλου ὃ ἐπιφύεται ἐπὶ τοῦ μετώπου τῶν πώλων, καλεῖται δ' ἵπομανές· ἔστι δὲ τὸ μέγεθος ἔλαττον μικρῷ ἰσχάδος, τὴν δ' ἰδέαν πλατύ, περιφερές, μέλαν. Τοῦτο δ' ἐάν τις φθῇ λαβὼν καὶ ὄσφρηται ἡ ἵππος, ἐξίσταται καὶ μαίνεται πρὸς τὴν ὁσμὴν· διὸ καὶ τοῦτο αἱ φαρμακίδες ζητοῦσι καὶ συλλέγουσιν.

Ἐὰν δ' ὠχευμένην ἵππον ὑπὸ ἵππου ὄνος ὀχεύσῃ, διαφθείρει τὸ ἔμβρυον τὸ ἐνυπάρχον. Ἴππων δ' ἡγεμόνα οὐ καθιστᾷσιν οἱ ἵποφορβοὶ ὥσπερ τῶν βοῶν, [διὰ τὸ μὴ μόνιμον εἶναι τὴν φύσιν αὐτῶν ἀλλ' ὀξεῖαν καὶ εὐκίνητον].

Κεφάλαιο 23

Ὁνος δ' ὀχεύει μὲν καὶ ὀχεύεται τριακοντάμηνος, καὶ βάλλει τοὺς πρώτους ὀδόντας· τοὺς δὲ δευτέρους ἔκτῳ μηνί, καὶ τοὺς τρίτους καὶ τοὺς τετάρτους ὡσαύτως· τούτους δὲ γνώμονας καλοῦσι, τοὺς τετάρτους. Ἦδη δὲ καὶ ἐνιαυσία ὄνος ἐκύησεν ὥστε καὶ ἐκτραφῆναι. Ἐξουρεῖ δ', ὅταν ὀχευθῇ, τὴν γονὴν, ἐὰν μὴ κωλύηται· διὸ τύπτουσι μετὰ τὴν ὀχείαν εὐθὺς καὶ διώκουσιν. Τίκει δὲ δωδεκάτῳ μηνί. Τίκει δὲ τὰ μὲν πολλὰ ἓν· μονοτόκον γὰρ ἔστι φύσει· τίκει δ' ἐνίστε καὶ δύο.

Ὁ μὲν οὖν ὄνος ἐπαναβάς διαφθείρει τὸ τοῦ ἵππου ὄχευμα, ὥσπερ εἴρηται· ὁ δ' ἵππος τὸ τοῦ ὄνου οὐ διαφθείρει, ὅταν ἢ ὠχευμένη ἢ ἵππος ὑπὸ τοῦ ὄνου. Ἴσχει δὲ γάλα κύουσα δεκάμηνος οὔσα. Τεκούσα δὲ βιβάζεται ἐβδόμη ἡμέρα, καὶ μάλιστα δέχεται τὸ πλῆσμα ταύτῃ βιβασθεῖσα τῇ ἡμέρᾳ, λαμβάνει δὲ καὶ ὕστερον. Ἐὰν δὲ μὴ τέκη πρὶν τὸ γνῶμα λιπεῖν, οὐκέτι λαμβάνει πλῆσμα οὐδὲ κυῖσκειται τοῦ λοιποῦ (577b.) βίου παντός. Τίκειν δ' οὐ θέλει οὔτε ὀρωμένη ὑπὸ ἀνθρώπου οὔτ' ἐν τῷ φωτί, ἀλλ' εἰς τὸ σκότος ἀπάγουσιν, ὅταν μέλλῃ τίκειν. Τίκει δὲ διὰ βίου, ἐὰν τέκη πρὶν τὸ γνῶμα λιπεῖν. Βιοῖ δ' ὄνος πλείω τριάκοντ' ἐτῶν, καὶ ἡ θήλεια τοῦ ἄρρενος πλείω ἔτη.

Ὅταν δ' ἵππος ὀχεύσῃ ὄνον ἢ ὄνος ἵππον, πολὺ μᾶλλον ἐξαμβλοῖ ἢ ὅταν τὰ ὁμογενῇ ἀλλήλοις μιχθῇ, οἷον ἵππος ἵπῳ ἢ ὄνος ὄνῳ. Αποβαίνει δὲ καὶ ὁ τῆς κυήσεως χρόνος, ὅταν μιχθῇ ἵππος καὶ ὄνος, κατὰ τὸ ἄρρεν, λέγω δ' ἐν ὅσῳ χρόνῳ τοῦτο γίνεται ἐξ ὁμογωνῶν γινόμενον.

Τὸ δὲ μέγεθος τοῦ σώματος καὶ τὸ εἶδος καὶ ἡ ἰσχὺς μᾶλλον τῷ θήλει ἀφομοιοῦται τοῦ γενομένου. Ἐὰν δὲ συνεχῶς μίσγηται καὶ μὴ διαλείπῃ χρόνον τινὰ οὕτως ὀχευόμενα, ταχέως ἄγονον τὸ θῆλυ γίνεται· διὸ συνεχῶς οὐ μίσγουσιν οὕτως οἱ περὶ ταῦτα πραγματευόμενοι, ἀλλὰ διαλείπουσί τινα χρόνον. Οὐ προσδέχεται δ' οὔτε ἡ ἵππος τὸν ὄνον οὔτε ἡ ὄνος τὸν ἵππον, ἐὰν μὴ τύχῃ τεθηλακῶς ὁ ὄνος ἵππον· ὑποβάλλουσι γὰρ ἐπίτηδες οὓς καλοῦσιν ἱποθήλας. Οὗτοι δ' ὀχεύουσιν ἐν τῇ νομῇ βίᾳ κρατοῦντες, ὥσπερ οἱ ἵπποι.

Κεφάλαιο 24

Ὁ δ' ὀρεὺς ἀναβαίνει μὲν καὶ ὀχεύει μετὰ τὸν πρῶτον βόλον, ἑπταετῆς δ' ὢν καὶ πληροῖ, καὶ ἤδη ἐγένετο γίννος ὅταν ἀναβῇ ἐφ' ἵππον θήλειαν· ὕστερον δ' οὐκέτι ἀναβαίνει. Καὶ ὁ θῆλυς δ' ὀρεὺς ἤδη ἐπληρώθη, οὐ μέντοι γε ὥστ' ἐξενεγκεῖν διὰ τέλους. Αἱ δ' ἐν τῇ Συρίᾳ τῇ ὑπὲρ Φοινίκης ἡμίονοι καὶ ὀχεύονται καὶ τίκτουσιν· ἀλλ' ἔστι τὸ γένος ὅμοιον μὲν ἕτερον δέ.

Οἱ δὲ καλούμενοι γίννοι γίνονται ἐξ ἵππου, ὅταν νοσήσῃ ἐν τῇ κυήσῃ, ὥσπερ ἐν μὲν τοῖς ἀνθρώποις οἱ νάνοι, ἐν δὲ τοῖς ὑσὶ τὰ μετὰ χοῖρα· καὶ ἴσχει δέ, ὥσπερ οἱ νάνοι, ὁ γίννος τὸ αἰδοῖον μέγα.

Ζῆ δ' ἡμίονος ἔτη πολλά· ἤδη γάρ τις βεβίωκεν ἔτη καὶ ὀγδοήκοντα, οἷον Ἀθήνησιν ὅτε τὸν νεῶν ᾠκοδόμουν· ὃς καὶ ἀφειμένος ἤδη διὰ τὸ γῆρας συναμπερῦν καὶ παραπορευόμενος παρῶξυνε τὰ ζεύγη πρὸς τὸ ἔργον, ὥστ' ἐψηφίσαντο μὴ (578a.) ἀπελαύνειν αὐτὸν τοὺς σιτοπώλας ἀπὸ τῶν τηλιῶν. Γηράσκει δὲ βραδύτερον ὁ θῆλυς ὀρεὺς τοῦ ἄρρενος. Λέγουσι δ' ἔνιοι ὅτι ἡ μὲν καθαίρεται οὐροῦσα, ὁ δ' ἄρρην διὰ τὸ ὀσφραίνεσθαι τοῦ οὔρου γηράσκει θάττον. Τούτων μὲν οὖν τῶν ζώων αἱ γενέσεις τοῦτον ἔχουσι τὸν τρόπον.

Κεφάλαιο 25

Τὰ δὲ νέα καὶ τὰ παλαιὰ τετράποδα διαγινώσκουσιν οἱ περὶ τὰς
θεραπείας ὄντες αὐτῶν· ἐὰν μὲν ἀπὸ τῆς γνάθου τὸ δέρμα
ἐφελκόμενον ταχὺ ἐπίη, νέον τὸ τετράπουν, ἐὰν δὲ πολὺν χρόνον
μένῃ ἐρρυτιδωμένον, παλαιόν.

Κεφάλαιο 26

Ἡ δὲ κάμηλος κύει μὲν δέκα μῆνας, τίκτει δ' αἰεὶ ἓν μόνον· μονοτόκον γάρ ἐστιν. Ἐκκρίνουσι δ' ἐκ τῶν καμήλων ἐνιαύσιον τὸ ἔκγονον. Ζῇ δὲ χρόνον πολύν, πλείω ἢ πενήκοντα ἔτη. Τίκτει δὲ τοῦ ἔαρος, καὶ γάλα ἔχει μέχρι οὗ ἂν ἐν γαστρὶ λάβῃ. Ἔχει δὲ καὶ τὰ κρέα καὶ τὸ γάλα ἥδιστα πάντων· πίνουσι δὲ τὸ γάλα δύο καὶ ἓνα ἢ τρία καὶ ἓνα πρὸς ὕδωρ κεράσαντες. Ὁ δ' ἐλέφας ὀχεύει καὶ ὀχεύεται πρῶτον εἴκοσιν ἐτῶν.

Κεφάλαιο 27

Ὅταν δ' ὀχευθῇ ἡ θήλεια, φέρει ἐν γαστρί, ὡς μὲν τινὲς φασιν, ἐνιαυτὸν καὶ ἕξ μῆνας, ὡς δ' ἕτεροι, τρί' ἔτη· τοῦ δὲ μὴ ὁμολογεῖσθαι τὸν χρόνον αἴτιον τὸ μὴ εὐθεώρητον εἶναι τὴν ὀχείαν. Τίκει δ' ἡ θήλεια συγκαθίσασα ἐπὶ τὰ ὀπισθεν, καὶ ἀλγοῦσα δῆλη ἐστίν. Ὁ δὲ σκύμνος ὅταν γένηται, θηλάζει τῷ στόματι καὶ οὐ τῷ μυκτῆρι, καὶ βαδίζει καὶ βλέπει εὐθὺς γεννηθείς.

Κεφάλαιο 28

Αἱ δ' ὕες αἱ ἄγριαι τοῦ χειμῶνος ἀρχομένου ὀχεύονται, τίκτουσι δὲ τοῦ ἔαρος ἀποχωροῦσαι εἰς τοὺς δυσβατωτάτους τόπους καὶ ἀποκρήμινους μάλιστα καὶ φαραγγώδεις καὶ συσκίους. Διατρίβει δ' ὁ ἄρρην ἐν ταῖς ὑσὶν ὥς ἐπὶ τὸ πολὺ ἡμέρας τριάκοντα. Τὸ δὲ πλῆθος τῶν τικτομένων καὶ ὁ χρόνος τῆς κυήσεως ὁ αὐτὸς καὶ ἐπὶ τῶν ἡμέρων ὕδν ἐστιν. Τὰς δὲ φωνὰς παραπλησίας ἔχουσι τοῖς ἡμέροις, πλὴν μᾶλλον ἢ θήλεια φωνεῖ, ὁ δ' ἄρρην σπανίως. Τῶν δ' ἀρρένων καὶ ἀγρίων οἱ τομίαι μείζους γίνονται καὶ χαλεπότεροι, ὥσπερ καὶ (578b.) Ὅμηρος ἐποίησεν “θρέψεν ἔπι χλοῦνην σὺν ἄγριον· οὐδὲ ἐφύκει θηρί γε σιτοφάγῳ, ἀλλὰ ρίψ ὑλήεντι.” Γίνονται δὲ τομίαι διὰ τὸ νέοις οὗσιν ἐμπίπτειν νόσημα κνησμὸν εἰς τοὺς ὄρχεις· εἴτα ζυόμενοι πρὸς τὰ δένδρα ἐκθλίβουσι τοὺς ὄρχεις.

Κεφάλαιο 29

Ἡ δ' ἔλαφος τὴν μὲν ὀχείαν ποιεῖται, καθάπερ ἐλέχθη πρότερον, τὰ πλεῖστα μὲν ὑπαγωγῆς (οὐ γὰρ ὑπομένει ἡ θήλεια τὸν ἄρρενα πολλάκις διὰ τὴν συντονίαν), οὐ μὴν ἀλλὰ καὶ ὑπομένουσαι ἐνίοτε ὀχεύονται, καθάπερ τὰ πρόβατα· καὶ ὅταν ὀργῶσι, παρεκκλίνουσιν ἀλλήλας. Μεταλλάττει δ' ὁ ἄρρην καὶ οὐ πρὸς μιᾷ διατρίβει, ἀλλὰ διαλιπὼν βραχὺν χρόνον πλησιάζει ἄλλαις. Ἡ δ' ὀχεία γίνεται μετ' ἀρκτοῦρον περὶ τὸν Βοηδρομιῶνα καὶ Μαιμακτηριῶνα. Κύει δ' ὀκτὼ μῆνας· κυῖσκεται δ' ἐν ὀλίγαις ἡμέραις, καὶ ὕφ' ἐνὸς πολλάι. Τίκτει δ' ὡς μὲν ἐπὶ τὸ πολὺ ἔν, ἥδη δέ τινες ὠμμένοι εἰσὶν ὀλίγαι καὶ δύο. Καὶ ποιεῖται τοὺς τόκους παρὰ τὰς ὁδοὺς διὰ τὸν πρὸς τὰ θηρία φόβον. Ἡ δ' αὖξησης ταχεῖα τῶν νεβρῶν. Κάθαρσις δὲ κατ' ἄλλους μὲν χρόνους οὐ συμβαίνει ταῖς ἐλάφοις· ὅταν δὲ τίκτωσι, γίνεται φλεγματώδης αὐταῖς κάθαρσις.

Εἴθισται δ' ἄγειν τοὺς νεβρούς ἐπὶ τοὺς σταθμούς· ἔστι δὲ τοῦτο τὸ χωρίον αὐταῖς καταφυγή, πέτρα περιπραγεῖσα μίαν ἔχουσα εἴσοδον, οὗ καὶ ἀμύνεσθαι εἴωθε τοὺς ἐπιτιθεμένους.

Περὶ δὲ τῆς ζωῆς μυθολογεῖται μὲν ὡς ὃν μακρόβιον, οὐ φαίνεται δ' οὔτε τῶν μυθολογουμένων οὐδὲν σαφές, ἢ τε κῆσις καὶ ἡ αὖξησης τῶν νεβρῶν συμβαίνει οὐχ ὡς μακροβίου τοῦ ζώου ὄντος.

Ἐν δὲ τῷ ὅρει τῷ Ἐλαφῶντι καλουμένῳ, ὃ ἐστὶ τῆς Ἀσίας ἐν τῇ Ἀργινούσῃ, οὗ ἐτελεύτησεν Ἀλκιβιάδης, αἱ ἔλαφοι πᾶσαι τὸ οὗς ἐσχισμέναι εἰσὶν, ὥστε κἂν ἐκτοπίσωσι γινώσκεσθαι τούτῳ· καὶ τὰ ἔμβρυα δ' ἐν τῇ γαστρὶ ὄντα εὐθὺς ἔχει τοῦτο τὸ σημεῖον.

Θηλὰς δ' ἔχουσιν αἱ θήλειαι τέτταρας ὥσπερ αἱ βόες. Ἐπειδὴν δὲ πλησθῶσιν αἱ θήλειαι, ἐκκρίνονται οἱ ἄρρενες καθ' ἑαυτοὺς, καὶ διὰ τὴν ὁρμὴν τὴν τῶν ἀφροδισίων ἕκαστος (579a.) μονούμενος βόθρους ὀρύττει, καὶ βρωμᾶται ὥσπερ οἱ τράγοι· καὶ τὰ πρόσωπα διὰ τὸ ραίνεσθαι μέλανα γίνεται αὐτῶν, ὥσπερ τῶν τράγων. Οὕτω δὲ διάγουσιν, ἕως ἂν ὕδωρ γένηται· μετὰ δὲ ταῦτα τρέπονται πρὸς τὴν νομὴν. Ταῦτα δὲ ποιεῖ τὸ ζῶον διὰ τὸ φύσει λάγνον εἶναι καὶ διὰ τὴν παχύτητα· ὑπερβάλλουσα γὰρ γίνεται τοῦ θέρους αὐτῶν, διὸ καὶ οὐ δύνανται θεῖν, ἀλλ' ἀλίσκονται ὑπὸ τῶν πεζῇ διωκόντων ἐν τῷ δευτέρῳ δρόμῳ καὶ τρίτῳ, καὶ φεύγουσι διὰ τὸ καῦμα καὶ τὸ ἄσθμα εἰς τὸ ὕδωρ. Καθ' ὃν δὲ χρόνον ὀχεύουσι, τὰ κρέα γίνεται φαῦλα καὶ

δυσώδη, καθάπερ καὶ τῶν τράγων. Ἐν μὲν οὖν τῷ χειμῶνι γίνονται λεπτοὶ καὶ ἀσθενεῖς, πρὸς δ' ἕαρ μάλιστ' ἀκμάζουσι πρὸς τὸ δραμεῖν. Ἐν δὲ τῷ φεύγειν ἀνάπαυσιν ποιοῦνται τῶν δρόμων, καὶ ὑφιστάμενοι μένουσιν ἕως ἂν πλησίον ἔλθῃ ὁ διώκων· τότε δὲ πάλιν φεύγουσιν.

Τοῦτο δὲ δοκοῦσι ποιεῖν διὰ τὸ πονεῖν τὰ ἐντός· τὸ γὰρ ἔντερον ἔχει λεπτὸν καὶ ἀσθενὲς οὕτως ὥστ' ἐὰν ἡρέμα τις πατάξῃ, διακόπτεται τοῦ δέρματος ὑγιοῦς ὄντος.

Κεφάλαιο 30

Αἱ δ' ἄρκτοι τὴν μὲν ὀχρίαν ποιοῦνται, ὥσπερ εἴρηται πρότερον, οὐκ ἀναβαδὸν ἀλλὰ κατακεκλιμέναι ἐπὶ τῆς γῆς.

Κύει δ' ἄρκτος τριάκονθ' ἡμέρας. Τίκει δὲ καὶ ἓν καὶ δύο, τὰ δὲ πλεῖστα πέντε. Ἐλάχιστον δὲ τίκει τὸ ἔμβρυον τῷ μεγέθει ὡς κατὰ τὸ σῶμα τὸ ἐαυτῆς· ἔλαττον μὲν γὰρ γαλῆς τίκει, μεῖζον δὲ μυός, καὶ ψιλὸν καὶ τυφλόν, καὶ σχεδὸν ἀδιάρθρωτα τὰ σκέλη καὶ τὰ πλεῖστα τῶν μορίων.

Τὴν δ' ὀχρίαν ποιεῖται τοῦ μηνὸς τοῦ Ἐλαφηβολιῶνος, τίκει δὲ περὶ τὴν ὥραν τὴν τοῦ φωλεύειν. Γίνονται μὲν οὖν περὶ τὸν χρόνον τοῦτον καὶ ἡ θήλεια καὶ ἡ ἄρρην πιότατοι· ὅταν δ' ἐκθρέψη, τρίτῳ μηνὶ ἐκφαίνουσιν ἤδη τοῦ ἔαρος.

Καὶ ἡ ὕστριξ δὲ φωλεῖ καὶ κύει ἴσας ἡμέρας, καὶ τᾶλλα ὡσαύτως τῇ ἄρκτῳ. Κύουσιν δ' ἄρκτον ἔργον ἐστὶ λαβεῖν.

Κεφάλαιο 31

Λέων δ' ὅτι μὲν ὀχεύει ὀπισθεν καὶ ἔστιν ὀπισθοιητικόν, εἴρηται πρότερον· ὀχεύει δὲ καὶ τίκτει οὐ πᾶσαν ὥραν, καθ' ἕκαστον μέντοι τὸν ἐνιαυτόν. Τίκτει μὲν οὖν τοῦ ἔαρος, τίκτει (579b.) δ' ὡς ἐπὶ τὸ πολὺ δύο, τὰ μέντοι πλεῖστα ἕξ· τίκτει δ' ἐνίοτε καὶ ἓν. Ὁ δὲ λεχθεὶς μῦθος περὶ τοῦ ἐκβάλλειν τὰς ὑστέρας τίκτοντα ληρώδης ἐστί, συνετέθη δ' ἐκ τοῦ σπανίους εἶναι τοὺς λέοντας, ἀποροῦντος τὴν αἰτίαν τοῦ τὸν μῦθον συνθέντος· σπάνιον γὰρ τὸ γένος τὸ τῶν λεόντων ἐστὶ καὶ οὐκ ἐν πολλῷ γίνεται τόπῳ, ἀλλὰ τῆς Εὐρώπης ἀπάσης ἐν τῷ μεταξὺ τοῦ Ἀχελώου καὶ τοῦ Νέσσου ποταμοῦ. Τίκτει δὲ καὶ ὁ λέων πάνυ μικρὰ οὕτως ὥστε δίμηνα ὄντα μόλις βαδίζειν. Οἱ δ' ἐν Συρίᾳ λέοντες τίκτουσι πεντάκις, τὸ πρῶτον πέντε, εἴτ' ἀεὶ ἐνὶ ἐλάττονα· μετὰ δὲ ταῦτα οὐκέτι οὐδὲν τίκτουσιν, ἀλλ' ἄγονοι διατελοῦσιν.

Οὐκ ἔχει δ' ἡ λέαινα χαίτην, ἀλλ' ὁ ἄρρην λέων. Βάλλει δ' ὁ λέων τῶν ὀδόντων τοὺς κυνόδοντας καλουμένους τέτταρας μόνους, δύο μὲν ἄνωθεν δύο δὲ κάτωθεν· βάλλει δ' ἐξάμηνος ὢν τὴν ἡλικίαν.

Κεφάλαιο 32

Ἡ δ' ὕαινα τῷ μὲν χρώματι λυκώδης ἐστί, δασυτέρα δέ, καὶ λοφιὰν ἔχει δι' ὅλης τῆς ῥάχεως· περὶ δὲ τῶν αἰδοίων ὁ λέγεται, ὡς ἔχει ἄρρενος καὶ θηλείας, ψευδός ἐστιν.

Ἀλλ' ἔχει τὸ μὲν τοῦ ἄρρενος ὅμοιον τῷ τῶν λύκων καὶ τῶν κυνῶν, τὸ δὲ δοκοῦν θηλείας εἶναι ὑποκάτω μὲν ἔχει τῆς κέρκου, παραπλήσιον δ' ἐστὶ τῷ σχήματι τῷ τοῦ θήλεος, οὐκ ἔχει μέντοι οὐδένα πόρον· ὑποκάτω δ' αὐτοῦ ἐστὶν ὁ τῆς περιττώσεως πόρος. Ἡ δὲ θήλεια ὕαινα ἔχει μὲν καὶ τὸ ὅμοιον τῷ τῆς θηλείας λεγομένῳ αἰδοίῳ, ἔχει δ' ὥσπερ ὁ ἄρρην αὐτὸ ὑποκάτω τῆς κέρκου, πόρον δ' οὐδένα ἔχει· μετὰ δὲ τοῦτο ὁ τῆς περιττώσεως ἐστὶ πόρος, ὑποκάτω δὲ τούτου τὸ ἀληθινὸν αἰδοῖον.

Ἐχει δ' ἡ ὕαινα ἡ θήλεια καὶ ὑστέραν, ὥσπερ καὶ τὰ ἄλλα ζῷα τὰ θήλεα, ὅσα ἐστὶ τοιαῦτα. Σπάνιον δ' ἐστὶ λαβεῖν θήλειαν ὕαιναν· ἐν ἑνδεκα γοῦν κυνηγός τις μίαν ἔφη λαβεῖν.

Κεφάλαιο 33

Οἱ δὲ δασύποδες ὀχεύονται μὲν συνιόντες ὀπισθεν, ὥσπερ εἴρηται πρότερον (ἔστι γὰρ ὀπισθοιρητικόν), ὀχεύονται δὲ καὶ τίκτουσι πᾶσαν ὥραν, καὶ ἐπικυῖσκονται ὅταν κύωσι, καὶ τίκτουσι κατὰ μῆνα. Τίκτουσι δ' οὐκ ἀθρόα, ἀλλὰ (580a.) διαλείπουσιν ἡμέρας ὅσας ἂν τύχωσιν. Ἴσχει δ' ἡ θήλεια γάλα πρότερον ἢ τεκεῖν, καὶ τεκοῦσα εὐθὺς ὀχεύεται, καὶ συλλαμβάνει ἔτι θηλαζομένη· τὸ δὲ γάλα παχύτητι ὅμοιον ἐστὶ τῷ υἱέῳ. Τίκτει δὲ τυφλά, ὥσπερ τὰ πολλὰ τῶν πολυσχιδῶν.

Κεφάλαιο 34

Ἡ δ' ἀλώπηξ ὀχεύει μὲν ἀναβαίνουσα, τίκει δ' ὥσπερ ἡ ἄρκτος, καὶ ἔτι μᾶλλον ἀδιάρθρωτον. Ὅταν δὲ μέλλη τίκειν, ἐκτοπίζει οὕτως ὥστε σπάνιον εἶναι τὸ ληφθῆναι κύουσιν. Ὅταν δ' ἐκτέκη, τῇ γλώττῃ λείχουσα ἐκθερμαίνει καὶ συμπέττει. Τίκει δὲ τέτταρα τὰ πλεῖστα.

Κεφάλαιο 35

Λύκος δὲ κύει μὲν καὶ τίκει καθάπερ κύων τῷ χρόνῳ καὶ τῷ πλήθει τῶν γινομένων, καὶ τυφλὰ τίκει ὥσπερ κύων· ὀχεύει δὲ καὶ ὀχεύεται κατὰ μίαν ὥραν, καὶ τίκει ἀρχομένου τοῦ θέρους. Λέγεται δὲ τις περὶ τοῦ τόκου λόγος πρὸς μῦθον συνάπτων· φασὶ γὰρ πάντας τοὺς λύκους ἐν δώδεχ' ἡμέραις τοῦ ἐνιαυτοῦ τίκειν. Τούτου δὲ τὴν αἰτίαν ἐν μύθῳ λέγουσιν, ὅτι ἐν τοσαύταις ἡμέραις τὴν Λητὸν παρεκόμισαν ἐξ Ὑπερβορέων εἰς Δῆλον, λύκαιναν φαινομένην διὰ τὸν τῆς Ἥρας φόβον. Εἰ δ' ἐστὶν ὁ χρόνος οὗτος τῆς κυήσεως ἢ μή ἐστιν, οὐδὲν πω συνῶπται μέχρι γε τοῦ νῦν, ἀλλ' ἢ ὅτι λέγεται μόνον. Οὐκ ἀληθὲς δὲ φαίνεται ὃν οὐδὲ τὸ λεγόμενον ὡς ἅπαξ ἐν τῷ βίῳ τίκτουσιν οἱ λύκοι.

Οἱ δ' αἰλουροὶ καὶ οἱ ἰχνεύμονες τίκτουσιν ὅσαπερ καὶ οἱ κύνες, καὶ τρέφονται τοῖς αὐτοῖς· ζῶσι δὲ περὶ ἔτη ἕξ· καὶ ὁ πανθὴρ δὲ τίκει τυφλὰ ὥσπερ λύκος, τίκει δὲ τὰ πλεῖστα τέτταρα. Καὶ οἱ θῶες δ' ὁμοίως κυῖσκονται τοῖς κυσί, καὶ τίκτουσι τυφλά· τίκτουσι δὲ καὶ δύο καὶ τρία καὶ τέτταρα τὸν ἀριθμόν. Ἔστι δὲ τὴν ιδέαν ἐπ' οὐρανὸν μὲν μακρός, τὸ δ' ὕψος βραχύτερος. Ὅμοίως δὲ ταχυτῆτι διαφέρει, καίπερ τῶν σκελῶν ὄντων βραχέων, διὰ τὸ ὑγρὸς εἶναι, καὶ πηδᾷ πόρρω.

Κεφάλαιο 36

(580b.) Εἰσὶ δ' ἐν Συρίᾳ οἱ καλούμενοι ἡμίονοι, ἕτερον γένος τῶν ἐκ συνδυασμοῦ γινομένων ἵππου καὶ ὄνου, ὅμοιοι δὲ τὴν ὄψιν, ὥσπερ καὶ οἱ ἄγριοι ὄνοι πρὸς τοὺς ἡμέρους, ἀπὸ τινος ὁμοιότητος λεχθέντες. Εἰσὶ δ' ὥσπερ οἱ ὄνοι οἱ ἄγριοι καὶ αἱ ἡμίονοι, τὴν ταχυτῆτα διαφέροντες. Αὗται αἱ ἡμίονοι γεννῶσιν ἐξ ἀλλήλων. Σημεῖον δέ· ἦλθον γάρ τινες εἰς Φρυγίαν ἐπὶ Φαρνάκου τοῦ Φαρναβάζου πατρός, καὶ διαμένουσιν ἔτι. Εἰσὶ δὲ νῦν μὲν τρεῖς, τὸ παλαιὸν δ' ἑννέα ἦσαν, ὡς φασίν.

Κεφάλαιο 37

Ἡ δὲ τῶν μυῶν γένεσις θαυμασιωτάτη παρὰ τᾶλλα ζῷα ἐστὶ τῷ πλήθει καὶ τῷ τάχει. Ἦδη γάρ ποτε ἐναποληφθείσης τῆς θηλείας κυούσης ἐν ἀγγεῖῳ κέγχρου, μετ' ὀλίγον ἀνοιχθέντος τοῦ ἀγγείου ἐφάνησαν ἑκατὸν καὶ εἴκοσι μῦες τὸν ἀριθμόν. Ἀπορεῖται δὲ καὶ ἡ τῶν ἐπιπολαζόντων γένεσις μυῶν ἐν ταῖς χώραις καὶ ἡ φθορά· πολλαχοῦ γὰρ εἶωθε γίνεσθαι πλῆθος ἀμύθητον τῶν ἀρουραίων, ὥστ' ὀλίγον λείπεσθαι τοῦ σίτου παντός. Γίνεται δ' οὕτω ταχεῖα ἡ φθορά, ὥστ' ἔνιοι τῶν μὴ μεγάλας γεωργίας ἐργαζομένων, τῇ προτεραιᾷ ἰδόντες ὅτι θερίζειν ὥρα, τῇ ὑστεραιᾷ ἔωθεν ἄγοντες τοὺς θεριστὰς καταβεβρωμένα ἅπαντα καταλαμβάνουσιν. Ὁ δ' ἀφανισμὸς οὐ κατὰ λόγον ἀποβαίνει· ἐν ὀλίγαις γὰρ ἡμέραις ἀφανεῖς πάμπαν γίνονται· καίτοι ἐν τοῖς ἔμπροσθεν χρόνοις οὐ κρατοῦσιν οἱ ἄνθρωποι ἀποθυμῶντες καὶ ἀνορύττοντες, ἔτι δὲ θηρεύοντες καὶ τὰς ὕς ἐμβάλλοντες· αὗται γὰρ ἀνορύττουσι τὰς μυωπίας. Θηρεύουσι δὲ καὶ αἱ ἀλώπεκες αὐτούς, καὶ αἱ γαλαῖ αἱ ἄγριαι μάλιστα ἀναιροῦσιν, ὅταν ἐπιγένωνται· ἀλλ' οὐ κρατοῦσι τῆς πολυγονίας καὶ τῆς ταχυγονίας, οὐδ' ἄλλ' οὐδὲν πλὴν οἱ ὄμβροι, ὅταν ἐπιγένωνται· τότε δ' ἀφανίζονται ταχέως. Τῆς δὲ Περσικῆς ἐν τινὶ τόπῳ ἀνασχιζομένης τῆς θηλείας τῶν ἐμβρύων τὰ θήλεα κύοντα φαίνεται. Φασὶ δέ τινες καὶ ἰσχυρίζονται ὅτι ἂν ἄλλα (581a.) λείχωσιν, ἄνευ ὁχείας γίνεσθαι ἐγκύους.

Οἱ δ' ἐν Αἰγύπτῳ μῦες σκληρὰν ἔχουσι τὴν τρίχα ὥσπερ οἱ χερσαῖοι ἐχῖνοι.

Εἰσὶ δὲ καὶ ἔτεροι οἱ βαδίζουσιν ἐπὶ τοῖς δυσὶ ποσίν· τὰ γὰρ πρόσθια μικρὰ ἔχουσι, τὰ δ' ὀπίσθια μεγάλα· γίνονται δὲ πλήθει πολλοί. Ἔστι δὲ καὶ ἄλλα γένη μυῶν πολλά.

Βιβλίο 7

Κεφάλαιο 1

Περὶ δ' ἀνθρώπου γενέσεως τῆς τε πρώτης τῆς ἐν τῷ θήλει καὶ τῆς ὕστερον μέχρι γήρωος, ὅσα συμβαίνει διὰ τὴν φύσιν τὴν οἰκείαν, τόνδ' ἔχει τὸν τρόπον.

Ἡ μὲν διαφορὰ τοῦ ἄρρενος πρὸς τὸ θήλυ καὶ τὰ μόρια πρότερον εἴρηται. Φέρειν δὲ σπέρμα πρῶτον ἄρχεται τὸ ἄρρεν ὡς ἐπὶ τὸ πολὺ ἐν τοῖς ἔτεσι τοῖς δις ἑπτὰ τετελεσμένοις· ἅμα δὲ καὶ ἡ τρίχωσις τῆς ἥβης ἄρχεται, καθάπερ καὶ τὰ φυτὰ μέλλοντα σπέρμα φέρειν ἀνθεῖν πρῶτον Ἀλκμαίων φησὶν ὁ Κροτωνιάτης. Περὶ δὲ τὸν αὐτὸν χρόνον τοῦτον ἢ τε φωνὴ μεταβάλλειν ἄρχεται ἐπὶ τὸ τραχύτερον καὶ ἀνωμαλέστερον, οὐτ' ἔτι ὀξεῖα οὖσα οὔτε πω βαρεῖα, οὔτε πᾶσα ὁμαλή, ἀλλ' ὁμοία φαινομένη ταῖς παρανενευρισμέναις καὶ τραχείαις χορδαῖς· ὁ καλοῦσι τραγίζειν. Γίνεται δὲ τοῦτο μᾶλλον τοῖς πειρωμένοις ἀφροδισιάζειν· τοῖς γὰρ περὶ ταῦτα προθυμουμένοις καὶ μεταβάλλουσιν αἱ φωναὶ εἰς τὴν τῶν ἀνδρῶν φωνήν, ἀπεχομένοις δὲ τούναντίον· ἂν δὲ καὶ συναποβιάζωνται ταῖς ἐπιμελείαις, ὅπερ ποιοῦσιν ἔνιοι τῶν περὶ τὰς χορείας σπουδαζόντων, καὶ μέχρι πόρρω διαμένει καὶ τὸ πάμπαν μικρὰν λαμβάνει μεταβολήν.

Καὶ μαστῶν ἔπαρσις γίνεται καὶ αἰδοίων, οὐ μεγέθει μόνον ἀλλὰ καὶ εἶδει. Συμβαίνει δὲ περὶ τοῦτον τὸν χρόνον τοῖς τε πειρωμένοις τρίβεσθαι περὶ τὴν τοῦ σπέρματος πρόεσιν οὐ μόνον ἡδονὴν γίνεσθαι τοῦ σπέρματος ἐξίοντος, ἀλλὰ καὶ λύπην.

Περὶ τὸν αὐτὸν δὲ χρόνον καὶ τοῖς θήλεσιν ἢ τ' ἔπαρσις γίνεται τῶν μαστῶν καὶ τὰ (581b.) καταμήνια καλούμενα καταρρήγνυται· τοῦτο δ' ἐστὶν αἷμα οἶον νεόσφακτον. Τὰ δὲ λευκὰ καὶ παιδίοις οὖσι γίνεται νέοις πάμπαν, μᾶλλον δ' ἂν ὑγρᾷ χρῶνται τροφῇ· καὶ κωλύει τὴν αὐξήσιν, καὶ τὰ σώματα ἰσχναίνει τῶν παιδίων. Τὰ δὲ καταμήνια γίνεται ταῖς πλείσταις ἤδη τῶν μαστῶν ἐπὶ δύο δακτύλους ἡρμένων. Καὶ ἡ φωνὴ δὲ καὶ ταῖς παισὶ μεταβάλλει περὶ τὸν χρόνον τοῦτον ἐπὶ τὸ βαρύτερον. Ὅλως μὲν γὰρ γυνὴ ἀνδρὸς ὀξυφωνότερον, αἱ δὲ νέαι τῶν πρεσβυτέρων, ὥσπερ καὶ οἱ παῖδες τῶν ἀνδρῶν· ἀλλ' ἔστιν ἡ φωνὴ ὀξυτέρα ἢ τῶν θηλειῶν παίδων ἢ τῶν ἀρρένων, καὶ ὁ παρθένιος αὐλὸς τοῦ παιδικοῦ ὀξύτερος.

Μάλιστα δὲ καὶ φυλακῆς δέονται περὶ τὸν χρόνον τοῦτον· μάλιστα γὰρ ὁρμῶσι πρὸς τὴν τῶν ἀφροδισίων χρῆσιν ἀρχομένων

αὐτῶν, ὥστ' ἂν μὴ διευλαβηθῶσι μηδὲν ἐπὶ πλεῖον κινήσαι οὐτ' αὐτὰ τὰ σώματα μεταβάλλει μηδὲν χρωμένων ἀφροδισίοις, ἀκολουθεῖν εἴωθεν εἰς τὰς ὕστερον ἡλικίας. Αἱ τε γὰρ νέαι πάνπαν ἀφροδισιαζόμεναι ἀκολαστότεραι γίνονται καὶ οἱ ἄρρενες, ἐάν τ' ἐπὶ θάτερα ἐάν τ' ἐπ' ἀμφοτέρα ἀφυλακτῆσωσιν· οἱ τε γὰρ πόροι ἀναστομοῦνται, καὶ ποιοῦσιν εὖρουν τὸ σῶμα ταύτη· καὶ ἅμα ἡ τότε μνήμη τῆς συμβαινούσης ἡδονῆς ἐπιθυμίαν ποιεῖ τῆς τότε γινομένης ὁμιλίας.

Γίνονται δέ τινες ἄνηβοι ἐκ γενετῆς καὶ ἄγονοι, διὰ τὸ πηρωθῆναι περὶ τὸν τόπον τὸν γόνιμον· ὁμοίως δὲ καὶ γυναῖκες γίνονται ἄνηβοι ἐκ γενετῆς.

Μεταβάλλουσι δὲ καὶ τὰς ἔξεις καὶ τὰ ἄρρενα καὶ τὰ θήλεα περὶ τε τὸ ὑγιεινότερα εἶναι καὶ νοσερώτερα, καὶ περὶ τὴν τοῦ σώματος ἰσχύτητα καὶ παχύτητα καὶ εὐτροφίαν· μετὰ γὰρ τὴν ἡβην οἱ μὲν ἐξ ἰσχνῶν παχύνονται καὶ ὑγιεινότεροι γίνονται, οἱ δὲ τοῦναντίον· ὁμοίως δὲ τοῦτο συμβαίνει καὶ ἐπὶ τῶν παρθένων. Ὅσοι μὲν γὰρ παῖδες ἢ ὅσαι παρθένοι περιττωματικὰ τὰ σώματα εἶχον, συναποκρινομένων τῶν τοιούτων τοῖς μὲν ἐν τῷ σπέρματι ταῖς δ' ἐν τοῖς καταμηνίοις ὑγιεινότερα τὰ σώματα γίνεται καὶ (582a.) εὐτραφέστερα, ἐξιόντων τῶν ἐμποδιζόντων τὴν ὑγίειαν καὶ τὴν τροφήν· ὅσοι δὲ τοῦναντίον, ἰσχνότερα καὶ νοσακερώτερα τὰ σώματα γίνεται· ἀπὸ γὰρ τῆς φύσεως καὶ τῶν καλῶς ἐχόντων ἢ ἀπόκρισις γίνεται τοῖς μὲν ἐν τῷ σπέρματι ταῖς δ' ἐν τοῖς καταμηνίοις.

Ἔτι δὲ ταῖς γε παρθένοις καὶ τὰ περὶ τοὺς μαστοὺς γίνεται διαφερόντως ἐτέραις πρὸς ἐτέρας· αἱ μὲν γὰρ πάνπαν μεγάλους ἔχουσιν, αἱ δὲ μικροῦς. Ὡς ἐπὶ τὸ πολὺ δὲ συμβαίνει τοῦτο, ὅσαι ἂν παῖδες οὐσαι περιττωματικαὶ ᾤσιν· μελλόντων γὰρ καὶ οὐπω γινομένων τῶν γυναικείων, ὅσῳ ἂν πλείων ἢ ὑγρότης ᾗ, τοσούτῳ μᾶλλον ἀναγκάζει αἰρεσθαι ἄνω, ἕως ἂν καταρραγῇ· ὥστε τότε λαβόντες ὄγκον οἱ μαστοὶ διαμένουσι καὶ εἰς τὸ ὕστερον. Καὶ τῶν ἄρρένων δ' ἐπιδηλότεροι γίνονται καὶ γυναικικώτεροι οἱ μαστοί, καὶ νεωτέροις καὶ πρεσβυτέροις οὖσι, τοῖς ὑγροῖς καὶ λείοις καὶ μὴ φλεβώδεσι, καὶ τούτων μᾶλλον τοῖς μέλασιν ἢ λευκοῖς.

Μέχρι μὲν οὖν τῶν τριῶν ἐπτὰ ἐτῶν τὸ μὲν πρῶτον ἄγονα τὰ σπέρματά ἐστιν· ἔπειτα γόνιμα μὲν μικρὰ δὲ καὶ ἀτελῆ γεννῶσι καὶ οἱ νέοι καὶ αἱ νέαι, ὥσπερ καὶ ἐπὶ τῶν ἄλλων ζώων τῶν πλείστων.

Συλλαμβάνουσι μὲν οὖν αἱ νέαι θᾶπτον· ἐὰν δὲ συλλάβωσιν, ἐν τοῖς τόκοις πονοῦσι μᾶλλον. Καὶ τὰ σώματα δ' αὐτῶν ἀτελέστερα γίνεται ὥς ἐπὶ τὸ πολὺ καὶ γηράσκει θᾶπτον, τῶν τ' ἀφροδισιαστικῶν ἀρρένων καὶ τῶν γυναικῶν τῶν τοῖς τόκοις χρωμένων πλείοσιν· δοκεῖ γὰρ οὐδ' ἡ αὔξησις ἔτι γίνεσθαι μετὰ τοὺς τρεῖς τόκους. Καθίστανται δὲ καὶ σωφρονίζονται μᾶλλον ὅσαι τῶν γυναικῶν ἀκόλαστοι πρὸς τὴν ὁμιλίαν εἰσὶ τὴν τῶν ἀφροδισίων, ὅταν τοῖς τόκοις χρήσονται πολλοῖς. Μετὰ δὲ τὰ τρεῖς ἐπτὰ ἔτη αἱ μὲν γυναῖκες πρὸς τὰς τεκνοποιίας ἤδη εὐκαίρως ἔχουσιν, οἱ δ' ἄνδρες ἔτι ἔχουσιν ἐπίδοσιν.

Ἔστι δὲ τὰ μὲν λεπτὰ τῶν σπερμάτων ἄγονα, τὰ δὲ χαλαζώδη γόνιμα καὶ ἀρρενογόνα μᾶλλον· τὰ δὲ λεπτὰ καὶ μὴ θρομβώδη θηλυγόνα.

Καὶ γενείου δὲ τρίχωσις συμβαίνει τοῖς ἄρρεσι περὶ τὴν ἡλικίαν ταύτην.

Κεφάλαιο 2

Ἡ δὲ τῶν γυναικείων ὁρμὴ γίνεται περὶ φθίνοντας τοὺς μῆνας· διό φασί τινες τῶν σοφισζομένων καὶ τὴν σελήνην (582b.) εἶναι θῆλυ, ὅτι ἅμα συμβαίνει ταῖς μὲν ἢ κάθαρσις τῇ δ' ἢ φθίσις, καὶ μετὰ τὴν κάθαρσιν καὶ τὴν φθίσιν ἢ πλήρωσις ἀμφοῖν. Καὶ ταῖς μὲν συνεχῶς καθ' ἕκαστον ὀλιγάκις τὰ καταμήνια φοιτᾷ, παρὰ δὲ μῆνα τρίτον ταῖς πλείσταις.

Ὅσαις μὲν οὖν ὀλίγον χρόνον γίνεται, δύο ἢ τρεῖς ἡμέρας, ἀπαλλάττουσι ῥᾶον, ὅσαις δὲ πολλάς, χαλεπώτερον. Πονοῦσι γὰρ τὰς ἡμέρας ταύτας· ταῖς μὲν γὰρ ἀθρόα ἢ κάθαρσις γίνεται ταῖς δὲ κατ' ὀλίγον, τὸ δὲ σῶμα βαρύνεται πάσαις, ἕως ἂν ἐξέλθῃ. Πολλαῖς δὲ καὶ ὅταν ὁρμᾷ τὰ καταμήνια καὶ μέλλη ρήγνυσθαι, πνιγμοὶ γίνονται καὶ ψόφος ἐν ταῖς ὑστέραις, ἕως ἂν ῥαγῇ.

Φύσει μὲν οὖν ἡ σύλληψις γίνεται μετὰ τὴν τούτων ἀπαλλαγὴν ταῖς γυναιξίν· καὶ ὅσαις μὴ γίνεται ταῦτα, ὡς ἐπὶ τὸ πολὺ ἄτεκνοι διατελοῦσιν. Οὐ μὴν ἀλλὰ καὶ μὴ γινομένων τούτων ἔναι συλλαμβάνουσιν, ὅσαις συναθροίζεται ἱκμὰς τοσαύτη ὅση ταῖς γευναμέναις ὑπολείπεται μετὰ τὴν κάθαρσιν, ἀλλὰ μὴ ὥστε καὶ θύραζε ἐξιέναι. Καὶ γινομένων ἔτι ἔναι συλλαμβάνουσιν· ὕστερον δ' οὐ συλλαμβάνουσιν, ὅσαις εὐθὺς μετὰ τὴν κάθαρσιν αἱ ὑστέραι συμμύουσιν. Γίνεται δ' ἐνίαις καὶ κυούσαις διὰ τέλους τὰ γυναικεῖα· συμβαίνει μέντοι ταύταις φαῦλα τίκτειν, καὶ ἢ μὴ σώζεσθαι εἰς αὖξιν ἢ ἀσθενῇ τὰ ἔκγονα γίνεσθαι. Πολλαῖς δὲ καὶ διὰ τὸ δεῖσθαι τῆς συνουσίας ἢ διὰ τὴν νεότητα καὶ τὴν ἡλικίαν, ἢ διὰ τὸ χρόνον ἀπέχεσθαι πολύν, καταβαίνουσιν αἱ ὑστέραι κάτω, καὶ τὰ γυναικεῖα γίνεται πολλάκις τρεῖς τοῦ μηνός, ἕως ἂν συλλάβωσιν· τότε δ' ἀπέρχονται πάλιν εἰς τὸν ἄνω τόπον τὸν οἰκεῖον.

Ἐνίετε δὲ κἂν συμβῇ <εὔ> ἔχουσα, τύχη δ' ὕγρα οὖσα, ἀποφυσᾷ τοῦ σπέρματος τὸ ὑγρότερον.

Πάντων δὲ τῶν ζώων, ὥσπερ εἴρηται καὶ πρότερον, ταῖς γυναιξὶ μᾶλλον τῶν ἄλλων θηλειῶν ἢ κάθαρσις γίνεται πλείστη. Τοῖς μὲν γὰρ μὴ ζωοτοκοῦσιν οὐδὲν τοιοῦτον ἐπισημαίνει διὰ τὸ τὴν περίττωσιν ταύτην τρέπεσθαι εἰς τὸ σῶμα (μεῖζω τε γὰρ ἔνια τῶν ἄρρένων ἐστὶ, καὶ ἔτι τοῖς μὲν εἰς φολίδας τοῖς δ' εἰς λεπίδας τοῖς δ' εἰς τὸ τῶν πτερῶν ἀναλίσκεται πλῆθος), τοῖς δὲ πεζοῖς καὶ ζωοτόκοις

εἷς τε τὰς τρίχας καὶ τὸ σῶμα (λεῖον γὰρ (583a.) ἄνθρωπός ἐστι μόνον) καὶ εἰς τὰ οὖρα (παχεῖαν γὰρ τὰ πλεῖστα καὶ πολλὴν τὰ τοιαῦτα ποιεῖται τὴν ἔκκρισιν)· ταῖς δὲ γυναιξὶν ἀντὶ τούτων τρέπεται τὸ περίττωμα εἰς τὴν κάθαρσιν. Ὅμοίως δ' ἔχει τοῦτο καὶ ἐπὶ τῶν ἀρρένων· πλεῖστον γὰρ ὥς κατὰ τὸ μέγεθος ἀφήσει σπέρμα τῶν ἄλλων ζώων ἄνθρωπος (διὸ καὶ λειότατον τῶν ζώων ἐστὶν ἄνθρωπος), καὶ αὐτῶν δ' οἱ ὑγρότεροι τὰς φύσεις καὶ μὴ πολύσαρκοι λίαν, καὶ οἱ λευκότεροι δὲ τῶν μελάνων. Καὶ ἐπὶ γυναικῶν δὲ τὸν αὐτὸν τρόπον· ταῖς γὰρ εὐσάρκοις πορεύεται εἰς τὴν τροφὴν τοῦ σώματος τὸ πολὺ τῆς ἐκκρίσεως. Καὶ ἐν ταῖς ὁμιλίαις δὲ τῶν ἀφροδισίων αἱ λευκότεραι τὴν φύσιν ἐξικμάζουσι μᾶλλον τῶν μελαινῶν. Ποιεῖ δὲ τῆς τροφῆς τὰ ὑγρά καὶ δριμέα τοιαύτην τὴν ὁμιλίαν μᾶλλον.

Κεφάλαιο 3

Γίνεται δὲ σημεῖον τοῦ συνειληφέναι ταῖς γυναίξιν, ὅταν εὐθύς γένηται μετὰ τὴν ὁμιλίαν ὁ τόπος ξηρός. Ἄν μὲν οὖν λεία τὰ χεῖλη ἢ τοῦ στόματος, οὐ θέλει συλλαμβάνειν (ἀπολισθαίνει γάρ), οὐδ' ἂν παχέα· ἂν δ' ἄπτομένῳ τῷ δακτύλῳ τραχύτερα ἢ καὶ ἀντέχῃται, καὶ ἂν λεπτὰ τὰ χεῖλη, τότε εὐκαίρως ἔχει πρὸς τὴν σύλληψιν. Πρὸς μὲν οὖν τὸ συλλαμβάνειν τοιαύτας δεῖ κατασκευάζειν τὰς ὑστέρας, πρὸς δὲ τὸ μὴ συλλαμβάνειν τούναντίον· ἂν γὰρ ἢ λεία τὰ χεῖλη, οὐ συλλαμβάνει· διὸ ἔνιοι τῆς μήτρας πρὸς ὃ πίπτει τὸ σπέρμα, ἀλείφουσιν ἐλαίῳ κεδρίνῳ ἢ ψιμυθίῳ ἢ λιβανωτῷ, διέντες ἐλαίῳ. Ἐὰν δὲ ἐπτὰ ἡμέρας, φανερόν ὅτι εἴληπται· αἱ γὰρ καλούμεναι ἐκρύσεις ἐν ταύταις γίνονται ταῖς ἡμέραις.

Αἱ δὲ καθάρσεις φοιτῶσι ταῖς πλείστας ἐπὶ τινα χρόνον συνειληφυῖαις, ἐπὶ μὲν τῶν θηλειῶν τριάκονθ' ἡμέρας μάλιστα, περὶ δὲ τετταράκοντα ἐπὶ τῶν ἄρρένων. Καὶ μετὰ τοὺς τόκους δ' αἱ καθάρσεις βούλονται τὸν αὐτὸν ἀριθμὸν ἀποδιδόναι τούτων, οὐ μὴν ἐξακριβοῦσί γε πάσαις ὁμοίως. Μετὰ δὲ τὴν σύλληψιν καὶ τὰς ἡμέρας τὰς εἰρημένας οὐκέτι κατὰ φύσιν, ἀλλ' εἰς τοὺς μαστοὺς τρέπεται καὶ γίνεται γάλα. Ἐπισημαίνει δὲ τὸ πρῶτον μικρόν τε καὶ ἀραχνιώδες τὸ γάλα ἐν τοῖς μαστοῖς.

Ὅταν δὲ συλ(583b.) (ἐνίαις γὰρ γίνονται πληρέστεραι εὐθύς· μᾶλλον δ' ἐπιδήλως τοῦτο συμβαίνει ταῖς ἰσχυαῖς) καὶ ἐν τοῖς βουβῶσιν.

Ἐπὶ μὲν οὖν τῶν ἄρρένων ὡς ἐπὶ τὸ πολὺ ἐν τῷ δεξιῷ μᾶλλον περὶ τὰς τετταράκοντα γίνεται ἡ κίνησις, τῶν δὲ θηλειῶν ἐν τῷ ἀριστερῷ περὶ ἐνενήκονθ' ἡμέρας. Οὐ μὴν ἀλλ' ἀκρίβειάν γε τούτων οὐδεμίαν ὑποληπτέον· πολλαῖς γὰρ θηλυτοκούσαις ἡ κίνησις ἐν τῷ δεξιῷ γίνεται, καὶ ταῖς ἐν τῷ ἀριστερῷ ἄρρεν· ἀλλὰ καὶ ταῦτα καὶ τὰ τοιαῦτα πάντα διαφέρει ὡς ἐπὶ τὸ πολὺ τῷ μᾶλλον καὶ ἥττον.

Περὶ δὲ τοῦτον τὸν χρόνον καὶ σχίζεται τὸ κύημα· τὸν δ' ἔμπροσθεν ἄναρθρον συνέστηκε κρεῶδες. Καλοῦνται δ' ἐκρύσεις μὲν αἱ μέχρι τῶν ἐπτὰ ἡμερῶν διαφθοραί, ἐκτρωσμοὶ δ' αἱ μέχρι τῶν τετταράκοντα· καὶ πλείστα διαφθίρεται τῶν κυημάτων ἐν ταύταις ταῖς ἡμέραις.

Τὸ μὲν οὖν ἄρρεν ὅταν ἐξέλθῃ τετταρακοσταῖον, ἂν μὲν εἰς ἄλλο

τι ἀφ᾽ ἧ τις, διαχεῖται τε καὶ ἀφανίζεται, ἐὰν δ' εἰς ψυχρὸν ὕδωρ, συνίσταται οἶον ἐν ὑμένι· τούτου δὲ διακνισθέντος φαίνεται τὸ ἔμβρυον τὸ μέγεθος ἡλικὸν μύρμηξ τῶν μεγάλων, τά τε μέλη δῆλα, τά τε ἄλλα πάντα καὶ τὸ αἰδοῖον, καὶ οἱ ὀφθαλμοὶ καθάπερ ἐπὶ τῶν ἄλλων ζώων μέγιστοι.

Τὸ δὲ θῆλυ, ὃ τι μὲν ἂν διαφθαρεῖ ἐντὸς τῶν τριῶν μηνῶν, ἀδιάρθρωτον ὥς ἐπὶ τὸ πολὺ φαίνεται· ὃ τι δ' ἂν ἐπιλάβῃ τοῦ τετάρτου μηνός, γίνεται ἐσχισμένον καὶ διὰ ταχέων λαμβάνει τὴν ἄλλην διάρθρωσιν. Τέως μὲν οὖν πᾶσαν τὴν τελείωσιν τῶν μορίων βραδύτερον ἀπολαμβάνει τὸ θῆλυ τοῦ ἄρρενος, καὶ δεκάμηνα γίνεται μᾶλλον τῶν ἀρρένων· ὅταν δὲ γένηται, θᾶπτον τὰ θήλεα τῶν ἀρρένων καὶ νεότητα καὶ ἀκμὴν λαμβάνει καὶ γῆρας, καὶ μᾶλλον αἱ πλείοσι χρώμεναι τόκοις, ὥσπερ εἴρηται πρότερον.

Κεφάλαιο 4

Ὅταν δὲ συλλάβῃ ἡ ὑστέρα τὸ σπέρμα, εὐθὺς συμμύει ταῖς πολλαῖς, μέχρι γένωνται ἑπτὰ μῆνες· τῷ δ' ὀγδόῳ χάσκουσιν· καὶ τὸ ἔμβρυον, ἐὰν ᾗ γόνιμον, προκαταβαίνει τῷ ὀγδόῳ μηνί. Τὰ δὲ μὴ γόνιμα ἀλλ' ἀποπεπνιγμένα ὀκτάμηνα ἐν τοῖς τόκοις οὐκ ἐκφέρουσιν ὀκτάμηνα αἱ γυναῖκες, οὔτε προκαταβαίνει κάτω τὰ ἔμβρυα τῷ ὀγδόῳ μηνί, οὔθ' αἱ ὑστέραι ἐν τῷ χρόνῳ τούτῳ χάσκουσιν· ἀλλὰ (584a.) σημεῖον ὅτι οὐ γόνιμον, ἐὰν γένηται μὴ συμπεσόντων τῶν εἰρημένων.

Μετὰ δὲ τὰς συλλήψεις αἱ γυναῖκες βαρύνονται τὸ σῶμα πᾶν, καὶ σκότοι πρὸ τῶν ὀμμάτων καὶ ἐν τῇ κεφαλῇ γίνονται πόνοι. Ταῦτα δὲ ταῖς μὲν θᾶττον καὶ σχεδὸν δεκαταίαις γίνεται, ταῖς δὲ βραδύτερον, ὅπως ἂν τύχωσιν οὔσαι τῷ περιττωματικαί εἶναι μᾶλλον καὶ ἥττον. Ἔτι δὲ ναυτίαι καὶ ἔμετοι λαμβάνουσι τὰς πλείστας, καὶ μάλιστα τὰς τοιαύτας, ὅταν αἱ τε καθάρσεις στῶσι καὶ μήπω εἰς τοὺς μαστοὺς τετραμμένα ᾖσιν.

Ἔναι μὲν οὖν ἀρχόμεναι μᾶλλον πονοῦσι τῶν γυναικῶν, ἔναι δ' ὕστερον, ἥδη τοῦ κυήματος ἔχοντος αὖξησιν μᾶλλον· πολλαῖς δὲ καὶ πολλάκις καὶ στραγγουρίαι γίνονται τὸ τελευταῖον. Ὡς μὲν οὖν ἐπὶ τὸ πολὺ ῥᾶον ἀπαλλάττουσιν αἱ τὰ ἄρρενα κύουσαι καὶ μᾶλλον μετ' εὐχροίας διατελοῦσιν, ἐπὶ δὲ τῶν θηλειῶν τὸναντίον· ἀχρούστεραι τε γὰρ ὥς ἐπὶ τὸ πολὺ, καὶ βαρύτερον διάγουσι, καὶ πολλαῖς περὶ τὰ σκέλη οἰδήματα καὶ ἐπάρσεις γίνονται τῆς σαρκός· οὐ μὴν ἀλλ' ἐνίαις γίνεται καὶ τάναντία τούτων.

Εἰώθασιν δὲ ταῖς κυούσαις ἐπιθυμίαι γίνεσθαι παντοδαπαὶ καὶ μεταβάλλειν ὀξέως, ὃ καλοῦσιν τινες κισσᾶν· καὶ ἐπὶ τῶν θηλειῶν ὀξύτεραι μὲν αἱ ἐπιθυμίαι, παραγινομένων δὲ ἥττον δύνανται ἀπολαύειν. Ὀλίγαις δὲ τισι συμβαίνει βέλτιον ἔχειν τὸ σῶμα κυούσαις. Μάλιστα δ' ἀσῶνται, ὅταν ἄρχωνται τὰ παιδιά τρίχας ποιεῖν. Αἱ δὲ τρίχες ταῖς μὲν κυούσαις αἱ μὲν συγγενεῖς γίνονται ἐλάττους καὶ ρέουσιν, ἐν οἷς δὲ μὴ εἰώθασιν ἔχειν τρίχας, ταῦτα δασύνεται μᾶλλον.

Καὶ κίνησιν δὲ παρέχεται ἐν τῷ σώματι μᾶλλον ὥς ἐπὶ τὸ πολὺ τὸ ἄρρεν τοῦ θήλεος, καὶ τίκτεται θᾶττον, τὰ δὲ θήλεα βραδύτερον. Καὶ ὁ πόνος ἐπὶ μὲν τοῖς θήλεσι συνεχῆς καὶ νωθρότερος, ἐπὶ δὲ τοῖς

ἄρρεσιν ὅξυς μέν, πολλῷ δὲ χαλεπώτερος. Αἱ δὲ πλησιάζουσai πρὸ τῶν τόκων τοῖς ἀνδράσι θάττον τίκτουσιν. Δοκοῦσι δ' ὠδίνειν αἱ γυναῖκες ἐνίστε οὐ γινομένης ὠδίνος, ἀλλὰ διὰ τὸ τὴν κεφαλὴν στρέφειν τὸ ἔμβρυον φαίνεται ὠδίνος ἀρχὴ τοῦτο γίνεσθαι.

Τὰ μὲν οὖν ἄλλα ζῶα μοναχῶς ποιεῖται τὴν τοῦ τόκου τελείωσιν· εἷς γὰρ ὥρισται τοῦ τόκου χρόνος πᾶσιν· ἀνθρώπῳ δὲ πολλοὶ μόνῳ τῶν ζώων· καὶ γὰρ ἐπτάμηνα καὶ ὀκτάμηνα καὶ ἐννεάμηνα γίνεται, καὶ δεκάμηνα τὸ πλεῖστον· ἔνιαι δ' (584b.) ἐπιλαμβάνουσι καὶ τοῦ ἐνδεκάτου μηνός.

Ὅσα μὲν οὖν γίνεται πρότερα τῶν ἐπτὰ μηνῶν, οὐδὲν οὐδαμῇ δύναται ζῆν· τὰ δ' ἐπτάμηνα γόνιμα γίνεται πρῶτον, ἀσθενῇ δὲ τὰ πολλὰ (διὸ καὶ σπαργανοῦσιν ἐρίοις αὐτά), πολλὰ δὲ καὶ τῶν πόρων ἐνίους ἔχοντα ἀσχίστους, οἷον ὥτων καὶ μυκτῆρων· ἀλλ' ἐπαυξανομένοις διαρθροῦται, καὶ βιοῦσι πολλὰ καὶ τῶν τοιούτων. Τὰ δ' ὀκτάμηνα περὶ μὲν Αἴγυπτον καὶ ἐν ἐνίοις τόποις, ὅπου εὐέκφοροι αἱ γυναῖκες καὶ φέρουσί τε πολλὰ ῥαδίως καὶ τίκτουσι, καὶ γενόμενα δύναται ζῆν, κἂν τερατώδη γένηται, ἐνταῦθα μὲν ζῇ τὰ ὀκτάμηνα καὶ ἐκτρέφεται, ἐν δὲ τοῖς περὶ τὴν Ἑλλάδα τόποις ὀλίγα πάμπαν σώζεται, τὰ δὲ πολλὰ ἀπόλλυται· καὶ διὰ τὴν ὑπόληψιν, κἂν σωθῇ τι, νομίζουσιν οὐκ ὀκτάμηνον εἶναι τὸ γεγεννημένον, ἀλλὰ λαθεῖν ἑαυτὰς αἱ γυναῖκες συλλαβοῦσαι πρότερον.

Πονοῦσι δ' αἱ γυναῖκες μάλιστα τὸν μῆνα τὸν τέταρτον καὶ τὸν ὀγδοον, καὶ ἐὰν διαφθείρωσι τετάρτῳ ἢ ὀγδόῳ μηνί, διαφθεύονται καὶ αὐταὶ ὥς ἐπὶ τὸ πολὺ, ὥστ' οὐ μόνον τὰ ὀκτάμηνα οὐ ζῇ, ἀλλὰ καὶ διαφθειρομένων αἱ τίκτουσαι κινδυνεύουσιν.

Τὸν αὐτὸν δὲ τρόπον δοκεῖ λανθάνειν καὶ ὅσα φαίνεται τίκτεσθαι πολυχρονιώτερα τῶν ἐνδεκα μηνῶν· καὶ γὰρ τούτων ἢ τῆς συλλήψεως ἀρχὴ λανθάνει τὰς γυναῖκας· πολλάκις γὰρ πνευματικῶν γενομένων ἔμπροσθεν τῶν ὑστερῶν, μετὰ ταῦτα πλησιάσασαι καὶ συλλαβοῦσαι ἐκείνην οἶονται τὴν ἀρχὴν εἶναι τῆς συλλήψεως, δι' ἣν ἐχρήσαντο τοῖς σημείοις ὁμοίοις.

Τὸ δὲ δὴ πλῆθος τῶν τόκων τῆς τελειώσεως παρὰ τᾶλλα ζῶα τοῖς ἀνθρώποις ταύτην ἔχει τὴν διαφοράν· καὶ τῶν μὲν μονοτόκων ὄντων τῶν δὲ πολυτόκων, ἐπαμφοτερίζει τὸ γένος τὸ τῶν ἀνθρώπων. Τὸ μὲν γὰρ πλεῖστον καὶ παρὰ τοῖς πλείστοις ἐν τίκτουσιν αἱ γυναῖκες, πολλάκις δὲ καὶ πολλαχοῦ δίδυμα, οἷον καὶ περὶ Αἴγυπτον. Τίκτουσι δὲ καὶ τρία καὶ τέτταρα, περὶ ἐνίους μὲν καὶ σφόδρα τόπους, ὥσπερ

εἴρηται πρότερον. Πλείστα δὲ τίκεται πέντε τὸν ἀριθμόν· ἥδη γὰρ ὥπται τοῦτο καὶ ἐπὶ πλειόνων συμβεβηκός. Μία δέ τις ἐν τέτταρσι τόκοις ἔτεκεν εἴκοσιν· ἀνὰ πέντε γὰρ ἔτεκε, καὶ τὰ πολλὰ αὐτῶν ἐξετράφη.

Ἐν μὲν οὖν τοῖς ἄλλοις ζώοις, κἂν ἦ τὰ δίδυμα ἄρρεν καὶ θῆλυ, οὐδὲν ἦττον (585a.) ἐκτρέφεται γενόμενα καὶ σώζεται τῶν ἀρρένων ἢ θηλειῶν· ἐν δὲ τοῖς ἀνθρώποις ὀλίγα σώζεται τῶν διδύμων, ἐὰν ἦ τὸ μὲν θῆλυ τὸ δ' ἄρρεν.

Δέχεται δ' ὀχείαν κύοντα μάλιστα τῶν ζώων γυνὴ καὶ ἵππος· τὰ δ' ἄλλα ὅταν πληρωθῇ, φεύγει τοὺς ἄρρενας, ὅσα μὴ πέφυκεν ἐπικυῖσκεσθαι, καθάπερ δασύπους. Ἀλλ' ἵππος μὲν ἂν συλλάβῃ τὸ πρῶτον, οὐκ ἐπικυῖσκεται πάλιν, ἀλλ' ἐν τίκει μόνον ὡς ἐπὶ τὸ πολὺ· ἐπ' ἀνθρώπῳ δ' ὀλίγα μὲν, γέγονε δέ ποτε.

Τὰ μὲν οὖν ὕστερον πολλῷ χρόνῳ συλληφθέντα οὐδὲν λαμβάνει τέλος, ἀλλὰ πόνον παρασχόντα συνδιαφθείρει τὸ προϋπάρχον (ἥδη γὰρ συνέβη γενομένης διαφθορᾶς καὶ δώδεκα ἐκπεσεῖν τὰ ἐπικυηθέντα)· ἐὰν δ' ἐγγὺς ἢ σύλληψις ἐγένετο, τὸ ἐπικυηθὲν ἐξήνεγκαν, καὶ τίκτουσιν ὥσπερ δίδυμα γόνῳ, καθάπερ καὶ τὸν Ἴφικλέα καὶ τὸν Ἡρακλέα μυθολογοῦσιν. Γέγονε γὰρ καὶ τοῦτο φανερόν· μοιχευομένη γάρ τις τὸ μὲν τῶν τέκνων τῷ ἀνδρὶ ἐοικὸς ἔτεκε, τὸ δὲ τῷ μοιχῷ. Ἦδη δὲ καὶ δίδυμα κύουσά τις ἐπεκύησε τρίτον, γενομένου δὲ τοῦ χρόνου τοῦ καθήκοντος τὰ μὲν τελεόγονα τῷ χρόνῳ ἔτεκε, τὸ δὲ πεντάμηνον· καὶ τοῦτ' ἀπέθανεν εὐθύς. Καὶ ἑτέρα δέ τι συνέβη τεκούσῃ πρῶτον μὲν ἐπτάμηνον, ὕστερον δὲ δύο τελεόμηνα τεκεῖν· καὶ τούτων τὸ μὲν ἐτελεύτησε, τὰ δ' ἐβίωσεν.

Καὶ ἐκτιτρώσκουσαι δέ τινες συνέλαβον ἅμα, καὶ τὸ μὲν ἐξέβαλον τὸ δ' ἔτεκον.

Ταῖς δὲ πλείσταις, ἐὰν συγγένωνται κύουσαι μετὰ τὸν ὄγδοον μῆνα, περίπλεων μυξώδους τὸ παιδίον ἐξέρχεται γλισχρότητος. Καὶ τῶν ἐδεσμάτων δὲ τῶν προσφερομένων περίπλεων φαίνεται πολλάκις.

Κεφάλαιο 5

Καὶ τῶν ἀλὶ δαψιλεστέρω χρησαμένων οὐκ ἔχοντα γίνεται τὰ παιδία ὄνυχας.

Τὸ δὲ γάλα τὸ γινόμενον πρότερον τῶν ἑπτὰ μηνῶν ἄχρηστόν ἐστιν· ἀλλ' ἅμα τὰ τε παιδία γόνιμα καὶ τὸ γάλα χρήσιμον. Τὸ δὲ πρῶτον καὶ ἀλμυρόν, ὥσπερ τοῖς προβάτοις.

Μάλιστα δ' ἐν ταῖς κυήσεσι τοῦ οἴνου αἰσθάνονται αἱ πλείσται· διαλύονται τε γάρ, ἐὰν πίωσι, καὶ ἀδυνατοῦσιν.

Ἀρχὴ δὲ ταῖς γυναιξὶ τοῦ τεκνοῦσθαι καὶ τοῖς ἄρρεσι τοῦ τεκνοῦν, καὶ παῦλα ἀμφοτέροις, τοῖς μὲν ἢ τοῦ σπέρματος πρόεσις ταῖς δ' ἢ τῶν καταμηνίων, πλὴν οὗτ' ἀρχομένων γόνιμα (585b.) εὐθὺς οὗτ' ἔτι ὀλίγων γινομένων καὶ ἀσθενῶν. Ἡλικία δὲ τῆς μὲν ἀρχῆς εἴρηται· παύεται δὲ ταῖς γυναιξὶ ταῖς μὲν πλείσταις τὰ καταμήνια περὶ τετταράκοντα ἔτη, αἷς δ' ἂν ὑπερβάλῃ τὸν χρόνον τοῦτον, διαμένει μέχρι τῶν πεντήκοντα ἐτῶν, καὶ ἤδη τινὲς ἔτεκον· πλείω δὲ χρόνον οὐδεμία.

Κεφάλαιο 6

Οἱ δ' ἄνδρες οἱ μὲν πλεῖστοι γεννῶσι μέχρι ἐξήκοντα ἐτῶν, ὅταν δ' ὑπερβάλῃ ταῦτα, μέχρι ἐβδομήκοντα· καὶ ἤδη τινὲς γεγεννήκασιν ἐβδομήκοντα ἐτῶν ὄντες. Συμβαίνει δὲ πολλοῖς καὶ πολλαῖς γυναιξὶ καὶ ἀνδράσι μετ' ἀλλήλων μὲν συνεζευγμένοις μὴ δύνασθαι τεκνοποιεῖσθαι, διαζευχθεῖσι δέ. Τὸ δ' αὐτὸ συμβαίνει καὶ περὶ ἀρρενογονίας καὶ θηλυγονίας· ἐνίοτε γὰρ καὶ γυναῖκες καὶ ἄνδρες μετ' ἀλλήλων μὲν ὄντες θηλυγόνοι εἰσὶν ἢ ἀρρενογόνοι, διεζευγμένοι δὲ γίνονται τούναντίον. Καὶ κατὰ τὴν ἡλικίαν δὲ μεταβάλλουσιν· νέοι μὲν ὄντες μετ' ἀλλήλων θήλεα γεννῶσι, πρεσβύτεροι δ' ἄρρενα· τοῖς δὲ καὶ ἐπὶ τούτων συμβαίνει τούναντίον. Καὶ ἐπὶ τοῦ γεννᾶν δ' ὅλως τὸ αὐτό· νέοις μὲν οὖσιν οὐδὲν γίνεται, πρεσβυτέροις δέ· οἱ δὲ τὸ πρῶτον, ὕστερον δὲ γεννῶσιν οὐδέν.

Εἰσὶ δὲ καὶ τῶν γυναικῶν τινὲς αἱ μόλις μὲν συλλαμβάνουσιν, ἐὰν δὲ συλλάβωσιν, ἐκφέρουσιν· αἱ δὲ τούναντίον συλλαμβάνουσι μὲν ῥαδίως, οὐ δύνανται δ' ἐκφέρειν. Εἰσὶ δὲ καὶ ἄνδρες θηλυγόνοι καὶ γυναῖκες ἀρρενογόνοι, οἷον καὶ κατὰ τοῦ Ἡρακλέους μυθολογεῖται, ὃς ἐν δύο καὶ ἐβδομήκοντα τέκνοις θυγατέρα μίαν ἐγέννησεν. Αἱ δὲ μὴ δυνάμεναι συλλαμβάνειν ἐὰν ἢ διὰ θεραπείαν συλλάβωσιν ἢ δι' ἄλλην τινὰ σύμπτωσιν, ὥς ἐπὶ τὸ πολὺ θηλυτοκοῦσι μᾶλλον ἢ ἀρρενοτοκοῦσιν.

Πολλοῖς δὲ συμβαίνει καὶ τῶν ἀνδρῶν δυναμένοις γεννᾶν ὕστερον μὴ δύνασθαι, καὶ πάλιν καθίστασθαι εἰς αὐτό.

Γίνονται δὲ καὶ ἐξ ἀναπήρων ἀνάπηροι, οἷον ἐκ χωλῶν χωλοὶ καὶ τυφλῶν τυφλοί, καὶ ὅλως τὰ παρὰ φύσιν εἰκότες πολλάκις, καὶ σημεῖα ἔχοντες συγγενῇ, οἷον φύματα καὶ οὐλάς. Ἦδη δ' ἀπέδωκε τῶν τοιούτων τι καὶ διὰ τριῶν, οἷον ἔχοντός τινος στίγμα ἐν τῷ βραχίονι ὃ μὲν υἱὸς οὐκ ἐγένετο ὃ δ' υἱοῦς ἔχων ἐν τῷ αὐτῷ τόπῳ συγκεχυμένον μέλαν.

Ὀλίγα μὲν οὖν γίνεται τὰ τοιαῦτα, τὰ δὲ πλεῖστα γίνεται ὁλόκληρα ἐκ κολοβῶν, καὶ οὐδὲν ἀποτέτακται τούτων. Καὶ (586a.) εἰκότες δὲ τοῖς γεννήσασιν ἢ τοῖς ἄνωθεν γονεῦσιν, ὅτε δ' οὐδὲν οὐδενί. Αποδίδωσι δὲ καὶ διὰ πλειόνων γενῶν, οἷον ἐν Σικελίᾳ ἢ τῷ Αἰθίοπι μοιχευθεῖσα· ἢ μὲν γὰρ θυγάτηρ ἐγένετο οὐκ Αἰθίοψ, τὸ δ'

ἐκ ταύτης.

Καὶ ὥς μὲν ἐπὶ τὸ πολὺ τὰ θήλεα ἔοικε τῇ μητρὶ μᾶλλον, τὰ δ' ἄρρενα τῷ πατρί· γίνεται δὲ καὶ τοῦναντίον, τὰ μὲν θήλεα τῷ πατρί, τὰ δ' ἄρρενα τῇ μητρὶ. Καὶ κατὰ μέρη δὲ γίνονται ἐοικότα ἅττα [μέρη] ἑκατέρῳ. Τὰ δὲ δίδυμα ἤδη μὲν ἐγένετο καὶ οὐκ ἐοικότα ἀλλήλοις, τὰ δὲ πλεῖστα καὶ ὥς ἐπὶ τὸ πολὺ ἐοικότα, ἐπεὶ καὶ μετὰ τὸν τόκον τις ἐβδομαία συγγενομένη καὶ συλλαβοῦσα ἔτεκε τὸ ὕστερον τῷ προτέρῳ ἐοικός, ὥσπερ δίδυμον. Εἰσὶ δὲ καὶ γυναῖκες ἐοικότα αὐταῖς γεννῶσαι, αἱ δὲ τῷ ἀνδρί, ὥσπερ ἡ ἐν Φαρσάλῳ ἵππος ἢ Δικαία καλουμένη.

Κεφάλαιο 7

Ἐν δὲ τῇ τοῦ σπέρματος ἐξόδῳ πρῶτον μὲν ἡγεῖται πνεῦμα (δηλοῖ δὲ καὶ ἡ ἐξοδος ὅτι γίνεται ὑπὸ πνεύματος· οὐδὲν γὰρ ῥιπτεῖται πόρρῳ ἄνευ βίας πνευματικῆς)· ὅταν δὲ λάβηται τὸ σπέρμα τῆς ὑστέρας καὶ ἐγγχρονισθῇ, ὑμὴν περιίσταται. Φαίνεται γάρ, ὅταν πρὶν διαρθρωθῆναι ἐξέλθῃ, οἷον ὥδὸν ἐν ὑμένι περιεχόμενον ἀφαιρεθέντος τοῦ ὀστράκου· ὁ δ' ὑμὴν φλεβῶν μεστός.

Πάντα δὲ τὰ πλωτὰ καὶ πτηνὰ καὶ πεζά, εἴτε ζωοτοκεῖται ἢ ὠοτοκεῖται, ὁμοίως γίνεται· πλὴν τὸν ὀμφαλὸν τὰ μὲν πρὸς τὴν ὑστέραν ἔχει τὰ ζωοτοκούμενα, τὰ δὲ πρὸς τῷ ὠῷ, τὰ δ' ἀμφοτέρως, οἷον ἐπὶ γένους τινὸς ἰχθύων. Καὶ τὰ μὲν περιέχουσιν οἷον ὑμένες, τὰ δὲ χόρια· καὶ πρῶτον μὲν τοῦ ἐσχάτου ἐντὸς γίνεται τὸ ζῶον, εἴθ' ὑμὴν περὶ τοῦτον ἄλλος, τὸ μὲν πλεῖστον προσπεφυκῶς τῇ μήτρᾳ, τῇ δ' ἀφεστῶς καὶ ὕδωρ ἔχων. Μεταξὺ δ' ὑγρότης ὑδατώδης ἢ αἱματώδης, ὁ καλούμενος ὑπὸ τῶν γυναικῶν πρόφορος.

Κεφάλαιο 8

Αύξεται δὲ τὰ ζῶα πάντα, ὅσα ἔχει ὀμφαλόν, διὰ τοῦ ὀμφαλοῦ. Ὁ δ' ὀμφαλός, ὅσα μὲν κοτυληδόνας ἔχει, πρὸς τῇ κοτυληδόνι προσπέφυκεν, ὅσα δὲ λείαν ἔχει τὴν ὑστέραν, πρὸς τῇ ὑστέρᾳ ἐπὶ φλεβός. Σχῆμα δ' ἔχει ἐν τῇ ὑστέρᾳ τὰ μὲν τετράποδα πάντα ἐκτεταμένα, καὶ τὰ ἄποδα (586b.) πλάγια, οἷον ἰχθύς, τὰ δὲ δίποδα συγκεκαμμένα, οἷον ὄρνις· καὶ ἄνθρωπος συγκεκαμμένος ῥίνα μὲν μεταξὺ τῶν γονάτων ἔχει, ὀφθαλμοὺς δ' ἐπὶ τοῖς γόνασιν, ὧτα δ' ἐκτός. Ἔχει δ' ὁμοίως πάντα τὰ ζῶα τὴν κεφαλὴν ἄνω τὸ πρῶτον· αὐξανόμενα δὲ καὶ πρὸς τὴν ἐξοδὸν ὀρμῶντα κάτω περιάγεται, καὶ ἡ γένεσις ἐστὶν ἡ κατὰ φύσιν ἐπὶ κεφαλῇ· συγκεκαμμένα δὲ καὶ ἐπὶ πόδας γίνεται παρὰ φύσιν. Τὰ δὲ τῶν τετραπόδων ἔχει καὶ περιττώματα, ὅταν ἤδη τέλεια ᾖ, καὶ ὑγρὸν καὶ σφυράδας, τὰς μὲν ἐν τῷ ἐσχάτῳ τοῦ ἐντέρου, ἐν δὲ τῇ κύστει οὖρον. Τοῖς δ' ἔχουσι κοτυληδόνας ἐν τῇ μήτρᾳ τῶν ζῴων ἀεὶ ἐλάττους γίνονται αἱ κοτυληδόνες αὐξανομένου τοῦ ἐμβρύου, καὶ τέλος ἀφανίζονται.

Ὁ δ' ὀμφαλός ἐστι κέλυφος περὶ φλέβας, ὧν ἡ ἀρχὴ ἐκ τῆς ὑστέρας ἐστί, τοῖς μὲν ἔχουσι τὰς κοτυληδόνας ἐκ τῶν κοτυληδόνων, τοῖς δὲ μὴ ἔχουσιν ἀπὸ φλεβός. Εἰσὶ δὲ τοῖς μὲν μείζουσιν, οἷον τοῖς τῶν βοῶν ἐμβρύοις, τέτταρες αἱ φλέβες, τοῖς δ' ἐλάττουσι δύο, τοῖς δὲ πάμπαν μικροῖς, οἷον ὄρνισι, μία φλέψ. Τείνουσι δ' εἰς τὰ ἐμβρυα αἱ μὲν δύο διὰ τοῦ ἥπατος, ἥ αἱ καλούμεναι πύλαι εἰσὶ, πρὸς τὴν φλέβα τὴν μεγάλην, αἱ δὲ δύο πρὸς τὴν ἀορτὴν, ἥ σχίζεται καὶ γίνεται ἡ ἀορτὴ δύο ἐκ μιᾶς. Εἰσὶ δὲ περὶ τὴν συζυγίαν ἑκατέραν τῶν φλεβῶν ὑμένες, περὶ δὲ τοὺς ὑμένας ὁ ὀμφαλὸς οἷον ἔλυτρον. Αὐξανομένων δ' ἀεὶ μᾶλλον συμπύπτουσιν αὗται αἱ φλέβες. Τὸ δ' ἐμβρυον ἀδρυνόμενον εἰς τε τὰ κοῖλα ἔρχεται, καὶ ἐνταῦθα δηλόν ἐστι κινούμενον, καὶ ἐνίστε κυλινδεῖται περὶ τὸ αἰδοῖον.

Κεφάλαιο 9

Ὅταν δ' ὠδίνωσιν αἱ γυναῖκες, εἰς πολλὰ μὲν καὶ ἄλλα ἀποστηρίζονται αὐταῖς οἱ πόνοι, ταῖς δὲ πλείσταις εἰς ὁπότερον ἂν τύχη τῶν μηρῶν. Ὅσαις δ' ἂν περὶ τὴν κοιλίαν σφοδρότατοι γένωνται πόνοι, αὗται τάχιστα τίκτουσιν· καὶ ὅσαι μὲν τὴν ὀσφὺν προαλγοῦσι, μόλις τίκτουσιν, ὅσαι δὲ τὸ ἦτρον, ταχύ.

Ἄν μὲν οὖν ἀρρενοτοκῇ, προέρχονται οἱ ἰχῶρες ὕδαρεῖς ὑπαχροί, ἐὰν δὲ θηλυτοκῇ, αἱματώδεις, ὕγροι δὲ καὶ οὔτοι· ἐνίαις μέντοι συμβαίνει περὶ τὰς ὠδῖνας καὶ οὐδέτερα τούτων.

Τοῖς μὲν οὖν ἄλλοις ζῴοις οὐκ ἐπίπονοι (587a.) γίνονται οἱ τόκοι, ἀλλὰ μετριωτέως ἐπίδηλά ἐστιν ἐνοχλούμενα ὑπὸ τῆς ὠδίνος· ταῖς δὲ γυναιξὶ συμβαίνουσιν οἱ πόνοι ἰσχυρότεροι, καὶ μάλιστα ταῖς ἐδραΐαις καὶ ὅσαι μὴ εὐπλευροὶ μηδὲ δύνανται τὸ πνεῦμα κατέχειν. Δυστοκοῦσι δὲ μᾶλλον καὶ ἐὰν μεταξὺ ἀποπνεύσωσιν ἀποβιαζόμεναι τῷ πνεύματι.

Πρῶτον μὲν οὖν ὕδρωψ ἐξέρχεται κινουμένου τοῦ ἐμβρύου καὶ ῥηγνυμένων τῶν ὑμένων, ἔπειτα τὸ ἔμβρυον, στρεφομένων μὲν τῶν ὑστερῶν, καὶ τοῦ ὑστέρου τὰ ἔσω ἐκτὸς ἴσχοντος.

Κεφάλαιο 10

Καὶ τῆς μαίαις ἡ ὀμφαλοτομία μέρος ἐστὶν οὐκ ἀστόχου διανοίας· οὐ γὰρ μόνον περὶ τὰς δυστοκίας τῶν γυναικῶν τῇ εὐχερείᾳ δύνασθαι δεῖ βοηθεῖν, ἀλλὰ καὶ πρὸς τὰ συμβαίνοντα ἀγγλίνουν εἶναι καὶ περὶ τὴν τοῦ ὀμφαλοῦ ἀπόδωσιν τοῖς παιδίοις. Ἐὰν μὲν γὰρ καὶ τὸ ὕστερον συνεκπέσῃ, ἐρίῳ ἀποδεῖται ἀπὸ τοῦ ὑστέρου ὁ ὀμφαλός, καὶ ἀποτεμένεται ἄνωθεν· ἥ δ' ἂν ἀποδεθῇ, συμφύεται, τὸ δὲ συνεχὲς ἀποπίπτει. Ἐὰν δὲ λυθῇ τὸ ἄμμα, ἀποθνήσκει τοῦ αἵματος ἐκρυνέντος τὸ ἔμβρυον. Ἐὰν δὲ μὴ συνεχέσθῃ εὐθὺς τὸ ὕστερον, ἔξω ὄντος αὐτοῦ τοῦ παιδίου, ἔσω ἀποτεμένεται ἀποδεθέντος τοῦ ὀμφαλοῦ. Πολλάκις δ' ἔδοξε τεθνεὺς τίκτεσθαι τὸ παιδίον, ὅταν ἀσθενικοῦ ὄντος, πρὶν ἀποδεθῆναι τὸν ὀμφαλόν, τὸ αἶμα ἔξω εἰς τὸν ὀμφαλὸν καὶ τὸ πέριξ τύχῃ ἐξερρηγνός· ἀλλὰ τεχνικαὶ τινες ἤδη τῶν μαιῶν γενόμεναι ἀπέθλιψαν εἴσω ἐκ τοῦ ὀμφαλοῦ, καὶ εὐθὺς τὸ παιδίον, ὥσπερ ἔξαιμον γενόμενον πρότερον, πάλιν ἀνεβίωσεν.

Γίνεται δέ, καθάπερ ἐλέχθη πρότερον, κατὰ φύσιν ἐπὶ κεφαλὴν καὶ τὰλλα ζῶα, τὰ δὲ παιδιά καὶ τὰς χεῖρας παρατεταμένα παρὰ τὰς πλευράς. Ἐξελθόντα δ' εὐθὺς φθέγγεται, καὶ προσάγει πρὸς τὸ στόμα τὰς χεῖρας. Αἰφίσι δὲ καὶ περιττώματα τὰ μὲν εὐθὺς τὰ δὲ διὰ ταχέων, πάντα δ' ἐν ἡμέρᾳ· καὶ τοῦτο πλέον ἢ τοῦ παιδὸς κατὰ μέγεθος· ὁ καλοῦσιν αἱ γυναῖκες μηκώνιον. Χρῶμα δὲ τούτου αἱματῶδες καὶ σφόδρα μέλαν, καὶ πιττῶδες, μετὰ δὲ τοῦτο ἤδη γαλακτῶδες· σπᾶ γὰρ εὐθὺς καὶ τὸν μαστόν.

Πρὶν δ' ἐξελθεῖν οὐ φθέγγεται τὸ παιδίον, κἂν δυστοκούσης τὴν κεφαλὴν μὲν ὑπερέχῃ, τὸ δ' ὅλον σῶμα ἔχῃ ἐντός.

Ὅσαι δ' ἂν ἐν ταῖς (587b.) ἀποκαθάρσεσι προεξορμήσωσιν οἱ καθαρμοί, δυσαπαλλακτότεροι γίνονται τῶν ἐμβρύων. Ἐὰν δ' αἱ καθάρσεις μετὰ τὸν τόκον ἐλάττους γένωνται, καὶ ὅσων μόνον αἱ πρῶται, καὶ μὴ διατελέσωσιν εἰς τὰς τετταράκοντα, ισχύουσί τε μᾶλλον αἱ γυναῖκες καὶ συλλαμβάνουσι θᾶττον.

Τὰ δὲ παιδιά ὅταν γένωνται, τῶν τετταράκοντα ἡμερῶν ἐγρηγορότα μὲν οὔτε γελᾷ οὔτε δακρύει, νύκτωρ δ' ἐνίοτε ἄμφω· οὐδὲ κνιζόμενα τὰ πολλὰ αἰσθάνεται, τὸ δὲ πλεῖστον καθεύδει τοῦ χρόνου.

Αὐξανόμενον δ' αἰεὶ εἰς τὸ ἐγρηγορεῖν μεταβάλλει μᾶλλον· καὶ

ένυπνιαζόμενον δῆλον μὲν γίνεται, μνημονεύει δ' ὁψὲ τὰς φαντασίας.

Τοῖς μὲν οὖν ἄλλοις ζώοις οὐδεμία διαφορὰ τῶν ὀστέων, ἀλλὰ πάντα τετελεσμένα γίνεται· τοῖς δὲ παιδίοις τὸ βρέγμα λεπτόν, καὶ ὁψὲ πηγνυται. Καὶ τὰ μὲν ἔχοντα γίνεται ὀδόντας, τὰ δὲ παιδιά ἐβδόμῳ μηνὶ ἄρχονται ὀδοντοφυεῖν· φύει δὲ πρῶτον τοὺς προσθίους, καὶ τὰ μὲν τοὺς ἄνωθεν πρότερον, τὰ δὲ τοὺς κάτωθεν. Πάντα δὲ θᾶπτον φύουσιν, ὅσων αἱ τίτθαι θερμότερον ἔχουσι τὸ γάλα.

Κεφάλαιο 11

Μετὰ δὲ τοὺς τόκους καὶ τὰς καθάρσεις ταῖς γυναιξὶ τὸ γάλα πληθύνεται, καὶ ἐνίαις ρεῖ οὐ μόνον κατὰ τὰς θηλάς ἀλλὰ πολλαχῇ τοῦ μαστοῦ, ἐνίαις δὲ καὶ κατὰ τὰς μασχάλας· καὶ διαμένουσιν εἰς τὸν ὕστερον χρόνον στραγγαλίδες, ὅταν μὴ ἐκπεφθῇ μηδὲ ἐξέλθῃ ὑγρότης, ἀλλὰ πληρωθῇ· ἅπας γὰρ ὁ μαστὸς σομφός ἐστιν οὕτως, ὥστε κἂν ἐν τῷ πόματι λάβωσι τρίχα, πόνος ἐγγίνεται ἐν τοῖς μαστοῖς (ὁ καλοῦσι τριχιᾶν), ἕως ἂν ἡ αὐτομάτῃ ἐξέλθῃ θλιβομένη ἢ μετὰ τοῦ γάλακτος ἐκθηλασθῇ.

Τὸ δὲ γάλα ἔχουσιν ἕως ἂν πάλιν συλλάβωσιν· τότε δὲ παύεται καὶ σβέννυται ὁμοίως ἐπ’ ἀνθρώπων καὶ τῶν ἄλλων ζωοτόκων καὶ τετραπόδων. Τοῦ γάλακτος δ’ ἐξιόντος οὐ γίνονται αἱ καθάρσεις ὥς ἐπὶ τὸ πολὺ, ἐπεὶ ἤδη τισὶ θηλαζομέναις ἐγένετο κάθαρσις.

Ὅλως δ’ ἅμα πολλαχῇ οὐ συμβαίνει ἡ ὁρμὴ τῆς ὑγρότητος, οἷον ταῖς ἐχούσαις αἰμορροΐδας χεῖρους αἱ καθάρσεις ἐπιγίνονται. Ἐνίαις δὲ καὶ διὰ τῶν ἰξιῶν, ὅταν ἀπὸ τῆς ὀσφύος ἐκκριθῇ, πρὶν ἐλθεῖν εἰς τὰς ὑστέρας. Καὶ ὅσαις δ’ ἂν μὴ (588a.) γινομένων τῶν καθάρσεων αἷμα συμπίεση ἐμέσαι, οὐδὲν βλάπτονται.

Κεφάλαιο 12

Εἶωθε δὲ τὰ παιδιά τὰ πλεῖστα σπασμὸς ἐπιλαμβάνειν, καὶ μᾶλλον τὰ εὐτραφέστερα καὶ γάλακτι χρώμενα πλείονι ἢ παχυτέρῳ καὶ τίτθαις εὐσάρκοις. Βλαβερὸν δὲ πρὸς τὸ πάθος καὶ ὁ οἶνος ὁ μέλας μᾶλλον τοῦ λευκοῦ, καὶ ὁ μὴ ὑδαρής, καὶ τὰ πλεῖστα τῶν φυσιωδῶν, καὶ ἐὰν ἡ κοιλία στῇ. Τὰ πλεῖστα δ' ἀναιρεῖται πρὸ τῆς ἐβδόμης· διὸ καὶ τὰ ὀνόματα τότε τίθενται, ὥς πιστεύοντες ἤδη μᾶλλον τῇ σωτηρίᾳ. Καὶ ἐν ταῖς πανσελήνοις δὲ μᾶλλον πονοῦσιν. Ἐπικίνδυνον δὲ καὶ ὅσοις τῶν παιδίων οἱ σπασμοὶ ἐκ τοῦ νώτου ἄρχονται.

Βιβλίο 8

Κεφάλαιο 1

Τὰ μὲν οὖν περὶ τὴν ἄλλην φύσιν τῶν ζώων καὶ τὴν γένεσιν τοῦτον ἔχει τὸν τρόπον· αἱ δὲ πράξεις καὶ οἱ βίοι κατὰ τὰ ἦθη καὶ τὰς τροφὰς διαφέρουσιν. Ἐνεστί γὰρ ἐν τοῖς πλείστοις καὶ τῶν ἄλλων ζώων ἴχνη τῶν περὶ τὴν ψυχὴν τρόπων, ἅπερ ἐπὶ τῶν ἀνθρώπων ἔχει φανερωτέρας τὰς διαφοράς· καὶ γὰρ ἡμερότης καὶ ἀγριότης, καὶ πραότης καὶ χαλεπότης, καὶ ἀνδρία καὶ δειλία, καὶ φόβοι καὶ θάρρη, καὶ θυμοὶ καὶ πανουργίαι καὶ τῆς περὶ τὴν διάνοιαν συνέσεως ἐνεῖσιν ἐν πολλοῖς αὐτῶν ὁμοιοτήτες, καθάπερ ἐπὶ τῶν μερῶν ἐλέγομεν. Τὰ μὲν γὰρ τῷ μᾶλλον καὶ ἥττον διαφέρει πρὸς τὸν ἄνθρωπον, καὶ ὁ ἄνθρωπος πρὸς πολλὰ τῶν ζώων (ἓνια γὰρ τῶν τοιούτων ὑπάρχει μᾶλλον ἐν ἀνθρώπῳ, ἓνια δ' ἐν τοῖς ἄλλοις ζώοις μᾶλλον), τὰ δὲ τῷ ἀνάλογον διαφέρει· ὥς γὰρ ἐν ἀνθρώπῳ τέχνη καὶ σοφία καὶ σύνεσις, οὕτως ἐνίοις τῶν ζώων ἐστί τις ἐτέρα τοιαύτη φυσικὴ δύναμις. Φανερώτατον δ' ἐστί τὸ τοιοῦτον ἐπὶ τὴν τῶν παίδων ἡλικίαν βλέψασιν· ἐν τούτοις γὰρ τῶν μὲν ὕστερον ἔξεων ἐσομένων ἔστιν ἰδεῖν οἷον ἴχνη καὶ σπέρματα, διαφέρει δ' (588b.) οὐδὲν ὥς εἰπεῖν ἢ ψυχὴ τῆς τῶν θηρίων ψυχῆς κατὰ τὸν χρόνον τοῦτον, ὥστ' οὐδὲν ἄλογον εἰ τὰ μὲν ταῦτα τὰ δὲ παραπλήσια τὰ δ' ἀνάλογον ὑπάρχει τοῖς ἄλλοις ζώοις.

Οὕτω δ' ἐκ τῶν ἀψύχων εἰς τὰ ζῶα μεταβαίνει κατὰ μικρὸν ἢ φύσις, ὥστε τῇ συνεχείᾳ λανθάνει τὸ μεθόριον αὐτῶν καὶ τὸ μέσον ποτέρων ἐστίν. Μετὰ γὰρ τὸ τῶν ἀψύχων γένος τὸ τῶν φυτῶν πρῶτόν ἐστιν· καὶ τούτων ἕτερον πρὸς ἕτερον διαφέρει τῷ μᾶλλον δοκεῖν μετέχειν ζωῆς, ὅλον δὲ τὸ γένος πρὸς μὲν τᾶλλα σώματα φαίνεται σχεδὸν ὥσπερ ἔμψυχον, πρὸς δὲ τὸ τῶν ζώων ἄψυχον.

Ἡ δὲ μετάβασις ἐξ αὐτῶν εἰς τὰ ζῶα συνεχὴς ἐστίν, ὥσπερ ἐλέχθη πρότερον. Ἐνια γὰρ τῶν ἐν τῇ θαλάττῃ διαπορήσειεν ἂν τις πότερον ζῶόν ἐστιν ἢ φυτόν· προσπέφυκε γὰρ, καὶ χωριζόμενα πολλὰ διαφθείρεται τῶν τοιούτων, οἷον αἱ μὲν πίνναι προσπεφύκασιν, οἱ δὲ σωλῆνες ἀνασπασθέντες οὐ δύνανται ζῆν. Ὅλως δὲ πᾶν τὸ γένος τὸ τῶν ὀστρακοδέρμων φυτοῖς ἔοικε πρὸς τὰ πορευτικὰ τῶν ζώων.

Καὶ περὶ αἰσθήσεως, τὰ μὲν αὐτῶν οὐδ' ἐν σημαίνεται, τὰ δ' ἀμυδρῶς.

Ἡ δὲ τοῦ σώματος ἐνίων σαρκώδης ἐστί φύσις, οἷον τὰ τε

καλούμενα τήθυα καὶ τὸ τῶν ἀκαληφῶν γένος· ὁ δὲ σπόγγος παντελῶς ἔοικε τοῖς φυτοῖς.

Αἰεὶ δὲ κατὰ μικρὰν διαφορὰν ἕτερα πρὸ ἐτέρων ἤδη φαίνεται μᾶλλον ζῶν ἔχοντα καὶ κίνησιν. Καὶ κατὰ τὰς τοῦ βίου δὲ πράξεις τὸν αὐτὸν ἔχει τρόπον. Τῶν τε γὰρ φυτῶν ἔργον οὐδὲν ἄλλο φαίνεται πλὴν οἷον αὐτὸ ποιῆσαι πάλιν ἕτερον, ὅσα γίνεται διὰ σπέρματος· ὁμοίως δὲ καὶ τῶν ζῴων ἐνίων παρὰ τὴν γένεσιν οὐδὲν ἔστιν ἄλλο λαβεῖν ἔργον. Διόπερ αἱ μὲν τοιαῦται πράξεις κοιναὶ πάντων εἰσὶ· προσούσης δ' αἰσθήσεως ἤδη, περὶ τε τὴν ὀχείαν διὰ τὴν ἡδονὴν διαφέρουσιν αὐτῶν οἱ βίοι, καὶ περὶ τοὺς τόκους καὶ τὰς ἐκτροφὰς τῶν τέκνων. Τὰ μὲν οὖν ἀπλῶς, ὥσπερ φυτά, κατὰ τὰς ὥρας ἀποτελεῖ τὴν οἰκείαν γένεσιν· τὰ δὲ καὶ περὶ τὰς τροφὰς ἐκπονεῖται τῶν τέκνων, ὅταν δ' ἀποτελέσῃ, χωρίζονται καὶ κοινωνίαν (589a.) οὐδεμίαν ἔτι ποιοῦνται· τὰ δὲ συνετώτερα καὶ κοινωνοῦντα μνήμης ἐπὶ πλέον καὶ πολιτικώτερον χρῶνται τοῖς ἀπογόνους.

Ἐν μὲν οὖν μέρος τῆς ζωῆς αἱ περὶ τὴν τεκνοποιίαν εἰσὶ πράξεις αὐτοῖς, ἔτι δ' ἕτερον αἱ περὶ τὴν τροφήν· περὶ γὰρ δύο τούτων αἱ τε σπουδαὶ τυγχάνουσιν οὔσαι πᾶσαι καὶ ὁ βίος. Αἱ δὲ τροφαὶ διαφέρουσι μάλιστα κατὰ τὴν ὕλην ἐξ οἷας συνεστήκασιν. Ἡ γὰρ αὔξησις ἐκάστοις γίνεται κατὰ φύσιν ἐκ ταύτης. Τὸ δὲ κατὰ φύσιν ἡδύ· διώκει δὲ πάντα τὴν κατὰ φύσιν ἡδονήν.

Κεφάλαιο 2

Διήρηνται δὲ κατὰ τοὺς τόπους· τὰ μὲν γὰρ πεζὰ τὰ δ' ἔνυδρα τῶν ζώων ἐστίν. Διχῶς δὲ λεγομένης ταύτης τῆς διαφορᾶς, τὰ μὲν τῷ δέχεσθαι τὸν ἀέρα, τὰ δὲ τῷ τὸ ὕδωρ, λέγεται τὰ μὲν πεζὰ τὰ δ' ἔνυδρα· τὰ δ' οὐ δεχόμενα μὲν, πεφυκῶτα μέντοι πρὸς τὴν κρᾶσιν τῆς ψύξεως τὴν ἀφ' ἑκατέρου τούτων ἱκανῶς, τὰ μὲν πεζὰ τὰ δ' ἔνυδρα καλεῖται, οὗτ' ἀναπνέοντα οὔτε δεχόμενα τὸ ὕδωρ. Τὰ δὲ τῷ τὴν τροφήν ποιεῖσθαι καὶ διαγωγὴν ἐν ἑκατέρῳ τούτων.

Πολλὰ γὰρ δεχόμενα τὸν ἀέρα, καὶ τοὺς τόκους ἐν τῇ γῇ ποιούμενα, τὴν τροφήν ἐκ τῶν ἐνύδρων ποιεῖται τόπων καὶ διατρίβει τὸν πλεῖστον ἐν ὕδατι χρόνον· ἅπερ ἔοικεν ἐπαμφοτερίζειν μόνῃ τῶν ζώων· καὶ γὰρ ὡς πεζὰ καὶ ὡς ἔνυδρά τις ἂν θείη.

Τῶν δὲ δεχομένων τὸ ὑγρὸν οὐδὲν οὔτε πεζὸν οὔτε πτηνόν, οὐδὲ τὴν τροφήν ἐκ τῆς γῆς ποιεῖται, τῶν δὲ πεζῶν καὶ δεχομένων τὸν ἀέρα πολλά. Καὶ τὰ μὲν οὕτως ὥστε μὴδὲ ζῆν δύνασθαι χωριζόμενα τῆς τοῦ ὕδατος φύσεως, οἷον αἱ τε καλούμεναι θαλάττιαι χελῶναι καὶ κροκόδειλοι καὶ ἵπποι ποτάμιοι καὶ φῶκαι καὶ τῶν ἐλαττόνων ζώων οἷον αἱ τ' ἐμύδες καὶ τὸ τῶν βατράχων γένος· ταῦτα γὰρ ἅπαντα μὴ διὰ τινος ἀναπνεύσαντα χρόνου ἀποπνίγεται. Καὶ τίκτει δὲ καὶ ἐκτρέφει ἐν τῷ ξηρῷ, τὰ δὲ πρὸς τῷ ξηρῷ, διάγει δ' ἐν τῷ ὑγρῷ.

Περιττότατα δὲ πάντων ὁ δελφίς ἔχει τῶν ζώων, καὶ εἴ τι ἄλλο τοιοῦτόν ἐστι καὶ τῶν ἐνύδρων καὶ τῶν ἄλλων κητωδῶν, ὅσα (589b.) τοῦτον ἔχει τὸν τρόπον, οἷον φάλαινα καὶ ὅσ' ἄλλ' αὐτῶν ἔχει αὐλόν. Οὐ γὰρ ῥάδιον οὗτ' ἔνυδρον θεῖναι μόνον τούτων ἕκαστον οὔτε πεζόν, εἰ πεζὰ μὲν τὰ δεχόμενα τὸν ἀέρα θετέον, τὰ δὲ τὸ ὕδωρ ἔνυδρα τὴν φύσιν. Ἀμφοτέρων γὰρ μετείληφεν· καὶ γὰρ τὴν θάλατταν δέχεται καὶ ἀφίησι κατὰ τὸν αὐλόν, καὶ τὸν ἀέρα τῷ πλεύμονι. Τοῦτο γὰρ ἔχουσι τὸ μόριον, καὶ ἀναπνεύουσιν· διὸ καὶ λαμβανόμενος ὁ δελφίς ἐν τοῖς δικτύοις ἀποπνίγεται ταχέως διὰ τὸ μὴ ἀναπνεῖν. Καὶ ἔξω δὲ ζῆ πολλὸν χρόνον μύζων καὶ στένων, ὥσπερ καὶ τᾶλλα τῶν ἀναπνεόντων ζώων· ἔτι δὲ καθεύδων ὑπερέχει τὸ ῥύγχος, ὅπως ἀναπνέη.

Τὰ δ' αὐτὰ τάττειν εἰς ἀμφοτέρας τὰς διαιρέσεις ἄτοπον, ὑπεναντίους οὕσας· ἀλλ' ἔοικεν εἶναι τὸ ἔνυδρον ἔτι προσδιοριστέον. Τὰ μὲν γὰρ δέχεται τὸ ὕδωρ καὶ ἀφίησι διὰ τὴν

αὐτὴν αἰτίαν δι' ἣν περ τὰ ἀναπνέοντα τὸν ἀέρα, καταψύξεως χάριν, τὰ δὲ διὰ τὴν τροφήν· ἀνάγκη γὰρ ἐν ὑγρῷ λαμβάνοντα ταύτην καὶ τὸ ὑγρὸν ἅμα δέχεσθαι, καὶ δεχόμενα ὄργανον ἔχειν ᾧ ἐκπέμψει. Τὰ μὲν οὖν ἀνάλογον τῇ ἀναπνοῇ χρώμενα τῷ ὑγρῷ βράγχια ἔχει, τὰ δὲ διὰ τὴν τροφήν αὐλὸν τῶν ἐναίμων ζώων. Ὀμοίως δὲ τὰ τε μαλάκια καὶ τὰ μαλακόστρακα· καὶ γὰρ ταῦτα δέχεται τὸ ὑγρὸν διὰ τὴν τροφήν.

Ἐνυδρα δ' ἐστὶ τὸν ἕτερον τρόπον, διὰ τὴν τοῦ σώματος κρᾶσιν καὶ τὸν βίον, ὅσα δέχεται μὲν τὸν ἀέρα ζῆ δ' ἐν τῷ ὑγρῷ, ἢ ὅσα δέχεται μὲν τὸ ὑγρὸν καὶ ἔχει βράγχια, πορεύεται δ' εἰς τὸ ξηρὸν καὶ λαμβάνει τροφήν. Ἐν δὲ μόνον νῦν ὥπται τοιοῦτον, ὁ καλούμενος κορδύλος· οὗτος γὰρ πλεύμονα μὲν οὐκ ἔχει ἀλλὰ βράγχια, τετράπουν δ' ἐστὶν ὡς καὶ πεζεύειν πεφυκός.

Τούτων δὲ πάντων ἔοικεν ἡ φύσις ὥσπερ ἀνεῖ διεστράφθαι, καθάπερ τῶν τ' ἄρρενων ἓνια γίνεται θηλυκὰ καὶ τῶν θηλέων ἄρρενωπά. Ἐν μικροῖς γὰρ μορίοις λαμβάνοντα τὰ ζῶα διαφορὰν μέγα διαφέρειν φαίνεται κατὰ τὴν τοῦ ὅλου σώματος φύσιν. Δηλοῖ δ' ἐπὶ τῶν (590α.) ἐκτεμνομένων· μικροῦ γὰρ μορίου πηρωθέντος εἰς τὸ θῆλυ μεταβάλλει τὸ ζῶον. Ὡστε δῆλον ὅτι καὶ ἐν τῇ ἐξ ἀρχῆς συστάσει ἀκαριαίου τινὸς μεταβάλλοντος τῷ μεγέθει, ἂν ἢ ἀρχοειδές, γίνεται τὸ μὲν θῆλυ τὸ δ' ἄρρεν, ὅπως δ' ἀναιρεθέντος οὐδέτερον. Ὡστε καὶ τὸ πεζὸν καὶ τὸ ἔνυδρον εἶναι κατ' ἀμφοτέρους τοὺς τρόπους, ἐν μικροῖς μορίοις γινομένης τῆς μεταβολῆς. Διὸ συμβαίνει γίνεσθαι τὰ μὲν πεζὰ τὰ δ' ἔνυδρα τῶν ζώων. Καὶ τὰ μὲν οὐκ ἐπαμφοτερίζει, τὰ δ' ἐπαμφοτερίζει, διὰ τὸ μετέχειν τι τῆς ὕλης ἐν τῇ συστάσει τῆς γενέσεως, ἐξ οἷας ποιεῖται τὴν τροφήν· προσφιλὲς γὰρ ἐκάστῳ τῶν ζώων τὸ κατὰ φύσιν, ὥσπερ εἴρηται καὶ πρότερον.

Διηρημένων δὲ τῶν ζώων εἰς τὸ ἔνυδρον καὶ πεζὸν τριχῶς, τῷ τε δέχεσθαι τὸν ἀέρα ἢ τὸ ὕδωρ, καὶ τῇ κράσει τῶν σωμάτων, τὸ δὲ τρίτον ταῖς τροφαῖς, ἀκολουθοῦσιν οἱ βίοι κατὰ ταύτας τὰς διαιρέσεις· τὰ μὲν γὰρ κατὰ τὴν κρᾶσιν καὶ τὴν τροφήν ἀκολουθοῦσι, καὶ κατὰ τὸ δέχεσθαι τὸ ὕδωρ ἢ τὸν ἀέρα, τὰ δὲ τῇ κράσει καὶ τοῖς βίοις μόνον.

Τῶν μὲν οὖν ὀστρακοδέρμων ζώων ἓνια μὲν ἀκινήτιζοντα τρέφεται τῷ ποτίμῳ (διηθεῖται γὰρ διὰ τῶν πυκνῶν διὰ τὸ λεπτότερον εἶναι τῆς θαλάττης συμπετομένης), ὥσπερ καὶ τὴν ἐξ

ὑπαρχῆς λαμβάνει γένεσιν. Ὅτι δ' ἐν τῇ θαλάττῃ πότιμον ἔνεστι καὶ τοῦτο διηθεῖσθαι δύναται, φανερόν ἐστιν. Ἦδη γὰρ εἰληφέναι τούτου συμβέβηκε πείραν· ἐὰν γάρ τις κήρινον πλάσας λεπτὸν ἄγγειον καὶ περιδήσας καθῆι εἰς τὴν θάλατταν κενόν, ἐν νυκτὶ καὶ ἡμέρᾳ λαμβάνει ὕδατος πλῆθος, καὶ τοῦτο φαίνεται πότιμον.

Αἱ δ' ἀκαλῆφαι τρέφονται ὃ τι ἂν προσέσῃ ἰχθυδίων. Ἐχει δὲ τὸ στόμα ἐν μέσῳ· δῆλον δὲ τοῦτο μάλιστ' ἐστὶν ἐπὶ τῶν μεγάλων. Ἐχει δὲ καὶ ὥσπερ τὰ ὄστρεια, ἧ ὑποχωρεῖ ἔξω ἢ τροφή, πόρον. Ἔστι δ' οὗτος ἄνω· ἔοικε γὰρ ἢ ἀκαλήφῃ ὥσπερ τὸ ἔσω εἶναι τῶν ὀστρέων τὸ σαρκῶδες, τῇ δὲ πέτρᾳ χρῆσθαι ὡς ὀστρέῳ.

Καὶ αἱ λεπάδες δ' ἀπολυόμεναι μεταχωροῦσι καὶ τρέφονται. Ὅσα δὲ κινητικά, τὰ (590b.) μὲν ζωοφαγοῦντα τρέφεται τοῖς μικροῖς ἰχθυοῖς, οἷον ἡ πορφύρα (σαρκοφάγον γάρ ἐστι, διὸ καὶ δελεάζεται τοῖς τοιούτοις), τὰ δὲ καὶ τοῖς ἐν τῇ θαλάττῃ φυομένοις.

Αἱ δὲ χελῶναι αἱ θαλάττιαι τὰ τε κογχύλια νέμονται (ἔχουσι γὰρ τὸ στόμα ἰσχυρότατον πάντων· ὅτου γὰρ ἂν ἐπιλάβηται, ἢ λίθου ἢ ἄλλου ὁτουοῦν, ἀπεσθίει καὶ κατάγνυσιν), καὶ ἐξιούσα τὴν πόαν νέμεται. Πονοῦσι δὲ καὶ ἀπόλλυνται πολλάκις, ὅταν ἐπιπολάζουσαι ξηρανθῶσιν ὑπὸ τοῦ ἡλίου· καταφέρεσθαι γὰρ πάλιν οὐ δύνανται ῥαδίως.

Τὸν αὐτὸν δὲ τρόπον καὶ τὰ μαλακόστρακα· καὶ γὰρ ταῦτα παμφάγα· καὶ γὰρ λίθους καὶ ἰλὺν καὶ φυκία νέμονται καὶ κόπρον, οἷον οἱ πετραῖοι τῶν καρκίνων, καὶ σαρκοφαγοῦσιν. Οἱ δὲ κάραβοι κρατοῦσι μὲν καὶ τῶν μεγάλων ἰχθύων, καὶ τις συμβαίνει περιπέτεια τούτων ἐνίοις· τοὺς μὲν γὰρ καράβους οἱ πολύποδες κρατοῦσιν, ὥστε κἂν ὄντας πλησίον ἐν ταῦτῳ δικτύῳ αἰσθῶνται, ἀποθνήσκουσιν οἱ κάραβοι διὰ τὸν φόβον. Οἱ δὲ κάραβοι τοὺς γόγγρους· διὰ γὰρ τὴν τραχύτητα οὐκ ἐξολισθαίνουσιν αὐτῶν. Οἱ δὲ γόγγροι τοὺς πολύποδας κατεσθίουσιν· οὐδὲν γὰρ αὐτοῖς διὰ τὴν λειότητα δύνανται χρῆσθαι. Τὰ δὲ μαλάκια πάντα σαρκοφάγα ἐστίν. Νέμονται δ' οἱ κάραβοι τὰ ἰχθυῖδια θηρεύοντες παρὰ τὰς θαλάμας· καὶ γὰρ ἐν τοῖς πελάγεσιν ἐν τοῖς τοιούτοις γίνονται τόποις οἱ ἂν ὦσι τραχεῖς καὶ λιθώδεις· ἐν τούτοις γὰρ ποιοῦνται καὶ τὰς θαλάμας· ὃ τι δ' ἂν λάβῃ, προσάγεται πρὸς τὸ στόμα τῇ δικρῷ χηλῇ καθάπερ οἱ καρκίνοι. Βαδίζει δὲ κατὰ φύσιν μὲν εἰς τοῦμπροσθεν, ὅταν ἄφοβος ᾖ, καταβαλὼν τὰ κέρατα πλάγια· ὅταν δὲ φοβηθῇ, φεύγει ἀνάπαλιν καὶ μακρὰν ἐξακοντίζει. Μάχονται δὲ πρὸς ἀλλήλους ὥσπερ οἱ κριοὶ

τοῖς κέρασιν, ἐξαίροντες καὶ τύπτοντες· ὀρῶνται δὲ μετ' ἀλλήλων καὶ ἄθροοι πολλάκις ὥσπερ ἀγέλη.

Τὰ μὲν οὖν μαλακόστρακα τοῦτον ζῆ τὸν τρόπον, τῶν δὲ μαλακίων αἱ τευθίδες καὶ αἱ σηπίαι κρατοῦσι καὶ τῶν (591a.) μεγάλων ἰχθύων. Οἱ δὲ πολυπόδες μάλιστα κογχύλια συλλέγοντες, ἐξαιροῦντες τὰ σαρκία τρέφονται τούτοις· διὸ καὶ τοῖς ὀστράκοις οἱ θηρεύοντες γνωρίζουσι τὰς θαλάμας αὐτῶν.

Ὁ δὲ λέγουσί τινες, ὡς αὐτὸς αὐτὸν ἐσθίει, ψευδὲς ἐστίν· ἀλλ' ἀπεδηδεδεσμένας ἔχουσιν ἔνιοι τὰς πλεκτάνας ὑπὸ τῶν γόγγρων.

Οἱ δ' ἰχθύες τοῖς μὲν κυήμασι τρέφονται πάντες, ὅταν οἱ χρόνοι καθήκωσιν οὗτοι, τὴν δ' ἄλλην τροφήν οὐ τὴν αὐτὴν ποιοῦνται πάντες. Οἱ μὲν γὰρ αὐτῶν εἰσι σαρκοφάγοι μόνον, οἷον τὰ τε σελάχη καὶ οἱ γόγγροι καὶ αἱ χάνναι καὶ οἱ θύννοι καὶ λάβρακες καὶ σινόδοντες καὶ ἁμῖαι καὶ ὀρφοὶ καὶ μύραιναι· αἱ δὲ τρίγλαι καὶ φυκίοις τρέφονται καὶ ὀστρέοις καὶ βορβόρῳ καὶ σαρκοφαγοῦσιν· κέφαλοι δὲ τῷ βορβόρῳ, ὁ δὲ δάσκιλλος τῷ βορβόρῳ καὶ κόπρῳ, σκάρος δὲ καὶ μελάνουρος φυκίοις, ἡ δὲ σάλπη τῇ κόπρῳ καὶ φυκίοις· βόσκεται δὲ καὶ τὸ πρᾶσον, θηρεύεται δὲ καὶ κολοκύνθη μόνη τῶν ἰχθύων.

Ἀλληλοφαγοῦσι δὲ πάντες μὲν πλὴν κεστρέως, μάλιστα δ' οἱ γόγγροι. Ὁ δὲ κέφαλος καὶ ὁ κεστρεὺς ὅλως μόνοι οὐ σαρκοφαγοῦσιν· σημῖον δέ, οὔτε γὰρ ἐν τῇ κοιλίᾳ πώποτ' ἔχοντες εἰλημμένοι εἰσὶ τοιοῦτον οὐδέν, οὔτε δελέατι χρῶνται πρὸς αὐτοὺς ζώων σαρξὶν ἀλλὰ μάζῃ. Τρέφεται δὲ πᾶς κεστρεὺς φυκίοις καὶ ἄμμῳ. Ἔστι δ' ὁ μὲν κέφαλος, ὃν καλοῦσιν τινες χελῶνα, πρόσγειος, ὁ δὲ περαιῖας οὐ· βόσκεται δ' ὁ περαιῖας τὴν ἀφ' αὐτοῦ μύξαν, διὸ καὶ νῆστις ἐστίν αἰεὶ. Οἱ δὲ κέφαλοι νέμονται τὴν ἰλύν, διὸ καὶ βαρεῖς καὶ βλεννώδεις εἰσὶν, ἰχθὺν δ' ὅλως οὐκ ἐσθίουσιν· διὰ δὲ τὸ ἐν τῇ ἰλύϊ διατρίβειν ἐξανακολουμῶσι πολλάκις, ἵνα περιπλύνωνται τὸ βλέννος. Τὸν δὲ γόνον αὐτῶν οὐδὲν ἐσθίει τῶν θηρίων, διὸ γίνονται πολλοί· ἀλλ' ὅταν αὐξηθῶσι, τότε κατεσθίονται ὑπὸ τε τῶν ἄλλων ἰχθύων καὶ μάλιστα (591b.) ὑπὸ τοῦ ἀχάρνου. Λαίμαργος δὲ μάλιστα τῶν ἰχθύων ὁ κεστρεὺς ἐστὶ καὶ ἄπληστος, διὸ ἡ κοιλία περιτείνεται, καὶ ὅταν ἤ μὴ νῆστις, φαῦλος· ὅταν δὲ φοβηθῇ, κρύπτει τὴν κεφαλὴν ὡς ὅλον τὸ σῶμα κρύπτων. Σαρκοφαγεῖ δὲ καὶ ὁ σινόδων, καὶ τὰ μαλάκια κατεσθίει. Πολτάκις δὲ καὶ οὗτος καὶ ἡ χάννα ἐκβάλλουσι τὰς κοιλίας διώκοντες τοὺς ἐλάττους ἰχθῦς, διὰ τὸ πρὸς τῷ στόματι

τὰς κοιλίας τῶν ἰχθύων εἶναι καὶ στόμαχον μὴ ἔχειν.

Τὰ μὲν οὖν, ὥσπερ εἴρηται, σαρκοφάγα μόνον ἐστίν, οἷον δελφίς καὶ σινόδων καὶ χρύσοφρυς καὶ οἱ σελαχῶδεις τῶν ἰχθύων καὶ τὰ μαλάκια· τὰ δ' ὡς ἐπὶ τὸ πολὺ νέμονται μὲν τὸν πηλὸν καὶ τὸ φῦκος καὶ τὸ βρύον καὶ τὸ καλούμενον καυλίον καὶ τὴν φυομένην ὕλην, οἷον φυκίς καὶ κωβίδς καὶ οἱ πετραῖοι· ἡ δὲ φυκίς ἄλλης μὲν σαρκὸς οὐχ ἄπτεται, τῶν δὲ καρίδων. Πολλάκις δὲ καὶ ἀλλήλων ἄπτονται, καθάπερ εἴρηται, καὶ τῶν ἐλαττόνων οἱ μείζους. Σημεῖον δ' ὅτι σαρκοφαγοῦσιν· ἀλίσκονται γὰρ τοιοῦτοις δελέασιν. Καὶ ἁμία δὲ καὶ θύννος καὶ λάβραξ τὰ μὲν πολλὰ σαρκοφαγοῦσιν, ἄπτονται δὲ καὶ φυκίων. Ὁ δὲ σάργος ἐπινέμεται τῇ τρίγλῃ, καὶ ὅταν ἡ τρίγλη κινήσασα τὸν πηλὸν ἀπέλθῃ (δύναται γὰρ ὀρύττειν), ἐπικαταβάς νέμεται καὶ τοὺς ἀσθενεστέρους ἑαυτοῦ κωλύει συνεπινεῖν. Δοκεῖ δὲ τῶν ἰχθύων ὁ καλούμενος σκάρος μηρυκάζειν ὥσπερ τὰ τετράποδα μόνος.

Τοῖς μὲν οὖν ἄλλοις ἰχθύσιν ἡ θήρα τῶν ἡττόνων καταντικρὺ γίνεται τοῖς στόμασιν, ὥνπερ πεφύκασι τρόπον νεῖν· οἱ δὲ σελαχῶδεις καὶ οἱ δελφῖνες καὶ πάντες οἱ κητώδεις ὑπτιοὶ ἀναπίπτοντες λαμβάνουσιν· κάτω γὰρ τὸ στόμα ἔχουσιν. Διὸ σώζονται μᾶλλον οἱ ἐλάττους· εἰ δὲ μή, πάμπαν ἂν ὀλίγοι δοκοῦσιν εἶναι· καὶ γὰρ ἡ τοῦ δελφίνος ὀξύτης καὶ δύναμις τοῦ φαγεῖν δοκεῖ εἶναι θαυμαστή.

Τῶν δ' ἐγγελύων τρέφονται ὀλίγοι μὲν τινες καὶ (592a.) ἐνιαχοῦ καὶ τῇ ἰλύϊ καὶ σιτίοις, ἐὰν τις παραβάλῃ, αἱ μέντοι πλεῖστοι τῷ ποτίμῳ ὕδατι· καὶ τοῦτο τηροῦσιν οἱ ἐγγελυοτρόφοι ὅπως ὅτι μάλιστα καθαρὸν ᾗ, ἀπορρέον ἀεὶ καὶ ἐπιρρέον ἐπὶ πλαταμώνων· ἡ κονιῶνται τοὺς ἐγγελεῶνας. Ἀποπνίγονται γὰρ ταχύ, ἐὰν μὴ καθαρὸν ᾗ τὸ ὕδωρ· ἔχουσι γὰρ τὰ βράγχια μικρά. Διόπερ ὅταν θηρεύωσι, ταράττουσι τὸ ὕδωρ· καὶ ἐν τῷ Στρυμόνι δὲ περὶ Πλειάδας ἀλίσκονται· τότε γὰρ ἀναθολοῦται τὸ ὕδωρ καὶ ὁ πηλὸς ὑπὸ πνευμάτων γινομένων ἐναντίων· εἰ δὲ μή, συμφέρει ἡσυχίαν ἔχειν.

Ἀποθανοῦσαι δ' αἱ ἐγγέλους οὐκ ἐπιπολάζουσιν οὐδὲ φέρονται ἄνω, ὥσπερ οἱ πλεῖστοι τῶν ἰχθύων· ἔχουσι γὰρ τὴν κοιλίαν μικράν. Δημὸν δ' ὀλίγοι μὲν ἔχουσιν, αἱ δὲ πλεῖστοι οὐκ ἔχουσιν. Ζῶσι δ' ἐκ τοῦ ὕγρου ἀφαιρούμεναι ἡμέρας καὶ πέντε καὶ ἕξ, καὶ βορείων μὲν ὄντων πλείους, νοτίων δ' ἐλάττους. Καὶ μεταβαλλόμεναι τοῦ θέρους εἰς τοὺς ἐγγελεῶνας ἐκ τῶν λιμνῶν ἀποθνήσκουσι, χειμῶνος δ' οὔ.

Καὶ τὰς μεταβολὰς δ' οὐχ ὑπομένουσι τὰς ἰσχυράς, οἷον καὶ τοῖς

φέρουσιν ἐὰν βάπτωσιν εἰς ψυχρόν· ἀπόλλυνται γὰρ ἀθρόαι πολλάκις. Ἀποπνίγονται δὲ καὶ ἐὰν ἐν ὀλίγῳ ὕδατι τρέφονται. Τὸ δ' αὐτὸ τοῦτο καὶ ἐπὶ τῶν ἄλλων συμβαίνει ἰχθύων· ἀποπνίγονται γὰρ ἐν τῷ αὐτῷ ὕδατι καὶ ὀλίγῳ ἀεὶ ὄντες, ὥσπερ καὶ τὰ ἀναπνέοντα, ἐὰν περιπωμασθῇ ὀλίγος ἀήρ. Ζῶσι δ' ἔνιαι ἐγγέλυσ καὶ ἑπτὰ καὶ ὀκτὼ ἔτη.

Τροφῇ δὲ καὶ οἱ ποτάμιοι χρῶνται ἀλλήλους τ' ἐσθίοντες καὶ βοτάνας καὶ ρίζας, κἄν τι ἐν τῷ βορβόρῳ λάβωσιν. Νέμονται δὲ μᾶλλον τῆς νυκτός, τὴν δ' ἡμέραν εἰς τὰ βαθέα ὑποχωροῦσιν. Τὰ μὲν οὖν περὶ τὴν τῶν ἰχθύων τροφήν τοῦτον ἔχει τὸν τρόπον.

Κεφάλαιο 3

Τῶν δ' ὀρνίθων ὅσοι μὲν γαμψώνυχες, σαρκοφάγοι πάντες εἰσί, σῖτον δ' οὐδ' ἐάν τις ψωμίξῃ δύνανται (592b.) καταπίνειν, οἷον τὰ τε τῶν ἀετῶν γένη πάντα καὶ ἰκτῖνοι καὶ ἰέρακες ἅμφω, ὃ τε φαβοτύπος καὶ ὁ σπιζίας (διαφέρουσι δ' οὗτοι τὸ μέγεθος πολὺ ἀλλήλων), καὶ ὁ τριόρχης· ἔστι δ' ὁ τριόρχης τὸ μέγεθος ὅσον ἰκτῖνος, καὶ φαίνεται οὗτος διὰ παντός. Ἔτι φήνη καὶ γύψ· ἔστι δ' ἡ μὲν φήνη τὸ μέγεθος ἀετοῦ μείζων, τὸ δὲ χρῶμα σποδοειδές, τῶν δὲ γυπῶν δύο ἐστὶν εἶδη, ὁ μὲν μικρὸς καὶ ἐκλευκότερος, ὁ δὲ μείζων καὶ σποδοειδέστερος.

Ἔτι τῶν νυκτερινῶν ἔνιοι γαμψώνυχές εἰσιν, οἷον νυκτικόραξ, γλαυξ, βύας. Ἔστι δ' ὁ βύας τὴν μὲν ἰδέαν ὅμοιος γλαυκί, τὸ δὲ μέγεθος ἀετοῦ οὐδὲν ἐλάττων. Ἔτι δ' ἐλεὸς καὶ αἰγώλιος καὶ σκῶψ. Τούτων δ' ὁ μὲν ἐλεὸς μείζων ἀλεκτρύνος, ὁ δ' αἰγώλιος παραπλήσιος, ἀμφοτέρω δὲ θηρεύουσι τὰς κίττας· ὁ δὲ σκῶψ ἐλάττων γλαυκός· πάντα δὲ ταῦτα τρία ὄντα ὅμοια τὰς ὄψεις καὶ σαρκοφάγα πάντα.

Εἰσὶ δὲ καὶ τῶν μὴ γαμψώνυχων ἔνιοι σαρκοφάγοι, οἷον ἡ χελιδών. Τὰ δὲ σκωληκοφάγα, οἷον σπίζα, στρουθός, βατίς, γλωρίς, αἰγιθαλός. Ἔστι δὲ τῶν αἰγιθαλῶν εἶδη τρία, ὁ μὲν σπιζίτης μέγιστος (ἔστι γὰρ ὅσον σπίζα), ἕτερος δ' ὀρεινὸς διὰ τὸ διατρίβειν ἐν τοῖς ὄρεσιν, οὐραῖον μακρὸν ἔχων· ὁ δὲ τρίτος ὅμοιος μὲν τούτοις, διαφέρει δὲ κατὰ τὸ μέγεθος· ἔστι γὰρ ἐλάχιστος. Ἔτι δὲ συκαλὶς, μελαγκόρυφος, πυρρούλας, ἐρίθακος, ἐπιλαΐς, οἴστρος, τύραννος· οὗτος τὸ μέγεθος μικρῷ μείζων ἀκρίδος, ἔστι δὲ φοινικοῦν λόφον ἔχων, καὶ ἄλλως εὐχαρὶ τὸ ὀρνίθιον καὶ εὐρυθμον. Ἄνθος· οὗτος τὸ μέγεθος ὅσον σπίζα. Ὀρόσπιζος· οὗτος σπίζῃ ὅμοιος καὶ τὸ μέγεθος παραπλήσιος, πλὴν ἔχει <τὸ> περὶ τὸν αὐχένα κυανοῦν, καὶ διατρίβει ἐν τοῖς ὄρεσιν. Ἔτι βασιλεύς, σπερμολόγος. Ταῦτα μὲν οὖν καὶ τὰ τοιαῦτα τὰ μὲν ὅλως, τὰ δ' ὡς ἐπὶ τὸ πολὺ σκωληκοφάγα, τὰ δὲ τοιάδε ἀκανθοφάγα, ἀκανθίς, θραυπίς, ἔτι ἡ καλουμένη (593a.) χρυσομήτρις. Ταῦτα γὰρ πάντα ἐπὶ τῶν ἀκανθῶν νέμεται, σκωλήκα δ' οὐδὲν οὐδ' ἔμψυχον οὐδέν· ἐν ταῦτῳ δὲ καθεύδει καὶ νέμεται ταῦτα.

Ἄλλα δ' ἐστὶ σκνιποφάγα, ἃ τοὺς σκνῖπας θηρεύοντα ζῇ μάλιστα, οἷον πιπὼ ἢ τε μείζων καὶ ἡ ἐλάττων· καλοῦσι δὲ τινες ἀμφοτέρα

ταῦτα δρυοκολάπτας· ὅμοια δ' ἀλλήλοις, καὶ φωνὴν ἔχουσιν ὁμοίαν, πλὴν μείζω τὸ μείζον· νέμεται δ' ἀμφοτέρω ταῦτα πρὸς τὰ ξύλα προσπετόμενα. Ἔτι κελεύς· ἔστι δ' ὁ κελεύς τὸ μέγεθος ὅσον τρυγῶν, τὸ δὲ χρῶμα χλωρὸς ὅλος· ἔστι δὲ ξυλοκόπος σφόδρα, καὶ νέμεται ἐπὶ τῶν ξύλων τὰ πολλά, φωνὴν τε μεγάλην ἔχει· γίνεται δὲ μάλιστα τὸ ὄρνεον τοῦτο περὶ Πελοπόννησον. Ἄλλος ὃς καλεῖται κνιπολόγος, τὸ δὲ μέγεθος μικρὸς ὅσον ἀκανθυλλίς, τὴν δὲ χροάν σποδοειδῆς καὶ κατάστικτος· φωνεῖ δὲ μικρόν· ἔστι δὲ καὶ τοῦτο ξυλοκόπον.

Ἄλλα δ' ἔστιν ἡ ζῆ καρποφαγοῦντα καὶ ποοφαγοῦντα, οἶον φάψ, φάττα, περιστερὰ, οἰνάς, τρυγῶν. Φάττα μὲν οὖν καὶ περιστερὰ αἰε φαίνονται, τρυγῶν δὲ τοῦ θέρους· τοῦ γὰρ χειμῶνος ἀφανίζεται· φωλεῖ γάρ. Οἰνάς δὲ τοῦ φθινοπώρου καὶ φαίνεται μάλιστα καὶ ἀλίσκεται· ἔστι δὲ τὸ μέγεθος ἢ οἰνάς μείζων μὲν περιστερᾶς, ἐλάττων δὲ φαβός· ἢ δ' ἄλωσις αὐτῆς γίνεται μάλιστα καπτούσης τὸ ὕδωρ. Ἀφικνοῦνται δ' εἰς τοὺς τόπους τούτους ἔχουσαι νεοττούς· τὰ δ' ἄλλα πάντα τοῦ θέρους ἀφικνούμενα νεοττεύει ἐνταῦθα, καὶ ἐκτρέφει τὰ πλεῖστα ζώοις, πλὴν τῶν περιστεροειδῶν. Πάντων δ' ὡς εἰπεῖν τῶν ὀρνίθων οἱ μὲν πεξεύουσι περὶ τὴν τροφήν, οἱ δὲ περὶ ποταμοὺς καὶ λίμνας βιοτεύουσιν, οἱ δὲ περὶ τὴν θάλατταν, ὅσοι μὲν στεγανόποδες, ἐν αὐτῷ τῷ ὕδατι ποιούμενοι τὴν πλείστην διατριβήν, ὅσοι δὲ σχιζόποδες, περὶ αὐτὸ τὸ ὕδωρ· καὶ τούτων ἐνιοὶ διὰ τῶν φυομένων τρέφονται, ὅσοι μὴ σαρκοφάγοι. (593b.) Οἶον περὶ μὲν τὰς λίμνας καὶ τοὺς ποταμοὺς ἐρωδιὸς καὶ ὁ λευκερωδιός· ἔστι δ' οὗτος τὸ μέγεθος ἐκείνου ἐλάττων, καὶ ἔχει τὸ ρύγχος πλατὺ καὶ μακρόν. Ἔτι πελαργὸς καὶ λάρος· ὁ δὲ λάρος τὸ χρῶμα σποδοειδῆς. Καὶ σχοινίλος καὶ κίγκλος καὶ πύγαργος· οὗτος μέγιστος τῶν ἐλαττόνων τούτων· ἔστι γὰρ ὅσον κίχλη. Πάντες δ' οὗτοι τὸ οὐραῖον κινοῦσιν.

Ἔτι σκαλίδρις· ἔστι δὲ τοῦτο τὸ ὄρνεον ποικιλίαν ἔχον, τὸ δ' ὅλον σποδοειδές. Καὶ τὸ τῶν ἀλκυνόνων δὲ γένος πάρυδρόν ἐστιν. Τυγχάνει δ' αὐτῶν ὄντα δύο εἶδη, καὶ ἡ μὲν φθέγγεται, καθιζάνουσα ἐπὶ τῶν δονάκων, ἢ δ' ἄφωνος· ἔστι δ' αὕτη μείζων· τὸν δὲ νῶτον ἀμφοτέρω κυανοῦν ἔχουσιν. Καὶ τροχίλος.

Περὶ δὲ τὴν θάλατταν καὶ ἀλκυνὼν καὶ κήρυλος. Καὶ αἱ κορῶναι δὲ νέμονται ἀπτόμεναι τῶν ἐκπιπτόντων ζώων· παμφάγον γάρ ἐστιν. Ἔτι δὲ λάρος ὁ λευκὸς καὶ κέφρος, αἶθυια, χαραδριός.

Τῶν δὲ στεγανοπόδων τὰ μὲν βαρύτερα περὶ ποταμοὺς καὶ λίμνας ἐστίν, οἷον κύκνος, νῆττα, φαλαρίς, κολυμβίς, ἔτι βόσκας, ὁμοῖος μὲν νήττη, τὸ δὲ μέγεθος ἐλάττων, καὶ ὁ καλούμενος κόραξ· οὗτος δ' ἐστὶ τὸ μὲν μέγεθος οἷον πελαργός, πλὴν τὰ σκέλη ἔχει ἐλάττω, στεγανόπους δὲ καὶ νευστικός, τὸ δὲ χρῶμα μέλας· καθίζει δὲ οὗτος ἐπὶ τῶν δένδρων καὶ νεοττεύει ἐνταῦθα μόνος τῶν τοιούτων. Ἔτι χήν, καὶ ὁ μικρὸς χήν ὁ ἀγελαῖος, καὶ χηναλώπηξ καὶ αἰξ καὶ πηνέλοψ. Ὁ δ' ἀλαιοῖος καὶ περὶ τὴν θάλατταν διατρίβει καὶ τὰ λιμναῖα κόπτει.

Πολλοὶ δὲ καὶ παμφάγοι τῶν ὀρνίθων εἰσίν. Οἱ δὲ γαμψώνυχοι καὶ τῶν ἄλλων ἄπτονται ζώων, ὅσων ἂν κρατῶσι, καὶ τῶν ὀρνέων· πλὴν οὐκ ἀλληλοφάγοι τοῦ γένους τοῦ οἰκείου εἰσίν, ὥσπερ οἱ ἰχθύες ἄπτονται πολλάκις καὶ αὐτῶν. Ἔστι δὲ τὸ τῶν ὀρνέων γένος πᾶν μὲν ὀλιγόποτον, οἱ δὲ γαμψώνυχοι καὶ (594a.) ἄποτοι πάμπαν, εἰ μὴ τι ὀλίγον γένος καὶ ὀλιγάκις. Μάλιστα δὲ τοιοῦτον ἡ κεγχρίς. Καὶ ἰκτίνος ὀλιγάκις μὲν, ὥπται δὲ πίνων.

Κεφάλαιο 4

Τὰ δὲ φολιδωτὰ τῶν ζώων, οἷον σαῦρός τε καὶ τὰ τετράποδα τᾶλλα καὶ οἱ ὄφεις, παμφάγα ἐστίν· καὶ γὰρ σαρκοφάγα, καὶ πόαν ἐσθίουσιν. Οἱ δ' ὄφεις καὶ λιχνότατοι τῶν ζώων εἰσίν. Ἔστι μὲν οὖν ὀλιγόποτα καὶ ταῦτα καὶ τᾶλλα ὅσα ἔχει τὸν πλεύμονα σομφόν· ἔχουσι δὲ σομφόν τὰ ὀλίγαιμα πάντα καὶ τὰ φωτόκα. Οἱ δ' ὄφεις καὶ πρὸς τὸν οἶνόν εἰσιν ἀκρατεῖς, διὸ θηρεύουσί τινες καὶ τοὺς ἔχεις εἰς ὀστράκια διατιθέντες οἶνον εἰς τὰς αἵμασιās· λαμβάνονται γὰρ μεθύοντες.

Σαρκοφάγοι δ' ὄντες οἱ ὄφεις, ὅ τι ἂν λάβωσι ζῷον, ἐξικμάζοντες ὅλα κατὰ τὴν ὑποχώρησιν προΐενται. Σχεδὸν δὲ καὶ τᾶλλα τὰ τοιαῦτα, οἷον οἱ ἀράχλαι· ἀλλ' ἔξω οἱ ἀράχλαι ἐκχυμίζουσιν, οἱ δ' ὄφεις ἐν τῇ κοιλίᾳ.

Λαμβάνει μὲν οὖν ὁ ὄφεις ὅθεν ἂν τύχη τὸ διδόμενον (ἐσθίει γὰρ καὶ ὀρνίθια καὶ θηρία, καὶ ὧα καταπίνει), λαβὼν δ' ἐπανάγει, ἕως ἂν ἐπὶ τὸ ἄκρον ἐλθὼν εἰς εὐθὺ καταστήσῃ, κᾶπειθ' οὕτω συνάγει αὐτὸν καὶ συστέλλει εἰς μικρὸν ὥστ' ἐκταθέντος κάτω γίνεσθαι τὸ καταποθέν. Ταῦτα δὲ ποιεῖ διὰ τὸ τὸν στόμαχον εἶναι λεπτὸν καὶ μακρόν. Δύναται δ' ἄσιτα καὶ τὰ φαλάγγια καὶ οἱ ὄφεις πολλὸν χρόνον ζῆν· ἔστι δὲ τοῦτο θεωρῆσαι ἐκ τῶν παρὰ τοῖς φαρμακοπώλαις τρεφομένων.

Κεφάλαιο 5

Τῶν δὲ τετραπόδων καὶ ζωοτόκων τὰ μὲν ἄγρια καὶ καρχαρόδοντα πάντα σαρκοφάγα· πλὴν τοὺς λύκους φασίν, ὅταν πεινῶσιν, ἐσθίειν τινὰ γῆν, μόνον δὴ τοῦτο τῶν ζώων· πόας δ' ἄλλοτε μὲν οὐχ ἄπτονται, ὅταν δὲ κάμνωσι, καθάπερ καὶ αἱ κύνες ἐσθίουσαι ἀνεμοῦσι καὶ καθαίρονται.

Ἀνθρωποφαγοῦσι δ' οἱ μονοπεῖραι τῶν λύκων μᾶλλον [αὐτῶν] ἢ τὰ κυνηγέσια. Ὅν δὲ καλοῦσιν οἱ μὲν γλάνον οἱ δ' ὕαιναν, ἔστι μὲν τὸ μέγεθος οὐκ ἐλάττων λύκου, χαίτην δ' ἔχει ὥσπερ (594b.) ἵππος, καὶ ἔτι σκληροτέρας καὶ βαθυτέρας τὰς τρίχας, καὶ καθ' ὅλης τῆς ράχεως· ἐπιβουλεύει δὲ καὶ θηρεύει τοὺς ἀνθρώπους, τοὺς δὲ κύνας καὶ ἐμοῦσα θηρεύει ὥσπερ οἱ ἄνθρωποι· καὶ τυμβωρυχεῖ δὲ ἐφιέμενον τῆς σαρκοφαγίας τῆς τοιαύτης.

Ἡ δ' ἄρκτος παμφάγον ἐστί. Καὶ γὰρ καρπὸν ἐσθίει, καὶ ἀναβαίνει ἐπὶ τὰ δένδρα διὰ τὴν ὑγρότητα τοῦ σώματος, καὶ τοὺς καρποὺς τοὺς χέδροπας· ἐσθίει δὲ καὶ μέλι τὰ σμήνη καταγνύουσα, καὶ καρκίνους καὶ μύρμηκας, καὶ σαρκοφαγεῖ. Διὰ γὰρ τὴν ἰσχὺν ἐπιτίθεται οὐ μόνον τοῖς ἐλάφοις ἀλλὰ καὶ τοῖς ἀγρίοις ὑσίν, ἂν δύνηται λαθεῖν ἐπιτεσοῦσα, καὶ τοῖς ταύροις· ὁμόσε χωρήσασα γὰρ τῷ ταύρῳ κατὰ πρόσωπον ὑπτία καταπίπτει, καὶ τοῦ ταύρου τύπτειν ἐπιχειροῦντος τοῖς μὲν βραχίοσι τὰ κέρατα περιλαμβάνει, τῷ δὲ στόματι τὴν ἀκρωμίαν δακοῦσα καταβάλλει τὸν ταῦρον. Βαδίζει δ' ἐπὶ τινα χρόνον ὀλίγον καὶ τοῖν δυοῖν ποδοῖν ὀρθή. Τὰ δὲ κρέα πάντα κατεσθίει προσήπουσα πρῶτον.

Ὁ δὲ λέων σαρκοφάγον μὲν ἐστίν, ὥσπερ καὶ τᾶλλα ὅσα ἄγρια καὶ καρχαρόδοντα, τῇ δὲ βρώσει χρῆται λάβρως, καὶ καταπίνει πολλὰ ὅλα οὐ διαιρῶν, εἴθ' ἡμέρας δύο ἢ τρεῖς ἀσιτεῖ· δύναται γὰρ διὰ τὸ ὑπερπληροῦσθαι.

Ὀλιγόποτον δ' ἐστίν. Τὸ δὲ περίττωμα προῖεται σπανίως· διὰ τρίτης γὰρ ἢ ὅπως ἂν τύχη προχωρεῖ, καὶ τοῦτο σκληρὸν καὶ ἐξικμασμένον, ὅμοιον κυνί. Προῖεται δὲ καὶ τὴν φῦσαν σφόδρα δριμεῖαν καὶ τὸ οὔρον ἔχον ὁσμήν, διὸ <ὥς>περ οἱ κύνες ὁσφραίνεται τῶν δένδρων· οὐρεῖ γὰρ αἴρων τὸ σκέλος ὥσπερ οἱ κύνες. Ἐμποιεῖ δὲ καὶ ὁσμήν βαρεῖαν ἐν τοῖς ἐσθιομένοις καταπνέων· καὶ γὰρ ἀνοιχθέντος αὐτοῦ τὰ ἔσω ἀτμίδα ἀφίησι

βαρεῖαν.

Ἐνια δὲ τῶν τετραπόδων καὶ ἀγρίων ζώων ποιεῖται τὴν τροφήν περὶ λίμνας καὶ ποταμούς· περὶ δὲ τὴν θάλατταν οὐδὲν ἔξω φώκης. Τοιαῦτα δ' ἐστὶν ὃ τε καλούμενος κάστωρ καὶ τὸ σαθέριον καὶ τὸ σατύριον καὶ ἐνυδρίς καὶ ἡ καλουμένη λάταξ· ἔστι δὲ τοῦτο πλατύτερον τῆς ἐνυδρίδος, καὶ (595a.) ὀδόντας ἔχει ἰσχυρούς· ἐξιοῦσα γὰρ νύκτωρ πολλάκις τὰς περὶ τὸν ποταμὸν κερκίδας ἐκτέμνει τοῖς ὀδοῦσιν. Δάκνει δὲ τοὺς ἀνθρώπους καὶ ἡ ἐνυδρίς, καὶ οὐκ ἀφίησιν, ὡς λέγουσι, μέχρι ἂν ὁστοῦ ψόφον ἀκούσῃ. Τὸ δὲ τρίχωμα ἔχει ἡ λάταξ σκληρόν, καὶ τὸ εἶδος μεταξὺ τοῦ τῆς φώκης τριχώματος καὶ τοῦ τῆς ἐλάφου.

Κεφάλαιο 6

Πίνει δὲ τῶν ζώων τὰ μὲν καρχαρόδοντα λάπτοντα· ἓνια δὲ καὶ τῶν μὴ καρχαροδόντων, οἷον οἱ μύες. Τὰ δὲ συνόδοντα σπάσει, οἷον ἵπποι καὶ βόες. Ἡ δ' ἄρκτος οὔτε σπάσει οὔτε λάψει, ἀλλὰ κάψει. Καὶ τῶν ὀρνέων δὲ τὰ μὲν ἄλλα σπάσει, πλὴν τὰ μὲν μακραύχενα διαλείποντα καὶ αἶροντα τὴν κεφαλὴν, ὁ δὲ πορφυρίων μόνος κάψει.

Τὰ δὲ κερατώδη τῶν ζώων, καὶ ἡμερα καὶ ἄγρια, καὶ ὅσα μὴ καρχαρόδοντα, πάντα καρποφάγα καὶ ποηφάγα ἐστί, μὴ λίαν κατεχόμενα τῷ πεινῇ, ἔξω τῆς ὕος· αὕτη δ' ἥκιστα ποηφάγον καὶ καρποφάγον· ῥιζοφάγον δὲ μάλιστα ἢ ὅς ἐστι τῶν ζώων διὰ τὸ εὖ πεφυκέναι τὸ ῥύγχος πρὸς τὴν ἐργασίαν ταύτην, καὶ εὐχερέστατον πρὸς πᾶσαν τροφήν τῶν ζώων ἐστίν. Τάχιστα δὲ καὶ ἐπιδίδωσιν εἰς παχύτητα ὡς κατὰ μέγεθος· παιίνεται γὰρ ἐν ἐξήκοντα ἡμέραις· ὅσον δ' ἐπιδίδωσιν, γινώσκουσιν οἱ περὶ ταῦτα πραγματευόμενοι νῆστιν ἰστάντες. Παιίνεται δὲ προλιμοκτονηθεῖσα ἡμέρας τρεῖς· σχεδὸν δὲ καὶ τᾶλλα πάντα προλιμοκτονούμενα παιίνεται. Μετὰ δὲ τὰς τρεῖς ἡμέρας εὐωχοῦσιν ἤδη οἱ παιίνοντες τὰς ὕς. Οἱ δὲ Θρᾶκες παιίνουνσι τῇ μὲν πρώτῃ πιεῖν διδόντες, εἴτα διαλείπουσιν ἡμέραν μίαν τὸ πρῶτον, μετὰ δὲ ταῦτα δύο, εἴτα τρεῖς καὶ τέτταρας μέχρι τῶν ἐπτά. Παιίνεται δὲ τὸ ζῶον τοῦτο κριθαῖς, κέγχροις, σύκοις, ἀκύλοις, ἀχράσι, σικύοις. Μάλιστα δὲ καὶ ταῦτα καὶ τᾶλλα τὰ ἔχοντα κοιλίαν θερμὴν ἢ ἀτρεμία παιίνει· τὰς δ' ὕς καὶ τὸ λούεσθαι ἐν πληθῇ. Νέμεσθαι δὲ βούλονται (595b.) κατὰ τὰς ἡλικίας. Μάχεται δ' ὕς καὶ λύκῳ. Απογίνεται δ' ἀπὸ τοῦ σταθμοῦ, ὅσον ἔλκει ζῶσα, τὸ ἕκτον μέρος εἰς τρίχας καὶ αἷμα καὶ τὰ τοιαῦτα. Θηλαζόμεναι δὲ καὶ αἱ ὕες καὶ τᾶλλα πάντα λεπτότερα γίνεται. Ταῦτα μὲν οὖν τοῦτον ἔχει τὸν τρόπον.

Κεφάλαιο 7

Οἱ δὲ βόες εἰσὶ μὲν καὶ καρποφάγοι καὶ ποηφάγοι, παίνονται δὲ τοῖς τε φυσητικοῖς, οἷον ὀρόβοις καὶ κυάμοις ἐρηριγμένοις καὶ χλόη κυάμων, καὶ ἂν τις τὸ δέρμα ἐντεμὼν φυσῇσῃ καὶ μετὰ ταῦτα παράσχῃ τὴν τροφήν τοῖς πρεσβυτέροις, ἔτι δὲ κριθαῖς καὶ ἀπλῶς καὶ ἐπτισμέναις, καὶ τοῖς γλυκέσιν, οἷον σύκοις καὶ ἀσταφίσι, καὶ οἴνῳ καὶ τοῖς φύλλοις τῆς πετέας· μάλιστα δ' οἱ ἥλιοι καὶ τὰ λουτρά τὰ θερμά.

Τὰ δὲ κέρατα τῶν νέων χλαινόμενα τῷ κηρῷ ἄγεται ῥαδίως ὅπου ἂν τις ἐθέλῃ· καὶ τοὺς πόδας δ' ἥττον ἀλγοῦσιν, ἂν τις τὰ κέρατα ἀλείφῃ κηρῷ ἢ ἐλαίῳ ἢ πίττῃ. Πονοῦσι δ' αἱ ἀγελαῖαι μᾶλλον ὑπὸ τῆς πάχνης μετανιστάμεναι ἢ ὑπὸ χιόνος.

Αὐξάνονται δ' ὅταν πλείω ἔτη ἀνόχευτοι ᾧσιν· διὸ οἱ ἐν τῇ Ἑρείῳ τὰς καλουμένας Πυρρικὰς βοῦς ἐννέα ἔτη διατηροῦσιν ἀνοχεύτους καὶ καλοῦσιν ἀποταύρους, ὅπως αὐξάνωνται. Τούτων δὲ τὸ μὲν πλῆθος εἶναι φασὶ περὶ τετρακοσίας, ἰδίους τῶν βασιλέων, ζῆν δ' ἐν ἄλλῃ χώρᾳ οὐ δύνασθαι· καίτοι πεπειρᾶσθαι τινος.

Κεφάλαιο 8

Ἴπποι δὲ καὶ ὀρεῖς καὶ ὄνοι καρποφάγοι μὲν εἰσι καὶ ποηφάγοι, μάλιστα δὲ πιαίνεται τῷ ποτῷ· ὥς γὰρ ἂν πίνη τὰ ὑποζύγια τὸ ὕδωρ, οὕτω καὶ πρὸς τὴν ἀπόλαυσιν ἔχει τῆς τροφῆς, καὶ ὅπου δ' ἂν ἦττον δυσχεραίνει τὸ ποτόν, τοῦτο μᾶλλον εὐχορτόν ἐστιν. Ἡ δὲ κρᾶστις λειοτριχεῖν ποιεῖ, ὅταν ἔγκυος ᾖ· ὅταν δ' ἀθέρας ἔχη σκληρούς, οὐκ ἀγαθή. Τῆς δὲ πόας τῆς Μηδικῆς ἢ τε πρωτόκουρος φαύλη, καὶ ὅπου ἂν δυσῶδες ὕδωρ ἐπάγεται· ὅζει γὰρ τῆς πόας.

Πίνειν δ' οἱ μὲν βόες ζητοῦσι καθαρόν, οἱ δ' ἵπποι ὥσπερ αἱ κάμηλοι· ἡ δὲ κάμηλος πίνει ἥδιον θολερὸν καὶ παχύ· οὐδὲ γὰρ ἀπὸ τῶν (596a.) ποταμῶν πρότερον πίνει ἢ συνταράξει. Δύναται δ' ἄποτος ἀνέχεσθαι καὶ τέτταρας ἡμέρας· εἴτα μετὰ ταῦτα πίνει πολὺ πλῆθος.

Κεφάλαιο 9

Ὁ δ' ἐλέφας ἐσθίει πλεῖστον μὲν <κριθῶν> μεδίμνους Μακεδονικοὺς ἐννέα ἐπὶ μιᾷς ἐδώδῃς· ἐπικίνδυνον δὲ τὸ τοσοῦτον πλῆθος· τὸ δ' ἐπίπαν ἕξ μεδίμνους ἢ ἐπτά, ἀλφίτων δὲ πέντε μεδίμνους καὶ οἴνου πέντε μάρεις (ἔστι δ' ὁ μάρης ἕξ κοτύλαι). Ἦδη δέ τις ἔπιεν ἐλέφας μετρητὰς ὕδατος Μακεδονικοὺς εἰσάπαξ δέκα καὶ τέτταρας, καὶ πάλιν τῆς δεύλης ἄλλους ὀκτώ. Ζῶσι δ' αἱ μὲν πολλαὶ τῶν καμήλων περὶ ἔτη τριάκοντα, ἔνιαι δὲ πολλῶ πλείω· καὶ γὰρ εἰς ἔτη ἑκατὸν ζῶσιν. Τὸν δ' ἐλέφαντα ζῆν οἱ μὲν περὶ ἔτη διακόσια φασιν, οἱ δὲ τριακόσια.

Κεφάλαιο 10

Πρόβατα δὲ καὶ αἰγες εἰσὶ μὲν ποηφάγα, τὴν δὲ νομὴν ποιοῦνται τὰ μὲν πρόβατα προσεδρεύοντα καὶ μονίμως, αἱ δ' αἰγες ταχὺ μεταβάλλουσιν καὶ τῶν ἄκρων ἀπτόμεναι μόνον. Πιαίνει δὲ μάλιστα τὸ πρόβατον τὸ ποτόν, διὸ καὶ τοῦ θέρους διδόασιν ἄλλας διὰ πέντε ἡμερῶν μέδιμον τοῖς ἑκατόν· γίνεται γὰρ οὕτως ὑγιεινότερον καὶ πιότερον τὸ ποιμνίον. Καὶ τὰ πολλὰ δ' ἀλίζοντες διὰ τοῦτο προσφέρουσιν, οἷον ἔν τε τοῖς ἀχύροις ἄλλας πολλούς (διψῶντα γὰρ πίνει μᾶλλον) καὶ τοῦ μετοπώρου τὴν κολοκύνθην ἀλὶ πάττοντες· τοῦτο γὰρ καὶ γάλα ποιεῖ πλεῖον. Καὶ κινούμεναι δὲ μεσημβρίας πίνουσι μᾶλλον πρὸς τὴν δείλην. Πρὸς τε τοὺς τόκους ἀλιζόμεναι μείζω τὰ οὐθατα καθιᾶσιν.

Πιαίνει δὲ τὰ πρόβατα θαλλός, κότινος, ἀφάκη, ἄχυρα ὅποια ἂν ᾖ· ἅπαντα δὲ μᾶλλον πιαίνει ἄλμη προσρανθέντα. Παχύνεται δὲ καὶ ταῦτα μᾶλλον προλιμοκτονηθέντα τρεῖς ἡμέρας. Ὑδωρ δὲ τοῖς προβάτοις τοῦ μετοπώρου τὸ βόρειον τοῦ νοτίου ἄμεινον, καὶ αἱ νομαὶ αἱ πρὸς ἐσπέραν συμφέρουσιν, λεπτύνουσι δ' αἱ ὁδοὶ καὶ αἱ τάλαιπωρίαι.

Οἱ δὲ ποιμένες γινώσκουσι τὰς ἰσχυούσας τῶν οἰῶν, ὅταν χειμῶν ᾖ, τῷ (596b.) ἔχειν πάχνην, τὰς δὲ μὴ ἔχειν· διὰ γὰρ τὴν ἀσθένειαν κινούμεναι ἀποβάλλουσιν αἱ μὴ ἰσχύουσαι.

Παντὸς δὲ τετράποδος τὰ κρέα χερίῳ, ὅπου ἐλώδη χωρία νέμονται ἢ ὅπου μετεωρότερα.

Εἰσὶ δὲ δυσχειμερώτεραι αἱ πλατύκερκοι οἰες τῶν μακροκέρκων καὶ αἱ κολέραι τῶν λασίων· δυσχείμεροι δὲ καὶ αἱ οὐλαί. Ὑγιεινότεραι μὲν οὖν αἱ οἰες τῶν αἰγῶν, ἰσχύουσι δὲ μᾶλλον αἱ αἰγες τῶν οἰῶν.

Τῶν δὲ λυκοβρώτων προβάτων τὰ κώδια καὶ τὰ ἔρια καὶ τὰ ἐξ αὐτῶν ἱμάτια φθειρωδέστερα γίνεται πολὺ μᾶλλον τῶν ἄλλων.

Κεφάλαιο 11

Τῶν δ' ἐντόμων τὰ μὲν ἔχοντα ὀδόντας παμφάγα ἐστί, τὰ δὲ γλῶτταν μόνον τοῖς ὑγροῖς τρέφεται, πάντοθεν ἐκχυλίζοντα ταύτη. Καὶ τούτων τὰ μὲν παμφάγα (πάντων γὰρ γεύεται τῶν χυμῶν), οἷον αἱ μυῖαι, τὰ δ' αἱμοβόρα, καθάπερ μύωψ καὶ οἷστρος· τὰ δὲ φυτῶν καὶ καρπῶν ζῇ χυλοῖς. Ἡ δὲ μέλιττα μόνον πρὸς οὐδὲν σαπρὸν προσίζει, οὐδὲ χρῆται τροφῇ οὐδεμιᾷ ἄλλ' ἢ τῇ γλυκὺν ἐχούσῃ χυμόν· καὶ ὕδωρ δ' ἥδιστα εἰς ἑαυτὰς λαμβάνουσιν, ὅπου ἂν καθαρὸν ἀναπηδᾷ. Τροφαῖς μὲν οὖν χρῶνται τὰ γένη τῶν ζώων ταῖς εἰρημέναις.

Κεφάλαιο 12

Αἱ δὲ πράξεις αὐτῶν ἅπασαι περὶ τε τὰς ὀχείας καὶ τὰς τεκνώσεις εἰσί, καὶ περὶ τὰς εὐπορίας τῆς τροφῆς, καὶ πρὸς τὰ ψύχη καὶ τὰς ἀλέας πεπορισμέναι, καὶ πρὸς τὰς μεταβολὰς τὰς τῶν ὥρων. Πάντα γὰρ τῆς κατὰ τὸ θερμὸν καὶ ψυχρὸν μεταβολῆς αἴσθησιν ἔχει σύμφυτον, καὶ καθάπερ τῶν ἀνθρώπων οἱ μὲν εἰς τὰς οἰκίας τοῦ χειμῶνος μεταβάλλουσιν, οἱ δὲ πολλῆς χώρας κρατοῦντες θερίζουσι μὲν ἐν τοῖς ψυχροῖς χειμάζουσι δ' ἐν τοῖς ἀλεινοῖς, οὕτω καὶ τῶν ζώων τὰ δυνάμενα μεταβάλλειν τοὺς τόπους.

Καὶ τὰ μὲν ἐν αὐτοῖς τοῖς συνήθεσι τόποις εὐρίσκεται τὰς βοηθείας, τὰ δ' ἐκτοπίζει, μετὰ μὲν τὴν φθινοπωρινὴν ἰσημερίαν ἐκ τοῦ Πόντου καὶ τῶν ψυχρῶν τόπων φεύγοντα τὸν (597a.) ἐπιόντα χειμῶνα, μετὰ δὲ τὴν ἑαρινὴν ἐκ τῶν θερμῶν εἰς τοὺς τόπους τοὺς ψυχροὺς φοβούμενα τὰ καύματα, τὰ μὲν ἐκ τῶν ἐγγύς τόπων ποιούμενα τὰς μεταβολὰς, τὰ δὲ καὶ ἐκ τῶν ἐσχάτων ὡς εἰπεῖν, οἷον αἱ γέρανοι ποιοῦσιν. Μεταβάλλουσι γὰρ ἐκ τῶν Σκυθικῶν πεδίων εἰς τὰ ἔλη τὰ ἄνω τῆς Αἰγύπτου, ὅθεν ὁ Νεῖλος ῥεῖ· οὗ καὶ λέγονται τοῖς Πυγμαίοις ἐπιχειρεῖν· οὐ γάρ ἐστι τοῦτο μῦθος, ἀλλ' ἔστι κατὰ τὴν ἀλήθειαν γένος μικρὸν μὲν, ὥσπερ λέγεται, καὶ αὐτοὶ καὶ οἱ ἵπποι, τρωγλοδύται δ' εἰσὶ τὸν βίον. Καὶ οἱ πελεκᾶνες δ' ἐκτοπίζουσι, καὶ πέτονται ἀπὸ τοῦ Στρυμόνος ἐπὶ τὸν Ἰστρον, κάκεῖ τεκνοποιοῦνται· ἀθρόοι δ' ἀπέρχονται, ἀναμένοντες οἱ πρότεροι τοὺς ὕστερον, διὰ τὸ ὅταν ὑπερπτῶνται τὸ ὄρος ἀδήλους γίνεσθαι τοὺς προτέρους τοῖς ὑστέροις.

Καὶ οἱ ἰχθύες δὲ τὸν αὐτὸν τρόπον οἱ μὲν ἐκ τοῦ Πόντου καὶ εἰς τὸν Πόντον μεταβάλλουσιν, οἱ δ' ἐν μὲν τῷ χειμῶνι ἐκ τοῦ πελάγους πρὸς τὴν γῆν, τὴν ἀλέαν διώκοντες, ἐν δὲ τῷ θέρει ἐκ τῶν προσγείων εἰς τὸ πέλαγος, φεύγοντες τὴν ἀλέαν.

Καὶ τὰ ἀσθενῆ δὲ τῶν ὀρνέων ἐν μὲν τῷ χειμῶνι καὶ τοῖς πάγοις εἰς τὰ πεδία καταβαίνουσι διὰ τὴν ἀλέαν, ἐν δὲ τῷ θέρει ἀποχωροῦσιν εἰς τὰ ὄρη ἄνω διὰ τὰ καύματα. Ποιεῖται δ' αἰεὶ τὰ ἀσθενέστερα πρῶτα τὴν μετάστασιν καθ' ἑκατέραν τὴν ὑπερβολὴν, οἷον οἱ μὲν σκόμβροι τῶν θύννων, οἱ δ' ὄρτυγες τῶν γεράνων· τὰ μὲν γὰρ μεταβάλλει τοῦ Βοηδρομιῶνος, τὰ δὲ τοῦ Μαιμακτηριῶνος.

Ἔστι δὲ πιότερα πάντα ὅταν ἐκ τῶν ψυχρῶν τόπων μεταβάλλῃ ἢ

ὅταν ἐκ τῶν θερμῶν, οἶον καὶ οἱ ὄρτυγες τοῦ φθινοπώρου μᾶλλον ἢ τοῦ ἔαρος. Συμβαίνει δ' ἐκ τῶν ψυχρῶν τόπων ἅμα μεταβάλλειν καὶ ἐκ τῆς ὥρας τῆς θερμῆς. Ἔχουσι δὲ καὶ πρὸς τὰς ὀχείας ὀρμητικώτερον κατὰ τὴν ἐαρινὴν ὥραν καὶ ὅταν μεταβάλλωσιν ἐκ τῶν θερμῶν.

Τῶν μὲν οὖν ὀρνέων αἱ γέρανοι, καθάπερ εἴρηται πρότερον, ἐκτοπίζουσιν εἰς τὰ ἔσχατα ἐκ τῶν ἐσχάτων. Πέτονται δὲ πρὸς τὸ πνεῦμα. Τὸ δὲ περὶ (597b.) τοῦ λίθου ψεῦδός ἐστι· λέγεται γὰρ ὡς ἔχουσιν ἔρμα λίθον, ὃς γίνεται χρήσιμος πρὸς τὰς τοῦ χρυσοῦ βασάνους, ὅταν ἀνεμέσωσιν.

Ἀπαίρουσι δὲ καὶ αἱ φάτται καὶ αἱ πελειάδες, καὶ οὐ χειμάζουσι, καὶ αἱ χελιδόνες καὶ αἱ τρυγόνες· αἱ δὲ περιστεραι καταμένουσιν. Ὅμοίως δὲ καὶ οἱ ὄρτυγες, ἐὰν μὴ τινες ὑπολειφθῶσι καὶ τῶν τρυγόνων καὶ τῶν ὀρτύγων ἐν εὐείλοις χωρίοις. Ἀγελάζονται δ' αἱ τε φάτται καὶ αἱ τρυγόνες, ὅταν τε παραγίνωνται καὶ πάλιν ὅταν ὥρα ᾗ πρὸς τὴν ἀνακομιδὴν. Οἱ δ' ὄρτυγες ὅταν ἐμπέσωσιν, ἐὰν μὲν εὐδία ἢ βόρειον ᾗ, συνδυάζονται τε καὶ εὐημεροῦσιν, ἐὰν δὲ νότος, χαλεπῶς ἔχουσι διὰ τὸ μὴ εἶναι πτητικοί· ὑγρὸς γὰρ καὶ βαρὺς ὁ ἄνεμος· διὸ καὶ οἱ θηρεύοντες ἐπιχειροῦσι τοῖς νοτίοις. Εὐδίας δ' οὐκ εὖ πέτονται διὰ τὸ βάρος· πολὺ γὰρ τὸ σῶμα. Διὸ καὶ βοῶντες πέτονται· πονοῦσι γάρ. Ὅταν μὲν οὖν ἐκεῖθεν παραβάλλωσιν, οὐκ ἔχουσιν ἡγεμόνας· ὅταν δ' ἐντεῦθεν ἀπαίρωσιν, ἢ τε γλωττὶς συναπαίρει καὶ ἡ ὀρτυγομήτρα καὶ ὁ ὄϊτος καὶ ὁ κύχραμος, ὅσπερ αὐτοὺς καὶ ἀνακαλεῖται νύκτωρ· καὶ ὅταν τούτου τὴν φωνὴν ἀκούσωσιν οἱ θηρεύοντες, ἴσασιν ὅτι οὐ καταμένουσιν. Ἡ δ' ὀρτυγομήτρα παραπλήσιος τὴν μορφήν τοῖς λιμναίοις ἐστί, καὶ ἡ γλωττὶς γλωτταν ἐξαγομένην ἔχουσα μέχρι πόρρω. Ὁ δ' ὄϊτος ὅμοιος ταῖς γλαυξὶ καὶ περὶ τὰ ὄϊα πτερύγια ἔχων· ἔνιοι δ' αὐτὸν νυκτικόρακα καλοῦσιν. Ἔστι δὲ κόβαλος καὶ μιμητής, καὶ ἀντορχούμενος ἀλίσκεται, περιελθόντος θατέρου τῶν θηρευτῶν, καθάπερ ἡ γλαύξ. Ὅλως δὲ τὰ γαμψώνυχα πάντα βραχυτράχηλα καὶ πλατύγλωττα καὶ μιμητικά· καὶ γὰρ τὸ Ἰνδικὸν ὀρνεον ἢ ψιττάκη, τὸ λεγόμενον ἀνθρωπόγλωττον, τοιοῦτόν ἐστι· καὶ ἀκολαστότερον δὲ γίνεται, ὅταν πῆν οἶνον.

Ἀγελαῖοι δὲ τῶν ὀρνίθων εἰσὶ γέρανός, κύκνος, πελεκάν, χὴν ὁ μικρός.

Κεφάλαιο 13

Τῶν δ' ἰχθύων οἱ μὲν, ὥσπερ εἴρηται, μεταβάλλουσι πρὸς τὴν γῆν ἐκ τοῦ πελάγους καὶ εἰς τὸ πέλαγος ἀπὸ τῆς (598a.) γῆς, φεύγοντες τὰς ὑπερβολὰς τοῦ ψύχους καὶ τῆς ἀλέας. Ἀμείνους δ' εἰσὶν οἱ πρόσγειοι τῶν πελαγίων· πλείω γὰρ καὶ βελτίω νομὴν ἔχουσιν· ὅπου γὰρ ἂν ὁ ἥλιος ἐπιβάλλῃ, πλείω φύεται καὶ βελτίω καὶ ἀπαλώτερα, οἷον ἐν κήποις. Καὶ ὁ θῆς †..... ὁ μέλας φύεται πρὸς τῇ γῇ, ὁ δ' ἄλλος ὁμοίος ἐστὶ τοῖς ἀγρίοις. Ἔτι δὲ καὶ κεκραμένοι τυγχάνουσι καλῶς τῷ θερμῷ καὶ τῷ ψυχρῷ οἱ τόποι οἱ πρόσγειοι τῆς θαλάττης· διὸ καὶ αἱ σάρκες συνεστᾶσι μᾶλλον τῶν τοιούτων ἰχθύων, τῶν δὲ πελαγίων ὑγραὶ εἰσι καὶ κεχυμένα.

Εἰσὶ δὲ πρόσγειοι σινόδων, κάνθαρος, ὀρφῶς, χρύσοφρυς, κεστρεύς, τρίγλη, κίχλη, δράκων, καλλιόνυμος, κωβιὸς καὶ τὰ πετραῖα πάντα· πελάγιοι δὲ τρυγῶν καὶ τὰ σελάχη καὶ γόγγροι οἱ λευκοί, χάννη, ἐρυθρῖνος, γλαῦκος· φάγροι δὲ καὶ σκορπίοι καὶ γόγγροι οἱ μέλανες καὶ μύραινα καὶ κόκκυγες ἐπαμφοτερίζουσιν. Εἰσὶ δὲ διαφοραὶ τούτων καὶ κατὰ τοὺς τόπους, οἷον περὶ Κρήτην οἱ κωβιοὶ καὶ τὰ πετραῖα πάντα πίονα γίνεται. Γίνεται δὲ καὶ ὁ θύννος ἀγαθὸς πάλιν μετ' Ἀρκτοῦρον· ἥδη γὰρ οἰστρῶν παύεται ταύτην τὴν ὥραν· διὰ γὰρ τοῦτο ἐν τῷ θέρει χεῖρων ἐστίν.

Γίνονται δὲ καὶ ἐν ταῖς λιμνοθαλάτταις πολλοὶ τῶν ἰχθύων, οἷον σάλπαι, χρύσοφρυς, τρίγλη καὶ τῶν ἄλλων σχεδὸν οἱ πλεῖστοι. Γίνονται δὲ καὶ ἀμῖαι, οἷον περὶ Ἀλωπεκόννησον· καὶ ἐν τῇ Βιστωνίδι λίμνῃ ἔνεστι τὰ πλεῖστα γένη τῶν ἰχθύων.

Τῶν δὲ κολιῶν οἱ πολλοὶ εἰς μὲν τὸν Πόντον οὐκ ἐμβάλλουσιν, ἐν δὲ τῇ Προποντίδι θερίζουσι καὶ ἐκτίκτουσι, χειμάζουσι δ' ἐν τῷ Αἰγαίῳ. Θυννίδες δὲ καὶ πηλαμύδες καὶ ἀμῖαι εἰς τὸν Πόντον ἐμβάλλουσι τοῦ ἔαρος καὶ θερίζουσιν, σχεδὸν δὲ καὶ οἱ πλεῖστοι τῶν ρυάδων καὶ ἀγελαίων ἰχθύων.

Εἰσὶ δ' οἱ πλεῖστοι ἀγελαῖοι. Ἔχουσι δ' οἱ ἀγελαῖοι ἡγεμόνας πάντες. Εἰσπλέουσι δ' εἰς τὸν Πόντον διὰ τε τὴν τροφήν· ἡ γὰρ νομὴ καὶ πλείων καὶ βελτίων διὰ τὸ πότιμον, καὶ τὰ (598b.) θηρία δὲ τὰ μεγάλα ἐλάττω· ἔξω γὰρ δελφῖνος καὶ φωκαίνης οὐδὲν ἐστὶν ἐν τῷ Πόντῳ, καὶ ὁ δελφίς μικρός. Ἐξω δ' εὐθὺς προελθόντι μεγάλοι. Διὰ τε δὴ τὴν τροφήν εἰσπλέουσι καὶ διὰ τὸν τόκον· τόποι γὰρ εἰσιν

ἐπιτήδευοι ἐντίκτειν, καὶ τὸ πότιμον καὶ τὸ γλυκύτερον ὕδωρ ἐκτρέφει τὰ κυήματα. Ὅταν δὲ τέκωσι καὶ τὰ γενόμενα αὐξηθῇ, ἐκπλέουσιν εὐθὺς μετὰ Πλειάδα. Ἄν μὲν οὖν νότιος ὁ χειμὼν ᾗ, βραδύτερον ἐκπλέουσιν, ἂν δὲ βόρειος, θάπτον διὰ τὸ τὸ πνεῦμα συνεπουρίζειν· καὶ ὁ γόνος δὲ τότε μικρὸς ἀλίσκεται περὶ Βυζάντιον ἅτ' οὐ γενομένης πολλῆς ἐν τῷ Πόντῳ διατριβῆς.

Οἱ μὲν οὖν ἄλλοι καὶ ἐκπλέοντες καὶ εἰσπλέοντες δηλοῖ εἰσιν, οἱ δὲ τριχίαί μόνον εἰσπλέοντες μὲν ἀλίσκονται, ἐκπλέοντες δ' οὐχ ὁρῶνται, ἀλλὰ καὶ ὅταν ληφθῇ τις περὶ Βυζάντιον, οἱ ἀλιεῖς τὰ δίκτυα περικαθαίρουσι διὰ τὸ μὴ εἰσθῆναι ἐκπλεῖν. Αἴτιον δ' ὅτι οὗτοι μόνον ἀναπλέουσιν εἰς τὸν Ἰστρον, εἴθ' ἢ σχίζεται, καταπλέουσιν εἰς τὸν Ἀδρίαν.

Σημεῖον δέ, ἐκεῖ γὰρ συμβαίνει τοῦναντίον· εἰσπλέοντες μὲν γὰρ οὐχ ἀλίσκονται εἰς τὸν Ἀδρίαν, ἐκπλέοντες δ' ἀλίσκονται.

Εἰσπλέουσι δ' οἱ θύννοι ἐπὶ δεξιᾷ ἐχόμενοι τῆς γῆς, ἐκπλέουσι δ' ἐπ' ἀριστερά· τοῦτο δὲ φασὶ τινες ποιεῖν ὅτι τῷ δεξιῷ ὀξύτερον ὁρῶσι, φύσει οὐκ ὀξὺ βλέποντες. Τὴν μὲν οὖν ἡμέραν οἱ ῥυάδες κομίζονται, τὴν δὲ νύκτα ἡσυχάζουσι καὶ νέμονται, ἂν μὴ σελήνη ᾗ· τότε δὲ κομίζονται καὶ οὐχ ἡσυχάζουσιν. Λέγουσι δὲ τινες τῶν περὶ τὴν θάλατταν ὡς ὅταν τροπαὶ χειμεριναὶ γένωνται, οὐκέτι κινοῦνται ἀλλ' ἡσυχάζουσιν, ὅπου ἂν τύχωσι καταληφθέντες, μέχρι ἰσημερίας.

Οἱ μὲν οὖν κολίαὶ εἰσπλέοντες ἀλίσκονται, ἐξιόντες δ' ἤττον· ἄριστοι δ' εἰσιν ἐν τῇ Προποντίδι πρὸ τοῦ τίκτειν. Οἱ δ' ἄλλοι ῥυάδες ἐξιόντες ἐκ τοῦ Πόντου ἀλίσκονται μᾶλλον καὶ ἄριστοι τότε εἰσιν· ὅταν δ' εἰσπλέωσιν, ἐγγύτατα τοῦ Αἰγαίου πύοτατοι ἀλίσκονται, ὅσῳ δ' ἀνωτέρω, ἀεὶ λεπτότεροι.

(599a.) Πολλάκις δὲ καὶ ὅταν πνεῦμα ἀντίκωπῃ νότιον ἐκπλέουσι καὶ τοῖς κολίαις καὶ τοῖς σκόμβροις, κάτω ἀλίσκονται μᾶλλον ἢ περὶ Βυζάντιον.

Τοὺς μὲν οὖν ἐκτοπισμοὺς τοῦτον ποιοῦνται τὸν τρόπον. Τὸ δ' αὐτὸ τοῦτο συμβαίνει πάθος καὶ ἐπὶ τῶν χερσαίων κατὰ τὴν φωλείαν· τοῦ μὲν γὰρ χειμῶνος ὁρμῶσι πρὸς τὴν φωλείαν, ἀπαλλάττονται δὲ κατὰ τὴν θερμότεραν ὥραν. Ποιοῦνται δὲ τὰ ζῷα καὶ τὰς φωλείας πρὸς τὴν βοήθειαν καὶ τὰς ὑπερβολὰς τῆς ὥρας ἐκατέρας. Φωλεῖ δὲ τῶν μὲν ὅλον τὸ γένος, ἐνίων δὲ τὰ μὲν τὰ δ' οὐ. Τὰ μὲν γὰρ ὀστρακόδερμα πάντα φωλεῖ, οἷον τὰ τε ἐν τῇ θαλάττῃ, πορφύραι καὶ κήρυκες καὶ πᾶν τὸ τοιοῦτον γένος· ἀλλὰ τῶν μὲν

ἀπολελυμένων ἐπιδηλότερός ἐστιν ἡ φωλεία (κρύπτουσι γὰρ αὐτά, οἷον οἱ κτένες, τὰ δ' ἴσχει ἐπιπολῆς ἐπικάλυμμα, οἷον οἱ χερσαῖοι κοχλῖαι), τῶν δ' ἀναπολύτων ἄδηλος ἡ μεταβολή. Φωλοῦσι δ' οὐ τὴν αὐτὴν ὥραν, ἀλλ' οἱ μὲν κοχλῖαι τοῦ χειμῶνος, αἱ δὲ πορφύραι καὶ οἱ κήρυκες ὑπὸ κύνα περὶ ἡμέρας τριάκοντα, καὶ οἱ κτένες περὶ τὸν αὐτὸν χρόνον. Τὰ δὲ πλεῖστα αὐτῶν φωλεῖ καὶ ἐν τοῖς σφόδρα ψύχεσι καὶ ἐν ταῖς σφόδρα ἀλέαις.

Κεφάλαιο 14

Τὰ δ' ἔντομα σχεδὸν ἅπαντα φωλεῖ, πλὴν εἴ τι ἐν ταῖς οἰκήσεσι συνανθρωπεύεται αὐτῶν, καὶ ὅσα φθείρεται καὶ μὴ διετίζει. Τᾶλλα δὲ φωλεῖ τοῦ χειμῶνος. Φωλεῖ δὲ τὰ μὲν πλείους ἡμέρας, τὰ δὲ τὰς χειμεριωτάτας, οἷον αἱ μέλιτται· καὶ γὰρ αὗται φωλοῦσιν. Σημεῖον δ' ὅτι οὐδὲν φαίνονται γευόμεναι τῆς παρακειμένης τροφῆς· κἄν τις αὐτῶν ἐξερπύση, φαίνεται διαφανῆς, καὶ οὐδὲν ἐν τῇ κοιλίᾳ ἐνὸν δῆλον. Ἡσυχάζει δ' ἀπὸ Πλειάδος δύσεως μέχρι τοῦ ἔαρος.

Κεφάλαιο 15

Ποιεῖται δὲ τὰ ζῷα τὰς φωλείας ἀποκρυπτόμενα ἐν ἀλεινοῖς καὶ ἐν οἷς εἶωθε τόποις ἐπικοιτάζεσθαι. Φωλεῖ δὲ καὶ τῶν ἐναίμων πολλά, οἷον τὰ τε φολιδωτά, ὄφεις τε καὶ σαῦροι καὶ ἀσκαλαβῶται καὶ κροκόδειλοι οἱ ποτάμιοι, τέτταρας μῆνας τοὺς χειμεριωτάτους, καὶ οὐκ ἐσθίουσιν οὐδέν. Οἱ μὲν οὖν ἄλλοι (599b.) ὄφεις ἐν τῇ γῇ φωλοῦσιν, αἱ δ' ἔχιδνα ὑπὸ τὰς πέτρας ἀποκρύπτουσιν αὐτάς.

Φωλοῦσι δὲ πολλοὶ καὶ τῶν ἰχθύων, ἐπιφανέστατα δ' ἵππουρος καὶ κορακῖνος τοῦ χειμῶνος· οὗτοι γὰρ μόνοι οὐχ ἀλίσκονται οὐδαμοῦ πλην κατὰ τινας χρόνους τακτοὺς καὶ τοὺς αὐτοὺς αἰεὶ, τὰ δὲ λοιπὰ πάντα σχεδόν. Φωλεῖ δὲ καὶ μύρινα καὶ ὀρφῶς καὶ γόγγρος. Κατὰ συζυγίας δ' οἱ πετραῖοι φωλοῦσιν οἱ ἄρρενες τοῖς θήλεσιν, ὥσπερ καὶ νεοττεύουσιν, οἷον κίχλαι, κόττυφοι, πέρκαι. Φωλοῦσι δὲ καὶ οἱ θύννοι τοῦ χειμῶνος ἐν τοῖς βάθεσι, καὶ γίνονται πιότατοι μετὰ τὴν φωλείαν, καὶ ἄρχονται θηρεύεσθαι ἀπὸ Πλειάδος ἀνατολῆς μέχρι Ἀρκτούρου δύσεως τὸ ἔσχατον· τὸν δ' ἄλλον χρόνον ἡσυχίαν ἔχουσι φωλοῦντες. Ἀλίσκονται δ' ἔνιοι περὶ τὸν χρόνον τῆς φωλείας καὶ τούτων καὶ τῶν ἄλλων τινὲς τῶν φωλούντων κινούμενοι, ἂν ἀλεινὸς ᾗ ὁ τόπος καὶ ἐπιγίνωνται εὐδαίᾳ παράλογοι· ἀπὸ γὰρ τῆς θαλάμης προέρχονται μικρὸν ἐπὶ νομῇ· καὶ ταῖς πανσελήνοισι. Εἰσὶ δ' οἱ πολλοὶ φωλοῦντες ἡδιστοί. Αἱ δὲ πριμάδες κρύπτουσιν ἑαυτὰς ἐν τῷ βορβόρῳ· σημεῖον δὲ τό τε μὴ ἀλίσκεσθαι καὶ ἰλὺν ἐχούσας ἐπὶ τοῦ νώτου φαίνεσθαι πολλὴν καὶ τὰ πτερύγια ἐντεθλιμμένα. Κατὰ δὲ τὴν ἑαρινὴν ὥραν κινούνται καὶ προέρχονται πρὸς τὴν γῆν ὀχευόμεναι καὶ τίκτουςαι, καὶ ἀλίσκονται κύουσαι· καὶ τότε δοκοῦσιν ὠραῖοι εἶναι, οἱ δὲ μετοπωρινοὶ καὶ χειμερινοὶ χεῖρους· ἅμα δὲ καὶ οἱ ἄρρενες φαίνονται πλήρεις ὄντες θοροῦ. Ὅταν μὲν οὖν μικρὰ τὰ κυήματ' ἔχωσι, δυσάλωτοί εἰσιν, ὅταν δὲ μείζω, πολλοὶ ἀλίσκονται διὰ τὸ οἰστρᾶν.

Φωλεῖ δὲ τὰ μὲν ἐν τῇ ἄμμῳ τὰ δ' ἐν τῷ πηλῷ, ὑπερέχοντα τὸ στόμα μόνον. Τὰ μὲν οὖν πλεῖστα φωλεῖ μόνον τοῦ χειμῶνος, τὰ δὲ μαλακόστρακα καὶ τῶν ἰχθύων οἱ πετραῖοι καὶ βάτοι καὶ τὰ σελαχῶδη τὰς χειμεριωτάτας μόνον ἡμέρας· δημοῖ δὲ τὸ μὴ ἀλίσκεσθαι ὅταν ᾗ ψύχη.

Ἐνιοὶ δὲ τῶν ἰχθύων φωλοῦσι καὶ τοῦ θέρους, οἷον ὁ γλαῦκος·

οὗτος γὰρ τοῦ θέρους φωλεῖ περὶ ἐξήκονθ' ἡμέρας.

Φωλεῖ δὲ καὶ ὁ ὄνος καὶ ὁ χρύσοφρυς· σημεῖον δὲ δοκεῖ (600a.) εἶναι τοῦ τὸν ὄνον πλεῖστον φωλεῖν χρόνον τὸ διὰ πλείστου χρόνου ἀλίσκεσθαι. Τοῦ δὲ καὶ θέρους τοὺς ἰχθῦς φωλεῖν δοκεῖ σημεῖον εἶναι τὸ ἐπὶ τοῖς ἄστροις γίνεσθαι τὰς ἀλώσεις, καὶ μάλιστα ἐπὶ κυνί· τηνικαῦτα γὰρ ἀνατρέπεσθαι τὴν θάλατταν. Ὅπερ ἐν τῷ Βοσπόρῳ γνωριμώτατόν ἐστιν· ἡ γὰρ ἰλὺς ἐπάνω γίνεται καὶ ἐπιφέρονται οἱ ἰχθύες. Φασὶ δὲ καὶ πολλάκις τριβομένου τοῦ βυθοῦ ἀλίσκεσθαι πλείους ἐν τῷ αὐτῷ βόλῳ τὸ δεύτερον ἢ τὸ πρῶτον. Καὶ ἐπειδὴν ὄμβροι γένωνται μεγάλοι, πολλὰ φαίνεται ζῶα τῶν πρότερον ἢ ὅλως οὐχ ἐωραμένων ἢ οὐ πολλάκις.

Κεφάλαιο 16

Φωλοῦσι δὲ πολλοὶ καὶ τῶν ὀρνίθων, καὶ οὐχ ὥς τινες οἶονται, εἰς ἄλσεινοὺς τόπους ἀπέρχονται πάντες· ἀλλ' οἱ μὲν πλησίον ὄντες τοιούτων τόπων, ἐν οἷς αἰεὶ διαμένουσι, καὶ ἰκτῖνοι καὶ χελιδόνες, ἀποχωροῦσιν ἐνταῦθα, οἱ δὲ πορρωτέρω ὄντες τῶν τοιούτων οὐκ ἐκτοπίζουσιν ἀλλὰ κρύπτουσιν ἑαυτούς. Ἦδη γὰρ ὠμμένοι πολλαὶ χελιδόνες εἰσὶν ἐν ἀγγείοις ἐψιλωμένοι πάμπαν, καὶ ἰκτῖνοι ἐκ τοιούτων ἐκπετόμενοι χωρίων, ὅταν φαίνωνται τὸ πρῶτον.

Φωλοῦσι δ' οὐδὲν διακεκριμένως καὶ τῶν γαμψωνύχων καὶ τῶν εὐθυωνύχων· φωλεῖ γὰρ καὶ πελαργὸς καὶ κόττυφος καὶ τρυγὼν καὶ κόρυδος, καὶ ἥ γε τρυγὼν ὁμολογουμένως μάλιστα πάντων· οὐδεὶς γὰρ ὥς εἰπεῖν λέγεται τρυγὼνα ἰδεῖν οὐδαμοῦ χειμῶνος. Ἀρχεται δὲ τῆς φωλείας σφόδρα πείρα οὔσα, καὶ πτερορρυεῖ μὲν ἐν τῇ φωλείᾳ, παχεῖα μέντοι διατελεῖ οὔσα. Τῶν δὲ φασσῶν ἔναι μὲν φωλοῦσιν, ἔναι δ' οὐ φωλοῦσιν, ἀπέρχονται δ' ἅμα ταῖς χελιδόσιν. Φωλεῖ δὲ καὶ ἡ κίχλη καὶ ὁ ψάρος, καὶ τῶν γαμψωνύχων ἰκτῖνος ὀλίγας ἡμέρας καὶ ἡ γλαύξ.

Κεφάλαιο 17

Τῶν δὲ ζωοτόκων καὶ τετραπόδων φωλοῦσιν οἱ τε ὕστριχες καὶ αἱ ἄρκτοι. Ὅτι μὲν οὖν φωλοῦσιν αἱ ἄγριαι ἄρκτοι, φανερόν ἐστι, πότερον δὲ διὰ ψυχὸς ἢ δι' ἄλλην αἰτίαν, ἀμφισβητεῖται. Γίνονται γὰρ περὶ τὸν χρόνον τοῦτον οἱ ἄρρενες καὶ αἱ θήλειαι πιότατοι, ὥστε μὴ εὐκίνητοι εἶναι. Ἡ δὲ θήλεια καὶ τίκτει περὶ (600b.) τοῦτον τὸν καιρόν, καὶ φωλεῖ ἕως ἂν ἐξάγειν ὥρα ἢ τοὺς σκύμνους· τοῦτο δὲ ποιεῖ τοῦ ἥαρος περὶ τρίτον μῆνα ἀπὸ τροπῶν. Τὸ δ' ἐλάχιστον φωλεῖ περὶ τετταράκονθ' ἡμέρας· τούτων δὲ δις ἐπτά λέγουσιν ἐν αἷς οὐδὲν κινεῖται, ἐν δὲ ταῖς πλείοσι ταῖς μετὰ ταῦτα φωλεῖ μὲν κινεῖται δὲ καὶ ἐγείρεται. Κύουσα δ' ἄρκτος ἢ ὑπ' οὐδενὸς ἢ πάνυ ὀλίγων εἴληπται. Ἐν δὲ τῷ χρόνῳ τούτῳ φανερόν ἐστιν ὅτι οὐδὲν ἐσθίουσιν· οὔτε γὰρ ἐξέρχονται, ὅταν τε ληφθῶσι, κενὰ φαίνεται ἢ τε κοιλία καὶ τὰ ἔντερα. Λέγεται δὲ καὶ διὰ τὸ μηδὲν προσφέρεισθαι τὸ ἔντερον ὀλίγου συμφύεσθαι αὐτῇ, καὶ διὰ τοῦτο πρῶτον ἐξιοῦσαν γεύεσθαι τοῦ ἥρου πρὸς τὸ ἀφιστάναι τὸ ἔντερον καὶ διευρύνειν. Φωλεῖ δὲ καὶ ὁ ἐλειὸς ἐν αὐτοῖς τοῖς δένδρεσι, καὶ γίνεται τότε παχύτατος, καὶ ὁ μῦς ὁ Ποντικὸς ὁ λευκός.

Τῶν δὲ φωλούντων ἔνιοι τὸ καλούμενον ἐκδύνουσι γῆρας· ἐστὶ δὲ τοῦτο τὸ ἔσχατον δέρμα καὶ τὸ περὶ τὰς γενέσεις κέλυφος. Τῶν μὲν οὖν πεζῶν καὶ ζωοτόκων περὶ τῆς ἄρκτου ἀμφισβητεῖται ἡ αἰτία τῆς φωλείας, καθάπερ ἐλέχθη πρότερον· τὰ δὲ φολιδωτὰ φωλεῖ μὲν σχεδὸν τὰ πλείστα, ἐκδύνει δὲ τὸ γῆρας ὅσων τὸ δέρμα μαλακὸν μὴ ὀστρακῶδες ὥσπερ τῆς χελώνης (καὶ γὰρ ἡ χελώνη τῶν φολιδωτῶν ἐστὶ καὶ ὁ ἐμύς), ἀλλ' οἷον ἀσκαλαβώτης τε καὶ σαῦρος καὶ μάλιστα πάντων οἱ ὄφεις· ἐκδύνουσι γὰρ καὶ τοῦ ἥαρος, ὅταν ἐξίωσι, καὶ τοῦ μετοπώρου πάλιν. Ἐκδύνουσι δὲ καὶ οἱ ἔχεις τὸ γῆρας καὶ τοῦ ἥαρος καὶ τοῦ μετοπώρου, καὶ οὐχ ὥσπερ φασὶ τινες τοῦτο τὸ γένος τῶν ὄφεων μὴ ἐκδύεσθαι μόνον.

Ὅταν δ' ἄρχωνται ἐκδύνειν οἱ ὄφεις, ἀπὸ τῶν ὀφθαλμῶν ἀφίσταται πᾶσι πρῶτον, ὥστε δοκεῖν γίνεσθαι τυφλοὺς τοῖς μὴ συννοοῦσι τὸ πάθος· μετὰ δὲ τοῦτο ἀπὸ τῆς κεφαλῆς, καὶ λευκὴ φαίνεται πάντων. Ἐν νυκτὶ δὲ σχεδὸν καὶ ἡμέρα πᾶν ἀποδύεται τὸ γῆρας, ἀπὸ τῆς κεφαλῆς ἀρξάμενον μέχρι τῆς κέρκου. Γίνεται δ' ἐκδυομένου τὰ ἐντὸς ἐκτός· (601a.) ἐκδύεται γὰρ ὥσπερ τὰ ἔμβρυα

ἐκ τῶν χορίων.

Τὸν αὐτὸν δὲ τρόπον καὶ τῶν ἐντόμων ἐκδύνει τὸ γῆρας ὅσα ἐκδύνει, οἷον σίλφη καὶ ἐμπῖς καὶ τὰ κολεόπτερα, οἷον κάνθαρος. Πάντα δὲ μετὰ τὴν γένεσιν ἐκδύεται· ὥσπερ γὰρ τοῖς ζωοτοκουμένοις τὸ χόριον καὶ τοῖς σκωληκοτοκουμένοις περιρρήγνυται τὸ κέλυφος, ὁμοίως καὶ μελίτταις καὶ ἀκρίσιν. Οἱ δὲ τέττιγες ὅταν ἐξέλθωσι, καθιζάνουσιν ἐπὶ τε τὰς ἐλαίας καὶ καλάμους. Περιρραγέντος δὲ τοῦ κελύφους ἐξέρχονται ἐγκαταλιπόντες ὑγρότητα μικράν, καὶ μετ' οὐ πολὺν χρόνον ἀναπέτονται καὶ ἄδουσιν.

Τῶν δὲ θαλαττίων οἱ κάραβοι καὶ ἄστακοὶ ἐκδύνουσιν ὅτε μὲν τοῦ ἔαρος ὅτε δὲ τοῦ μετοπώρου μετὰ τοὺς τόκους. Ἦδη δ' εἰλημμένοι εἰσὶν ἔνιοι τῶν καράβων τὰ μὲν περὶ τὸν θώρακα μαλακὰ ἔχοντες διὰ τὸ περιερρωγένοι τὸ ὄστρακον, τὰ δὲ κάτω σκληρὰ διὰ τὸ μήπω περιερρωγένοι· τὴν γὰρ ἐκδυσιν ποιοῦνται οὐχ ὁμοίαν τοῖς ὄφεσιν. Φωλοῦσι δ' οἱ κάραβοι περὶ πέντε μῆνας. Ἐκδύνουσι δὲ καὶ οἱ καρκίνοι τὸ γῆρας, οἱ μὲν μαλακόστρακοι ὁμολογουμένως, φασὶ δὲ καὶ τοὺς ὀστρακοδέρμους, οἷον τὰς μαίας. Ὅταν δ' ἐκδύνωσι, μαλακὰ γίνεται πάμπαν τὰ ὄστρακα, καὶ οἱ γε καρκίνοι βαδίζειν οὐ σφόδρα δύνανται. Ἐκδύνει δὲ τὰ τοιαῦτα οὐχ ἅπαξ ἀλλὰ πολλάκις.

Ὅσα μὲν οὖν φωλεῖ καὶ πότε καὶ πῶς, ἔτι δὲ ποῖα καὶ πότε ἐκδύνει τὸ γῆρας, εἴρηται.

Κεφάλαιο 18

Εὐημεροῦσι δὲ τὰ ζῷα κατὰ τὰς ὥρας οὐ τὰς αὐτάς, οὐδ' ἐν ταῖς ὑπερβολαῖς ὁμοίως ἀπάσαις· ἔτι δ' ὑγίειαι καὶ νόσοι κατὰ τε τὰς ὥρας τοῖς ἑτερογενέσιν ἕτεραι καὶ τὸ σύνολον οὐχ αἱ αὐταὶ πᾶσιν.

Τοῖς μὲν οὖν ὄρνισιν οἱ αὐχμοὶ συμφέρουσι καὶ πρὸς τὴν ἄλλην ὑγίειαν καὶ πρὸς τοὺς τόκους, καὶ οὐχ ἥκιστα ταῖς φάτταις, τοῖς δ' ἰχθύσιν ἔξω τινῶν ὀλίγων αἱ ἐπομβρίαι. Ἀσύμφορα δὲ τοῦναντίον ἑκατέροις, τοῖς μὲν ὄρνισι τὰ ἔπομβρα ἔτη (οὐδὲ γὰρ ὅλως συμφέρει τὸ πολὺ πίνειν), τοῖς δ' ἰχθύσιν οἱ αὐχμοί. Τὰ μὲν οὖν γαμψώνυχα, καθάπερ εἴρηται πρότερον, ὥς ἀπλῶς (601b.) εἰπεῖν ἅποτα πάνπαν ἐστίν (ἀλλ' Ἡσίοδος ἠγνώνει τοῦτο· πεποίηκε γὰρ τὸν τῆς μαντείας πρόεδρον ἀετὸν ἐν τῇ διηγήσει τῇ περὶ τὴν πολιορκίαν τὴν Νίνου πίνοντα). Τὰ δ' ἄλλα πίνει μὲν, οὐ πολύποτα δ' ἐστίν· ὁμοίως δ' οὐδ' ἄλλ' οὐδὲν τῶν πλεούμενα ἐχόντων σομφὸν καὶ φωτόκων. Τῶν δ' ὀρνίθων ἐν ταῖς ἀρρωστίαις ἐπίδηλος ἡ πτέρωσις γίνεται· ταράττεται γάρ, καὶ οὐ τὴν αὐτὴν ἔχει κατάστασιν ἢνπερ ὑγαιονόντων.

Κεφάλαιο 19

Τῶν δ' ἰχθύων τὸ πλεῖστον γένος εὐθηνεῖ μᾶλλον, ὥσπερ εἴρηται πρότερον, ἐν τοῖς ἐπομβρίοις ἔτεσιν· οὐ γὰρ μόνον τότε πλείω τροφήν ἔχουσιν, ἀλλὰ καὶ ὅλως τὸ ὄμβριον συμφέρει, καθάπερ καὶ τοῖς ἐκ τῆς γῆς φυομένοις· καὶ γὰρ τὰ λάχανα καίπερ ἀρδευόμενα ὅμως ἐπιδίδωσιν ὑόμενα πλέον. Τὸ δ' αὐτὸ καὶ οἱ κάλαμοι πάσχουσιν οἱ πεφυκότες ἐν ταῖς λίμναις· οὐδὲν γὰρ ὡς εἰπεῖν αὐξάνονται μὴ γινομένων ὑδάτων. Σημεῖον δὲ καὶ τὸ τοὺς πλείστους τῶν ἰχθύων εἰς τὸν Πόντον ἐκτοπίζειν θεριοῦντας· διὰ γὰρ τὸ πλῆθος τῶν ποταμῶν γλυκύτερον τὸ ὕδωρ, καὶ τροφήν οἱ ποταμοὶ καταφέρουσι πολλήν. Ἔτι δὲ καὶ εἰς τοὺς ποταμοὺς ἀναπλέουσι πολλοὶ τῶν ἰχθύων, καὶ εὐθηνοῦσιν ἐν τοῖς ποταμοῖς καὶ ἐν ταῖς λίμναις, οἷον ἀμία καὶ κεστρεύς. Γίνονται δὲ καὶ οἱ κωβιοὶ πίονες ἐν τοῖς ποταμοῖς· καὶ ὅλως τὰ εὐλίμνα τῶν χωρίων ἀρίστους ἔχει ἰχθῦς. Αὐτῶν δὲ τῶν ὑδάτων οἱ θερινοὶ ὄμβροι μᾶλλον συμφέρουσι τοῖς πλείστοις ἰχθύσι, καὶ ὅταν τὸ ἔαρ καὶ τὸ θέρος καὶ τὸ φθινόπωρον γένηται ἐπόμβριον, ὁ δὲ χειμὼν εὐδιεινός. Ὡς δ' εἰπεῖν ὅλως ὅταν καὶ κατὰ τοὺς ἀνθρώπους εὐετηρία ᾖ, καὶ τοῖς πλείστοις ἰχθύσι συμβαίνει εὐημερεῖν. Ἐν δὲ τοῖς ψυχροῖς τόποις οὐκ εὐθηνοῦσιν. Μάλιστα δὲ πονοῦσιν ἐν τοῖς χειμῶσιν οἱ ἔχοντες λίθον ἐν τῇ κεφαλῇ, οἷον χρομῖς, λάβραξ, σκίαίνα, φάγγρος· διὰ γὰρ τὸν λίθον ὑπὸ τοῦ ψύχους καταπήγνυνται καὶ ἐκπίπτουσιν.

Τοῖς μὲν οὖν πλείστοις ἰχθύσι συμφέρει (602a.) μᾶλλον, κεστρεῖ δὲ καὶ κεφάλῳ καὶ ὃν καλοῦσιν τινες μαρῖνον τούναντιον· ὑπὸ γὰρ τῶν ὀμβρίων ὑδάτων ἀποτυφλοῦνται οἱ πολλοὶ αὐτῶν θᾶπτον, ἂν λίαν ὑπερβάλλωσιν. Εἰώθασι γὰρ πάσχειν αὐτὸ οἱ κέφαλοι ἐν τοῖς χειμῶσι μᾶλλον· γίνεται γὰρ αὐτῶν τὰ ὅμματα λευκά, καὶ ἀλίσκονται τότε λεπτοί, καὶ τέλος ἀπόλλυνται πάμπαν. Ἔοικε δ' οὐ διὰ τὴν ὑπερομβρίαν τοῦτο πάσχειν μᾶλλον, ἀλλὰ διὰ τὸ ψύχος· ἤδη γοῦν καὶ ἄλλοθι καὶ περὶ Ναυπλίαν τῆς Ἀργείας περὶ τὸ τέναγος πολλοὶ τυφλοὶ ἐλήφθησαν ἰσχυροῦ γενομένου ψύχους· ἐλήφθησαν δὲ πολλοὶ καὶ λευκὴν ἔχοντες τὴν ὄψιν. Πονεῖ δὲ τοῦ χειμῶνος καὶ ὁ χρύσοφρυς, τοῦ δὲ θέρους ὁ ἀχάρνας, καὶ γίνεται λεπτός. Συμφέρει δὲ τοῖς κορακίνιοις ὡς εἰπεῖν παρὰ τοὺς ἄλλους ἰχθῦς τὰ αὐχμῶδη μᾶλλον τῶν ἐτῶν· καὶ τούτοις δὲ διὰ τὸ συμβαίνειν ἀλέαν μᾶλλον ἐν

τοῖς αὐχμοῖς.

Τόποι δ' ἐκάστοις συμφέρουσι πρὸς εὐθηνίαν, ὅσα μὲν ἐστὶ φύσει παράγεια ἢ πελάγια, ἐν ἐκατέρῳ τούτων, ὅσα δ' ἐπαμφοτερίζει, ἐν ἀμφοτέροις· εἰσὶ δέ τινες καὶ ἴδιοι τόποι ἐκάστοις ἐν οἷς εὐθηνοῦσιν. Ὡς δ' ἀπλῶς εἰπεῖν οἱ φυκῶδεις συμφέρουσιν· πióτεροι γοῦν ἐν τοῖς τοιούτοις ἀλίσκονται, ὅσοι παντοδαποὺς νέμονται τόπους· οἱ μὲν γὰρ φυκιοφάγοι τροφῆς εὐποροῦσιν, οἱ δὲ σαρκοφάγοι πλείουσιν ἐντυγχάνουσιν ἰχθύσιν. Διαφέρουσι δὲ καὶ τὰ βόρεια καὶ τὰ νότια. Τὰ γὰρ μακρὰ μᾶλλον εὐθηνεῖ ἐν τοῖς βορείοις, καὶ τοῦ θέρους ἀλίσκονται ἐπὶ τοῦ αὐτοῦ χωρίου πλείους ἐν τοῖς βορείοις τῶν μακρῶν καὶ τῶν πλατέων.

Οἱ δὲ θύννοι καὶ οἱ ξιφίαι οἰστρῶσι περὶ κυνὸς ἐπιτολήν· ἔχουσι γὰρ ἀμφοτέροις τῆνικαῦτα παρὰ τὰ πτερύγια οἷον σκωλήκιον τὸ καλούμενον οἷστρον, ὅμοιον μὲν σκορπίῳ, μέγεθος δ' ἡλίκον ἀράχνης· ποιοῦσι δὲ ταῦτα πόνον τοιοῦτον ὥστ' ἐξάλλεσθαι οὐκ ἔλαττον ἐνίοτε τὸν ξιφίαν τοῦ δελφίνος, διὸ καὶ τοῖς πλοίοις πολλάκις ἐμπίπτουσιν. Χαίρουσι δ' οἱ θύννοι μάλιστα τῶν ἰχθύων τῇ ἀλέα, καὶ πρὸς τὴν ἄμμον τὴν πρὸς τῇ γῇ (602b.) προσχωροῦσι τῆς ἀλέας ἕνεκεν, καὶ ἄνω ἐπιπολάζουσιν ὅτι θερμαίνονται.

Τὰ δὲ μικρὰ τῶν ἰχθυδίων σώζεται διὰ τὸ παρορᾶσθαι· διώκουσι γὰρ τὰ μείζω οἱ μεγάλοι. Τῶν δ' ὧν καὶ τοῦ γόνου διαφθείρεται τὸ πολὺ διὰ τὰς ἀλέας· οὗ γὰρ ἂν ἐφάψωνται, πᾶν τοῦτο λυμαίνονται.

Ἀλίσκονται δὲ μάλιστα οἱ ἰχθύες πρὸ ἡλίου ἀνατολῆς καὶ μετὰ τὴν δύσιν, ὅλως δὲ περὶ δυσμᾶς ἡλίου καὶ ἀνατολάς· οὗτοι γὰρ λέγονται εἶναι ὥραῖοι βόλοι, διὸ καὶ τὰ δίκτυα ταύτην τὴν ὥραν ἀναιροῦνται οἱ ἀλιεῖς. Μάλιστα γὰρ ἀπατῶνται οἱ ἰχθύες τῇ ὄψει κατὰ τούτους τοὺς καιροὺς· τῆς μὲν γὰρ νυκτὸς ἡσυχάζουσι, πλείονος δὲ γενομένου τοῦ φωτὸς μᾶλλον ὀρῶσιν.

Νόσημα δὲ λοιμῶδες μὲν οὐδὲν εἰς τοὺς ἰχθύς φαίνεται ἐμπίπτειν, οἷον ἐπὶ τῶν ἀνθρώπων συμβαίνει πολλάκις καὶ τῶν ζωοτόκων καὶ τετραπόδων εἰς ἵππους καὶ βοῦς, καὶ τῶν ἄλλων εἰς ἓνια καὶ ἡμερα καὶ ἄγρια· νοσεῖν μέντοι γε δοκοῦσιν· τεκμαίρονται δ' οἱ ἀλιεῖς τῷ ἐνίους ἀλίσκεσθαι λεπτοὺς καὶ ἡσθενηκόσιν ὁμοίους καὶ τὸ χρῶμα μεταβεβληκότας ἐν πολλοῖς καὶ πίοσιν ἐαλωκότας καὶ τῷ γένει τῷ αὐτῷ. Περὶ μὲν οὖν τῶν θαλαττίων τοῦτον ἔχει τὸν τρόπον.

Κεφάλαιο 20

Τοῖς δὲ ποταμίοις καὶ λιμναίοις λοιμῶδες μὲν οὐδὲ τούτοις οὐδὲν γίνεται, ἐνίοις δ' αὐτῶν ἴδια νοσήματα ἐμπίπτει, οἷον ὁ γλάνις ὑπὸ κύνα μάλιστα διὰ τὸ μετέωρος νεῖν ἀστροβλής τε γίνεται καὶ ὑπὸ βροντῆς νεανικῆς καροῦται. Πάσχει δέ ποτε τοῦτο καὶ ὁ κυπρῖνος, ἥττον δέ. Οἱ δὲ γλάνεις ἐν τοῖς βραχέσι καὶ ὑπὸ δράκοντος τοῦ ὄφεως τυπτόμενοι ἀπόλλυνται πολλοί. Ἐν δὲ τῷ βαλέρω καὶ τίλωνι ἐλμῖς ἐγγινομένη ὑπὸ κύνα μετεωρίζει τε καὶ ἀσθενῇ ποιεῖ· μετέωρος δὲ γινόμενος ὑπὸ τοῦ καύματος ἀπόλλυται. Τῇ δὲ χαλκίδι νόσημα ἐμπίπτει νεανικόν· φθειρες ὑπὸ τὰ βράγγια γινόμενοι πολλοὶ ἀναιροῦσιν. Τῶν δ' ἄλλων ἰχθύων οὐδενὶ οὐδὲν τοιοῦτόν ἐστι νόσημα.

Αποθνήσκουσι δ' οἱ ἰχθύες τῷ πλόμῳ· διὸ καὶ θηρεύουσιν οἱ μὲν ἄλλοι τοὺς ἐν τοῖς ποταμοῖς καὶ (603a.) λίμναις πλομίζοντες, οἱ δὲ Φοίνικες καὶ τοὺς ἐν τῇ θαλάττῃ. Ποιοῦνται δέ τινες καὶ δύο ἄλλας θήρας τῶν ἰχθύων. Διὰ γὰρ τὸ φεύγειν ἐν τῷ χειμῶνι τὰ βαθέα ἐν τοῖς ποταμοῖς (καὶ γὰρ ἄλλως τὸ πότιμον ὕδωρ ψυχρόν) ὀρύττουσι τάφρον εἰς τὸν ποταμὸν διὰ ξηροῦ· εἴτα ταύτην καταστεγάσαντες χόρτῳ καὶ λίθοις οἷον γωλεὸν ποιοῦσιν, ἔκδυσιν ἔχοντα ἐκ τοῦ ποταμοῦ· καὶ ὅταν πάγος ᾗ, ἐκ τούτου κύρτῳ θηρεύουσιν τοὺς ἰχθύς. Καὶ ἄλλην δὲ θήραν ποιοῦνται ὁμοίως θέρους καὶ χειμῶνος· ἐν μέσῳ τῷ ποταμῷ φρυγάνοις καὶ λίθοις περιφράξαντες ὅσον στόμα καταλείπουσιν· καὶ ἐν τούτῳ κύρτον ἐνθέντες θηρεύουσιν, περιελόντες τοὺς λίθους.

Τῶν δ' ὀστρακοδέρμων συμφέρει τοῖς ἄλλοις τὰ ἔπομβρα ἔτη, πλὴν ταῖς πορφύραις. Σημεῖον δέ· ὅταν γὰρ τεθῇ οὗ ποταμὸς ἐξερεύγεται, καὶ γεύσωνται τοῦ ὕδατος, ἀποθνήσκουσιν αὐθημερόν. Καὶ ζῇ δ' ἡ πορφύρα, ὅταν θηρευθῇ, περὶ ἡμέρας πεντήκοντα. Τρέφονται δ' ὑπ' ἀλλήλων· ἐπιγίνεται γὰρ ἐπὶ τοῖς ὀστράκοις ὥσπερ φυκός τι καὶ βρύον.

Ἄ δ' ἐμβάλλουσιν εἰς τροφήν αὐταῖς, τοῦ σταθμοῦ φασι χάριν εἶναι πρὸς τὸ πλεόν ἔλκειν. Τοῖς δ' ἄλλοις οἱ αὐχμοὶ ἀσύμφοροι· ἐλάττω γὰρ καὶ χεῖρῳ γίνεται, καὶ οἱ πυρροὶ τότε γίνονται μᾶλλον κτένες. Ἐν δὲ τῷ Πυρραίῳ ποτ' εὐρίπῳ ἐξέλιπον οἱ κτένες οὐ μόνον διὰ τὸ ὄργανον ᾧ θηρεύοντες ἀνέξουν, ἀλλὰ καὶ διὰ τοὺς αὐχμούς.

Καὶ τοῖς ἄλλοις δ' ὀστρακοδέρμοις τὰ ἔπομβρα ἔτη συμφέρει διὰ τὸ γλυκυτέραν γίνεσθαι τὴν θάλατταν. Ἐν δὲ τῷ Πόντῳ διὰ τὸ ψῦχος οὐ γίνονται, οὐδ' ἐν τοῖς ποταμοῖς ἀλλ' ἢ ὀλίγα τῶν διθύρων· τὰ δὲ μονόθυρα μάλιστα ἐν τοῖς πάγοις ἐκπύγνυται.

Κεφάλαιο 21

Περὶ μὲν οὖν τὰ ἔνυδρα τῶν ζώων τοῦτον ἔχει τὸν τρόπον· τῶν δὲ τετραπόδων αἱ μὲν ὕες νοσήμασι μὲν κάμνουσι τρισὶν, ὧν ἓν μὲν καλεῖται βράγχος, ἐν ᾧ μάλιστα τὰ περὶ τὰ βράγχια καὶ τὰς σιαγόνας φλεγμαίνει. Γίνεται δὲ καὶ (603b.) ὅπου ἂν τύχη τοῦ σώματος· πολλάκις γὰρ τοῦ ποδὸς λαμβάνεται, ὅτε δ' ἐν τῷ ὠτί. Γίνεται δὲ σαπρὸν εὐθὺς καὶ τὸ ἐχόμενον, ἕως ἂν ἔλθῃ πρὸς τὸν πλευμόνα· τότε δ' ἀποθνήσκει. Ταχὺ δ' αὐξάνεται· καὶ οὐδὲν ἐσθίει, ὅταν ἄρξηται τὸ πάθος κἂν ὀσονοῦν. Ἰῶνται δ' οἱ ὑβοσκοί, ὅταν αἰσθωνται μικρὸν ὄν, ἄλλον μὲν οὐδένα τρόπον, ἀποτέμνουσι δ' ὅλον.

Δύο δ' ἄλλ' ἐστί, λέγεται δὲ κραυρᾶν ἄμφω· ὧν τὸ μὲν ἕτερόν ἐστι κεφαλῆς πόνος καὶ βάρος, ᾧ αἱ πλεῖσται ἀλίσκονται, τὸ δ' ἕτερον, ἡ κοιλία ῥεῖ. Καὶ τοῦτο μὲν δοκεῖ εἶναι ἀνίατον, θατέρῳ δὲ βοηθοῦσιν οἶνον προσφέροντες πρὸς τοὺς μυκτῆρας καὶ κλύζοντες τοὺς μυκτῆρας οἶνῳ. Διαφεύγειν δὲ καὶ τοῦτο χαλεπὸν· ἀναιρεῖ μὲν γὰρ ἐν ἡμέραις τρισὶν ἢ τέτταρσιν. Βραγχῶσι δὲ μάλιστα, ὅταν τὸ θέρος ἐνέγκῃ σῦκα καὶ πόματα ὧσιν· βοηθεῖ δὲ τὰ τε συκάμινα διδόμενα καὶ τὸ λουτρὸν ἐὰν πολὺ ᾗ καὶ θερμόν, καὶ ἐὰν τις σχάσῃ ὑπὸ τὴν γλῶτταν.

Χαλαζῶδεις δ' εἰσὶ τῶν ὕδων αἱ ὑγρόσαρκοι τὰ τε περὶ τὰ σκέλη καὶ τὰ περὶ τὸν τράχηλον καὶ τοὺς ὤμους, ἐν οἷς μέρεσι καὶ πλεῖσται γίνονται χάλαζαι· κἂν μὲν ὀλίγας ἔχῃ, γλυκυτέρα ἢ σὰρξ, ἂν δὲ πολλάς, ὑγρὰ λίαν καὶ διάχυλος γίνεται. Δῆλαι δ' εἰσὶν αἱ χαλαζῶσαι· ἐν τε γὰρ τῇ γλώττῃ τῇ κάτω ἔχουσι μάλιστα τὰς χαλάζας, καὶ ἐὰν τις τρίχας ἐκτίλλῃ ἐκ τῆς λοφιᾶς, ὕφαιμοι φαίνονται· ἔτι δὲ τὰ χαλαζῶντα τοὺς ὀπισθίους πόδας οὐ δύνανται ἡσυχάζειν. Οὐκ ἔχουσι δὲ χαλάζας, ἕως ἂν ὧσι γαλαθῆναι μόνον. Ἐκβάλλουσι δὲ τὰς χαλάζας ταῖς τίφαις· ὃ καὶ πρὸς τὴν τροφήν ἐστι χρήσιμον.

Ἄριστον δὲ πρὸς τὸ πιαίνειν καὶ τρέφειν οἱ ἐρέβινθοι καὶ τὰ σῦκα, τὸ δ' ὅλον μὴ ποιεῖν ἀπλῆν τὴν τροφήν ἀλλὰ ποικίλην· χαίρει γὰρ μεταβάλλουσα καθάπερ καὶ τᾶλλα ζῶα, καὶ ἅμα φασὶ τὸ μὲν ἐμφυσᾶν τὸ δὲ σαρκοῦν τὸ δὲ πιαίνειν τῶν προσφερομένων, τὰς δὲ βαλάνους ἡδέως μὲν ἐσθίειν, ποιεῖν δ' ὑγρὰν τὴν σάρκα· καὶ ἐὰν κύουσαι πλείους (604a.) ἐσθίωσιν, ἐκβάλλουσιν ὥσπερ καὶ τὰ

πρόβατα· ταῦτα γὰρ ἐπιδηλοτέρως τοῦτο πάσχει διὰ τὰς βαλάνους.
Χαλαζῆ δὲ μόνον τῶν ζώων ὧν ἴσμεν ὕς.

Κεφάλαιο 22

Οἱ δὲ κύνες κάμνουσι νοσήμασι τρισίν· ὀνομάζεται δὲ ταῦτα λύττα, κυνάγχη, ποδάγρα. Τούτων ἡ λύττα ἐμποιεῖ μανίαν, καὶ ὅταν δάκη, λυττῶσιν ἅπαντα τὰ δηχθέντα πλὴν ἀνθρώπου· καὶ ἀναιρεῖ δὲ τὸ νόσημα τοῦτο τὰς τε κύνας καὶ ἂν τι δηχθῇ ὑπὸ λυττώσης πλὴν ἀνθρώπου. Ἀναιρεῖ δὲ καὶ ἡ κυνάγχη τὰς κύνας· ὀλίγαι δὲ καὶ ἐκ τῆς ποδάγρας περιφεύγουσιν. Λαμβάνει δ' ἡ λύττα καὶ τὰς καμήλους. Τοὺς δ' ἐλέφαντας πρὸς μὲν τὰ ἄλλα ἀρρωστήματα ἀνόσους εἶναι φασιν, ἐνοχλεῖσθαι δ' ὑπὸ φυσῶν.

Κεφάλαιο 23

Οἱ δὲ βόες οἱ ἀγελαῖοι νοσοῦσι δύο νόσους, ὧν τὸ μὲν ποδάγρα τὸ δὲ κραῦρος καλεῖται. Ἐν μὲν οὖν τῇ ποδάγρα τοὺς πόδας οἰδοῦσιν, οὐκ ἀποθνήσκουσι δ' οὐδὲ τὰς ὀπλὰς ἀποβάλλουσιν· βέλτιον δ' ἴσχουσι τῶν κεράτων ἀλειφομένων πίσση θερμῇ. Ὅταν δὲ κραυρᾷ, τὸ πνεῦμα γίνεται θερμὸν καὶ πυκνόν· καὶ ὃ ἐστὶν ἐν τοῖς ἀνθρώποις πυρετός, τοῦτό ἐστιν ἐν τοῖς βουσὶ τὸ κραυρᾶν. Σημεῖον δὲ τῆς ἀρρωστίας τὰ ὦτα καταβάλλουσι καὶ οὐ δύνανται ἐσθίειν. Ἀποθνήσκουσι δὲ ταχέως, καὶ ἀνοιχθέντων ὁ πλευμὼν φαίνεται σαπρός.

Κεφάλαιο 24

Τῶν δ' ἵπων αἱ μὲν φορβάδες ἄνοσοι τῶν ἄλλων ἀρρωστημάτων εἰσὶ πλὴν ποδάγρας, ταύτη δὲ κάμνουσι, καὶ ἐνίστε ἀποβάλλουσι τὰς ὀπλὰς· ὅταν δ' ἀποβάλωσι, πάλιν φύουσιν εὐθύς· γίνεται γὰρ ἅμα τῆς ἐτέρας ὑποφυομένης ἢ τῆς ἐτέρας ὀπλῆς ἀποβολή. Σημεῖον δὲ τῆς ἀρρωστίας· ὁ γὰρ ὄρχις ἄλλεται ὁ δεξιός, ἢ κατὰ μέσον ὀλίγον κάτωθεν τῶν μυκτῆρων ἔγκοιλόν τι γίνεται καὶ ῥυτιδῶδες.

Οἱ δὲ τροφαὶ ἵπποι πλείστοις ἀρρωστήμασι κάμνουσιν. Λαμβάνει γὰρ καὶ εἰλός· σημεῖον δὲ τῆς ἀρρωστίας τὰ (604b.) ὀπίσθια σκέλη ἐφέλκουσιν ἐπὶ τὰ ἐμπρόσθια καὶ ὑποφέρουσιν, ὥστε ὀλίγου συγκρούειν. Ἐὰν δ' ἀσιτήσας τὰς ἐμπροσθεν ἡμέρας εἴτα μανῇ, αἷμα ἀφαιροῦντες βοηθοῦσι καὶ ἐκτέμνοντες. Λαμβάνει δὲ καὶ τέτανος· σημεῖον δ' αἱ φλέβες τέτανται πᾶσαι καὶ κεφαλὴ καὶ αὐχὴν, καὶ προβαίνει εὐθέσι τοῖς σκέλεσιν. Γίνονται δὲ καὶ ἔμπυοι οἱ ἵπποι. Λαμβάνει δὲ καὶ ἄλλος αὐτοῦς πόνος, καλεῖται δὲ τοῦτο κριθιᾶν· σημεῖον δὲ τοῦ ἀρρωστήματος μαλακὸς γίνεται ὁ οὐρανὸς καὶ θερμὸν πνεῖ. Ἀνίατα δέ, ἂν μὴ αὐτόματα καταστῇ.

Τὸ δὲ νυμφιᾶν καλούμενον, ἐν ᾧ συμβαίνει κατέχεσθαι ὅταν αὐλῇ τις, καὶ κατωπιᾶν· καὶ ὅταν ἀναβῇ τις, τροχάζει, ἕως ἂν μέλλῃ τις κατασχεῖν· κατηφεῖ δ' αἰεὶ, καὶ ὅταν λυττήσῃ. Σημεῖον δὲ καὶ τούτου τὰ ὄτα καταβάλλει πρὸς τὴν χαίτην καὶ πάλιν προτείνει, καὶ ἐκλείπει, καὶ πνεῖ.

Ἀνίατα δὲ καὶ τάδε, ἐὰν καρδίαν ἀλγήσῃ (σημεῖον δὲ λαπαρὸς ὦν ἀλγεῖ), καὶ ἐὰν ἡ κύστις μεταστῇ (σημεῖον δὲ καὶ τούτου τὸ μὴ δύνασθαι οὐρεῖν, καὶ τὰς ὀπλὰς καὶ τὰ ἰσχία ἐφέλκει), καὶ ἐὰν σταφύλινον περιχάνῃ· τοῦτο δ' ἐστὶν ἡλίκον σφονδύλη.

Τὰ δὲ δῆγματα τῆς μυγαλῆς καὶ τοῖς ἄλλοις ὑποζυγίοις χαλεπά· γίνονται δὲ φλύκταιναι. Χαλεπώτερον δὲ τὸ δῆγμα, ἐὰν κύουσα δάκῃ· ἐκρήγγνυνται γὰρ αἱ φλύκταιναι, εἰ δὲ μή, οὐ. Ἀποκτείνει δὲ δάκνουσα ἢ σφόδρα ποιεῖ ἀλγεῖν καὶ ἡ καλουμένη χαλκὶς ὑπὸ τινῶν, ὑπὸ δ' ἐνίων ζιγνίς· ἔστι δ' ὅμοιον ταῖς μικραῖς σαύραις, τὸ δὲ χρῶμα τοῖς τυφλίνοις ὄφεσιν. Ὅλως δέ φασιν οἱ ἔμπειροι, σχεδὸν ὅσα περ ἀρρωστήματα ἀρρωστεῖ ἄνθρωπος, καὶ ἵππον ἀρρωστεῖν καὶ πρόβατον. Ὑπὸ φαρμάκου δὲ διαφορεῖται καὶ ἵππος καὶ πᾶν ὑποζύγιον σανδαράκης· δίδοται δ' ἐν ὕδατι καὶ διηθεῖται. Καὶ

ἐκβάλλει δὲ κύουσα ἵππος ὁσμῇ λύχου ἀποσβεννυμένου· συμβαίνει (605a.) δὲ τοῦτο καὶ γυναιξὶν ἐνίαις κυούσαις. Περὶ μὲν οὖν τὰς νόσους τῶν ἵππων τοῦτον ἔχει τὸν τρόπον.

Τὸ δ' ἵπομανὲς καλούμενον ἐπιφύεται μὲν, ὥσπερ λέγεται, τοῖς πώλοις, αἱ δ' ἵπποι περιλείχουσαι καὶ καθαίρουσαι ἀποτρῶγουσιν αὐτό· τὰ δ' ἐπιμυθευόμενα πέπλασται μᾶλλον ὑπὸ γυναικῶν καὶ τῶν περὶ τὰς ἐπιδάς. Ὁμολογουμένως δὲ καὶ τὸ καλούμενον πῶλιον αἱ ἵπποι προεκβάλλουσι πρὸ τοῦ πώλου.

Γινώσκουσι δ' οἱ ἵπποι καὶ τὴν φωνὴν ἀκούοντες τῶν ἵππων, οἷς ἂν μαχεσάμενοι τύχωσιν. Χαίρουσι δ' οἱ ἵπποι τοῖς λειμῶσι καὶ τοῖς ἔλεσιν· καὶ γὰρ τῶν ὑδάτων τὰ θολερὰ πίνουσι, κἂν ἢ καθαρὰ, ἀνατρέπουσιν αὐτὰ οἱ ἵπποι ταῖς ὀπλαῖς, εἴτα πιοῦσαι λούονται. Καὶ γὰρ ὅλως ἐστὶ φιλόλουτρον τὸ ζῶον καὶ φίλυδρον· διὸ καὶ ἡ τοῦ ποταμίου ἵππου φύσις οὕτω συνέστηκεν. Ὁ δὲ βοῦς τοῦναντίον τοῦ ἵππου· ἂν γὰρ μὴ καθαρὸν ἢ τὸ ὕδωρ καὶ ψυχρὸν καὶ ἀκέραιον, οὐκ ἐθέλει πιεῖν.

Κεφάλαιο 25

Οἱ δ' ὄνοι νοσοῦσι μάλιστα νόσον μίαν, ἣν καλοῦσι μηλίδα. Γίνεται δὲ περὶ τὴν κεφαλὴν πρῶτον, καὶ ρεῖ φλέγμα κατὰ τοὺς μυκτῆρας παχὺ καὶ πυρρόν· ἐὰν δὲ πρὸς τὸν πλεύμονα καταβῇ, ἀποκτείνει· τὰ δὲ περὶ τὴν κεφαλὴν οὐ θανάσιμα. Δυστριγότατον δ' ἐστὶ τῶν τοιούτων ζώων· διὸ καὶ περὶ τὸν Πόντον καὶ τὴν Σκυθικὴν οὐ γίνονται ὄνοι.

Κεφάλαιο 26

Οἱ δ' ἐλέφαντες κάμνουσι τοῖς φυσώδεσι νοσήμασιν· διὸ οὔτε τὸ ὕγρὸν περίττωμα προῖεσθαι δύνανται οὔτε τὰ τῆς κοιλίας. Καὶ ἐὰν γῆν ἐσθίῃ, μαλακίζεται, ἐὰν μὴ συνεχῶς· εἰ δὲ συνεχῶς, οὐδὲν βλάπτεται. Καταπίνει δὲ καὶ λίθους ἐνίοτε. Ἀλίσκεται δὲ καὶ διαρροία· ὅταν δ' ἄλῳ, ἰατρεύουσιν ὕδωρ θερμὸν διδόντες πίνειν, καὶ τὸν χόρτον εἰς μέλι βάπτοντες διδόασιν ἐσθίειν, καὶ ἴστησιν ἐκάτερον τούτων.

Ὅταν δὲ κοπιάσωσι διὰ τὸ μὴ κοιμηθῆναι, ἀλλὶ τριβόμενοι καὶ ἐλαίῳ καὶ ὕδατι θερμῷ τοὺς ὤμους ὑγιάζονται. Καὶ (605b.) ὅταν τοὺς ὤμους ἀλγῇ, ὕεια κρέα ὀπτήσαντες προστιθέασι, καὶ βοηθεῖ αὐτοῖς. Ἐλαιὸν δ' οἱ μὲν πίνουσιν οἱ δ' οὐ τῶν ἐλεφάντων· κἂν τύχη σιδήριόν τι ἐν τῷ σώματι ἐνόν, τὸ ἔλαιον ἐκβάλλει, ὅταν πῖωσιν, ὡς φασί· τοῖς δὲ μὴ πίνουσι ρίζαν ἐψήσαντες ἐν ἐλαίῳ διδόασιν.

Κεφάλαιο 27

Περὶ μὲν οὖν τῶν τετραπόδων ζώων τοῦτον ἔχει τὸν τρόπον. Τῶν δ' ἐντόμων τὰ πλεῖστα εὐθηνεῖ ἐν ἥπερ ὥρα καὶ γίνεται, ὅταν τοιοῦτον ᾖ τὸ ἔτος οἷον τὸ ἔαρ, ὑγρὸν καὶ ἀλεεινόν. Ταῖς δὲ μελίτταις ἐγγίνεται ἐν τοῖς σμήνεσι θηρία ἃ λυμαίνεται τὰ κηρία, τό τε σκωλήκιον τὸ ἀραχνιοῦν καὶ λυμαινόμενον τὰ κηρία (καλεῖται δὲ κλῆρος, οἱ δὲ πυραύστην καλοῦσιν· ὃς ἐντίκτει ἐν τῷ κηρίῳ ὅμοιον ἑαυτῷ οἷον ἀράχνιον, καὶ νοσεῖν ποιεῖ τὸ σμήνος), καὶ ἄλλο θηρίον, οἷον ὁ ἡπίολος ὁ περὶ τὸν λύχνον πετόμενος· οὗτος ἐντίκτει τι χροῦ ἀνάπλεων, καὶ οὐ κεντεῖται ὑπὸ τῶν μελιττῶν, ἀλλὰ μόνον φεύγει καπνιζόμενος. Ἐγγίνονται δὲ καὶ κάμπαι ἐν τοῖς σμήνεσιν [ἃς καλοῦσι τερηδόνας], ἃς οὐκ ἀμύνονται αἱ μέλιτται. Νοσοῦσι δὲ μάλιστα ὅταν ἐρυσιβώδη τὰ ἄνθη ἢ ὕλη ἐνέγκῃ, καὶ ἐν τοῖς αὐχμηροῖς ἔτεσιν. Πάντα δὲ τὰ ἔντομα ἀποθνήσκει ἐλαιούμενα· τάχιστα δ', ἂν τις τὴν κεφαλὴν ἀλείψας ἐν τῷ ἡλίῳ θῇ.

Κεφάλαιο 28

Διαφέρει δὲ τὰ ζῷα καὶ κατὰ τοὺς τόπους· ὥσπερ γὰρ ἔν τιςιν ἔνια οὐ γίνεται παντάπασιν, οὕτως ἐν ἐνίοις τόποις γίνεται μὲν ἐλάττω δὲ καὶ ὀλιγοβιώτερα, καὶ οὐκ εὐημερεῖ.

Καὶ ἐνίοτε ἐν τοῖς πάρεγγυς τόποις ἡ διαφορὰ γίνεται τῶν τοιούτων, οἷον τῆς Μιλησίας ἐν τόποις γειτνιῶσιν ἀλλήλοις ἔνθα μὲν γίνονται τέττιγες ἔνθα δ' οὐ γίνονται, καὶ ἐν Κεφαληνίᾳ ποταμὸς διείργει, οὗ ἐπὶ τάδε μὲν γίνονται τέττιγες, ἐπ' ἐκεῖνα δ' οὐ γίνονται. Ἐν δὲ Πορδοσελήνῃ ὁδὸς διείργει, ἧς ἐπ' ἐκεῖνα μὲν γαλῇ γίνεται, ἐπὶ θάτερα δ' οὐ γίνεται.

Καὶ ἐν τῇ Βοιωτίᾳ ἀσπάλακες περὶ μὲν τὸν Ὀρχομενὸν (606a.) πολλοὶ γίνονται, ἐν δὲ τῇ Λεβαδιακῇ γειτνιώσῃ οὐκ εἰσίν, οὐδ' ἂν τις κομίσει, ἐθέλουσιν ὀρύττειν. Ἐν Ἰθάκῃ δ' οἱ δασύποδες, ἐάν τις ἀφῇ κομίσας, οὐ δύνανται ζῆν, ἀλλὰ φαίνονται τεθνεῶτες πρὸς τῇ θαλάττῃ ἐστραμμένοι, ἥπερ ἂν εἰσαχθῶσιν. Καὶ ἐν μὲν Σικελίᾳ ἵππομύρμηκες οὐκ εἰσίν, ἐν δὲ Κυρήνῃ οἱ φωνοῦντες βάτραχοι πρότερον οὐκ ἦσαν. Ἐν δὲ Λιβύῃ πάσῃ οὔτε σὺς ἄγριός ἐστιν οὔτ' ἔλαφος οὔτ' αἰξ ἄγριος· ἐν δὲ τῇ Ἰνδικῇ, ὡς φησὶ Κτησίας οὐκ ὦν ἀξιόπιστος, οὔτ' ἄγριος οὔτε ἡμερος ὕς, τὰ δ' ἄναιμα καὶ τὰ φολιδωτὰ πάντα μεγάλα. Καὶ ἐν μὲν τῷ Πόντῳ οὔτε τὰ μαλάκια γίνεται οὔτε τὰ ὀστρακόδερμα, εἰ μὴ ἔν τιςι τόποις ὀλίγα· ἐν δὲ τῇ ἐρυθρᾷ θαλάττῃ ὑπερμεγέθη τὰ ὀστρακόδερμα πάντα.

Ἐν δὲ Συρίᾳ τὰ πρόβατα τὰς οὐράς ἔχει τὸ πλάτος πήχεως, τὰ δ' ὄτα αἱ αἰγες σπιθαμῆς καὶ παλαιστῆς, καὶ ἔνιαι συμβάλλουσι κάτω τὰ ὄτα πρὸς τὴν γῆν· καὶ οἱ βόες, ὥσπερ αἱ κάμηλοι, κάλας ἔχουσιν ἐπὶ τῶν ἀκρωμίων. Καὶ ἐν Λυκίᾳ αἱ αἰγες κείρονται, ὥσπερ τὰ πρόβατα παρὰ τοῖς ἄλλοις. Καὶ ἐν μὲν Λιβύῃ εὐθύς γίνεται κέρατα ἔχοντα τὰ κερατώδη τῶν ζώων, οὐ μόνον οἱ ἄρνες, ὥσπερ φησὶν Ὅμηρος, ἀλλὰ καὶ τᾶλλα· ἐν δὲ τῷ Πόντῳ περὶ τὴν Σκυθικὴν τοῦναντίον· ἀκέρата γὰρ γίνονται.

Καὶ ἐν Αἰγύπτῳ τὰ μὲν ἄλλα μείζω ἢ ἐν τῇ Ἑλλάδι, καθάπερ οἱ βόες καὶ τὰ πρόβατα, τὰ δ' ἐλάττω, οἷον οἱ κύνες καὶ λύκοι καὶ λαγωοὶ καὶ ἀλώπεκες καὶ κόρακες καὶ ἰέρακες, τὰ δὲ παραπλήσια, οἷον κορῶναι καὶ αἰγες. Αἰτιῶνται δὲ τὰς τροφάς, ὅτι τοῖς μὲν ἄφθονος τοῖς δὲ σπανία, οἷον τοῖς λύκοις καὶ τοῖς ἰέραξι, τοῖς μὲν γὰρ

σαρκοφάγοις ὀλίγη· σπάνια (606b.) γὰρ τὰ μικρὰ ὄρνεα· τοῖς δὲ δασύποσι, καὶ ὅσα μὴ σαρκοφάγα, ὅτι οὐτ' ἀκρόδρυα οὐτ' ὀπώρα χρόνιος.

Πολλαχοῦ δὲ καὶ ἡ κρᾶσις αἰτία, οἷον ἐν τῇ Ἰλλυρίδι καὶ τῇ Θράκῃ καὶ τῇ Ἠπειρῷ οἱ ὄνοι μικροί, ἐν δὲ τῇ Σκυθικῇ καὶ Κελτικῇ ὅλως οὐ γίνονται· δυσχείμερα γὰρ ταῦτα.

Ἐν δ' Ἀραβίᾳ σαῦραι μείζους πηχυαίων γίνονται καὶ μύες πολὺ μείζους τῶν ἄρουραίων, τὰ μὲν ὀπίσθια σκέλη ἔχοντες καὶ σπιθαμῆς, τὰ δὲ πρόσθια ὅσον ἄχρι τῆς πρώτης καμπῆς τῶν δακτύλων.

Ἐν δὲ τῇ Λιβύῃ τὸ τῶν ὄφεων μέγεθος γίνεται ἅπλετον, ὥσπερ καὶ λέγεται· ἤδη γὰρ φασὶ τινες προσπλεύσαντες ἰδεῖν ὅσα βοῶν πολλῶν, ἃ δῆλον γενέσθαι αὐτοῖς ὅτι ὑπ' ὄφεων ἦν κατεδηδεσμένα· ἀναγομένων γὰρ διώκειν ταχὺ τὰς τριήρεις αὐτούς, καὶ ἐνίους αὐτῶν ἐμβαλεῖν ἀνατρέψαντας τὴν τριήρη.

Ἔτι δὲ λέοντες μὲν ἐν τῇ Λιβύῃ μᾶλλον, καὶ τῆς Ἑυρώπης ἐν τῷ μεταξὺ τόπῳ τοῦ Ἀχελώου καὶ Νέσσου ποταμοῦ· παρδάλεις δ' ἐν τῇ Ἀσίᾳ, ἐν δὲ τῇ Εὐρώπῃ οὐ γίνονται.

Ὅλως δὲ τὰ μὲν ἄγρια ἀγριώτερα ἐν τῇ Ἀσίᾳ, ἀνδρειώτερα δ' ἐν τῇ Εὐρώπῃ πάντα, πολυμορφότατα δ' ἐν τῇ Λιβύῃ· καὶ λέγεται δέ τις παροιμία, ὅτι αἰεὶ Λιβύῃ φέρει τι καινόν. Διὰ γὰρ τὴν ἀνομβρίαν μίσγεσθαι δοκεῖ ἀπαντῶντα πρὸς τὰ ὑδάτια καὶ τὰ μὴ ὁμόφυλα, καὶ ἐκφέρειν ὧν οἱ χρόνοι οἱ τῆς κυήσεως οἱ αὐτοὶ καὶ τὰ μεγέθη μὴ πολὺ ἀπ' ἀλλήλων· πρὸς ἄλληλα δὲ πραῦνεται διὰ τὴν τοῦ ποτοῦ χρεῖαν. Καὶ γὰρ καὶ δέονται τοῦ πίνειν τούναντίον τῶν ἄλλων τοῦ χειμῶνος μᾶλλον ἢ τοῦ θέρους· διὰ γὰρ τὸ μὴ εἰσθῆναι ὕδατα γίνεσθαι τοῦ θέρους ἀσύνηθες αὐτοῖς τὸ πίνειν ἐστίν. Καὶ οἷ γε μύες ὅταν πίωσιν, (607a.) ἀποθνήσκουσιν. Γίνεται δὲ καὶ ἄλλα ἐκ μίξεως μὴ ὁμοφύλων, ὥσπερ καὶ ἐν Κυρήνῃ οἱ λύκοι μίσγονται ταῖς κυσὶ καὶ γεννῶσι, καὶ ἐξ ἀλώπεκος καὶ κυνὸς οἱ Λακωνικοί. Φασὶ δὲ καὶ ἐκ τοῦ τίγριος καὶ κυνὸς γίνεσθαι τοὺς Ἰνδικούς, οὐκ εὐθὺς δ' ἄλλ' ἐπὶ τῆς τρίτης μίξεως· τὸ γὰρ πρῶτον γεννηθὲν θηριῶδες γίνεσθαι φασιν. Ἄγοντες δὲ δεσμεύουσιν εἰς τὰς ἐρημίας τὰς κύνας· καὶ πολλαὶ κατεσθίονται, ἐὰν μὴ τύχῃ ὀργῶν πρὸς τὴν ὀχείαν τὸ θηρίον.

Κεφάλαιο 29

Ποιοῦσι δ' οἱ τόποι διαφέροντα καὶ τὰ ἦθη, οἷον οἱ ὀρεινοὶ καὶ τραχεῖς τῶν ἐν τοῖς πεδινοῖς καὶ μαλακοῖς· καὶ γὰρ τὰς ὄψεις ἀγριώτερα καὶ ἀλκιμώτερα, καθάπερ καὶ οἱ ἐν τῷ Ἄθῳ ὕες· τούτων γὰρ οὐδὲ τὰς θηλείας ὑπομένουσι τῶν κάτω οἱ ἄρρενες.

Καὶ πρὸς τὰ δῆγματα δὲ τῶν θηρίων μεγάλην ἔχουσιν αἱ χῶραι διαφοράν, οἷον περὶ μὲν Φάρον καὶ ἄλλους τόπους οἱ σκορπίοι οὐ χαλεποί, ἐν ἄλλοις δὲ τόποις καὶ ἐν τῇ Σκυθίᾳ πολλοὶ καὶ μεγάλοι καὶ χαλεποὶ γίνονται, κἂν τινα πατάξωσιν ἄνθρωπον ἢ τι ἄλλο θηρίον, ἀποκτείνουσι, καὶ τὰς ὕς, αἱ ἥκιστα αἰσθάνονται τῶν ἄλλων δηγμάτων, καὶ τούτων τὰς μελαίνας μᾶλλον ἀποκτείνουσιν· τάχιστα δ' ἀπόλλυνται αἱ ὕες πληγεῖσαι, ἐὰν εἰς ὕδωρ ἔλθωσιν.

Τὰ τε τῶν ὄφεων δῆγματα πολὺ διαφέρουσιν. Ἡ τε γὰρ ἀσπίς ἐν Λιβύῃ γίνεται, ἐξ οὗ ὄφεως ποιοῦσι τὸ σηπτικόν, καὶ ἄλλως ἀνιάτος. Γίνεται δὲ καὶ ἐν τῷ σιλφίῳ τι ὀφείδιον, οὗ καὶ λέγεται ἄκος εἶναι λίθος τις, ὃν λαμβάνουσιν ἀπὸ τάφου βασιλέως τῶν ἀρχαίων καὶ ἐν οἴνῳ ἀποβάψαντες πίνουσιν. Τῆς δ' Ἰταλίας ἐν τισὶ τόποις καὶ τὰ τῶν ἀσκαλαβωτῶν δῆγματα θανάσιμά ἐστιν. Πάντων δὲ χαλεπώτερα ἐστὶ τὰ δῆγματα τῶν ἰοβόλων, ἐὰν τύχῃ ἀλλήλων ἐδηδοκότα, οἷον σκορπίον ἔχῃς, Ἔστι δὲ τοῖς πλείστοις αὐτῶν πολέμιον τὸ τοῦ ἀνθρώπου πτύελον. Ἔστι δέ τι ὀφείδιον μικρόν, ὃ καλοῦσιν τινες ἱερόν, ὃ οἱ πάνυ μεγάλοι ὄφεις φεύγουσιν· γίνεται δὲ τὸ μέγιστον πηχυαῖον, καὶ δασὺ ἰδεῖν· ὃ τι δ' ἂν δάκῃ, εὐθὺς σήπεται τὸ κύκλω. Ἔστι δὲ καὶ ἐν τῇ Ἰνδικῇ ὀφείδιόν τι, οὗ μόνου φάρμακον οὐκ ἔχουσιν.

Κεφάλαιο 30

(607b.) Διαφέρει δὲ τὰ ζῶα τῷ εὐημερεῖν ἢ τοῦναντίον καὶ περὶ τὰς κυήσεις. Τὰ μὲν γὰρ ὀστρακόδερμα, οἷον κτένες καὶ ἅπαντα τὰ ὀστρεώδη καὶ τὰ μαλακόστρακα, ἄριστα ἔστιν ὅταν κύη, οἷον τὰ καραβώδη. Λέγεται δὲ κύησις καὶ τῶν ὀστρακοδέρμων· τὰ μὲν γὰρ μαλακόστρακα καὶ ὀχευόμενα ὁρᾶται καὶ ἀποτίκτοντα, ἐκείνων δ' οὐδέν. Καὶ τὰ μαλάκια δὲ κύοντα ἄριστα, οἷον τευθίδες τε καὶ σηπίαι καὶ πολύποδες.

Οἱ δ' ἰχθύες ἀρχόμενοι μὲν κυῖσκεσθαι σχεδὸν ἀγαθοὶ πάντες, προΐουσης δὲ τῆς κυήσεως οἱ μὲν οἱ δ' οὐ. Κύουσα μὲν οὖν ἀγαθὴ μαινίς· μορφὴ δὲ τῆς θηλείας στρογγυλωτέρα, ὁ δ' ἄρρην μακρότερος καὶ πλατύτερος· συμβαίνει δ' ἀρχομένης κυῖσκεσθαι τῆς θηλείας τοὺς ἄρρενας μέλαν τὸ χρῶμα ἴσχειν καὶ ποικιλώτερον, καὶ φαγεῖν χειρίστους εἶναι· καλοῦνται δ' ὑπ' ἐνίων τράγοι περὶ τοῦτον τὸν χρόνον.

Μεταβάλλουσι δὲ καὶ οὓς καλοῦσι κοττύφους καὶ κίχλας καὶ ἡ σμαρίς τὸ χρῶμα κατὰ τὰς ὥρας, ὥσπερ ἓνια τῶν ὀρνέων· τοῦ μὲν γὰρ ἕαρος μέλανες γίνονται, εἴτα ἐκ τοῦ ἕαρος λευκοὶ πάλιν. Μεταβάλλει δὲ καὶ ἡ φυκίς τὴν χροάν· τὸν μὲν γὰρ ἄλλον χρόνον λευκὴ ἔστι, τοῦ δ' ἕαρος ποικίλη· μόνη δ' αὕτη τῶν θαλαττίων ἰχθύων στιβαδοποιεῖται, ὥς φασί, καὶ τίκτει ἐν τῇ στιβάδι. Μεταβάλλει δὲ καὶ ἡ μαινίς, ὥσπερ εἴρηται, καὶ ἡ σμαρίς, καὶ ἐκ λευκοτέρων πάλιν ἐν τῷ θέρει καθίστανται καὶ γίνονται μέλανες· μάλιστα δ' ἐπίδηλός ἐστι περὶ τὰ πτερύγια καὶ τὰ βράγχια.

Καὶ κορακῖνος δ' ἄριστός ἐστι κύων, ὥσπερ καὶ ἡ μαινίς. Κεστρεὺς δὲ καὶ λάβραξ καὶ οἱ λοιποὶ πλωτοὶ φαῦλοι κύοντες σχεδὸν πάντες.

Ὅμοιοι δὲ κύοντες καὶ μὴ ὀλίγοι, οἷον γλαῦκος. Φαῦλοι δὲ καὶ οἱ γέροντες τῶν ἰχθύων, καὶ οἱ γε θύννοι καὶ εἰς τὰς ταριχεῖας φαῦλοι οἱ γέροντες· πολὺ γὰρ συντήκεται τῆς σαρκός. Τὸ δ' αὐτὸ καὶ ἐπὶ τῶν ἄλλων συμβαίνει ἰχθύων. Δῆλοι δ' οἱ γέροντες αὐτῶν τῷ μεγέθει τῶν λεπίδων καὶ τῇ σκληρότητι. Ἦδη δ' ἐλήφθη γέρων θύννος οὗ σταθμὸς μὲν ἦν τάλαντα πεντεκαίδεκα, τοῦ δ' οὐραίου τὸ διάστημα δύο πήχεων ἦν καὶ σπιθαμῆς.

Οἱ δὲ ποτάμιοι καὶ οἱ λιμναῖοι (608a.) ἄριστοι γίνονται μετὰ τὴν

ἄφεσιν τοῦ κυήματος καὶ τοῦ θοροῦ, ὅταν ἀνατραφῶσιν· κύοντες δ' ἔνιοι μὲν ἀγαθοί, οἷον σαπερδῖς, ἔνιοι δὲ φαῦλοι, οἷον γλάνις. Οἱ μὲν οὖν ἄλλοι πάντες ἀμείνους οἱ ἄρρενες τῶν θηλειῶν, γλάνις δ' ὁ θῆλυς τοῦ ἄρρενος ἀμείνων. Καὶ ἐν ταῖς ἐγγέλυσι δέ, ὥς καλοῦσι θηλείας, ἀμείνους εἰσὶν· οὐκ οὔσας δὲ θηλείας καλοῦσιν, ἀλλὰ τῇ ὄψει διαφόρους.

Βιβλίο 9

Κεφάλαιο 1

Τὰ δ' ἦθη τῶν ζώων ἐστὶ τῶν μὲν ἀμαυροτέρων καὶ βραχυβιωτέρων ἥττον ἡμῖν ἐνδηλα κατὰ τὴν αἴσθησιν, τῶν δὲ μακροβιωτέρων ἐνδηλότερα. Φαίνονται γὰρ ἔχοντά τινα δύναμιν περὶ ἕκαστον τῶν τῆς ψυχῆς παθημάτων φυσικὴν, περὶ τε φρόνησιν καὶ εὐήθειαν καὶ ἀνδρείαν καὶ δειλίαν, περὶ τε πραότητα καὶ χαλεπότητα καὶ τὰς ἄλλας τὰς τοιαύτας ἕξεις. Ἐνια δὲ κοινωνεῖ τινὸς ἅμα καὶ μαθήσεως καὶ διδασκαλίας, τὰ μὲν παρ' ἀλλήλων, τὰ δὲ καὶ παρὰ τῶν ἀνθρώπων, ὅσαπερ ἀκοῆς μετέχει, μὴ μόνον ὅσα τῶν ψόφων, ἀλλ' ὅσα καὶ τῶν σημείων διαισθάνεται τὰς διαφοράς.

Ἐν πᾶσι δ' ὅσοις ἐστὶ γένεσι τὸ θῆλυ καὶ τὸ ἄρρεν, σχεδὸν ἡ φύσις ὁμοίως διέστησε τὸ ἦθος τῶν θηλειῶν πρὸς τὸ τῶν ἀρρένων. Μάλιστα δὲ φανερόν ἐπὶ τε τῶν ἀνθρώπων καὶ τῶν μέγεθος ἔχόντων καὶ τῶν ζωοτόκων τετραπόδων· μαλακώτερον γὰρ τὸ ἦθος ἐστὶ τῶν θηλειῶν, καὶ τιθασσεύεται θᾶττον, καὶ προσίεται τὰς χεῖρας μᾶλλον, καὶ μαθητικώτερον, οἷον καὶ αἱ Λάκαιναι κύνες αἱ θήλειαι εὐφυέστεραι τῶν ἀρρένων εἰσίν. Τὸ δ' ἐν τῇ Μολοττία γένος τῶν κυνῶν τὸ μὲν θηρευτικὸν οὐδὲν διαφέρει πρὸς τὸ παρὰ τοῖς ἄλλοις, τὸ δ' ἀκόλουθον τοῖς προβάτοις τῷ μεγέθει καὶ τῇ ἀνδρείᾳ τῇ πρὸς τὰ θηρία. Διαφέρουσι δ' οἱ ἐξ ἀμφοῖν ἀνδρεία καὶ φιλοπονία, οἱ τε ἐκ τῶν ἐν τῇ Μολοττία γινομένων κυνῶν καὶ ἐκ τῶν Λακωνικῶν.

Ἀθυμότερα δὲ τὰ θήλεα πάντα τῶν ἀρρένων πλὴν ἄρκτου καὶ παρδάλεως· τούτων δ' ἡ θήλεια δοκεῖ εἶναι ἀνδρειότερα. Ἐν δὲ τοῖς ἄλλοις γένεσι τὰ θήλεα (608b.) μαλακώτερα καὶ κακουργότερα καὶ ἥττον ἀπλᾶ καὶ προπετέστερα καὶ περὶ τῶν τέκνων τροφὴν φροντιστικώτερα, τὰ δ' ἄρρενα ἐναντίως θυμωδέστερα καὶ ἀγριώτερα καὶ ἀπλούστερα καὶ ἥττον ἐπίβουλα.

Τούτων δ' ἵχνη μὲν τῶν ἡθῶν ἐστὶν ἐν πᾶσιν ὥς εἰπεῖν, μᾶλλον δὲ φανερώτερα ἐν τοῖς ἔχουσι μᾶλλον ἦθος καὶ μάλιστα ἐν ἀνθρώπῳ· τοῦτο γὰρ ἔχει τὴν φύσιν ἀποτετελεσμένην, ὥστε καὶ ταύτας τὰς ἕξεις εἶναι φανερωτέρας ἐν αὐτοῖς. Διόπερ γυνὴ ἀνδρὸς ἐλεημονέστερον καὶ ἀρίδακρυ μᾶλλον, ἔτι δὲ φθονερώτερον καὶ μεμψιμοιρότερον, καὶ φιλολοίδορον μᾶλλον καὶ πληκτικώτερον. Ἔστι δὲ καὶ δύσθυμον μᾶλλον τὸ θῆλυ τοῦ ἄρρενος καὶ δύσελπι, καὶ ἀναιδέστερον καὶ ψευδέστερον, εὐαπατητότερον δὲ καὶ

μνημονικώτερον, ἔτι δ' ἀγρυπνότερον καὶ ὀκνηρότερον, καὶ ὅλως ἀκινήτοτερον τὸ θῆλυ τοῦ ἄρρενος, καὶ τροφῆς ἐλάττονός ἐστιν.

Βοηθητικώτερον δὲ καί, ὥσπερ ἐλέχθη, ἀνδρειότερον τὸ ἄρρεν τοῦ θήλεός ἐστιν, ἐπεὶ ἐν τοῖς μαλακίοις, ὅταν τῷ τριῶδοντι πληγῇ ἡ σηπία, ὁ μὲν ἄρρην βοηθεῖ τῇ θηλείᾳ, ἡ δὲ θήλεια φεύγει τοῦ ἄρρενος πληγέντος. Πόλεμος μὲν οὖν πρὸς ἄλληλα τοῖς ζώοις ἐστίν, ὅσα τοὺς αὐτοὺς τε κατέχει τόπους καὶ ἀπὸ τῶν αὐτῶν ποιεῖται τὴν ζώην· ἐὰν γὰρ ἦ σπάνιος ἡ τροφή, καὶ πρὸς ἄλληλα τὰ ὁμόφυλα μάχεται, ἐπεὶ καὶ τὰς φώκας φασὶ πολεμεῖν τὰς περὶ τὸν αὐτὸν τόπον, καὶ ἄρρενι ἄρρενα καὶ θηλείᾳ θήλειαν, ἕως ἂν ἀποκτείνῃ ἢ ἐκβληθῇ θάτερον ὑπὸ θατέρου· καὶ τὰ σκυμνία ὡσαύτως πάντα. Ἔτι δὲ τοῖς ὁμοφάγοις ἅπαντα πολεμεῖ, καὶ ταῦτα τοῖς ἄλλοις· ἀπὸ γὰρ τῶν ζώων ἡ τροφή αὐτοῖς· ὅθεν καὶ τὰς διεδρείας καὶ τὰς συνεδρείας οἱ μάντις λαμβάνουσι, δίδρα μὲν τὰ πολέμια τιθέντες, σύνεδρα δὲ τὰ εἰρηνόοντα πρὸς ἄλληλα. Κινδυνεύει δέ, εἰ ἀφθονία τροφῆς εἴη, πρὸς τε τοὺς ἀνθρώπους ἂν ἔχειν τιθασσῶς τὰ νῦν φοβούμενα αὐτῶν καὶ ἀγριαίνοντα, καὶ πρὸς ἄλληλα τὸν αὐτὸν τρόπον. Δῆλον δὲ ποιεῖ τοῦτο ἡ περὶ Αἴγυπτον ἐπιμέλεια τῶν ζώων· διὰ γὰρ τὸ τροφήν ὑπάρχειν καὶ μὴ ἀπορεῖν μετ' ἀλλήλων ζῶσι καὶ αὐτὰ τὰ ἀγριώτατα· διὰ τὰς ὠφελείας γὰρ ἡμεροῦται, (609a.) οἷον ἐνιαχοῦ τὸ τῶν κροκοδείλων γένος πρὸς τὸν ἱερέα διὰ τὴν ἐπιμέλειαν τὴν τῆς τροφῆς. Τὸ δ' αὐτὸ τοῦτ' ἐστὶν ἰδεῖν καὶ περὶ τὰς ἄλλας χώρας γινόμενον, καὶ κατὰ μόρια τούτων.

Ἔστι δ' αἰετὸς καὶ δράκων πολέμια· τροφήν γὰρ ποιεῖται τοὺς ὄφεις ὁ αἰετός. Καὶ ἰχνεύμων καὶ φάλαγξ· θηρεύει γὰρ τοὺς φάλαγγας ὁ ἰχνεύμων. Τῶν δ' ὀρνίθων ποικιλίδες καὶ κορυδῶνες καὶ πίπρα καὶ χλωρεὺς· τὰ γὰρ φᾶ κατεσθίουσιν ἀλλήλων. Καὶ κορώνη καὶ γλαυξ· ἡ μὲν γὰρ τῆς μεσημβρίας, διὰ τὸ μὴ ὀξὺ βλέπειν τὴν γλαῦκα τῆς ἡμέρας, κατεσθίει ὑφαρπάζουσα αὐτῆς τὰ φᾶ, ἡ δὲ γλαυξ τῆς νυκτός τὰ τῆς κορώνης, καὶ κρείττων ἡ μὲν τῆς ἡμέρας ἡ δὲ τῆς νυκτός ἐστίν. Καὶ γλαυξ δὲ καὶ ὄρχιλος πολέμια· τὰ γὰρ φᾶ κατεσθίει καὶ οὗτος τῆς γλαυκός. Τῆς δ' ἡμέρας καὶ τὰ ἄλλα ὀρνίθια τὴν γλαῦκα περιπέταται, ὃ καλεῖται θαυμάζειν, καὶ προσπετόμενα τίλλουσιν· διὸ οἱ ὀρνιθοθήραι θηρεύουσιν αὐτῇ παντοδαπὰ ὀρνίθια. Πολέμιος δὲ καὶ ὁ πρέσβυς καλούμενος καὶ γαλῇ [καὶ κορώνη]· τὰ γὰρ φᾶ καὶ τοὺς νεοττοὺς κατεσθίουσιν αὐτῆς.

Καὶ τρυγὼν καὶ πυραλλίς· τόπος γὰρ τῆς νομῆς καὶ βίος ὁ αὐτός.

Καὶ κελεὸς καὶ λιβυός. Ἰκτῖνος δὲ καὶ κόραξ· ὑφαιρεῖται γὰρ τοῦ κόρακος ὁ ἰκτῖνος ὅ τι ἂν ἔχη διὰ τὸ κρείττων εἶναι τοῖς ὄνυξι καὶ τῇ πτήσει, ὥστε ἡ τροφή ποιεῖ πολεμίους καὶ τούτους.

Ἔτι οἱ ἀπὸ τῆς θαλάττης ζῶντες ἀλλήλοις, οἷον βρένθος καὶ λάρος καὶ ἄρπη. Τριόρχης δὲ καὶ φρυῖνος καὶ ὄφις· κατεσθίει γὰρ ὁ τριόρχης αὐτούς. Τρυγὼν δὲ καὶ χλωρεύς· ἀποκτείνει γὰρ τὴν τρυγὼνα ὁ χλωρεύς, καὶ ἡ κορώνη τὸν καλούμενον τύπανον. Τὸν δὲ κάλαριν ὁ αἰγώλιος καὶ οἱ ἄλλοι γαμψώνυχες κατεσθίουσιν· ὅθεν ὁ πόλεμος αὐτοῖς. Πόλεμος δὲ καὶ ἀσκαλαβώτη καὶ ἀράχνη· κατεσθίει γὰρ τοὺς ἀράχνας ὁ ἀσκαλαβώτης. Πίπῳ δὲ καὶ ἐρωδιῷ· τὰ γὰρ ῥα κατεσθίει καὶ τοὺς νεοττοὺς τοῦ ἐρωδιοῦ. Αἰγίθῳ δὲ καὶ ὄνῳ πόλεμος διὰ τὸ παριόντα τὸν ὄνον κνήθεσθαι εἰς τὰς ἀκάνθας τὰ ἔλκη· διὰ τε οὖν τοῦτο, κὰν ὀγκήσῃται, ἐκβάλλει τὰ ῥα καὶ τοὺς νεοττούς· φοβούμενοι γὰρ ἐκπίπτουσιν· ὁ δὲ διὰ τὴν βλάβην ταύτην κολάπτει ἐπιπετόμενος τὰ ἔλκη (609b.) αὐτοῦ.

Λύκος δ' ὄνῳ καὶ ταύρῳ καὶ ἀλώπεκι πολέμιος· ὠμοφάγος γὰρ ὢν ἐπιτίθεται τοῖς βουσί καὶ τοῖς ὄνοις καὶ τῇ ἀλώπεκι. Καὶ ἀλώπηξ δὲ καὶ κίρκος διὰ τὴν αὐτὴν αἰτίαν· γαμψώνυχος γὰρ ὢν καὶ ὠμοφάγος ἐπιτίθεται καὶ ἔλκη ποιεῖ κόπτων. Καὶ κόραξ ταύρῳ καὶ ὄνῳ πολέμιος διὰ τὸ τύπτειν ἐπιπετόμενος αὐτούς καὶ τὰ ὄμματα κολάπτειν αὐτῶν. Πολεμεῖ δὲ καὶ ἀετὸς καὶ ἐρωδιός· γαμψώνυχος γὰρ ὢν ὁ ἀετὸς ἐπιτίθεται, ὁ δ' ἀποθνήσκει ἀμυνόμενος. Καὶ αἰσάλων δ' αἰγυπιῷ πολέμιος, καὶ κρεῖξ ἐλεῶ καὶ κοττύφῳ καὶ χλωρίωνι, ὃν ἔνιοι μυθολογοῦσι γενέσθαι ἐκ πυρκαϊᾶς· καὶ γὰρ αὐτοὺς βλέπτει καὶ τὰ τέκνα αὐτῶν. Καὶ σίττη καὶ τροχίλος ἀετῷ πολέμια· ἡ γὰρ σίττη καταγνύει τὰ ῥα τοῦ ἀετοῦ, ὁ δ' ἀετὸς καὶ διὰ τοῦτο καὶ διὰ τὸ ὠμοφάγος εἶναι πολέμιός ἐστι πᾶσιν. Ἄνθος δ' ἵππῳ πολέμιος· ἐξελαύνει γὰρ ὁ ἵππος ἐκ τῆς νομῆς· πόαν γὰρ νέμεται ὁ ἄνθος, ἐπάργεμος δ' ἐστὶ καὶ οὐκ ὀξυωπός· μιμεῖται γὰρ τοῦ ἵππου τὴν φωνήν, καὶ φοβεῖ ἐπιπετόμενος καὶ ἐξελαύνει, ὅταν δὲ λάβῃ, κτείνει αὐτόν. Οἰκεῖ δ' ὁ ἄνθος παρὰ ποταμὸν καὶ ἔλη, χροάν δ' ἔχει καλὴν καὶ εὐβίotos. Κωλωτῇ δ' ὄνος πολέμιος· κοιμᾶται γὰρ ἐν τῇ φάτνῃ αὐτοῦ, καὶ κωλύει ἐσθίειν εἰς τοὺς μυκτῆρας ἐνδυνόμενος.

Τῶν δ' ἐρωδιῶν ἐστὶ τρία γένη, ὃ τε πέλλος καὶ ὁ λευκός καὶ ὁ ἀστερίας καλούμενος. Τούτων ὁ πέλλος χαλεπῶς εὐνάζεται καὶ ὀχεύει. κράζει τε γὰρ καὶ αἶμα, ὥς φασίν, ἀφίησιν ἐκ τῶν ὀφθαλμῶν ὀχεύων, καὶ τίκτει φαύλως καὶ ὀδυνηρῶς. Πολεμεῖ δὲ τοῖς

βλάπτουσιν, ἀετῷ (ἀρπάζει γὰρ αὐτόν) καὶ ἀλώπεκι (φθείρει γὰρ αὐτὸν τῆς νυκτός) καὶ κορύδῳ (τὰ γὰρ ῥὰ αὐτοῦ κλέπτει).

Ὅφεις δὲ γαλῆ καὶ ὑἱὸν πολέμιον, τῇ μὲν γαλῇ, κατ' οἰκίαν ὅταν ᾧσιν ἀμφοτέρω· ἀπὸ γὰρ τῶν αὐτῶν ζῶσιν· ἡ δ' ὕς ἐσθίει τοὺς ὄφεις. Καὶ αἰσάλων ἀλώπεκι πολέμιος· τύπτει γὰρ καὶ τίλλει αὐτήν, καὶ τὰ τέκνα ἀποκτείνει· γαμψώνυχος γάρ ἐστιν. Κόραξ δὲ καὶ ἀλώπηξ ἀλλήλοις φίλοι· πολεμεῖ γὰρ τῷ αἰσάλωνι ὁ κόραξ· διὸ βοηθεῖ τυπτομένη αὐτῇ. Καὶ αἰγυπιὸς δὲ καὶ αἰσάλων πολέμιος σφίσιν αὐτοῖς· ἀμφοτέροι γὰρ γαμψώνυχοι. (610a.) Μάχεται δὲ καὶ ἀετῷ αἰγυπιὸς καὶ κύκνος· κρατεῖ δ' ὁ κύκνος πολλάκις· εἰσὶ δ' οἱ κύκνοι καὶ ἀλληλοφάγοι μάλιστα τῶν ὀρνέων.

Ἔστι δὲ τῶν θηρίων τὰ μὲν αἰὶ πολέμια ἀλλήλοις, τὰ δ' ὥσπερ ἄνθρωποι, ὅταν τύχωσιν. Ὅνος δὲ καὶ ἀκανθίδες πολέμιος· αἱ μὲν γὰρ ἀπὸ τῶν ἀκανθῶν βιοτεύουσιν, ὁ δ' ἀπαλὰς οὖσας κατεσθίει τὰς ἀκάνθας. Καὶ ἄνθος καὶ ἀκανθὶς καὶ αἰγίθος· λέγεται δ' ὅτι αἰγίθου καὶ ἄνθου αἶμα οὐ συμμίγνυται ἀλλήλοις.

Κορώνη δὲ καὶ ἐρωδιὸς φίλοι, καὶ σχοινίων καὶ κόρυδος, καὶ λαεδὸς καὶ κελεός· ὁ μὲν γὰρ κελεὸς παρὰ ποταμὸν οἰκεῖ καὶ λόχμας, ὁ δὲ λαεδὸς πέτρας καὶ ὄρη, καὶ φιλοχωρεῖ οὗ ἂν οἰκῇ. Καὶ πίφιγξ καὶ ἄρπη καὶ ἰκτίνος φίλοι, καὶ ἀλώπηξ καὶ ὄφεις (ἄμφω γὰρ τρωγλοδύται), καὶ κόττυφος καὶ τρυγών.

Πολέμιος δὲ καὶ ὁ λέων καὶ ὁ θῶς ἀλλήλοις· ὁμοφάγοι γὰρ ὄντες ἀπὸ τῶν αὐτῶν ζῶσιν.

Μάχονται δὲ καὶ ἐλέφαντες σφοδρῶς πρὸς ἀλλήλους, καὶ τύπτουσι τοῖς ὁδοῦσι σφᾶς αὐτούς· ὁ δ' ἡττηθεὶς δουλοῦται ἰσχυρῶς, καὶ οὐχ ὑπομένει τὴν τοῦ νικήσαντος φωνήν. Διαφέρουσι δὲ καὶ τῇ ἀνδρείᾳ ἀλλήλων οἱ ἐλέφαντες θαυμαστὸν ὅσον. Χρῶνται δ' οἱ Ἰνδοὶ πολεμιστηρίοις, καθάπερ τοῖς ἄρρεσι, καὶ ταῖς θηλείαις· εἰσὶ μέντοι καὶ ἐλάττονες αἱ θήλειαι καὶ ἀψυχότεραι πολὺ. Τοὺς δὲ τοίχους καταβάλλει ὁ ἐλέφας τοὺς ὀδόντας τοὺς μεγάλους προσβάλλων· τοὺς δὲ φοίνικας τῷ μετώπῳ, ἕως ἂν κατακλίνῃ, ἔπειτα τοῖς ποσὶν ἐπιβαίνων κατατείνει ἐπὶ τῆς γῆς. Ἔστι δὲ καὶ ἡ θήρα τῶν ἐλεφάντων τοιάδε· ἀναβάντες ἐπὶ τινας τῶν τιθασσῶν καὶ ἀνδρείων διώκουσι, καὶ ὅταν καταλάβωσι, τύπτειν προστάττουσι τούτοις, ἕως ἂν ἐκλύσωσιν· τότε δ' ὁ ἐλεφαντιστὴς ἐπιτηδῆσας κατευθύνει τῷ δρεπάνῳ. Ταχέως δὲ μετὰ ταῦτα τιθασσεύεται τε καὶ πειθαρχεῖ. Ἐπιβεβηκότος μὲν οὖν τοῦ ἐλεφαντιστοῦ ἅπαντες πραεῖς εἰσιν, ὅταν

δ' ἀποβῆ, οἱ μὲν οἱ δ' οὐ· ἀλλὰ τῶν ἐξαγριουμένων τὰ ἐμπρόσθια
σκέλη δεσμεύουσι σειραῖς, ἵν' ἡσυχάζωσιν. Ἔστι δ' ἡ θήρα καὶ
μεγάλων ἤδη ὄντων καὶ πώλων.

Αἱ μὲν οὖν φιλῖαι καὶ οἱ πόλεμοι τοῖς θηρίοις τούτοις διὰ τὰς
τροφὰς καὶ τὸν βίον συμβαίνουσιν.

Κεφάλαιο 2

(610b.) Τῶν δ' ἰχθύων οἱ μὲν συναγελάζονται μετ' ἀλλήλων καὶ φίλοι εἰσὶν, οἱ δὲ μὴ συναγελαζόμενοι πολέμιοι. Ἀγελάζονται δ' οἱ μὲν κυοῦντες, ἔνιοι δ' ὅταν ἐκτέκωσιν. Ὅλως δ' ἀγελαῖα ἐστὶ τὰ τοιαῦδε, θυννίδες, μαινίδες, κωβιοί, βῶκες, σαῦροι, κορακῖνοι, σινόδοντες, τρίγλαι, σφύραιναι, ἀνθίαι, ἐλεγῖνοι, ἀθερῖνοι, σαργῖνοι, βελόνας, τευθοί, ἰουλίδες, πηλαμύδες, σκόμβροι, κολίαι. Τούτων δ' ἑνία ἐστὶν οὐ μόνον ἀγελαῖα ἀλλὰ καὶ σύζυγα· τὰ γὰρ λοιπὰ συνδύαζεται μὲν ἅπαντα, τὰς δ' ἀγέλας ποιοῦνται κατ' ἐνίους καιροὺς, ὥσπερ εἴρηται, ὅταν κύωσιν, ἑνια δὲ καὶ ὅταν τέκωσιν.

Λάβραξ δὲ καὶ κεστρεὺς πολεμιώτατοι ὄντες κατ' ἐνίους καιροὺς συναγελάζονται ἀλλήλοις· συναγελάζονται γὰρ πολλάκις οὐ μόνον τὰ ὁμόγωνα, ἀλλὰ καὶ οἷς ἢ αὐτὴ καὶ ἢ παραπλήσιός ἐστι νομὴ, ἂν ἢ ἄφθονος.

Ζῶσι δὲ πολλάκις ἀφηρημένοι οἱ κεστρεῖς τὴν κέρκον καὶ οἱ γόγγροι μέχρι τῆς ἐξόδου τῆς περιπτώσεως· ἀπεσθίεται δ' ὁ μὲν κεστρεὺς ὑπὸ λάβρακος, ὁ δὲ γόγγρος ὑπὸ μυραίνης. Ὁ δὲ πόλεμός ἐστὶ τοῖς κρείττοσι πρὸς τοὺς ἥττους· κατεσθίει γὰρ ὁ κρείττων. Καὶ περὶ μὲν τῶν θαλαττίων ταῦτα.

Κεφάλαιο 3

Τὰ δ' ἦθη τῶν ζώων, ὥσπερ εἴρηται πρότερον, διαφέρει κατὰ τε δειλίαν καὶ πραότητα καὶ ἀνδρείαν καὶ ἡμερότητα καὶ νοῦν τε καὶ ἄνοιαν. Τό τε γὰρ τῶν προβάτων ἦθος, ὥσπερ λέγεται, εὖηθες καὶ ἀνόητον· πάντων γὰρ τῶν τετραπόδων κάκιστόν ἐστι, καὶ ἔρπει εἰς τὰς ἐρημίας πρὸς οὐδέν, καὶ πολλάκις χειμῶνος ὄντος ἐξέρχεται ἔνδοθεν, καὶ ὅταν ὑπὸ νιφετοῦ ληφθῶσιν, ἂν μὴ κινήσῃ ὁ ποιμὴν, οὐκ ἐθέλουσιν ἀπιέναι, ἀλλ' ἀπόλλυνται καταλειπόμενα, ἐὰν μὴ ἄρρενας κομίσωσιν οἱ ποιμένες· τότε δ' ἀκολουθοῦσιν.

Τῶν δ' αἰγῶν ὅταν τις μιᾶς λάβῃ τὸ ἄκρον τοῦ ἡρύγγου (ἔστι δ' οἶον θρίξ), αἱ ἄλλαι ἐστᾶσιν ὥσπερ μεμωρωμένοι βλέπουσαι εἰς ἐκείνην. Ἐγκαθεύδειν δὲ ψυχρότεραι ὄιες αἰγῶν· αἱ γὰρ αἶγες μᾶλλον ἡσυχάζουσι καὶ προσέρχονται πρὸς τοὺς ἀνθρώπους· εἰσὶ δ' αἱ αἶγες δυσριγότεραι τῶν ὄϊων.

Διδάσκουσι δ' οἱ ποιμένες τὰ πρόβατα συνθεῖν ὅταν ψοφήσῃ· ἐὰν γὰρ βροντήσαντος ὑπολειφθῇ τις καὶ μὴ συνδράμῃ, ἐκτιτρώσκει, (611a.) ἐὰν τύχῃ κύουσα· διὸ ἐὰν ψοφῇ, ἐν τῇ οἰκίᾳ συνθέουσι διὰ τὸ ἔθος. Κατάκεινται δ' αἱ ὄιες καὶ αἱ αἶγες ἀθρόαι κατὰ συγγένειαν· ὅταν δ' ὁ ἥλιος τραπῇ θάπτον, φασὶν οἱ ποιμένες οὐκέτι ἀντιβλεπούσας κατακεῖσθαι τὰς αἶγας, ἀλλ' ἀπεστραμμένας ἀπ' ἀλλήλων.

Κεφάλαιο 4

Αἱ δὲ βόες καὶ νέμονται καθ' ἑταιρείας καὶ συνηθείας, κἂν μία ἀποπλανηθῇ, ἀκολουθοῦσιν αἱ ἄλλαι· διὸ καὶ οἱ βουκόλοι, ἔαν μίαν μὴ εὗρωσιν, εὐθὺς πάντες ἐπιζητοῦσιν. Ἀπόλλυνται δὲ καὶ οἱ ταῦροι, ὅταν ἀτιμαγελήσαντες ἀποπλανηθῶσιν, ὑπὸ θηρίων.

Τῶν δ' ἵππων αἱ σύννομοι, ὅταν ἡ ἑτέρα ἀπόληται, ἐκτρέφουσι τὰ πωλία ἀλλήλων. Καὶ ὅλως γε δοκεῖ τὸ τῶν ἵππων γένος εἶναι φύσει φιλόστοργον. Σημεῖον δέ· πολλάκις γὰρ αἱ στέριφαι ἀφαιρούμεναι τὰς μητέρας τὰ πωλία αὐταὶ στέργουσι, διὰ δὲ τὸ μὴ ἔχειν γάλα διαφθείρουσιν.

Κεφάλαιο 5

Τῶν δ' ἀγρίων καὶ τετραπόδων ἡ ἔλαφος οὐχ ἥκιστα δοκεῖ εἶναι φρόνιμον, τῷ τε τίκτειν παρὰ τὰς ὁδοὺς (τὰ γὰρ θηρία διὰ τοὺς ἀνθρώπους οὐ προσέρχεται), καὶ ὅταν τέκη, ἐσθίει τὸ χόριον πρῶτον. Καὶ ἐπὶ τὴν σέσελιν δὲ τρέχουσι, καὶ φαγοῦσαι οὕτως ἔρχονται πρὸς τὰ τέκνα πάλιν. Ἔτι δὲ τὰ τέκνα ἄγει ἐπὶ τοὺς σταθμούς, ἐθίζουσα οὐ δεῖ ποιεῖσθαι τὰς ἀποφυγὰς· ἔστι δὲ τοῦτο πέτρα ἀπορρώξ, μίαν ἔχουσα εἴσοδον, οὗ δὴ καὶ ἀμύνεσθαι ἤδη φασὶν ὑπομένουσιν.

Ἔτι δὲ ὁ ἄρρην ὅταν γένηται παχύς (γίνεται δὲ σφόδρα πίων ὁπώρας οὔσης), οὐδαμοῦ ποιεῖ αὐτὸν φανερόν ἀλλ' ἐκτοπίζει ὥς διὰ τὴν παχύτητα εὐάλωτος ᾖν. Αποβάλλουσι δὲ καὶ τὰ κέρατα ἐν τόποις χαλεποῖς καὶ δυσεξευρέτοις· ὅθεν καὶ ἡ παροιμία γέγονεν “οὐ αἱ ἔλαφοι τὰ κέρατα ἀποβάλλουσιν.” ὥσπερ γὰρ τὰ ὄπλα ἀποβεβληκυῖαι φυλάττονται ὀρᾶσθαι. Λέγεται δ' ὥς τὸ ἀριστερόν κέρας οὐδεὶς πω ἑώρακεν· ἀποκρύπτειν γὰρ αὐτὸ ὥς ἔχον τινὰ φαρμακείαν.

Οἱ μὲν οὖν ἐνιαύσιοι οὐ φύουσι κέρατα, πλὴν ὥσπερ σημείου χάριν ἀρχὴν τινα· τοῦτο δ' ἐστὶ βραχὺ καὶ δασύ. Φύουσι δὲ διετεῖς πρῶτον τὰ κέρατα εὐθέα, καθάπερ παττάλους· διὸ καὶ καλοῦσι τότε πατταλίας αὐτούς. Τῷ δὲ τρίτῳ ἔτει δίκρουν φύουσι, τῷ δὲ τετάρτῳ τραχύτερον· καὶ τοῦτον τὸν τρόπον αἰεὶ (611b.) ἐπιδιδόασιν μέχρι ἑξ ἐτῶν. Ἀπὸ τούτου δὲ ὅμοια αἰεὶ ἀναφύουσιν, ὥστε μηκέτι ἂν γινῶναι τὴν ἡλικίαν τοῖς κέρασιν, ἀλλὰ τοὺς γέροντας γνωρίζουσι μάλιστα δυοῖν σημείων· ὀδόντας τε γὰρ οἱ μὲν οὐκ ἔχουσιν οἱ δ' ὀλίγους, καὶ τοὺς ἀμυντῆρας οὐκέτι φύουσιν. Καλοῦνται δ' ἀμυντῆρες τὰ προνενευκότα τῶν φυομένων κεράτων εἰς τὸ πρόσθεν, οἷς ἀμύνεται· ταῦτα δ' οἱ γέροντες οὐκ ἔχουσιν, ἀλλ' εἰς τὸ ὀρθὸν γίνεται ἡ αὐξησις αὐτοῖς τῶν κεράτων. Αποβάλλουσι δ' ἀνὰ ἕκαστον ἐνιαυτὸν τὰ κέρατα, ἀποβάλλουσι δὲ περὶ τὸν Θαργηλιῶνα μῆνα.

Ὅταν δ' ἀποβάλῃ, κρύπτουσιν αὐτοὺς τὴν ἡμέραν, ὥσπερ εἴρηται· κρύπτουσι δ' ἐν τοῖς δασέσιν, εὐλαβούμενοι τὰς μυίας. Νέμονται δὲ τὸν χρόνον τοῦτον νύκτωρ, μέχριπερ ἂν ἐκφύσῃ τὰ κέρατα. Φύεται δ' ὥσπερ ἐν δέρματι τὸ πρῶτον, καὶ γίνονται δασέα· ὅταν δ' αὐξηθῶσιν, ἡλιάζονται, ἵν' ἐκπέσῃ καὶ ξηράνῃ τὸ κέρας. Ὅταν δὲ μηκέτι πονῶσι πρὸς τὰ δένδρα κνώμενοι αὐτά, τότε

ἐκλείπουσι τοὺς τόπους τούτους διὰ τὸ θαρρεῖν ὡς ἔχοντες ᾧ ἀμυνοῦνται. Ἦδη δ' εἴληπται ἀχαΐνης ἔλαφος ἐπὶ τῶν κεράτων ἔχων κιττὸν πολὺν πεφυκότα χλωρόν, ὡς ἀπαλῶν ὄντων τῶν κεράτων ἐμφύντα ὥσπερ ἐν ξύλῳ χλωρῷ.

Ὅταν δὲ δηχθῶσιν αἱ ἔλαφοι ὑπὸ φαλαγγίου ἢ τινος τοιούτου, τοὺς ὀριγάνους συλλέγουσαι ἐσθίουσιν· δοκεῖ δὲ καὶ ἀνθρώπῳ ἀγαθὸν εἶναι τοῦτο πίνειν, ἀλλ' ἔστιν ἀηδές. Αἱ δὲ θήλειαι τῶν ἐλάφων ὅταν τέκωσιν, εὐθὺς κατεσθίουσι τὸ χόριον, καὶ οὐκ ἔστι λαβεῖν· πρὸ γὰρ τοῦ χαμαὶ βαλεῖν αὐταὶ ἄπτονται· δοκεῖ δὲ τοῦτ' εἶναι φάρμακον.

Ἀλίσκονται δὲ θηρευόμεναι αἱ ἔλαφοι συριπτόντων καὶ ἀδόντων, καὶ κατακλίνονται ὑπὸ τῆς ἡδονῆς.

Δύο δ' ὄντων ὁ μὲν φανερῶς ἄδει ἢ συρίττει, ὁ δ' ἐκ τοῦ ὀπισθεν βάλλει, ὅταν οὗτος σημῆνῃ τὸν καιρόν. Ἐὰν μὲν οὖν τύχῃ ὀρθὰ τὰ ὦτα ἔχουσα, ὁξὺ ἀκούει καὶ οὐκ ἔστι λαθεῖν· ἐὰν δὲ καταβεβληκυῖα τύχῃ, λανθάνει.

Κεφάλαιο 6

Αἱ δ' ἄρκτοι ὅταν φεύγωσι, τὰ σκυμνία προωθοῦσι καὶ ἀναλαβοῦσαι φέρουσιν· ὅταν δ' ἐπικαταλαμβάνωνται, ἐπὶ τὰ δένδρα ἀναπηδῶσιν. Καὶ ὅταν ἐκ τοῦ φωλεοῦ ἐξέλθωσι, πρῶτον τὸ ἄρον ἐσθίουσιν, ὥσπερ εἴρηται πρότερον, (612a.) καὶ τὰ ξύλα διαμασῶνται ὥσπερ ὀδοντοφυοῦσαι.

Πολλὰ δὲ καὶ τῶν ἄλλων ζώων τῶν τετραπόδων ποιεῖ πρὸς βοήθειαν αὐτοῖς φρονίμως, ἐπεὶ καὶ ἐν Κρήτῃ φασὶ τὰς αἶγας τὰς ἀγρίας, ὅταν τοξευθῶσι, ζητεῖν τὸ δίκταμνον· δοκεῖ δὲ τοῦτο ἐκβλητικὸν εἶναι τῶν τοξευμάτων ἐν τῷ σώματι. Καὶ αἱ κύνες δ' ὅταν τι πονῶσιν, ἔμετον ποιοῦνται φαγοῦσαί τινα πόαν. Ἡ δὲ πάρδαλις ὅταν φάγῃ τὸ φάρμακον τὸ παρδαλιαγχές, ζητεῖ τὴν τοῦ ἀνθρώπου κόπρον· βοηθεῖ γὰρ αὐτῇ.

Διαφθείρει δὲ τοῦτο τὸ φάρμακον καὶ λέοντας. Διὸ καὶ οἱ κυνηγοὶ κρεμαννύουσιν ἐν ἀγγεῖῳ ἕκ τινος δένδρου τὴν κόπρον, ὅπως μὴ ἀποχωρῇ μακρὰν τὸ θηρίον· αὐτοῦ γὰρ προσαλλομένη ἡ πάρδαλις καὶ ἐλπίζουσα λήψεσθαι τελευτᾷ. Λέγουσι δὲ καὶ κατανενοηκυῖαν τὴν πάρδαλιν ὅτι τῇ ὁσμῇ αὐτῆς χαίρουσι τὰ θηρία, ἀποκρύπτουσιν ἑαυτὴν θηρεύειν· προσιέναι γὰρ ἐγγύς, καὶ λαμβάνειν οὕτω καὶ τὰς ἐλάφους.

Ὁ δ' ἰχνεύμων ὁ ἐν Αἰγύπτῳ ὅταν ἴδῃ τὸν ὄφιν τὴν ἀσπίδα καλουμένην, οὐ πρότερον ἐπιτίθεται πρὶν συγκαλέσῃ βοηθοὺς ἄλλους· πρὸς δὲ τὰς πληγὰς καὶ τὰ δῆγματα πηλῷ καταπλάττουσιν ἑαυτοῦς· βρέξαντες γὰρ ἐν τῷ ὕδατι πρῶτον, οὕτω καλινδοῦνται ἐν τῇ γῇ.

Τῶν δὲ κροκοδείλων χασκόντων οἱ τροχίλοι καθαίρουσιν εἰσπετόμενοι τοὺς ὀδόντας, καὶ αὐτοὶ μὲν τροφὴν λαμβάνουσιν, ὁ δ' ὠφελούμενος αἰσθάνεται καὶ οὐ βλέπτει, ἀλλ' ὅταν ἐξελεθῇ βούληται, κινεῖ τὸν αὐχένα, ἵνα μὴ συνδάκῃ.

Ἡ δὲ χελώνη ὅταν ἔχεως φάγῃ, ἐπεσθίει τὴν ὀρίγανον· καὶ τοῦτο ὥπται. Καὶ ἤδη κατιδὼν τις τοῦτο πολλάκις ποιοῦσαν αὐτὴν καὶ ὅτε σπάσαι τῆς ὀρίγανου πάλιν ἐπὶ τὸν ἔχιν πορευομένην, ἐξέτιλε τὴν ὀρίγανον· τούτου δὲ συμβάντος ἀπέθανεν ἡ χελώνη. Ἡ δὲ γαλῆ ὅταν ὀφει μάχεται, προεσθίει τὸ πῆγανον· πολεμία γὰρ ἡ ὁσμὴ τοῖς ὄφεσιν.

Ὁ δὲ δράκων ὅταν ὀπωρίζῃ, τὸν ὀπὸν τῆς πικρίδος ἐκροφεῖ, καὶ τοῦθ' ἐώραται ποιῶν. Αἱ δὲ κύνες ὅταν ἐλμινθιῶσιν, ἐσθίουσι τοῦ σίτου τὸ λήϊον. Οἱ δὲ πελαργοὶ καὶ οἱ ἄλλοι τῶν ὀρνίθων, ὅταν ἐλκωθῇ τι μαχομένοις, ἐπιτιθέασι τὴν ὀρίγανον. Πολλοὶ δὲ καὶ τὴν ἀκρίδα ἐώρακασιν ὅτι, ὅταν μάχεται τοῖς ὄφεσι, λαμβάνεται τοῦ τραχήλου τῶν ὄφρων.

(612b.) Φρονίμως δὲ δοκεῖ καὶ ἡ γαλῆ χειροῦσθαι τοὺς ὀρνιθας· σφάζει γὰρ ὥσπερ οἱ λύκοι τὰ πρόβατα. Μάχεται δὲ καὶ τοῖς ὄφεσι μάλιστα τοῖς μυοθήραις διὰ τὸ καὶ αὐτὴν τοῦτο τὸ ζῷον θηρεύειν.

Περὶ δὲ τῆς τῶν ἐχίνων αἰσθήσεως συμβέβηκε πολλαχοῦ θεωρηθῆσαι ὅτι μεταβαλλόντων βορέων καὶ νότων οἱ μὲν ἐν τῇ γῇ τὰς ὁπὰς αὐτῶν μεταμείβουσιν, οἱ δ' ἐν ταῖς οἰκίαις τρεφόμενοι μεταβάλλουσι πρὸς τοὺς τοίχους, ὥστ' ἐν Βυζαντίῳ γέ τινα φασὶ προλέγοντα λαβεῖν δόξαν ἐκ τοῦ κατανενοηκέναι ποιοῦντα ταῦτα τὸν ἐχῖνον.

Ἡ δ' ἴκτις ἐστὶ μὲν τὸ μέγεθος ἡλίκον Μελιταῖον κυνίδιον τῶν μικρῶν, τὴν δὲ δασύτητα καὶ τὴν ὄψιν καὶ τὸ λευκὸν τὸ ὑποκάτω καὶ τοῦ ἥθους τὴν κακουργίαν ὅμοιον γαλῆ, καὶ τιθασσὸν δὲ γίνεται σφόδρα, τὰ δὲ σμήνη κακουργεῖ· τῷ γὰρ μέλιτι χαίρει. Ἔστι δὲ καὶ ὀρνιθοφάγον ὥσπερ αἱ αἴλουροι. Τὸ δ' αἰδοῖον αὐτῆς ἐστὶ μὲν, ὥσπερ εἴρηται, ὅστοῦν, δοκεῖ δ' εἶναι φάρμακον στραγγουρίας τὸ τοῦ ἄρρενος· διδόασι δ' ἐπιζύοντες.

Κεφάλαιο 7

Ὅλως δὲ περὶ τοὺς βίους πολλὰ ἂν θεωρηθεῖη μιμήματα τῶν ἄλλων ζώων τῆς ἀνθρωπίνης ζωῆς, καὶ μᾶλλον ἐπὶ τῶν ἐλαττόνων ἢ μειζόνων ἴδοι τις ἂν τὴν τῆς διανοίας ἀκρίβειαν, οἷον πρῶτον ἐπὶ τῶν ὀρνίθων ἢ τῆς χελιδόνος σκηνοπηγία· τῇ γὰρ περὶ τὸν πηλὸν ἀχυρώσει τὴν αὐτὴν ἔχει τάξιν. Συγκαταπλέκει γὰρ τοῖς κάρφεσι πηλόν· κἂν ἀπορῆται πηλοῦ, βρέχουσα αὐτὴν κυλινδεῖται τοῖς πτεροῖς πρὸς τὴν κόνιν. Ἔτι δὲ στιβαδοποιεῖται καθάπερ οἱ ἄνθρωποι, τὰ σκληρὰ πρῶτα ὑποτιθεῖσα καὶ τῷ μεγέθει σύμμετρον ποιοῦσα πρὸς ἑαυτήν. Περί τε τὴν τροφήν τῶν τέκνων ἐκπονεῖται ἀμφοτέρα· δίδωσι δ' ἐκατέρῳ διατηροῦσά τινα συνηθεία τὸ προειληφός, ὅπως μὴ δις λάβῃ. Καὶ τὴν κόπρον τὸ μὲν πρῶτον αὐταὶ ἐκβάλλουσιν, ὅταν δ' αὐξηθῶσι, μεταστρέφοντας ἔξω διδάσκουσι τοὺς νεοττοὺς προῖεσθαι.

Περί τε τὰς περιστερὰς ἔστιν ἕτερα τοιαύτην ἔχοντα τὴν θεωρίαν· οὔτε γὰρ συνδυάζεσθαι θέλουσι πλείοσιν, οὔτε προαπολείπουν τὴν κοινωνίαν, πλὴν ἐὰν χῆρος ἢ χήρα γένηται. Ἔτι δὲ περὶ τὴν ὠδῖνα δεινὴ ἢ τοῦ ἄρρενος θεραπεία καὶ συναγανάκτησις· (613a.) ἐὰν τ' ἀπομαλακίζεται πρὸς τὴν εἰσοδὸν τῆς νεοττιᾶς διὰ τὴν λοχείαν, τύπτει καὶ ἀναγκάζει εἰσιέναι. Γενομένων δὲ τῶν νεοττῶν τῆς ἀλμυριζούσης μάλιστα γῆς διαμασησάμενος εἰσπτύνει τοῖς νεοττοῖς διοιγνὺς τὸ στόμα, προπαρασκευάζων πρὸς τὴν τροφήν. Ὅταν δ' ἐκ τῆς νεοττιᾶς ἐξάγειν μέλλη πάντας, ὁ ἄρρην ὀχεύει.

Ὡς μὲν οὖν ἐπὶ τὸ πολὺ τοῦτον τὸν τρόπον στέργουσιν ἀλλήλας, παροχεύονται δὲ ποτε καὶ τῶν τοὺς ἄρρενας ἐχουσῶν τινες. Ἔστι δὲ μάχιμον τὸ ζῶον, καὶ ἐνοχλοῦσιν ἀλλήλαις, καὶ εἰς τὰς νεοττιὰς παραδύονται τὰς ἀλλήλων, ὀλιγάκις μέντοι· καὶ γὰρ ἂν ἄποθεν ἦττον ἦ, ἀλλὰ παρά γε τὴν νεοττιὰν διαμάχονται ἐσχάτως. Ἴδιον δὲ ταῖς περιστεραῖς δοκεῖ συμβεβηκέναι καὶ ταῖς φανί τε καὶ τρυγόσι τὸ μὴ ἀνακύπτειν πινούσας, ἐὰν μὴ ἱκανὸν πίωσιν.

Ἐχει δὲ τὸν ἄρρενα ἢ τρυγῶν τὸν αὐτὸν καὶ φάττα, καὶ ἄλλον οὐ προσίενται· καὶ ἐπ' αὐτῶν ἀμφοτέροι καὶ ὁ ἄρρην καὶ ἡ θήλεια. Διαγνῶναι δ' οὐ ῥάδιον τὴν θήλειαν καὶ τὸν ἄρρενα, ἀλλ' ἢ τοῖς ἐντός. Ζῶσι δ' αἱ φάτται πολὺν χρόνον· καὶ γὰρ εἴκοσιν ἔτη καὶ πέντε καὶ τριάκοντα ἔτη ὠμμέναι εἰσίν, ἔναι δὲ καὶ τετταράκοντα

ἔτη. Πρεσβυτέρων δὲ γινομένων αὐτῶν οἱ ὄνυχες αὐξάνονται· ἀλλ' ἀποτέμνουσιν οἱ τρέφοντες. Ἄλλο δ' οὐδὲν βλάπτονται ἐπιδήλως γηράσκουσαι.

Καὶ αἱ τρυγόνες δὲ καὶ αἱ περιστεραι ζῶσι καὶ ὀκτὼ ἔτη αἱ τετυφλωμένοι ὑπὸ τῶν παλευτρίας τρεφόντων αὐτάς. Ζῶσι δὲ καὶ οἱ πέρδικες περὶ πεντεκαίδεκ' ἔτη. Νεοττεύουσι δὲ καὶ αἱ φάβες καὶ αἱ τρυγόνες ἐν τοῖς αὐτοῖς τόποις αἰεῖ. Πολυχρονιώτερα δ' ὅλως μὲν ἐστὶ τὰ ἄρρενα τῶν θηλέων, ἐπὶ δὲ τούτων τελευτᾶν φασί τινες πρότερον τὰ ἄρρενα τῶν θηλέων, τεκμαιρόμενοι ἐκ τῶν κατ' οἰκίαν τρεφόμενων παλευτριῶν.

Λέγουσι δὲ τινες καὶ τῶν στρουθίων ἐνιαυτὸν μόνον ζῆν τοὺς ἄρρενας, ποιοῦμενοι σημεῖον ὅτι τοῦ ἔαρος οὐ φαίνονται ἔχοντες εὐθὺς τὰ περὶ τὸν πώγωνα μέλανα, ὕστερον δ' ἴσχουσιν, ὥς οὐδενὸς σωζομένου τῶν προτέρων. Τὰς δὲ θηλείας μακροβιωτέρας εἶναι τῶν στρουθίων· ταύτας γὰρ ἀλίσκεσθαι ἐν τοῖς (613b.) νέοις, καὶ διαδήλας εἶναι τῷ ἔχειν τὰ περὶ τὰ χεῖλη σκληρά.

Διάγουσι δ' αἱ μὲν τρυγόνες τοῦ θέρους ἐν τοῖς χειμερίοις, αἱ δὲ σπίζαι τοῦ μὲν θέρους ἐν τοῖς ἀλεεινοῖς, τοῦ δὲ χειμῶνος ἐν τοῖς ψυχροῖς.

Κεφάλαιο 8

Οἱ δὲ βαρεῖς τῶν ὀρνίθων οὐ ποιοῦνται νεοττίας (οὐ συμφέρει γὰρ μὴ πτητικοῖς οὖσιν), οἷον ὄρτυγες καὶ πέρδικες καὶ τᾶλλα τὰ τοιαῦτα τῶν ὀρνέων· ἀλλ' ὅταν ποιήσωνται ἐν τῷ λείῳ κονίστραν (ἐν ἄλλῳ γὰρ τόπῳ οὐδενὶ τίκτει), ἐπηλυγασάμενοι ἄκανθάν τινα καὶ ὕλην τῆς περὶ τοὺς ἰέρακας ἔνεκα καὶ τοὺς ἀετοὺς ἀλεώρας, ἐνταῦθα τίκτουσι καὶ ἐπωάζουσιν. Ἐπειτα ἐκλέψαντες εὐθὺς ἐξάγουσι τοὺς νεοττοὺς διὰ τὸ μὴ δύνασθαι τῇ πτήσει πορίζειν αὐτοῖς τροφήν. Ἀναπαύονται δ' ὑπ' ἑαυτοὺς ἀγόμενοι τοὺς νεοττοὺς καὶ οἱ ὄρτυγες καὶ οἱ πέρδικες, ὥσπερ αἱ ἀλεκτορίδες. Καὶ οὐκ ἐν τῷ αὐτῷ τίκτουσι καὶ ἐπωάζουσιν, ἵνα μὴ τις κατανοήσῃ τὸν τόπον πλείῳ χρόνον προσεδρευόντων. Ὅταν δέ τις θηρεύῃ περιπεσὼν τῇ νεοττιᾷ, προκυλινδεῖται ἢ πέρδιξ τοῦ θηρεύοντος ὡς ἐπίληπτος οὔσα, καὶ ἐπισπᾶται ὡς ληψόμενον ἐφ' ἑαυτήν, ἕως ἂν διαδράσῃ τῶν νεοττῶν ἕκαστος· μετὰ δὲ ταῦτα ἀναπτᾶσα αὐτὴ ἀνακαλεῖται ἅλιν.

Τίκτει μὲν οὖν ὧν ἡ πέρδιξ οὐκ ἐλάττω ἢ δέκα, πολλάκις δ' ἑκκαίδεκα· ὥσπερ δ' εἴρηται, κακότηδες τὸ ὄρνεόν ἐστι καὶ πανοῦργον. Τοῦ δ' ἕαρος ἐκ τῆς ἀγέλης ἐκκρίνονται δι' ὥδης καὶ μάχης κατὰ ζεύγη μετὰ θηλείας, ἣν ἂν λάβῃ ἕκαστος. Διὰ δὲ τὸ εἶναι ἀφροδισιαστικοί, ὅπως μὴ ἐπωάζῃ ἢ θήλεια, οἱ ἄρρενες τὰ ὧν διακυλινδοῦσι καὶ συντριβούσιν, ἐὰν εὗρωσιν· ἢ δὲ θήλεια ἀντιμηχανωμένη ἀποδιδράσκουσα τίκτει, καὶ πολλάκις διὰ τὸ ὀργᾶν τεκεῖν, ὅπου ἂν τύχῃ ἐκβάλλει· ἂν παρῇ ὁ ἄρρην καὶ ὅπως σώζεται ἀθρόα, οὐκ ἔρχεται πρὸς αὐτά. Καὶ ἐὰν ὑπ' ἀνθρώπου ὀφθῇ, ὥσπερ περὶ τοὺς νεοττοὺς, οὕτω καὶ ἀπὸ τῶν ὧν ὑπάγει, πρὸ ποδῶν φαινομένη τοῦ ἀνθρώπου, ἕως ἂν ἀπαγάγῃ.

Ὅταν δ' ἀποδράσῃ ἐπωάζῃ, οἱ ἄρρενες (614a.) κεκράγασι καὶ μάχονται συνιόντες· καλοῦσι δὲ τούτους χήρους. Ὁ δ' ἡττηθεὶς μαχόμενος ἀκολουθεῖ τῷ νικήσαντι, ὑπὸ τούτου ὀχευόμενος μόνου. Ἐὰν δὲ κρατηθῇ τις ὑπὸ τοῦ δευτέρου ἢ ὁποιοοῦν, οὗτος λάθρᾳ ὀχεύεται ὑπὸ τοῦ κρατιστεύοντος. Γίνεται δὲ τοῦτο οὐκ αἰεὶ, ἀλλὰ καθ' ὥραν τινὰ τοῦ ἔτους· καὶ ἐπὶ τῶν ὀρτύγων ὡσαύτως. Ἐνίστε δὲ συμβαίνει τοῦτο καὶ ἐπὶ τῶν ἀλεκτρονίων· ἐν μὲν γὰρ τοῖς ἱεροῖς, ὅπου ἄνευ θηλειῶν ἀνάκεινται, τὸν ἀνατιθέμενον πάντες εὐλόγως ὀχεύουσιν.

Καὶ τῶν περδίκων δ' οἱ τιθασσοὶ τοὺς ἀγρίους πέρδικας ὀχεύουσι καὶ ἐπικορρίζουσι καὶ ὑβρίζουσιν.

Ἐπὶ δὲ τὸν θηρευτὴν πέρδικα ὠθεῖται τῶν ἀγρίων ὁ ἡγεμὼν ἀντάσας ὡς μαχοῦμενος. Τούτου δ' ἀλόντος ἐν ταῖς πηκταῖς πάλιν προσέρχεται ἄλλος, ἀντάσας τὸν αὐτὸν τρόπον. Ἐὰν μὲν οὖν ἄρρην ἢ ὁ θηρεύων, τοῦτο ποιοῦσιν· ἐὰν δὲ θήλεια ἢ θηρεύουσα ἢ καὶ ἄδουσα, ἀντάση δ' ὁ ἡγεμὼν αὐτῇ, οἱ ἄλλοι ἀθροισθέντες τύπτουσι τοῦτον καὶ ἀποδιώκουσιν ἀπὸ τῆς θηλείας, ὅτι ἐκεῖνη ἄλλ' οὐκ αὐτοῖς προσέρχεται. Ὁ δὲ πολλάκις διὰ ταῦτα σιωπῇ προσέρχεται, ὅπως μὴ ἄλλος τῆς φωνῆς ἀκούσας ἔλθῃ μαχοῦμενος αὐτῷ. Ἐνίστε δέ φασιν οἱ ἔμπειροι τὸν ἄρρενα προσιόντα τὴν θήλειαν κατασιγάζειν, ὅπως μὴ ἀκουσάντων τῶν ἀρρένων ἀναγκασθῇ διαμάχεσθαι πρὸς αὐτούς.

Οὐ μόνον δ' ἄδει ὁ πέρδιξ, ἀλλὰ καὶ τριγμὸν ἀφίησι καὶ ἄλλας φωνάς. Πολλάκις δὲ καὶ ἡ θήλεια ἐπιάζουσα ἀνίσταται, ὅταν τῇ θηρευούσῃ θηλείᾳ αἰσθηται προσέχοντα τὸν ἄρρενα, καὶ ἀντάσασα ὑπομένει, ἵν' ὀχευθῇ καὶ ἀποσπάσῃ ἀπὸ τῆς θηρευούσης. Οὕτω δὲ σφόδρα καὶ οἱ πέρδικες καὶ οἱ ὄρτυγες ἐπτόνῃται περὶ τὴν ὀχείαν, ὥστ' εἰς τοὺς θηρεύοντας ἐμπίπτουσι καὶ πολλάκις καθιζάνουσιν ἐπὶ τὰς κεφαλὰς.

Περὶ μὲν οὖν τὴν ὀχείαν καὶ θήραν τῶν περδίκων τοιαῦτα συμβαίνει, καὶ περὶ τὴν ἄλλην τοῦ ἥθους πανουργίαν.

Νεοττεύουσι δ' ἐπὶ τῆς γῆς, ὥσπερ εἴρηται, οἱ τε ὄρτυγες καὶ οἱ πέρδικες καὶ τῶν ἄλλων ἔνιοι τῶν πτητικῶν. Ἔτι δὲ τῶν τοιούτων ὁ μὲν κόρυδος καὶ ὁ σκολόπαξ καὶ ὄρτυξ ἐπὶ δένδρου οὐ καθίζουσιν, ἀλλ' ἐπὶ τῆς γῆς.

Κεφάλαιο 9

Ὁ δὲ δρυοκολάπτης οὐ καθίζει ἐπὶ τῆς γῆς· κόπτει δὲ τὰς δρυὺς τῶν σκωλήκων (614b.) καὶ σκνιπῶν ἔνεκεν, ἵν' ἐξίωσιν. Ἀναλέγεται γὰρ ἐξελθόντας αὐτοὺς τῇ γλώττῃ· πλατεῖαν δ' ἔχει καὶ μεγάλην. Καὶ πορεύεται ἐπὶ τοῖς δένδρεσι ταχέως πάντα τρόπον, καὶ ὑπτίως, καθάπερ οἱ ἀσκαλαβῶται. Ἔχει δὲ καὶ τοὺς ὄνυχας βελτίους τῶν κολοιῶν πεφυκότας πρὸς τὴν ἀσφάλειαν τῆς ἐπὶ τοῖς δένδρεσιν ἐφεδρείας· τούτους γὰρ ἐμπηγνὺς πορεύεται.

Ἔστι δὲ τῶν δρυοκολαπτῶν ἓν μὲν γένος ἔλαττον τοῦ κοττύφου, ἔχει δ' ὑπέρυθρα μικρά, ἕτερον δὲ γένος μεῖζον ἢ κόττυφος. Τὸ δὲ τρίτον γένος αὐτῶν οὐ πολλῶ ἔλαττόν ἐστιν ἀλεκτορίδος θηλείας. Νεοττεύει δ' ἐπὶ τῶν δένδρων, ὥσπερ εἴρηται, ἐν ἄλλοις τε τῶν δένδρων καὶ ἐν ἐλαίαις. Βόσκεται δὲ τοὺς τε μύρμηκας καὶ τοὺς σκώληκας τοὺς ἐκ τῶν δένδρων. Θηρεύοντα δὲ τοὺς σκώληκας οὕτω σφόδρα φασὶ κοιλαίνειν, ὥστε καταβάλλειν τὰ δένδρα. Καὶ τιθασσεύομενος δέ τις ἤδη ἀμύγδαλον εἰς ῥωγμὴν ξύλου ἐνθείς, ὅπως ἐναρμοσθὲν ὑπομείνειεν αὐτοῦ τὴν πληγὴν, ἐν τῇ τρίτῃ πληγῇ διέκοψε καὶ κατήσθιε τὸ μαλακόν.

Κεφάλαιο 10

Φρόνιμα δὲ πολλὰ καὶ περὶ τὰς γεράνους δοκεῖ συμβαίνειν· ἐκτοπίζουσί τε γὰρ μακράν, καὶ εἰς ὕψος πέτονται πρὸς τὸ καθορᾶν τὰ πόρρω, καὶ ἐὰν ἴδωσι νέφη καὶ χειμέρια, καταπτᾶσαι ἡσυχάζουσιν. Ἔτι δὲ τὸ ἔχειν ἡγεμόνα τε καὶ τοὺς ἐπισυρίττοντας ἐν τοῖς ἐσχάτοις, ὥστε κατακούεσθαι τὴν φωνήν. Ὅταν δὲ καθίζωνται, αἱ μὲν ἄλλαι ὑπὸ τῇ πτέρυγι τὴν κεφαλὴν ἔχουσαι καθεύδουσιν ἐπὶ ἐνὸς ποδὸς ἐναλλάξ, ὁ δ' ἡγεμὼν γυμνὴν ἔχων τὴν κεφαλὴν προορᾷ, καὶ ὅταν αἰσθηταί τι, σημαίνει βοῶν. Οἱ δὲ πελεκᾶνες οἱ ἐν τοῖς ποταμοῖς γινόμενοι καταπίνουσι τὰς μεγάλας κόγχας καὶ λείας· ὅταν δ' ἐν τῷ πρὸ τῆς κοιλίας τόπῳ πέσωσιν, ἐξεμοῦσιν, ἵνα χασκουσῶν τὰ κρέα ἐξαιροῦντες ἐσθίωσιν.

Κεφάλαιο 11

Τῶν δ' ἀγρίων ὀρνέων αἱ τ' οἰκῆσεις μεμηχάνηνται πρὸς τοὺς βίους καὶ τὰς σωτηρίας τῶν τέκνων. Εἰσὶ δ' οἱ μὲν εὐτεκνοὶ αὐτῶν καὶ ἐπιμελεῖς τῶν τέκνων, οἱ δὲ τοῦναντίον, καὶ οἱ μὲν εὐμήχανοι πρὸς τὸν βίον, οἱ δ' ἀμηχανώτεροι.

Τὰς δ' οἰκῆσεις οἱ μὲν περὶ τὰς χαράδρας καὶ χηραμοὺς (615a.) ποιοῦνται καὶ πέτρας, οἷον ὁ καλούμενος χαραδριός· ἔστι δ' ὁ χαραδριὸς καὶ τὴν χροάν καὶ τὴν φωνὴν φαῦλος, φαίνεται δὲ νύκτωρ, ἡμέρας δ' ἀποδιδράσκει.

Ἐν ἀποτόμοις δὲ καὶ ὁ ἱέραξ νεοττεύει· ὠμοφάγος δ' ὢν, ὢν ἂν κρατήσῃ ὀρνέων, τὴν καρδίαν οὐ κατεσθίει· καὶ τοῦτό τινες ἐωράκασι καὶ ἐπ' ὄρτυγος καὶ ἐπὶ κίχλης καὶ ἑτεροὶ ἐφ' ἐτέρων. Ἔτι δὲ καὶ περὶ τὸ θηρεύειν μεταβάλλουσιν· οὐ γὰρ ἀρπάζουσιν ὁμοίως τοῦ θέρους.

Γυπὸς δὲ λέγεται ὑπὸ τινων ὡς οὐδεὶς ἐώρακεν οὔτε νεοττὸν οὔτε νεοττιάν· ἀλλὰ διὰ τοῦτο ἔφη Ἡρόδωρος ὁ Βρύσωνος τοῦ σοφιστοῦ πατὴρ ἀπὸ τινος αὐτὸν ἐτέρας εἶναι μετεώρου γῆς, τεκμήριον τοῦτο λέγων καὶ τὸ φαίνεσθαι ταχὺ πολλοὺς, ὅθεν δέ, μηδενὶ εἶναι δῆλον. Τούτου δ' αἴτιον ὅτι τίκτει ἐν πέτραις ἀπροσβάτοις· ἔστι δ' οὐδὲ πολλαχοῦ ἐπιχώριος ὁ ὄρνις. Τίκτει δ' ἐν ᾧδὸν ἢ δύο τὰ πλεῖστα.

Ἔνιοι δὲ τῶν ὀρνίθων ἐν τοῖς ὄρεσι καὶ τῇ ὕλῃ κατοικοῦσιν, οἷον ἔποψ καὶ βρίνθος· οὗτος δ' ὁ ὄρνις εὐβίωτος καὶ ᾠδικός. Ὁ δὲ τροχίλος καὶ λόχμας καὶ τρώγλας οἰκεῖ· δυσάλωτος δὲ καὶ δραπετής καὶ τὸ ἦθος ἀσθενές, εὐβίωτος δὲ καὶ τεχνικός. Καλεῖται δὲ πρέσβυς καὶ βασιλεύς· διὸ καὶ τὸν ἀετὸν αὐτῷ φασὶ πολεμεῖν.

Κεφάλαιο 12

Εἰσὶ δὲ τινες οἱ περὶ τὴν θάλατταν βιοῦσιν, οἷον κίγκλος. Ἔστι δὲ τὸ ἦθος ὁ κίγκλος πανοῦργος καὶ δυσθήρατος, ὅταν δὲ ληφθῇ, τιθασσότατος.

Τυχάνει δ' ὦν καὶ ἀνάπηρος· ἀκρατὴς γὰρ τῶν ὀπισθέν ἐστιν. Ζῶσι δὲ περὶ θάλατταν καὶ ποταμοὺς καὶ λίμνας οἱ μὲν στεγανόποδες ἅπαντες· ἡ γὰρ φύσις αὐτῇ ζητεῖ τὸ πρόσφορον· πολλοὶ δὲ καὶ τῶν σχιζοπόδων περὶ τὰ ὕδατα καὶ τὰ ἔλη βιοτεύουσιν, οἷον ἄνθος παρὰ τοὺς ποταμοὺς· ἔχει δὲ τὴν χροάν καλὴν καὶ ἔστιν εὐβίотον. Ὁ δὲ καταρράκτης ζῇ μὲν περὶ θάλατταν, ὅταν δὲ καθῇ αὐτὸν εἰς τὸ βαθύ, μένει χρόνον οὐκ ἐλάττονα ἢ ὅσον πλέθρον διέλθοι τις· ἔστι δ' ἐλαττον ἰέρακος τὸ ὄρνειον.

Καὶ οἱ κύκνοι δ' εἰσὶ μὲν τῶν στεγανοπόδων, καὶ βιοτεύουσι περὶ λίμνας καὶ ἔλη, εὐβίотοι δὲ καὶ εὐήθεις καὶ εὐτεκνοὶ καὶ εὐγηροὶ, καὶ τὸν ἀετὸν, ἐὰν (615b.) ἄρξηται, ἀμυνόμενοι νικῶσιν, αὐτοὶ δ' οὐκ ἄρχουσι μάχης. Ψιδικοὶ δέ, καὶ περὶ τὰς τελευτὰς μάλιστα ἄδουσιν· ἀναπέτονται γὰρ καὶ εἰς τὸ πέλαγος, καὶ τινες ἤδη πλέοντες παρὰ τὴν Λιβύην περιέτυχον ἐν τῇ θαλάττῃ πολλοῖς ἄδουσι φωνῇ γοῶδει, καὶ τούτων ἐώρων ἀποθνήσκοντας ἐνίους.

Ἡ δὲ κύμινδις ὀλιγάκις μὲν φαίνεται (οἰκεῖ γὰρ ὄρη), ἔστι δὲ μέλας καὶ μέγεθος ὅσον ἰέραξ ὁ φασσοφόνος καλούμενος, καὶ τὴν ιδέαν μακρὸς καὶ λεπτός. Κύμινδιν δὲ καλοῦσιν Ἴωνες αὐτήν· ἥς καὶ Ὅμηρος μέμνηται ἐν τῇ Ἰλιάδι εἰπὼν “χαλκίδα κυκλήσκουσι θεοί, ἄνδρες δὲ κύμινδιν.”

Ἡ δ' ὕβρις, φασὶ δὲ τινες εἶναι τὸν αὐτὸν τοῦτον ὄρνιθα τῷ πῶϋγγι, οὗτος ἡμέρας μὲν οὐ φαίνεται διὰ τὸ μὴ βλέπειν ὀξύ, τὰς δὲ νύκτας θηρεύει ὥσπερ οἱ ὄϊοι· καὶ μάχονται δὲ πρὸς τὸν ἀετὸν οὕτω σφόδρα ὥστ' ἄμφω λαμβάνεσθαι πολλάκις ζῶντας ὑπὸ τῶν νομέων. Τίττει μὲν οὖν δύο ῥά, νεοττεύει δὲ καὶ οὗτος ἐν πέτραις καὶ σπηλαίοις. Μάχιμοι δὲ καὶ αἱ γέρανοί εἰσι πρὸς ἀλλήλας οὕτω σφόδρα ὥστε καὶ λαμβάνεσθαι μαχομένας· ὑπομένουσι γὰρ. Τίττει δὲ γέρανος δύο ῥά.

Κεφάλαιο 13

Ἡ δὲ κίττα φωνὰς μὲν μεταβάλλει πλείστας (καθ' ἐκάστην γὰρ ὡς εἶπεν ἡμέραν ἄλλην ἀφήσι), τίκτει δὲ περὶ ἑννέα ῥά, ποιεῖται δὲ τὴν νεοττιὰν ἐπὶ τῶν δένδρων ἐκ τριχῶν καὶ ἐρίων· ὅταν δ' ὑπολίπωσιν αἱ βάλανοι, ἀποκρύπτουσα ταμιεύεται.

Περὶ μὲν οὖν τῶν πελαργῶν, ὅτι ἀντεκτρέφονται, θρυλεῖται παρὰ πολλοῖς· φασὶ δὲ τινες καὶ τοὺς μέροπας ταὐτὸ τοῦτο ποιεῖν, καὶ ἀντεκτρέφεσθαι ὑπὸ τῶν ἐκγόνων οὐ μόνον γηράσκοντας ἀλλὰ καὶ εὐθύς, ὅταν οἰοί τ' ὥσιν· τὸν δὲ πατέρα καὶ τὴν μητέρα μένειν ἔνδον. Ἡ δ' ἰδέα τοῦ ὄρνιθος τῶν πτερῶν ἐστὶ τὰ μὲν ὑποκάτω ὠχρόν, τὰ δὲ ἐπάνω ὥσπερ τῆς ἀλκυόνος κυάνεον, τὰ δ' ἐπ' ἄκρων τῶν πτερυγίων ἐρυθρά. Τίκτει δὲ περὶ ἕξ ἢ ἑπτὰ ὑπὸ τὴν ὁπώραν, ἐν τοῖς κρημνοῖς τοῖς μαλακοῖς· εἰσδύεται δ' εἴσω καὶ τέτταρας πῆχεις.

Ἡ δὲ καλουμένη χλωρίς διὰ τὸ τὰ κάτω ἔχειν ὠχρά, ἔστι μὲν ἡλίκον κόρυδος, τίκτει δ' ῥά (616a.) τέτταρα ἢ πέντε, τὴν δὲ νεοττιὰν ποιεῖται μὲν ἐκ τοῦ συμφύτου ἔλκουσα πρόρριζον, στρώματα δ' ὑποβάλλει τρίχας καὶ ἔρια. Ταὐτὸ δὲ τοῦτο ποιεῖ καὶ ὁ κόττυφος καὶ ἡ κίττα, καὶ τὰ ἐντὸς τῆς νεοττιᾶς ἐκ τούτων ποιοῦνται.

Τεχνικῶς δὲ καὶ ἡ τῆς ἀκανθυλλίδος ἔχει νεοττιά· πέπλεκται γὰρ ὥσπερ σφαῖρα λινῇ, ἔχουσα τὴν εἰσδυσιν μικράν· Φασὶ δὲ καὶ τὸ κιννάμωμον ὄρνεον εἶναι οἱ ἐκ τῶν τόπων ἐκείνων, καὶ τὸ καλούμενον κιννάμωμον φέρειν ποθὲν τοῦτο τὸ ὄρνεον, καὶ τὴν νεοττιὰν ἐξ αὐτοῦ ποιεῖσθαι. Νεοττεύει δ' ἐφ' ὑψηλῶν δένδρων καὶ ἐν τοῖς θαλλοῖς τῶν δένδρων· ἀλλὰ τοὺς ἐγγχωρίους μόλιβδον πρὸς τοῖς οἴστοις προσαρτῶντας τοξεύοντας καταβάλλειν, καὶ οὕτω συνάγειν ἐκ τοῦ φορυτοῦ τὸ κιννάμωμον.

Κεφάλαιο 14

Ἡ δ' ἄλκυών ἐστι μὲν οὐ πολλῷ μείζων στρουθοῦ, τὸ δὲ χρῶμα καὶ κυανοῦν ἔχει καὶ χλωρὸν καὶ ὑποπόρφυρον· μεμιγμένως δὲ τοιοῦτον τὸ σῶμα πᾶν καὶ αἱ πτέρυγες καὶ τὰ περὶ τὸν τράχηλον, οὐ χωρὶς ἕκαστον τῶν χρωμάτων· τὸ δὲ ῥύγχος ὑπόχλωρον μὲν, μακρὸν δὲ καὶ λεπτόν. Τὸ μὲν οὖν εἶδος ἔχει τοιοῦτον, ἡ δὲ νεοττιὰ παρομοία ταῖς σφαίραις ταῖς θαλαττίαις ἐστὶ καὶ ταῖς καλουμέναις ἄλοσάχναις, πλὴν τοῦ χρώματος· τὴν δὲ χροάν ὑπόπυρρον ἔχουσιν, τὸ δὲ σχῆμα παραπλήσιον ταῖς σικύαις ταῖς ἐχούσαις τοὺς τραχήλους μακρούς. Τὸ δὲ μέγεθος αὐτῶν ἐστὶ τῆς μεγίστης σπογγιᾶς μείζον· εἰσὶ γὰρ καὶ μείζους καὶ ἐλάττους· κατάστεγοι δέ, καὶ τὸ στερεὸν ἔχουσι συχνὸν καὶ τὸ κοῖλον.

Καὶ κόπτοντι μὲν σιδηρίῳ ὅξεϊ οὐ ταχὺ διακόπτεται, ἅμα δὲ κόπτοντι καὶ ταῖς χερσὶ θραύονται ταχὺ διαθραύεται, ὥσπερ ἡ ἄλοσάχνη. Τὸ δὲ στόμα στενὸν ὅσον ἰεῖς εἴδουσιν μικράν, ὥστ' οὐδ' ἂν ἀνατραπῇ, ἡ θάλαττα οὐκ εἰσέρχεται. Τὰ δὲ κοῖλα παραπλήσια ἔχει τοῖς τῶν σπόγγων. Ἀπορεῖται δ' ἐκ τίνος συντίθῃσι τὴν νεοττιάν, δοκεῖ δὲ μάλιστα ἐκ τῶν ἀκανθῶν τῆς βελόνης· ζῆ γὰρ ἰχθυοφαγοῦσα. Ἀναβαίνει δὲ καὶ ἀνὰ τοὺς ποταμούς. Τίττει δὲ περὶ πέντε μάλιστα ὥα. Λοχεύεται δὲ διὰ βίου, ἄρχεται δὲ τετράμηνος.

Κεφάλαιο 15

Ὁ δ' ἔποψ τὴν νεοττιὰν μάλιστα ποιεῖται ἐκ τῆς (616b.) ἀνθρωπίνης κόπρου· τὴν δ' ἰδέαν μεταβάλλει τοῦ θέρους καὶ τοῦ χειμῶνος, ὥσπερ καὶ τῶν ἄλλων ἀγρίων τὰ πλεῖστα.

Ὁ δ' αἰγίθαλος τίκτει μὲν ὥα πλεῖστα, ὥς φασίν. Ἐνιοὶ δὲ καὶ τὸν μελαγκόρυφον καλούμενόν φασι πλεῖστα τίκτειν μετὰ γε τὸν ἐν Λιβύῃ στρουθόν· ἐώραται μὲν γὰρ καὶ ἑπτακαίδεκα, τίκτει μέντοι καὶ πλείω ἢ εἴκοσιν. Τίκτει δ' αἰεὶ περιττά, ὥς φασίν. Νεοττεύει δὲ καὶ οὗτος ἐν τοῖς δένδρεσι, καὶ βόσκεται τοὺς σκώληκας. Ἴδιον δὲ τούτῳ καὶ ἀηδόνι παρὰ τοὺς ἄλλους ὄρνιθας τὸ μὴ ἔχειν τῆς γλώττης τὸ ὀξύ.

Ὁ δ' αἰγιθος εὐβίωτος καὶ πολύτεκνος, τὸν δὲ πόδα χωλός ἐστιν.

Χλωρίων δὲ μαθεῖν μὲν ἀγαθὸς καὶ βιομήχανος, κακοπέτης δέ, καὶ χροάν ἔχει μοχθηράν.

Κεφάλαιο 16

Ἡ δ' ἐλέα, ὥσπερ ἄλλος τις τῶν ὀρνίθων, εὐβίοτος, καὶ καθίζει
θέρους μὲν ἐν προσηνέμῳ καὶ σκιᾷ, χειμῶνος δ' ἐν εὐηλίῳ καὶ
ἐπισκεπεῖ ἐπὶ τῶν δονάκων περὶ τὰ ἔλλη. Ἔστι δὲ τὸ μὲν μέγεθος
βραχύς, φωνὴν δ' ἔχει ἀγαθὴν.

Καὶ ὁ γνάφαλος καλούμενος τὴν τε φωνὴν ἔχει ἀγαθὴν καὶ τὸ
χρῶμα καλός, καὶ βιομήχανος, καὶ τὸ εἶδος εὐπρεπής. Δοκεῖ δ' εἶναι
ξενικὸς ὄρνις· ὀλιγάκις γὰρ φαίνεται ἐν τοῖς μὴ οἰκείοις τόποις.

Κεφάλαιο 17

Ἡ δὲ κρῆξ τὸ μὲν ἦθος μάχιμος, τὴν δὲ διάνοιαν εὐμήχανος πρὸς τὸν βίον, ἄλλως δὲ κακόποτος ὄρνις.

Ἡ δὲ καλουμένη σίττη τὸ μὲν ἦθος μάχιμος, τὴν δὲ διάνοιαν εὐθικτος καὶ εὐθήμων καὶ εὐβίωτος, καὶ λέγεται φαρμάκεια εἶναι διὰ τὸ πολυίδρις εἶναι· πολύγονος δὲ καὶ εὐτεκνος, καὶ ζῆ ὕλογοποῦσα.

Αἰγώλιος δ' ἐστὶ νυκτινόμος καὶ ἡμέρας ὀλιγάκις φαίνεται, καὶ οἰκεῖ καὶ οὗτος πέτρας καὶ σπήλυγγας· ἔστι γὰρ ἀθαρσής, τὴν δὲ διάνοιαν βιωτικὸς καὶ εὐμήχανος.

Ἔστι δὲ τι ὀρνίθιον μικρὸν ὃ καλεῖται κέρθιος· οὗτος τὸ μὲν ἦθος θρασύς, καὶ οἰκεῖ περὶ δένδρα, καὶ ἔστι θριποφάγος, τὴν δὲ διάνοιαν εὐβίωτος, καὶ τὴν φωνὴν ἔχει λαμπράν.

Αἱ δ' ἀκανθίδες κακόβιοι καὶ κακόχροοι, φωνὴν μέντοι λιγυρὰν ἔχουσιν.

Κεφάλαιο 18

Τῶν δ' ἐρωδιῶν ὁ μὲν πέλλος, ὥσπερ εἴρηται, ὀχεύει μὲν χαλεπῶς, εὐμήχανος δὲ καὶ δειπνοφόρος καὶ ἔπαγρος, ἐργάζεται δὲ τὴν ἡμέραν· τὴν μέντοι χρόαν ἔχει φαύλην (617a.) καὶ τὴν κοιλίαν αἰεὶ ὑγρὰν. Τῶν δὲ λοιπῶν δύο (τρία γὰρ γένη ἐστὶν αὐτῶν) ὁ μὲν λευκὸς τὴν τε χρόαν ἔχει καλήν, καὶ ὀχεύει ἀσινῶς, καὶ νεοττεύει καὶ τίκτει καλῶς ἐπὶ τῶν δένδρων, νέμεται δ' ἔλη καὶ λίμνας καὶ πεδία καὶ λειμῶνας. Ὁ δ' ἀστερίας ὁ ἐπικαλούμενος ὄκνος μυθολογεῖται μὲν γενέσθαι ἐκ δούλων τὸ ἀρχαῖον, ἔστι δὲ κατὰ τὴν ἐπωνυμίαν τούτων ἀργότατος.

Οἱ μὲν οὖν ἐρωδιοὶ τοῦτον βιοῦσι τὸν τρόπον. Ἡ δὲ καλουμένη πῶϋγξ ἴδιον ἔχει πρὸς τᾶλλα· μάλιστα γάρ ἐστι ὀφθαλμοβόρος τῶν ὀρνίθων. Πολέμιος δὲ τῇ ἄρπη· καὶ γὰρ ἐκείνη ὁμοιοβίотος.

Κεφάλαιο 19

Τῶν δὲ κοτύφων δύο γένη ἐστίν, ὁ μὲν ἕτερος μέλας καὶ πανταχοῦ ὢν, ὁ δ' ἕτερος ἔκλευκος, τὸ δὲ μέγεθος ἴσος ἐκείνῳ, καὶ ἡ φωνὴ παραπλησία ἐκείνῳ· ἔστι δ' οὗτος ἐν Κυλλήνῃ τῆς Ἀρκαδίας, ἄλλοθι δ' οὐδαμοῦ. Τούτων ὅμοιος τῷ μέλανι κοτύφῳ ἐστὶ λαιός, τὸ μέγεθος μικρῷ ἐλάττων· οὗτος ἐπὶ τῶν πετρῶν καὶ ἐπὶ τῶν κεράμων τὰς διατριβὰς ποιεῖται, τὸ δὲ ρύγχος οὐ φοινικοῦν ἔχει καθάπερ ὁ κόττυφος.

Κεφάλαιο 20

Κιχλῶν δ' εἶδη τρία, ἡ μὲν ἰξοβόρος· αὕτη δ' οὐκ ἐσθίει ἀλλ' ἡ ἰξὸν καὶ ῥητίνην, τὸ δὲ μέγεθος ὅσον κίττα ἐστίν. Ἑτέρα τριχάς· αὕτη δ' ὀξὺ φθέγγεται, τὸ δὲ μέγεθος ὅσον κόττυφος. Ἄλλη δ' ἦν καλοῦσί τινες ἱλιάδα, ἐλαχίστη τε τούτων καὶ ἥττον ποικίλη.

Κεφάλαιο 21

Ἦστί δέ τις πετραῖος ᾧ ὄνομα κύανος· οὗτος ὁ ὄρνις ἐν Νισύρῳ μάλιστα ἐστὶ, ποιεῖται δ' ἐπὶ τῶν πετρῶν τὰς διατριβάς. Τὸ δὲ μέγεθος κοττύφου μὲν ἐλάττων, σπίζης δὲ μείζων μικρῷ. Μεγαλόπους δέ, καὶ πρὸς τὰς πέτρας προσαναβαίνει. Κυανοῦς ὅλος· τὸ δὲ ῥύγχος ἔχει λεπτὸν καὶ μακρόν, σκέλη δὲ βραχέα τῇ πίπῳ παρόμοια.

Κεφάλαιο 22

Ὁ δὲ χλωρίων χλωρὸς ὅλος· οὗτος τὸν χειμῶνα οὐχ ὁρᾶται, περὶ δὲ τὰς τροπὰς τὰς θερινὰς φανερὸς μάλιστα γίνεται, ἀπαλλάττεται δ' ὅταν Ἀρκτοῦρος ἐπιτέλλῃ. Τὸ δὲ μέγεθός ἐστιν ὅσον τρυγῶν.

Ὁ δὲ μαλακοκρανεὺς ἀεὶ ἐπὶ τὸ αὐτὸ (617b.) καθιζάνει, καὶ ἀλίσκεται ἐνταῦθα. Τὸ δ' εἶδος, κεφαλὴ μὲν μεγάλη χονδρότυπος, τὸ δὲ μέγεθος ἐλάττων κίχλης μικρῷ· στόμα δ' εὖρωστον, μικρόν, στρογγύλον· τὸ δὲ χρῶμα σποδοειδῆς ὅλος· εὖπους δὲ καὶ κακόπτερος. Ἀλίσκεται δὲ μάλιστα γλαυκί.

Κεφάλαιο 23

Ἦστι δὲ καὶ ὁ πάρδαλος. Τοῦτο δὲ τὸ ὄρνεόν ἐστιν ἀγελαῖον ὡς ἐπὶ τὸ πολὺ, καὶ οὐκ ἔστι κατὰ ἓνα ἰδεῖν· τὸ δὲ χρῶμα σποδοειδὲς ὅλος, μέγεθος δὲ παραπλήσιος ἐκείνοις, εὐπους δὲ καὶ οὐ κακόπτερος, φωνὴ δὲ πολλή καὶ οὐ βαρεῖα.

Κολλυρίων δὲ τὰ αὐτὰ ἐσθίει τῷ κοττύφῳ· τὸ δὲ μέγεθος καὶ τούτου ταὐτὸν τοῖς πρότερον· ἀλίσκεται δὲ κατὰ χειμῶνα μάλιστα. Ταῦτα δὲ πάντα διὰ παντὸς φανερά ἐστιν.

Ἔτι δὲ τὰ κατὰ πόλεις εἰωθότα μάλιστα ζῆν, κόραξ καὶ κορώνη· καὶ γὰρ ταῦτ' ἀεὶ φανερά, καὶ οὐ μεταβάλλει τοὺς τόπους οὐδὲ φωλεῖ.

Κεφάλαιο 24

Κολοιῶν δ' ἐστὶν εἶδη τρία, ἓν μὲν ὁ κορακίας· οὗτος ὅσον κορώνη, φοινικόρυγχος· ἄλλος δ' ὁ λύκος καλούμενος· ἔτι δ' ὁ μικρός, ὁ βωμολόχος. Ἔστι δὲ καὶ ἄλλο γένος κολοιῶν περὶ τὴν Λυδίαν καὶ Φρυγίαν, ὃ στεγανόπουν ἐστίν.

Κεφάλαιο 25

Κορυδάλων δ' ἐστὶ δύο γένη, ἡ μὲν ἑτέρα ἐπίγειος καὶ λόφον ἔχουσα, ἡ δ' ἑτέρα ἀγελαία καὶ οὐ σπορὰς ὥσπερ ἐκείνη, τὸ μέντοι χρῶμα ὅμοιον τῇ ἑτέρᾳ ἔχουσα, τὸ δὲ μέγεθος ἐλάττων· καὶ λόφον οὐκ ἔχει· ἐσθίεται δέ.

Κεφάλαιο 26

Ἀσκαλώπας δ' ἐν τοῖς κήποις ἀλίσκεται ἔρκεσιν· τὸ μέγεθος ὅσον ἀλεκτορίς, τὸ ρύγχος μακρόν, τὸ χρῶμα ὅμοιον ἀτταγῆνι· τρέχει δὲ ταχύ, καὶ φιλόανθρωπόν ἐστιν ἐπιεικῶς.

Κεφάλαιο 27

Ὁ δὲ ψάρος ἐστὶ ποικίλος· μέγεθος δ' ἐστὶν ἡλίκον κόττυφος.

Αἱ δ' ἴβιες αἱ ἐν Αἰγύπτῳ εἰσὶ μὲν διτταί, αἱ μὲν λευκαὶ αὐτῶν, αἱ δὲ μέλαιναι. Ἐν μὲν οὖν τῇ ἄλλῃ Αἰγύπτῳ αἱ λευκαὶ εἰσι, πλὴν ἐν Πηλουσίῳ οὐ γίνονται· αἱ δὲ μέλαιναι ἐν τῇ ἄλλῃ Αἰγύπτῳ οὐκ εἰσίν, ἐν Πηλουσίῳ δ' εἰσίν.

Κεφάλαιο 28

Σκῶπες δ' οἱ μὲν ἀεὶ πᾶσαν ὥραν εἰσί, καὶ καλοῦνται ἀεισκῶπες, καὶ οὐκ (618a.) ἐσθίονται διὰ τὸ ἄβρωτοι εἶναι· ἕτεροι δὲ γίνονται ἐνίστε τοῦ φθινοπώρου, φαίνονται δ' ἐφ' ἡμέραν μίαν ἢ δύο τὸ πλεῖστον, καὶ εἰσὶν ἐδώδιμοι καὶ σφόδρα εὐδοκιμοῦσιν. Καὶ διαφέρουσι τῶν ἀεισκωπῶν καλουμένων οὗτοι ἄλλω μὲν ὥς εἰπεῖν οὐδενί, τῷ δὲ πάχει· καὶ οὗτοι μὲν εἰσιν ἄφωνοι, ἐκεῖνοι δὲ φθέγγονται. Περὶ δὲ γενέσεως αὐτῶν ἥτις ἐστίν, οὐδὲν ὥπται, πλὴν ὅτι τοῖς ξεφυρίοις φαίνονται· τοῦτο δὲ φανερόν.

Κεφάλαιο 29

Ὁ δὲ κόκκυξ, ὥσπερ εἴρηται ἐν ἑτέροις, οὐ ποιεῖ νεοττιάν, ἀλλ' ἐν ἄλλοτρίαις τίκτει νεοττιαῖς, μάλιστα μὲν ἐν ταῖς τῶν φαβῶν καὶ ἐν ὑπολαῖδος καὶ κορυδου χαμαί, ἐπὶ δένδρου δ' ἐν τῇ τῆς χλωρίδος καλουμένης νεοττιᾷ. Τίκτει μὲν οὖν ἐν ῥόν, ἐπ' ἄζει δ' οὐκ αὐτός, ἀλλ' ἐν οὗ ἂν τέκη νεοττιᾷ, οὗτος ὁ ὄρνις ἐκκολάπτει καὶ τρέφει, καὶ ὡς φασίν, ὅταν αὐξάνηται ὁ τοῦ κόκκυγος νεοττός, ἐκβάλλει τὰ αὐτῆς, καὶ ἀπόλλυνται οὕτως. Οἱ δὲ λέγουσιν ὡς καὶ ἀποκτείνασα ἢ τρέφουσα δίδωσι καταφαγεῖν· διὰ γὰρ τὸ καλὸν εἶναι τὸν τοῦ κόκκυγος νεοττὸν ἀποδοκιμάζει τὰ αὐτῆς.

Τὰ μὲν οὖν πλεῖστα τούτων ὁμολογοῦσιν αὐτόπται γεγενημένοι τινές· περὶ δὲ τῆς φθορᾶς τῆς τῶν νεοττῶν τῆς ὀρνιθοῦς οὐχ ὡσαύτως πάντες λέγουσιν, ἀλλ' οἱ μὲν φασιν αὐτὸν ἐπιφοιτῶντα τὸν κόκκυγα κατεσθίειν τὰ τῆς ὑποδεξαμένης ὀρνιθοῦς νεόττια, οἱ δὲ διὰ τὸ τῷ μεγέθει ὑπερέχειν τὸν νεοττὸν τοῦ κόκκυγος ὑποκάπτοντα τὰ προσφερόμενα φθάνειν, ὥστε λιμῶ τοὺς ἑτέρους ἀπόλλυσθαι νεοττούς, οἱ δὲ κρείττον' ὄντα ἀποκτινύναι συντρεφόμενον αὐτοῖς.

Δοκεῖ δ' ὁ κόκκυξ φρόνιμον ποιεῖσθαι τὴν τέκνωσιν· διὰ γὰρ τὸ συνειδέναι αὐτῷ τὴν δειλίαν καὶ ὅτι οὐκ ἂν δύναιτο βοηθῆσαι, διὰ τοῦτο ὥσπερ ὑποβολιμαίους ποιεῖ τοὺς ἑαυτοῦ νεοττούς, ἵνα σωθῶσιν. Τὴν γὰρ δειλίαν ὑπερβάλλει τοῦτο τὸ ὀρνεον· τίλλεται γὰρ ὑπὸ τῶν μικρῶν ὀρνέων, καὶ φεύγει αὐτά.

Κεφάλαιο 30

Οἱ δ' ἄποδες, οὓς καλοῦσί τινες κυψέλους, ὅτι μὲν ὅμοιοι ταῖς χελιδόσιν εἰσίν, εἴρηται πρότερον· οὐ γὰρ ῥάδιον γνῶναι πρὸς τὴν χελιδόνα, πλὴν τῷ τὴν κνήμην ἔχειν δασεῖαν. Οὗτοι νεοττεύουσιν ἐν κυψελίσιν ἐκ πηλοῦ πεπλασμέναις μακραῖς, ὅσον εἴσδυσιν ἐχούσαις. Ἐν στεγνῷ δὲ ποιεῖται (618b.) τὰς νεοττιάς ὑπὸ πέτραις καὶ σπηλαίοις, ὥστε καὶ τὰ θηρία καὶ τοὺς ἀνθρώπους διαφεύγειν.

Ὁ δὲ καλούμενος αἰγοθήλας ἐστὶ μὲν ὀρεινός, τὸ δὲ μέγεθος κοττύφου μὲν μικρῷ μείζων, κόκκυγος δ' ἐλάττων. Τίκει μὲν οὖν ῥὰ δύο ἢ τρία τὸ πλεῖστον, τὸ δ' ἥθος ἐστὶ βλακικός. Θηλάζει δὲ τὰς αἰγας προσπετόμενος, ὅθεν καὶ τοῦνομ' εἴληφεν· φασὶ δ', ὅταν θηλάσῃ τὸν μαστόν, ἀποσβέννυσθαί τε καὶ τὴν αἶγα ἀποτυφλοῦσθαι. Ἔστι δ' οὐκ ὀξύωπὸς τῆς ἡμέρας, ἀλλὰ τῆς νυκτὸς βλέπει.

Κεφάλαιο 31

Οἱ δὲ κόρακες ἐν τοῖς μικροῖς χωρίοις, καὶ ὅπου μὴ ἱκανὴ τροφή πλείοσι, δύο μόνοι γίνονται· καὶ τοὺς ἑαυτῶν νεοττούς, ὅταν οἱοί τ' ᾧσιν ἤδη πέτεσθαι, τὸ μὲν πρῶτον ἐκβάλλουσιν, ὕστερον δὲ καὶ ἐκ τοῦ τόπου ἐκδιώκουσιν.

Τίκτει δ' ὁ κόραξ καὶ τέτταρα καὶ πέντε. Περὶ δὲ τοὺς χρόνους ἐν οἷς ἀπώλονται οἱ Μηδίου ξένοι ἐν Φαρσάλῳ, ἐρημία ἐν τοῖς τόποις τοῖς περὶ Ἀθήνας καὶ Πελοπόννησον ἐγένετο κοράκων, ὥς ἐχόντων αἰσθησὶν τινα τῆς παρ' ἀλλήλων δηλώσεως.

Κεφάλαιο 32

Τῶν δ' αἰτῶν ἐστὶ πλείονα γένη, ἔν μὲν ὁ καλούμενος πύγαργος· οὗτος κατὰ τὰ πεδία καὶ τὰ ἄλση καὶ περὶ τὰς πόλεις γίνεται· ἔνιοι δὲ καλοῦσιν νεβροφόνον αὐτόν. Πέτεται δὲ καὶ εἰς τὰ ὄρη καὶ εἰς τὴν ὕλην διὰ τὸ θάρσος· τὰ δὲ λοιπὰ γένη ὀλιγάκις εἰς πεδία καὶ εἰς ἄλση φοιτᾷ.

Ἔτερον δὲ γένος αἰτοῦ ἐστὶν ὁ πλάγγος καλεῖται, δεύτερος μεγέθει καὶ ῥώμῃ· οἰκεῖ δὲ βήσσας καὶ ἄγκη καὶ λίμνας, ἐπικαλεῖται δὲ νηττοφόνος καὶ μορφνός· οὗ καὶ Ὅμηρος μέμνηται ἐν τῇ τοῦ Πριάμου ἐξόδῳ.

Ἔτερος δὲ μέλας τὴν χροάν καὶ μέγεθος ἐλάχιστος, κράτιστος τούτων· οὗτος οἰκεῖ ὄρη καὶ ὕλας, καλεῖται δὲ μελανάετος καὶ λαγωφόνος. Ἐκτρέφει δὲ μόνος τὰ τέκνα οὗτος καὶ ἐξάγει. Ἔστι δ' ὠκυβόλος καὶ εὐθήμων καὶ ἄφθονος καὶ ἄφοβος καὶ μάχιμος καὶ εὖφημος· οὐ γὰρ μινυρίζει οὐδὲ λέληκεν.

Ἔτι δ' ἕτερον γένος περκνόπτερος, λευκὴ κεφαλὴ, μεγέθει δὲ μέγιστος, πτερὰ δὲ βραχύτατα καὶ οὐροπύγιον πρόμηκες, γυπὶ ὅμοιος· ὀρειπέλαργος καλεῖται καὶ ὑπάετος. Οἰκεῖ δ' ἄλση, τὰ μὲν κακὰ ταῦτά ἔχων τοῖς ἄλλοις, τῶν δ' ἀγαθῶν (619a.) οὐδέν· ἀλίσκεται γὰρ καὶ διώκεται ὑπὸ κοράκων καὶ τῶν ἄλλων· βαρὺς γὰρ καὶ κακόβιος καὶ τὰ τεθνεῶτα φέρων, πεινῇ δ' αἰεὶ καὶ βοᾷ καὶ μινυρίζει.

Ἔτερον δὲ γένος ἐστὶν αἰτῶν οἱ καλούμενοι ἀλιάετοι. Οὗτοι δ' ἔχουσιν αὐχένα τε μέγαν καὶ παχὺν καὶ πτερὰ καμπύλα, οὐροπύγιον δὲ πλατὺ· οἰκοῦσι δὲ περὶ θάλατταν καὶ ἀκτάς, ἀρπάζοντες δὲ καὶ οὐ δυνάμενοι φέρειν πολλάκις καταφέρονται εἰς βυθόν.

Ἔτι δ' ἄλλο γένος ἐστὶν αἰτῶν οἱ καλούμενοι γνήσιοι. Φασὶ δὲ τούτους μόνους καὶ τῶν ἄλλων ὀρνίθων γνησίους εἶναι· τὰ γὰρ ἄλλα γένη μέμικται καὶ μεμοίχευται ὑπ' ἀλλήλων, καὶ τῶν αἰτῶν καὶ τῶν ἱεράκων καὶ τῶν ἐλαχίστων.

Ἔστι δ' οὗτος μέγιστος τῶν αἰτῶν ἀπάντων, μείζων τε τῆς φήνης, τῶν δ' αἰτῶν καὶ ἡμιόλιος, χρῶμα ξανθός. Φαίνεται δ' ὀλιγάκις, ὥσπερ ἡ καλουμένη κύμινδις.

Ὡρα δὲ τοῦ ἐργάζεσθαι αἰετῶ καὶ πέτεσθαι ἀπ' ἀρίστου μέχρι δειλῆς· τὸ γὰρ ἔωθεν κάθηται μέχρι ἀγορᾶς πληθυσούσης.

Γηράσκουσι δὲ τοῖς ἀετοῖς τὸ ρύγχος αὐξάνεται τὸ ἄνω γαμψοῦμενον ἀεὶ μᾶλλον, καὶ τέλος λιμῶ ἀποθνήσκουσιν. Ἐπιλέγεται δὲ τις καὶ μῦθος, ὥς τοῦτο πάσχει διότι ἄνθρωπός ποτ' ὦν ἠδίκησε ξένον. Αποτίθεται δὲ τὴν περιττεύουσαν τροφήν τοῖς νεοττοῖς· διὰ γὰρ τὸ μὴ εὐπορον εἶναι καθ' ἑκάστην ἡμέραν αὐτὴν πορίζεσθαι, ἐνίοτε οὐκ ἔχουσιν ἔξωθεν κομίζειν. Τύπτουσι δὲ ταῖς πτέρυξι καὶ τοῖς ὀνυξιν ἀμύττουσιν, ἂν τινα λάβωσι σκευωρούμενον περὶ τὰς νεοττιάς.

Ποιοῦνται δ' αὐτὰς οὐκ ἐν πεδινοῖς τόποις ἀλλ' ἐν ὑψηλοῖς, μάλιστα μὲν ἐν πέτραις ἀποκρήμνις, οὐ μὴν ἀλλὰ καὶ ἐπὶ δένδρων. Τρέφουσι δὲ τοὺς νεοττοὺς ἕως ἂν δυνατοὶ γένωνται πέτεσθαι· τότε δ' ἐκ τῆς νεοττιάς αὐτοὺς ἐκβάλλουσι καὶ ἐκ τοῦ τόπου τοῦ περὶ αὐτὴν παντὸς ἀπελαύνουσιν. Ἐπέχει γὰρ ἐν ζευγος ἀετῶν πολὺν τόπον· διόπερ οὐκ ἔῃ πλησίον αὐτῶν ἄλλους αὐλισθῆναι.

Τὴν δὲ θήραν ποιεῖται οὐκ ἐκ τῶν συνέγγυς τόπων τῆς νεοττιάς, ἀλλὰ συχνὸν ἀποπτάς. Ὅταν δὲ κυνηγήσῃ καὶ ἄρῃ, τίθησι καὶ οὐκ εὐθὺς φέρει, ἀλλ' ἀποπειραθεὶς τοῦ βάρους ἀφήσιν. Καὶ τοὺς δασύποδας δ' οὐκ (619b.) εὐθὺς λαμβάνει, ἀλλ' εἰς τὸ πεδὶον ἐάσας προελθεῖν· καὶ καταβαίνει δ' οὐκ εὐθὺς εἰς τὸ ἔδαφος, ἀλλ' ἀεὶ ἀπὸ τοῦ μείζονος ἐπὶ τὸ ἔλαττον κατὰ μικρόν. Ἀμφω δὲ ταῦτα ποιεῖ πρὸς ἀσφάλειαν τοῦ μὴ ἐνεδρεύεσθαι. Καὶ ἐφ' ὑψηλῶν καθίζει διὰ τὸ βραδέως αἶρεσθαι ἀπὸ τῆς γῆς. Ὑψοῦ δὲ πέτεται, ὅπως ἐπὶ πλεῖστον τόπον καθορᾷ· διόπερ θεῖον οἱ ἄνθρωποι φασιν εἶναι μόνον τῶν ὀρνέων.

Πάντες δ' οἱ γαμψώνυχιοι ἥκιστα καθιζάνουσιν ἐπὶ πέτραις διὰ τὸ τῇ γαμψότητι ἐμπόδιον εἶναι τὴν σκληρότητα. Θηρεύει δὲ λαγῶς καὶ νεβροὺς καὶ ἀλώπεκας καὶ τὰ λοιπά, ὅσων κρατεῖν οἷός τ' ἐστίν. Μακρόβιος δ' ἐστίν· δηλὸν δὲ τοῦτο ἐκ τοῦ τὴν νεοττιὰν τὴν αὐτῶν ἐπὶ πολὺ διαμένειν.

Κεφάλαιο 33

Ἐν δὲ Σκύθαις ὀρνίθων γένος ἐστὶν οὐκ ἔλαττον ὠτίδος· τοῦτο τίκτει δύο νεοττοὺς, οὐκ ἐπικάθηται δέ, ἀλλ' ἐν δέρματι λαγωοῦ ἢ ἀλώπεκος ἐγκρύψαν ἑᾶ· ἐπ' ἅκρῳ δὲ τῷ δένδρῳ φυλάττει, ὅταν μὴ τύχῃ θηρεύων· κἂν τις ἀναβαίνῃ, μάχεται καὶ τύπτει ταῖς πτέρυξιν, ὥσπερ οἱ ἀετοί.

Γλαῦκες δὲ καὶ νυκτικόρακες, καὶ τὰ λοιπὰ ὅσα τῆς ἡμέρας ἀδυνατεῖ βλέπειν, τῆς νυκτὸς μὲν θηρεύοντα τὴν τροφὴν αὐτοῖς πορίζεται, οὐ κατὰ πᾶσαν δὲ τὴν νύκτα τοῦτο ποιεῖ, ἀλλ' ἅκρας ἐσπέρας καὶ περὶ ὄρθρον· θηρεύει δὲ μῦς καὶ σαύρας καὶ σφονδύλας καὶ τοιαῦτ' ἄλλα ζῳδάρια.

Ἡ δὲ καλουμένη φήνη ἐστὶν εὐτεκνος καὶ εὐβίотος καὶ δειπνοφόρος καὶ ἥπιος, καὶ τὰ τέκνα ἐκτρέφει καὶ τὰ αὐτῆς καὶ τὰ τοῦ ἀετοῦ. Καὶ γὰρ ταῦθ' ὅταν ἐκβάλλῃ ἐκεῖνος, ἀναλαβοῦσα τρέφει· ἐκβάλλει γὰρ ὁ ἀετὸς πρὸ ὥρας, ἔτι βίου δεόμενα καὶ οὐπω δυνάμενα πέτεσθαι. Ἐκβάλλειν δὲ δοκεῖ ὁ ἀετὸς τοὺς νεοττοὺς διὰ φθόνον· φύσει γάρ ἐστι φθονερός καὶ ὀξύπεινος, ἔτι δὲ ὀξυλαβής. Λαμβάνει δὲ μέγα, ὅταν λάβῃ. Φθονεῖ οὖν τοῖς νεοττοῖς ἀδρυνομένοις, ὅτι φαγεῖν ἀγαθοὶ γίνονται, καὶ σπᾶ τοῖς ὄνυξιν. Μάχονται δὲ καὶ οἱ νεοττοὶ καὶ αὐτοὶ περὶ τῆς ἑδρας καὶ τῆς τροφῆς· ὁ δ' ἐκβάλλει καὶ κόπτει αὐτούς· οἱ δ' ἐκβαλλόμενοι βοῶσι, καὶ οὕτως ὑπολαμβάνει αὐτοὺς ἡ φήνη.

Ἡ δὲ φήνη (620a.) ἐπάργεμός τ' ἐστὶ καὶ πεπῆρωται τοὺς ὀφθαλμούς· ὁ δ' ἀλιάετος ὀξυωπέστατος μὲν ἐστὶ, καὶ τὰ τέκνα ἀναγκάζει ἔτι ψιλὰ ὄντα πρὸς τὸν ἥλιον βλέπειν, καὶ τὸν μὴ βουλόμενον κόπτει καὶ στρέφει, καὶ ὁποτέρου ἂν ἔμπροσθεν οἱ ὀφθαλμοὶ δακρύσωσιν, τοῦτον ἀποκτείνει, τὸν δ' ἕτερον ἐκτρέφει. Διατρίβει δὲ περὶ θάλατταν, καὶ ζῇ θηρεύων τοὺς περὶ τὴν θάλατταν ὀρνίθας, ὥσπερ εἴρηται. Θηρεύει δ' ἀπολαμβάνων καθ' ἓνα, παρατηρῶν ἀναδυόμενον ἐκ τῆς θαλάττης. Ὅταν δ' ἴδῃ ὁ ὄρνις ἀνακύπτων τὸν ἀλιάετον, πάλιν φοβηθεὶς καταδύεται ὡς ἐτέρᾳ ἀνακύψων· ὁ δὲ διὰ τὸ ὀξὺ ὄρᾳν ἀεὶ πέτεται, ἕως ἂν ἀποπνίξῃ ἢ λάβῃ μετέωρον. Ἀθρόαις γὰρ οὐκ ἐπιχειρεῖ· ραίνουσαι γὰρ ἀπερύκουσι ταῖς πτέρυξιν.

Κεφάλαιο 34

Οἱ δὲ κέφοι ἀλίσκονται τῷ ἀφρῶ· κάπτουσι γὰρ αὐτόν, διὸ προσραίνοντες θηρεύουσιν. Ἔχει δὲ τὴν μὲν ἄλλην σάρκα εὐώδη, τὸ δὲ πυγαῖον μόνον θινὸς ὄζει. Γίνονται δὲ πῖονες.

Κεφάλαιο 35

Τῶν δ' ἱεράκων κράτιστος μὲν ὁ τριόρχης, δεύτερος δ' ὁ αἰσάλων, τρίτος ὁ κίρκος. Ὁ δ' ἄστερίας καὶ ὁ φασσοφόνος καὶ ὁ πτέρνις ἄλλοιοι. Οἱ δὲ πλατύτεροι ἱέρακες ὑποτριόρχαι καλοῦνται, ἄλλοι δὲ πέρκοι καὶ σπιζίαί, οἱ δ' ἔλαιοι καὶ οἱ φρυνολόγοι· οὗτοι εὐβιώτατοι καὶ χθαμαλοπτῆται.

Γένη δὲ τῶν ἱεράκων φασὶ τινες εἶναι οὐκ ἐλάττω τῶν δέκα, διαφέρουσι δ' ἀλλήλων· οἱ μὲν γὰρ αὐτῶν ἐπὶ τῆς γῆς καθημένην τύπτουσι τὴν περιστερὰν καὶ συναρπάζουσι, πετομένης δ' οὐ θιγγάνουσιν· οἱ δ' ἐπὶ δένδρου μὲν ἢ τινος ἄλλου καθημένην θηρεύουσιν, ἐπὶ τῆς γῆς δ' οὔσης ἢ μετεώρου οὐχ ἄπτονται· οἱ δ' οὔτ' ἐπὶ τῆς γῆς οὔτ' ἐπ' ἄλλου καθημένης θιγγάνουσιν, ἀλλὰ πετομένην πειρῶνται λαμβάνειν. Φασὶ δὲ καὶ τὰς περιστερὰς γινώσκειν ἕκαστον τούτων τῶν γενῶν, ὥστε προσπετομένων, ἐὰν μὲν ἢ τῶν μετεωροθήρων, μένειν ὅπου ἂν καθήμεναι τύχωσιν, ἐὰν δ' ἢ τῶν χαμαιτύπων ὁ προσπετόμενος, οὐχ ὑπομένειν ἀλλ' ἀναπέτεσθαι.

Ἐν δὲ Θράκῃ τῇ καλουμένη ποτὲ Κεδρειπόλει ἐν τῷ ἔλει θηρεύουσιν οἱ ἄνθρωποι τὰ ὀρνίθια κοινῇ μετὰ τῶν ἱεράκων· οἱ μὲν γὰρ ἔχοντες ξύλα σοβοῦσι τὸν κάλαμον καὶ (620b.) τὴν ὕλην, ἵνα πέτῳνται τὰ ὀρνίθια, οἱ δ' ἱέρακες ἄνωθεν ὑπερφαινόμενοι καταδιώκουσιν· ταῦτα δὲ φοβούμενα κάτω πέτονται πάλιν πρὸς τὴν γῆν· οἱ δ' ἄνθρωποι τύπτοντες τοῖς ξύλοις λαμβάνουσιν, καὶ τῆς θήρας μεταδιδόασιν αὐτοῖς· ρίπτουσι γὰρ τῶν ὀρνίθων, οἱ δ' ὑπολαμβάνουσιν. Καὶ περὶ τὴν Μαιῶτιν δὲ λίμνην τοὺς λύκους φασὶ συνήθεις εἶναι τοῖς ποιουμένοις τὴν θήραν τῶν ἰχθύων· ὅταν δὲ μὴ μεταδιδῶσι, διαφθείρειν αὐτῶν τὰ δίκτυα ξηραίνόμενα ἐν τῇ γῇ.

Κεφάλαιο 36

Τὰ μὲν οὖν περὶ τοὺς ὄρνιθας τοῦτον ἔχει τὸν τρόπον· ἔστι δὲ καὶ ἐν τοῖς θαλαττίοις ζώοις πολλὰ τεχνικὰ θεωρῆσαι πρὸς τοὺς ἐκάστων βίους. Τὰ τε γὰρ θρυλούμενα περὶ τὸν βάτραχον τὸν ἀλιέα καλούμενόν ἐστιν ἀληθῆ, καὶ τὰ περὶ τὴν νάρκην. Ὁ μὲν γὰρ βάτραχος χρῆται τοῖς πρὸ τῶν ὀφθαλμῶν ἀποκρεμαμένοις, ὧν τὸ μὲν μῆκός ἐστι τριχοειδές, ἐπ' ἄκρου δὲ στρογγύλον, ὥσπερ προσκείμενον ἐκατέρῳ δελέατος χάριν· ὅταν οὖν ἐν τοῖς ἀμμώδεσιν ἢ θολώδεσιν ἀναταράξας κρύψη ἑαυτόν, ἐπαίρει τὰ τριχώδη, κοπτόντων δὲ τῶν ἰχθυδίων συγκατάγει μέχριπερ ἂν πρὸς τὸ στόμα προσαγάγῃ.

Ἡ τε νάρκη ναρκᾶν ποιοῦσα ὧν ἂν κρατήσῃν μέλλῃ ἰχθύων, τῷ ῥόπτρῳ ὃν ἔχει ἐν τῷ σώματι λαμβάνουσα, τρέφεται τούτοις, κατακρύπτεται δ' εἰς τὴν ἄμμον καὶ πηλόν, λαμβάνει δὲ τὰ ἐπινέοντα, ὅσα ἂν ναρκήσῃ ἐπιφερόμενα τῶν ἰχθύων· καὶ τούτου αὐτόπται γεγένηνται τινες. Κατακρύπτει δὲ καὶ ἡ τρυγὼν αὐτήν, πλὴν οὐχ ὁμοίως.

Σημεῖον δ' ὅτι τοῦτον τὸν τρόπον ζῶσιν· ἀλίσκονται γὰρ ἔχοντες κεστρέας πολλάκις ὄντες αὐτοὶ βραδύτατοι, τὸν τάχιστον τῶν ἰχθύων. Ἐπειτα ὁ μὲν βάτραχος, ὅταν μηκέτ' ἔχῃ τὰ ἐπὶ ταῖς θριξίν, ἀλίσκεται λεπτότερος· ἡ δὲ νάρκη φανερά ἐστι καὶ τοὺς ἀνθρώπους ποιοῦσα ναρκᾶν.

Καθαμμίζουσι δ' ἑαυτὰ καὶ ὄνος καὶ βάτος καὶ ψῆττα καὶ ῥίνη, καὶ ὅταν ποιήσῃ ἑαυτὰ ἄδηλα, εἴτα ῥαβδεύεται τοῖς ἐν τῷ στόματι, ἃ καλοῦσιν οἱ ἀλιεῖς ῥαβδία· προσέρχονται δ' ὡς πρὸς φυκία ἅφ' ὧν τρέφονται.

Ὅπου δ' ἂν ἀνθίας ὀραθῇ, οὐκ ἔστι θηρίον· ὃ καὶ σημείω χρώμενοι κατακολυμβῶσιν οἱ σπογγεῖς, καὶ καλοῦσιν ἱεροὺς ἰχθύς τούτους· ἔοικε δὲ συμπτώματι, (621a.) καθάπερ ὅπου ἂν ᾖ κοχλίας, σὺς οὐκ ἔστιν οὐδὲ πέρδιξ· κατεσθίουσι γὰρ ἅμφω τοὺς κοχλίας.

Ὁ δ' ὄφις ὁ θαλάττιος τὸ μὲν χρῶμα παραπλήσιον ἔχει τῷ γόγγρω καὶ τὸ σῶμα, πλὴν ἐστὶν ἀμαυρότερος καὶ σφοδρότερος· ἐὰν δὲ ληφθῇ καὶ ἀφεθῇ, εἰς τὴν ἄμμον καταδύεται ταχὺ τῷ ῥύγχει διατρυσάσας· ἔχει δ' ὀξύτερον τὸ στόμα τῶν ὄφεων.

Ἦν δὲ καλοῦσι σκολόπενδραν, ὅταν καταπίῃ τὸ ἄγκιστρον,

ἐκτρέπεται τὰ ἐντὸς ἐκτός, ἕως ἂν ἐκβάλῃ τὸ ἄγκιστρον· εἴθ' οὕτως εἰστρέπεται πάλιν ἐντός. Βαδίζουσι δ' αἱ σκολόπενδραι πρὸς τὰ κνισώδη, ὥσπερ καὶ αἱ χερσαῖαι. Τῷ μὲν οὖν στόματι οὐ δάκνουσι, τῇ δ' ἄπει καθ' ὅλον τὸ σῶμα, ὥσπερ αἱ καλούμεναι κνίδαι.

Τῶν δ' ἰχθύων αἱ ὀνομαζόμεναι ἀλώπεκες ὅταν αἰσθωνται ὅτι τὸ ἄγκιστρον καταπεπώκασι, βοηθοῦσι πρὸς τοῦτο ὥσπερ καὶ ἡ σκολόπενδρα· ἀναδραμοῦσαι γὰρ ἐπὶ πολὺ πρὸς τὴν ὀρμιᾶν ἀποτρώγουσιν αὐτῆς· ἀλίσκονται γὰρ περὶ ἐνίους τόπους πολυαγκίστροις ἐν ῥοώδεσι καὶ βαθέσι τόποις.

Συστρέφονται δὲ καὶ αἱ ἀμῖαι, ὅταν τι θηρίον ἴδωσι, καὶ κύκλω αὐτῶν περιnéουσιν αἱ μέγισται, καὶ ἄπτηται τις, ἀμύνουσιν· ἔχουσι δ' ὀδόντας ἰσχυροῦς, καὶ ἤδη ὤπται καὶ ἄλλα καὶ λάμια ἐμπεσοῦσα καὶ καθελκωθεῖσα.

Τῶν δὲ ποταμίων ὁ γλάνις ὁ ἄρρην περὶ τὰ τέκνα ποιεῖται ἐπιμέλειαν πολλήν· ἡ μὲν γὰρ θήλεια τεκοῦσα ἀπαλλάττεται, ὁ δ' ἄρρην, οὗ ἂν πλεῖστον συστῇ τοῦ κυήματος, ὠφουλακεῖ παραμένων, οὐδεμίαν ὠφέλειαν ἄλλην παρεχόμενος πλὴν ἐρύκων τᾶλλα ἰχθύδια μὴ διαρπάσωσι τὸν γόνον· καὶ τοῦτο ποιεῖ ἡμέρας καὶ τετταράκοντα καὶ πεντήκοντα, ἕως ἂν αὐξηθεῖς ὁ γόνος δύνῃται διαφεύγειν ἀπὸ τῶν ἄλλων ἰχθύων. Γινώσκεται δ' ὑπὸ τῶν ἀλιέων οὗ ἂν τύχη ὠφουλακῶν· ἐρύκων γὰρ τὰ ἰχθύδια ἄττει καὶ ἥχον ποιεῖ καὶ μυγμόν. Οὕτω δὲ φιλοστόργως μένει πρὸς τοῖς ᾠοῖς, ὥστε οἱ ἀλιεῖς ἐκάστοτε, ἂν ἐν βαθείαις ῥίζαις τὰ ᾠὰ προσῇ, ἀνάγουσιν ὡς ἂν δύνωνται εἰς βραχύτατον· ὁ δ' ὅμως οὐκ ἀπολείπει τὸν γόνον, ἀλλ' ἐὰν μὲν <νέος> τύχη, ταχέως ὑπὸ τοῦ ἀγκίστρου ἐάλω διὰ τὸ ἀρπάζειν τὰ προσιόντα τῶν ἰχθυδίων, ἐὰν δ' ἦ συνήθης καὶ (621b.) ἀγκιστροφάγος, λείπει μὲν οὐδ' ὥς τὸν γόνον, τῷ δ' ὀδόντι τῷ σκληροτάτῳ συνδάκνων διαφθείρει τὰ ἄγκιστρα.

Ἄπαντα δὲ καὶ τὰ πλωτὰ καὶ τὰ μόνιμα τούτους νέμεται τοὺς τόπους ἐν οἷς ἂν φυῶσι, καὶ τοὺς ὁμοίους τούτοις· ἡ γὰρ οἰκεία τροφή ἐκάστων ἐν τούτοις ἐστίν. Πλανᾶται δὲ μάλιστα τὰ σαρκοφάγα· πάντα δὲ σχεδόν ἐστὶ σαρκοφάγα πλὴν ὀλίγων, οἷον κεστρέως καὶ σάλπης καὶ τρίγλης καὶ χαλκίδος. Τῇ δὲ καλουμένη φωλίδι ἡ μύξα, ἣν ἀφίησι, περιπλάττεται περὶ αὐτὴν καὶ γίνεται καθάπερ θαλάμη.

Τῶν δ' ὀστρακοδέρμων καὶ ἀπόδων ὁ κτεῖς μάλιστα καὶ πλεῖστον κινεῖται δι' αὐτοῦ πετόμενος· ἡ γὰρ πορφύρα ἐπὶ μικρότατον

προέρχεται, καὶ τὰ ὅμοια ταύτη.

Ἐκ δὲ τοῦ εὐρίπου τοῦ ἐν Πύρρᾳ οἱ ἰχθύες χειμῶνος μὲν ἐκπλέουσιν ἔξω, πλὴν κωβιοῦ, διὰ τὸ ψυχρός (ψυχρότερος γάρ ἐστιν ὁ εὐρίπος), ἅμα δὲ τῷ ἔαρι πάλιν εἰσπλέουσιν. Οὐ γίνεται δ' ἐν τῷ εὐρίπῳ οὔτε σκάρος οὔτε θρίττα οὔτ' ἄλλο τῶν ἀκανθηροτέρων οὐδέν, οὐδὲ γαλεοὶ οὐδ' ἀκανθίαι οὐδὲ κάραβοι οὐδὲ πολυπόδες οὐδὲ βολίταιναι οὐδ' ἄλλ' ἄττα· τῶν δ' ἐν τῷ εὐρίπῳ φυομένων οὐκ ἔστι πελάγιος ὁ λευκὸς κωβίος.

Ἀκμάζουσι δὲ τῶν ἰχθύων οἱ μὲν ὠοφόροι τοῦ ἔαρος, μέχρι οὗ ἂν ἐκτέκωσιν, οἱ δὲ ζωοτόκοι τοῦ μετοπώρου, καὶ πρὸς τούτοις κεστρεῖς καὶ τρίγλαι καὶ τᾶλλα τὰ τοιαῦτα πάντα. Περὶ δὲ τὴν Λέσβον καὶ τὰ πελάγια πάντα καὶ τὰ εὐριπώδη τίκτει ἐν τῷ εὐρίπῳ· ὀχεύονται μὲν γὰρ τοῦ μετοπώρου, τίκτουσι δὲ τοῦ ἔαρος. Ἔστι δὲ καὶ τὰ σελάχη κατὰ μὲν τὸ μετόπωρον ἀναμιξ τὰ ἄρρενα τοῖς θήλεσι κατὰ τὴν ὀχείαν, τοῦ δ' ἔαρος εἰσπλέουσιν διακεκριμένα μέχρι οὗ ἂν ἐκτέκωσιν· κατὰ δὲ τὴν ὀχείαν ἀλίσκεται πολλὰ συνεζυγμένα.

Τῶν δὲ μαλακίων πανουργότατον μὲν ἡ σηπία, καὶ μόνη χρῆται τῷ θολῷ κρύψεως χάριν, καὶ οὐ μόνον φοβουμένη· ὁ δὲ πολύπους καὶ ἡ τευθὶς διὰ φόβον ἀφήσι τὸν θολόν. Ἀφήσι δὲ ταῦτα πάντα οὐδέποτε ἀθρόον τὸν θολόν· καὶ ὅταν ἀφῇ, αὐξάνεται πάλιν.

Ἡ δὲ σηπία, ὥσπερ εἴρηται, τῷ τε θολῷ πολλάκις χρῆται κρύψεως χάριν, καὶ προδείξασα εἰς τὸ πρόσθεν (622a.) ἀναστρέφεται εἰς τὸν θολόν· ἔτι δὲ θηρεύει τοῖς μακροῖς τοῖς ἀποτεινουσιν οὐ μόνον τὰ μικρὰ τῶν ἰχθυδίων, ἀλλὰ καὶ κεστρέας πολλάκις.

Ὁ δὲ πολύπους ἀνόητον μὲν ἐστὶ (καὶ γὰρ πρὸς τὴν χεῖρα βαδίζει τοῦ ἀνθρώπου καθιεμένην), οἰκονομικὸς δ' ἐστίν· πάντα γὰρ συλλέγει μὲν εἰς τὴν θαλάμην, οὗ τυγχάνει κατοικῶν, ὅταν δὲ καταναλώσῃ τὰ χρησιμώτατα, ἐκβάλλει τὰ ὄστρακα καὶ τὰ κελύφια τῶν καρκίνων καὶ κογχυλίων καὶ τὰς ἀκάνθας τῶν ἰχθυδίων· καὶ θηρεύει τοὺς ἰχθύς τὸ χρῶμα μεταβάλλων καὶ ποιῶν ὅμοιον οἷς ἂν πλησιάζῃ λίθοις. Τὸ δ' αὐτὸ ποιεῖ καὶ φοβηθεὶς. Λέγεται δ' ὑπό τινων ὡς καὶ ἡ σηπία τοῦτο ποιεῖ· παρόμοιον γὰρ φασὶ τὸ χρῶμα ποιεῖν τὸ αὐτῆς τῷ τόπῳ περὶ ὃν διατρίβει. Τῶν δ' ἰχθύων τοῦτο ποιεῖ μόνον ἡ ρίνη· μεταβάλλει γὰρ τὴν χροάν ὥσπερ ὁ πολύπους.

Τὸ μὲν οὖν πλεῖστον γένος τῶν πολυπόδων οὐ διετίζει· καὶ γὰρ φύσει συντηκτικόν ἐστίν· σημεῖον δ' ἐστίν, πιλούμενος γὰρ ἀφήσιν ἀεὶ τι καὶ τέλος ἀφανίζεται. Αἱ δὲ θήλειαι μετὰ τὸν τόκον τοῦτο

πάσχουσι μᾶλλον, καὶ γίνονται μωραί, καὶ οὔτε κυματιζόμεναι αἰσθάνονται, λαβεῖν τε τῇ χειρὶ κατακολυμβήσαντα ῥάδιον· βλεννώδεις τε γίνονται, καὶ οὐδὲ θηρεύουσιν ἔτι προσκαθήμεναι. Οἱ δ' ἄρρενες σκυτώδεις τε γίνονται καὶ γλίσχροι.

Σημεῖον δὲ δοκεῖ εἶναι τοῦ μὴ διετιζεῖν, ὅτι μετὰ τὴν γένεσιν τῶν πολυποδίων ἓν γε τῷ θέρει καὶ πρὸς τὸ φθινόπωρον μέγαν πολὺπον οὐκέτι ῥάδιόν ἐστιν ἰδεῖν, μικρὸν δὲ πρὸ τούτου τοῦ καιροῦ μέγιστοί εἰσιν οἱ πολὺποδες. Ὅταν δὲ τὰ φᾶ ἐκτέκωσιν, οὕτω καταγηράσκειν καὶ ἀσθενεῖς γίνεσθαι ἀμφοτέρους φασὶν ὥστε ὑπὸ τῶν ἰχθυδίων κατεσθίεσθαι καὶ ῥαδίως ἀποσπᾶσθαι ἀπὸ τῶν φωλεῶν· πρότερον δὲ τοιοῦτον οὐδὲν πάσχειν· Ἔτι δὲ τοὺς μικροὺς καὶ νέους τῶν πολυπόδων μετὰ τὴν γένεσιν οὐδὲν φασὶ τοιοῦτον πάσχειν, ἀλλ' ἰσχυροτέρους εἶναι τῶν μειζόνων. Οὐ διετίζουσι δ' οὐδ' αἱ σηπίαί. Εἰς δὲ τὸ ξηρὸν ἐξέρχεται μόνον τῶν μαλακίων ὁ πολὺπους· πορεύεται δ' ἐπὶ τοῦ τραχέος, τὸ δὲ λεῖον φεύγει. Ἔστι δὲ τὰ μὲν ἄλλα ἰσχυρὸν τὸ ζῶον, τὸν δὲ τράχηλον ἀσθενές, ὅταν πιεσθῇ.

(622b.) Περὶ μὲν οὖν τῶν μαλακίων τοῦτον ἔχει τὸν τρόπον. Τὰς δὲ κόγχας φασὶ τὰς λεπτὰς καὶ τραχείας ποιεῖσθαι περὶ αὐτὰς οἶον θώρακα σκληρόν, καὶ τοῦτον μείζονα, ὅταν γίνωνται μείζους, καὶ ἐκ τούτου ἐξιέναι ὥσπερ ἐκ φωλεοῦ τινὸς ἢ οἰκίας.

Ἔστι δὲ καὶ ὁ ναυτίλος πολὺπους τῇ τε φύσει καὶ οἷς ποιεῖ περιπτός· ἐπιπλεῖ γὰρ ἐπὶ τῆς θαλάττης, τὴν ἀναφορὰν ποιησάμενος κάτωθεν ἐκ τοῦ βυθοῦ, καὶ ἀναφέρεται μὲν κατεστραμμένῳ τῷ ὀστράκῳ, ἵνα ῥᾶόν γ' ἀνέλθῃ καὶ κενῷ ναυτίλλῃται, ἐπιπολάσας δὲ μεταστρέφει. Ἔχει δὲ <τὸ> μεταξὺ τῶν πλεκτανῶν ἐπὶ τι συνυφές· ὁμοιον τοῖς στεγανόποσι τὸ μεταξὺ δακτύλων, πλὴν ἐκείνοις μὲν παχύ, τούτοις δὲ λεπτὸν τοῦτο καὶ ἀραχνιωδές ἐστιν. Χρῆται δ' αὐτῷ, ὅταν πνεῦμά τι ἦ, ἰστίῳ· ἀντὶ πηδαλίων δὲ <δύο> τῶν πλεκτανῶν παρακαθήσιν· ἐὰν δὲ φοβηθῇ, καταδύνει τῆς θαλάττης μεστώσας τὸ ὄστρακον. Περὶ δὲ γενέσεως καὶ συναυξήσεως τοῦ ὀστράκου ἀκριβῶς μὲν οὐπω ὥπται, δοκεῖ δ' οὐκ ἐξ ὀχείας γίνεσθαι, ἀλλὰ φύεσθαι ὥσπερ τᾶλλα κογχύλια. Οὐ δῆλον δὲ πῶ οὐδ' εἰ ἀποδύόμενος δύναται ζῆν.

Κεφάλαιο 37

Τῶν δ' ἐντόμων ἐργατικώτατον ζῶων ἐστί, σχεδὸν δὲ καὶ πρὸς τᾶλλα συγκρίνεσθαι πάντα, τό τε τῶν μυρμήκων γένος καὶ τὸ τῶν μελιττῶν, ἔτι δ' ἀνθρῆναι καὶ σφήκες καὶ πάνθ' ὥς εἰπεῖν τὰ συγγενῇ τούτοις. Εἰσὶ δὲ καὶ τῶν ἀραχνίων οἱ γλαφυρώτατοι καὶ λαγαρώτατοι καὶ τεχνικώτατοι περὶ τὸν βίον. Ἡ μὲν οὖν τῶν μυρμήκων ἐργασία πᾶσιν ἐστὶν ἐπιπολῆς ἰδεῖν, καὶ ὥς ἀεὶ μίαν ἀτραπὸν πάντες βαδίζουσι, καὶ τὴν ἀπόθεσιν τῆς τροφῆς καὶ ταμείαν· ἐργάζονται γὰρ καὶ τὰς νύκτας τὰς πανσελήνους.

Κεφάλαιο 38

Τῶν δ' ἀραχνίων καὶ τῶν φαλαγγίων ἔστι πολλὰ γένη, τῶν μὲν δηκτικῶν φαλαγγίων δύο, τὸ μὲν ἕτερον ὁμοιον τοῖς καλουμένοις λύκοις μικρὸν καὶ ποικίλον καὶ ὀξὺ καὶ πηδητικόν· καλεῖται δὲ ψύλλα· τὸ δ' ἕτερον μεῖζον, τὸ μὲν χρῶμα μέλαν, τὰ δὲ σκέλη τὰ πρόσθια μακρὰ ἔχον, καὶ τῇ κινήσει νωθρὸν καὶ βαδίζον ἡρέμα καὶ οὐ κρατερόν καὶ οὐ πηδῶν. Τὰ δ' ἄλλα πάντα, ὅσα παρατίθενται οἱ φαρμακοπῶλαι, τὰ μὲν (623a.) οὐδεμίαν τὰ δ' ἀσθενῇ ποιεῖ τὴν δῆξιν. Ἄλλο δ' ἐστὶ τῶν καλουμένων λύκων γένος.

Τοῦτο μὲν οὖν τὸ μικρὸν οὐχ ὑφαίνει ἀράχνιον, τὸ δὲ μεῖζον τραχὺ καὶ φαῦλον πρὸς τῇ γῇ καὶ ταῖς αἵμασιαι· ἐπὶ τοῖς στομίοις δ' αἰεὶ ποιεῖ τὸ ἀράχνιον, καὶ ἔνδον ἔχον τὰς ἀρχὰς τηρεῖ, ἕως ἂν ἐμπεσόν τι κινήσῃ· ἔπειτα προσέρχεται. Τὸ δὲ ποικίλον ὑπὸ τοῖς δένδρεσι ποιεῖται μικρὸν καὶ φαῦλον ἀράχνιον.

Ἄλλο δ' ἐστὶ τρίτον τούτων σοφώτατον καὶ γλαφυρώτατον· ὑφαίνει γὰρ πρῶτον μὲν διατεῖναν πρὸς τὰ πέρατα πανταχόθεν, εἴτα στημονίζεται ἀπὸ τοῦ μέσου (λαμβάνει δὲ τὸ μέσον ἱκανῶς), ἐπὶ δὲ τούτοις ὥσπερ κρόκας ἐμβάλλει, εἴτα συνυφαίνει. Τὴν μὲν οὖν κοίτην καὶ τὴν ἀπόθεσιν τῆς θήρας ἄλλοθι ποιεῖται, τὴν δὲ θήραν ἐπὶ τοῦ μέσου τηροῦσα· κᾶπειθ' ὅταν ἐμπέσῃ τι, κινήθέντος τοῦ μέσου πρῶτον μὲν περιδεῖ καὶ περιελίττει τοῖς ἀραχνίοις, ἕως ἂν ἀχρεῖον ποιήσῃ, μετὰ δὲ ταῦτ' ἀπὴνεγκεν ἀραμένη, καὶ ἐὰν μὲν τύχῃ πεινῶσα, ἐξεχύλισεν (αὕτη γὰρ ἡ ἀπόλαυσις), εἰ δὲ μή, πάλιν ὀρμᾷ πρὸς τὴν θήραν, ἀκεσαμένη πρῶτον τὸ διερρωγός· ἐὰν δὲ τι μεταξὺ ἐμπέσῃ, πρῶτον ἐπὶ τὸ μέσον βαδίζει, κάκεῖθεν ἐπανέρχεται πρὸς τὸ ἐμπεσόν ὥσπερ ἀπ' ἀρχῆς. Ἐὰν δὲ τι λυμήνηται τοῦ ἀραχνίου, πάλιν ἄρχεται τῆς ὑφῆς καταφερομένου τοῦ ἡλίου ἢ ἀνατέλλοντος διὰ τὸ μάλιστα ἐν ταύταις ταῖς ὥραις ἐμπίπτειν τὰ θηρία. Ἐργάζεται δὲ καὶ θηρεύει ἡ θήλεια· ὁ δ' ἄρρην συναπολαύει.

Τῶν δ' ἀραχνίων τῶν γλαφυρῶν καὶ ὑφαινόντων ἀράχνιον πυκνὸν δύο ἐστὶ γένη, τὸ μὲν μεῖζον τὸ δ' ἔλαττον. Τὸ μὲν οὖν μακροσκελέστερον κάτωθεν κρεμáμενον τηρεῖ, ὅπως ἂν μὴ φοβούμενα τὰ θηρία εὐλαβῆται ἀλλ' ἐμπίπτῃ ἄνω (διὰ γὰρ τὸ μέγεθος οὐκ εὐκρυφές ἐστι), τὸ δὲ συμμετρότερον ἄνωθεν ἐπηλυγισάμενον τοῦ ἀραχνίου ὀπὴν μικράν.

Δύνανται δ' ἀφιέναι οἱ ἀράχαι τὸ ἀράχνιον εὐθὺς γενόμενοι, οὐκ ἔσωθεν ὡς ὃν περίττωμα, καθάπερ φησὶ Δημόκριτος, ἀλλ' ἀπὸ τοῦ σώματος οἷον φλοιόν, ἢ τὰ βάλλοντα ταῖς θριξίν, οἷον αἱ ὕστριχες. Ἐπιτίθεται δὲ καὶ περιελίττεται καὶ τοῖς μείζοσι ζώοις, ἐπεὶ καὶ ταῖς (623b.) σαύραις ταῖς μικραῖς ἐπιβάλλον περὶ τὸ σῶμα περιθέον ἀφίησιν, ἕως ἂν συλλάβῃ τὸ στόμα· τότε δ' ἤδη δάκνει προσελθόν.

Κεφάλαιο 39

Καὶ περὶ μὲν τούτων τῶν ζώων τοῦτον ἔχει τὸν τρόπον.

Ἔστι δὲ τι γένος τῶν ἐντόμων, ὃ ἐνὶ μὲν ὀνόματι ἀνώνυμόν ἐστιν, ἔχει δὲ πάντα τὴν μορφήν συγγενικὴν· ἔστι δὲ ταῦτα ὅσα κηριοποιά, οἷον μέλιτται καὶ τὰ παραπλήσια τὴν μορφήν. Τούτων δ' ἐστὶ γένη ἐννέα, ὧν τὰ μὲν ἐξ ἀγελαῖα, μέλιττα, βασιλεῖς τῶν μελιττῶν, κηφὴν ὁ ἐν ταῖς μελίτταις, σφήξ ὁ ἐπέτειος, ἔτι δ' ἀνθρήνη καὶ τενθρηδών· μοναδικὰ δὲ τρία, σειρήν ὁ μικρός, φαιός, ἄλλος σειρήν ὁ μεῖζων, ὁ μέλας καὶ ποικίλος, τρίτος δ' ὁ καλούμενος βομβύλιος, μέγιστος τούτων.

Οἱ μὲν οὖν μύρμηκες θηρεύουσι μὲν οὐδέν, τὰ δὲ πεποιημένα συλλέγουσιν· οἱ δ' ἀράχλαι ποιοῦσι μὲν οὐδέν οὐδ' ἀποτίθενται, θηρεύουσι δὲ μόνον τὴν τροφήν· τῶν δ' ἐννέα γενῶν τῶν εἰρημένων περὶ μὲν τῶν λοιπῶν ὕστερον λεχθήσεται, αἱ δὲ μέλιτται θηρεύουσι μὲν οὐδέν, αὐταὶ δὲ ποιοῦνται καὶ ἀποτίθενται· ἔστι γὰρ αὐταῖς τὸ μέλι τροφή. Δῆλον δὲ ποιοῦσιν, ὅταν τὰ κηρία ἐπιχειρῶσιν οἱ μελιττουργοὶ ἐξαιρεῖν· θυμιώμεναι γὰρ καὶ σφόδρα πονοῦσαι ὑπὸ τοῦ καπνοῦ τότε μάλιστα τὸ μέλι ἐσθίουσιν, ἐν δὲ τῷ ἄλλῳ χρόνῳ οὐ σφόδρα ὀρῶνται, ὥς φειδόμεναι καὶ ἀποτιθέμεναι τροφῆς χάριν.

Ἔστι δ' αὐταῖς καὶ ἄλλη τροφή, ἣν καλοῦσιν τινες κήρινθον· ἔστι δὲ τοῦτο ὑποδεέστερον καὶ γλυκύτητα συκώδη ἔχον, κομίζουσι δὲ τοῦτο τοῖς σκέλεσι καθάπερ καὶ τὸν κηρόν.

Ἔστι δὲ περὶ τὴν ἐργασίαν αὐτῶν καὶ τὸν βίον πολλὴ ποικιλία. Ἐπειδὴν γὰρ παραδοθῇ αὐταῖς καθαρὸν τὸ σμήνος, οἰκοδομοῦσι τὰ κηρία, φέρουσαι τῶν τ' ἄλλων ἀνθέων καὶ ἀπὸ τῶν δένδρων τὰ δάκρυα, ἰτέας τε καὶ πτελέας καὶ ἄλλων τῶν κολλωδεστάτων. Τούτῳ δὲ καὶ τὸ ἔδαφος διαχρίουσι τῶν ἄλλων θηρίων ἕνεκεν· καλοῦσι δ' οἱ μελιττουργοὶ τοῦτο κόλλησιν καὶ τὰς εἰσόδους δὲ παροικοδομοῦσιν, ἐὰν εὐρεῖται ὧσιν.

Πλάττουσι δὲ κηρία πρῶτον ἐν οἷς αὐταὶ γίνονται, εἴτ' ἐν οἷς οἱ καλούμενοι βασιλεῖς καὶ τὰ κηφήνια. Τὰ μὲν οὖν αὐτῶν αἰεὶ (624a.) πλάττουσι, τὰ δὲ τῶν βασιλέων ὅταν ᾗ πολυγονία, τὰ δὲ κηφήνια ἐὰν μέλιτος ἀφθονία ἐπισημαίνῃ. Πλάττουσι δὲ τὰ μὲν τῶν βασιλέων πρὸς τοῖς αὐτῶν (μικρὰ δ' ἐστὶ ταῦτα), τὰ δὲ κηφήνια πρὸς αὐτά· ἐλάττω δ' ἐστὶ ταῦτα τῷ μεγέθει τῶν μελιττίων. Ἀρχονται δὲ τῶν

ιστῶν ἄνωθεν ἀπὸ τῆς ὀροφῆς τοῦ σμήνου, καὶ κάτω συνυφεῖς ποιοῦσιν ἕως τοῦ ἐδάφους ἰστοὺς πολλοὺς. Αἱ δὲ θυρίδες καὶ αἱ τοῦ μέλιτος καὶ τῶν σχαδόνων ἀμφίστομοι· περὶ γὰρ μίαν βᾶσιν δύο θυρίδες εἰσίν, ὥσπερ ἡ τῶν ἀμφικυπέλλων, ἡ μὲν ἐντὸς ἡ δ' ἐκτός. Αἱ δὲ περὶ τὰς ἀρχὰς τῶν κηρίων πρὸς τὰ σμήνη συνύφειαι, ὅσον ἐπὶ δύο ἢ τρεῖς στίχους κύκλῳ, βραχεῖαι καὶ κεναὶ μέλιτος· πληρέστερα δὲ τῶν κηρίων τὰ μάλιστα τῷ κηρῷ καταπεπλασμένα.

Περὶ δὲ τὸ στόμα τοῦ σμήνου τὸ μὲν πρῶτον τῆς εἰσόδου περιαλήλπται μίτυ· τοῦτο δ' ἐστὶ μέλαν ἱκανῶς, ὥσπερ ἀποκάθαρμ' αὐταῖς τοῦ κηροῦ, καὶ τὴν ὁσμὴν δριμύ, φάρμακον δ' ἐστὶ τυμμάτων καὶ τῶν τοιούτων ἐμπυημάτων· ἡ δὲ συνεχῆς ἀλοιφή τούτῳ πισσόκηρος, ἀμβλύτερον καὶ ἥττον φαρμακῶδες τῆς μίτυος.

Λέγουσι δὲ τινες τοὺς κηφῆνας κηρία μὲν πλάττειν καθ' αὐτοὺς καὶ ἐν τῷ αὐτῷ σμήνει καὶ ἐν τῷ ἐνὶ κηρίῳ μεριζομένους πρὸς τὰς μελίττας, μελιτουργεῖν μέντοι οὐδέν, ἀλλὰ τρέφεσθαι τῷ τῶν μελιττῶν καὶ αὐτοὺς καὶ τοὺς νεοττοῦς. Διατρίβουσι δ' οἱ κηφῆνες τὰ μὲν πολλὰ ἔνδον, ἐὰν δ' ἐκπετασθῶσι, προσφέρονται ῥύβδην ἄνω πρὸς τὸν οὐρανόν, ἐπιδινοῦντες αὐτοὺς καὶ ὥσπερ ἀπογυμνάζοντες· ὅταν δὲ τοῦτο δράσωσι, πάλιν εἰσελθόντες εὐωχοῦνται.

Οἱ δὲ βασιλεῖς οὐ πέτονται ἔξω, ἐὰν μὴ μετὰ ὅλου τοῦ ἐσμοῦ, οὔτ' ἐπὶ βοσκὴν οὔτ' ἄλλως. Φασὶ δὲ καὶ ἐὰν ἀποπλανηθῇ ὁ ἀφεςμός, ἀνιχνεύουσας μεταθεῖν ἕως ἂν εὕρωσι τὸν ἡγεμόνα τῇ ὁσμῇ. Λέγεται δὲ καὶ φέρεσθαι αὐτὸν ὑπὸ τοῦ ἐσμοῦ, ὅταν πέτεσθαι μὴ δύνηται· καὶ ἐὰν ἀπόληται, ἀπόλλυσθαι τὸν ἀφεςμόν· ἐὰν δ' ἄρα χρόνον τινὰ διαμείνωσι καὶ κηρία ποιήσωσι, μέλι οὐκ ἐγγίνεσθαι καὶ αὐτὰς ταχὺ ἀπόλλυσθαι.

Τὸν δὲ κηρὸν ἀναλαμβάνουσιν αἱ μέλισσαι ἀριχώμεναι πρὸς τὰ βρύα ὀξέως τοῖς (624b.) ἔμπροσθεν ποσί· τούτους δ' ἐκμάττουσιν εἰς τοὺς μέσους, τοὺς δὲ μέσους εἰς τὰ βλαισὰ τῶν ὀπισθίων· καὶ οὕτω γεμισθεῖσαι ἀποπέτονται, καὶ δῆλαί εἰσι βαρυνόμεναι. Καθ' ἐκάστην δὲ πτῆσιν οὐ βαδίζει ἡ μέλιττα ἐφ' ἕτερα τῷ εἶδει ἄνθη, οἷον ἀπὸ ἴου ἐπὶ ἴον, καὶ οὐ θιγγάνει ἄλλου γε, ἕως ἂν εἰς τὸ σμήνος εἰσπετασθῇ. Ὅταν δ' εἰς τὸ σμήνος ἀφίκωνται, ἀποσεύονται, καὶ παρακολουθοῦσιν ἐκάστη τρεῖς ἢ τέτταρες. Τὸ δὲ λαμβανόμενον οὐ ῥάδιόν ἐστιν ἰδεῖν· οὐδὲ τὴν ἐργασίαν ὄντινα τρόπον ποιοῦνται, οὐκ ὥπται· τοῦ δὲ κηροῦ ἡ ἀνάληψις τεθεώρηται ἐπὶ τῶν ἐλαιῶν, διὰ πυκνότητα τῶν φύλλων ἐν ταῦτῳ διαμενουσῶν πλείω χρόνον.

Μετὰ δὲ τοῦτο νεοττεύουσιν. Οὐδὲν δὲ κωλύει ἐν τῷ αὐτῷ κηρίῳ εἶναι νεοττοὺς καὶ μέλι καὶ κηφήνας.

Ἐὰν μὲν οὖν ὁ ἡγεμὼν ζῇ, χωρὶς φασὶ τοὺς κηφήνας γίνεσθαι, εἰ δὲ μή, ἐν τοῖς τῶν μελιττῶν κυττάροις γεννᾶσθαι ὑπὸ τῶν μελιττῶν, καὶ γίνεσθαι τούτους θυμικωτέρους· διὸ καὶ καλεῖσθαι κεντρωτούς, οὐκ ἔχοντας κέντρον, ἀλλ' ὅτι βούλονται μὲν οὐ δύνανται δὲ βάλλειν. Εἰσὶ δὲ μείζους οἱ τῶν κηφήνων κύτταροι. Ἀναπλάττουσι δ' ὅτε μὲν καὶ αὐτὰ καθ' αὐτὰ τὰ κηρία τὰ τῶν κηφήνων, ὥς ἐπὶ τὸ πολὺ δ' ἐν τοῖς τῶν μελιττῶν· διὸ καὶ ἀποτέμνουσιν.

Εἰσὶ δὲ γένη τῶν μελιττῶν πλείω, καθάπερ εἴρηται πρότερον, δύο μὲν ἡγεμόνων, ὁ μὲν βελτίων πυρρός, ὁ δ' ἕτερος μέλας καὶ ποικιλώτερος, τὸ δὲ μέγεθος διπλάσιος τῆς χρηστῆς μελίττης. Ἡ δ' ἀρίστη μικρά, στρογγύλη καὶ ποικίλη, ἄλλη μακρά, ὁμοία τῇ ἀνθρήνῃ. Ἑτέρος ὁ φῶρ καλούμενος, μέλας, πλατυγᾶστωρ. Ἐτι δ' ὁ κηφήν· οὗτος μέγιστος πάντων, ἄκεντρος δὲ καὶ νωθρός.

Διαφέρουσι δ' αἱ γινόμεναι τῶν μελιττῶν αἱ τ' ἀπὸ τῶν τὰ ἡμερα νεομένων καὶ ἀπὸ τῶν τὰ ὀρεινά· εἰσὶ γὰρ αἱ ἀπὸ τῶν ὑλονόμων δασύτεραι καὶ ἐλάττους καὶ ἐργατικώτεραι καὶ χαλεπώτεραι.

Αἱ μὲν οὖν χρησταὶ μέλιται ἐργάζονται τὰ τε κηρία ὁμαλὰ καὶ τὸ ἐπιπολῆς κάλυμμα πᾶν λείον, ἔτι δ' ἐν εἶδος τοῦ κηρίου, οἷον ἅπαν μέλι ἢ νεοττοὺς ἢ κηφήνας· ἐὰν δὲ συμβῇ ὥστ' ἐν τῷ αὐτῷ κηρίῳ ἅπαντα ποιεῖν αὐτά, ἔσται ἐφεξῆς ἐν εἶδος εἰργασμένον διὰ (625a.) τέλους. Αἱ δὲ μακραὶ τὰ τε κηρία ποιοῦσιν ἀνώμαλα καὶ τὸ κάλυμμα ἀνωδηκός, ὅμοιον τῷ τῆς ἀνθρήνης, ἔτι δὲ τὸν γόνον καὶ τᾶλλα οὐ τεταγμένα ἀλλ' ὥς ἂν τύχη· γίνονται δ' ἐξ αὐτῶν οἱ τε πονηροὶ ἡγεμόνες καὶ κηφήνες πολλοὶ καὶ οἱ φῶρες καλούμενοι, μέλι δ' ἢ πάνυ βραχὺ ἢ οὐδέν.

Ἐπικαθύνονται δ' ἐπὶ τοῖς κηρίοις αἱ μέλιται καὶ συμπέττουσιν· ἐὰν δὲ τοῦτο μὴ ποιῶσι, θείρεσθαί φασὶ τὰ κηρία καὶ ἀραχνιοῦσθαι. Καὶ ἐὰν μὲν τὸ λοιπὸν δύνωνται κατέχειν ἐπικαθήμεναι, τοῦθ' ὥσπερ ἔκβρωμα γίνεται, εἰ δὲ μή, ἀπόλλυται ὅλα. Γίνεται δὲ σκολήκια ἐν τοῖς φθειρομένοις, ἃ πτερούμενα ἐκπέταται.

Καὶ τὰ πίπτοντα δὲ τῶν κηρίων ὀρθοῦσιν αἱ μέλιται, καὶ ὑφιστᾶσιν ἐρείσματα, ὅπως ἂν δύνωνται ὑπιέναι· ὅταν γὰρ μὴ ἔχωσιν ὁδὸν ἢ προσπορεύονται, οὐ προσκαθίζουσιν, εἴτ' ἀραχνιοῦται.

Τοῦ δὲ φωρός καὶ κηφήνος γενομένων οὐδέν ἐστιν ἔργον, τὰ δὲ

τῶν ἄλλων βλάπτουσιν. Ἀλίσκομενοι δὲ θνήσκουσιν ὑπὸ τῶν χρηστῶν μελιττῶν. Κτείνουσι δ' αὗται σφόδρα καὶ τῶν ἡγεμόνων τοὺς πολλούς, καὶ μᾶλλον τοὺς πονηρούς, ἵνα μὴ πολλοὶ ὄντες διασπῶσι τὸν ἐσμόν. Κτείνουσι δὲ μάλιστα, ὅταν μὴ πολύγονον ἢ τὸ σμήνος μηδὲ ἀφέςεις μέλλωσι γίνεσθαι· ἐν γὰρ τούτοις τοῖς καιροῖς καὶ τὰ κηρία διαφθείρουσι τὰ τῶν βασιλέων, ἐὰν ἢ παρεσκευασμένα, ὥς ἐξαγωγέων ὄντων.

Διαφθείρουσι δὲ καὶ τὰ τῶν κηφήνων, ἐὰν ὑποφαίνῃ ἀπορία μέλιτος καὶ μὴ εὐμελιτῇ τὰ σμήνη· καὶ τοῖς ἐξαιρουσὶ περὶ τοῦ μέλιτος τότε μάχονται μάλιστα, καὶ τοὺς ὑπάρχοντας τῶν κηφήνων ἐκβάλλουσι, καὶ πολλάκις ὀρῶνται ἐν τῷ τεύχει ἀποκαθήμεναι.

Πολεμοῦσι δὲ σφόδρα αἱ μικραὶ τῷ γένει τῷ μακρῷ, καὶ πειρῶνται ἐκβάλλειν ἐκ τῶν σμηνῶν· καὶ ἐπικρατήσωσι, τοῦτο δοκεῖ ὑπερβολῇ γίνεσθαι ἀγαθὸν σμήνος. Αἱ δ' ἔτεροι ἂν γένωνται αὐταὶ ἐφ' εαυτῶν, ἀργοῦσί τε καὶ τελέως οὐδὲν ποιοῦσιν ἀγαθόν, ἀπόλλυνται δὲ καὶ αὐταὶ πρὸ τοῦ φθινοπώρου. Ὅσας δὲ κτείνουσιν αἱ χρησταὶ μέλιτται, πειρῶνται μὲν ἔξω τοῦ σμήνους τοῦτο πράττειν· ἐὰν δ' ἔσω τις ἀποθάνῃ, ἐξάγουσιν ὁμοίως.

Οἱ δὲ φῶρες καλούμενοι κακουργοῦσι μὲν καὶ (625b.) τὰ παρ' αὐτοῖς κηρία, εἰσέρχονται δέ, ἐὰν λάθωσι, καὶ εἰς τὰ ἀλλότρια· ἐὰν δὲ ληφθῶσι, θνήσκουσιν. Ἔργον δ' ἐστὶ λαθεῖν· ἐπὶ τε γὰρ εἰσόδῳ ἐκάστη φύλακές εἰσιν, αὐτός τε ἐὰν εἰσελθὼν λάθῃ, διὰ τὸ ὑπερπεπλησθαι οὐ δύναται πέτεσθαι, ἀλλὰ πρὸ τοῦ σμήνους κυλίνεται, ὥστ' ἔργον ἐστὶν αὐτῷ ἐκφυγεῖν.

Οἱ δὲ βασιλεῖς αὐτοὶ μὲν οὐχ ὀρῶνται ἔξω ἄλλως ἢ μετ' ἀφέσεως· ἐν δὲ ταῖς ἀφέσεσιν αἱ λοιπαὶ περὶ τοῦτον συνεσπειραμένοι φαίνονται. Ὅταν δ' ἄφεςις μέλλῃ γίνεσθαι, φωνὴ μονῶτις καὶ ἴδιος γίνεται ἐπὶ τινας ἡμέρας, καὶ πρὸ δύο ἢ τριῶν ἡμερῶν ὀλίγα πέτονται περὶ τὸ σμήνος· εἰ δὲ γίνεται καὶ ὁ βασιλεὺς ἐν ταύταις, οὐκ ὥπται πῶ δια τὸ μὴ ῥάδιον εἶναι. Ὅταν δ' ἀθροισθῶσιν, ἀποπέτονται καὶ χωρίζονται καθ' ἕκαστον τῶν βασιλέων αἱ ἄλλαι· ἐὰν δὲ τύχωσιν ὀλίγα πολλαῖς ἐγγὺς καθεζόμεναι, μετανίστανται αἱ ὀλίγα πρὸς τὰς πολλάς, καὶ τὸν βασιλέα ὃν ἀπέλειπον, ἐὰν συνακολουθήσῃ, διαφθείρουσιν. Τὰ μὲν οὖν περὶ τὴν ἀπόλειψιν καὶ ἄφεςιν τοῦτον συμβαίνει γίνεσθαι τὸν τρόπον.

Εἰσὶ δ' αὐταῖς τεταγμέναι ἐφ' ἕκαστον τῶν ἔργων, οἷον αἱ μὲν ἀνθοφοροῦσιν, αἱ δ' ὕδροφοροῦσιν, αἱ δὲ λεαίνουσι καὶ κατορθοῦσι

τὰ κηρία. Φέρει δ' ὕδωρ, ὅταν τεκνοτροφή. Πρὸς σάρκα δ' οὐδενὸς καθίζει, οὐδ' ὀψοφαγεῖ. Χρόνος δ' αὐταῖς οὐκ ἔστιν εἰθισμένος ἀφ' ὅτου ἄρχονται ἐργάζεσθαι· ἀλλ' ἐὰν τὰπιτήδεια ἔχωσι καὶ εὖ διάγωσι, μᾶλλον ἐν ὥρᾳ τοῦ ἔτους ἐγχειροῦσι τῇ ἐργασίᾳ, καὶ ὅταν εὐδία ᾖ, συνεχῶς ἐργάζονται. Καὶ εὐθὺς δὲ νέα οὔσα, ὅταν ἐκδύη, ἐργάζεται τριταία, ἐὰν ἔχη τροφήν. Καὶ ὅταν ἐσμός προκάθηται, ἀποτρέπονται ἔναι ἐπὶ τροφήν, εἴτ' ἐπανέρχονται πάλιν.

Ἐν δὲ τοῖς εὐθηνούσι τῶν σμηνῶν ἐκλείπει ὁ γόνος τῶν μελιττῶν περὶ τετταράκονθ' ἡμέρας μόνον τὰς μετὰ χειμερινὰς τροπὰς. Ἐπειδὴν δ' ἠϋξημένοι ὦσιν οἱ νεοτοί, τροφήν αὐτοῖς παραθεῖσαι καταχρίουσιν· ὅταν δ' ᾖ δυνατός, αὐτὸς διελὼν τὸ κάλυμμα ἐξέρχεται. Τὰ δὲ γινόμενα θηρία ἐν τοῖς σμήνεσι καὶ λυμαινόμενα τὰ κηρία αἱ μὲν χρησται μέλιται ἐκκαθαίρουσιν, αἱ δ' ἕτεραι διὰ κακίαν περιορῶσιν (626a.) ἀπολλύμενα τὰ ἔργα αὐτῶν.

Ὅταν δὲ τὰ κηρία ἐξαιρῶσιν οἱ μελιττουργοί, ἀπολείπουσιν αὐταῖς τροφήν διὰ χειμῶνος, ἥ ἐὰν μὲν διαρκῆς ᾖ, σώζεται τὸ σμῆνος, εἰ δὲ μή, ἐὰν μὲν χειμῶν ᾖ, αὐτοῦ θνήσκουσιν, εὐδιῶν δ' οὐσῶν ἐκλείπουν τὸ σμῆνος. Τροφή δὲ χρῶνται μέλιτι καὶ θέρους καὶ χειμῶνος· τίθενται δὲ καὶ ἄλλην τροφήν ἐμφερῇ τῷ κηρῷ τὴν σκληρότητα, ἣν ὀνομάζουσιν τινες σανδαράκην.

Ἀδικοῦσι δ' αὐτὰς μάλιστα οἱ τε σφήκες καὶ οἱ αἰγίθαλοι καλούμενοι τὰ ὄρνεα, ἔτι δὲ χελιδῶν καὶ μέροψ. Θηρεύουσι δὲ καὶ οἱ τελματιαῖοι βάτραχοι πρὸς τὸ ὕδωρ αὐτὰς ἀπαντῶσας· διόπερ καὶ τούτους οἱ μελισσεῖς ἐκ τῶν τελμάτων, ἀφ' ὧν ὑδρεύονται αἱ μέλιται, θηρεύουσι, καὶ τὰς σφηκίας καὶ τὰς χελιδόνας τὰς πλησίον τῶν σμηνῶν ἐξαιροῦσι, καὶ τὰς τῶν μερόπων νεοττίας. Οὐδὲν δὲ φεύγουσι τῶν ζώων ἀλλ' ἢ ἑαυτάς. Ἡ δὲ μάχη αὐτῶν ἐστὶ καὶ πρὸς αὐτάς καὶ πρὸς τοὺς σφήκας· καὶ ἔξω μὲν οὗτ' ἀλλήλας ἀδικοῦσιν οὔτε τῶν ἄλλων οὐδέν, τὰ δὲ πρὸς τῷ σμήνει ἀποκτείνουσιν, ὧν ἂν κρατήσωσιν.

Αἱ δὲ τύπτουσαι ἀπόλλυνται διὰ τὸ μὴ δύνασθαι τὸ κέντρον ἄνευ τοῦ ἐντέρου ἐξαιρεῖσθαι· πολλάκις γὰρ σώζεται, ἐὰν ὁ πληγεὶς ἐπιμελῇται καὶ τὸ κέντρον ἐκθλίψῃ· τὸ δὲ κέντρον ἀποβαλοῦσα ἢ μέλιτα ἀποθνήσκει. Κτείνουσι δὲ βάλλουσαι τὰ μεγάλα τῶν ζώων, οἷον ἵππος ἥδη ἀπέθανεν ὑπὸ μελιττῶν. Ἦκιστα δὲ χαλεπαίνουν οἱ ἡγεμόνες καὶ τύπτουσιν.

Τὰς δ' ἀποθνησκούσας τῶν μελιττῶν ἐκκομίζουν ἔξω. Καὶ

τάλλα δὲ καθαριώτατόν ἐστι τὸ ζῶον· διὸ καὶ τὸ περίττωμα πολλάκις ἀφιᾶσιν ἀποπετόμεναι, διὰ τὸ δυσῶδες εἶναι. Δυσχεραίνουσι δ', ὥσπερ εἴρηται, ταῖς δυσώδεσιν ὀσμαῖς καὶ ταῖς τῶν μύρων· διὸ καὶ τοὺς χρωμένους αὐτοῖς τύπτουσιν.

Ἀπόλλυνται δὲ διὰ τ' ἄλλα συμπτώματα, καὶ ὅταν οἱ ἡγεμόνες πολλοὶ γενόμενοι ἕκαστος αὐτῶν μέρος ἀπαγάγῃ. Απόλλυσι δὲ καὶ ὁ φρῦνος τὰς μελίττας· ἐπὶ τὰς εἰσόδους γὰρ ἐλθὼν φυσᾷ τε καὶ ἐπιτηρῶν ἐκπετομένης κατεσθίει· ὑπὸ μὲν οὖν τῶν μελιττῶν οὐδὲν δύναται κακὸν πάσχειν, ὁ δ' ἐπιμελόμενος (626b.) τῶν σμηνῶν κτείνει αὐτόν.

Τὸ δὲ γένος τὸ τῶν μελιττῶν ὃ εἴρηται ὅτι πονηρόν τε καὶ τραχέα τὰ κηρία ἐργάζεται, εἰσὶ τινες τῶν μελιττουργῶν οἱ φασὶ τὰς νέας μάλιστα τοῦτο ποιεῖν δι' ἀνεπιστημοσύνην· νέαι δ' εἰσὶν αἱ ἐπέτειοι. Οὐχ ὁμοίως δ' οὐδὲ κεντοῦσιν αἱ νέαι· διὸ οἱ ἔσμοι φέρονται· εἰσὶ γὰρ νέων μελιττῶν. Ὅταν δ' ὑπολίπη τὸ μέλι, τοὺς κηφήνας ἐκβάλλουσι, καὶ παραβάλλουσι σῦκα καὶ τὰ γλυκέα αὐταῖς.

Τῶν δὲ μελιττῶν αἱ μὲν πρεσβύτεραι εἴσω ἐργάζονται, καὶ δασεῖαι εἰσι διὰ τὸ εἴσω μένειν, αἱ δὲ νέαι ἔξωθεν φέρουσι καὶ εἰσὶ λειότεραι. Καὶ τοὺς κηφήνας δ' ἀποκτείνουσιν, ὅταν μηκέτι χωρῇ αὐταῖς ἐργαζομέναις· εἰσὶ δ' ἐν μυχῷ τοῦ σμήνους.

Ἦδη δὲ νοσήσαντός τινος σμήνους ἦλθόν τινες ἐπ' ἀλλότριον, καὶ μαχόμεναι νικῶσαι ἐξέφερον τὸ μέλι· ἐπεὶ δ' ἀπέκτεινεν ὁ μελιττουργός, οὕτως ἐπεξήεσαν αἱ ἕτεραι καὶ ἡμύνοντο, καὶ τὸν ἄνθρωπον οὐκ ἔτυπτον. Τὰ δὲ νοσήματα ἐμπίπτει μάλιστα εἰς τὰ εὐθηνοῦντα τῶν σμηνῶν, ὃ τε καλούμενος κλῆρος· τοῦτο γίνεται ἐν τῷ ἐδάφει σκολήκια μικρά, ἀφ' ὧν αὐξανομένων ὥσπερ ἀράχνια κατίσχει ὅλον τὸ σμήνος, καὶ σήπεται τὰ κηρία· ἄλλο δὲ νόσημα οἷον ἀργία τις γίνεται τῶν μελιττῶν καὶ δυσωδία τῶν σμηνῶν. Νομῇ δὲ ταῖς μελίτταις τὸ θύμον· ἄμεινον δὲ τὸ λευκὸν τοῦ ἐρυθροῦ. Τόπος δ' ἐν τῷ πνίγει μὴ ἄλεινός, ἐν δὲ τῷ χειμῶνι ἄλεινός. Νοσοῦσι δὲ μάλιστα, ὅταν ἐρυσιβώδη ἐργάζονται ὕλην. Ὅταν δ' ἄνεμος ἦ μέγας, φέρουσι λίθον ἐφ' ἑαυταῖς ἔρμα πρὸς τὸ πνεῦμα. Πίνουσι δ', ἂν μὲν ἦ ποταμὸς πλησίον, οὐδαμόθεν ἄλλοθεν ἢ ἐντεῦθεν, θέμεναι τὸ ἄχθος πρῶτον· ἐὰν δὲ μὴ ἦ, ἐτέρωθεν πίνουσαι ἀνεμοῦσι τὸ μέλι, καὶ εὐθὺς ἐπ' ἔργον πορεύονται.

Τῇ δὲ τοῦ μέλιτος ἐργασία διττοὶ καιροὶ εἰσίν, ἕα καὶ μετόπωρον· ἥδιον δὲ καὶ λευκότερον καὶ τὸ σύνολον κάλλιον ἐστι τὸ

ἐαρινὸν τοῦ μετοπωρινοῦ. Μέλι δὲ κάλλιον γίνεται ἐκ νέου κηροῦ καὶ ἐκ μόσχου· τὸ δὲ πυρρὸν αἴσχιον διὰ τὸ κηρίον· διαφθείρεται γὰρ ὥσπερ οἶνος ὑπ' ἀγγείου· διὸ δεῖ ξηραίνειν (627a.) αὐτό. Ὅταν δὲ τὸ θύμον ἀνθῇ καὶ πληρὲς γίνηται τὸ κηρίον, οὐ πήγνυται τοῦτο. Ἔστι δὲ καλὸν τὸ χρυσοειδές· τὸ δὲ λευκὸν οὐκ ἐκ θύμου εἰλικρινοῦς, ἀγαθὸν δὲ πρὸς ὀφθαλμοὺς καὶ ἔλκη. Τοῦ δὲ μέλιτος τὸ μὲν ἀσθενὲς αἰεὶ ἄνω ἐπιπολάζει, ὃ δεῖ ἀφαιρεῖν, τὸ δὲ καθαρὸν κάτω.

Ὅταν δ' ἡ ὕλη ἀνθῇ, κηρὸν ἐργάζονται· διὸ ἐκ τοῦ σίμβλου τότε ἔξαιρετέον τὸν κηρὸν· ἐργάζονται γὰρ εὐθύς. Ἀφ' ὧν δὲ φέρουσιν, ἔστι τάδε, ἀτρακτυλῖς, μελίλωτον, ἀσφόδελος, μυρρίνη, φλεῶς, ἄγνος, σπάρτον. Ὅταν δὲ τὸ θύμον ἐργάζονται, ὕδωρ μιν γνύουσι πρὶν τὸ κηρίον καταλείπειν. Ἀφοδεύουσι δ' αἱ μέλιται πᾶσαι ἢ ἀποπετόμεναι, ὥσπερ εἴρηται, ἢ εἰς ἓν κηρίον.

Εἰσὶ δ' αἱ μικραὶ ἐργάτιδες μᾶλλον τῶν μεγάλων, ὥσπερ εἴρηται, ἔχουσι δὲ τὰ πτερὰ περιτετριμμένα καὶ χροῖαν μέλαιναν, καὶ ἐπικεκαυμένα· αἱ δὲ φαναὶ καὶ λαμπραὶ, ὥσπερ γυναικες ἀργαί.

Δοκοῦσι δὲ χαίρειν αἱ μέλιται καὶ τῷ κρότῳ, διὸ καὶ κροτοῦντές φασιν ἀθροίζειν αὐτὰς εἰς τὸ σμῆνος ὀστράκοις τε καὶ ψήφοις· ἔστι μέντοι ἄδηλον ὅλως εἶ τι ἀκούουσιν, καὶ πότερον δι' ἡδονὴν τοῦτο ποιοῦσιν ἢ διὰ φόβον.

Ἐξελαύνουσι δὲ καὶ τὰς ἀργὰς αἱ μέλιται καὶ τὰς μὴ φειδομένας. Διήρηνται δὲ τὰ ἔργα, ὥσπερ εἴρηται πρότερον, καὶ αἱ μὲν κηρὸν ἐργάζονται, αἱ δὲ τὸ μέλι, αἱ δ' ἐριθάκην· καὶ αἱ μὲν πλάττουσι κηρία, αἱ δὲ ὕδωρ φέρουσιν εἰς τοὺς κυττάρους καὶ μιν γνύουσι τῷ μέλιτι, αἱ δ' ἐπ' ἔργον ἔρχονται. Ὅρθριαι δὲ σιωπῶσιν, ἕως ἂν μία ἐγείρῃ βομβήσασα δις ἢ τρίς· τότε δ' ἐπ' ἔργον ἀθροαί πέτονται, καὶ ἐλθοῦσαι πάλιν θορυβοῦσι τὸ πρῶτον, κατὰ μικρὸν δ' ἤττον, ἕως ἂν μία περιπετομένη βομβήσῃ, ὥσπερ σημαίνουσα καθεύδειν· εἴτ' ἔξαπίνης σιωπῶσιν.

Διαγινώσκεται δ' ἰσχύειν τὸ σμῆνος τῷ τὸν ψόφον εἶναι πολὺν καὶ κινεῖσθαι ἐξιούσας καὶ εἰσιούσας· τότε γὰρ σχαδόνas ἐργάζονται.

Πεινώσι δὲ μάλισθ' ἡνίκ' ἂν ἄρχωνται ἐκ τοῦ χειμῶνος. Ἀργότεραι δὲ γίνονται, ἐὰν πλεῖόν τις καταλίπῃ μέλι βλίττων· ἀλλὰ δεῖ πρὸς τὸ πλῆθος καταλείπειν τὰ κηρία· ἀθυμότερον δ' (627b.) ἐργάζονται κἂν ἐλάττω καταλειφθῇ. Ἀργότεραι δὲ γίνονται κἂν μέγα τὸ κυψέλιον ᾗ· ἀθυμότερον γὰρ πονοῦσιν. Βλίττεται δὲ σμῆνος χοᾶ ἢ τρία ἡμίχοα, τὰ δ' εὐθηνοῦντα δύο χοᾶς ἢ πέντε ἡμίχοα· τρεῖς δὲ

χοᾶς ὀλίγα.

Πολέμιον δὲ πρόβατον ταῖς μελίτταις, καὶ οἱ σφῆκες, ὥσπερ εἴρηται καὶ πρότερον· θηρεύουσι δὲ τούτους οἱ μελιττουργοί, λοπάδα τιθέντες καὶ κρέας εἰς αὐτὴν ἐμβάλλοντες· ὅταν δὲ πολλοὶ ἐμπίπτωσιν, ἐπὶ τὸ πῦρ πωμάσαντες ἐπιτιθέασιν. Κηφῆνες δ' ὀλίγοι ἐνόντες ὠφελοῦσι τὸ σμήνος· ἐργατικωτέρας γὰρ ποιοῦσι τὰς μελίττας.

Προγινώσκουσι δὲ καὶ χειμῶνα καὶ ὕδωρ αἱ μέλιτται· σημεῖον δέ, οὐκ ἀποπέτονται γὰρ ἀλλ' ἐν τῇ εὐδίᾳ αὐτοῦ ἀνειλοῦνται, ὃ γινώσκουσιν οἱ μελιττουργοὶ ὅτι χειμῶνα προσδέχονται. Ὅταν δὲ κρέμονται ἐξ ἀλλήλων ἐν τῷ σμήνει, σημεῖον γίνεται τοῦτο ὅτι ἀπολείπει τὸ σμήνος. Ἀλλὰ καταφυσῶσι τὸ σμήνος οἶνω γλυκεῖ οἱ μελιττουργοί, ὅταν τοῦτ' αἰσθωνται.

Φυτεύειν δὲ συμφέρει περὶ τὰ σμήνη ἀχράδας, κυάμους, πόαν Μηδικήν, Συρίαν, ὄχρους, μυρρίνην, μήκωνα, ἔρπυλλον, ἀμυγδαλὴν.

Γινώσκουσι δὲ τινες τῶν μελιττουργῶν τὰς ἐαυτῶν ἐν τῷ νομῷ ἄλεια καταπάσαντες.

Ἐὰν δ' ἔαρ ὄψιον γένηται ἢ αὐχμός, καὶ ὅταν ἐρυσίβη, ἐλάττον' ἐργάζονται αἱ μέλιτται τὸν γόνον.

Κεφάλαιο 40

Τὰ μὲν οὖν περὶ τὰς μελίττας τοῦτον ἔχει τὸν τρόπον, τῶν δὲ σφηκῶν ἐστὶ δύο γένη. Τούτων δ' οἱ μὲν ἄγριοι σπάνιοι, γίνονται δ' ἐν τοῖς ὄρεσι, καὶ τίκτουσιν οὐ κατὰ γῆς ἀλλ' ἐν ταῖς δρυσί, τὴν μὲν μορφήν μείζους καὶ προμηκέστεροι καὶ μελαγχρῶτες τῶν ἐτέρων μᾶλλον, ποικίλοι δὲ καὶ ἔγκεντροι πάντες καὶ ἀλκιμώτεροι, καὶ τὸ πληγμα ὀδυνηρότερον αὐτῶν ἢ ἐκείνων· καὶ γὰρ τὸ κέντρον ἀνάλογον μείζον τὸ τούτων. Οὗτοι μὲν οὖν διετίζουσι, καὶ ὀρῶνται καὶ τοῦ χειμῶνος ἐκ δρυῶν κοπτομένων ἐκπετόμενοι, ζῶσι δὲ φωλοῦντες τὸν χειμῶνα· ἡ δὲ διατριβὴ ἐν τοῖς ξύλοις. Εἰσὶ δ' αὐτῶν οἱ μὲν μῆτραι οἱ δ' ἐργάται, ὥσπερ καὶ τῶν ἡμερωτέρων.

Τίς δ' ἡ φύσις τοῦ ἐργάτου καὶ τῆς μήτρας, ἐπὶ τῶν (628a.) ἡμερωτέρων ἔσται δῆλον. Ἔστι γὰρ καὶ τῶν ἡμέρων σφηκῶν δύο γένη, οἱ μὲν ἡγεμόνες, οὓς καλοῦσι μήτρας, οἱ δ' ἐργάται. Εἰσὶ δὲ μείζους οἱ ἡγεμόνες πολὺ καὶ πραότεροι. Καὶ οἱ μὲν ἐργάται οὐ διετίζουσιν, ἀλλὰ πάντες ἀποθνήσκουσιν, ὅταν χειμῶν ἐπιτέσῃ (φανερὸν δ' ἐστὶ τοῦτο· τοῦ γὰρ χειμῶνος ἀρχομένου μὲν μωροὶ γίνονται οἱ ἐργάται αὐτῶν, περὶ δὲ τροπᾶς οὐ φαίνονται ὅλως), οἱ δ' ἡγεμόνες οἱ καλούμενοι μῆτραι ὀρῶνται δι' ὅλου τοῦ χειμῶνος καὶ κατὰ γῆς φωλεύουσιν· ἀροῦντες γὰρ καὶ σκάπτοντες ἐν τῷ χειμῶνι μήτρας μὲν πολλοὶ ἐωράκασιν, ἐργάτας δ' οὐδεῖς.

Ἡ δὲ γένεσις τῶν σφηκῶν ἐστὶ τοιαύδε· οἱ ἡγεμόνες ὅταν λάβωσι τόπον εὐσκεπῇ ἐπιόντος τοῦ θέρους, πλάττονται τὰ κηρία καὶ συνίστανται οὓς καλοῦσι σφηκωνεῖς, ἰστοὺς μικροὺς, οἷον τετραθύρους ἢ ἐγγὺς τούτων, ἐν οἷς σφήκες γίνονται καὶ οὐ μῆτραι. Τούτων δ' αὐξηθέντων πάλιν μετὰ τούτους ἄλλους μείζους συνίστανται, καὶ πάλιν τούτων αὐξηθέντων ἐτέρους, ὥστε τοῦ μετοπώρου τελευτῶντος πλεῖστα καὶ μέγιστα γίνεσθαι σφηκία, ἐν οἷς ὁ ἡγεμὼν, ἡ καλουμένη μήτρα, οὐκέτι σφήκας γεννᾷ ἀλλὰ μήτρας. Γίνονται δ' οὗτοι ἄνω ἐπὶ τοῦ σφηκίου ἐπιπολῆς μείζους σκώληκες ἐν θυρίσι συνεχέσι τέτταρσιν ἢ μικρῷ πλείοσιν, παραπλησίως δ' ὥσπερ ἐν τοῖς κηρίοις τὰ τῶν ἡγεμόνων.

Ἐπειδὴν δὲ γένωνται οἱ ἐργάται σφήκες ἐν τοῖς κηρίοις, οὐκέτι οἱ ἡγεμόνες ἐργάζονται, ἀλλ' οἱ ἐργάται αὐτοῖς τὴν τροφήν εἰσφέρουσιν· φανερὸν δ' ἐστὶ τοῦτο τῷ μηκέτι τοὺς ἡγεμόνας

ἐκπέτεσθαι τῶν ἐργατῶν, ἀλλ' ἔνδον μένοντας ἡσυχάζειν. Πότερον δ' οἱ περυσιοὶ ἡγεμόνες, ὅταν νέους ποιήσωσιν ἡγεμόνας, ἀποθνήσκουσιν ὑπὸ τῶν νέων σφηκῶν, καὶ τοῦθ' ὁμοίως συμβαίνει, ἢ καὶ πλείω χρόνον δύνανται ζῆν, οὐδὲν ὥπται πω· οὐδὲ γῆρας οὔτε μήτρας οὔτε τῶν ἀγρίων σφηκῶν οὐδεὶς πω ὥπται ἑωρακώς, οὐδ' ἄλλο τοιοῦτον οὐδὲν πάθος.

Ἔστι δ' ἡ μήτρα πλατὺ καὶ βαρὺ, καὶ παχύτερον καὶ μεῖζον τοῦ σφηκός, καὶ πρὸς τὴν πτῆσιν διὰ τὸ βάρος οὐκ ἄγαν ἰσχυρόν, οὐδὲ δύνανται ἐπὶ [τῷ] πολὺ πέτεσθαι· διὸ καὶ κάθηνται ἐν τοῖς σφηκίοις ἀεὶ, συμπλάττουσαι καὶ διοικοῦσαι τὰ ἔνδον. Ἐν δὲ τοῖς πλείστοις σφηκίοις ἔνεισιν αἱ μήτραι καλούμεναι. Ἀμφισβητεῖται δὲ (628b.) πότερον ἔγκεντροί εἰσιν ἢ ἄκεντροι· εἰκάσι δ', ὥσπερ οἱ τῶν μελιττῶν ἡγεμόνες, ἔχειν μὲν, οὐκ ἐξίεναι δ' οὐδὲ βάλλειν.

Τῶν δὲ σφηκῶν οἱ μὲν ἄκεντροί εἰσιν ὥσπερ κηφῆνες, οἱ δ' ἔχουσι κέντρον. Εἰσὶ δ' οἱ ἄκεντροι ἐλάττους καὶ ἀμεννότεροι, καὶ οὐκ ἀμύνονται, οἱ δ' ἔχοντες τὰ κέντρα μεῖζους καὶ ἄλκιμοι· καὶ καλοῦσι τούτους ἔνιοι μὲν ἄρρενας, τοὺς δ' ἀκέντρους θηλείας. Πρὸς δὲ τὸν χειμῶνα ἀποβάλλειν δοκοῦσι πολλοὶ τῶν ἐχόντων τὰ κέντρα· αὐτόπτη δ' οὐπω ἐντετυχήκαμεν.

Γίνονται δ' οἱ σφῆκες μᾶλλον ἐν τοῖς ἀνύχοις καὶ ἐν ταῖς χώραις ταῖς τραχείαις, γίνονται δ' ὑπὸ γῆν, καὶ τὰ κηρία πλάττουσιν ἐκ φορυτοῦ καὶ γῆς, ἀπὸ μιᾶς ἀρχῆς ἕκαστον ὥσπερ ἀπὸ ρίζης. Τροφῇ δὲ χρῶνται μὲν καὶ ἀπ' ἀνθῶν τινῶν καὶ καρπῶν, τὴν δὲ πλείστην ἀπὸ ζωοφαγίας.

Ὡμμένοι δ' εἰσὶν ὀχευόμενοι ἤδη καὶ τῶν ἄλλων τινές· εἰ δ' ἄκεντροι ἄμφω ἢ κέντρα ἔχοντες, ἢ ὁ μὲν ὁ δ' οὐ, οὐπω ὥπται. Καὶ τῶν ἀγρίων ὀχευόμενοι ὠμμένοι, καὶ ὁ ἕτερος ἔχων κέντρον· περὶ θατέρου δ' οὐκ ὥφθη.

Ὁ δὲ γόνος οὐ δοκεῖ ἐκ τοῦ τόκου γίνεσθαι, ἀλλ' εὐθύς μεῖζων εἶναι ἢ ὡς σφηκὸς τόκος. Ἐὰν δὲ λάβῃ τις τῶν ποδῶν σφήκα καὶ τοῖς πτεροῖς ἐξ βομβεῖν, προσπέτονται οἱ ἄκεντροι, οἱ δὲ τὰ κέντρα ἔχοντες οὐ προσπέτονται· ὃ τινὲς τεκμηρίῳ χρῶνται ὡς τῶν μὲν ἄρρένων ὄντων τῶν δὲ θηλειῶν. Ἀλίσκονται δ' ἐν τοῖς σπηλαίοις τοῦ χειμῶνος καὶ ἔχοντες ἔνιοι κέντρα καὶ οὐκ ἔχοντες.

Ἐργάζονται δ' οἱ μὲν μικρὰ καὶ ὀλίγα σφηκία, <οἱ δὲ πολλὰ καὶ μεγάλα>. Αἱ δὲ μήτραι καλούμεναι ἀλίσκονται θεραπείης τῆς ὥρας, αἱ πολλαὶ περὶ τὰς πτελέας· συλλέγουσι γὰρ τὰ γλίσχρα καὶ

κομμιώδη. Γεγένηται δέ που μητρῶν πλῆθος γενομένων τῷ
ἔμπροσθεν ἔτει πολλῶν σφηκῶν καὶ ἐπομβρίας. Θηρεύονται δὲ περὶ
τοὺς κρημνοὺς καὶ τὰ ρήγματα τῆς γῆς τὰ εἰς ὀρθόν, καὶ πάντες
φαίνονται ἔχοντες κέντρα.

Κεφάλαιο 41

Τὰ μὲν οὖν περὶ τοὺς σφηκας τοῦτον ἔχει τὸν τρόπον.

Αἱ δ' ἀνθρῆναι ζῶσι μὲν οὐκ ἀνθολογούμεναι ὥσπερ αἱ μέλιτται, ἀλλὰ τὰ πολλὰ σαρκοφαγοῦσαι (διὸ καὶ περὶ τὴν κόπρον διατρίβουσιν· θηρεύουσι γὰρ τὰς μεγάλας μυίας, καὶ ὅταν καταλάβωσιν, ἀφελοῦσαι τὴν κεφαλὴν ἀποπέτονται (629a.) φέρουσαι τὸ σῶμα τὸ λοιπόν), ἄπτονται δὲ καὶ τῆς γλυκείας ὁπώρας. Τροφῇ μὲν οὖν χρῶνται τῇ εἰρημένῃ, ἔχουσι δ' ἡγεμόνας ὥσπερ αἱ μέλιτται καὶ οἱ σφηκες· καὶ οἱ ἡγεμόνες οὗτοι μείζονές εἰσι τῷ μεγέθει κατὰ λόγον πρὸς τὰς ἀνθρήνας ἢ ὁ τῶν σφηκῶν πρὸς τοὺς σφηκας καὶ ὁ τῶν μελιττῶν πρὸς τὰς μελίττας. Διατρίβει δ' ἔσω καὶ οὗτος, ὥσπερ ὁ τῶν σφηκῶν ἡγεμών. Ποιοῦσι δὲ τὸ σμήνος ὑπὸ γῆν αἱ ἀνθρῆναι, ἐκφέρουσαι τὴν γῆν ὥσπερ οἱ μύρμηκες· ἀφεσμός γάρ, ὥσπερ τῶν μελιττῶν, οὐ γίνεται οὔτε τούτων οὔτε τῶν σφηκῶν, ἀλλ' αἰεὶ ἐπιγινόμεναι νεώτεραι αὐτοῦ μένουσι καὶ τὸ σμήνος μείζον ποιοῦσιν ἐκφέρουσαι τὸν χοῦν. Γίνεται δὲ μεγάλη τὰ σμήνη· ἤδη γὰρ εὐθηνουῦντος σμήνους κόφινοι τρεῖς καὶ τέτταρες ἐξήρηνται κηρίων. Οὐδὲ τροφήν, ὥσπερ αἱ μέλιτται, ἀποτίθενται, ἀλλὰ φωλοῦσι τὸν χειμῶνα, αἱ δὲ πλείσται ἀποθνήσκουσιν· εἰ δὲ καὶ πᾶσαι, οὐπω δῆλον.

Οἱ δ' ἡγεμόνες πλείους ἐνὸς οὐ γίνονται ἐν τοῖς σμήνισιν, ὥσπερ ἐν τοῖς τῶν μελιττῶν, οἱ διασπῶσι τὰ σμήνη τῶν μελιττῶν. Ὅταν δὲ πλανηθῶσί τινες τῶν ἀνθρηνῶν ἀπὸ τοῦ σμήνους, συστραφεῖσαι πρὸς τινα ὕλην ποιοῦσι κηρία, οἷάπερ καὶ ὁράται ἐπιπολῆς ὄντα πολλάκις, καὶ ἐν τούτῳ ἐργάζονται ἡγεμόνα ἓνα· οὗτος δ' ἐπὰν ἐξέλθῃ καὶ αὐξήσῃ, ἀπάγει λαβὼν καὶ κατοικίζει μεθ' αὐτοῦ εἰς σμήνος.

Περὶ δ' ὁχείας τῶν ἀνθρηνῶν οὐδὲν ὥπταί πω, οὐδὲ πόθεν γίνεται ὁ γόνος. Ἐν μὲν οὖν ταῖς μελίτταις ἄκεντροί εἰσι καὶ οἱ κηφήνες καὶ οἱ βασιλεῖς, καὶ τῶν σφηκῶν ἔνιοι ἄκεντροί εἰσι, καθάπερ εἴρηται πρότερον· αἱ δ' ἀνθρῆναι πᾶσαι φαίνονται κέντρον ἔχουσαι. Ἐπισκεπτέον δὲ μᾶλλον καὶ περὶ τοῦ ἡγεμόνος, εἰ κέντρον ἔχει ἢ μή.

Κεφάλαιο 42

Οἱ δὲ βομβύλιοι τίκτουσιν ὑπὸ πέτρας ἐπ' αὐτῆς τῆς γῆς, θυρίσι δυσὶν ἢ μικρῷ πλείοσιν· εὐρίσκεται δὲ καὶ μέλιτος ἀρχὴ φαύλου τινὸς ἐν τούτοις.

Ἡ δὲ τενθρηδὼν προσεμφερὴς μὲν ἐστὶ τῇ ἀνθρώπῳ, ποικίλον δέ, καὶ τὸ πλάτος ὅμοιον τῇ μελίττῃ· λίχνον δ' ὃν καὶ πρὸς τὰ μαγειρεῖα καὶ τοὺς ἰχθύας καὶ τὴν τοιαύτην ἀπόλαυσιν κατὰ μόνας προσπέταται· ἐκτίκει δὲ κατὰ γῆς ὥσπερ οἱ σφηκες, (629b.) πολύχουν δ' ἐστὶ, καὶ τὸ τενθρήνιον αὐτῶν πολὺ μείζον ἢ τῶν σφηκῶν καὶ προμηκέστερον. Τὰ μὲν οὖν περὶ τὴν τῶν μελιττῶν καὶ τῶν σφηκῶν καὶ τῶν ἄλλων τῶν τοιούτων ἐργασίαν καὶ τὸν βίον τοῦτον ἔχει τὸν τρόπον.

Κεφάλαιο 43

Περὶ δὲ τὰ ἤθη τῶν ζώων, ὥσπερ εἴρηται καὶ πρότερον, ἔστι θεωρῆσαι διαφορὰς πρὸς ἀνδρίαν μὲν μάλιστα καὶ δειλίαν, ἔπειτα καὶ πρὸς πραότητα καὶ ἀγριότητα καὶ αὐτῶν τῶν ἀγρίων. Καὶ γὰρ ὁ λέων ἐν τῇ βρώσει μὲν χαλεπώτατός ἐστι, μὴ πεινῶν δὲ καὶ βεβρωκῶς πραότατος.

Ἔστι δὲ τὸ ἦθος οὐχ ὑπόπτῃς οὐδενὸς οὐδ' ὑφορώμενος οὐδέν, πρὸς τε τὰ σύντροφα καὶ συνήθη σφόδρα φιλοπαίγμων καὶ στερκτικός. Ἐν δὲ ταῖς θήραις ὀρώμενος μὲν οὐδέποτε φεύγει οὐδὲ πτήσσει, ἀλλ' ἐὰν καὶ διὰ πλῆθος ἀναγκασθῇ τῶν θηρευόντων ὑπαγαγεῖν βάδην ὑποχωρεῖ καὶ κατὰ σκέλος, κατὰ βραχὺ ἐπιστρεφόμενος· ἐὰν μέντοι ἐπιλάβηται δασέος, φεύγει ταχέως, ἕως ἂν καταστῇ εἰς φανερόν· τότε δὲ πάλιν ὑπάγει βάδην. Ἐν δὲ τοῖς ψιλοῖς ἐὰν ποτ' ἀναγκασθῇ εἰς φανερόν διὰ τὸ πλῆθος φεύγειν, τρέχει κατατείνας καὶ οὐ πηδᾷ. Τὸ δὲ δρόμημα συνεχῶς ὥσπερ κυνός ἐστι κατατεταμένον· διώκων μέντοι ἐπιρρίπτει ἑαυτόν, ὅταν ἦ πλησίον.

Ἀληθῆ δὲ καὶ τὰ λεγόμενα, τό τε φοβεῖσθαι μάλιστα τὸ πῦρ, ὥσπερ καὶ Ὅμηρος ἐποίησεν “καιόμεναί τε δεταί, τάς τε τρεῖ ἐσσύμενός περ,” καὶ τὸ τὸν βάλλοντα τηρήσαντα ἴεσθαι ἐπὶ τοῦτον· ἐὰν δέ τις βάλλῃ μὲν μὴ, ἐνοχλῇ δ' αὐτόν, ἐὰν ἐπαΐξας συλλάβῃ, ἀδικεῖ μὲν οὐδὲν οὐδὲ βλάπτει τοῖς ὄνουσι, σείσας δὲ καὶ φοβήσας ἀφήσιν πάλιν.

Πρὸς δὲ τὰς πόλεις ἔρχονται μάλιστα καὶ τοὺς ἀνθρώπους ἀδικοῦσιν, ὅταν γένωνται πρεσβῦται, διὰ τε τὸ γῆρας ἀδύνατοι θηρεύειν ὄντες καὶ διὰ τὸ πεπονηκέναι τοὺς ὀδόντας.

Ἔτη δὲ ζῶσι πολλά, καὶ ὁ ληφθεὶς λέων χωλὸς πολλοὺς τῶν ὀδόντων εἶχε κατεαγότας, ὃ τεκμηρίω ἐχρῶντό τινες ὅτι πόλλ' ἔτη ζῶσιν· τοῦτο γὰρ οὐκ ἂν συμπεσεῖν μὴ πολυχρονίῳ ὄντι.

Γένῃ δ' ἐστὶ λεόντων δύο· τούτων δ' ἐστὶ τὸ μὲν στρογγυλότερον καὶ οὐλοτριχώτερον δειλότερον, τὸ δὲ μακρότερον καὶ εὐθύτριχον ἀνδρειότερον. Φεύγουσι δ' ἐνίοτε (630a.) κατατείναντες τὴν κέρκον ὥσπερ κύνες. Ἦδη δ' ὥπται λέων καὶ ὑἱ ἐπιτίθεσθαι μέλλων, καὶ ὡς εἶδεν ἀντιφρίζοντα, φεύγων. Ἔστι δὲ πρὸς τὰς πληγὰς εἰς μὲν τὰ κοῖλα ἀσθενής, κατὰ δὲ τὸ ἄλλο σῶμα δέχεται πολλὰς καὶ κεφαλὴν

ἔχει ἰσχυράν. Ὅσα δ' ἂν δάκη ἢ τοῖς ὄνυξιν ἐλκώσῃ, ἐκ τῶν ἐλκῶν ἰχῶρες ῥέουσιν ὥχροι σφόδρα καὶ ἐκ τῶν ἐπιδέσμων καὶ σπόγγων ὑπ' οὐδενὸς δυνάμενοι ἐκκλύζεσθαι· ἡ δὲ θεραπεία ἡ αὐτὴ καὶ τῶν κυνοδήκτων ἐλκῶν.

Φιλάνθρωποι δ' εἰσὶ καὶ οἱ θῶες, καὶ οὐτ' ἀδικοῦσι τοὺς ἀνθρώπους οὔτε φοβοῦνται σφόδρα, πολεμοῦσι δὲ τοῖς κυσὶ καὶ τοῖς λέουσιν· διὸ ἐν τῷ αὐτῷ τόπῳ οὐ γίνονται. Ἄριστοι δ' οἱ μικροὶ τῶν θῶων. Γένη δ' αὐτῶν οἱ μὲν φασιν εἶναι δύο, οἱ δὲ τρία· οὐ δοκεῖ δὲ πλείω εἶναι, ἀλλ' ὥσπερ τῶν ἰχθύων καὶ τῶν ὀρνέων καὶ τῶν τετραπόδων ἓνια, καὶ οἱ θῶες μεταβάλλουσι κατὰ τὰς ὥρας, καὶ τό τε χρῶμα ἕτερον τοῦ χειμῶνος καὶ τοῦ θέρους ἴσχουσι, καὶ τοῦ μὲν θέρους λεῖοι γίνονται τοῦ δὲ χειμῶνος δασεῖς.

Κεφάλαιο 44

Ὁ δὲ βόνασος γίνεται μὲν ἐν τῇ Παιονίᾳ ἐν τῷ ὄρει τῷ Μεσσαπίῳ, ὃ ὀρίζει τὴν Παιονικὴν καὶ τὴν Μαιδικὴν χώραν, καλοῦσι δ' αὐτὸν οἱ Παίονες μόναπον. Τὸ δὲ μέγεθός ἐστιν ἡλίκον ταῦρος, καὶ ἔστιν ὀγκωδέστερον ἢ βοῦς· οὐ γὰρ πρόμηκές ἐστιν. Τὸ δὲ δέρμα αὐτοῦ κατέχει εἰς ἐπτάκλινον ἀποταθέν. Καὶ τὸ ἄλλο δ' εἶδος ὅμοιον βοῖ, πλὴν χαίτην ἔχει μέχρι τῆς ἀκρωμίας ὥσπερ ἵππος· μαλακωτέρα δ' ἢ θριξ τῆς τοῦ ἵππου, καὶ προσεσταλμένη μᾶλλον.

Χρῶμα δ' ἔχει τοῦ τριχώματος ξανθόν· βαθεῖα δὲ καὶ μέχρι τῶν ὀφθαλμῶν καθήκουσα ἡ χαίτη ἐστὶ καὶ πυκνή. Τὸ δὲ χρῶμα ἔχει τι μέσον τεφροῦ καὶ πυρροῦ, οὐχ οἶον αἱ παρῶαι ἵπποι καλούμεναι, ἀλλ' αὐχμηροτέραν τὴν τρίχα <ἄνωθεν>, κάτωθεν ἐριώδη· μέλανες δ' ἢ πυρροὶ σφόδρα οὐ γίνονται. Φωνὴν δ' ὁμοίαν ἔχουσι βοῖ, κέρατα δὲ γαμψά, κεκαμμένα πρὸς ἄλληλα καὶ ἄχρηστα πρὸς τὸ ἀμύνεσθαι, τῷ μεγέθει σπιθαμιαῖα ἢ μικρῷ μείζω, πάχος δ' ὥστε χωρῆσαι μὴ πολλῷ ἔλαττον ἡμίχουν ἐκάτερον· ἡ δὲ μελανία καλὴ καὶ λιπαρὰ τοῦ κέρατος.

Τὸ δὲ προκόμιον καθήκει (630b.) ἐπὶ τοὺς ὀφθαλμούς, ὥστ' εἰς τὸ πλάγιον παρορᾶν μᾶλλον ἢ εἰς τὸ πρόσθεν. Ὀδόντας δὲ τοὺς ἄνωθεν οὐκ ἔχει, ὥσπερ οὐδὲ βοῦς οὐδ' ἄλλο τῶν κερατοφόρων οὐδέν, σκέλη δὲ δασέα· καὶ ἔστι διχαλόν· κέρκον δ' ἐλάττω ἢ κατὰ τὸ μέγεθος, ὁμοίαν τῇ τοῦ βοός. Καὶ ἀναρρίπτει τὴν κόνιν καὶ ὀρύττει ὥσπερ ταῦρος. Δέρμα δ' ἔχει πρὸς τὰς πληγὰς ἰσχυρόν. Ἔστι δ' ἡδύκρεων, διὸ καὶ θηρεύουσιν αὐτό. Ὅταν δὲ πληγῇ, φεύγει, καὶ ὑπομένει ὅταν ἐξατονῇ. Ἀμύνεται δὲ λακτίζων καὶ προσαφοδεύων καὶ εἰς τέτταρας ὀργυῖας ἀφ' ἑαυτοῦ ρίπτων· ῥαδίως δὲ χρῆται τούτῳ καὶ πολλάκις, καὶ ἐπικαίει ὥστε ἀποψήχεσθαι τὰς τρίχας τῶν κυνῶν. Τεταραγμένου μὲν οὖν καὶ φοβουμένου τοῦτο ποιεῖ ἢ κόπρος, ἀταράκτου δ' ὄντος οὐκ ἐπικαίει.

Ἡ μὲν οὖν ιδέα τοῦ θηρίου καὶ ἡ φύσις τοιαύτη τίς ἐστίν· ὅταν δ' ὥρα ἦ τοῦ τίκτειν, ἄθροοι τίκτουσιν ἐν τοῖς ὄρεσιν. Περὶ δὲ τὸν τόπον ἀφοδεύουσι πρότερον πρὶν τεκεῖν, καὶ ποιοῦσιν οἶον περίβολον· προῖται γὰρ τὸ θηρίον πολὺ τι πλῆθος τούτου τοῦ περιττώματος.

Κεφάλαιο 45

Πάντων δὲ τιθασσότατον καὶ ἡμερώτατον τῶν ἀγρίων ἐστὶν ὁ ἐλέφας· πολλὰ γὰρ καὶ παιδεύεται καὶ ξυνήσιν, ἐπεὶ καὶ προσκυνεῖν διδάσκονται τὸν βασιλέα. Ἔστι δὲ καὶ εὐαίσθητον καὶ τῇ συνέσει τῇ ἄλλῃ ὑπερβάλλον. Ὁ δ' ἂν ὀχεύσῃ καὶ ἔγκυον ποιήσῃ, τούτου πάλιν οὐχ ἄπτεται.

Ζῆν δὲ φασὶ τὸν ἐλέφαντα οἱ μὲν ἔτη διακόσια, οἱ δ' ἑκατὸν εἴκοσι, καὶ τὴν θήλειαν ἴσα σχεδὸν τῷ ἄρρενι, ἀκμάζειν δὲ περὶ ἔτη ἐξήκοντα, πρὸς δὲ τοὺς χειμῶνας καὶ τὰ ψύχῃ δύσριγον εἶναι. Ἔστι δὲ τὸ ζῶον παραποτάμιον, οὐ ποτάμιον.

Ποιεῖται δὲ καὶ διὰ τοῦ ὕδατος τὴν πορείαν, ἕως τούτου δὲ προέρχεται ἕως ἂν ὁ μυκτὴρ ὑπερέχῃ αὐτοῦ· ἀναφυσᾷ γὰρ διὰ τούτου καὶ τὴν ἀναπνοὴν ποιεῖται. Νεῖν δ' οὐ πάνυ δύναται διὰ τὸ τοῦ σώματος βάρος.

Κεφάλαιο 46

Οἱ δὲ κάμηλοι οὐκ ἀναβαίνουσιν ἐπὶ τὰς μητέρας, ἀλλὰ κἂν βιάζηται τις, οὐ θέλουσιν. Ἦδη γάρ ποτε ἐπεὶ οὐκ ἦν ὀχεῖον, ὁ ἐπιμελητὴς περικαλύψας τὴν μητέρα ἐφῆκε τὸν πῶλον· ὥς δ' ὀχεύοντος ἀπέπεσε, τότε μὲν ἀπετέλεσε τὴν συνουσίαν, μικρὸν δ' ὕστερον δακὼν τὸν καμηλίτην (631a.) ἀπέκτεινεν. Λέγεται δὲ καὶ τῷ Σκυθῶν βασιλεῖ γενέσθαι ἵππον γενναίαν, ἐξ ἧς ἅπαντας ἀγαθοὺς γίνεσθαι τοὺς ἵππους· τούτων ἐκ τοῦ ἀρίστου βουλόμενον γεννῆσαι καὶ τῆς μητρὸς προσαγαγεῖν, ἵν' ὀχεύσῃ· τὸν δ' οὐ θέλειν· περικαλυφθείσης δὲ λαθόντα ἀναβῆναι· ὥς δ' ὀχεύσαντος ἀπεκαλύφθη τὸ πρόσωπον τῆς ἵπου, ἰδόντα τὸν ἵππον φεύγειν καὶ ῥῖψαι ἑαυτὸν κατὰ τῶν κρημνῶν.

Κεφάλαιο 47

Τῶν δὲ θαλαττίων πλεῖστα λέγεται σημεῖα περὶ τοὺς δελφῖνας πρᾶότητος καὶ ἡμερότητος, καὶ δὴ καὶ πρὸς παῖδας ἔρωτες καὶ ἐπιθυμίας, καὶ περὶ Τάραντα καὶ Καρίαν καὶ ἄλλους τόπους. Καὶ περὶ Καρίαν δὲ ληφθέντος δελφίνος καὶ τραύματα λαβόντος ἀθρόον ἐλθεῖν λέγεται πλῆθος δελφίνων εἰς τὸν λιμένα, μέχριπερ ὁ ἄλιεύς ἀφῆκεν· τότε δὲ πάλιν ἅμα πάντες ἀπῆλθον. Καὶ τοῖς μικροῖς δελφῖσιν ἀκολουθεῖ τις αἰεὶ τῶν μεγάλων φυλακῆς χάριν. Ἦδη δ' ὥπται δελφίνων μεγάλων ἀγέλη ἅμα καὶ μικρῶν· τούτων δ' ἀπολειπόμενοί τινες δύο οὐ πολὺ ἐφάνησαν δελφινίσκον μικρὸν τεθνηκότα, ὅτ' εἰς βυθὸν φέροιτο, ὑπονέοντες καὶ μετεωρίζοντες τῷ νώτῳ οἷον κατελεοῦντες, ὥστε μὴ καταβρωθῆναι ὑπὸ τινος τῶν ἄλλων θηρίων.

Λέγεται δὲ καὶ περὶ ταχυτήτος ἁπιστα τοῦ ζώου· ἀπάντων γὰρ δοκεῖ εἶναι ζώων τάχιστον, καὶ τῶν ἐνύδρων καὶ τῶν χερσαίων, καὶ ὑπεράλλονται δὲ πλοίων μεγάλων ἰστούς. Μάλιστα δὲ τοῦτ' αὐτοῖς συμβαίνει, ὅταν διώκωσί τινα ἰχθὺν τροφῆς χάριν· τότε γάρ, ἐὰν ἀποφεύγῃ, συνακολουθοῦσιν εἰς βυθὸν διὰ τὸ πεινῆν, ὅταν δ' αὐτοῖς μακρὰ γίνηται ἡ ἀναστροφή, κατέχουσι τὸ πνεῦμα ὥσπερ ἀναλογισάμενοι, καὶ συστρέψαντες ἑαυτοὺς φέρονται ὥσπερ τόξευμα, τῇ ταχυτῇ τὸ μῆκος διελθεῖν βουλόμενοι πρὸς τὴν ἀναπνοήν, καὶ ὑπεράλλονται τοὺς ἰστούς, ἐὰν παρατυγχάνῃ που πλοῖον. Ταῦτόν δὲ ποιοῦσι καὶ οἱ κατακολουμβηταί, ὅταν εἰς βυθὸν ἑαυτοὺς ἀφῶσιν· κατὰ τὴν ἑαυτῶν γὰρ δύναμιν καὶ οὗτοι ἀναφέρονται (631b.) συστρέψαντες.

Διατρίβουσι δὲ μετ' ἀλλήλων κατὰ συζυγίας οἱ ἄρρενες ταῖς θηλείαις. Διαπορεῖται δὲ περὶ αὐτῶν διὰ τί ἐξοκέλλουσιν εἰς τὴν γῆν· ποιεῖν γάρ φασι τοῦτ' αὐτοὺς ἐνίστε, ὅταν τύχῳσι, δι' οὐδεμίαν αἰτίαν.

Κεφάλαιο 48

Ὡσπερ δὲ τὰς πράξεις κατὰ τὰ πάθη συμβαίνει ποιεῖσθαι πᾶσι τοῖς ζώοις, οὕτω πάλιν καὶ τὰ ἥθη μεταβάλλουσι κατὰ τὰς πράξεις, πολλάκις δὲ καὶ τῶν μορίων ἓνια, οἷον ἐπὶ τῶν ὀρνίθων συμβαίνει. Αἷ τε γὰρ ἀλεκτορίδες ὅταν νικήσωσι τοὺς ἄρρενας, κοκκύζουσί τε μιμούμεναι τοὺς ἄρρενας καὶ ὀχεύειν ἐπιχειροῦσι, καὶ τό τε κάλλαιον ἐξαίρεται αὐταῖς καὶ τὸ οὐροπύγιον, ὥστε μὴ ῥαδίως ἂν ἐπιγνῶναι ὅτι θήλειαι εἰσιν· ἐνίαις δὲ καὶ πληκτρά τινα μικρὰ ἐπανεστη.

Ἦδη δὲ καὶ τῶν ἀρρένων τινὲς ὥφθησαν ἀπολομένης τῆς θηλείας αὐτοὶ περὶ τοὺς νεοττοὺς τὴν τῆς θηλείας ποιούμενοι σκευωρίαν, περιάγοντές τε καὶ ἐκτρέφοντες οὕτως ὥστε μήτε κοκκύζειν ἔτι μήτ' ὀχεύειν ἐπιχειρεῖν. Γίνονται δὲ καὶ θηλυδρία ἐκ γενετῆς τῶν ὀρνίθων τινὲς οὕτως ὥστε καὶ ὑπομένειν τοὺς ἐπιχειροῦντας ὀχεύειν.

Κεφάλαιο 49

Μεταβάλλει δὲ τὰ ζῷα οὐ μόνον τὰς μορφὰς ἑνια καὶ τὸ ἦθος κατὰ τὰς ἡλικίας καὶ τὰς ὥρας, ἀλλὰ καὶ ἐκτεμνόμενα. Ἐκτέμνεται δὲ τῶν ζώων ὅσα ἔχει ὄρχεις.

Ἐχουσι δ' οἱ μὲν ὄρνιθες τοὺς ὄρχεις ἐντὸς καὶ τὰ φωτόκα τῶν τετραπόδων πρὸς τῇ ὀσφύϊ, τὰ δὲ ζωτόκα καὶ πεζὰ τὰ μὲν πλεῖστα ἐκτός, τὰ δ' ἐντός, πάντα δὲ πρὸς τῷ τέλει τῆς γαστρού.

Ἐκτέμνονται δ' οἱ μὲν ὄρνιθες κατὰ τὸ οὐροπύγιον, καθ' ὃ συμπίπτουσιν ὀχεύοντες· ἐνταῦθα γὰρ ἂν ἐπικαύσῃ τις δυσὶν ἢ τρισὶ σιδηρίοις, ἐὰν μὲν ἤδη τέλειον ὄντα, τό τε κάλλιον ἔξωχρον γίνεται καὶ οὐκέτι κοκκίζει οὐδ' ἐπιχειρεῖ ὀχεύειν, ἐὰν δ' ἔτι νεοττὸν ὄντα, οὐδὲ γίνεται τούτων οὐδὲν αὐξανομένου. Τὸν αὐτὸν δὲ τρόπον καὶ ἐπὶ ἀνθρώπων· ἐὰν μὲν γὰρ παιῶδας ὄντας πηρώσῃ τις, οὔτε αἱ ὑστερογενεῖς ἐπιγίνονται τρίχες οὐθ' ἡ φωνὴ μεταβάλλει, (632a.) ἀλλ' ὀξεῖα διατελεῖ· ἂν δ' ἤδη ἡβῶντας, αἱ μὲν ὑστερογενεῖς τρίχες ἀπολείπουσιν πλὴν τῶν ἐπὶ τῆς ἥβης (αὗται δ' ἐλάττους μὲν, μένουσι δέ), αἱ δ' ἐκ γενετῆς τρίχες οὐκ ἀπολείπουσιν· οὐδεὶς γὰρ γίνεται εὐνοῦχος φαλακρός.

Μεταβάλλει δὲ καὶ ἡ φωνὴ ἐπὶ τῶν τετραπόδων τῶν ἐκτεμνομένων ἀπάντων εἰς τὸ θῆλυ. Τὰ μὲν οὖν ἄλλα τετράποδα ἐὰν μὴ νέα ἐκτέμνηται, διαφθείρεται· ἐπὶ δὲ τῶν κάπρων μόνων οὐδὲν διαφέρει. Πάντα δ' ἐὰν μὲν νέα ἐκτμηθῇ, μείζω γίνεται τῶν ἀτμήτων καὶ γλαφυρώτερα, ἐὰν δὲ καθεστηκότα ἤδη, οὐκέτι αὐξάνεται ἐπὶ πλεῖον.

Οἱ δ' ἔλαφοι ἐὰν μὲν μὴ πω τὰ κέρατα ἔχοντες διὰ τὴν ἡλικίαν ἐκτμηθῶσιν, οὐκέτι φύουσιν κέρατα· ἐὰν δ' ἔχοντας ἐκτέμῃ τις, τό τε μέγεθος ταῦτόν μὲν τῶν κεράτων, καὶ οὐκ ἀποβάλλουσιν.

Οἱ μὲν οὖν μόσχοι ἐκτέμνονται ἐνιαύσιοι, εἰ δὲ μὴ, αἰσχίους γίνονται καὶ ἐλάττους· οἱ δὲ δαμάλαι ἐκτέμνονται τὸν τρόπον τοῦτον· κατακλίνοντες καὶ ἀποτέμνοντες τῆς ὀσχέας κάτωθεν τοὺς ὄρχεις ἀποθλίβουσιν, εἴτα ἀναστέλλουσιν τὰς ρίζας ἄνω ὡς μάλιστα, καὶ τὴν τομὴν φριξὶ βύουσιν, ὅπως ὁ ἰχώρ ῥέῃ ἔξω· καὶ ἐὰν φλεγμαίνῃ, κατακαύσαντες τὴν ὀσχέαν ἐπιπάττουςιν.

Οἱ δ' ἐνόρχαι τῶν βοῶν ἐὰν ἐκτμηθῶσι, τὸ φανερόν συγγενῶσιν. Ἐκτέμνεται δὲ καὶ ἡ καπρία τῶν θηλειῶν ὧν, ὥστε μηκέτι δεῖσθαι

ὀχείας ἀλλὰ πιαίνεσθαι ταχέως. Ἐκτέμνεται δὲ νηστεύσασα δύο ἡμέρας, ὅταν κρεμάσωσι τῶν ὀπισθίων σκελῶν. Τέμνουσι δὲ τὸ ἦτρον, ἧ τοῖς ἄρρεσιν οἱ ὄρχεις μάλιστα φύονται· ἐνταῦθα γὰρ ἐπὶ ταῖς μήτραις ἐπιπέφυκεν ἡ καπρία, ἧς μικρὸν ἀποτέμνοντες συρράπτουσιν.

Ἐκτέμνονται δὲ καὶ αἱ κάμηλοι αἱ θήλειαι, ὅταν εἰς πόλεμον χρῆσθαι αὐταῖς βούλωνται, ἵνα μὴ ἐν γαστρὶ λάβωσιν. Κέκτηνται δ' ἔνιοι τῶν ἄνω καμήλους καὶ τρισχιλίας. Θέουσι δὲ θᾶσσον τῶν Νησαίων ἵππων πολὺ, ἐὰν θέωσι, διὰ τὸ μέγεθος τοῦ ὀρέγματος. Ὅλως δὲ μακρότερα γίνεται τὰ ἐκτεμνόμενα ζῷα τῶν ἀτμήτων.

Ὡφελοῦνται δὲ τὰ ζῷα καὶ χαίρουσι καὶ (632b.) μηρυκάζοντα ὥσπερ ἐσθίοντα ὅσα μηρυκάζει. Μηρυκάζει δὲ τὰ μὴ ἀμφώδοντα, οἷον βόες καὶ πρόβατα καὶ αἶγες. Ἐπὶ δὲ τῶν ἀγρίων οὐδὲν πω συνῶπται, ὅσα μὴ συντρέφεται ἐνίοτε, οἷον ἔλαφος· αὕτη δὲ μηρυκάζει. Πάντα δὲ κατακείμενα μηρυκάζουσι μᾶλλον. Μάλιστα δὲ τοῦ χειμῶνος μηρυκάζουσιν, τά τε κατ' οἰκίαν τρεφόμενα σχεδὸν ἑπτὰ μῆνας τοῦτο ποιεῖ· τὰ δ' ἀγελαῖα καὶ ἦτρον καὶ ἐλάττονα χρόνον μηρυκάζει διὰ τὸ νέμεσθαι ἔξω.

Μηρυκάζει δὲ καὶ τῶν ἀμφωδόντων ἔνια, οἷον οἱ τε μῦες οἱ Ποντικοί, καὶ ἄλλοι ἰχθύες καὶ ὃν καλοῦσιν ἔνιοι ἀπὸ τοῦ ἔργου μήρυκα.

Ἔστι δὲ τὰ μὲν μακροσκελῆ τῶν ζώων ὑγροκοίλια, τὰ δ' εὐρυστήθη ἐμετικά μᾶλλον, καὶ ἐπὶ τῶν τετραπόδων καὶ ἐπ' ὀρνίθων καὶ ἐπ' ἀνθρώπων ὥς ἐπὶ τὸ πολὺ.

Κεφάλαιο 49B

Τῶν δ' ὀρνέων πολλὰ μεταβάλλουσι κατὰ τὰς ὥρας καὶ τὸ χρῶμα καὶ τὴν φωνήν, οἷον ὁ κόττυφος ἀντὶ μέλανος ξανθός, καὶ τὴν φωνήν ἴσχει ἀλλοίαν· ἐν μὲν γὰρ τῷ θέρει ἄδει, τοῦ δὲ χειμῶνος παταγεῖ καὶ φθέγγεται θορυβῶδες. Μεταβάλλει δὲ καὶ ἡ κίχλη τὸ χρῶμα· τοῦ μὲν γὰρ χειμῶνος ψαρὰ τοῦ δὲ θέρους ποικίλα τὰ περὶ τὸν αὐχένα ἴσχει· τὴν μέντοι φωνήν οὐδὲν μεταβάλλει.

Ἡ δ' ἀηδὼν ἄδει μὲν συνεχῶς ἡμέρας καὶ νύκτας δεκαπέντε, ὅταν τὸ ὄρος ἤδη δασύνηται· μετὰ δὲ ταῦτα ἄδει μὲν, συνεχῶς δ' οὐκέτι. Τοῦ δὲ θέρους προϊόντος ἄλλην ἀφίησι φωνήν καὶ οὐκέτι παντοδαπὴν οὐδὲ ταχεῖαν καὶ ἐπιστρεφῇ ἄλλ' ἀπλῆν, καὶ τὸ χρῶμα μεταβάλλει, καὶ ἔν γ' Ἰταλία τὸ ὄνομα ἕτερον καλεῖται περὶ τὴν ὥραν ταύτην. Φαίνεται δ' οὐ πολὺν χρόνον· φωλεῖ γάρ.

Μεταβάλλουσι δὲ καὶ οἱ ἐρίθακοι καὶ οἱ καλούμενοι φοινίκουροι ἐξ ἀλλήλων· ἔστι δ' ὁ μὲν ἐρίθακος χειμερινόν, οἱ δὲ φοινίκουροι θερινοί, διαφέρουσι δ' ἀλλήλων οὐδὲν ὥς εἰπεῖν ἄλλ' ἢ τῇ χροᾷ μόνον.

Ὡσαύτως δὲ καὶ αἱ συκαλίδες καὶ οἱ μελαγκόρουφοι· καὶ γὰρ οὗτοι μεταβάλλουσιν εἰς ἀλλήλους. Γίνεται δ' ἡ μὲν συκαλὶς περὶ τὴν ὀπώραν, ὁ δὲ μελαγκόρυφος εὐθέως μετὰ (633a.) τὸ φθινόπωρον. Διαφέρουσι δὲ καὶ οὗτοι οὐδὲν ἀλλήλων πλὴν τῇ χροᾷ καὶ τῇ φωνῇ. Ὅτι δ' ὁ αὐτός ἐστιν ὄρνις, ἤδη ὥπται περὶ τὴν μεταβολὴν ἐκάτερον τὸ γένος τούτων, οὐπω δὲ τελέως μεταβεβληκότα οὐδ' ἐν θατέρῳ εἶδει ὄντα. Οὐδὲν δ' ἄτοπον εἰ ἐπὶ τούτων αἱ φωναὶ μεταβάλλουσιν ἢ τὰ χρώματα, ἐπεὶ καὶ ἡ φάττα τοῦ μὲν χειμῶνος οὐ φθέγγεται (πλὴν ἤδη ποτὲ εὐδίας ἐκ χειμῶνος σφοδροῦ γενομένης ἐφθέγγετο καὶ ἐθαυμαστώθη ὑπὸ τῶν ἐμπείρων), ἀλλ' ὅταν ἔαρ γένηται, τότε ἄρχεται φωνεῖν. Τὸ δ' ὅλον τὰ ὄρνεα καὶ μάλιστα καὶ πλείστας ἀφίησι φωνάς, ὅταν ὥσι περὶ τὴν ὀχείαν.

Μεταβάλλει δὲ καὶ ὁ κόκκυξ τὸ χρῶμα καὶ τῇ φωνῇ οὐ σαφηνίζει, ὅταν μέλλῃ ἀφανίζεσθαι· ἀφανίζεται δ' ὑπὸ κύνα, φανερός δὲ γίνεται ἀπὸ τοῦ ἔαρος ἀρξάμενος μέχρι κυνὸς ἐπιτολῆς. Ἀφανίζεται δὲ καὶ ἦν καλοῦσί τινες οἰνάνθην ἀνίσχοντος τοῦ σειρίου, δυομένου δὲ φαίνεται· φεύγει δ' ὅτε μὲν τὰ ψύχη ὅτε δὲ τὴν ἀλέαν.

Μεταβάλλει δὲ καὶ ὁ ἔποψ τὸ χρῶμα καὶ τὴν ιδέαν, ὥσπερ

πεποίηκεν Αἰσχύλος ἐν τοῖσδε·

Τοῦτον δ' ἐπόπτην ἔποπα τῶν αὐτοῦ κακῶν πεποικίλωκε,
κάποδηλώσας ἔχει θρασὺν πετραῖον ὄρνιν ἐν παντευχία,
ὃς ἦρι μὲν φαίνοντι διαπάλλει πτερόν κίρκου λεπάργου.
Δύο γὰρ οὖν μορφὰς φανεῖ, παιδὸς τε χαυτοῦ νηδύος μιᾶς ἄπο.
Νέας δ' ὀπώρας ἥνικ' ἂν ξανθῇ στάχυν,
στικτὴ νιν αὖθις ἀμφινωμήσει πτέρυξ.

Ἀεὶ δὲ μίσει τῶνδ' ἅπ' ἄλλον εἰς τόπον δρυμοὺς ἐρήμους καὶ
πάγους ἀποικίσει.

Εἰσὶ δὲ τῶν ὀρνίθων οἱ μὲν κονιστικοί, οἱ δὲ λοῦσται, οἱ δ' οὔτε
κονιστικοὶ οὔτε λοῦσται. Ὅσοι μὲν μὴ πτητικοὶ (633b.) ἀλλ' ἐπίγειοι,
κονιστικοί, οἷον ἀλεκτορίς, πέρδιξ, ἀτταγὴν, κορύδαλος, φασιανός·
τῶν δ' εὐθυωνύχων ἔνιοι, καὶ ὅσοι περὶ ποταμὸν ἢ ἔλη ἢ θάλατταν
διατρίβουσι, λοῦνται· οἱ δ' ἄμφω, καὶ κονίονται καὶ λοῦνται, οἷον
περιστερὰ καὶ στρουθός· τῶν δὲ γαμψωνύχων οἱ πολλοὶ οὐδέτερον.

Ταῦτα μὲν οὖν τοῦτον ἔχει τὸν τρόπον, ἴδιον δ' ἐνίοις συμβαίνει
τῶν ὀρνιθίων τὸ ἀποσοφεῖν, οἷον καὶ ταῖς τρυγόσιν· ποιοῦνται δὲ καὶ
περὶ τὴν ἔδραν κίνησιν οἱ τοιοῦτοι ἰσχυρὰν ἅμα τῇ φωνῇ.

Βιβλίο 10

ΥΠΕΡ ΤΟΥ ΜΗ ΓΕΝΝΑΝ

Προϊούσης δὲ τῆς ἡλικίας ἀνδρὶ καὶ γυναικί, τοῦ μὴ γεννᾶν ἀλλήλοις συνόντας τὸ αἴτιον ὅτε μὲν ἐν ἀμφοῖν ἐστίν, ὅτε δ' ἐν θατέρῳ μόνον. Πρῶτον μὲν οὖν ἐπὶ τοῦ θήλεος δεῖ θεωρεῖν τὰ περὶ τὰς ὑστέρας ὅπως ἔχει, ἵν' εἰ μὲν ἐν ταύταις τὸ αἴτιον, αὗται τυγχάνωσι θεραπείας, εἰ δὲ μὴ ἐν ταύταις, περὶ ἑτερόν τι τῶν αἰτίων ποιῶνται τὴν ἐπιμέλειαν.

Ἔστι δ', ὥσπερ καὶ περὶ ἄλλο μέρος, φανερόν εἰ ὑγιαίνει, ὅταν τὸ ἔργον τὸ αὐτοῦ ἱκανῶς ἀποτελῇ καὶ ἄλυπόν τ' ἢ καὶ μετὰ τὰς ἐργασίας ἄκοπον, οἷον ὀφθαλμὸς ὅταν λήμην τε μηδεμίαν ποιῇ καὶ ὀρᾷ καὶ μετὰ τὴν ὄρασιν μὴ ταράττηται μηδ' ἀδυνατῇ ὀρᾶν πάλιν. Οὕτω καὶ ὑστέρα ἢ πόνον τε μὴ παρέχουσα, καὶ ὁ ἐκείνης ἐστί, τοῦθ' ἱκανῶς ἀπεργαζομένη, καὶ μετὰ τὰ ἔργα μὴ ἀδύνατος ἀλλ' ἄκοπος.

Λέγεται δὲ καὶ μὴ καλῶς ἔχουσιν τὴν ὑστέραν ὅμως πρὸς τὸ ἔργον τὸ αὐτῆς ἔχειν καλῶς καὶ ἀλύπως, ἂν μὴ ταύτης χειρόν ὁ ἔργον ἐστὶν αὐτῆς ἔχη, ὥσπερ ὄμμα οὐδὲν κωλύει αὐτὸ ὀρᾶν ἀκριβῶς, μὴ ἔχοντος τοῦ ὀφθαλμοῦ καλῶς πάντα τὰ μόρια, ἢ εἰ φῦμά τι ἔνεστιν. Ὅμοίως δὲ καὶ ὑστέρα, εἰ εὖ ἔχει τοῦ ἐπικαίρου τόπου, οὐδὲν ἂν πρὸς τοῦτο (634a.) βλάπτοιο.

Δεῖ δὴ τὴν ἔχουσιν καλῶς ὑστέραν πρῶτον μὲν τῷ τόπῳ μὴ ἐν ἄλλῳ καὶ ἄλλῳ εἶναι, ἀλλ' ὁμοίως τῇ θέσει, πλὴν γίνεσθαι τὸ πορρώτερον ἄνευ πάθους καὶ λύπης, καὶ μηδὲν ἀναισθητοτέρας εἶναι θιγγανομένας. Τοῦτο δὲ κρίνειν οὐ χαλεπόν. Ὅτι δὲ δεῖ τοιαύτας εἶναι, ἐκ τῶνδε φανερόν.

Εἴτε γὰρ μὴ πλησίον προσίασιν, οὐκ ἔσσονται ἀνασπαστικά· πόρρω γὰρ αὐταῖς ἔσται ὁ τόπος ὅθεν δεῖ ἀναλαβεῖν.

Εἰ δὲ μή, εἰ πλησίον μένουσι καὶ μὴ οἶαι ἐπανιέναι πορρωτέρω, κωφότεραι ἔσσονται, ἵτις τῷ < διαθιγγάνεσθαι ἀεί, ὥστε μὴ ταχὺ ἀνοίγεσθαι· δεῖ < τοῦτο σφόδρα ποιεῖν καὶ εὐηκόους εἶναι.

Ταῦτά τε οὖν χρή ὑπάρχειν, ὅσαις τε μὴ ὑπάρχει, αὗται θεραπείας δέονται τινός, καὶ τὰ καταμήνια γίνεσθαι καλῶς, τοῦτο δ' ἐστὶ δι' ἴσων χρόνων καὶ μὴ πεπλανημένως, ὑγιαίνοντος τοῦ σώματος. Σημαίνει γὰρ οὕτω γινόμενα καλῶς ἔχειν ἀνοίγεσθαι καὶ δέχεσθαι

τὴν ἐκ τοῦ σώματος ὑγρότητα, ὅταν τὸ σῶμα διδῶ. Ὅταν δὲ πλεονάκῃς ἢ ἐλαττονάκῃς ἢ πεπλανημένως ἀφιώσι, τοῦ ἄλλου σώματος μὴ συναιτίου ὄντος ἀλλ' ὑγιαίνοντος, ἀνάγκη τοῦτο συμβαίνειν δι' αὐτάς.

Ἡ διὰ κωφότητα οὐκ ἀνοίγονται ἐν τοῖς καιροῖς, ὥστ' ὀλίγα δέχονται, ἢ μᾶλλον ἐπισπῶνται τὸ ὑγρὸν διὰ τινὰ φλεγμασίαν αὐτῶν, ὥστε θεραπείας σημαίνουνσι δεόμεναι, ὥσπερ καὶ ὀφθαλμοὶ καὶ κύστις καὶ κοιλία καὶ τᾶλλα· πάντες γὰρ οἱ τόποι φλεγμαίνοντες ἔλκουσιν ὑγρότητα τοιαύτην, ἢ πέφυκεν ἐκκρίνεσθαι εἰς ἕκαστον τόπον, ἀλλ' οὐ τοιαύτη ἢ τοσαύτη. Ὅμοίως δὲ καὶ ἡ ὑστέρα πλείω ἀποδιδούσα σημαίνει φλεγματικόν τι πάθος, ἐὰν ὅμοια μὲν πλείω δ' ἀποδιδῶ.

Ἐὰν δ' ἀνόμοια καὶ σεσημμένα μᾶλλον, οἷα ταῖς ὑγαινούσαις προέρχεται, τοῦτο μὲν ἤδη πάθος καὶ ἐπίδηλον γίνεται. Ἀνάγκη γὰρ καὶ πόνους τινὰς ἐπισημαίνειν ἐχούσης ὥς οὐ δεῖ.

Ταῖς δ' ὑγαινούσαις τὰ λευκὰ καὶ σεσημμένα προέρχεται, ταῖς μὲν καὶ ἀρχομένων, ταῖς δὲ πλείσταις ληγόντων τῶν καταμηνίων. Ὅσαις μὲν οὖν σεσημμένα μᾶλλον γίνεται ἢ ταῖς ὑγαινούσαις, ἢ ἄτακτα, πλείω ἢ ἐλάττω, μᾶλλον δέονται θεραπείας ὥς ἐμποδιζόντων πρὸς τὴν τέκνωσιν. Ὅσαις δὲ τοῖς χρόνοις μόνον ἀνωμάλοις καὶ μὴ δι' ἴσου, ἦττον μὲν διακωλυτικὸν τὸ πάθος, διασημαίνει μέντοι τῆς ὑστέρας τὴν ἔξιν κινουμένην καὶ οὐκ αἰεὶ ὁμοίως μένουσαν. Ἔστι δὲ τοῦτο τὸ πάθος οἷον μὲν βλάψαι τὰς εὐφυεῖς πρὸς τὴν σύλληψιν, οὐ μέντοι νόσος, ἀλλὰ τοιοῦτόν τι πάθος οἷον καθίστασθαι καὶ ἄνευ θεραπείας, ἂν (634b.) μὴ τι προσεξαμαρτάνῃ αὐτή.

Ἐὰν δὲ μεταβάλλωσι τῇ τάξει ἢ τῷ πλήθει, τοῦ ἄλλου σώματος μὴ ὁμοίως ἔχοντος ἀλλ' ὅτε μὲν ὑγροτέρου ὅτε δὲ ξηροτέρου, οὐδὲν αἰτίαι αἰ ὑστέραι, ἀλλὰ δεῖ καὶ ἀκολουθεῖν αὐτάς τῇ τοῦ σώματος ἔξει, δεχομένας καὶ ἀφιεῖσας κατὰ λόγον. Ἐὰν μὲν οὖν ὑγιαίνοντος τοῦ σώματος μεταβάλλοντος δὲ τοῦτο ποιῶσιν, οὐδὲν αὐταὶ δέονται θεραπείας.

Ἐὰν δὲ νοσοῦντος ἢ ἐλάττω ἀποδιδῶσι διὰ τὸ ἄλλοθι πού ἀναλίσκεσθαι τὸ περίττωμα, ἢ κάμνει τὸ σῶμα, ἢ πλείω ἀφιώσι διὰ τὸ δεῦρο ἐξερεύγεσθαι τὸ σῶμα, οὐδὲ τοῦτο σημαίνει αὐτάς γε τὰς ὑστέρας δεῖσθαι θεραπείας, ἀλλὰ τὸ σῶμα. Ὡς ὅσαις συμεταβάλλει ταῖς ἔξεσι τοῦ σώματος τὰ γυναικεῖα, δηλοῖ ὅτι οὐδὲν αἴτιον ἐν ταῖς ὑστέραις ἐστίν, ὅτι ὑγιαίνουσαι διατελοῦσιν.

Αὐταὶ δ' αὐτῶν ὅτε μὲν ἄρρωστώτεραι, ὅτε δ' ἰσχύουσι μᾶλλον, καὶ ὅτε μὲν ὑγρότεραι ὅτε δὲ ξηρότεραι. Καὶ φοιτᾷ αὐταῖς, ὅταν μὲν πλεῖον τὸ σῶμα αὐτῶν, πλείω, ὅταν δ' ἔλαττον, ἐλάττω, καὶ ἐὰν μὲν ὑγρόν, ὑδαρέστερα, ἐὰν δὲ ξηρόν, ἐναιμότερα. Καὶ ἄρχονται μὲν ἐκ λευκῶν γαλακτοειδῶν, ἀνόσμων μενόντων· τὰ δὲ φοινικᾷ μὲν, ἀπολήγοντα δὲ λευκότερα, ἐσχάτης καταλήξεως. Ὅσμῃν δ' ἔχει τὰ λευκὰ ταῦτα οὐ σηπεδόνος, ἀλλὰ δριμυτέραν καὶ βαρυτέραν, οὔτε πύου. Καὶ ἄνευ μὲν τήξεως, μετὰ μέντοι θερμασίας, ὅταν οὗτος ἢ ὁ τρόπος τῶν σημείων. Ὅσαις μὲν οὖν οὕτω συμβαίνει, ταύταις ἔχουσιν ὡς δεῖ τὰ περὶ τὰς ὑστέρας πρὸς τὴν τέκνωσιν.

Καὶ πρῶτον ταῦτα σκεπτέον, εἰ καλῶς ἔχει, μετὰ δὲ ταῦτα πῶς ἔχει τὸ στόμα τῶν ὑστερῶν. Δεῖ γὰρ εἰς ὀρθὸν ἔχειν· εἰ δὲ μὴ, οὐχ ἔλξουσιν εἰς αὐτὰς τὸ σπέρμα.

Εἰς τὸ πρόσθεν γὰρ αὐτῶν καὶ ἡ γυνὴ προίεται, ὡς δηλόν, ὅταν ἐξονειρώττωσιν αὐταὶ τελέως· τότε γὰρ οὗτος ὁ τόπος θεραπείας δεῖται αὐταῖς ὑγρανθεῖς, ὥσπερ εἰ ἀνδρὶ συνεγένοντο, ὡς προϊέμενον ἐνταῦθα καὶ τὸ παρὰ τοῦ ἀνδρός, εἰς τὸν αὐτὸν τόπον καὶ οὐχὶ εἰς τὰς ὑστέρας εἴσω. Ἀλλ' ὅταν ἐνταῦθα προϊῶνται, ἐντεῦθεν σπῶσι τῷ πνεύματι, οἷον αἱ ῥίνες, καὶ αἱ ὑστέραι τὸ σπέρμα. Διὸ καὶ παντὶ σχήματι συνοῦσαι κυῖσκονται, ὅτι εἰς τὸ πρόσθεν παντελῶς ἐχούσης γίνεται καὶ αὐταῖς καὶ τοῖς ἀνδράσιν ἡ πρόεσις τοῦ σπέρματος· εἰ δ' εἰς αὐτήν, οὐκ ἂν πάντως συγγινόμεναι συνελάμβανον.

Ἐὰν δὲ μὴ εἰς ὀρθὸν βλέπωσιν αἱ ὑστέραι ἀλλ' ἢ πρὸς τὰ ἰσχία ἢ πρὸς τὴν ὀσφὺν ἢ πρὸς τὸ ὑπογάστριον, (635a.) ἀδύνατον συλλαβεῖν διὰ τὴν προειρημένην αἰτίαν, ὅτι ἀνελεσθαι οὐκ ἂν δύναιντο τὸ σπέρμα. Ἐὰν μὲν οὖν ἰσχυρῶς τῇ φύσει οὕτως ἔχωσιν ἢ ὑπὸ νόσου, ἀνίατον τὸ πάθος· ἐὰν δ' ἢ ῥήγμα ἢ φύσει ἢ ὑπὸ τῆς νόσου διὰ φλεγμασίαν συσπασάσης, ἐπὶ θάτερα αὐτῇ τὸ πάθος.

Ταῖς δὲ μελλούσαις ἐγκύοις ἔσεσθαι δεῖ, καθάπερ εἴρηται, τὸ στόμα εἰς ὀρθὸν εἶναι, καὶ πρὸς τούτοις ἀνοίγεσθαι καλῶς. Λέγω δὲ τὸ καλῶς τοιοῦτον ὅπως, ὅταν ἄρχηται τὰ γυναικεῖα, θιγγανόμενον ἔσται τὸ στόμα μαλακώτερον ἢ πρότερον, καὶ μὴ διεστομωμένον φανερώς. Ἀλλ' εἰ οὕτως ἔχοντος, τὰ πρῶτα σημεῖα τὰ λευκὰ φοιτάτω. Ὅταν δὲ σαρκικώτερα ἢ τὴν χροάν τὰ σημεῖα, φανερώς ἔσται ἀνεστομωμένη ἄνευ ἀλγήματος, κὰν θιγγάνῃ κὰν μὴ θιγγάνῃ, καὶ μήτε κωφότητά μήτε στόμα ἀλλοιότερον αὐτὸ αὐτοῦ. Ληξάντων δὲ τῶν γυναικείων διεστομωμένον ἔστω σφόδρα καὶ ξηρόν, ἀλλὰ μὴ

σκληρόν, ἡμέραν ὅλην καὶ ἡμίσειαν ἢ καὶ δύο ἡμέρας. Ταῦτα γὰρ σημαίνει οὕτω γινόμενα ὅτι καλῶς ἔχουσιν αἱ ὑστέραι καὶ ποιοῦσι τὸ αὐτῶν ἔργον, τῷ μὲν μὴ εὐθὺς ἀνεστομοῦσθαι ἀλλὰ μαλακὸν τὸ στόμα γίνεσθαι, ὅτι ἅμα τῷ ἄλλῳ σώματι λυομένῳ λύονται, καὶ οὐκ ἐμποδίζουσι, καὶ ἀφιασι πρῶτον τὰ ἀπ' αὐτοῦ τοῦ στόματος, ὅταν δὲ πλείω τὸ σῶμα προΐηται, ἀναστομοῦνται· ὅπερ ἐστὶ στόματος ὑγιεινῶς ἔχοντος. Πausaμένων δὲ τῶν σημείων, τῷ μὴ εὐθὺς συμπίπτειν σημαίνουσιν ὅτι, ἂν ἀπορήσῃ, κεναὶ καὶ ξηραὶ γίνονται καὶ διψηραὶ καὶ οὐκ ἔχουσι λείψανα περὶ τὴν δίοδον.

Προσπαστικαὶ οὖν οὕσαι σημαίνουσι καλῶς ἔχειν πρὸς τὸ συλλαβεῖν πλησιάσαντος, ὅταν οὕτως ἔχωσιν ἄνευ ἄλγους καὶ μετὰ ἀναισθησίας. Τό τε μὴ ἀλλοιότερον ἔχειν τὸ στόμα ἀγαθόν· καὶ γὰρ τοῦτο σημαίνει ὅτι οὐδέν ἐστιν ὃ κωλύει μὴ συμμύειν αὐτὰς ὅταν δέη.

Περὶ μὲν οὖν τὸ στόμα τῶν ὑστερῶν ἐκ τούτων ἡ σκέψις ἐστίν, εἰ ἔχει ὥς δεῖ ἢ μὴ. Περὶ αὐτὴν δὲ τὴν ὑστέραν δεῖ συμβαίνειν τοιαῦτα μετὰ τὴν κάθαρσιν, πρῶτον μὲν ἐν τοῖς ὕπνοις ὥς συγγινομένην τῷ ἀνδρὶ καὶ προΐεμένην, ὥς ἂν εἰ παρεπλησίαζε, ῥαδίως· ἂν τοῦτο φαίνεται πλεονάκις πάσχουσα, ἄμεινον. Καὶ ἀνισταμένην ὅτε μὲν δεῖσθαι θεραπείας οἷας ὅταν πλησιάσῃ ἀνδρί, ὅτε δὲ ξηρασίας.

Τὴν δὲ ξηρότητα ταύτην μὴ συνεχῇ, ἀλλ' ὕστερον μετὰ τὴν ἔγερσιν ἐξυγραίνεσθαι ὅτε μὲν θάπτων ὅτε δ' ὀψιαιότερον καὶ ὅσον εἰς ἡμισυ τῆς ἡμέρας βραχείας προελθούσης. Ἡ δ' ὑγρότης (635b.) ἔστω τοιαύτη οἷα ὅταν πλεσιάσῃ τῷ ἀνδρί. Πάντα γὰρ ταῦτα σημαίνει δεκτικὴν τὴν ὑστέραν εἶναι τοῦ διδομένου, καὶ προσπαστικὰς τὰς κοτυληδόνας, καὶ καθεκτικὰς ὧν λαμβάνουσι, καὶ ἀκούσας ἀφιείσας.

Ἔτι φύσας ἐγγίνεσθαι ἄνευ πάθους, ὥσπερ ἡ κοιλία, καὶ ἀφιέναι, καὶ μεγάλας γινομένας καὶ ἐλάττους αὐτῶν, ἄνευ νόσου· καὶ γὰρ ταῦτ' ἀποδηλοῖ αὐτάς, ὅτι οὐδέν στερεώτεροι τοῦ δέοντός εἰσιν, οὐδὲ κωφαὶ οὔτε φύσει οὔτε νόσῳ, ἀλλὰ δύνανται, ὥς ἂν δέζωνται, αὐξανομένῳ παρέχειν χώραν. Ἐχουσι δὲ καὶ διάτασιν.

Ὅταν δὲ τοῦτο μὴ γίνηται, ἢ πυκνότεραί εἰσιν ἢ ἀναισθητότεροι ἢ φύσει ἢ νόσῳ. Διὸ καὶ οὐ δύνανται τρέφειν, ἀλλὰ καὶ διαφθεύρουσι τὰ ἔμβρυα, ἐὰν μὲν σφόδρα τοιαῦται ὦσιν, ἔτι μικρὰ ὄντα, ἐὰν δ' ἦττον, μείζω· ἐὰν δὲ πάνυ ἡρέμα, φαυλότερα ἐκτρέφουσι τὰ ἔκγονα καὶ οἷον ἐν ἀγγεῖῳ φαύλῳ τραφέντα.

Ἔτι δὲ θιγγανομένης τὰ ἐπὶ δεξιὰ καὶ τὰ ἐπ' ἀριστερὰ ὁμαλὰ αὐτῆς εἶναι, καὶ τᾶλλα τούτοις ὁμοίως.

Καὶ ἐν τῇ πρὸς τὸν ἄνδρα συνουσίᾳ μεταξὺ ὑγραίνεσθαι, μὴ πολλάκις δὲ μὴδὲ σφόδρα. Ἔστι δὲ τοῦτο τὸ πάθος οἶον ἰδρωμα τοῦ τόπου, ὥσπερ καὶ τῷ στόματι σιάλου πολλαχοῦ μὲν καὶ πρὸς τὴν φορὰν τῶν σιτίων, καὶ ὅταν λαλῶμεν καὶ ἐργαζώμεθα αὐτοὶ πλέον· καὶ τοῖς ὄμμασι δακρύομεν πρὸς τὰ λαμπρότερα ὀρῶντες, καὶ ὑπὸ ψύχους καὶ θερμότητος ἰσχυροτέρας, ἥς κρατεῖ τὰ μόρια ταῦτα, ὅταν τύχη ὑγροτέρως ἔχοντα. Οὕτω καὶ αἱ ὑστέραι ὑγραίνονται ἐργαζόμεναι, ὅταν τύχωσιν ὑγροτέρας διαθέσεως. Πάσχουσι δὲ τοῦτο τὸ πάθος καὶ αἱ μάλιστα καλῶς πεφυκυῖαι. Διὸ θεραπείας ἀεὶ δέονται αἱ γυναῖκες ἢ πλείονος ἢ ἐλάττονος, ὥσπερ καὶ τὸ στόμα πτύσεως. Ἄλλ' ἐνίαις τοσαύτῃ ὑγρασίᾳ γίνεται, ὥστε μὴ δύνασθαι καθαρὸν τὸ τοῦ ἀνδρὸς ἀνασπάσαι διὰ τὴν σύμμιξιν τῆς γινομένης ἀπὸ τῆς γυναικὸς ὑγρότητος.

Πρὸς δὲ τούτοις τοῖς πάθεσι καὶ τοσόνδε δεῖ κατανοεῖν τί συμβαίνει, ὅταν δόξη ἐν τῷ ὕπνῳ πλησιάσαι τῷ ἀνδρί, πῶς ἔχουσα ἐξανίσταται, οἶον εἰ ἀσθενεστέρα, καὶ εἰ ἀεὶ, ἢ ὅτε μὲν ὅτε δ' οὐ, ἢ ἐνίῳτε καὶ ἰσχυροτέρα· εἰ δὲ μὴ ξηροτέρα τὸ πρῶτον, εἴτα ἐφυγραίνεται. Δεῖ γὰρ ταῦτα συμβαίνειν τῇ γονίμῳ γυναικί. Τὸ μὲν γὰρ ἐκλύεσθαι σημαίνει προετικὸν εἶναι τὸ σῶμα σπέρματος ἀεὶ, τὴν τ' ἐκποιοῦσαν ποιεῖ ἥ καὶ σωματωδῶν δ' οὐσῶν ἥ ἀσθενεστέραν. Τὸ δ' ἀνόςως τοῦτο πάσχειν σημεῖον ὅτι κατὰ φύσιν καὶ ὃν δεῖ τρόπον ἢ ἄφοδος τούτου γίνεται· εἰ γὰρ μή, νοςώδης (636a.) ἦν ἡ ἀρρωστία. Τὸ δὲ ποτε καὶ ἰσχύειν μᾶλλον, καὶ ξηρὰν εἶναι τὴν ὑστέραν, εἴτ' ἐφυγραίνεσθαι, σημεῖον ὅτι πᾶν τὸ σῶμα λαμβάνει καὶ ἀφανίζει, καὶ οὐ μόνον ἡ ὑστέρα καὶ τὸ σῶμα ἰσχύει. Πνεύματί τε γὰρ ἔλκει ἡ ὑστέρα τὸ προσελθὼν ἔξωθεν αὐτῇ, ὥσπερ πρότερον εἴρηται. Οὐ γὰρ εἰς αὐτὴν προίεται, ἀλλ' οὗ καὶ ὁ ἀνὴρ. Ὅσα δὲ πνεύματι, πάντα ἰσχύϊ ἐργάζεται. Ὡστε δηλὸν ὅτι καὶ τὸ σῶμα προσσπαστικὸν τῆς τοιαύτης.

Εἰσὶ δὲ τινες αἱ πάσχουσι τι τοιοῦτον ὃ καλοῦσιν ἐξανεμοῦσθαι· δεῖ δὴ καὶ τοῦτο μὴ πάσχειν. Ἔστι δὲ τὸ τοιοῦτον πάθος· ὅταν συγγένωνται τῷ ἀνδρί, οὔτε προϊέμεναι δηλαὶ τὸ σπέρμα οὔτε κυῖσκονται, διὸ καὶ καλεῖται ἐξανεμοῦσθαι.

Αἴτιον δὲ τοῦ πάθους ἡ ὑστέρα, ὅταν ἦ λίαν ξηρά· ἐλκύσασα γὰρ πρὸς αὐτὴν τὸ ὑγρὸν ἀφήρισιν ἔξω· τὸ δὲ κατασκελετεύεται, καὶ

μικρόν τι γινόμενον ἐξ αὐτῆς ἀπέπεσέ τε καὶ ἔλαθε διὰ μικρότητα ἐξιόν. Καὶ ὅταν μὲν τοῦτο σφόδρα πάθῃ ἢ ὑστέρα καὶ γένηται ὑπέρξηρος, ταχὺ τ' ἀπέβαλε καὶ ταχὺ δῆλον γίνεται ὅτι οὐ κύει· ἐὰν δὲ μὴ σφόδρα ταχέως ταῦτα ποιῇ, ἐν τῷ μεταξὺ χρόνῳ δοκεῖ κύειν, ὃ ἂν ἔχῃ αὐτὴ πρὸς αὐτήν, ἕως ἂν ἀποβάλλῃ. Καὶ ὅμοια συμβαίνει ταχὺ ταύταις πάθῃ οἷα ταῖς ὀρθῶς κυοῦσαις, καὶ ἐὰν γίνηται πολὺς χρόνος, αἶρεται ἢ ὑστέρα, ὥστε φανερῶς δοκεῖ κύειν, ἕως ἂν ἀποπέσῃ· τότε δ' ὁμοία ἐγένετο οἷα πρὸ τοῦ ἦν. Ἀναφέρουσι δὲ τοῦτο τὸ πάθος εἰς τὸ δαιμόνιον. Ὅ ἐστι θεραπευτόν, ἐὰν μὴ φύσει τοιαύτη ᾖ σφόδρα πάσχουσα τὸ πάσχον. Σημεῖον δὲ τοῦ μὴ τοιαύτας εἶναι, ἐὰν φαίνωνται μὴ προϊέμεναι, ὅταν λάβωσι παρὰ τοῦ ἀνδρός, καὶ μὴ συλλάβωσιν.

Κωλύονται δὲ καὶ ἐὰν σπᾶσμα ἔχωσιν αἱ ὑστέραι. Γίνονται δὲ σπᾶσματα ἐν ταῖς ὑστέραις ἢ φλεγμασίᾳ διατεινομένης τῆς ὑστέρας, ἢ ἐν τῷ τόκῳ πληρώματος πολλοῦ ἐξαπίνης ἐπιτεσόντος καὶ μὴ ἀνοιγομένου τοῦ στόματος· τότε ὑπὸ τῆς διατάσεως γίνεται σπᾶσμα. Σημεῖον δὲ τοῦ μὴ ἔχειν σπᾶσμα, ἐὰν μὴ φαίνεται εἰς φλεγμασίαν ἀφικνουμένη ἐν τοῖς αὐτῆς ἔργοις ἢ ὑστέρα· ἔχουσα γὰρ σπᾶσμα φλεγμαῖνοι ἂν ποτε.

Ἔτι δ' ἐὰν φῦμα ἐπὶ τοῦ στόματος ᾖ, πολλὰ ἐλκωθέντος, ἐμποδίζει πρὸς τὰς συλλήψεις. Σημεῖον δὲ καὶ τοῦ ταῦτα μὴ ἔχειν, ἐὰν φαίνεται ἀνοιγομένη καλῶς ἢ ὑστέρα καὶ συμμύουσα, ὅταν γένηται αὐταῖς τὰ γυναικεῖα καὶ αἱ πρὸς τὸν ἄνδρα (636b.) χρήσεις.

Ἔτι ἔστιν αἷς πως τὸ στόμα συμφύεται, ταῖς μὲν ἐκ γενετῆς ταῖς δὲ διὰ νόσον. Γίνεται δὲ τοῦτο καὶ ἰατὸν καὶ ἀνίατον. Οὐ χαλεπὸν δὲ τοῦτο γινῶναι, ἐὰν ᾖ· οὐ γὰρ οἷόν τ' οὔτε λαμβάνειν οὐδὲν ὦν δεῖ οὔτε προϊεσθαι. Ἐὰν οὖν φαίνεται καὶ δεχομένη παρὰ τοῦ ἀνδρός καὶ ἀφιεῖσα, δῆλον ὅτι οὐκ ἂν ἐνσχεθεῖ τῷ πάθει.

Ὅσαις δὲ τούτων μηδὲν ἐμπόδιον ᾖ, ἀλλ' ἔχουσιν ὃν τρόπον δεῖν εἶρηται ἔχειν, ἂν μὴ ὁ ἀνὴρ αἷτιος ᾖ τῆς ἀτεκνίας, ἀμφοτέρωι μὲν δύνανται τεκνοῦσθαι, πρὸς ἀλλήλους δ' ἐὰν μὴ ὥσι σύμμετροι τῷ ἅμα προϊεσθαι ἀλλὰ πολὺ διαφωνῶσιν, οὐκ ἔσονται τέκνα τούτοις.

Τοῦ μὲν οὖν εἰδέναι τὰ τοῦ ἀνδρός αἷτια ἔστι μὲν καὶ ἄλλα σημεῖα λαβεῖν· ἃ δὲ ῥᾶω μάλιστ' ἂν φαίνοιτο, πρὸς ἄλλας πλησιάζων καὶ γεννῶν.

Τῷ δὲ πρὸς ἀλλήλους μὴ συνδρόμῳ ἔχειν, πάντων τῶν εἰρημένων ὑπαρξάντων, οὐ γεννῶσιν. Δηλοῖ γὰρ ὅτι τοῦτο αἷτιον

μόνον. Εἴπερ γὰρ καὶ ἡ γυνὴ συμβάλλεται εἰς τὸ σπέρμα καὶ τὴν γένεσιν, δῆλον ὅτι δεῖ ἰσοδρομῆσαι παρ' ἀμφοῖν. Ἐὰν οὖν ὁ μὲν ταχὺ ἐκποιήσῃ ἡ δὲ μόλις (τὰ γὰρ πολλὰ αἱ γυναῖκες βραδύτεραι), τοῦτο κωλύει· διὸ καὶ συζευγνύμενοι οὐ γεννῶντες μετ' ἀλλήλων, γεννῶσιν ὅταν ἐντύχωσιν ἰσοδρομοῦσι πρὸς τὴν συνουσίαν. Εἰ γὰρ ἡ μὲν ὀργῶσα καὶ παρεσκευασμένη εἴῃ καὶ ἐννοίας ἔχουσα ἐπιτηδείας, ὁ δὲ προλελυπημένος καὶ κατεψυγμένος, ἀνάγκη τότε ἰσοδρομῆσαι αὐτοὺς ἀλλήλοις.

Ἔτι δ' ἐνίστε γυναιξὶ καὶ ἐξονειρωξάσαις καὶ ἀνδράσιν ἀφροδισιάσασι συμβαίνει εὐρωστοτέροις εἶναι, μὴ ἰσχυρὴν ἀλλ' ὑγιεῖα. Γίνεται δὲ τοῦτο, ὅταν πολὺ τὸ σπέρμα ἢ ἡθροισμένον ἐπὶ τὸν τόπον ὅθεν προῖενται. Ἐὰν οὖν τότε ἀπέλθῃ, οὐδὲν ἀσθενέστεραι γίνονται· οὐ γὰρ αἰεὶ ἐκλύονται ἀπελθόντων, ὅταν ἱκανὰ ἢ τὰ λειπόμενα· οὐδ' ἂν εἰ ἐκεῖνα ἄχρηστα ἢ ἅμα καὶ ῥάω, οἷον πλησμονῆς ἀπαλλαγέντα· διὸ οὐκ ἰσχυρὴ εὐρωστότεραι ἀλλὰ κουφότητι γίνονται. Ἀλλ' ὅταν ἀπὸ τοσούτων ἐπὶ ὧν τὸ σῶμα δεῖται, τότε ἀσθενεστέρας ποιεῖ.

Παύεται δὲ ταχύ, ἂν ἄλλως τις ὑγιάνῃ τὸ σῶμα καὶ ἐν ἡλικίᾳ ἢ, ἢ ταχὺ σπερμοποιεῖ· τῶν γὰρ αὐξανομένων τοῦτ' ἐστὶ ταχὺ καὶ τῶν αὐξητῶν. Καὶ λανθάνουσι τότε μάλιστα

κυῖσκόμεναι. Οὐ γὰρ οἶονται συνειληφέναι, ἐὰν μὴ αἰσθωνται προιέμεναι δὲ τυγχάνουσιν ὑπολαμβάνουσαι ὥς δεῖ ἀπ' ἀμφοῖν συμπεσεῖν ἅμα, καὶ ἀπὸ τῆς γυναικὸς καὶ ἀπὸ τοῦ ἀνδρός. Μάλιστα δὲ λανθάνει, ὅσαι οἶονται ἀδύνατον εἶναι (637a.) συλλαβεῖν, ἐὰν μὴ ξηρανθῶσι καὶ ἐπιδήλως ἀφανισθῇ τὸ δοθέν. Συμβαίνει δ' ἐνίστε πλεον προῖεσθαι καὶ αὐτὴν καὶ τὸν ἄνδρα οὗ ἂν δύνηται ἀφανίσει καὶ τοῦ ἱκανοῦ. Ὅταν οὖν σπάσῃ μὲν ἱκανόν, λειφθῇ δὲ πολὺ, τότε λανθάνουσι κυῖσκόμεναι. Ὅτι δὲ τοιοῦτον ἐνδέχεται γίνεσθαι καὶ οὐκ ἐξ ἅπαντος γίνεται τὸ πάθος, δηλοῖ ὅσα τῶν ζώων ἀπὸ μιᾶς ὀχείας πολλὰ τίκτει, καὶ ἡ τῶν διδύμων γένεσις, ὅταν ἀπὸ μιᾶς γένηται· δῆλον γὰρ ὅτι ἐξ οὐχ ἅπαντος ἐγένετο, ἀλλὰ μέρος τι αὐτοῦ ἔλαβεν ὁ τόπος, τὸ δὲ περιελείπετο πολλαπλάσιον. Ἔτι εἰ πολλὰ ἀπὸ μιᾶς ὀχείας γίνεται, ὅπερ φαίνεται ἐπὶ τῶν ὑῶν καὶ τῶν διδύμων ἐνίστε γινόμενον, δῆλον ὅτι οὐκ ἀπὸ παντὸς ἔρχεται τὸ σπέρμα τοῦ σώματος, ἀλλ' ἐφ' ἐκάστου εἶδους ἐμερίζετο. Ἀπὸ παντὸς μὲν γὰρ ἐνδέχεται ἀποχωρισθῆναι, καὶ τὸ πᾶν εἰς πολλὰ. Ὡστε ἅμα καὶ κατὰ μέρος ἀδύνατον.

Ἔτι ἡ γυνὴ προῖεται εἰς τὸ πρόσθεν τοῦ στόματος τῶν ὑστερῶν,

οὗ καὶ ὁ ἀνὴρ, ὅταν πλησιάσῃ. Ἐντεῦθεν γὰρ σπᾶ τῷ πνεύματι, ὥσπερ τοῖς στόμασιν ἢ τοῖς μυκτῆρσιν. Πάντα γὰρ ὅσα μὴ ὀργάνοις προσάγεται, ἢ φύσιν ἔχει ἀνωθεῖν κοῦφα ὄντα, ἢ πνεύματι ἔλκονται ἐκ τούτου τοῦ τόπου. Διὸ ἐπιμελοῦνται ὅπως γένηται ξηρὸς οὕτως, ὥσπερ πρὶν τοῦτο συμβαίνειν.

Πέφυκε δ' οὕτως ἡ ὁδός, δι' ἧς ἔρχεται, ταῖς γυναιξίν. Ἐχουσι καυλόν, ὥσπερ καὶ οἱ ἄνδρες τὸ αἰδοῖον, ἀλλ' ἐν τῷ σώματι. Ἀποπνέουσι It;δὲ> διὰ τοῦτο μικρῷ τε πόρῳ ἀνωτέρῳ <ἦ> ἢ οὐροῦσιν αἱ γυναῖκες. Διὸ καὶ ὅταν ὀργῶσιν ἀφροδισιασθῆναι, οὗτος ὁ τόπος οὐκ ἔχει ὁμοίως καὶ πρὶν ὀργᾶν. Ἀπὸ δὴ τούτου τοῦ καυλοῦ γίνεται ἔκπτωσις, καὶ τὸ ἔμπροσθεν τῆς ὑστέρας πολλῷ μείζον ἢ καθ' ἣν εἰς ἐκεῖνον τὸν τόπον ἐκπίπτει. Ὅμοιον δ' ἐστὶ τοῦτο κατὰ τοῦτο ταῖς ῥίσιν· καὶ γὰρ αἱ ῥῖνες ἔχουσιν εἴσω εἰς τὸν φάρυγγα πόρον τινὰ καὶ εἰς τὸν ἔξω ἀέρα· οὕτω κἀκεῖνος καὶ ἔξω ἔχει πόρον μικρόν τε πάνυ καὶ στενόν, ὅσον πνεύματι ἐξοδόν, τὸν δ' εἰς τὸ πρόσθεν τῆς ὑστέρας εὐρύχωρον [εὐρουν] ὥσπερ αἱ ῥῖνες τὸν εἰς τὸν ἀέρα μείζω τοῦ εἰς τὸ στόμα καὶ φάρυγγα.

Ὅμοίως δὲ καὶ αἱ γυναῖκες μείζω τὸν εἰς τὸ ἔμπροσθεν τῶν ὑστερῶν πόρον ἔχουσι καὶ εὐρυχωρότερον τοῦ ἔξω.

Ὅ τι συμβάλλεται εἰς τοῦτο, ποιεῖ τῶν αὐτῶν παθημάτων, ὅτι καὶ ἡ γυνὴ γόνιμον προίεται. Τὰ δ' αὐτὰ αἷτια, ταῦτα συμβαίνει. Καὶ γὰρ οἷς ἡ νόσου ἢ θανάτου δοκεῖ ἐτέρου τὸ αἷτιον, θεωροῦσι τὸ (637b.) τελευταῖον ἐπὶ τὰς ἀρχάς, ὃ δεῖ ὀρᾶν. Τοῖς μὲν γὰρ ταῦτα αἷτια τὰ πρῶτα, τοῖς δ' οὐδέν, τῶν δὲ τὰ μὲν τὰ δ' οὐ.

Ἀποδίδωσιν οὖν κατὰ λόγον καὶ τὰ ἀποβαίνοντα· καὶ τοῖς μὲν διὰ πάντων συμβαίνει διελθεῖν τῶν αὐτῶν παθημάτων, τοῖς δὲ διὰ πολλῶν, οἷς πολλά, τοῖς δὲ δι' ὀλίγων, τοῖς δὲ δι' οὐδενός, ὅσοις μηδέν.

Φανερά δὲ τὰ ζῷά ἐστιν, ὅταν ὀχευθῆναι δέηται. Διώκει γὰρ τὰ ἄρρενα, οἷον αἱ ἀλεκτορίδες διώκουσι καὶ ὑφιζάνουσιν αὐταί, ἐὰν μὴ ὀργᾶ ὁ ἄρρην. Τοῦτο δὲ ποιεῖ καὶ ἄλλα ζῷα. Εἰ δὴ ταῦτα πάθη πᾶσι τοῖς ζῷοις φαίνεται ὄντα περὶ τὴν συνουσίαν, δηλὸν ὅτι καὶ τὰ αἷτια συμβαίνοντα.

Ἀλλὰ μὴν ἢ γ' ὄρνις οὐ μόνον τοῦ λαβεῖν ἐπιθυμίαν ἔχει, ἀλλὰ καὶ τοῦ προέσθαι. Σημεῖον δὲ τούτου· ἐὰν γὰρ μὴ παρῇ ὁ ἄρρην, πίπτει ὑπ' ἄλλην καὶ ἔγκυος γίνεται καὶ τίκτει ὑπηνέμια, ὥς ἐπιθυμοῦσα καὶ τοῦ ἀφεῖναι τότε, καὶ ἀφεῖσα, It;ὡς> ὅταν καὶ τῷ

ἄρρενι ἀνὴρ συνῆ.

Ποιεῖ δὲ τοῦτο καὶ τᾶλλα, ἐπειδὴ καὶ τῶν ἄδουσῶν ἀκρίδων ἤδη τις ἐπειράθη τρέφουσα, ἔτι ἀπαλὰς λαβοῦσα· καὶ ἐγένοντο αὐτόματοι ἔγκυοι. Ἐκ δὴ τούτων δῆλον ὅτι συμβάλλεται εἰς τὸ σπέρμα πᾶν τὸ θῆλυ, εἴ γε καὶ ἐφ' ἐνὸς γένους φαίνεται τοῦτο γινόμενον. Οὐδὲν γὰρ διαφέρει τὸ φὸν τὸ ὑπηνέμιον τούτου, ἀλλὰ τῷ μὴ γεννᾶν ζῶον. Τοῦτο δ' ὅτι καὶ παρ' ἀμφοῖν ἦλθεν. Διὸ οὐδὲ τὰ ἀπὸ τοῦ ἄρρενος ἅπαντα γόνιμα φαίνεται, ἀλλ' ἔνια ἄγονα, ὅταν μὴ ἐξ ἀμφοῖν ὡς δεῖ συναρμοσθῇ.

Ἔτι γυναῖκες ἐξονειρώττουσι, καὶ ταύταις γίνεται, ὡς ὅταν συγγένωνται ἀνδρί, ταυτὰ παθήματα μετὰ τὸν ὀνειρωγμόν, διάλυσις καὶ ἀδυναμία. Δῆλον τοίνυν, εἰ ἐν τῷ ἐξονειρωγμῷ φαίνονται προῖεμεναι, καὶ τότε συμβάλλονται, ὅτι μετὰ τοὺς ἐξονειρωγμοὺς ὁ αὐτὸς τόπος ἀφυγραίνεται, καὶ θεραπείας δέονται τῆς αὐτῆς αὐταὶ ὑφ' αὐτῶν, ὥσπερ ὅταν συγγένωνται ἀνδρί. Ὡστε φανερόν ὅτι παρ' ἀμφοῖν γίνεται πρόεσις τοῦ σπέρματος, εἰ μέλλει γόνιμον ἔσεσθαι.

Προῖενται δ' οὐκ εἰς αὐτὰς αἱ ὑστέραι, ἀλλ' ἔξω, οὗ καὶ ὁ ἀνὴρ· εἴτ' ἐκεῖθεν ἔλκει εἰς αὐτάς. Ὡν τὰ μὲν γεννᾷ ἀφ' αὐτῶν τὰ θήλεα, οἷον ὄρνις τὰ ὑπηνέμια, τὰ δ' οὐδέν, οἷον ἵπποι καὶ πρόβατα. Ἡ ὅτι ἡ μὲν ὄρνις εἰς τὴν ὑστέραν προῖεται, καὶ οὐκ ἔστιν ἔξω τόπος εἰς ὃν ἀφήσιν, οὐδ' ὁ ἄρρην; Διὸ ἐὰν μὴ τύχη ὀχεύων, εἰς τὴν γῆν ἐκχεῖ. Τοῖς δὲ τετράποσιν ἔστιν ἔξω τόπος ἄλλος, εἰς ὃν καὶ τὸ θῆλυ (638a.) προῖεται καὶ τὸ ἄρρεν.

Ὅπερ τοῖς μὲν ἄλλοις μετὰ τῶν ἄλλων ὑγρῶν συγχεῖται, καὶ οὐ συνίσταται ἐν τῇ ὑστέρα διὰ τὸ μὴ εἰσιέναι, τοῖς δ' ὄρνισι λαβοῦσα ἡ ὑστέρα συμπτέττει καὶ σῶμά τι ὅμοιον τᾶλλα, πλὴν οὐ ζῶον, διότι δεῖ ἐξ ἀμφοῖν τὸ ζῶον εἶναι.

Ἔστι δ' ἐνστήναι εἰ ἀληθῆ λέγουσι φάσκουσαι, ὅταν ἐξονειρώττωσι, ξηραὶ ἀνίστασθαι. Δῆλον γὰρ ὅτι ἔλκει ἡ ὑστέρα ἄνωθεν, ὥστε διὰ τί οὐ γεννᾷ αὐτὰ καθ' αὐτὰ τὰ θήλεα, ἐπεὶ περ καὶ μιχθὲν ἔλκει τὸ τοῦ ἄρρενος; Διὰ τί οὐχὶ καὶ ἀμιγῆς τὸ αὐτῆς ἔλκει, ὅπερ εἰς τὸ ἔξω διατείνει;

Αἷς γίνεται τοῦτο τὸ πάθος κυούσαις ἔτη πολλά. Τίκτουσι γὰρ ὁ καλοῦσι μύλην, οἷον συνέβη τινὶ γυναικί. Συγγενομένης τῷ ἀνδρὶ καὶ δοξάσης συλλαβεῖν ὁ τ' ὄγκος ηὐξάνετο τῆς ὑστέρας καὶ τᾶλλα ἐγίνετο τὸ πρῶτον κατὰ λόγον.

Ἐπεὶ δ' ὁ χρόνος ἦν τοῦ τόκου, οὗτ' ἔτικτεν οὗθ' ὁ ὄγκος ἐλάττων

ἐγίνετο, ἀλλ' ἔτη τρία ἢ τέτταρα οὕτω διετέλεσεν, ἕως δυσεντερίας γενομένης καὶ κινδυνευσάσης αὐτῆς ἔτεκε σάρκα εὐμεγέθη, ἣν καλοῦσι μύλην. Ἐνίαις δὲ καὶ συγκαταγῆράσκει τὸ πάθος καὶ συναποθνήσκει. Πότερον δὲ διὰ θερμότητα γίνεται τὸ πάθος τοῦτο, ὅταν τύχη ἡ ὑστέρα θερμὴ καὶ ξηρὰ οὕσα καὶ διὰ ταῦτα σπαστική πρὸς αὐτήν, καὶ οὕτως ὥστ' ἔστιν ἀνελέσθαι καὶ φυλάξαι πρὸς αὐτήν; Οὕτω γὰρ ἐχούσαις, ἐὰν μὴ μεμιγμένον ἐστὶ τὸ ἀπ' ἀμφοῖν, ἀλλ' ὥσπερ τὸ ὑπηνέμιον ἐνδέξαιτο ἀπὸ θατέρου, τότε γίνεται ἡ καλουμένη μύλη, οὔτε ζῶον, διὰ τὸ μὴ παρ' ἀμφοῖν, οὔτ' ἄψυχον, διὰ τὸ ἔμψυχον <τὸ> ληφθὲν εἶναι, ὥσπερ τὰ ὑπηνέμια.

Πολὺν δὲ χρόνον ἐμμένει διὰ τε τὴν τῆς ὑστέρας διάθεσιν, καὶ διότι ἡ μὲν ὄρνις πολλὰ εἰς αὐτὴν τίκτουσα, ὑπὸ τούτων τεινομένης τῆς ὑστέρας, προάγει καὶ τίκτει· καὶ ὅταν ἅπαξ οἰχθῇ, καὶ τὸ τελευταῖον ἐξέρχεται. Οὐ γὰρ ἐστὶ τὸ εἶργον, ἀλλὰ καὶ τὸ σῶμα προετικὸν γενόμενον, ὅτε ἐπληροῦτο, οὐκέτι τὴν ὑστέραν ποιεῖ ἀντισπαστικήν. Ὅσα δὲ ζυφοφορεῖ, διὰ τὸ μεταβάλλειν τὴν δύναμιν αὐξανομένου καὶ ἄλλοτε ἀλλοίας δεῖσθαι τροφῆς, ἐπιφλεγμαίνουσά τι ἡ ὑστέρα ποιεῖ τακτὸν τὸν τόκον. Ἡ δὲ σάρξ, διὰ τὸ μὴ ζῶον εἶναι, ἀεὶ τῶν ὁμαλῶν.

Δεῖ γὰρ ὁ βαρύνει τὴν ὑστέραν οὐδὲν ποιεῖν φλεγμαίνειν. Ὡς ἐνίαις γε καὶ συναποθνήσκει τὸ πάθος, ἐὰν μὴ τι εὐτύχημα ἀσθενήματος συμβῇ, οἷον τῇ ληφθείσῃ ὑπὸ τῆς (638b.) δυσεντερίας.

Πότερον δ' ὥσπερ εἴρηται, διὰ θερμότητα γίνεται τὸ πάθος ἢ μᾶλλον δι' ὑγρότητα, ὅτι καὶ ἔστι τὸ πλήρωμα οἷον μύει, ἢ ὅταν μὴ οὕτως ἢ ψυχρὰ ἡ ὑστέρα ὥστε ἀφεῖναι, μηδ' οὕτω θερμὴ ὥστε πέσαι; Διὸ καὶ χρόνιον τὸ πάθος, ὥσπερ καὶ τὰ ἐν ἐψήσει πολὺν χρόνον διαμένει. Τὰ δ' ἐψόμενα πέρας ἔχει καὶ ταχυτῆτα. Αἱ δὲ τοιαῦται ὑστέραι ἀκρόταται οὕσαι τὸν χρόνον ποιοῦσι πολὺν. Ἐτι δὲ τὸ μὴ ζῶον εἶναι μὴ κινούμενον οὐ ποιεῖ τὴν ὥδιν· ἡ γὰρ κίνησις τῶν συνδέσμων ὥδις ἐστίν, ἣν διὰ τὸ ζῆν <ποιεῖ> προῖεσθαι τὸ ἔμβρυον.

Καὶ ἡ σκληρότης δ' ἡ γινομένη τοῦ πράγματος μολύσεως ἔργον ἐστίν. Οὕτω γὰρ γίνεται σκληρὸν ὥστε πελέκει οὐ δύνανται διακόπτειν. Τὰ μὲν οὖν ἐφθὰ καὶ πάντα τὰ πεπεμμένα μαλακὰ γίνεται, τὰ δὲ μεμολυμμένα ἄπεπτα καὶ σκληρά.

Ὅτι πολλοὶ ἰατροὶ ἀγνοοῦντες δι' ὁμοιότητα μύλας εἶναι τὸ πάθος λέγουσιν, ἂν μόνον ἴδωσι τὰς τε κοιλίας ἐπαιρομένας ἄνευ ὕδρωπος

καὶ τῶν ἐπιμηνίων σχέσιν, ὅταν χρονίζῃ τοῦτο τὸ πάθος. Τὸ δ' οὐκ ἔστιν, ἀλλ' ὀλιγάκις γίνονται αἱ γινόμεναι μύλαι. Ἄλλοτε μὲν σύρρους γίνεται ψυχρῶν καὶ ὑγρῶν περιττωμάτων καὶ ὑδαρῶν, ἄλλοτε δὲ παχυτέρων, εἰς τὸν περὶ τὴν κοιλίαν τόπον, ἐὰν τὴν φύσιν τοιαῦτα ἢ ἢ τὴν ἔξιν. Ταῦτα γὰρ οὐτ' ὀδυνηρὰν παρέχει οὔτε θερμότητα διὰ ψυχρότητα. Αὐξησιν δὲ λαβόντα τὰ μὲν μείζω τὰ δ' ἐλάττω, οὐδεμίαν ἄλλην ἐπισπῶνται νόσον παρ' ἑαυτά, ἀλλ' ὥσπερ πῆρωμά τι ἡσυχάζει. Ἡ δ' ἀπόλειψις τῶν καταμηνίων γίνεται διὰ τὸ δεῦρο καταναλίσκεσθαι τὰ περιττώματα, ὥσπερ καὶ ὅταν θηλάζωνται· καὶ γὰρ ταύταις ἢ οὐ γίνεται ἢ ὀλίγα.

Ἔστι δ' ὅτε καὶ εἰς τὸν μεταξὺ τόπον τῆς ὑστέρας καὶ τῆς κοιλίας συρρέον ἐκ τῆς σαρκὸς δοκεῖ μύλη εἶναι, οὐκ οὕσα. Ἔστι δ' οὐ χαλεπὸν γινῶναι, ἂν μύλη ἢ, θιγγάνοντα τῆς ὑστέρας. Ἐὰν γὰρ ἢ εὐσταλῆς καὶ μὴ ἔχουσα αὐξησιν, δῆλον ὅτι οὐκ ἐν ἐκείνῃ τὸ πάθος. Ἐὰν δὲ τοιαύτη ἢ οἷον ὅτε παιδίον ἔχει [μύλην], θερμὴ τε [καὶ ψυχρὰ] καὶ ξηρὰ ἔσται διὰ τὸ εἶσω τετράφθαι τὰ ὑγρά, καὶ τὸ στόμα τοιαύτη οἷον ὅταν κύωσιν. Ἐὰν δέ τι ἄλλο ἢ ὁ ὄγκος, ἔσται ψυχρὰ θιγγανομένη καὶ οὐ ξηρά, καὶ ἀεὶ τὸ στόμα ὅμοιον.

Κεφάλαιο 1

(639a.) Περὶ πᾶσαν θεωρίαν τε καὶ μέθοδον, ὁμοίως ταπεινότεραν τε καὶ τιμιωτέραν, δύο φαίνονται τρόποι τῆς ἔξεως εἶναι, ὧν τὴν μὲν ἐπιστήμην τοῦ πράγματος καλῶς ἔχει προσαγορεύειν, τὴν δ' οἶον παιδεῖαν τινά. Πειπαιδευμένου γὰρ ἐστὶ κατὰ τρόπον τὸ δύνασθαι κρῖναι εὐστόχως τί καλῶς ἢ μὴ καλῶς ἀποδίδωσιν ὁ λέγων. Τοιοῦτον γὰρ δὴ τίνα καὶ τὸν ὅλως πεπαιδευμένον οἰόμεθ' εἶναι, καὶ τὸ πεπαιδεῦσθαι τὸ δύνασθαι ποιεῖν τὸ εἰρημένον. Πλήν τοῦτον μὲν περὶ πάντων ὡς εἰπεῖν κριτικόν τίνα νομίζομεν εἶναι ἓνα τὸν ἀριθμὸν ὄντα, τὸν δὲ περὶ τινος φύσεως ἀφωρισμένης· εἴη γὰρ ἂν τις ἕτερος τὸν αὐτὸν τρόπον τῷ εἰρημένῳ διακείμενος περὶ μόριον. Ὡστε δηλὸν ὅτι καὶ τῆς περὶ φύσιν ἱστορίας δεῖ τινὰς ὑπάρχειν ὅρους τοιούτους πρὸς οὓς ἀναφέρων ἀποδέξεται τὸν τρόπον τῶν δεικνυμένων, χωρὶς τοῦ πῶς ἔχει τάληθές, εἴτε οὕτως εἴτε ἄλλως. Λέγω δ' οἶον πότερον δεῖ λαμβάνοντας μίαν ἐκάστην οὐσίαν περὶ ταύτης διορίζειν καθ' αὐτήν, οἶον περὶ ἀνθρώπου φύσεως ἢ λέοντος ἢ βοὸς ἢ καὶ τινος ἄλλου καθ' ἕκαστον προχειριζομένους, ἢ τὰ κοινῇ συμβεβηκότα πᾶσι κατὰ τι κοινὸν ὑποθεμένους. Πολλὰ γὰρ ὑπάρχει ταῦτά πολλοῖς γένεσιν ἑτέροις οὓσιν ἀλλήλων, οἶον ὕπνος, ἀναπνοή, αὐξησις, φθίσις, θάνατος, καὶ πρὸς τούτοις ὅσα τοιαῦτα τῶν λειπομένων παθῶν τε καὶ διαθέσεων· ἄδηλον γὰρ καὶ ἀδιόριστόν ἐστι λέγειν νῦν περὶ τούτων. Φανερόν δ' ὅτι καὶ κατὰ μέρος μὲν λέγοντες περὶ πολλῶν ἐροῦμεν πολλάκις ταῦτά· καὶ γὰρ ἵπποις καὶ κυσὶ καὶ ἀνθρώποις ὑπάρχει τῶν εἰρημένων ἕκαστον, ὥστε ἐὰν καθ' ἕκαστον τῶν συμβεβηκότων λέγῃ τις, πολλάκις ἀναγκασθήσεται περὶ τῶν αὐτῶν λέγειν, ὅσα ταῦτά μὲν ὑπάρχει τοῖς εἶδει διαφέρουσι τῶν ζώων, αὐτὰ δὲ μηδεμίαν ἔχει διαφοράν. Ἔτερα δὲ ἴσως ἐστὶν οἷς συμβαίνει τὴν μὲν κατηγορίαν ἔχειν τὴν αὐτήν, διαφέρειν (639b.) δὲ τῇ κατ' εἶδος διαφορᾷ, οἶον ἢ τῶν ζώων πορεία· οὐ γὰρ φαίνεται μία τῷ εἶδει· διαφέρει γὰρ πτησις καὶ νεῦσις καὶ βάδισις καὶ ἔρψις. Διὸ δεῖ μὴ διαλεληθέναι πῶς ἐπισκεπτέον, λέγω δὲ πότερον κοινῇ κατὰ γένος πρῶτον, εἴτα ὕστερον περὶ τῶν ἰδίων θεωρητέον, ἢ καθ' ἕκαστον εὐθύς. Νῦν γὰρ οὐ διώρισται περὶ αὐτοῦ οὐδέ γε τὸ νῦν ῥηθησόμενον, οἶον πότερον καθάπερ οἱ μαθηματικοὶ τὰ περὶ τὴν ἀστρολογίαν δεικνύουσιν, οὕτω δεῖ καὶ τὸν φυσικὸν τὰ φαινόμενα

πρῶτον τὰ περὶ τὰ ζῷα θεωρήσαντα καὶ τὰ μέρη τὰ περὶ ἕκαστον, ἔπειθ' οὕτω λέγειν τὸ διὰ τί καὶ τὰς αἰτίας, ἢ ἄλλως πως.

Πρὸς δὲ τούτοις, ἐπεὶ πλείους ὀρῶμεν αἰτίας περὶ τὴν γένεσιν τὴν φυσικὴν, οἷον τὴν τε οὗ ἔνεκα καὶ τὴν ὅθεν ἢ ἀρχὴ τῆς κινήσεως, διοριστέον καὶ περὶ τούτων, ποία πρώτη καὶ δευτέρα πέφυκεν. Φαίνεται δὲ πρώτη, ἣν λέγομεν ἔνεκά τινος· λόγος γὰρ οὗτος, ἀρχὴ δ' ὁ λόγος ὁμοίως ἔν τε τοῖς κατὰ τέχνην καὶ ἐν τοῖς φύσει συνεστηκόσιν. Ἡ γὰρ τῇ διανοίᾳ ἢ τῇ αἰσθήσει ὀρισάμενος ὁ μὲν ἱατρὸς τὴν ὑγίειαν, ὁ δ' οἰκοδόμος τὴν οἰκίαν, ἀποδιδόασιν τοὺς λόγους καὶ τὰς αἰτίας οὗ ποιοῦσιν ἐκάστου, καὶ διότι ποιητέον οὕτως. Μᾶλλον δ' ἐστὶ τὸ οὗ ἔνεκα καὶ τὸ καλὸν ἐν τοῖς τῆς φύσεως ἔργοις ἢ ἐν τοῖς τῆς τέχνης. Τὸ δ' ἐξ ἀνάγκης οὐ πᾶσιν ὑπάρχει τοῖς κατὰ φύσιν ὁμοίως, εἰς ὃ πειρῶνται πάντες σχεδὸν τοὺς λόγους ἀνάγειν, οὐ διελόμενοι ποσαχῶς λέγεται τὸ ἀναγκαῖον. Ὑπάρχει δὲ τὸ μὲν ἀπλῶς τοῖς αἰδίοις, τὸ δ' ἐξ ὑποθέσεως καὶ τοῖς ἐν γενέσει πᾶσιν, ὥσπερ ἐν τοῖς τεχναστοῖς, οἷον οἰκία καὶ τῶν ἄλλων ὄψου τῶν τοιούτων. Ἀνάγκη δὲ τοιάνδε τὴν ὕλην ὑπάρξει, εἰ ἔσται οἰκία ἢ ἄλλο τι τέλος· καὶ γενέσθαι τε καὶ κινηθῆναι δεῖ τόδε πρῶτον, εἴτα τόδε, καὶ τοῦτον δὴ τὸν τρόπον ἐφεξῆς μέχρι τοῦ τέλους καὶ οὗ ἔνεκα γίνεται ἕκαστον καὶ ἔστιν. Ὡσαύτως δὲ καὶ ἐν τοῖς φύσει γιγνομένοις. Ἄλλ' ὁ (640a.) τρόπος τῆς ἀποδείξεως καὶ τῆς ἀνάγκης ἕτερος ἐπὶ τε τῆς φυσικῆς καὶ τῶν θεωρητικῶν ἐπιστημῶν. Εἴρηται δ' ἐν ἑτέροις περὶ τούτων. Ἡ γὰρ ἀρχὴ τοῖς μὲν τὸ ὄν, τοῖς δὲ τὸ ἐσόμενον· ἐπεὶ γὰρ τοιόνδε ἐστὶν ἢ ὑγίεια ἢ ὁ ἄνθρωπος, ἀνάγκη τόδ' εἶναι ἢ γενέσθαι, ἀλλ' οὐκ ἐπεὶ τόδ' ἐστὶν ἢ γέγονεν, ἐκεῖνο ἐξ ἀνάγκης ἐστὶν ἢ ἔσται. Οὐδ' ἔστιν εἰς αἶδιον συναρτῆσαι τῆς τοιαύτης ἀποδείξεως τὴν ἀνάγκην, ὥστε εἰπεῖν, ἐπεὶ τόδε ἐστίν, ὅτι τόδε ἐστίν. Διόρισται δὲ καὶ περὶ τούτων ἐν ἑτέροις, καὶ ποίοις ὑπάρχει καὶ ποῖα ἀντιστρέφει καὶ διὰ τίν' αἰτίαν.

Δεῖ δὲ μὴ λεληθέναι καὶ πότερον προσήκει λέγειν, ὥσπερ οἱ πρότερον ἐποιοῦντο τὴν θεωρίαν, πῶς ἕκαστον γίνεσθαι πέφυκε μᾶλλον ἢ πῶς ἔστιν. Οὐ γάρ τι μικρὸν διαφέρει τοῦτο ἐκείνου.

Ἔοικε δ' ἐντεῦθεν ἀρκτέον εἶναι, καθάπερ καὶ πρότερον εἵπομεν, ὅτι πρῶτον τὰ φαινόμενα ληπτέον περὶ ἕκαστον γένος, εἴθ' οὕτω τὰς αἰτίας τούτων λεκτέον, καὶ περὶ γενέσεως· μᾶλλον γὰρ τάδε συμβαίνει καὶ περὶ τὴν οἰκοδόμησιν, ἐπεὶ τοιόνδ' ἐστὶ τὸ εἶδος τῆς οἰκίας, ἢ τοιόνδ' ἐστὶν ἢ οἰκία, ὅτι γίνεται οὕτως. Ἡ γὰρ γένεσις

ἔνεκα τῆς οὐσίας ἐστίν, ἀλλ' οὐχ ἡ οὐσία ἔνεκα τῆς γενέσεως. Διόπερ Ἐμπεδοκλῆς οὐκ ὀρθῶς εἶρηκε λέγων ὑπάρχειν πολλὰ τοῖς ζώοις διὰ τὸ συμβῆναι οὕτως ἐν τῇ γενέσει, οἷον καὶ τὴν ῥάχιν τοιαύτην ἔχειν, ὅτι στραφέντος καταχθῆναι συνέβη, ἀγνοῶν πρῶτον μὲν ὅτι δεῖ τὸ σπέρμα τὸ συνιστάν ὑπάρχειν τοιαύτην ἔχον δύναμιν, εἴτα ὅτι τὸ ποιῆσαν πρότερον ὑπῆρχεν οὐ μόνον τῷ λόγῳ ἀλλὰ καὶ τῷ χρόνῳ· γεννᾷ γὰρ ὁ ἄνθρωπος ἄνθρωπον, ὥστε διὰ τὸ ἐκεῖνον τοιόνδ' εἶναι ἡ γένεσις τοιάδε συμβαίνει τῷδί.

Ὅμοίως δὲ καὶ ἐπὶ τῶν αὐτομάτως δοκούντων γίνεσθαι, καθάπερ καὶ ἐπὶ τῶν τεχναστῶν· ἓνια γὰρ καὶ ἀπὸ ταῦτομάτου γίνεται ταῦτα τοῖς ἀπὸ τέχνης, οἷον ὑγίεια. Τῶν μὲν οὖν προϋπάρχει τὸ ποιητικὸν ὅμοιον, οἷον ἀνδριαντοποιητική· οὐ γὰρ γίνεται αὐτόματον. Ἡ δὲ τέχνη λόγος τοῦ ἔργου ὁ ἄνευ τῆς ὕλης ἐστίν. Καὶ τοῖς ἀπὸ <τέχνης τὰ ἀπὸ> τύχης ὁμοίως· ὥς γὰρ ἡ τέχνη ἔχει, οὕτω γίνεται. Διὸ μάλιστα μὲν λεκτέον ὥς ἐπειδὴ τοῦτ' ἦν τὸ ἀνθρώπῳ εἶναι, διὰ τοῦτο ταῦτ' ἔχει· οὐ γὰρ ἐνδέχεται εἶναι ἄνευ τῶν μορίων τούτων. Εἰ δὲ μή, ὅτι ἐγγύτατα τούτου, καὶ ἡ ὅλως (ὅτι ἀδύνατον ἄλλως) ἡ καλῶς γε (640b.) οὕτως. Ταῦτα δ' ἔπεται. Ἐπεὶ δ' ἐστὶ τοιοῦτον, τὴν γένεσιν ὧδι καὶ τοιαύτην συμβαίνειν ἀναγκαῖον. Διὸ γίνεται πρῶτον τῶν μορίων τότε, εἴτα τότε. Καὶ τοῦτον δὴ τὸν τρόπον ὁμοίως ἐπὶ πάντων τῶν φύσει συνισταμένων. Οἱ μὲν οὖν ἀρχαῖοι καὶ πρῶτοι φιλοσοφήσαντες περὶ φύσεως περὶ τῆς ὑλικῆς ἀρχῆς καὶ τῆς τοιαύτης αἰτίας ἐσκόπουν, τίς καὶ ποία τις, καὶ πῶς ἐκ ταύτης γίνεται τὸ ὅλον, καὶ τίνος κινουντος, οἷον νείκους ἢ φιλίας ἢ νοῦ ἢ τοῦ αὐτομάτου, τῆς δ' ὑποκειμένης ὕλης τοιάνδε τινὰ φύσιν ἐχούσης ἐξ ἀνάγκης, οἷον τοῦ μὲν πυρὸς θερμὴν, τῆς δὲ γῆς ψυχράν, καὶ τοῦ μὲν κούφην, τῆς δὲ βαρεῖαν. Οὕτως γὰρ καὶ τὸν κόσμον γεννῶσιν. Ὅμοίως δὲ καὶ περὶ τὴν τῶν ζώων καὶ τῶν φυτῶν γένεσιν λέγουσιν, οἷον ὅτι ἐν τῷ σώματι ῥέοντος μὲν τοῦ ὕδατος κοιλίαν γενέσθαι καὶ πᾶσαν ὑποδοχὴν τῆς τε τροφῆς καὶ τοῦ περιττώματος, τοῦ δὲ πνεύματος διαπορευθέντος τοὺς μυκτῆρας ἀναρραγῆναι. Ὁ δ' ἀῆρ καὶ τὸ ὕδωρ ὕλη τῶν σωμάτων ἐστίν· ἐκ τῶν τοιούτων γὰρ σωμάτων συνιστᾷσι τὴν φύσιν πάντες. Εἰ δ' ἔστιν ὁ ἄνθρωπος καὶ τὰ ζῷα φύσει καὶ τὰ μόρια αὐτῶν, λεκτέον ἂν περὶ σαρκὸς εἶη καὶ ὀστοῦ καὶ αἵματος καὶ τῶν ὁμοιομερῶν ἀπάντων. Ὅμοίως δὲ καὶ τῶν ἀνομοιομερῶν, οἷον προσώπου, χειρός, ποδός, ἧ τε τοιοῦτον ἕκαστόν ἐστιν αὐτῶν καὶ κατὰ ποίαν δύναμιν. Οὐ γὰρ ἰκανὸν τὸ ἐκ

τίνων ἐστίν, οἷον πυρὸς ἢ γῆς, ὥσπερ κἂν εἰ περὶ κλίνης ἐλέγομεν ἢ τινος ἄλλου τῶν τοιούτων, ἐπειρώμεθα μᾶλλον ἂν διορίζειν τὸ εἶδος αὐτῆς ἢ τὴν ὕλην, οἷον τὸν χαλκὸν ἢ τὸ ξύλον· εἰ δὲ μή, τὴν γε τοῦ συνόλου· κλίνη γὰρ τόδε ἐν τῷδε ἢ τόδε τοιόνδε, ὥστε κἂν περὶ τοῦ σχήματος εἶη λεκτέον, καὶ ποῖον τὴν ιδέα. Ἡ γὰρ κατὰ τὴν μορφήν φύσις κυριωτέρα τῆς ὑλικῆς φύσεως. Εἰ μὲν οὖν τῷ σχήματι καὶ τῷ χρώματι ἕκαστόν ἐστι τῶν τε ζώων καὶ τῶν μορίων, ὀρθῶς ἂν Δημόκριτος λέγοι· φαίνεται γὰρ οὕτως ὑπολαβεῖν. Φησὶ γοῦν παντὶ δῆλον εἶναι οἷόν τι τὴν μορφήν ἐστὶν ὁ ἄνθρωπος, ὡς ὄντος αὐτοῦ τῷ τε σχήματι καὶ τῷ χρώματι γνωρίμου. Καίτοι καὶ ὁ τεθνεὺς ἔχει τὴν αὐτὴν τοῦ σχήματος μορφήν, ἀλλ' ὅμως οὐκ ἔστιν ἄνθρωπος. Ἔτι δ' ἀδύνατον εἶναι χεῖρα ὁπωσοῦν διακειμένην, οἷον χαλκὴν ἢ ξυλίνην, πλὴν (641a.) ὁμωνύμως, ὥσπερ τὸν γεγραμμένον ἱατρὸν. Οὐ γὰρ δυνήσεται ποιεῖν τὸ ἑαυτῆς ἔργον, ὥσπερ οὐδ' αὐλοὶ λίθινοι τὸ ἑαυτῶν ἔργον, οὐδ' ὁ γεγραμμένος ἱατρός. Ὅμοίως δὲ τούτοις οὐδὲ τῶν τοῦ τεθνηκότος μορίων οὐδὲν ἔτι τῶν τοιούτων ἐστὶ, λέγω δ' οἷον ὀφθαλμός, χεῖρ. Λίαν οὖν ἀπλῶς εἴρηται, καὶ τὸν αὐτὸν τρόπον ὥσπερ ἂν εἰ τέκτων λέγοι περὶ χειρὸς ξυλίνης.

Οὕτως γὰρ καὶ οἱ φυσιολόγοι τὰς γενέσεις καὶ τὰς αἰτίας τοῦ σχήματος λέγουσιν· ὑπὸ τινων γὰρ ἐδημιουργήθησαν δυνάμει. Ἀλλ' ἴσως ὁ μὲν τέκτων ἐρεῖ πέλεκυν ἢ τρύπανον, ὁ δ' ἀέρα καὶ γῆν, πλὴν βέλτιον ὁ τέκτων· οὐ γὰρ ἱκανὸν ἔσται αὐτῷ τὸ τοσοῦτον εἰπεῖν, ὅτι ἐμπεσόντος τοῦ ὀργάνου τὸ μὲν κοῖλον ἐγένετο τὸ δὲ ἐπίπεδον, ἀλλὰ διότι τὴν πληγὴν ἐποιήσατο τοιαύτην, καὶ τίνος ἕνεκα, ἐρεῖ τὴν αἰτίαν, ὅπως τοιόνδε ἢ τοιόνδε ποτὲ τὴν μορφήν γένηται.

Δῆλον τοίνυν ὅτι οὐκ ὀρθῶς λέγουσι, καὶ ὅτι λεκτέον ὡς τοιοῦτον τὸ ζῶον, καὶ περὶ ἐκείνου, καὶ τί καὶ ποῖόν τι, καὶ τῶν μορίων ἕκαστον, ὥσπερ καὶ περὶ τοῦ εἶδους τῆς κλίνης. Εἰ δὴ τοῦτό ἐστι ψυχὴ ἢ ψυχῆς μέρος ἢ μὴ ἄνευ ψυχῆς (ἀπελθούσης γοῦν οὐκέτι ζῶόν ἐστιν, οὐδὲ τῶν μορίων οὐδὲν τὸ αὐτὸ λείπεται, πλὴν τῷ σχήματι μόνον, καθάπερ τὰ μυθεύόμενα λιθοῦσθαι), εἰ δὴ ταῦτα οὕτως, τοῦ φυσικοῦ περὶ ψυχῆς ἂν εἶη λέγειν καὶ εἰδέναι, καὶ εἰ μὴ πάσης, κατ' αὐτὸ τοῦτο καθ' ὃ τοιοῦτο τὸ ζῶον, καὶ τί ἐστὶν ἡ ψυχὴ, ἢ αὐτὸ τοῦτο τὸ μόριον, καὶ περὶ τῶν συμβεβηκότων κατὰ τὴν τοιαύτην αὐτῆς οὐσίαν, ἄλλως τε καὶ τῆς φύσεως διχῶς λεγομένης καὶ οὔσης τῆς μὲν ὡς ὕλης τῆς δ' ὡς οὐσίας. Καὶ ἔστιν αὕτη καὶ ὡς ἡ κινουσα

καὶ ὥς τὸ τέλος.

Τοιοῦτον δὲ τοῦ ζώου ἦτοι πᾶσα ἡ ψυχὴ ἢ μέρος τι αὐτῆς. Ὡστε καὶ οὕτως ἂν λεκτέον εἴη τῷ περὶ φύσεως θεωρητικῷ περὶ ψυχῆς μᾶλλον ἢ περὶ τῆς ὕλης, ὅσῳ μᾶλλον ἢ ὕλη δι' ἐκείνην φύσις ἐστὶν ἢ περ ἀνάπαλιν. Καὶ γὰρ κλίνη καὶ τρίπους τὸ ξύλον ἐστίν, ὅτι δυνάμει ταῦτά ἐστιν. Ἀπορήσειε δ' ἂν τις εἰς τὸ νῦν λεχθὲν ἐπιβλέψας, πότερον περὶ πάσης ψυχῆς τῆς φυσικῆς ἐστὶ τὸ εἰπεῖν ἢ περὶ τινος. Εἰ γὰρ περὶ πάσης, οὐδεμία λείπεται παρὰ τὴν φυσικὴν ἐπιστήμην φιλοσοφία. Ὁ γὰρ νοῦς τῶν νοητῶν. Ὡστε περὶ (641b.) πάντων ἡ φυσικὴ γνῶσις ἂν εἴη· τῆς γὰρ αὐτῆς περὶ νοῦ καὶ τοῦ νοητοῦ θεωρησά, εἴπερ πρὸς ἄλληλα, καὶ ἡ αὐτὴ θεωρία τῶν πρὸς ἄλληλα πάντων, καθάπερ καὶ περὶ αἰσθήσεως καὶ τῶν αἰσθητῶν. Ἡ οὐκ ἔστι πᾶσα ἡ ψυχὴ κινήσεως ἀρχή, οὐδὲ τὰ μόρια ἅπαντα, ἀλλ' αὐξήσεως μὲν ὅπερ καὶ ἐν τοῖς φυτοῖς, ἀλλοιώσεως δὲ τὸ αἰσθητικόν, φορᾶς δ' ἕτερόν τι καὶ οὐ τὸ νοητικόν· ὑπάρχει γὰρ ἡ φορὰ καὶ ἐν ἑτέροις τῶν ζώων, διάνοια δ' οὐδενί. Δήλον οὖν ὡς οὐ περὶ πάσης ψυχῆς λεκτέον· οὐδὲ γὰρ πᾶσα ψυχὴ φύσις, ἀλλὰ τι μόριον αὐτῆς ἐν ἡ καὶ πλείω.

Ἔτι δὲ τῶν ἐξ ἀφαιρέσεως οὐδενὸς οἷόν τ' εἶναι τὴν φυσικὴν θεωρητικὴν, ἐπειδὴ ἡ φύσις ἕνεκά του ποιεῖ πάντα. Φαίνεται γάρ, ὥσπερ ἐν τοῖς τεχναστοῖς ἐστὶν ἡ τέχνη, οὕτως ἐν αὐτοῖς τοῖς πράγμασιν ἄλλη τις ἀρχὴ καὶ αἰτία τοιαύτη, ἣν ἔχομεν καθάπερ τὸ θερμὸν καὶ τὸ ψυχρὸν ἐκ τοῦ παντός. Διὸ μᾶλλον εἰκὸς τὸν οὐρανὸν γεγενῆσθαι ὑπὸ τοιαύτης αἰτίας, εἰ γέγονε, καὶ εἶναι διὰ τοιαύτην αἰτίαν μᾶλλον ἢ τὰ ζῷα τὰ θνητά· τὸ γοῦν τεταγμένον καὶ τὸ ὠρισμένον πολὺ μᾶλλον φαίνεται ἐν τοῖς οὐρανίοις ἢ περὶ ἡμᾶς, τὸ δ' ἄλλοτ' ἄλλως καὶ ὡς ἔτυχε περὶ τὰ θνητὰ μᾶλλον. Οἱ δὲ τῶν μὲν ζώων ἕκαστον φύσει φασὶν εἶναι καὶ γενέσθαι, τὸν δ' οὐρανὸν ἀπὸ τύχης καὶ τοῦ αὐτομάτου τοιοῦτον συστήναι, ἐν ᾧ ἀπὸ τύχης καὶ ἀταξίας οὐδ' ὅτιοῦν φαίνεται. Πανταχοῦ δὲ λέγομεν τότε τοῦδε ἕνεκα, ὅπου ἂν φαίνεται τέλος τι πρὸς ὃ ἡ κίνησις περαίνει μηδενὸς ἐμποδίζοντος. Ὡστε εἶναι φανερόν ὅτι ἔστι τι τοιοῦτον, ὃ δὴ καὶ καλοῦμεν φύσιν. Οὐ γὰρ δὴ ὅ τι ἔτυχεν ἐξ ἑκάστου γίνεται σπέρματος, ἀλλὰ τότε ἐκ τοῦδε, οὐδὲ σπέρμα τὸ τυχὸν ἐκ τοῦ τυχόντος σώματος.

Ἀρχὴ ἄρα καὶ ποιητικὸν τοῦ ἐξ αὐτοῦ τὸ σπέρμα. Φύσει γὰρ ταῦτα· φύεται γοῦν ἐκ τούτου. Ἀλλὰ μὴν ἔτι τούτου πρότερον τὸ οὐ

τὸ σπέρμα· γενέσεις μὲν γὰρ τὸ σπέρμα, οὐσία δὲ τὸ τέλος. Ἀμφοῖν δ' ἔτι πρότερον, ἅφ' οὗ ἔστι τὸ σπέρμα. Ἔστι γὰρ τὸ σπέρμα διχῶς, ἐξ οὗ τε καὶ οὗ· καὶ γὰρ ἅφ' οὗ ἀπῆλθε, τούτου σπέρμα, οἷον ἵππου, καὶ τούτου ὃ ἔσται ἐξ αὐτοῦ, οἷον ὀρέως, τρόπον δ' οὐ τὸν αὐτόν, ἀλλ' ἑκατέρου τὸν εἰρημένον. Ἐτι δὲ δυνάμει τὸ σπέρμα· (642a.) δύνამις δ' ὡς ἔχει πρὸς ἐντελέχειαν, ἴσμεν.

Εἰσὶν ἄρα δύο γὰρ γίνεται, ὅτι ἀνάγκη. Ἴσως δ' ἂν τις ἀπορήσειε ποῖαν λέγουσιν ἀνάγκην οἱ λέγοντες ἐξ ἀνάγκης· τῶν μὲν γὰρ δύο τρόπων οὐδέτερον οἷόν τε ὑπάρχειν, τῶν διωρισμένων ἐν τοῖς κατὰ φιλοσοφίαν. Ἔστι δ' ἐν γε τοῖς ἔχουσι γενέσειν ἢ τρίτῃ· λέγομεν γὰρ τὴν τροφὴν ἀναγκαῖόν τι κατ' οὐδέτερον τούτων τῶν τρόπων, ἀλλ' ὅτι οὐχ οἷόν τ' ἄνευ ταύτης εἶναι.

Τοῦτο δ' ἐστὶν ὥσπερ ἐξ ὑποθέσεως· ὥσπερ γὰρ ἐπεὶ δεῖ σχίζειν τῷ πελέκει, ἀνάγκη σκληρόν εἶναι, εἰ δὲ σκληρόν, χαλκοῦν ἢ σιδηροῦν, οὕτως καὶ ἐπεὶ τὸ σῶμα ὄργανον (ἐνεκά τινος γὰρ ἕκαστον τῶν μορίων, ὁμοίως δὲ καὶ τὸ ὅλον), ἀνάγκη ἄρα τοιονδί εἶναι καὶ ἐκ τοιωνδί, εἰ ἐκεῖνο ἔσται.

Ὅτι μὲν οὖν δύο τρόποι τῆς αἰτίας, καὶ δεῖ λέγοντας τυγχάνειν μάλιστα μὲν ἀμφοῖν, εἰ δὲ μή, δηλόν γε πειρᾶσθαι ποιεῖν, καὶ ὅτι πάντες οἱ τοῦτο μὴ λέγοντες οὐδὲν ὡς εἰπεῖν περὶ φύσεως λέγουσιν· ἀρχὴ γὰρ ἡ φύσις μᾶλλον τῆς ὕλης.

Ἐνιαχοῦ δέ που αὐτῇ καὶ Ἐμπεδοκλῆς περιπίπτει, ἀγόμενος ὑπ' αὐτῆς τῆς ἀληθείας, καὶ τὴν οὐσίαν καὶ τὴν φύσιν ἀναγκάζεται φάναι τὸν λόγον εἶναι, οἷον ὅστουν ἀποδιδούς τί ἐστίν· οὔτε γὰρ ἐν τι τῶν στοιχείων λέγει αὐτὸ οὔτε δύο ἢ τρία οὔτε πάντα, ἀλλὰ λόγον τῆς μίξεως αὐτῶν. Δηλὸν τοίνυν ὅτι καὶ ἡ σὰρξ τὸν αὐτὸν τρόπον ἐστί, καὶ τῶν ἄλλων τῶν τοιούτων μορίων ἕκαστον. Αἴτιον δὲ τοῦ μὴ ἐλθεῖν τοὺς προγενεστεροὺς ἐπὶ τὸν τρόπον τοῦτον, ὅτι τὸ τί ἦν εἶναι καὶ τὸ ὀρίσασθαι τὴν οὐσίαν οὐκ ἦν, ἀλλ' ἦψατο μὲν Δημόκριτος πρῶτος, ὡς οὐκ ἀναγκαῖον δὲ τῇ φυσικῇ θεωρίᾳ, ἀλλ' ἐκφερόμενος ὑπ' αὐτοῦ τοῦ πράγματος, ἐπὶ Σωκράτους δὲ τοῦτο μὲν ηὐξήθη, τὸ δὲ ζητεῖν τὰ περὶ φύσεως ἔληξε, πρὸς δὲ τὴν χρήσιμον ἀρετὴν καὶ τὴν πολιτικὴν ἀπέκλιναν οἱ φιλοσοφοῦντες. Δεικτέον δ' οὕτως, οἷον ὅτι ἔστι μὲν ἡ ἀναπνοὴ τουδὶ χάριν, τοῦτο δὲ γίνεται διὰ τάδε ἐξ ἀνάγκης. Ἡ δ' ἀνάγκη ὅτε μὲν σημαίνει ὅτι εἰ ἐκεῖνο ἔσται τὸ οὗ ἔνεκα, ταῦτα ἀνάγκη ἐστὶν ἔχειν, ὅτε δ' ὅτι ἔστιν οὕτως ἔχοντα καὶ πεφυκότα. Τὸ θερμὸν γὰρ ἀναγκαῖον ἐξιέναι καὶ πάλιν εἰσιέναι

ἀντικροῦον, τὸν δ' ἀέρα εἰσρεῖν. Τοῦτο δ' ἤδη ἀναγκαῖόν ἐστιν.
(642b.) Τοῦ ἐντὸς δὲ θερμοῦ ἀντικόπτοντος, ἐν τῇ ψύξει τοῦ θύραθεν
ἀέρος ἢ εἵσοδος.

Ὁ μὲν οὖν τρόπος οὗτος ὁ τῆς μεθόδου, καὶ περὶ ὧν δεῖ λαβεῖν
τὰς αἰτίας, ταῦτα καὶ τοιαῦτά ἐστιν.

Κεφάλαιο 2

Λαμβάνουσι δ' ἔνιοι τὸ καθ' ἕκαστον, διαιρούμενοι τὸ γένος εἰς δύο διαφοράς. Τοῦτο δ' ἐστὶ τῇ μὲν οὐ ῥάδιον, τῇ δὲ ἀδύνατον. Ἐνίων γὰρ ἔσται διαφορὰ μία μόνη, τὰ δ' ἄλλα περίεργα, οἷον ὑπόπουν, δίπουν, σχιζόπουν· αὕτη γὰρ μόνη κυρία. Εἰ δὲ μή, ταῦτ' ὀνόματι ἀναγκαῖον λέγειν.

Ἔτι δὲ προσήκει μὴ διασπᾶν ἕκαστον γένος, οἷον τοὺς ὄρνιθας τοὺς μὲν ἐν τῇδε, τοὺς δ' ἐν ἄλλῃ διαιρέσει, καθάπερ ἔχουσιν αἱ γεγραμμέναι διαιρέσεις· ἐκεῖ γὰρ τοὺς μὲν μετὰ τῶν ἐνύδρων συμβαίνει διηρηθῆναι, τοὺς δ' ἐν ἄλλῳ γένει. Ταύτῃ μὲν οὖν τῇ ὁμοιότητι ὄρνις ὄνομα κεῖται, ἑτέρα δ' ἰχθύς.

Ἄλλαι δ' εἰσὶν ἀνώνυμοι, οἷον τὸ ἔναιμον καὶ τὸ ἄναιμον· ἐφ' ἑκατέρῳ γὰρ τούτων οὐ κεῖται ἐν ὀνόματι. Εἴπερ οὖν μηδὲν τῶν ὁμογενῶν διασπαστέον, ἢ εἰς δύο διαίρεσις μάταιος ἂν εἴη· οὕτως γὰρ διαιροῦντας ἀναγκαῖον χωρίζειν καὶ διασπᾶν· τῶν πολυπόδων γὰρ ἐστὶ τὰ μὲν ἐν τοῖς πεζοῖς τὰ δ' ἐν τοῖς ἐνύδροις.

Κεφάλαιο 3

Ἦτι στερήσει μὲν ἀναγκαῖον διαιρεῖν, καὶ διαιροῦσιν οἱ διχοτομοῦντες. Οὐκ ἔστι δὲ διαφορὰ στερήσεως ἢ στέρησις· ἀδύνατον γὰρ εἶδη εἶναι τοῦ μὴ ὄντος, οἷον τῆς ἀποδίας ἢ τοῦ ἀπτέρου ὥσπερ πτερώσεως καὶ ποδῶν. Δεῖ δὲ τῆς καθόλου διαφορᾶς εἶδη εἶναι· εἰ γὰρ μὴ ἔσται, διὰ τί ἂν εἴη τῶν καθόλου καὶ οὐ τῶν καθ' ἕκαστον; Τῶν δὲ διαφορῶν αἱ μὲν καθόλου εἰσὶ καὶ ἔχουσιν εἶδη, οἷον πτερότης· τὸ μὲν γὰρ ἄσχιστον τὸ δ' ἐσχισμένον ἐστὶ πτερόν. Καὶ ποδότης ὡσαύτως ἢ μὲν πολυσχιδής, ἢ δὲ δισχιδής, οἷον τὰ διχαλά, ἢ δ' ἀσχιδής καὶ ἀδιαίρετος, οἷον τὰ μώνυχα. Χαλεπὸν μὲν οὖν διαλαβεῖν καὶ εἰς τοιαύτας διαφορὰς ὧν ἔστιν εἶδη, ὥσθ' ὅτιοῦν ζῶον ἐν ταύταις ὑπάρχειν καὶ μὴ ἐν πλείοσι ταυτόν, οἷον πτερωτὸν καὶ ἄπτερον (ἐστὶ γὰρ ἄμφω ταυτόν, οἷον μύρμηξ καὶ λαμπυρίς καὶ ἕτερα τίνα), πάντων δὲ χαλεπώτατον ἢ ἀδύνατον εἰς τὰ ἀντικείμενα. Ἀναγκαῖον γὰρ τῶν καθ' ἕκαστον ὑπάρχειν τινὶ τῶν διαφορῶν ἐκάστην, ὥστε καὶ τὴν (643a.) ἀντικειμένην. Εἰ δὲ μὴ ἐνδέχεται τοῖς εἶδει διαφέρουσιν ὑπάρχειν εἰδὸς τι τῆς οὐσίας ἄτομον καὶ ἐν, ἀλλ' ἀεὶ διαφορὰν ἔξει (οἷον ὄρνις ἀνθρώπου· ἢ διποδία γὰρ ἄλλη καὶ διάφορος· κἂν εἰ ἕναιμα, τὸ αἷμα διάφορον, ἢ οὐδὲν τῆς οὐσίας τὸ αἷμα θετέον· εἰ δ' οὕτως ἐστίν, ἢ μία διαφορὰ δυσὶν ὑπάρξει)· εἰ δὲ τοῦτο, δῆλον ὅτι ἀδύνατον στέρησιν εἶναι διαφορὰν. Ἔσονται δ' αἱ διαφοραὶ ἴσαι τοῖς ἀτόμοις ζῴοις, εἴπερ ἄτομά τε ταῦτα καὶ αἱ διαφοραὶ ἄτομοι, κοινὴ δὲ μὴ ἔστιν.

Εἰ δ' ἐνδέχεται μὴ ὑπάρχειν † καὶ κοινήν, ἄτομον δέ, δῆλον ὅτι κατὰ γε τὴν κοινήν ἐν τῷ αὐτῷ ἐστίν, ἕτερα ὄντα τῷ εἶδει ζῶα. Ὡστ' ἀναγκαῖον, εἰ ἴδιοι αἱ διαφοραὶ εἰς ἃς ἅπαντα ἐμπίπτει τὰ ἄτομα, μηδεμίαν αὐτῶν εἶναι κοινήν.

Εἰ δὲ μή, ἕτερα ὄντα εἰς τὴν αὐτὴν βαδιεῖται. Δεῖ δ' οὔτε τὸ αὐτὸ καὶ ἄτομον εἰς ἑτέραν καὶ ἑτέραν ἰέναι διαφορὰν τῶν διηρημένων, οὔτ' εἰς τὴν αὐτὴν ἕτερα, καὶ ἅπαντα εἰς ταύτας.

Φανερόν τοίνυν ὅτι οὐκ ἔστι λαβεῖν τὰ ἄτομα εἶδη ὡς διαιροῦνται οἱ εἰς δύο διαιροῦντες τὰ ζῶα ἢ καὶ ἄλλο ὅτιοῦν γένος. Καὶ γὰρ κατ' ἐκείνους ἀναγκαῖον ἴσας τὰς ἐσχάτας εἶναι διαφορὰς τοῖς ζῴοις πᾶσι τοῖς ἀτόμοις τῷ εἶδει. Ὄντος γὰρ τοῦδὲ τίνος γένους, οὗ διαφοραὶ πρῶται τὰ λευκά, τούτων δ' ἐκατέρου ἄλλαι, καὶ οὕτως εἰς τὸ πρόσω

ἕως τῶν ἀτόμων, αἱ τελευταῖαι τέτταρες ἔσονται ἢ ἄλλο τι πλῆθος τῶν ἀφ' ἐνὸς διπλασιαζομένων· τοσαῦτα δὲ καὶ τὰ εἶδη. Ἔστι δ' ἡ διαφορὰ τὸ εἶδος ἐν τῇ ὕλῃ. Οὐτε γὰρ ἄνευ ὕλης οὐδὲν ζῶου μόριον, οὔτε μόνη ἡ ὕλη· οὐ γὰρ πάντως ἔχον σῶμα ἔσται ζῶον, οὐδὲ τῶν μορίων οὐδέν, ὥσπερ πολλάκις εἴρηται. Ἔτι διαιρεῖν χρή τοῖς ἐν τῇ οὐσίᾳ καὶ μὴ τοῖς συμβεβηκόσι καθ' αὐτό, οἷον εἰ τις τὰ σχήματα διαιροίη, ὅτι τὰ μὲν δυσὶν ὀρθαῖς ἴσας ἔχει τὰς γωνίας, τὰ δὲ πλείοσιν· συμβεβηκὸς γάρ τι τῷ τριγώνῳ τὸ δυσὶν ὀρθαῖς ἴσας ἔχειν τὰς γωνίας. Ἔτι τοῖς ἀντικειμένοις διαιρεῖν. Διάφορα γὰρ ἀλλήλοις τάντικείμενα, οἷον λευκότης καὶ μελανία καὶ εὐθύτης καὶ καμπυλότης. Ἐὰν οὖν θάτερα διάφορα ᾖ, τῷ ἀντικειμένῳ διαιρετέον καὶ μὴ τὸ μὲν νεύσει τὸ δὲ χρώματι, πρὸς δὲ τούτοις τά γ' ἐμψυχα τοῖς κοινοῖς ἔργοις τοῦ σώματος καὶ τῆς ψυχῆς, οἷον καὶ ἐν ταῖς ῥηθείσαις νῦν (643b.) πορευτικὰ καὶ πτηνὰ· ἔστι γὰρ τινα γένη οἷς ἄμφω ὑπάρχει καὶ ἔστι πτηνὰ καὶ ἅπτερα, καθάπερ τὸ τῶν μυρμηκῶν γένος. Καὶ τῷ ἀγρίῳ καὶ τῷ ἡμέρῳ διαιρεῖσθαι· ὡσαύτως γὰρ ἂν δόξειε ταῦτα εἶδη διαιρεῖν. Πάντα γὰρ ὡς εἰπεῖν, ὅσα ἡμερα καὶ ἄγρια τυγχάνει ὄντα, οἷον ἄνθρωποι, ἵπποι, βόες, κύνες ἐν τῇ Ἰνδικῇ, ὕες, αἶγες, πρόβατα· ὧν ἕκαστον, εἰ μὲν ὁμώνυμον, οὐ διήρηται χωρὶς, εἰ δὲ ταῦτα ἐν εἶδει, οὐχ οἷον τ' εἶναι διαφορὰς τὸ ἄγριον καὶ τὸ ἡμερον.

Ὅλως δ' ὅποιοι οὖν διαφορὰ μᾶ διαιροῦντι τοῦτο συμβαίνειν ἀναγκαῖον. Ἀλλὰ δεῖ πειρᾶσθαι λαμβάνειν κατὰ γένη τὰ ζῶα, ὡς ὑφήγηθ' οἱ πολλοὶ διορίσαντες ὄρνιθος γένος καὶ ἰχθύος. Τούτων δ' ἕκαστον πολλαῖς ὠρίσται διαφοραῖς, οὐ κατὰ τὴν διχοτομίαν. Οὕτω μὲν γὰρ ἦτοι τὸ παράπαν οὐκ ἔστι λαβεῖν (τὸ αὐτὸ γὰρ εἰς πλείους ἐμπίπτει διαιρέσεις καὶ τὰ ἐναντία εἰς τὴν αὐτήν), ἢ μία μόνον διαφορὰ ἔσται, καὶ αὕτη ἦτοι ἀπλῆ, ἢ ἐκ συμπλοκῆς τὸ τελευταῖον ἔσται εἶδος. Ἐὰν δὲ μὴ διαφορὰς λαμβάνῃ τὴν διαφοράν, ἀναγκαῖον ὥσπερ συνδέσμῳ τὸν λόγον ἓνα ποιοῦντας, οὕτω καὶ τὴν διαίρεσιν συνεχῇ ποιεῖν. Λέγω δ' οἷον συμβαίνει τοῖς διαιρουμένοις τὸ μὲν ἅπτερον τὸ δὲ πτερωτόν, πτερωτοῦ δὲ τὸ μὲν ἡμερον τὸ δ' ἄγριον, ἢ τὸ μὲν λευκὸν τὸ δὲ μέλαν· οὐ γὰρ διαφορὰ τοῦ πτερωτοῦ τὸ ἡμερον οὐδὲ τὸ λευκόν, ἀλλ' ἐτέρας ἀρχὴ διαφορᾶς, ἐκεῖ δὲ κατὰ συμβεβηκός. Διὸ πολλαῖς τὸ ἐν εὐθέως διαιρετέον, ὥσπερ λέγομεν. Καὶ γὰρ οὕτως μὲν αἱ στερήσεις ποιήσουσι διαφοράν, ἐν δὲ τῇ διχοτομίᾳ οὐ ποιήσουσιν. Ὅτι δ' οὐκ ἐνδέχεται τῶν καθ' ἕκαστον

εἰδῶν λαμβάνειν οὐδὲν διαιροῦσι δίχα τὸ γένος, ὥσπερ τινὲς ᾤθησαν, καὶ ἐκ τῶνδε φανερόν. Ἀδύνατον γὰρ μίαν ὑπάρχειν διαφορὰν τῶν καθ' ἕκαστον διαιρετῶν, ἐὰν τε ἀπλᾶ λαμβάνη ἐὰν τε συμπεπλεγμένα (λέγω δὲ ἀπλᾶ μὲν, ἐὰν μὴ ἔχῃ διαφοράν, οἷον τὴν σχιζοποδίαν, συμπεπλεγμένα δέ, ἐὰν ἔχῃ, οἷον τὸ πολυσχιδὲς πρὸς τὸ σχιζόπουν. Τοῦτο γὰρ ἢ συνέχεια βούλεται τῶν ἀπὸ τοῦ γένους κατὰ τὴν διαίρεσιν διαφορῶν ὡς ἓν τι τὸ πᾶν ὄν, ἀλλὰ παρὰ τὴν λέξιν συμβαίνει δοκεῖν τὴν τελευταίαν μόνην εἶναι διαφοράν, οἷον τὸ πολυσχιδὲς ἢ τὸ δίπουν· τὸ δ' ὑπόπουν (644a.) καὶ πολύπουν περίεργα). Ὅτι δ' ἀδύνατον πλείους εἶναι τοιαύτας, δῆλον· αἰεὶ γὰρ βαδίζων ἐπὶ τὴν ἐσχάτην διαφορὰν ἀφικνεῖται, ἀλλ' οὐκ ἐπὶ τὴν τελευταίαν καὶ τὸ εἶδος. Αὕτη δ' ἐστὶν ἢ τὸ σχιζόπουν μόνον, ἢ πᾶσα ἢ σύμπλεξις, ἐὰν διαιρῇται ἄνθρωπον, οἷον εἴ τις συνθείη ὑπόπουν, δίπουν, σχιζόπουν. Εἰ δ' ἦν ὁ ἄνθρωπος σχιζόπουν μόνον, οὕτως ἐγίγνετ' ἂν αὕτη μία διαφορά. Νῦν δ' ἐπειδὴ οὐκ ἔστιν, ἀνάγκη πολλὰς εἶναι μὴ ὑπὸ μίαν διαίρεσιν. Ἀλλὰ μὴν πλείους γε τοῦ αὐτοῦ οὐκ ἔστιν ὑπὸ μίαν διχοτομίαν εἶναι, ἀλλὰ μίαν κατὰ μίαν τελευτᾶν. Ὡστε ἀδύνατον ὅτιοῦν λαβεῖν τῶν καθ' ἕκαστον ζώων δίχα διαιρουμένους.

Κεφάλαιο 4

Απορήσειε δ' ἄν τις διὰ τί οὐκ ἄνωθεν ἐνὶ ὀνόματι ἐμπεριλαβόντες ἅμα ἐν γένος ἅμφω προσηγόρευσαν οἱ ἄνθρωποι, ὃ περιέχει τὰ τε ἐνυδρα καὶ τὰ πτηνὰ τῶν ζώων. Ἔστι γὰρ ἓνια πάθη κοινὰ καὶ τούτοις καὶ τοῖς ἄλλοις ζώοις ἅπασιν. Ἀλλ' ὅμως ὀρθῶς διώρισταί τοῦτον τὸν τρόπον. Ὅσα μὲν γὰρ διαφέρει τῶν γενῶν καθ' ὑπεροχὴν καὶ τὸ μᾶλλον καὶ τὸ ἥττον, ταῦτα ὑπέζευκται ἐνὶ γένει, ὅσα δ' ἔχει τὸ ἀνάλογον, χωρίς· λέγω δ' οἷον ὄρνις ὄρνιθος διαφέρει τῷ μᾶλλον ἢ καθ' ὑπεροχὴν (τὸ μὲν γὰρ μακρόπτερον τὸ δὲ βραχύπτερον), ἰχθύς δ' ὄρνιθος τῷ ἀνάλογον (ὃ γὰρ ἐκείνῳ πτερόν, θατέρῳ λεπίς). Τοῦτο δὲ ποιεῖν ἐπὶ πᾶσιν οὐ ῥάδιον· τὰ γὰρ πολλὰ ζῶα ἀνάλογον ταῦτὸ πέπονθεν. Ἐπεὶ δ' οὐσίαι μὲν εἰσι τὰ ἔσχατα εἶδη, ταῦτα δὲ κατὰ τὸ εἶδος ἀδιάφορα, οἷον Σωκράτης, Κορίσκος, ἀναγκαῖον ἢ τὰ καθόλου ὑπάρχοντα πρότερον εἰπεῖν ἢ πολλάκις ταῦτόν λέγειν, καθάπερ εἴρηται. Τὰ δὲ καθόλου κοινὰ· τὰ γὰρ πλείοσιν ὑπάρχοντα καθόλου λέγομεν. Ἀπορίαν δ' ἔχει περὶ πότερα δεῖ πραγματεύεσθαι. Ἦι μὲν γὰρ οὐσία τὸ τῷ εἶδει ἄτομον, κράτιστον, εἴ τις δύναιτο περὶ τῶν καθ' ἕκαστον καὶ ἀτόμων τῷ εἶδει θεωρεῖν χωρίς, ὥσπερ περὶ ἀνθρώπου, οὕτω μὴ περὶ ὄρνιθος· ἔχει γὰρ εἶδη τὸ γένος τοῦτο· ἀλλὰ περὶ οὐτοῦν ὄρνιθος τῶν ἀτόμων, οἷον ἢ στρουθὸς ἢ γέρανος ἢ τι τοιοῦτον.

Ἦι δὲ συμβήσεται λέγειν πολλάκις περὶ τοῦ αὐτοῦ πάθους διὰ τὸ κοινῇ πλείοσιν ὑπάρχειν, ταύτῃ δ' ἐστὶν ὑπάτοπον καὶ (644b.) μακρόν τὸ περὶ ἐκάστου λέγειν χωρίς.

Ἵσως μὲν οὖν ὀρθῶς ἔχει τὰ μὲν κατὰ γένη κοινῇ λέγειν, ὅσα λέγεται καλῶς ὠρισμένων τῶν ἀνθρώπων, καὶ ἔχει τε μίαν φύσιν κοινὴν καὶ εἶδη ἐν αὐτῷ μὴ πολὺ διεστῶτα, ὄρνις καὶ ἰχθύς, καὶ εἴ τι ἄλλο ἐστὶν ἀνώνυμον μὲν, τῷ γένει δ' ὁμοίως περιέχει τὰ ἐν αὐτῷ εἶδη· ὅσα δὲ μὴ τοιαῦτα, καθ' ἕκαστον, οἷον περὶ ἀνθρώπου καὶ εἴ τι τοιοῦτον ἕτερόν ἐστιν. Σχεδὸν δὲ τοῖς σχήμασι τῶν μορίων καὶ τοῦ σώματος ὅλου, ἐὰν ὁμοιότητα ἔχωσιν, ὠρίσται τὰ γένη, οἷον τὸ τῶν ὀρνίθων γένος πρὸς αὐτὰ πέπονθε καὶ τὸ τῶν ἰχθύων καὶ τὰ μαλάκιά τε καὶ τὰ ὄστρεα. Τὰ γὰρ μόρια διαφέρουσι τούτων οὐ τῇ ἀνάλογον ὁμοιότητι, οἷον ἐν ἀνθρώπῳ καὶ ἰχθύϊ πέπονθεν ὁστοῦν πρὸς ἄκανθαν, ἀλλὰ μᾶλλον τοῖς σωματικοῖς πάθεσιν, οἷον μεγέθει

μικρότητι, μαλακότητι σκληρότητι, λειότητι τραχύτητι καὶ τοῖς τοιούτοις, ὅλως δὲ τῷ μᾶλλον καὶ ἥττον. Πῶς μὲν οὖν ἀποδέχεσθαι δεῖ τὴν περὶ φύσεως μέθοδον, καὶ τίνα τρόπον γίνοιτ' ἂν ἡ θεωρία περὶ αὐτῶν ὁδῶ καὶ ῥᾶστα, ἔτι δὲ περὶ διαιρέσεως, τίνα τρόπον ἐνδέχεται μετιοῦσι λαμβάνειν χρησίμως, καὶ διότι τὸ διχοτομεῖν τῇ μὲν ἀδύνατον τῇ δὲ κενόν, εἴρηται. Διωρισμένων δὲ τούτων περὶ τῶν ἐφεξῆς λέγωμεν, ἀρχὴν τήνδε ποιησάμενοι.

Κεφάλαιο 5

Τῶν οὐσιῶν ὅσαι φύσει συνεστᾶσι, τὰς μὲν ἀγενήτους καὶ ἀφθάρτους εἶναι τὸν ἅπαντα αἰῶνα, τὰς δὲ μετέχειν γενέσεως καὶ φθορᾶς. Συμβέβηκε δὲ περὶ μὲν ἐκείνας τιμίας οὐσας καὶ θείας ἐλάττους ἡμῖν ὑπάρχειν θεωρίας (καὶ γὰρ ἐξ ὧν ἂν τις σκέψαιτο περὶ αὐτῶν, καὶ περὶ ὧν εἰδέναι ποθοῦμεν, παντελῶς ἐστὶν ὀλίγα τὰ φανερά κατὰ τὴν αἴσθησιν), περὶ δὲ τῶν φθαρτῶν φυτῶν τε καὶ ζώων εὐποροῦμεν μᾶλλον πρὸς τὴν γνῶσιν διὰ τὸ σύντροφον· πολλὰ γὰρ περὶ ἕκαστον γένος λάβοι τις ἂν τῶν ὑπαρχόντων βουλόμενος διαπονεῖν ἱκανῶς. Ἔχει δ' ἐκάτερα χάριν. Τῶν μὲν γὰρ εἰ καὶ κατὰ μικρὸν ἐφαπτόμεθα, ὅμως διὰ τὴν τιμιότητα τοῦ γνωρίζειν ἥδιον ἢ τὰ παρ' ἡμῖν ἅπαντα, ὥσπερ καὶ τῶν ἐρωμένων τὸ τυχὸν καὶ μικρὸν μόριον κατιδεῖν ἥδιον ἐστὶν ἢ πολλὰ ἕτερα καὶ μεγάλα δι' ἀκριβείας ἰδεῖν· (645a.) τὰ δὲ διὰ τὸ μᾶλλον καὶ πλείω γνωρίζειν αὐτῶν λαμβάνει τὴν τῆς ἐπιστήμης ὑπεροχὴν, ἔτι δὲ διὰ τὸ πλησιαίτερα ἡμῶν εἶναι καὶ τῆς φύσεως οἰκειότερα ἀντικαταλλάττεται τι πρὸς τὴν περὶ τὰ θεῖα φιλοσοφίαν. Ἐπεὶ δὲ περὶ ἐκείνων διήλθομεν λέγοντες τὸ φαινόμενον ἡμῖν, λοιπὸν περὶ τῆς ζωϊκῆς φύσεως εἰπεῖν, μηδὲν παραλιπόντας εἰς δύναμιν μήτε ἀτιμότερον μήτε τιμιώτερον. Καὶ γὰρ ἐν τοῖς μὴ κεχαρισμένοις αὐτῶν πρὸς τὴν αἴσθησιν κατὰ τὴν θεωρίαν ὅμως ἡ δημιουργήσασα φύσις ἀμηχάνους ἡδονὰς παρέχει τοῖς δυναμένοις τὰς αἰτίας γνωρίζειν καὶ φύσει φιλοσόφοις. Καὶ γὰρ ἂν εἴη παράλογον καὶ ἄτοπον, εἰ τὰς μὲν εἰκόνας αὐτῶν θεωροῦντες χαίρομεν ὅτι τὴν δημιουργήσασαν τέχνην συνθεωροῦμεν, οἷον τὴν γραφικὴν ἢ τὴν πλαστικὴν, αὐτῶν δὲ τῶν φύσει συνεστώτων μὴ μᾶλλον ἀγαπῶμεν τὴν θεωρίαν, δυνάμενοί γε τὰς αἰτίας καθορᾶν. Διὸ δεῖ μὴ δυσχεραίνειν παιδικῶς τὴν περὶ τῶν ἀτιμοτέρων ζώων ἐπίσκεψιν. Ἐν πᾶσι γὰρ τοῖς φυσικοῖς ἔνεστί τι θαυμαστόν· καὶ καθάπερ Ἡράκλειτος λέγεται πρὸς τοὺς ξένους εἰπεῖν τοὺς βουλομένους ἐντυχεῖν αὐτῷ, οἱ ἐπειδὴ προσιόντες εἶδον αὐτὸν θερόμενον πρὸς τῷ ἱπνῷ ἔστησαν (ἐκέλευε γὰρ αὐτοὺς εἰσιέναι θαρροῦντας· εἶναι γὰρ καὶ ἐνταῦθα θεούς), οὕτω καὶ πρὸς τὴν ζήτησιν περὶ ἐκάστου τῶν ζώων προσιέναι δεῖ μὴ δυσωπούμενον ὡς ἐν ἅπασιν ὄντος τινὸς φυσικοῦ καὶ καλοῦ.

Τὸ γὰρ μὴ τυχόντως ἀλλ' ἐνεκά τινος ἐν τοῖς τῆς φύσεως ἔργοις

ἐστὶ καὶ μάλιστα· οὐ δ' ἔνεκα συνέστηκεν ἢ γέγονε τέλους, τὴν τοῦ καλοῦ χώραν εἴληφεν. Εἰ δέ τις τὴν περὶ τῶν ἄλλων ζώων θεωρίαν ἄτιμον εἶναι νενόμικε, τὸν αὐτὸν τρόπον οἶεσθαι χρή καὶ περὶ αὐτοῦ· οὐκ ἔστι γὰρ ἄνευ πολλῆς δυσχερείας ἰδεῖν ἐξ ὧν συνέστηκε τὸ τῶν ἀνθρώπων γένος, οἷον αἷμα, σάρκες, ὅσῃ, φλέβες καὶ τὰ τοιαῦτα μόρια. Ὅμοίως τε δεῖ νομίζειν τὸν περὶ οὐτινοσοῦν τῶν μορίων ἢ τῶν σκευῶν διαλεγόμενον μὴ περὶ τῆς ὕλης ποιεῖσθαι τὴν μνήμην, μηδὲ ταύτης χάριν, ἀλλὰ τῆς ὅλης μορφῆς, οἷον καὶ περὶ οἰκίας, ἀλλὰ μὴ πλίνθων καὶ πηλοῦ καὶ ξύλων· καὶ τὸν περὶ φύσεως περὶ τῆς συνθέσεως καὶ τῆς ὅλης οὐσίας, ἀλλὰ μὴ περὶ τούτων ἃ μὴ συμβαίνει χωριζόμενά ποτε τῆς οὐσίας αὐτῶν. (645b.) Ἀναγκαῖον δὲ πρῶτον τὰ συμβεβηκότα διελεῖν περὶ ἕκαστον γένος, ὅσα καθ' αὐτὰ πᾶσιν ὑπάρχει τοῖς ζώοις, μετὰ δὲ ταῦτα τὰς αἰτίας αὐτῶν πειρᾶσθαι διελεῖν. Εἴρηται μὲν οὖν καὶ πρότερον ὅτι πολλὰ κοινὰ πολλοῖς ὑπάρχει τῶν ζώων, τὰ μὲν ἀπλῶς, οἷον πόδες πτερὰ λεπίδες, καὶ πάθη δὴ τὸν αὐτὸν τρόπον τούτοις, τὰ δ' ἀνάλογον. Λέγω δ' ἀνάλογον, ὅτι τοῖς μὲν ὑπάρχει πλεύμων, τοῖς δὲ πλεύμων μὲν οὐ, ὃ δὲ τοῖς ἔχουσι πλεύμονα, ἐκείνοις ἕτερον ἀντὶ τούτου· καὶ τοῖς μὲν αἷμα, τοῖς δὲ τὸ ἀνάλογον τὴν αὐτὴν ἔχον δύναμιν ἥνπερ τοῖς ἐναίμοις τὸ αἷμα. Τὸ δὲ λέγειν χωρὶς περὶ ἐκάστων τῶν καθ' ἕκαστα, καὶ ἔμπροσθεν εἶπομεν ὅτι πολλάκις συμβήσεται ταῦτα λέγειν, ἐπειδὴν λέγωμεν περὶ πάντων τῶν ὑπαρχόντων· ὑπάρχει δὲ πολλοῖς ταῦτά. Ταῦτα μὲν οὖν ταύτῃ διωρίσθω. Ἐπεὶ δὲ τὸ μὲν ὄργανον πᾶν ἔνεκά του, τῶν δὲ τοῦ σώματος μορίων ἕκαστον ἔνεκά του, τὸ δ' οὐ ἔνεκα πρᾶξις τις, φανερόν ὅτι καὶ τὸ σύνολον σῶμα συνέστηκε πράξεώς τινος ἔνεκα πολυμεροῦς. Οὐ γὰρ ἡ πρίσις τοῦ πρίονος χάριν γέγονεν, ἀλλ' ὁ πρίων τῆς πρίσεως· χρῆσις γὰρ τις ἢ πρίσις ἐστίν. Ὡστε καὶ τὸ σῶμά πως τῆς ψυχῆς ἔνεκεν, καὶ τὰ μόρια τῶν ἔργων πρὸς ἃ πέφυκεν ἕκαστον. Λεκτέον ἄρα πρῶτον τὰς πράξεις τὰς τε κοινὰς πάντων καὶ τὰς κατὰ γένος καὶ τὰς κατ' εἶδος.

Λέγω δὲ κοινὰς μὲν αἰ πᾶσιν ὑπάρχουσι τοῖς ζώοις, κατὰ γένος δέ, ὅσων παρ' ἄλληλα τὰς διαφορὰς ὁρῶμεν καθ' ὑπεροχὴν οὐσας, οἷον ὄρνιθα λέγω κατὰ γένος, ἄνθρωπον δὲ κατ' εἶδος, καὶ πᾶν ὃ κατὰ τὸν καθόλου λόγον μηδεμίαν ἔχει διαφοράν. Τὰ μὲν γὰρ ἔχουσι τὸ κοινὸν κατ' ἀναλογίαν, τὰ δὲ κατὰ γένος, τὰ δὲ κατ' εἶδος. Ὅσαι μὲν οὖν πράξεις ἄλλων ἔνεκα, δῆλον ὅτι καὶ ὧν αἱ πράξεις τὸν αὐτὸν τρόπον διεστᾶσιν ὥνπερ αἱ πράξεις. Ὅμοίως δὲ καὶ εἰ τινες πρότεραι

καὶ τέλος ἐτέρων πράξεων τυγχάνουσιν οὐσαι, τὸν αὐτὸν ἔξει τρόπον καὶ τῶν μορίων ἕκαστον, ὧν αἱ πράξεις αἱ τοιαῦται· καὶ τρίτον, ὧν ὄντων ἀναγκαῖον ὑπάρχειν. Λέγω δὲ πάθη καὶ πράξεις γένεσιν αὐξήσιν ὀχρίαν ἐγρήγορσιν ὕπνον πορείαν, καὶ ὁπόσ’ ἄλλα τοιαῦτα τοῖς ζώοις ὑπάρχει· μόρια δὲ λέγω ῥῖνα ὀφθαλμὸν καὶ τὸ σύνολον πρόσωπον, ὧν ἕκαστον καλεῖται (646a.) μέλος. Ὅμοίως δὲ καὶ περὶ τῶν ἄλλων. Καὶ περὶ μὲν τοῦ τρόπου τῆς μεθόδου τοσαῦθ’ ἡμῖν εἰρήσθω· τὰς δ’ αἰτίας πειραθῶμεν εἰπεῖν περὶ τε τῶν κοινῶν καὶ τῶν ἰδίων, ἀρξάμενοι καθάπερ διωρίσαμεν, πρῶτον ἀπὸ τῶν πρώτων.

Βιβλίο 2

Κεφάλαιο 1

Ἐκ τίνων μὲν οὖν μορίων καὶ πόσων συνέστηκεν ἕκαστον τῶν ζώων, ἐν ταῖς ἱστορίαις ταῖς περὶ αὐτῶν δεδήλωται σαφέστερον· δι' ἃς δ' αἰτίας ἕκαστον τοῦτον ἔχει τὸν τρόπον, ἐπισκεπτέον νῦν, χωρίσαντας καθ' αὐτὰ τῶν ἐν ταῖς ἱστορίαις εἰρημένων.

Τριῶν δ' οὐσῶν τῶν συνθέσεων πρώτην μὲν ἂν τις θεῖη τὴν ἐκ τῶν καλουμένων ὑπὸ τινων στοιχείων, οἷον γῆς ἀέρος ὕδατος πυρός. Ἔτι δὲ βέλτιον ἴσως ἐκ τῶν δυνάμεων λέγειν, καὶ τούτων οὐκ ἐξ ἀпасῶν, ἀλλ' ὥσπερ ἐν ἐτέροις εἴρηται καὶ πρότερον. Ὑγρὸν γὰρ καὶ ξηρὸν καὶ θερμὸν καὶ ψυχρὸν ὕλη τῶν συνθέτων σωμάτων ἐστίν· αἱ δ' ἄλλαι διαφοραὶ ταύταις ἀκολουθοῦσιν, οἷον βάρος καὶ κουφότης καὶ πυκνότης καὶ μανότης καὶ τραχύτης καὶ λειότης καὶ τᾶλλα τὰ τοιαῦτα πάθη τῶν σωμάτων. Δευτέρα δὲ σύστασις ἐκ τῶν πρώτων ἢ τῶν ὁμοιομερῶν φύσις ἐν τοῖς ζώοις ἐστίν, οἷον ὁστοῦ καὶ σαρκὸς καὶ τῶν ἄλλων τῶν τοιούτων. Τρίτη δὲ καὶ τελευταία κατ' ἀριθμὸν ἢ τῶν ἀνομοιομερῶν, οἷον προσώπου καὶ χειρὸς καὶ τῶν τοιούτων μορίων. Ἐπεὶ δ' ἐναντίως ἐπὶ τῆς γενέσεως ἔχει καὶ τῆς οὐσίας· τὰ γὰρ ὕστερα τῇ γενέσει πρότερα τὴν φύσιν ἐστί, καὶ πρῶτον τὸ τῇ γενέσει τελευταῖον· οὐ γὰρ οἰκία πλίνθων ἕνεκέν ἐστι καὶ λίθων, ἀλλὰ ταῦτα τῆς οἰκίας· ὁμοίως δὲ τοῦτ' ἔχει καὶ περὶ τὴν ἄλλην ὕλην. Οὐ μόνον δὲ φανερὸν ὅτι τοῦτον ἔχει τὸν τρόπον ἐκ τῆς ἐπαγωγῆς, ἀλλὰ καὶ κατὰ τὸν λόγον· πᾶν γὰρ τὸ γινόμενον ἐκ τινος καὶ εἰς τι ποιεῖται τὴν γένεσιν, καὶ ἀπ' ἀρχῆς ἐπ' ἀρχήν, ἀπὸ τῆς πρώτης κινούσης καὶ ἐχούσης ἤδη τινὰ φύσιν ἐπὶ τινὰ μορφήν ἢ τοιοῦτον ἄλλο τέλος· ἄνθρωπος γὰρ ἄνθρωπον καὶ φυτὸν γεννᾷ φυτὸν ἐκ τῆς περὶ ἕκαστον ὑποκειμένης ὕλης. Τῷ μὲν οὖν χρόνῳ προτέραν τὴν ὕλην (646b.) ἀναγκαῖον εἶναι καὶ τὴν γένεσιν, τῷ λόγῳ δὲ τὴν οὐσίαν καὶ τὴν ἐκάστου μορφήν. Δῆλον δ' ἂν λέγῃ τις τὸν λόγον τῆς γενέσεως· ὁ μὲν γὰρ τῆς οἰκοδομήσεως λόγος ἔχει τὸν τῆς οἰκίας, ὁ δὲ τῆς οἰκίας οὐκ ἔχει τὸν τῆς οἰκοδομήσεως. Ὅμοίως δὲ τοῦτο συμβέβηκε καὶ ἐπὶ τῶν ἄλλων. Ὡστε τὴν μὲν τῶν στοιχείων ὕλην ἀναγκαῖον εἶναι τῶν ὁμοιομερῶν ἕνεκεν.

Ὑστερα γὰρ ἐκείνων ταῦτα τῇ γενέσει, τούτων δὲ τὰ ἀνομοιομερῆ· ταῦτα γὰρ ἤδη τὸ τέλος ἔχει καὶ τὸ πέρας, ἐπὶ τοῦ τρίτου λαβόντα τὴν σύστασιν ἀριθμοῦ, καθάπερ ἐπὶ πολλῶν

συμβαίνει τελειοῦσθαι τὰς γενέσεις.

Ἐξ ἀμφοτέρων μὲν οὖν τὰ ζῷα συνέστηκε τῶν μορίων τούτων, ἀλλὰ τὰ ὁμοιομερῆ τῶν ἀνομοιομερῶν ἕνεκέν ἐστιν· ἐκείνων γὰρ ἔργα καὶ πράξεις εἰσὶν, οἷον ὀφθαλμοῦ καὶ μυκτῆρος καὶ τοῦ προσώπου παντὸς καὶ δακτύλου καὶ χειρὸς καὶ παντὸς τοῦ βραχίονος. Πολυμόρφων δὲ τῶν πράξεων καὶ τῶν κινήσεων ὑπαρχουσὼν τοῖς ζῷοις ὅλοις τε καὶ τοῖς μορίοις τοῖς τοιούτοις, ἀναγκαῖον ἐξ, ὧν σύγκεινται, τὰς δυνάμεις ἀνομοίας ἔχειν· πρὸς μὲν γάρ τινα μαλακότης χρήσιμος πρὸς δὲ τινα σκληρότης, καὶ τὰ μὲν τάσιν ἔχειν τὰ δὲ κάμψιν. Τὰ μὲν οὖν ὁμοιομερῆ κατὰ μέρος διείληφε τὰς δυνάμεις τὰς τοιαύτας (τὸ μὲν γὰρ αὐτῶν ἐστὶ μαλακὸν τὸ δὲ σκληρόν, καὶ τὸ μὲν ὑγρὸν τὸ δὲ ξηρόν, καὶ τὸ μὲν γλίσχρον τὸ δὲ κραῦρον), τὰ δ' ἀνομοιομερῆ κατὰ πολλὰς καὶ συγκειμένας ἀλλήλαις· ἐτέρα γὰρ πρὸς τὸ πιέσαι τῇ χειρὶ χρήσιμος δύναμις καὶ πρὸς τὸ λαβεῖν. Διόπερ ἐξ ὁστῶν καὶ νεύρων καὶ σαρκὸς καὶ τῶν ἄλλων τῶν τοιούτων συνεστήκασιν τὰ ὀργανικὰ τῶν μορίων, ἀλλ' οὐκ ἐκεῖνα ἐκ τούτων. Ὡς μὲν οὖν ἕνεκά τινος διὰ ταύτην τὴν αἰτίαν ἔχει περὶ τούτων τὸν εἰρημένον τρόπον· ἐπεὶ δὲ ζητεῖται καὶ πῶς ἀναγκαῖον ἔχειν οὕτως, φανερόν ὅτι προυπηρχεν οὕτω πρὸς ἄλληλα ἔχοντα ἐξ ἀνάγκης. Τὰ μὲν γὰρ ἀνομοιομερῆ ἐκ τῶν ὁμοιομερῶν ἐνδέχεται συνεστάναι, καὶ ἐκ πλειόνων καὶ ενός, οἷον ἕνια τῶν σπλάγχχνων· πολύμορφα γὰρ τοῖς σχήμασιν, ἐξ ὁμοιομεροῦς ὄντα σώματος ὡς εἰπεῖν ἀπλῶς. Τὰ δ' ὁμοιομερῆ ἐκ τούτων ἀδύνατον· τὸ γὰρ ὁμοιομερές πόλλ' ἂν εἴη ἀνομοιομερῆ. Διὰ μὲν οὖν (647a.) ταύτας τὰς αἰτίας τὰ μὲν ἀπλᾶ καὶ ὁμοιομερῆ, τὰ δὲ σύνθετα καὶ ἀνομοιομερῆ τῶν μορίων ἐν τοῖς ζῷοις ἐστίν.

Ὅντων δὲ τῶν μὲν ὀργανικῶν μερῶν τῶν δ' αἰσθητηρίων ἐν τοῖς ζῷοις, τῶν μὲν ὀργανικῶν ἕκαστον ἀνομοιομερές ἐστίν, ὥσπερ εἶπον πρότερον, ἢ δ' αἰσθησις ἐγγίγνεται πᾶσιν ἐν τοῖς ὁμοιομερέσι, διὰ τὸ τῶν αἰσθήσεων ὅποιανοῦν ενός τινος εἶναι γένους, καὶ τὸ αἰσθητήριον ἐκάστου δεκτικὸν εἶναι τῶν αἰσθητῶν. Πάσχει δὲ τὸ δυνάμει ὄν ὑπὸ τοῦ ἐνεργείᾳ ὄντος, ὥστε ἐστὶ τὸ αὐτὸ τῷ γένει καὶ ἐκεῖνο ἐν καὶ τοῦτο ἔν. Καὶ διὰ τοῦτο χεῖρα μὲν ἢ πρόσωπον ἢ τῶν τοιούτων τι μορίων οὐδεὶς ἐγχειρεῖ λέγειν τῶν φυσιολόγων τὸ μὲν εἶναι γῆν, τὸ δ' ὕδωρ, τὸ δὲ πῦρ· τῶν δ' αἰσθητηρίων ἕκαστον πρὸς ἕκαστον ἐπιζευγνύουσι τῶν στοιχείων, τὸ μὲν ἀέρα φάσκοντες εἶναι τὸ δὲ πῦρ. Οὕσης δὲ τῆς αἰσθήσεως ἐν τοῖς ἀπλοῖς μέρεσιν εὐλόγως

μάλιστα συμβαίνει τὴν ἀφὴν ἐν ὁμοιομερεῖ μὲν ἥκιστα δ' ἀπλῶ τῶν αἰσθητηρίων ἐγγίνεσθαι· μάλιστα γὰρ αὕτη δοκεῖ πλειόνων εἶναι γενῶν, καὶ πολλὰς ἔχειν ἐναντιώσεις τὸ ὑπὸ ταύτην αἰσθητόν, θερμὸν ψυχρόν, ξηρὸν ὑγρὸν καὶ ἔτι ἄλλα τοιαῦτα· καὶ τὸ τούτων αἰσθητήριον, ἢ σάρξ, καὶ τὸ ταύτῃ ἀνάλογον σωματωδέστατόν ἐστι τῶν αἰσθητηρίων. Ἐπεὶ δ' ἀδύνατον εἶναι ζῶον ἄνευ αἰσθήσεως, καὶ διὰ τοῦτο ἂν εἴη ἀναγκαῖον ἔχειν τοῖς ζώοις ἓνια μόρια ὁμοιομερῆ· ἢ μὲν γὰρ αἰσθησις ἐν τούτοις, αἱ δὲ πράξεις διὰ τῶν ἀνομοιομερῶν ὑπάρχουσιν αὐτοῖς.

Τῆς δ' αἰσθητικῆς δυνάμεως καὶ τῆς κινούσης τὸ ζῶον καὶ τῆς θρεπτικῆς ἐν ταύτῳ μορίῳ τοῦ σώματος οὔσης, καθάπερ ἐν ἐτέροις εἴρηται πρότερον, ἀναγκαῖον τὸ ἔχον πρῶτον μόριον τὰς τοιαύτας ἀρχάς, ἧ μὲν ἐστὶ δεκτικὸν πάντων τῶν αἰσθητῶν, τῶν ἀπλῶν εἶναι μορίων, ἧ δὲ κινητικὸν καὶ πρακτικόν, τῶν ἀνομοιομερῶν. Διόπερ ἐν μὲν τοῖς ἀναίμοις ζώοις τὸ ἀνάλογον, ἐν δὲ τοῖς ἐναίμοις ἢ καρδία τοιοῦτόν ἐστιν· διαιρεῖται μὲν γὰρ εἰς ὁμοιομερῆ καθάπερ τῶν ἄλλων σπλάγχχνων ἕκαστον, διὰ δὲ τὴν τοῦ σχήματος μορφήν ἀνομοιομερές ἐστίν.

Ταύτῃ δ' ἡκολούθηκε καὶ τῶν ἄλλων τῶν καλουμένων σπλάγχχνων ἕκαστον. Ἐκ τῆς αὐτῆς γὰρ ὕλης συνεστάσιν· αἱματικὴ (647b.) γὰρ ἡ φύσις πάντων αὐτῶν διὰ τὸ τὴν θέσιν ἔχειν ἐπὶ πόροις φλεβικοῖς καὶ διαλήψεσιν. Καθάπερ οὖν ρέοντος ὕδατος ἰλὺς, τᾶλλα σπλάγχχνα τῆς διὰ τῶν φλεβῶν ῥύσεως τοῦ αἵματος οἷον προχεύματά ἐστιν· ἢ δὲ καρδία, διὰ τὸ τῶν φλεβῶν ἀρχὴ εἶναι καὶ ἔχειν ἐν αὐτῇ τὴν δύναμιν τὴν δημιουργοῦσαν τὸ αἷμα πρῶτην, εὐλογον, ἐξ οἷας δέχεται τροφῆς, ἐκ τοιαύτης συνεστάναι καὶ αὐτήν. Διότι μὲν οὖν αἱματικὰ τὴν μορφήν τὰ σπλάγχχνα ἐστίν, εἴρηται, καὶ διότι τῇ μὲν ὁμοιομερῇ τῇ δ' ἀνομοιομερῇ.

Κεφάλαιο 2

Τῶν δ' ὁμοιομερῶν μορίων ἐν τοῖς ζώοις ἐστὶ τὰ μὲν μαλακὰ καὶ ὑγρά, τὰ δὲ σκληρὰ καὶ στερεά, ὑγρά μὲν ἢ ὅλως ἢ ἕως ἂν ἢ ἐν τῇ φύσει, οἶον αἷμα, ἰχώρ, πιμελή, στέαρ, μυελός, γονή, χολή, γάλα ἐν τοῖς ἔχουσι, σάρξ, καὶ τὰ τούτοις ἀνάλογον· οὐ γὰρ ἅπαντα τὰ ζῶα τούτων τῶν μορίων τέτευχεν, ἀλλ' ἔνια τῶν ἀνάλογον τούτων τισίν. Τὰ δὲ ξηρὰ καὶ στερεὰ τῶν ὁμοιομερῶν ἐστίν, οἶον ὅστουν ἄκανθα νεῦρον φλέψ. Καὶ γὰρ τῶν ὁμοιομερῶν ἡ διαίρεσις ἔχει διαφοράν· ἐστὶ γὰρ ὡς ἐνίων τὸ μέρος ὁμώνυμον τῷ ὅλῳ, ἐστὶ δ' ὡς οὐχ ὁμώνυμον, οἶον φλεβὸς φλέψ, ἀλλὰ προσώπου πρόσωπον οὐδαμῶς. Πρῶτον μὲν οὖν καὶ τοῖς ὑγροῖς μορίοις καὶ τοῖς ξηροῖς πολλοὶ τρόποι τῆς αἰτίας εἰσίν. Τὰ μὲν γὰρ ὡς ὕλη τῶν μερῶν τῶν ἀνομοιομερῶν ἐστίν (ἐκ τούτων γὰρ συνέστηκεν ἕκαστον τῶν ὀργανικῶν μερῶν, ἐξ ὁστῶν καὶ νεύρων καὶ σαρκῶν καὶ ἄλλων τοιούτων συμβαλλομένων τὰ μὲν εἰς τὴν οὐσίαν τὰ δ' εἰς τὴν ἐργασίαν), τὰ δὲ τροφή τούτοις τῶν ὑγρῶν ἐστὶ (πάντα γὰρ ἐξ ὑγροῦ λαμβάνει τὴν αὐξησιν), τὰ δὲ περιττώματα συμβέβηκεν εἶναι τούτων, οἶον τὴν τε τῆς ξηρᾶς τροφῆς ὑπόστασιν καὶ τὴν τῆς ὑγρᾶς τοῖς ἔχουσι κύστιν.

Αὐτῶν δὲ τούτων αἱ διαφοραὶ πρὸς ἄλληλα τοῦ βελτίονος ἕνεκὲν εἰσιν, οἶον τῶν τε ἄλλων καὶ αἵματος πρὸς αἷμα· τὸ μὲν γὰρ λεπτότερον τὸ δὲ παχύτερον καὶ τὸ μὲν καθαρώτερόν ἐστι τὸ δὲ θολερώτερον, ἔτι δὲ τὸ μὲν ψυχρότερον τὸ δὲ θερμότερον ἐν τε τοῖς μορίοις τοῦ ἐνὸς ζώου (τὸ γὰρ ἐν τοῖς ἄνω μέρεσι πρὸς τὰ κάτω μόρια διαφέρει ταύταις ταῖς διαφοραῖς) καὶ ἐτέρῳ πρὸς ἕτερον. Καὶ ὅλως (648a.) τὰ μὲν ἔναιμα τῶν ζώων ἐστί, τὰ δ' ἀντὶ τοῦ αἵματος ἔχει ἕτερόν τι μόριον τοιοῦτον. Ἔστι δ' ἰσχύος μὲν ποιητικώτερον τὸ παχύτερον αἷμα καὶ θερμότερον, αἰσθητικώτερον δὲ καὶ νοερώτερον τὸ λεπτότερον καὶ ψυχρότερον. Τὴν αὐτὴν δ' ἔχει διαφοράν καὶ τῶν ἀνάλογον ὑπαρχόντων πρὸς τὸ αἷμα· διὸ καὶ μέλιτται καὶ ἄλλα τοιαῦτα ζῶα φρονιμώτερα τὴν φύσιν ἐστὶν ἐναίμων πολλῶν, καὶ τῶν ἐναίμων τὰ ψυχρὸν ἔχοντα καὶ λεπτὸν αἷμα φρονιμώτερα τῶν ἐναντίων ἐστίν.

Ἄριστα δὲ τὰ θερμὸν ἔχοντα καὶ λεπτὸν καὶ καθαρὸν· ἅμα γὰρ πρὸς τε ἀνδρείαν τὰ τοιαῦτα καὶ πρὸς φρόνησιν ἔχει καλῶς. Διὸ καὶ

τὰ ἄνω μόρια πρὸς τὰ κάτω ταύτην ἔχει τὴν διαφοράν, καὶ πρὸς τὸ θῆλυ αὐτὸ τὸ ἄρρεν, καὶ τὰ δεξιὰ πρὸς τὰ ἀριστερὰ τοῦ σώματος. Ὅμοίως δὲ καὶ περὶ τῶν ἄλλων καὶ τῶν τοιούτων μορίων καὶ τῶν ἀνομοιομερῶν ὑποληπτέον ἔχειν τὴν διαφοράν, τὰ μὲν πρὸς τὸ βέλτιον ἢ χειρόν, τὰ δὲ πρὸς τὰ ἔργα καὶ τὴν οὐσίαν ἐκάστω τῶν ζώων, οἷον ἐχόντων ὀφθαλμοὺς ἀμφοτέρων τὰ μὲν ἐστὶ σκληρόφθαλμα τὰ δ' ὑγρόφθαλμα, καὶ τὰ μὲν οὐκ ἔχει βλέφαρα τὰ δ' ἔχει πρὸς τὸ τὴν ὄψιν ἀκριβεστέραν εἶναι.

Ὅτι δ' ἀναγκαῖον ἔχειν ἢ αἷμα ἢ τὸ τοῦτο τὴν αὐτὴν ἔχον φύσιν, καὶ τίς ἐστὶν ἢ τοῦ αἵματος φύσις, πρῶτον διελομένοις περὶ θερμοῦ καὶ ψυχροῦ, οὕτω καὶ περὶ τούτου θεωρητέον τὰς αἰτίας. Πολλῶν γὰρ ἡ φύσις ἀνάγεται πρὸς ταύτας τὰς ἀρχάς, καὶ πολλοὶ διαμφισβητοῦσι ποῖα θερμὰ καὶ ποῖα ψυχρὰ τῶν ζώων ἢ τῶν μορίων. Ἐνιοὶ γὰρ τὰ ἐνυδρα τῶν πεζῶν θερμότερά φασιν εἶναι, λέγοντες ὡς ἐπανισοῖ τὴν ψυχρότητα τοῦ τόπου ἢ τῆς φύσεως αὐτῶν θερμότης, καὶ τὰ ἄναιμα τῶν ἐναίμων καὶ τὰ θήλεα τῶν ἀρρένων, οἷον Παρμενίδης τὰς γυναῖκας τῶν ἀνδρῶν θερμότερας εἶναι φησι καὶ ἕτεροὶ τινες, ὡς διὰ τὴν θερμότητα καὶ πολυαιμούσας γινομένων τῶν γυναικείων, Ἐμπεδοκλῆς δὲ τοῦναντίον· ἔτι δ' αἷμα καὶ χολὴν οἱ μὲν θερμὸν ὁποτερονοῦν εἶναι φασιν αὐτῶν, οἱ δὲ ψυχρόν. Εἰ δ' ἔχει τοσαύτην τὸ θερμὸν καὶ τὸ ψυχρὸν ἀμφισβήτησιν, τί χρὴ περὶ τῶν ἄλλων ὑπολαβεῖν; Ταῦτα γὰρ ἡμῖν ἐναργέστατα τῶν περὶ τὴν αἴσθησιν.

Ἔοικε δὲ διὰ τὸ πολλαχῶς λέγεσθαι τὸ θερμότερον ταῦτα (648b.) συμβαίνειν· ἕκαστος γὰρ δοκεῖ τι λέγειν τὰναντία λέγων.

Διὸ δεῖ μὴ λανθάνειν πῶς δεῖ τῶν φύσει συνεστώτων τὰ μὲν θερμὰ λέγειν τὰ δὲ ψυχρὰ καὶ τὰ μὲν ξηρὰ τὰ δ' ὑγρά, ἐπεὶ ὅτι γ' αἰτία ταῦτα σχεδὸν καὶ θανάτου καὶ ζωῆς ἔοικεν εἶναι φανερόν, ἔτι δ' ὕπνου καὶ ἐγρηγόρσεως καὶ ἀκμῆς καὶ γήρωος καὶ νόσου καὶ ὑγιείας, ἀλλ' οὐ τραχύτητες καὶ λειότητες οὐδὲ βαρύτητες καὶ κουφότητες οὐδ' ἄλλο τῶν τοιούτων οὐδὲν ὡς εἰπεῖν. Καὶ τοῦτ' εὐλόγως συμβέβηκεν· καθάπερ γὰρ ἐν ἐτέροις εἴρηται πρότερον, ἀρχαὶ τῶν φυσικῶν στοιχείων αὐταὶ εἰσι, θερμὸν καὶ ψυχρὸν καὶ ξηρὸν καὶ ὑγρόν.

Πότερον οὖν ἀπλῶς λέγεται τὸ θερμὸν ἢ πλεοναχῶς; Δεῖ δὴ λαβεῖν τί ἔργον τοῦ θερμότερου, ἢ πόσα, εἰ πλείω. Ἐνα μὲν δὴ τρόπον λέγεται μᾶλλον θερμὸν ὑφ' οὗ μᾶλλον θερμαίνεται τὸ

ἀπτόμενον, ἄλλως δὲ τὸ μᾶλλον αἰσθησιν ἐμποιοῦν ἐν τῷ θιγγάνειν, καὶ τοῦτ', ἐὰν μετὰ λύπης. Ἔστι δ' ὅτε δοκεῖ τοῦτ' εἶναι ψεῦδος· ἐνίστε γὰρ ἢ ἕξις αἰτία τοῦ ἀλγεῖν αἰσθανομένοις. Ἔτι τὸ τηκτικώτερον τοῦ τηκτοῦ καὶ τοῦ καυστοῦ καυστικώτερον. Ἔτι ἐὰν ἢ τὸ μὲν πλεόν τὸ δ' ἔλαττον τὸ αὐτό, τὸ πλεόν τοῦ ἐλάττονος θερμότερον. Πρὸς δὲ τούτοις δυοῖν τὸ μὴ ταχέως ψυχόμενον ἀλλὰ βραδέως θερμότερον, καὶ τὸ θᾶττον θερμαινόμενον τοῦ θερμαινόμενου βραδέως θερμότερον εἶναι τὴν φύσιν φαμέν, ὥς τὸ μὲν ἐναντίον, ὅτι πόρρω, τὸ δ' ὅμοιον, ὅτι ἐγγύς. Λέγεται μὲν οὖν εἰ μὴ πλεοναχῶς, ἀλλὰ τοσαυταχῶς ἕτερον ἐτέρου θερμότερον· τούτους δὲ τοὺς τρόπους ἀδύνατον ὑπάρχειν τῷ αὐτῷ πάντα.

Θερμαίνει μὲν γὰρ μᾶλλον τὸ ζέον ὕδωρ τῆς φλογός, καίει δὲ καὶ τήκει τὸ καυστὸν καὶ τηκτὸν ἢ φλόξ, τὸ δ' ὕδωρ οὐδέν. Ἔτι θερμότερον μὲν τὸ ζέον ὕδωρ ἢ πῦρ ὀλίγον, ψύχεται δὲ καὶ θᾶττον καὶ μᾶλλον τὸ θερμὸν ὕδωρ μικροῦ πυρός· οὐ γὰρ γίνεται ψυχρὸν πῦρ, ὕδωρ δὲ γίνεται πᾶν. Ἔτι θερμότερον μὲν κατὰ τὴν ἀφήν τὸ ζέον ὕδωρ, ψύχεται δὲ θᾶττον καὶ πῆγνυται τοῦ ἐλαίου. Ἔτι τὸ αἶμα κατὰ μὲν τὴν ἀφήν θερμότερον ὕδατος καὶ ἐλαίου, πῆγνυται δὲ θᾶττον.

Ἔτι λίθοι καὶ σίδηρος καὶ τὰ τοιαῦτα θερμαίνεται μὲν βραδύτερον ὕδατος, καίει δὲ θερμανθέντα μᾶλλον. Πρὸς δὲ τούτοις τῶν λεγομένων θερμῶν τὰ μὲν ἀλλοτρίαν ἔχει τὴν (649a.) θερμότητα τὰ δ' οἰκείαν, διαφέρει δὲ τὸ θερμὸν εἶναι οὕτως ἢ ἐκείνως πλεῖστον· ἐγγύς γὰρ τοῦ κατὰ συμβεβηκὸς εἶναι θερμὸν ἀλλὰ μὴ καθ' αὐτὸ θάτερον αὐτῶν, ὥσπερ ἂν εἴ τις λέγοι, εἰ συμβεβηκὸς εἴη τῷ πυρέττοντι εἶναι μουσικῶ, τὸν μουσικὸν εἶναι θερμότερον ἢ τὸν μεθ' ὑγιείας θερμὸν. Ἐπεὶ δ' ἐστὶ τὸ μὲν καθ' αὐτὸ θερμὸν τὸ δὲ κατὰ συμβεβηκός, ψύχεται μὲν βραδύτερον τὸ καθ' αὐτό, θερμαίνει δὲ μᾶλλον πολλάκις τὴν αἰσθησιν τὸ κατὰ συμβεβηκός· καὶ πάλιν καίει μὲν μᾶλλον τὸ καθ' αὐτὸ θερμὸν, οἶον ἢ φλόξ τοῦ ὕδατος τοῦ ζέοντος, θερμαίνει δὲ κατὰ τὴν ἀφήν τὸ ζέον μᾶλλον, τὸ κατὰ συμβεβηκὸς θερμὸν. Ὡστε φανερόν ὅτι τὸ κρῖναι δυοῖν πότερον θερμότερον οὐχ ἀπλοῦν· ὡδὶ μὲν γὰρ τόδε ἔσται θερμότερον, ὡδὶ δὲ θάτερον. Ἐνια δὲ τῶν τοιούτων οὐδ' ἔστιν ἀπλῶς εἰπεῖν ὅτι θερμὸν ἢ μὴ θερμὸν. Ὁ μὲν γὰρ ποτε τυγχάνει ὄν τὸ ὑποκείμενον, οὐ θερμὸν, συνδουζόμενον δὲ θερμὸν, οἶον εἴ τις θεῖτο ὄνομα ὕδατι ἢ σιδήρῳ θερμῷ.

Τοῦτον γὰρ τὸν τρόπον τὸ αἷμα θερμόν ἐστιν. Καὶ ποιεῖ δὲ φανερόν ἐν τοῖς τοιοῦτοις ὅτι τὸ ψυχρὸν φύσις τις ἀλλ' οὐ στέρησις ἐστιν, ἐν ὅσοις τὸ ὑποκείμενον κατὰ πάθος θερμόν ἐστιν. Τάχα δὲ καὶ ἡ τοῦ πυρὸς φύσις, εἰ ἔτυχε, τοιαύτη τις ἐστιν· ἴσως γὰρ τὸ ὑποκείμενόν ἐστιν ἢ καπνὸς ἢ ἄνθραξ, ὧν τὸ μὲν ἀεὶ θερμόν (ἀναθυμίασις γὰρ ὁ καπνός), ὁ δ' ἄνθραξ ἀποσβεσθεὶς ψυχρός. Ἐλαιον δὲ καὶ πεύκη γένοιτ' ἂν ψυχρά. Ἔχει δὲ θερμότητα καὶ τὰ πυρωθέντα πάντα σχεδόν, οἷον κονία καὶ τέφρα, καὶ τὰ ὑποστήματα τῶν ζώων, καὶ τῶν περιττωμάτων ἢ χολή, τῷ ἐμπεφυρεῦσθαι καὶ ἐγκαταλελειφθαί τι ἐν αὐτοῖς θερμόν. Ἄλλον δὲ τρόπον θερμόν πεύκη καὶ τὰ πίονα, τῷ ταχὺ μεταβάλλειν εἰς ἐνέργειαν πυρός. Δοκεῖ δὲ τὸ θερμόν καὶ πηγνύναι καὶ τήκειν.

Ὅσα μὲν οὖν ὕδατος μόνον, ταῦτα πήγνυσι τὸ ψυχρόν, ὅσα δὲ γῆς, τὸ πῦρ· καὶ τῶν θερμῶν πήγνυται ὑπὸ ψυχροῦ ταχὺ μὲν ὅσα γῆς μᾶλλον, καὶ ἀλύτως, λυτῶς δ', ὅσα ὕδατος.

Ἀλλὰ περὶ μὲν τούτων ἐν ἑτέροις διώρισται σαφέστερον, ποῖα τὰ πηκτά, καὶ πήγνυται διὰ τίνας αἰτίας. Τὸ δὲ τί θερμόν καὶ ποῖον θερμότερον, ἐπεὶ δὲ λέγεται πλεοναχῶς, (649b.) οὐ τὸν αὐτὸν τρόπον ὑπάρξει πᾶσιν, ἀλλὰ προσδιοριστέον ὅτι καθ' αὐτὸ μὲν τόδε, κατὰ συμβεβηκὸς δὲ πολλάκις θάτερον, ἔτι δὲ δυνάμει μὲν τοδί, τοδί δὲ κατ' ἐνέργειαν, καὶ τόνδε μὲν τὸν τρόπον τοδί, τῷ μᾶλλον τὴν ἀφὴν θερμαίνειν, τοδί δὲ τῷ φλόγα ποιεῖν καὶ πυροῦν. Λεγομένου δὲ τοῦ θερμοῦ πολλαχῶς, ἀκολουθήσει δῆλον ὅτι καὶ τὸ ψυχρὸν κατὰ τὸν αὐτὸν λόγον. Καὶ περὶ μὲν θερμοῦ καὶ ψυχροῦ καὶ τῆς ὑπεροχῆς αὐτῶν διωρίσθω τὸν τρόπον τοῦτον.

Κεφάλαιο 3

Ἐχόμενον δὲ καὶ περὶ ξηροῦ καὶ ὑγροῦ διελθεῖν ἀκολούθως τοῖς εἰρημένοις. Λέγεται δὲ ταῦτα πλεοναχῶς, οἷον τὰ μὲν δυνάμει τὰ δ' ἐνεργείᾳ. Κρύσταλλος γὰρ καὶ πᾶν τὸ πεπηγὸς ὑγρὸν λέγεται ξηρὸν μὲν ἐνεργείᾳ καὶ κατὰ συμβεβηκός, ὄντα δυνάμει καὶ καθ' αὐτὰ ὑγρά, γῆ δὲ καὶ τέφρα καὶ τὰ τοιαῦτα μιχθέντα ὑγρῷ ἐνεργείᾳ μὲν ὑγρά καὶ κατὰ συμβεβηκός, καθ' αὐτὰ δὲ καὶ δυνάμει ξηρά· διακριθέντα δὲ ταῦτα τὰ μὲν ὕδατος ἀναπληστικά καὶ ἐνεργείᾳ καὶ δυνάμει ὑγρά, τὰ δὲ γῆς ἅπαντα ξηρά. Καὶ τὸ κυρίως καὶ ἀπλῶς ξηρὸν τοῦτον μάλιστα λέγεται τὸν τρόπον.

Ὅμοιως δὲ καὶ θάτερα τὰ ὑγρά κατὰ τὸν αὐτὸν λόγον ἔχει τὸ κυρίως καὶ ἀπλῶς, καὶ ἐπὶ θερμῶν καὶ ψυχρῶν.

Τούτων δὲ διωρισμένων φανερόν ὅτι τὸ αἷμα ὡδὶ μὲν ἔστι θερμόν, οἷον τι ἦν αὐτῷ τὸ αἷματι εἶναι (καθαπερεὶ ὀνόματί τινη σημαίνοιμεν τὸ ζέον ὕδωρ, οὕτω λέγεται), τὸ δ' ὑποκείμενον καὶ ὃ ποτε ὄν αἷμα ἐστίν, οὐ θερμόν· καὶ καθ' αὐτό ἐστὶ μὲν ὡς θερμόν ἐστίν, ἔστι δ' ὡς οὐ. Ἐν μὲν γὰρ τῷ λόγῳ ὑπάρξει αὐτοῦ ἡ θερμότης, ὥσπερ ἐν τῷ τοῦ λευκοῦ ἀνθρώπου τὸ λευκόν· ἥ δὲ κατὰ πάθος τὸ αἷμα, οὐ καθ' αὐτὸ θερμόν. Ὅμοιως δὲ καὶ περὶ ξηροῦ καὶ ὑγροῦ. Διὸ καὶ ἐν τῇ φύσει τῶν τοιούτων τὰ μὲν θερμὰ καὶ ὑγρά χωριζόμενα δὲ πηγνυται καὶ ψυχρὰ φαίνεται, οἷον τὸ αἷμα, τὰ δὲ θερμὰ καὶ πάχος ἔχοντα καθάπερ ἡ χολή, χωριζόμενα δ' ἐκ τῆς φύσεως τῶν ἐχόντων τοὐναντίον πάσχει· ψύχεται γὰρ καὶ ὑγραίνεται· τὸ μὲν γὰρ αἷμα ξηραίνεται μᾶλλον, ὑγραίνεται δ' ἡ ξανθὴ χολή. Τὸ δὲ μᾶλλον καὶ ἥττον μετέχειν τῶν ἀντικειμένων ὡς ὑπάρχοντα δεῖ τιθέναι τούτοις. Πῶς μὲν οὖν (650a.) θερμόν καὶ πῶς ὑγρόν, καὶ πῶς τῶν ἐναντίων ἡ φύσις τοῦ αἵματος κεκοινώνηκεν, εἴρηται σχεδόν.

Ἐπεὶ δ' ἀνάγκη πᾶν τὸ αὐξανόμενον λαμβάνειν τροφήν, ἡ δὲ τροφή πᾶσιν ἐξ ὑγροῦ καὶ ξηροῦ, καὶ τούτων ἡ πέψις γίνεται καὶ ἡ μεταβολὴ διὰ τῆς τοῦ θερμοῦ δυνάμεως, καὶ τὰ ζῶα πάντα καὶ τὰ φυτά, κἂν εἰ μὴ δι' ἄλλην αἰτίαν, ἀλλὰ διὰ ταύτην ἀναγκαῖον ἔχειν ἀρχὴν θερμοῦ φυσικὴν, καὶ ταύτην ὥσπερ † ... αἱ ἐργασίαι τῆς τροφῆς πλειόνων εἰσὶ μορίων. Ἡ μὲν γὰρ πρώτη φανερά τοῖς ζῷοις λειτουργία διὰ τοῦ στόματος οὔσα καὶ τῶν ἐν τούτῳ μορίων, ὅσων ἡ τροφή δεῖται διαιρέσεως. Ἀλλ' αὕτη μὲν οὐδεμιᾶς αἰτία πέψεως,

ἀλλ' εὐπεψίας μᾶλλον· ἡ γὰρ εἰς μικρὰ διαίρεσις τῆς τροφῆς ῥᾶω ποιεῖ τῷ θερμῷ τὴν ἐργασίαν· ἡ δὲ τῆς ἄνω καὶ τῆς κάτω κοιλίας ἤδη μετὰ θερμότητος φυσικῆς ποιεῖται τὴν πέψιν. Ὡσπερ δὲ καὶ τὸ στόμα τῆς ἀκατεργάστου τροφῆς πόρος ἐστί, καὶ τὸ συνεχές αὐτῷ μόριον ὃ καλοῦσιν οἰσοφάγον, ὅσα τῶν ζώων ἔχει τοῦτο τὸ μόριον, ἕως εἰς τὴν κοιλίαν, οὕτως καὶ ἄλλας ἀρχὰς δεῖ πλείους εἶναι, δι' ὧν ἅπαν λήψεται τὸ σῶμα τὴν τροφήν, ὥσπερ ἐκ φάτνης, ἐκ τῆς κοιλίας καὶ τῆς τῶν ἐντέρων φύσεως. Τὰ μὲν γὰρ φυτὰ λαμβάνει τὴν τροφήν κατειργασμένην ἐκ τῆς γῆς ταῖς ῥίζαις (διὸ καὶ περιττώμα οὐ γίνεται τοῖς φυτοῖς· τῇ γὰρ γῇ καὶ τῇ ἐν αὐτῇ θερμότητι χρῆται ὥσπερ κοιλία), τὰ δὲ ζῶα πάντα μὲν σχεδόν, τὰ δὲ πορευτικά φανερώς, οἷον γῆν ἐν αὐτοῖς ἔχει τὸ τῆς κοιλίας κύτος, ἐξ ἧς, ὥσπερ ἐκεῖνα ταῖς ῥίζαις, ταῦτα δεῖ τινι τὴν τροφήν λαμβάνειν, ἕως τὸ τῆς ἐχομένης πέψεως λάβῃ τέλος. Ἡ μὲν γὰρ τοῦ στόματος ἐργασία παραδίδωσι τῇ κοιλίᾳ, παρὰ δὲ ταύτης ἕτερον ἀναγκαῖον λαμβάνειν, ὅπερ συμβέβηκεν· αἱ γὰρ φλέβες κατατείνονται διὰ τοῦ μεσεντερίου παράπαν, κάτωθεν ἀρξάμεναι μέχρι τῆς κοιλίας. Δεῖ δὲ ταῦτα θεωρεῖν ἕκ τε τῶν ἀνατομῶν καὶ τῆς φυσικῆς ἱστορίας.

Ἐπεὶ δὲ πάσης τροφῆς ἐστί τι δεκτικὸν καὶ τῶν γινομένων περιττωμάτων, αἱ δὲ φλέβες οἷον ἀγγεῖον αἵματός εἰσι, φανερόν ὅτι τὸ αἷμα ἡ τελευταία τροφή τοῖς ζώοις τοῖς ἐναίμοις ἐστί, τοῖς δ' ἀναίμοις τὸ ἀνάλογον. Καὶ διὰ τοῦτο μὴ λαμβάνουσί τε τροφήν ὑπολείπει τοῦτο καὶ (650b.) λαμβάνουσιν αὐξάνεται, καὶ χρηστῆς μὲν οὔσης ὑγιεινόν, φαύλης δὲ φαῦλον. Ὅτι μὲν οὖν τὸ αἷμα τροφῆς ἔνεκεν ὑπάρχει τοῖς ἐναίμοις, φανερόν ἐκ τούτων καὶ τῶν τοιούτων. Καὶ γὰρ διὰ τοῦτο θιγγανόμενον αἰσθῆσιν οὐ ποιεῖ, ὥσπερ οὐδ' ἄλλο τῶν περιττωμάτων οὐδέν. Οὐδ' ἡ τροφή καθάπερ σάρξ· αὕτη γὰρ θιγγανομένη ποιεῖ αἰσθῆσιν. Οὐ γὰρ συνεχές ἐστί τὸ αἷμα ταύτη οὐδὲ συμπεφυκός, ἀλλ' οἷον ἐν ἀγγεῖῳ τυγχάνει κείμενον ἐν τε τῇ καρδίᾳ καὶ ταῖς φλεψίν. Ὅν δὲ τρόπον λαμβάνει ἐξ αὐτοῦ τὰ μόρια τὴν αὕξησιν, ἔτι δὲ περὶ τροφῆς ὅλως, ἐν τοῖς περὶ γενέσεως καὶ ἐν ἑτέροις οἰκειότερόν ἐστι διελθεῖν. Νῦν δ' ἐπὶ τοσοῦτον εἰρήσθω (τοσοῦτον γὰρ χρήσιμον), ὅτι τὸ αἷμα τροφῆς ἔνεκα καὶ τροφῆς τῶν μορίων ἐστί.

Κεφάλαιο 4

Τὰς δὲ καλουμένας ἵνας τὸ μὲν ἔχει αἷμα τὸ δ' οὐκ ἔχει, οἷον τὸ τῶν ἐλάφων καὶ προκῶν. Διόπερ οὐ πήγνυται τὸ τοιοῦτον αἷμα· τοῦ γὰρ αἵματος τὸ μὲν ὕδατῶδες μᾶλλον ψυχρόν ἐστι, διὸ καὶ οὐ πήγνυται, τὸ δὲ γεῶδες πήγνυται συνεξατμίζοντος τοῦ ὑγροῦ· αἱ δ' ἵνες γῆς εἰσιν. Συμβαίνει δ' ἑνιά γε καὶ γλαφυρωτέραν ἔχειν τὴν διάνοιαν τῶν τοιούτων, οὐ διὰ τὴν ψυχρότητα τοῦ αἵματος, ἀλλὰ διὰ τὴν λεπτότητα μᾶλλον καὶ διὰ τὸ καθαρὸν εἶναι· τὸ γὰρ γεῶδες οὐδέτερον ἔχει τούτων. Εὐκίνητοτέραν γὰρ ἔχουσι τὴν αἴσθησιν τὰ λεπτοτέραν ἔχοντα τὴν ὑγρότητα καὶ καθαρωτέραν. Διὰ γὰρ τοῦτο καὶ τῶν ἀναίμων ἑνια συνετωτέραν ἔχει τὴν ψυχὴν ἐνίων ἐναίμων, καθάπερ εἴρηται πρότερον, οἷον ἡ μέλιττα καὶ τὸ γένος τὸ τῶν μυρμηκῶν κἂν εἴ τι ἕτερον τοιοῦτόν ἐστιν. Δειλότερα δὲ τὰ λίαν ὕδατῶδη. Ὁ γὰρ φόβος καταψύχει· προωδοποιῆται οὖν τῷ πάθει τὰ τοιαύτην ἔχοντα τὴν ἐν τῇ καρδίᾳ κρᾶσιν· τὸ γὰρ ὕδωρ τῷ ψυχρῷ πηκτόν ἐστιν. Διὸ καὶ τᾶλλα τὰ ἀναιμα δειλότερα τῶν ἐναίμων ἐστὶν ὥς ἀπλῶς εἰπεῖν, καὶ ἀκινήτιζι τε φοβούμενα καὶ προῖεται περιττώματα καὶ μεταβάλλει ἑνια τὰς χροῖας αὐτῶν. Τὰ δὲ πολλὰς ἔχοντα λίαν ἵνας καὶ παχείας γεωδέστερα τὴν φύσιν ἐστὶ καὶ θυμῶδη τὸ ἦθος καὶ ἐκστατικὰ διὰ τὸν θυμόν. Θερμότητος γὰρ ποιητικὸν ὁ θυμός, τὰ δὲ στερεὰ θερμανθέντα μᾶλλον θερμαίνει τῶν ὑγρῶν· αἱ δ' ἵνες στερεὸν (651a.) καὶ γεῶδες, ὥστε γίνονται οἷον πυρίαι ἐν τῷ αἵματι καὶ ζέσιν ποιοῦσιν ἐν τοῖς θυμοῖς. Διὸ οἱ ταῦροι καὶ οἱ κάπροι θυμῶδεις καὶ ἐκστατικοί· τὸ γὰρ αἷμα τούτων ἰνωδέστατον, καὶ τό γε τοῦ ταύρου τάχιστα πήγνυται πάντων. Ἐξαιρουμένων δὲ τούτων τῶν ἰνῶν οὐ πήγνυται τὸ αἷμα· καθάπερ γὰρ ἐκ πηλοῦ εἴ τις ἐξέλαι τὸ γεῶδες, οὐ πήγνυται τὸ ὕδωρ. οὕτω καὶ τὸ αἷμα· αἱ γὰρ ἵνες γῆς. Μὴ ἐξαιρουμένων δὲ πήγνυται, οἷον ὑγρὰ γῆ ὑπὸ ψύχους· τοῦ γὰρ θερμοῦ ὑπὸ τοῦ ψυχροῦ ἐκθλιβομένου συνεξατμίζει τὸ ὑγρόν, καθάπερ εἴρηται πρότερον, καὶ πήγνυται οὐχ ὑπὸ θερμοῦ ἀλλ' ὑπὸ ψυχροῦ ξηραίνόμενον. Ἐν δὲ τοῖς σώμασιν ὑγρόν ἐστὶ διὰ τὴν θερμότητα τὴν ἐν τοῖς ζώοις. Πολλῶν δ' ἐστὶν αἰτία ἡ τοῦ αἵματος φύσις καὶ κατὰ τὸ ἦθος τοῖς ζώοις καὶ κατὰ τὴν αἴσθησιν, εὐλόγως· ὕλη γὰρ ἐστὶ παντὸς τοῦ σώματος· ἡ γὰρ τροφή ὕλη, τὸ δ' αἷμα ἡ ἐσχάτη τροφή. Πολλὴν οὖν ποιεῖ διαφορὰν θερμὸν ὄν καὶ ψυχρόν

καὶ λεπτὸν καὶ παχὺ καὶ θολερὸν καὶ καθαρὸν. Ἰχώρ δ' ἐστὶ τὸ
ὑδατῶδες τοῦ αἵματος διὰ τὸ μήπω πεπέφθαι ἢ διεφθάρθαι, ὥστε ὁ
μὲν ἐξ ἀνάγκης ἰχώρ, ὁ δ' αἵματος χάριν ἐστίν.

Κεφάλαιο 5

Πιμελή δὲ καὶ στέαρ διαφέρουσι μὲν ἀλλήλων κατὰ τὴν τοῦ αἵματος διαφοράν. Ἔστι γὰρ ἐκάτερον αὐτῶν αἷμα πεπεμμένον δι' εὐτροφίαν, καὶ τὸ μὴ καταναλισκόμενον εἰς τὸ σαρκῶδες μόριον τῶν ζῶων, εὐπεπτον δὲ καὶ εὐτραφές.

Δηλοῖ δὲ τὸ λιπαρὸν αὐτῶν· τῶν γὰρ ὑγρῶν τὸ λιπαρὸν κοινὸν ἀέρος καὶ πυρός ἐστιν. Διὰ τοῦτο οὐδὲν ἔχει τῶν ἀναίμων οὔτε πιμελὴν οὔτε στέαρ, ὅτι οὐδ' αἷμα. Τῶν δ' ἐναίμων τὰ μὲν σωματῶδες ἔχοντα τὸ αἷμα στέαρ ἔχει μᾶλλον. Τὸ γὰρ στέαρ γεῶδες ἐστὶ, διὸ πηγνυται καθάπερ καὶ τὸ ἰνῶδες, καὶ αὐτὸ καὶ οἱ ζῶμοι οἱ τοιοῦτοι· ὀλίγον γὰρ ἔχει ὕδατος, τὸ δὲ πολὺ γῆς. Διὸ τὰ μὴ ἀμφώδοντα ἀλλὰ κερατῶδη στέαρ ἔχει. Φανερά δ' ἡ φύσις αὐτῶν τοῦ τοιοῦτου στοιχείου πλήρης οὔσα τῷ κερατῶδῃ εἶναι καὶ ἀστραγάλους ἔχειν· ἅπαντα γὰρ ξηρὰ καὶ γεηρὰ τὴν φύσιν ἐστίν. Τὰ δ' ἀμφώδοντα καὶ ἀκέρατα καὶ πολυσχιδῇ πιμελὴν ἔχει ἀντὶ στέατος, ἥ οὐ πηγνυται οὐδὲ θρύπτεται ξηραινομένη διὰ τὸ μὴ εἶναι γεῶδη τὴν φύσιν αὐτῆς. Μέτρια μὲν οὖν ταῦτα ὄντα ἐν τοῖς μορίοις τῶν ζῶων ὠφελεῖ (πρὸς μὲν γὰρ αἴσθησιν οὐκ (651b.) ἐμποδίζει, πρὸς δ' ὑγίειαν καὶ δύναμιν ἔχει βοήθειαν), ὑπερβάλλοντα δὲ τῷ πλήθει φθείρει καὶ βλάπτει. Εἰ γὰρ πᾶν γένοιτο τὸ σῶμα πιμελή καὶ στέαρ, ἀπόλοιτ' ἄν. Ζῶον μὲν γὰρ ἐστὶ κατὰ τὸ αἰσθητικὸν μόριον, ἡ δὲ σὰρξ καὶ τὸ ἀνάλογον αἰσθητικόν· τὸ δ' αἷμα, ὥσπερ εἴρηται καὶ πρότερον, οὐκ ἔχει αἴσθησιν, διὸ οὐδὲ πιμελή οὐδὲ στέαρ· αἷμα γὰρ πεπεμμένον ἐστίν. Ὡστ' εἰ πᾶν γένοιτο τὸ σῶμα τοιοῦτον, οὐκ ἂν ἔχοι οὐδεμίαν αἴσθησιν. Διὸ καὶ γηράσκει ταχέως τὰ λίαν πίονα· ὀλίγαιμα γὰρ ἄτε εἰς τὴν πύοτητα ἀναλίσκομένου τοῦ αἵματος, τὰ δ' ὀλίγαιμα ἤδη προωδοποιῆται πρὸς τὴν φθοράν· ἡ γὰρ φθορὰ ὀλιγαίμια τίς ἐστὶ, καὶ τὸ ὀλίγον παθητικὸν καὶ ὑπὸ ψυχροῦ τοῦ τυχόντος καὶ ὑπὸ θερμοῦ.

Καὶ ἀγνώτερα δὴ τὰ πίονά ἐστι διὰ τὴν αὐτὴν αἰτίαν· ὁ γὰρ ἔδει ἐκ τοῦ αἵματος εἰς τὴν γονὴν ἰέναι καὶ τὸ σπέρμα, τοῦτ' εἰς τὴν πιμελὴν ἀναλίσκεται καὶ τὸ στέαρ· πεττόμενον γὰρ τὸ αἷμα γίνεται ταῦτα, ὥστε ἢ ὅλως οὐ γίνεται περίττωμα αὐτοῖς οὐδὲν ἢ ὀλίγον.

Κεφάλαιο 6

Καὶ περὶ μὲν αἵματος καὶ ἰχῶρος καὶ πιμελῆς καὶ στέατος, τί τέ ἐστιν ἕκαστον αὐτῶν καὶ διὰ τίνας αἰτίας, εἴρηται. Ἔστι δὲ καὶ ὁ μυελὸς αἵματός τις φύσις, καὶ οὐχ ὥσπερ οἶονταί τινες, τῆς γονῆς σπερματικῇ δυνάμει. Δηλοῖ δ' ἐν τοῖς νέοις πάμπαν· ἅτε γὰρ ἐξ αἵματος συνεστώτων τῶν μορίων καὶ τῆς τροφῆς οὔσης τοῖς ἐμβρύοις αἵματος, καὶ ἐν τοῖς ὅστοις ὁ μυελὸς αἱματώδης ἐστίν· αὐξανομένων δὲ καὶ πεττομένων, καθάπερ καὶ τὰ μόρια μεταβάλλει καὶ τὰ σπλάγχνα τὰς χροάς (ὕπερβολῇ γὰρ αἱματώδες καὶ τῶν σπλάγχνων ἕκαστόν ἐστιν ἔτι νέων ὄντων), οὕτω καὶ ὁ μυελός· καὶ τῶν μὲν πιμελωδῶν λιπαρὸς καὶ πιμελῇ ὅμοιος, ὅσοις δὲ μὴ πιμελῇ ὅμοιος ἀλλὰ στέαρ γίνεται τὸ αἷμα πεττόμενον, τούτοις δὲ στεατώδης. Διὸ τοῖς μὲν κερατοφόροις καὶ μὴ ἀμφώδουσι στεατώδης, τοῖς δ' ἀμφώδουσι καὶ πολυσχιδέσι πιμελώδης. Ἦκιστα δὲ τοιοῦτος ὁ ραχίτης ἐστὶ μυελὸς διὰ τὸ δεῖν αὐτὸν εἶναι συνεχῇ καὶ διέχειν διὰ πάσης τῆς ράχεως διηρημένης κατὰ τοὺς σφονδύλους· λιπαρὸς δ' ὢν ἢ στεατώδης οὐκ ἂν ὁμοίως ἦν συνεχῆς, ἀλλ' ἢ θραυστὸς ἢ ὑγρός. Ἐνια δ' οὐκ ἔχει τῶν ζώων ὡς ἀξίως εἰπεῖν μυελόν, ὅσων τὰ ὀστέα ἰσχυρὰ καὶ πυκνά, οἷον τὰ τοῦ (652a.) λέοντος· τούτου γὰρ τὰ ὀστέα, διὰ τὸ πάμπαν ἄσημον ἔχειν, δοκεῖ οὐκ ἔχειν ὅλως μυελόν. Ἐπεὶ δὲ τὴν μὲν τῶν ὀστέων ἀνάγκη φύσιν ὑπάρχειν τοῖς ζώοις, ἢ τὸ ἀνάλογον τοῖς ὅστοις, οἷον τοῖς ἐνύδροις τὴν ἄκανθαν, ἀναγκαῖον ἐνίοις ὑπάρχειν καὶ μυελόν, ἐμπεριλαμβανομένης τῆς τροφῆς ἐξ ἧς γίνεται τὰ ὀστέα. Ὅτι δ' ἡ τροφή πᾶσιν αἷμα, εἴρηται πρότερον. Εὐλόγως δὲ καὶ στεατώδεις οἱ μυελοὶ καὶ πιμελώδεις εἰσίν· διὰ γὰρ τὴν ἀλέαν τὴν γινομένην ὑπὸ τοῦ περιέχεσθαι τοῖς ὅστοις πέττεται τὸ αἷμα, ἢ δὲ καθ' αὐτὸ πέψις αἵματος στέαρ καὶ πιμελή ἐστιν. Καὶ ἐν τοῖς δὴ τὰ ὀστέα πυκνὰ ἔχουσι καὶ ἰσχυρὰ εὐλόγως ἐν τοῖς μὲν οὐκ ἔνεστι, τοῖς δ' ὀλίγος ἔνεστιν· εἰς γὰρ τὰ ὀστέα ἀναλίσκεται ἡ τροφή. Ἐν δὲ τοῖς μὴ ἔχουσιν ὀστέα ἀλλ' ἄκανθαν ὁ ραχίτης μόνος ἐστὶ μυελός· ὀλίγαιμά τε γὰρ φύσει ὑπάρχει ὄντα, καὶ κοίλῃ ἄκανθα μόνον ἢ τῆς ράχεώς ἐστιν. Διὸ ἐν ταύτῃ ἐγγίνεται· μόνη τε γὰρ ἔχει χώραν, καὶ μόνη δεῖται συνδέσμου διὰ τὰς διαλήψεις. Διὸ καὶ ὁ ἐνταῦθα μυελός, ὥσπερ εἴρηται, ἀλλοιότερός ἐστιν· διὰ τὸ ἀντὶ περόνης γὰρ γίνεσθαι γλίσχρος καὶ

νευρώδης ἐστίν, ἵν' ἔχη τάσιν. Διὰ τί μὲν οὖν μυελὸν ἔχει τὰ ζῷα τὰ ἔχοντα μυελόν, εἴρηται· καὶ τί ἐστὶν ὁ μυελός, ἐκ τούτων φανερόν, ὅτι τῆς αἱματικῆς τροφῆς τῆς εἰς ὅσα καὶ ἄκανθαν μεριζομένης ἐστὶ τὸ ἐμπεριλαμβανόμενον περίττωμα πεφθέν.

Κεφάλαιο 7

Περὶ δ' ἐγκεφάλου σχεδὸν ἐστὶν ἐχόμενον εἰπεῖν· πολλοῖς γὰρ καὶ ὁ ἐγκέφαλος δοκεῖ μυελὸς εἶναι καὶ ἀρχὴ τοῦ μυελοῦ διὰ τὸ συνεχῆ τὸν ῥαχίτην αὐτῷ ὁρᾶν μυελόν.

Ἔτι δὲ πᾶν τοῦναντίον αὐτῷ τὴν φύσιν ὡς εἰπεῖν· ὁ μὲν γὰρ ἐγκέφαλος ψυχρότατον τῶν ἐν τῷ σώματι μορίων, ὁ δὲ μυελὸς θερμὸς τὴν φύσιν· δηλοῖ δ' ἡ λιπαρότης αὐτοῦ καὶ τὸ πῖον. Διὸ καὶ συνεχῆς ὁ ῥαχίτης τῷ ἐγκεφάλῳ ἐστίν· ἀεὶ γὰρ ἡ φύσις μηχανᾶται πρὸς τὴν ἐκάστου ὑπερβολὴν βοήθειαν τὴν τοῦ ἐναντίου παρεδρίαν, ἵνα ἀνισάζῃ τὴν θατέρου ὑπερβολὴν θάτερον. Ὅτι μὲν οὖν ὁ μυελὸς θερμόν ἐστι, δῆλον ἐκ πολλῶν· ἡ δὲ τοῦ ἐγκεφάλου ψυχρότης φανερά μὲν καὶ κατὰ τὴν θίξιν, ἔτι δ' ἀναιμιότατον τῶν ὑγρῶν τῶν ἐν τῷ σώματι πάντων (οὐδ' ὅτιοῦν γὰρ αἵματος ἔχει ἐν αὐτῷ) καὶ (652b.) αὐχμηρότατον. Ἔστι δ' οὔτε περίττωμα οὔτε τῶν συνεχῶν μορίων, ἀλλὰ ἴδιος ἡ φύσις, καὶ εὐλόγως τοιαύτη. Ὅτι μὲν οὖν οὐκ ἔχει συνέχειαν οὐδεμίαν πρὸς τὰ αἰσθητικὰ μόρια, δῆλον μὲν καὶ διὰ τῆς ὀψεως, ἔτι δὲ μᾶλλον τῷ μηδεμίαν ποιεῖν αἴσθησιν θιγγανόμενος, ὥσπερ οὐδὲ τὸ αἷμα οὐδὲ τὸ περίττωμα τῶν ζώων. Ὑπάρχει δ' ἐν τοῖς ζώοις πρὸς τὴν τῆς φύσεως ὅλης σωτηρίαν. Οἱ μὲν γὰρ τοῦ ζῴου τὴν ψυχὴν τιθέασιν πῦρ ἢ τοιαύτην τινὰ δύναμιν φορτικῶς τιθέντες· βέλτιον δ' ἴσως φάναι ἐν τοιούτῳ τινὶ σώματι συνεστάναι. Τούτου δ' αἴτιον ὅτι τοῖς τῆς ψυχῆς ἔργοις ὑπηρετικώτατον τῶν σωμάτων τὸ θερμόν ἐστιν· τὸ τρέφειν γὰρ καὶ κινεῖν ψυχῆς ἔργον ἐστί, ταῦτα δὲ διὰ ταύτης μάλιστα γίνεται τῆς δυνάμεως. Ὅμοιον οὖν τὸ τὴν ψυχὴν εἶναι φάναι πῦρ, καὶ τὸ πρίονα ἢ τρύπανον τὸν τέκτονα ἢ τὴν τεκτονικὴν, ὅτι τὸ ἔργον περαίνεται ἐγγὺς ἀλλήλων οὖσιν. Ὅτι μὲν οὖν θερμότητος τὰ ζῶα μετέχειν ἀναγκαῖον, δῆλον ἐκ τούτων.

Ἐπεὶ δ' ἅκαὶ τοῦ μέσου (τὴν γὰρ οὐσίαν ἔχει τοῦτο καὶ τὸν λόγον, τῶν δ' ἄκρων ἐκάτερον οὐκ ἔχει χωρὶς), διὰ ταύτην τὴν αἰτίαν πρὸς τὸν τῆς καρδίας τόπον καὶ τὴν ἐν αὐτῇ θερμότητα μεμηχάνηται τὸν ἐγκέφαλον ἢ φύσις, καὶ τούτου χάριν ὑπάρχει τοῦτο τὸ μόριον τοῖς ζώοις, τὴν φύσιν ἔχον κοινὴν ὕδατος καὶ γῆς. Καὶ διὰ τοῦτο τὰ ἔναιμα ἔχει πάντα ἐγκέφαλον, τῶν δ' ἄλλων οὐδὲν ὡς εἰπεῖν, πλὴν ὅτι κατὰ τὸ ἀνάλογον, οἷον ὁ πολύπους· ὀλιγόθερμα γὰρ πάντα διὰ τὴν ἀναιμίαν. Ὁ μὲν οὖν ἐγκέφαλος εὐκρατον ποιεῖ τὴν ἐν τῇ καρδίᾳ

θερμότητα καὶ ζέσιν· ἵνα δὲ καὶ τοῦτο τὸ μόριον τυγχάνῃ μετρίας θερμότητος, ἀφ' ἑκατέρας τῆς φλεβός, τῆς τε μεγάλης καὶ τῆς καλουμένης ἁορτῆς, τελευτῶσιν αἱ φλέβες εἰς τὴν μήνιγγα τὴν περὶ τὸν ἐγκέφαλον. Πρὸς δὲ τὸ τῇ θερμότητι μὴ βλάπτειν, ἀντὶ μὲν μεγάλων ὀλίγων πυκναὶ καὶ λεπταὶ φλέβες περιέχουσιν αὐτόν, ἀντὶ δὲ πολλοῦ καὶ παχέος αἵματος λεπτόν καὶ καθαρόν. Διὸ καὶ τὰ ρεύματα τοῖς σώμασιν ἐκ τῆς κεφαλῆς ἐστὶ τὴν ἀρχήν, ὅσοις ἂν ᾗ τὰ περὶ τὸν ἐγκέφαλον ψυχρότερα τῆς συμμετρου κράσεως· ἀναθυμιωμένης γὰρ διὰ τῶν φλεβῶν ἄνω τῆς (653a.) τροφῆς τὸ περίττωμα ψυχόμενον διὰ τὴν τοῦ τόπου τούτου δύναμιν ρεύματα ποιεῖ φλέγματος καὶ ἰχῶρος. Δεῖ δὲ λαβεῖν, ὡς μεγάλῳ παρεικάζοντα μικρόν, ὁμοίως συμβαίνειν ὥσπερ τὴν τῶν ὑετῶν γένεσιν· ἀναθυμιωμένης γὰρ ἐκ τῆς γῆς τῆς ἀτμίδος καὶ φερομένης ὑπὸ τοῦ θερμοῦ πρὸς τὸν ἄνω τόπον, ὅταν ἐν τῷ ὑπὲρ τῆς γῆς γένηται ἀέρι ὄντι ψυχρῷ, συνίσταται πάλιν εἰς ὕδωρ διὰ τὴν ψύξιν καὶ ρεῖ κάτω πρὸς τὴν γῆν. Ἀλλὰ περὶ μὲν τούτων ἐν ταῖς τῶν νόσων ἀρχαῖς ἀρμόττει λέγειν, ἐφ' ὅσον τῆς φυσικῆς φιλοσοφίας ἐστὶν εἰπεῖν περὶ αὐτῶν· ποιεῖ δὲ καὶ τὸν ὕπνον τοῖς ζώοις τοῦτοτὸ μόριον τοῖς ἔχουσιν ἐγκέφαλον, τοῖς δὲ μὴ ἔχουσι τὸ ἀνάλογον. Καταψύχον γὰρ τὴν ἀπὸ τῆς τροφῆς τοῦ αἵματος ἐπίρρυσιν, ἥ καὶ διὰ τινος ὁμοίας αἰτίας ἄλλας, βαρύνει τε τὸν τόπον (διὸ τὴν κεφαλὴν καρηβαροῦσιν οἱ ὑπνώσοντες) καὶ κάτω ποιεῖ τὸ θερμὸν ὑποφεύγειν μετὰ τοῦ αἵματος. Διὸ πλεῖον ἀθροιζόμενον ἐπὶ τὸν κάτω τόπον ἀπεργάζεται τὸν ὕπνον, καὶ τὸ δύνασθαι ἐστάναι ὀρθὰ ἀφαιρεῖται, ὅσα τῶν ζώων ὀρθὰ τὴν φύσιν ἐστί, τῶν δ' ἄλλων τὴν ὀρθότητα τῆς κεφαλῆς· περὶ ὧν εἴρηται καθ' αὐτὰ ἐν τε τοῖς περὶ αἰσθήσεως καὶ περὶ ὕπνου διωρισμένοις.

Ὅτι δ' ἐστὶν ὁ ἐγκέφαλος κοινὸς ὕδατος καὶ γῆς, δηλοῖ τὸ συμβαίνειν περὶ αὐτόν· ἐψόμενος γὰρ γίνεται ξηρὸς καὶ σκληρὸς, καὶ λείπεται τὸ γεῶδες ἐξατμισθέντος τοῦ ὕδατος ὑπὸ τῆς θερμότητος, ὥσπερ τὰ τῶν χεδρόπων ἐψήματα καὶ τῶν ἄλλων καρπῶν, διὰ τὸ γῆς εἶναι τὸ πλεῖστον μέρος, ἐξιόντος τοῦ मिχθέντος ὑγροῦ· καὶ γὰρ ταῦτα γίνεται σκληρὰ καὶ γεηρὰ πάμπαν. Ἔχει δὲ τῶν ζώων ἐγκέφαλον πλεῖστον ἄνθρωπος ὡς κατὰ μέγεθος, καὶ τῶν ἀνθρώπων οἱ ἄρρενες τῶν θηλειῶν· καὶ γὰρ τὸν περὶ τὴν καρδίαν καὶ τὸν πλεύμονα τόπον θερμότατον καὶ ἐναιμότατον. Διὸ καὶ μόνον ἐστὶ τῶν ζώων ὀρθόν· ἡ γὰρ τοῦ θερμοῦ φύσις ἐνισχύουσα ποιεῖ τὴν

αὔξησιν ἀπὸ τοῦ μέσου κατὰ τὴν αὐτῆς φοράν. Πρὸς οὖν πολλὴν θερμότητα ἀντίκειται πλείων ὑγρότης καὶ ψυχρότης, καὶ διὰ τὸ πλῆθος ὀψιαίτατα πήγνυνται τὸ περὶ τὴν κεφαλὴν ὅστουν, ὃ καλοῦσι βρέγμα τινές, διὰ τὸ πολὺν χρόνον τὸ θερμὸν ἀπατμίζειν· τῶν δ' ἄλλων οὐδενὶ τοῦτο συμβαίνει τῶν ἐναίμων ζώων. Καὶ ῥαφὰς δὲ πλείστας ἔχει περὶ τὴν (653b.) κεφαλὴν, καὶ τὸ ἄρρεν πλείους τῶν θηλειῶν, διὰ τὴν αὐτὴν αἰτίαν, ὅπως ὁ τόπος εὐπνους ἦ, καὶ μᾶλλον ὁ πλείων ἐγκέφαλος· ὑγραινόμενος γὰρ ἢ ξηραίνόμενος μᾶλλον οὐ ποιήσει τὸ αὐτοῦ ἔργον, ἀλλ' ἢ οὐ ψύξει ἢ πήξει, ὥστε νόσους καὶ παρανοίας ποιεῖν καὶ θανάτους· τὸ γὰρ ἐν τῇ καρδίᾳ θερμὸν καὶ ἡ ἀρχὴ συμπαθέστατόν ἐστι καὶ ταχεῖαν ποιεῖται τὴν αἴσθησιν μεταβάλλοντός τι καὶ πάσχοντος τοῦ περὶ τὸν ἐγκέφαλον αἵματος.

Περὶ μὲν οὖν τῶν συμφύτων τοῖς ζώοις ὑγρῶν σχεδὸν εἴρηται περὶ πάντων· τῶν δ' ὑστερογενῶν τὰ τε περιττώματα τῆς τροφῆς ἐστὶ, τό τε τῆς κύστεως ὑπόστημα καὶ τὸ τῆς κοιλίας, καὶ παρὰ ταῦτα γονὴ καὶ γάλα τοῖς πεφυκόσιν ἔχειν ἕκαστα τούτων. Τὰ μὲν οὖν τῆς τροφῆς περιττώματα περὶ τὴν τῆς τροφῆς σκέψιν καὶ θεωρίαν οἰκείους ἔχει τοὺς λόγους, τίσι τε τῶν ζώων ὑπάρχει καὶ διὰ τίνας αἰτίας, τὰ δὲ περὶ σπέρματος καὶ γάλακτος ἐν τοῖς περὶ γενέσεως· τὸ μὲν γὰρ ἀρχὴ γενέσεως αὐτῶν ἐστὶ, τὸ δὲ χάριν γενέσεως.

Κεφάλαιο 8

Περὶ δὲ τῶν ἄλλων μορίων τῶν ὁμοιομερῶν σκεπτέον, καὶ πρῶτον περὶ σαρκὸς ἐν τοῖς ἔχουσι σάρκας, ἐν δὲ τοῖς ἄλλοις τὸ ἀνάλογον· τοῦτο γὰρ ἀρχὴ καὶ σῶμα καθ' αὐτὸ τῶν ζώων ἐστίν. Δῆλον δὲ καὶ κατὰ τὸν λόγον· τὸ γὰρ ζῶον ὀρίζομεθα τῷ ἔχειν αἴσθησιν, πρῶτον δὲ τὴν πρώτην· αὕτη δ' ἐστὶν ἀφή, ταύτης δ' αἰσθητήριον τὸ τοιοῦτον μόνιον ἐστίν, ἥτοι τὸ πρῶτον, ὥσπερ ἡ κόρη τῆς ὄψεως, ἢ τὸ δι' οὗ συνειλημμένον, ὥσπερ ἂν εἴ τις προσλάβοι τῇ κόρῃ τὸ διαφανὲς πᾶν. Ἐπὶ μὲν οὖν τῶν ἄλλων αἰσθήσεων ἀδύνατόν τε καὶ οὐδὲν προὔργου τοῦτ' ἦν ποιῆσαι τῇ φύσει, τὸ δ' ἀπτικὸν ἐξ ἀνάγκης· μόνον γὰρ ἢ μάλιστα τοῦτ' ἔστι σωματῶδες τῶν αἰσθητηρίων. Κατὰ δὲ τὴν αἴσθησιν φανερόν πάντα τᾶλλα τούτου χάριν ὄντα, λέγω δ' οἶον ὅστ' αἰ καὶ δέρμα καὶ νεῦρα καὶ φλέβες, ἔτι δὲ τρίχες καὶ τὸ τῶν ὀνύχων γένος, καὶ εἴ τι τοιοῦτον ἕτερόν ἐστιν. Ἡ μὲν γὰρ τῶν ὀστέων φύσις σωτηρίας ἔνεκεν μεμηγάνηται μαλακοῦ, σκληρὰ τὴν φύσιν οὔσα, ἐν τοῖς ἔχουσιν ὅστ' αἰ· ἐν δὲ τοῖς μὴ ἔχουσι τὸ ἀνάλογον, οἶον ἐν τοῖς ἰχθύσι τοῖς μὲν ἄκανθα τοῖς δὲ χόνδρος. Τὰ μὲν οὖν ἔχει τῶν ζώων ἐντὸς τὴν τοιαύτην βοήθειαν, ἔνια δὲ τῶν (654a.) ἀναίμων ἐκτός, ὥσπερ τῶν τε μαλακοστράκων ἕκαστον, οἶον καρκίνοι καὶ τὸ τῶν καράβων γένος, καὶ τὸ τῶν ὀστρακοδέρμων ὡσαύτως, οἶον τὰ καλούμενα ὀστρεα· πᾶσι γὰρ τούτοις τὸ μὲν σαρκῶδες ἐντός, τὸ δὲ συνέχον καὶ φυλάττον ἐκτός τὸ γεῶδές ἐστιν· πρὸς γὰρ τῇ φυλακῇ τῆς συνεχείας, τῷ ἔχειν ὀλίγον αὐτῶν τὴν φύσιν θερμὸν ἀναίμων ὄντων, οἶον πνιγεὺς τις περικείμενον τὸ ὀστρακὸν φυλάττει τὸ ἐμπεφυρευμένον θερμόν. Ἡ δὲ χελώνη καὶ τὸ τῶν ἐμύδων γένος ὁμοίως ἔχειν δοκεῖ τούτοις, ἕτερον ὃν γένος τούτων. Τὰ δ' ἔντομα τῶν ζώων καὶ τὰ μαλάκια τούτοις τ' ἐναντίως καὶ αὐτοῖς ἀντικειμένως συνέστηκεν· οὐδὲν γὰρ ὀστωδες ἔχειν ἔοικεν οὐδὲ γεηρὸν ἀποκεκριμένον, ὃ τι καὶ ἄξιον εἰπεῖν, ἀλλὰ τὰ μὲν μαλάκια σχεδὸν ὅλα σαρκώδη καὶ μαλακά, πρὸς δὲ τὸ μὴ εὐφθαρτον εἶναι τὸ σῶμα αὐτῶν, καθάπερ τὰ σαρκώδη, μεταξὺ σαρκὸς καὶ νεύρου τὴν φύσιν ἔχει. Μαλακὸν μὲν γὰρ ὥσπερ σὰρξ ἐστίν, ἔχει δὲ τάσιν ὥσπερ νεῦρον· τὴν δὲ σχίσιν ἔχει τῆς σαρκὸς οὐ κατ' εὐθυωρίαν ἀλλὰ κατὰ κύκλους διαιρετήν· οὕτως γὰρ ἂν ἔχον χρησιμώτατον ἂν εἴη πρὸς τὴν ἰσχύν. Ὑπάρχει δ'

ἐν αὐτοῖς καὶ τὸ ἀνάλογον ταῖς τῶν ἰχθύων ἀκάνθαις, οἷον ἐν μὲν ταῖς σηπίαις τὸ καλούμενον σηπίον, ἐν δὲ ταῖς τευθίσιν τὸ καλούμενον ξίφος. Τὰ δ' αὖ τῶν πολυπόδων τοιοῦτον οὐδὲν ἔχει διὰ τὸ μικρὸν ἔχειν τὸ κύτος τὴν καλουμένην κεφαλὴν, θάτερα δ' εὐμήκη. Διὸ πρὸς τὴν ὀρθότητα αὐτῶν καὶ τὴν ἀκαμψίαν ὑπέγραψε ταῦτα ἢ φύσις, ὥσπερ τῶν ἐναίμων τοῖς μὲν ὀστοῦν τοῖς δ' ἄκανθαν. Τὰ δ' ἔντομα τούτοις τ' ἐναντίως ἔχει καὶ τοῖς ἐναίμοις, καθάπερ εἵπομεν. Οὐδὲν γὰρ ἀφωρισμένον ἔχει σκληρόν, τὸ δὲ μαλακόν, ἀλλ' ὅλον τὸ σῶμα σκληρόν, σκληρότητα δὲ τοιαύτην, ὅστοῦ μὲν σαρκωδεστέραν, σαρκὸς δ' ὀστωδεστέραν καὶ γεωδεστέραν, πρὸς τὸ μὴ εὐδιαίρετον εἶναι τὸ σῶμα αὐτῶν.

Κεφάλαιο 9

Ἔχει δ' ὁμοίως ἢ τε τῶν ὀστέων καὶ ἢ τῶν φλεβῶν φύσις. Ἐκατέρα γὰρ αὐτῶν ἀφ' ἐνὸς ἡργμένη συνεχῆς ἐστὶ, καὶ οὔτε ὀστοῦν ἐστὶν καθ' αὐτὸ οὐδέν, ἀλλ' ἢ μόριον ὡς συνεχοῦς ἢ ἀπτόμενον καὶ προσδεδεμένον, ἵνα χρῆται ἢ φύσις (654b.) καὶ ὡς ἐνὶ καὶ συνεχεῖ καὶ ὡς δυσὶ καὶ διηρημένοις πρὸς τὴν κάμψιν. Ὅμοίως δὲ καὶ φλὲψ οὐδεμία αὐτὴ καθ' αὐτήν ἐστιν, ἀλλὰ πᾶσαι μόριον μιᾶς εἰσιν. Ὅστοῦν τε γὰρ εἴ τι κεχωρισμένον ἦν, τό τ' ἔργον οὐκ ἂν ἐποίει οὗ χάριν ἢ τῶν ὀστέων ἐστὶ φύσις (οὔτε γὰρ ἂν κάμψεως ἦν αἴτιον οὐτ' ὀρθότητος οὐδεμιᾶς μὴ συνεχῆς ὄν ἀλλὰ διαλεῖπον), ἔτι τ' ἔβλαπτεν ἂν ὥσπερ ἄκανθὰ τις ἢ βέλος ἐνὸν ταῖς σαρκὶν. Εἴτε φλὲψ ἦν τις κεχωρισμένη καὶ μὴ συνεχῆς πρὸς τὴν ἀρχήν, οὐκ ἂν ἔσωζε τὸ ἐν αὐτῇ αἷμα· ἢ γὰρ ἀπ' ἐκείνης θερμότης κωλύει πηγνυσθαι, φαίνεται δὲ καὶ σηπόμενον τὸ χωριζόμενον. Ἀρχὴ δὲ τῶν μὲν φλεβῶν ἢ καρδία, τῶν δ' ὀστέων ἢ καλουμένη ράχις τοῖς ἔχουσιν ὀστᾶ πᾶσιν, ἀφ' ἧς συνεχῆς ἢ τῶν ἄλλων ὀστέων ἐστὶ φύσις.

Ἡ γὰρ τὸ μῆκος καὶ τὴν ὀρθότητα συνέχουσα τῶν ζώων ἢ ράχις ἐστίν. Ἐπεὶ δ' ἀνάγκη κινουμένου τοῦ ζώου κάμπτεσθαι τὸ σῶμα, μία μὲν διὰ τὴν συνέχειάν ἐστὶ, πολυμερὴς δὲ τῇ διαιρέσει τῶν σπονδύλων. Ἐκ δὲ ταύτης τοῖς ἔχουσι κῶλα συνεχῇ πρὸς αὐτήν, τὰ τούτων ὀστᾶ τῶν ἀρμονιῶν ἐστίν, ἧ μὲν ἔχει τὰ κῶλα κάμψιν, συνδεδεμένα τε νεύροις, καὶ τῶν ἐσχάτων συναρμοττόντων τοῦ μὲν ὄντος κοίλου τοῦ δὲ περιφεροῦς, ἢ καὶ ἀμφοτέρων κοίλων, ἐν μέσῳ δὲ περιειληφόντων, οἷον γόμφον, ἀστράγαλον, ἵνα γίγνηται κάμψις καὶ ἔκτασις· ἄλλως γὰρ ἢ ὅλως ἀδύνατον, ἢ οὐ καλῶς ἂν ἐποίουν τὴν τοιαύτην κίνησιν. Ἐνία δ' αὐτῶν ὁμοίαν ἔχοντα τὴν ἀρχὴν τὴν θατέρου τῇ τελευτῇ θατέρου, συνδέδεται νεύροις. Καὶ χονδρῶδη δὲ μόρια μεταξὺ τῶν κάμψεων εἰσιν, οἷον στοιβή, πρὸς τὸ ἄλληλα μὴ τρίβειν.

Περὶ δὲ τὰ ὀστᾶ αἱ σάρκες περιπεφύκασι, προσειλημμένοι λεπτοῖς καὶ ἰνώδεσι δεσμοῖς, ὧν ἕνεκεν τὸ τῶν ὀστέων ἐστὶ γένος. Ὡσπερ γὰρ οἱ πλάττοντες ἐκ πηλοῦ ζῶον ἢ τινος ἄλλης ὑγρᾶς συστάσεως ὑφιστάσι τῶν στερεῶν τι σωμάτων, εἴθ' οὕτω περιπλάττουσι, τὸν αὐτὸν τρόπον ἢ φύσις δεδημιούργηκεν ἐκ τῶν σαρκῶν τὸ ζῶον. Τοῖς μὲν οὖν ἄλλοις ὕπεστιν ὀστᾶ τοῖς σαρκώδεσι μορίοις, τοῖς μὲν

κινουμένοις διὰ κάμπιν τούτου χάριν, τοῖς δ' ἀκινήτοις φυλακῆς ἔνεκεν, οἷον αἱ συγκλείουσαι πλευραὶ τὸ στήθος σωτηρίας (655a.) χάριν τῶν περὶ τὴν καρδίαν σπλάγχων· τὰ δὲ περὶ τὴν κοιλίαν ἀνόστεα πᾶσιν, ὅπως μὴ κωλύῃ τὴν ἀνοίδησιν τὴν ἀπὸ τῆς τροφῆς γινομένην τοῖς ζώοις ἐξ ἀνάγκης καὶ τοῖς θήλεσι τὴν ἐν αὐτοῖς τῶν ἐμβρύων αὖξησιν. Τὰ μὲν οὖν ζωοτόκα τῶν ζώων καὶ ἐν αὐτοῖς καὶ ἐκτὸς παραπλησίαν ἔχει τὴν τῶν ὀστέων δύναμιν καὶ ἰσχυράν. Πολὺ γὰρ μείζω πάντα τὰ τοιαῦτα τῶν μὴ ζωοτόκων ὥς κατὰ λόγον εἰπεῖν τῶν σωμάτων· ἐνιαχοῦ γὰρ πολλὰ γίνεται μέγала τῶν ζωοτόκων, οἷον ἐν Λιβύῃ καὶ τοῖς τόποις τοῖς θερμοῖς καὶ τοῖς ξηροῖς. Τοῖς δὲ μέγαλοις ἰσχυροτέρων δεῖ τῶν ὑπερεισμάτων καὶ μειζόνων καὶ σκληροτέρων, καὶ τούτων αὐτῶν τοῖς βιαστικωτέροις. Διὸ τὰ τῶν ἄρρένων σκληρότερα ἢ τὰ τῶν θηλειῶν, καὶ τὰ τῶν σαρκοφάγων (ἡ τροφή γὰρ διὰ μάχης τούτοις), ὥσπερ τὰ τοῦ λέοντος· οὕτω γὰρ ἔχει ταῦτα σκληρὰν τὴν φύσιν ὥστ' ἐξάπτεσθαι τυπτομένων καθάπερ ἐκ λίθων πῦρ. Ἐχει δὲ καὶ ὁ δελφίς οὐκ ἀκάνθας ἀλλ' ὅστᾳ· ζωοτόκος γὰρ ἐστίν. Τοῖς δ' ἐναίμοις μὲν μὴ ζωοτόκοις δὲ παραλλάττει κατὰ μικρὸν ἢ φύσις, οἷον τοῖς ὄρνισιν ὅστᾳ μὲν, ἀσθενέστερα δέ. Τῶν δ' ἰχθύων τοῖς μὲν ὠοτόκοις ἄκανθα, καὶ τοῖς ὄφεσιν ἀκανθώδης ἐστὶν ἢ τῶν ὀστέων φύσις, πλὴν τοῖς λίαν μέγαλοις· τούτοις δέ, δι' ἅπερ καὶ τοῖς ζωοτόκοις, πρὸς τὴν ἰσχὺν ἰσχυροτέρων δεῖ τῶν στερεωμάτων.

Τὰ δὲ καλούμενα σελάχη χονδράκανθα τὴν φύσιν ἐστίν· ὑγροτέραν τε γὰρ ἀναγκαῖον αὐτῶν εἶναι τὴν κίνησιν, ὥστε δεῖ καὶ τὴν τῶν ἐρεισμάτων μὴ κραῦρον εἶναι ἀλλὰ μαλακωτέραν, καὶ τὸ γεῶδες εἰς τὸ δέρμα πᾶν ἀνήλωκεν ἢ φύσις· ἅμα δὲ τὴν αὐτὴν ὑπεροχὴν εἰς πολλοὺς τόπους ἀδυνατεῖ διανέμειν ἢ φύσις. Ἐνεστι δὲ καὶ ἐν τοῖς ζωοτόκοις πολλὰ τῶν ὀστέων χονδρώδη, ἐν ὅσοις συμφέρει μαλακὸν εἶναι καὶ μυξῶδες τὸ στερεὸν διὰ τὴν σάρκα τὴν περικειμένην, οἷον συμβέβηκε περὶ τε τὰ ὦτα καὶ τοὺς μυκτῆρας· θραύεται γὰρ τὰ κραῦρα ταχέως ἐν τοῖς ἀπέχουσιν. Ἡ δὲ φύσις ἢ αὐτὴ χόνδρου καὶ ὀστοῦ ἐστὶ, διαφέρει δὲ τῷ μᾶλλον καὶ ἥττον· διὸ καὶ οὐδέτερον αὐξάνεται ἀποκοπέν. Οἱ μὲν οὖν ἐν τοῖς πεζοῖς ἀμύελοι χόνδροι κεχωρισμένῳ μυελῷ· τὸ γὰρ χωριζόμενον εἰς ἅπαν μεμιγμένον μαλακὴν ποιεῖ καὶ ζυμώδη τὴν τοῦ χόνδρου σύστασιν. Ἐν δὲ τοῖς σελάχεσιν ἢ ράχιδι (655b.) χονδρώδης μὲν ἐστίν, ἔχει δὲ μυελόν· ἀντ' ὀστοῦ γὰρ αὐτοῖς ὑπάρχει τοῦτο τὸ μόριον.

Σύνεγγυς δὲ κατὰ τὴν ἀφήν ἐστι τοῖς ὀστοῖς καὶ τὰ τοιάδε τῶν

μορίων οἷον ὄνυχές τε καὶ ὅπλα καὶ χηλαὶ καὶ κέρατα καὶ ῥύγχη τὰ τῶν ὀρνίθων. Πάντα δὲ ταῦτα βοηθείας ἔχουσι χάριν τὰ ζῷα· τὰ γὰρ ἐξ αὐτῶν συνεστηκότα ὅλα καὶ συνώνυμα τοῖς μορίοις, οἷον ὀπλή τε ὅλη καὶ κέρας ὅλον, μεμηχάνηται πρὸς τὴν σωτηρίαν ἐκάστοις. Ἐν τούτῳ δὲ τῷ γενεῖ καὶ ἡ τῶν ὀδόντων ἐστὶ φύσις, τοῖς μὲν ὑπάρχουσα πρὸς ἓν ἔργον τὴν τῆς τροφῆς ἐργασίαν, τοῖς δὲ πρὸς τε τοῦτο καὶ πρὸς ἀλκὴν, οἷον τοῖς καρχαρόδοι καὶ χαυλιόδοι πᾶσιν. Ἐξ ἀνάγκης δὲ πάντα ταῦτα γεώδη καὶ στερεὰν ἔχει τὴν φύσιν· ὅπλου γὰρ αὕτη δύναμις. Διὸ καὶ πάντα τὰ τοιαῦτα μᾶλλον ἐν τοῖς τετράποσιν ὑπάρχει ζώοις τῶν ζωοτόκων, διὰ τὸ γεωδεστέραν ἔχειν πάντα τὴν σύστασιν ἢ τὸ τῶν ἀνθρώπων γένος.

Ἀλλὰ καὶ περὶ τούτων καὶ τῶν ἐχομένων, οἷον δέρματος καὶ κύστεως καὶ ὑμένος καὶ τριχῶν καὶ πτερῶν καὶ τῶν ἀνάλογον τούτοις καὶ εἴ τι τοιοῦτόν ἐστι μέρος, ὕστερον ἅμα τοῖς ἀνομοιομερέσι θεωρητέον τὴν αἰτίαν αὐτῶν, καὶ τίνος ἕνεκεν ὑπάρχει τοῖς ζώοις ἕκαστον· ἐκ τῶν ἔργων γὰρ γνωρίζειν, ὥσπερ κἀκεῖνα, καὶ ταῦτα ἀναγκαῖον ἂν εἴη. Ἄλλ' ὅτι συνώνυμα τοῖς ὅλοις τὰ μέρη, τὴν τάξιν ἀπέλαβεν ἐν τοῖς ὁμοιομερέσι νῦν, Εἰσὶ δ' ἀρχαὶ πάντων τούτων τό τε ὅστουν καὶ ἡ σάρξ. Ἔτι δὲ περὶ γονῆς καὶ γάλακτος ἀπελίπομεν ἐν τῇ περὶ τῶν ὑγρῶν καὶ ὁμοιομερῶν θεωρίᾳ· τοῖς γὰρ περὶ γενέσεως λόγοις ἀρμόττουσαν ἔχει τὴν σκέψιν· τὸ μὲν γὰρ αὐτῶν ἀρχή, τὸ δὲ τροφή τῶν γινομένων ἐστίν.

Κεφάλαιο 10

Νῦν δὲ λέγωμεν οἷον ἀπ' ἀρχῆς πάλιν, ἀρξάμενοι πρῶτον ἀπὸ τῶν πρῶτων. Πᾶσι γὰρ τοῖς ζώοις τοῖς τελείοις δύο τὰ ἀναγκαιότατα μόρια ἐστίν, ἧ τε δέχονται τὴν τροφήν καὶ ἧ τὸ περιττώμα ἀφήσουσιν· οὔτε γὰρ εἶναι οὔτε αὐξάνεσθαι ἐνδέχεται ἄνευ τροφῆς. Τὰ μὲν οὖν φυτὰ (καὶ γὰρ ταῦτα ζῆν φαμεν) τοῦ μὲν ἀχρήστου περιττώματος οὐκ ἔχει τόπον· ἐκ τῆς γῆς γὰρ λαμβάνει πεπεμμένην τὴν τροφήν, ἀντὶ δὲ τούτου προίεται τὰ σπέρματα καὶ τοὺς καρπούς. Τρίτον δὲ μέρος ἐν πᾶσιν ἐστὶ τὸ τούτων μέσον, ἐν ᾧ ἡ ἀρχὴ ἐστὶν ἡ τῆς ζωῆς. Ἡ μὲν οὖν τῶν φυτῶν (656a.) φύσις οὕσα μόνιμος οὐ πολυειδής ἐστὶ τῶν ἀνομοιομερῶν· πρὸς γὰρ ὀλίγας πράξεις ὀλίγων ὀργάνων ἢ χρῆσις· διὸ θεωρητέον καθ' αὐτὰ περὶ τῆς ιδέας αὐτῶν. Τὰ δὲ πρὸς τῷ ζῆν αἰσθήσιν ἔχοντα πολυμορφότεραν ἔχει τὴν ιδέαν, καὶ τούτων ἕτερα πρὸ ἐτέρων μᾶλλον, καὶ πολυχουστέραν, ὅσων μὴ μόνον τοῦ ζῆν ἀλλὰ καὶ τοῦ εἶ ζῆν ἡ φύσις μετείληφεν.

Τοιοῦτο δ' ἐστὶ τὸ τῶν ἀνθρώπων γένος· ἡ γὰρ μόνον μετέχει τοῦ θείου τῶν ἡμῖν γνωρίμων ζώων, ἡ μάλιστα πάντων. Ὡστε διὰ τε τοῦτο, καὶ διὰ τὸ γνώριμον εἶναι μάλιστ' αὐτοῦ τὴν τῶν ἔξωθεν μορίων μορφήν, περὶ τούτου λεκτέον πρῶτον. Εὐθύς γὰρ καὶ τὰ φύσει μόρια κατὰ φύσιν ἔχει τούτῳ μόνῳ, καὶ τὸ τούτου ἄνω πρὸς τὸ τοῦ ὅλου ἔχει ἄνω· μόνον γὰρ ὀρθόν ἐστὶ τῶν ζώων ἄνθρωπος. Τὸ μὲν οὖν ἔχειν τὴν κεφαλὴν ἄσαρκον ἐκ τῶν περὶ τὸν ἐγκέφαλον εἰρημένων ἀναγκαῖον συμβέβηκεν. Οὐ γὰρ ὥσπερ τινὲς λέγουσιν, ὅτι εἰ σαρκώδης ἦν, μακροβιώτερον ἂν ἦν τὸ γένος· ἀλλ' εὐαισθησίας ἔνεκεν ἄσαρκον εἶναί φασιν· αἰσθάνεσθαι μὲν γὰρ τῷ ἐγκεφάλῳ, τὴν δ' αἰσθήσιν οὐ προσίσθαι τὰ μόρια τὰ σαρκώδη λίαν. Τούτων δ' οὐδέτερόν ἐστιν ἀληθές, ἀλλὰ πολύσαρκος μὲν ὁ τόπος ὧν ὁ περὶ τὸν ἐγκέφαλον τὸναντίον ἂν ἀπειργάζετο οὗ ἔνεκα ὑπάρχει τοῖς ζώοις ὁ ἐγκέφαλος (οὐ γὰρ ἂν ἐδύνατο καταψύχειν ἀλεαίνων αὐτὸς λίαν), τῶν τ' αἰσθήσεων οὐκ αἴτιος οὐδεμιᾶς, ὅς γε ἀναισθητος καὶ αὐτός ἐστιν ὥσπερ ὅτιοι τῶν περιττωμάτων. Ἀλλ' οὐχ εὐρίσκοντες διὰ τίνα αἰτίαν ἔναι τῶν αἰσθήσεων ἐν τῇ κεφαλῇ τοῖς ζώοις εἰσί, τοῦτο δ' ὀρῶντες ἰδιαίτερον ὄν τῶν ἄλλων μορίων, ἐκ συλλογισμοῦ πρὸς ἄλληλα συνδυάζουσιν.

Ὅτι μὲν οὖν ἀρχὴ τῶν αἰσθήσεων ἐστὶν ὁ περὶ τὴν καρδίαν τόπος,

διώρισταί πρότερον ἐν τοῖς περὶ αἰσθήσεως· καὶ διότι αἱ μὲν δύο φανερώς ἠρτημέναι πρὸς τὴν καρδίαν εἰσίν, ἢ τε τῶν ἀπτῶν καὶ ἡ τῶν χυμῶν, τῶν δὲ τριῶν ἡ μὲν τῆς ὀσφρήσεως μέση, ἀκοὴ δὲ καὶ ὄψις μάλιστ' ἐν τῇ κεφαλῇ διὰ τὴν τῶν αἰσθητηρίων φύσιν εἰσί, καὶ τούτων ἡ ὄψις πᾶσιν, ἐπεὶ ἢ γ' ἀκοὴ καὶ ἡ ὀσφρησις ἐπὶ τῶν ἰχθύων καὶ τῶν τοιούτων ποιεῖ τὸ λεγόμενον φανερόν· ἀκούουσι μὲν γὰρ καὶ ὀσφραίνονται, αἰσθητήριον δ' οὐδὲν ἔχουσι φανερόν ἐν τῇ κεφαλῇ τούτων τῶν αἰσθητῶν. Ἡ δ' ὄψις πᾶσι τοῖς ἔχουσιν εὐλόγως ἐστὶ περὶ τὸν (656b.) ἐγκέφαλον· ὁ μὲν γὰρ ὑγρὸς καὶ ψυχρὸς, ἡ δ' ὕδωρ τὴν φύσιν ἐστίν· τοῦτο γὰρ τῶν διαφανῶν εὐφυλακτότατόν ἐστιν.

Ἔτι δὲ τὰς ἀκριβεστέρας τῶν αἰσθήσεων διὰ τῶν καθαρώτερον ἐχόντων τὸ αἷμα μορίων ἀναγκαῖον ἀκριβεστέρας γίνεσθαι· ἐκκόπτει γὰρ ἡ τῆς ἐν τῷ αἵματι θερμότητος κίνησις τὴν αἰσθητικὴν ἐνέργειαν· διὰ ταύτας τὰς αἰτίας ἐν τῇ κεφαλῇ τούτων τὰ αἰσθητήριά ἐστιν. Οὐ μόνον δ' ἐστὶ τὸ ἔμπροσθεν ἄσαρκον, ἀλλὰ καὶ τὸ ὀπισθεν τῆς κεφαλῆς, διὰ τὸ πᾶσι τοῖς ἔχουσιν αὐτὴν ὀρθότατον δεῖν εἶναι τοῦτο τὸ μόριον· οὐδὲν γὰρ ὀρθοῦσθαι δύναται φορτίον ἔχον, ἦν δ' ἂν τοιοῦτον, εἰ σεσαρκωμένην εἶχε τὴν κεφαλὴν. Ἦι καὶ δηλὸν ὅτι οὐ τῆς τοῦ ἐγκεφάλου αἰσθήσεως χάριν ἄσαρκος ἡ κεφαλὴ ἐστίν· τὸ γὰρ ὀπισθεν οὐκ ἔχει ἐγκέφαλον, ἄσαρκον δ' ὁμοίως. Ἔχει δὲ καὶ τὴν ἀκοὴν εὐλόγως ἓν τῶν ζώων ἐν τῷ τόπῳ τῷ περὶ τὴν κεφαλὴν· τὸ γὰρ κενὸν καλούμενον ἀέρος πληρές ἐστι, τὸ δὲ τῆς ἀκοῆς αἰσθητήριον ἀέρος εἶναί φαμεν. Ἐκ μὲν οὖν τῶν ὀφθαλμῶν οἱ πόροι φέρουσιν εἰς τὰς περὶ τὸν ἐγκέφαλον φλέβας· πάλιν δ' ἐκ τῶν ὧτων ὡσαύτως πόρος εἰς τοῦτο ὀπισθεν συνάπτει. Ἔστι δ' οὐτ' ἄναιμον οὐδὲν αἰσθητικὸν οὔτε τὸ αἷμα, ἀλλὰ τῶν ἐκ τούτου τι. Διόπερ οὐδὲν ἐν τοῖς ἐναίμοις ἄναιμον αἰσθητικόν, οὐδ' αὐτὸ τὸ αἷμα· οὐδὲν γὰρ τῶν ζώων μόριον. Ἔχει δ' ἐν τῷ ἔμπροσθεν τὸν ἐγκέφαλον πάντα τὰ ἔχοντα τοῦτο τὸ μόριον, διὰ τὸ ἔμπροσθεν εἶναι ἐφ' ὃ αἰσθάνεται, τὴν δ' αἴσθησιν ἀπὸ τῆς καρδίας, ταύτην δ' εἶναι ἐν τοῖς ἔμπροσθεν, καὶ τὸ αἰσθάνεσθαι διὰ τῶν ἐναίμων γίνεσθαι μορίων, φλεβῶν δ' εἶναι κενὸν τὸ ὀπισθεν κύτος. Τέτακται δὲ τὸν τρόπον τοῦτον τὰ αἰσθητήρια τῇ φύσει καλῶς, τὰ μὲν τῆς ἀκοῆς ἐπὶ μέσης τῆς περιφερείας (ἀκούει γὰρ οὐ μόνον κατ' εὐθυωρίαν ἀλλὰ πάντοθεν), ἡ δ' ὄψις εἰς τὸ ἔμπροσθεν (ὁρᾷ γὰρ κατ' εὐθυωρίαν, ἡ δὲ κίνησις εἰς τὸ ἔμπροσθεν, προορᾷ δὲ δεῖ ἐφ' ὃ ἡ κίνησις). Ἡ δὲ τῆς ὀσφρήσεως μεταξύ τῶν ὁμμάτων εὐλόγως. Διπλοῦν μὲν γὰρ ἐστὶν ἕκαστον τῶν

αἰσθητηρίων διὰ τὸ διπλοῦν εἶναι τὸ σῶμα, τὸ μὲν δεξιὸν τὸ δ' ἀριστερόν. Ἐπὶ μὲν οὖν τῆς ἀφῆς τοῦτ' ἄδηλον· τούτου δ' αἷτιον ὅτι οὐκ ἔστι τὸ πρῶτον αἰσθητήριον ἢ σὰρξ καὶ τὸ τοιοῦτον μόριον, ἄλλ' ἐντός. Ἐπὶ δὲ τῆς γλώττης ἦττον μὲν, μᾶλλον δ' ἢ ἐπὶ τῆς ἀφῆς· ἔστι γὰρ οἷον ἀφή τις καὶ (657a.) αὕτη ἢ αἴσθησις. Ὅμως δὲ δῆλον καὶ ἐπὶ ταύτης· φαίνεται γὰρ ἐσχισμένη. Ἐπὶ δὲ τῶν ἄλλων αἰσθητηρίων φανερωτέως ἐστὶν ἡ αἴσθησις διμερής· ὅτ' αὖτε γὰρ δύο καὶ ὄμματα καὶ ἡ τῶν μυκτῆρων δύναμις διφυής ἐστίν. Ἄλλον οὖν ἂν τρόπον κειμένη καὶ διεσπασμένη, καθάπερ ἡ τῆς ἀκοῆς, οὐκ ἂν ἐποίει τὸ αὐτῆς ἔργον, οὐδὲ τὸ μόριον ἐν ᾧ ἐστίν· διὰ γὰρ τῆς ἀναπνοῆς ἡ αἴσθησις τοῖς ἔχουσι μυκτῆρας, τοῦτο δὲ τὸ μόριον κατὰ μέσον καὶ ἐν τοῖς ἔμπροσθέν ἐστίν. Διόπερ εἰς μέσον τῶν τριῶν αἰσθητηρίων συνήγαγεν ἡ φύσις τοὺς μυκτῆρας, οἷον ἐπὶ στάθμην θεῖσα μίαν ἐπὶ τὴν τῆς ἀναπνοῆς κίνησιν. Καλῶς δὲ καὶ τοῖς ἄλλοις ἔχει ταῦτα τὰ αἰσθητήρια ζώοις πρὸς τὴν ἰδίαν φύσιν ἐκάστω.

Κεφάλαιο 11

Τὰ μὲν γὰρ τετράποδα ἀπηρτημένα ἔχει τὰ ὦτα καὶ ἄνωθεν τῶν ὀμμάτων, ὡς δόξειεν ἄν. Οὐκ ἔχει δέ, ἀλλὰ φαίνεται διὰ τὸ μὴ ὀρθὰ εἶναι τὰ ζῶα ἀλλὰ κύπτειν. Οὕτω δὲ τὸ πλεῖστον κινουμένων χρήσιμα μετεωρότερα τε ὄντα καὶ κινούμενα· δέχεται γὰρ στρεφόμενα πάντοθεν τοὺς ψόφους μᾶλλον.

Κεφάλαιο 12

Οἱ δ' ὄρνιθες τοὺς πόρους μόνον ἔχουσι διὰ τὴν τοῦ δέρματος σκληρότητα, καὶ τὸ ἔχειν μὴ τρίχας ἀλλὰ πτερωτὰ εἶναι· οὐκ οὖν ἔχει τοιαύτην ὕλην ἐξ ἧς ἂν ἔπλασε τὰ ὦτα. Ὁμοίως δὲ καὶ τῶν τετραπόδων τὰ ὠτόκα καὶ φολιδωτά· ὁ γὰρ αὐτὸς ἀρμόσει καὶ ἐπ' ἐκείνων λόγος. Ἔχει δὲ καὶ ἡ φώκη τῶν ζωοτόκων οὐκ ὦτα ἀλλὰ πόρους ἀκοῆς, διὰ τὸ πεπηρωμένον εἶναι τετράπουν.

Κεφάλαιο 13

Καὶ οἱ μὲν ἄνθρωποι καὶ οἱ ὄρνιθες καὶ τὰ ζῳοτόκα καὶ τὰ φωτόκα τῶν τετραπόδων φυλακὴν ἔχουσι τῆς ὄψεως, τὰ μὲν ζῳοτόκα βλέφαρα δύο, οἷς καὶ σκαρδαμύττουσι, τῶν δ' ὀρνίθων ἄλλοι τε καὶ οἱ βαρεῖς καὶ τὰ φωτόκα τῶν τετραπόδων τῇ κάτω βλεφαρίδι μύουσιν· σκαρδαμύττουσι δ' οἱ ὄρνιθες ἐκ τῶν κανθῶν ὑμένι. Τοῦ μὲν οὖν φυλακὴν ἔχειν αἴτιον τὸ ὑγρὰ τὰ ὄμματα εἶναι, ἵνα ὁξὺ βλέπωσι τοῦτον τὸν τρόπον ὑπὸ τῆς φύσεως. Σκληρόδερμα γὰρ ὄντα ἀβλαβέστερα μὲν ἂν ἦν ὑπὸ τῶν ἐξωθεν προσπιπτόντων, οὐκ ὁξυωπὰ δέ. Τοῦ μὲν οὖν εὖ ἔνεκα λεπτὸν τὸ δέρμα τὸ περὶ τὴν κόρην ἐστί, τῆς δὲ σωτηρίας χάριν τὰ βλέφαρα· καὶ διὰ τοῦτο σκαρδαμύσσει τε πάντα καὶ μάλιστ' ἄνθρωπος, πάντα μὲν ὅπως τὰ προσπίπτοντα τοῖς βλεφάροις κωλύωσι (καὶ τοῦτο (657b.) οὐκ ἐκ προαιρέσεως, ἀλλ' ἡ φύσις ἐποίησε), πλειστάκις δ' ὁ ἄνθρωπος διὰ τὸ λεπτοδερμότατος εἶναι. Ἡ δὲ βλεφαρίς ἐστὶ δέρματι περιειλημμένη· διὸ καὶ οὐ συμφύεται οὔτε βλεφαρίς οὔτε ἀκροποσθία, ὅτι ἄνευ σαρκὸς δέρματά ἐστιν. Τῶν δ' ὀρνίθων ὅσοι τῇ κάτω βλεφαρίδι μύουσι, καὶ τὰ φωτόκα τῶν τετραπόδων, διὰ τὴν σκληρότητα τοῦ δέρματος τοῦ περὶ τὴν κεφαλὴν οὕτω μύουσιν. Οἱ μὲν γὰρ βαρεῖς τῶν πτερωτῶν διὰ τὸ μὴ πτητικοὶ εἶναι τὴν τῶν πτερῶν αὐξήσιν εἰς τὴν τοῦ δέρματος παχύτητα τετραμμένην ἔχουσιν. Διὸ καὶ οὗτοι μὲν τῷ κάτω βλεφάρῳ μύουσι, περιστερὰ δὲ καὶ τὰ τοιαῦτα ἀμφοῖν. Τὰ δὲ τετράποδα τῶν φωτόκων φολιδωτά ἐσιν· ταῦτα δὲ σκληρότερα πάντα τριχὺς, ὥστε καὶ τὰ δέρματα τοῦ δέρματος. Τὸ μὲν οὖν περὶ τὴν κεφαλὴν σκληρόν ἐστιν αὐτοῖς, διόπερ οὐκ ἔχει βλέφαρον ἐκεῖθεν, τὸ δὲ κάτωθεν σαρκῶδες, ὥστ' ἔχειν τὸ βλέφαρον λεπτότητα καὶ τάσιν. Σκαρδαμύττουσι δ' οἱ βαρεῖς ὄρνιθες τούτῳ μὲν οὐ, τῷ δ' ὑμένι, διὰ τὸ βραδεῖαν εἶναι τὴν τούτου κίνησιν, δεῖν δὲ ταχεῖαν γίνεσθαι· ὁ δ' ὑμὴν τοιοῦτον. Ἐκ δὲ τοῦ κανθοῦ τοῦ παρὰ τοὺς μυκτῆρας σκαρδαμύττουσιν, ὅτι βέλτιον ἀπ' ἀρχῆς μιᾶς τὴν φύσιν εἶναι αὐτῶν, οὗτοι δ' ἔχουσιν ἀρχὴν τὴν πρὸς τὸν μυκτῆρα πρόσφυσιν· καὶ τὸ πρόσθιον ἀρχὴ τοῦ πλαγίου μᾶλλον. Τὰ δὲ τετράποδα καὶ φωτόκα οὐ σκαρδαμύττει ὁμοίως, ὅτι οὐδ' ὑγρὰν αὐτοῖς ἀναγκαῖον ἔχειν καὶ ἀκριβῆ τὴν ὄψιν ἐπιγείους οὔσιν. Τοῖς δ' ὀρνίσιν ἀναγκαῖον· πόρρωθεν γὰρ ἡ χρῆσις τῆς ὄψεως.

Διὸ καὶ τὰ γαμψώνυχια μὲν ὀξυωπά (ἄνωθεν γὰρ αὐτοῖς ἡ θεωρία τῆς τροφῆς, διὸ καὶ ἀναπέτονται ταῦτα μάλιστα τῶν ὀρνέων εἰς ὕψος), τὰ δ' ἐπίγεια καὶ μὴ πτητικά, οἷον ἀλεκτρυόνες καὶ τὰ τοιαῦτα, οὐκ ὀξυωπά· οὐδὲν γὰρ αὐτὰ κατεπεῖγει πρὸς τὸν βίον.

Οἱ δ' ἰχθύες καὶ τὰ ἔντομα καὶ τὰ σκληρόδερμα διαφέροντα μὲν ἔχουσι τὰ ὄμματα, βλέφαρον δ' οὐδὲν αὐτῶν ἔχει. Τὰ μὲν γὰρ σκληρόδερμα ὅλως οὐκ ἔχει· ἡ δὲ τοῦ βλεφάρου χρήσις ταχεῖαν καὶ δερματικὴν ἔχει τὴν ἐργασίαν· ἀλλ' ἀντὶ ταύτης τῆς φυλακῆς πάντα σκληρόφθαλμά ἐστιν, οἷον βλέποντα διὰ τοῦ βλεφάρου προσπεφυκότες. Ἐπεὶ δ' ἀναγκαῖον διὰ τὴν σκληρότητα ἀμβλύτερον βλέπειν, κινουμένους ἐποίησεν ἡ φύσις τοὺς ὀφθαλμοὺς τοῖς ἐντόμοις, καὶ μᾶλλον (658a.) ἔτι τοῖς σκληροδέρμοις, ὥσπερ ἔνια τῶν τετραπόδων τὰ ὦτα, ὅπως ὀξύτερον βλέπη στρέφοντα πρὸς τὸ φῶς καὶ δεχόμενα τὴν αὐγὴν. Οἱ δ' ἰχθύες ὑγρόφθαλμοὶ μὲν εἰσιν.

Ἀναγκαία γὰρ τοῖς πολλὴν ποιουμένοις κίνησιν ἡ τῆς ὄψεως ἐκ πολλοῦ χρήσις. Τοῖς μὲν οὖν πεζοῖς ὁ ἀήρ εὐδίοπτος· ἐκείνοις δ' ἐπεὶ τὸ ὕδωρ πρὸς μὲν τὸ ὀξὺ βλέπειν ἐναντίον, οὐκ ἔχει δὲ πολλὰ τὰ προσκρούσματα πρὸς τὴν ὄψιν ὥσπερ ὁ ἀήρ, διὰ μὲν τοῦτ' οὐκ ἔχει βλέφαρον (οὐδὲν γὰρ ἡ φύσις ποιεῖ μάτην), πρὸς δὲ τὴν παχύτητα τοῦ ὕδατος ὑγρόφθαλμοὶ εἰσιν.

Κεφάλαιο 14

Βλεφαρίδας δ' ἐπὶ τῶν βλεφάρων ἔχουσιν ὅσα τρίχας ἔχουσιν, ὀρνιθες δὲ καὶ τῶν φολιδωτῶν οὐδέν· οὐ γὰρ ἔχουσι τρίχας. Περὶ γὰρ τοῦ στρουθοῦ τοῦ Λιβυκοῦ τὴν αἰτίαν ὕστερον ἐροῦμεν· τοῦτο γὰρ ἔχει βλεφαρίδας τὸ ζῶον. Καὶ τῶν ἐχόντων τρίχας ἐπ' ἀμφοτέρα οἱ ἄνθρωποι μόνον ἔχουσιν. Τὰ γὰρ τετράποδα τῶν ζώων ἐν τοῖς ὑπτίοις οὐκ ἔχει τρίχας, ἀλλ' ἐν τοῖς πρανεσί μᾶλλον· οἱ δ' ἄνθρωποι τούναντίον ἐν τοῖς ὑπτίοις μᾶλλον ἢ ἐν τοῖς πρανεσίν. Σκέπης γὰρ χάριν αἱ τρίχες ὑπάρχουσι τοῖς ἔχουσιν· τοῖς μὲν οὖν τετράποσι τὰ πρηνῆ δεῖται μᾶλλον τῆς σκέπης, τὰ δὲ πρόσθια τιμιώτερα μὲν, ἀλλ' ἀλεάζει διὰ τὴν κάμψιν· τοῖς δ' ἀνθρώποις ἐπεὶ ἐξ ἴσου διὰ τὴν ὀρθότητα τὰ πρόσθια τοῖς ὀπισθίοις, τοῖς τιμιωτέροις ὑπέγραψεν ἡ φύσις τὴν βοήθειαν· αἰὶ γὰρ ἐκ τῶν ἐνδεχομένων αἰτία τοῦ βελτιονός ἐστιν. Καὶ διὰ τοῦτο τῶν τετραπόδων οὐθὲν οὔτε βλεφαρίδα ἔχει τὴν κάτωθεν, ἀλλ' ὑπὸ τοῦτο τὸ βλέφαρον ἐνίοις παραφύονται μαναὶ τρίχες, οὗτ' ἐν ταῖς μασχάλαις οὗτ' ἐπὶ τῆς ἥβης, ὥσπερ τοῖς ἀνθρώποις. Ἀλλ' ἀντὶ τούτων τὰ μὲν καθ' ὅλον τὸ σῶμα πρανεὲς δεδᾶσυνται ταῖς θριξίν, οἷον τὸ τῶν κυνῶν γένος, τὰ δὲ λοφίαν ἔχει, καθάπερ ἵπποι καὶ τὰ τοιαῦτα τῶν ζώων, τὰ δὲ χαίτην, ὥσπερ ὁ ἄρρην λέων.

Ἔτι δ' ὅσα κέρκους ἔχει μῆκος ἐχούσας, καὶ ταύτας ἐπικεκόσμηκεν ἡ φύσις θριξί, τοῖς μὲν μικρὸν ἔχουσι τὸν στόλον μακραῖς, ὥσπερ τοῖς ἵπποις, τοῖς δὲ μακρὸν βραχεΐαις, καὶ κατὰ τὴν τοῦ ἄλλου σώματος φύσιν· πανταχοῦ γὰρ ἀποδίδωσι λαβοῦσα ἐτέρωθεν πρὸς ἄλλο μόριον. Ὅσοις δὲ τὸ σῶμα δασὺ λίαν (658b.) πεποίηκε, τούτοις ἐνδεῶς ἔχει τὰ περὶ τὴν κέρκον, οἷον ἐπὶ τῶν ἄρκτων συμβέβηκεν.

Τὴν δὲ κεφαλὴν ἀνθρωπός ἐστι τῶν ζώων δασύτατον, ἐξ ἀνάγκης μὲν διὰ τὴν ὑγρότητα τοῦ ἐγκεφάλου καὶ διὰ τὰς ῥαφάς (ὅπου γὰρ ὑγρὸν καὶ θερμὸν πλεῖστον, ἐνταῦθ' ἀναγκαῖον πλεῖστην εἶναι τὴν ἐκφυσιν), ἔνεκεν δὲ βοηθείας, ὅπως σκεπάζωσι φυλάττουσαι τὰς ὑπερβολὰς τοῦ τε ψύχους καὶ τῆς ἀλέας. Πλεῖστος δ' ὢν καὶ ὑγρότατος ὁ τῶν ἀνθρώπων ἐγκέφαλος πλείστης καὶ τῆς φυλακῆς δεῖται· τὸ γὰρ ὑγρότατον καὶ ζεῖ καὶ ψύχεται μάλιστα, τὸ δ' ἐναντίως ἔχον ἀπαθέστερόν ἐστιν. Ἀλλὰ περὶ μὲν τούτων παρεκβῆναι

συμβέβηκεν ἔχομένοις τῆς περὶ τὰς βλεφαρίδας αἰτίας, διὰ τὴν συγγένειαν αὐτῶν, ὥστε περὶ τῶν λοιπῶν ἐν τοῖς οἰκείοις καιροῖς ἀποδοτέον τὴν μνείαν.

Κεφάλαιο 15

Αἱ δ' ὀφρύες καὶ αἱ βλεφαρίδες ἀμφοτέραι βοηθείας χάριν εἰσίν, αἱ μὲν ὀφρύες τῶν καταβαινόντων ὑγρῶν, ὅπως ἀποστέγωσιν οἶον ἀπογείσωμα τῶν ἀπὸ τῆς κεφαλῆς ὑγρῶν, αἱ δὲ βλεφαρίδες τῶν πρὸς τὰ ὄμματα προσπιπτόντων ἕνεκεν, οἶον τὰ χαρακώματα ποιοῦσί τινες πρὸ τῶν ἐρυμάτων.

Εἰσὶ δ' αἱ μὲν ὀφρύες ἐπὶ συνθέσει ὀστῶν, διὸ καὶ δασύνονται πολλοῖς ἀπογηράσκουσιν οὕτως ὥστε δεῖσθαι κουράς, αἱ δὲ βλεφαρίδες ἐπὶ πέρατι φλεβίων· ἥ γὰρ τὸ δέρμα περαίνει, καὶ τὰ φλέβια πέρας ἔχει τοῦ μήκους. Ὡστ' ἀναγκαῖον διὰ τὴν ἀπιοῦσαν ἱκμάδα σωματικὴν οὔσαν, ἂν μή τι τῆς φύσεως ἔργον ἐμποδίσῃ πρὸς ἄλλην χρῆσιν, καὶ διὰ τὴν τοιαύτην αἰτίαν ἐξ ἀνάγκης ἐν τοῖς τόποις τούτοις γίνεσθαι τρίχας.

Κεφάλαιο 16

Τοῖς μὲν οὖν ἄλλοις ζώοις τοῖς τετράποσι καὶ ζωοτόκοις οὐ πόρρω τρόπον τινὰ διέστηκεν ἀλλήλων τὸ τῆς ὀσφρήσεως αἰσθητήριον, ἀλλ' ὅσα μὲν ἔχει προμήκεις εἰς στενὸν ἀπηγμένας τὰς σιαγόνας, ἐν τῷ καλουμένῳ ῥύγχει καὶ τὸ τῶν μυκτῆρων ἐνυπάρχει μόριον κατὰ τὸν ἐνδεχόμενον τρόπον, τοῖς δ' ἄλλοις μᾶλλον διηρθρωμένον ἐστὶ πρὸς τὰς σιαγόνας.

Ὁ δ' ἐλέφας ἰδιαίτατον ἔχει τοῦτο τὸ μόριον τῶν ἄλλων ζώων· τό τε γὰρ μέγεθος καὶ τὴν δύναμιν ἔχει περιττή. Μυκτῆρ γὰρ ἐστὶν ὃ τὴν τροφήν προσάγεται, καθάπερ χειρὶ χρώμενος, πρὸς τὸ στόμα, τὴν τε ξηρὰν καὶ (659a.) τὴν ὑγρὰν, καὶ τὰ δένδρα περιελίττων ἀνασπᾶ, καὶ χρήται καθάπερ ἂν εἰ χειρί. Τὴν γὰρ φύσιν ἐλῶδες ἅμα τὸ ζῷόν ἐστι καὶ πεζόν, ὥστ' ἐπεὶ τὴν τροφήν ἐξ ὑγροῦ συνέβαινεν ἔχειν, ἀναπνεῖν δ' ἀναγκαῖον πεζόν ὄν καὶ ἔναιμον, καὶ μὴ ταχεῖαν ποιεῖσθαι τὴν μεταβολὴν ἐκ τοῦ ὑγροῦ πρὸς τὸ ξηρόν, καθάπερ ἔνια τῶν ζωοτόκων καὶ ἐναίμων καὶ ἀναπνεόντων, τὸ γὰρ μέγεθος ὄν υπερβάλλον, ἀναγκαῖον ὁμοίως ἦν χρῆσθαι τῷ ὑγρῷ ὥσπερ καὶ τῇ γῇ.

Οἷον οὖν τοῖς κολυμβηταῖς ἔνιοι πρὸς τὴν ἀναπνοὴν ὄργανα πορίζονται, ἵνα πολὺν χρόνον ἐν τῇ θαλάττῃ μένοντες ἔλκωσιν ἔξωθεν τοῦ ὑγροῦ διὰ τοῦ ὀργάνου τὸν ἀέρα, τοιοῦτον ἢ φύσις τὸ τοῦ μυκτῆρος μέγεθος ἐποίησε τοῖς ἐλέφασιν. Διόπερ ἀναπνέουσιν ἄραντες ἄνω διὰ τοῦ ὕδατος τὸν μυκτῆρα, ἂν ποτε ποιῶνται δι' ὑγροῦ τὴν πορείαν· καθάπερ γὰρ εἶπομεν, μυκτῆρ ἐστὶν ἢ προβοσκὶς τοῖς ἐλέφασιν. Ἐπεὶ δ' ἀδύνατον ἦν εἶναι τὸν μυκτῆρα τοιοῦτον μὴ μαλακὸν ὄντα μηδὲ κάμπτεσθαι δυνάμενον (ἐνεπόδιζε γὰρ ἂν τῷ μήκει πρὸς τὸ λαβεῖν τὴν θύραθεν τροφήν, καθάπερ φασὶ τὰ κέρατα τοῖς ὀπισθονόμοις βουσίν· καὶ γὰρ ἐκείνους νέμεσθαί φασιν ὑποχωροῦντας πάλιν πυγηδόν) ὑπάρξαντος οὖν τοιούτου τοῦ μυκτῆρος, ἢ φύσις παρακαταχρῆται, καθάπερ εἶωθεν, ἐπὶ πλείονα τοῖς αὐτοῖς μορίοις, ἀντὶ τῆς τῶν προσθίων ποδῶν χρείας. Τούτους γὰρ τὰ πολυδάκτυλα τῶν τετραπόδων ἀντὶ χειρῶν ἔχουσιν, ἀλλ' οὐ μόνον ἔνεχ' ὑποστάσεως τοῦ βάρους· οἱ δ' ἐλέφαντες τῶν πολυδακτύλων εἰσὶ, καὶ οὔτε διχαλοὺς ἔχουσιν οὔτε μώνυχας τοὺς πόδας· ἐπεὶ δὲ τὸ μέγεθος πολὺ καὶ τὸ βάρος τὸ τοῦ σώματος, διὰ

τοῦτο μόνον ἐρείσματός εἰσι χάριν, καὶ διὰ τὴν βραδυτῆτα καὶ τὴν ἀφυΐαν τῆς κάμψεως οὐ χρήσιμον πρὸς ἄλλο οὐδέν. Διὰ μὲν οὖν τὴν ἀναπνοὴν ἔχει μυκτῆρα, καθάπερ καὶ τῶν ἄλλων ἕκαστον τῶν ἐχόντων πλεύμονα ζῶων, διὰ δὲ τὴν ἐν τῷ ὑγρῷ διατριβὴν καὶ τὴν βραδυτῆτα τῆς ἐκεῖθεν μεταβολῆς δυνάμενον ἐλίττεσθαι καὶ μακρόν· ἀφηρημένης δὲ τῆς τῶν ποδῶν χρήσεως, καὶ ἡ φύσις, ὥσπερ εἵπομεν, καταχρῆται καὶ πρὸς τὴν ἀπὸ τῶν ποδῶν γινομένην ἂν βοήθειαν τούτῳ τῷ μορίῳ.

Οἱ δ' ὀρνιθες καὶ οἱ ὄφεις καὶ ὅσα (659b.) ἄλλ' ἔναιμα καὶ φωτόκα τῶν τετραπόδων, τοὺς μὲν πόρους ἔχουσι τῶν μυκτῆρων πρὸ τοῦ στόματος, ὥστε δ' εἰπεῖν μυκτῆρας, εἰ μὴ διὰ τὸ ἔργον, οὐκ ἔχουσι φανερῶς διηρθρωμένους· ἀλλ' ἡ γε ὀρνις ὥστε μηθέν' ἂν εἰπεῖν ἔχειν ῥίνας. τοῦτο δὲ συμβέβηκεν, ὅτι ἀντὶ σιαγόνων ἔχει τὸ καλούμενον ῥύγχος. Αἰτία δὲ τούτων ἡ φύσις ἡ τῶν ὀρνίθων συνεστηκυῖα τοῦτον τὸν τρόπον. Δίπουν γάρ ἐστι καὶ περυγῳτόν, ὥστ' ἀνάγκη μικρὸν τὸ βάρος ἔχειν τὸ τοῦ αὐχένος καὶ τὸ τῆς κεφαλῆς, ὥσπερ καὶ τὸ στήθος στενόν· ὅπως μὲν οὖν ἡ χρήσιμον πρὸς τε τὴν ἀλκὴν καὶ διὰ τὴν τροφήν, ὅστωδες ἔχουσι τὸ ῥύγχος, στενὸν δὲ διὰ τὴν μικρότητα τῆς κεφαλῆς. Ἐν δὲ τῷ ῥύγχει τοὺς πόρους ἔχουσι τῆς ὀσφρήσεως, μυκτῆρας δ' ἔχειν ἀδύνατον. Περί δὲ τῶν ἄλλων ζῴων τῶν μὴ ἀναπνεόντων εἴρηται πρότερον δι' ἣν αἰτίαν οὐκ ἔχουσι μυκτῆρας, ἀλλὰ τὰ μὲν διὰ τῶν βραγχιῶν, τὰ δὲ διὰ τοῦ αὐλοῦ, τὰ δ' ἔντομα διὰ τοῦ ὑποζώματος αἰσθάνονται τῶν ὀσμῶν, καὶ πάντα τῷ συμφύτῳ πνεύματι τοῦ σώματος ὥσπερ κινεῖται· τοῦτο δ' ὑπάρχει φύσει πᾶσι καὶ οὐ θύραθεν ἐπέισακτόν ἐστιν.

Ὑπὸ δὲ τοὺς μυκτῆρας ἡ τῶν χειλῶν ἐστι φύσις τοῖς ἔχουσι τῶν ἐναίμων ὀδόντας. Τοῖς γὰρ ὀρνισι, καθάπερ εἵπομεν, διὰ τὴν τροφήν καὶ τὴν ἀλκὴν τὸ ῥύγχος ὅστωδες ἐστίν· συνῆκται γὰρ εἰς ἓν ἀντ' ὀδόντων καὶ χειλῶν, ὥσπερ ἂν εἴ τις ἀφελὼν ἀνθρώπου τὰ χεῖλη καὶ συμφύσας τοὺς ἄνωθεν ὀδόντας χωρὶς καὶ τοὺς κάτωθεν προαγάγοι μῆκος ποιήσας ἀμφοτέρωθεν εἰς στενόν· εἴη γὰρ ἂν τοῦτο ἤδη ῥύγχος ὀρνιθῶδες. Τοῖς μὲν οὖν ἄλλοις ζῴοις πρὸς σωτηρίαν τῶν ὀδόντων ἡ τῶν χειλῶν φύσις ἐστὶ καὶ πρὸς φυλακὴν, διόπερ ὡς ἐκείνων μετέχουσι τοῦ ἀκριβῶς καὶ καλῶς ἡ τοῦναντίον, οὕτω καὶ τοῦ διηρθῶσθαι τοῦτο τὸ μόριον ἔχουσιν· οἱ δ' ἄνθρωποι μαλακὰ καὶ σαρκώδη καὶ δυνάμενα χωρίζεσθαι, φυλακῆς τε ἕνεκα τῶν

ὀδόντων ὥσπερ καὶ τὰ ἄλλα, καὶ μᾶλλον ἔτι διὰ τὸ εὖ· πρὸς γὰρ τὸ
χρηῆσθαι τῷ λόγῳ καὶ ταῦτα. Ὡς περ γὰρ τὴν γλῶτταν οὐχ ὁμοίαν
τοῖς ἄλλοις ἐποίησεν ἡ φύσις, πρὸς ἐργασίας δύο καταχρησαμένη,
καθάπερ εἵπομεν ποιεῖν αὐτὴν ἐπὶ πολλῶν, τὴν μὲν (660a.) γλῶτταν
τῶν τε χυμῶν ἔνεκεν καὶ τοῦ λόγου, τὰ δὲ χεῖλη τοῦτου τε ἔνεκεν καὶ
τῆς τῶν ὀδόντων φυλακῆς. Ὁ μὲν γὰρ λόγος ὁ διὰ τῆς φωνῆς ἐκ τῶν
γραμμάτων σύγκειται, τῆς δὲ γλώττης μὴ τοιαύτης οὔσης μηδὲ τῶν
χειλῶν ὑγρῶν οὐκ ἂν φθέγγεσθαι τὰ πλεῖστα τῶν γραμμάτων· τὰ μὲν
γὰρ τῆς γλώττης εἰσὶ προσβολαί, τὰ δὲ συμβολαί τῶν χειλῶν. Ποίας
δὲ ταῦτα καὶ πόσας καὶ τίνας ἔχει διαφοράς, δεῖ πυνθάνεσθαι παρὰ
τῶν μετρικῶν. Ἀνάγκη δ' ἦν εὐθὺς ἀκολουθεῖν τούτων τῶν μορίων
ἐκάτερον πρὸς τὴν εἰρημένην χρῆσιν εὐεργὰ καὶ τοιαύτην ἔχοντα τὴν
φύσιν· διὸ σάρκινά. Μαλακωτάτη δ' ἡ σὰρξ ἢ τῶν ἀνθρώπων
ὑπῆρχεν. Τοῦτο δὲ διὰ τὸ αἰσθητικώτατον εἶναι τῶν ζώων τὴν διὰ
τῆς ἀφῆς αἴσθησιν.

Κεφάλαιο 17

Ὑπὸ δὲ τὸν οὐρανὸν ἐν τῷ στόματι ἡ γλῶττα τοῖς ζώοις ἐστί, τοῖς μὲν πεζοῖς σχεδὸν ὁμοίως πᾶσι, τοῖς δ' ἄλλοις ἀνομοίως καὶ αὐτοῖς πρὸς αὐτὰ καὶ πρὸς τὰ πεζὰ τῶν ζώων.

Ὁ μὲν οὖν ἄνθρωπος ἀπολελυμένην τε καὶ μαλακωτάτην ἔχει μάλιστα τὴν γλῶτταν καὶ πλατεῖαν, ὅπως πρὸς ἀμφοτέρας ἢ τὰς ἐργασίας χρήσιμος, πρὸς τε τὴν τῶν χυμῶν αἴσθησιν (ὁ γὰρ ἄνθρωπος εὐαισθητότατος τῶν ἄλλων ζώων, καὶ ἡ μαλακὴ γλῶττα ἀπτικωτάτη γάρ, ἡ δὲ γεῦσις ἀφή τίς ἐστίν), καὶ πρὸς τὴν τῶν γραμμάτων διάρθρωσιν καὶ πρὸς τὸν λόγον ἡ μαλακὴ καὶ πλατεῖα χρήσιμος· συστέλλειν γὰρ καὶ προβάλλειν παντοδαπὴ τοιαύτη οὐσα καὶ ἀπολελυμένη μάλιστ' ἂν δύναιτο. Δηλοῖ δ' ὅσοις μὴ λίαν ἀπολέλγεται· ψελλίζονται γὰρ καὶ τραυλίζουσι, τοῦτο δ' ἐστὶν ἔνδεια τῶν γραμμάτων. Ἐν τε τῷ πλατεῖαν εἶναι καὶ τὸ στενὴν ἐστίν· ἐν γὰρ τῷ μεγάλῳ καὶ τὸ μικρόν, ἐν δὲ τῷ μικρῷ τὸ μέγα οὐκ ἔστιν. Διὸ καὶ τῶν ὀρνίθων οἱ μάλιστα φθεγγόμενοι γράμματα πλατυγλωττότεροι τῶν ἄλλων εἰσίν. Τὰ δ' ἔναιμα καὶ ζωτόκα τῶν τετραπόδων βραχεῖαν τῆς φωνῆς ἔχει διάρθρωσιν· σκληράν τε γὰρ καὶ οὐκ ἀπολελυμένην ἔχουσι καὶ παχεῖαν τὴν γλῶτταν. Τῶν δ' ὀρνίθων ἔνιοι πολύφωνοι, καὶ πλατυτέραν οἱ γαμψώνυχοι ἔχουσιν. Πολύφωνοι δ' οἱ μικρότεροι. Καὶ χρῶνται τῇ γλώττῃ καὶ πρὸς ἐρμηνεῖαν ἀλλήλοις πάντες μὲν, ἕτεροι δὲ τῶν ἐτέρων μᾶλλον, (660b.) ὥστ' ἐπ' ἐνίων καὶ μάθησιν εἶναι δοκεῖν παρ' ἀλλήλων· εἴρηται δὲ περὶ αὐτῶν ἐν ταῖς ἱστορίαις ταῖς περὶ τῶν ζώων.

Τῶν δὲ πεζῶν καὶ ζωτόκων καὶ ἐναίμων πρὸς μὲν τὴν τῆς φωνῆς ἐργασίαν ἄχρηστον τὰ πολλὰ τὴν γλῶτταν ἔχει καὶ προσδεδεμένην καὶ σκληράν, πρὸς δὲ τὴν τῶν χυμῶν γεῦσιν οἱ τ' ὄφεις καὶ οἱ σαῦροι μακράν καὶ δικρόαν ἔχουσιν, οἱ μὲν ὄφεις οὕτω μακράν ὥστ' ἐκτείνεσθαι ἐκ μικροῦ ἐπὶ πολὺ, δικρόαν δὲ καὶ τὸ ἄκρον λεπτὸν καὶ τριχῶδες διὰ τὴν λιχνεῖαν τῆς φύσεως· διπλὴν γὰρ τὴν ἡδονὴν κτᾶται τῶν χυμῶν, ὥσπερ διπλὴν ἔχοντα τὴν τῆς γεύσεως αἴσθησιν. Ἐχει δὲ καὶ τὰ μὴ ἔναιμα τῶν ζώων τὸ αἰσθητικὸν τῶν χυμῶν μόνιον καὶ τὰ ἔναιμα πάντα· καὶ γὰρ ὅσα μὴ δοκεῖ τοῖς πολλοῖς ἔχειν, οἷον ἔνιοι τῶν ἰχθύων, καὶ οὗτοι τρόπον τινὰ γλίσχρον ἔχουσι, καὶ σχεδὸν παραπλησίως τοῖς ποταμίοις κροκοδεύλοισι. Οὐ φαίνονται δ' οἱ

πλεῖστοι αὐτῶν ἔχειν διὰ τιν' αἰτίαν εὐλογον· ἀκανθώδης τε γάρ ἐστιν ὁ τόπος τοῦ στόματος πᾶσι τοῖς τοιούτοις, καὶ διὰ τὸ μικρὸν χρόνον εἶναι τὴν αἴσθησιν τοῖς ἐνύδροις τῶν χυμῶν, ὥσπερ καὶ ἡ χρῆσις αὐτῆς βραχεῖα, οὕτω βραχεῖαν ἔχουσιν αὐτῆς καὶ τὴν διάρθρωσιν. Ταχεῖα δ' ἡ δίοδος εἰς τὴν κοιλίαν διὰ τὸ μὴ οἶόν τ' εἶναι διατρίβειν ἐκχυμίζοντας· παρεμπίπτει γὰρ ἂν τὸ ὕδωρ. Ὡστ' ἐὰν μὴ τις τὸ στόμα ἐπικλίνη, μὴ φαίνεσθαι ἀφεστηκὸς τοῦτο τὸ μόριον. Ἀκανθώδης δ' ἐστὶν οὗτος ὁ τόπος· σύγκειται γὰρ ἐκ τῆς συμψαύσεως τῶν βραγχίων, ὧν ἡ φύσις ἀκανθώδης ἐστίν. Τοῖς δὲ κροκοδεύλοις συμβάλλεται τι πρὸς τὴν τοῦ μορίου τούτου ἀναπηρίαν καὶ τὸ τὴν σιαγὸνα τὴν κάτω ἀκίνητον ἔχειν. Ἔστι μὲν γὰρ ἡ γλῶττα τῇ κάτω συμφυῆς, οἱ δ' ἔχουσιν ὥσπερ ἀνάπαλιν τὴν ἄνω κάτω· τοῖς γὰρ ἄλλοις ἡ ἄνω ἀκίνητος. Πρὸς μὲν οὖν τῇ ἄνω οὐκ ἔχουσι τὴν γλῶτταν, ὅτι ἐναντίως ἂν ἔχοι πρὸς τὴν τῆς τροφῆς εἴσοδον, πρὸς δὲ τῇ κάτω, ὅτι ὥσπερ μετακειμένη ἡ ἄνω ἐστίν. Ἐτι δὲ καὶ συμβέβηκεν αὐτῷ πεζῷ ὄντι ζῆν ἰχθύων βίον, ὥστε καὶ διὰ τοῦτο ἀναγκαῖον ἀδιάρθρωτον αὐτὸν ἔχειν τοῦτο τὸ μόριον. Τὸν δ' οὐρανὸν σαρκῶδη πολλοὶ καὶ τῶν ἰχθύων ἔχουσι, καὶ τῶν ποταμίων ἔνιοι σφόδρα σαρκῶδη καὶ μαλακόν, οἷον οἱ καλούμενοι κυπρίνοι, ὥστε δοκεῖν (661a.) τοῖς μὴ σκοποῦσιν ἀκριβῶς γλῶτταν ἔχειν ταύτη. Οἱ δ' ἰχθύες διὰ τὴν εἰρημένην αἰτίαν ἔχουσι μὲν, οὐ σαφῆ δ' ἔχουσι τὴν διάρθρωσιν τῆς γλώττης. Ἐπεὶ δὲ τῆς τροφῆς χάριν τῆς ἐν τοῖς χυμοῖς ἐστὶν εἰς αἴσθησιν μὲν τὸ γλωττοειδὲς μόριον, οὐ πάντῃ δ' ὁμοίως ἀλλὰ τῷ ἄκρῳ μάλιστα, διὰ τοῦτο τοῖς ἰχθύσι τοῦτ' ἀφώρισται μόνον. Ἐπιθυμίαν δ' ἔχει τροφῆς τὰ ζῶα πάντα ὡς ἔχοντα αἴσθησιν τῆς ἡδονῆς τῆς γινομένης ἐκ τῆς τροφῆς· ἡ γὰρ ἐπιθυμία τοῦ ἡδέος ἐστίν.

Ἀλλὰ τὸ μόριον οὐχ ὅμοιον τοῦτο πᾶσιν, ὥ τὴν αἴσθησιν ποιοῦνται τῆς τροφῆς, ἀλλὰ τοῖς μὲν ἀπολελυμένον τοῖς δὲ προσπεφυκός, ὅσοις μὴδὲν ἔργον ὑπάρχει φωνῆς, καὶ τοῖς μὲν σκληρὸν τοῖς δὲ μαλακόν ἢ σαρκῶδες. Διὸ καὶ τοῖς μαλακοστράκοις, οἷον καράβοις καὶ τοῖς τοιούτοις, ἐντὸς ὑπάρχει τι τοῦ στόματος τοιοῦτον, καὶ τοῖς μαλακίοις, οἷον σηπῖαις καὶ πολύποσιν. Τῶν δ' ἐντόμων ζώων ἕνα μὲν ἐντὸς ἔχει τὸ τοιοῦτον μόριον, οἷον τὸ τῶν μυρμήκων γένος, ὡσαύτως δὲ καὶ τῶν ὀστρακοδέρμων πολλὰ· τὰ δ' ἐκτός, οἷον κέντρον, σομφὸν δὲ τὴν φύσιν καὶ κοῖλον, ὥσθ' ἅμα τούτῳ καὶ γεύεσθαι καὶ τὴν τροφήν ἀνασπᾶν. Δῆλον δὲ τοῦτο ἐπὶ τε

μυιῶν καὶ μελιττῶν καὶ πάντων τῶν τοιούτων, ἔτι δ' ἐπ' ἐνίων τῶν ὀστρακοδέρμων· ταῖς γὰρ πορφύραις τοσαύτην ἔχει δύναμιν τοῦτο τὸ μόριον ὥστε καὶ τῶν κογχυλίων διατρυπῶσι τὸ ὄστρακον, οἷον τῶν στρόμβων οἷς δελεάζουσιν αὐτάς. Ἔτι δ' οἷ τε οἷστροι καὶ οἱ μύωπες οἱ μὲν τὰ τῶν ἀνθρώπων οἱ δὲ καὶ τὰ τῶν ἄλλων ζώων δέρματα διαιροῦσιν. Ἐν μὲν οὖν τούτοις τοῖς ζώοις ἡ γλῶττα τοιαύτη τὴν φύσιν ἐστίν, ὥσπερ ἀντιστρόφως ἔχουσα τῷ μυκτῆρι τῷ τῶν ἐλεφάντων· καὶ γὰρ ἐκείνοις πρὸς βοήθειαν ὁ μυκτῆρ, καὶ τούτοις ἡ γλῶττα ἀντὶ κέντρου ἐστίν. Ἐπὶ δὲ τῶν ἄλλων ζώων ἡ γλῶττα πάντων ἐστὶν οἷανπερ εἵπομεν.

Βιβλίο 3

Κεφάλαιο 1

Ἐχόμενον δὲ τῶν εἰρημένων ἢ τῶν ὀδόντων ἐστὶ φύσις τοῖς ζώοις, καὶ τὸ στόμα τὸ περιεχόμενον ὑπὸ τούτων καὶ συνεστηκὸς ἐκ τούτων. Τοῖς μὲν οὖν ἄλλοις ἢ τῶν ὀδόντων (661b.) φύσις κοινὴ μὲν ἐπὶ τὴν τῆς τροφῆς ἐργασίαν ὑπάρχει, χωρὶς δὲ κατὰ γένη τοῖς μὲν ἀλκῆς χάριν, καὶ ταύτης διηρημένης, ἐπὶ τε τὸ ποιεῖν καὶ τὸ μὴ πάσχειν· τὰ μὲν γὰρ ἀμφοῖν ἔνεκεν ἔχει, καὶ τοῦ μὴ παθεῖν καὶ τοῦ ποιεῖν, οἷον ὅσα σαρκοφάγα τῶν ἀγρίων τὴν φύσιν ἐστίν, τὰ δὲ βοηθείας χάριν, ὥσπερ πολλὰ τῶν ἀγρίων καὶ τῶν ἡμέρων. Ὁ δ' ἄνθρωπος πρὸς τε τὴν κοινήν χρῆσιν καλῶς ἔχει πεφυκότας, τοὺς μὲν προσθίους ὀξεῖς, ἵνα διαιρῶσι, τοὺς δὲ γομφίους πλατεῖς, ἵνα λεαίνωσιν. Ὅρίζουσι δ' ἑκατέρους οἱ κυνόδοντες, μέσοι τὴν φύσιν ἀμφοτέρων ὄντες· τό τε γὰρ μέσον ἀμφοτέρων μετέχει τῶν ἄκρων, οἳ τε κυνόδοντες τῇ μὲν ὀξεῖς τῇ δὲ πλατεῖς εἰσιν. Ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων ζώων, ὅσα μὴ πάντα ἔχουσιν ὀξεῖς. Μάλιστα δὲ καὶ τούτους τοιοῦτους καὶ τοσοῦτους πρὸς τὴν διάλεκτον· πολλὰ γὰρ πρὸς τὴν γένεσιν τῶν γραμμάτων οἱ πρόσθιοι τῶν ὀδόντων συμβάλλονται.

Ἔνια δὲ τῶν ζώων, ὥσπερ εἵπομεν, τροφῆς χάριν ἔχει μόνον. Ὅσα δὲ καὶ πρὸς βοήθειάν τε καὶ πρὸς ἀλκὴν, τὰ μὲν χαυλιόδοντας ἔχει, καθάπερ ὕς, τὰ δ' ὀξεῖς καὶ ἐπαλλάττοντας, ὅθεν καρχαρόδοντα καλεῖται. Ἐπεὶ γὰρ ἐν τοῖς ὀδοῦσιν ἢ ἰσχὺς αὐτῶν, τοῦτο δὲ γίνοιτ' ἂν διὰ τὴν ὀξύτητα, οἱ χρήσιμοι δὴ πρὸς τὴν ἀλκὴν ἐναλλάξ ἐμπίπτουσιν, ὅπως μὴ ἀμβλύνωνται τριβόμενοι πρὸς ἀλλήλους. Οὐδὲν δὲ τῶν ζώων ἐστὶν ἅμα καρχαρόδουν καὶ χαυλιόδουν, διὰ τὸ μηδὲν μάτην ποιεῖν τὴν φύσιν μηδὲ περιεργον· ἔστι δὲ τῶν μὲν διὰ πληγῆς ἢ βοηθεία, τῶν δὲ διὰ δῆγματος. Διόπερ αἱ θήλειαι τῶν ὕδων δάκνουσιν· οὐ γὰρ ἔχουσι χαυλιόδοντας. Καθόλου δὲ χρεῶν τι λαβεῖν, ὃ καὶ ἐπὶ τούτων καὶ ἐπὶ πολλῶν τῶν ὕστερον λεχθησομένων ἔσται χρήσιμον. Τῶν τε γὰρ πρὸς ἀλκὴν τε καὶ βοήθειαν ὀργανικῶν μορίων ἕκαστα ἀποδίδωσιν ἢ φύσις τοῖς δυναμένοις χρῆσθαι μόνοις ἢ μᾶλλον, μάλιστα δὲ τῷ μάλιστα, οἷον κέντρον, πλῆκτρον, κέρατα, χαυλιόδοντας καὶ εἴ τι τοιοῦτον ἕτερον. Ἐπεὶ δὲ τὸ ἄρρεν ἰσχυρότερον καὶ θυμικώτερον, τὰ μὲν μόνον τὰ δὲ μᾶλλον ἔχει τὰ τοιαῦτα τῶν μορίων. Ὅσα μὲν γὰρ ἀναγκαῖον καὶ τοῖς θήλεσιν ἔχειν,

οἷον τὰ πρὸς τὴν τροφήν, ἔχουσι μὲν ἥττον δ' ἔχουσιν, ὅσα δὲ πρὸς μηδὲν τῶν ἀναγκαίων, οὐκ ἔχουσιν. Καὶ (662a.) διὰ τοῦτο τῶν ἐλάφων οἱ μὲν ἄρρενες ἔχουσι κέρατα, αἱ δὲ θήλειαι οὐκ ἔχουσιν. Διαφέρει δὲ καὶ τὰ κέρατα τῶν θηλειῶν βοῶν καὶ τῶν ταύρων· ὁμοίως δὲ καὶ ἐν τοῖς προβάτοις. Καὶ πληκτρα τῶν ἀρρένων ἐχόντων αἱ πολλαὶ τῶν θηλειῶν οὐκ ἔχουσιν. Ὡσαύτως δ' ἔχει τοῦτο καὶ ἐπὶ τῶν ἄλλων τῶν τοιούτων.

Οἱ δ' ἰχθύες πάντες εἰσὶ καρχαρόδοντες, πλὴν τοῦ ἐνὸς τοῦ καλουμένου σκάρου· πολλοὶ δ' ἔχουσι καὶ ἐν ταῖς γλώτταις ὀδόντας καὶ ἐν τοῖς οὐρανοῖς. Τούτου δ' αἴτιον ὅτι ἀναγκαῖον ἐν ὑγροῖς οὖσι παρεισδέχεσθαι τὸ ὑγρὸν ἅμα τῇ τροφῇ, καὶ τοῦτο ταχέως ἐκπέμπειν. Οὐ γὰρ ἐνδέχεται λεαίνοντας διατρίβειν· εἰσρέοι γὰρ ἂν τὸ ὑγρὸν εἰς τὰς κοιλίας.

Διὰ τοῦτο πάντες εἰσὶν ὀξεῖς πρὸς τὴν διαίρεσιν. Πάλιν καὶ πολλοὶ καὶ πολλαχῇ, ἵνα ἀντὶ τοῦ λεαίνειν εἰς πολλὰ κερματίζωσι τῷ πλήθει. Γαμψοὶ δὲ διὰ τὸ τὴν ἀλκὴν σχεδὸν ἅπασαν αὐτοῖς διὰ τούτων εἶναι.

Ἐχει δὲ καὶ τὴν τοῦ στόματος φύσιν τὰ ζῶα τούτων τε τῶν ἔργων ἕνεκα καὶ ἔτι τῆς ἀναπνοῆς, ὅσα ἀναπνεῖ τῶν ζώων καὶ καταπύχεται θύραθεν. Ἡ γὰρ φύσις αὐτὴ καθ' αὐτήν, ὥσπερ εἵπομεν, τοῖς κοινοῖς πάντων μορίοις εἰς πολλὰ τῶν ἰδίων καταχρῆται, οἷον καὶ ἐπὶ τοῦ στόματος ἢ μὲν τροφή πάντων κοινόν, ἢ δ' ἀλκή τινων ἰδίων καὶ ὁ λόγος ἐτέρων, ἔτι δὲ τὸ ἀναπνεῖν οὐ πάντων κοινόν. Ἡ δὲ φύσις ἅπαντα συνήγαγεν εἰς ἓν, ποιοῦσα διαφορὰν αὐτοῦ τοῦ μορίου πρὸς τὰς τῆς ἐργασίας διαφοράς. Διὸ τὰ μὲν ἐστὶ συστομώτερα, τὰ δὲ μεγαλόστομα. Ὅσα μὲν γὰρ τροφῆς καὶ ἀναπνοῆς καὶ λόγου χάριν, συστομώτερα, τῶν δὲ βοηθείας χάριν τὰ μὲν καρχαρόδοντα πάντα ἀνερρωγότα. Οὕσης γὰρ αὐτοῖς τῆς ἀλκῆς ἐν τοῖς δῆγμασι χρήσιμον τὸ μεγάλην εἶναι τὴν ἀνάπτυξιν τοῦ στόματος· πλείοσι γὰρ καὶ κατὰ μεῖζον δήξεται, ὅσονπερ ἂν ἐπὶ τὸ πλεόν ἀνερρώγη τὸ στόμα. Ἐχουσι δὲ καὶ τῶν ἰχθύων οἱ δηκτικοὶ καὶ σαρκοφάγοι τοιοῦτον στόμα, οἱ δὲ μὴ σαρκοφάγοι μύουρον· τοιοῦτον γὰρ αὐτοῖς χρήσιμον, ἐκεῖνο δὲ ἄχρηστον.

Τοῖς δ' ὀρνισίν ἐστὶ τὸ καλούμενον ῥύγχος στόμα· τοῦτο γὰρ ἀντὶ χειλῶν καὶ ὀδόντων ἔχουσιν. Διαφέρει δὲ τοῦτο κατὰ τὰς χρήσεις καὶ τὰς (662b.) βοηθείας. Τὰ μὲν γὰρ γαμψώνυχα καλούμενα διὰ τὸ σαρκοφαγεῖν καὶ μηδενὶ τρέφεσθαι καρπῷ γαμψὸν ἔχει τὸ ῥύγχος ἅπαντα· χρήσιμον γὰρ πρὸς τὸ κρατεῖν καὶ βιαστικώτερον τοιοῦτο

πεφυκός. Ἡ δ' ἀλκή ἐν τούτῳ τε καὶ τοῖς ὄνυξι, διὸ καὶ τοὺς ὄνυχας γαμψοτέρους ἔχουσιν. Τῶν δ' ἄλλων ἐκάστῳ πρὸς τὸν βίον χρήσιμόν ἐστι τὸ ρύγχος, οἷον τοῖς μὲν δρυοκόποις ἰσχυρὸν καὶ σκληρόν, καὶ κόραξι καὶ κορακώδεσι, τοῖς δὲ μικροῖς γλαφυρὸν πρὸς τὰς συλλογὰς τῶν καρπῶν καὶ τὰς λήψεις τῶν ζωδαρίων. Ὅσα δὲ पोηφάγα καὶ ὅσα παρ' ἔλη ζῆ, καθάπερ τὰ πλωτὰ καὶ στεγανόποδα, τὰ μὲν ἄλλον τρόπον χρήσιμον ἔχει τὸ ρύγχος, τὰ δὲ πλατύρυγχα αὐτῶν ἐστίν· τοιούτῳ γὰρ ὄντι ῥαδίως δύνατ' ὀρύσσειν, ὥσπερ καὶ τῶν τετραπόδων τὸ τῆς ὑός· καὶ γὰρ αὕτη ῥιζοφάγος. Ἔτι δ' ἔχουσι καὶ τὰ ῥιζοφάγα τῶν ὀρνέων καὶ τῶν ὁμοιοβίων ἓνια τὰ ἄκρα τοῦ ρύγχους κεχαραγμένα· ποηφάγοις γὰρ τούτοις οὗσι ποιεῖ ῥαδίως.

Περὶ μὲν οὖν τῶν ἄλλων μορίων τῶν ἐν τῇ κεφαλῇ σχεδὸν εἴρηται, τῶν ἀνθρώπων δὲ καλεῖται τὸ μεταξὺ τῆς κεφαλῆς καὶ τοῦ αὐχένος πρόσωπον, ἀπὸ τῆς πράξεως αὐτῆς ὀνομασθέν, ὡς ἔοικεν· διὰ γὰρ τὸ μόνον ὀρθὸν εἶναι τῶν ζώων μόνον πρόσωθεν ὅπως καὶ τὴν φωνὴν εἰς τὸ πρόσω διαπέμπει.

Κεφάλαιο 2

Περὶ δὲ κεράτων λεκτέον· καὶ γὰρ ταῦτα πέφυκε τοῖς ἔχουσιν ἐν τῇ κεφαλῇ. Ἔχει δ' οὐδὲν μὴ ζωτόκον. Καθ' ὁμοιότητα δὲ καὶ μεταφορὰν λέγεται καὶ ἐτέρων τινῶν κέρατα· ἀλλ' οὐδενὶ αὐτῶν τὸ ἔργον τοῦ κέρατος ὑπάρχει.

Βοηθείας γὰρ καὶ ἀλκῆς χάριν ἔχουσι τὰ ζωτόκα, ὃ τῶν ἄλλων τῶν λεγομένων ἔχειν κέρας οὐδενὶ συμβέβηκεν· οὐδὲν γὰρ χρῆται τοῖς κέρασιν οὔτ' ἀμυνόμενον οὔτε πρὸς τὸ κρατεῖν, ἅπερ ἰσχύος ἐστὶν ἔργα. Ὅσα μὲν οὖν πολυσχιδῇ τῶν ζώων, οὐδὲν ἔχει κέρας. Τούτου δ' αἴτιον ὅτι τὸ μὲν κέρας βοηθείας αἰτιὸν ἐστὶ, τοῖς δὲ πολυσχιδέσιν ὑπάρχουσιν ἕτεραι βοήθειαι· δέδωκε γὰρ ἡ φύσις τοῖς μὲν ὄνυχας, τοῖς δ' ὀδόντας μαχητικούς, τοῖς δ' ἄλλο τι μόριον ἱκανὸν ἀμύνειν.

Τῶν δὲ διχαλῶν τὰ μὲν πολλὰ κέρατα ἔχει πρὸς ἀλκὴν, (663a.) καὶ τῶν μωνύχων ἓνια, τὰ δὲ καὶ πρὸς βοήθειαν. Ὅσοις δὲ μὴ δέδωκεν ἡ φύσις ἄλλην ἀλκὴν πρὸς σωτηρίαν, οἷον ταχυτῆτα σώματος, καθάπερ τοῖς ἵπποις βεβοήθηκεν, ἢ μέγεθος, ὥσπερ ταῖς καμήλοις· καὶ γὰρ μεγέθους ὑπερβολὴ τὴν ἀπὸ τῶν ἄλλων ζώων φθορὰν ἱκανῇ κωλύειν, ὅπερ συμβέβηκε ταῖς καμήλοις, ἔτι δὲ μᾶλλον τοῖς ἐλέφασιν.

Τὰ δὲ χαυλιόδοντα, ὥσπερ καὶ τὸ τῶν ὄντων γένος, διχαλόν. Ὅσοις δ' ἄχρηστος πέφυκεν ἡ τῶν κεράτων ἐξοχή, τούτοις προστέθεικεν ἐτέραν βοήθειαν ἡ φύσις, οἷον ταῖς μὲν ἐλάφοις τάχος (τὸ γὰρ μέγεθος αὐτῶν καὶ τὸ πολυσχιδὲς μᾶλλον βλάπτει ἢ ὠφελεῖ), καὶ βουβάλοις δὲ καὶ δορκάσι (πρὸς ἓνια μὲν γὰρ ἀνθιστάμενα τοῖς κέρασιν ἀμύνονται, τὰ δὲ θηριώδη καὶ μάχιμα ἀποφεύγουσι), τοῖς δὲ βονάσοις (καὶ γὰρ τούτοις γαμψὰ τὰ κέρατα πέφυκε πρὸς ἄλληλα) τὴν τοῦ περιττώματος ἄφεσιν· τούτῳ γὰρ ἀμύνεται φοβηθέντα· καὶ ταύτῃ δὲ τῇ προέσει διασφύζεται ἕτερα. Ἄμα δ' ἱκανὰς καὶ πλείους βοηθείας οὐ δέδωκεν ἡ φύσις τοῖς αὐτοῖς. Ἔστι δὲ τὰ πλεῖστα τῶν κερατοφόρων διχαλά, λέγεται δὲ καὶ μώνυχον, ὃν καλοῦσιν Ἰνδικὸν ὄνον. Τὰ μὲν οὖν πλεῖστα, καθάπερ καὶ τὸ σῶμα διήρηται τῶν ζώων οἷς ποιεῖται τὴν κίνησιν, δεξιὸν καὶ ἀριστερόν, καὶ κέρατα δύο πέφυκεν ἔχειν διὰ τὴν αἰτίαν ταύτην· ἐστὶ δὲ καὶ μονοκέρατα, οἷον ὃ τε ὄρυξ καὶ ὁ Ἰνδικὸς καλούμενος ὄνος. Ἔστι δ' ὁ μὲν ὄρυξ διχαλόν,

ὁ δ' ὄνος μώνυχον. Ἔχει δὲ τὰ μονοκέρατα τὸ κέρας ἐν τῷ μέσῳ τῆς κεφαλῆς· οὕτω γὰρ ἐκάτερον τῶν μερῶν μάλιστ' ἂν ἔχοι κέρας ἐν· τὸ γὰρ μέσον ὁμοίως κοινὸν ἀμφοτέρων τῶν ἐσχάτων. Εὐλόγως δ' ἂν δόξειε μονόκερων εἶναι τὸ μώνυχον τοῦ διχαλοῦ μᾶλλον· ὅπλῃ γὰρ καὶ χηλὴ τὴν αὐτὴν ἔχει κέρατι φύσιν, ὥσθ' ἅμα καὶ τοῖς αὐτοῖς ἢ σχίσιν γίνεται τῶν ὀπλῶν καὶ τῶν κεράτων.

Ἔτι δ' ἡ σχίσιν καὶ τὸ διχαλὸν κατ' ἔλλειψιν τῆς φύσεώς ἐστιν, ὥστ' εὐλόγως τοῖς μωνύχοις ἐν ταῖς ὀπλαῖς δοῦσα τὴν ὑπεροχὴν ἢ φύσιν ἀνωθεν ἀφεῖλε καὶ μονόκερων ἐποίησεν.

Ὅρθως δὲ καὶ τὸ ἐπὶ τῆς κεφαλῆς ποιῆσαι τὴν τῶν κεράτων φύσιν, ἀλλὰ μὴ καθάπερ ὁ Αἰσώπου Μῶμος διαμέμφεται τὸν ταῦρον, ὅτι οὐκ ἐπὶ τοῖς ὤμοις ἔχει τὰ κέρατα, ὅθεν (663b.) τὰς πληγὰς ἐποιεῖτ' ἂν ἰσχυροτάτας, ἀλλ' ἐπὶ τοῦ ἀσθενεστάτου μέρους τῆς κεφαλῆς. Οὐ γὰρ ὅξυ βλέπων ὁ Μῶμος ταῦτ' ἐπετίμησεν. Ὡς περ γὰρ καὶ εἰ ἐτέρωθί που τοῦ σώματος κέρατα ἐπεφύκει, βάρος ἂν παρείχεν ἄλλως οὐδὲν ὄντα χρήσιμα κἂν ἐμπόδια τῶν ἔργων πολλοῖς ἦν, οὕτως καὶ ἐπὶ τῶν ὤμων πεφυκότα. Οὐ γὰρ μόνον χρήσκοπεῖν πόθεν ἰσχυρότεραι αἱ πληγαί, ἀλλὰ καὶ πόθεν πορρώτεραι· ὥστ' ἐπεὶ καὶ χεῖρας μὲν οὐκ ἔχουσιν, ἐπὶ δὲ τῶν ποδῶν ἀδύνατον, ἐν δὲ τοῖς γόνασιν ὄντα τὴν κάμπιν ἐκώλυεν ἄν, ἀναγκαῖον ὥς περ νῦν ἔχουσιν, ἐπὶ τῆς κεφαλῆς ἔχειν. Ἄμα δὲ καὶ πρὸς τὰς ἄλλας κινήσεις τοῦ σώματος ἀνεμπόδιστα πέφυκεν οὕτω μάλιστα. Ἔστι δὲ τὰ κέρατα δι' ὅλου στερεὰ τοῖς ἐλάφοις μόνοις, καὶ ἀποβάλλει μόνον, ἔνεκεν μὲν ὠφελείας κουφιζόμενον, ἐξ ἀνάγκης δὲ διὰ τὸ βάρος. Τῶν δ' ἄλλων τὰ κέρατα μέχρι τινὸς κοῖλα, τὰ δ' ἅκρα στερεὰ διὰ τὸ πρὸς τὰς πληγὰς τοῦτ' εἶναι χρήσιμον. Ὅπως δὲ μηδὲ τὸ κοῖλον ἀσθενὲς ἦ, πέφυκεν ἐκ τοῦ δέρματος, ἐν τούτῳ δ' ἐνήρμοσται στερεὸν ἐκ τῶν ὀστέων· οὕτω γὰρ καὶ τὰ κέρατα ἔχοντα πρὸς ἀλκὴν τε χρησιμώτατ' εἶναι, καὶ πρὸς τὸν ἄλλον βίον ἀνοχλότατα.

Τίνος μὲν οὖν ἔνεκεν ἢ τῶν κεράτων φύσιν, εἴρηται, καὶ διὰ τίν' αἰτίαν τὰ μὲν ἔχουσι τοιαῦτα, τὰ δ' οὐκ ἔχουσιν· πῶς δὲ τῆς ἀναγκαίας φύσεως ἐχούσης τοῖς ὑπάρχουσιν ἐξ ἀνάγκης ἢ κατὰ τὸν λόγον φύσιν ἔνεκά του κατακέχρηται, λέγωμεν. Πρῶτον μὲν οὖν τὸ σωματῶδες καὶ γεῶδες πλεῖον ὑπάρχει τοῖς μείζοσι τῶν ζώων, κερατοφόρον δὲ μικρὸν πάμπαν οὐδὲν ἴσμεν· ἐλάχιστον γὰρ ἐστὶ τῶν γνωριζομένων δορκάς. Δεῖ δὲ τὴν φύσιν θεωρεῖν εἰς τὰ πολλὰ βλέποντα· ἢ γὰρ ἐν τῷ παντὶ ἢ τῷ ὥς ἐπὶ τὸ πολὺ τὸ κατὰ φύσιν

ἐστίν. Τὸ δ' ὁστῶδες ἐν τοῖς σώμασι τῶν ζώων γεῶδες ὑπάρχει· διὸ καὶ πλεῖστον ἐν τοῖς μεγίστοις ὥς ἐπὶ τὸ πολὺ βλέψαντας εἶπεῖν. Τὴν γοῦν τοιοῦτου σώματος περισσωματικὴν ὑπερβολὴν ἐν τοῖς μείζοσι τῶν ζώων ὑπάρχουσαν ἐπὶ βοήθειαν καὶ τὸ συμφέρον καταχρῆται ἡ φύσις, καὶ τὴν ῥέουσιν ἐξ ἀνάγκης εἰς τὸν ἄνω τόπον τοῖς μὲν εἰς ὀδόντας καὶ χαυλιόδοντας ἀπένειμε, τοῖς δ' εἰς κέρατα. Διὸ τῶν κερατοφόρων οὐδέν ἐστιν ἄμφωδον· ἄνω γὰρ οὐκ ἔχει τοὺς προσθίους (664a.) ὀδόντας· ἀφελούσα γὰρ ἐντεῦθεν ἡ φύσις τοῖς κέρασι προσέθηκε, καὶ ἡ διδομένη τροφή εἰς τοὺς ὀδόντας τούτους εἰς τὴν τῶν κεράτων αὔξησιν ἀναλίσκεται. Τοῦ δὲ τὰς θηλείας ἐλάφους κέρατα μὲν μὴ ἔχειν, περὶ δὲ τοὺς ὀδόντας ὁμοίως τοῖς ἄρρεσιν, αἴτιον τὸ τὴν αὐτὴν εἶναι φύσιν ἀμφοῖν καὶ κερατοφόρον. Ἀφήρηται δὲ τὰ κέρατα ταῖς θηλείαις διὰ τὸ χρήσιμα μὲν μὴ εἶναι μηδὲ τοῖς ἄρρεσιν, βλάπτεσθαι δ' ἦσσαν διὰ τὴν ἰσχύν. Τῶν δ' ἄλλων ζώων ὅσοις μὴ εἰς κέρατα ἀποκρίνεται τὸ τοιοῦτον μόνον τοῦ σώματος, ἐνίοις μὲν τῶν ὀδόντων αὐτῶν ἐπηύξησε τὸ μέγεθος κοινῇ πάντων, ἐνίοις δὲ χαυλιόδοντας ὥσπερ κέρατα ἐκ τῶν γνάθων ἐποίησεν.

Κεφάλαιο 3

Περὶ μὲν οὖν τῶν ἐν τῇ κεφαλῇ μορίων ταύτῃ διωρίσθω, ὑπὸ δὲ τὴν κεφαλὴν ὁ αὐχὴν πεφυκῶς ἐστὶ τοῖς ἔχουσιν αὐχένα τῶν ζῴων. Οὐ γὰρ πάντα τοῦτο τὸ μόριον ἔχει. ἀλλὰ μόνα τὰ ἔχοντα ὦν χάριν ὁ αὐχὴν πέφυκεν· ταῦτα δ' ἐστὶν ὃ τε φάρυγξ καὶ ὁ καλούμενος οἰσοφάγος. Ὁ μὲν οὖν φάρυγξ τοῦ πνεύματος ἔνεκεν πέφυκεν· διὰ τούτου γὰρ εἰσάγεται τὸ πνεῦμα τὰ ζῶα καὶ ἐκπέμπει ἀναπνέοντα καὶ ἐκπνέοντα. Διὸ τὰ μὴ ἔχοντα πλεύμονα οὐκ ἔχουσιν οὐδ' αὐχένα, οἷον τὸ τῶν ἰχθύων γένος. Ὁ δ' οἰσοφάγος ἐστὶ δι' οὗ ἡ τροφή πορεύεται εἰς τὴν κοιλίαν· ὥσθ' ὅσα μὴ ἔχει αὐχένα, οὐδ' οἰσοφάγον ἐπιδήλως ἔχουσιν. Οὐκ ἀναγκαῖον δ' ἔχειν τὸν οἰσοφάγον τῆς τροφῆς ἔνεκεν· οὐθὲν γὰρ παρασκευάζει πρὸς αὐτήν. Ἔτι δὲ μετὰ τὴν τοῦ στόματος θέσιν ἐνδέχεται κείσθαι τὴν κοιλίαν εὐθέως, τὸν δὲ πλεύμονα οὐκ ἐνδέχεται. Δεῖ γὰρ εἶναι τινα κοινὸν οἶον αὐλῶνα, δι' οὗ μεριεῖται τὸ πνεῦμα κατὰ τὰς ἀρτηρίας εἰς τὰς σύριγγας, διμερῇ ὄντα· καὶ κάλλιστ' ἂν οὕτως ἀποτελοῖ τὴν ἀναπνοὴν καὶ ἐκπνοήν. Τοῦ δ' ὀργάνου τοῦ περὶ τὴν ἀναπνοὴν ἐξ ἀνάγκης ἔχοντος μῆκος, ἀναγκαῖον τὸν οἰσοφάγον εἶναι μετὰ τοῦ στόματος καὶ τῆς κοιλίας. Ἔστι δ' ὁ μὲν οἰσοφάγος σαρκώδης, ἔχων νευρώδη τάσιν, νευρώδης μὲν, ὅπως ἔχη διάτασιν εἰσιούσης τῆς τροφῆς, σαρκώδης δέ, ὅπως μαλακὸς ᾗ καὶ ἐνδιδῶ καὶ μὴ βλάβηται τραχυνόμενος ὑπὸ τῶν κατιόντων.

Ἡ δὲ καλουμένη φάρυγξ καὶ ἀρτηρία συνέστηκεν ἐκ χονδρώδους σώματος· οὐ (664b.) γὰρ μόνον ἀναπνοῆς ἔνεκέν ἐστιν ἀλλὰ καὶ φωνῆς, δεῖ δὲ τὸ ψοφήσειν μέλλον λεῖον εἶναι καὶ στερεότητα ἔχειν. Κεῖται δ' ἔμπροσθεν ἡ ἀρτηρία τοῦ οἰσοφάγου, καίπερ ἐμποδίζουσα αὐτὸν περὶ τὴν ὑποδοχὴν τῆς τροφῆς· ἐὰν γάρ τι παρεισρυῇ ξηρὸν ἢ ὑγρὸν εἰς τὴν ἀρτηρίαν, πνιγμοὺς καὶ πόνους καὶ βῆχας χαλεπὰς ἐμποιεῖ. Ὁ δὲ καὶ θαυμάσειεν ἂν τις τῶν λεγόντων ὡς ταύτῃ τὸ ποτὸν δέχεται τὸ ζῶον· συμβαίνει γὰρ φανερώς τὰ λεχθέντα πᾶσιν, οἷς ἂν παραρρυῇ τι τῆς τροφῆς. Πολλαχῇ δὲ γελοῖον φαίνεται τὸ λέγειν ὡς ταύτῃ τὸ ποτὸν εἰσδέχεται τὰ ζῶα. Πόρος γὰρ οὐδεὶς ἐστὶν εἰς τὴν κοιλίαν ἀπὸ τοῦ πλεύμονος, ὥσπερ ἐκ τοῦ στόματος ὀρώμεν τὸν οἰσοφάγον. Ἔτι δ' ἐν τοῖς ἐμέτοις καὶ ναυτίαις οὐκ ἄδηλον πόθεν τὸ ὑγρὸν φαίνεται πορευόμενον. Δῆλον δὲ καὶ ὅτι οὐκ εὐθέως εἰς τὴν

κύστιν συλλέγεται τὸ ὑγρόν, ἀλλ' εἰς τὴν κοιλίαν πρότερον· τὰ γὰρ τῆς κοιλίας περιπτώματα φαίνεται χρωματίζειν ἢ ἰλὺς τοῦ μέλανος οἴνου· συμβέβηκε δὲ τοῦτο πολλάκις φανερόν καὶ ἐπὶ τῶν εἰς τὴν κοιλίαν τραυμάτων. Ἀλλὰ γὰρ ἴσως εὐήθεις τὸ τοὺς εὐήθεις τῶν λόγων λίαν ἐξετάζειν.

Ἡ δ' ἀρτηρία τῷ διακεῖσθαι, καθάπερ εἵπομεν, ἐν τῷ πρόσθεν ὑπὸ τῆς τροφῆς ἐνοχλεῖται· ἀλλ' ἡ φύσις πρὸς τοῦτο μεμηχάνηται τὴν ἐπιγλωσσίδα. Ταύτην δ' οὐκ ἔχουσιν ἅπαντα τὰ ζωοτοκοῦντα, ἀλλ' ὅσα πλεύμονα ἔχει καὶ τὸ δέρμα τριχωτόν, καὶ μὴ φολιδωτὰ μηδὲ πτερωτὰ πέφυκεν. Τούτοις δ' ἀντὶ τῆς ἐπιγλωττίδος συνάγεται καὶ διοίγεται ὁ φάρυγξ, ὃνπερ τρόπον ἐκείνοις ἐπιβάλλει τε καὶ ἀναπτύσσεται τοῦ πνεύματος τῇ εἰσόδῳ τε καὶ ἐξόδῳ ἀναπτυσσομένη, τῆς δὲ τροφῆς εἰσιούσης ἐπιπτυσσομένη, ἵνα μὴθὲν παραρρυῇ παρὰ τὴν ἀρτηρίαν. Ἐὰν δέ τι πλημμεληθῇ παρὰ τὴν τοιαύτην κίνησιν καὶ προσφερομένης τῆς τροφῆς ἀναπνεύσῃ τις, βῆχας καὶ πνιγμοὺς ποιεῖ, καθάπερ εἴρηται. Οὕτω δὲ καλῶς μεμηχάνηται καὶ ἡ ταύτης καὶ ἡ τῆς γλώττης κίνησις, ὥστε τῆς τροφῆς ἐν μὲν τῷ στόματι λεαινομένης, παρ' αὐτὴν δὲ διούσης, τὴν μὲν ὀλιγάκις ὑπὸ τοὺς ὀδόντας πίπτειν, εἰς δὲ τὴν ἀρτηρίαν σπάνιόν τι παραρρεῖν. Οὐκ ἔχει δὲ τὰ λεχθέντα ζῶα τὴν (665a.) ἐπιγλωττίδα διὰ τὸ ξηρὰς εἶναι τὰς σάρκας αὐτῶν καὶ τὸ δέρμα σκληρόν, ὥστ' οὐκ ἂν εὐκίνητον ἦν τὸ τοιοῦτον μόριον αὐτοῖς ἐκ τοιαύτης σαρκὸς καὶ ἐκ τοιούτου δέρματος συνεστηκός, ἀλλ' αὐτῆς τῆς ἀρτηρίας τῶν ἐσχάτων θᾶσσον ἐγίνετ' ἂν ἡ συναγωγή τῆς ἐκ τῆς οἰκείας σαρκὸς ἐπιγλωττίδος, ἣν ἔχουσι τὰ τριχωτά. Δι' ἣν μὲν οὖν αἰτίαν τὰ μὲν ἔχει τῶν ζώων τὰ δ' οὐκ ἔχει, ταῦτ' εἰρήσθω, καὶ διότι τῆς ἀρτηρίας τὴν φαυλότητα τῆς θέσεως ἰάτρευκεν ἡ φύσις, μηχανησαμένη τὴν καλουμένην ἐπιγλωττίδα.

Κεῖται δ' ἔμπροσθεν ἡ φάρυγξ τοῦ οἰσοφάγου ἐξ ἀνάγκης. Ἡ μὲν γὰρ καρδία ἐν τοῖς ἔμπροσθεν καὶ ἐν μέσῳ κεῖται, ἐν ἧ τὴν ἀρχὴν φαμεν τῆς ζωῆς καὶ πάσης κινήσεώς τε καὶ αἰσθήσεως (ἐπὶ τὸ καλούμενον γὰρ ἔμπροσθεν ἡ αἰσθησις καὶ ἡ κίνησις· αὐτῷ γὰρ τῷ λόγῳ τούτῳ διώρισται τὸ ἔμπροσθεν καὶ ὀπισθεν), ὁ δὲ πλεύμων κεῖται οὗ ἡ καρδία καὶ περὶ ταύτην, ἡ δ' ἀναπνοὴ διὰ τε τοῦτο καὶ διὰ τὴν ἀρχὴν τὴν ἐν τῇ καρδίᾳ ἐνυπάρχουσαν. Ἡ δ' ἀναπνοὴ γίνεται τοῖς ζώοις διὰ τῆς ἀρτηρίας· ὥστ' ἐπεὶ τὴν καρδίαν ἐν τοῖς ἔμπροσθεν πρώτην ἀναγκαῖον κεῖσθαι, καὶ τὸν φάρυγγα καὶ τὴν

ἀρτηρίαν πρότερον ἀναγκαῖον κεῖσθαι τοῦ οἰσοφάγου· τὰ μὲν γὰρ πρὸς τὸν πλεύμονα τείνει καὶ τὴν καρδίαν, ὁ δ' εἰς τὴν κοιλίαν. Ὅλως δ' αἰὲρ τὸ βέλτιον καὶ τιμιώτερον, ὅπου μή τι μεῖζον ἕτερον ἐμποδίζει, τοῦ μὲν ἄνω καὶ κάτω ἐν τοῖς μᾶλλον ἐστὶν ἄνω, τοῦ δ' ἔμπροσθεν καὶ ὀπίσθεν ἐν τοῖς ἔμπροσθεν, τοῦ δεξιοῦ δὲ καὶ ἀριστεροῦ ἐν τοῖς δεξιοῖς.

Κεφάλαιο 4

Καὶ περὶ μὲν αὐχένος τε καὶ οἰσοφάγου καὶ ἀρτηρίας εἴρηται, ἐπόμενον δ' ἐστὶ περὶ σπλάγχχνων εἰπεῖν.

Ταῦτα δ' ἐστὶν ἴδια τῶν ἐναίμων, καὶ τοῖς μὲν ἅπανθ' ὑπάρχει, τοῖς δ' οὐχ ὑπάρχει. Τῶν δ' ἀναίμων οὐδὲν ἔχει σπλάγχχνον.

Δημόκριτος δ' ἔοικεν οὐ καλῶς διαλαβεῖν περὶ αὐτῶν, εἴπερ ᾤθηται διὰ μικρότητα τῶν ἀναίμων ζώων ἄδηλα εἶναι ταῦτα. Συνισταμένων γὰρ εὐθέως τῶν ἐναίμων καὶ ἀάμπαν ὄντων μικρῶν ἐνδηλα γίνεται καρδία τε καὶ ἥπαρ· φαίνεται γὰρ ἐν μὲν τοῖς ᾧοις ἐνίοτε τριταίοις οὔσι στιγμῇς (665b.) ἔχοντα μέγεθος, πᾶμμικρα δὲ καὶ ἐν τοῖς ἐκβολίμοις τῶν ἐμβρύων. Ἔτι δ' ὥσπερ τῶν ἐκτὸς μορίων οὐ πᾶσι τῶν αὐτῶν χρήσις, ἀλλ' ἐκάστοις ἰδίᾳ πεπόρισται πρὸς τε τοὺς βίους καὶ τὰς κινήσεις, οὕτω καὶ τὰ ἐντὸς ἄλλα πέφυκεν ἄλλοις. Τὰ δὲ σπλάγχχνα τῶν αἱματικῶν ἐστὶν ἴδια, διὸ καὶ συνέστηκεν αὐτῶν ἕκαστον ἐξ αἱματικῆς ὕλης. Δῆλον δ' ἐν τοῖς νεογνοῖς τούτων· αἱματωδέστερα γὰρ καὶ μέγιστα κατὰ λόγον διὰ τὸ εἶναι τὸ εἶδος τῆς ὕλης καὶ τὸ πλῆθος ἐμφανέστατον κατὰ τὴν πρώτην σύστασιν.

Καρδία μὲν οὖν ἅπασιν ὑπάρχει τοῖς ἐναίμοις· δι' ἣν δ' αἰτίαν, εἴρηται καὶ πρότερον· Αἷμα μὲν γὰρ ἔχειν τοῖς ἐναίμοις δῆλον ὡς ἀναγκαῖον· ὕγρου δ' ὄντος τοῦ αἵματος ἀναγκαῖον ἀγγεῖον ὑπάρχειν, ἐφ' ὃ δὴ καὶ φαίνεται μεμηχανῆσθαι τὰς φλέβας ἢ φύσις. Ἀρχὴν δὲ τούτων ἀναγκαῖον εἶναι μίαν· ὅπου γὰρ ἐνδέχεται, μίαν βέλτιον ἢ πολλάς. Ἡ δὲ καρδία τῶν φλεβῶν ἀρχή· φαίνονται γὰρ ἐκ ταύτης οὔσαι καὶ οὐ διὰ ταύτης, καὶ ἡ φύσις αὐτῆς φλεβώδης ὡς ὁμογενοῦς οὔσης.

Ἔχει δὲ καὶ ἡ θέσις αὐτῆς ἀρχικὴν χώραν· περὶ μέσον γάρ, μᾶλλον δ' ἐν τῷ ἄνω ἢ κάτω καὶ ἔμπροσθεν ἢ ὀπισθεν· ἐν τοῖς γὰρ τιμιωτέροις τὸ τιμιώτερον καθίδρυκεν ἡ φύσις, οὗ μὴ τι κωλύει μεῖζον. Ἐμφανέστατον δὲ τὸ λεχθέν ἐστὶν ἐπὶ τῶν ἀνθρώπων, βούλεται δὲ καὶ ἐν τοῖς ἄλλοις ὁμολόγως ἐν μέσῳ κεῖσθαι τοῦ ἀναγκαίου σώματος. Τούτου δὲ πέρας ἢ τὰ περιττώματα ἀποκρίνεται· τὰ δὲ κῶλα πέφυκεν ἄλλοις ἄλλως, καὶ οὐκ ἔστι τῶν πρὸς τὸ ζῆν ἀναγκαίων, διὸ καὶ ἀφαιρουμένων ζῶσιν· δῆλον δ' ὡς οὐδὲ προστιθέμενα φθείρει. Οἱ δ' ἐν τῇ κεφαλῇ λέγοντες τὴν ἀρχὴν τῶν φλεβῶν οὐκ ὀρθῶς ὑπέλαβον. Πρῶτον μὲν γὰρ πολλὰς ἀρχὰς

καὶ διεσπαρμέναις ποιοῦσιν, εἴτ' ἐν τόπῳ ψυχρῷ. Δηλοῖ δὲ δύσριγος ὢν, ὁ δὲ περὶ τὴν καρδίαν τοῦναντίον. Ὡςπερ δ' ἐλέχθη, διὰ μὲν τῶν ἄλλων σπλάγχνων διέχουσιν αἱ φλέβες, διὰ δὲ τῆς καρδίας οὐ διατείνει φλέψ· ὅθεν καὶ δῆλον ὅτι μόριον καὶ ἀρχὴ τῶν φλεβῶν ἐστὶν ἡ καρδία. Καὶ τοῦτ' εὐλόγως· μέσον γὰρ τὸ τῆς καρδίας ἐστὶ σῶμα πυκνὸν καὶ κοῖλον πεφυκός, ἔτι δὲ πλήρες αἵματος (666a.) ὡς τῶν φλεβῶν ἐντεῦθεν ἡργμένων, κοῖλον μὲν πρὸς τὴν ὑποδοχὴν τοῦ αἵματος, πυκνὸν δὲ πρὸς τὸ φυλάσσειν τὴν ἀρχὴν τῆς θερμότητος. Ἐν ταύτῃ γὰρ μόνη τῶν σπλάγχνων καὶ τοῦ σώματος αἷμα ἄνευ φλεβῶν ἐστὶ, τῶν δ' ἄλλων μορίων ἕκαστον ἐν ταῖς φλεψὶν ἔχει τὸ αἷμα. Καὶ τοῦτ' εὐλόγως· ἐκ τῆς καρδίας γὰρ ἐποχετεύεται καὶ εἰς τὰς φλέβας, εἰς δὲ τὴν καρδίαν οὐκ ἄλλοθεν· αὕτη γὰρ ἐστὶν ἀρχὴ ἢ πηγὴ τοῦ αἵματος καὶ ὑποδοχὴ πρώτη. Ἐκ τῶν ἀνατομῶν δὲ κατὰδηλα μᾶλλον ταῦτα, καὶ ἐκ τῶν γενέσεων· εὐθέως γὰρ ἐστὶν ἔναιμος πρώτη γινομένη τῶν μορίων ἀπάντων. Ἔτι δ' αἱ κινήσεις τῶν ἡδέων καὶ τῶν λυπηρῶν καὶ ὅλως πάσης αἰσθήσεως ἐντεῦθεν ἀρχόμεναι φαίνονται καὶ πρὸς ταύτην περαίνουσαι. Οὕτω δ' ἔχει καὶ κατὰ τὸν λόγον· ἀρχὴν γὰρ εἶναι δεῖ μίαν ὅπου ἐνδέχεται. Εὐφυέστατος δὲ τῶν τόπων ὁ μέσος· ἐν γὰρ τὸ μέσον καὶ ἐπὶ πᾶν ἐφικτὸν ὁμοίως ἢ παραπλησίως. Ἔτι δ' ἐπεὶ οὔτε τῶν ἀναίμων οὐθέν αἰσθητικὸν οὔτε τὸ αἷμα, δῆλον ὡς τὸ πρῶτον ἔχον ὡς ἐν ἀγγεῖῳ δ' ἔχον ἀναγκαῖον εἶναι τὴν ἀρχὴν. Οὐ μόνον δὲ κατὰ τὸν λόγον οὕτως ἔχειν φαίνεται, ἀλλὰ καὶ κατὰ τὴν αἴσθησιν· ἐν γὰρ τοῖς ἐμβρύοις εὐθέως ἡ καρδία φαίνεται κινουμένη τῶν μορίων καθάπερ εἰ ζῶν, ὡς ἀρχὴ τῆς φύσεως τοῖς ἐναίμοις οὔσα. Μαρτύριον δὲ τῶν εἰρημένων καὶ τὸ πᾶσι τοῖς ἐναίμοις ὑπάρχειν αὐτὴν· ἀναγκαῖον γὰρ αὐτοῖς ἔχειν τὴν ἀρχὴν τοῦ αἵματος. Ὑπάρχει δὲ καὶ τὸ ἥπαρ πᾶσι τοῖς ἐναίμοις· ἀλλ' οὐθεὶς ἂν ἀξιώσειεν αὐτὸ ἀρχὴν εἶναι οὔτε τοῦ ὅλου σώματος οὔτε τοῦ αἵματος· κεῖται γὰρ οὐδαμῶς πρὸς ἀρχοειδῇ θέσιν, ἔχει δ' ὥςπερ ἀντίζυγον ἐν τοῖς μάλιστ' ἀπηκριβωμένοις τὸν σπλῆνα. Ἔτι δ' ὑποδοχὴν αἵματος οὐκ ἔχει ἐν ἑαυτῷ καθάπερ ἡ καρδία, ἀλλ' ὥςπερ τὰ λοιπά, ἐν φλεβί. Ἔτι δὲ τείνει δι' αὐτοῦ φλέψ, δι' ἐκείνης δ' οὐδεμία· πασῶν γὰρ τῶν φλεβῶν ἐκ τῆς καρδίας αἱ ἀρχαί. Ἐπεὶ οὖν ἀνάγκη μὲν θάτερον τούτων ἀρχὴν εἶναι, μὴ ἔστι δὲ τὸ ἥπαρ, ἀνάγκη τὴν καρδίαν εἶναι καὶ τοῦ αἵματος ἀρχὴν. Τὸ μὲν γὰρ ζῶν αἰσθήσει ὥρισταί, αἰσθητικὸν δὲ πρῶτον τὸ πρῶτον ἔναιμον, τοιοῦτον δ' ἡ καρδία· καὶ γὰρ (666b.) ἀρχὴ τοῦ αἵματος καὶ

ἔναιμιον πρῶτον.

Ἔστι δ' αὐτῆς τὸ ἄκρον ὃζὺ καὶ στερεώτερον, κεῖται δὲ πρὸς τῷ στήθει καὶ ὅλως ἐν τοῖς πρόσθεν τοῦ σώματος πρὸς τὸ μὴ καταψύχεσθαι αὐτό· πᾶσι γὰρ ἀσαρκότερον τὸ στήθος, τὰ δὲ πρηνῆ σαρκωδέστερα, διὸ πολλὴν ἔχει σκέπην τὸ θερμὸν κατὰ τὸν νῶτον. Ἔστι δ' ἡ καρδία τοῖς μὲν ἄλλοις ζῷοις κατὰ μέσον τοῦ στηθικοῦ τόπου, τοῖς δ' ἀνθρώποις μικρὸν εἰς τὰ εὐώνυμα παρεγκλίνουσα πρὸς τὸ ἀνισοῦν τὴν κατάψυχιν τῶν ἀριστερῶν· μάλιστα γὰρ τῶν ἄλλων ζῶων ἄνθρωπος ἔχει κατεψυγμένα τὰ ἀριστερά. Ὅτι δὲ καὶ ἐν τοῖς ἰχθύσιν ὁμοίως ἡ καρδία κεῖται, πρότερον εἴρηται, καὶ διότι φαίνεται ἀνομοίως. Ἐχει δὲ πρὸς τὴν κεφαλὴν τὸ ὃζὺ, ἔστι δ' αὕτη τὸ πρόσθεν· ἐπὶ ταύτην γὰρ ἡ κίνησις. Ἐχει δὲ καὶ νεύρων πλῆθος ἡ καρδία, καὶ τοῦτ' εὐλόγως· ἀπὸ ταύτης γὰρ αἱ κινήσεις, περαίνονται δὲ διὰ τοῦ ἔλκειν καὶ ἀνιέναι· δεῖ οὖν τοιαύτης ὑπηρεσίας καὶ ἰσχύος. Ἡ δὲ καρδία, καθάπερ εἵπομεν καὶ πρότερον, οἷον ζῶόν τι πέφυκεν ἐν τοῖς ἔχουσιν. Ἔστι δ' ἀνόστεος πάντων ὅσα καὶ ἡμεῖς θεθάμεθα, πλὴν τῶν ἵππων καὶ γένους τινὸς βοῶν· τούτοις δὲ διὰ τὸ μέγεθος οἷον ἐρείσματος χάριν ὅστωιν ὕπεστι, καθάπερ καὶ τοῖς ὅλοις σώμασιν. Κοιλίας δ' ἔχουσιν αἱ μὲν τῶν μεγάλων ζῶων τρεῖς, αἱ δὲ τῶν ἐλασσόνων δύο, μίαν δὲ πᾶσαι· δι' ἣν δ' αἰτίαν, εἴρηται. Δεῖ γὰρ εἶναι τόπον τινὰ τῆς καρδίας καὶ ὑποδοχὴν τοῦ πρώτου αἵματος. Ὅτι δὲ πρῶτον ἐν τῇ καρδίᾳ γίνεται τὸ αἷμα, πολλάκις εἰρήκαμεν, διὰ τὸ τὰς ἀρχηγοὺς φλέβας δύο εἶναι, τὴν τε μεγάλην καλουμένην καὶ τὴν ἄορτήν.

Ἐκατέρας γὰρ οὔσης ἀρχῆς τῶν φλεβῶν, καὶ διαφορὰς ἔχουσῶν, περὶ ὧν ὕστερον ἐροῦμεν, βέλτιον καὶ τὰς ἀρχὰς αὐτῶν κεχωρίσθαι· τοῦτο δ' ἂν εἴη διαφόρου ὄντος τοῦ αἵματος καὶ κεχωρισμένου. Διόπερ ἐν οἷς ἐνδέχεται, δὴ εἰσὶν ὑποδοχαί. Ἐνδέχεται δ' ἐν τοῖς μεγάλοις· τούτων γὰρ ἔχουσι καὶ αἱ καρδίαι μέγεθος. Ἔτι δὲ βέλτιον τρεῖς εἶναι τὰς κοιλίας, ὅπως ἢ μία ἀρχὴ κοινή· τὸ δὲ μέσον καὶ περιττὸν ἀρχή· ὥστε μεγέθους δεῖ μείζονος αὐταῖς ἀεί, διόπερ αἱ μέγισται τρεῖς ἔχουσι μόναι. Τούτων δὲ πλεῖστον μὲν αἷμα (667a.) καὶ θερμώτατον ἔχουσιν αἱ δεξιάι (διὸ καὶ τῶν μερῶν θερμότερα τὰ δεξιά), ἐλάχιστον δὲ καὶ ψυχρότερον αἱ ἀριστεραί, μέσον δ' αἱ μέσαι τῷ πλήθει καὶ θερμότητι, καθαρώτατον δέ· δεῖ γὰρ τὴν ἀρχὴν ὅτι μάλιστ' ἡρεμεῖν, τοιαύτη δ' ἂν εἴη καθαροῦ τοῦ αἵματος ὄντος, τῷ πλήθει δὲ καὶ θερμότητι μέσου. Ἐχουσι δὲ καὶ διαίρεσιν τινα αἱ

καρδία παραπλησίαν ταῖς ῥαφαῖς. Οὐκ εἰσὶ δὲ συναφεῖς ὥς τιнос ἐκ πλειόνων συνθέτου ἀλλά, καθάπερ εἵπομεν, διαρθρώσει μᾶλλον.

Εἰσὶ δὲ τῶν μὲν αἰσθητικῶν ἀρθρωδέστεραι, τῶν δὲ νωθροτέρων ἀναρθρότεραι, καθάπερ αἱ τῶν ὤν.

Αἱ δὲ διαφοραὶ τῆς καρδίας κατὰ μέγεθος τε καὶ μικρότητα καὶ σκληρότητα καὶ μαλακότητα τείνουσί πη καὶ πρὸς τὰ ἥθη. Τὰ μὲν γὰρ ἀναίσθητα σκληρὰν ἔχει τὴν καρδίαν καὶ πυκνὴν, τὰ δ' αἰσθητικὰ μαλακωτέραν· καὶ τὰ μὲν μεγάλας ἔχοντα τὰς καρδίας δειλά, τὰ δὲ ἐλάσσους καὶ μέσας θαρραλεώτερα.

Τὸ γὰρ συμβαῖνον πάθος ὑπὸ τοῦ φοβεῖσθαι προϋπάρχει τούτοις, διὰ τὸ μὴ ἀνάλογον ἔχειν τὸ θερμὸν τῇ καρδίᾳ, μικρὸν δ' ὂν ἐν μεγάλοις ἀμαυροῦσθαι, καὶ τὸ αἷμα ψυχρότερον εἶναι. Μεγάλας δὲ τὰς καρδίας ἔχουσι, λαγῶς, ἔλαφος, μῦς, ὕαινα, ὄνος, πάρδαλις, γαλῆ, καὶ τᾶλλα σχεδὸν πάνθ' ὅσα φανερῶς δειλὰ ἢ διὰ φόβον κακοῦργα. Παραπλησίως δὲ καὶ ἐπὶ τῶν φλεβῶν καὶ ἐπὶ τῶν κοιλιῶν ἔχει· ψυχραὶ γὰρ αἱ μεγάλαι φλέβες καὶ κοιλίαι. Ὡς περ γὰρ ἐν μικρῷ καὶ ἐν μεγάλῳ οἰκίῳ τὸ ἴσον πῦρ ἦσσαν ἐν τοῖς μείζουσι θερμαίνει, οὕτω καὶ τούτοις τὸ θερμόν· ἀγγεῖα γὰρ καὶ ἡ φλέψ καὶ ἡ κοιλία. Ἔτι δ' αἱ ἀλλότριάκις κινήσεις ἕκαστον τῶν θερμῶν καταψύχουσιν, ἐν δὲ ταῖς εὐρυχωρεστέραις τὸ πνεῦμα πλεῖον καὶ ἐνισχύει μᾶλλον· διὸ τῶν μεγαλοκοιλιῶν οὐδὲν οὐδὲ τῶν μεγαλοφλέβων πῖόν ἐστι κατὰ σάρκα, ἀλλὰ πάντα ἢ τὰ πλεῖστα τῶν τοιούτων ἀδηλόφλεβα καὶ μικροκοιλία φαίνεται.

Μόνον δὲ τῶν σπλάγχνων καὶ ὅλως τῶν ἐν τῷ σώματι μορίων ἡ καρδία χαλεπὸν πάθος οὐδὲν ὑποφέρει, καὶ τοῦτ' εὐλόγως· φθειρομένης γὰρ τῆς ἀρχῆς οὐκ ἔστιν ἐξ οὗ γένοιτ' ἂν βοήθεια τοῖς ἄλλοις ἐκ ταύτης ἡρτημένοις. Σημεῖον δὲ τοῦ μηθὲν ἐπιδέχεσθαι πάθος τὴν καρδίαν τὸ ἐν μηδενὶ τῶν θυομένων (667b.) ἱερείων ὥφθαι τοιοῦτον πάθος περὶ αὐτὴν ὥς περ ἐπὶ τῶν ἄλλων σπλάγχνων. Οἱ τε γὰρ νεφροὶ πολλάκις φαίνονται λίθων μεστοὶ καὶ φυμάτων καὶ δοθεινῶν καὶ τὸ ἥπαρ, ὡσαύτως δὲ καὶ ὁ πλεύμων, μάλιστα δὲ ὁ σπλήν. Πολλὰ δὲ καὶ ἕτερα παθήματα συμβαίνοντα περὶ αὐτὰ φαίνεται, ἥκιστα δὲ τοῦ μὲν πλεύμονος περὶ τὴν ἀρτηρίαν, τοῦ δ' ἥπατος περὶ τὴν σύναψιν τῇ μεγάλῃ φλεβί, καὶ ταῦτ' εὐλόγως· ταύτῃ γὰρ μάλιστα κοινωνοῦσι τῇ καρδίᾳ. Ὅσα δὲ διὰ νόσον καὶ τοιαῦτα πάθη φαίνεται τελευτῶντα τῶν ζώων, τούτοις ἀνατεμνομένοις φαίνεται περὶ τὴν καρδίαν νοσῶδη πάθη.

Καὶ περὶ μὲν τῆς καρδίας, ποία τις, καὶ τίνος ἕνεκεν καὶ διὰ τίν'
αἰτίαν ὑπάρχει τοῖς ἔχουσιν τοσαῦτ' εἰρήσθω.

Κεφάλαιο 5

Ἐπόμενον δ' ἂν εἴη καὶ περὶ φλεβῶν εἰπεῖν, τῆς τε μεγάλης καὶ τῆς ᾠορτῆς· αὗται γὰρ ἐκ τῆς καρδίας πρῶται δέχονται τὸ αἷμα, αἱ δὲ λοιπαὶ τούτων ἀποφυάδες εἰσίν. Ὅτι μὲν οὖν τοῦ αἵματος χάριν εἰσί, πρότερον εἴρηται· τό τε γὰρ ὑγρὸν ἅπαν ἀγγείου δεῖται, καὶ τὸ φλεβῶν γένος ἀγγεῖον, τὸ δ' αἷμα ἐν ταύταις· διότι δὲ δύο καὶ ἀπὸ μιᾶς ἀρχῆς καθ' ἅπαν τὸ σῶμα διατείνουσι, λέγωμεν. Τοῦ μὲν οὖν εἰς μίαν ἀρχὴν συντελεῖν καὶ ἀπὸ μιᾶς αἴτιον τὸ μίαν ἔχειν πάντα τὴν αἰσθητικὴν ψυχὴν ἐνεργεῖα, ὥστε καὶ τὸ μόριον ἐν τὸ ταύτην ἔχον πρῶτως, ἐν μὲν τοῖς ἐναίμοις κατὰ δύναμιν καὶ κατ' ἐνέργειαν, τῶν δ' ἀναίμων ἐνίοις κατ' ἐνέργειαν μόνον. Διὸ καὶ τὴν τοῦ θερμοῦ ἀρχὴν ἀναγκαῖον ἐν τῷ αὐτῷ τόπῳ εἶναι· αὕτη δ' ἐστὶν αἰτία καὶ τῷ αἵματι τῆς ὑγρότητος καὶ τῆς θερμότητος. Διὰ μὲν οὖν τὸ ἐν ἐνὶ εἶναι μορίῳ τὴν αἰσθητικὴν ἀρχὴν καὶ τὴν τῆς θερμότητος καὶ ἡ τοῦ αἵματος ἀπὸ μιᾶς ἐστὶν ἀρχῆς, διὰ δὲ τὴν τοῦ αἵματος ἐνότητα καὶ ἡ τῶν φλεβῶν ἀπὸ μιᾶς. Δύο δ' εἰσὶ διὰ τὸ τὰ σώματα εἶναι διμερῆ τῶν ἐναίμων καὶ πορευτικῶν· ἐν πᾶσι γὰρ τούτοις διώρισται τὸ ἔμπροσθεν καὶ τὸ ὀπισθεν καὶ τὸ δεξιὸν καὶ τὸ ἀριστερὸν καὶ τὰ ἄνω καὶ τὸ κάτω. Ὅσῳ δὲ τιμιώτερον καὶ ἡγεμονικώτερον τὸ ἔμπροσθεν τοῦ ὀπισθεν, τοσοῦτ' καὶ ἡ μεγάλη φλέψ τῆς ᾠορτῆς.

Ἡ μὲν γὰρ ἐν τοῖς ἔμπροσθεν, ἡ δ' ἐν τοῖς ὀπισθεν κεῖται, καὶ τὴν μὲν ἅπαντ' ἔχει τὰ ἐναιμα φανερώς, (668a.) τὴν δ' ἔνια μὲν ἀμυδρώς ἔνια δ' ἀφανῶς. Τοῦ δ' εἰς τὸ πᾶν διαδεδόσθαι τὸ σῶμα τὰς φλέβας αἴτιον τὸ παντὸς εἶναι τοῦ σώματος ὕλην τὸ αἷμα, τοῖς δ' ἀναίμοις τὸ ἀνάλογον, ταῦτα δ' ἐν φλεβὶ καὶ τῷ ἀνάλογον κεῖσθαι. Πῶς μὲν οὖν τρέφεται τὰ ζῶα καὶ ἐκ τίνος καὶ τίνα τρόπον ἀναλαμβάνουσιν ἐκ τῆς κοιλίας, ἐν τοῖς περὶ γενέσεως λόγοις μᾶλλον ἀρμόζει σκοπεῖν καὶ λέγειν. Συνισταμένων δὲ τῶν μορίων ἐκ τοῦ αἵματος, καθάπερ εἵπομεν, εὐλόγως ἡ τῶν φλεβῶν ρύσις διὰ παντὸς τοῦ σώματος πέφυκεν· δεῖ γὰρ καὶ τὸ αἷμα διὰ παντὸς καὶ παρὰ πᾶν εἶναι, εἴπερ τῶν μορίων ἕκαστον ἐκ τούτου συνέστηκεν. Ἔοικε δ' ὥσπερ ἐν τε τοῖς κήποις αἱ ὕδραγωγίαι κατασκευάζονται ἀπὸ μιᾶς ἀρχῆς καὶ πηγῆς εἰς πολλοὺς ὀχετοὺς καὶ ἄλλους ἀεὶ πρὸς τὸ πάντῃ μεταδιδόναι, καὶ ἐν ταῖς οἰκοδομίαις παρὰ πᾶσαν τὴν τῶν θεμελίων ὑπογραφὴν λίθοι παραβέβληνται διὰ τὸ τὰ μὲν κηπευόμενα φύεσθαι

ἐκ τοῦ ὕδατος, τοὺς δὲ θεμελίους ἐκ τῶν λίθων οἰκοδομεῖσθαι, τὸν αὐτὸν τρόπον καὶ ἡ φύσις τὸ αἷμα διὰ παντὸς ὠχέτευκε τοῦ σώματος, ἐπεὶ δὴ παντὸς ὕλη πέφυκε τοῦτο. Γίνεται δὲ κατάδηλον ἐν τοῖς μάλιστα καταλελεπτυσμένοις οὐθὲν γὰρ ἄλλο φαίνεται παρὰ τὰς φλέβας, καθάπερ ἐπὶ τῶν ἀμπελίνων τε καὶ συκίνων φύλλων καὶ ὅς' ἄλλα τοιαῦτα· καὶ γὰρ τούτων αὐαινομένων φλέβες λείπονται μόνον.

Τούτων δ' αἴτιον ὅτι τὸ αἷμα καὶ τὸ ἀνάλογον τούτῳ δυνάμει σῶμα καὶ σὰρξ ἢ τὸ ἀνάλογόν ἐστιν· καθάπερ οὖν ἐν ταῖς ὀχετείαις αἱ μέγισται τῶν τάφρων διαμένουσιν, αἱ δ' ἐλάχισται πρῶται καὶ ταχέως ὑπὸ τῆς ἰλὺος ἀφανίζονται, πάλιν δ' ἐκλείπουσιν φανεραὶ γίνονται, τὸν αὐτὸν τρόπον καὶ τῶν φλεβῶν αἱ μὲν μέγισται διαμένουσιν, αἱ δ' ἐλάχισται γίνονται σάρκες ἐνεργεία, δυνάμει δ' εἰσὶν οὐδὲν ἥσσον φλέβες.

Διὸ καὶ σφριζόμενων τῶν σαρκῶν καθ' ὅτι οὖν αἷμα ρεῖ διαιρουμένων· καίτοι ἄνευ μὲν φλεβὸς οὐκ ἔστιν αἷμα, φλεβίον δ' οὐδὲν δῆλον, ὥσπερ οὐδ' ἐν τοῖς ὀχετοῖς αἱ τάφροι πρὶν ἢ τὴν ἰλὺν ἐξαίρεθῆναι.

Ἐκ μειζόνων δ' εἰς ἐλάσσους αἱ φλέβες ἀεὶ προέρχονται, ἕως τοῦ γενέσθαι τοὺς πόρους ἐλάσσους (668b.) τῆς τοῦ αἵματος παχύτητος· δι' ὧν τῷ μὲν αἵματι δίοδος οὐκ ἔστι, τῷ δὲ περιττώματι τῆς ὑγρᾶς ἱκμάδος, ὃν καλοῦμεν ἰδρῶτα, καὶ τοῦτο διαθερμανθέντος τοῦ σώματος καὶ τῶν φλεβίων ἀναστομωθέντων. Ἦδη δὲ τισιν ἰδρῶσαι συνέβη αἱματώδει περιττώματι διὰ καχεξίαν, τοῦ μὲν σώματος ρυάδος καὶ μανοῦ γενομένου, τοῦ δ' αἵματος ἐξυγρानθέντος δι' ἀπεψίαν, ἀδυνατούσης τῆς ἐν τοῖς φλεβίοις θερμότητος πέσσειν δι' ὀλιγότητα. Εἴρηται γὰρ ὅτι πᾶν τὸ κοινὸν γῆς καὶ ὕδατος παχύνεται πεσσομένον, ἢ δὲ τροφή καὶ τὸ αἷμα μικτὸν ἐξ ἀμφοῖν. Ἀδυνατεῖ δὲ πέσσειν ἢ θερμότης οὐ μόνον διὰ τὴν αὐτῆς ὀλιγότητα ἀλλὰ καὶ διὰ πλῆθος καὶ ὑπερβολὴν τῆς εἰσφερομένης τροφῆς· γίνεται δὲ πρὸς ταύτην ὀλίγη. Ἡ δ' ὑπερβολὴ δισσή· καὶ γὰρ τῷ ποσῷ καὶ τῷ ποιῷ. Οὐ γὰρ πᾶν ὁμοίως εὐπεπτον.

Ῥεῖ δὲ μάλιστα τὸ αἷμα κατὰ τοὺς εὐρυχωρεστάτους τῶν πόρων· διόπερ ἐκ τῶν μυκτήρων καὶ τῶν οὐλῶν καὶ τῆς ἔδρας, ἐνίοτε δὲ καὶ ἐκ τοῦ στόματος αἱμορροῖδες ἅποναι γίνονται, καὶ οὐχ ὥσπερ ἐκ τῆς ἀρτηρίας μετὰ βίας.

Διεστῶσαι δ' ἄνωθεν ἢ τε μεγάλη φλὲς καὶ ἡ ἀορτή, κάτω δ' ἐναλλάσσεσθαι συνέχουσι τὸ σῶμα.

Προϊοῦσαι γὰρ σχίζονται κατὰ τὴν διφυΐαν τῶν κώλων, καὶ ἡ μὲν ἐκ τοῦ ἔμπροσθεν εἰς τοῦπισθεν προέρχεται, ἡ δ' ἐκ τοῦ ὀπισθεν εἰς τοῦμπροσθεν, καὶ συμβάλλουσιν εἰς ἓν· ὥσπερ γὰρ ἐν τοῖς πλεκομένοις ἐγγίνεται τὸ συνεχές μᾶλλον, οὕτω καὶ διὰ τῆς τῶν φλεβῶν ἐναλλάξεως συνδεῖται τῶν σωμάτων τὰ πρόσθια τοῖς ὀπισθεν. Ὅμοίως δὲ καὶ ἀπὸ τῆς καρδίας ἐν τοῖς ἄνω τόποις συμβαίνει. Τὸ δὲ μετ' ἀκριβείας ὡς ἔχουσιν αἱ φλέβες πρὸς ἀλλήλας, ἔκ τε τῶν ἀνατομῶν δεῖ θεωρεῖν καὶ ἐκ τῆς ζωϊκῆς ἱστορίας. Καὶ περὶ μὲν φλεβῶν καὶ καρδίας εἰρήσθω, περὶ δὲ τῶν ἄλλων σπλάγχνων σκεπτέον κατὰ τὴν αὐτὴν μέθοδον.

Κεφάλαιο 6

Πλεύμονα μὲν οὖν ἔχει διὰ τὸ πεζὸν εἶναι τι γένος τῶν ζώων. Αναγκαῖον μὲν γὰρ γίνεσθαι τῷ θερμῷ κατάψυξιν, ταύτης δὲ δεῖται θύραθεν τὰ ἔναιμα τῶν ζώων· θερμότερα (669a.) γάρ. Τὰ δὲ μὴ ἔναιμα καὶ τῷ συμφύτῳ πνεύματι δύναται καταψύχειν. Ἀνάγκη δὲ καταψύχειν ἔξωθεν ἢ ὕδατι ἢ ἀέρι. Διόπερ τῶν μὲν ἰχθύων οὐδεὶς ἔχει πλεύμονα, ἀλλ' ἀντὶ τούτου βράγχια, καθάπερ εἴρηται ἐν τοῖς περὶ ἀναπνοῆς· ὕδατι γὰρ ποιεῖται τὴν κατάψυξιν, τὰ δ' ἀναπνέοντα τῷ ἀέρι, διόπερ πάντα τὰ ἀναπνέοντα ἔχει πλεύμονα. Ἀναπνεῖ δὲ τὰ μὲν πεζὰ πάντα, ἔνια δὲ καὶ τῶν ἐνύδρων, οἷον φάλαινα καὶ δελφὶς καὶ τὰ ἀναφυσῶντα κήτη πάντα. Πολλὰ γὰρ τῶν ζώων ἐπαμφοτερίζει τὴν φύσιν, καὶ τῶν τε πεζῶν καὶ τὸν ἀέρα δεχομένων διὰ τὴν τοῦ σώματος κράσιν ἐν ὑγρῷ διατελεῖ τὸν πλείστον χρόνον, καὶ τῶν ἐν τῷ ὑγρῷ μετέχει τοσοῦτον ἔνια τῆς πεζῆς φύσεως ὥστ' ἐν τῷ πνεύματι αὐτῶν εἶναι τὸ τέλος τοῦ ζῆν. Τοῦ δ' ἀναπνεῖν ὁ πλεύμων ὄργανόν ἐστι, τὴν μὲν ἀρχὴν τῆς κινήσεως ἔχων ἀπὸ τῆς καρδίας, ποιῶν δ' εὐρυχωρίαν τῇ εἰσόδῳ τοῦ πνεύματος διὰ τὴν αὐτοῦ σομφότητα καὶ τὸ μέγεθος· αἰρομένου γὰρ εἰσρεῖ τὸ πνεῦμα, συνιόντος δ' ἐξέρχεται πάλιν. Τὸ δὲ πρὸς τὴν ἄλσιν εἶναι τὸν πλεύμονα τῆς καρδίας οὐκ εἴρηται καλῶς· ἐν ἀνθρώπῳ τε γὰρ συμβαίνει μόνον ὡς εἰπεῖν τὸ τῆς πηδήσεως διὰ τὸ μόνον ἐν ἐλπίδι γίνεσθαι καὶ προσδοκίᾳ τοῦ μέλλοντος, ἀπέχει τ' ἐν τοῖς πλείστοις πολὺν τόπον καὶ κεῖται τὴν θέσιν ἀνωτέρω τοῦ πλεύμονος, ὥστε μηδὲν συμβάλλεσθαι τὸν πλεύμονα πρὸς τὴν ἄλσιν τῆς καρδίας.

Διαφέρει δὲ ὁ πλεύμων πολὺ τοῖς ζώοις. Τὰ μὲν γὰρ ἔναιμον ἔχει καὶ μέγαν, τὰ δ' ἐλάττω καὶ σομφόν, τὰ μὲν ζωτόκα διὰ τὴν θερμότητα τῆς φύσεως μείζω καὶ πολύαιμον, τὰ δ' ὠτόκα ξηρὸν καὶ μικρόν, δυνάμενον δὲ μέγα δίστασθαι ἐν τῷ ἐμφυσᾶσθαι, ὥσπερ τὰ τετράποδα μὲν ὠτόκα δὲ τῶν πεζῶν, οἷον οἱ τε σαῦροι καὶ αἱ χελῶναι καὶ πᾶν τὸ τοιοῦτον γένος, ἔτι δὲ πρὸς τούτοις ἡ τῶν πτηνῶν φύσις καὶ καλουμένων ὀρνίθων. Πάντων γὰρ τούτων σομφὸς ὁ πλεύμων καὶ ὁμοῖος ἀφρῶ· καὶ γὰρ ὁ ἀφρὸς ἐκ πολλοῦ μικρὸς γίνεται συγγεόμενος, καὶ ὁ τούτων πλεύμων μικρὸς καὶ ὑμένωδης. Διὸ καὶ ἄδιψα καὶ ὀλιγόποτα ταῦτα πάντα, καὶ δύναται πολὺν ἐν τῷ ὑγρῷ ἀνέχεσθαι χρόνον· ἅτε γὰρ ὀλίγον ἔχοντα θερμὸν ἱκανῶς ἐπὶ

πολὺν χρόνον καταψύχεται ὑπ' αὐτῆς τῆς τοῦ πλεύμονος (669b.) κινήσεως, οὔσης ἀερώδους καὶ κενῆς. Συμβέβηκε δὲ καὶ τὰ μεγέθη τούτων ἐλάττω τῶν ζώων ὥς ἐπίπαν εἰπεῖν· τὸ γὰρ θερμὸν αὐξητικόν· ἡ δὲ πολυαιμία θερμότητος σημεῖον.

Ἔτι δ' ὀρθοὶ τὰ σώματα μᾶλλον, διόπερ ἄνθρωπος μὲν τῶν ἄλλων ὀρθότατον, τὰ δὲ ζωοτόκα τῶν ἄλλων τετραπόδων· οὐδὲν γὰρ ὁμοίως τρωγλοδυτεῖ τῶν ζωοτόκων, οὔτ' ἄπουν οὔτε πεζεῦον. Ὅλως μὲν οὖν ὁ πλεύμων ἐστὶν ἀναπνοῆς χάριν, ἄναιμος δὲ καὶ τοιοῦτος γένους τινὸς ἕνεκεν ζώων· ἀλλ' ἀνώνυμον τὸ κοινὸν ἐπ' αὐτῶν, καὶ οὐχ ὥσπερ ὁ ὄρνις ὠνόμασται ἐπὶ τινος γένους. Διὸ ὥσπερ τὸ ὄρνιθι εἶναι ἔκ τινός ἐστι, καὶ ἐκείνων ἐν τῇ οὐσίᾳ ὑπάρχει τὸ πλεύμονα ἔχειν.

Κεφάλαιο 7

Δοκεῖ δὲ τῶν σπλάγχνων τὰ μὲν εἶναι μονοφυῆ, καθάπερ καρδία καὶ πλεῦμων, τὰ δὲ διφυῆ, καθάπερ νεφροί, τὰ δ' ἀπορεῖται ποτέρως ἔχει. Φανεῖν γὰρ ἂν ἐπαμφοτερίζειν τούτοις τὸ ἦπαρ καὶ ὁ σπλήν· καὶ γὰρ ὡς μονοφυῆς ἐκάτερον, καὶ ὡς ἀνθ' ἑνὸς δύο παραπλησίαν ἔχοντα τὴν φύσιν. Ἔστι δὲ πάντα διφυῆ. Τὸ δ' αἴτιον ἢ τοῦ σώματος διάστασις διφυῆς μὲν οὖσα, πρὸς μίαν δὲ συντελοῦσα ἀρχήν· τὸ μὲν γὰρ ἄνω καὶ κάτω, τὸ δ' ἔμπροσθεν καὶ ὀπίσθεν τὸ δὲ δεξιὸν καὶ ἀριστερόν ἐστιν. Διόπερ καὶ ὁ ἐγκέφαλος βούλεται διμερῆς εἶναι πᾶσι καὶ τῶν αἰσθητηρίων ἕκαστον. Κατὰ τὸν αὐτὸν δὲ λόγον ἢ καρδία ταῖς κοιλίαις. Ὁ δὲ πλεῦμων ἔν τε τοῖς φωτόκοις τοσοῦτον διέστηκεν ὥστε δοκεῖν δύο ἔχειν αὐτὰ πλεύμονας. Οἱ δὲ νεφροὶ καὶ παντὶ δῆλοι. Κατὰ δὲ τὸ ἦπαρ καὶ τὸν σπλῆνα δικαίως ἂν τις ἀπορήσειεν. Τούτου δ' αἴτιον ὅτι ἐν μὲν τοῖς ἐξ ἀνάγκης ἔχουσι σπλῆνα δόξειεν ἂν οἷον νόθον εἶναι ἦπαρ ὁ σπλήν, ἐν δὲ τοῖς μὴ ἐξ ἀνάγκης ἔχουσιν, ἀλλὰ πάμμικρον ὥσπερ σημείου χάριν, ἐναργῶς διμερὲς τὸ ἦπαρ ἐστίν, καὶ τὸ μὲν εἰς τὰ δεξιὰ, τὸ δ' ἑλαττον εἰς τὰριστερὰ βούλεται τὴν θέσιν ἔχειν. Οὐ μὴν ἀλλὰ καὶ ἐν τοῖς φωτόκοις ἦττον μὲν ἢ ἐπὶ τούτων φανερόν, ἐνίοις δὲ κακεῖ ὥσπερ ἐν τισὶ ζωοτόκοις ἐπιδήλως διέστηκεν, οἷον κατὰ τινας τόπους οἱ δασύποδες δύο δοκοῦσιν ἦπαρ ἔχειν, καθάπερ τῶν ἰχθύων ἕτεροὶ τέτινες καὶ οἱ σελαχῶδεις.

Διὰ δὲ τὴν θέσιν ἔχειν τὸ ἦπαρ ἐν τοῖς δεξιοῖς μᾶλλον (670a.) ἢ τοῦ σπληνὸς γέγονε φύσις, ὥστ' ἀναγκαῖον μὲν πως, μὴ λῖαν δ' εἶναι πᾶσι τοῖς ζῴοις. Τοῦ μὲν οὖν διφυῆ τὴν φύσιν εἶναι τῶν σπλάγχνων αἴτιον, ὥσπερ εἵπομεν, τὸ δύο εἶναι τὸ δεξιὸν καὶ τὸ ἀριστερόν· ἐκάτερον γὰρ ζητεῖ τὸ ὅμοιον. Ὡς περ καὶ αὐτὰ βούλεται παραπλησίαν καὶ διδύμην ἔχειν τὴν φύσιν, καθάπερ ἐκεῖνα δίδυμα μὲν, συνήρηται δ' εἰς ἓν, καὶ τῶν σπλάγχνων ὁμοίως ἕκαστον. Ἔστι δὲ σπλάγχνα τὰ κάτω τοῦ ὑποζώματος κοινῇ μὲν πάντα τῶν φλεβῶν χάριν, ὅπως οὖσαι μετέωροι μένωσι τῷ τούτων συνδέσμῳ πρὸς τὸ σῶμα. Καθάπερ ἄγκυραι γὰρ βέβληνται πρὸς τὸ σῶμα διὰ τῶν ἀποτεταμένων μορίων· ἀπὸ μὲν τῆς μεγάλης φλεβός, πρὸς τὸ ἦπαρ καὶ τὸν σπλῆνα (τούτων γὰρ τῶν σπλάγχνων ἢ φύσις οἷον ἦλοι πρὸς τὸ σῶμα προσλαμβάνουσιν αὐτήν, εἰς μὲν τὰ πλάγια τοῦ σώματος τό

θ' ἦπαρ καὶ ὁ σπλὴν τὴν φλέβα τὴν μεγάλην-ἀπὸ ταύτης γὰρ εἰς αὐτὰ μόνα διατείνουσι φλέβες-εἰς δὲ τὰ ὀπισθεν οἱ νεφροί· πρὸς δ' ἐκείνους οὐ μόνον ἀπὸ τῆς μεγάλης φλεβὸς ἀλλὰ καὶ ἀπὸ τῆς ἀορτῆς τείνει φλέψ εἰς ἑκάτερον. Ταῦτα δὴ συμβαίνει διὰ τούτων τῇ συστάσει τῶν ζώων· καὶ τὸ μὲν ἦπαρ καὶ ὁ σπλὴν βοηθεῖ πρὸς τὴν πέψιν τῆς τροφῆς (ἔναιμα γὰρ ὄντα θερμὴν ἔχει τὴν φύσιν), οἱ δὲ νεφροὶ πρὸς τὸ περίττωμα τὸ εἰς τὴν κύστιν ἀποκρινόμενον. Καρδία μὲν οὖν καὶ ἦπαρ πᾶσιν ἀναγκαῖα τοῖς ζώοις, ἡ μὲν διὰ τὴν τῆς θερμότητος ἀρχὴν (δεῖ γὰρ εἶναι τινα οἶον ἐστίαν, ἐν ᾗ κείσεται τῆς φύσεως τὸ ζωπυροῦν, καὶ τοῦτο εὐφύλακτον, ὥσπερ ἀκρόπολις οὔσα τοῦ σώματος), τὸ δ' ἦπαρ τῆς πέψεως χάριν. Πάντα δὲ δεῖται τὰ ἔναιμα δυοῖν τούτοις, διόπερ ἔχει πάντα τὰ ἔναιμα δύο τὰ σπλάγχνα ταῦτα μόνον· ὅσα δ' ἀναπνεῖ, καὶ πλεύμονα τρίτον. Ὁ δὲ σπλὴν κατὰ συμβεβηκὸς ἐξ ἀνάγκης ὑπάρχει τοῖς ἔχουσιν, ὥσπερ καὶ τὰ περιττώματα, τό τ' ἐν τῇ κοιλίᾳ καὶ τὸ περὶ τὴν κύστιν. Διόπερ ἔντισιν ἐκλείπει κατὰ τὸ μέγεθος, ὥσπερ τῶν τε πτερωτῶν ἐνίοις, ὅσα θερμὴν ἔχει τὴν κοιλίαν, οἶον περιστερὰ ἰέραξ ἰκτίνος, καὶ ἐπὶ τῶν φωτόκων (670b.) δὲ καὶ τετραπόδων ὁμοίως (μικρὸν γὰρ πάμπαν ἔχουσιν), καὶ πολλοῖς τῶν λεπιδωτῶν· ἅπερ καὶ κύστιν οὐκ ἔχει διὰ τὸ τρέπεσθαι τὸ περίττωμα διὰ μανῶν τῶν σαρκῶν εἰς πτερὰ καὶ λεπίδας. Ὁ γὰρ σπλὴν ἀντισπᾷ ἐκ τῆς κοιλίας τὰς ἰκμάδας τὰς περιττευσούσας, καὶ δύναται συμπέττειν αἱματώδης ὦν. Ἄν δὲ τὸ περίττωμα πλεῖον ἢ ἡ ὀλιγόθερμος ὁ σπλὴν, νοσακερὰ γίνεται πλήρη τροφῆς· καὶ διὰ τὴν ἐνταῦθα παλίρροια τῆς ὑγρότητος πολλοῖς αἱ κοιλίαι σκληραὶ γίνονται σπληνιῶσιν, ὥσπερ τοῖς λίαν οὐρητικοῖς, διὰ τὸ ἀντιπερισπᾶσθαι τὰς ὑγρότητας. Οἷς δὲ ὀλίγη περίττωσις γίνεται, καθάπερ τοῖς ὀρνέοις καὶ τοῖς ἰχθύσι, τὰ μὲν οὐ μέγαν ἔχει, τὰ δὲ σημείου χάριν. Καὶ ἐν τοῖς τετράποσι δὲ τοῖς φωτόκοις μικρὸς καὶ στιφρὸς καὶ νεφρώδης ὁ σπλὴν ἐστι, διὰ τὸ τὸν πλεύμονα σομφὸν εἶναι καὶ ὀλιγοποτεῖν καὶ τὸ περιγινόμενον περίττωμα τρέπεσθαι εἰς τὸ σῶμα καὶ τὰς φολίδας, ὥσπερ εἰς τὰ πτερὰ τοῖς ὀρνισιν. Ἐν δὲ τοῖς κύστιν ἔχουσι καὶ τὸν πλεύμονα ἔναιμον ὑγρὸς ἐστι διὰ τε τὴν εἰρημένην αἰτίαν καὶ διὰ τὸ τὴν φύσιν τὴν τῶν ἀριστερῶν ὅλως ὑγροτέραν εἶναι καὶ ψυχροτέραν. Διήρηται γὰρ τῶν ἐναντίων ἕκαστον πρὸς τὴν συγγενῇ συστοιχίαν, οἶον δεξιὸν ἐναντίον ἀριστερῷ καὶ θερμὸν ἐναντίον ψυχρῷ· καὶ σύστοιχα γὰρ ἀλλήλοις εἰσὶ τὸν εἰρημένον τρόπον.

Οἱ δὲ νεφροὶ τοῖς ἔχουσιν οὐκ ἐξ ἀνάγκης, ἀλλὰ τοῦ εὖ καὶ καλῶς ἔνεκεν ὑπάρχουσιν· τῆς γὰρ περιττώσεως χάριν τῆς εἰς τὴν κύστιν ἀθροιζομένης εἰσὶ κατὰ τὴν ἰδίαν φύσιν, ἐν ὅσοις πλεῖον ὑπόστημα γίνεται τὸ τοιοῦτον, ὅπως βέλτιον ἀποδιδῶ ἡ κύστις τὸ αὐτῆς ἔργον. Ἐπεὶ δὲ τῆς αὐτῆς ἔνεκα χρείας τοὺς τε νεφροὺς συμβέβηκεν ἔχειν τὰ ζῶα καὶ τὴν κύστιν, λεκτέον περὶ κύστεως νῦν, ὑπερβάντας τὸν ἐφεξῆς τῶν μορίων ἀριθμόν· περὶ γὰρ φρενῶν οὐδὲν πω διώρισται, τοῦτο δέ τι τῶν περὶ τὰ σπλάγχνα μορίων ἐστίν.

Κεφάλαιο 8

Κύστιν δ' οὐ πάντ' ἔχει τὰ ζῶα, ἀλλ' ἔοικεν ἡ φύσις βουλομένη ἀποδιδόναι τοῖς ἔχουσι τὸν πλεύμονα ἔναιμον (671a.) μόνον, τούτοις δ' εὐλόγως. Διὰ γὰρ τὴν ὑπεροχὴν τῆς φύσεως, ἣν ἔχουσιν ἐν τῷ μορίῳ τούτῳ, διψητικά τε ταῦτ' ἐστὶ μάλιστα τῶν ζῶων, καὶ δεῖται τροφῆς οὐ μόνον ξηρᾶς ἀλλὰ καὶ τῆς ὑγρᾶς πλείονος, ὥστ' ἐξ ἀνάγκης καὶ περίττωμα γίνεσθαι πλεῖον καὶ μὴ τοσοῦτον μόνον ὅσον ὑπὸ τῆς κοιλίας πέττεσθαι καὶ ἐκκρίνεσθαι μετὰ τοῦ ταύτης περιττώματος. Ἀνάγκη τοίνυν εἶναι τι δεκτικὸν καὶ τούτου τοῦ περιττώματος. Διόπερ ὅσα πλεύμονα ἔχει τοιοῦτον ἅπαντ' ἔχει κύστιν· ὅσα δὲ μὴ τοιοῦτον, ἀλλ' ἢ ὀλιγόποτά ἐστι διὰ τὸ τὸν πλεύμονα ἔχειν σομφόν, ἢ ὅλως τὸ ὑγρὸν προσφέρεται οὐ ποτοῦ χάριν ἀλλὰ τροφῆς, οἷον τὰ ἔντομα καὶ οἱ ἰχθύες, ἔτι δὲ πτερωτά ἐστὶν ἢ λεπιδωτά ἢ φολιδωτά, ταῦτα δι' ὀλιγότητά τε τῆς τοῦ ὑγροῦ προσφορᾶς καὶ διὰ τὸ τρέπεσθαι εἰς ταῦτα τὸ περιγιγνόμενον τοῦ περιττώματος οὐδὲν ἔχει τούτων κύστιν, πλὴν αἱ χελῶναι τῶν φολιδωτῶν.

Καὶ ἐνταῦθ' ἡ φύσις κεκολόβωται μόνον. Αἴτιον δ' ὅτι αἱ μὲν θαλάττια σαρκώδη καὶ ἔναιμον ἔχουσι τὸν πλεύμονα, καὶ ὅμοιον τῷ βοεῖῳ, αἱ δὲ χερσαῖαι μείζω ἢ κατὰ λόγον. Ἔτι δὲ διὰ τὸ ὀστρακῶδες καὶ πυκνὸν εἶναι τὸ περιέχον οὐ διαπνέοντος τοῦ ὑγροῦ διὰ μανῶν τῶν σαρκῶν, οἷον τοῖς ὄρνισι καὶ τοῖς ὄφεσι καὶ τοῖς ἄλλοις τοῖς φολιδωτοῖς, ὑπόστασις γίνεται τοσαύτη ὥστε δεῖσθαι τὴν φύσιν αὐτῶν ἔχειν τι μόριον δεκτικὸν καὶ ἀγγειῶδες. Κύστιν μὲν οὖν ταῦτα μόνον τῶν τοιούτων ἔχει διὰ ταύτην τὴν αἰτίαν, ἡ μὲν θαλαττία μεγάλην, αἱ δὲ χερσαῖαι μικρὰν πάμπαν.

Κεφάλαιο 9

Ὅμοίως δ' ἔχει καὶ περὶ νεφρῶν. Οὐδὲ γὰρ νεφροὺς οὔτε τῶν πτερωτῶν καὶ λεπιδωτῶν οὐδὲν ἔχει οὔτε τῶν φολιδωτῶν, πλὴν αἱ θαλάττιαι χελῶναι καὶ αἱ χερσαῖαι· ἀλλ' ὥς τῆς εἰς τοὺς νεφροὺς τεταγμένης σαρκὸς οὐκ ἐχούσης χώραν ἀλλὰ διεσπαρμένης εἰς πολλά, πλατέα νεφροειδῆ ἐν ἐνίοις τῶν ὀρνίθων ἐστίν. Ἡ δ' ἐμὺς οὔτε κύστιν οὔτε νεφροὺς ἔχει· διὰ τὴν μαλακότητα γὰρ τοῦ χελωνίου εὐδιάπνουν γίνεται τὸ ὑγρόν. Ἡ μὲν οὖν ἐμὺς διὰ ταύτην τὴν αἰτίαν οὐκ ἔχει τῶν μορίων οὐδέτερον· τοῖς δ' ἄλλοις ζῴοις τοῖς ἔχουσιν ἔναιμον, ὥσπερ εἴρηται, τὸν πλεύμονα πᾶσι συμβέβηκεν ἔχειν (671b.) νεφρούς. Καταχρῆται γὰρ ἡ φύσις ἅμα τῶν τε φλεβῶν χάριν καὶ πρὸς τὴν τοῦ ὑγροῦ περιττώματος ἔκκρισιν· φέρει γὰρ εἰς αὐτοὺς πόρος ἐκ τῆς μεγάλης φλεβός. Ἐχουσι δ' οἱ νεφροὶ πάντες κοῖλον, ἢ πλεῖον ἢ ἔλαττον, πλὴν οἱ τῆς φώκης· οὗτοι δ' ὅμοιοι τοῖς βοείοις ὄντες στερεώτατοι πάντων εἰσίν. Ὅμοιοι δὲ καὶ οἱ τοῦ ἀνθρώπου τοῖς βοείοις· εἰσὶ γὰρ ὥσπερ συγκείμενοι ἐκ πολλῶν νεφρῶν μικρῶν καὶ οὐχ ὁμαλεῖς, ὥσπερ οἱ τῶν προβάτων καὶ τῶν ἄλλων τῶν τετραπόδων. Διὸ καὶ τὸ ἄρρώστημα τοῖς ἀνθρώποις δυσάπάλλακτον αὐτῶν ἐστίν, ἂν ἅπαξ νοσήσωσιν· συμβαίνει γὰρ ὥσπερ πολλοὺς νεφροὺς νοσοῦντων χαλεπωτέραν εἶναι τὴν ἴασιν ἢ τῶν ἑνα νοσοῦντων. Ὁ δ' ἀπὸ τῆς φλεβὸς τείνων πόρος οὐκ εἰς τὸ κοῖλον τῶν νεφρῶν κατατελευτᾷ ἀλλ' εἰς τὸ σῶμα καταναλίσκεται τῶν νεφρῶν· διόπερ ἐν τοῖς κοίλοις αὐτῶν οὐκ ἐγγίνεται αἷμα, οὐδὲ πηγνυται τελευτώντων. Ἐκ δὲ τοῦ κοίλου τῶν νεφρῶν φέρουσι πόροι ἄναιμοι εἰς τὴν κύστιν δύο νεανικοί, ἐξ ἑκατέρου εἷς, καὶ ἄλλοι ἐκ τῆς ἀορτῆς ἰσχυροὶ καὶ συνεχεῖς. Ταῦτα δ' ἔχει τὸν τρόπον τοῦτον, ὅπως ἐκ μὲν τῆς φλεβὸς τὸ περίττωμα τῆς ὑγρότητος βαδίξῃ εἰς τοὺς νεφρούς, ἐκ δὲ τῶν νεφρῶν ἡ γιγνομένη ὑπόστασις διηθουμένων τῶν ὑγρῶν διὰ τοῦ σώματος τῶν νεφρῶν εἰς τὸ μέσον συρρέῃ, οὗ τὸ κοῖλον οἱ πλεῖστοι ἔχουσιν αὐτῶν· διὸ καὶ δυσωδέστατον τοῦτο τῶν σπλάγγνων ἐστίν. Ἐκ δὲ τοῦ μέσου διὰ τούτων τῶν πόρων εἰς τὴν κύστιν ἡδὴ μᾶλλον ὥς περίττωμα ἀποκρίνεται. Καθώρμισται δ' ἡ κύστις ἐκ τῶν νεφρῶν· τείνουσι γάρ, ὥσπερ εἴρηται, πόροι ἰσχυροὶ πρὸς αὐτήν· οἱ μὲν οὖν νεφροὶ διὰ ταύτας τὰς αἰτίας εἰσὶ, καὶ τὰς δυνάμεις ἔχουσι τὰς εἰρημένας.

Ἐν πᾶσι δὲ τοῖς ἔχουσι νεφροὺς ὁ δεξιὸς ἀνωτέρω τοῦ ἀριστεροῦ ἐστίν· διὰ γὰρ τὸ τὴν κίνησιν εἶναι ἐκ τῶν δεξιῶν καὶ ἰσχυροτέραν διὰ ταῦτ' εἶναι τὴν φύσιν τὴν τῶν δεξιῶν, δεῖ προοδοποιήσασθαι διὰ τὴν κίνησιν πρὸς τὸ ἄνω πάντα τὰ μόρια μᾶλλον, ἐπεὶ καὶ τὴν ὀφρὺν τὴν δεξιὰν αἵρουσι μᾶλλον καὶ ἐπικεκαμμένην ἔχουσι τῆς ἀριστερᾶς μᾶλλον. Καὶ διὰ τὸ ἀνεσπᾶσθαι ἀνώτερον τὸν δεξιὸν νεφρὸν τὸ ἦπαρ ἄπτεται τοῦ δεξιοῦ νεφροῦ ἐν πᾶσιν· ἐν τοῖς δεξιοῖς γὰρ τὸ ἦπαρ.

(672a.) Ἐχουσι δ' οἱ νεφροὶ μάλιστα τῶν σπλάγχων πιμελὴν, ἐξ ἀνάγκης μὲν διὰ τὸ διηθεῖσθαι τὸ περίττωμα διὰ τῶν νεφρῶν· τὸ γὰρ λειπόμενον αἷμα καθαρὸν ὃν εὐπεπτὸν ἐστί, τέλος δ' εὐπενσίας αἱματικῆς πιμελὴ καὶ στέαρ ἐστίν.

Ὡσπερ γὰρ ἐν τοῖς πεπυρωμένοις ξηροῖς, οἷον τῇ τέφρᾳ, ἐγκαταλείπεται τι πῦρ, οὕτω καὶ ἐν τοῖς πεπεμμένοις ὑγροῖς· ἐγκαταλείπεται γάρ τι τῆς εἰργασμένης θερμότητος μόριον. Διόπερ τὸ λιπαρὸν κοῦφόν ἐστί καὶ ἐπιτολάζει ἐν τοῖς ὑγροῖς. Ἐν αὐτοῖς μὲν οὖν οὐ γίνεται τοῖς νεφροῖς διὰ τὸ πυκνὸν εἶναι τὸ σπλάγχον, ἔξω δὲ περιίσταται πιμελὴ μὲν ἐν τοῖς πιμελώδεσιν, στέαρ δ' ἐν τοῖς στεατώδεσιν· ἡ δὲ διαφορὰ τούτων εἴρηται πρότερον ἐν ἑτέροις. Ἐξ ἀνάγκης μὲν οὖν πιμελώδεις γίνονται διὰ ταύτην τὴν αἰτίαν ἐκ τῶν συμβαινόντων ἐξ ἀνάγκης τοῖς ἔχουσι νεφροὺς, ἔνεκα δὲ σωτηρίας καὶ τοῦ θερμὴν εἶναι τὴν φύσιν τὴν τῶν νεφρῶν.

Ἐσχατοὶ τε γὰρ ὄντες ἀλέας δέονται πλείονος· τὸ μὲν γὰρ νῶτον σαρκῶδές ἐστιν, ὅπως ἢ προβολὴ τοῖς περὶ τὴν καρδίαν σπλάγχνοις, ἢ δ' ὁσφὺς ἄσαρκος (ἄσαρκοι γὰρ αἱ καμπαὶ πάντων)· ἀντὶ σαρκὸς οὖν ἢ πιμελὴ πρόβλημα γίνεται τοῖς νεφροῖς. Ἐτι δὲ διακρίνουσι καὶ πέττουσι τὴν ὑγρότητα μᾶλλον πίονες ὄντες· τὸ γὰρ λιπαρὸν θερμόν, πέττει δ' ἡ θερμότης. Διὰ ταύτας μὲν οὖν τὰς αἰτίας οἱ νεφροὶ πιμελώδεις εἰσίν, ἐν πᾶσι δὲ τοῖς ζώοις ὁ δεξιὸς ἀπιμελώτερός ἐστιν. Αἴτιον δὲ τὸ τὴν φύσιν ξηρὰν εἶναι τὴν τῶν δεξιῶν καὶ κινητικωτέραν· ἢ δὲ κίνησις ἐναντία· τήκει γὰρ τὸ πῖον μᾶλλον. Τοῖς μὲν οὖν ἄλλοις ζώοις συμφέρει τε τοὺς νεφροὺς ἔχειν πίονας, καὶ πολλάκις ἔχουσιν ὅλους περίπλεως· τὸ δὲ πρόβατον ὅταν τοῦτο πάθῃ, ἀποθνήσκει. Ἄλλ' ἂν καὶ πάνυ πίονες ᾖσιν, ὅμως ἐλλείπει τι, ἂν μὴ κατ' ἀμφοτέρους, ἀλλὰ κατὰ τὸν δεξιόν. Αἴτιον δὲ τοῦ μόνον ἢ μάλιστα τοῦτο συμβαίνειν ἐπὶ τῶν προβάτων, ὅτι τοῖς μὲν πιμελώδεσιν ὑγρὸν τὸ πῖον, ὥστ' οὐχ ὁμοίως ἐγκατακλειόμενα τὰ πνεύματα ποιεῖ τὸν πόνον. Τοῦ δὲ σφακελισμοῦ τοῦτ' αἰτίον ἐστίν·

διὸ καὶ τῶν ἀνθρώπων τοῖς πονοῦσι τοὺς νεφροὺς, καίπερ τοῦ
πιαίνεσθαι συμφέροντος, ὅμως ἂν λίαν γίνονται πίονες, ὀδύνην
θανατηφόροι συμβαίνουσιν. Τῶν δ' ἄλλων τοῖς (672b.) στεατώδεσιν
ἦττον πυκνὸν τὸ στέαρ ἢ τοῖς προβάτοις.

Καὶ τῷ πλήθει πολὺ τὰ πρόβατα ὑπερβάλλει· γίνεται γὰρ
περίνεφρα τάχιστα τῶν ζώων τὰ πρόβατα πάντων.
Ἐγκατακλειομένης οὖν τῆς ὑγρότητος καὶ τῶν πνευμάτων διὰ τὸν
σφακελισμὸν ἀναιροῦνται ταχέως· διὰ γὰρ τῆς ἀορτῆς καὶ τῆς
φλεβὸς εὐθὺς ἀπαντᾷ τὸ πάθος πρὸς τὴν καρδίαν· οἱ δὲ πόροι
συνεχεῖς ἀπὸ τούτων τῶν φλεβῶν εἰσι πρὸς τοὺς νεφροὺς.

Κεφάλαιο 10

Περὶ μὲν οὖν τῆς καρδίας καὶ πλεύμονος εἴρηται, καὶ περὶ ἥπατος καὶ σπληνὸς καὶ νεφρῶν.

Τυγχάνει δὲ ταῦτα κεχωρισμένα ἀλλήλων τῷ διαζώματι. Τοῦτο δὲ τὸ διάζωμα καλοῦσιν τινες φρένας· ὁ διορίζει τὸν τε πλεύμονα καὶ τὴν καρδίαν. Καλεῖται δὲ τοῦτο τὸ διάζωμα ἐν τοῖς ἐναίμοις, ὥσπερ καὶ εἴρηται, φρένες. Ἔχει δὲ πάντα τὰ ἔναιμα αὐτό, καθάπερ καρδίαν καὶ ἥπαρ. Τούτου δ' αἴτιον ὅτι τοῦ διορισμοῦ χάριν ἐστὶ τοῦ τε περὶ τὴν κοιλίαν τόπου καὶ τοῦ περὶ τὴν καρδίαν, ὅπως ἢ τῆς αἰσθητικῆς ψυχῆς ἀρχὴ ἀπαθὴς ἢ καὶ μὴ ταχὺ καταλαμβάνηται διὰ τὴν ἀπὸ τῆς τροφῆς γινομένην ἀναθυμίασιν καὶ τὸ πλῆθος τῆς ἐπεισάκτου θερμότητος. Ἐπὶ γὰρ τοῦτο διέλαβεν ἡ φύσις, οἷον παροικοδόμημα ποιήσασα καὶ φραγμὸν τὰς φρένας, καὶ διεῖλε τό τε τιμιώτερον καὶ τὸ ἀτιμιώτερον, ἐν ὅσοις ἐνδέχεται διελεῖν τὸ ἄνω καὶ κάτω· τὸ μὲν γὰρ ἄνω ἐστὶν οὗ ἕνεκεν καὶ βέλτιον, τὸ δὲ κάτω τὸ τούτου ἕνεκεν καὶ ἀναγκαῖον, τὸ τῆς τροφῆς δεκτικόν. Ἔστι δὲ τὸ διάζωμα πρὸς μὲν τὰς πλευρὰς σαρκωδέστερον καὶ ἰσχυρότερον, κατὰ μέσον δ' ὑμενωδέστερον· οὕτω γὰρ πρὸς τὴν ἰσχὺν καὶ τὴν τάσιν χρησιμώτερον. Διότι δὲ πρὸς τὴν θερμότητα τὴν κάτωθεν οἷον παραφυάδες εἰσὶ, σημεῖον ἐκ τῶν συμβαινόντων· ὅταν γὰρ διὰ τὴν γειτνίασιν ἐλκύσωσιν ὑγρότητα θερμὴν καὶ περιττωματικὴν, εὐθὺς ἐπιδήλως ταράττει τὴν διάνοιαν καὶ τὴν αἴσθησιν, διὸ καὶ καλοῦνται φρένες ὡς μετέχουσαι τι τοῦ φρονεῖν. Αἱ δὲ μετέχουσι μὲν οὐδέν, ἐγγὺς δ' οὔσαι τῶν μετεχόντων ἐπίδηλον ποιοῦσι τὴν μεταβολὴν τῆς διανοίας. Διὸ καὶ λεπταὶ κατὰ μέσον εἰσίν, οὐ μόνον ἐξ ἀνάγκης, ὅτι σαρκώδεις οὔσας τὰ πρὸς τὰς πλευρὰς ἀναγκαῖον εἶναι σαρκωδεστέρας, ἀλλ' ἵν' ὅτι ὀλιγίστης μετέχωσιν ἰκμάδος· σαρκώδεις γὰρ ἂν οὔσαι (673a.) καὶ εἶχον καὶ εἶλκον μᾶλλον ἰκμάδα πολλήν.

Ὅτι δὲ θερμαινόμεναι ταχέως ἐπίδηλον ποιοῦσι τὴν αἴσθησιν, σημαίνει καὶ τὸ περὶ τοὺς γέλωτας συμβαῖνον. Γαργαλιζόμενοί τε γὰρ ταχὺ γελῶσι, διὰ τὸ τὴν κίνησιν ἀφικνεῖσθαι ταχὺ πρὸς τὸν τόπον τοῦτον, θερμαίνουσιν δ' ἡρέμα, ποιεῖν ὁμως ἐπίδηλον καὶ κινεῖν τὴν διάνοιαν παρὰ τὴν προαίρεσιν.

Τοῦ δὲ γαργαλιζεσθαι μόνον ἄνθρωπον αἴτιον ἢ τε λεπτότης τοῦ

δέρματος καὶ τὸ μόνον γελᾶν τῶν ζώων ἄνθρωπον. Ὁ δὲ γαργαλισμὸς γέλως ἐστὶ διὰ κινήσεως τοιαύτης τοῦ μορίου τοῦ περὶ τὴν μασχάλην. Συμβαίνειν δέ φασι καὶ περὶ τὰς ἐν τοῖς πολέμοις πληγὰς εἰς τὸν τόπον τὸν περὶ τὰς φρένας γέλωτα διὰ τὴν ἐκ τῆς πληγῆς γινομένην θερμότητα. Τοῦτο γὰρ μᾶλλον ἐστὶν ἀξιοπίστων ἀκοῦσαι λεγόντων ἢ τὸ περὶ τὴν κεφαλὴν, ὡς ἀποκοπεῖσα φθέγγεται τῶν ἀνθρώπων. Λέγουσι γάρ τινες ἐπαγόμενοι καὶ τὸν Ὅμηρον, ὡς διὰ τοῦτο ποιήσαντος· φθεγγομένη δ' ἄρα τοῦγε κάρη κονίησιν ἐμίχθη· ἀλλ' οὐ, φθεγγομένου. Περὶ δὲ Καρίαν οὕτω τὸ τοιοῦτον διεπίστευσαν ὥστε καὶ κρίσιν ἐποιήσαντο περὶ τινος τῶν ἐγχωρίων.

Τοῦ γὰρ ἱερέως τοῦ Ὀπλοσμίου Διὸς ἀποθανόντος, ὅφ' ὅτου δὲ δὴ ἀδήλως, ἔφασάν τινες ἀκοῦσαι τῆς κεφαλῆς ἀποκεκομμένης λεγούσης πολλάκις· ἐπ' ἀνδρὸς ἄνδρα Κερκιδᾶς ἀπέκτεινεν. Διὸ καὶ ζητήσαντες ὃ ὄνομα ἦν ἐν τῷ τόπῳ Κερκιδᾶς, ἔκριναν. Ἀδύνατον δὲ φθέγγεσθαι κεχωρισμένης τῆς ἀρτηρίας, καὶ ἄνευ τῆς ἐκ τοῦ πλεύμονος κινήσεως. Παρά τε τοῖς βαρβάροις, παρ' οἷς ἀποτέμνουσι ταχέως τὰς κεφαλὰς, οὐδὲν πῶ τοιοῦτον συμβέβηκεν. Ἔτι δ' ἐπὶ τῶν ἄλλων ζώων διὰ τίν' αἰτίαν οὐ γίνεται; Τὸ μὲν γὰρ τοῦ γέλωτος πληγείσων τῶν φρενῶν εἰκότως· οὐδὲν γὰρ γελᾷ τῶν ἄλλων. Προϊέναι δέ ποι τὸ σῶμα τῆς κεφαλῆς ἀφηρημένης οὐδὲν ἄλογον, ἐπεὶ τὰ γ' ἄναιμα καὶ ζῆ πολλὸν χρόνον· δεδήλωται δὲ περὶ τῆς αἰτίας αὐτῶν ἐν ἑτέροις.

Τίνος μὲν οὖν ἕνεκέν ἐστὶν ἕκαστον τῶν σπλάγχχνων, εἴρηται. Γέγονε δ' ἐξ ἀνάγκης ἐπὶ τοῖς ἐντὸς πέρασι τῶν φλεβῶν· ἐξίεναι τε γὰρ ἱκμάδα ἀναγκαῖον, καὶ ταύτην αἱματικήν, (673b.) ἐξ ἧς συνισταμένης καὶ πηγνυμένης γίνεσθαι τὸ σῶμα τῶν σπλάγχχνων. Διόπερ αἱματικά, καὶ αὐτοῖς μὲν ὁμοίαν ἔχουσι τὴν τοῦ σώματος φύσιν, τοῖς δ' ἄλλοις ἀνομοίαν.

Κεφάλαιο 11

Πάντα δὲ τὰ σπλάγχνα ἐν ὑμένι ἐστίν· προβολῆς τε γὰρ δεῖ πρὸς τὸ ἀπαθῆ εἶναι, καὶ ταύτης ἐλαφρᾶς, ὁ δ' ὑμὴν τὴν φύσιν τοιοῦτος· πυκνὸς μὲν γὰρ ὥστ' ἀποστέγειν, ἄσαρκος δὲ ὥστε μὴ ἔλκειν μηδ' ἔχειν ἱκμάδα, λεπτὸς δ', ὅπως κοῦφος ἦ καὶ μηδὲν ποιῇ βάρος. Μέγιστοι δὲ καὶ ἰσχυρότατοι τῶν ὑμένων εἰσὶν οἱ τε περὶ τὴν καρδίαν καὶ περὶ τὸν ἐγκέφαλον, εὐλόγως· ταῦτα γὰρ δεῖται πλείστης φυλακῆς. Ἡ μὲν γὰρ φυλακὴ περὶ τὰ κύρια, ταῦτα δὲ κύρια μάλιστα τῆς ζωῆς.

Κεφάλαιο 12

Ἔχουσι δ' ἓνια μὲν τῶν ζώων πάντα τὸν ἀριθμὸν αὐτῶν, ἓνια δ' οὐ πάντα· ποῖα δὲ ταῦτα καὶ διὰ τίν' αἰτίαν, εἴρηται πρότερον. Καὶ τῶν ἐχόντων δὲ ταῦτα διαφέρουσιν· οὐ γὰρ ὁμοίας οὔτε τὰς καρδίας ἔχουσι πάντα τὰ ἔχοντα καρδίαν, οὔτε τῶν ἄλλων ὡς εἰπεῖν οὐδέν.

Τὸ τε γὰρ ἦπαρ τοῖς μὲν πολυσχιδῆς ἐστὶ, τοῖς δὲ μονοφυέστερον, πρῶτον αὐτῶν τῶν ἐναίμων καὶ ζωοτόκων· ἔτι δὲ μᾶλλον καὶ πρὸς ταῦτα καὶ πρὸς ἄλληλα διαφέρει τά τε τῶν ἰχθύων καὶ τῶν τετραπόδων καὶ ψοτόκων. Τὸ δὲ τῶν ὀρνίθων μάλιστα προσεμφερές τῳ τῶν ζωοτόκων ἐστὶν ἦπατι· καθαρὸν γὰρ καὶ ἔναιμον τὸ χρῶμα αὐτῶν ἐστὶ καθάπερ κἀκείνων.

Αἷτιον δὲ τὸ τὰ σώματα τούτων εὐπνούστατα εἶναι καὶ μὴ πολλὴν ἔχειν φαύλην περίττωσιν. Διόπερ ἓνια καὶ οὐκ ἔχει χολὴν τῶν ζωοτόκων· τὸ γὰρ ἦπαρ συμβάλλεται πολὺ μέρος πρὸς εὐκρασίαν τοῦ σώματος καὶ ὑγίειαν· ἐν μὲν γὰρ τῷ αἵματι μάλιστα τὸ τούτων τέλος, τὸ δ' ἦπαρ αἱματικώτατον μετὰ τὴν καρδίαν τῶν σπλάγχχνων. Τὰ δὲ τῶν τετραπόδων καὶ ψοτόκων καὶ τῶν ἰχθύων ἔνωχρα τῶν πλείστων, ἐνίων δὲ καὶ φαῦλα παντελῶς, ὥσπερ καὶ τὰ σώματα φαύλης τετύχηκε κράσεως, οἷον φρύνης καὶ χελώνης καὶ τῶν ἄλλων τῶν τοιούτων.

Σπλήνα δ' ἔχει τὰ μὲν κερατοφόρα καὶ διχαλὰ στρογγύλον, καθάπερ αἰῖξ καὶ πρόβατον καὶ τῶν ἄλλων ἕκαστον, εἰ μὴ τι διὰ μέγεθος εὐανξέστερον ἔχει κατὰ μῆκος, οἷον ὁ τοῦ βοῦς (674a.) πέπονθεν· τὰ δὲ πολυσχιδῆ πάντα μακρόν, οἷον ὅς καὶ ἄνθρωπος καὶ κύων, τὰ δὲ μώνυχα μετὰ τούτων καὶ μικτόν· τῇ μὲν γὰρ πλατὺν ἔχει τῇ δὲ στενόν, οἷον ἵππος καὶ ὄρευς καὶ ὄνος.

Κεφάλαιο 13

Οὐ μόνον δὲ διαφέρει τὰ σπλάγχνα τῆς σαρκὸς τῷ ὄγκῳ τοῦ σώματος, ἀλλὰ καὶ τῷ τὴν μὲν ἔξω τὰ δ' ἔσω τὴν θέσιν ἔχειν. Αἴτιον δ' ὅτι τὴν φύσιν ἔχει κοινωνοῦσαν ταῖς φλεψί, καὶ τὰ μὲν τῶν φλεβῶν χάριν, τὰ δ' οὐκ ἄνευ φλεβῶν ἐστίν.

Κεφάλαιο 14

Ὑπὸ δὲ τὸ ὑπόζωμα κεῖται ἡ κοιλία τοῖς ζώοις, τοῖς μὲν ἔχουσιν οἰσοφάγον ἢ τελευτᾷ τοῦτο τὸ μόριον, τοῖς δὲ μὴ ἔχουσιν εὐθὺς πρὸς τῷ στόματι· τῆς δὲ κοιλίας ἐχόμενον τὸ καλούμενον ἔντερον. Δι' ἣν δ' αἰτίαν ἔχει ταῦτα τὰ μόρια τῶν ζώων ἕκαστον, φανερόν πασιν. Καὶ γὰρ δέξασθαι τὴν εἰσελθοῦσαν τροφήν καὶ τὴν ἐξικμασμένην ἀναγκαῖον ἐκπέμψαι, καὶ μὴ τὸν αὐτὸν τόπον εἶναι τῆς τε ἀπέπτου καὶ τοῦ περιττώματος, εἶναι τέ τινα δεῖ τόπον ἐν ᾧ μεταβάλλει. Τὸ μὲν γὰρ τὴν εἰσελθοῦσαν ἔξει μόριον, τὸ δὲ τὸ περιττώμα τὸ ἄχρηστον· ὥσπερ δὲ χρόνος ἕτερος ἐκατέρου τούτων, ἀναγκαῖον διειληῖσθαι καὶ τοῖς τόποις. Ἀλλὰ περὶ μὲν τούτων ἐν τοῖς περὶ τὴν γένεσιν καὶ τὴν τροφήν οἰκειότερός ἐστιν ὁ διορισμός· περὶ δὲ τῆς διαφορᾶς τῆς κοιλίας καὶ τῶν συντελῶν μορίων νῦν ἐπισκεπτέον. Οὐτε γὰρ τοῖς μεγέθεσιν οὐτε τοῖς εἶδεσιν ὁμοίας ἔχουσιν ἀλλήλοις τὰ ζῷα. Ἀλλ' ὅσα μὲν ἐστὶν αὐτῶν ἀμφώδοντα τῶν ἐναίμων καὶ τῶν ζωοτόκων, μίαν ἔχει κοιλίαν, οἷον ἄνθρωπος καὶ κύων καὶ λέων καὶ τᾶλλα ὅσα πολυδάκτυλα, καὶ ὅσα μώνυχα, οἷον ἵππος ὀρεὺς ὄνος, καὶ ὅσα διχαλὰ μὲν ἀμφώδοντα δέ, οἷον ὕς, πλὴν εἰ μὴ τι διὰ μέγεθος τοῦ σώματος καὶ τὴν τῆς τροφῆς δύναμιν, οὐσαν οὐκ εὐπεπτον ἀλλ' ἀκανθώδη καὶ ξυλικήν, ἔχει πλείους, οἷον κάμηλος, ὥσπερ καὶ τὰ κερατοφόρα.

Τὰ γὰρ κερατοφόρα οὐκ ἔστιν ἀμφώδοντα· διὰ τοῦτο δὲ καὶ ἡ κάμηλος οὐ τῶν ἀμφωδόντων ἐστίν, ἀκέρατος οὖσα, διὰ τὸ ἀναγκαιότερον εἶναι αὐτῇ τὴν κοιλίαν ἔχειν τοιαύτην ἢ τοὺς προσθίους ὀδόντας. Ὡστ' ἐπεὶ ταύτην ὁμοίαν ἔχει (674b.) τοῖς μὴ ἀμφώδουσι, καὶ τὰ περὶ τοὺς ὀδόντας ὁμοίως ἔχει αὐτῇ, ὥς οὐδὲν ὄντας προέργου. Ἄμα δὲ καὶ ἐπεὶ ἡ τροφή ἀκανθώδης, τὴν δὲ γλῶτταν ἀνάγκη σαρκώδη εἶναι, πρὸς σκληρότητα τοῦ οὐρανοῦ κατακέχρηται τῷ ἐκ τῶν ὀδόντων γεῶδει ἢ φύσει. Καὶ μηρυκάζει δ' ἡ κάμηλος ὥσπερ τὰ κερατοφόρα, διὰ τὸ τὰς κοιλίας ὁμοίας ἔχειν τοῖς κερατοφόροις. Τούτων δ' ἕκαστον πλείους ἔχει κοιλίας, οἷον πρόβατον βοῦς αἰξ ἔλαφος καὶ τᾶλλα τὰ τοιαῦτα τῶν ζώων, ὅπως ἐπειδὴ τῆς ἐργασίας ἐλλείπει περὶ τὴν τροφήν ἢ λειτουργία ἢ τοῦ στόματος διὰ τὴν ἔνδειαν τῶν ὀδόντων, ἢ τῶν κοιλιῶν ἑτέρα πρὸς ἑτέρας δεχομένη τὴν τροφήν, ἢ μὲν ἀκατέργαστον, ἢ δὲ

κατειργασμένην μάλλον, ἢ δὲ πάμπαν, ἢ δὲ λείαν. Διὸ τὰ τοιαῦτα τῶν ζώων πλείους ἔχει τόπους καὶ μόρια. Καλοῦνται δὲ ταῦτα κοιλία καὶ κεκρύφαλος καὶ ἐχῖνος καὶ ἥνυστρον. Ὅν δ' ἔχει τρόπον ταῦτα πρὸς ἀλλήλα τῇ θέσει καὶ τοῖς εἶδεσιν, ἕκ τε τῆς ἱστορίας τῆς περὶ τὰ ζῶα δεῖ θεωρεῖν, καὶ ἕκ τῶν ἀνατομῶν.

Διὰ τὴν αὐτὴν δ' αἰτίαν καὶ τὸ τῶν ὀρνίθων γένος ἔχει διαφορὰν περὶ τὸ τῆς τροφῆς δεκτικὸν μόριον. Ἐπεὶ γὰρ οὐδὲ ταῦτα ὅλως τὴν τοῦ στόματος ἀποδίδωσι λειτουργίαν (ἀνόδοντα γάρ) καὶ οὔτε ᾧ διαιρήσει, οὔτε ᾧ λεανεῖ τὴν τροφήν ἔχουσι, διὰ τοῦτο τὰ μὲν πρὸ τῆς κοιλίας ἔχουσι τὸν καλούμενον πρόλοβον ἀντὶ τῆς τοῦ στόματος ἐργασίας, οἱ δὲ τὸν οἰσοφάγον πλατύν, ἢ πρὸ τῆς κοιλίας αὐτοῦ μέρος τι ὀγκῶδες ἐν ᾧ προθησαυρίζουσι τὴν ἀκατέργαστον τροφήν, ἢ τῆς κοιλίας αὐτῆς τι ἐπανεστηκός, οἱ δ' αὐτὴν τὴν κοιλίαν ἰσχυρὰν καὶ σαρκώδη πρὸς τὸ δύνασθαι πολὺν χρόνον θησαυρίζειν καὶ πέττειν ἀλείαντον οὔσαν τὴν τροφήν· τῇ δυνάμει γὰρ καὶ τῇ θερμότητι τῆς κοιλίας ἡ φύσις ἀναλαμβάνει τὴν τοῦ στόματος ἔνδειαν. Εἰσὶ δὲ τινες οἱ τούτων οὐδὲν ἔχουσιν, ἀλλὰ τὸν πρόλοβον μακρόν, ὅσα μακροσκελῆ καὶ ἔλεια, διὰ τὴν τῆς τροφῆς ὑγρότητα. Αἴτιον δ' ὅτι ἡ τροφή πᾶσι τούτοις εὐλέαντος, ὥστε συμβαίνειν διὰ ταῦτα τῶν τοιούτων τὰς κοιλίας εἶναι ὑγρὰς διὰ τὴν ἀπενίαν καὶ τὴν τροφήν.

(675a.) Τὸ δὲ τῶν ἰχθύων γένος ἔχει μὲν ὀδόντας, τούτους δὲ καρχαρόδοντας σχεδὸν ὡς εἰπεῖν πάντας· ὀλίγον γὰρ τί ἐστὶ γένος τὸ μὴ τοιοῦτον, οἷον ὁ καλούμενος σκάρος, ὃς δὴ καὶ δοκεῖ μηρυκάζειν εὐλόγως διὰ ταῦτα μόνος· καὶ γὰρ τὰ μὴ ἀμφώδοντα κερατοφόρα δὲ μηρυκάζει. Ὅξεῖς δὲ πάντες ἔχουσιν, ὥστε διελεῖν μὲν δύνανται, φαύλως δὲ διελεῖν· ἐνδιατρίβειν γὰρ οὐχ οἷόν τε χρονίζοντας. Διόπερ οὐδὲ πλατεῖς ἔχουσιν ὀδόντας, οὐδ' ἐνδέχεται λεαίνειν· μάτην ἂν οὖν εἶχον. Ἔτι δὲ στόμαχον οἱ μὲν ὅλως οὐκ ἔχουσιν, οἱ δὲ βραχύν. Ἀλλὰ πρὸς τὴν βοήθειαν τῆς πέψεως οἱ μὲν ὀρνιθῶδεις ἔχουσι τὰς κοιλίας καὶ σαρκώδεις, οἷον κεστρεῦς, οἱ δὲ πολλοὶ παρὰ τὴν κοιλίαν ἀποφυάδας πυκνάς, ἵν' ἐν ταύταις ὥσπερ ἐν προλακκίοις θησαυρίζοντες συσσήπωσι καὶ πέττωσι τὴν τροφήν. Ἐχουσι δ' ἐναντίως οἱ ἰχθύες τοῖς ὀρνίσι τὰς ἀποφυάδας· οἱ μὲν γὰρ ἰχθύες ἄνω πρὸς τῇ κοιλίᾳ, τῶν δ' ὀρνίθων οἱ ἔχοντες ἀποφυάδας κάτω πρὸς τῷ τέλει τοῦ ἐντέρου. Ἐχουσι δ' ἀποφυάδας ἕνια καὶ τῶν ζωοτόκων ἐντερικὰς κάτω διὰ τὴν αὐτὴν αἰτίαν. Τὸ δὲ τῶν ἰχθύων γένος ἅπαν,

διὰ τὸ ἐνδεεστέρως ἔχειν τὰ περὶ τὴν τῆς τροφῆς ἐργασίαν, ἀλλ' ἄπεπτα διαχωρεῖν, λαίμαργον πρὸς τὴν τροφήν ἐστι, καὶ τῶν ἄλλων δὲ πάντων ὅσα εὐθυέντερα· ταχείας γὰρ γινομένης τῆς διαχωρήσεως, καὶ διὰ ταῦτα βραχείας οὐσης τῆς ἀπολαύσεως, ταχεῖαν ἀναγκαῖον γίνεσθαι πάλιν καὶ τὴν ἐπιθυμίαν. Τὰ δ' ἀμφώδοντα ὅτι μὲν μικρὰν ἔχει κοιλίαν, εἴρηται πρότερον, εἰς διαφορὰς δὲ πίπτουσι δύο πᾶσαι σχεδόν· τὰ μὲν γὰρ τῇ τῆς κυνὸς ὁμοίαν ἔχουσι κοιλίαν, τὰ δὲ τῇ τῆς ὑὸς· ἔστι δὲ ἡ μὲν τῆς ὑὸς μείζων καὶ τινὰς ἔχουσα μετρίας πλάκας πρὸς τὸ χρονιωτέραν γίνεσθαι τὴν πέψιν, ἡ δὲ τῆς κυνὸς μικρὰ τὸ μέγεθος καὶ οὐ πολὺ τοῦ ἐντέρου ὑπερβάλλουσα καὶ λεία τὰ ἐντός.

Μετὰ δὲ τὴν κοιλίαν ἡ τῶν ἐντέρων ἔγκειται φύσις πᾶσι τοῖς ζώοις. Ἐχει δὲ διαφορὰς πολλὰς, καθάπερ ἡ κοιλία, καὶ τοῦτο τὸ μόριον. Τοῖς μὲν γὰρ ἀπλοῦν ἐστι καὶ ὅμοιον ἀναλυόμενον, τοῖς δ' ἀνόμοιον· ἐνίοις μὲν γὰρ εὐρύτερον τὸ πρὸς τῇ κοιλίᾳ, τὸ δὲ πρὸς τῷ τέλει στενώτερον (διόπερ αἱ κύνες μετὰ πόνου προΐενται τὴν τοιαύτην περίττωσιν), τοῖς (675b.) δὲ πλείοσιν ἄνωθεν στενώτερον, πρὸς τῷ τέλει δ' εὐρύτερον. Μείζω δὲ καὶ ἀναδιπλώσεις ἔχοντα πολλὰς τὰ τῶν κερατοφόρων ἐστί, καὶ οἱ ὄγκοι τῆς κοιλίας τούτοις μείζους καὶ τῶν ἐντέρων διὰ τὸ μέγεθος· πάντα γὰρ ὥς εἰπεῖν μεγάλα τὰ κερατοφόρα διὰ τὴν κατεργασίαν τὴν τῆς τροφῆς. Πᾶσι δὲ τοῖς μὴ εὐθυεντέροις προΐοῦσιν εὐρύτερον γίνεται τὸ μόριον τοῦτο, καὶ τὸ καλούμενον κόλον ἔχουσι, καὶ τοῦ ἐντέρου τυφλὸν τι καὶ ὀγκῶδες, εἴτ' ἐκ τούτου πάλιν στενώτερον καὶ εἰλιγμένον. Τὸ δὲ μετὰ τοῦτο εὐθὺ πρὸς τὴν ἔξοδον διατείνει τοῦ περιττώματος, καὶ τοῖς μὲν τοῦτο τὸ μόριον, ὁ καλούμενος ἀρχός, κνισσώδης ἐστί, τοῖς δ' ἀπίμελος.

Πάντα δὲ ταῦτα μεμηχάνηται τῇ φύσει πρὸς τὰς ἀρμοττοῦσας ἐργασίας περὶ τὴν τροφήν καὶ τοῦ γινομένου περιττώματος. Προϊόντι γὰρ καὶ καταβαίνοντι τῷ περιττώματι εὐρυχωρία γίνεται, καὶ πρὸς τὸ μεταβάλλειν ἱσταμένῳ τοῖς εὐχιλοτέροις τῶν ζώων καὶ πλείονος δεομένοις τροφῆς, διὰ τὸ μέγεθος ἢ τὴν θερμότητα τῶν τόπων. Εἴτ' ἐντεῦθεν πάλιν, ὥσπερ ἀπὸ τῆς ἄνω κοιλίας δέχεται στενώτερον ἔντερον, οὕτως ἐκ τοῦ κόλου καὶ τῆς εὐρυχωρίας ἐν τῇ κάτω κοιλίᾳ πάλιν εἰς στενώτερον ἔρχεται καὶ εἰς τὴν ἔλικα τὸ περίττωμα ἐξικμασμένον πάμπαν, ὅπως ταμιεύηται ἢ φύσις καὶ μὴ ἄθροός ἢ ἡ ἔξοδος τοῦ περιττώματος. Ὅσα μὲν οὖν εἶναι δεῖ τῶν ζώων σωφρονέστερα πρὸς τὴν τῆς τροφῆς ποιήσιν εὐρυχωρίας μὲν οὐκ ἔχει μεγάλας κατὰ τὴν κάτω κοιλίαν, ἔλικας δ' ἔχει πλείους καὶ οὐκ

εὐθυέντερά ἐστιν. Ἡ μὲν γὰρ εὐρυχωρία ποιεῖ πλήθους ἐπιθυμίαν, ἡ δ' εὐθύτης ταχυτῆτα ἐπιθυμίας· διόπερ ὅσα τῶν ζώων ἢ ἀπλᾶς ἔχει ἢ εὐρυχώρους τὰς ὑποδοχάς, τὰ μὲν εἰς πλῆθος γαστρίμαργα τὰ δ' εἰς τάχος ἐστίν. Ἐπεὶ δ' ἐν τῇ ἄνω μὲν κοιλίᾳ κατὰ τὴν πρώτην εἵσοδον τῆς τροφῆς νεαρὰν ἀναγκαῖον εἶναι τὴν τροφήν, κάτω δὲ προϊοῦσαν κοπρώδη καὶ ἐξικμασμένην, ἀναγκαῖον εἶναι τι καὶ τὸ μεταξὺ, ἐν ᾧ μεταβάλλει καὶ οὗτ' ἔτι πρόσφατος οὗτ' ἤδη κόπρος.

Διὰ τοῦτο πάντα τὰ τοιαῦτα ζῷα τὴν καλουμένην ἔχει νῆστιν καὶ ἐν τῷ μετὰ τὴν κοιλίαν ἐντέρω τῷ λεπτῷ· τοῦτο γὰρ μεταξὺ τῆς τ' ἄνω, ἐν ἧ τὸ ἄπεπτον, καὶ τῆς κάτω, ἐν ἧ τὸ ἄχρηστον ἤδη περίττωμα. Γίνεται δ' ἐν πᾶσι μὲν, δῆλη δ' (676a.) ἐν τοῖς μείζοσι καὶ νηστεύσασιν ἄλλ' οὐκ ἐδηδοκόσιν.

Τότε γὰρ ἤδη μεταίχμιον γίνεται τῶν τόπων ἀμφοτέρων, ἐδηδοκότων δὲ μικρὸς ὁ καιρὸς τῆς μεταβολῆς. Τοῖς μὲν οὖν θήλεσι γίνεται ὅπου ἂν τύχῃ τοῦ ἄνω ἐντέρου ἢ νῆστις· οἱ δ' ἄρρενες ἔχουσι πρὸ τοῦ τυφλοῦ καὶ τῆς κάτω κοιλίας.

Κεφάλαιο 15

Ἔχουσι δὲ τὴν καλουμένην πυετίαν τὰ μὲν πολυκοιλία πάντα, τῶν δὲ μονοκοιλίων δασύπους. Ἔχει δὲ τὰ ἔχοντα τῶν πολυκοιλίων τὴν πυετίαν οὐτ' ἐν τῇ μεγάλῃ κοιλίᾳ οὐτ' ἐν τῷ κεκρυφάλῳ οὐτ' ἐν τῷ τελευταίῳ τῷ ἡνύστρῳ, ἀλλ' ἐν τῷ μεταξὺ τοῦ τελευταίου καὶ δύο τῶν πρώτων, ἐν τῷ καλουμένῳ ἐχίνῳ. Ἔχει δὲ ταῦτα πάντα πυετίαν διὰ τὴν παχύτητα τοῦ γάλακτος· τὰ δὲ μονοκοιλία οὐκ ἔχει, λεπτὸν γὰρ τὸ γάλα τῶν μονοκοιλίων. Διὸ τῶν μὲν κερατοφόρων πηγνυται, τῶν δ' ἀκεράτων οὐ πηγνυται τὸ γάλα. Τῷ δὲ δασύποδι γίνεταί πυετία διὰ τὸ νέμεσθαι ὁπώδη πόαν· ὁ γὰρ τοιοῦτος χυμὸς συνίστησιν ἐν τῇ κοιλίᾳ τὸ γάλα τοῖς ἐμβρύοις. Διότι δὲ τῶν πολυκοιλίων ἐν τῷ ἐχίνῳ γίνεται ἡ πυετία, εἴρηται [ἐν τοῖς προβλήμασιν].

Κεφάλαιο 1

Τὸν αὐτὸν δὲ τρόπον ἔχει τὰ περὶ τὰ σπλάγχνα καὶ τὴν κοιλίαν καὶ τῶν εἰρημένων μορίων ἕκαστον τοῖς τετράποσι μὲν ὥτοκόις δὲ τῶν ζώων καὶ τοῖς ἄποσιν, οἷον τοῖς ὄφεσιν.

Καὶ γὰρ ἡ τῶν ὄφεων φύσις ἐστὶ συγγενῆς τούτοις· ὁμοία γάρ ἐστι σαύρῳ μακρῷ εἰ καὶ ἄποδι. Τούτοις δὲ καὶ τοῖς ἰχθύσι πάντα παραπλήσια, πλὴν τὰ μὲν ἔχει πλεύμονα διὰ τὸ πεζεύειν, οἱ δ' οὐκ ἔχουσιν, ἀλλὰ βράγχια ἀντὶ τοῦ πλεύμονος. Κύστιν δὲ οὔτε οἱ ἰχθύες ἔχουσιν οὔτε τούτων οὐδὲν πλὴν χελώνης· τρέπεται γὰρ εἰς τὰς φολίδας τὸ ὕγρον ὀλιγοπότην ὄντων διὰ τὴν ἀναιμότητα τοῦ πλεύμονος, καθάπερ τοῖς ὄρνισιν εἰς τὰ πτερὰ. Καὶ ἐπιλευκαίνει δὲ τὸ περίττωμα πᾶσι καὶ τούτοις, ὥσπερ καὶ τοῖς ὄρνισιν· διόπερ ἐν τοῖς ἔχουσι κύστιν ἐξελθόντος τοῦ περιττώματος ὑφίσταται ἀλμυρὶς γεώδης ἐν τοῖς ἀγγείοις· τὸ γὰρ γλυκὺ καὶ ὀπίμον ἀναλίσκεται διὰ κουφότητα εἰς τὰς σάρκας. Τῶν δ' (676b.) ὄφεων οἱ ἔχεις πρὸς τοὺς ἄλλους ἔχουσι τὴν αὐτὴν διαφορὰν ἣν καὶ ἐν τοῖς ἰχθύσι τὰ σελάχη πρὸς τοὺς ἄλλους· ζωτοκοῦσι γὰρ ἔξω καὶ τὰ σελάχη καὶ οἱ ἔχεις, ἐν αὐτοῖς ὥτοκῆσαντα πρῶτον. Μονοκοιλία δὲ πάντα τὰ τοιαῦτά ἐστι, καθάπερ τᾶλλα τὰ ἀμφώδοντα· καὶ σπλάγχνα δὲ πάμπαν μικρὰ ἔχει, ὥσπερ τᾶλλα τὰ μὴ ἔχοντα κύστιν. Οἱ δ' ὄφεις διὰ τὴν τοῦ σώματος μορφήν, οὔσαν μακρὰν καὶ στενὴν, καὶ τὰ σχήματα τῶν σπλάγχνων ἔχουσι διὰ ταῦτα μακρὰ καὶ τοῖς τῶν ἄλλων ζώων ἀνόμοια, διὰ τὸ καθάπερ ἐν τύπῳ τὰ σχήματα αὐτῶν πλασθῆναι διὰ τὸν τόπον. Ἐπίπλοον δὲ καὶ μεσεντέριον καὶ τὰ περὶ τὴν τῶν ἐντέρων φύσιν, ἔτι δὲ τὸ διάζωμα καὶ τὴν καρδίαν πάντ' ἔχει τὰ ἔναιμα τῶν ζώων, πλεύμονα δὲ καὶ ἀρτηρίαν πάντα πλὴν τῶν ἰχθύων. Καὶ τὴν θέσιν δὲ τῆς ἀρτηρίας καὶ τοῦ οἰσοφάγου πάντα τὰ ἔχοντα ὁμοίως ἔχει διὰ τὰς εἰρημένας αἰτίας πρότερον.

Κεφάλαιο 2

Ἔχει δὲ καὶ χολήν τὰ πολλὰ τῶν ἐναίμων ζώων, τὰ μὲν ἐπὶ τῷ ἥπατι, τὰ δ' ἀπηρητημένην ἐπὶ τοῖς ἐντέροις, ὡς οὕσαν οὐχ ἥττον ἐκ τῆς κάτω κοιλίας τὴν φύσιν αὐτῆς. Δῆλον δὲ μάλιστα ἐπὶ τῶν ἰχθύων· οὗτοι γὰρ ἔχουσι τε πάντες, καὶ οἱ πολλοὶ πρὸς τοῖς ἐντέροις, ἔνιοι δὲ παρ' ὅλον τὸ ἔντερον παρυφασμένην, οἷον ἡ ἀμία· καὶ τῶν ὄφεων οἱ πλεῖστοι τὸν αὐτὸν τρόπον. Διόπερ οἱ λέγοντες τὴν φύσιν τῆς χολῆς αἰσθήσεώς τινος εἶναι χάριν, οὐ καλῶς λέγουσι. Φασὶ γὰρ εἶναι διὰ τοῦτο, ὅπως τῆς ψυχῆς τὸ περὶ τὸ ἥπαρ μόριον δάκνουσα μὲν συνιστῇ, λυομένη δ' ἵλεων ποιῇ. Τὰ μὲν γὰρ ὅλως οὐκ ἔχει χολήν, οἷον ἵππος καὶ ὄρευς καὶ ὄνος καὶ ἔλαφος καὶ πρόξ. Οὐκ ἔχει δὲ οὐδὲ ἡ κάμηλος ἀποκεκριμένην, ἀλλὰ φλεβία χολώδη μᾶλλον. Οὐκ ἔχει δ' οὐδ' ἡ φώκη χολήν, οὐδὲ τῶν θαλαττίων δελφίς. Ἐν δὲ τοῖς γένεσι τοῖς αὐτοῖς τὰ μὲν ἔχειν φαίνεται, τὰ δ' οὐκ ἔχειν, οἷον ἐν τῷ τῶν μυῶν. Τούτων δ' ἐστὶ καὶ ὁ ἄνθρωπος· ἔνιοι μὲν γὰρ φαίνονται ἔχοντες χολήν ἐπὶ τοῦ ἥπατος, ἔνιοι δ' οὐκ ἔχοντες. Διὸ καὶ γίνεται ἀμφισβήτησις περὶ ὅλου τοῦ γένους· οἱ γὰρ ἐντυχόντες ὁποτέρωσοῦν ἔχουσι περὶ πάντων ὑπολαμβάνουσιν ὡς ἀπάντων ἐχόντων. Συμβαίνει δὲ τὸ τοιοῦτον καὶ περὶ τὰ πρόβατα καὶ τὰς αἴγας· τὰ μὲν γὰρ πλεῖστα (677a.) τούτων ἔχει χολήν· ἀλλ' ἐνιαχοῦ μὲν τοσαύτην ὥστε δοκεῖν τέρας εἶναι τὴν ὑπερβολήν, οἷον ἐν Νάξῳ, ἐνιαχοῦ δὲ οὐκ ἔχουσιν, οἷον ἐν Χαλκίδι τῆς Εὐβοίας κατὰ τινα τόπον τῆς χώρας αὐτῶν. Ἔτι δ', ὥσπερ εἴρηται, ἡ τῶν ἰχθύων ἀπήρηται πολὺ τοῦ ἥπατος. Οὐκ ὀρθῶς δ' εἰκόασιν οἱ περὶ Ἀναξαγόραν ὑπολαμβάνειν ὡς αἰτίαν οὕσαν τῶν ὀξέων νοσημάτων· ὑπερβάλλουσιν γὰρ ἀπορραίνειν πρὸς τε τὸν πλεύμονα καὶ τὰς φλέβας καὶ τὰ πλευρά. Σχεδὸν γὰρ οἷς ταῦτα συμβαίνει τὰ πάθη τῶν νόσων, οὐκ ἔχουσι χολήν, ἐν τε ταῖς ἀνατομαῖς ἂν ἐγίνετο τοῦτο φανερόν· ἔτι δὲ τὸ πλῆθος τό τ' ἐν τοῖς ἀρρωστήμασιν ὑπάρχον καὶ τὸ ἀπορραινόμενον ἀσύμβλητον. Ἀλλ' εἴκειν ἡ χολή, καθάπερ καὶ ἡ κατὰ τὸ ἄλλο σῶμα γινομένη περίττωμα τι εἶναι ἢ σύντηξις, οὕτω καὶ ἡ ἐπὶ τῷ ἥπατι χολὴ περίττωμα εἶναι καὶ οὐχ ἕνεκά τινος, ὥσπερ καὶ ἡ ἐν τῇ κοιλίᾳ καὶ ἐν τοῖς ἐντέροις ὑπόστασις. Κατάχρηται μὲν οὖν ἐνίοτε ἡ φύσις εἰς τὸ ὠφέλιμον καὶ τοῖς περιττώμασιν, οὐ μὴν διὰ τοῦτο δεῖ ζητεῖν πάντα ἕνεκα τίνος, ἀλλὰ τινων ὄντων τοιούτων

ἕτερα ἐξ ἀνάγκης συμβαίνει διὰ ταῦτα πολλά.

Ὅσοις μὲν οὖν ἡ τοῦ ἥπατος σύστασις ὑγιεινὴ ἐστὶ καὶ ἡ τοῦ αἵματος φύσις γλυκεῖα ἢ εἰς τοῦτ' ἀποκρινομένη, ταῦτα μὲν ἡ πάμπαν οὐκ ἴσχει χολὴν ἐπὶ τοῦ ἥπατος, ἢ ἔν τισι φλεβίοις, ἢ τὰ μὲν τὰ δ' οὐ. Διὸ καὶ τὰ ἥπατα τὰ τῶν ἀχόλων εὐχρῶ καὶ γλυκερά ἐστὶν ὡς ἐπίπαν εἰπεῖν, καὶ τῶν ἐχόντων χολὴν τὸ ὑπὸ τῇ χολῇ τοῦ ἥπατος γλυκύτατόν ἐστιν.

Τῶν δὲ συνισταμένων ἐξ ἥττον καθαροῦ αἵματος τοῦτ' ἐστὶν ἡ χολή τὸ γινόμενον περίττωμα. Ἐναντίον τε γὰρ τῇ τροφῇ τὸ περίττωμα βούλεται εἶναι καὶ τῷ γλυκεῖ τὸ πικρόν, καὶ τὸ αἷμα γλυκὺ τὸ ὑγιαῖνον. Φανερόν οὖν ὅτι οὐ τινος ἔνεκα, ἀλλ' ἀποκάθαρμά ἐστιν ἡ χολή. Διὸ καὶ χαριέστατα λέγουσι τῶν ἀρχαίων οἱ φάσκοντες αἴτιον εἶναι τοῦ πλείω ζῆν χρόνον τὸ μὴ ἔχειν χολήν, βλέψαντες ἐπὶ τὰ μόνυχα καὶ τὰς ἐλάφους· ταῦτα γὰρ ἄχολά τε καὶ ζῆ πολὺν χρόνον.

Ἔτι δὲ καὶ τὰ μὴ ἑωραμένα ὑπ' ἐκείνων ὅτι οὐκ ἔχει χολήν, οἷον δελφίς καὶ κάμηλος, καὶ ταῦτα τυγχάνει μακρόβια ὄντα.

Εὐλογον γὰρ τὴν τοῦ ἥπατος φύσιν ἐπικαιρον οὔσαν, καὶ ἀναγκαίαν πᾶσι τοῖς ἐναίμοις ζώοις αἰτίαν εἶναι, ποιάν τιν' (677b.) οὔσαν, τοῦ ζῆν ἐλάττω ἢ πλείω χρόνον. Καὶ τὸ τούτου μὲν τοῦ σπλάγχνου εἶναι περίττωμα τοιοῦτον, τῶν δ' ἄλλων μηδενός, κατὰ λόγον ἐστίν. Τῇ μὲν γὰρ καρδίᾳ τοιοῦτον οὐδένα πλησιάζειν οἷόν τε χυμόν (οὐδὲν γὰρ δέχεται βίαιον πάθος), τῶν δ' ἄλλων οὐδὲν σπλάγχνων ἀναγκαῖόν ἐστι τοῖς ζώοις, τὸ δ' ἥπαρ μόνον· διόπερ καὶ τοῦτο συμβαίνει περὶ αὐτὸ μόνον. Ἀτοπὸν τε τὸ μὴ πανταχοῦ νομίζειν, ὅπου ἂν τις ἴδῃ φλέγμα ἢ τὸ ὑπόστημα τῆς κοιλίας, περίττωμα εἶναι, ὁμοίως δὲ δῆλον ὅτι καὶ χολὴν καὶ μὴ διαφέρεισθαι τοῖς τόποις.

Κεφάλαιο 3

Καὶ περὶ μὲν χολῆς, διὰ τίν' αἰτίαν τὰ μὲν ἔχει τὰ δ' οὐκ ἔχει τῶν ζώων, εἴρηται. Περὶ δὲ μεσεντερίου καὶ ἐπιπλόου λοιπὸν εἰπεῖν. Ταῦτα γὰρ ἐν τῷ τόπῳ τούτῳ καὶ μετὰ τῶν μορίων ἐστὶ τούτων. Ἔστι δὲ τὸ μὲν ἐπίπλοον ὑμῖν τοῖς μὲν στέαρ ἔχουσι στεατώδης, τοῖς δὲ πιμελὴν πιμελώδης. Ποῖα δ' ἐστὶν ἐκάτερα τούτων εἴρηται πρότερον. Ἦρκεται δὲ τὸ ἐπίπλοον ὁμοίως τοῖς τε μονοκοιλίοις καὶ τοῖς πολυκοιλίοις ἀπὸ μέσης τῆς κοιλίας κατὰ τὴν ὑπογεγραμμένην οἶον ῥαφήν. Ἐπέχει δὲ τό τε λοιπὸν τῆς κοιλίας καὶ τὸ τῶν ἐντέρων πλῆθος ὁμοίως τοῖς ἐναίμοις, ἔν τε τοῖς πεζοῖς καὶ τοῖς ἐνύδροις ζώοις.

Ἡ μὲν οὖν γένεσις ἐξ ἀνάγκης συμβαίνει τοιαύτη τοῦ μορίου τούτου· ξηροῦ γὰρ καὶ ὑγροῦ μίγματος θερμαινομένου τὸ ἔσχατον αἰεὶ δερματῶδες γίνεται καὶ ὑμενώδες, ὃ δὲ τόπος οὗτος τοιαύτης πλήρης ἐστὶ τροφῆς. Ἔτι δὲ διὰ πυκνότητα τοῦ ὑμένοος τὸ διηθούμενον τῆς αἱματώδους τροφῆς ἀναγκαῖον λιπαρὸν εἶναι (τοῦτο γὰρ λεπτότατον) καὶ διὰ τὴν θερμότητα τὴν περὶ τὸν τόπον συμπεττόμενον ἀντὶ σαρκώδους καὶ αἱματώδους συστάσεως στέαρ γίνεσθαι καὶ πιμελὴν.

Ἡ μὲν οὖν γένεσις τοῦ ἐπιπλόου συμβαίνει κατὰ τὸν λόγον τοῦτον, καταχρῆται δ' ἡ φύσις αὐτῷ πρὸς τὴν εὐπεψίαν τῆς τροφῆς, ὅπως ῥᾶον πέττη καὶ θᾶττον τὰ ζῷα τὴν τροφήν· τὸ μὲν γὰρ θερμὸν πεπτικόν, τὸ δὲ πῖον θερμόν, τὸ δ' ἐπίπλοον πῖον Καὶ διὰ τοῦτο ἀπὸ μέσης ἦρκεται τῆς κοιλίας, ὅτι τὸ ἐπ' ἐκεῖνο μέρος συμπέττει τὸ παρακείμενον ἦπαρ. Καὶ περὶ μὲν τοῦ ἐπιπλόου εἴρηται.

Κεφάλαιο 4

Τὸ δὲ καλούμενον μεσεντέριον ἐστὶ μὲν ὑμὴν, διατείνει δὲ συνεχῆς ἀπὸ τῆς τῶν ἐντέρων παρατάσεως εἰς τὴν φλέβα (678a.) τὴν μεγάλην καὶ τὴν ἀορτὴν, πληρὲς ὃν φλεβῶν πολλῶν καὶ πυκνῶν, αἱ τείνουσιν ἀπὸ τῶν ἐντέρων εἰς τε τὴν μεγάλην φλέβα καὶ τὴν ἀορτὴν. Τὴν μὲν οὖν γένεσιν ἐξ ἀνάγκης οὕσαν εὐρήσομεν ὁμοίως τοῖς ἄλλοις μορίοις· διὰ τίνα δ' αἰτίαν ὑπάρχει τοῖς ἐναίμοις, φανερόν ἐστιν ἐπισκοποῦσιν. Ἐπεὶ γὰρ ἀναγκαῖον τὰ ζῶα τροφήν λαμβάνειν θύραθεν, καὶ πάλιν ἐκ ταύτης γίνεσθαι τὴν ἐσχάτην τροφήν, ἐξ ἧς ἤδη διαδίδοται εἰς τὰ μόρια (τοῦτο δὲ τοῖς μὲν ἀναίμοις ἀνώνυμον, τοῖς δ' ἐναίμοις αἷμα καλεῖται), δεῖ τι εἶναι δι' οὗ εἰς τὰς φλέβας ἐκ τῆς κοιλίας οἶον διὰ ῥιζῶν πορεύεται ἡ τροφή. Τὰ μὲν οὖν φυτὰ τὰς ῥίζας ἔχει εἰς τὴν γῆν (ἐκεῖθεν γὰρ λαμβάνει τὴν τροφήν), τοῖς δὲ ζῴοις ἡ κοιλία καὶ ἡ τῶν ἐντέρων δύναμις γῆ ἐστίν, ἐξ ἧς δεῖ λαμβάνειν τὴν τροφήν· διόπερ ἡ τοῦ μεσεντερίου φύσις ἐστίν, οἶον ῥίζας ἔχουσα τὰς δι' αὐτῆς φλέβας. Οὗ μὲν οὖν ἕνεκα τὸ μεσεντέριον ἐστίν, εἴρηται· τίνα δὲ τρόπον λαμβάνει τὴν τροφήν, καὶ πῶς εἰσέρχεται διὰ τῶν φλεβῶν ἀπὸ τῆς εἰσιούσης τροφῆς εἰς τὰ μόρια ταῦτα τὸ διαδιδόμενον εἰς τὰς φλέβας, ἐν τοῖς περὶ τὴν γένεσιν τῶν ζῴων λεχθήσεται καὶ τὴν τροφήν.

Τὰ μὲν οὖν ἔναιμα τῶν ζῴων πῶς ἔχει μέχρι τῶν διωρισμένων μορίων, καὶ διὰ τίνας αἰτίας, εἴρηται. Περὶ δὲ τῶν εἰς τὴν γένεσιν συντελούντων, οἷς δοκεῖ διαφέρειν τὸ θῆλυ τοῦ ἄρρενος, ἐχόμενον μὲν ἐστὶ καὶ λοιπὸν τῶν εἰρημένων· ἀλλ' ἐπειδὴ περὶ γενέσεως λεκτέον, ἀρμόττον ἐστὶ καὶ περὶ τούτων ἐν τῇ περὶ ἐκείνων θεωρίᾳ διελθεῖν.

Κεφάλαιο 5

Τὰ δὲ καλούμενα μαλάκια καὶ μαλακόστρακα πολλὴν ἔχει πρὸς ταῦτα διαφοράν· εὐθὺς γὰρ τὴν τῶν σπλάγγων ἅπασαν οὐκ ἔχει φύσιν. Ὁμοίως δ' οὐδὲ τῶν ἄλλων ἀναίμων οὐδέν.

Ἔστι δὲ δύο γένη λοιπὰ τῶν ἀναίμων, τὰ τε ὀστρακόδερμα καὶ τὸ τῶν ἐντόμων γένος. Ἐξ οὗ γὰρ συνέστηκεν ἡ τῶν σπλάγγων φύσις, οὐδὲν τούτων ἔχει αἷμα διὰ τὸ τῆς οὐσίας αὐτῶν εἶναί τι τοιοῦτον πάθος αὐτῆς· ὅτι γὰρ ἐστὶ τὰ μὲν ἔναιμα τὰ δ' ἄναιμα, ἐν τῷ λόγῳ ἐνυπάρξει τῷ ὀρίζοντι τὴν οὐσίαν αὐτῶν. Ἐτι δ' ὧν ἕνεκεν ἔχουσι τὰ σπλάγγνα τὰ ἔναιμα τῶν ζῶων, οὐδὲν ὑπάρξει τοῖς τοιούτοις· οὔτε γὰρ (678b.) φλέβας ἔχουσιν οὔτε κύστιν οὔτ' ἀναπνεύουσιν, ἀλλὰ μόνον ἀναγκαῖον ἔχειν αὐτοῖς τὸ ἀνάλογον τῇ καρδίᾳ. Τὸ γὰρ αἰσθητικὸν ψυχῆς καὶ τὸ τῆς ζωῆς αἴτιον ἀρχῇ τινι τῶν μορίων καὶ τοῦ σώματος ὑπάρχει πᾶσι τοῖς ζώοις. Τὰ δὲ πρὸς τὴν τροφήν μόρια ἔχει καὶ ταῦτα ἐξ ἀνάγκης πάντα· οἱ δὲ τρόποι διαφέρουσι διὰ τοὺς τόπους ἐν οἷς λαμβάνουσι τὴν τροφήν.

Ἐχουσι δὲ τὰ μὲν μαλάκια περὶ τὸ καλούμενον στόμα δύο ὀδόντας, καὶ ἐν τῷ στόματι ἀντὶ γλώττης σαρκῶδές τι, ᾧ κρίνουσι τὴν ἐν τοῖς ἐδεστοῖς ἡδονήν. Ὁμοίως δὲ καὶ τὰ μαλακόστρακα τούτοις τοὺς πρώτους ὀδόντας ἔχει καὶ τὸ ἀνάλογον τῇ γλώττῃ σαρκῶδες. Ἐτι δὲ καὶ τὰ ὀστρακόδερμα πάντα τὸ τοιοῦτον ἔχει μόριον διὰ τὴν αὐτὴν αἰτίαν τοῖς ἐναίμοις, πρὸς τὴν τῆς τροφῆς αἴσθησιν. Ὁμοίως δὲ καὶ τὰ ἔντομα τὰ μὲν τὴν ἐξιοῦσαν ἐπιβοσκίδα τοῦ στόματος, οἷον τό τε τῶν μελιττῶν γένος καὶ τὸ τῶν μυιῶν, ὥσπερ εἴρηται καὶ πρότερον· ὅσα δὲ μὴ ἔστιν ἐμπροσθόκεντρα, ἐν τῷ στόματι ἔχει τὸ τοιοῦτον μόριον, οἷον τὸ τῶν μυρμηκῶν γένος, καὶ εἴ τι τοιοῦτον ἕτερον. Ὀδόντας δὲ τὰ μὲν ἔχει τούτων, ἁλλοιοτέρους δέ, καθάπερ τό τε τῶν μυρμηκῶν καὶ τὸ τῶν μελιττῶν γένος, τὰ δ' οὐκ ἔχει, ὅσα ὑγρᾷ χρῆται τῇ τροφῇ· πολλὰ γὰρ τῶν ἐντόμων οὐ τροφῆς ἔχει χάριν τοὺς ὀδόντας ἀλλ' ἀλκῆς. Τῶν δὲ ὀστρακοδέρμων τὰ μὲν, ὥσπερ ἐλέχθη καὶ ἐν τοῖς κατ' ἀρχὰς λόγοις, τὴν καλουμένην ἔχει γλῶτταν ἰσχυράν, οἱ δὲ κόχλοι καὶ ὀδόντας δύο, καθάπερ τὰ μαλακόστρακα.

Μετὰ δὲ τὸ στόμα τοῖς μαλακίοις ἐστὶ στόμαχος μακρὸς, τούτου δ' ἐχόμενος πρόλοβος οἷός περ τοῖς ὄρνεσιν, εἴτα συνεχῆς κοιλία καὶ

ταύτης ἐχόμενον ἔντερον ἀπλοῦν μέχρι τῆς ἐξόδου. Ταῖς μὲν οὖν σηπείαις καὶ τοῖς πολύποσιν ὅμοια καὶ τοῖς σχήμασι καὶ τῇ ἀφῇ τὰ περὶ τὴν κοιλίαν· ταῖς δὲ καλουμέναις τευθίσι δύο μὲν ὁμοίως αἱ κοιλιώδεις εἰσὶν ὑποδοχαί, ἥττον δὲ προλοβώδης ἢ ἐτέρα, καὶ τοῖς σχήμασιν ἐκείνων διαφέρουσι διὰ τὸ καὶ τὸ σῶμα πᾶν ἐκ μαλακωτέρας συνεστάναι σαρκός. Ταῦτα δ' ἔχει τὰ μόρια τοῦτον τὸν τρόπον διὰ τὴν αὐτὴν αἰτίαν ὥσπερ καὶ οἱ ὄρνιθες· οὐδὲ γὰρ τούτων οὐδὲν ἐνδέχεται λεαίνειν τὴν τροφήν, διόπερ ὁ πρόλοβός ἐστι πρὸ τῆς κοιλίας. Πρὸς βοήθειαν δὲ καὶ σωτηρίαν ἔχει ταῦτα τὸν καλούμενον θολόν, ἐν χιτῶνι ὑμενώδει (679a.) προσπεφυκότα, τὴν ἐξοδὸν ἔχοντι καὶ τὸ πέρας ἥπερ ἀφιάσι τὸ περιττώμα τῆς κοιλίας κατὰ τὸν καλούμενον αὐλόν· οὗτος δ' ἐστὶν ἐν τοῖς ὑπτίοις.

Ἐχει μὲν οὖν πάντα τὰ μαλάκια τοῦτο τὸ μόριον ἴδιον, μάλιστα δ' ἡ σηπία καὶ πλεῖστον. Ὅταν γὰρ φοβηθῶσι καὶ δεισώσιν, οἷον φράγμα πρὸ τοῦ σώματος ποιοῦνται τὴν τοῦ ὑγροῦ μελανίαν καὶ θόλωσιν. Αἱ μὲν οὖν τευθίδες καὶ πολύποδες ἔχουσιν ἄνωθεν τὸν θολόν ἐπὶ τῇ μύτιδι μᾶλλον, ἢ δὲ σηπία πρὸς τῇ κοιλίᾳ κάτω· πλείω γὰρ ἔχει διὰ τὸ χρῆσθαι μᾶλλον. Τοῦτο δ' αὐτῇ συμβαίνει διὰ τὸ πρόσγειον μὲν εἶναι τὸν βίον αὐτῆς, μὴ ἔχειν δὲ ἄλλην βοήθειαν, ὥσπερ ὁ πολύπους τὰς πλεκτάνας ἔχει χρησίμους καὶ τὴν τοῦ χρώματος μεταβολήν, ἢ συμβαίνει αὐτῷ, ὥσπερ καὶ ἡ τοῦ θολοῦ πρόεσις, διὰ δειλίαν. Ἡ δὲ τευθὶς πελάγιόν ἐστι τούτων μόνον. Πλείω μὲν οὖν ἔχει ἡ σηπία παρὰ τοῦτο τὸν θολόν, κάτωθεν δὲ διὰ τὸ πλείω· ῥόδιον γὰρ προῖεσθαι καὶ πόρρωθεν ἀπὸ τοῦ πλείονος. Γίνεται δ' ὁ θολός, καθάπερ τοῖς ὄρνισιν ὑπόστημα τὸ λευκὸν ἐπὶ τοῦ περιττώματος γεῶδες, οὕτω καὶ τούτοις ὁ θολός διὰ τὸ μηδὲ ταῦτ' ἔχειν κύστιν· ἀποκρίνεται γὰρ τὸ γεωδέστατον εἰς αὐτόν, καὶ τῇ σηπίᾳ πλεῖστον διὰ τὸ πλεῖστον ἔχειν γεῶδες. Σημεῖον δὲ τὸ σηπίον τοιοῦτον ὄν· τοῦτο γὰρ ὁ μὲν πολύπους οὐκ ἔχει, αἱ δὲ τευθίδες χονδρῶδες καὶ λεπτόν· δι' ἣν δ' αἰτίαν τὰ μὲν οὐκ ἔχει τὰ δ' ἔχει, καὶ ποῖόν τι τούτων ἔχει ἐκάτερον, εἴρηται. Ἀναίμων δ' ὄντων καὶ διὰ τοῦτο κατεψυγμένων καὶ φοβητικῶν, ὥσπερ ἐνίοις ὅταν δείσωσιν ἡ κοιλία ταραττεται, τοῖς δ' ἐκ τῆς κύστεως ρεῖ περιττώσις, καὶ τούτοις τοῦτο συμβαίνει μὲν ἐξ ἀνάγκης ἀφιέναι διὰ δειλίαν, ὥσπερ ἐκ κύστεως τοῖς ἐπουροῦσιν, ἢ δὲ φύσις ἅμα τῷ τοιούτῳ περιττώματι καταχρῆται πρὸς βοήθειαν καὶ σωτηρίαν αὐτῶν.

Ἐχουσι δὲ καὶ τὰ μαλακόστρακα, τὰ τε караβοειδῇ καὶ οἱ

καρκίνοι, δύο μὲν ὀδόντας τοὺς πρώτους, καὶ μεταξὺ τὴν σάρκα τὴν γλωσσοειδῆ, ὥσπερ εἴρηται καὶ πρότερον, εὐθὺς δ' ἐχόμενον τοῦ στόματος στόμαχον μικρὸν κατὰ μέγεθος τῶν σωμάτων, τὰ μείζω πρὸς τὰ ἐλάττω· τούτου δὲ κοιλίαν ἐχομένην, ἐφ' ἧς οἱ τε κάραβοι καὶ ἔνιοι τῶν καρκίνων ὀδόντας ἔχουσιν ἑτέρους διὰ τὸ τοὺς ἄνω μὴ διαιρεῖν ἱκανῶς, ἀπὸ δὲ τῆς κοιλίας ἔντερον ἀπλοῦν κατ' εὐθὺ μέχρι πρὸς τὴν (679b.) ἔξοδον τοῦ περιττώματος.

Ἔχει δὲ καὶ τῶν ὀστρακοδέρμων ἕκαστον ταῦτα τὰ μόρια, τὰ μὲν διηρθρωμένα μᾶλλον τὰ δ' ἦττον. Ἐν δὲ τοῖς μείζοσι διαδηλότερά ἐστιν ἕκαστα τούτων. Οἱ μὲν οὖν κόχλοι καὶ ὀδόντας ἔχουσι σκληροὺς καὶ ὀξεῖς, ὥσπερ εἴρηται πρότερον, καὶ τὸ μεταξὺ σαρκῶδες ὁμοίως τοῖς μαλακίοις καὶ μαλακοστράκοις, καὶ τὴν προβοσκίδα, καθάπερ εἴρηται, μεταξὺ κέντρου καὶ γλώττης, τοῦ δὲ στόματος ἐχόμενον οἷον ὀρνιθώδη τινὰ πρόλοβον, τούτου δ' ἐχόμενον στόμαχον· τούτου δ' ἔχεται ἡ κοιλία, ἐν ἣ ἡ καλουμένη μήκων, ἀφ' ἧς συνεχές ἐστιν ἔντερον ἀπλὴν τὴν ἀρχὴν ἔχον ἀπὸ τῆς μήκωνος· ἔστι γὰρ ἐν πᾶσι τοῖς ὀστρακηροῖς περίττωμα τοῦτο τὸ μάλιστα δοκοῦν εἶναι ἐδώδιμον. Ἔχει δ' ὁμοίως τῷ κόχλῳ καὶ τᾶλλα τὰ στρομβώδη, οἷον πορφύραι καὶ κήρυκες.

Ἔστι δὲ γένη καὶ εἶδη πολλὰ τῶν ὀστρακοδέρμων· τὰ μὲν γὰρ στρομβώδη ἐστίν, ὥσπερ τὰ νῦν εἰρημένα, τὰ δὲ δίθυρα, τὰ δὲ μονόθυρα. Τρόπον δὲ τινὰ καὶ τὰ στρομβώδη διθύροις ἔοικεν· ἔχει γὰρ ἐπιπύγματ' ἐπὶ τῷ φανερῷ τῆς σαρκὸς πάντα τὰ τοιαῦτα ἐκ γενετῆς, οἷον αἱ τε πορφύραι καὶ κήρυκες καὶ οἱ νηρεῖται καὶ πᾶν τὸ τοιοῦτον γένος, πρὸς βοήθειαν. Ἥτι γὰρ μὴ προβέβληται τὸ ὀστρακον, ῥάδιον ταύτῃ βλάπτεσθαι ὑπὸ τῶν θύραθεν προσπιπτόντων. Τὰ μὲν οὖν μονόθυρα διὰ τὸ προσπεφυκέναι σφύζεται τῷ πρᾶνές ἔχειν τὸ ὀστρακον, καὶ γίνεται ἀλλοτρίῳ φράγματι τρόπον τινὰ δίθυρον, οἷον αἱ καλούμεναι λεπάδες· τὰ δὲ δίθυρα, οἷον κτένες καὶ μύες, τῷ συνάγειν, τὰ δὲ στρομβώδη τούτῳ τῷ ἐπικαλύμματι, ὥσπερ δίθυρα γινόμενα ἐκ μονοθύρων.

Ὁ δ' ἐχῖνος μάλιστα πάντων ἀλεωρὰν ἔχει· κύκλῳ γὰρ τὸ ὀστρακον συνηρεφές καὶ κεχαρακωμένον ταῖς ἀκάνθαις. Ἴδιον δ' ἔχει τῶν ὀστρακοδέρμων τοῦτο, καθάπερ εἴρηται πρότερον.

Τῶν δὲ μαλακοστράκων καὶ τῶν ὀστρακοδέρμων συνέστηκεν ἡ φύσις τοῖς μαλακίοις ἀντικειμένως· τοῖς μὲν γὰρ ἔξω τὸ σαρκῶδες, τοῖς δ' ἐντός, ἐκτός δὲ τὸ γεῶδες. Ὁ δ' ἐχῖνος οὐδὲν ἔχει σαρκῶδες.

Πάντα μὲν οὖν ἔχει, καθάπερ εἴρηται, καὶ τᾶλλα τὰ ὀστρακόδερμα στόμα τε καὶ τὸ γλωττοειδὲς καὶ τὴν κοιλίαν καὶ τοῦ περιττώματος τὴν ἔξοδον, διαφέρει δὲ τῇ θέσει καὶ τοῖς μεγέθεσιν. Ὅν δὲ (680a.) τρόπον ἔχει τούτων ἕκαστον, ἕκ τε τῶν ἱστοριῶν τῶν περὶ τὰ ζῷα θεωρεῖσθω καὶ ἐκ τῶν ἀνατομῶν· τὰ μὲν γὰρ τῷ λόγῳ τὰ δὲ πρὸς τὴν ὄψιν αὐτῶν σαφηνίζειν δεῖ μᾶλλον.

Ἰδίως δ' ἔχουσι τῶν ὀστρακοδόρμων οἱ τ' ἐχῖνοι καὶ τὸ τῶν καλουμένων τηθῶν γένος. Ἐχουσι δ' οἱ ἐχῖνοι ὀδόντας μὲν πέντε καὶ μεταξὺ τὸ σαρκῶδες ὥσπερ ἐπὶ πάντων ἐστὶ τῶν εἰρημένων, ἐχόμενον δὲ τούτου στόμαχον, ἀπὸ δὲ τούτου τὴν κοιλίαν εἰς πολλὰ διηρημένην, ὥσπερανεὶ πολλὰς τοῦ ζῶου κοιλίας ἔχοντος. Κεχωρισμένοι μὲν γὰρ εἰσι καὶ πλήρεις περιττώματος, ἐξ ἑνὸς δ' ἡρτῆνται τοῦ στομάχου καὶ τελευτῶσι πρὸς μίαν ἔξοδον τὴν τοῦ περιττώματος. Παρὰ δὲ τὴν κοιλίαν σαρκῶδες μὲν οὐδὲν ἔχουσιν, ὥσπερ εἴρηται, τὰ δὲ καλούμενα ῥά πλείω τὸν ἀριθμὸν ἐν ὑμένι χωρὶς ἕκαστον, καὶ κύκλῳ ἀπὸ τοῦ στόματος μέλαν' ἄττα διεσπαρμένα χύδην, ἀνώνυμα. Ὅντων δὲ πλειόνων γενῶν (οὐ γὰρ ἐν εἶδος τῶν ἐχίνων πάντων ἐστὶ) πάντες μὲν ἔχουσι ταῦτα τὰ μόρια, ἀλλ' οὐκ ἐδώδιμα πάντες τὰ καλούμενα ῥά, καὶ μικρὰ πάνπαν ἔξω τῶν ἐπιπολαζόντων. Ὅλως δὲ τοῦτο καὶ περὶ τᾶλλα συμβέβηκε τὰ ὀστρακόδερμα· καὶ γὰρ αἱ σάρκες οὐχ ὁμοίως ἐδώδιμοι πάντων, καὶ τὸ περίττωμα, ἢ καλουμένη μήκων, ἐνίων μὲν ἐδώδιμος, ἐνίων δ' οὐκ ἐδώδιμος. Ἔστι δὲ τοῖς στρομβώδεσιν ἐν τῇ ἐλίκῃ τοῦτο, τοῖς δὲ μονοθύροις ἐν τῷ πυθμένι, οἷον ταῖς λεπάσι, τοῖς δὲ διθύροις πρὸς τῇ συναφῇ.

Τὸ δ' ῥὸν καλούμενον ἐν τοῖς δεξιοῖς, ἐν δὲ τοῖς ἐπὶ θάτερα ἢ ἔξοδος τοῦ περιττώματος τοῖς διθύροις. Καλεῖται δ' ῥὸν οὐκ ὀρθῶς ὑπὸ τῶν καλούντων· τοῦτο γὰρ ἐστὶν οἷον τοῖς ἐναίμοις, ὅταν εὐθηνῶσιν, ἢ πύοις. Διὸ καὶ γίνεται κατὰ τούτους τοὺς καιροὺς τοῦ ἐνιαυτοῦ, ἐν οἷς εὐθηνοῦσιν, ἔν τε τῷ ἔαρι καὶ τῷ μετοπώρῳ. Ἐν γὰρ τῷ ψύχει καὶ ταῖς ἀλέαις πονοῦσι πάντα τὰ ὀστρακόδερμα, καὶ φέρειν οὐ δύνανται τὰς ὑπερβολάς. Σημεῖον δὲ τὸ συμβαῖνον ἐπὶ τῶν ἐχίνων· εὐθύς τε γὰρ γινόμενοι ἔχουσι καὶ ἐν ταῖς πανσελήνοις μᾶλλον, οὐ διὰ τὸ νέμεσθαι καθάπερ τινὲς οἴονται μᾶλλον, ἀλλὰ διὰ τὸ ἀλεινοτέρας εἶναι τὰς νύκτας διὰ τὸ φῶς τῆς σελήνης. Δύσριγα γὰρ ὄντα διὰ τὸ ἄναιμα εἶναι δέονται ἀλέας. Διὸ καὶ ἐν τῷ θέρει μᾶλλον πανταχοῦ εὐθηνοῦσιν, πλὴν οἱ ἐν τῷ Πυρραίῳ εὐρίπῳ·

ἐκεῖνοι δ' οὐχ ἦττον (680b.) τοῦ χειμῶνος. Αἴτιον δὲ τὸ νομῆς εὐπορεῖν τότε μᾶλλον, ἀπολειπόντων τῶν ἰχθύων τοὺς τόπους κατὰ ταύτην τὴν ὥραν. Ἐχουσι δ' οἱ ἐχῖνοι πάντες ἴσα τε τῷ ἀριθμῷ τὰ ψά καὶ περιττά· πέντε γὰρ ἔχουσιν, τοσοῦτους δὲ καὶ τοὺς ὀδόντας καὶ τὰς κοιλίας. Αἴτιον δ' ὅτι τὸ ψόν ἐστι, καθάπερ εἴρηται πρότερον, οὐκ ψὸν ἀλλὰ τοῦ ζῶου εὐτροφία.

Γίνεται δὲ τοῦτο ἐπὶ θάτερα μόνον ἐν τοῖς ὀστρέοις, τὸ καλούμενον ψόν. Ταῦτο δὲ τοῦτό ἐστι καὶ τὸ ἐν τοῖς ἐχίνοις.

Ἐπεὶ τοίνυν ἐστὶ σφαιροειδῆς ὁ ἐχῖνος, καὶ οὐχ ὥσπερ ἐπὶ τῶν ἄλλων ὀστρέων τοῦ σώματος κύκλος εἷς, ὁ δ' ἐχῖνος οὐ τῇ μὲν τοιοῦτος τῇ δ' οὐ, ἀλλὰ πάντῃ ὅμοιος (σφαιροειδῆς γάρ), ἀνάγκη καὶ τὸ ψόν ὁμοίως ἔχειν. Οὐ γάρ ἐστιν, ὥσπερ τοῖς ἄλλοις, τὸ κύκλω ἀνόμοιον. Ἐν μέσῳ γὰρ ἡ κεφαλὴ πᾶσιν αὐτοῖς· τὸ δ' ἄνω τὸ τοιοῦτον μόριον. Ἀλλὰ μὴν οὐδὲ συνεχὲς οἷόν τ' εἶναι τὸ ψόν· οὐδὲ γὰρ τοῖς ἄλλοις, ἀλλ' ἐπὶ θάτερα τοῦ κύκλου μόνον. Ἀνάγκη τοίνυν, ἐπεὶ τοῦτο μὲν ἀπάντων κοινόν, ἴδιον δ' ἐκείνου εἶναι τὸ σῶμα σφαιροειδές, μὴ εἶναι ἄρτια τὰ ψά. Κατὰ διάμετρον γὰρ ἂν ἦν, διὰ τὸ ὁμοίως δεῖν ἔχειν τὸ ἔνθεν καὶ ἔνθεν, εἰ ἦν ἄρτια καὶ κατὰ διάμετρον. Οὕτως δ' ἐχόντων ἐπ' ἀμφοτέρα ἂν τοῦ κύκλου εἶχον τὸ ψόν. Τοῦτο δ' οὐκ ἦν οὐδ' ἐπὶ τῶν ἄλλων ὀστρέων. Ἐπὶ θάτερα γὰρ τῆς περιφερείας ἔχουσι τὰ ὀστρεα καὶ οἱ κτένες τὸ τοιοῦτον μόριον. Ἀνάγκη τοίνυν τρία ἢ πέντε εἶναι ἢ ἄλλον τιν' ἀριθμὸν περιττόν. Εἰ μὲν οὖν τρία εἶχε, πόρρω λίαν <ἂν> ἦν, εἰ δὲ πλείω τῶν πέντε, συνεχὲς ἂν. Τούτων δὲ τὸ μὲν οὐ βέλτιον, τὸ δ' οὐκ ἐνδεχόμενον. Ἀνάγκη ἄρα πέντ' αὐτοὺς ἔχειν τὰ ψά. Διὰ τὴν αὐτὴν δ' αἰτίαν καὶ ἡ κοιλία τοιαύτη ἐσχισται καὶ τὸ τῶν ὀδόντων τοσοῦτόν ἐστι πλῆθος. Ἐκαστον γὰρ τῶν ψῶν, οἷον σῶμά τι τοῦ ζῶου ὄν, πρὸς τὸν τρόπον τὸν τῆς ζωῆς ὅμοιον ἔχειν ἀναγκαῖον· ἐντεῦθεν γὰρ ἡ αὐξησης. Μιᾶς μὲν γὰρ οὔσης ἢ πόρρω ἂν ἦσαν, ἢ πᾶν ἂν κατεῖχε τὸ κύτος, ὥστε καὶ δυσκίνητον εἶναι τὸν ἐχῖνον καὶ μὴ πληροῦσθαι τῆς τροφῆς τὸ ἀγγεῖον· πέντε δ' ὄντων τῶν διαλειμμάτων ἀνάγκη πρὸς ἐκάστῳ οὔσαν πενταχῇ διηρηῆσθαι. Διὰ τὴν αὐτὴν δ' αἰτίαν καὶ τὸ τῶν ὀδόντων ἐστὶ τοσοῦτον πλῆθος. Τὸ γὰρ ὅμοιον οὕτως ἂν ἡ φύσις εἴη ἀποδεδωκυῖα τοῖς εἰρημένοις (681a.) μορίοις. Διότι μὲν οὖν περιττά καὶ τοσαῦτα τὸν ἀριθμὸν ἔχει ὁ ἐχῖνος τὰ ψά, εἴρηται· διότι δὲ οἱ μὲν πάνπαν μικρὰ οἱ δὲ μεγάλα, αἴτιον τὸ θερμότερους εἶναι τὴν φύσιν τούτους· πέττειν γὰρ τὸ θερμὸν δύναται τὴν τροφὴν μᾶλλον, διόπερ

περιττώματος πλήρεις οἱ ἄβρωτοι μάλλον.

Καὶ παρασκευάζει κινητικωτέρους ἢ τῆς φύσεως θερμότης, ὥστε νέμεσθαι καὶ μὴ μένειν ἐδραίους. Σημεῖον δὲ τούτου τὸ ἔχειν τοὺς τοιοῦτους αἰεὶ τι ἐπὶ τῶν ἀκανθῶν ὥς κινουμένους πυκνά· χρῶνται γὰρ ποσὶ ταῖς ἀκάνθαις.

Τὰ δὲ τήθυα μικρὸν τῶν φυτῶν διαφέρει τὴν φύσιν, ὅμως δὲ ζωτικώτερα τῶν σπόγγων· οὗτοι γὰρ πάμπαν ἔχουσι φυτοῦ δύναμιν. Ἡ γὰρ φύσις μεταβαίνει συνεχῶς ἀπὸ τῶν ἀνύχων εἰς τὰ ζῶα διὰ τῶν ζώντων μὲν οὐκ ὄντων δὲ ζώων, οὕτως ὥστε δοκεῖν πάμπαν μικρὸν διαφέρειν θατέρου θάτερον τῷ συνέγγυς ἀλλήλοις. Ὁ μὲν οὖν σπόγγος, ὥσπερ εἴρηται, καὶ τῷ ζῆν προσπεφυκὼς μόνον, ἀπολυθεὶς δὲ μὴ ζῆν, ὁμοίως ἔχει τοῖς φυτοῖς παντελῶς. Τὰ δὲ καλούμενα ὀλοθούρια καὶ οἱ πλεύμονες, ἔτι δὲ καὶ ἕτερα τοιαῦτ' ἐν τῇ θαλάττῃ μικρὸν διαφέρει τούτων τῷ ἀπολελύσθαι· αἰσθησιν μὲν γὰρ οὐδεμίαν ἔχει, ζῆ δὲ ὥσπερ ὄντα φυτὰ ἀπολελυμένα. Ἔστι δὲ καὶ ἐν τοῖς ἐπιγείοις φυτοῖς ἔνια τοιαῦτα, ἃ καὶ ζῆ καὶ γίνεται τὰ μὲν ἐν ἐτέροις φυτοῖς, τὰ δὲ καὶ ἀπολελυμένα, οἷον καὶ τὸ ἐκ τοῦ Παρνασσοῦ καλούμενον ὑπὸ τινων ἐπίπετρον· τοῦτο γὰρ ζῆ πολλὸν χρόνον κρεμάμενον ἄνω ἐπὶ τῶν παττάλων. Ἔστι δ' ὅτε καὶ τὰ τήθυα, καὶ εἴ τι τοιοῦτον ἕτερον γένος, τῷ μὲν προσπεφυκὸς ζῆν μόνον φυτῷ παραπλήσιον, τῷ δ' ἔχειν τι σαρκῶδες δόξειεν ἂν ἔχειν τιν' αἰσθησιν· ἄδηλον δὲ τοῦτο ποτέρως θετέον. Ἐχει δὲ τοῦτο τὸ ζῶον δύο πόρους καὶ μίαν διαίρεσιν, ἥ τε δέχεται τὴν ὑγρότητα τὴν εἰς τροφήν, καὶ ἥ πάλιν διαπέμπει τὴν ὑπολειπομένην ἰκμάδα· περίττωμα γὰρ οὐδὲν ἐστὶ δῆλον ἔχον, ὥσπερ τᾶλλα τὰ ὀστρακόδερμα. Διὸ μάλιστα καὶ τοῦτο, κἂν εἴ τι ἄλλο τοιοῦτον τῶν ζώων, φυτικὸν δίκαιον καλεῖν· οὐδὲ γὰρ τῶν φυτῶν οὐδὲν ἔχει περίττωμα. Διὰ μέσου δὲ λεπτὸν διάζωμα, ἐν ᾧ τὸ κύριον ὑπάρχειν εὖλογον τῆς ζωῆς.

Ἄς δὲ καλοῦσιν οἱ μὲν κνίδας οἱ δὲ ἀκαλήφας, ἔστι μὲν (681b.) οὐκ ὀστρακόδερμα, ἀλλ' ἔξω πίπτει τῶν διηρημένων γενῶν, ἐπαμφοτερίζει δὲ τοῦτο καὶ φυτῷ καὶ ζῷῳ τὴν φύσιν.

Τῷ μὲν γὰρ ἀπολύεσθαι καὶ προσπίπτειν πρὸς τὴν τροφήν ἐνίας αὐτῶν ζωϊκὸν ἐστὶ, καὶ τῷ αἰσθάνεσθαι τῶν προσπιπτόντων. Ἔτι δὲ καὶ τῇ τοῦ σώματος τραχύτητι χρῆται πρὸς τὴν σωτηρίαν· τῷ δ' ἀτελὲς εἶναι καὶ προσφύεσθαι ταχέως ταῖς πέτραις τῷ γένει τῶν φυτῶν παραπλήσιον, καὶ τῷ περίττωμα μηδὲν ἔχειν φανερόν, στόμα

δ' ἔχειν. Ὅμοιον δὲ τούτῳ καὶ τὸ τῶν ἀστέρων ἐστὶ γένος· καὶ γὰρ τοῦτο προσπίπτον ἐκχυμίζει πολλὰ τῶν ὀστρέων, τοῖς τ' ἀπολελυμένοις τῶν εἰρημένων ζώων, οἷον τοῖς τε μαλακίοις καὶ τοῖς μαλακοστράκοις. Ὁ δ' αὐτὸς λόγος καὶ περὶ τῶν ὀστρακοδέρμων.

Τὰ μὲν οὖν μόρια τὰ περὶ τὴν τροφήν, ἅπερ ἀναγκαῖον πᾶσιν ὑπάρχειν, ἔχει τὸν προειρημένον τρόπον, δεῖ δὲ δηλονότι καὶ τῶν τοῖς ἐναίμοις ὑπαρχόντων κατὰ τὸ κύριον τῶν αἰσθήσεων ἔχειν ἀνάλογόν τι μόριον· τοῦτο γὰρ δεῖ πᾶσιν ὑπάρχειν τοῖς ζώοις. Ἔστι δὲ τοῦτο τοῖς μὲν μαλακίοις ἐν ὑμένι κείμενον ὑγρόν, δι' οὗπερ ὁ στόμαχος τέταται κατὰ τὴν κοιλίαν, προσπέφυκε δὲ πρὸς τὰ πρηνῆ μᾶλλον, καὶ καλεῖται μύτις ὑπὸ τινων. Τοιοῦτον δ' ἕτερον καὶ τοῖς μαλακοστράκοις ἐστὶ, καὶ καλεῖται κάκεῖνο μύτις. Ἔστι δ' ὑγρόν καὶ σωματῶδες ἅμα τοῦτο τὸ μόριον, τείνει δὲ δι' αὐτοῦ, καθάπερ εἴρηται, διὰ μέσου μὲν ὁ στόμαχος. Εἰ γὰρ ἦν μετὰ τούτου καὶ τοῦ πρηνοῦς, οὐκ ἂν ἠδύνατο λαμβάνειν ὁμοίως διάστασιν εἰσιούσης τροφῆς διὰ τὴν τοῦ νώτου σκληρότητα. Ἐπὶ δὲ τῆς μύτιδος τὸ ἔντερον ἐξωθεν, καὶ ὁ θολὸς πρὸς τῷ ἐντέρω, ὅπως ὅτι πλεῖστον ἀπέχη τῆς εἰσόδου καὶ τὸ δυσχερὲς ἄποθεν ἢ τοῦ βελτίονος καὶ τῆς ἀρχῆς. Ὅτι δ' ἐστὶ τὸ ἀνάλογον τῇ καρδίᾳ τοῦτο τὸ μόριον, δηλοῖ ὁ τόπος (οὗτος γάρ ἐστιν ὁ αὐτός) καὶ ἡ γλυκύτης τῆς ὑγρότητος, ὥς οὗσα πεπεμμένη καὶ αἱματώδης. Ἐν δὲ τοῖς ὀστρακοδέρμοις ἔχει μὲν τὸν αὐτὸν τρόπον τὸ κύριον τῆς αἰσθήσεως, ἦττον δ' ἐπίδηλον. Πλὴν δεῖ ζητεῖν αἰεὶ περὶ μεσότητα ταύτην τὴν ἀρχήν, ὅσα μὲν μόνιμα, τοῦ δεχομένου μορίου τὴν τροφήν, καὶ δι' οὗ ποιεῖται τὴν ἀπόκρισιν ἢ τὴν σπερματικὴν ἢ τὴν περιττωματικὴν, ὅσα δὲ καὶ πορευτικὰ (682a.) τῶν ζώων, αἰεὶ τῷ μέσῳ τῶν δεξιῶν καὶ τῶν ἀριστερῶν.

Τοῖς δ' ἐντόμοις τὸ μὲν τῆς τοιαύτης ἀρχῆς μόριον, ὥσπερ ἐν τοῖς πρώτοις ἐλέχθη λόγοις, μετὰ ζῦ κεφαλῆς καὶ τοῦ περὶ τὴν κοιλίαν ἐστὶ κύτους. Τοῦτο δὲ τοῖς μὲν πολλοῖς ἐστὶν ἓν, τοῖς δὲ πλείω, καθάπερ τοῖς ἰουλώδεσι καὶ μακροῖς· διόπερ διατεμνόμενα ζῇ. Βούλεται μὲν γὰρ ἡ φύσις ἐν πᾶσι μόνον ἓν ποιεῖν τὸ τοιοῦτον, οὐ δυναμένη δ' ἐνεργεῖα ποιεῖ μόνον ἓν, δυνάμει δὲ πλείω· δηλον δ' ἐν ἑτέροις ἑτέρων μᾶλλον.

Τὰ δὲ πρὸς τὴν τροφήν μόρια οὐ πᾶσιν ὁμοίως, ἀλλὰ διαφορὰν ἔχει πολλήν. Ἐντὸς γὰρ τοῦ στόματος ἐνίοις μὲν ἐστὶ τὸ καλούμενον κέντρον, ὥσπερανεὶ σύνθετον καὶ ἔχον γλώττης καὶ χειλῶν ἅμα δύναμιν. Τοῖς δὲ μὴ ἔχουσιν ἔμπροσθεν τὸ κέντρον ἐστὶν ἐντὸς τῶν

ὀδόντων τοιοῦτον αἰσθητήριον. Τούτου δ' ἐχόμενον πᾶσιν ἔντερον εὐθὺ καὶ ἀπλοῦν μέχρι τῆς ἐξόδου τοῦ περιττώματος· ἐνίοις δὲ τοῦτο ἐλίκτην ἔχει. Τὰ δὲ κοιλίαν μετὰ τὸ στόμα, ἀπὸ δὲ τῆς κοιλίας τὸ ἔντερον εἰλιγμένον, ὅπως ὅσα βρωτικώτερα καὶ μεῖζω τὴν φύσιν, ὑποδοχὴν ἔχη πλείονος τροφῆς. Τὸ δὲ τῶν τεττίγων γένος ἰδίαν ἔχει μάλιστα τούτων φύσιν· τὸ γὰρ αὐτὸ μόριον ἔχει στόμα καὶ γλῶτταν συμπεφυκός, δι' οὗ καθαπερεὶ διὰ ῥίζης δέχεται τὴν τροφήν ἀπὸ τῶν ὑγρῶν· Πάντα μὲν οὖν ἐστὶν ὀλιγότροφα τὰ ἔντομα τῶν ζώων, οὐχ οὕτω διὰ μικρότητα ὥς διὰ ψυχρότητα (τὸ γὰρ θερμὸν καὶ δεῖται τροφῆς καὶ πέττει τὴν τροφήν ταχέως, τὸ δὲ ψυχρὸν ἄτροφον), μάλιστα δὲ τὸ τῶν τεττίγων γένος. Ἰκανὴ γὰρ τροφή τῷ σώματι ἢ ἐκ τοῦ σώματος ὑπομένουσα ὑγρότης, καθάπερ τοῖς ἐφημέροις ζώοις (γίνεται δὲ ταῦτα περὶ τὸν Πόντον), πλὴν ἐκεῖνα μὲν ζῆ μιᾶς ἡμέρας χρόνον, ταῦτα δὲ πλειόνων μὲν ἡμερῶν, ὀλίγων δὲ τούτων.

Ἐπεὶ δὲ περὶ τῶν ἐντὸς ὑπαρχόντων μορίων τοῖς ζώοις εἴρηται, πάλιν περὶ τῶν λοιπῶν τῶν ἐκτὸς ἐπανιτέον.

Ἀρκτέον δ' ἀπὸ τῶν νῦν εἰρημένων, ἀλλ' οὐκ ἀφ' ὧν ἀπελίπομεν, ὅπως ἀπὸ τούτων διατριβὴν ἐλάττω ἐχόντων ἐπὶ τῶν τελείων καὶ ἐναίμων ζώων ὁ λόγος σχολάζῃ μᾶλλον.

Κεφάλαιο 6

Τὰ μὲν οὖν ἔντομα τῶν ζώων οὐ πολυμερῇ μὲν τὸν ἀριθμὸν ἐστίν, ὁμῶς δ' ἔχει καὶ πρὸς ἄλληλα διαφοράς.

Πολύποδα μὲν γάρ ἐστι πάντα διὰ τὸ πρὸς τὴν βραδυτῆτα (682b.) καὶ κατάψυξιν τῆς φύσεως τὴν πολυποδίαν ἀνυτικωτέραν αὐτοῖς ποιεῖν τὴν κίνησιν· καὶ μάλιστα πολύποδα τὰ μάλιστα κατεψυγμένα διὰ τὸ μῆκος, οἷον τὸ τῶν ιούλων γένος. Ἔτι δὲ διὰ τὸ ἀρχὰς ἔχει πλείονας αἶ τ' ἔντομαί εἰσι καὶ πολύποδα κατὰ ταῦτ' ἐστίν. Ὅσα δ' ἐλάττονας ἔχει πόδας, πτηνὰ ταῦτ' ἐστὶ πρὸς τὴν ἔλλειψιν τὴν τῶν ποδῶν.

Αὐτῶν δὲ τῶν πτηγῶν ὧν μὲν ἐστίν ὁ βίος νομαδικὸς καὶ διὰ τὴν τροφὴν ἀναγκαῖον ἐκτοπίζειν, τετράπτερα τέ ἐστι καὶ τὸν τοῦ σώματος ἔχει κοῦφον ὄγκον, οἷον αἶ τε μέλιτται καὶ τὰ σύμφυλα ζῶα ταύταις· δύο γὰρ ἐφ' ἐκάτερα πτερὰ τοῦ σώματος ἔχουσιν. Ὅσα δὲ μικρὰ τῶν τοιούτων, δίπτερα, καθάπερ τὸ τῶν μυιῶν γένος. Τὰ δὲ βραχέα καὶ τοῖς βίοις ἐδραῖα πολύπτερα μὲν ὁμοίως ταῖς μελίτταις ἐστίν, ἔχει δ' ἔλυτρα τοῖς πτεροῖς, οἷον αἶ τε μηλολόνθαι καὶ τὰ τοιαῦτα τῶν ἐντόμων, ὅπως σφῶζι τὴν τῶν πτερῶν δύναμιν. Ἐδραίων γὰρ ὄντων εὐδιάφθορα μᾶλλον ἐστὶ τῶν εὐκινήτων, διόπερ ἔχει φραγμὸν πρὸ αὐτῶν. Καὶ ἄσχιστον δὲ τούτων ἐστὶ τὸ πτερὸν καὶ ἄκαυλον· οὐ γάρ ἐστὶ πτερὸν ἄλλ' ὑμὴν δερματικός, ὃς διὰ ξηρότητα ἐξ ἀνάγκης ἀφίσταται τοῦ σώματος αὐτῶν ψυχομένου τοῦ σαρκώδους.

Ἔντομα δ' ἐστὶ διὰ τε τὰς εἰρημένας αἰτίας, καὶ ὅπως σφῶζεται δι' ἀπάθειαν συγκαμπτόμενα· συνελίττεται γὰρ τὰ μῆκος ἔχοντ' αὐτῶν, τοῦτο δ' οὐκ ἂν ἐγίνετ' αὐτοῖς μὴ οὖσιν ἐντόμοις. Τὰ δὲ μὴ ἐλικτὰ αὐτῶν σκληρύνεται μᾶλλον συνιόντα ἐς τὰς τομάς. Δῆλον δὲ τοῦτο γίνεται θιγγανόντων, οἷον ἐπὶ τῶν καλουμένων κανθάρων· φοβηθέντα γὰρ ἀκινήτίζει, καὶ τὸ σῶμα γίνεται σκληρὸν αὐτοῖς. Ἀναγκαῖον δ' ἐντόμοις αὐτοῖς εἶναι· τοῦτο γὰρ ἐν τῇ οὐσίᾳ αὐτῶν ὑπάρχει τὸ πολλὰς ἔχει ἀρχάς, καὶ ταύτῃ προσέοικε τοῖς φυτοῖς. Ὡσπερ γὰρ τὰ φυτά, καὶ ταῦτα διαιρούμενα δύναται ζῆν, πλὴν ταῦτα μὲν μέχρι τινός, ἐκεῖνα δὲ καὶ τέλεια γίνεται τὴν φύσιν καὶ δύο ἐξ ἐνός καὶ πλείω τὸν ἀριθμὸν.

Ἔχει δ' ἔνια τῶν ἐντόμων καὶ κέντρα πρὸς βοήθειαν τῶν

βλαπτόντων. Τὸ μὲν οὖν κέντρον τοῖς μὲν ἔμπροσθέν ἐστι τοῖς δ' ὀπισθεν, τοῖς μὲν ἔμπροσθεν κατὰ τὴν γλῶτταν, τοῖς δ' ὀπισθεν κατὰ τὸ οὐραῖον. Ὡς περ γὰρ τοῖς ἐλέφασιν τὸ τῶν ὀσμῶν αἰσθητήριον γεγένηται χρήσιμον πρὸς τε τὴν (683a.) ἀλκὴν καὶ τὴν τῆς τροφῆς χρῆσιν, οὕτως τῶν ἐντόμων ἐνίοις τὸ κατὰ τὴν γλῶτταν τεταγμένον· αἰσθάνονται τε γὰρ τούτῳ τῆς τροφῆς καὶ ἀναλαμβάνουσι καὶ προσάγονται αὐτήν. Ὅσα δὲ μὴ ἔστιν αὐτῶν ἔμπροσθόκεντρα, ὀδόντας ἔχει τὰ μὲν ἐδωδῆς χάριν, τὰ δὲ τοῦ λαμβάνειν καὶ προσάγεσθαι τὴν τροφήν, οἷον οἱ τε μύρμηκες καὶ τὸ τῶν μελιττῶν πασῶν γένος. Ὅσα δὲ ὀπισθόκεντρά ἐστι, διὰ τὸ θυμὸν ἔχειν ὄπλον ἔχει τὸ κέντρον. Ἐχουσι δὲ τὰ μὲν ἐν ἑαυτοῖς τὰ κέντρα, καθάπερ αἱ μέλιτται καὶ οἱ σφήκες, διὰ τὸ πτηνὰ εἶναι. Λεπτὰ μὲν γὰρ ὄντα καὶ ἔξω εὐφθαρτα <ἂν> ἦν. Εἰ δ' ἀπεῖχεν ὥς περ τοῖς σκορπίοις, βάρος ἂν παρεῖχεν. Τοῖς δὲ σκορπίοις πεζοῖς οὖσι καὶ κέρκον ἔχουσιν ἀναγκαῖον ἐπὶ ταύτῃ ἔχειν τὸ κέντρον, ἢ μὴτὲν χρήσιμον εἶναι πρὸς τὴν ἀλκὴν.

Δίπτερον δ' οὐθέν ἐστιν ὀπισθόκεντρον. Διὰ τὸ ἀσθενῆ γὰρ καὶ μικρὰ εἶναι δίπτερά ἐστιν· ἱκανὰ γὰρ τὰ μικρὰ αἵρεσθαι ὑπὸ τῶν ἐλαττόνων τὸν ἀριθμόν. Διὰ ταῦτό δὲ τοῦτο καὶ ἔμπροσθεν ἔχει τὸ κέντρον· ἀσθενῆ γὰρ ὄντα μόλις δύναται τοῖς ἔμπροσθεν τύπτειν. Τὰ δὲ πολύπτερα, διὰ τὸ μείζω τὴν φύσιν εἶναι, πλειόνων τετύχηκε πτερῶν καὶ ἰσχύει τοῖς ὀπισθεν μορίοις. Βέλτιον δ' ἐνδεχομένου μὴ ταῦτό ὄργανον ἐπὶ ἀνομοίας ἔχειν χρήσεις, ἀλλὰ τὸ μὲν ἀμυντικὸν ὀξύτατον, τὸ δὲ γλωττικὸν σομφὸν καὶ σπαστικὸν τῆς τροφῆς. Ὅπου γὰρ ἐνδέχεται χρῆσθαι δυσὶν ἐπὶ δύο ἔργα καὶ μὴ ἐμποδίζειν πρὸς ἕτερον, οὐδὲν ἢ φύσις εἴωθε ποιεῖν ὥς περ ἡ χαλκευτικὴ πρὸς εὐτέλειαν ὀβελισκολύχνιον. Ἀλλ' ὅπου μὴ ἐνδέχεται, καταχρῆται τῷ αὐτῷ ἐπὶ πλείω ἔργα.

Τοὺς δὲ πόδας τοὺς προσθίους μείζους ἔνια τούτων ἔχει, ὅπως ἐπειδὴ διὰ τὸ σκληρόφθαλμα εἶναι οὐκ ἀκριβῆ τὴν ὄψιν ἔχουσι, τὰ προσπίπτοντα τοῖς προσθίοις ἀποκαθαίρωσι σκέλεσιν· ὅπερ καὶ φαίνονται ποιοῦσαι αἱ τε μυῖαι καὶ τὰ μελιττώδη τῶν ζώων· αἱ γὰρ χαρακίζουνσι τοῖς προσθίοις σκέλεσιν. Τὰ δ' ὀπίσθια μείζω τῶν μέσων διὰ τε τὴν βάδισιν καὶ πρὸς τὸ αἵρεσθαι ῥᾶον ἀπὸ τῆς γῆς ἀναπετόμενα. Ὅσα δὲ πηδητικὰ αὐτῶν, ἔτι μᾶλλον τοῦτο φανερόν, οἷον αἱ τ' ἀκρίδες καὶ τὸ τῶν ψυλλῶν γένος· ὅταν γὰρ κάμψαντ' ἐκτείνειν πάλιν, ἀναγκαῖον ἀπὸ τῆς γῆς ἦρθαι. Οὐκ ἔμπροσθεν δ' ἄλλ'

ὅπισθεν μόνον ἔχουσι τὰ πηδαλιώδη αἱ ἀκρίδες.

(683b.) Τὴν γὰρ καμπὴν ἀναγκαῖον εἶσω κεκλάσθαι, τῶν δὲ προσθίων κώλων οὐδέν ἐστι τοιοῦτον. Ἐξάποδα δὲ τὰ τοιαῦτα πάντ' ἐστὶ σὺν τοῖς ἀλτικοῖς μορίοις.

Κεφάλαιο 7

Τῶν δὲ ὀστρακοδέρμων οὐκ ἔστι τὸ σῶμα πολυμερές. Τούτου δ' αἴτιον τὸ μόνιμον αὐτῶν εἶναι τὴν φύσιν· πολυμερέστερα γὰρ ἀναγκαῖον εἶναι τῶν ζῶων τὰ κινητικὰ διὰ τὸ εἶναι αὐτῶν πράξεις· ὀργάνων γὰρ δεῖται πλειόνων τὰ πλειόνων μετέχοντα κινήσεων. Τούτων δὲ τὰ μὲν ἀκίνητα πάμπαν ἐστί, τὰ δὲ μικρᾷ μετέχει κινήσεως· ἀλλ' ἡ φύσις πρὸς σωτηρίαν αὐτοῖς τὴν τῶν ὀστράκων σκληρότητα περιέθηκεν. Εἰσὶ δὲ τὰ μὲν μονόθυρα τὰ δὲ δίθυρα αὐτῶν τὰ δὲ στρομβώδη, καθάπερ εἴρηται πρότερον. Καὶ τούτων τὰ μὲν ἐλίκην ἔχοντα, οἷον κήρυκες, τὰ δὲ σφαιροειδῆ μόνον, καθάπερ τὸ τῶν ἐχίνων γένος. Καὶ τῶν διθύρων τὰ μὲν ἐστὶν ἀναπτυκτά, οἷον κτένες καὶ μῦες (ἐπὶ θάτερα γὰρ συγκέκλεισται, ὥστε ἀνοίγεσθαι ἐπὶ θάτερα καὶ συγκλείεσθαι), τὰ δ' ἐπ' ἄμφω συμπέφυκεν, οἷον τὸ τῶν σωλήνων γένος. Ἄπαντα δὲ τὰ ὀστρακόδερμα, καθάπερ τὰ φυτὰ, κάτω τὴν κεφαλὴν ἔχει. Τούτου δ' αἴτιον ὅτι κάτωθεν λαμβάνει τὴν τροφήν, ὥσπερ τὰ φυτὰ ταῖς ῥίζαις. Συμβαίνει οὖν αὐτοῖς τὰ μὲν κάτω ἄνω ἔχειν, τὰ δ' ἄνω κάτω. Ἐν ὑμένι δ' ἐστί, δι' οὗ διηθεῖ τὸ πότιμον καὶ λαμβάνει τὴν τροφήν. Ἐχει δὲ κεφαλὴν μὲν πάντα, τὰ δὲ τοῦ σώματος μόρια παρὰ τὸ τῆς τροφῆς δεκτικὸν ἀνώνυμα τᾶλλα.

Κεφάλαιο 8

Τὰ δὲ μαλακόστρακα πάντα καὶ πορευτικά, διὸ ποδῶν ἔχει πλῆθος. Ἔστι δὲ γένη μὲν τέτταρα τὰ μέγιστ' αὐτῶν, οἳ τε καλούμενοι κάραβοι καὶ ἀστακοὶ καὶ καρίδες καὶ καρκίνοι. Τούτων δ' ἐκάστου πλείω εἶδη ἐστὶ διαφέροντα οὐ μόνον κατὰ τὴν μορφήν ἀλλὰ καὶ κατὰ τὸ μέγεθος πολὺ· τὰ μὲν γὰρ μεγάλα τὰ δὲ μικρὰ πάνπαν αὐτῶν ἐστίν.

Τὰ μὲν οὖν καρκινώδη καὶ караβώδη παρόμοι' ἐστὶ τῷ χηλάς ἔχειν ἀμφοτέρα. Ταύτας δ' οὐ πορείας ἔχουσι χάριν, ἀλλὰ πρὸς τὸ λαβεῖν καὶ κατασχεῖν ἀντὶ χειρῶν. Διὸ καὶ κάμπτουσιν ἐναντίως ταύτας τοῖς ποσίν· τοὺς μὲν γὰρ ἐπὶ τὸ κοῖλον τὰς δ' ἐπὶ τὸ περιφερὲς κάμπτουσι καὶ ἐλίσσουσιν.

Οὕτως γὰρ χρήσιμαί πρὸς τὸ λαβοῦσαι προσφέρεσθαι τὴν (684a.) τροφήν. Διαφέρουσι δ' ἢ οἱ μὲν κάραβοι ἔχουσιν οὐράν, οἱ δὲ καρκίνοι οὐκ ἔχουσιν οὐράν. Τοῖς μὲν γὰρ διὰ τὸ νευστικοῖς εἶναι χρήσιμος ἡ οὐρά (νέουσι γὰρ ἀπερειδόμενοι οἷον πλάταις αὐταῖς), τοῖς δὲ καρκίνοις οὐδὲν χρήσιμον διὰ τὸ πρόσγειον εἶναι τὸν βίον αὐτῶν καὶ εἶναι τρωγλοδύτας.

Ὅσοι δ' αὐτῶν πελάγιοι εἰσι, διὰ τοῦτο πολὺ ἀργότερους ἔχουσι τοὺς πόδας αὐτῶν πρὸς τὴν πορείαν, οἷον αἱ τε μαῖαι καὶ οἱ Ἑρακλεωτικοὶ καλούμενοι καρκίνοι, ὅτι ὀλίγη κινήσει χρῶνται, ἀλλ' ἡ σωτηρία αὐτοῖς τῷ ὀστρειδώδεις εἶναι γίνεται· διὸ αἱ μὲν μαῖαι λεπτοσκελεῖς, οἱ δὲ Ἑρακλεωτικοὶ μικροσκελεῖς εἰσιν. Οἱ δὲ πάνπαν μικροὶ καρκίνοι οἱ ἀλίσκονται ἐν τοῖς μικροῖς ἰχθυδίοις, ἔχουσι τοὺς τελευταίους πλατεῖς πόδας, ἵνα πρὸς τὸ νεῖν αὐτοῖς χρήσιμοι ᾖσιν, ὥσπερ πτερύγια ἢ πλάτας ἔχοντες τοὺς πόδας. Αἱ δὲ καρίδες τῶν μὲν καρκινοειδῶν διαφέρουσι τῷ ἔχειν κέρκον, τῶν δὲ караβοειδῶν διὰ τὸ μὴ ἔχειν χηλάς· ὥς οὐκ ἔχουσι διὰ τὸ πλείους ἔχειν πόδας· ἐνταῦθα γὰρ ἡ ἐκεῖθεν ἀνήλωται αὐξησης. Πλείους δ' ἔχουσι πόδας ὅτι μὴ νευστικώτερα ἐστίν ἢ πορευτικώτερα. Τὰ δ' ἐν τοῖς ὑπτίοις μόρια καὶ περὶ τὴν κεφαλὴν τὰ μὲν εἰς τὸ δέξασθαι τὸ ὕδωρ καὶ ἀφεῖναι ἔχουσι βραγχοειδῆ· πλακωδέστερα δὲ τὰ κάτω αἱ θήλειαι τῶν ἀρρένων καράβων ἔχουσι, καὶ τὰ ἐν τῷ ἐπιπτύγματι δασύτερα αἱ θήλειαι καρκίνοι τῶν ἀρρένων, διὰ τὸ ἐκτείνειν τὰ φὰ πρὸς αὐτά, ἀλλὰ μὴ ἄποθεν, ὥσπερ οἱ ἰχθύες καὶ τᾶλλα τὰ τίκοντα·

εὐρυχωρέστερα γὰρ ὄντα καὶ μείζω χώραν ἔχει τοῖς φύοις μᾶλλον. Οἱ μὲν οὖν κάραβοι καὶ οἱ καρκίνοι πάντες τὴν δεξιὰν ἔχουσι χηλὴν μείζω καὶ ἰσχυροτέραν· τοῖς γὰρ δεξιοῖς πάντα πέφυκε τὰ ζῷα δρᾶν μᾶλλον, ἢ δὲ φύσις ἀποδίδωσιν αἰ τοῖς χρῆσθαι δυναμένοις ἕκαστον ἢ μόνως ἢ μᾶλλον, οἷον χαυλιόδοντας καὶ ὀδόντας καὶ κέρατα καὶ πληκτρα καὶ πάντα τὰ τοιαῦτα μόρια, ὅσα πρὸς βοήθειαν καὶ ἀλκὴν εἰσιν. Οἱ δ' ἄστακοὶ μόνοι, ὁποτέραν ἂν τύχωσιν, ἔχουσι μείζω τῶν χηλῶν, καὶ αἱ θήλειαι καὶ οἱ ἄρρενες.

Αἴτιον δὲ τοῦ μὲν ἔχειν χηλὰς ὅτι ἐν τῷ γένει εἰσὶ τῷ ἔχοντι χηλὰς. Τοῦτο δ' ἀτάκτως ἔχουσιν, ὅτι πεπῆρωνται, καὶ οὐ (684b.) χρῶνται ἐφ' ὃ πεφύκασιν, ἀλλὰ πορείας χάριν. Καθ' ἕκαστον δὲ τῶν μορίων, τίς ἢ θέσις αὐτῶν καὶ τίνες διαφοραὶ πρὸς ἄλληλα, τῶν τ' ἄλλων καὶ τίνι διαφέρει τὰ ἄρρενα τῶν θηλειῶν, ἕκ τε τῶν ἀνατομῶν θεωρεῖσθω καὶ ἐκ τῶν ἱστοριῶν τῶν περὶ τὰ ζῷα.

Κεφάλαιο 9

Τῶν δὲ μαλακίων περὶ μὲν τῶν ἐντὸς εἴρηται πρότερον, ὥσπερ καὶ περὶ τῶν ἄλλων ζῶων. Ἐκτὸς δ' ἔχει τό τε τοῦ σώματος κύτος, ἀδιόριστον ὄν, καὶ τούτου πόδας ἔμπροσθεν περὶ τὴν κεφαλὴν, ἐντὸς μὲν τῶν ὀφθαλμῶν, περὶ δὲ τὸ στόμα καὶ τοὺς ὀδόντας. Τὰ μὲν οὖν ἄλλα ζῶα τὰ ἔχοντα πόδας τὰ μὲν ἔμπροσθεν ἔχει καὶ ὀπισθεν, τὰ δ' ἐκ τοῦ πλαγίου, ὥσπερ τὰ πολύποδα καὶ ἄναιμα τῶν ζῶων. Τοῦτο δὲ τὸ γένος ἰδίως τούτων· πάντας γὰρ ἔχουσι τοὺς πόδας ἐπὶ τὸ καλούμενον ἔμπροσθεν. Τούτου δ' αἴτιον ὅτι συνήκται αὐτῶν τὸ ὀπισθεν πρὸς τὸ ἔμπροσθεν, ὥσπερ τῶν ὀστρακοδέρμων τοῖς στρομβώδεσιν.

Ὅλως γὰρ τὰ ὀστρακόδερμα ἔχει τῇ μὲν ὁμοίως τοῖς μαλακοστράκοις, τῇ δὲ τοῖς μαλακίοις. Ἦι μὲν γὰρ ἔξωθεν τὸ γεῶδες ἐντὸς δὲ τὸ σαρκῶδες, τοῖς μαλακοστράκοις, τὸ δὲ σχῆμα τοῦ σώματος ὄν τρόπον συνέστηκε, τοῖς μαλακίοις, τρόπον μὲν τινα πάντα, μάλιστα δὲ τῶν στρομβωδῶν τὰ ἔχοντα τὴν ἐλίκην. Ἀμφοτέρων γὰρ τοῦτον ἔχει τὸν τρόπον ἢ φύσις, ὥσπερ εἰ τις νοήσειεν ἐπ' εὐθείας, καθάπερ συμβέβηκεν ἐπὶ τῶν τετραπόδων ζῶων καὶ τῶν ἀνθρώπων, πρῶτον μὲν ἐπὶ τῷ ἄκρῳ τῷ ἄνω στόμα τι τῆς εὐθείας κατὰ τὸ Α, ἔπειτα τὸ Β τὸν στόμαχον, τὸ δὲ Γ τὴν κοιλίαν· ἀπὸ δὲ τοῦ ἐντέρου μέχρι τῆς διεξόδου τοῦ περιτώματος, ἧ τὸ Δ.

Τοῦτον μὲν οὖν τὸν τρόπον ἔχει τοῖς ἐναίμοις ζῴοις· καὶ περὶ τοῦτό ἐστιν ἡ κεφαλὴ καὶ ὁ θώραξ καλούμενος. Τὰ δὲ λοιπὰ μόρια τούτων τε χάριν καὶ ἔνεκα τῆς κινήσεως προσέθηκεν ἡ φύσις, οἷον τὰ τε πρόσθια κῶλα καὶ τὰ ὀπισθεν. Βούλεται δὲ καὶ τοῖς μαλακοστράκοις καὶ τοῖς ἐντόμοις ἢ γ' εὐθυωρία τῶν ἐντοσθιδίων τὸν αὐτὸν ἔχειν τρόπον, κατὰ δὲ τὰς ὑπηρεσίας τὰς ἔξωθεν κινητικὰς διαφέρει τῶν ἐναίμων. Τὰ δὲ μαλάκιά τε καὶ στρομβώδη τῶν ὀστρακοδέρμων ἔχει αὐτοῖς μὲν παραπλησίως, τούτοις δ' (685a.) ἀντεστραμμένως. Κέκαμπται γὰρ ἡ τελευτὴ πρὸς τὴν ἀρχήν, ὥσπερ ἂν εἰ τις τὴν εὐθεῖαν ἐφ' ἧς τὸ Ε κάμψας προσαγάγοι τὸ Δ πρὸς τὸ Α. Οὕτως γὰρ κειμένων νῦν τῶν ἐντοσθίων, περὶκεῖται τοῖς μὲν μαλακίοις τὸ κύτος, ὃ καλεῖται μόνον ἐπὶ τῶν πολυπόδων κεφαλὴ· τοῖς δ' ὀστρακοδέρμοις τὸ τοιοῦτόν ἐστιν ὁ στρόμβος. Διαφέρει δὲ

οὐδὲν ἄλλο πλὴν ὅτι τοῖς μὲν μαλακὸν τὸ περίξ, τοῖς δὲ σκληρὸν περὶ τὸ σαρκῶδες περιέθηκεν ἡ φύσις, ὅπως σφίζεται διὰ τὴν δυσκινησίαν· καὶ διὰ τοῦτο τὸ περίττωμα τοῖς τε μαλακίοις ἐξέρχεται περὶ τὸ στόμα καὶ τοῖς στρομβώδεσι, πλὴν τοῖς μὲν μαλακίοις κάτωθεν, τοῖς δὲ στρομβώδεσιν ἐκ τοῦ πλαγίου.

Διὰ ταύτην μὲν οὖν τὴν αἰτίαν τοῖς μαλακίοις οἱ πόδες τοῦτον ἔχουσι τὸν τρόπον, καὶ ὑπεναντίως ἢ τοῖς ἄλλοις.

Ἔχουσι δ' ἀνομοίως αἱ σηπία καὶ αἱ τευθίδες τοῖς πολύποσι διὰ τὸ νευστικάι μόνον εἶναι, τοὺς δὲ καὶ πορευτικούς. Αἱ μὲν γὰρ τοὺς ἄνωθεν τῶν ποδῶν μικροὺς ἔχουσι, καὶ τούτων τοὺς ἐσχάτους δύο μείζους, τοὺς δὲ λοιποὺς τῶν ὀκτῶ δύο κάτωθεν μεγίστους τούτων. Ὡς περ γὰρ τοῖς τετράποσι τὰ ὀπίσθια ἰσχυρότερα κῶλα, καὶ ταύταις μέγιστοι οἱ κάτωθεν· τὸ γὰρ φορτίον οὗτοι ἔχουσι καὶ κινουσι μάλιστα, καὶ οἱ ἔσχατοι δύο μείζους τῶν μέσων, ὅτι τούτοις συνυπηρετοῦσιν.

Ὁ δὲ πολύπους τοὺς ἐν μέσῳ τέτταρας μεγίστους. Πόδας μὲν οὖν πάντα ἔχουσι ταῦτα ὀκτώ, ἀλλ' αἱ μὲν σηπία καὶ αἱ τευθίδες βραχεῖς, τὰ δὲ πολυποδώδη μεγάλους. Τὸ γὰρ κύτος τοῦ σώματος αἱ μὲν μέγα ἔχουσιν οἱ δὲ μικρόν, ὥστε τοῖς μὲν ἀφεῖλεν ἀπὸ τοῦ σώματος, πρὸς δὲ τὸ μῆκος τῶν ποδῶν προσέθηκεν ἡ φύσις, ταῖς δ' ἀπὸ τῶν ποδῶν λαβοῦσα τὸ σῶμα ἠΰξησεν. Διόπερ τοῖς μὲν οὐ μόνον πρὸς τὸ νεῖν χρήσιμοι οἱ πόδες ἀλλὰ καὶ πρὸς τὸ βαδίζειν, ταῖς δ' ἄχρηστοι· μικροὶ γάρ, τὸ δὲ κύτος μέγα ἔχουσιν. Ἐπεὶ δὲ βραχεῖς ἔχουσι τοὺς πόδας καὶ ἀχρήστους πρὸς τὸ ἀντιλαμβάνεσθαι καὶ μὴ ἀντισπᾶσθαι ἀπὸ τῶν πετρῶν, ὅταν κλύδων ἦ καὶ χειμῶν, καὶ πρὸς τὸ τὰ ἄποθεν προσάγεσθαι, διὰ ταῦτα προβοσκίδας ἔχουσι δύο μακράς, αἷς ὀρμουσί τε καὶ ἀποσαλεύουσιν ὥς περ πλοῖον ὅταν χειμῶν ἦ, καὶ τὰ ἄποθεν (685b.) θηρεύουσι καὶ προσάγονται ταύταις αἷ τε σηπία καὶ αἱ τευθίδες. Οἱ δὲ πολύποδες οὐκ ἔχουσι τὰς προβοσκίδας διὰ τὸ τοὺς πόδας αὐτοῖς εἶναι πρὸς ταῦτα χρήσιμους.

Ὅσοις δὲ κοτυληδόνες πρὸς τοῖς ποσὶ καὶ πλεκτάναι πρόσεισι, δύναμιν ἔχουσι καὶ σύνθεσιν τοιαύτην οἷαν περ τὰ πλεγμάτια οἷς οἱ ἄτροι οἱ ἀρχαῖοι τοὺς δακτύλους ἐνέβαλλον· οὕτως καὶ ἐκ τῶν ἰνῶν πεπλεγμέναι εἰσὶν, αἷς ἔλκουσι τὰ σαρκία καὶ τὰ ἐνδιδόντα. Περιλαμβάνει μὲν γὰρ χαλαρὰ ὄντα· ὅταν δὲ συντείνη, πιέζει καὶ ἔχεται τοῦ ἐντὸς θιγγάνοντος παντός. Ὡς τ' ἐπεὶ ἄλλο οὐκ ἔστιν ὃ προσάγονται, ἀλλ' ἢ τὰ μὲν τοῖς ποσὶ τὰ δὲ ταῖς προβοσκίσιν, ταύτας

ἔχουσι πρὸς ἀλκὴν καὶ τὴν ἄλλην βοήθειαν ἀντὶ χειρῶν. Τὰ μὲν οὖν ἄλλα δικότυλά ἐστι, γένος δέ τι πολυπόδων μονοκότυλον. Αἴτιον δὲ τὸ μῆκος καὶ ἡ λεπτότης τῆς φύσεως αὐτῶν· μονοκότυλον γὰρ ἀναγκαῖον εἶναι τὸ στενόν. Οὐκ οὖν ὥς βέλτιστον ἔχουσιν, ἀλλ' ὥς ἀναγκαῖον διὰ τὸν ἴδιον λόγον τῆς οὐσίας.

Πτερύγιον δ' ἔχουσι ταῦτα πάντα κύκλω περὶ τὸ κῦτος. Τοῦτο δ' ἐπὶ μὲν τῶν ἄλλων συναπτόμενον καὶ συνεχές ἐστι, καὶ ἐπὶ τῶν μεγάλων τευθῶν· αἱ δ' ἐλάττους καὶ καλούμεναι τευθίδες πλατύτερόν τε τοῦτο ἔχουσι καὶ οὐ στενόν, ὥσπερ αἱ σηπίαί καὶ οἱ πολύποδες, καὶ τοῦτ' ἀπὸ μέσου ἠργμένον, καὶ οὐ κύκλω διὰ παντός. Τοῦτο δ' ἔχουσιν ὅπως νέωσι καὶ πρὸς τὸ διορθοῦν, ὥσπερ τοῖς μὲν πτηνοῖς τὸ ὀρροπύγιον, τοῖς δ' ἰχθύσι τὸ οὐραῖον. Ἐλάχιστον δὲ τοῦτο καὶ ἥκιστα ἐπίδηλον τοῖς πολύποσιν ἐστὶ διὰ τὸ μικρὸν ἔχειν τὸ κῦτος καὶ διορθοῦσθαι τοῖς ποσὶν ἱκανῶς.

Περὶ μὲν οὖν τῶν ἐντόμων καὶ μαλακοστράκων καὶ ὀστρακοδέρμων καὶ μαλακίων εἴρηται, καὶ περὶ τῶν ἐντὸς μορίων καὶ τῶν ἐκτός.

Κεφάλαιο 10

Πάλιν δ' ἐξ ὑπαρχῆς περὶ τῶν ἐναίμων καὶ ζωοτόκων ἐπισκεπτέον, ἀρξαμένοις ἀπὸ τῶν ὑπολοίπων καὶ πρότερον εἰρημένων μορίων· τούτων δὲ διορισθέντων περὶ τῶν ἐναίμων καὶ ὠοτόκων τὸν αὐτὸν τρόπον ἐροῦμεν.

Τὰ μὲν οὖν μόρια τὰ περὶ τὴν κεφαλὴν τῶν ζώων εἴρηται πρότερον, καὶ τὰ περὶ τὸν καλούμενον αὐχένα καὶ τράχηλον.

Ἔχει δὲ κεφαλὴν πάντα τὰ ἐναίμα ζῶα· τῶν δ' ἀναίμων (686a.) ἐνίοις ἀδιόριστον τοῦτο τὸ μόριον, οἷον τοῖς καρκίνοις.

Αὐχένα οὖν τὰ μὲν ζωοτόκα πάντ' ἔχει, τῶν δ' ὠοτόκων τὰ μὲν ἔχει, τὰ δ' οὐκ ἔχει· ὅσα μὲν γὰρ πλεύμονα ἔχει, καὶ αὐχένα ἔχει, τὰ δὲ μὴ ἀναπνέοντα θύραθεν οὐκ ἔχει τοῦτο τὸ μόριον. Ἔστι δ' ἡ μὲν κεφαλὴ μάλιστα τοῦ ἐγκεφάλου χάριν· ἀνάγκη γὰρ τοῦτο τὸ μόριον ἔχειν τοῖς ἐναίμοις, καὶ ἐν ἀντικειμένῳ τόπῳ τῆς καρδίας, διὰ τὰς εἰρημένας πρότερον αἰτίας. Ἐξέθετο δ' ἡ φύσις ἐν αὐτῇ καὶ τῶν αἰσθήσεων ἐνίας διὰ τὸ σύμμετρον εἶναι τὴν τοῦ αἵματος κρᾶσιν καὶ ἐπιτηδεῖαν πρὸς τε τὴν τοῦ ἐγκεφάλου ἀλέαν καὶ πρὸς τὴν τῶν αἰσθήσεων ἡσυχίαν καὶ ἀκρίβειαν. Ἔτι δὲ τρίτον μόριον ὑπέθηκε τὸ τὴν τῆς τροφῆς εἴσοδον δημιουργοῦν· ἐνταῦθα γὰρ ὑπέκειτο συμμέτρως μάλιστα. Οὔτε γὰρ ἄνωθεν κεῖσθαι τῆς καρδίας καὶ τῆς ἀρχῆς ἐνεδέχeto τὴν κοιλίαν, οὔτε κάτωθεν οὔσης ὄν τρόπον ἔχει νῦν, ἐνεδέχeto τὴν εἴσοδον εἶτι κάτω εἶναι τῆς καρδίας· πολὺ γὰρ τὸ μῆκος ἦν τοῦ σώματος, καὶ πόρρω λίαν τῆς κινούσης ἀρχῆς καὶ πεπτουσης.

Ἡ μὲν οὖν κεφαλὴ τούτων χάριν ἐστίν, ὁ δ' αὐχὴν τῆς ἀρτηρίας χάριν· πρόβλημα γὰρ ἐστὶ, καὶ σφάζει ταύτην καὶ τὸν οἰσοφάγον κύκλῳ περιέχων. Τοῖς μὲν οὖν ἄλλοις ἐστὶ καμπτὸς καὶ σφονδύλους ἔχων, οἱ δὲ λύκοι καὶ λέοντες μονοστοῦν τὸν αὐχένα ἔχουσιν· ἔβλεψε γὰρ ἡ φύσις ὅπως πρὸς τὴν ἰσχὺν χρήσιμον αὐτὸν ἔχωσι μᾶλλον ἢ πρὸς τὰς ἄλλας βοηθείας.

Ἐχόμενα δὲ τοῦ αὐχένος καὶ τῆς κεφαλῆς τὰ τε πρόσθια κῶλα τοῖς ζώοις ἐστὶ καὶ θώραξ. Ὁ μὲν οὖν ἄνθρωπος ἀντὶ σκελῶν καὶ ποδῶν τῶν προσθίων βραχίονας καὶ τὰς καλουμένας ἔχει χεῖρας. Ὅρθον μὲν γὰρ ἐστὶ μόνον τῶν ζώων διὰ τὸ τὴν φύσιν αὐτοῦ καὶ τὴν οὐσίαν εἶναι θεῖαν· ἔργον δὲ τοῦ θειοτάτου τὸ νοεῖν καὶ φρονεῖν·

τοῦτο δ' οὐ ῥάδιον πολλοῦ τοῦ ἄνωθεν ἐπικειμένου σώματος· τὸ γὰρ βάρος δυσκίνητον ποιεῖ τὴν διάνοιαν καὶ τὴν κοινὴν αἴσθησιν. Διὸ πλείονος γινομένου τοῦ βάρους καὶ τοῦ σωματώδους ἀνάγκη ῥέπειν τὰ σώματα πρὸς τὴν γῆν, ὥστε πρὸς τὴν ἀσφάλειαν ἀντὶ βραχιόνων καὶ χειρῶν τοὺς προσθίους πόδας ὑπέθηκεν ἡ φύσις τοῖς τετράποσιν. Τοὺς μὲν γὰρ ὀπισθίους δύο πᾶσιν ἀναγκαῖον τοῖς πορευτικοῖς ἔχειν, τὰ δὲ (686b.) τοιαῦτα τετράποδα ἐγένετο οὐ δυναμένης φέρειν τὸ βάρος τῆς ψυχῆς.

Πάντα γάρ ἐστι τὰ ζῶα νανώδη τᾶλλα παρὰ τὸν ἄνθρωπον· νανῶδες γάρ ἐστιν οὗ τὸ μὲν ἄνω μέγα, τὸ δὲ φέρον τὸ βάρος καὶ πεζεῦον μικρόν. Ἄνω δ' ἐστὶν ὁ καλούμενος θώραξ, ἀπὸ τῆς κεφαλῆς μέχρι τῆς ἐξόδου τοῦ περιττώματος. Τοῖς μὲν οὖν ἀνθρώποις τοῦτο πρὸς τὸ κάτω σύμμετρον, καὶ πολλῶ ἑλαττόν ἐστι τελειουμένοις· νέοις δ' οὗσι τοῦναντίον τὰ μὲν ἄνω μέγαλα, τὸ δὲ κάτω μικρόν. Διὸ καὶ ἔρπουσι, βαδίζειν δ' οὐ δύνανται. Τὸ δὲ πρῶτον οὐδ' ἔρπουσιν, ἀλλ' ἀκινήτίζουσιν· νάνοι γὰρ εἰσι τὰ παιδία πάντα. Προϊοῦσι δὲ τοῖς μὲν ἀνθρώποις αὖξεται τὰ κάτωθεν· τοῖς δὲ τετράποσι τοῦναντίον τὰ κάτω μέγιστα τὸ πρῶτον, προϊόντα δ' αὖξεται ἐπὶ τὸ ἄνω, τοῦτο δ' ἐστὶ τὸ ἀπὸ τῆς ἔδρας ἐπὶ τὴν κεφαλὴν κύτος. Διὸ καὶ τῷ ὕψει οἱ πᾶλοι τῶν ἵππων οὐδὲν ἢ μικρόν ἐλάττους εἰσί, καὶ νέοι μὲν ὄντες θιγγάνουσι τῷ ὀπισθεν σκέλει τῆς κεφαλῆς, πρεσβύτεροι δ' ὄντες οὐ δύνανται. Τὰ μὲν οὖν μώνυχα καὶ διχηλὰ τοῦτον ἔχει τὸν τρόπον, τὰ δὲ πολυδάκτυλα καὶ ἀκέρατα νανώδη μὲν ἐστίν, ἥττον δὲ τούτων· διὸ καὶ τὴν αὖξησιν πρὸς τὰ ἄνω τὰ κάτω κατὰ λόγον ποιεῖται τῆς ἐλλείψεως. Ἔστι δὲ καὶ τὸ τῶν ὀρνίθων καὶ τὸ τῶν ἰχθύων γένος καὶ πᾶν τὸ ἔναιμον, ὥσπερ εἴρηται, νανῶδες. Διὸ καὶ ἀφρονέστερα πάντα τὰ ζῶα τῶν ἀνθρώπων ἐστίν. Καὶ γὰρ τῶν ἀνθρώπων, οἷον τὰ τε παιδία πρὸς τοὺς ἄνδρας καὶ αὐτῶν τῶν ἐν ἡλικίᾳ οἱ νανώδεις τὴν φύσιν, ἐὰν καὶ τιν' ἄλλην δύναμιν ἔχωσι περιττὴν, ἀλλὰ τῷ τὸν νοῦν ἔχειν ἐλλείπουσιν. Αἴτιον δ' ὥσπερ εἴρηται πρότερον, ὅτι ἡ τῆς ψυχῆς ἀρχὴ πολλῶ δὴ δυσκίνητός ἐστι καὶ σωματώδης.

Ἔτι δ' ἐλάττονος γινομένης τῆς αἰρούσης θερμότητος καὶ τοῦ γεώδους πλείονος, τὰ τε σώματα ἐλάττονα τῶν ζώων ἐστὶ καὶ πολυπόδα, τέλος δ' ἄποδα γίγνεται καὶ τεταμένα πρὸς τὴν γῆν. Μικρόν δ' οὕτω προβαίνοντα καὶ τὴν ἀρχὴν ἔχουσι κάτω, καὶ τὸ κατὰ τὴν κεφαλὴν μόριον τέλος ἀκίνητόν ἐστι καὶ ἀναίσθητον, καὶ

γίνεται φυτόν, ἔχον τὰ μὲν ἄνω κάτω, τὰ δὲ κάτω ἄνω· αἱ γὰρ ρίζαι τοῖς φυτοῖς στόματος καὶ (687a.) κεφαλῆς ἔχουσι δύναμιν, τὸ δὲ σπέρμα τοῦναντίον· ἄνω γὰρ καὶ ἐπ' ἄκροις γίνεται τοῖς πτόρθοις. Δι' ἣν μὲν οὖν αἰτίαν τὰ μὲν δίποδα τὰ δὲ πολύποδα τὰ δ' ἄποδα τῶν ζώων ἐστί, καὶ διὰ τίν' αἰτίαν τὰ μὲν φυτὰ τὰ δὲ ζῷα γέγονεν, εἴρηται, καὶ διότι μόνον ὀρθόν ἐστι τῶν ζώων ὁ ἄνθρωπος.

Ὅρθῳ δ' ὄντι τὴν φύσιν οὐδεμία χρεία σκελῶν τῶν ἐμπροσθίων, ἀλλ' ἀντὶ τούτων βραχίονας καὶ χεῖρας ἀποδέδωκεν ἡ φύσις. Ἀναξαγόρας μὲν οὖν φησι διὰ τὸ χεῖρας ἔχειν φρονιμώτατον εἶναι τῶν ζώων ἄνθρωπον· εὐλογον δὲ διὰ τὸ φρονιμώτατον εἶναι χεῖρας λαμβάνειν. Αἱ μὲν γὰρ χεῖρες ὄργανόν εἰσιν, ἡ δὲ φύσις αἰεὶ διανέμει, καθάπερ ἄνθρωπος φρόνιμος, ἕκαστον τῷ δυναμένῳ χρῆσθαι. Προσῆκει γὰρ τῷ ὄντι αὐλητῇ δοῦναι μᾶλλον αὐλοῦς ἢ τῷ αὐλοῦς ἔχοντι προσθεῖναι αὐλητικὴν· τῷ γὰρ μείζονι καὶ κυριωτέρῳ προσέθηκε τοῦλαττον, ἀλλ' οὐ τῷ ἐλάττονι τὸ τιμιώτερον καὶ μείζον. Εἰ οὖν οὕτως βέλτιον, ἡ δὲ φύσις ἐκ τῶν ἐνδεχομένων ποιεῖ τὸ βέλτιστον, οὐ διὰ τὰς χεῖράς ἐστιν ὁ ἄνθρωπος φρονιμώτατος, ἀλλὰ διὰ τὸ φρονιμώτατον εἶναι τῶν ζώων ἔχει χεῖρας. Ὁ γὰρ φρονιμώτατος πλείστοις ἂν ὀργάνοις ἐχρήσατο καλῶς, ἡ δὲ χεὶρ ἔοικεν εἶναι οὐχ ἓν ὄργανον ἀλλὰ πολλά· ἐστὶ γὰρ ὥσπερ ὄργανον πρὸ ὀργάνων. Τῷ οὖν πλείστας δυναμένῳ δέξασθαι τέχνας τὸ ἐπὶ πλείστον τῶν ὀργάνων χρήσιμον τὴν χεῖρα ἀποδέδωκεν ἡ φύσις. Ἀλλ' οἱ λέγοντες ὡς συνέστηκεν οὐ καλῶς ὁ ἄνθρωπος ἀλλὰ χεῖριστα τῶν ζώων (ἀνυπόδητόν τε γὰρ αὐτὸν εἶναι φασὶ καὶ γυμνὸν καὶ οὐκ ἔχοντα ὄπλον πρὸς τὴν ἀλκὴν) οὐκ ὀρθῶς λέγουσιν.

Τὰ μὲν γὰρ ἄλλα μίαν ἔχει βοήθειαν, καὶ μεταβάλλεσθαι ἀντὶ ταύτης ἑτέραν οὐκ ἔστιν, ἀλλ' ἀναγκαῖον ὥσπερ ὑποδεδεμένον αἰεὶ καθεύδειν καὶ πάντα πράττειν, καὶ τὴν περὶ τὸ σῶμα ἀλεωρὰν μηδέποτε καταθέσθαι, μηδὲ μεταβάλλεσθαι ὃ δὴ ἐτύγχανεν ὄπλον ἔχον. Τῷ δὲ ἀνθρώπῳ τὰς τε βοηθείας (687b.) πολλὰς ἔχειν, καὶ ταύτας αἰεὶ ἔξεστι μεταβάλλειν, ἔτι δ' ὄπλον οἷον ἂν βούληται καὶ ὅπου ἂν βούληται ἔχειν. Ἡ γὰρ χεὶρ καὶ ὄνυξ καὶ χηλὴ καὶ κέρασ γίνεται καὶ δόρυ καὶ ξίφος καὶ ἄλλο ὅποιονοῦν ὄπλον καὶ ὄργανον· πάντα γὰρ ἔσται ταῦτα διὰ τὸ πάντα δύνασθαι λαμβάνειν καὶ ἔχειν.

Ταύτῃ δὲ συμμεμηχανῆσθαι καὶ τὸ εἶδος τῇ φύσει τῆς χειρός. Διαιρετὴ γὰρ καὶ πολυσχιδής· ἐνὶ γὰρ ἐν τῷ διαιρετῇ εἶναι καὶ συνθετὴν εἶναι, ἐν τούτῳ δ' ἐκεῖνο οὐκ ἔστιν. Καὶ χρῆσθαι ἐνὶ καὶ

δυοῖν καὶ πολλαχῶς ἔστιν. Καὶ αἱ καμπαὶ τῶν δακτύλων καλῶς ἔχουσι πρὸς τὰς λήψεις καὶ πιέσεις.

Καὶ ἐκ πλαγίου εἷς, καὶ οὗτος βραχὺς καὶ παχὺς ἀλλ' οὐ μακρός· ὥσπερ γὰρ εἰ μὴ ἦν χεὶρ ὅλως, οὐκ ἂν ἦν λήψις, οὕτως κἂν εἰ μὴ ἐκ πλαγίου οὗτος ἦν. Οὗτος γὰρ κάτωθεν ἄνω πιέζει, ὅπερ οἱ ἕτεροι ἄνωθεν κάτω· δεῖ δὲ τοῦτο συμβαίνειν, εἰ μέλλει ἰσχυρῶς ὥσπερ σῶμα ἰσχυρὸν συνδεῖν, ἵνα ἰσάξη εἷς ὢν πολλοῖς. Καὶ βραχὺς διὰ τε τὴν ἰσχὺν καὶ διότι οὐδὲν ὄφελος εἰ μακρός. Καὶ ὁ ἔσχατος δὲ μικρὸς ὀρθῶς, καὶ ὁ μέσος μακρός, ὥσπερ κώπη μεσόνεως· μάλιστα γὰρ τὸ λαμβανόμενον ἀνάγκη περιλαμβάνεσθαι κύκλῳ κατὰ τὸ μέσον πρὸς τὰς ἐργασίας. Καὶ διὰ τοῦτο καλεῖται μέγας μικρὸς ὢν, ὅτι ἄχρηστοι ὡς εἰπεῖν οἱ ἄλλοι ἄνευ τούτου. Εὖ δὲ καὶ τὸ τῶν ὀνύχων μεμηχάνηται· τὰ μὲν γὰρ ἄλλα ζῶα ἔχει καὶ πρὸς χρῆσιν αὐτούς, τοῖς δ' ἀνθρώποις ἐπικαλυπτήρια· σκέπασμα γὰρ τῶν ἀκρωτηρίων εἰσίν.

Αἱ δὲ καμπαὶ τῶν βραχιόνων ἔχουσι πρὸς τε τὴν τῆς τροφῆς προσαγωγὴν καὶ πρὸς τὰς ἄλλας χρήσεις ἐναντίως τοῖς τετράποσιν. Ἐκείνοις μὲν γὰρ ἀναγκαῖον εἶσω κάμπτειν τὰ ἐμπρόσθια κῶλα· χρῶνται γὰρ ποσίν, ἵν' ἢ χρήσιμα πρὸς τὴν πορείαν, ἐπεὶ θέλει γε κἀκείνων τοῖς πολυδακτύλοις οὐ μόνον πρὸς τὴν πορείαν χρήσιμ' εἶναι τὰ ἐμπροσθεν σκέλη, ἀλλὰ καὶ ἀντὶ χειρῶν, ὥσπερ καὶ φαίνεται χρώμενα· καὶ γὰρ (688a.) λαμβάνουσι καὶ ἀμύνονται τοῖς προσθίοις. Τὰ δὲ μώνυχα τοῖς ὀπισθίοις· οὐ γὰρ ἔχει αὐτοῖς τὰ πρόσθια σκέλη ἀνάλογον τοῖς ἀγκῶσι καὶ ταῖς χερσίν. Τῶν δὲ πολυδακτύλων ἓνα καὶ διὰ τοῦτο καὶ πενταδακτύλους ἔχει τοὺς προσθίους πόδας, τοὺς δ' ὀπισθεν τετραδακτύλους, οἷον λέοντες καὶ λύκοι, ἔτι δὲ κύνες καὶ παρδάλεις· ὁ γὰρ πέμπτος ὥσπερ ὁ τῆς χειρὸς γίνεται μέγας πέμπτος. Τὰ δὲ μικρὰ τῶν πολυδακτύλων καὶ τοὺς ὀπισθίους ἔχει πενταδακτύλους διὰ τὸ ἐρπυστικὰ εἶναι, ὅπως τοῖς ὄνυξι πλείοσιν οὖσιν ἀντιλαμβάνόμενα ῥῶον ἀνέρπη πρὸς τὸ μετεωρότερον καὶ ὑπὲρ κεφαλῆς.

Μεταξὺ δὲ τῶν ἀγκῶνων τοῖς ἀνθρώποις, τοῖς δ' ἄλλοις τῶν ἐμπροσθίων σκελῶν, τὸ καλούμενον στῆθός ἐστι, τοῖς μὲν ἀνθρώποις ἔχον πλάτος εὐλόγως (οὐ γὰρ κωλύουσιν οἱ ἀγκῶνες ἐκ πλαγίου προσκείμενοι τοῦτον εἶναι τὸν τόπον πλατύν), τοῖς δὲ τετράποσι διὰ τὴν ἐπὶ τὸ πρόσθιον τῶν κώλων ἔκτασιν ἐν τῷ πορεύεσθαι καὶ μεταβάλλειν τὸν τόπον στενὸν τοῦτ' ἔστι τὸ μόριον.

Καὶ διὰ τοῦτο τὰ μὲν τετράποδα τῶν ζώων οὐκ ἔχει μαστοὺς ἐν τῷ τόπῳ τούτῳ· τοῖς δ' ἀνθρώποις διὰ τὴν εὐρυχωρίαν καὶ τὸ σκεπάζεσθαι δεῖν τὰ περὶ τὴν καρδίαν, διὰ τοῦτο ὑπάρχοντος τοῦ τόπου σαρκώδους οἱ μαστοὶ διήρθρωνται, σαρκώδεις ὄντες τοῖς μὲν ἄρρεσι διὰ τὴν εἰρημένην αἰτίαν, ἐπὶ δὲ τῶν θηλειῶν παρακέχρηται καὶ πρὸς ἕτερον ἔργον ἢ φύσις, ὅπερ φαμέν αὐτὴν πολλάκις ποιεῖν· ἀποτίθεται γὰρ ἐνταῦθα τοῖς γεννωμένοις τροφήν.

Δύο δ' εἰσὶν οἱ μαστοὶ διὰ τὸ δύο τὰ μόρια εἶναι, τό τ' ἀριστερὸν καὶ τὸ δεξιόν. Καὶ σκληρότεροι μὲν, διωρισμένοι δὲ διὰ τὸ καὶ τὰς πλευρὰς συνάπτεσθαι μὲν ἀλλήλας κατὰ τὸν τόπον τοῦτον, μὴ ἐπίπονον δ' εἶναι τὴν φύσιν αὐτῶν.

Τοῖς δ' ἄλλοις ζώοις ἐν μὲν τῷ στήθει μεταξὺ τῶν σκελῶν ἀδύνατόν ἐστιν ἔχειν τοὺς μαστοὺς (ἐμποδίζοιεν μὲν γὰρ ἂν πρὸς τὴν πορείαν), ἔχουσι δ' ἤδη πολλοὺς τρόπους. Τὰ μὲν γὰρ ὀλιγοτόκα καὶ μώνυχα καὶ κερατοφόρα ἐν τοῖς μηροῖς ἔχουσι τοὺς μαστοὺς, καὶ τούτους δύο, τὰ δὲ πολυτόκα ἢ πολυσχιδῇ τὰ μὲν περὶ τὴν γαστέρα πλαγίους καὶ πολλοὺς, οἷον ὕς καὶ κύων, τὰ δὲ δύο μόνους, περὶ μέσην μέντοι (688b.) γαστέρα, οἷον λέγων. Τούτου δ' αἴτιον οὐχ ὅτι ὀλιγοτόκον, ἐπεὶ τίκτει ποτὲ πλείω δυοῖν, ἀλλ' ὅτι οὐ πολυγάλακτον· ἀναλίσκει γὰρ εἰς τὸ σῶμα τὴν λαμβανομένην τροφήν, λαμβάνει δὲ σπάνιον διὰ τὸ σαρκοφάγον εἶναι. Ὁ δ' ἐλέφας δύο μόνον ἔχει, τούτους δ' ὑπὸ ταῖς μασχάλαις τῶν ἐμπροσθίων σκελῶν. Αἴτιον δὲ τοῦ μὲν δύο ἔχειν ὅτι μονοτόκον ἐστί, τοῦ δὲ μὴ ἐν τοῖς μηροῖς ὅτι πολυσχιδὲς (οὐδὲν γὰρ ἔχει πολυσχιδὲς ἐν τοῖς μηροῖς), ἄνω δὲ πρὸς ταῖς μασχάλαις, ὅτι πρῶτοι οὗτοι τῶν μαστῶν τοῖς πολλοὺς ἔχουσι μαστοὺς, καὶ ἰμῶνται γάλα πλεῖστον. Σημεῖον δὲ τὸ ἐπὶ τῶν ὕων συμβαῖνον· τοῖς γὰρ πρώτοις γενομένοις τῶν χοίρων τοὺς πρώτους παρέχουσι μαστοὺς· ὃ οὖν τὸ πρῶτον γιγνόμενον ἐν μόνον ἐστί, τούτῳ τοὺς μαστοὺς ἀναγκαῖον ἔχειν τοὺς πρώτους· πρῶτοι δ' εἰσὶν οἱ ὑπὸ ταῖς μασχάλαις. Ὁ μὲν οὖν ἐλέφας διὰ ταύτην τὴν αἰτίαν δύο ἔχει καὶ ἐν τούτῳ τῷ τόπῳ, τὰ δὲ πολυτόκα περὶ τὴν γαστέρα. Τούτου δ' αἴτιον ὅτι πλειόνων δεῖ μαστῶν τοῖς πλείω μέλλουσιν ἐκτρέφειν· ἐπεὶ οὖν ἐπὶ πλάτος οὐχ οἷον τε ἀλλ' ἢ δύο μόνους ἔχειν διὰ τὸ δύο εἶναι τό τ' ἀριστερὸν καὶ τὸ δεξιόν, ἐπὶ μῆκος ἀναγκαῖον ἔχειν· ὁ δὲ μεταξὺ τόπος τῶν ἐμπροσθεν σκελῶν καὶ τῶν ὀπισθεν ἔχει μῆκος μόνον. Τὰ δὲ μὴ πολυσχιδῇ ἀλλ' ὀλιγοτόκα ἢ κερατοφόρα καὶ ἐν τοῖς μηροῖς ἔχει τοὺς μαστοὺς, οἷον ἵππος ὄνος κάμηλος (ταῦτα γὰρ

μονοτόκα, καὶ τὰ μὲν μώνυχα, τὸ δὲ διχηλόν), ἔτι δ' ἔλαφος καὶ βοῦς καὶ αἰξ καὶ τᾶλλα πάντα τὰ τοιαῦτα. Αἴτιον δ' ὅτι τούτοις ἡ αὔξησις ἐπὶ τὸ ἄνω τοῦ σώματός ἐστιν. Ὡσθ' ὅπου συλλογὴ καὶ περιουσία γίνεται τοῦ περιττώματος καὶ αἵματος (οὗτος δ' ὁ τόπος ἐστὶν ὁ κάτω καὶ περὶ τὰς ἐκροάς), ἐνταῦθα ἐποίησεν ἡ φύσις τοὺς μαστούς. Ὅπου γὰρ κίνησις γίνεται τῆς τροφῆς, ἐντεῦθεν καὶ λαβεῖν ἐστὶν αὐτοῖς δυνατόν. Ἄνθρωπος μὲν οὖν καὶ ὁ θῆλυς καὶ ὁ ἄρρην ἔχει μαστούς, ἐν δὲ τοῖς ἄλλοις ἓνα τῶν ἀρρένων οὐκ ἔχει, οἷον ἵπποι οἱ μὲν οὐκ ἔχουσιν οἱ δ' ἔχουσιν, ὅσοι ἐοίκασι τῇ μητρί.

Καὶ περὶ μὲν μαστῶν εἴρηται, μετὰ δὲ τὸ στήθος ὁ περὶ τὴν κοιλίαν ἐστὶ τόπος, ἀσύγκλειστος ταῖς πλευραῖς διὰ τὴν εἰρημένην ἔμπροσθεν αἰτίαν, ὅπως μὴ ἐμποδίζωσι μήτε (689a.) τὴν ἀνοίδησιν τῆς τροφῆς, ἣν ἀναγκαῖον συμβαίνειν θερμαινομένης αὐτῆς, μήτε τὰς ὑστέρας τὰς περὶ τὴν κύησιν. Τέλος δὲ τοῦ καλουμένου θώρακός ἐστι τὰ μόρια τὰ περὶ τὴν τῆς περιττώσεως ἐξοδον, τῆς τε ξηρᾶς καὶ τῆς ὑγρᾶς.

Καταχρῆται δ' ἡ φύσις τῷ αὐτῷ μορίῳ ἐπὶ τε τὴν τῆς ὑγρᾶς ἐξοδον περιττώσεως καὶ περὶ τὴν ὀχεῖαν, ὁμοίως ἔν τε τοῖς θήλεσι καὶ τῶν ἀρρένων, ἔξω τινῶν ὀλίγων πᾶσι τοῖς ἐναίμοις, ἐν δὲ τοῖς ζωοτόκοις πᾶσιν. Αἴτιον δ' ὅτι ἡ γονὴ ὑγρόν ἐστὶ τι καὶ περιττώμα· τοῦτο δὲ νῦν μὲν ὑποκείσθω, ὕστερον δὲ δειχθήσεται περὶ αὐτοῦ. Τὸν αὐτὸν δὲ τρόπον καὶ ἐν τοῖς θήλεσι τὰ τε καταμήνια, καὶ ἣ προῖενται τὴν γονὴν· διορισθήσεται δὲ καὶ περὶ τούτων ὕστερον, νῦν δὲ ὑποκείσθω μόνον ὅτι περιττώμα καὶ τὰ καταμήνια τοῖς θήλεσιν· ὑγρά δὲ τὴν φύσιν τὰ καταμήνια καὶ ἡ γονή, ὥστε τῶν αὐτῶν καὶ τῶν ὁμοίων εἰς ταῦτα τὰ μόρια τὴν ἐκκρίσιν εἶναι κατὰ λόγον ἐστίν. Ἐντὸς δὲ πῶς ἔχει, καὶ πῇ διαφέρουσι τὰ τε περὶ τὸ σπέρμα καὶ τὰ περὶ τὴν κύησιν, ἐκ τε τῆς ἱστορίας τῆς περὶ τὰ ζῷα φανερόν καὶ τῶν ἀνατομῶν, καὶ ὕστερον λεχθήσεται ἐν τοῖς περὶ γενέσεως. Ὅτι δ' ἔχει καὶ τὰ σχήματα τῶν μορίων τούτων πρὸς τὴν ἐργασίαν ἀναγκαίως, οὐκ ἄδηλον. Ἐχει δὲ διαφορὰς τὸ τῶν ἀρρένων ὄργανον κατὰ τὰς τοῦ σώματος διαφοράς. Οὐ γὰρ ὁμοίως ἅπαντα νευρώδη τὴν φύσιν ἐστίν. Ἔτι δὲ μόνον τοῦτο τῶν μορίων ἄνευ νοσερᾶς μεταβολῆς αὔξησιν ἔχει καὶ ταπεινῶσιν· τούτων γὰρ τὸ μὲν χρήσιμον πρὸς τὸν συνδυασμόν, τὸ δὲ πρὸς τὴν τοῦ ἄλλου σώματος χρείαν· αἰεὶ γὰρ ὁμοίως ἔχοντα ἐνεπόδιζεν ἄν. Συνέστηκε δὲ τὴν φύσιν ἐκ τοιούτων τὸ μόριον τοῦτο ὥστε δύνασθαι ταῦτ' ἀμφοτέρω

συμβαίνειν· τὸ μὲν γὰρ ἔχει νευρῶδες τὸ δὲ χονδρῶδες, διόπερ συνιέναι τε δύναται καὶ ἔκτασιν ἔχειν καὶ πνεύματός ἐστι δεκτικόν. Τὰ μὲν οὖν θήλεα τῶν τετραπόδων πάντ' ἐστὶν ὀπισθοθηρικά διὰ τὸ πρὸς τὴν ὀχείαν οὕτως εἶναι αὐτοῖς χρησίμην τὴν θέσιν, τῶν δ' ἄρρένων ὀλίγα ἐστὶν ὀπισθοθηρικά, οἷον λυγρὸν λέων κάμηλος δασύπους· μῶνονυχον δ' οὐδέν ἐστιν ὀπισθοθηρικόν.

(689b.) Τὰ δ' ὀπισθεν καὶ τὰ περὶ τὰ σκέλη τοῖς ἀνθρώποις ἰδίως ἔχει πρὸς τὰ τετράποδα. Κέρκον δ' ἔχει πάντα σχεδόν, οὐ μόνον τὰ ζωοτόκα ἀλλὰ καὶ τὰ ψοτόκα· καὶ γὰρ ἂν μὴ μέγεθος αὐτοῖς ἔχον ἦ τοῦτο τὸ μόριον, ἀλλὰ σημείου γ' ἔνεκεν ἔχουσί τινα στόλον. Ὁ δ' ἄνθρωπος ἄκερκον μὲν ἐστίν, ἰσχία δ' ἔχει, τῶν δὲ τετραπόδων οὐδέν. Ἔτι δὲ καὶ τὰ σκέλη ὁ μὲν ἄνθρωπος σαρκώδη καὶ μηροὺς καὶ κνήμας, τὰ δ' ἄλλα πάντ' ἄσαρκα ἔχει, οὐ μόνον τὰ ζωοτόκα ἀλλ' ὅλως ὅσα σκέλη ἔχει τῶν ζώων· νευρώδη γὰρ ἔχει καὶ ὀστώδη καὶ ἀκανθώδη. Τούτων δ' αἰτία μία τίς ἐστίν ὡς εἰπεῖν ἀπάντων, διότι μόνον ἐστὶν ὀρθὸν τῶν ζώων ἄνθρωπος. Ἴν' οὖν φέρῃ ῥαδίως τᾶνω κοῦφα ὄντα, ἀφελοῦσα τὸ σωματῶδες ἀπὸ τῶν ἄνω πρὸς τὰ κάτω τὸ βάρος ἢ φύσις προσέθηκεν· διόπερ τὰ ἰσχία σαρκώδη ἐποίησε καὶ μηροὺς καὶ γαστροκνημίας. Ἄμα δὲ τὴν τε τῶν ἰσχυῶν φύσιν καὶ πρὸς τὰς ἀναπαύσεις ἀπέδωκε χρήσιμον· τοῖς μὲν γὰρ τετράποσιν ἄκοπον τὸ ἐστάναι, καὶ οὐ κάμνουσι τοῦτο ποιοῦντα συνεχῶς (ὥσπερ γὰρ κατακεείμενα διατελεῖ ὑποκειμένων τεττάρων ἐρεισμάτων), τοῖς δ' ἀνθρώποις οὐ ῥαδίον ὀρθῶς ἐστῶσι διαμένειν, ἀλλὰ δεῖται τὸ σῶμα ἀναπαύσεως καὶ καθέδρας.

Ὁ μὲν οὖν ἄνθρωπος ἰσχία τ' ἔχει τὰ σκέλη σαρκώδη διὰ τὴν εἰρημένην αἰτίαν, καὶ διὰ ταῦτα ἄκερκον (ἢ τε γὰρ ἐκεῖ τροφὴ πορευομένη εἰς ταῦτα ἀναλίσκεται, καὶ διὰ τὸ ἔχειν ἰσχία ἀφήρηται ἢ τῆς οὐρᾶς ἀναγκαία χρῆσις), τὰ δὲ τετράποδα καὶ τᾶλλα ζῶα ἐξ ἐναντίας· νανώδεσι γὰρ οὕσι πρὸς τὸ ἄνω τὸ βάρος καὶ τὸ σωματῶδες ἐπίκειται πᾶν, ἀφηρημένον ἀπὸ τῶν κάτωθεν· διόπερ ἀνίσχια καὶ σκληρὰ τὰ σκέλη ἔχουσιν.

Ὅπως δ' ἐν φυλακῇ καὶ σκέπη ἦ τὸ λειτουργοῦν μόριον τὴν ἔξοδον τοῦ περιττώματος, τὴν καλουμένην οὐρὰν καὶ κέρκον αὐτοῖς ἀπέδωκεν ἢ φύσις, ἀφελομένη τῆς εἰς τὰ σκέλη γιγνομένης τροφῆς. Ὁ δὲ πίθηκος διὰ τὸ τὴν μορφήν ἐπαμφοτερίζειν καὶ μηδετέρων τ' εἶναι καὶ ἀμφοτέρων, διὰ τοῦτ' οὔτε οὐρὰν ἔχει οὔτ' ἰσχία, ὡς μὲν δίπους ὦν οὐράν, ὡς δὲ τετράπους ἰσχία. Τῶν δὲ καλουμένων

κέρκων διαφοραί (690a.) τ' εἰσὶ πλείους καὶ ἡ φύσις παρακαταχρῆται καὶ ἐπὶ τούτων, οὐ μόνον πρὸς φυλακὴν καὶ σκέπην τῆς ἔδρας, ἀλλὰ καὶ πρὸς ὠφέλειαν καὶ χρῆσιν τοῖς ἔχουσιν.

Οἱ δὲ πόδες τοῖς μὲν τετράποσι διαφέρουσιν· τὰ μὲν γὰρ μώνυχα αὐτῶν ἐστὶ τὰ δὲ διχηλὰ τὰ δὲ πολυχιδῆ, μώνυχα μὲν ὅσοις διὰ μέγεθος καὶ τὸ πολὺ γεῶδες ἔχειν ἀντὶ κεράτων καὶ ὀδόντων εἰς τὴν τοῦ ὄνυχος φύσιν τὸ τοιοῦτον μόριον ἔλαβεν ἀπόκρισιν, καὶ διὰ πλῆθος ἀντὶ πλειόνων ὀνύχων εἷς ὄνυξ ἡ ὀπλή ἐστίν.

Καὶ ἀστράγαλον δὲ διὰ τοῦτο οὐκ ἔχουσιν ὥς ἐπὶ τὸ πολὺ εἰπεῖν, διὰ τὸ δυσκινητοτέραν εἶναι τὴν καμπὴν τοῦ ὀπισθεν σκέλους ἀστραγάλου ἐνότος· θάττον γὰρ ἀνοίγεται καὶ κλείεται τὰ μίαν ἔχοντα γωνίαν ἢ πλείους, ὁ δ' ἀστράγαλος γόμφος ὢν ὥσπερ ἀλλότριον κῶλον ἐμβέβληται τοῖς δυσί, βάρος μὲν παρέχον, ποιοῦν δ' ἀσφαλεστέραν τὴν βάσιν. Διὰ γὰρ τοῦτο καὶ ἐν τοῖς ἐμπροσθίοις οὐκ ἔχουσιν ἀστράγαλον τὰ ἔχοντα ἀστράγαλον, ἀλλ' ἐν τοῖς ὀπισθεν, ὅτι δεῖ ἐλαφρὰ εἶναι τὰ ἡγούμενα καὶ εὐκαμπτα, τὸ δ' ἀσφαλὲς καὶ τὴν τάσιν ἐν τοῖς ὀπισθεν. Ἔτι δὲ πρὸς τὸ ἀμύνεσθαι ἐμβριθεστέραν ποιεῖ τὴν πληγὴν· τὰ δὲ τοιαῦτα τοῖς ὀπισθεν χρῆται κώλοις, λακτίζοντα τὸ λυποῦν. Τὰ δὲ διχηλὰ ἔχει ἀστράγαλον (κουφότερα γὰρ τὰ ὀπισθεν), καὶ διὰ τὸ ἔχειν ἀστράγαλον καὶ οὐ μώνυχά ἐστιν, ὥς τὸ ἐκλείπον ὀστῶδες ἐκ τοῦ ποδὸς ἐν τῇ κάμψει μένον. Τὰ δὲ πολυδάκτυλα οὐκ ἔχει ἀστράγαλον· οὐ γὰρ ἂν ἦν πολυδάκτυλα, ἀλλὰ τοσοῦτον ἐσχίζετο τὸ πλάτος ὅσον ἐπέχει ὁ ἀστράγαλος. Διὸ καὶ τῶν ἐχόντων αὐτὸν τὰ πλείω διχηλὰ.

Ὁ δ' ἄνθρωπος πόδας μεγίστους ἔχει τῶν ζώων ὥς κατὰ μέγεθος, εὐλόγως· μόνον γὰρ ἔστηκεν ὀρθόν, ὥστε τοὺς μέλλοντας δύ' ὄντας ἔξειν πᾶν τὸ τοῦ σώματος βάρος δεῖ μῆκος ἔχειν καὶ πλάτος. Καὶ τὸ τῶν δακτύλων δὴ μέγεθος ἐναντίως ἔχει ἐπὶ τε τῶν ποδῶν καὶ τῶν χειρῶν κατὰ λόγον· τῶν μὲν γὰρ τὸ λαμβάνειν ἔργον καὶ πιέζειν, ὥστε δεῖ μακροὺς (690b.) ἔχειν (τῷ γὰρ καμπτομένῳ μέρει περιλαμβάνει ἡ χεὶρ), τῶν δὲ τὸ βεβηκέναι ἀσφαλῶς, ὥστε τοῦτο δεῖ τὸ μόριον εἶναι νομίζειν τὸ ἄσχιτον τοῦ ποδὸς τῶν δακτύλων. Ἐσχίσθαι δὲ βέλτιον ἢ ἄσχιτον εἶναι τὸ ἔσχατον· ἅπαν γὰρ ἂν συμπαθεῖς ἦν ἐνὸς μορίου πονήσαντος, ἐσχισμένων δ' εἰς δακτύλους τοῦτ' οὐ συμβαίνει ὁμοίως. Ἔτι δὲ καὶ βραχεῖς ὄντες ἤττον συμβλάπτοντο· διὸ πολυχιδεῖς οἱ πόδες τῶν ἀνθρώπων, οὐ μακροδάκτυλοι δ' εἰσίν. Τὸ δὲ τῶν ὀνύχων γένος διὰ τὴν αὐτὴν

αίτιαν καὶ ἐπὶ τῶν χειρῶν ἔχουσιν· δεῖ γὰν σκέπεσθαι τὰ ἀκρωτήρια
μάλιστα διὰ τὴν ἀσθένειαν.

Κεφάλαιο 11

Περὶ μὲν οὖν τῶν ἐναίμων ζώων καὶ ζωοτόκων καὶ πεζῶν εἴρηται σχεδὸν περὶ πάντων.

Τῶν δ' ἐναίμων ζώων φωτόκων δὲ τὰ μὲν ἐστὶ τετράποδα τὰ δ' ἄποδα. Τοιοῦτον δ' ἐν μόνον γένος ἐστὶν ἄπουν, τὸ τῶν ὄφεων· ἡ δ' αἰτία τῆς ἀποδίας αὐτῶν εἴρηται ἐν τοῖς περὶ τῆς πορείας τῶν ζώων διωρισμένοις. Τὰ δ' ἄλλα παραπλησίαν ἔχει τὴν μορφήν τοῖς τετράποσι καὶ φωτόκοις.

Ἐχει δὲ τὰ ζῶα ταῦτα κεφαλὴν μὲν καὶ τὰ ἐν αὐτῇ μόρια διὰ τὰς αὐτὰς αἰτίας τοῖς ἄλλοις τοῖς ἐναίμοις ζώοις, καὶ γλῶτταν ἐν τῷ στόματι πλὴν τοῦ ποταμίου κροκοδείλου· οὗτος δ' οὐκ ἂν δόξειεν ἔχειν, ἀλλὰ τὴν χώραν μόνον. Αἴτιον δ' ὅτι τρόπον μὲν τινα ἅμα χερσαῖος καὶ ἐνυδρὸς ἐστὶν· διὰ μὲν οὖν τὸ χερσαῖος εἶναι ἔχει χώραν γλώττης, διὰ δὲ τὸ ἐνυδρὸς ἄγλωττος. Οἱ γὰρ ἰχθύες, καθάπερ εἴρηται πρότερον, οἱ μὲν οὐ δοκοῦσιν ἔχειν, ἂν μὴ σφόδρα ἀνακλίνηταις, οἱ δ' ἀδιάρθρωτον ἔχουσιν. Αἴτιον δ' ὅτι ὀλίγη ἦν χρεία τούτοις τῆς γλώττης διὰ τὸ μὴ ἐνδέχεσθαι μασᾶσθαι μηδὲ προγεύεσθαι, ἀλλ' ἐν τῇ καταπόσει γίνεσθαι τὴν αἴσθησιν καὶ τὴν ἡδονὴν πᾶσι τούτοις τῆς τροφῆς. Ἡ μὲν γὰρ γλῶττα τῶν χυμῶν ποιεῖ τὴν αἴσθησιν, τῶν δὲ ἐδεστῶν ἐν τῇ καθόδῳ ἡ ἡδονή· καταπινομένων γὰρ αἰσθάνονται τῶν λιπαρῶν καὶ θερμῶν καὶ τῶν ἄλλων τῶν τοιούτων. Ἐχει μὲν οὖν καὶ τὰ ζωοτόκα ταύτην τὴν αἴσθησιν, καὶ σχεδὸν τῶν (691a.) πλείστων ὄψων καὶ ἐδεστῶν ἐν τῇ καταπόσει τῇ τάσει τοῦ οἰσοφάγου γίνεται ἡ χάρις. Διὸ οὐχ οἱ αὐτοὶ περὶ τὰ πόματα καὶ τοὺς χυμοὺς ἀκρατεῖς εἰσι καὶ τὰ ὄψα καὶ τὴν ἐδωδὴν, ἀλλὰ τοῖς μὲν ἄλλοις ζώοις καὶ ἡ κατὰ τὴν γεῦσιν ὑπάρχει αἴσθησις, ἐκείνοις δ' ὥσπερ ἀνὴρ ἡ ἑτέρα. Τῶν δὲ τετραπόδων καὶ φωτόκων οἱ σαῦροι, ὥσπερ οἱ ὄφεις, δικρόαν ἔχουσι τὴν γλῶτταν καὶ ἐπ' ἄκρου τριγῶδὴ πᾶμπαν, καθάπερ εἴρηται πρότερον. Ἐχουσι δὲ καὶ αἱ φῶκαι δικρόαν τὴν γλῶτταν· διὸ καὶ λίχνα πάντα τὰ ζῶα ἐστὶ ταῦτα. Ἔστι δὲ καὶ καρχαρόδοντα τὰ τετράποδα τῶν φωτόκων, ὥσπερ οἱ ἰχθύες.

Τὰ δ' αἰσθητήρια πάντα ὁμοίως ἔχουσι τοῖς ἄλλοις ζώοις, οἷον τῆς ὀσφρήσεως μυκτῆρας καὶ ὄψεως ὀφθαλμοὺς καὶ ἀκοῆς ὦτα, πλὴν οὐκ ἐπανεστηκότα, καθάπερ οὐδ' οἱ ὄρνιθες, ἀλλὰ τὸν πόρον μόνον. Αἴτιον δ' ἀμφοτέροις ἡ τοῦ δέρματος σκληρότης· τὰ μὲν γὰρ

περωτὰ αὐτῶν ἐστι, ταῦτα δὲ πάντα φολιδωτά, ἔστι δ' ἡ φολὶς ὁμοιον χώρα λεπίδος, φύσει δὲ σκληρότερον. Δηλοῖ δ' ἐπὶ τῶν χελωνῶν τοῦτο καὶ ἐπὶ τῶν μεγάλων ὄφεων καὶ τῶν ποταμίων κροκοδείλων· ἰσχυρότεραι γὰρ γίνονται τῶν ὀστέων ὥς οὔσαι τοιαῦτα τὴν φύσιν.

Οὐκ ἔχουσι δὲ τὰ ζῷα ταῦτα τὴν ἄνω βλεφαρίδα, ὥσπερ οὐδ' οἱ ὀρνιθες, ἀλλὰ τῇ κάτω μύουσι διὰ τὴν αἰτίαν τὴν εἰρημένην ἐπ' ἐκείνων. Τῶν μὲν οὖν ὀρνίθων ἔνιοι καὶ σκαρδαμύττουσιν ὑμένι ἐκ τῶν κανθῶν, ταῦτα δὲ τὰ ζῷα οὐ σκαρδαμύττει· σκληροφθαλμότερα γάρ ἐστι τῶν ὀρνίθων. Αἴτιον δ' ὅτι ἐκείνοις χρησιμωτέρα ἡ ὀξυωπία πτηνοῖς οὔσι πρὸς τὸν βίον, τούτοις δ' ἦττον· τρωγλόδута γὰρ πάντα τὰ τοιαῦτά ἐστιν.

Εἰς δύο δὲ διηρημένης τῆς κεφαλῆς, τοῦ τε ἄνω μορίου καὶ τῆς σιαγόνης τῆς κάτω, ἄνθρωπος μὲν οὖν καὶ τὰ ζῷα τῶν τετραπόδων καὶ ἄνω καὶ κάτω κινουσι τὰς σιαγόνας καὶ εἰς τὸ πλάγιον, οἱ δ' ἰχθύες καὶ ὀρνιθες καὶ τὰ ὀτόκα τῶν τετραπόδων εἰς τὸ ἄνω καὶ κάτω μόνον. Αἴτιον δ' ὅτι ἡ μὲν τοιαύτη κίνησις χρήσιμος εἰς τὸ δακεῖν καὶ (691b.) διελεῖν, ἡ δ' εἰς τὸ πλάγιον ἐπὶ τὸ λαβεῖν. Τοῖς μὲν οὖν ἔχουσι γομφίους χρήσιμος ἡ εἰς τὸ πλάγιον κίνησις, τοῖς δὲ μὴ ἔχουσιν οὐδὲν χρήσιμος, διόπερ ἀφήρηται πάντων τῶν τοιούτων· οὐδὲν γὰρ ποιεῖ περίεργον ἡ φύσις. Τὰ μὲν οὖν ἄλλα πάντα κινεῖ τὴν σιαγόνα τὴν κάτω, ὁ δὲ ποτάμιος κροκόδειλος μόνος τὴν ἄνω. Τούτου δ' αἴτιον ὅτι πρὸς τὸ λαβεῖν καὶ κατασχεῖν ἀχρήστους ἔχει τοὺς πόδας· μικροὶ γάρ εἰσι πάμπαν. Πρὸς οὖν ταύτας τὰς χρείας ἀντὶ ποδῶν τὸ στόμα ἡ φύσις χρήσιμον αὐτῷ ἐποίησεν. Πρὸς δὲ τὸ κατασχεῖν ἢ λαβεῖν, ὅποτερωθεν ἂν ἦ ἡ πληγὴ ἰσχυροτέρα, ταύτη χρησιμωτέρα κινουμένη ἐστίν· ἡ δὲ πληγὴ ἰσχυροτέρα αἰετῶν ἢ κάτωθεν. Ἐπεὶ οὖν ἀμφοτέρων μὲν διὰ τοῦ στόματος ἡ χρῆσις, καὶ τοῦ λαβεῖν καὶ τοῦ δακεῖν, ἀναγκαιοτέρα δ' ἡ τοῦ κατασχεῖν μήτε χειρὸς ἔχοντι μήτε πόδας εὐφυεῖς, χρησιμώτερον τὴν ἄνωθεν κινεῖν σιαγόνα ἢ τὴν κάτωθεν αὐτοῖς. Διὰ τὸ αὐτὸ δὲ καὶ οἱ καρκῖνοι τὸ ἄνωθεν τῆς χηλῆς κινουσι μόριον, ἀλλ' οὐ τὸ κάτωθεν· ἀντὶ χειρὸς γὰρ ἔχουσι τὰς χηλάς, ὥστε πρὸς τὸ λαβεῖν ἀλλ' οὐ πρὸς τὸ διελεῖν χρήσιμον δεῖ εἶναι τὴν χηλὴν. Τὸ δὲ διελεῖν καὶ δακεῖν ὀδόντων ἔργον ἐστίν. Τοῖς μὲν οὖν καρκῖνοις καὶ τοῖς ἄλλοις ὅσοις ἐνδέχεται σχολαίως ποιεῖσθαι τὴν λήψιν διὰ τὸ μὴ ἐν ὑγρῷ εἶναι τὴν χρῆσιν τοῦ στόματος, διήρηται, καὶ λαμβάνουσι μὲν

χερσὶν ἢ ποσί, διαιροῦσι δὲ τῷ στόματι καὶ δάκνουσιν· τοῖς δὲ κροκοδείλοις ἐπ' ἀμφοτέρα χρήσιμον τὸ στόμα πεποίηκεν ἢ φύσις, κινουμένων οὕτω τῶν σιαγόνων.

Ἔχουσι δὲ καὶ αὐχένα πάντα τὰ τοιαῦτα διὰ τὸ πλεύμονα ἔχειν· δέχονται γὰρ τὸ πνεῦμα διὰ τῆς ἀρτήριας μῆκος ἐχούσης. Ἐπεὶ δὲ τὸ μεταξὺ κεφαλῆς καὶ ὤμων κέκληται αὐχὴν, ἥκιστα τῶν τοιούτων ὁ ὄφις δόξειεν ἂν ἔχειν αὐχένα, ἀλλὰ τὸ ἀνάλογον τῷ αὐχένι, εἴ γε δεῖ τοῖς εἰρημένοις ἐσχάτοις διορίζειν τὸ μόνιον τοῦτο. Ἴδιον δὲ πρὸς τὰ συγγενῇ τῶν ζώων ὑπάρχει τοῖς ὄφεσι τὸ στρέφειν τὴν κεφαλὴν (692a.) εἰς τοῦπισθεν ἡρεμοῦντος τοῦ σώματος τοῦ λοιποῦ.

Τούτου δ' αἴτιον ὅτι καθάπερ τὰ ἔντομα ἐλίκτόν ἐστιν, ὥστε εὐκάμπτους καὶ χονδρώδεις τοὺς σπονδύλους ἔχειν. Ἐξ ἀνάγκης μὲν οὖν διὰ ταύτην τὴν αἰτίαν τοῦτο συμβέβηκεν αὐτοῖς, πρὸς δὲ τὸ βέλτιον φυλακῆς τε ἔνεκα τῶν ὀπισθεν βλαπτόντων· μακρὸν γὰρ ὄν καὶ ἄπουν ἀφυές ἐστι πρὸς τε τὴν στροφὴν καὶ πρὸς τὴν τῶν ὀπισθεν τήρησιν. Οὐδὲν γὰρ ὄφελος αἶρειν, στρέφειν δὲ μὴ δύνασθαι τὴν κεφαλὴν.

Ἔχουσι δὲ τὰ τοιαῦτα καὶ τῷ στήθει ἀνάλογον μόνιον. Μαστοὺς δ' οὐτ' ἐνταῦθα οὐτ' ἐν τῷ ἄλλῳ σώματι ἔχουσιν· ἔχει δ' οὐδεὶς οὐδ' ὄρνις οὐδ' ἰχθύς. Τούτου δ' αἴτιον τὸ μὴδὲ γάλα ἔχειν τούτων μὴδέν· ὁ δὲ μαστὸς ὑποδοχὴ καὶ ὥσπερ ἀγγεῖόν ἐστι γάλακτος. Ἔχει δ' οὐδὲ ταῦτα οὐτ' ἄλλο τῶν μὴ ζωοτοκούντων ἐν αὐτοῖς οὐδὲν γάλα, διότι φωτοκοῦσιν, ἐν δὲ τῷ ὧφ ἐγγίνεται ἡ γαλακτώδης ὑπάρχουσα ἐν τοῖς ζωοτόκοις τροφή. Σαφέστερον δὲ περὶ αὐτῶν λεχθήσεται ἐν τοῖς περὶ γενέσεως. Περὶ δὲ τῆς τῶν καμπύλων κάμψεως ἐπέσκεπται πρόσθεν ἐν τοῖς περὶ πορείας κοινῇ πᾶσιν.

Ἔχουσι δὲ καὶ κέρκον τὰ τοιαῦτα, τὰ μὲν μείζω, τὰ δὲ ἐλάττω, ὑπὲρ ἧς τὴν αἰτίαν καθόλου πρότερον εἰρήκαμεν.

Ἰσχνότατος δ' ὁ χαμαιλέων τῶν φωτόκων καὶ πεζῶν ἐστι πάντων· ὀλιγαιμώτατος γὰρ ἐστιν. Αἴτιον δὲ τὸ τῆς ψυχῆς ἥθος ἐστὶν αὐτοῦ· διὰ γὰρ τὸν φόβον γίνεται πολύμορφος.

Κατάψυξις γὰρ ὁ φόβος δι' ὀλιγαιμίαν καὶ δι' ἔνδειάν ἐστι θερμότητος. Καὶ περὶ μὲν τῶν ἐναίμων ζώων τῶν τ' ἀπόδων (692b.) καὶ τετραπόδων, ὅσα τε μόνια αὐτῶν ἐστὶν ἐκτὸς καὶ διὰ τίν' αἰτίαν, εἴρηται σχεδόν.

Κεφάλαιο 12

Ἐν δὲ τοῖς ὄρνισιν ἡ πρὸς ἄλληλα διαφορὰ ἐν τῇ τῶν μορίων ἐστὶν ὑπεροχῇ καὶ ἐλλείψει καὶ κατὰ τὸ μᾶλλον καὶ ἥττον. Εἰσὶ γὰρ αὐτῶν οἱ μὲν μακροσκελεῖς οἱ δὲ βραχυσκελεῖς, καὶ τὴν γλῶτταν οἱ μὲν πλατεῖαν ἔχουσιν οἱ δὲ στενήν· ὡσαύτως δὲ καὶ ἐπὶ τῶν ἄλλων μορίων. Ἰδίᾳ δ' ἐπ' ὀλίγον διαφέρουσιν ἀλλήλων τοῖς μορίοις· πρὸς δὲ τὰ ἄλλα ζῶα καὶ τῇ μορφῇ τῶν μορίων διαφέρουσιν.

Πτερωτοὶ μὲν οὖν ἅπαντές εἰσιν, καὶ τοῦτ' ἴδιον ἔχουσι τῶν ἄλλων. Τὰ γὰρ μόρια τῶν ζώων τὰ μὲν ἐστὶ φολιδωτὰ τὰ δὲ λεπιδωτὰ τυγχάνουσιν ὄντα, οἱ δ' ὄρνιθες πτερωτοί.

Καὶ τὸ πτερὸν σχιστὸν καὶ οὐχ ὅμοιον τῷ εἶδει τοῖς ὀλοπτέροις· τῶν μὲν γὰρ ἄσχιστον τῶν δὲ σχιστόν ἐστι, καὶ τὸ μὲν ἄκαυλον, τὸ δ' ἔχει καυλόν. Ἐχουσι δὲ καὶ ἐν τῇ κεφαλῇ περιττὴν καὶ ἴδιον τὴν τοῦ ῥύγχους φύσιν πρὸς τᾶλλα. Τοῖς μὲν γὰρ ἐλέφασιν ὁ μυκτὴρ ἀντὶ χειρῶν, τῶν δ' ἐντόμων ἐνίοις ἀντὶ στόματος ἢ γλῶττα, τούτοις δ' ἀντὶ ὀδόντων καὶ χειρῶν τὸ ῥύγχος ὅστινον. Περὶ δὲ τῶν αἰσθητηρίων εἴρηται πρόσθεν.

Αὐχένα δὲ τεταμένον ἔχει τῇ φύσει καὶ διὰ τὴν αὐτὴν αἰτίαν ἦνπερ καὶ τᾶλλα· καὶ τοῦτον τὰ μὲν βραχὺν τὰ δὲ μακρόν, καὶ σχεδὸν ἀκόλουθον τοῖς σκέλεσι τὰ πλεῖστα. Τὰ μὲν γὰρ μακροσκελῆ μακρόν, τὰ δὲ βραχυσκελῆ βραχὺν ἔχει τὸν αὐχένα χωρὶς τῶν στεγανόποδων. Τὰ μὲν γὰρ εἰ εἶχε (693a.) βραχὺν ἐπὶ σκέλεσι μακροῖς, οὐκ ἂν ὑπέρτει αὐτοῖς ὁ αὐχὴν πρὸς τὴν ἀπὸ τῆς γῆς νομὴν, τοῖς δ' εἰ μακρὸς ἦν ἐπὶ βραχεσί. Ἔτι τοῖς κρεωφάγοις αὐτῶν ὑπεναντίον τὸ μῆκος πρὸς τὸν βίον· ὁ γὰρ μακρὸς αὐχὴν ἀσθενής· τοῖς δ' ὁ βίος ἐκ τοῦ κρατεῖν ἐστίν. Διόπερ οὐδὲν τῶν γαμψωνύχων μακρόν ἔχει τὸν αὐχένα. Τὰ δὲ στεγανόποδα καὶ διηρημένους μὲν ἔχοντα τοὺς πόδας σεσιμωμένους δέ, ὡς ἐν τῷ αὐτῷ γένει ὄντα τοῖς στεγανόποσι, τὸν μὲν αὐχένα μακρόν ἔχουσιν (χρήσιμος γὰρ τοιοῦτος ὢν πρὸς τὴν τροφήν τὴν ἐκ τοῦ ὕγρου), τὰ δὲ σκέλη πρὸς τὴν νεῦσιν βραχεά.

Διαφορὰν δ' ἔχει καὶ τὰ ῥύγχη κατὰ τοὺς βίους. Τὰ μὲν γὰρ εὐθὺ ἔχει τὰ δὲ γαμψόν, εὐθὺ μὲν ὅσα τροφῆς ἔνεκεν, γαμψόν δὲ τὸ ὠμοφάγον. Χρήσιμον γὰρ πρὸς τὸ κρατεῖν τὸ τοιοῦτον, τὴν δὲ τροφήν ἀναγκαῖον ἀπὸ ζώων πορίζεσθαι.

Ὅσων δὲ ὁ βίος ἔλειος καὶ ποηφάγος, πλατὺ τὸ ρύγχος ἔχουσιν· πρὸς τε γὰρ τὴν ὄρυξιν χρήσιμον τὸ τοιοῦτον καὶ πρὸς τὴν τῆς τροφῆς σπάσιν καὶ κουράν. Ἐνια δὲ μακρὸν ἔχει τὸ ρύγχος τῶν τοιούτων ὥσπερ καὶ τὸν αὐχένα διὰ τὸ λαμβάνειν τὴν τροφήν ἐκ τοῦ βάθους. Καὶ τὰ πολλὰ τῶν τοιούτων καὶ τῶν στεγανοπόδων ἢ ἀπλῶς ἢ κατὰ τὸ μόριον ταῦτο θηρεύοντα ζῇ τῶν ἐν τῷ ὕγρῳ ἔνια ζωδαρίων· καὶ γίνεται τοῖς τοιούτοις ὁ μὲν αὐχὴν καθάπερ ἀλιευταῖς ὁ κάλαμος, τὸ δὲ ρύγχος οἷον ὀρμιὰ καὶ τὸ ἄγκιστρον.

Τὰ δὲ πρηνῇ τοῦ σώματος καὶ τὰ ὕπτια καὶ τὰ τοῦ καλουμένου θώρακος ἐπὶ τῶν τετραπόδων, ὀλοφυῆς ὁ τόπος ἐπὶ τῶν ὀρνίθων ἐστίν. Ἀπηρητημένας γὰρ ἀπὸ τῶν βραχιόνων καὶ τῶν σκελῶν τῶν προσθίων ἔχουσι τὰς πτέρυγας, ἰδιόν (693b.) τι μόριον· διόπερ ἀντὶ ὁμοπλάτης τὰ τελευταῖα ἐπὶ τοῦ νώτου τῶν πτερύγων ἔχουσιν. Σκέλη δὲ καθάπερ ἄνθρωπος δύο, κεκαμμένα καθάπερ τὰ τετράποδα εἴσω, καὶ οὐχ ὥσπερ ἄνθρωπος ἔξω· τὰς δὲ πτέρυγας, ὡς τὰ πρόσθια σκέλη τῶν τετραπόδων, ἐπὶ τὸ περιφερές. Δίπουν δ' ἐξ ἀνάγκης ἐστίν· τῶν γὰρ ἐναίμων ἢ τοῦ ὀρνίθου οὐσία, ἅμα δὲ καὶ πτερυγωτός. Τὰ δ' ἐναίμα οὐ κινεῖται πλείοσιν ἢ τέτταρσι σημείοις. Τὰ μὲν οὖν ἀπηρητημένα μόρια, τέτταρα, ὥσπερ τοῖς ἄλλοις τοῖς πεζοῖς καὶ τοῖς πορευτικοῖς, ἔστι καὶ τοῖς ὀρνισιν, ἀλλὰ τοῖς μὲν βραχιόνες καὶ σκέλη τέτταρα ὑπάρχει, τοῖς δ' ὀρνισιν ἀντὶ τῶν προσθίων σκελῶν ἢ βραχιόνων πτερύγιον κοινόν ἐστιν (κατὰ ταύτας γὰρ τονικοί εἰσι, τῷ δ' ὀρνίθῳ ἐν τῇ οὐσίᾳ τὸ πτητικόν ἐστιν), ὥστε λείπεται αὐτοῖς ἐξ ἀνάγκης δίποσιν εἶναι. Οὕτω γὰρ τέτταρσι σημείοις κινῆσονται μετὰ τῶν πτερύγων.

Στιῆθος δ' ἔχουσιν ἅπαντες ὅξυ καὶ σαρκῶδες, ὅξυ μὲν πρὸς τὴν πτῆσιν (τὰ γὰρ πλατέα, πολὺν ἀέρα ὠθοῦντα δυσκίνητά ἐστι), σαρκῶδες δέ, διότι τὸ ὅξυ ἀσθενές μὴ πολλὴν ἔχον σκέπην. Ὑπὸ δὲ τὸ στιῆθος κοιλία μέχρι πρὸς τὴν ἔξοδον τοῦ περιττώματος καὶ τὴν τῶν σκελῶν καμπήν, καθάπερ τοῖς τετράποσι καὶ τοῖς ἀνθρώποις. Μεταξὺ μὲν οὖν τῶν πτερύγων καὶ τῶν σκελῶν ταῦτα τὰ μόριά ἐστιν.

Ὀμφαλὸν δ' ἐν μὲν τῇ γενέσει ἅπαντα ἔχει ὅσαπερ ζωτοκεῖται ἢ φωτοκεῖται, τῶν δ' ὀρνίθων αὐξηθέντων ἄδηλος. Δῆλον δ' ἐν τοῖς περὶ γένεσιν. Εἰς γὰρ τὸ ἔντερον ἢ σύμφυσις γίνεται, καὶ οὐχ ὥσπερ τοῖς ζωτοκόις τῶν φλεβῶν τι μόριον ἐστίν.

Ἔτι τῶν ὀρνίθων οἱ μὲν πτητικοὶ καὶ τὰς πτέρυγας ἔχουσι (694a.)

μεγάλας καὶ ἰσχυράς, οἷον οἱ γαμψώνυχες καὶ οἱ ὠμοφάγοι· ἀνάγκη γὰρ πτητικοῖς εἶναι διὰ τὸν βίον, ὥσθ' ἔνεκα τούτου καὶ πλῆθος ἔχουσι πτερῶν καὶ τὰς πτέρυγας μεγάλας. Ἔστι δ' οὐ μόνον τὰ γαμψώνυχα ἀλλὰ καὶ ἄλλα γένη ὀρνίθων πτητικά, ὅσοις ἡ σωτηρία ἐν τῇ ταχυτῇτι τῆς πτήσεως ἢ ἐκτοπιστικά. Ἐνια δ' οὐ πτητικά τῶν ὀρνίθων ἐστὶν ἀλλὰ βαρέα, οἷς ὁ βίος ἐπίγειος καὶ ἔστι καρποφάγα ἢ πλωτὰ καὶ περὶ ὕδωρ βιοτεύουσιν. Ἔστι δὲ τὰ μὲν τῶν γαμψωνύχων σώματα μικρὰ ἄνευ τῶν πτερύγων διὰ τὸ εἰς ταύτας ἀναλίσκεσθαι τὴν τροφήν εἰς τὰ ὄπλα καὶ τὴν βοήθειαν· τοῖς δὲ μὴ πτητικοῖς τούναντίον τὰ σώματα ὀγκώδη, διὸ βαρέα ἐστίν.

Ἐχουσι δ' ἔνιοι τῶν βαρέων βοήθειαν ἀντὶ τῶν πτερύγων τὰ καλούμενα πλῆκτρα ἐπὶ τοῖς σκέλεσιν. Ἄμα δὲ οἱ αὐτοὶ οὐ γίνονται πλῆκτρα ἔχοντες καὶ γαμψώνυχες· αἴτιον δ' ὅτι οὐδὲν ἢ φύσις ποιεῖ περίεργον. Ἔστι δὲ τοῖς μὲν γαμψωνύχοις καὶ πτητικοῖς ἄχρηστα τὰ πλῆκτρα· χρήσιμα γάρ ἐστιν ἐν ταῖς πεζαῖς μάχαις· διὸ ὑπάρχει ἐνίοις τῶν βαρέων.

Τούτοις δ' οὐ μόνον ἄχρηστοι ἀλλὰ καὶ βλαβεροὶ οἱ γαμψοὶ ὄνυχες τῷ ἐμπήγνυσθαι ὑπεναντίοι πρὸς τὴν πορείαν ὄντες. Διὸ καὶ γαμψώνυχα πάντα χαλεπῶς πορεύεται καὶ ἐπὶ πέτραις οὐ καθίζανουσιν· ὑπεναντία γὰρ αὐτοῖς πρὸς ἀμφοτέρα ἢ τῶν ὀνύχων φύσις. Ἐξ ἀνάγκης δὲ τοῦτο περὶ τὴν γένεσιν συμβέβηκεν· τὸ γὰρ γεῶδες ἐν τῷ σώματι καὶ θερμὸν χρήσιμα μόρια γίνεται πρὸς τὴν ἀλκήν. Ἄνω μὲν ῥυὲν ῥύγχους ἐποίησε σκληρότητα ἢ μέγεθος, ἂν δὲ κάτω ῥυῆι, πλῆκτρα ἰσχυρὰ ἐν τοῖς σκέλεσιν ἢ ἐπὶ τῶν ποδῶν ὀνύχων μέγεθος καὶ ἰσχύν.

Ἄμα δ' ἄλλοθι καὶ ἄλλοθι ἕκαστα τούτων οὐ ποιεῖ. Διασπωμένη γὰρ ἀσθενὴς γίνεται ἢ φύσις τούτου τοῦ (694b.) περιττώματος· τοῖς δὲ σκελῶν κατασκευάζει μῆκος, ἐνίοις δ' ἀντὶ τούτων συμπληροῖ τὸ μεταξὺ τῶν ποδῶν. Καὶ διὰ τοῦτο ὡς ἀναγκαῖον οἱ πλωτοὶ τῶν ὀρνίθων οἱ μὲν ἀπλῶς εἰσι στεγανόποδες, οἱ δὲ διηρημένην μὲν ἔχουσι τὴν καθ' ἕκαστα τῶν δακτύλων φύσιν, πρὸς ἐκάστῳ δ' αὐτῶν προσπέφυκεν οἷον πλάτη καθ' ὅλον συνεχῆς. Ἐξ ἀνάγκης μὲν οὖν ταῦτα συμβαίνει διὰ ταύτας τὰς αἰτίας· ὥς δὲ διὰ τὸ βέλτιον ἔχουσι τοιοῦτους τοὺς πόδας τοῦ βίου χάριν, ἵνα ζῶντες ἐν ὑγρῷ καὶ τῶν πτερῶν ἀχρείων ὄντων τοὺς πόδας χρησίμους ἔχωσι πρὸς τὴν νεῦσιν. Γίνονται γὰρ ὥσπερ κῶπαι εἰσπλέουσι τὰ πτερύγια τοῖς ἰχθύσιν· διὸ καὶ ἐὰν τῶν μὲν τὰ πτερύγια σφαλῇ, τῶν δὲ τὰ μεταξὺ τῶν ποδῶν,

οὐκέτι νέουσιν. Ἐνιοὶ δὲ μακροσκελεῖς τῶν ὀρνίθων εἰσίν. Αἴτιον δ' ὅτι ὁ βίος τῶν τοιούτων ἔλειος· τὰ γὰρ ὄργανα πρὸς τὸ ἔργον ἢ φύσις ποιεῖ, ἀλλ' οὐ τὸ ἔργον πρὸς τὰ ὄργανα. Διὰ μὲν οὖν τὸ μὴ πλωτὰ εἶναι οὐ στεγανόποδά ἐστι, διὰ δὲ τὸ ἐν ὑπείκοντι εἶναι τὸν βίον μακροσκελεῖ καὶ μακροδάκτυλα, καὶ τὰς καμπὰς ἔχουσι πλείους ἐν τοῖς δακτύλοις οἱ πολλοὶ αὐτῶν. Ἐπεὶ δὲ οὐ πτητικὰ μὲν, ἐκ τῆς δ' αὐτῆς ὕλης ἐστὶ πάντα, ἢ εἰς τὸ οὐροπύγιον αὐτοῖς τροφή εἰς τὰ σκέλη καταναλισκομένη ταῦτα ηὔξησεν. Διὸ καὶ ἐν τῇ πτήσει ἀντ' οὐροπυγίου χρῶνται αὐτοῖς· πέτονται γὰρ ἀποτεινόντες εἰς τὸ ὀπισθεν· οὕτω γὰρ αὐτοῖς χρήσιμα τὰ σκέλη, ἄλλως δὲ ἐμποδίζοιεν ἄν.

Ἐνια δὲ βραχέα σκέλη πρὸς τῇ γαστρὶ ἔχοντα πέτανται. Τοῖς μὲν γὰρ αὐτῶν οὐκ ἐμποδίζουσιν οἱ πόδες οὕτω, τοῖς δὲ γαμψώνουσι καὶ πρὸ ἔργου εἰσὶ πρὸς τὴν ἀρπαγὴν. Τῶν δ' ἐχόντων ὀρνίθων τὸν αὐχένα μακρὸν οἱ μὲν παχύτερον ἔχοντες πέτανται ἐκτεταμένῳ τῷ αὐχένι, οἱ δὲ λεπτὸν καὶ μακρὸν συγκεκαμμένῳ· ἐπιπεταμένοις γὰρ διὰ τὴν σκέλην ἦττον εὐθρυπτόν ἐστιν.

(695a.) Ἰσχίον δ' ἔχουσι μὲν οἱ ὀρνιθες πάντες ἢ οὐκ ἂν δόξαιεν ἔχειν, ἀλλὰ δύο μηροὺς ἴσχειν διὰ τὸ τοῦ ἰσχίου μῆκος· ὑποτέταται γὰρ μέχρι μέσης τῆς γαστρός. Αἴτιον δ' ὅτι δίπουν ἐστὶ τοῦτο τὸ ζῶον, οὐκ ὀρθόν, ὥς εἴ γε εἶχε καθάπερ ἐν τοῖς ἀνθρώποις ἢ τοῖς τετράποσιν, ἀπὸ τῆς ἔδρας βραχὺ τὸ ἰσχίον καὶ τὸ σκέλος εὐθὺς ἐχόμενον, ἡδυνάτει ἂν ὀρθὸν ἐστάναι. Ὁ μὲν γὰρ ἄνθρωπος ὀρθόν, τοῖς δὲ τετράποσι πρὸς τὸ βάρος σκέλη ἐμπρόσθια ὑπερήρυσται.

Οἱ δ' ὀρνιθες οὐκ ὀρθοὶ μὲν διὰ τὸ νανώδεις εἶναι τὴν φύσιν, σκέλη δ' ἐμπρόσθια οὐκ ἔχουσιν (διὰ τοῦτο πτέρυγας ἔχουσιν ἀντ' αὐτῶν)· ἀντὶ δὲ τούτου μακρὸν ἢ φύσις τὸ ἰσχίον ποιήσασα εἰς μέσον προσήρυσεν· ἐντεῦθεν δὲ ὑπέθηκε τὰ σκέλη, ὅπως ἰσορρόπου ὄντος τοῦ βάρους ἔνθεν καὶ ἔνθεν πορεύεσθαι δύνηται καὶ μένη. Δι' ἣν μὲν οὖν αἰτίαν δίπουν ἐστὶν οὐκ ὀρθὸν ὃν εἴρηται. Τοῦ δ' ἄσαρκα τὰ σκέλη εἶναι ἢ αὐτὴ αἰτία καὶ ἐπὶ τῶν τετραπόδων, ὑπὲρ ἧς καὶ πρόσθεν εἴρηται.

Τετραδάκτυλος δ' ἐστὶ πᾶς ὄρνις σχιζόπους ὁμοίως καὶ στεγανόπους. Περὶ γὰρ τοῦ στρουθοῦ τοῦ Λιβυκοῦ ὕστερον ἐροῦμεν ὅτι διχηλός, ἅμα τοῖς λοιποῖς ἐναντιώμασιν οἷς ἔχει πρὸς τὸ τῶν ὀρνίθων γένος. Τούτων δὲ τοὺς μὲν τρεῖς ἔχει πρόσθεν, ἓνα δ' ὀπισθεν πρὸς ἀσφάλειαν ἀντὶ πτέρνης.

Καὶ τῶν μακροσκελῶν λείπει τοῦτο κατὰ μέγεθος, οἷον συμβέβηκεν ἐπὶ τῆς κρεκός, πλείους δ' οὐκ ἔχουσι δακτύλους.

Ἐπὶ μὲν οὖν τῶν ἄλλων οὕτως ἢ τῶν δακτύλων ἔχει θέσις, ἢ δ' ἱυγξ δύο μόνον ἔχει τοὺς ὀπισθεν καὶ δύο τοὺς ἔμπροσθεν. Αἴτιον δ' ὅτι ἥττον ἐστὶν αὐτῆς τὸ σῶμα προπετὲς ἐπὶ τὸ πρόσθεν ἢ τὸ τῶν ἄλλων. Ὅρχεις δ' ἔχουσι μὲν πάντες οἱ ὄρνιθες, ἐντὸς δ' ἔχουσιν· ἢ δ' αἰτία ἐν τοῖς περὶ τὰς γενέσεις λεχθήσεται τῶν ζώων. Τὰ μὲν οὖν τῶν ὀρνίθων μόρια (695b.) τὸν τρόπον ἔχει τοῦτον.

Κεφάλαιο 13

Τὸ δὲ τῶν ἰχθύων γένος ἔτι μᾶλλον κεκολόβωται τῶν ἐκτὸς μορίων. Οὔτε γὰρ σκέλη οὔτε χεῖρας οὔτε πτέρυγας ἔχουσιν (εἴρηται δὲ περὶ τούτων ἡ αἰτία πρότερον), ἀλλ' ὅλον ἀπὸ τῆς κεφαλῆς τὸ κύτος συνεχές ἐστι μέχρι τῆς οὐρᾶς. Ταύτην δ' οὐχ ὁμοίαν ἔχουσι πάντες, ἀλλὰ τὰ μὲν παραπλησίαν, τῶν δὲ πλατέων ἔνια ἀκανθῶδη καὶ μακράν. Ἡ ἐκεῖθεν γὰρ αὐξησις γίνεται εἰς τὸ πλάτος, οἷόν ἐστι νάρκαις καὶ τρυγόσι καὶ εἴ τι τοιοῦτον ἄλλο σέλαχός ἐστιν. Τῶν μὲν οὖν τοιούτων ἀκανθῶδες καὶ μακρὸν τὸ οὐραῖον ἐστιν, ἐνίων δὲ σαρκῶδες μὲν βραχὺ δὲ διὰ τὴν αὐτὴν αἰτίαν δι' ἥνπερ ταῖς νάρκαις· διαφέρει γὰρ οὐδέν, ἢ βραχὺ μὲν σαρκωδέστερον δὲ, ἢ μακρὸν μὲν ἀσαρκότερον δ' εἶναι. Ἐπὶ δὲ τῶν βατράχων τὸ ἐναντίον συμβέβηκεν· διὰ γὰρ τὸ μὴ σαρκῶδες εἶναι τὸ πλάτος αὐτῶν τὸ ἐμπρόσθιον, ὅσον ἀφήρηται σαρκῶδες, πρὸς τὸ ὀπισθεν αὐτὸ ἔθηκεν ἡ φύσις καὶ τὴν οὐράν.

Οὐκ ἔχουσι δὲ ἀπηρτημένα κῶλα οἱ ἰχθύες, διὰ τὸ νευστικὴν εἶναι τὴν φύσιν αὐτῶν κατὰ τὸν τῆς οὐσίας λόγον, ἐπεὶ οὔτε περίεργον οὐδέν οὔτε μάτην ἢ φύσις ποιεῖ. Ἐπεὶ δ' ἔναιμά ἐστι κατὰ τὴν οὐσίαν, διὰ μὲν τὸ νευστικὰ εἶναι πτερύγια ἔχει, διὰ δὲ τὸ μὴ πεζεύειν οὐκ ἔχει πόδας· ἢ γὰρ τῶν ποδῶν πρόσθεσις πρὸς τὴν ἐπὶ τῷ πεδίῳ κίνησιν χρήσιμός ἐστιν. Ἄμα δὲ πτερύγια τέτταρα καὶ πόδας οὐχ οἷόν τε ἔχειν, οὐδ' ἄλλο κῶλον τοιοῦτον οὐδέν· ἔναιμα γάρ. Οἱ δὲ κορδύλοι βράγχια ἔχοντες πόδας ἔχουσιν· πτερύγια γὰρ οὐκ ἔχουσιν, ἀλλὰ τὴν οὐρὰν μανῶδη καὶ πλατεῖαν. Ἐχουσι δὲ τῶν ἰχθύων ὅσοι μὴ πλατεῖς, καθάπερ βάτος καὶ τρυγῶν, τέτταρα πτερύγια, δύο μὲν ἐν τοῖς πρανεσί, δύο δ' ἐν τοῖς (696a.) ὑπίοις. Πλείω δὲ τούτων οὐδεῖς· ἄναιμοι γὰρ ἂν ἦσαν. Τούτων δὲ τὰ μὲν ἐν τῷ πρανεῖ σχεδὸν πάντες ἔχουσι, τὰ δ' ἐν τοῖς ὑπίοις ἔνιοι τῶν μακρῶν καὶ πάχος ἐχόντων οὐκ ἔχουσιν, οἷον ἔγγελυς καὶ γόγγρος καὶ κεστρέων τι γένος τὸ ἐν τῇ λίμνῃ τῇ ἐν Σιφαῖς. Ὅσα δ' ἐστὶ μακροφνέστερα καὶ ὀφιώδη μᾶλλον, οἷον σμύραινα, οὐδέν ἔχουσι πτερύγιον ἀπλῶς, ἀλλὰ ταῖς καμπαῖς κινοῦνται, χρώμεναι τῷ ὑγρῷ ὥσπερ οἱ ὄφεις τῇ γῇ· τοῦτον γὰρ τὸν τρόπον οἱ ὄφεις νέουσιν ὄνπερ ἐπὶ τῆς γῆς ἔρπουσιν. Αἰτία δὲ τοῦ μὴ ἔχειν τοὺς ὀφιώδεις τῶν ἰχθύων πτερύγια ἥπερ καὶ τῶν ὄφεων τοῦ ἁποδᾶς εἶναι. Τὸ δ' αἴτιον

ἐν τοῖς περὶ πορείας καὶ κινήσεως τῶν ζώων εἴρηται. Ἡ γὰρ κακῶς ἂν ἐκινοῦντο, τέτταρσι σημείοις κινούμενα. Εἴτε γὰρ σύνεγγυς εἶχον τὰ πτερύγια, μόγις ἂν ἐκινοῦντο, εἴτε πόρρω, διὰ τὸ πολὺ μεταξύ. Εἰ δὲ πλείω τὰ κινητικὰ σημεῖα εἶχον, ἄναιμα ἂν ἦν. Ἡ δ' αὐτὴ αἰτία καὶ ἐπὶ τῶν δύο μόνον ἐχόντων πτερύγια ἰχθύων· ὁφιώδη γάρ ἐστι καὶ εὐμηκέστερα, καὶ χρῆται τῇ κάμψει ἀντὶ τῶν δύο πτερυγίων. Διὸ καὶ ἐν τῷ ξηρῷ ἔρπουσι καὶ ζῶσι πολὺν χρόνον, καὶ τὰ μὲν οὐκ εὐθύ, τὰ δ' οἰκεῖα τῆς πεζῆς ὄντα φύσεως ἦττον ἀσπαρίζει. Αὐτῶν δὲ τῶν πτερυγίων τὰ ἐν τοῖς πρανεῖσιν ἔχει τὰ δύο ἔχοντα πτερύγια μόνον, ὅσα μὴ κωλύεται διὰ τὸ πλάτος. Τὰ δ' ἔχοντα, πρὸς τῇ κεφαλῇ ἔχει, διὰ τὸ μὴ ἔχειν μῆκος ἐν τῷ τόπῳ, ᾧ ἀντὶ τούτων κινῆσεται· ἐπὶ γὰρ τὴν οὐρὰν πρόμηκες τὸ τῶν τοιούτων ἐστὶν ἰχθύων σῶμα. Οἱ δὲ βάτοι καὶ τὰ τοιαῦτα ἀντὶ τῶν πτερυγίων τῷ ἐσχάτῳ πλάτει νέουσιν. Ἡ δὲ νάρκη καὶ ὁ βάτραχος τὰ ἐν τῷ πρανεῖ κάτω διὰ τὸ πλάτος τῶν ἄνω, τὰ δ' ἐν τοῖς ὑπτίοις πρὸς τῇ κεφαλῇ. Οὐ γὰρ κωλύει κινεῖσθαι τὸ πλάτος, ἀλλ' ἀντὶ τοῦ ἄνω ἐλάττω ταῦτα τῶν ἐν τῷ πρανεῖ ἔχει. Ἡ δὲ νάρκη πρὸς τῇ οὐρᾷ ἔχει τὰ δύο πτερύγια· ἀντὶ δὲ τῶν δύο τῷ πλάτει χρῆται ὥς δυσὶ πτερυγίοις ἑκατέρῳ τῷ ἡμικυκλίῳ.

Περὶ δὲ τῶν ἐν τῇ κεφαλῇ μορίων καὶ αἰσθητηρίων εἴρηται πρότερον. Ἴδιον δ' ἔχει τὸ τῶν ἰχθύων γένος πρὸς τᾶλλα (696b.) τὰ ἔναιμα ζῶα τὴν τῶν βραγχίων φύσιν· δι' ἣν δ' αἰτίαν, εἴρηται ἐν τοῖς περὶ ἀναπνοῆς. Καὶ ἔχει δὲ τὰ ἔχοντα βράγχια τὰ μὲν ἐπικαλύμματα τοῖς βραγχίοις, τὰ δὲ σελάχη πάντα (χονδράκανθα γάρ) ἀκάλυπτα. Αἴτιον δ' ὅτι οἱ μὲν ἀκανθῶδεις εἰσὶ, τὸ δ' ἐπικάλυμμα ἀκανθῶδες, τὰ δὲ σελάχη πάντα χονδράκανθα. Ἐτι δ' αἱ κινήσεις τῶν μὲν νωθραὶ διὰ τὸ μὴ ἀκανθῶδη εἶναι μηδὲ νευρώδη, τῶν δὲ ἀκανθωδῶν ταχεῖα· τοῦ δ' ἐπικαλύμματος ταχεῖαν δεῖ γίνεσθαι τὴν κίνησιν· ὥσπερ γὰρ πρὸς ἐκπνοὴν ἢ τῶν βραγχίων ἐστὶ φύσις. Διὰ τοῦτο τοῖς σελαχῶδεσι καὶ αὐτῶν τῶν πόρων ἢ συναγωγὴ γίνεται τῶν βραγχίων, καὶ οὐ δεῖ ἐπικαλύμματος, ὅπως γίνηται ταχεῖα. Οἱ μὲν οὖν αὐτῶν ἔχουσι πολλὰ βράγχια οἱ δ' ὀλίγα, καὶ οἱ μὲν διπλᾶ οἱ δ' ἀπλᾶ· τὸ δ' ἔσχατον ἀπλοῦν οἱ πλείστοι. Τὴν δ' ἀκρίβειαν ἐκ τῶν ἀνατομῶν περὶ τούτων καὶ ἐν ταῖς ἱστορίαις ταῖς περὶ τὰ ζῶα δεῖ θεωρεῖν. Αἴτιον δὲ τοῦ πλήθους καὶ τῆς ὀλιγότητος τὸ τοῦ ἐν τῇ καρδίᾳ θερμοῦ πλήθος καὶ ὀλιγότης· θάττω γὰρ καὶ ἰσχυροτέραν τὴν κίνησιν δεῖ εἶναι τοῖς πλείω ἔχουσι θερμότητα. Τὰ δὲ πλείω καὶ διπλᾶ βράγχια τοιαύτην ἔχει τὴν φύσιν μᾶλλον τῶν ἀπλῶν καὶ ἐλαττόνων. Διὸ καὶ ἔνια

αὐτῶν ἔξω ζῆν δύναται πολὺν χρόνον, τῶν ἐχόντων ἐλάττω καὶ ἥττον ἐγκρατῇ τὰ βράγχια, οἷον ἔγχελυς καὶ ὅσα ὀφιώδη· οὐ γὰρ πολλῆς δέονται καταψύξεως.

Ἔχει δὲ καὶ περὶ τὸ στόμα διαφοράς. Τὰ μὲν γὰρ κατ' ἀντικρὺ ἔχει τὸ στόμα καὶ εἰς τὸ πρόσθεν, τὰ δ' ἐν τοῖς ὑπτίοις, οἷον οἱ τε δελφῖνες καὶ τὰ σελαχῶδη· καὶ ὑπτία στρεφόμενα λαμβάνει τὴν τροφήν. Φαίνεται δ' ἡ φύσις οὐ μόνον σωτηρίας ἕνεκεν ποιῆσαι τοῦτο τῶν ἄλλων ζώων (ἐν γὰρ τῇ στρέψει σφάζεται τὰλλα βραδυνόντων· πάντα γὰρ τὰ τοιαῦτα ζωοφάγα ἐστίν), ἀλλὰ καὶ πρὸς τὸ μὴ ἀκολουθεῖν τῇ λαϊμαργίᾳ τῇ περὶ τὴν τροφήν· ῥᾶον γὰρ λαμβάνοντα διεφθείρετ' ἂν διὰ τὴν πλήρωσιν ταχέως. Πρὸς δὲ τούτοις περιφερῇ καὶ λεπτὴν ἔχοντα τὴν τοῦ ῥύγχους φύσιν οὐχ οἷον τ' εὐδιαίρετον ἔχειν. Ἔτι δὲ καὶ τῶν ἄνω τὸ στόμα ἐχόντων (697a.) τὰ μὲν ἀνερρωγὸς ἔχει τὸ στόμα τὰ δὲ μύουρον, ὅσα μὲν σαρκοφάγα, ἀνερρωγός, ὥσπερ τὰ καρχαρόδοντα, διὰ τὸ ἐν τῷ στόματι εἶναι τοῖς τοιοῦτοις τὴν ἰσχύν, ὅσα δὲ μὴ σαρκοφάγα, μύουρον.

Τὸ δὲ δέρμα οἱ μὲν λεπιδωτὸν ἔχουσιν αὐτῶν (ἡ δὲ λεπίς διὰ λαμπρότητα καὶ λεπτότητα τοῦ σώματος ἀφίσταται), οἱ δὲ τραχύ, οἷον ῥίνη καὶ βάτος καὶ τὰ τοιαῦτα· ἐλάχιστα δὲ τὰ λεῖα. Τὰ δὲ σελάχη ἀλεπιδωτά μὲν τραχέα δ' ἐστὶ διὰ τὸ χονδράκανθα εἶναι· τὸ γὰρ γεῶδες ἐκείθεν ἡ φύσις εἰς τὸ δέρμα κατανήλωκεν.

Ὅρχεις δ' οὐδεὶς ἔχει ἰχθὺς οὔτ' ἐκτὸς οὔτ' ἐντός, οὐδ' ἄλλο τι τῶν ἀπόδων οὐδέν, διὸ οὐδ' οἱ ὄφεις. Πόρον δὲ τοῦ περιττώματος καὶ τῶν περὶ τὴν γένεσιν τὸν αὐτόν, καθάπερ καὶ τὰλλα φυτόκα πάντα καὶ τετράποδα, διὰ τὸ μὴ ἔχειν κύστιν μηδὲ γίνεσθαι περίττωμ' αὐτοῖς ὑγρόν. Τὸ μὲν οὖν τῶν ἰχθύων γένος πρὸς τὰλλα ζῶα ταύτας ἔχει τὰς διαφοράς.

Οἱ δὲ δελφῖνες καὶ αἱ φάλαιναι καὶ πάντα τὰ τοιαῦτα τῶν κητῶν βράγχια μὲν οὐκ ἔχουσιν, αὐλὸν δὲ διὰ τὸ πλεύμονα ἔχειν· δεχόμενα γὰρ κατὰ τὸ στόμα τὴν θάλατταν ἀφιαῖσι κατὰ τὸν αὐλόν. Ἀνάγκη μὲν γὰρ δέξασθαι τὸ ὑγρὸν διὰ τὸ λαμβάνειν τὴν τροφήν ἐν τῷ ὑγρῷ· δεξάμενα δ' ἀφιέναι ἀναγκαῖον. Τὰ μὲν οὖν βράγχιά ἐστι χρήσιμα τοῖς μὴ ἀναπνέουσιν· δι' ἣν δ' αἰτίαν, εἴρηται ἐν τοῖς περὶ ἀναπνοῆς· ἀδύνατον γὰρ ἅμα τὸ αὐτὸ ἀναπνεῖν καὶ βράγχια ἔχειν· ἀλλὰ πρὸς τὴν ἄφεσιν τοῦ ὕδατος ἔχουσι τὸν αὐλόν. Κεῖται δ' αὐτοῖς οὗτος πρὸ τοῦ ἐγκεφάλου· διελάμβανε γὰρ ἂν ἀπὸ τῆς ῥάχεως αὐτόν. Αἴτιον δὲ τοῦ πλεύμονα ταῦτα ἔχειν καὶ ἀναπνεῖν, ὅτι τὰ μεγάλα τῶν ζώων

πλείονος δεῖται θερμότητος, ἵνα κινήται. Διὸ ὁ πλεύμων ἔγκειται αὐτοῖς θερμότητος ὦν πλήρης αἱματικῆς. Ἔστι δὲ ταῦτα τρόπον τινὰ περὶ καὶ ἔνυδρα· τὸν μὲν γὰρ ἀέρα δέχεται ὡς περὶ, ἀποδα δ' ἐστὶ καὶ λαμβάνει ἐκ τοῦ ὑγροῦ τὴν τροφήν ὥσπερ τὰ ἔνυδρα.

(697b.) Καὶ αἱ φῶκαι δὲ καὶ αἱ νυκτερίδες διὰ τὸ ἐπαμφοτερίζειν αἱ μὲν τοῖς ἐνύδροις καὶ περὶ, αἱ δὲ τοῖς πτηνοῖς καὶ περὶ, διὰ τοῦτο ἀμφοτέρων τε μετέχουσι, καὶ οὐδετέρων. Αἱ τε γὰρ φῶκαι ὡς μὲν ἔνυδροι πόδας ἔχουσιν, ὡς δὲ περὶ πτέρυγας (τοὺς γὰρ ὀπισθεν πόδας ἰχθυώδεις ἔχουσιν πάνπαν, ἔτι δὲ τοὺς ὀδόντας πάντας καρχαρόδοντας καὶ ὀξεῖς)· καὶ αἱ νυκτερίδες ὡς μὲν πτηνὰ ἔχουσιν πόδας, ὡς δὲ τετράποδα οὐκ ἔχουσιν, καὶ οὔτε κέρκον ἔχουσιν οὔτ' οὐροπύγιον, διὰ μὲν τὸ πτηνὰ εἶναι κέρκον· διὰ δὲ τὸ περὶ οὐροπύγιον. Συμβέβηκε δ' αὐταῖς τοῦτ' ἐξ ἀνάγκης· εἰσὶ γὰρ θερμόπτεροι, οὐδὲν δ' ἔχει οὐροπύγιον μὴ σχιζόπτερον· ἐκ τοιούτου γὰρ πτεροῦ γίνεται τὸ οὐροπύγιον. Ἡ δὲ κέρκος καὶ ἐμπόδιος ἂν ἦν ὑπάρχουσα ἐν τοῖς πτεροῖς.

Κεφάλαιο 14

Τὸν αὐτὸν δὲ τρόπον καὶ ὁ στρουθὸς ὁ Λιβυκός· τὰ μὲν γὰρ ὄρνιθος ἔχει, τὰ δὲ ζώου τετράποδος. Ὡς μὲν γὰρ οὐκ ὦν τετράπους πτερὰ ἔχει, ὥς δ' οὐκ ὦν ὄρνις οὔτε πέταται μετεωριζόμενος, καὶ τὰ πτερὰ οὐ χρήσιμα πρὸς πτήσιν ἀλλὰ τριχώδη. Ἔτι δὲ ὥς μὲν τετράπους ὦν βλεφαρίδας ἔχει τὰς ἄνωθεν καὶ ψιλός ἐστι τὰ περὶ τὴν κεφαλὴν καὶ τὰ ἄνω τοῦ αὐχένος, ὥστε τριχωδεστέρας ἔχειν τὰς βλεφαρίδας, ὥς δ' ὄρνις ὦν τὰ κάτωθεν ἐπτέρωται, καὶ δίπους μὲν ἐστὶν ὥς ὄρνις, διχαλὸς δ' ὥς τετράπους· οὐ γὰρ δακτύλους ἔχει ἀλλὰ χηλὰς. Τούτου δ' αἴτιον ὅτι τὸ μέγεθος οὐκ ὄρνιθος ἔχει ἀλλὰ τετράποδος. Ἐλάχιστον γὰρ ἀναγκαῖον εἶναι τὸ μέγεθος ὥς καθόλου εἰπεῖν τὸ τῶν ὀρνίθων· οὐ γὰρ ῥᾶδιον πολὺν ὄγκον κινεῖσθαι σώματος μετέωρον.

Περὶ μὲν οὖν μορίων, διὰ τίν' αἰτίαν ἕκαστόν ἐστιν ἐν τοῖς ζώοις, εἴρηται περὶ πάντων τῶν ζώων καθ' ἕκαστον. Τούτων δὲ διωρισμένων ἐφεξῆς ἐστὶ τὰ περὶ τὰς γενέσεις αὐτῶν διελθεῖν.

(698a.) Περί δὲ κινήσεως τῆς τῶν ζώων, ὅσα μὲν αὐτῶν περὶ ἕκαστον ὑπάρχει γένος, καὶ τίνες διαφοραί, καὶ τίνες αἰτίαι τῶν καθ' ἕκαστον συμβεβηκότων αὐτοῖς, ἐπέσκεπται περὶ ἀπάντων ἐν ἐτέροις· ὅλως δὲ περὶ τῆς κοινῆς αἰτίας τοῦ κινεῖσθαι κίνησιν ὅποιανούν (τὰ μὲν γὰρ πτήσει ινεῖται τὰ δὲ νεύσει τὰ δὲ πορεία τῶν ζώων, τὰ δὲ κατ' ἄλλους τρόπους τοιούτους) ἐπισκεπτέον νῦν. ὅτι μὲν οὖν ἀρχὴ τῶν ἄλλων κινήσεων τὸ αὐτὸ ἑαυτὸ κινουῖν, τούτου δὲ τὸ ἀκίνητον, καὶ ὅτι τὸ πρῶτον κινουῖν ἀναγκαῖον ἀκίνητον εἶναι, διώρισται πρότερον, ὅτεπερ καὶ περὶ κινήσεως αἰδίου, πότερον ἔστιν ἢ οὐκ ἔστι, καὶ εἰ ἔστι, τίς ἐστιν. δεῖ δὲ τοῦτο μὴ μόνον τῷ λόγῳ λαβεῖν, ἀλλὰ καὶ ἐπὶ τῶν καθ' ἕκαστα καὶ τῶν αἰσθητῶν, δι' ἅπερ καὶ τοὺς καθόλου ζητοῦμεν λόγους, καὶ ἐφ' ὧν ἐφαρμόττειν οἰόμεθα δεῖν αὐτούς. φανερόν γὰρ καὶ ἐπὶ τούτων ὅτι ἀδύνατον κινεῖσθαι μηδενὸς ἡρεμοῦντος, πρῶτον μὲν οὖν ἐν αὐτοῖς τοῖς ζώοις· δεῖ γάρ, ἂν κινῆται τι τῶν μορίων, ἡρεμεῖν τι· καὶ διὰ τοῦτο αἱ καμπαὶ τοῖς ζώοις εἰσίν. ὥσπερ γὰρ κέντρῳ χρῶνται ταῖς καμπαῖς, καὶ γίνεται τὸ ὅλον μέρος, ἐν ᾧ ἡ καμπή, καὶ ἐν καὶ δύο, καὶ εὐθὺ καὶ κεκαμμένον, μεταβάλλον δυνάμει καὶ ἐνεργείᾳ διὰ τὴν καμπήν. καμπτομένου δὲ καὶ κινουμένου τὸ μὲν κινεῖται σημεῖον τὸ δὲ μένει τῶν ἐν ταῖς καμπαῖς, ὥσπερ ἂν εἰ τῆς διαμέτρου ἡ μὲν Α καὶ ἡ Δ μένοι, ἡ δὲ Β κινοῖτο, καὶ γίνοιτο ἡ ΑΓ. ἀλλ' ἐνταῦθα μὲν δοκεῖ πάντα τρόπον ἀδιαίρετον εἶναι τὸ κέντρον (καὶ γὰρ τὸ κινεῖσθαι, ὡς φασί, πλάττουσιν ἐπ' αὐτῶν· οὐ γὰρ κινεῖσθαι τῶν μαθηματικῶν οὐδέν), τὰ δ' ἐν ταῖς καμπαῖς δυνάμει καὶ ἐνεργείᾳ γίνεται ὅτε (698b.) μὲν ἐν ὅτῃ δὲ διαιρετά. ἀλλ' οὖν αἰεὶ ἡ ἀρχή, ἡρεμεῖ κινουμένου τοῦ μορίου τοῦ κάτωθεν, οἷον τοῦ μὲν βραχίονος κινουμένου τὸ ὠλέκρανον, ὅλου δὲ τοῦ κόλου ὁ ὦμος, καὶ τῆς μὲν κνήμης τὸ γόνυ, ὅλου δὲ τοῦ σκέλους τὸ ἰσχίον. ὅτι μὲν οὖν καὶ ἐν αὐτῷ ἕκαστόν τι δεῖ ἔχειν ἡρεμοῦν, ὅθεν ἡ ἀρχὴ τοῦ κινουμένου ἔσται, καὶ πρὸς ᾧ ἀπεριδόμενον καὶ ὅλον ἀθρόον κινήσεται καὶ κατὰ μέρος, φανερόν.

Κεφάλαιο 2

Ἀλλὰ πᾶσα ἡ ἐν αὐτῷ ἡρεμία ὅμως ἄκυρος, ἂν μὴ τι ἔξωθεν ἢ ἀπλῶς ἡρεμοῦν καὶ ἀκίνητον. ἄξιον δ' ἐπιστήσαντας ἐπισκέψασθαι περὶ τοῦ λεχθέντος· ἔχει γὰρ τὴν θεωρίαν οὐ μόνον ὅσον ἐπὶ τὰ ζῶα συντείνουσιν, ἀλλὰ καὶ πρὸς τὴν τοῦ παντὸς κίνησιν καὶ φοράν. ὥσπερ γὰρ καὶ ἐν αὐτῷ δεῖ τι ἀκίνητον εἶναι, εἰ μέλλει κινεῖσθαι, οὕτως ἔτι μᾶλλον ἔξω δεῖ τι εἶναι τοῦ ζώου ἀκίνητον, πρὸς ὃ ἀπερειδόμενον κινεῖται τὸ κινούμενον. εἰ γὰρ ὑποδώσει ἀεί, οἷον τοῖς ἐμύσι τοῖς ἐν τῇ γῇ, ἢ τοῖς ἐν τῇ ἁμμῳ πορευομένοις, οὐ πρόεισιν, οὐδ' ἔσται οὔτε πορεία, εἰ μὴ ἡ γῆ μένοι, οὔτε πτῆσις ἢ νεῦσις, εἰ μὴ ὁ ἀῆρ ἢ ἡ θάλαττα ἀντεριδοί. ἀνάγκη δὲ τοῦτο ἕτερον εἶναι τοῦ κινουμένου, καὶ ὅλον ὅλου, καὶ μόνιον μηδὲν εἶναι τοῦ κινουμένου τὸ οὕτως ἀκίνητον· εἰ δὲ μὴ, οὐ κινηθήσεται. μαρτύριον δὲ τούτου τὸ ἀπορούμενον, διὰ τί ποτε τὸ πλοῖον ἔξωθεν μὲν, ἂν τις ὠθῇ τῷ κοντῷ τὸν ἰστὸν ἢ τι ἄλλο προσβάλλον μόνιον, κινεῖ ῥαδίως, ἐὰν δ' ἐν αὐτῷ τις ὦν τῷ πλοίῳ τοῦτο πειρᾶται πράττειν, οὐκ ἂν κινήσειεν οὐδ' ἂν ὁ Τιτυδὸς οὔθ' ὁ Βορέας πνέων ἔσωθεν ἐκ τοῦ πλοίου, εἰ τύχοι πνέων τὸν τρόπον τοῦτον ὥστε οἱ γραφεῖς ποιοῦσιν· ἐξ αὐτοῦ γὰρ τὸ πνεῦμα ἀφιέντα γράφουσιν. ἐὰν τε γὰρ ἡρέμα (699a.) ῥιπτῇ τὸ πνεῦμά τις ἐάν τ' ἰσχυρῶς οὕτως ὥστ' ἄνεμον ποιεῖν τὸν μέγιστον, ἐὰν τε ἄλλο τι ἢ τὸ ῥιπτούμενον ἢ ὠθούμενον, ἀνάγκη πρῶτον μὲν πρὸς ἡρεμοῦν τι τῶν αὐτοῦ μορίων ἀπερειδόμενον ὠθεῖν, εἴτα πάλιν τοῦτο τὸ μόνιον, ἢ αὐτὸ ἢ οὗ τυγχάνει μόνιον ὄν, πρὸς τῶν ἔξωθεν τι ἀποστηριζόμενον μένειν. ὁ δὲ τὸ πλοῖον ὠθῶν ἐν τῷ πλοίῳ αὐτὸς ὢν καὶ ἀποστηριζόμενος πρὸς τὸ πλοῖον εὐλόγως οὐ κινεῖ τὸ πλοῖον διὰ τὸ ἀναγκαῖον εἶναι πρὸς ὃ ἀποστηρίζεται μένειν· συμβαίνει δ' αὐτῷ τὸ αὐτὸ ὃ τε κινεῖ καὶ πρὸς ὃ ἀποστηρίζεται. ἔξωθεν δ' ὠθῶν ἢ ἔλκων κινεῖ· οὐθὲν γὰρ μέρος ἢ γῆ τοῦ πλοίου.

Κεφάλαιο 3

Απορήσειε δ' ἂν τις, ἄρ' εἴ τι κινεῖ τὸν ὅλον οὐρανόν, εἶναι θέλει ἀκίνητον, καὶ τοῦτο μηθὲν εἶναι τοῦ οὐρανοῦ μόριον μηδ' ἐν τῷ οὐρανῷ. εἴτε γὰρ αὐτὸ κινούμενον κινεῖ αὐτόν, ἀνάγκη τινὸς ἀκινήτου θιγγάνον κινεῖν, καὶ τοῦτο μηδὲν εἶναι μόριον τοῦ κινουντος· εἴτ' εὐθὺς ἀκίνητόν ἐστι τὸ κινοῦν, ὁμοίως οὐδὲν ἔσται τοῦ κινουμένου μόριον. καὶ τοῦτό γ' ὀρθῶς λέγουσιν οἱ λέγοντες, ὅτι κύκλῳ φερομένης τῆς σφαίρας οὐδ' ὅτιοῦν μένει μόριον· ἢ γὰρ ἂν ὅλην ἀναγκαῖον ἦν μένειν, ἢ διασπᾶσθαι τὸ συνεχές αὐτῆς. ἀλλ' ὅτι τοὺς πόλους οἶονταί τινα δύναμιν ἔχειν, οὐθὲν ἔχοντας μέγεθος ἀλλ' ὄντας ἔσχατα καὶ στιγμάς, οὐ καλῶς. πρὸς γὰρ τῷ μηδεμίαν οὐσίαν εἶναι τῶν τοιούτων μηδενός, καὶ κινεῖσθαι τὴν μίαν κίνησιν ὑπὸ δυοῖν ἀδύνατον· τοὺς δὲ πόλους δύο ποιοῦσιν. ὅτι μὲν οὖν ἔχει τι καὶ πρὸς τὴν ὅλην φύσιν οὕτως ὥσπερ ἡ γῆ πρὸς τὰ ζῷα καὶ τὰ κινούμενα δι' αὐτῶν, ἐκ τῶν τοιούτων ἂν τις διαπορήσειεν. οἱ δὲ μυθικῶς τὸν Ἄτλαντα ποιοῦντες ἐπὶ τῆς γῆς ἔχοντα τοὺς πόδας δόξαιεν ἂν ἀπὸ διανοίας εἰρηκέναι τὸν μῦθον, ὥς τοῦτον ὥσπερ διάμετρον ὄντα καὶ στρέφοντα τὸν οὐρανὸν περὶ τοὺς πόλους· τοῦτο δ' ἂν συμβαίη καὶ κατὰ λόγον διὰ τὸ τὴν γῆν μένειν, ἀλλὰ τοῖς ταῦτα λέγουσιν ἀναγκαῖον φάναι μηδὲν εἶναι μόριον αὐτὴν τοῦ παντός, πρὸς δὲ τούτοις δεῖ τὴν ἰσχὺν ἰσάζειν τοῦ κινουντος καὶ τὴν τοῦ μένοντος.

ἔστι γάρ τι πλῆθος ἰσχύος καὶ δυνάμεως καθ' ἣν μένει τὸ μένον, ὥσπερ καὶ καθ' ἣν κινεῖ τὸ κινοῦν· καὶ ἔστι τις ἀναλογία ἐξ ἀνάγκης, ὥσπερ τῶν ἐναντίων κινήσεων, οὕτω καὶ τῶν ἡρεμιῶν. καὶ αἱ μὲν ἴσαι ἀπαθεῖς ὑπ' ἀλλήλων, (699b.) κρατοῦνται δὲ κατὰ τὴν ὑπεροχήν. διόπερ εἴτ' Ἄτλας εἴτε τι τοιοῦτόν ἐστιν ἕτερον τὸ κινοῦν τῶν ἐντός, οὐδὲν μᾶλλον ἀντερείδειν δεῖ τῆς μονῆς ἣν ἡ γῆ τυγχάνει μένουσα· ἢ κινήσεται ἡ γῆ ἀπὸ τοῦ μέσου καὶ ἐκ τοῦ αὐτῆς τόπου. ὥς γὰρ τὸ ὠθοῦν ὠθεῖ, οὕτω τὸ ὠθούμενον ὠθεῖται, καὶ ὁμοίως κατ' ἰσχύν.

κινεῖ δὲ τὸ ἡρεμοῦν πρῶτον, ὥστε μᾶλλον καὶ πλείων ἡ ἰσχὺς ἢ ὁμοία καὶ ἴση τῆς ἡρεμίας. ὡσαύτως δὲ καὶ ἡ τοῦ κινουμένου μέν, μὴ κινουντος δέ. τοσαύτην οὖν δεήσει τὴν δύναμιν εἶναι τῆς γῆς ἐν τῷ ἡρεμεῖν ὅσην ὁ τε πᾶς οὐρανὸς ἔχει καὶ τὸ κινοῦν αὐτόν. εἰ δὲ τοῦτο

ἀδύνατον, ἀδύνατον καὶ τὸ κινεῖσθαι τὸν οὐρανὸν ὑπὸ τινος
τοιούτου τῶν ἐντός.

Κεφάλαιο 4

Ἔστι δέ τις ἀπορία περὶ τὰς κινήσεις τῶν τοῦ οὐρανοῦ μορίων, ἣν ὥς οὔσαν οἰκείαν τοῖς εἰρημένοις ἐπισκέψαιτ' ἂν τις.

ἐὰν γάρ τις ὑπερβάλλῃ τῇ δυνάμει τῆς κινήσεως τὴν τῆς γῆς ἡρεμίαν, δῆλον ὅτι κινήσει αὐτὴν ἀπὸ τοῦ μέσου. καὶ ἡ ἰσχὺς δ' ἀφ' ἧς αὕτη ἡ δύναμις, ὅτι οὐκ ἄπειρος, φανερόν· οὐδὲ γὰρ ἡ γῆ ἄπειρος, ὥστ' οὐδὲ τὸ βάρος αὐτῆς. ἐπεὶ δὲ τὸ ἀδύνατον λέγεται πλεοναχῶς (οὐ γὰρ ὡσαύτως τὴν τε φωνὴν ἀδύνατόν φαμεν εἶναι ὁραθῆναι καὶ τοὺς ἐπὶ τῆς σελήνης ὑπ' ἡμῶν· τὸ μὲν γὰρ ἐξ ἀνάγκης, τὸ δὲ πεφυκὸς ὁρᾶσθαι οὐκ ὀφθῆσεται), τὸν δ' οὐρανὸν ἄφθαρτον εἶναι καὶ ἀδιάλυτον οἴομεθα μὲν ἐξ ἀνάγκης [εἶναι], συμβαίνει δὲ κατὰ τοῦτον τὸν λόγον οὐκ ἐξ ἀνάγκης· (πέφυκε γὰρ καὶ ἐνδέχεται εἶναι κίνησιν μείζω καὶ ἀφ' ἧς ἡρεμεῖ ἡ γῆ καὶ ἀφ' ἧς κινουῦνται τὸ πῦρ καὶ τὸ ἄνω σῶμα)· εἰ μὲν οὖν εἰσὶν ὑπερέχουσαι κινήσεις, διαλυθήσεται ταῦτα ὑπ' ἀλλήλων· εἰ δὲ μὴ εἰσὶ μὲν, ἐνδέχεται δ' εἶναι (ἄπειρον γὰρ οὐκ ἐνδέχεται διὰ τὸ μηδὲ σῶμα ἐνδέχεσθαι ἄπειρον εἶναι), ἐνδέχονται ἂν διαλυθῆναι τὸν οὐρανόν. τί γὰρ κωλύει τοῦτο συμβῆναι, εἴπερ μὴ ἀδύνατον; οὐκ ἀδύνατον δέ, εἰ μὴ τάντικείμενον ἀναγκαῖον. ἀλλὰ περὶ μὲν τῆς ἀπορίας ταύτης ἕτερος ἔστω λόγος· ἄρα δὲ δεῖ τι ἀκίνητον εἶναι καὶ ἡρεμοῦν ἔξω τοῦ κινουμένου, μηδὲν ὃν ἐκείνου μόνιον, ἢ οὐ; καὶ τοῦτο πότερον καὶ ἐπὶ τοῦ παντὸς οὕτως ὑπάρχειν ἀναγκαῖον; ἴσως γὰρ ἂν δόξειεν ἄτοπον εἶναι, εἰ ἡ ἀρχὴ τῆς κινήσεως ἐντός. διὸ δόξειεν ἂν τοῖς οὕτως ὑπολαμβάνουσιν εὖ εἰρῆσθαι Ὅμηρον

ἀλλ' οὐκ ἂν ἐρύσαιτ' ἐξ οὐρανόθεν πεδίονδε (700a.)

Ζῆν' ὕπατον πάντων, οὐδ' εἰ μάλα πολλὰ κάμοιτε·

πάντες δ' ἐξάπτεσθε θεοὶ πᾶσαι τε θεάιναι.

τὸ γὰρ ὅλως ἀκίνητον ὑπ' οὐδενὸς ἐνδέχεται κινήσθαι. ὅθεν λύεται καὶ ἡ πάλαι λεχθεῖσα ἀπορία, πότερον ἐνδέχεται ἢ οὐκ ἐνδέχεται διαλυθῆναι τὴν τοῦ οὐρανοῦ σύστασιν, εἰ ἐξ ἀκινήτου ἡρτῆται ἀρχῆς. ἐπὶ δὲ τῶν ζώων οὐ μόνον τὸ οὕτως ἀκίνητον δεῖ ὑπάρχειν, ἀλλὰ καὶ ἐν αὐτοῖς τοῖς κινουμένοις κατὰ τόπον ὅσα κινεῖ αὐτὰ αὐτά. δεῖ γὰρ αὐτοῦ τὸ μὲν ἡρεμεῖν τὸ δὲ κινεῖσθαι, πρὸς ὃ ἀπεριδόμενον τὸ κινούμενον κινήσεται, οἷον ἂν τι κινή τῶν μορίων· ἀπεριδεται γὰρ θάτερον ὥς πρὸς μένον θάτερον. περὶ δὲ τῶν

ἀψύχων ὅσα κινεῖται ἀπορήσειεν ἂν τις, πότερον ἅπαντ' ἔχει ἐν ἑαυτοῖς καὶ τὸ ἡρεμοῦν καὶ τὸ κινεῖν, καὶ πρὸς τῶν ἔξω τι ἡρεμοῦντων ἀπερείδεσθαι ἀνάγκη καὶ ταῦτα, ἢ ἀδύνατον, οἷον πῦρ ἢ γῆν ἢ τῶν ἀψύχων τι, ἀλλ' ὑφ' ὧν ταῦτα κινεῖται πρῶτων. πάντα γὰρ ὑπ' ἄλλου κινεῖται τὰ ἄψυχα, ἀρχὴ δὲ πάντων τῶν οὕτως κινουμένων τὰ αὐτὰ αὐτὰ κινεῖντα. τῶν δὲ τοιούτων περὶ μὲν τῶν ζώων εἴρηται· τὰ γὰρ τοιαῦτα πάντα ἀνάγκη καὶ ἐν αὐτοῖς ἔχειν τὸ ἡρεμοῦν, καὶ ἔξω πρὸς ὃ ἀπερείσεται. εἰ δέ τι ἐστὶν ἀνωτέρω καὶ πρῶτως κινεῖν, ἄδηλον, καὶ ἄλλος λόγος περὶ τῆς τοιαύτης ἀρχῆς. τὰ δὲ ζῶα ὅσα κινεῖται, πάντα πρὸς τὰ ἔξω ἀπερειδόμενα κινεῖται, καὶ ἀναπνέοντα καὶ ἐκπνέοντα. οὐδὲν γὰρ διαφέρει μέγα ῥῖψαι βάρος ἢ μικρόν, ὅπερ ποιοῦσιν οἱ πτύοντες καὶ βήττοντες καὶ οἱ εἰσπνέοντες καὶ ἐκπνέοντες.

Κεφάλαιο 5

Πότερον δ' ἐν τῷ αὐτῷ αὐτὸ κινοῦντι κατὰ τόπον μόνῳ δεῖ τι μένειν, ἢ καὶ ἐν τῷ ἀλλοιουμένῳ αὐτῷ ὑφ' αὐτοῦ καὶ ἀξανομένῳ; περὶ δὲ γενέσεως τῆς ἐξ ἀρχῆς καὶ φθορᾶς ἄλλος λόγος· εἰ γὰρ ἐστὶν ἥνπερ φαμέν πρώτην κίνησιν γενέσεως καὶ φθορᾶς, αὕτη αἰτία ἂν εἴη, καὶ τῶν ἄλλων δὲ κινήσεων ἴσως πασῶν. ὥσπερ δ' ἐν τῷ ὄλῳ, καὶ ἐν τῷ ζῳῳ κίνησις πρώτη αὕτη, ὅταν τελεωθῇ· ὥστε καὶ ἀξήσεως, εἴ ποτε γίνεται, αὐτὸ αὐτῷ αἴτιον καὶ ἀλλοιώσεως, εἰ δὲ μή, οὐκ ἀνάγκη. αἱ δὲ πρῶται ἀξήσεις καὶ ἀλλοιώσεις ὑπ' ἄλλου γίνονται καὶ δι' ἐτέρων· γενέσεως δὲ καὶ φθορᾶς (700b.) οὐδαμῶς οἶόν τε αὐτὸ αἴτιον εἶναι αὐτῷ οὐδέν. προϋπάρχειν γὰρ δεῖ τὸ κινοῦν τοῦ κινουμένου καὶ τὸ γεννῶν τοῦ γεννωμένου· αὐτὸ δ' αὐτοῦ πρότερον οὐδέν ἐστίν.

Περὶ μὲν οὖν ψυχῆς, εἴτε κινεῖται εἴτε μή, καὶ εἰ κινεῖται, πῶς κινεῖται, πρότερον εἴρηται ἐν τοῖς διωρισμένοις περὶ αὐτῆς. ἐπεὶ δὲ τὰ ἄψυχα πάντα κινεῖται ὑφ' ἑτέρου, περὶ δὲ τοῦ πρώτου κινουμένου καὶ ἀεὶ κινουμένου, τίνα τρόπον κινεῖται, καὶ πῶς κινεῖ τὸ πρῶτον κινοῦν, διώρισται πρότερον ἐν τοῖς περὶ τῆς πρώτης φιλοσοφίας, λοιπὸν ἐστὶ θεωρῆσαι πῶς ἡ ψυχὴ κινεῖ τὸ σῶμα, καὶ τίς ἡ ἀρχὴ τῆς τοῦ ζώου κινήσεως. τῶν γὰρ ἄλλων παρὰ τὴν τοῦ ὅλου κίνησιν τὰ ἔμψυχα αἷτια τῆς κινήσεως, ὅσα μὴ κινεῖται ὑπ' ἀλλήλων διὰ τὸ προσκόπτειν ἀλλήλοις. διὸ καὶ πέρας ἔχουσιν αὐτῶν πᾶσαι αἱ κινήσεις· καὶ γὰρ καὶ αἱ τῶν ἐμψύχων. πάντα γὰρ τὰ ζῶα καὶ κινεῖ καὶ κινεῖται ἔνεκά τινος, ὥστε τοῦτ' ἐστὶν αὐτοῖς πάσης τῆς κινήσεως πέρας, τὸ οὗ ἔνεκα. ὁρῶμεν δὲ τὰ κινοῦντα τὸ ζῶον διάνοιαν καὶ φαντασίαν καὶ προαίρεσιν καὶ βούλησιν καὶ ἐπιθυμίαν. ταῦτα δὲ πάντα ἀνάγεται εἰς νοῦν καὶ ὄρεξιν. καὶ γὰρ ἡ φαντασία καὶ ἡ αἴσθησις τὴν αὐτὴν τῷ νῷ χώραν ἔχουσιν· κριτικὰ γὰρ πάντα, διαφέρουσι δὲ κατὰ τὰς εἰρημένας ἐν ἄλλοις διαφοράς. βούλησις δὲ καὶ θυμὸς καὶ ἐπιθυμία πάντα ὄρεξις, ἡ δὲ προαίρεσις κοινὸν διανοίας καὶ ὀρέξεως· ὥστε κινεῖ πρῶτον τὸ ὀρεκτὸν καὶ τὸ διανοητόν. οὐ πᾶν δὲ τὸ διανοητόν, ἀλλὰ τὸ τῶν πρακτῶν τέλος. διὸ τὸ τοιοῦτόν ἐστὶ τῶν ἀγαθῶν τὸ κινοῦν, ἀλλ' οὐ πᾶν τὸ καλόν· ἥ γὰρ ἔνεκα τούτου ἄλλο, καὶ ἥ τέλος ἐστὶ τῶν ἄλλου τινὸς ἔνεκα ὄντων, ταύτῃ κινεῖ. δεῖ δὲ τιθέναι καὶ τὸ φαινόμενον ἀγαθὸν ἀγαθοῦ χώραν ἔχειν, καὶ τὸ ἡδύ· φαινόμενον γὰρ ἐστὶν ἀγαθόν. ὥστε δῆλον ὅτι ἐστὶ μὲν ἥ ὁμοίως κινεῖται τὸ ἀεὶ κινούμενον ὑπὸ τοῦ ἀεὶ κινοῦντος καὶ τῶν ζώων ἕκαστον, ἐστὶ δ' ἥ ἄλλως, διὸ καὶ τὰ μὲν ἀεὶ κινεῖται, ἡ δὲ τῶν ζώων κινήσις ἔχει πέρας. τὸ δὲ αἰδὶον καλόν, καὶ τὸ ἀληθῶς καὶ τὸ πρῶτως ἀγαθὸν καὶ μὴ ποτὲ μὲν ποτὲ δὲ μή, θεϊότερον καὶ τιμιώτερον ἢ ὥστ' εἶναι πρότερόν <τι>. τὸ μὲν οὖν πρῶτον οὐ κινούμενον κινεῖ, ἡ δ' (701a.) ὄρεξις καὶ τὸ ὀρεκτικὸν κινούμενον κινεῖ. τὸ δὲ τελευταῖον τῶν κινουμένων οὐκ ἀνάγκη κινεῖν οὐδέν. φανερόν δ' ἐκ τούτων καὶ ὅτι εὐλόγως ἡ φορὰ τελευταία τῶν γινομένων ἐν τοῖς κινουμένοις· κινεῖται γὰρ καὶ πορεύεται τὸ ζῶον ὀρέξει ἢ προαιρέσει, ἀλλοιωθέντος τινὸς κατὰ τὴν αἴσθησιν ἢ τὴν φαντασίαν.

Πῶς δὲ νοῶν ὅτε μὲν πράττει ὅτε δ' οὐ πράττει, καὶ κινεῖται, ὅτε δ' οὐ κινεῖται; ἔοικε παραπλησίως συμβαίνειν καὶ περὶ τῶν ἀκινήτων διανοούμενοις καὶ συλλογιζομένοις. ἀλλ' ἐκεῖ μὲν θεώρημα τὸ τέλος (ὅταν γὰρ τὰς δύο προτάσεις νοήσῃ, τὸ συμπέρασμα ἐνόησε καὶ συνέθηκεν), ἐνταῦθα δ' ἐκ τῶν δύο προτάσεων τὸ συμπέρασμα γίνεται ἢ πρᾶξις, οἷον ὅταν νοήσῃ ὅτι παντὶ βαδιστέον ἀνθρώπῳ, αὐτὸς δ' ἀνθρώπος, βαδίζει εὐθέως, ἂν δ' ὅτι οὐδενὶ βαδιστέον νῦν ἀνθρώπῳ, αὐτὸς δ' ἀνθρώπος, εὐθύς ἡρεμεῖ· καὶ ταῦτα ἄμφω πράττει, ἂν μὴ τι κωλύῃ ἢ ἀναγκάζῃ. ποιητέον μοι ἀγαθόν, οἰκία δ' ἀγαθόν· ποιεῖ οἰκίαν εὐθύς. σκεπάσματος δέομαι, ἱμάτιον δὲ σκέπασμα· ἱματίου δέομαι. οὗ δέομαι, ποιητέον· ἱματίου δέομαι· ἱμάτιον ποιητέον. καὶ τὸ συμπέρασμα, τὸ ἱμάτιον ποιητέον, πρᾶξις ἐστίν. πράττει δ' ἂπ' ἀρχῆς. εἰ ἱμάτιον ἔσται, ἀνάγκη εἶναι τότε πρῶτον, εἰ δὲ τότε, τότε· καὶ τοῦτο πράττει εὐθύς. ὅτι μὲν οὖν ἢ πρᾶξις τὸ συμπέρασμα, φανερόν· αἱ δὲ προτάσεις αἱ ποιητικαὶ διὰ δύο εἰδῶν γίνονται, διὰ τε τοῦ ἀγαθοῦ καὶ διὰ τοῦ δυνατοῦ. ὥσπερ δὲ τῶν ἐρωτώντων ἔνιοι, οὕτω τὴν ἐτέραν πρότασιν τὴν δῆλην οὐδ' ἢ διάνοια ἐπιστᾶσα σκοπεῖ οὐδέν· οἷον εἰ τὸ βαδίζειν ἀγαθόν ἀνθρώπῳ, ὅτι αὐτὸς ἀνθρώπος, οὐκ ἐνδιατρίβει. διὸ καὶ ὅσα μὴ λογισάμενοι πράττομεν, ταχὺ πράττομεν. ὅταν ἐνεργήσῃ γὰρ ἢ τῇ αἰσθήσῃ πρὸς τὸ οὗ ἕνεκα ἢ τῇ φαντασίᾳ ἢ τῷ νῷ, οὗ ὁρέγεται, εὐθύς ποιεῖ· ἀντ' ἐρωτήσεως γὰρ ἢ νοήσεως ἢ τῆς ὁρέξεως γίνεται ἐνέργεια. ποτέον μοι, ἢ ἐπιθυμία λέγει· τοδὶ δὲ ποτόν, ἢ αἰσθησις εἶπεν ἢ ἡ φαντασία ἢ ὁ νοῦς· εὐθύς πίνει. οὕτως μὲν οὖν ἐπὶ τὸ κινεῖσθαι καὶ πράττειν τὰ ζῷα ὁρμῶσι, τῆς μὲν ἐσχάτης αἰτίας τοῦ κινεῖσθαι ὁρέξεως οὔσης, ταύτης δὲ γινομένης ἢ δι' αἰσθήσεως ἢ διὰ φαντασίας καὶ νοήσεως. τῶν δ' ὁρεγομένων πράττειν τὰ μὲν δι' ἐπιθυμίαν ἢ θυμὸν τὰ δὲ (701b.) δι' ὄρεξιν ἢ βούλησιν τὰ μὲν ποιοῦσι, τὰ δὲ πράττουσιν. ὥσπερ δὲ τὰ αὐτόματα κινεῖται μικρᾶς κινήσεως γινομένης, λυομένων τῶν στρεβλῶν καὶ κρουόντων ἀλλήλας τὰς στρέβλας, καὶ τὸ ἀμάξιον, ὅπερ ὀχούμενον αὐτὸ κινεῖ εἰς εὐθύ, καὶ πάλιν κύκλῳ κινεῖται τῷ ἀνίσους ἔχειν τοὺς τροχοὺς (ὁ γὰρ ἐλάττων ὥσπερ κέντρον γίνεται, καθάπερ ἐν τοῖς κυλίνδροις), οὕτω καὶ τὰ ζῷα κινεῖται. ἔχει γὰρ ὄργανα τοιαῦτα τὴν τε τῶν

νεύρων φύσιν καὶ τὴν τῶν ὀστέων, τὰ μὲν ὥς ἐκεῖ τὰ ξύλα καὶ ὁ σίδηρος, τὰ δὲ νεῦρα ὥς αἱ στρέβλαι· ὧν λυομένων καὶ ἀνιεμένων κινουῦνται. ἐν μὲν οὖν τοῖς αὐτομάτοις καὶ τοῖς ἀμαξίοις οὐκ ἔστιν ἀλλοιώσεις, ἐπεὶ εἰ ἐγίνοντο ἐλάττους οἱ ἐντὸς τροχοὶ καὶ πάλιν μείζους, κἂν κύκλῳ τὸ αὐτὸ ἐκινεῖτο· ἐν δὲ τῷ ζῳῳ δύναται τὸ αὐτὸ καὶ μείζον καὶ ἔλαττον γίνεσθαι καὶ τὰ σχήματα μεταβάλλειν, αὐξανομένων τῶν μορίων διὰ θερμότητα καὶ πάλιν συστελλομένων διὰ ψύξιν καὶ ἀλλοιουμένων. ἀλλοιοῦσι δ' αἱ φαντασῖαι καὶ αἱ αἰσθήσεις καὶ αἱ ἔννοιαι. αἱ μὲν γὰρ αἰσθήσεις εὐθὺς ὑπάρχουσιν ἀλλοιώσεις τινὲς οὐσαι, ἡ δὲ φαντασία καὶ ἡ νόησις τὴν τῶν πραγμάτων ἔχουσι δύναμιν· τρόπον γάρ τινα τὸ εἶδος τὸ νοούμενον τὸ τοῦ θερμοῦ ἢ ψυχροῦ ἢ ἡδέος ἢ φοβεροῦ τοιοῦτον τυγχάνει ὃν οἷόν περ καὶ τῶν πραγμάτων ἕκαστον, διὸ καὶ φρίττουσι καὶ φοβοῦνται νοήσαντες μόνον. ταῦτα δὲ πάντα πάθη καὶ ἀλλοιώσεις εἰσὶν. ἀλλοιουμένων δ' ἐν τῷ σώματι τὰ μὲν μείζω τὰ δ' ἐλάττω γίνεται. ὅτι δὲ μικρὰ μεταβολὴ γινομένη ἐν ἀρχῇ μεγάλας καὶ πολλὰς ποιεῖ διαφορὰς ἄποθεν, οὐκ ἄδηλον· οἷον τοῦ οἴακος ἀκαριαῖόν τι μεθισταμένου πολλὴ ἢ τῆς πρώρας γίνεται μετὰστασις. ἔτι δὲ κατὰ θερμότητα ἢ ψύξιν ἢ κατ' ἄλλο τι τοιοῦτον πάθος ὅταν γένηται ἀλλοίωσις περὶ τὴν καρδίαν, καὶ ἐν ταύτῃ κατὰ μέγεθος ἐν ἀναισθητῷ μορίῳ, πολλὴν ποιεῖ τοῦ σώματος διαφορὰν ἐρυθήμασι καὶ ὠχρότησι καὶ φρίκαις καὶ τρόμοις καὶ τοῖς τούτων ἐναντίοις.

Κεφάλαιο 8

Ἀρχὴ μὲν οὖν, ὥσπερ εἴρηται, τῆς κινήσεως τὸ ἐν τῷ πρακτῷ διωκτὸν καὶ φευκτὸν· ἐξ ἀνάγκης δ' ἀκολουθεῖ τῇ νοήσει καὶ τῇ φαντασίᾳ αὐτῶν θερμότης καὶ ψύξις. τὸ μὲν γὰρ λυπηρὸν φευκτόν, τὸ δ' ἡδὺ διωκτόν (ἀλλὰ λανθάνει περὶ τὰ μικρὰ τοῦτο συμβαῖνον), ἔστι δὲ τὰ λυπηρὰ (702a.) καὶ ἡδέα πάντα σχεδὸν μετὰ ψύξεώς τινος καὶ θερμότητος. τοῦτο δὲ δηλὸν ἐκ τῶν παθημάτων. θάρρη γὰρ καὶ φόβοι καὶ ἀφροδισιασμοὶ καὶ ἄλλα σωματικὰ λυπηρὰ καὶ ἡδέα τὰ μὲν κατὰ μόριον μετὰ θερμότητος ἢ ψύξεώς ἐστι, τὰ δὲ καθ' ὅλον τὸ σῶμα· μνημαὶ δὲ καὶ ἐλπίδες, οἷον εἰδώλοις χρώμεναι τοῖς τοιούτοις, ὅτε μὲν ἦττον ὅτε δὲ μᾶλλον αἰτίαι τῶν αὐτῶν εἰσιν. ὥστ' εὐλόγως ἤδη δημιουργεῖται τὰ ἐντὸς καὶ τὰ περὶ τὰς ἀρχὰς τῶν ὀργανικῶν μορίων μεταβάλλοντα ἐκ πεπηγότων ὑγρὰ καὶ ἐξ ὑγρῶν πεπηγότα καὶ μαλακὰ καὶ σκληρὰ ἐξ ἀλλήλων. τούτων δὲ συμβαινόντων τὸν τρόπον τοῦτον, καὶ ἔτι τοῦ παθητικοῦ καὶ ποιητικοῦ τοιαύτην ἐχόντων τὴν φύσιν οἷαν πολλαχοῦ εἰρήκαμεν, ὁπότεν συμβῇ ὥστ' εἶναι τὸ μὲν ποιητικὸν τὸ δὲ παθητικόν, καὶ μηδὲν ἀπολίπη αὐτῶν ἐκάτερον τῶν ἐν τῷ λόγῳ, εὐθύς τὸ μὲν ποιεῖ τὸ δὲ πάσχει. διὰ τοῦτο δ' ἅμα ὡς εἰπεῖν νοεῖ ὅτι πορευτέον καὶ πορεύεται, ἂν μὴ τι ἐμποδίζῃ ἕτερον. τὰ μὲν γὰρ ὀργανικὰ μέρη παρασκευάζει ἐπιτηδείως τὰ πάθη, ἢ δ' ὄρεξις τὰ πάθη, τὴν δ' ὄρεξιν ἢ φαντασίᾳ· αὕτη δὲ γίνεται ἢ διὰ νοήσεως ἢ δι' αἰσθήσεως.

ἅμα δὲ καὶ ταχὺ διὰ τὸ <τὸ> ποιητικὸν καὶ παθητικὸν τῶν πρὸς ἄλληλα εἶναι τὴν φύσιν. τὸ δὲ κινεῖν πρῶτον τὸ ζῶον ἀνάγκη εἶναι ἐν τινὶ ἀρχῇ. ἢ δὲ καμπὴ ὅτι μὲν ἐστὶ ἀρχὴ τοῦ δὲ τελευτῆ, εἴρηται. διὸ καὶ ἐστὶ μὲν ὡς ἐνί, ἐστὶ δ' ὡς δυοὶ χρηταὶ ἢ φύσις αὐτῇ. ὅταν γὰρ κινῆται ἐντεῦθεν, ἀνάγκη τὸ μὲν ἡρεμεῖν τῶν σημείων τῶν ἐσχάτων, τὸ δὲ κινεῖσθαι· ὅτι γὰρ πρὸς ἡρεμοῦν δεῖ ἀπερείδεσθαι τὸ κινεῖν, εἴρηται πρότερον. κινεῖται μὲν οὖν καὶ οὐ κινεῖ τὸ ἔσχατον τοῦ βραχίονος, τῆς δ' ἐν τῷ ὠλεκράνῳ κάμψεως τὸ μὲν κινεῖται τὸ ἐν αὐτῷ τῷ ὅλῳ κινουμένῳ, ἀνάγκη δ' εἶναι τι καὶ ἀκίνητον, ὃ δὴ φαμεν δυνάμει μὲν ἐν εἶναι σημείον, ἐνεργείᾳ δὲ γίνεσθαι δύο· ὥστ' εἰ τὸ ζῶον ἦν ὁ βραχίων, ἐνταῦθ' ἂν ποῦ ἦν ἡ ἀρχὴ τῆς ψυχῆς ἢ κινουσα. ἐπεὶ δ' ἐνδέχεται καὶ πρὸς τὴν χεῖρα ἔχειν τι οὕτως τῶν ἀψύχων, οἷον εἰ κινοίῃ τὴν βακτηρίαν ἐν τῇ χειρί, φανερόν ὅτι οὐκ

ἂν εἴη ἐν οὐδετέρῳ ἢ ψυχὴ τῶν ἐσχάτων, οὐτ' ἐν τῷ ἐσχάτῳ τοῦ
κινουμένου οὐτ' ἐν τῇ ἐτέρᾳ ἀρχῇ. καὶ γὰρ τὸ ξύλον ἔχει καὶ (702b.)
ἀρχὴν καὶ τέλος πρὸς τὴν χειρᾶ. ὥστε διὰ γε τοῦτο, εἰ μὴ καὶ ἐν τῇ
βακτηρίᾳ ἢ κινουσα ἀπὸ τῆς ψυχῆς ἀρχὴ ἔνεστιν, οὐδ' ἐν τῇ χειρί·
ὁμοίως γὰρ ἔχει καὶ τὸ ἄκρον τῆς χειρὸς πρὸς τὸν καρπὸν, καὶ τοῦτο
τὸ μέρος πρὸς τὸ ὠλέκρανον. οὐδὲν γὰρ διαφέρει τὰ προσπεφυκότα
τῶν μή· γίνεται γὰρ ὥσπερ ἀφαιρετὸν μέρος ἢ βακτηρία. ἀνάγκη ἄρα
ἐν μηδεμιᾷ εἶναι ἀρχῇ, ἢ ἐστὶν ἄλλου τελευτῇ, μηδὲ εἴ τι ἐστὶν
ἕτερον ἐκείνου ἐξωτέρῳ, οἷον τοῦ μὲν τῆς βακτηρίας ἐσχάτου ἐν τῇ
χειρὶ ἢ ἀρχῇ, τούτου δ' ἐν τῷ καρπῷ. εἰ δὲ μηδ' ἐν τῇ χειρί, ὅτι
ἀνωτέρῳ ἔτι, ἢ ἀρχῇ οὐδ' ἐνταῦθα· ἔτι γὰρ τοῦ ὠλεκράνου μένοντος
κινεῖται ἅπαν τὸ κάτω συνεχές.

Κεφάλαιο 9

Ἐπεὶ δ' ὁμοίως ἔχει ἀπὸ τῶν ἀριστερῶν καὶ ἀπὸ τῶν δεξιῶν, καὶ ἅμα τὰναντία κινεῖται, ὥστε μὴ εἶναι τῷ ἡρεμεῖν τὸ δεξιὸν κινεῖσθαι τὸ ἀριστερὸν μὴδ' αὖ τῷ τοῦτο ἐκεῖνο, ἀεὶ δ' ἐν τῷ ἀνωτέρῳ ἀμφοτέρων ἡ ἀρχή, ἀνάγκη ἐν τῷ μέσῳ εἶναι τὴν ἀρχὴν τῆς ψυχῆς τῆς κινούσης· ἀμφοτέρων γὰρ τῶν ἄκρων τὸ μέσον ἔσχατον. ὁμοίως δ' ἔχει πρὸς τὰς κινήσεις τοῦτο καὶ τὰς ἀπὸ τοῦ ἄνω καὶ κάτω, οἷον τὰς ἀπὸ τῆς κεφαλῆς πρὸς τὰ ἀπὸ τῆς ῥάχεως τοῖς ἔχουσι ῥάχιν. καὶ εὐλόγως δὲ τοῦτο συμβέβηκεν· καὶ γὰρ τὸ αἰσθητικὸν ἐνταῦθα εἶναι φαμεν, ὥστ' ἀλλοιούμενου διὰ τὴν αἴσθησιν τοῦ τόπου τοῦ περὶ τὴν ἀρχὴν καὶ μεταβάλλοντος τὰ ἐχόμενα συµμεταβάλλει ἐκτεινόμενά τε καὶ συναγόμενα τὰ μόρια, ὥστ' ἐξ ἀνάγκης διὰ ταῦτα γίνεσθαι τὴν κίνησιν τοῖς ζώοις. τὸ δὲ μέσον τοῦ σώματος μέρος δυνάμει μὲν ἔν, ἐνεργείᾳ δ' ἀνάγκη γίνεσθαι πλείω· καὶ γὰρ ἅμα κινεῖται τὰ κῶλα ἀπὸ τῆς ἀρχῆς, καὶ θατέρου ἡρεμοῦντος θάτερον κινεῖται. λέγω δ' οἷον ἐπὶ τῆς ΑΒΓ τὸ Β κινεῖται, κινεῖ δὲ τὸ Α. ἀλλὰ μὴν δεῖ γέ τι ἡρεμεῖν, εἰ μέλλει τὸ μὲν κινεῖσθαι τὸ δὲ κινεῖν. ἐν ἄρα δυνάμει ὃν τὸ Α ἐνεργείᾳ δύο ἔσται, ὥστ' ἀνάγκη μὴ στιγμὴν ἀλλὰ μέγεθος τι εἶναι. ἀλλὰ μὴν ἐνδέχεται τὸ Γ ἅμα τῷ Β κινεῖσθαι, ὥστ' ἀνάγκη ἀμφοτέρας τὰς ἀρχὰς τὰς ἐν τῷ Α κινουμένας κινεῖν. δεῖ τι ἄρα εἶναι παρὰ ταύτας ἕτερον τὸ κινεῖν, καὶ μὴ κινούμενον. ἀπερείδοντο μὲν γὰρ ἂν τὰ ἄκρα καὶ αἱ ἀρχαὶ αἱ ἐν τῷ Α πρὸς ἀλλήλας κινουμένων, ὥσπερ ἂν εἴ τινες τὰ (703a.) νῶτα ἀντερείδοντες κινοῖεν τὰ σκέλη. ἀλλὰ τὸ κινεῖν ἄμφω <ἀκίνητον> ἀναγκαῖον εἶναι, τοῦτο δ' ἐστὶν ἡ ψυχὴ, ἕτερον μὲν οὐσα | τοῦ μεγέθους τοῦ τοιούτου, ἐν τούτῳ δ' οὐσα.

Κεφάλαιο 10

Κατὰ μὲν οὖν τὸν λόγον τὸν λέγοντα τὴν αἰτίαν τῆς κινήσεως ἐστὶν ἡ ὀρεξις τὸ μέσον, ὃ κινεῖ κινούμενον· ἐν δὲ τοῖς ἐμψύχοις σώμασι δεῖ τι εἶναι σῶμα τοιοῦτον. τὸ μὲν οὖν κινούμενον μὲν μὴ πεφυκὸς δὲ κινεῖν δύναται πάσχειν κατ' ἄλλοτρίαν δύναμιν· τὸ δὲ κινεῖν ἀναγκαῖον ἔχειν τινὰ δύναμιν καὶ ἰσχύν. πάντα δὲ φαίνεται τὰ ζῶα καὶ ἔχοντα πνεῦμα σύμφυτον καὶ ἰσχύοντα τούτῳ. τίς μὲν οὖν ἡ σωτηρία τοῦ συμφύτου πνεύματος, εἴρηται ἐν ἄλλοις· τοῦτο δὲ πρὸς τὴν ἀρχὴν τὴν ψυχικὴν ὅμοιως ἔχειν ὥσπερ τὸ ἐν ταῖς καμπαῖς σημείον, τὸ κινεῖν καὶ κινούμενον, πρὸς τὸ ἀκίνητον. ἐπεὶ δ' ἡ ἀρχὴ τοῖς μὲν ἐν τῇ καρδίᾳ τοῖς δ' ἐν τῷ ἀνάλογον, διὰ τοῦτο καὶ τὸ πνεῦμα τὸ σύμφυτον ἐνταῦθα φαίνεται ὄν. πότερον μὲν οὖν ταυτόν ἐστι τὸ πνεῦμα αἰεὶ ἢ γίνεται αἰεὶ ἕτερον, ἔστω ἄλλος λόγος (ὁ αὐτὸς γὰρ ἐστὶ καὶ περὶ τῶν ἄλλων μορίων)· φαίνεται δ' εὐφυνῶς ἔχον πρὸς τὸ κινητικὸν εἶναι καὶ παρέχειν ἰσχύν. τὰ δ' ἔργα τῆς κινήσεως ὥσις καὶ ἔλξις, ὥστε δεῖ τὸ ὄργανον αὐξάνεσθαι τε δύνασθαι καὶ συστέλλεσθαι. τοιαύτη δ' ἐστὶν ἡ τοῦ πνεύματος φύσις· καὶ γὰρ ἀβίαστος συστελλομένη, καὶ βιαστικὴ καὶ ὠστικὴ διὰ τὴν αὐτὴν αἰτίαν, καὶ ἔχει καὶ βάρος πρὸς τὰ πυρώδη καὶ κουφότητα πρὸς τὰ ἐναντία. δεῖ δὲ τὸ μέλλον κινεῖν μὴ ἀλλοιώσει τοιοῦτον εἶναι· κρατεῖ γὰρ κατὰ τὴν ὑπεροχὴν τὰ φυσικὰ σώματα ἀλλήλων, τὸ μὲν κοῦφον κάτω ὑπὸ τοῦ βαρυτέρου ἀπονικώμενον, τὸ δὲ βαρὺ ἄνω ὑπὸ τοῦ κουφοτέρου. ὅ μὲν οὖν κινεῖ κινουμένῳ μορίῳ ἡ ψυχὴ, εἴρηται, καὶ δι' ἣν αἰτίαν· ὑποληπτέον δὲ συνεστάναι τὸ ζῶον ὥσπερ πόλιν εὐνομουμένην. ἐν τε γὰρ τῇ πόλει ὅταν ἅπαξ συστῇ ἡ τάξις, οὐδὲν δεῖ κεχωρισμένου μονάρχου, ὃν δεῖ παρεῖναι παρ' ἑκαστον τῶν γινομένων, ἀλλ' αὐτὸς ἑκαστος ποιεῖ τὰ αὐτοῦ ὡς τέτακται, καὶ γίνεται τόδε μετὰ τόδε διὰ τὸ ἔθος· ἐν τε τοῖς ζῴοις τὸ αὐτὸ τοῦτο διὰ τὴν φύσιν γίνεται καὶ τῷ πεφυκέναι ἑκαστον οὕτω συστάντων ποιεῖν τὸ αὐτοῦ ἔργον, ὥστε μηδὲν δεῖν ἐν ἑκάστῳ εἶναι ψυχὴν, ἀλλ' ἐν τινι ἀρχῇ τοῦ σώματος οὔσης τᾶλλα (703b.) ζῆν μὲν τῷ προσπεφυκέναι, ποιεῖν δὲ τὸ ἔργον τὸ αὐτῶν διὰ τὴν φύσιν.

Κεφάλαιο 11

Πῶς μὲν οὖν κινεῖται τὰς ἐκουσίους κινήσεις τὰ ζῶα, καὶ διὰ τίνας αἰτίας, εἴρηται· κινεῖται δέ τίνας καὶ ἀκουσίους ἔνια τῶν μερῶν, τὰς δὲ πλείστας οὐχ ἐκουσίους. λέγω δ' ἀκουσίους μὲν οἷον τὴν τῆς καρδίας τε καὶ τὴν τοῦ αἰδοίου (πολλάκις γὰρ φανέντος τινός, οὐ μέντοι κελεύσαντος τοῦ νοῦ κινοῦνται), οὐχ ἐκουσίους δ' οἷον ὕπνον καὶ ἐγρήγορσιν καὶ ἀναπνοήν, καὶ ὅσαι ἄλλαι τοιαῦταί εἰσιν. οὐθενὸς γὰρ τούτων κυρία ἀπλῶς ἐστὶν οὔθ' ἡ φαντασία οὔθ' ἡ ὄρεξις, ἀλλ' ἐπειδὴ ἀνάγκη ἀλλοιοῦσθαι τὰ ζῶα φυσικὴν ἀλλοιώσιν, ἀλλοιουμένων δὲ τῶν μορίων τὰ μὲν αὖξεσθαι τὰ δὲ φθίνειν, ὥστ' ἤδη κινεῖσθαι καὶ μεταβάλλειν τὰς πεφυκυίας ἔχεσθαι μεταβολὰς ἀλλήλων. αἰτίαι δὲ τῶν κινήσεων θερμότητές τε καὶ ψύξεις, αἱ τε θύραθεν καὶ αἱ ἐντὸς ὑπάρχουσιν φυσικαί. καὶ αἱ παρὰ τὸν λόγον δὴ γινόμεναι κινήσεις τῶν ῥηθέντων μορίων ἀλλοιώσεως συμπεσούσης γίνονται. (ἡ γὰρ νόησις καὶ ἡ φαντασία, ὥσπερ εἴρηται πρότερον, τὰ ποιητικὰ τῶν παθημάτων προσφέρουσι· τὰ γὰρ εἶδη τῶν ποιητικῶν προσφέρουσι.) μάλιστα δὲ τῶν μορίων ταῦτα ποιεῖ ἐπιδήλως διὰ τὸ ὥσπερ ζῶον κεχωρισμένον ἐκάτερον εἶναι τῶν μορίων. [τούτου δ' αἴτιον ὅτι ἔχουσιν ὑγρότητα ζωτικήν.] ἡ μὲν οὖν καρδία φανερόν δι' ἣν αἰτίαν· τὰς γὰρ ἀρχὰς ἔχει τῶν αἰσθήσεων· τὸ δὲ μόριον τὸ γεννητικὸν ὅτι τοιοῦτόν ἐστι, σημεῖον· καὶ γὰρ ἐξέρχεται ἐξ αὐτοῦ ὥσπερ ζῶόν τι ἡ τοῦ σπέρματος δύναμις. αἱ δὲ κινήσεις τῇ τε ἀρχῇ ἀπὸ τῶν μορίων καὶ τοῖς μορίοις ἀπὸ τῆς ἀρχῆς εὐλόγως συμβαίνουσι, καὶ πρὸς ἀλλήλας οὕτως ἀφικνοῦνται. δεῖ γὰρ νοῆσαι τὸ Α ἀρχήν. αἱ οὖν κινήσεις καθ' ἕκαστον στοιχεῖον τῶν ἐπιγεγραμμένων ἐπὶ τὴν ἀρχὴν ἀφικνοῦνται, καὶ ἀπὸ τῆς ἀρχῆς κινουμένης καὶ μεταβαλλούσης, ἐπειδὴ πολλὰ δυνάμει ἐστίν, ἡ μὲν τοῦ Β ἀρχὴ ἐπὶ τὸ Β, ἡ δὲ τοῦ Γ ἐπὶ τὸ Γ, ἡ δ' ἀμφοῖν ἐπ' ἄμφω. ἀπὸ δὲ τοῦ Β ἐπὶ τὸ Γ τῷ ἀπὸ μὲν τοῦ Β ἐπὶ τὸ Α ἐλθεῖν ὡς ἐπ' ἀρχήν, ἀπὸ δὲ τοῦ Α ἐπὶ τὸ Γ ὡς ἀπ' ἀρχῆς. ὅτι δὲ ὅτε μὲν ταῦτα νοησάντων γίνεται ἡ κίνησις ἡ παρὰ τὸν λόγον ἐν τοῖς μορίοις, ὅτε δ' οὐ, αἴτιον τὸ ὅτε (704a.) μὲν ἐνυπάρχειν τὴν παθητικὴν ὕλην ὅτε δὲ μὴ τοσαύτην ἢ τοιαύτην ἀφικνοῦνται. δεῖ γὰρ νοῆσαι τὸ Α ἀρχήν. αἱ οὖν κινήσεις καθ' ἕκαστον στοιχεῖον τῶν ἐπιγεγραμμένων ἐπὶ τὴν ἀρχὴν ἀφικνοῦνται, καὶ ἀπὸ τῆς ἀρχῆς κινουμένης καὶ

μεταβαλλούσης, ἐπειδὴ πολλὰ δυνάμει ἐστίν, ἢ μὲν τοῦ Β ἀρχὴ ἐπὶ τὸ Β, ἢ δὲ τοῦ Γ ἐπὶ τὸ Γ, ἢ δ' ἀμφοῖν ἐπ' ἄμφω. ἀπὸ δὲ τοῦ Β ἐπὶ τὸ Γ τῷ ἀπὸ μὲν τοῦ Β ἐπὶ τὸ Α ἐλθεῖν ὡς ἐπ' ἀρχήν, ἀπὸ δὲ τοῦ Α ἐπὶ τὸ Γ ὡς ἀπ' ἀρχῆς. ὅτι δὲ ὅτε μὲν ταῦτα νοησάντων γίνεται ἡ κίνησις ἢ παρὰ τὸν λόγον ἐν τοῖς μορίοις, ὅτε δ' οὐ, αἷτιον τὸ ὅτε (704a.) μὲν ἐνυπάρχειν τὴν παθητικὴν ὕλην ὅτε δὲ μὴ τοσαύτην ἢ τοιαύτην.

Περὶ μὲν οὖν τῶν μορίων ἐκάστου τῶν ζώων, καὶ περὶ (704b.) ψυχῆς, ἔτι δὲ περὶ αἰσθήσεως καὶ ὕπνου καὶ μνήμης καὶ τῆς κοινῆς κινήσεως, εἰρήκαμεν τὰς αἰτίας· λοιπὸν δὲ περὶ γενέσεως εἶπεῖν.

(704a.) Περὶ δὲ τῶν χρησίμων μορίων τοῖς ζώοις πρὸς τὴν κίνησιν τὴν κατὰ τόπον ἐπισκεπτέον διὰ τίνα αἰτίαν τοιοῦτόν ἐστιν ἕκαστον αὐτῶν καὶ τίνος ἕνεκεν ὑπάρχει αὐτοῖς, ἔτι δὲ περὶ τῶν διαφορῶν τῶν τε πρὸς ἄλληλα τοῖς τοῦ αὐτοῦ καὶ ἑνὸς ζώου μορίοις καὶ πρὸς τὰ τῶν ἄλλων τῶν τῷ γένει διαφόρων. πρῶτον δὲ λάβωμεν περὶ ὧσων ἐπισκεπτέον. ἔστι δὲ αὐτῶν ἐν μὲν πόσοις ἐλαχίστοις τὰ ζῶα κινεῖται σημεῖοις, ἔπειτα διὰ τί τὰ μὲν ἔναιμα τέτταρσι τὰ δ' ἄναιμα πλείοσι, καὶ καθόλου δὲ διὰ τίν' αἰτίαν τὰ μὲν ἄποδα τὰ δὲ δίποδα τὰ δὲ τετράποδα τὰ δὲ πολύποδα τῶν ζώων ἐστί, καὶ διὰ τί πάντα ἄρτίους ἔχει τοὺς πόδας, ὅσαπερ ἔχει πόδας αὐτῶν, ὅλως δ' οἷς κινεῖται σημεῖοις, ἄρτια ταῦτ' ἐστίν· ἔτι δὲ διὰ τίν' αἰτίαν ἄνθρωπος μὲν καὶ ὄρνις δίπους, οἱ δ' ἰχθύες ἄποδες εἰσι· καὶ τὰς κάμπεις ὃ τε ἄνθρωπος καὶ ὁ ὄρνις δίποδες ὄντες ἐναντίας ἔχουσι τῶν σκελῶν (ὁ μὲν γὰρ ἄνθρωπος ἐπὶ τὴν περιφέρειαν κάμπτει τὸ σκέλος, ὁ δ' ὄρνις ἐπὶ τὸ κοῖλον. καὶ ὁ ἄνθρωπος αὐτὸς ἑαυτῷ ἐναντίως τὰ σκέλη καὶ τοὺς βραχίονας· τοὺς μὲν γὰρ ἐπὶ τὸ κοῖλον, τὰ δὲ γόνατα ἐπὶ τὴν περιφέρειαν κάμπτει. καὶ τὰ τετράποδα τὰ ζωοτόκα τοῖς τ' ἀνθρώποις ἐναντίως κάμπτει καὶ αὐτὰ αὐτοῖς· τὰ μὲν γὰρ πρόσθια σκέλη ἐπὶ τὸ (704b.) κυρτὸν τῆς περιφερείας κάμπτει, τὰ δ' ὀπίσθια ἐπὶ τὸ κοῖλον. ἔτι δὲ τῶν τετραπόδων ὅσα μὴ ζωοτοκεῖ ἀλλ' ὠτοκεῖ, ἰδίως καὶ εἰς τὸ πλάγιον κάμπτει) πρὸς δὲ τούτοις διὰ τίν' αἰτίαν τὰ τετράποδα κινεῖται κατὰ διάμετρον· περὶ δὴ πάντων τούτων, καὶ ὅσα ἄλλα συγγενῇ τούτοις, τὰς αἰτίας θεωρητέον. ὅτι μὲν οὖν οὕτω ταῦτα συμβαίνει, δῆλον ἐκ τῆς ἱστορίας τῆς φυσικῆς, διότι δέ, νῦν σκεπτέον.

Κεφάλαιο 2

Ἀρχὴ δὲ τῆς σκέψεως ὑποθεμένοις οἷς εἰώθαμεν χρῆσθαι πολλάκις πρὸς τὴν μέθοδον τὴν φυσικὴν, λαβόντες τὰ τοῦτον ἔχοντα τὸν τρόπον ἐν πᾶσι τοῖς τῆς φύσεως ἔργοις, τούτων δ' ἐν μὲν ἔστιν ὅτι ἡ φύσις οὐθὲν ποιεῖ μάτην, ἀλλ' ἀεὶ ἐκ τῶν ἐνδεχομένων τῇ οὐσίᾳ περὶ ἕκαστον γένος ζώου τὸ ἄριστον· διόπερ εἰ βέλτιον ᾧδί, οὕτως καὶ ἔχει κατὰ φύσιν. ἔτι τὰς διαστάσεις τοῦ μεγέθους, πόσαι καὶ ποῖαι ποίοις ὑπάρχουσι, δεῖ λαβεῖν. εἰσὶ γὰρ διαστάσεις μὲν ἕξ, συζυγίαι δὲ τρεῖς, μία μὲν τὸ ἄνω καὶ τὸ κάτω, δευτέρα δὲ τὸ ἔμπροσθεν καὶ τὸ ὀπίσθεν, τρίτη δὲ τὸ δεξιὸν καὶ τὸ ἀριστερόν. πρὸς δὲ τούτοις ὅτι τῶν κινήσεων τῶν κατὰ τόπον ἀρχαὶ ὧσις καὶ ἔλξις. καθ' αὐτὰς μὲν οὖν αὗται, κατὰ συμβεβηκὸς δὲ κινεῖται τὸ φερόμενον ὑπ' ἄλλου· οὐ (705a.) γὰρ αὐτὸ δοκεῖ κινεῖν αὐτό, ἀλλ' ὑπ' ἄλλου κινεῖσθαι τὸ ὑπὸ τινος φερόμενον.

Κεφάλαιο 3

Τούτων δὲ διωρισμένων λέγωμεν τὰ τούτων ἐφεξῆς. τῶν δὲ ζώων ὅσα μεταβάλλει κατὰ τόπον, τὰ μὲν ἀθρόω παντὶ τῷ σώματι μεταβάλλει, καθάπερ τὰ ἀλλόμενα, τὰ δὲ μορίοις, καθάπερ τῶν πορευομένων ἕκαστον. ἐν ἀμφοτέραις δὲ ταῖς μεταβολαῖς ταύταις αἰὲν μεταβάλλει τὸ κινούμενον ἀποστηριζόμενον πρὸς τὸ ὑποκείμενον αὐτῷ. διόπερ ἐάν τε ὑποφέρηται τοῦτο θάττον ἢ ὥστ' ἔχειν ἀπερείσασθαι τὸ ποιούμενον ἐπ' αὐτοῦ τὴν κίνησιν, ἐάν θ' ὅλως μηδεμίαν ἔχη τοῖς κινουμένοις ἀντέρεισιν, οὐθὲν ἐπ' αὐτοῦ δύναται κινεῖν ἑαυτό. καὶ γὰρ τὸ ἀλλόμενον καὶ πρὸς αὐτὸ ἀπερειδόμενον τὸ ἄνω καὶ πρὸς τὸ ὑπὸ τοὺς πόδας ποιεῖται τὴν ἄλσιν· ἔχει γάρ τινα ἀντέρεισιν πρὸς ἄλληλα τὰ μόρια ἐν ταῖς καμπαῖς, καὶ ὅλως τὸ πιέζον πρὸς τὸ πιεζόμενον. διὸ καὶ οἱ πένταθλοι ἄλλονται πλέον ἔχοντες τοὺς ἀλτῆρας ἢ μὴ ἔχοντες, καὶ οἱ θέοντες θάττον θέουσι παρασεύοντες τὰς χεῖρας· γίνεται γάρ τις ἀπέρεισις ἐν τῇ διατάσει πρὸς τὰς χεῖρας καὶ τοὺς καρπούς. αἰὲν δὲ τὸ κινούμενον δυσὶν ἐλαχίστοις χρώμενον ὀργανικοῖς μέρεσι ποιεῖται τὴν μεταβολήν, τῷ μὲν ὥσπερανεὶ θλίβοντι, τῷ δὲ θλιβομένῳ. τὸ μὲν γὰρ μένον θλίβεται διὰ τὸ φέρειν, τὸ δ' αἰρόμενον τείνεται τῷ φέροντι τὸ φορτίον. διόπερ ἀμερὲς οὐδὲν οὕτω κινηθῆναι δυνατόν· οὐ γὰρ ἔχει τὴν τε τοῦ πεισομένου καὶ τὴν τοῦ ποιήσοντος ἐν αὐτῷ διάληψιν.

Κεφάλαιο 4

Ἐπεὶ δ' εἰσὶν αἱ διαστάσεις τὸν ἀριθμὸν ἕξ, αἷς ὀρίζεσθαι πέφυκε τὰ ζῶα, τό τε ἄνω καὶ κάτω καὶ τὸ ἔμπροσθεν καὶ τὸ ὀπίσθεν, ἔτι δὲ τὸ δεξιὸν καὶ τὸ ἀριστερόν, τὸ μὲν ἄνω καὶ κάτω μόριον πάντ' ἔχει τὰ ζῶντα. οὐ μόνον γὰρ ἐν τοῖς ζώοις ἐστὶ τὸ ἄνω καὶ κάτω, ἀλλὰ καὶ ἐν τοῖς φυτοῖς. διείληπται δ' ἔργῳ, καὶ οὐ θέσει μόνον τῇ πρὸς τε τὴν γῆν καὶ τὸν οὐρανόν. ὅθεν μὲν γὰρ ἡ τῆς τροφῆς διάδοσις καὶ ἡ αὐξησις ἐκάστοις, ἄνω τοῦτ' ἐστὶ· πρὸς ὃ δ' (705b.) ἔσχατον αὕτη περαίνει, τοῦτο κάτω. τὸ μὲν γὰρ ἀρχὴ τις, τὸ δὲ πέρας· ἀρχὴ δὲ τὸ ἄνω. καίτοι δόξειέ γ' ἂν τοῖς φυτοῖς οἰκεῖον εἶναι τὸ κάτω μᾶλλον· οὐχ ὁμοίως γὰρ ἔχει τῇ θέσει τὸ ἄνω καὶ κάτω τούτοις καὶ τοῖς ζώοις. ἔχει δὲ πρὸς μὲν τὸ ὅλον οὐχ ὁμοίως, κατὰ δὲ τὸ ἔργον ὁμοίως. αἱ γὰρ ρίζαι εἰσὶ τὸ ἄνω τοῖς φυτοῖς· ἐκεῖθεν γὰρ ἡ τροφή διαδίδεται τοῖς φυομένοις, καὶ λαμβάνει ταύταις αὐτήν, καθάπερ τὰ ζῶα τοῖς στόμασιν. ὅσα δὲ μὴ μόνον ζῆ ἀλλὰ καὶ ζῶα ἐστὶ, τοῖς τοιούτοις ὑπάρχει τό τε ἔμπροσθεν καὶ τὸ ὀπίσθεν. αἰσθησιν γὰρ ἔχει ταῦτα πάντα, ὀρίζεται δὲ κατὰ ταύτην τό τε ὀπίσθεν καὶ τὸ ἔμπροσθεν· ἐφ' ὃ μὲν γὰρ ἡ αἰσθησις πέφυκε καὶ ὅθεν ἐστὶν ἐκάστοις, ἔμπροσθεν ταῦτ' ἐστὶ, τὰ δ' ἀντικείμενα τούτοις ὀπίσθεν. ὅσα δὲ τῶν ζώων μὴ μόνον αἰσθήσεως κοινωνεῖ, ἀλλὰ δύναται ποιεῖσθαι τὴν κατὰ τόπον μεταβολὴν αὐτὰ δι' αὐτῶν, ἐν τούτοις δὴ διώρισται πρὸς τοῖς λεχθεῖσι τό τ' ἀριστερόν καὶ τὸ δεξιὸν ὁμοίως τοῖς πρότερον εἰρημένοις, ἔργῳ τινὶ καὶ οὐ θέσει διωρισμένον ἐκάτερον αὐτῶν· ὅθεν μὲν γὰρ ἐστὶ τοῦ σώματος ἡ τῆς κατὰ τόπον μεταβολῆς ἀρχὴ φύσει, τοῦτο μὲν δεξιὸν ἐκάστων, τὸ δ' ἀντικείμενον καὶ τούτῳ πεφυκὸς ἀκολουθεῖν ἀριστερόν. τοῦτο δὲ διήρθρωται μᾶλλον ἐτέροις ἐτέρων. ὅσα μὲν γὰρ ὀργανικοῖς μέρεσι χρώμενα (λέγω δ' οἷον ποσὶν ἢ πτέρυξιν ἢ τινὶ ἄλλῳ τοιούτῳ) τὴν εἰρημένην μεταβολὴν ποιεῖται, περὶ μὲν τὰ τοιαῦτα μᾶλλον διήρθρωται τὸ λεχθέν· ὅσα δὲ μὴ τοιούτοις μορίοις, αὐτῷ δὲ τῷ σώματι διαλήψεις ποιούμενα προέρχεται, καθάπερ ἔνια τῶν ἀπόδων, οἷον οἱ τε ὄφεις καὶ τὸ τῶν καμπῶν γένος, καὶ πρὸς τούτοις ἃ καλοῦσι ἔντερα γῆς, ὑπάρχει μὲν καὶ ἐν τούτοις τὸ λεχθέν, οὐ μὴν διασεσάφηταί γ' ὁμοίως. ὅτι δ' ἐκ τῶν δεξιῶν ἡ ἀρχὴ τῆς κινήσεως ἐστὶ, σημεῖον καὶ τὸ φέρειν τὰ φορτία πάντας ἐπὶ τοῖς ἀριστεροῖς· οὕτως γὰρ ἐνδέχεται κινεῖσθαι τὸ

φέρον, λελυμένου τοῦ κινήσοντος.

διὸ καὶ ἀσκωλιάζουσι ῥᾶον ἐπὶ τοῖς ἀριστεροῖς· κινεῖν γὰρ (706a.) πέφυκε τὸ δεξιόν, κινεῖσθαι δὲ τὸ ἀριστερόν· ὥστε καὶ τὸ φορτίον οὐκ ἐπὶ τῷ κινήσονται ἄλλ' ἐπὶ τῷ κινήσομένῳ δεῖ ἐπικεῖσθαι· ἐὰν δ' ἐπὶ τῷ κινουῖντι καὶ τῇ ἀρχῇ τῆς κινήσεως ἐπιτεθῇ, ἤτοι ὅλως οὐ κινήσεται ἢ χαλεπώτερον. σημεῖον δ' ὅτι ἀπὸ τῶν δεξιῶν ἡ ἀρχὴ τῆς κινήσεως καὶ αἱ προβολαί· πάντες γὰρ τὰ ἀριστερὰ προβάλλονται, καὶ ἐστῶτες προβεβλήκασι τὰ ἀριστερὰ μᾶλλον, ἢ μὴ ἀπὸ τύχης συμβῇ. οὐ γὰρ τῷ προβεβηκότι κινουῖνται, ἀλλὰ τῷ ἀποβεβηκότι· καὶ ἀμύνονται τοῖς δεξιοῖς. διὰ ταύτην δὲ τὴν αἰτίαν καὶ τὰ δεξιὰ ταυτὰ ἐστὶ πάντων. ὅθεν μὲν γὰρ ἡ ἀρχὴ τῆς κινήσεως, τὸ αὐτὸ πᾶσι καὶ ἐν τῷ αὐτῷ τὴν θέσιν ἔχει κατὰ φύσιν· δεξιὸν δ' ἐστὶν ὅθεν ἡ ἀρχὴ τῆς κινήσεως ἐστὶ. καὶ διὰ τοῦτο τὰ στρομβώδη τῶν ὀστρακοδέρμων δεξιὰ πάντ' ἐστὶν. οὐ γὰρ ἐπὶ τὴν ἐλίκην κινεῖται, ἀλλ' ἐπὶ τὸ καταντικρὺ πάντα προέρχονται, οἷον πορφύραι καὶ κήρυκες. κινουμένων οὖν πάντων ἀπὸ τῶν δεξιῶν, κάκείνων ἐπὶ ταυτὰ κινουμένων ἑαυτοῖς, ἀνάγκη πάντα δεξιὰ εἶναι ὁμοίως. ἀπολελυμένα δ' ἔχουσι τὰ ἀριστερὰ τῶν ζώων μάλιστα ἄνθρωποι διὰ τὸ κατὰ φύσιν ἔχειν μάλιστα τῶν ζώων· φύσει δὲ βέλτιον τὸ δεξιὸν τοῦ ἀριστεροῦ κεχωρισμένον. διὸ καὶ τὰ δεξιὰ ἐν τοῖς ἀνθρώποις μάλιστα δεξιὰ ἐστὶ. διωρισμένων δὲ τῶν δεξιῶν εὐλόγως τὰ ἀριστερὰ ἀκινήτοτέρα ἐστὶ, καὶ ἀπολελυμένα μάλιστα ἐν τούτοις. καὶ αἱ ἄλλαι δ' ἀρχαὶ μάλιστα κατὰ φύσιν καὶ διωρισμέναι ἐν τῷ ἀνθρώπῳ ὑπάρχουσι, τό τ' ἄνω καὶ τὸ ἔμπροσθεν.

Κεφάλαιο 5

ὅσοις μὲν οὖν τὸ ἄνω καὶ τὸ ἔμπροσθεν διώριται, καθάπερ τοῖς ἀνθρώποις καὶ τοῖς ὄρνισι, ταῦτα μὲν δίποδα. (τῶν δὲ τεττάρων τὰ δύο σημεῖα τοῖς μὲν πτέρυγες τοῖς δὲ χεῖρες καὶ βραχίονές εἰσιν), ὅσα δ' ἐπὶ τὸ αὐτὸ τὸ πρόσθεν ἔχει καὶ τὸ ἄνω, τετράποδα καὶ πολύποδα καὶ ἄποδα. καλῶ γὰρ πόδα μέρος ἐπὶ σημείῳ πεζῷ κινητικῷ κατὰ τόπον· καὶ γὰρ τὸ ὄνομα εἰκόασιν εἰληφέναι ἀπὸ τοῦ πέδου οἱ πόδες. ἓν δ' ἐπὶ τὸ αὐτὸ ἔχει τὸ πρόσθιον καὶ (706b.) τὸ ὀπίσθιον, οἷον τὰ τε μαλάκια καὶ τὰ στρομβώδη τῶν ὀστρακοδέρμων· εἴρηται δὲ περὶ αὐτῶν πρότερον ἐν ἑτέροις.

τριῶν δ' ὄντων τόπων, τοῦ ἄνω καὶ μέσου καὶ κάτω, τὰ μὲν δίποδα τὸ ἄνω πρὸς τὸ τοῦ ὅλου ἄνω ἔχει, τὰ δὲ πολύποδα ἢ ἄποδα πρὸς τὸ μέσον, τὰ δὲ φυτὰ πρὸς τὸ κάτω. αἴτιον δ' ὅτι τὰ μὲν ἀκίνητα, πρὸς τὴν τροφήν δὲ τὸ ἄνω, ἢ δὲ τροφή ἐκ τῆς γῆς. τὰ δὲ τετράποδα ἐπὶ τὸ μέσον καὶ τὰ πολύποδα καὶ ἄποδα διὰ τὸ μὴ ὀρθὰ εἶναι· τὰ δὲ δίποδα πρὸς τὸ ἄνω διὰ τὸ ὀρθὰ εἶναι, μάλιστα δ' ὁ ἄνθρωπος· μάλιστα γὰρ κατὰ φύσιν ἐστὶ δίπους. εὐλόγως δὲ καὶ αἱ ἀρχαὶ εἰσιν ἀπὸ τούτων τῶν μορίων· ἢ μὲν γὰρ ἀρχὴ τίμιον, τὸ δ' ἄνω τοῦ κάτω καὶ τὸ πρόσθεν τοῦ ὀπισθεν καὶ τὸ δεξιὸν τοῦ ἀριστεροῦ τιμιώτερον. καλῶς δ' ἔχει καὶ τὸ ἀνάπαλιν λέγειν περὶ αὐτῶν, ὥς διὰ τὸ τὰς ἀρχὰς ἐν τούτοις εἶναι ταῦτα τιμιώτερα τῶν ἀντικειμένων μορίων ἐστίν.

Κεφάλαιο 6

Ὅτι μὲν οὖν ἐκ τῶν δεξιῶν ἢ τῆς κινήσεως ἐστὶν ἀρχή, φανερόν ἐκ τῶν εἰρημένων. ἐπεὶ δ' ἀνάγκη παντὸς συνεχοῦς, οὗ τὸ μὲν κινεῖται τὸ δ' ἡρεμεῖ, ὅλου δυναμένου κινεῖσθαι ἐστῶτος θατέρου, ἢ ἄμφω κινεῖται τὰς ἐναντίας κινήσεις, εἶναι τὸ κοινόν, καθ' ὃ συνεχῇ ταῦτ' ἐστὶν ἀλλήλοις, κἀνταῦθ' ὑπάρχειν τὴν ἀρχὴν τῆς ἐκατέρου τῶν μερῶν κινήσεως, ὁμοίως δὲ καὶ τῆς στάσεως δηλονότι, καθ' ὅσας τῶν λεχθεισῶν ἀντιθέσεων ἰδίᾳ κίνησις ὑπάρχει τῶν ἀντικειμένων μερῶν ἐκατέρω, πάντα ταῦτα κοινήν ἀρχὴν ἔχει κατὰ τὴν τῶν εἰρημένων μερῶν σύμφυσιν, λέγω δὲ τῶν τε δεξιῶν καὶ τῶν ἀριστερῶν καὶ τῶν ἄνω καὶ κάτω καὶ τῶν ἔμπροσθεν καὶ τῶν ὀπίσθεν. κατὰ μὲν οὖν τὸ ἔμπροσθεν καὶ τὸ ὀπίσθεν διάληψις οὐκ ἔστι τοιαύτη περὶ τὸ κινεῖν ἑαυτό, διὰ τὸ μηθενὶ φυσικὴν ὑπάρχειν κίνησιν εἰς τὸ ὀπίσθεν, μηδὲ διορισμὸν ἔχειν τὸ κινούμενον, καθ' ὃν τὴν ἐφ' ἐκάτερα τούτων μεταβολὴν ποιεῖται· κατὰ δὲ τὸ δεξιὸν γε καὶ ἀριστερόν καὶ τὸ ἄνω καὶ τὸ κάτω ἔστι. διὸ τῶν ζώων ὅσα μέρεσιν (707a.) ὀργανικοῖς χρώμενα προέρχεται, τῇ μὲν τοῦ ἔμπροσθεν καὶ ὀπίσθεν διαφορᾷ οὐκ ἔχει διωρισμένα ταῦτα, ταῖς δὲ λοιπαῖς, ἀμφοτέραις μὲν, προτέρᾳ δὲ τῇ κατὰ τὸ δεξιὸν καὶ ἀριστερόν διοριζούσῃ, διὰ τὸ τὴν μὲν ἐν τοῖς δυσὶν εὐθέως ἀναγκαῖον εἶναι ὑπάρχειν, τὴν δ' ἐν τοῖς τέτταρσι πρώτοις.

ἐπεὶ οὖν τό τε ἄνω καὶ τὸ κάτω καὶ τὸ δεξιὸν καὶ ἀριστερόν τῇ αὐτῇ ἀρχῇ καὶ κοινῇ συνήρτηται πρὸς αὐτά (λέγω δὲ ταύτην τὴν τῆς κινήσεως κυρίαν), δεῖ δ' ἐν ἅπαντι τῷ μέλλοντι κατὰ τρόπον ποιεῖσθαι τὴν ἀφ' ἐκάστου κίνησιν ὠρίσθαι πως καὶ τετάχθαι ταῖς ἀποστάσεσι ταῖς πρὸς τὰς ῥηθείσας ἀρχάς (τάς τε ἀντιστοιχοὺς καὶ τὰς συστοίχους τῶν ἐν τοῖς μέρεσι τούτοις) τὸ τῶν λεχθεισῶν κινήσεων ἀπασῶν αἴτιον, (αὕτη δ' ἐστὶν ἀφ' ἧς ἀρχῆς κοινῆς τῶν ἐν τῷ ζῷ ἢ τε τοῦ δεξιοῦ καὶ ἀριστεροῦ κινήσις ἐστὶν, ὁμοίως δὲ καὶ ἢ τοῦ ἄνω καὶ κάτω) ταύτην δ' ἔχειν ἐκάστῳ ἢ παραπλησίως πρὸς ἐκάστην τῶν ἐν τοῖς ῥηθείσι μέρεσιν ἀρχῶν, δῆλον οὖν ὡς ἢ μόνοις ἢ μάλιστα τούτοις ὑπάρχει τῶν ζώων ἢ κατὰ τόπον κινήσις, ἢ δυσὶν ἢ τέτταρσι ποιεῖται σημεῖους τὴν κατὰ τόπον μεταβολήν.

Κεφάλαιο 7

ὥστ' ἐπεὶ σχεδὸν τοῖς ἐναίμοις τοῦτο μάλιστα συμβέβηκε, φανερόν ὅτι πλείοσί τε σημείοις τέτταρων οὐθὲν οἶόν τε κινεῖσθαι τῶν ἐναίμων ζώων, καὶ εἴ τι τέτταρσι σημείοις κινεῖσθαι πέφυκε μόνον, ἀναγκαῖον τοῦτ' εἶναι ἔναιμον. ὁμολογεῖ δὲ τοῖς λεχθεῖσι καὶ τὰ συμβαίνοντα περὶ τὰ ζῶα. τῶν μὲν γὰρ ἐναίμων οὐδὲν εἰς πλείω διαιρούμενον δύναται ζῆν οὐθένα χρόνον ὥς εἰπεῖν, τῆς τε κατὰ τόπον κινήσεως, καθ' ἣν ἐκινεῖτο συνεχὲς ὄν καὶ μὴ διηρημένον, οὐ δύναται κοινωνεῖν· τῶν δ' ἀναίμων τε καὶ πολυπόδων ἔνια διαιρούμενα δύναται ζῆν πολλὸν χρόνον ἐκάστω τῶν μερῶν, καὶ κινεῖσθαι τὴν αὐτὴν ἥπερ καὶ πρὶν διαιρεθῆναι κίνησιν, οἷον αἱ τε καλούμεναι σκολόπενδραι καὶ ἄλλα τῶν ἐντόμων καὶ προμήκων· πάντων γὰρ τούτων καὶ (707b.) τὸ ὀπισθεν μέρος ἐπὶ τὸ αὐτὸ ποιεῖται τὴν πορείαν τῷ ἔμπροσθεν. αἴτιον δὲ τοῦ διαιρούμενα ζῆν ὅτι, καθάπερ ἂν εἴ τι συνεχὲς ἐκ πολλῶν εἴη ζώων συγκεῖμενον, οὕτως ἕκαστον αὐτῶν συνέστηκε. φανερόν δὲ τοῦτο ἐκ τῶν πρότερον εἰρημένων, διότι τοῦτον ἔχει τὸν τρόπον. δυσι γὰρ ἡ τέτταρσι κινεῖσθαι πέφυκε σημείοις τὰ μάλιστα συνεστηκότα κατὰ φύσιν, ὁμοίως δὲ καὶ τῶν ἐναίμων ὅσα ἄποδά ἐστι. καὶ γὰρ ταῦτα κινεῖται τέτταρσι σημείοις, δι' ὧν τὴν κίνησιν ποιεῖται. δυσι γὰρ χρώμενα προέρχεται καμπαῖς· τὸ γὰρ δεξιὸν καὶ ἀριστερόν τὸ πρόσθιον καὶ ὀπίσθιον ἐν τῷ πλάτει ἐστὶν ἐν ἑκατέρᾳ τῇ καμπῇ αὐτοῖς, ἐν μὲν τῷ πρὸς τὴν κεφαλὴν μέρει τὸ πρόσθιον σημεῖον δεξιὸν τε καὶ ἀριστερόν, ἐν δὲ τῷ πρὸς τὴν οὐρὰν τὰ ὀπίσθια σημεῖα. δοκεῖ δὲ δυοῖν σημείοις κινεῖσθαι, τῇ τ' ἔμπροσθεν ἀφῇ καὶ τῇ ὕστερον.

αἴτιον δ' ὅτι στενὸν κατὰ πλάτος ἐστίν, ἐπεὶ καὶ ἐν τούτοις τὸ δεξιὸν ἡγεῖται, καὶ ἀνταποδίδωσι κατὰ τὸ ὀπισθεν, ὥσπερ ἐν τοῖς τετράποσι. τῶν δὲ κάμπσεων αἴτιον τὸ μήκος· ὥσπερ γὰρ οἱ μακροὶ τῶν ἀνθρώπων λорδοὶ βαδίζουσι, καὶ τοῦ δεξιοῦ ὤμου εἰς τὸ πρόσθεν ἡγουμένου (τὸ γὰρ ἀριστερόν ἰσχίον εἰς | τοῦπισθεν μᾶλλον ἀποκλίνει, καὶ τὸ μέσον κοῖλον γίνεται καὶ λорδόν) οὕτω δεῖ νοεῖν καὶ τοὺς ὄφεις κινουμένους ἐπὶ τῇ γῇ λорδοῦς. σημεῖον δ' ὅτι ὁμοίως κινοῦνται τοῖς τετράποσιν· ἐν μέρει γὰρ μεταβάλλουσι τὸ κοῖλον καὶ τὸ κυρτόν. ὅταν γὰρ τὸ ἀριστερόν πάλιν τῶν προσθίων ἡγήσεται, ἐξ

ἐναντίας πάλιν τὸ κοῖλον γίνεται· τὸ γὰρ δεξιὸν ἐντὸς πάλιν γίνεται.

σημεῖον δεξιὸν πρόσθιον ἐφ' οὗ Α, ἀριστερὸν ἐφ' οὗ Β, ὀπίσθιον ἀριστερὸν ἐφ' οὗ Γ, δεξιὸν ἐφ' οὗ Δ. οὕτω δὲ κινοῦνται τῶν μὲν χερσαίων οἱ ὄφεις, τῶν δ' ἐνύδρων αἱ ἐγγέλεις καὶ οἱ γόγγροι καὶ αἱ μύραι, καὶ τῶν ἄλλων ὅσα ἔχει τὴν μορφήν ὀφιοδεστέραν. πλὴν ἓνια μὲν τῶν ἐνύδρων τῶν τοιούτων οὐδὲν ἔχει πετερίδιον, οἷον αἱ μύραι, ἀλλὰ χρῆται τῇ (708a.) θαλάττῃ ὥσπερ οἱ ὄφεις τῇ γῇ καὶ τῇ θαλάττῃ (νέουσι γὰρ οἱ ὄφεις ὁμοίως καὶ ὅταν κινῶνται ἐπὶ τῆς γῆς)· τὰ δὲ δύο ἔχει πετερίδια μόνον, οἷον οἱ τε γόγγροι καὶ αἱ ἐγγέλεις καὶ γένος τι κεστρέων, οἱ γίνονται ἐν τῇ λίμνῃ τῇ ἐν Σιφαῖς. καὶ διὰ τοῦτο ταῖς καμπαῖς ἐλάττωσι κινοῦνται ἐν τῷ ὑγρῷ ἢ ἐν τῇ γῇ τὰ ζῆν εἰωθότα ἐν τῇ γῇ, καθάπερ τὸ τῶν ἐγγελύων γένος. οἱ δὲ δύο πετερίδια ἔχοντες τῶν κεστρέων τῇ καμπῇ ἀνισάζουσιν ἐν τῷ ὑγρῷ τὰ τέτταρα σημεῖα.

Κεφάλαιο 8

τοῖς δ' ὄφεσιν αἴτιον τῆς ἀποδίας τό τε τὴν φύσιν μὴθὲν ποιεῖν μάτην, ἀλλὰ πάντα πρὸς τὸ ἄριστον ἀποβλέπουσαν ἐκάστω <ἐκ> τῶν ἐνδεχομένων, διασώζουσιν ἐκάστου τὴν ἰδίαν | οὐσίαν καὶ τὸ τί ἦν αὐτῷ εἶναι· ἔτι δὲ καὶ τὸ πρότερον ἡμῖν εἰρημένον, τὸ τῶν ἐναίμων μὴθὲν οἶόν τ' εἶναι πλείοσι κινεῖσθαι σημείοις ἢ τέτταρσιν. ἐκ τούτων γὰρ φανερόν ὅτι τῶν ἐναίμων ὅσα κατὰ τὸ μήκος ἀσύμμετρά ἐστι πρὸς τὴν ἄλλην τοῦ σώματος φύσιν, καθάπερ οἱ ὄφεις, οὐθὲν αὐτῶν οἶόν θ' ὑπόπουν εἶναι. πλείους μὲν γὰρ τεττάρων οὐχ οἶόν τε αὐτὰ πόδας ἔχειν (ἄναιμα γὰρ ἂν ἦν), ἔχοντα δὲ δύο πόδας ἢ τέτταρας σχεδὸν ἦν ἂν ἀκίνητα πάμπαν· οὕτω βραδεῖαν ἀναγκαῖον εἶναι καὶ ἀνωφελῆ τὴν κίνησιν.

Ἄπαν δὲ τὸ ὑπόπουν ἐξ ἀνάγκης ἀρτίους ἔχει τοὺς πόδας· ὅσα μὲν γὰρ ἄλσει χρώμενα μόνον ποιεῖται τὴν κατὰ τόπον μεταβολήν, οὐθὲν ποδῶν πρὸς γε τὴν τοιαύτην δεῖται κίνησιν· ὅσα δὲ χρῆται μὲν ἄλσει, μή ἐστι δ' αὐτοῖς αὐτάρκης αὕτη ἢ κίνησις ἀλλὰ καὶ πορείας προσδέονται, δηλὸν ὥς τοῖς μὲν βέλτιον τοῖς δ' ὅλως ἀδύνατον πορεύεσθαι. [διότι πᾶν ζῶον ἀναγκαῖον ἀρτίους ἔχειν τοὺς πόδας.] οὕσης γὰρ τῆς τοιαύτης μεταβολῆς κατὰ μέρος, ἀλλ' οὐκ ἀθρόω παντὶ τῷ σώματι καθάπερ τῆς ἄλσεως, ἀναγκαῖόν ἐστι τοῖς μὲν μένειν μεταβαλλόντων τῶν ποδῶν τοῖς δὲ κινεῖσθαι, καὶ τοῖς ἀντικειμένοις τούτων ποιεῖν ἐκάτερον, μεταβάλλον ἀπὸ τῶν κινουμένων ἐπὶ τὰ μένοντα τὸ βάρος. διόπερ οὕτε τρισὶ (708b.) μὲν οὐθὲν οὐθ' ἐνὶ χρώμενον βαδίζειν οἶόν τε· τὸ μὲν γὰρ οὐθὲν ὅλως ὑπόστημα ἔχει ἐφ' ᾧ τὸ τοῦ σώματος ἔξει βάρος, τὸ δὲ κατὰ τὴν ἐτέραν ἀντίθεσιν μόνην, ὥστ' ἀναγκαῖον αὐτὸ οὕτως ἐπιχειροῦν κινεῖσθαι πίπτειν. ὅσα δὲ πολὺποδά ἐστιν, οἶον αἱ σκολόπενδραι, τούτοις δυνατόν μὲν καὶ ἀπὸ περιττῶν ποδῶν πορείαν γίνεσθαι, καθάπερ φαίνεται ποιούμενα καὶ νῦν, ἂν τις αὐτῶν ἓνα πηρώσῃ τῶν ποδῶν, διὰ τὸ τὴν τῶν ἀντιστοίχων ποδῶν κολόβωσιν ἰᾶσθαι τῷ λοιπῷ πλήθει τῶν ἐφ' ἐκάτερα ποδῶν· γίνεται γὰρ τούτοις οἶον ἔφελξις τοῦ πεπηρωμένου μορίου τοῖς ἄλλοις [ἀλλ' οὐ βάδισις].

οὐ μὴν ἀλλὰ φανερόν γε ὅτι βέλτιον ἂν καὶ ταῦτα ποιοῖτο τὴν μεταβολὴν ἀρτίους ἔχοντα τοὺς πόδας, καὶ μὴθενὸς ἐλλείποντος, ἀλλ' ἀντιστοίχους ἔχοντα τοὺς πόδας· οὕτω γὰρ <ἂν> αὐτῶν

ἀνισάζειν τε δύναιτο τὸ βάρος καὶ μὴ ταλαντεύειν ἐπὶ θάτερα
μᾶλλον, εἰ ἀντίστοιχα ἐρείσματ' ἔχοι καὶ μὴ κενὴν τὴν ἑτέραν χώραν
τῶν ἀντικειμένων. προβαίνει δ' ἀφ' ἑκατέρου τῶν μερῶν ἐναλλάξ
πορευόμενον· οὕτω γὰρ εἰς ταὐτὸ τῷ ἐξ ἀρχῆς σχήματι γίνεται ἡ
κατάστασις.

Κεφάλαιο 9

Ὅτι μὲν οὖν ἀρτίους ἔχει τοὺς πόδας πάντα, καὶ διὰ τίν' αἰτίαν εἴρηται· ὅτι δ' εἰ μὴτὲν ἦν ἡρεμοῦν, οὐκ ἂν ἦν κάμπις οὐδ' εὐθυνσις, ἐκ τῶνδε δῆλον. ἔστι γὰρ κάμπις μὲν ἢ ἐξ εὐθέος ἢ εἰς περιφερὲς ἢ εἰς γωνίαν μεταβολή, εὐθυνσις δ' ἢ ἐκ θατέρου τούτων εἰς εὐθύ. ἐν ἀπάσαις δὲ ταῖς εἰρημέναις μεταβολαῖς ἀνάγκη πρὸς ἓν σημεῖον τὴν κάμπιν ἢ τὴν εὐθυνσιν γίνεσθαι. ἀλλὰ μὴν κάμπεώς γε μὴ οὕσης οὗτ' ἂν πορεία οὔτε νεῦσις οὔτε πτήσις ἦν. τὰ μὲν γὰρ ὑπόποδα ἐπειδὴ ἐν ἑκατέρῳ τῶν ἀντικειμένων σκελῶν ἐν μέρει ἴσταται καὶ τὸ βάρος ἴσχει, ἀναγκαῖον θατέρου προβαίνοντος θατέρου ποιεῖσθαι κάμπιν. ἴσα τε γὰρ πέφυκεν ἔχειν τῷ μήκει τὰ ἀντίστοιχα κῶλα, καὶ ὀρθὸν δεῖ εἶναι τὸ ὑφεστὸς τῷ βάρει, οἷον κάθετον πρὸς τὴν γῆν. ὅταν δὲ προβαίνει, (709a.) γίνεται ἢ ὑποτείνουσα καὶ δυναμένη τὸ μένον μέγεθος καὶ τὴν μεταξύ. ἐπεὶ δ' ἴσα τὰ κῶλα, ἀνάγκη κάμπαι τὸ μένον, ἢ ἐν τῷ γόνати ἢ ἐν τῇ κάμπει, οἷον εἴ τι ἀγόνατον εἴη τῶν βαδιζόντων. σημεῖον δ' ὅτι οὕτως ἔχει· εἰ γάρ τις ἐν γῇ **** βαδίζοι παρὰ τοῖχον, ἢ γραφομένη ἔσται οὐκ εὐθεῖα ἀλλὰ σκολιά, διὰ τὸ ἐλάττω μὲν κάμπτοντος γίνεσθαι τὴν γραφομένην, μεῖζω δ' ἴσταμένου καὶ ἐξαίροντος.

ἐνδέχεται μέντοι κινεῖσθαι καὶ μὴ ἔχοντος καμπὴν τοῦ σκέλους, ὥσπερ τὰ παιδιά ἔρπουσι. καὶ περὶ τῶν ἐλεφάντων ὁ παλαιὸς ἦν λόγος τοιοῦτος, οὐκ ἀληθὴς ὢν. κινεῖται δὲ καὶ τὰ τοιαῦτα κάμπεως γινομένης ἐν ταῖς ὠμοπλάταις ἢ τοῖς ἰσχύις. ἀλλ' ὀρθὸν οὐδὲν δύναται· ἂν πορευθῆναι συνεχῶς καὶ ἀσφαλῶς, κινήθῃ δ' ἂν οἷον ἐν ταῖς παλαίστραις οἱ διὰ τῆς κόνεως προϊόντες ἐπὶ τῶν γονάτων· πολλὸ γὰρ τὸ ἄνω μέρος, ὥστε δεῖ μακρὸν εἶναι τὸ κῶλον· εἰ δὲ τοῦτο, κάμπιν ἀναγκαῖον εἶναι. ἐπεὶ γὰρ ἔστηκε πρὸς ὀρθήν, εἰ ἄκαμπτον ἔσται τὸ κινούμενον εἰς τὸ πρόσθεν, ἢ καταπεσεῖται ἐλάττονος τῆς ὀρθῆς γινομένης, ἢ οὐ προβήσεται.

εἰ γὰρ ὀρθοῦ ὄντος θατέρου σκέλους θάτερον ἔσται προβεβηκός, μεῖζον ἔσται, ἴσον ὄν· δυνήσεται γὰρ τοῦτο τό τ' ἡρεμοῦν καὶ τὴν ὑποτείνουσαν. ἀνάγκη ἄρα κάμπτεσθαι τό τε προϊόν, καὶ κάμπαν ἅμα ἐκτείνειν θάτερον, ἐκκλίνειν τε καὶ διαβεβηκέναι καὶ ἐπὶ τῆς καθέτου μένειν· ἰσοσκελὲς γὰρ γίνεται τρίγωνον τὰ κῶλα, καὶ ἡ κεφαλὴ γίνεται κατώτερον, ὅταν κάθετος ἦ ἐφ' ἧς βέβηκε. τὰ δ'

ἄποδα τὰ μὲν κυμαίνοντα προέρχεται (τοῦτο δὲ διττῶς συμβαίνει· τὰ μὲν γὰρ ἐπὶ τῆς γῆς, καθάπερ οἱ ὄφεις, τὰς καμπὰς ποιεῖται, τὰ δ' εἰς τὸ ἄνω, ὥσπερ αἱ κάμπαι), ἡ δὲ κύμανσις καμπή ἐστι· τὰ δ' ἰλυσπάσει χρώμενα, καθάπερ τὰ καλούμενα γῆς ἔντερα καὶ βδέλλαι. ταῦτα γὰρ τῷ μὲν ἡγουμένῳ προέρχεται, τὸ δὲ λοιπὸν σῶμα πᾶν πρὸς τοῦτο συνάγουσι, καὶ τοῦτον τὸν τρόπον εἰς τόπον ἐκ τόπου μεταβάλλουσι. φανερόν δ' ὅτι εἰ μὴ αἱ δύο τῆς μιᾶς μείζους ἦσαν, οὐκ ἂν ἐδύναντο (709b.) κινεῖσθαι τὰ κυμαίνοντα τῶν ζώων. ἐκταθείσης γὰρ τῆς καμπῆς, εἰ ἴσην κατεῖχεν, οὐθὲν ἂν προήεσαν· νῦν δ' ὑπερβάλλει ἐκταθεῖσα, καὶ ἡρεμήσαντος τούτου ἐπάγει τὸ λοιπόν. ἐν ἀπάσαις δὲ ταῖς λεχθείσαις μεταβολαῖς τὸ κινούμενον ὅτε μὲν ἐκτεινόμενον εἰς εὐθὺ προέρχεται, ὅτε δὲ συγκαμπτόμενον, τοῖς μὲν ἡγουμένοις μέρεσιν εὐθὺ γινόμενον, τοῖς δ' ἐπομένοις συγκαμπτόν. ποιεῖται δὲ καὶ τὰ ἀλλόμενα πάντα τὴν κάμπην ἐν τῷ ὑποκειμένῳ μέρει τοῦ σώματος, καὶ τοῦτον τὸν τρόπον ἔχοντα ἄλλεται. καὶ τὰ πετόμενα δὲ καὶ τὰ νέοντα, τὰ μὲν τὰς πτέρυγας εὐθύνοντα καὶ κάμπτοντα πέταται, τὰ δὲ τοῖς πτερυγίοις, καὶ τούτων τὰ μὲν τέτταρσι τὰ δὲ δυσίν, ὅσα προμηκέστερα τὴν μορφήν, ὥσπερ τὸ τῶν ἐγγελύων γένος· τὴν δὲ λοιπὴν κίνησιν ἀντὶ τῶν δύο πτερυγίων τῷ λοιπῷ τοῦ σώματος καμπτόμενα νεῖ, καθάπερ εἴρηται πρότερον. οἱ δὲ πλατεῖς τῶν ἰχθύων τῇ μὲν τῷ πλάτει χρῶνται τοῦ σώματος ἀντὶ πτερυγίων, τῇ δὲ πτερυγίοις δυσί. τὰ δὲ πάμπαν πλατέα, καθάπερ ὁ βάτος, αὐτοῖς τοῖς πτερυγίοις καὶ ταῖς ἐσχάταις τοῦ σώματος περιφερείαις εὐθύνοντα καὶ κάμπτοντα ποιεῖται τὴν νεῦσιν.

Καὶ περὶ μὲν τούτων διωρίσθω τὸν τρόπον τοῦτον, τὸ δὲ μέλλον ζῶον ὀρθὸν βαδιεῖσθαι διότι δίπουν τε ἀναγκαῖόν ἐστιν εἶναι, καὶ τὰ μὲν ἄνω μέρη τοῦ σώματος κουφότερα ἔχειν τὰ δ' ὑφ'esτῶτα τούτοις βαρύτερα, δῆλον· μόνως γὰρ ἂν οὕτως ἔχον οἷόν τ' εἴη φέρειν ἑαυτὸ ῥαδίως. διόπερ ἄνθρωπος μόνον ὀρθὸν τῶν ζῶων ὦν τὰ σκέλη κατὰ λόγον ἔχει πρὸς τὰ ἄνω τοῦ σώματος μέγιστα τῶν ὑποπόδων καὶ ἰσχυρότατα. δῆλον δὲ ποιεῖ τοῦτο καὶ τὸ συμβαῖνον τοῖς παιδίοις· οὐ γὰρ δύναται βαδίζειν ὀρθὰ διὰ τὸ πάντα νανώδη εἶναι καὶ | μείζω καὶ ἰσχυρότερα ἔχειν ἢ κατὰ λόγον τὰ ἄνω μέρη τοῦ σώματος τῶν κάτωθεν. προϊούσης δὲ τῆς ἡλικίας αὐξησιν λαμβάνει τὰ κάτω μᾶλλον, μέχρι οὐπὲρ ἂν λάβωσι τὸ προσῆκον μέγεθος, καὶ ποιοῦνται τότε τοῖς σώμασι τὴν βάδισιν τὴν ὀρθήν. οἱ δ' ὄρνιθες κουφοὶ ὄντες δίποδες εἰσι διὰ τὸ ὀπισθεν αὐτοῖς τὸ βάρος εἶναι, καθάπερ ἐργάζονται τοὺς ἵππους τοὺς χαλκοὺς τοὺς τὰ πρόσθια ἡρόκτας τῶν σκελῶν. αἴτιον δὲ μάλιστα τοῦ δίποδας ὄντας δύνασθαι ἐστάναι τὸ ἔχειν τὸ ἰσχίον ὁμοιον μηρῷ καὶ τηλικοῦτον ὥστε δοκεῖν δύο μηρούς ἔχειν, τὸν τ' ἐν τῷ σκέλει πρὸ τῆς καμπῆς καὶ τὸν πρὸς τοῦτο τὸ μέρος ἀπὸ τῆς ἑδρας· ἔστι δ' οὐκ ἰσχίον. εἰ γὰρ μὴ τηλικοῦτον ἦν, οὐκ ἂν ἦν ὄρνις δίπους. ὥπερ γὰρ τοῖς ἀνθρώποις καὶ τοῖς τετράποσι ζώοις, εὐθύς ἂν ἦν ἀπὸ βραχείος ὄντος τοῦ ἰσχίου ὁ μηρὸς καὶ τὸ ἄλλο σκέλος· λίαν οὖν ἂν ἦν τὸ σῶμα πᾶν προπετὲς αὐτῶν. νῦν δὲ μακρὸν ὄν μέχρι ὑπὸ μέσην παρατείνει τὴν γαστέρα, ὥστ' ἐντεῦθεν τὰ σκέλη ὑπερηρυσμένα φέρει τὸ σῶμα πᾶν. φανερόν δ' ἐκ τούτων καὶ ὅτι ὀρθὸν οὐκ ἐνδέχεται τὸν ὄρνιθα εἶναι ὥπερ τὸν ἄνθρωπον. ἢ γὰρ τῶν πτερῶν φύσις ὥς ἔχουσι τὸ σῶμα νῦν (711a.) οὕτως αὐτοῖς χρήσιμός ἐστιν, ὀρθοῖς δ' οὐσιν ἄχρηστος ἂν ἦν, ὥπερ γράφουσι τοὺς ἔρωτας ἔχοντας πτέρυγας. ἅμα γὰρ τοῖς εἰρημένοις δῆλον ὅτι οὐδ' ἄνθρωπον, οὐδ' εἰ ἄλλο τι τοιοῦτόν ἐστι τὴν μορφήν, δυνατόν εἶναι πτερωτόν, οὐ μόνον ὅτι πλείοσι σημείοις κινήσεται ἢ τέτταρσιν ἔναιμον ὄν, ἀλλ' ὅτι ἄχρηστος αὐτοῖς ἢ τῶν πτερύγων ἕξις κατὰ φύσιν κινουμένοις· ἢ δὲ φύσις οὐδὲν ποιεῖ παρὰ φύσιν.

[τὰ δὲ πτίλα τοῖς ὀλοπτέροις ἐκ τοῦ πλαγίου προσπέφυκεν.] οὕτω γὰρ ἂν τάχιστα καὶ ἰσχυρότατα <συστέλλοντα καὶ> διαστέλλοντα τὰ μὲν τὸν ἀέρα τὰ δὲ | τὸ ὑγρὸν ποιοῖτο τὴν κίνησιν· εἰς γὰρ τὸ ἔμπροσθεν καὶ τὰ | ὀπισθεν μόρια τοῦ σώματος ἐπακολουθοῖν <ἂν> ὑπέκοντι φερόμενα τὰ μὲν ἐν τῷ ὑγρῷ τὰ δ' ἐν τῷ ἀέρι. τὰ δὲ τρωγλόδουτα τῶν τετραπόδων καὶ ῥωτόκων, οἷον οἱ τε κροκόδειλοι καὶ σαῦροι καὶ ἀσκαλαβῶται καὶ ἐμύδες τε καὶ χελῶναι, πάντα ἐκ τοῦ πλαγίου προσπεφυκότα τὰ σκέλη ἔχει καὶ ἐπὶ τῇ γῇ κατατεταμένα, καὶ κάμπτει εἰς τὸ πλάγιον, διὰ τὸ οὕτω χρήσιμα εἶναι πρὸς τὴν τῆς υποδύσεως ῥαστώνην καὶ πρὸς τὴν ἐπὶ τοῖς ῥοῖς ἐφεδρείαν καὶ φυλακὴν. ἔξω δ' ὄντων αὐτῶν, ἀναγκαῖον τοὺς μηροὺς προσστέλλοντα καὶ ὑποτιθέμενα ὑφ' αὐτὰ τὸν μετεωρισμὸν τοῦ ὅλου σώματος ποιεῖσθαι. τούτου δὲ γινομένου κάμπτειν αὐτὰ οὐχ οἷον τε ἄλλως ἢ ἔξω.

Κεφάλαιο 16

Τὰ δ' ἄναιμα τῶν ὑποπόδων ὅτι μὲν πολυπόδα ἔστι καὶ οὐθὲν αὐτῶν τετράπουν, πρότερον ἡμῖν εἴρηται· διότι δ' αὐτῶν ἀναγκαῖον ἦν τὰ σκέλη πλὴν τῶν ἐσχάτων ἔκ τε τοῦ πλαγίου προσπεφυκέναι καὶ εἰς τὸ ἄνω τὰς καμπὰς ἔχειν, καὶ αὐτὰ ὑπόβλαισα εἶναι εἰς τὸ ὀπισθεν, φανερόν.

ἀπάντων γὰρ τῶν τοιούτων ἀναγκαῖόν ἐστι τὰ μέσα τῶν σκελῶν καὶ ἡγούμενα εἶναι καὶ ἐπόμενα. εἰ οὖν ὑπ' αὐτοῖς ἦν, (713b.) ἔδει αὐτὰ καὶ εἰς τὸ ἔμπροσθεν καὶ εἰς τὸ ὀπισθεν τὴν καμπὴν ἔχειν, διὰ μὲν τὸ ἡγεῖσθαι εἰς τὸ ἔμπροσθεν, διὰ δὲ τὸ ἀκολουθεῖν εἰς τὸ ὀπισθεν. ἐπεὶ δ' ἀμφοτέρω συμβαίνει ἀναγκαῖον αὐτοῖς, διὰ τοῦτο βεβλαίσωται τε καὶ εἰς τὸ πλάγιον ἔχει τὰς καμπὰς, πλὴν τῶν ἐσχάτων· ταῦτα δ' ὥσπερ πέφυκε μᾶλλον, τὰ μὲν ὡς ἐπόμενα τὰ δ' ὡς ἡγούμενα. ἔτι δὲ κέκαμπται τὸν τρόπον τοῦτον καὶ διὰ τὸ πλῆθος τῶν σκελῶν· ἦττον γὰρ ἂν οὕτως ἐν τῇ πορείᾳ ἐμπόδιά τε αὐτὰ αὐτοῖς εἶη καὶ προσκόπτοι. ἡ δὲ βλαισότης αὐτοῖς ἔστι διὰ τὸ τρωγλοδυτικά εἶναι πάντα ἢ τὰ πλεῖστα· οὐ γὰρ οἷόν τε ὑψηλὰ εἶναι τὰ ζῶντα τὸν τρόπον τοῦτον. οἱ δὲ καρκίνοι τῶν πολυπόδων περιττότατα πεφύκασιν· οὔτε γὰρ εἰς τὸ | πρόσθεν ποιοῦνται τὴν πορείαν πλὴν ὥσπερ εἴρηται πρότερον, | πολλοὺς τε τοὺς ἡγουμένους <πόδας> ἔχουσι μόνοι τῶν ζώων. τούτου δ' αἴτιον ἡ σκληρότης τῶν ποδῶν, καὶ ὅτι οὐ χρῶνται νεύσεως χάριν αὐτοῖς ἀλλὰ πορείας· πεζεύοντα γὰρ διατελοῦσι. πάντων μὲν οὖν τῶν πολυπόδων εἰς τὸ πλάγιον αἱ καμπαί, ὥσπερ καὶ τῶν τετραπόδων ὅσα τρωγλόδута· τοιαῦτα δ' ἐστὶν οἷον σαῦραι καὶ κροκόδειλοι καὶ τὰ πολλὰ τῶν φωτοκούντων. αἴτιον δ' ὅτι τρωγλοδυτεῖ τὰ μὲν τοῖς τόκοις, τὰ δὲ καὶ τῷ βίῳ παντί.

Κεφάλαιο 17

ἀλλὰ τῶν μὲν ἄλλων βλαιοῦνται τὰ κῶλα διὰ τὸ μαλακὰ εἶναι, τῶν δὲ καράβων ὄντων σκληροδέρμων οἱ πόδες εἰσὶν ἐπὶ τῷ νεῖν καὶ οὐ τοῦ βαδίζειν χάριν· τῶν δὲ καρκίνων ἡ κάμψις εἰς τὸ πλάγιον, καὶ οὐ βεβλαίσωται ὥσπερ τοῖς τε φωτόκοις τῶν τετραπόδων καὶ τοῖς ἀναίμοις καὶ πολύποσι διὰ τὸ σκληρόδερμα εἶναι τὰ κῶλα καὶ ὀστρακῶδη, ὅντι οὐ νευστικῶ καὶ τρωγλοδύτη· πρὸς τῇ γῇ γὰρ ὁ βίος. καὶ στρογγύλος δὲ τὴν μορφήν, καὶ οὐκ ἔχων ὀρροπύγιον ὥσπερ ὁ κάραβος· πρὸς τὴν νεῦσιν γὰρ τοῖς καράβοις χρήσιμον, ὁ δ' οὐ νευστικός. καὶ ὅμοιον δὲ τῷ ὀπισθεν τὸ πλάγιον ἔχει μόνος, διὰ τὸ πολλοὺς ἔχειν τοὺς ἡγεμόνας πόδας. τούτου δ' αἴτιον (714a.) ὅτι οὐ κάμπτει εἰς τὸ πρόσθεν οὐδὲ βεβλαίσωται. τοῦ δὲ μὴ βεβλαισῶσθαι τὸ αἴτιον πρότερον εἴρηται, ἡ σκληρότης καὶ τὸ ὀστρακῶδες τοῦ δέρματος. ἀνάγκη δὲ διὰ ταῦτα πᾶσι τε προηγεῖσθαι καὶ εἰς τὸ πλάγιον, εἰς μὲν τὸ πλάγιον ὅτι εἰς τὸ πλάγιον ἡ κάμψις, πᾶσι δ' ὅτι ἐνεπόδιζον ἂν οἱ ἡρεμοῦντες πόδες τοῖς κινουμένοις. οἱ δὲ ψηττοειδεῖς τῶν ἰχθύων, ὥσπερ οἱ ἐτερόφθαλμοι βαδίζουσιν, οὕτω νέουσι· διέστραπτai γὰρ αὐτῶν ἡ φύσις. οἱ δὲ στεγανόποδες τῶν ὀρνίθων νέουσι τοῖς ποσί, καὶ διὰ μὲν τὸ τὸν ἀέρα δέχεσθαι καὶ ἀναπνεῖν δίποδές εἰσι, διὰ δὲ τὸ ἐν ὑγρῷ τὸν βίον ἔχειν στεγανόποδες· ἀντὶ πτερυγίων γὰρ χρήσιμοι οἱ πόδες αὐτοῖς τοιοῦτοι ὄντες. ἔχουσι δὲ τὰ σκέλη οὐχ ὥσπερ οἱ ἄλλοι κατὰ μέσον, ἀλλ' ὀπισθεν μᾶλλον· βραχυσκελῶν γὰρ αὐτῶν ὄντων ὀπισθεν ὄντα πρὸς τὴν νεῦσιν χρήσιμα. βραχυσκελεῖς δ' εἰσὶν οἱ τοιοῦτοι διὰ τὸ ἀπὸ τοῦ μήκους τῶν σκελῶν ἀφελοῦσαν τὴν φύσιν προσθεῖναι τοῖς ποσί, καὶ ἀντὶ τοῦ μήκους πάχος ἀποδοῦναι τοῖς σκέλεσι καὶ πλάτος τοῖς ποσί· χρήσιμοι γὰρ πλατεῖς ὄντες μᾶλλον ἢ μακροὶ πρὸς τὸ ἀποβιάζεσθαι τὸ ὑγρόν, ὅταν νέωσιν.

Κεφάλαιο 18

Εὐλόγως δὲ καὶ τὰ μὲν πτηνὰ πόδας ἔχει, οἱ δ' ἰχθύες ἄποδες· τοῖς μὲν γὰρ ὁ βίος ἐν τῷ ξηρῷ, μετέωρον δ' αἰεὶ μένειν ἀδύνατον, ὥστ' ἀνάγκη πόδας ἔχειν· τοῖς δ' ἰχθύσιν ἐν τῷ ὑγρῷ ὁ βίος, καὶ τὸ ὕδωρ δέχονται, οὐ (714b.) τὸν ἀέρα. τὰ μὲν οὖν πτερύγια χρήσιμα πρὸς τὸ νεῖν, οἱ δὲ πόδες ἄχρηστοι. εἰ δ' ἄμφω εἶχον, ἄναιμοι ἂν ἦσαν.

ὁμοίως δ' ἔχουσιν οἱ ὄρνιθες τρόπον τινὰ τοῖς ἰχθύσι. τοῖς μὲν γὰρ ὄρνισιν ἄνω αἱ πτέρυγές εἰσι, τοῖς δὲ πτερύγια δύο ἐν τῷ πρανεῖ· καὶ τοῖς μὲν ἐν τοῖς ὑπτίοις οἱ πόδες, τοῖς δὲ ἐν τε τοῖς ὑπτίοις καὶ ἐγγὺς τῶν πρανῶν πτερύγια τοῖς πλείστοις· καὶ οἱ μὲν ὀροπύγιον ἔχουσιν, οἱ δ' οὐραῖον.

Κεφάλαιο 19

Περὶ δὲ τῶν ὀστρακοδέρμων ἀπορήσειεν ἂν τις τίς ἢ κίνησις, καὶ εἰ μὴ ἔχουσι δεξιὸν καὶ ἀριστερόν, πόθεν κινοῦνται· φαίνονται δὲ κινούμενα. ἢ ὥσπερ ἀνάπηρον δεῖ τιθέναι πᾶν τὸ τοιοῦτον γένος, καὶ κινεῖσθαι ὁμοίως οἷον εἴ τις ἀποκόψει τῶν ὑποπόδων τὰ σκέλη, ὥσπερ ἡ φώκη καὶ ἡ κίνησις, καὶ εἰ μὴ ἔχουσι δεξιὸν καὶ ἀριστερόν, πόθεν κινοῦνται· φαίνονται δὲ κινούμενα. ἢ ὥσπερ ἀνάπηρον δεῖ τιθέναι πᾶν τὸ τοιοῦτον γένος, καὶ κινεῖσθαι ὁμοίως οἷον εἴ τις ἀποκόψει τῶν ὑποπόδων τὰ σκέλη, ὥσπερ ἡ φώκη καὶ ἡ νυκτερίς· καὶ γὰρ ταῦτα τετράποδα, κακῶς δ' ἐστί. τὰ δ' ὀστρακόδεσμα κινεῖται μὲν, κινεῖται δὲ παρὰ φύσιν· οὐ γὰρ ἐστὶ κινητικά, ἀλλ' ὥς μὲν μόνιμα καὶ προσπεφυκότα κινητικά, ὥς δὲ πορευτικά μόνιμα. ἔχουσι δὲ φαύλως καὶ οἱ καρκίνοι τὰ δεξιά, ἐπεὶ ἔχουσι γε. δηλοῖ δ' ἡ χηλή· μείζων γὰρ καὶ ἰσχυροτέρα ἡ δεξιά, ὥς βουλομένων διωρίσθαι τῶν ἀριστερῶν καὶ τῶν δεξιῶν.

Τὰ μὲν οὖν περὶ τῶν μορίων, τῶν τ' ἄλλων αὐτῶν καὶ τῶν περὶ τὴν πορείαν τῶν ζώων καὶ περὶ πᾶσαν τὴν κατὰ τόπον μεταβολήν, τοῦτον ἔχει τὸν τρόπον· τούτων δὲ διωρισμένων ἐχόμενόν ἐστι θεωρῆσαι περὶ ψυχῆς.

Κεφάλαιο 1

(715a.) Ἐπεὶ δὲ περὶ τῶν ἄλλων μορίων εἴρηται τῶν ἐν τοῖς ζώοις καὶ κοινῇ καὶ καθ' ἕκαστον γένος περὶ τῶν ἰδίων χωρίς, τίνα τρόπον διὰ τὴν τοιαύτην αἰτίαν ἐστὶν ἕκαστον, λέγω δὲ ταύτην τὴν ἕνεκά του· ὑπόκεινται γὰρ αἰτίαι τέτταρες, τὸ τε οὗ ἕνεκα ὡς τέλος καὶ ὁ λόγος τῆς οὐσίας (ταῦτα μὲν οὖν ὡς ἐν τι σχεδὸν ὑπολαβεῖν δεῖ), τρίτον δὲ καὶ τέταρτον ἡ ὕλη καὶ ὅθεν ἡ ἀρχὴ τῆς κινήσεως-περὶ μὲν οὖν τῶν ἄλλων εἴρηται (ὁ τε γὰρ λόγος καὶ τὸ οὗ ἕνεκα ὡς τέλος ταῦτόν καὶ ἡ ὕλη τοῖς ζώοις τὰ μέρη· παντὶ μὲν τῷ ὄλῳ τὰ ἀνομοιομερῆ, τοῖς δ' ἀνομοιομερέσι τὰ ὁμοιομερῆ, τούτοις δὲ τὰ καλούμενα στοιχεῖα τῶν σωμάτων), λοιπὸν δὲ τῶν μὲν μορίων τὰ πρὸς τὴν γένεσιν συντελοῦντα τοῖς ζώοις περὶ ὧν οὐθὲν διώρισται πρότερον, περὶ αἰτίας δὲ τῆς κινούσης τίς ἀρχή· τὸ δὲ περὶ ταύτης σκοπεῖν καὶ τὸ περὶ τῆς γενέσεως τῆς ἐκάστου τρόπον τινὰ ταῦτόν ἐστιν· διόπερ ὁ λόγος εἰς ἐν συνήγαγε, τῶν μὲν περὶ τὰ μόρια τελευταῖα ταῦτα, τῶν δὲ περὶ γενέσεως τὴν ἀρχὴν ἐχομένην τούτων τάξας.

Τῶν δὲ ζώων τὰ μὲν ἐκ συνδυασμοῦ γίγνεται θήλεος καὶ ἄρρενος, ἐν ὅσοις γένεσι τῶν ζώων ἐστὶ τὸ θῆλυ καὶ τὸ ἄρρεν· οὐ γὰρ ἐν πᾶσιν ἐστὶν, ἀλλ' ἐν μὲν τοῖς ἐναίμοις ἔξω ὀλίγων ἅπασι τὸ μὲν ἄρρεν τὸ δὲ θῆλυ τελειωθέν ἐστι, τῶν δ' ἀναίμων τὰ μὲν ἔχει τὸ θῆλυ καὶ τὸ ἄρρεν ὥστε τὰ ὁμογενῆ γεννᾶν, τὰ δὲ γεννᾷ μὲν, οὐ μέντοι τὰ γε ὁμογενῆ· τοιαῦτα δ' ἐστὶν ὅσα γίγνεται μὴ ἐκ ζώων συνδυαζομένων ἀλλ' ἐκ γῆς σηπομένης καὶ περιττωμάτων. ὡς δὲ κατὰ παντὸς εἰπεῖν, ὅσα μὲν κατὰ τόπον μεταβλητικὰ τῶν ζώων ἴδοντα τὰ μὲν νευστικὰ τὰ δὲ πτηνὰ τὰ δὲ πεζευτικὰ τοῖς σώμασιν, ἐν πᾶσι τούτοις ἐστὶ τὸ θῆλυ καὶ τὸ ἄρρεν, οὐ μόνον τοῖς ἐναίμοις ἀλλ' ἐνίοις καὶ ἀναίμοις. καὶ τούτων τοῖς μὲν καθ' ὅλον (715b.) τὸ γένος οἷον τοῖς μαλακίοις καὶ τοῖς μαλακοστράκοις, ἐν δὲ τῷ τῶν ἐντόμων γένει τὰ πλεῖστα. τούτων δ' αὐτῶν ὅσα μὲν ἐκ συνδυασμοῦ γίγνεται τῶν συγγενῶν ζώων καὶ αὐτὰ γεννᾷ κατὰ τὴν συγγένειαν· ὅσα δὲ μὴ ἐκ ζώων ἀλλ' ἐκ σηπομένης τῆς ὕλης, ταῦτα δὲ γεννᾷ μὲν ἕτερον δὲ γένος, καὶ τὸ γιγνόμενον οὔτε θῆλύ ἐστὶν οὔτε ἄρρεν· τοιαῦτα δ' ἐστὶν ἐνία τῶν ἐντόμων. καὶ τοῦτο συμβέβηκεν εὐλόγως· εἰ γὰρ ὅσα μὴ γίγνεται ἐκ ζώων, ἐκ τούτων ἐγένετο ζῶα συνδυαζομένων, εἰ μὲν ὁμογενῆ, καὶ

τὴν ἐξ ἀρχῆς τοιαύτην ἔδει τῶν τεκνωσάντων εἶναι γένεσιν (τοῦτο δ' εὐλόγως ἀξιοῦμεν· φαίνεται γὰρ συμβαῖνον οὕτως ἐπὶ τῶν ἄλλων ζώων), εἰ δ' ἀνόμοια μὲν δυνάμενα δὲ συνδυάζεσθαι, πάλιν ἐκ τούτων ἑτέρα τις ἂν ἐγίγνετο φύσις καὶ πάλιν ἄλλη τις ἐκ τούτων, καὶ τοῦτ' ἐπορεύετ' ἂν εἰς ἄπειρον. ἡ δὲ φύσις φεύγει τὸ ἄπειρον· τὸ μὲν γὰρ ἄπειρον ἀτελές, ἡ δὲ φύσις αἰετῶς ζητεῖ τέλος. ὅσα δὲ μὴ πορευτικά καθάπερ τὰ ὀστρακόδερμα τῶν ζώων καὶ τὰ ζῶντα τῷ προσπεφυκέναι, διὰ τὸ παραπλησίαν αὐτῶν εἶναι τὴν οὐσίαν τοῖς φυτοῖς, ὥσπερ οὐδ' ἐν ἐκείνοις οὐδ' ἐν τούτοις ἐστὶ τὸ θῆλυ καὶ τὸ ἄρρεν ἄλλ' ἤδη καθ' ὁμοιότητα καὶ κατ' ἀναλογίαν λέγεται· μικρὰν γάρ τινα τοιαύτην ἔχει διαφοράν. καὶ γὰρ ἐν τοῖς φυτοῖς ὑπάρχει τὰ μὲν καρποφόρα δένδρα τοῦ αὐτοῦ γένους, τὰ δ' αὐτὰ μὲν οὐ φέρει καρπὸν, συμβάλλεται δὲ τοῖς φέρουσι πρὸς τὸ πέττειν, οἷον συμβαίνει περὶ τὴν συκὴν καὶ τὸν ἐρινεόν.

Ἔστι δὲ καὶ ἐπὶ τῶν φυτῶν τὸν αὐτὸν τρόπον· τὰ μὲν γὰρ ἐκ σπέρματος γίγνεται τὰ δ' ὥσπερ αὐτοματιζούσης τῆς φύσεως. γίγνεται γὰρ ἢ τῆς γῆς σηπομένης ἢ μορίων τινῶν ἐν τοῖς φυτοῖς· ἕνια γὰρ αὐτὰ μὲν οὐ συνίσταται καθ' αὐτὰ χωρὶς, ἐν ἑτέροις δ' ἐγγίγνεται δένδρεσιν οἷον ὁ ἰξός.

(716a.) Περὶ μὲν οὖν φυτῶν αὐτὰ καθ' αὐτὰ χωρὶς ἐπισκεπτέον.

Κεφάλαιο 2

Περὶ δὲ τῶν ἄλλων ζώων τῆς γενέσεως λεκτέον κατὰ τὸν ἐπιβάλλοντα λόγον καθ' ἕκαστον αὐτῶν, ἀπὸ τῶν εἰρημένων συνείροντας. καθάπερ γὰρ εἵπομεν τῆς γενέσεως ἀρχὰς ἂν τις οὐχ ἥκιστα θεῖη τὸ θῆλυ καὶ τὸ ἄρρεν, τὸ μὲν ἄρρεν ὡς τῆς κινήσεως καὶ τῆς γενέσεως ἔχον τὴν ἀρχήν, τὸ δὲ θῆλυ ὡς ὕλης. τοῦτο δὲ μάλιστ' ἂν τις πιστεύσειε θεωρῶν πῶς γίνεταί τὸ σπέρμα καὶ πόθεν· ἐκ τούτου μὲν γὰρ τὰ φύσει γιγνόμενα συνίσταται, τοῦτο δὲ πῶς ἀπὸ τοῦ θήλεος καὶ τοῦ ἄρρενος συμβαίνει γίνεσθαι δεῖ μὴ λανθάνειν. τῷ γὰρ ἀποκρίνεσθαι τὸ τοιοῦτον μόριον ἀπὸ τοῦ θήλεος καὶ τοῦ ἄρρενος καὶ ἐν τούτοις τὴν ἀπόκρισιν εἶναι καὶ ἐκ τούτων, διὰ τοῦτο τὸ θῆλυ καὶ τὸ ἄρρεν ἀρχαὶ τῆς γενέσεως εἰσιν. ἄρρεν μὲν γὰρ λέγομεν ζῶον τὸ εἰς ἄλλο γεννῶν, θῆλυ δὲ τὸ εἰς αὐτό· διὸ καὶ ἐν τῷ ὄλῳ τὴν τῆς γῆς φύσιν ὡς θῆλυ καὶ μητέρα νομίζουσιν, οὐρανὸν δὲ καὶ ἥλιον ἢ τι τῶν ἄλλων τῶν τοιούτων ὡς γεννῶντας καὶ πατέρας προσαγορεύουσιν.

Τὸ δ' ἄρρεν καὶ τὸ θῆλυ διαφέρει κατὰ μὲν τὸν λόγον τῷ δύνασθαι ἕτερον ἐκάτερον, κατὰ δὲ τὴν αἴσθησιν μορίοις τισίν· κατὰ μὲν τὸν λόγον τῷ τὸ ἄρρεν μὲν εἶναι τὸ δυνάμενον γεννᾶν εἰς ἕτερον, καθάπερ ἐλέχθη πρότερον, τὸ δὲ θῆλυ τὸ εἰς αὐτό, καὶ ἐξ οὗ γίνεταί ἐνυπάρχον ἐν τῷ γεννῶντι τὸ γεννώμενον. ἐπεὶ δὲ δυνάμει διώρισται καὶ ἔργῳ τινί, δεῖται δὲ πρὸς πᾶσαν ἐργασίαν ὀργάνων, ὄργανα δὲ ταῖς δυνάμεσι τὰ μέρη τοῦ σώματος, ἀναγκαῖον εἶναι καὶ πρὸς τὴν τέκνωσιν καὶ πρὸς τὸν συνδυασμὸν μόρια, καὶ ταῦτα διαφέροντ' ἀλλήλων καθὸ τὸ ἄρρεν διοίσει τοῦ θήλεος. εἰ γὰρ καὶ καθ' ὅλου λέγεται τοῦ ζώου τοῦ μὲν τὸ θῆλυ τοῦ δὲ τὸ ἄρρεν, ἀλλ' οὐ κατὰ πᾶν γε αὐτὸ θῆλυ καὶ ἄρρεν ἐστὶν ἀλλὰ κατὰ τινα δύναμιν καὶ κατὰ τι μόριον, ὥσπερ καὶ ὁρατικὸν καὶ πορευτικόν, -ὅπερ καὶ φαίνεται κατὰ τὴν αἴσθησιν. τοιαῦτα δὲ τυγχάνει μόρια ὄντα τοῦ μὲν θήλεος αἱ καλούμεναι ὑστέραι τοῦ δ' ἄρρενος τὰ περὶ τοὺς ὄρχεις καὶ τοὺς περινεύς ἐν πᾶσι τοῖς ἐναίμοις· τὰ μὲν γὰρ ὄρχεις ἔχει αὐτῶν τὰ δὲ τοὺς τοιούτους πόρους. εἰσὶ δὲ διαφοραὶ τοῦ θήλεος καὶ (716b.) τοῦ ἄρρενος καὶ ἐν τοῖς ἀναίμοις ὅσα αὐτῶν ἔχει ταύτην τὴν ἐναντίωσιν, διαφέρει δ' ἐν τοῖς ἐναίμοις τὰ μέρη τὰ πρὸς τὴν μίξιν τοῖς σχήμασιν. δεῖ δὲ νοεῖν ὅτι μικρᾶς ἀρχῆς μετακινουμένης πολλὰ

συμμεταβάλλειν εἶωθε τῶν μετὰ τὴν ἀρχήν. δῆλον δὲ τοῦτο ἐπὶ τῶν ἐκτεμνομένων· τοῦ γεννητικοῦ γὰρ μορίου διαφθειρομένου μόνον ὅλη σχεδὸν ἡ μορφήν συμμεταβάλλει τοσοῦτον ὥστε ἢ θῆλυ δοκεῖν εἶναι ἢ μικρὸν ἀπολείπειν, ὡς οὐ κατὰ τὸ τυχὸν μόνιον οὐδὲ κατὰ τὴν τυχοῦσαν δύναμιν θῆλυ ὄν καὶ ἄρρεν τὸ ζῶον. φανερόν οὖν ὅτι ἀρχὴ τις οὕσα φαίνεται τὸ θῆλυ καὶ τὸ ἄρρεν· πολλὰ γοῦν συμμεταβάλλει μεταβαλλόντων ἢ θῆλυ καὶ ἄρρεν, ὡς ἀρχῆς μεταπιπτούσης.

Κεφάλαιο 3

Ἔχει δὲ τὰ περὶ τοὺς ὄρχεις καὶ τὰς ὑστέρας οὐχ ὁμοίως πᾶσι τοῖς ἐναίμοις ζώοις, καὶ πρῶτόν γε τὰ περὶ τοὺς ὄρχεις τοῖς ἄρρεσιν· τὰ μὲν γὰρ ὅλως ὄρχεις οὐκ ἔχει τῶν τοιούτων ζώων, οἷον τό τε τῶν ἰχθύων γένος καὶ τὸ τῶν ὄφεων, ἀλλὰ πόρους μόνον δύο σπερματικούς· τὰ δ' ἔχει μὲν ὄρχεις, ἐντὸς δ' ἔχει τούτους πρὸς τῇ ὀσφύϊ κατὰ τὴν τῶν νεφρῶν χώραν, ἀπὸ δὲ τούτων ἑκατέρου πόρον ὥσπερ ἐν τοῖς μὴ ἔχουσιν ὄρχεις, συνάπτοντας εἰς ἓν καθάπερ καὶ ἐπ' ἐκείνων, οἷον οἱ τε ὄρνιθες πάντες καὶ τὰ ὠτοκοῦντα τετράποδα τῶν δεχομένων τὸν ἀέρα καὶ πνεύμονα ἐχόντων. καὶ γὰρ ταῦτα πάντα ἐντὸς ἔχει πρὸς τῇ ὀσφύϊ τοὺς ὄρχεις καὶ δύο πόρους ἀπὸ τούτων ὁμοίως τοῖς ὄφεσιν, οἷον σαῦροι καὶ χελῶναι καὶ τὰ φοιιδωτὰ πάντα. τὰ δὲ ζωοτόκα πάντα μὲν ἐν τῷ ἔμπροσθεν ἔχει τοὺς ὄρχεις, ἀλλ' ἓνια αὐτῶν ἔσω πρὸς τῷ τέλει τῆς γαστροῦς οἷον ὁ δελφίς, καὶ οὐ πόρους ἀλλ' αἰδοῖον ἀπὸ τούτων περαίνον εἰς τὸ ἔξω καθάπερ οἱ βόες, -τὰ δ' ἔξω, καὶ τούτων τὰ μὲν ἀπηρητημένους ὥσπερ ἄνθρωπος, τὰ δὲ πρὸς τῇ ἔδρᾳ καθάπερ οἱ ὕες, διώριστα δὲ περὶ αὐτῶν ἀκριβέστερον ἐν ταῖς ἱστορίαις ταῖς περὶ τῶν ζώων.

Αἱ δ' ὑστέραι πᾶσι μὲν εἰσι διμερεῖς καθάπερ καὶ οἱ ὄρχεις τοῖς ἄρρεσι δύο πᾶσιν· ταύτας δ' ἔχουσι τὰ μὲν πρὸς τοῖς ἄρθροις, καθάπερ αἱ τε γυναῖκες καὶ πάντα τὰ ζωοτοκοῦντα μὴ μόνον θύραζε ἀλλὰ καὶ ἐν αὐτοῖς καὶ (717a.) οἱ ἰχθύες ὅσοι ὠτοκοῦσιν εἰς τούμφανές, -τὰ δὲ πρὸς τῷ ὑποζώματι, καθάπερ οἱ τ' ὄρνιθες πάντες καὶ τῶν ἰχθύων οἱ ζωοτοκοῦντες. ἔχουσι δὲ δικρόας καὶ τὰ μαλακόστρακα τὰς ὑστέρας καὶ τὰ μαλάκια, καὶ τὰ καλούμενα τούτων ὧὰ τοὺς περιέχοντας ὑμένας ὑστερικούς ἔχει. μάλιστα δὲ ἀδιόριστον ἐπὶ τῶν πολυπόδων ἐστίν, ὥστε δοκεῖν μίαν εἶναι· τούτου δ' αἴτιον ὁ τοῦ σώματος ὄγκος πάντῃ ὁμοῖος ὢν. δικρόαι δὲ καὶ αἱ τῶν ἐντόμων εἰσὶν ἐν τοῖς μέγεθος ἔχουσιν· ἐν δὲ τοῖς ἐλάττωσιν ἀδηλοὶ διὰ μικρότητα τοῦ σώματος.

Τὰ μὲν οὖν εἰρημένα μόρια τοῖς ζώοις τοῦτον ἔχει τὸν τρόπον.

Κεφάλαιο 4

Περὶ δὲ τῆς ἐν τοῖς ἄρρεσι διαφορᾶς τῶν σπερματικῶν ὀργάνων εἴ τις μέλλει θεωρήσειν τὰς αἰτίας δι' ἃς εἰσιν, ἀνάγκη λαβεῖν πρῶτον τίνος ἔνεκεν ἢ τῶν ὄρχεων ἐστὶ σύστασις. εἰ δὴ πᾶν ἢ φύσις ἢ διὰ τὸ ἀναγκαῖον ποιεῖ ἢ διὰ τὸ βέλτιον, καὶ τοῦτο τὸ μόνιον εἴη διὰ τούτων θάτερον. ὅτι μὲν τοίνυν οὐκ ἀναγκαῖον πρὸς τὴν γένεσιν φανερόν· πᾶσι γὰρ ἂν ὑπῆρχε τοῖς γεννώσι, νῦν δ' οὐθ' οἱ ὄφεις ἔχουσιν ὄρχεις οὐθ' οἱ ἰχθύες· ὠμμένοι γὰρ εἰσι συνδουζόμενοι καὶ πλήρεις ἔχοντες θοροῦ τοὺς πόρους. λείπεται τοίνυν βελτιονός τινος χάριν. ἐστὶ δὲ τῶν μὲν πλείστων ζώων ἔργον σχεδὸν οὐθὲν ἄλλο πλην ὥσπερ τῶν φυτῶν σπέρμα καὶ καρπός. ὥσπερ δ' ἐν τοῖς περὶ τὴν τροφήν τὰ εὐθυέντερα λαβρότερα πρὸς τὴν ἐπιθυμίαν τὴν τῆς τροφῆς, οὕτω καὶ τὰ μὴ ἔχοντα ὄρχεις πόρους δὲ μόνον ἢ ἔχοντα μὲν ἐντὸς δ' ἔχοντα, πάντα ταχύτερα πρὸς τὴν ἐνέργειαν τῶν συνδουσμῶν. ἃ δὲ δεῖ σωφρονέστερα εἶναι, ὥσπερ ἐκεῖ οὐκ εὐθυέντερα, καὶ ἐνταῦθ' ἔλικας ἔχουσιν οἱ πόροι πρὸς τὸ μὴ λάβρον μηδὲ ταχεῖαν εἶναι τὴν ἐπιθυμίαν. οἱ δ' ὄρχεις εἰσὶ πρὸς τοῦτο μεμηχανημένοι· τοῦ γὰρ σπερματικοῦ περιττώματος στασιμωτέραν ποιοῦσι τὴν κίνησιν, ἐν μὲν τοῖς ζωοτόκοις οἷον ἵπποις τε καὶ τοῖς ἄλλοις τοῖς τοιούτοις καὶ ἐν ἀνθρώποις σώζοντες τὴν ἐπαναδίπλωσιν (ὄν δὲ τρόπον ἔχει αὕτη ἐκ τῶν ἱστοριῶν τῶν περὶ τὰ ζῶα δεῖ θεωρεῖν)· οὐθὲν γὰρ εἰσι μόνιον τῶν πόρων οἱ ὄρχεις ἀλλὰ πρόσκεινται-καθάπερ τὰς λαιὰς προσάπτουσιν αἱ ὑφαίνουσαι τοῖς ἱστοῖς-ἀφαιρουμένων (717b.) γὰρ αὐτῶν ἀνασπῶνται οἱ πόροι ἐντὸς, ὥστ' οὐ δύνανται γεννᾶν τὰ ἐκτεμνόμενα, ἐπεὶ εἰ μὴ ἀνεσπῶντο ἐδύναντο ἂν, - καὶ ἤδη ταῦρός τις μετὰ τὴν ἐκτομὴν εὐθέως ὀχεύσας ἐπλήρωσε διὰ τὸ μήπω τοὺς πόρους ἀνεσπάσθαι. τοῖς δ' ὄρνισι καὶ τοῖς ὠοτόκοις τῶν τετραπόδων δέχονται τὴν σπερματικὴν περίττωσιν, ὥστε βραδυτέραν εἶναι τὴν ἔξοδον ἢ τοῖς ἰχθύσιν. φανερόν δ' ἐπὶ τῶν ὀρνίθων· περὶ γὰρ τὰς ὀχείας πολὺ μείζους ἴσχουσι τοὺς ὄρχεις, καὶ ὅσα γε τῶν ὀρνέων καθ' ὥραν μίαν ὀχεύει, ὅταν ὁ χρόνος οὗτος παρέλθῃ οὕτω μικροὺς ἔχουσιν ὥστε σχεδὸν ἀδήλους εἶναι, περὶ δὲ τὴν ὀχεῖαν σφόδρα μεγάλους. θάπτον μὲν οὖν ὀχεύουσι τὰ ἐντὸς ἔχοντα· καὶ γὰρ τὰ ἐκτὸς ἔχοντα οὐ πρότερον τὸ σπέρμα ἀφίησι πρὶν ἀνασπάσαι τοὺς ὄρχεις.

Κεφάλαιο 5

Ἔτι δὲ τὸ ὄργανον τὸ πρὸς τὸν συνδυασμὸν τὰ μὲν τετράποδα ἔχει· ἐνδέχεται γὰρ αὐτοῖς ἔχειν-τοῖς δ' ὄρνεσι καὶ τοῖς ἄποσιν οὐκ ἐνδέχεται διὰ τὸ τῶν μὲν τὰ σκέλη ὑπὸ μέσσην εἶναι τὴν γαστέρα, τὰ δ' ὅλως ἀσκελῆ εἶναι, τὴν δὲ τοῦ αἰδοίου φύσιν ἡρτῆσθαι ἐντεῦθεν καὶ τῇ θέσει κεῖσθαι ἐνταῦθα (διὸ καὶ ἐν τῇ ὁμιλίᾳ ἢ σύντασις γίνεταί τῶν σκελῶν· τό τε γὰρ ὄργανον νευρῶδες καὶ ἡ φύσις τῶν σκελῶν νευρώδης)· ὥστ' ἐπεὶ τοῦτ' οὐκ ἐνδέχεται ἔχειν ἀνάγκη καὶ ὄρχεις ἢ μὴ ἔχειν ἢ μὴ ἐνταῦθ' ἔχειν· τοῖς γὰρ ἔχουσιν ἢ αὐτὴ θέσις ἀμφοτέρων αὐτῶν.

Ἔτι δὲ τοῖς γε τοὺς ὄρχεις ἔχουσιν ἔξω διὰ τῆς κινήσεως θερμαινομένου τοῦ αἰδοίου προέρχεται τὸ σπέρμα συναθροισθέν, ἀλλ' οὐχ ὥς ἔτοιμον ὃν εὐθὺς θιγοῦσιν ὥσπερ τοῖς ἰχθύσιν.

Πάντα δ' ἔχει τὰ ζωοτόκα τοὺς ὄρχεις ἐν τῷ πρόσθεν, <ἢ ἔσω> ἢ ἔξω πλὴν ἐχίνου· οὗτος δὲ πρὸς τῇ ὀσφύϊ μόνος διὰ τὴν αὐτὴν αἰτίαν δι' ἥνπερ καὶ οἱ ὄρνεθες· ταχὺν γὰρ ἀναγκαῖον γίνεσθαι τὸν συνδυασμὸν αὐτῶν· οὐ γὰρ ὥσπερ τὰ ἄλλα τετράποδα ἐπὶ τὰ πρηνῆ ἐπιβαίνει ἀλλ' ὀρθοὶ μίγνυνται διὰ τὰς ἀκάνθας.

Δι' ἣν μὲν οὖν αἰτίαν ἔχουσι τὰ ἔχοντα ὄρχεις εἴρηται, καὶ δι' ἣν αἰτίαν τὰ μὲν ἔξω τὰ δ' ἐντός.

Κεφάλαιο 6

Ὅσα δὲ μὴ ἔχει, καθάπερ εἴρηται, διὰ τε τὸ μὴ εὖ ἀλλὰ τὸ ἀναγκαῖον μόνον οὐκ ἔχει τοῦτο τὸ μόριον, καὶ διὰ τὸ ἀναγκαῖον εἶναι ταχεῖαν γίνεσθαι τὴν ὀχείαν· τοιαύτη δ' ἐστὶν ἡ τῶν ἰχθύων φύσις καὶ ἡ τῶν ὄφεων. οἱ (718a.) μὲν γὰρ ἰχθύες ὀχεύονται παραπίπτοντες καὶ ἀπολύονται ταχέως. ὥσπερ γὰρ ἐπὶ τῶν ἀνθρώπων καὶ πάντων τῶν τοιούτων ἀνάγκη κατασχόντας τὸ πνεῦμα προῖεσθαι τὴν γονὴν, τοῦτο δ' ἐκείνοις συμβαίνει μὴ δεχομένοις τὴν θάλατταν, εἰσὶ δὲ εὐφθαρτοὶ τοῦτο μὴ ποιοῦντες· οὐκ οὖν δεῖ ἐν τῷ συνδυασμῷ τὸ σπέρμα πέττειν αὐτοὺς ὥσπερ τὰ πεζᾶ καὶ ζωοτόκα, ἀλλ' ὑπὸ τῆς ὥρας τὸ σπέρμα πεττόμενον ἀθρόον ἔχουσιν ὥστε μὴ ἐν τῷ θιγγάνειν ἀλλήλων πέττειν ἀλλὰ προῖεσθαι πεπεμμένον. διὸ ὄρχεις οὐκ ἔχουσιν ἀλλ' εὐθεῖς καὶ ἀπλοῦς τοὺς πόρους, οἷον μικρὸν μόριον τοῖς τετράποσιν ὑπάρχει περὶ τοὺς ὄρχεις· τῆς γὰρ ἐπαναδιπλώσεως τοῦ πόρου τὸ μὲν ἔναιμιον μέρος ἐστὶ τὸ δ' ἄναιμιον, ὃ δέχεται <τὸ ὑγρὸν> καὶ δι' οὗ ἤδη σπέρμα ὄν πορεύεται, ὥσθ' ὅταν ἐνταῦθα ἔλθῃ ἡ γονὴ ταχεῖα καὶ τούτοις γίγνεται ἡ ἀπόλυσις. τοῖς δ' ἰχθύσι τοιοῦτος ὁ πόρος πᾶς ἐστὶν οἷος ἐπὶ τῶν ἀνθρώπων καὶ τῶν τοιούτων ζώων κατὰ τὸ ἕτερον μέρος τῆς ἐπαναδιπλώσεως.

Κεφάλαιο 7

Οἱ δὲ ὄφεις ὀχεύονται περιελιττόμενοι ἀλλήλοις, οὐκ ἔχουσι δ' ὄρχεις οὐδ' αἰδοῖον ὥσπερ εἴρηται πρότερον, -αἰδοῖον μὲν ὅτι οὐδὲ σκέλη, ὄρχεις δὲ διὰ τὸ μῆκος-ἀλλὰ πόρους ὥσπερ οἱ ἰχθύες· διὰ γὰρ τὸ εἶναι αὐτῶν προμήκη τὴν φύσιν, εἰ ἔτι ἐπίστασις ἐγίγνετο περὶ τοὺς ὄρχεις ἐψύχετ' ἂν ἡ γονὴ διὰ τὴν βραδυτῆτα. ὅπερ συμβαίνει καὶ ἐπὶ τῶν μέγα τὸ αἰδοῖον ἐχόντων· ἀγωνώτεροι γάρ εἰσι τῶν μετριαζόντων διὰ τὸ μὴ γόνιμον εἶναι τὸ σπέρμα τὸ ψυχρόν, ψύχεσθαι δὲ τὸ φερόμενον λίαν μακράν. δι' ἣν μὲν οὖν αἰτίαν τὰ μὲν ὄρχεις ἔχει τὰ δ' οὐκ ἔχει τῶν ζώων εἴρηται.

Περιπλέκονται δ' ἀλλήλοις οἱ ὄφεις διὰ τὴν ἀφυΐαν τῆς παραπτώσεως. μικρῷ γὰρ προσαρμόττοντες μορίῳ λίαν μακροὶ ὄντες οὐκ εὐσυνάρμοστοί εἰσιν· ἐπεὶ οὖν οὐκ ἔχουσι μόρια οἷς περιλήψονται, ἀντὶ τούτου τῇ ὑγρότητι χρῶνται τοῦ σώματος περιελιττόμενοι ἀλλήλοις. διὸ καὶ δοκοῦσι βραδύτερον ἀπολύεσθαι τῶν ἰχθύων, οὐ μόνον διὰ τὸ μῆκος τῶν πόρων ἀλλὰ καὶ διὰ τὴν περὶ ταῦτα σκευωρίαν.

Κεφάλαιο 8

Τοῖς δὲ θήλεσι τὰ περὶ τὰς ὑστέρας ἀπορήσειεν ἂν τις ὄν τρόπον ἔχει· πολλαὶ γὰρ ὑπεναντιώσεις ὑπάρχουσιν αὐτοῖς. οὔτε γὰρ τὰ ζωοτοκοῦντα ὁμοίως ἔχει πάντα, ἀλλ’ ἄνθρωποι μὲν καὶ τὰ πεζὰ πάντα κάτω πρὸς τοῖς ἄρθροις, (718b.) τὰ δὲ σελάχη <τὰ> ζωοτοκοῦντα ἄνω πρὸς τῷ ὑποζώματι, -οὔτε τὰ φωτοκοῦντα, ἀλλ’ οἱ μὲν ἰχθύες κάτω καθάπερ ἄνθρωπος καὶ τὰ ζωοτοκοῦντα τῶν τετραπόδων, οἱ δ’ ὄρνιθες ἄνω καὶ ὅσα φωτοκεῖ τῶν τετραπόδων. οὐ μὴν ἀλλ’ ἔχουσι καὶ αὗται αἱ ὑπεναντιώσεις κατὰ λόγον. πρῶτον μὲν γὰρ τὰ φωτοκοῦντα φωτοκεῖ διαφερόντως· τὰ μὲν γὰρ ἀτελῆ προΐεται τὰ φά οἷον οἱ ἰχθύες· ἔξω γὰρ ἐπιτελεῖται καὶ λαμβάνει αὔξησιν τὰ τῶν ἰχθύων. αἴτιον δ’ ὅτι πολύγωνα ταῦτα καὶ τοῦτ’ ἔργον αὐτῶν ὥσπερ τῶν φυτῶν· εἰ οὖν ἐν αὐτοῖς ἐτελεσιούργουν ἀναγκαῖον ὀλίγα τῷ πλήθει εἶναι· νῦν δὲ τοσαῦτα ἴσχουσιν ὥστε δοκεῖν φὸν εἶναι τὴν ὑστέραν ἐκατέραν ἐν γε τοῖς μικροῖς ἰχθυοῖς· ταῦτα γὰρ πολυγονώτατά ἐστιν ὥσπερ καὶ ἐπὶ τῶν ἄλλων τῶν ἀνάλογον τούτοις ἐχόντων τὴν φύσιν, καὶ ἐν φυτοῖς καὶ ἐν ζώοις· ἡ γὰρ τοῦ μεγέθους αὔξησις τρέπεται εἰς τὸ σπέρμα τούτοις. οἱ δ’ ὄρνιθες καὶ τὰ τετράποδα τῶν φωτόκων τέλεια φά τίκτουσιν, ἃ δεῖ πρὸς τὸ σώζεσθαι σκληρόδερμα εἶναι (μαλακόδερμα γὰρ ἕως ἂν αὔξησιν ἔχη ἐστίν), τὸ δ’ ὄστρακον γίνεταί ὑπὸ θερμότητος ἐξικμαζούσης τὸ ὑγρὸν ἐκ τοῦ γεώδους. ἀναγκαῖον οὖν θερμὸν εἶναι τὸν τόπον ἐν ᾧ τοῦτο συμβήσεται. τοιοῦτος δ’ ὁ περὶ τὸ ὑπόζωμα· καὶ γὰρ τὴν τροφήν πέττει οὗτος. εἰ οὖν τὰ φά ἀνάγκη ἐν τῇ ὑστέρα εἶναι καὶ τὴν ὑστέραν ἀνάγκη πρὸς τῷ ὑποζώματι εἶναι τοῖς τέλεια τὰ φά τίκτουσι, τοῖς δ’ ἀτελῆ κάτω· πρὸ ὁδοῦ γὰρ οὕτως ἔσται. καὶ πέφυκε δὲ μᾶλλον ἢ ὑστέρα κάτω εἶναι ἢ ἄνω, ὅπου μὴ τι ἐμποδίζει ἕτερον ἔργον τῆς φύσεως· κάτω γὰρ αὐτῆς καὶ τὸ πέρας ἐστίν· ὅπου δὲ τὸ πέρας καὶ τὸ ἔργον-αὕτη δ’ οὐ τὸ ἔργον.

Κεφάλαιο 9

Ἔχει δὲ καὶ τὰ ζφωτοκοῦντα πρὸς ἄλληλα διαφοράν. τὰ μὲν γὰρ οὐ μόνον θύραζε ζφωτοκεῖ ἀλλὰ καὶ ἐν αὐτοῖς, οἷον ἄνθρωποι τε καὶ ἵπποι καὶ κύνες καὶ πάντα τὰ τρίχας ἔχοντα, καὶ τῶν ἐνύδρων δὲ δελφῖνές τε καὶ φάλαιναι καὶ τὰ τοιαῦτα κήτη.

Κεφάλαιο 10

Τὰ δὲ σελάχη καὶ οἱ ἔχεις θύραζε μὲν ζωοτοκοῦσιν, ἐν αὐτοῖς δ' ὠοτοκοῦσι πρῶτον. ὠοτοκοῦσι δὲ τέλειον ὦον· οὕτω γὰρ γεννᾶται ἐκ τοῦ ὠοῦ τὸ ζῶον, ἐξ ἀτελοῦς δὲ οὐθέν. θύραζε δὲ οὐκ ὠοτοκοῦσι διὰ τὸ ψυχρὰ τὴν φύσιν εἶναι καὶ οὐχ ὥς τινές φασι θερμά.

Κεφάλαιο 11

μαλακόδερμα γοῦν τὰ ῥὰ γεννῶσιν· διὰ γὰρ τὸ εἶναι ὀλιγόθερμα οὐ ξηραίνει αὐτῶν ἡ φύσις τὸ ἔσχατον. διὰ μὲν οὖν τὸ ψυχρὰ εἶναι μαλακόδερμα (719a.) γεννῶσι, διὰ δὲ τὸ μαλακόδερμα οὐ θύραζε· διεφθείρετο γὰρ ἄν. ὅταν δὲ ζῶον ἐκ τοῦ ῥοῦ γίγνηται, τὸν αὐτὸν τρόπον τὰ πλεῖστα γίγνεται ὄνπερ ἐν τοῖς ὀρνιθίοις, καὶ καταβαίνει κάτω καὶ γίγνεται ζῶα πρὸς τοῖς ἄρθροις καθάπερ καὶ ἐν τοῖς ἐξ ἀρχῆς εὐθύς ζωοτοκοῦσιν. διὸ καὶ τὴν ὑστέραν τὰ τοιαῦτα ἔχει ἀνομοίαν καὶ τοῖς ζωοτόκοις καὶ τοῖς ῥοτόκοις διὰ τὸ ἀμφοτέρων μετέχειν τῶν εἰδῶν· καὶ γὰρ πρὸς τῷ ὑποζώματι ἔχουσι καὶ κάτω παρήκουσαν πάντα τὰ σελαχῶδη. δεῖ δὲ καὶ περὶ ταύτης καὶ περὶ τῶν ἄλλων ὑστερῶν, ὃν τρόπον ἔχουσιν, ἐκ τε τῶν ἀνατομῶν τεθεωρηκέναι καὶ τῶν ἱστοριῶν. ὥστε διὰ μὲν τὸ ῥοτόκα εἶναι τελείων ῥῶν ἄνω ἔχει, διὰ δὲ τὸ ζωοτοκεῖν κάτω, καὶ ἀμφοτέρων μετεπιλήφασιν.

Τὰ δ' εὐθύς ζωοτοκοῦντα πάντα κάτω· οὐ γὰρ ἐμποδίζει τῆς φύσεως οὐδὲν ἔργον οὐδὲ διττογονεῖ. πρὸς δὲ τούτοις ἀδύνατον ζῶα γίνεσθαι πρὸς τῷ ὑποζώματι· τὰ μὲν γὰρ ἔμβρυα βάρος ἔχειν ἀναγκαῖον καὶ κίνησιν, ὃ δὲ τόπος ἐπικαιρὸς ὢν τοῦ ζῆν οὐκ ἂν δύναιτο ταῦθ' ὑπενεγκεῖν. ἔτι δ' ἀνάγκη δυστοκίαν εἶναι διὰ τὸ μῆκος τῆς φορᾶς, ἐπεὶ καὶ νῦν ἐπὶ τῶν γυναικῶν ἐὰν περὶ τὸν τόκον ἀνασπάσῃσι χασμηςάμεναι ἢ τι τοιοῦτον ποιήσασαι δυστοκοῦσιν. καὶ κεναὶ δ' οὔσαι αἱ ὑστέραι ἄνω προσιστάμεναι πνίγουσιν· καὶ γὰρ ἀνάγκη τὰς μελλούσας ζῶον ἔξελιν ἰσχυροτέρας εἶναι, διὸ σαρκώδεις εἰσὶν αἱ τοιαῦται πᾶσαι, αἱ δὲ πρὸς τῷ ὑποζώματι ὑμενώδεις. καὶ ἐπ' αὐτῶν δὲ τῶν διγονίαν ποιουμένων ζῶων φανερόν τοῦτο συμβαῖνον· τὰ μὲν γὰρ ῥὰ ἄνω καὶ ἐν τῷ πλαγίῳ ἴσχουσι, τὰ δὲ ζῶα ἐν τῷ κάτω μέρει τῆς ὑστέρας.

Δι' ἣν μὲν οὖν αἰτίαν ὑπεναντίως ἔχουσι τὰ περὶ τὰς ὑστέρας ἐνίοις τῶν ζῶων, καὶ ὅλως διὰ τί τοῖς μὲν κάτω τοῖς δὲ ἄνω πρὸς τῷ ὑποζώματι εἰσὶν εἴρηται.

Κεφάλαιο 12

Διότι δὲ τὰς μὲν ὑστέρας ἔχουσι πάντα ἐντός, τοὺς δ' ὄρχεις τὰ μὲν ἐντός τὰ δ' ἐκτός, αἴτιον τοῦ μὲν τὰς ὑστέρας ἐντός εἶναι πᾶσιν ὅτι ἐν ταύταις ἐστὶ τὸ γιγνόμενον ὃ δεῖται φυλακῆς καὶ σκέπης καὶ πέψεως, ὃ δ' ἐκτός τοῦ σώματος τόπος εὐβλαπτος καὶ ψυχρός. οἱ δ' ὄρχεις τοῖς μὲν ἐκτός τοῖς δ' ἐντός ** διὰ τὸ (719b.) δεῖσθαι καὶ τούτους σκέπης καὶ καλύμματος πρὸς τε σωτηρίαν καὶ πρὸς τὴν τοῦ σπέρματος πέψιν· ἀδύνατον γὰρ ἐνψυγμένους καὶ πεπηγότας ἀνασπᾶσθαι καὶ προῖεσθαι τὴν γονὴν. διόπερ ὅσοις ἐν φανερωῖ εἰσιν οἱ ὄρχεις ἔχουσι σκέπην δερματικὴν τὴν καλουμένην ὀσχέαν· ὅσοις δ' ἢ τοῦ δέρματος φύσις ὑπεναντιοῦται διὰ σκληρότητα πρὸς τὸ μὴ περιληπτικὴν εἶναι μηδὲ μαλθακὴν [καὶ δερματικὴν], οἷον τοῖς τ' ἰχθυῶδες ἔχουσι τὸ δέσμα καὶ τοῖς φολιδωτόν, τούτοις δ' ἀναγκαῖον ἐντός ἔχειν. διόπερ οἱ τε δελφῖνες καὶ ὅσα τῶν κητωδῶν ὄρχεις ἔχουσιν ἐντός ἔχουσι, καὶ τὰ ῥοτόκα καὶ τετράποδα τῶν φολιδωτῶν. καὶ τὸ τῶν ὀρνίθων δὲ δέσμα σκληρὸν ὥστε κατὰ μέγεθος ἀσύμμετρον εἶναι περιλαβεῖν, καὶ ταύτην αἰτίαν εἶναι πᾶσι τούτοις πρὸς ταῖς εἰρημέναις πρότερον ἐκ τῶν περὶ τὰς ὀχείας συμβαινόντων ἀναγκαίων. διὰ τὴν αὐτὴν δ' αἰτίαν καὶ ὁ ἐλέφας καὶ ὁ ἐχῖνος ἔχουσιν ἐντός τοὺς ὄρχεις· οὐδὲ γὰρ τούτοις εὐφυῆς τὸ δέσμα πρὸς τὸ χωριστὸν ἔχειν τὸ σκεπαστικὸν μόριον.

Κεῖνται δὲ καὶ τῇ θέσει ὑπεναντίως αἱ ὑστέραι τοῖς τε ζωοτοκοῦσιν ἐν αὐτοῖς καὶ τοῖς ῥοτοκοῦσι θύραζε, καὶ τούτων τοῖς τε τὰς ὑστέρας ἔχουσι κάτω καὶ τοῖς πρὸς τῷ ὑποζώματι, οἷον τοῖς ἰχθύσι πρὸς τε τοὺς ὀρνίθους καὶ τὰ ῥοτόκα τῶν τετραπόδων, καὶ τοῖς κατ' ἀμφοτέρους τοὺς τρόπους γεννῶσιν, ἐν αὐτοῖς μὲν ῥοτοκοῦσιν εἰς δὲ τὸ φανερὸν ζωοτοκοῦσιν.

τὰ μὲν γὰρ ζωοτοκοῦντα καὶ ἐν αὐτοῖς καὶ ἐκτός ἐπὶ τῆς γαστρὸς ἔχει τὰς ὑστέρας, οἷον ἄνθρωπος καὶ βοῦς καὶ κύων καὶ τᾶλλα τὰ τοιαῦτα· πρὸς γὰρ τὴν τῶν ἐμβρύων σωτηρίαν καὶ αὔξισιν συμφέρει μὴθὲν ἐπεῖναι βάρος ἐπὶ ταῖς ὑστέραις.

Κεφάλαιο 13

Ἔστι δὲ καὶ ἕτερος ὁ πόρος δι' οὗ ἢ τε ξηρὰ περίττωσις ἐξέρχεται καὶ δι' οὗ ἢ ὑγρὰ τούτοις πᾶσιν. διὸ ἔχουσιν αἰδοῖα τὰ τοιαῦτα πάντα καὶ τὰ ἄρρενα καὶ τὰ θήλεα καθ' ἃ ἐκκρίνεται τὸ περίττωμα τὸ ὑγρὸν καὶ τοῖς μὲν ἄρρεσι τὸ σπέρμα τοῖς δὲ θήλεσι τὸ κύημα. οὗτος δ' ἐπάνω καὶ ἐν τοῖς προσθίοις ὑπάρχει ὁ πόρος τοῦ τῆς ξηρᾶς τροφῆς. Ἐπεὶ οὖν δεῖ καὶ τοὺς τῶν ἀρρένων πόρους τοὺς σπερματικούς ἐρηρεῖσθαι καὶ μὴ πλανᾶσθαι καὶ τοῖς θήλεσι τὰς ὑστέρας, τοῦτο δ' ἀναγκαῖον ἢ πρὸς τὰ πρόσθια τοῦ σώματος ἢ πρὸς τὰ πρηνῆ συμβαίνειν, τοῖς μὲν ζωοτόκοις διὰ τὰ ἔμβρυα ἐν τοῖς προσθίοις αἱ ὑστέραι τοῖς δ' ὠτόκοις πρὸς τῇ ὀσφύϊ καὶ τοῖς πρηνέσιν· ὅσα δ' ὠτοκήσαντα ἐν αὐτοῖς ζωοτοκεῖ ἐκτός, ταῦτα δ' ἀμφοτέρως ἔχει διὰ τὸ μετεληφέναι ἀμφοτέρων καὶ εἶναι καὶ ζωοτόκα καὶ ὠτόκα· τὰ μὲν γὰρ ἄνω τῆς ὑστέρας καὶ ἢ γίνεταί τὰ ὦα ὑπὸ τὸ ὑπόζωμα πρὸς τῇ ὀσφύϊ ἐστὶ καὶ τοῖς πρηνέσι, †προιούσης δὲ κάτω ἐπὶ τῇ γαστρὶ· ταύτη γὰρ ζωοτοκεῖ ἤδη. ὁ δὲ πόρος εἷς καὶ τούτοις τῆς τε ξηρᾶς περιττώσεως καὶ τῆς ὀχείας· οὐθὲν γὰρ ἔχει τούτων αἰδοῖον, καθάπερ εἴρηται πρότερον, ἀπηρτημένον. ὁμοίως δ' ἔχουσι καὶ οἱ τῶν ἀρρένων πόροι, καὶ τῶν ἐχόντων καὶ τῶν μὴ ἐχόντων ὄρχεις, ταῖς τῶν ὠοτόκων ὑστέραις· πᾶσι γὰρ πρὸς τοῖς πρηνέσι προσπεφύκασιν καὶ κατὰ τὸν τόπον τῆς ῥάχεως· δεῖ μὲν γὰρ μὴ πλανᾶσθαι ἀλλ' ἐδραίους εἶναι, τοιοῦτος δ' ὁ ὀπισθεν τόπος· οὗτος γὰρ τὸ συνεχὲς παρέχει καὶ τὴν στάσιν. τοῖς μὲν οὖν ἐντὸς ἔχουσι τοὺς ὄρχεις εὐθὺς ἐρηρεισμένοι εἰσὶν [ἅμα τοῖς πόροις] καὶ τοῖς

Πῶς μὲν οὖν ἔχουσι τῇ θέσει περὶ τὰ μόρια τὰ (720b.)

Κεφάλαιο 14

Τῶν δ' ἄλλων ζῳῶν τῶν ἀναίμων οὐχ ὁ αὐτὸς τρόπος τῶν μορίων τῶν πρὸς τὴν γένεσιν συντελούντων οὔτε τοῖς ἐναίμοις οὔθ' ἑαυτοῖς. ἔστι δὲ γένη τέτταρα τὰ λοιπά, ἐν μὲν τὸ τῶν μαλακοστράκων, δεύτερον δὲ τὸ τῶν μαλακίων, τρίτον δὲ τὸ τῶν ἐντόμων, καὶ τέταρτον τὸ τῶν ὀστρακοδέρμων (τούτων δὲ περὶ μὲν πάντων ἄδηλον, τὰ δὲ πλεῖστα ὅτι οὐ συνδυάζεται φανερόν· τίνα δὲ συνίσταται τρόπον ὕστερον λεκτέον).

Τὰ δὲ μαλακόστρακα συνδυάζεται μὲν ὥσπερ τὰ ὀπισθοιρητικά, ὅταν τὸ μὲν ὑπτίον τὸ δὲ πρανὲς ἐπαλλάξῃ τὰ οὐραῖα· τοῖς γὰρ ὑπτίοις πρὸς τὰ πρανῆ ἐπιβαίνειν ἐμποδίζει τὰ οὐραῖα μακρὰν ἔχοντα τὴν ἀπάρτησιν τῶν πτερυγίων. ἔχουσι δ' οἱ μὲν ἄρρενες λεπτοὺς πόρους θορικούς, αἱ δὲ θήλειαι ὑστέρας ὑμενώδεις παρὰ τὸ ἔντερον ἔνθεν καὶ ἔνθεν ἐσχισμέναις ἐν αἷς ἐγγίγνεται τὸ φόν.

Τὰ δὲ μαλάκια συμπλέκεται μὲν κατὰ τὸ στόμα ἀντερείδοντα καὶ διαπτύττοντα τὰς πλεκτάνας, συμπλέκεται δὲ τὸν τρόπον τοῦτον ἐξ ἀνάγκης· ἡ γὰρ φύσις παρὰ τὸ στόμα τὴν τελευτὴν τοῦ περιττώματος συνήγαγε κάμψασα, καθάπερ εἴρηται πρότερον [ἐν τοῖς περὶ τῶν μορίων λόγοις]. ἔχει δ' ἡ θήλεια μὲν ὑστερικὸν μόριον φανερώς ἐν ἐκάστῳ τούτων τῶν ζώων· ὅν γὰρ ἴσχει τὸ μὲν πρῶτον ἀδιόριστον, ἔπειτα διακρινόμενον γίγνεται πολλὰ καὶ ἀποτίκει ἐκαστον τούτων ἀτελές, καθάπερ καὶ οἱ ὠτοκοῦντες τῶν ἰχθύων. ὁ δὲ πόρος ὁ αὐτὸς τοῦ περιττώματος καὶ τοῦ ὑστερικοῦ μορίου καὶ τοῖς μαλακοστράκοις καὶ τούτοις, ἔστι γὰρ ἡ τὸν θολὸν ἀφήσι διὰ τοῦ πόρου. ταῦτα δ' ἐστὶν ἐν τοῖς ὑπτίοις τοῦ σώματος ἡ τὸ κέλυσος ἀφέστηκε καὶ ἡ θάλαττα εἰσέρχεται· διὸ ὁ συνδυασμὸς κατὰ τοῦτο γίγνεται τῷ ἄρρενι πρὸς τὴν θήλειαν· ἀναγκαῖον γάρ, εἴπερ ἀφήσῃ τι ὁ ἄρρεν εἴτε σπέρμα εἴτε μόριον εἴτε ἄλλην τινὰ δύναμιν, κατὰ τὸν ὑστερικὸν πόρον πλησιάζειν. ἡ δὲ τῆς πλεκτάνης τοῦ ἄρρενος διὰ τοῦ αὐλοῦ δῖεσις ἐπὶ τῶν πολυπόδων, ἥ φασιν ὀχεύειν πλεκτάνῃ οἱ ἄλιεις, συμπλοκῆς χάριν ἐστὶν ἄλλ' οὐχ ὡς ὄργάνου χρησίμου πρὸς τὴν γένεσιν· ἔξω γὰρ ἐστὶ τοῦ πόρου καὶ τοῦ σώματος. ἐνίοτε δὲ συνδυάζονται καὶ ἐπὶ τὰ πρηνῇ τὰ (721a.) μαλάκια· πότερον δὲ γενέσεως χάριν ἢ δι' ἄλλην αἰτίαν οὐθὲν ὥπται πῶ.

Τῶν δ' ἐντόμων τὰ μὲν συνδύάζεται καὶ ἡ γένεσις αὐτῶν ἐστὶν ἐκ ζώων συνωνύμων καθάπερ ἐπὶ τῶν ἐναίμων, οἷον αἶ τε ἀκρίδες καὶ οἱ τέττιγες καὶ τὰ φαλάγγια καὶ οἱ σφήκες καὶ οἱ μύρμηκες, -τὰ δὲ συνδύάζεται μὲν καὶ γεννῶσιν, οὐχ ὁμογενῇ δ' αὐτοῖς ἀλλὰ σκώληκας μόνον, οὐδὲ γίνονται ἐκ ζώων ἀλλ' ἐκ σηπομένων ὑγρῶν, τὰ δὲ ξηρῶν, οἷον αἶ τε ψύλλαι καὶ αἱ μυῖαι καὶ αἱ κανθαρίδες, -τὰ δ' οὐτ' ἐκ ζώων γίνονται οὔτε συνδυάζονται καθάπερ ἐμπίδες τε καὶ κώνωπες καὶ πολλὰ τοιαῦτα γένη. τῶν δὲ συνδυαζομένων ἐν τοῖς πλείστοις τὰ θήλεα μείζω τῶν ἀρρένων ἐστίν. πόρους δὲ τὰ ἄρρενα θορικοὺς οὐ φαίνονται ἔχοντα. ἀφήσι δὲ ὥς ἐπὶ τὸ πλεῖστον εἰπεῖν τὸ ἄρρεν εἰς τὸ θῆλυ οὐδὲν μόριον ἀλλὰ τὸ θῆλυ εἰς τὸ ἄρρεν κάτωθεν ἄνω. τεθεώρηται δὲ τοῦτο ἐπὶ πολλῶν, [καὶ περὶ τοῦ ἀναβαίνειν ὡσαύτως] τοῦναντίον δ' ἐπ' ὀλίγων· ὥστε δὲ γένει διελεῖν οὐπω συνεώραται. σχεδὸν δὲ τοῦτο καὶ ἐπὶ τῶν φωτόκων ἰχθύων τῶν πλείστων ἐστὶ καὶ ἐπὶ τῶν τετραπόδων καὶ φωτόκων· τὰ γὰρ θήλεα μείζω τῶν ἀρρένων ἐστὶ διὰ τὸ συμφέρειν πρὸς τὸν γιγνόμενον αὐτοῖς ὑπὸ τῶν ῥῶν ὄγκον ἐν τῇ κυήσει. τοῖς δὲ θήλεσιν αὐτῶν τὸ ταῖς ὑστέραις ἀνάλογον μόριον ἐσχισμένον ἐστὶ παρὰ τὸ ἔντερον, ὥσπερ καὶ τοῖς ἄλλοις, ἐν ᾧ ἐγγίγνεται τὰ κυήματα. δῆλον δὲ τοῦτο ἐπὶ τε τῶν ἀκρίδων καὶ ὅσα μέγεθος αὐτῶν ἔχει, συνδυάζεσθαι πεφυκότων· τὰ γὰρ πλεῖστα μικρὰ λίαν τῶν ἐντόμων ἐστίν.

Τὰ μὲν οὖν περὶ τὴν γένεσιν ὄργανα τοῖς ζώοις περὶ ὧν οὐκ ἐλέχθη πρότερον, τοῦτον ἔχει τὸν τρόπον· τῶν δ' ὁμοιομερῶν ἀπελείφθη περὶ γονῆς καὶ γάλακτος, περὶ ὧν καιρὸς ἐστὶν εἰπεῖν, περὶ μὲν γονῆς ἤδη περὶ δὲ γάλακτος ἐν τοῖς ἐχομένοις.

Κεφάλαιο 17

Τὰ μὲν γὰρ προῖεται φανερώς σπέρμα τῶν ζώων οἷον ὅσα αὐτῶν ἔναιμα τὴν φύσιν ἐστί, τὰ δ' ἔντομα καὶ τὰ μαλάκια ποτέρως ἄδηλον. ὥστε τοῦτο θεωρητέον πότερον πάντα προῖεται σπέρμα τὰ ἄρρενα ἢ οὐ πάντα, καὶ εἰ μὴ πάντα, διὰ τίν' αἰτίαν τὰ μὲν τὰ δ' οὐ· καὶ τὰ θήλεα δὲ πότερον συμβάλλεται σπέρμα τι ἢ οὐ, (721b.) καὶ εἰ μὴ σπέρμα, πότερον οὐδ' ἄλλο οὐθέν, ἢ συμβάλλεται μὲν τι, οὐ σπέρμα δέ. ἔτι δὲ καὶ τὰ προῖεμένα σπέρμα τί συμβάλλεται διὰ τοῦ σπέρματος πρὸς τὴν γένεσιν σκεπτέον καὶ ὅλως τίς ἐστιν ἡ τοῦ σπέρματος φύσις καὶ ἡ τῶν καλουμένων καταμηνίων, ὅσα ταύτην τὴν ὑγρότητα προῖεται τῶν ζώων.

Δοκεῖ δὲ πάντα γίνεσθαι ἐκ σπέρματος, τὸ δὲ σπέρμα ἐκ τῶν γεννώντων. διὸ τοῦ αὐτοῦ λόγου ἐστὶ πότερον καὶ τὸ θῆλυ καὶ τὸ ἄρρεν προῖενται ἄμφω ἢ θάτερον μόνον, καὶ πότερον ἀπὸ παντὸς ἀπέρχεται τοῦ σώματος ἢ οὐκ ἀπὸ παντός· εὐλογον γὰρ εἰ μὴ ἀπὸ παντός, μὴδ' ἀπ' ἀμφοτέρων τῶν γεννώντων. διόπερ ἐπισκεπτέον, ἐπειδὴ φασὶ τινες ἀπὸ παντὸς ἀπιέναι τοῦ σώματος, περὶ τούτου πῶς ἔχει πρῶτον. ἔστι δὲ σχεδὸν οἷς ἂν τις χρήσαιτο τεκμηρίοις, [ὥς ἀφ' ἐκάστου τῶν μορίων ἀπιόντος τοῦ σπέρματος] τέτταρα, πρῶτον μὲν ἡ σφοδρότης τῆς ἡδονῆς· μᾶλλον γὰρ ἡδὺ πλεον ταῦτο γιγνόμενον πάθος, πλεον δὲ τὸ πᾶσι τοῖς μορίοις ἢ τὸ ἐνὶ ἡ ὀλίγοις συμβαῖνον αὐτῶν. ἔτι τὸ ἐκ κολοβῶν κολοβὰ γίνεσθαι· διὰ μὲν γὰρ τὸ τοῦ μορίου ἐνδεὲς εἶναι οὐ βαδίζειν σπέρμα ἐντεῦθεν φασιν, ὅθεν δ' ἂν μὴ ἔλθῃ τοῦτο συμβαίνειν μὴ γίνεσθαι. πρὸς δὲ τούτοις αἱ μοιότητες πρὸς τοὺς γεννήσαντας· γίνονται γὰρ ἐοικότες ὥσπερ καὶ ὅλον τὸ σῶμα καὶ μόρια μορίοις· εἴπερ οὖν καὶ τῷ ὅλῳ αἴτιον τῆς ὁμοιότητος τὸ ἀφ' ὅλου ἐλθεῖν τὸ σπέρμα, καὶ τοῖς μορίοις αἴτιον ἂν εἴῃ τὸ ἀφ' ἐκάστου τι τῶν μορίων ἐλθεῖν. ἔτι δὲ καὶ εὐλογον ἂν εἶναι δόξειεν, ὥσπερ καὶ τοῦ ὅλου ἐστὶ τι ἐξ οὗ γίγνεται πρῶτον οὕτω καὶ τῶν μορίων ἐκάστου, ὥστ' εἰ ἐκείνου σπέρμα καὶ τῶν μορίων ἐκάστου εἴῃ ἂν τι σπέρμα ἴδιον.

πιθανὰ δὲ καὶ τὰ τοιαῦτα μαρτύρια ταύταις ταῖς δόξαις· οὐ γὰρ μόνον τὰ σύμφυτα προσεοικότες γίνονται τοῖς γονεῦσιν οἱ παῖδες ἀλλὰ καὶ τὰ ἐπίκτητα· οὐλὰς τε γὰρ ἐχόντων τῶν γεννησάντων ἤδη τινὲς ἔσχον ἐν τοῖς αὐτοῖς τόποις τῶν ἐκγόνων τὸν τύπον τῆς οὐλῆς,

καὶ στίγμα ἔχοντος ἐν τῷ βραχίονι τοῦ πατρὸς ἐπεσήμηνεν ἐν Χαλκηδόνι τῷ τέκνῳ συγκεχυμένον μέντοι καὶ οὐ διηρθρωμένον τὸ γράμμα. ὅτι μὲν οὖν ἀπὸ παντὸς ἔρχεται τὸ σπέρμα σχεδὸν ἐκ τούτων (722a.) μάλιστα πιστεύουσί τινες.

Κεφάλαιο 18

Φαίνεται δ' ἐξετάζουσι τὸν λόγον τοῦναντίον μᾶλλον· τά τε γὰρ εἰρημένα λύειν οὐ χαλεπὸν, καὶ πρὸς τούτοις ἄλλα συμβαίνει λέγειν ἀδύνατα. πρῶτον μὲν οὖν ὅτι οὐθὲν σημεῖον ἢ ὁμοιότης τοῦ ἀπιέναι ἀπὸ παντός, ὅτι καὶ φωνὴν καὶ ὄνυχας καὶ τρίχας ὅμοιοι γίνονται καὶ τὴν κίνησιν, ἀφ' ὧν οὐθὲν ἀπέρχεται. ἔνια δ' οὐκ ἔχουσί πω ὅταν γεννῶσιν, οἷον τρίχωσιν πολιῶν ἢ γενείου. ἔτι τοῖς ἄνωθεν γονεῦσιν ἐοίκασιν ἀφ' ὧν οὐθὲν ἀπῆλθεν· ἀποδιδόασι γὰρ διὰ πολλῶν γενεῶν αἱ ὁμοιότητες, οἷον καὶ ἐν Ἥλιδι ἢ τῷ Αἰθίοπι συγγενομένη· οὐ γὰρ ἢ θυγάτηρ ἐγένετο ἀλλ' ὁ ἐκ ταύτης Αἰθίωψ. καὶ ἐπὶ τῶν φυτῶν δὲ ὁ αὐτὸς λόγος· δῆλον γὰρ ὅτι καὶ τούτοις ἀπὸ πάντων ἂν τῶν μερῶν τὸ σπέρμα γίνοιτο. πολλὰ δὲ τὰ μὲν οὐκ ἔχει, τὰ δὲ καὶ ἀφέλοι τις ἂν, τὰ δὲ προσφύεται. ἔτι οὐδ' ἀπὸ τῶν περικαρπίων ἀπέρχεται· καίτοι καὶ ταῦτα γίγνεται τὴν αὐτὴν ἔχοντα μορφήν.

Ἔτι πότερον ἀπὸ τῶν ὁμοιομερῶν μόνον ἀπέρχεται ἀφ' ἐκάστου οἷον ἀπὸ σαρκὸς καὶ ὀστοῦ καὶ νεύρου, ἢ καὶ ἀπὸ τῶν ἀνομοιομερῶν οἷον προσώπου καὶ χειρός; εἰ μὲν γὰρ ἀπ' ἐκείνων μόνον-ἐοίκασι δὲ μᾶλλον ταῦτα τοῖς γονεῦσι [τὰ ἀνομοιομερῇ οἷον πρόσωπον καὶ χεῖρας καὶ πόδας]· εἴπερ οὖν μηδὲ ταῦτα τῷ ἀπὸ παντὸς ἀπελθεῖν, τί κωλύει μηδ' ἐκεῖνα τῷ ἀπὸ παντὸς ἀπελθεῖν ὅμοια εἶναι ἀλλὰ δι' ἄλλην αἰτίαν; εἰ δ' ἀπὸ τῶν ἀνομοιομερῶν μόνον -οὐκ οὐκ ἀπὸ πάντων. προσήκει δὲ μᾶλλον ἀπ' ἐκείνων· πρότερα γὰρ ἐκεῖνα καὶ σύγκειται τὰ ἀνομοιομερῇ ἐξ ἐκείνων, καὶ ὥσπερ πρόσωπον καὶ χεῖρας γίνονται ἐοικότες οὕτω καὶ σάρκας καὶ ὄνυχας. εἰ δ' ἀπ' ἀμφοτέρων, τίς ὁ τρόπος ἂν εἴη τῆς γενέσεως; σύγκειται γὰρ ἐκ τῶν ὁμοιομερῶν τὰ ἀνομοιομερῇ ὥστε τὸ ἀπὸ τούτων ἀπιέναι τὸ ἀπ' ἐκείνων ἂν εἴη ἀπιέναι καὶ τῆς συνθέσεως· ὥσπερ κἂν εἰ ἀπὸ τοῦ γεγραμμένου· ὀνόματος ἀπῆι τι, εἰ μὲν ἀπὸ παντός, κἂν ἀπὸ τῶν συλλαβῶν ἐκάστης, εἰ δ' ἀπὸ τούτων, ἀπὸ τῶν στοιχείων καὶ τῆς συνθέσεως. ὥστ' εἴπερ ἐκ πυρὸς καὶ τῶν τοιούτων σάρκες καὶ ὀστά συνεστᾶσιν, ἀπὸ τῶν στοιχείων ἂν εἴη μᾶλλον· ἀπὸ γὰρ τῆς συνθέσεως πῶς ἐνδέχεται; ἀλλὰ (722b.) μὴν ἄνευ γε ταύτης οὐκ ἂν εἴη ὅμοια. ταύτην δ' εἴ τι δημιουργεῖ ὕστερον, τοῦτ' ἂν εἴη τὸ τῆς ὁμοιότητος αἴτιον ἀλλ' οὐ τὸ ἀπελθεῖν ἀπὸ παντός.

Ἔτι εἰ μὲν διεσπασμένα τὰ μέρη ἐν τῷ σπέρματι πῶς ζῆ; εἰ δὲ

συνεχῇ ζῶον ἂν εἴη μικρόν. καὶ τὰ τῶν αἰδοίων πῶς; οὐ γὰρ ὅμοιον τὸ ἀπὸν ἀπὸ τοῦ ἄρρενος καὶ τοῦ θήλεος.

Ἔτι εἰ ἀπ' ἀμφοτέρων ὁμοίως ἀπὸ πάντων ἀπέρχεται, δύο γίγνεται ζῶα· ἐκατέρου γὰρ ἅπαντα ἔξει. διὸ καὶ Ἐμπεδοκλῆς ἔοικεν, εἴπερ οὕτω λεκτέον, μάλιστα λέγειν ὁμολογούμενα τούτῳ τῷ λόγῳ [τό γε τοσοῦτον, ἀλλ' εἴπερ ἑτέρα πη, οὐ καλῶς]· φησὶ γὰρ ἐν τῷ ἄρρενι καὶ τῷ θήλει οἶον σύμβολον ἐνεῖναι, ὅλον δ' ἀπ' οὐδετέρου ἀπιέναι, ἀλλὰ διέσπασται μελέων φύσις, ἡ μὲν ἐν ἀνδρός ... διὰ τί γὰρ τὰ θήλεα οὐ γεννᾷ ἐξ αὐτῶν εἴπερ ἀπὸ παντός τε ἀπέρχεται καὶ ἔχει ὑποδοχήν; ἀλλ' ὥς ἔοικεν ἢ οὐκ ἀπέρχεται ἀπὸ παντός ἢ οὕτως ὥσπερ ἐκεῖνος λέγει, οὐ ταῦτα ἀφ' ἐκατέρου, διὸ καὶ δέονται τῆς ἀλλήλων συνουσίας. ἀλλὰ καὶ τοῦτ' ἀδύνατον. ὥσπερ γὰρ καὶ μεγάλα ὄντ' ἀδύνατον διεσπασμένα σώζεσθαι καὶ ἔμψυχα εἶναι, καθάπερ Ἐμπεδοκλῆς γεννᾷ ἐπὶ τῆς Φιλότητος λέγων·

ἢ πολλὰ μὲν κόρσαι ἀναύχενες ἐβλάστησαν,

εἴθ' οὕτω συμφύεσθαι φησιν, τοῦτο δὲ φανερόν ὅτι ἀδύνατον· οὔτε γὰρ μὴ ψυχὴν ἔχοντα οὔτε μὴ ζωὴν τινα δύναται ἂν σώζεσθαι, οὔτε ὥσπερ ζῶα ὄντα πλείω συμφύεσθαι ὥστ' εἶναι πάλιν ἓν. ἀλλὰ μὴν τοῦτον τὸν τρόπον συμβαίνει λέγειν τοῖς ἀπὸ παντός ἀπιέναι φάσκουσιν, ὥσπερ τότε ἐν τῇ γῇ ἐπὶ τῆς Φιλότητος, οὕτω τούτοις ἐν τῷ σώματι. ἀδύνατον γὰρ συνεχῇ τὰ μόρια γίνεσθαι καὶ ἀπιέναι εἰς ἓνα τόπον συνιόντα. εἶτα πῶς καὶ διέσπασται τὰ ἄνω καὶ κάτω καὶ δεξιὰ καὶ ἀριστερὰ καὶ πρόσθια καὶ ὀπίσθια; πάντα γὰρ ταῦτα ἄλογα ἔστιν.

Ἔτι δὲ τὰ μέρη τὰ μὲν δυνάμει τὰ δὲ πάθεσι διώρισται, τὰ μὲν ἀνομοιομερῇ τῷ δύνασθαι τι ποιεῖν οἶον γλῶττα καὶ χεῖρ, τὰ δ' ὁμοιομερῇ σκληρότητι καὶ μαλακότητι καὶ τοῖς ἄλλοις τοῖς τοιούτοις πάθεσιν. οὐ πάντως οὖν ἔχον αἷμα οὐδὲ σὰρξ. δῆλον τοίνυν ὅτι ἀδύνατον τὸ ἀπελθὼν εἶναι συνώνυμον τοῖς μέρεσιν, οἶον αἷμα ἀπὸ (723a.) αἵματος ἢ σάρκα ἀπὸ σαρκός. ἀλλὰ μὴν εἴ γ' ἐξ ἑτέρου τινὸς ὄντος αἷμα γίγνεται οὐδ' ἂν τῆς ὁμοιότητος αἴτιον εἴη, ὥς λέγουσιν οἱ φάσκοντες οὕτω, τὸ ἀπελθεῖν ἀπὸ πάντων τῶν μορίων· ἰκανὸν γὰρ ἀφ' ἐνὸς ἀπιέναι μόνον εἴπερ μὴ ἐξ αἵματος αἷμα γίγνεται. διὰ τί γὰρ οὐκ ἂν καὶ ἅπαντα ἐξ ἐνὸς γίγνοιτο; ὁ αὐτὸς γὰρ λόγος ἔοικεν εἶναι οὗτος τῷ Ἀναξαγόρου, τῷ μὴθὲν γίνεσθαι τῶν ὁμοιομερῶν· πλὴν ἐκεῖνος μὲν ἐπὶ πάντων, οὗτοι δ' ἐπὶ τῆς γενέσεως τῶν ζώων τοῦτο ποιοῦσιν. ἔπειτα τίνα τρόπον αὐξηθήσεται ταῦτα τὰ ἀπελθόντα ἀπὸ

παντός; Ἀναξαγόρας μὲν γὰρ εὐλόγως φησὶ σάρκας ἐκ τῆς τροφῆς προσιέναι ταῖς σαρκίν· τοῖς δὲ ταῦτα μὲν μὴ λέγουσιν ἀπὸ παντός δ' ἀπιέναι φάσκουσι, πῶς ἐτέρου προσγενομένου ἔσται μείζον εἰ μὴ μεταβάλλει τὸ προσελθόν; ἀλλὰ μὴν εἴ γε δύναται μεταβάλλειν τὸ προσελθόν, διὰ τί οὐκ εὐθὺς ἐξ ἀρχῆς τὸ σπέρμα τοιοῦτόν ἐστιν ὥστ' ἐξ αὐτοῦ δυνατόν εἶναι γίνεσθαι αἷμα καὶ σάρκας, ἀλλὰ μὴ αὐτὸ εἶναι ἐκεῖνο καὶ αἷμα καὶ σάρκας; οὐ γὰρ δὴ οὐδὲ τοῦτο ἐνδέχεται λέγειν ὥς τῇ κατακεράσει αὐξάνεται ὕστερον οἶον οἶνος ὕδατος προσεγχυθέντος· αὐτὸ γὰρ ἂν πρῶτον μάλιστα ἦν ἕκαστον ἄκρατον ὄν· νῦν δὲ ὕστερον μᾶλλον καὶ σὰρξ καὶ ὀστοῦν καὶ τῶν ἄλλων ἕκαστόν ἐστι μορίων. τοῦ δὲ σπέρματος φάναι τι νεῦρον εἶναι καὶ ὀστοῦν λίαν ἐστὶν ὑπὲρ ἡμᾶς τὸ λεγόμενον.

Πρὸς δὲ τούτοις εἰ τὸ θῆλυ καὶ τὸ ἄρρεν ἐν τῇ κυήσει διαφέρει καθάπερ Ἐμπεδοκλῆς λέγει· ἐν δ' ἐχύθη καθαροῖσι· τὰ μὲν τελέθουσι γυναῖκες, ψύχεος ἀντιάσαντα ..., φαίνονται δ' οὖν μεταβάλλουσαι καὶ γυναῖκες καὶ ἄνδρες, ὥσπερ ἐξ ἀγόνων γόνιμοι οὕτω καὶ ἐκ θηλυτόκων ἀρρενοτόκοι, ὥς οὐκ ἐν τῷ ἀπελθεῖν ἀπὸ παντός ἢ μὴ τῆς αἰτίας οὔσης ἀλλ' ἐν τῷ σύμμετρον ἢ ἀσύμμετρον εἶναι τὸ ἀπὸ τῆς γυναικὸς καὶ τοῦ ἀνδρὸς ἀπίον, ἢ καὶ δι' ἄλλην τινὰ τοιαύτην αἰτίαν. δῆλον τοίνυν, εἰ τοῦτο θήσομεν οὕτως ὅτι οὐ τῷ ἀπελθεῖν ἀπὸ τινος τὸ θῆλυ, ὥστ' οὐδὲ τὸ μέρος ὃ ἔχει ἴδιον τό τε ἄρρεν καὶ τὸ θῆλυ, εἴπερ τὸ αὐτὸ σπέρμα καὶ θῆλυ καὶ ἄρρεν δύναται γίνεσθαι ὥς οὐκ ὄντος τοῦ μορίου ἐν τῷ σπέρματι. τί οὖν διαφέρει ἐπὶ τούτου λέγειν ἢ (723b.) ἐπὶ τῶν ἄλλων μορίων; εἰ γὰρ μὴδ' ἀπὸ τῆς ὑστέρας σπέρμα γίνεται ὁ αὐτὸς λόγος καὶ ἐπὶ τῶν ἄλλων ἂν εἴη μορίων.

Ἔτι ἓνια γίνεταί τῶν ζώων οὗτ' ἐξ ὁμογένων οὔτε τῷ γένει διαφόρων, οἷον αἱ μυῖαι καὶ τὰ γένη τῶν καλουμένων ψυλλῶν· ἐκ δὲ τούτων γίνεταί μὲν ζῶα οὐκέτι δ' ὅμοια τὴν φύσιν, ἀλλὰ γένος τι σκωλήκων. δῆλον οὖν ὅτι οὐκ ἀπὸ παντὸς μέρους ἀπρόντος γίνονται ὅσα ἑτερογενῆ· ὅμοια γὰρ ἂν ἦν εἴπερ τοῦ ἀπὸ παντὸς ἀπιέναι σημειόν ἐστιν ἡ ὁμοιότης.

Ἔτι ἀπὸ μιᾶς συνουσίας καὶ τῶν ζώων ἓνια γεννᾷ πολλὰ (τὰ δὲ φυτὰ καὶ παντάπασιν· δῆλον γὰρ ὅτι ἀπὸ μιᾶς κινήσεως τὸν ἐπέτειον πάντα φέρει καρπὸν)· καίτοι πῶς δυνατόν εἰ ἀπὸ παντὸς ἀπεκρίνετο τὸ σπέρμα; μίαν γὰρ ἀπόκρισιν ἀπὸ μιᾶς ἀναγκαῖον γίνεσθαι συνουσίας καὶ μιᾶς διακρίσεως. ἐν δὲ ταῖς ὑστέραις χωρίζεσθαι

ἀδύνατον· ἤδη γὰρ ὥσπερ ἀπὸ ζώου, οὐ σπέρματος εἶη ἡ διαχώρισις.

Ἔτι τὰ ἀποφυτευόμενα ἀφ' αὐτοῦ φέρει σπέρμα· δηλὸν οὖν ὅτι καὶ πρὶν ἀποφυτευθῆναι ἀπὸ τοῦ αὐτοῦ μεγέθους ἔφερε τὸν καρπὸν, καὶ οὐκ ἀπὸ παντὸς τοῦ φυτοῦ ἀπῆι τὸ σπέρμα.

Μέγιστον δὲ τούτων τεκμήριον θεωρήκαμεν ἱκανῶς ἐπὶ τῶν ἐντόμων. καὶ γὰρ εἰ μὴ ἐν πᾶσιν, ἀλλ' ἐπὶ τῶν πλείστων ἐν τῇ ὀχείᾳ τὸ θῆλυ εἰς τὸ ἄρρεν μέρος τι αὐτοῦ ἀποτείνει· διὸ καὶ τὴν ὀχείαν, καθάπερ εἵπομεν πρότερον, οὕτω ποιοῦνται· τὰ γὰρ κάτωθεν εἰς τὰ ἄνω φαίνεται ἐναφιέντα, οὐκ ἐν πᾶσιν ἀλλ' ἐν τοῖς πλείστοις τῶν θεωρημένων. ὥστε φανερόν ἂν εἶη ὅτι οὐδ' ὅσα προῖεται γονὴν τῶν ἄρρένων, οὐ τὸ ἀπὸ παντὸς ἀπιέναι τῆς γενέσεως αἰτίον ἐστίν, ἀλλ' ἄλλον τινὰ τρόπον περὶ οὗ σκεπτέον ὕστερον. καὶ γὰρ εἴπερ τὸ ἀπὸ παντὸς ἀπιέναι συνέβαινεν, ὥσπερ φασίν, οὐθὲν ἔδει ἀπὸ πάντων ἀξιοῦν ἀπιέναι ἀλλὰ μόνον ἀπὸ τοῦ δημιουργοῦντος, οἷον ἀπὸ τοῦ τέκτονος ἀλλὰ μὴ ἀπὸ τῆς ὕλης. νῦν δ' ὅμοιον λέγουσιν ὥσπερ κἂν εἰ ἀπὸ τῶν ὑποδημάτων· σχεδὸν γὰρ ὅμοιος υἱὸς τῷ πατρὶ ὅμοια φορεῖ.

Ὅτι δ' ἡδονὴ σφοδρότερα γίγνεται ἐν τῇ ὁμιλίᾳ τῇ τῶν ἀφροδισίων, οὐ τὸ ἀπὸ παντὸς ἀπιέναι αἴτιον ἀλλ' ὅτι κνησμός ἐστιν ἰσχυρός· διὸ καὶ εἰ πολλάκις συμβαίνει ἡ ὁμιλία αὕτη ἥττον γίγνεται (724a.) τὸ χαίρειν τοῖς πλησιάζουσιν. ἔτι πρὸς τῷ τέλει ἡ χαρά, ἔδει δὲ ἐν ἐκάστῳ τῶν μορίων, καὶ μὴ ἅμα ἀλλ' ἐν μὲν τοῖς πρότερον ἐν δὲ τοῖς ὕστερον.

Τοῦ δ' ἐκ κολοβῶν γίνεσθαι κολοβὰ ἡ αὐτὴ αἰτία καὶ διὰ τί ὅμοια τοῖς γονεῦσιν. γίγνεται δὲ καὶ οὐ κολοβὰ ἐκ κολοβῶν, ὥσπερ καὶ ἀνόμοια τοῖς τεκνώσασιν· περὶ ὧν ὕστερον τὴν αἰτίαν θεωρητέον· τὸ γὰρ πρόβλημα τοῦτ' ἐκείνοις ταυτόν ἐστιν.

Ἔτι εἰ τὸ θῆλυ μὴ προῖεται σπέρμα τοῦ αὐτοῦ λόγου μὴδ' ἀπὸ παντὸς ἀπιέναι. κἂν εἰ μὴ ἀπὸ παντὸς ἀπέρχεται, οὐθὲν ἄλογον τὸ μὴδ' ἀπὸ τοῦ θήλεος ἀλλ' ἄλλον τινὰ τρόπον αἴτιον εἶναι τὸ θῆλυ τῆς γενέσεως. περὶ οὗ ἐχόμενόν ἐστιν ἐπισκέψασθαι ἐπειδὴ φανερόν ἐστι οὐκ ἀπὸ πάντων ἀποκρίνεται τὸ σπέρμα τῶν μορίων.

Ἀρχὴ δὲ καὶ ταύτης τῆς σκέψεως καὶ τῶν ἐπομένων πρῶτον λαβεῖν περὶ σπέρματος τί ἐστίν· οὕτω γὰρ καὶ περὶ τῶν ἔργων αὐτοῦ καὶ τῶν περὶ αὐτὸ συμβαινόντων ἔσται μᾶλλον εὐθεώρητον. βούλεται δὲ τοιοῦτον τὴν φύσιν εἶναι τὸ σπέρμα ἐξ οὗ τὰ κατὰ φύσιν συνιστάμενα γίγνεται πρῶτου, τοῦ τῷ ἐξ ἐκείνου τι εἶναι τὸ ποιοῦν

οἶον τοῦ ἀνθρώπου· γίγνεται γὰρ ἐκ τούτου ὅτι τοῦτό ἐστι τὸ σπέρμα.† ἐπεὶ δὲ πολλαχῶς γίγνεται ἄλλο ἐξ ἄλλου-ἕτερον γὰρ τρόπον ὡς ἐξ ἡμέρας φαμὲν νῦν γίγνεται καὶ ἐκ παιδὸς ἀνὴρ, ὅτι τόδε μετὰ τόδε· ἄλλον δὲ τρόπον ὡς ἐκ χαλκοῦ ἀνδριάς καὶ ἐκ ξύλου κλίνη καὶ τᾶλλα ὅσα ὡς ἐξ ὕλης γίνεσθαι τὰ γινόμενα λέγομεν, ἕκ τινος ἐνυπάρχοντος καὶ σχηματισθέντος τὸ ὅλον ἐστίν. ἕτερον δὲ τρόπον ὡς ἐκ μουσικοῦ ἄμουσος καὶ ὡς ἐξ ὑγιоῦς κάμων καὶ ὅλως ὡς τὸ ἐναντίον ἐκ τοῦ ἐναντίου. ἔτι δὲ παρὰ ταῦτα ὡς Ἐπίχαρμος ποιεῖ τὴν ἐποικοδόμησιν, ἐκ τῆς διαβολῆς ἢ λαιδορία, ἐκ δὲ ταύτης ἢ μάχη· ταῦτα δὲ πάντα ἕκ τινος ἢ ἀρχῆς τῆς κινήσεως. τῶν δὲ τοιούτων ἐνίων μὲν ἐν αὐτοῖς ἢ ἀρχὴ τῆς κινήσεως ἐστὶν οἶον καὶ ἐν τοῖς νῦν εἰρημένοις (μέρος γάρ τι ἢ διαβολὴ τῆς πάσης ταραχῆς ἐστίν), ἐνίων δ' ἔξω οἶον αἱ τέχναι τῶν δημιουργουμένων καὶ ὁ λύχνος τῆς καιομένης οἰκίας.

Τὸ δὲ σπέρμα φανερόν ὅτι δυοῖν τούτοις ἐν θατέρῳ ἐστίν· ἢ γὰρ ὡς ἐξ ὕλης αὐτοῦ ἢ ὡς ἐκ πρώτου κινήσαντός (724b.) ἐστὶ τὸ γινόμενον. οὐ γὰρ δὴ ὡς τόδε μετὰ τόδε οἶον ἐκ τῶν Παναθηναίων ὁ πλοῦς, οὐδ' ὡς ἐξ ἐναντίου· φθειρομένου τε γὰρ γίγνεται τὸ ἐναντίον ἐκ τοῦ ἐναντίου, καὶ ἕτερόν τι δεῖ ὑποκεῖσθαι ἐξ οὗ ἔσται πρώτου ἐνυπάρχοντος. τοῖν δυοῖν δὴ ληπτέον ἐν ποτέρῳ θετέον τὸ σπέρμα, πότερον ὡς ὕλην καὶ πάσχον ἢ ὡς εἰδός τι καὶ ποιῶν, ἢ καὶ ἄμφω. ἅμα γὰρ ἴσως δηλόν ἔσται καὶ πῶς ἢ ἐξ ἐναντίων γένεσις ὑπάρχει πᾶσι τοῖς ἐκ τοῦ σπέρματος· φυσικὴ γὰρ καὶ ἢ ἐκ τῶν ἐναντίων γένεσις· τὰ μὲν γὰρ ἐξ ἐναντίων γίγνεται, ἄρρενος καὶ θήλεος, τὰ δ' ἐξ ἐνὸς μόνου, οἶον τὰ τε φυτὰ καὶ τῶν ζώων ἔνια ἐν ὅσοις μὴ ἐστὶ διωρισμένον τὸ ἄρρεν καὶ τὸ θήλυ χωρίς.

[[Γονὴ μὲν οὖν τὸ ἀπὸ τοῦ γεννῶντος καλεῖται ἀπίον, ὅσα συνδυάζεσθαι πέφυκε, τὸ πρῶτον ἔχον ἀρχὴν γενέσεως, σπέρμα δὲ τὸ ἐξ ἀμφοτέρων τὰς ἀρχὰς ἔχον τῶν συνδυασθέντων (οἶον τὰ τε τῶν φυτῶν καὶ ἐνίων ζώων ἐν οἷς μὴ κεχώρισται τὸ θήλυ καὶ τὸ ἄρρεν), ὥσπερ τὸ γινόμενον ἐκ θήλεος καὶ ἄρρενος πρῶτον μίγμα οἶον κύμηά τι ὄν ἢ ὠόν· καὶ γὰρ ταῦτα ἤδη ἔχει τὸ ἐξ ἀμφοῖν.

Σπέρμα δὲ καὶ καρπὸς διαφέρει τῷ ὕστερον καὶ πρότερον· καρπὸς μὲν γὰρ τῷ ἐξ ἄλλου εἶναι, σπέρμα δὲ τῷ ἐκ τούτου ἄλλο, ἐπεὶ ἄμφω γε ταυτὸν ἐστίν.

Ἡ δὲ τοῦ λεγομένου σπέρματος φύσις ἢ πρώτη, πάλιν λεκτέα τίς ἐστίν.]]

Ανάγκη δὴ πᾶν ὃ ἂν λαμβάνωμεν ἐν τῷ σώματι ἢ μέρος εἶναι τῶν κατὰ φύσιν, καὶ τοῦτο ἢ τῶν ἀνομοιομερῶν ἢ τῶν ὁμοιομερῶν, -ἢ τῶν παρὰ φύσιν οἷον φῦμα, ἢ περιττώμα ἢ σύντηγμα ἢ τροφήν. (λέγω δὲ περιττώμα μὲν τὸ τῆς τροφῆς ὑπόλειμμα, σύντηγμα δὲ τὸ ἀποκριθὲν ἐκ τοῦ αὐξήματος ὑπὸ τῆς παρὰ φύσιν ἀναλύσεως). ὅτι μὲν οὖν οὐκ ἂν εἴη μέρος φανερόν· ὁμοιομερεῖς μὲν γὰρ ἐστίν, ἐκ δὲ τούτου οὐθὲν σύγκειται ὥσπερ ἐκ νεύρου καὶ σαρκός. ἔτι δὲ οὐδὲ κεχωρισμένον, τὰ δ' ἄλλα πάντα μέρη. ἀλλὰ μὴν οὐδὲ τῶν παρὰ φύσιν οὐδὲ πῆρωμα· ἐν ἅπασί τε γὰρ ὑπάρχει, καὶ ἡ φύσις ἐκ τούτου γίγνεται. ἡ δὲ τροφή φανερώς ἐπέισακτον. ὥστ' ἀνάγκη ἢ σύντηγμα ἢ περιττώμα εἶναι. οἱ μὲν οὖν ἀρχαῖοι εὐόκασιν οἰομένοις εἶναι σύντηγμα· τὸ γὰρ ἀπὸ παντὸς ἀπιέναι φάναι διὰ τὴν θερμότητα τὴν ἀπὸ τῆς (725a.) κινήσεως συντήγματος ἔχει δύναμιν. τὰ δὲ συντήγματα τῶν παρὰ φύσιν τι, ἐκ δὲ τῶν παρὰ φύσιν οὐθὲν γίγνεται τῶν κατὰ φύσιν. ἀνάγκη ἄρα περιττώμα εἶναι. ἀλλὰ μὴν περιττώμα γε πᾶν ἢ ἀχρήστου τροφῆς ἐστίν ἢ χρησίμης. ἀχρηστον μὲν οὖν λέγω ἀφ' ἧς μὴθὲν ἔτι συντελεῖται εἰς τὴν φύσιν ἀλλ' ἀναλίσκομένου πλέονος μάλιστα κακοῦται, τὴν δὲ χρησίμην τὴν ἐναντίαν. ὅτι μὲν δὴ τοιοῦτον περιττώμα οὐκ ἂν εἴη φανερόν· τοῖς γὰρ κάκιστα διακειμένοις δι' ἡλικίαν ἢ νόσον πλεῖστον ἐνυπάρχει τοιοῦτον, σπέρμα δὲ ἥκιστα· ἡ γὰρ ὅλως οὐκ ἔχουσιν ἢ οὐ γόνιμον διὰ τὸ μίγνυσθαι ἀχρηστον περιττώμα καὶ νοσηματικόν.

Χρησίμου ἄρα περιττώματος μέρος τί ἐστὶ τὸ σπέρμα. χρησιμώτατον δὲ τὸ ἔσχατον καὶ ἐξ οὗ ἤδη γίγνεται ἕκαστον τῶν μορίων. ἔστι γὰρ τὸ μὲν πρότερον τὸ δ' ὕστερον. τῆς μὲν οὖν πρώτης τροφῆς περιττώμα φλέγμα καὶ εἴ τι ἄλλο τοιοῦτον· καὶ γὰρ τὸ φλέγμα τῆς χρησίμου τροφῆς περιττώμα ἐστίν· σημεῖον δ' ὅτι μιγνύμενον τροφή καθαρὰ τρέφει καὶ πονοῦσι καταναλίσκεται. τὸ δὲ τελευταῖον ἐκ πλείστης τροφῆς ὀλίγιστον γίγνεται. ἐννοεῖν δὲ δεῖ ὅτι μικρῷ αὐξάνεται τὰ ζῷα καὶ τὰ φυτὰ τῷ καθ' ἡμέραν· παμμίκρου γὰρ ἂν προστιθεμένου τοῦ αὐτοῦ ὑπερέβαλλε τὸ μέγεθος.

Τοῦναντίον ἄρα ἢ οἱ ἀρχαῖοι ἔλεγον λεκτέον. οἱ μὲν γὰρ τὸ ἀπὸ παντὸς ἀπιόν, ἡμεῖς δὲ τὸ πρὸς ἅπαντ' ἰέναι πεφυκὸς σπέρμα ἐροῦμεν, καὶ οἱ μὲν σύντηγμα, φαίνεται δὲ περιττώμα μᾶλλον. εὐλογώτερον γὰρ ὅμοιον εἶναι τὸ προσιὸν ἔσχατον καὶ τὸ περιγιγνόμενον τοῦ τοιούτου, οἷον τοῖς γραφεῦσι τοῦ ἀνδρεικέλου πολλάκις περιγίγνεται ὅμοιον τῷ ἀναλωθέντι. συντηκόμενον δὲ

φθείρεται πᾶν καὶ ἐξίσταται τῆς φύσεως. τεκμήριον δὲ τοῦ μὴ σύντηγμα εἶναι ἀλλὰ περίττωμα μᾶλλον τὸ τὰ μεγάλα τῶν ζώων ὀλιγοτόκα εἶναι, τὰ δὲ μικρὰ πολύγονα. σύντηγμα μὲν γὰρ πλεον ἀναγκαῖον εἶναι τοῖς μεγάλοις, περίττωμα δ' ἔλαττον· εἰς γὰρ τὸ σῶμα μέγα ὄν ἀναλίσκεται τὸ πλεῖστον τῆς τροφῆς ὥστ' ὀλίγον γίγνεται τὸ περίττωμα. ἔτι τόπος συντήγματι μὲν οὐθείς ἀποδέδοται κατὰ φύσιν ἀλλὰ ρεῖ ὅπου ἂν εὐοδήσῃ τοῦ σώματος, τοῖς δὲ κατὰ φύσιν (725b.) περιττώμασι πᾶσιν, οἷον τῆς τροφῆς τῆς ξηρᾶς ἢ κάτω κοιλία καὶ τῆς ὑγρᾶς ἢ κύστις καὶ τῆς χρησίμης ἢ ἄνω κοιλία, καὶ τοῖς σπερματικοῖς ὑστέραι καὶ αἰδοῖα καὶ μαστοί· εἰς τούτους γὰρ ἀθροίζεται καὶ συρρεῖ. καὶ μαρτύρια τὰ συμβαίνοντα ὅτι τὸ εἰρημένον σπέρμα ἐστίν· ταῦτα δὲ συμβαίνει διὰ τὸ τὴν φύσιν εἶναι τοῦ περιττώματος τοιαύτην· ἢ τε γὰρ ἔκλυσις ἐλαχίστου ἀπελθόντος τούτου γίγνεται ἐπίδηλος, ὥς στερισκόμενα τὰ σώματα τοῦ ἐκ τῆς τροφῆς γιγνομένου τέλους. (ὀλίγοις δὲ τισιν ἐν μικρῷ χρόνῳ κατὰ τὰς ἡλικίας κουφίζει τοῦτ' ἀπὸν ὅταν πλεονάσῃ, καθάπερ ἡ πρώτη τροφή ἂν ὑπερβάλλῃ τῷ πλήθει· καὶ γὰρ ταύτης ἀπιούσης τὰ σώματ' εὐήμερεῖ μᾶλλον. ἔτι ὅταν συναπῇ ἄλλα περιττώματα· οὐ γὰρ μόνον σπέρμα τὸ ἀπὸν ἀλλὰ καὶ ἕτεραι μεμιγμέναι δυνάμεις τούτοις συναπέρχονται, αὗται δὲ νοσώδεις, -διὸ ἐνίων γε καὶ ἄγονόν ποτε γίγνεται τὸ ἀποχωροῦν διὰ τὸ ὀλίγον ἔχειν τὸ σπερματικόν. ἀλλὰ τοῖς πλείστοις καὶ ὥς ἐπὶ τὸ πολὺ εἰπεῖν συμβαίνει ἐκ τῶν ἀφροδισιασμῶν ἔκλυσις καὶ ἀδυναμία μᾶλλον διὰ τὴν εἰρημένην αἰτίαν.) ἔτι οὐκ ἐνυπάρχει σπέρμα οὔτ' ἐν τῇ πρώτῃ ἡλικίᾳ οὔτ' ἐν τῷ γήρᾳ οὔτ' ἐν ταῖς ἀρρωστίαις, ἐν μὲν τῷ κάμνειν διὰ τὴν ἀδυναμίαν, ἐν δὲ τῷ γήρᾳ διὰ τὸ μὴ πέττειν τὸ ἰκάνον τὴν φύσιν, νέοις δ' οὔσι διὰ τὴν αὔξησιν· φθάνει γὰρ ἀναλίσκόμενον πᾶν· ἐν ἔτεσι γὰρ πέντε σχεδὸν ἐπὶ γε τῶν ἀνθρώπων ἥμισυ λαμβάνειν δοκεῖ τὸ σῶμα τοῦ μεγέθους τοῦ ἐν τῷ ἄλλῳ χρόνῳ γιγνομένου ἅπαντος.

Πολλοῖς δὲ συμβαίνει καὶ ζώοις καὶ φυτοῖς καὶ γένεσι πρὸς γένῃ διαφορὰ περὶ ταῦτα κἂν τῷ γένει τῷ αὐτῷ τοῖς ὁμοειδέσι πρὸς ἄλληλα, οἷον ἀνθρώπῳ πρὸς ἄνθρωπον καὶ ἀμπέλῳ πρὸς ἄμπελον. τὰ μὲν γὰρ πολὺσπερμα τὰ δ' ὀλιγόσπερμά ἐστι, τὰ δ' ἄσπερμα πάμπαν, οὐ δι' ἀσθένειαν ἀλλ' ἐνίοις γε διὰ τοῦναντίον· καταναλίσκεται γὰρ εἰς τὸ σῶμα οἷον τῶν ἀνθρώπων ἐνίοις· εὐεκτικοὶ γὰρ ὄντες καὶ γιγνώμενοι πολὺσαρκοὶ ἢ πιότεροὶ μᾶλλον ἥττον προῖενται σπέρμα καὶ ἥττον ἐπιθυμοῦσι τοῦ ἀφροδισιάζειν.

ὅμοιον δὲ καὶ τὸ περὶ τὰς τραγώσας ἀμπέλους πάθος αἰ διὰ τὴν τροφήν ἐξυβρίζουσιν (ἐπεὶ καὶ οἱ (726a.) τράγοι πίνοντες ὄντες ἤττον ὀχεύουσιν, διὸ καὶ προλεπτύνουσιν αὐτούς· καὶ τὰς ἀμπέλους τραγᾶν ἀπὸ τοῦ πάθους τῶν τράγων καλοῦσιν). καὶ οἱ πίνοντες δὲ ἀγνώτεροι φαίνονται εἶναι τῶν μὴ πίνων, καὶ γυναῖκες καὶ ἄνδρες διὰ τὸ τοῖς εὐτραφέσι πεττόμενον τὸ περίττωμα γίγνεσθαι πιμελήν· ἔστι γὰρ καὶ ἡ πιμελὴ περίττωμα δι' εὐβοσίαν ὑγιεινόν.

Ἔνια δ' ὅλως οὐδὲ φέρει σπέρμα οἶον ἰτέα καὶ αἰγίρος. εἰσὶ μὲν οὖν καὶ ἄλλαι αἰτίαι τούτου τοῦ πάθους. καὶ γὰρ δι' ἀδυναμίαν οὐ πέττουσι καὶ διὰ δύναμιν ἀναλίσκουσιν ὥσπερ εἴρηται. ὁμοίως δὲ καὶ πολύχοά ἐστι καὶ πολύσπερμα τὰ μὲν διὰ δύναμιν τὰ δὲ δι' ἀδυναμίαν· [[πολὺ γὰρ καὶ ἄχρηστον περίττωμα συμμίγνυται, ὥστ' ἐνίοις γίγνεσθαι καὶ ἀρρώστημα ὅταν αὐτῶν μὴ εὐοδήσῃ ἡ ἀποκάθαρσις. καὶ ἐνιοὶ μὲν ὑγιάζονται, οἱ δὲ καὶ ἀναιροῦνται. συντήκονται γὰρ ταύτῃ ὥσπερ καὶ εἰς τὸ οὖρον· ἥδη γὰρ καὶ τοῦτ' ἀσθένημα συνέβη τιςίν.

Ἔτι ὁ πόρος ὁ αὐτὸς τῷ περιττώματι καὶ τῷ σπέρματι· καὶ ὅσοις μὲν ἀμφοῖν γίγνεται περίττωμα, καὶ τῆς ὑγρᾶς καὶ τῆς ξηρᾶς τροφῆς, ἥπερ ἡ τοῦ ὑγροῦ ταύτῃ καὶ ἡ τῆς γονῆς γίγνεται ἀπόκρισις (ὑγροῦ γὰρ περίττωμά ἐστιν· ἡ γὰρ τροφή πάντων ὑγρὰ μᾶλλον), οἷς δὲ μή ἐστιν αὕτη, κατὰ τὴν τῆς ξηρᾶς ὑποστάσεως ἀποχώρησιν. ἔτι ἡ μὲν σύντηξις αἰὲν νοσώδης, ἡ δὲ τοῦ περιττώματος ἀφαίρεσις ὠφέλιμος· ἡ δὲ τοῦ σπέρματος ἀποχώρησις ἐπαμφοτερίζει διὰ τὸ προσλαμβάνειν <τι> τῆς μὴ χρησίμου τροφῆς. εἰ δέ γ' ἦν σύντηξις, αἰὲν ἔβλαπτεν ἄν· νῦν δ' οὐ ποιεῖ τοῦτο.]]

Ὅτι μὲν οὖν περίττωμά ἐστι τὸ σπέρμα χρησίμου τροφῆς καὶ τῆς ἐσχάτης, εἴτε πάντα προῖεται σπέρμα εἴτε μή, ἐν τοῖς προειρημένοις φανερόν.

Κεφάλαιο 19

Μετὰ δὲ ταῦτα διοριστέον περίττωμά τε ποίας τροφῆς καὶ περὶ καταμνηνίων· γίνεταί γάρ τισι καταμήνια τῶν ζωοτόκων. διὰ τούτων γὰρ φανερόν ἔσται καὶ περὶ τοῦ θήλεος πότερον προῖεται σπέρμα ὥσπερ τὸ ἄρρεν καὶ ἔστιν μίγμα τὸ γιννόμενον ἐκ δυοῖν σπερμάτων, ἢ οὐθὲν σπέρμα ἀποκρίνεται ἀπὸ τοῦ θήλεος· καὶ εἰ μηθέν, πότερον οὐδὲ ἄλλο οὐθὲν συμβάλλεται εἰς τὴν γένεσιν ἀλλὰ μόνον παρέχει τόπον, ἢ συμβάλλεται τι, καὶ (726b.) τοῦτο πῶς καὶ τίνα τρόπον.

Ὅτι μὲν οὖν ἔστιν ἐσχάτη τροφή τὸ αἷμα τοῖς ἐναίμοις, τοῖς δ' ἀναίμοις τὸ ἀνάλογον, εἴρηται πρότερον· ἐπεὶ δὲ καὶ ἡ γονὴ περίττωμά ἐστι τροφῆς καὶ τῆς ἐσχάτης, ἥτοι αἷμα ἂν εἴη ἢ τὸ ἀνάλογον ἢ ἐκ τούτων τι. ἐπεὶ δ' ἐκ τοῦ αἵματος πεττομένου καὶ μεριζομένου πως γίνεταί τῶν μορίων ἕκαστον, τὸ δὲ σπέρμα πεφθὲν μὲν ἀλλιοότερον ἀποκρίνεται τοῦ αἵματος, ἅπεπτον δ' ὄν, καὶ ὅταν τις προσβιάζεται πλεονάκις χρώμενος τῷ ἀφροδισιάζειν ἐνίοις αἱματῶδες ἤδη προελήλυθεν, φανερόν ὅτι τῆς αἱματικῆς ἂν εἴη περίττωμα τροφῆς τὸ σπέρμα τῆς εἰς τὰ μέρη διαδιδομένης τελευταίας. καὶ διὰ τοῦτο μεγάλην ἔχει δύναμιν-καὶ γὰρ ἡ τοῦ καθαροῦ καὶ ὑγιεινοῦ αἵματος ἀποχώρησις ἐκλυτικόν-καὶ τὸ ὅμοια γίνεσθαι τὰ ἔκγονα τοῖς γεννήσασιν εὐλογον· ὅμοιον γὰρ τὸ προσελθὸν πρὸς τὰ μέρη τῷ ὑπολειφθέντι. ὥστε τὸ σπέρμα ἐστὶ τὸ τῆς χειρὸς ἢ τὸ τοῦ προσώπου ἢ ὅλου τοῦ ζώου ἀδιορίστως χεῖρ ἢ πρόσωπον ἢ ὅλον ζῶον· καὶ οἷον ἐκείνων ἕκαστον ἐνεργεῖα τοιοῦτον τὸ σπέρμα δυνάμει, ἢ κατὰ τὸν ὄγκον τὸν ἑαυτοῦ, ἢ ἔχει τινὰ δύναμιν ἐν ἑαυτῷ (τοῦτο γὰρ οὐπω δῆλον ἡμῖν ἐκ τῶν διωρισμένων πότερον τὸ σῶμα τοῦ σπέρματός ἐστι τὸ αἷτιον τῆς γενέσεως ἢ ἔχει τινὰ ἕξιν καὶ ἀρχὴν κινήσεως γεννητικὴν)· οὐδὲ γὰρ ἡ χεῖρ οὐδ' ἄλλο τῶν μορίων οὐθὲν ἄνευ ψυχικῆς ἢ ἄλλης τινὸς δυνάμεως ἐστὶ χεῖρ οὐδὲ μόριον οὐθὲν ἀλλὰ μόνον ὁμώνυμον.

[[Φανερόν δὲ καὶ ὅτι ὅσοις σύντηξις γίνεταί σπερματικὴ καὶ τοῦτο περίττωμά ἐστιν. συμβαίνει δὲ τοῦτο ὅταν ἀναλύηται εἰς τὸ προελθόν, ὥσπερ ὅταν ἀποπέσῃ τὸ ἐναλειφθὲν τοῦ κονιάματος εὐθύς· ταῦτόν γάρ ἐστὶ τὸ ἀπελθόν τῷ πρώτῳ προστεθέντι. τὸν αὐτὸν τρόπον καὶ τὸ τελευταῖον περίττωμα τῷ πρώτῳ συντήγματι ταυτόν ἐστιν.]] καὶ περὶ μὲν τούτων διωρίσθω τὸν τρόπον τοῦτον.

Ἐπεὶ δ' ἀναγκαῖον καὶ τῷ ἀσθενεστέρῳ γίνεσθαι περίττωμα πλεῖον καὶ ἥττον πεπεμμένον, τοιοῦτον δ' ὄν ἀναγκαῖον εἶναι αἱματώδους ὑγρότητος πλῆθος, ἀσθενέστερον δὲ τὸ ἐλάττωτος θερμότητος κοινωνοῦν κατὰ φύσιν, τὸ δὲ θῆλυ ὅτι τοιοῦτον εἴρηται πρότερον, ἀναγκαῖον καὶ τὴν ἐν τῷ θήλει γιγνομένην αἱματώδη (727a.) ἀπόκρισιν περίττωμα εἶναι. γίνεται δὲ τοιαύτη ἡ τῶν καλουμένων καταμηνίων ἔκκρισις.

Ὅτι μὲν τοίνυν ἐστὶ τὰ καταμήνια περίττωμα καὶ ὅτι ἀνάλογον ὡς τοῖς ἄρρεσιν ἡ γονὴ οὕτω τοῖς θήλεσι τὰ καταμήνια φανερόν, ὅτι δ' ὀρθῶς εἴρηται σημεῖα τὰ συμβαίνοντα περὶ αὐτά. κατὰ γὰρ τὴν αὐτὴν ἡλικίαν τοῖς μὲν ἄρρεσιν ἄρχεται ἐγγίγνεσθαι γονὴ καὶ ἀποκρίνεται, τοῖς δὲ θήλεσι ρήγνυται τὰ καταμήνια καὶ φωνὴν τε μεταβάλλουσι καὶ ἐπισημαίνει τὰ περὶ τοὺς μαστούς, -καὶ παύεται τῆς ἡλικίας ληγοῦσης τοῖς μὲν τὸ δύνασθαι γεννᾶν τοῖς δὲ τὰ καταμήνια. ἔτι δὲ καὶ τὰ τοιάδε σημεῖα ὅτι περίττωμά ἐστιν αὕτη ἡ ἔκκρισις τοῖς θήλεσιν. ὥς γὰρ ἐπὶ τὸ πολὺ οὐθ' αἱμορροΐδες γίνονται ταῖς γυναῖξιν οὐτ' ἐκ τῶν ρινῶν ῥύσις αἵματος οὐτε τι ἄλλο μὴ τῶν καταμηνίων ἰσταμένων· ἐάν τε συμβῇ τι τούτων χεῖρους γίνονται αἱ καθάρσεις ὡς μεθισταμένης εἰς ταῦτα τῆς ἀποκρίσεως. ἔτι δὲ οὐτε φλεβώδεις ὁμοίως γλαφυρώτερὰ τε καὶ λειότερα τὰ θήλεα τῶν ἄρρένων ἐστὶ διὰ τὸ συνεκκρίνεσθαι τὴν εἰς ταῦτα περίττωσιν ἐν τοῖς καταμηνίοις. τὸ δ' αὐτὸ τοῦτο δεῖ νομίζειν αἴτιον εἶναι καὶ τοῦ τοὺς ὄγκους ἐλάττους εἶναι τῶν σωμάτων τοῖς θήλεσιν ἢ τοῖς ἄρρεσιν ἐν τοῖς ζωοτοκοῦσιν· ἐν τούτοις γὰρ ἡ τῶν καταμηνίων γίνεται ῥύσις θύραζε μόνους, καὶ τούτων ἐπιδηλότατα ἐν ταῖς γυναῖξιν· πλείστην γὰρ ἀφήσιν ἀπόκρισιν γυνὴ τῶν ζώων. διόπερ ἐπιδηλοτάτως αἰεὶ ὥχρον τέ ἐστὶ καὶ ἀδηλόφλεβον, καὶ τὴν ἔλλειψιν πρὸς τοὺς ἄρρενας ἔχει τοῦ σώματος φανεράν.

Ἐπεὶ δὲ τοῦτ' ἐστὶν ὃ γίνεται τοῖς θήλεσιν ὡς ἡ γονὴ τοῖς ἄρρεσιν, δύο δ' οὐκ ἐνδέχεται σπερματικὰς ἅμα γίνεσθαι ἀποκρίσεις, φανερόν ὅτι τὸ θῆλυ οὐ συμβάλλεται σπέρμα εἰς τὴν γένεσιν. εἰ μὲν γὰρ σπέρμα ἦν τὰ καταμήνια οὐκ ἂν ἦν· νῦν δὲ διὰ τὸ ταῦτα γίνεσθαι ἐκεῖνο οὐκ ἔστιν.

Διότι μὲν οὖν ὥσπερ τὸ σπέρμα καὶ τὰ καταμήνια περίττωμά ἐστιν εἴρηται· λάβοι δ' ἂν τις εἰς τοῦτο μαρτύρια ἔνια τῶν συμβαινόντων τοῖς ζώοις. τὰ τε γὰρ πίονα ἥττόν ἐστι σπερματικὰ τῶν ἀπιμέλων, ὥσπερ εἴρηται πρότερον (αἴτιον δ' ὅτι καὶ ἡ πιμελὴ

περίττωμά ἐστι καθάπερ τὸ σπέρμα, καὶ πεπεμμένον αἷμα, ἀλλ' οὐ τὸν αὐτὸν τρόπον τῷ σπέρματι. ὥστ' εὐλόγως εἰς τὴν πιμελὴν (727b.) ἀνηλωμένης τῆς περιττώσεως ἐλλείπει τὰ περὶ τὴν γονὴν), τῶν τε ἀναίμων τὰ μαλάκια καὶ τὰ μαλακόστρακα περὶ τὴν κύησιν ἐστὶν ἄριστα· διὰ τὸ ἄναιμα γὰρ εἶναι καὶ μὴ γίγνεσθαι πιμελὴν ἐν αὐτοῖς τὸ ἀνάλογον αὐτοῖς τῇ πιμελῇ ἀποκρίνεται εἰς τὸ περίττωμα τὸ σπερματικόν. σημεῖον δ' ὅτι οὐ τοιοῦτον σπέρμα προῖεται τὸ θῆλυ οἷον τὸ ἄρρεν, οὐδὲ μιγνυμένων ἀμφοῖν γίγνεται, ὥσπερ τινές φασιν, ὅτι πολλάκις τὸ θῆλυ συλλαμβάνει οὐ γενομένης αὐτῇ τῆς ἐν τῇ ὁμιλίᾳ ἡδονῆς· καὶ γιγνομένης πάλιν οὐδὲν ἤττον, καὶ ἰσοδρομησάντων [παρὰ] τοῦ ἄρρενος καὶ τοῦ θήλεος οὐθὲν γεννᾶται ἐὰν μὴ ἡ τῶν καλουμένων καταμηνίων ἱκμὰς ὑπάρχῃ σύμμετρος. διὸ οὔτε ὅλως μὴ γιγνομένων αὐτῶν γεννᾶ τὸ θῆλυ οὔτε γιγνομένων ὅταν ἐξικμάζῃ ὥς ἐπὶ τὸ πολὺ, ἀλλὰ μετὰ τὴν κάθαρσιν. ὅτε μὲν γὰρ οὐκ ἔχει τροφήν οὐδ' ὕλην ἐξ ἧς δυνήσεται συστήσαι τὸ ζῶον ἢ ἀπὸ τοῦ ἄρρενος ἐνυπάρχουσα ἐν τῇ γονῇ δύναμις, ὅτε δὲ συνεκκλύζεται διὰ τὸ πλῆθος. ὅταν δὲ γενομένων ἀπέλθῃ τὸ ὑπολειφθὲν συνίσταται. ὅσαι δὲ μὴ γιγνομένων τῶν καταμηνίων συλλαμβάνουσιν, ἢ μεταξὺ γιγνομένων ὕστερον δὲ μή, αἴτιον ὅτι ταῖς μὲν τοσαύτῃ γίγνεται ἱκμὰς ὅση μετὰ τὴν κάθαρσιν ὑπολείπεται ταῖς γονίμοις, πλείων δ' οὐ γίγνεται περίττωσις ὥστε καὶ θύραζε ἀπελθεῖν, -ταῖς δὲ μετὰ τὴν κάθαρσιν συμμύει τὸ στόμα τῶν ὕστερων. ὅταν οὖν πολὺ μὲν τὸ ἀπεληλυθὸς ἦ, ἔτι δὲ γίγνηται μὲν κάθαρσις, μὴ τοσαύτῃ δὲ ὥστε συνεξικμάζειν τὸ σπέρμα, τότε πλησιάζουσιν συλλαμβάνουσιν.

οὐδὲν δὲ ἄτοπον τὸ συνειληφυῖαις ἔτι γίγνεσθαι· καὶ γὰρ ὕστερον μέχρι τινὸς φοιτᾷ τὰ καταμήνια, ὀλίγα δὲ καὶ οὐ διὰ παντός. ἀλλὰ τοῦτο μὲν νοσηματῶδες, διόπερ ὀλίγαις καὶ ὀλιγάκις συμβαίνει· τὰ δ' ὥς ἐπὶ τὸ πολὺ γιγνόμενα μάλιστα κατὰ φύσιν ἐστίν.

Ὅτι μὲν οὖν συμβάλλεται τὸ θῆλυ εἰς τὴν γένεσιν τὴν ὕλην, τοῦτο δ' ἐστὶν ἐν τῇ καταμηνίων συστάσει, τὰ δὲ καταμήνια περίττωμα, δῆλον.

Κεφάλαιο 20

Ὁ δ' οἶονταί τινες σπέρμα συμβάλλεσθαι ἐν τῇ συνουσίᾳ τὸ θῆλυ διὰ τὸ γίνεσθαι παραπλησίαν τε χαρὰν ἐνίοτε αὐταῖς τῇ τῶν ἄρρένων καὶ ἅμα ὑγρὰν ἀπόκρισιν, οὐκ ἔστιν ἡ ὑγρασία αὕτη σπερματικὴ (728a.) ἀλλὰ τοῦ τόπου ἴδιος ἐκάσταις. ἔστι γὰρ τῶν ὑστερῶν ἔκκρισις καὶ ταῖς μὲν γίνεταί ταῖς δ' οὐ· γίνεταί μὲν γὰρ ταῖς λευκοχροοῖς καὶ θηλυκαῖς ὥς ἐπὶ τὸ πολὺ εἰπεῖν, οὐ γίνεταί δὲ ταῖς μελαίναις καὶ ἄρρενωποῖς. τὸ δὲ πλῆθος αἷς γίνεταί ἐνίοτε οὐ κατὰ σπέρματος πρόεσιν ἔστιν, ἀλλὰ πολὺ ὑπερβάλλει. ἔτι δὲ καὶ ἐδέσματα ἕτερα ἐτέρων ποιεῖ πολλὴν διαφορὰν τοῦ γίνεσθαι τὴν ἔκκρισιν ἢ ἐλάττω ἢ πλείω τὴν τοιαύτην, οἶον ἔνια τῶν δριμέων ἐπίδηλον ποιεῖ εἰς πλῆθος τὴν ἀπόκρισιν.

Τὸ δὲ συμβαίνειν ἡδονὴν ἐν τῇ συνουσίᾳ οὐ μόνον τοῦ σπέρματος προῖεμένου ἔστιν ἀλλὰ καὶ πνεύματος ἐξ οὗ συνισταμένου ἀποσπερματίζει. δηλὸν δ' ἐπὶ τῶν παίδων τῶν μήπω δυναμένων προῖεσθαι, ἐγγὺς δὲ τῆς ἡλικίας ὄντων, καὶ τῶν ἀγόνων ἀνδρῶν· γίνεταί γὰρ πᾶσι τούτοις ἡδονὴ ξυομένοις. καὶ τοῖς γε διεφθαρμένοις τὴν γένεσιν ἔστιν ὅτε ἀναλύονται αἱ κοιλίαι διὰ τὸ ἀποκρίνεσθαι περίττωμα εἰς τὴν κοιλίαν οὐ δυνάμενον πεφθῆναι καὶ γενέσθαι σπέρμα.

Ἔοικε δὲ καὶ τὴν μορφὴν γυναικὶ παῖς, καὶ ἔστιν ἡ γυνὴ ὥσπερ ἄρρεν ἄγονον· ἀδυναμία γάρ τινι τὸ θῆλὺ ἔστι τῷ μὴ δύνασθαι πέττειν ἐκ τῆς τροφῆς σπέρμα τῆς ὑστάτης (τοῦτο δ' ἔστιν ἡ αἷμα ἢ τὸ ἀνάλογον ἐν τοῖς ἀναίμοις) διὰ ψυχρότητα τῆς φύσεως. ὥσπερ οὖν ἐν ταῖς κοιλίαις διὰ τὴν ἀπεψίαν γίνεταί διάρροια οὕτως ἐν ταῖς φλεβῖν αἷ τ' ἄλλαι αἱμορροΐδες καὶ αἱ τῶν καταμηνίων· καὶ γὰρ αὕτη αἱμορροΐς ἔστιν, ἀλλ' ἐκεῖναι μὲν διὰ νόσον αὕτη δὲ φυσικὴ.

Ὡστε φανερόν ὅτι εὐλόγως γίνεταί ἐκ τούτου ἡ γένεσις. ἔστι γὰρ τὰ καταμήνια σπέρμα οὐ καθαρὸν ἀλλὰ δεόμενον ἐργασίας, ὥσπερ ἐν τῇ περὶ τοὺς καρποὺς γενέσει, ὅταν ἦ μήπω διητημένη, ἔνεστι μὲν ἡ τροφή, δεῖται δ' ἐργασίας πρὸς τὴν κάθαρσιν. διὸ καὶ μιγνυμένη ἐκείνη μὲν τῇ γονῇ, αὕτη δὲ καθαρὰ τροφῇ, ἡ μὲν γεννᾷ ἡ δὲ τρέφει.

Σημεῖον δὲ τοῦ τὸ θῆλυ μὴ προῖεσθαι σπέρμα καὶ τὸ γίνεσθαι ἐν τῇ ὁμιλίᾳ τὴν ἡδονὴν τῇ ἀφῇ κατὰ τὸν αὐτὸν τρόπον τοῖς ἄρρεσιν·

καίτοι οὐ προΐενται τὴν ἱκμάδα ταύτην ἐντεῦθεν. ἔτι δ' οὐ πᾶσι γίγνεται τοῖς θήλεσιν αὕτη ἢ ἔκκρισις ἀλλὰ τοῖς αἱματικοῖς, καὶ οὐδὲ τούτοις πᾶσιν ἀλλ' ὅσων αἱ ὑστέραι μὴ πρὸς τῷ ὑποζώματί εἰσι μηδ' ὀτοκοῦσιν, ἔτι δ' (728b.) οὐδὲ τοῖς αἷμα μὴ ἔχουσιν ἀλλὰ τὸ ἀνάλογον· ὅπερ γὰρ ἐν ἐκείνοις τὸ αἷμα, ἐν τούτοις ἐτέρα ὑπάρχει σύγκρισις. τοῦ δὲ μήτε τούτοις γίνεσθαι κάθαρσιν μήτε τῶν αἷμα ἐχόντων τοῖς εἰρημένους, [τοῖς κάτω ἔχουσι καὶ μὴ ὀτοκοῦσιν] αἰτία ἢ ξηρότης τῶν σωμάτων, ὀλίγον λείπουσα τὸ περίττωμα καὶ τοσοῦτον ὅσον εἰς τὴν γένεσιν ἱκανὸν μόνον, ἔξω δὲ μὴ προῖεσθαι. ὅσα δὲ ζωοτόκα ἄνευ ὀτοκίας (ταῦτα δ' ἐστὶν ἄνθρωπος καὶ τῶν τετραπόδων ὅσα κάμπει τὰ ὀπίσθια σκέλη ἐντός· ταῦτα μὲν γὰρ πάντα ζωοτοκεῖ ἄνευ ὀτοκίας) τούτοις δὲ γίγνεται μὲν πᾶσιν, πλὴν εἴ τι πεπύρωται ἐν τῇ γενέσει οἶον ὀρεῦς, οὐ μὴν ἐπιπολάζουσί γε αἱ καθάρσεις ὥσπερ ἀνθρώποις. δι' ἀκριβείας δέ, πῶς συμβαίνει ταῦτα περὶ ἕκαστον τῶν ζώων, γέγραπται ἐν ταῖς περὶ τὰ ζῷα ἱστορίαις. πλείστη δὲ γίγνεται κάθαρσις τῶν ζώων ταῖς γυναιξί, καὶ τοῖς ἄρρεσι πλείστη τοῦ σπέρματος πρόεσις κατὰ λόγον τοῦ μεγέθους. αἴτιον δ' ἢ τοῦ σώματος σύστασις ὑγρὰ καὶ θερμὴ οὖσα· ἀναγκαῖον γὰρ ἐν τῷ τοιούτῳ γίνεσθαι πλείστην περίττωσιν. ἔτι δὲ οὐδὲ τὰ τοιαῦτ' ἔχει ἐν τῷ σώματι μέρη εἰς ἃ τρέπεται ἢ περίττωσις ὥσπερ ἐν τοῖς ἄλλοις· οὐ γὰρ ἔχει οὔτε τριχῶν πλῆθος κατὰ τὸ σῶμα οὔτε ὀστέων καὶ κεράτων καὶ ὀδόντων ἐκκρίσεις.

Σημεῖον δ' ὅτι ἐν τοῖς καταμηνίοις τὸ σπέρμα ἐστίν· ἅμα γάρ, ὥσπερ εἴρηται πρότερον, τοῖς ἄρρεσι γίγνεται τὸ περίττωμα τοῦτο καὶ τοῖς θήλεσι τὰ καταμήνια ἐπισημαίνει ἐν τῇ αὐτῇ ἡλικίᾳ, ὥς καὶ ἅμα διισταμένων τῶν τόπων τῶν δεκτικῶν ἐκατέρου τοῦ περιττώματος· καὶ ἀραιουμένων ἐκατέρων τῶν πλησίον τόπων ἐξανθεῖ ἢ τῆς ἥβης τρίχωσις. μελλόντων δὲ δίστασθαι οἱ τόποι ἀνοικοῦσιν ὑπὸ τοῦ πνεύματος, τοῖς μὲν ἄρρεσιν ἐπιδηλότερον περὶ τοὺς ὄρχεις, ἐπισημαίνει δὲ καὶ περὶ τοὺς μαστοὺς, τοῖς δὲ θήλεσι περὶ τοὺς μαστοὺς μᾶλλον· ὅταν γὰρ δύο δακτύλους ἀρθῶσι τότε γίγνεται τὰ καταμήνια ταῖς πλείσταις.

Ἐν ὅσοις μὲν οὖν τῶν ζώων ἐχόντων μὴ κεχώρισται τὸ θῆλυ καὶ τὸ ἄρρεν, τούτοις μὲν τὸ σπέρμα οἶον κύημα ἐστίν. λέγω δὲ κύημα τὸ πρῶτον μίγμα ἐκ θήλεος καὶ ἄρρενος. διὸ καὶ ἐξ ἐνὸς σπέρματος ἐν σῶμα γίγνεται οἶον ἐξ ἐνὸς πυροῦ εἰς πυθμὴν, ὥσπερ ἐξ ἐνὸς ὧοῦ ἐν ζῶον (τὰ γὰρ δίδυμα τῶν (729a.) ὧων δύο ὧά ἐστιν). ἐν ὅσοις δὲ

τῶν γενῶν διώρισται τὸ θῆλυ καὶ τὸ ἄρρεν, ἐν τούτοις ἀφ' ἐνὸς σπέρματος ἐνδέχεται πολλὰ γίνεσθαι ζῶα, ὡς διαφέροντος τῇ φύσει τοῦ σπέρματος ἐν τοῖς φυτοῖς τε καὶ ζώοις. σημεῖον δέ, ἀπὸ μιᾶς γὰρ ὀχείας πλείω γίγνεται ἐν τοῖς πλείω δυναμένοις γεννᾶν ἐνός. ἢ καὶ δῆλον ὅτι οὐκ ἀπὸ παντὸς ἔρχεται ἡ γονή· οὔτε γὰρ ἂν κεχωρισμένα ἀπὸ τοῦ αὐτοῦ μέρους εὐθὺς ἀπεκρίνετο οὔτε ἅμα ἐλθόντα εἰς τὰς ὑστέρας ἐκεῖ διεχωρίζετο· ἀλλὰ συμβαίνει ὥσπερ εὐλογον, ἐπειδὴ τὸ μὲν ἄρρεν παρέχεται τὸ τε εἶδος καὶ τὴν ἀρχὴν τῆς κινήσεως τὸ δὲ θῆλυ τὸ σῶμα καὶ τὴν ὕλην, οἷον ἐν τῇ τοῦ γάλακτος πῆξει τὸ μὲν σῶμα τὸ γάλα ἐστίν, ὁ δὲ ὀπὸς ἡ ἢ πυετία τὸ τὴν ἀρχὴν ἔχον τὴν συνιστᾶσαν, οὕτω τὸ ἀπὸ τοῦ ἄρρενος ἐν τῷ θήλει μεριζόμενον. δι' ἣν δ' αἰτίαν μερίζεται ἔνθα μὲν εἰς πλείω ἔνθα δ' εἰς ἐλάττω ἔνθα δὲ μοναχῶς ἕτερος ἔσται λόγος. ἀλλὰ διὰ τὸ μηθὲν γε διαφέρειν τῷ εἶδει, ἀλλ' ἐὰν μόνον σύμμετρον ἢ τὸ διαιρούμενον πρὸς τὴν ὕλην, καὶ μήτε ἔλαττον ὥστε μὴ πέττειν μηδὲ συνιστάναι, μήτε πλεῖον ὥστε ξηρᾶναι, πλείω οὕτω γεννᾶται. ἐκ δὲ τοῦ συνιστάντος πρώτου, ἐξ ἐνὸς ἤδη ἓν γίγνεται μόνον.

ὅτι μὲν οὖν τὸ θῆλυ εἰς τὴν γένεσιν γονὴν μὲν οὐ συμβάλλεται, συμβάλλεται δέ τι καὶ τοῦτ' ἔστιν ἡ τῶν καταμηνίων σύστασις καὶ τὸ ἀνάλογον ἐν τοῖς ἀναίμοις, ἐκ τε τῶν εἰρημένων δῆλον καὶ κατὰ τὸν λόγον καθόλου σκοπούμενοις. ἀνάγκη γὰρ εἶναι τὸ γεννῶν καὶ ἐξ οὗ, καὶ τοῦτ' ἂν καὶ ἐν ἡ, τῷ γε εἶδει διαφέρειν καὶ τῷ τὸν λόγον αὐτῶν εἶναι ἕτερον, ἐν δὲ τοῖς κεχωρισμένας ἔχουσι τὰς δυνάμεις καὶ τὰ σώματα καὶ τὴν φύσιν ἐτέραν εἶναι τοῦ τε ποιοῦντος καὶ τοῦ πάσχοντος. εἰ οὖν τὸ ἄρρεν ἐστίν ὡς κινοῦν καὶ ποιοῦν, τὸ δὲ θῆλυ [ἢ θῆλυ] ὡς παθητικόν, εἰς τὴν τοῦ ἄρρενος γονὴν τὸ θῆλυ ἂν συμβάλλοιο οὐ γονὴν ἀλλ' ὕλην. ὅπερ καὶ φαίνεται συμβαῖνον· κατὰ γὰρ τὴν πρώτην ὕλην ἐστίν ἡ τῶν καταμηνίων φύσις.

Κεφάλαιο 21

Καὶ περὶ μὲν τούτων διωρίσθω τὸν τρόπον τοῦτον. ἅμα δ' ἐκ τούτων φανερόν, περὶ ὧν ἐχόμενόν ἐστιν ἐπισκέψασθαι, (729b.) πῶς ποτε συμβάλλεται εἰς τὴν γένεσιν τὸ ἄρρεν καὶ πῶς αἰτιόν ἐστι τοῦ γιγνομένου τὸ σπέρμα τὸ ἀπὸ τοῦ ἄρρενος, πότερον ὡς ἐνυπάρχον καὶ μόριον ὃν εὐθὺς τοῦ γιγνομένου σώματος, μινύμενον τῇ ὕλῃ τῇ παρὰ τοῦ θήλεος, ἢ τὸ μὲν σῶμα οὐθὲν κοινωνεῖ τοῦ σπέρματος, ἢ δ' ἐν αὐτῷ δύναμις καὶ κίνησις· αὕτη μὲν γάρ ἐστιν ἡ ποιοῦσα, τὸ δὲ συνιστάμενον καὶ λαμβάνον τὴν μορφήν τὸ τοῦ ἐν τῇ θήλει περιττώματος λοιπόν. κατὰ τε δὴ τὸν λόγον οὕτω φαίνεται καὶ ἐπὶ τῶν ἔργων. καθόλου τε γὰρ ἐπισκοποῦσιν οὐ φαίνεται γιγνόμενον ἐν ἐκ τοῦ παθητικοῦ καὶ τοῦ ποιοῦντος ὡς ἐνυπάρχοντος ἐν τῷ γιγνομένῳ τοῦ ποιοῦντος, οὐδ' ὅλως δὴ ἐκ τοῦ κινουμένου καὶ κινουντος. ἀλλὰ μὴν τό γε θῆλυ ἢ θῆλυ παθητικόν, τὸ δ' ἄρρεν ἢ ἄρρεν ποιητικόν καὶ ὅθεν ἡ ἀρχὴ τῆς κινήσεως. ὥστε ἂν ληφθῇ τὰ ἄκρα ἐκατέρων, ἢ τὸ μὲν ποιητικόν καὶ κινεῖ τὸ δὲ παθητικόν καὶ κινούμενον, οὐκ ἔστιν ἐκ τούτων τὸ γιγνόμενον ἔν, ἀλλ' ἢ οὕτως ὡς ἐκ τοῦ τέκτονος καὶ ξύλου ἢ κλίνῃ ἢ ὡς ἐκ τοῦ κηροῦ καὶ τοῦ εἶδους ἢ σφαῖρα. δῆλον ἄρα ὅτι οὐτ' ἀνάγκη ἀπιέναι τι ἀπὸ τοῦ ἄρρενος, οὐτ' εἰ τι ἀπέρχεται διὰ τοῦτο ἐκ τούτου ὡς ἐνυπάρχοντος τὸ γεννώμενόν ἐστιν ἀλλ' ὡς ἐκ κινήσαντος καὶ τοῦ εἶδους, ὡς καὶ ἀπὸ τῆς ἱατρικῆς ὁ ὕγιασθεῖς, συμβαίνει δ' ὁμολογούμενα τῷ λόγῳ καὶ ἐπὶ τῶν ἔργων. διὰ τοῦτο γὰρ ἓν τῶν ἀρρένων καὶ συνδυαζομένων τοῖς θήλεσιν οὐδὲ μόριον οὐθὲν φαίνεται προῖεμένα εἰς τὸ θῆλυ ἀλλὰ τοῦναντίον τὸ θῆλυ εἰς τὸ ἄρρεν, οἷον συμβαίνει ἐν ἐνίοις τῶν ἐντόμων. ὁ γὰρ τοῖς προῖεμένοις ἀπεργάζεται τὸ σπέρμα ἐν τῷ θήλει, τούτοις ἢ ἐν τῷ ζῶφ αὐτῷ θερμότης καὶ δύναμις ἀπεργάζεται, εἰσφέροντος τοῦ θήλεος τὸ δεκτικόν τοῦ περιττώματος μόριον.

καὶ διὰ τοῦτο τὰ τοιαῦτα τῶν ζῶων συμπλέκεται μὲν πολὺν χρόνον, διαλυθέντα δὲ γεννᾷ ταχέως. συνδεδύασται γὰρ μέχρις οὗ ἂν συστήσῃ, ὥσπερ ἡ γονή· διαλυθέντα δὲ προῖεται τὸ κύημα ταχέως· γεννᾷ γὰρ ἀτελέες· σκωληκοτοκεῖ γὰρ πάντα τὰ τοιαῦτα.

Μέγιστον δὲ σημεῖον τὸ συμβαῖνον περὶ τοὺς ὄρνιθας καὶ τὸ τῶν ἰχθύων γένος τῶν φωτόκων τοῦ μήτε ἀπὸ πάντων ἰέναι τὸ σπέρμα τῶν μορίων, μήτε (730a.) προῖεσθαι τὸ ἄρρεν τοιοῦτόν τι ὅριον ὃ

ἔσται ἐνυπάρχον τῷ γεννηθέντι ἀλλὰ μόνον τῇ δυνάμει τῇ ἐν τῇ γονῇ ζωοποιεῖν, ὥσπερ εἶπομεν ἐπὶ τῶν ἐντόμων ἐν οἷς τὸ θῆλυ προῖεται εἰς τὸ ἄρρεν. ἐάν τε γὰρ ὑπηνέμια τύχη κύουσα ἢ ὄρνις, ἐὰν μετὰ ταῦτα ὀχεύηται μήπω μεταβεβληκότος τοῦ ὡοῦ ἐκ τοῦ ὠχρόν ὅλον εἶναι εἰς τὸ λευκαίνεσθαι, γόνιμα γίγνεται ἀντὶ ὑπηνεμίων· ἐάν τε ὑφ' ἐτέρου ὠχευμένη <ῆ> καὶ ἔτι ὠχροῦ ὄντος, κατὰ τὸν ὕστερον ὀχεύσαντα τὸ γένος ἀποβαίνει πᾶν τὸ τῶν νεοττῶν. διὸ ἐνιοὶ τοῦτον τὸν τρόπον τῶν περὶ τὰς ὄρνιθας τὰς γενναίας σπουδαζόντων ποιοῦσι μεταβάλλοντες τὰ πρῶτα ὀχεῖα καὶ τὰ ὕστερα, ὥς οὐ συμμειγνύμενον καὶ ἐνυπάρχον, οὐδ' ἀπὸ παντὸς ἐλθὼν τὸ σπέρμα· ἀπ' ἀμφοῖν γὰρ ἂν ἦλθεν, ὥστ' εἶχεν ἂν δις ταυτὰ μέρη. ἀλλὰ τῇ δυνάμει τὸ τοῦ ἄρρενος σπέρμα τὴν ἐν τῷ θήλει ὕλην καὶ τροφήν ποιάν τινα κατασκευάζει. τοῦτο γὰρ ἐνδέχεται ποιεῖν τὸ ὕστερον ἐπεισελθὼν ἐκ τοῦ θερμᾶναι καὶ πέσαι· λαμβάνει γὰρ τροφήν τὸ ὦν ἕως ἂν αὐξάνηται.

τὸ δ' αὐτὸ συμβαίνει καὶ περὶ τὴν τῶν ἰχθύων γένεσιν τῶν φωτοκουμένων. ὅταν γὰρ ἀποτέκη τὰ ὡὰ ἢ θήλεια, ὁ ἄρρην ἐπιρραίνει τὸν θορόν· καὶ ὢν μὲν ἂν ἐφάψηται, γόνιμα ταῦτα γίγνεται τὰ ὡὰ, ὢν δ' ἂν μή, ἄγονα, ὥς οὐκ εἰς τὸ ποσὸν συμβαλλομένου τοῖς ζώοις τοῦ ἄρρενος ἀλλ' εἰς τὸ ποιόν.

Ὅτι μὲν οὖν οὗτ' ἀπὸ παντὸς ἀπέρχεται τὸ σπέρμα τοῖς προῖεμένοις σπέρμα τῶν ζώων, οὔτε τὸ θῆλυ πρὸς τὴν γένεσιν οὕτω συμβάλλεται τοῖς συνισταμένοις ὥς τὸ ἄρρεν, ἀλλὰ τὸ μὲν ἄρρεν ἀρχὴν κινήσεως τὸ δὲ θῆλυ τὴν ὕλην, δῆλον ἐκ τῶν εἰρημένων. διὰ γὰρ τοῦτο οὗτ' αὐτὸ καθ' αὐτὸ γεννᾷ τὸ θῆλυ· δεῖται γὰρ ἀρχῆς καὶ τοῦ κινήσοντος καὶ διορισίντος (ἀλλ' ἐνίοις γε τῶν ζώων οἷον ταῖς ὄρνισι μέχρι τινὸς ἢ φύσις δύνатаι γεννᾶν· αὗται γὰρ συνιστᾶσι μὲν, ἀτελεῖ δὲ συνιστᾶσι τὰ καλούμενα ὑπηνέμια ὡὰ),

Κεφάλαιο 22

ἢ τε γένεσις ἐν τῷ θήλει συμβαίνει τῶν γιγνομένων, ἀλλ' οὐκ εἰς τὸ ἄρρεν οὐτ' αὐτὸ τὸ ἄρρεν προῖται τὴν γονὴν οὔτε τὸ θήλυ, ἀλλ' ἄμφω εἰς τὸ θήλυ συμβάλλονται τὸ παρ' αὐτῶν (730b.) γιγνόμενον, διὰ τὸ ἐν τῷ θήλει εἶναι τὴν ὕλην ἐξ ἧς ἐστὶ τὸ δημιουργούμενον. καὶ εὐθὺς τὴν μὲν ἀθρόον ὑπάρχειν ἀναγκαῖον ἐξ ἧς συνίσταται τὸ κύημα τὸ πρῶτον, τὴν δ' ἐπιγίνεσθαι ἀεὶ τῆς ὕλης ἵν' αὐξάνηται τὸ कुούμενον. ὥστ' ἀνάγκη ἐν τῷ θήλει ὑπάρχειν τὸν τόκον· καὶ γὰρ πρὸς τῷ ξύλῳ ὁ τέκτων καὶ πρὸς τῷ πηλῷ ὁ κεραμεύς, καὶ ὅλως πᾶσα ἡ ἐργασία καὶ ἡ κίνησις ἡ ἐσχάτη πρὸς τῇ ὕλῃ οἷον ἡ οἰκοδόμησις ἐν τοῖς οἰκοδομουμένοις. λάβοι δ' ἂν τις ἐκ τούτων καὶ τὸ ἄρρεν πῶς συμβάλλεται πρὸς τὴν γένεσιν· οὐδὲ γὰρ τὸ ἄρρεν ἅπαν προῖται σπέρμα, ὅσα τε προῖται τῶν ἀρρένων, οὐθὲν μόριον τοῦτ' ἐστὶ τοῦ γιγνομένου κυήματος, ὥσπερ οὐδ' ἀπὸ τοῦ τέκτονος πρὸς τὴν τῶν ξύλων ὕλην οὐτ' ἀπέρχεται οὐθέν, οὔτε μόριον οὐθέν ἐστὶν ἐν τῷ γιγνομένῳ τῆς τεκτονικῆς, ἀλλ' ἡ μορφή καὶ τὸ εἶδος ἀπ' ἐκείνου ἐγγίγνεται διὰ τῆς κινήσεως ἐν τῇ ὕλῃ, καὶ ἡ μὲν ψυχὴ ἐν ἧ τὸ εἶδος καὶ ἡ ἐπιστήμη κινουσι τὰς χεῖρας ἢ τι μόριον ἕτερον ποιᾶν τινα κίνησιν, ἑτέραν μὲν ἀφ' ὧν τὸ γινόμενον ἕτερον, τὴν αὐτὴν δὲ ἀφ' ὧν τὸ αὐτό, αἱ δὲ χεῖρες τὰ ὄργανα, τὰ δ' ὄργανα τὴν ὕλην. ὁμοίως δὲ καὶ ἡ φύσις ἡ ἐν τῷ ἄρρενι τῶν σπέρμα προῖεμένων χρῆται τῷ σπέρματι ὡς ὀργάνῳ καὶ ἔχοντι κίνησιν ἐνεργείᾳ, ὥσπερ ἐν τοῖς κατὰ τέχνην γιγνομένοις τὰ ὄργανα κινεῖται· ἐν ἐκείνοις γὰρ πῶς ἡ κίνησις τῆς τέχνης. ὅσα μὲν οὖν προῖται σπέρμα συμβάλλεται τοῦτον τὸν τρόπον εἰς τὴν γένεσιν· ὅσα δὲ μὴ προῖται ἀλλ' ἐναφίησι τὸ θήλυ εἰς τὸ ἄρρεν τῶν αὐτοῦ τι μορίων, ὅμοιον ἔοικε ποιοῦντι ὥσπερ ἂν εἰ τὴν ὕλην κομίσειέ τις πρὸς τὸν δημιουργόν. δι' ἀσθένειαν γὰρ τῶν τοιούτων ἀρρένων οὐθὲν δι' ἐτέρων οἷα τε ποιεῖν ἡ φύσις, ἀλλὰ μόλις αὐτῆς προσεδρευούσης ἰσχύουσιν αἱ κινήσεις, καὶ ἔοικε τοῖς πλάττουσιν, οὐ τοῖς τεκταινομένοις· οὐ γὰρ δι' ἐτέρου θιγγάνουσα δημιουργεῖ τὸ συνιστάμενον ἀλλ' αὐτὴ τοῖς αὐτῆς μορίοις.

Κεφάλαιο 23

Ἐν μὲν οὖν τοῖς ζώοις πᾶσι τοῖς πορευτικοῖς κεχώριται τὸ θῆλυ τοῦ ἄρρενος, καὶ ἔστιν ἕτερον ζῶον θῆλυ καὶ ἕτερον ἄρρεν, τῷ δὲ εἶδει ταυτόν, οἷον ἄνθρωπος ἢ ἵππος (731a.) ἀμφοτέρω· ἐν δὲ τοῖς φυτοῖς μεμιγμέναι αὗται αἱ δυνάμεις εἰσί, καὶ οὐ κεχώριται τὸ θῆλυ τοῦ ἄρρενος. διὸ καὶ γεννᾷ αὐτὰ ἐξ αὐτῶν καὶ προῖεται οὐ γονὴν ἀλλὰ κύημα τὰ καλούμενα σπέρματα. καὶ τοῦτο καλῶς λέγει Ἑμπεδοκλῆς ποιήσας· οὕτω δ' ὥτοκεῖ μακρὰ δένδρεα· πρῶτον ἐλαίας ... τό τε γὰρ ὠδὸν κύημά ἐστι, καὶ ἔκ τινος αὐτοῦ γίνεταί τὸ ζῶον, τὸ δὲ λοιπὸν τροφή, καὶ ἐκ τοῦ σπέρματος ἐκ μέρους γίνεταί τὸ φυόμενον, τὸ δὲ λοιπὸν τροφή γίνεταί τῷ βλαστῷ καὶ τῇ ρίζῃ τῇ πρώτῃ. τρόπον δέ τινα ταῦτά συμβαίνει καὶ ἐν τοῖς κεχωρισμένον ἔχουσι ζώοις τὸ θῆλυ καὶ τὸ ἄρρεν. ὅταν γὰρ δεήσῃ γεννᾶν γίνεταί ἀχώριστον ὥσπερ ἐν τοῖς φυτοῖς, καὶ βούλεται ἡ φύσις αὐτῶν ἐν γίνεσθαι· ὅπερ ἐμφαίνεται κατὰ τὴν ὄψιν μιγνυμένων καὶ συνδυαζομένων [ἐν τῷ ζῶον γίνεσθαι ἐξ ἀμφοῖν].

Καὶ τὰ μὲν μὴ προέμενα σπέρμα πολὺν χρόνον συμπεπλέχθαι πέφυκεν ἕως ἂν συστήσῃ τὸ κύημα, οἷον τὰ συνδυαζόμενα τῶν ἐντόμων· τὰ δ' ἕως ἂν ἀποπέμψῃ τι τῶν ἐπείσάκτων αὐτοῦ μορίων, ὃ συστήσῃ τὸ κύημα ἐν πλείονι χρόνῳ, οἷον ἐπὶ τῶν ἐναίμων. τὰ μὲν γὰρ ἡμέρας τι μόριον συνέχεται, ἡ δὲ γονὴ ἐν ἡμέραις συνίστησι πλείοσιν· προέμενα δὲ τὸ τοιοῦτον ἀπολύεται. καὶ ἀτεχνῶς ἔοικε τὰ ζῶα ὥσπερ φυτὰ εἶναι διηρημένα, οἷον εἴ τις κάκεῖνα, ὅτε σπέρμα ἐξενέγκειεν, διαλύσειε καὶ χωρίσειεν εἰς τὸ ἐνυπάρχον θῆλυ καὶ ἄρρεν.

Καὶ ταῦτα πάντα εὐλόγως ἡ φύσις δημιουργεῖ. τῆς μὲν γὰρ τῶν φυτῶν οὐσίας οὐθέν ἐστιν ἄλλο ἔργον οὐδὲ πρᾶξις οὐδεμία πλὴν ἡ τοῦ σπέρματος γένεσις, ὥστ' ἐπεὶ τοῦτο διὰ τοῦ θήλεος γίνεταί καὶ τοῦ ἄρρενος συνδεδασμένων, μίξασα ταῦτα διέθηκε μετ' ἀλλήλων· διὸ ἐν τοῖς φυτοῖς ἀχώριστον τὸ θῆλυ καὶ τὸ ἄρρεν. ἀλλὰ περὶ μὲν τούτων ἐν ἑτέροις ἐπέσκεπται, τοῦ δὲ ζώου οὐ μόνον τὸ γεννῆσαι ἔργον (τοῦτο μὲν γὰρ κοῖνον τῶν ζώντων πάντων), ἀλλὰ καὶ γνώσεώς τινος πάντα μετέχουσι, τὰ μὲν πλείονος τὰ δ' ἐλάττωτος τὰ δὲ ἀμπαν μικρᾶς. αἰσθησιν γὰρ ἔχουσιν, ἡ δ' αἰσθησις γνῶσις τις. ταύτης δὲ τὸ τίμιον καὶ ἄτιμον πολὺ διαφέρει σκοποῦσι πρὸς

φρόνησιν καὶ πρὸς τὸ τῶν ἀψύχων γένος. πρὸς (731b.) μὲν γὰρ τὸ φρονεῖν ὥσπερ οὐδὲν εἶναι δοκεῖ τὸ κοινωνεῖν ἀφῆς καὶ γεύσεως μόνον, πρὸς δὲ φυτὸν ἢ λίθον θαυμάσιον· ἀγαπητὸν γὰρ ἂν δόξειε καὶ ταύτης τυχεῖν τῆς γνώσεως ἀλλὰ μὴ κεῖσθαι τεθνεὸς καὶ μὴ ὄν. διαφέρει δ' αἰσθήσει τὰ ζῶα τῶν ζώντων μόνον. ἐπεὶ δ' ἀνάγκη καὶ ζῆν, ἐὰν ἦ ζῶον, ὅταν δεήσῃ ἀποτελεῖν τὸ τοῦ ζῶντος ἔργον, τότε συνδυάζεται καὶ μίγνυται καὶ γίγνεται ὥσπερ ἂν εἰ φυτόν, καθάπερ εἵπομεν.

Τὰ δ' ὀστρακόδερμα τῶν ζώων μεταξὺ ὄντα τῶν ζώων καὶ τῶν φυτῶν, ὡς ἐν ἀμφοτέροις ὄντα τοῖς γένεσιν οὐδετέρων ποιεῖ τὸ ἔργον· ὡς μὲν γὰρ φυτὸν οὐκ ἔχει τὸ θῆλυ καὶ τὸ ἄρρεν καὶ οὐ γεννᾷ εἰς ἕτερον, ὡς δὲ ζῶον οὐ φέρει ἐξ αὐτοῦ καρπὸν ὥσπερ τὰ φυτά, ἀλλὰ συνίσταται καὶ γεννᾶται ἐκ τινος συστάσεως γεοειδοῦς καὶ ὑγρᾶς. ἀλλὰ περὶ μὲν τῆς τούτων γενέσεως ὕστερον λεκτέον.

Κεφάλαιο 1

Τὸ δὲ θῆλυ καὶ τὸ ἄρρεν ὅτι μὲν εἰσιν ἀρχαὶ γενέσεως εἴρηται πρότερον, καὶ τίς ἡ δύναμις καὶ ὁ λόγος τῆς οὐσίας αὐτῶν· διὰ τί δὲ γίνεταί καὶ ἔστι τὸ μὲν θῆλυ τὸ δ' ἄρρεν, ὥς μὲν ἐξ ἀνάγκης καὶ τοῦ πρώτου κινουντος καὶ ὁποίας ὕλης, προϊόντα πειραῖσθαι δεῖ φράζειν τὸν λόγον, ὥς δὲ διὰ τὸ βέλτιον καὶ τὴν αἰτίαν τὴν ἕνεκά τινος ἄνωθεν ἔχει τὴν ἀρχήν. ἐπεὶ γὰρ ἐστὶ τὰ μὲν αἴδια καὶ θεῖα τῶν ὄντων, τὰ δ' ἐνδεχόμενα καὶ εἶναι καὶ μὴ εἶναι, τὸ δὲ καλὸν καὶ τὸ θεῖον αἴτιον ἀεὶ κατὰ τὴν αὐτοῦ φύσιν τοῦ βελτίονος ἐν τοῖς ἐνδεχομένοις, τὸ δὲ μὴ αἴδιον ἐνδεχόμενόν ἐστι καὶ εἶναι <καὶ μὴ εἶναι> καὶ μεταλαμβάνειν καὶ τοῦ χείρονος καὶ τοῦ βελτίονος· βέλτιον δὲ ψυχὴ μὲν σώματος, τὸ δ' ἔμψυχον τοῦ ἀψύχου διὰ τὴν ψυχὴν καὶ τὸ εἶναι τοῦ μὴ εἶναι καὶ τὸ ζῆν τοῦ μὴ ζῆν, -διὰ ταύτας τὰς αἰτίας γενέσεις ζῶων ἐστίν· ἐπεὶ γὰρ ἀδύνατος ἡ φύσις τοῦ τοιοῦτου γένους αἴδιος εἶναι, καθ' ὃν ἐνδέχεται τρόπον, κατὰ τοῦτόν ἐστιν αἴδιον τὸ γινόμενον. ἀριθμῷ μὲν οὖν ἀδύνατον-ἡ γὰρ οὐσία τῶν ὄντων ἐν τῷ καθ' ἕκαστον· τοιοῦτον δ' εἴπερ ἦν αἴδιον ἂν ἦν-εἶδει δ' ἐνδέχεται. διὸ γένος ἀεὶ (732a.) ἀνθρώπων καὶ ζῶων ἐστὶ καὶ φυτῶν. ἐπεὶ δὲ τούτων ἀρχὴ τὸ θῆλυ καὶ τὸ ἄρρεν ἕνεκα τῆς γενέσεως ἂν εἴη τὸ θῆλυ καὶ τὸ ἄρρεν ἐν τοῖς <ἐχ>ουσιν. βελτίονος δὲ καὶ θειοτέρας τὴν φύσιν οὔσης τῆς αἰτίας τῆς κινούσης πρώτης-ἡ ὁ λόγος ὑπάρχει καὶ τὸ εἶδος-τῆς ὕλης, βέλτιον καὶ τὸ κεχωρίσθαι τὸ κρεῖττον τοῦ χείρονος. διὰ τοῦτ' ἐν ὅσοις ἐνδέχεται καὶ καθ' ὅσον ἐνδέχεται κεχώριστα τοῦ θήλεος τὸ ἄρρεν· βέλτιον γὰρ καὶ θεϊότερον ἡ ἀρχὴ τῆς κινήσεως ἢ τὸ ἄρρεν ὑπάρχει τοῖς γιγνομένοις-ὕλη δὲ τὸ θῆλυ. συνέρχεται δὲ καὶ μίγνυται πρὸς τὴν ἐργασίαν τῆς γενέσεως τῷ θήλει τὸ ἄρρεν· αὕτη γὰρ κοινὴ ἀμφοτέροις.

Κατὰ μὲν οὖν τὸ μετέχειν τοῦ θήλεος καὶ τοῦ ἄρρενος ζῆ (διὸ καὶ τὰ φυτὰ μετέχει ζωῆς), κατὰ δὲ τὴν αἴσθησιν τὸ τῶν ζῶων ἐστὶ γένος. τούτων δὲ σχεδὸν ἐν πᾶσι τοῖς πορευτικοῖς κεχώριστα τὸ θῆλυ καὶ τὸ ἄρρεν διὰ τὰς εἰρημένας αἰτίας· καὶ τούτων τὰ μὲν, ὥσπερ ἐλέχθη, προῖεται σπέρμα, τὰ δ' οὐ προῖεται ἐν τῷ συνδυασμῷ. τούτου δ' αἴτιον ὅτι τὰ τιμιώτερα καὶ αὐταρκέστερα τὴν φύσιν ἐστίν, ὥστε μεγέθους μετεिल्φέναι. τοῦτο δ' οὐκ ἄνευ θερμότητος ψυχικῆς· ἀνάγκη γὰρ τὸ μείζον ὑπὸ πλείονος κινεῖσθαι δυνάμεως, τὸ

δὲ θερμὸν κινητικόν. διόπερ ὥς ἐπὶ τὸ πᾶν βλέψαντας εἰπεῖν τὰ ἔναιμα μείζω τῶν ἀναιμῶν καὶ τὰ πορευτικὰ τῶν μονίμων ζώων· ἅπερ προῖεται σπέρμα διὰ τὴν θερμότητα καὶ τὸ μέγεθος.

Καὶ περὶ μὲν ἄρρενος καὶ θήλεος δι' ἣν αἰτίαν ἐστὶν ἐκάτερον εἴρηται.

Τῶν δὲ ζώων τὰ μὲν τελεσιουργεῖ καὶ ἐκπέμπει θύραζε ὅμοιον ἑαυτῷ, οἷον ὅσα ζωοτοκεῖ εἰς τοῦμφανές, τὰ δὲ ἀδιάθρωτον ἐκτίκτει καὶ οὐκ ἀπειληφὸς τὴν αὐτοῦ μορφήν. τῶν δὲ τοιούτων τὰ μὲν ἔναιμα ὠοτοκεῖ, τὰ δ' ἄναιμα σκωληκοτοκεῖ. διαφέρει δ' ὦδον καὶ σκώληξ· ὦδον μὲν γὰρ ἐστὶν ἐξ οὗ γίγνεται τὸ γιγνόμενον ἐκ μέρους (τὸ δὲ λοιπὸν ἐστὶ τροφή τῷ γιγνομένῳ), σκώληξ δ' ἐξ οὗ τὸ γιγνόμενον ὅλου ὅλον γίγνεται. τῶν δὲ εἰς τὸ φανερόν ὅμοιον ἀποτελούντων ζῶον καὶ ζωοτοκούντων τὰ μὲν εὐθὺς ἐν αὐτοῖς ζωοτοκεῖ, οἷον ἄνθρωπος καὶ ἵππος καὶ βοῦς καὶ τῶν θαλαττίων δὲ δελφίς καὶ τᾶλλα τὰ τοιαῦτα, τὰ δ' ἐν αὐτοῖς ὠοτοκῆσαντα (732b.) πρῶτον οὕτω ζωοτοκεῖ θύραζε, οἷον τὰ σελάχη καλούμενα. τῶν δ' ὠοτοκούντων τὰ μὲν τέλειον προῖεται τὸ ὦδον, οἷον ὄρνιθες καὶ ὅσα τετράποδα ὠοτοκεῖ καὶ ὅσα ἄποδα οἷον σαῦροι καὶ χελῶναι καὶ τῶν ὄφεων τὸ πλεῖστον γένος (τὰ γὰρ τούτων ὥα ὅταν ἐξέλθῃ οὐκέτι λαμβάνει αὐξησιν), -τὰ δ' ἀτελῆ, οἷον οἱ τ' ἰχθύες καὶ τὰ μαλακόστρακα καὶ τὰ μαλάκια καλούμενα· τούτων γὰρ τὰ ὥα αὐξάνεται ἐξελθόντα.

Πάντα δὲ τὰ ζωοτοκοῦντα ἢ ὠοτοκοῦντα ἔναιμά ἐστὶν, καὶ τὰ ἔναιμα ἢ ζωοτοκεῖ ἢ ὠοτοκεῖ, ὅσα μὴ ὅλως ἄγονά ἐστιν. τῶν δ' ἀναιμῶν τὰ ἔντομα σκωληκοτοκεῖ, ὅσα ἢ ἐκ συνδυασμοῦ γίγνεται ἢ αὐτὰ συνδυάζεται. ἐστὶ γὰρ ἓν ἢ τοιαῦτα τῶν ἐντόμων ἃ γίγνεται μὲν αὐτόματα, ἐστὶ δὲ θήλεα καὶ ἄρρενα, καὶ ἐκ συνδυαζομένων γίγνεται τι αὐτῶν, ἀτελεῖς μέντοι τὸ γιγνόμενον· ἢ δ' αἰτία εἴρηται πρότερον ἐν ἐτέροις.

Συμβαίνει δὲ πολλὴ ἐπάλλαξις τοῖς γένεσιν· οὔτε γὰρ τὰ δίποδα πάντα ζωοτοκεῖ (οἱ γὰρ ὄρνιθες ὠοτοκοῦσιν) οὔτ' ὠοτοκεῖ πάντα (ὁ γὰρ ἄνθρωπος ζωοτοκεῖ) οὔτε τὰ τετράποδα πάντα ὠοτοκεῖ (ἵππος γὰρ καὶ βοῦς καὶ ἄλλα μυρία ζωοτοκεῖ) οὔτε ζωοτοκεῖ πάντα (σαῦροι γὰρ καὶ κροκόδειλοι καὶ ἄλλα πολλὰ ὠοτοκοῦσιν). οὐδ' ἐν τῷ πόδας ἔχειν ἢ μὴ ἔχειν διαφέρει· καὶ γὰρ ἄποδα ζωοτοκεῖ οἷον οἱ ἔχεις καὶ τὰ σελάχη, τὰ δ' ὠοτοκεῖ οἷον τὸ τῶν ἰχθύων γένος καὶ τὰ τῶν ἄλλων ὄφεων· καὶ τῶν πόδας ἔχόντων καὶ ὠοτοκεῖ πολλὰ καὶ ζωοτοκεῖ οἷον

τὰ εἰρημένα τετράποδα. καὶ ἐν αὐτοῖς δὲ ζωοτοκεῖ καὶ δίποδα οἷον ἄνθρωπος, καὶ ἄποδα οἷον φάλλαῖνα καὶ δελφίς. ταύτη μὲν οὖν οὐκ ἔστι διελεῖν, οὐδ' αἷτιον τῆς διαφορᾶς ταύτης οὐθὲν τῶν πορευτικῶν ὀργάνων, ἀλλὰ ζωοτοκεῖ μὲν τὰ τελεώτερα τὴν φύσιν τῶν ζῴων καὶ μετέχοντα καθαρωτέρας ἀρχῆς· οὐθὲν γὰρ ζωοτοκεῖ ἐν αὐτῷ μὴ δεχόμενον τὸ πνεῦμα καὶ ἀναπνέον.

τελεώτερα δὲ τὰ θερμότερα τὴν φύσιν καὶ ὑγρότερα καὶ μὴ γεώδη. τῆς δὲ θερμότητος τῆς φυσικῆς ὅρος ὁ πνεύμων ὅσων ἔναιμός ἐστιν· ὅλως μὲν γὰρ τὰ ἔχοντα πνεύμονα τῶν μὴ ἔχόντων θερμότερα, τούτων δ' αὐτῶν τὰ μὴ σομφὸν ἔχοντα μηδὲ στιφρὸν μηδ' ὀλίγαιμον ἀλλ' ἔναιμον (733a.) καὶ μαλακόν. ὥσπερ δὲ τὸ μὲν ζῶον τέλειον τὸ δ' ὦν καὶ ὁ σκώληξ ἀτελής, οὕτω τὸ τέλειον ἐκ τοῦ τελείου γίνεσθαι πέφυκεν. τὰ δὲ θερμότερα μὲν διὰ τὸ ἔχειν πνεύμονα ξηρότερα δὲ τὴν φύσιν, ἢ τὰ ψυχρότερα μὲν ὑγρότερα δέ- τὰ μὲν ὡοτοκεῖ τέλειον ὦν, τὰ δ' ὡοτοκήσαντα ζωοτοκεῖ ἐν αὐτοῖς. οἱ μὲν γὰρ ὄρνιθες καὶ τὰ φολιδωτὰ διὰ μὲν θερμότητα τελεσιουργοῦσι, διὰ δὲ ξηρότητα ὡοτοκοῦσι, -τὰ δὲ σελάχη θερμὰ μὲν ἦττον τούτων ὑγρά δὲ μᾶλλον ὥστε μετέχει ἀμφοτέρων· καὶ γὰρ ὡοτοκεῖ καὶ ζωοτοκεῖ ἐν αὐτοῖς-ὡοτοκεῖ μὲν ὅτι ψυχρά, ζωοτοκεῖ δ' ὅτι ὑγρά· ζωτικὸν γὰρ τὸ ὑγρόν, πορρωτάτω δὲ τοῦ ἐμψύχου τὸ ξηρόν. ἐπεὶ δ' οὔτε περωτὰ οὔτε φολιδωτὰ οὔτε λεπιδωτὰ ἐστίν-ἂ σημεῖα ξηρᾶς μᾶλλον καὶ γεώδους φύσεως-μαλακὸν τὸ ὦν γεννῶσιν· ὥσπερ γὰρ οὐδ' ἐν αὐτῷ οὐδ' ἐν τῷ ὦν ἐπιπολάζει τὸ γεηρόν. καὶ διὰ τοῦτο εἰς αὐτὰ ὡοτοκεῖ· θύραζε γὰρ ἂν ἰὸν διεφθείρετο τὸ ὦν οὐκ ἔχον προβολήν.

Τὰ δὲ καὶ ψυχρὰ καὶ ξηρὰ μᾶλλον ὡοτοκεῖ μὲν, ἀτελὲς δὲ τὸ ὦν, καὶ σκληρόδερμον δὲ διὰ τὸ γεηρὰ εἶναι καὶ ἀτελὲς προῖεσθαι ἵνα σώζηται φυλακὴν ἔχον τὸ ὀστρακῶδες. οἱ μὲν οὖν ἰχθύες λεπιδωτοὶ ὄντες καὶ τὰ μαλακόστρακα γεηρὰ ὄντα σκληρόδερμα τὰ ὦα γεννᾷ. τὰ δὲ μαλάκια ὥσπερ αὐτὰ γλίσχρα τὴν τοῦ σώματός ἐστι φύσιν οὕτω σώζει ἀτελῆ προῖέμενα τὰ ὦα· προῖεται γὰρ γλισχρότητα περὶ τὸ κύημα πολλήν.

Τὰ δ' ἔντομα πάντα σκωληκοτοκεῖ. ἔστι δ' ἅπαντα ἄναιμα τὰ ἔντομα, διὸ καὶ τὰ σκωληκοτοκοῦντα θύραζε. τὰ δ' ἄναιμα οὐ πάντα σκωληκοτοκεῖ ἅπλως· ἐπαλλάττουσι γὰρ ἀλλήλοις τὰ τ' ἔντομα [καὶ] τὰ σκωληκοτοκοῦντα καὶ τὰ ἀτελῆ τίκοντα τὰ ὦα, οἷον οἱ τ' ἰχθύες οἱ λεπιδωτοὶ καὶ τὰ μαλακόστρακα καὶ τὰ μαλάκια. τούτων μὲν γὰρ

τὰ ὡὰ σκωληκώδη ἐστίν (αὔξησιν γὰρ λαμβάνει θύραζε), ἐκείνων δ' οἱ σκώληκες γίνονται προϊόντες ὥσειδεῖς· ὃν δὲ τρόπον ἐν τοῖς ὕστερον διοριῶμεν.

Δεῖ δὲ νοῆσαι ὥς εὖ καὶ ἐφεξῆς τὴν γένεσιν ἀποδίδωσιν ἡ φύσις. τὰ μὲν γὰρ (733b.) τελεώτερα καὶ θερμότερα τῶν ζώων τέλειον ἀποδίδωσι τὸ τέκνον κατὰ τὸ ποιόν (κατὰ δὲ τὸ ποσὸν ὅλως οὐθὲν τῶν ζώων· πάντα γὰρ γενόμενα λαμβάνει αὔξησιν), καὶ γεννᾷ δὴ ταῦτα ζῶα ἐν αὐτοῖς εὐθύς. τὰ δὲ δεύτερα ἐν αὐτοῖς μὲν οὐ γεννᾷ τέλεια εὐθύς (ζωοτοκεῖ γὰρ ὥτοκῆσαντα πρῶτον), θύραζε δὲ ζωοτοκεῖ. τὰ δὲ ζῶον μὲν οὐ τέλειον γεννᾷ, ὦν δὲ γεννᾷ καὶ τοῦτο τέλειον τὸ ὦν. τὰ δ' ἔτι τούτων ψυχροτέραν ἔχοντα τὴν φύσιν ὦν μὲν γεννᾷ, οὐ τέλειον δὲ ὦν ἀλλ' ἔξω τελειοῦται καθάπερ τὸ τῶν λεπιδωτῶν ἰχθύων γένος καὶ τὰ μαλακόστρακα καὶ τὰ μαλάκια. τὸ δὲ πέμπτον γένος καὶ ψυχρότατον οὐδ' ὥτοκεῖ ἐξ αὐτοῦ ἀλλὰ καὶ τὸ τοιοῦτον ἔξω συμβαίνει πάθος αὐτῷ ὥσπερ εἴρηται· τὰ γὰρ ἔντομα σκωληκοτοκεῖ τὸ πρῶτον, προελθὼν δ' ὥδης γίγνεται ὁ σκώληξ (ἡ γὰρ χρυσαλλίς καλουμένη δύναμιν ὦου ἔχει), εἴτ' ἐκ τούτου γίγνεται ζῶον ἐν τῇ τρίτῃ μεταβολῇ λαβὼν τὸ τῆς γενέσεως τέλος.

Τὰ μὲν οὖν οὐ γίγνεται τῶν ζώων ἀπὸ σπέρματος, ὥσπερ ἐλέχθη καὶ πρότερον, -τὰ δ' ἔναιμα πάντα γίγνεται ἀπὸ σπέρματος ὅσα ἐκ συνδυασμοῦ γίγνεται, προῖεμένου τοῦ ἄρρενος εἰς τὸ θήλυ γονὴν ἧς εἰσελθούσης τὰ ζῶα συνίσταται καὶ λαμβάνει τὴν οἰκείαν μορφήν, τὰ μὲν ἐν αὐτοῖς τοῖς ζώοις ὅσα ζωοτοκεῖ τὰ δ' ἐν ὦοις * * * καὶ σπέρμασι καὶ τοιαύταις ἄλλαις ἀποκρίσεσιν.

Περὶ ὧν ἐστὶν ἀπορία πλείων, πῶς ποτε γίγνεται ἐκ τοῦ σπέρματος τὸ φυτὸν ἢ τῶν ζώων ὅτιοῦν. ἀνάγκη γὰρ τὸ γιγνόμενον καὶ ἐκ τινος γίγνεσθαι καὶ ὑπὸ τινος καὶ τι. ἐξ οὗ μὲν οὖν ἐστὶν ἡ ὕλη ἦν ἔνια μὲν ζῶα ἔχει πρῶτην ἐν αὐτοῖς λαβόντα ἐκ τοῦ θήλεος, οἷον ὅσα μὴ ζωοτοκεῖται ἀλλὰ σκωληκοτοκεῖται ἢ ὥτοκεῖται, τὰ δὲ μέχρι πόρρω ἐκ τοῦ θήλεος λαμβάνει διὰ τὸ θηλάζειν, ὥσπερ ὅσα ζωοτοκεῖται μὴ μόνον ἐκτὸς ἀλλὰ καὶ ἐντός. ἐξ οὗ μὲν οὖν γίγνεται ἡ τοιαύτη ὕλη ἐστίν. ζητεῖται δὲ νῦν οὐκ ἐξ οὗ ἀλλ' ὕφ' οὗ γίγνεται τὰ μόρια· ἥτοι γὰρ τῶν ἔξωθεν τι ποιεῖ ἢ ἐνυπάρχον τι ἐν τῇ γονῇ καὶ σπέρματι, καὶ τοῦτ' (734a.) ἐστὶν ἢ μέρος τι ψυχῆς ἢ ψυχῇ, ἢ ἔχον ἄν εἴη ψυχὴν.

τὸ μὲν οὖν τῶν ἔξωθεν τι ποιεῖν ἕκαστον ἢ τῶν σπλάγγνων ἢ τῶν ἄλλων μερῶν ἄλογον ἂν δόξειεν· κινεῖν τε γὰρ μὴ ἀπτόμενον

ἀδύνατον καὶ μὴ κινουῦντος πάσχειν τι ὑπὸ τούτου. ἐν αὐτῷ ἄρα τῷ κυήματι ἐνυπάρχει τι ἤδη, ἢ αὐτοῦ μόριον ἢ κεχωρισμένον. τὸ μὲν οὖν ἄλλο τι εἶναι κεχωρισμένον ἄλογον· γεννηθέντος γὰρ τοῦ ζώου πότερον φθίρεται ἢ ἐμμένει; ἀλλ' οὐδὲν τοιοῦτον φαίνεται ἐνὸν ὃ οὐ μόριον τοῦ ὅλου ἢ φυτοῦ ἢ ζώου ἐστίν. ἀλλὰ μὴν καὶ τὸ φθείρεσθαι γε ποιῆσαν εἴτε πάντα τὰ μέρη εἴτε τι ἄτοπον· τὰ λοιπὰ γὰρ τί ποιήσει; εἰ γὰρ ἐκεῖνο μὲν τὴν καρδίαν, εἴτ' ἐφθάρη, αὕτη δ' ἕτερον, τοῦ αὐτοῦ λόγου ἢ πάντα φθείρεσθαι ἢ πάντα μένειν. σώζεται ἄρα· αὐτοῦ ἄρα μόριόν ἐστίν ὃ εὐθύς ἐνυπάρχει ἐν τῷ σπέρματι. εἰ δὲ δὴ μὴ ἔστι τῆς ψυχῆς μηθὲν ὃ μὴ τοῦ σώματος ἐστίν ἐν τινι μορίῳ, καὶ ἔμψυχον ἂν τι εἴη μόριον εὐθύς.

Τὰ οὖν ἄλλα πῶς; ἢ γάρ τοι ἅμα πάντα γίνεταί τὰ μόρια οἷον καρδία πνεύμων ἥπαρ ὀφθαλμὸς καὶ τῶν ἄλλων ἕκαστον, ἢ ἐφεξῆς ὥσπερ ἐν τοῖς καλουμένοις Ὀρφέως ἔπεσιν· ἐκεῖ γὰρ ὁμοίως φησὶ γίνεσθαι τὸ ζῶον τῇ τοῦ δικτύου πλοκῇ. ὅτι μὲν οὖν οὐχ ἅμα καὶ τῇ αἰσθήσει ἐστὶ φανερόν· τὰ μὲν γὰρ φαίνεται ἐνόντα ἤδη τῶν μορίων τὰ δ' οὐ. ὅτι δ' οὐ διὰ μικρότητα οὐ φαίνεται δῆλον· μείζων γὰρ τὸ μέγεθος ὣν ὁ πνεύμων τῆς καρδίας ὕστερον φαίνεται τῆς καρδίας ἐν τῇ ἐξ ἀρχῆς γενέσει. ἐπεὶ δὲ τὸ μὲν πρότερον τὸ δ' ὕστερον, πότερον θάτερον ποιεῖ θάτερον καὶ ἔστι διὰ τὸ ἐχόμενον, ἢ μᾶλλον μετὰ τὸδε γίνεταί τὸδε; λέγω δ' οἷον οὐχ ἡ καρδία γενομένη ποιεῖ τὸ ἥπαρ, τοῦτο δ' ἕτερόν τι, ἀλλὰ τὸδε μετὰ τὸδε, ὥσπερ μετὰ τὸ παῖς ἀνὴρ γίνεταί ἀλλ' οὐχ ὑπ' ἐκείνου. λόγος δὲ τούτου ὅτι ὑπὸ τοῦ ἐντελεχείᾳ ὄντος τὸ δυνάμει ὄν γίνεταί ἐν τοῖς φύσει ἢ τέχνῃ γιγνομένοις, ὥστε δέοι ἂν τὸ εἶδος καὶ τὴν μορφήν ἐν ἐκείνῳ εἶναι οἷον ἐν τῇ καρδίᾳ τὸ τοῦ ἥπατος. καὶ ἄλλως δ' ἄτοπος καὶ πλασματίας ὁ λόγος.

Ἀλλὰ μὴν καὶ τὸ ἐν τῷ σπέρματι εὐθύς ἐνυπάρχειν τι μόριον τοῦ ζώου ἢ φυτοῦ γεγεννημένον· εἴτε δυνάμενον ποιεῖν τᾶλλα εἴτε μή· ἀδύνατον εἰ πᾶν ἐκ σπέρματος καὶ γονῆς γίνεταί. δῆλον γὰρ ὅτι ὑπὸ τοῦ τὸ σπέρμα ποιήσαντος ἐγένετο, εἴπερ εὐθύς (734b.) ἐνυπάρχει. ἀλλὰ σπέρμα δεῖ γενέσθαι πρότερον, καὶ τοῦτ' ἔργον τοῦ γεννῶντος· οὐθὲν ἄρα οἷόν τε μόριον ὑπάρχειν. οὐκ ἄρα ἔχει τὸ ποιοῦν τὰ μόρια ἐν αὐτῷ. ἀλλὰ μὴν οὐδ' ἔξω· ἀνάγκη δὲ τούτων εἶναι θάτερον.

Πειρατέον δὴ ταῦτα λύειν· ἴσως γάρ τι τῶν εἰρημένων ἐστίν οὐχ ἀπλοῦν, οἷον πῶς ποτε ὑπὸ τοῦ ἔξω οὐκ ἐνδέχεται γίνεσθαι. ἔστι μὲν γὰρ ὡς ἐνδέχεται, ἔστι δ' ὡς οὐ. τὸ μὲν οὖν τὸ σπέρμα λέγειν ἢ

ἂφ' οὗ τὸ σπέρμα οὐθὲν διαφέρει ἢ ἔχει τὴν κίνησιν ἐν ἑαυτῷ ἣν ἐκεῖνο ἐκίνει. ἐνδέχεται δὲ τόδε μὲν τόδε κινήσῃ, τόδε δὲ τόδε, καὶ εἶναι οἷον τὰ αὐτόματα τῶν θαυμάτων. ἔχοντα γὰρ πῶς ὑπάρχει δύναμιν τὰ μόρια ἡρεμουῖντα· ὧν τὸ πρῶτον ὅταν τι κινήσῃ τῶν ἔξωθεν εὐθὺς τὸ ἐχόμενον γίγνεται ἐνεργεία. ὥσπερ οὖν ἐν τοῖς αὐτομάτοις τρόπον μὲν τινα ἐκεῖνο κινεῖ οὐχ ἀπτόμενον νῦν οὐθενός, ἀψάμενον μέντοι· ὁμοίως δὲ καὶ ἂφ' οὗ τὸ σπέρμα ἢ τὸ ποιῆσαν τὸ σπέρμα, ἀψάμενον μὲν τινος, οὐχ ἀπτόμενον δ' ἔτι· τρόπον δέ τινα ἢ ἐνοῦσα κίνησις ὥσπερ ἢ οἰκοδόμησις τὴν οἰκίαν.

Ὅτι μὲν οὖν ἔστι τι ὃ ποιεῖ, οὐχ οὕτως δὲ ὡς τόδε τι οὐδ' ἐνυπάρχον ὡς τετελεσμένον τὸ πρῶτον, δηλον.

Πῶς δὲ ποτε ἕκαστον γίγνεται ἐντεῦθεν δεῖ λαβεῖν, ἀρχὴν ποιησαμένους πρῶτον μὲν ὅτι ὅσα φύσει γίγνεται ἢ τέχνῃ ὑπ' ἐνεργείᾳ ὄντος γίγνεται ἐκ τοῦ δυνάμει τοιούτου. τὸ μὲν οὖν σπέρμα τοιούτου, καὶ ἔχει κίνησιν καὶ ἀρχὴν τοιαύτην ὥστε παυομένης τῆς κινήσεως γίνεσθαι ἕκαστον τῶν μορίων καὶ ἔμψυχον. οὐ γὰρ ἔστι πρόσωπον μὴ ἔχον ψυχὴν οὐδὲ σὰρξ, ἀλλὰ φθαρέντα ὁμωνύμως λεχθήσεται τὸ μὲν εἶναι πρόσωπον τὸ δὲ σὰρξ, ὥσπερ καὶ εἰ ἐγίγνετο λίθινα ἢ ξύλινα. ἅμα δὲ τὰ ὁμοιομερῆ γίγνεται καὶ τὰ ὀργανικά· καὶ ὥσπερ οὐδ' ἂν πέλεκυν οὐδ' ἄλλο ὄργανον φήσαιμεν ἂν ποιῆσαι τὸ πῦρ μόνον οὕτως οὐδὲ πόδα οὐδὲ χεῖρα. τὸν αὐτὸν δὲ τρόπον οὐδὲ σάρκα· καὶ γὰρ ταύτης ἔργον τί ἐστιν. σκληρὰ μὲν οὖν καὶ μαλακὰ καὶ γλίσχρα καὶ κραῦρα καὶ ὅσα ἄλλα τοιαῦτα πάθη ὑπάρχει τοῖς ἐμψύχοις μορίοις θερμότης καὶ ψυχρότης ποιήσειεν ἂν, τὸν δὲ λόγον ᾧ ἤδη τὸ μὲν σὰρξ τὸ δ' ὅστουν οὐκέτι, ἀλλ' ἢ κίνησις ἢ ἀπὸ τοῦ γεννήσαντος τοῦ ἐντελεχείᾳ ὄντος ὃ ἐστι δυνάμει ἐξ οὗ γίγνεται, ὥσπερ καὶ ἐπὶ τῶν γιγνομένων κατὰ τέχνην· σκληρὸν μὲν γὰρ καὶ μαλακὸν τὸν σίδηρον ποιεῖ τὸ θερμὸν (735a.) καὶ τὸ ψυχρόν, ἀλλὰ ξίφος ἢ κίνησις ἢ τῶν ὀργάνων ἔχουσα λόγον [τὸν] τῆς τέχνης. ἢ γὰρ τέχνη ἀρχὴ καὶ εἶδος τοῦ γιγνομένου, ἀλλ' ἐν ἐτέρῳ· ἢ δὲ τῆς φύσεως κίνησις ἐν αὐτῷ ἂφ' ἐτέρας οὐσα φύσεως τῆς ἐχούσης τὸ εἶδος ἐνεργεία.

Πότερον δ' ἔχει ψυχὴν τὸ σπέρμα ἢ οὐ; ὁ αὐτὸς λόγος καὶ περὶ τῶν μορίων· οὔτε γὰρ ψυχὴ ἐν ἄλλῳ οὐδεμία ἔσται πλην ἐν ἐκείνῳ οὗ γ' ἐστίν, οὔτε μόριον ἔσται μὴ μετέχον ἀλλ' ἢ ὁμωνύμως ὥσπερ τεθνεῶτος ὀφθαλμός. δηλον οὖν ὅτι καὶ ἔχει καὶ ἔστι δυνάμει. ἐγγυτέρω δὲ καὶ πορρωτέρω αὐτὸ αὐτοῦ ἐνδέχεται εἶναι δυνάμει,

ὥσπερ ὁ καθεύδων γεωμέτρης τοῦ ἐγρηγορότος πορρωτέρω καὶ οὗτος τοῦ θεωροῦντος. ταύτης μὲν οὖν οὐθὲν μόριον αἴτιον τῆς γενέσεως ἀλλὰ τὸ πρῶτον κινήσαν ἔξωθεν. οὐθὲν γὰρ αὐτὸ ἑαυτὸ γεννᾷ· ὅταν δὲ γένηται αὖξει ἤδη αὐτὸ ἑαυτό. διόπερ πρῶτόν τι γίγνεται καὶ οὐχ ἅμα πάντα. τοῦτο δὲ γίγνεσθαι ἀνάγκη πρῶτον ὁ αὐξήσεως ἀρχὴν ἔχει· εἴτε γὰρ φυτὸν εἴτε ζῷον ὁμοίως τοῦτο πᾶσιν ὑπάρχει τὸ θρεπτικόν. τοῦτο δ' ἔστι τὸ γεννητικὸν ἐτέρου οἷον αὐτό· τοῦτο γὰρ παντὸς φύσει τελείου ἔργον καὶ ζῶου καὶ φυτοῦ· ἀνάγκη δὲ διὰ τόδε ὅτι ὅταν τι γένηται αὐξάνεσθαι ἀνάγκη. ἐγέννησε μὲν τοίνυν τὸ συνώνυμον οἷον ἄνθρωπος ἄνθρωπον, αὖζεται δὲ δι' ἑαυτοῦ. αὐτὸ ἄρα τι ὃν αὖξει· εἰ δὴ ἔν τι καὶ τοῦτο πρῶτον, τοῦτο ἀνάγκη γίγνεσθαι πρῶτον. ὥστ' εἰ ἡ καρδία πρῶτον ἔν τισι ζώοις γίγνεται, ἐν δὲ τοῖς μὴ ἔχουσι καρδίαν τὸ ταύτῃ ἀνάλογον, ἐκ ταύτης ἂν εἴη ἡ ἀρχὴ τοῖς ἔχουσι, τοῖς δ' ἄλλοις ἐκ τοῦ ἀνάλογον.

Τί μὲν οὖν ἐστὶν αἴτιον ὡς ἀρχὴ τῆς περὶ ἕκαστον γενέσεως, κινεῖν πρῶτον καὶ δημιουργεῖν, εἴρηται πρὸς τὰ διαπορηθέντα πρότερον.

Κεφάλαιο 2

Περὶ δὲ τῆς τοῦ σπέρματος φύσεως ἀπορήσειεν ἂν τις, τὸ γὰρ σπέρμα ἐξέρχεται μὲν ἐκ τοῦ ζώου παχὺ καὶ λευκόν, ψυχόμενον δὲ γίνεταί ὑγρὸν ὥσπερ ὕδωρ καὶ τὸ χρῶμα ὕδατος. ἄτοπον δὴ ἂν δόξειεν· οὐ γὰρ παχύνεται ὕδωρ θερμῷ, τὸ δ' ἔσωθεν ἐκ θερμοῦ ἐξέρχεται παχὺ, ψυχόμενον δὲ γίνεταί ὑγρὸν. καίτοι πηγνυταί γε τὰ ὑδατώδη· τὸ δὲ σπέρμα οὐ πηγνυταί τιθέμενον ἐν τοῖς πάγοις ὑπαίθριον ἀλλ' ὑγραίνεται ὡς ὑπὸ τοῦ ἐναντίου παχυνθέν. ἀλλὰ μὴν οὐδ' ὑπὸ θερμοῦ παχύνεσθαι εὐλογον. ὅσα γὰρ (735b.) γῆς πλεῖον ἔχει, ταῦτα συνίσταται καὶ παχύνεται ἐψόμενα οἷον καὶ τὸ γάλα. ἔδει οὖν ψυχόμενον στερεοῦσθαι. νῦν δ' οὐθέν γίνεταί στερεὸν ἀλλὰ πᾶν ὥσπερ ὕδωρ. ἢ μὲν οὖν ἀπορία αὕτη ἐστίν· εἰ μὲν γὰρ ὕδατος-τὸ ὕδωρ οὐ φαίνεται παχυνόμενον ὑπὸ τοῦ θερμοῦ, τὸ δ' ἐξέρχεται παχὺ καὶ θερμὸν καὶ ἐκ θερμοῦ τοῦ σώματος· εἰ δὲ γῆς ἢ μικτὸν γῆς καὶ ὕδατος οὐκ ἔδει ὑγρὸν πᾶν γίνεσθαι [καὶ ὕδωρ]. ἢ οὐ πάντα τὰ συμβαίνοντα διηγήκαμεν; οὐ γὰρ μόνον παχύνεται τὸ ἐξ ὕδατος καὶ γεώδους συνιστάμενον ὑγρὸν ἀλλὰ καὶ τὸ ἐξ ὕδατος καὶ πνεύματος, οἷον καὶ ὁ ἀφρός γίνεταί παχύτερος καὶ λευκός, καὶ ὅσῳ ἂν ἐλάττους καὶ ἀδηλότεραι αἱ πομφόλυγες ὥσι τοσοῦτῳ καὶ λευκότερος καὶ στιφρότερος ὁ ὄγκος φαίνεται. τὸ δ' αὐτὸ καὶ τὸ ἔλαιον πάσχει· παχύνεται γὰρ τῷ πνεύματι μιγνύμενον· διὸ καὶ τὸ λευκαίνόμενον παχύτερον γίνεταί, τοῦ ἐνόντος ὑδατώδους ὑπὸ τοῦ θερμοῦ διακρινομένου καὶ γιγνομένου πνεύματος. καὶ ἡ μολύβδαινα μιγνυμένη ὕδατι καὶ ἐλαίῳ καὶ τριβομένη ἐξ ὀλίγου τε πολὺν ὄγκον ποιεῖ καὶ ἐξ ὑγροῦ στιφρὸν καὶ ἐκ μέλανος λευκόν. αἴτιον δ' ὅτι ἐγκαταμίγνυται πνεῦμα ὃ τὸν τε ὄγκον ποιεῖ καὶ τὴν λευκότητα διαφαίνει, ὥσπερ ἐν τῷ ἀφρῷ καὶ τῇ χιόνι· καὶ γὰρ ἡ χιών ἐστίν ἀφρός. καὶ αὐτὸ τὸ ὕδωρ ἐλαίῳ μιγνύμενον γίνεταί παχὺ καὶ λευκόν· καὶ γὰρ ὑπὸ τῆς τρίψεως ἐγκατακλείεται πνεῦμα, καὶ αὐτὸ τὸ ἔλαιον ἔχει πνεῦμα πολὺ· ἔστι γὰρ οὔτε γῆς οὔτε ὕδατος ἀλλὰ πνεύματος τὸ λιπαρόν. διὸ καὶ ἐπὶ τῷ ὕδατι ἐπιπολάζει· ὁ γὰρ ἐν αὐτῷ ὢν ἀῆρ ὥσπερ ἐν ἀγγελίῳ φέρει ἄνω καὶ ἐπιπολάζει καὶ αἴτιος τῆς κουφότητός ἐστιν. καὶ ἐν τοῖς ψύχεσι δὲ καὶ πάγοις παχύνεται τὸ ἔλαιον, πηγνυταί δ' οὐ· διὰ μὲν γὰρ θερμότητα οὐ πηγνυταί (ὁ γὰρ ἀῆρ θερμὸν καὶ ἄπηκτον), διὰ δὲ τὸ συνίστασθαι αὐτὸν καὶ

πυκνουῖσθαι [ὥσπερ] ὑπὸ τοῦ ψύχους παχύτερον γίγνεται τὸ ἔλαιον.

διὰ ταύτας τὰς αἰτίας καὶ τὸ σπέρμα ἔσωθεν μὲν ἐξέρχεται στιφρὸν καὶ λευκόν, ὑπὸ τῆς ἐντὸς θερμότητος πνεῦμα πολὺ ἔχον θερμόν, ἐξελθόντος δὲ ὅταν ἀποπνεύσῃ τὸ θερμόν καὶ ὁ ἀῆρ ψυχθῇ ὑγρὸν γίγνεται καὶ μέλαν· λείπεται γὰρ τὸ ὕδωρ καὶ εἴ τι μικρὸν γεῶδες, ὥσπερ ἐν φλέγματι, καὶ ἐν τῷ σπέρματι ξηραίνομένω.

Ἔστι μὲν οὖν τὸ σπέρμα (736a.) κοινὸν πνεύματος καὶ ὕδατος, τὸ δὲ πνεῦμά ἐστι θερμὸς ἀῆρ· διὸ ὑγρὸν τὴν φύσιν ὅτι ἐξ ὕδατος. Κτησίας γὰρ ὁ Κνίδιος ἅ περὶ τοῦ σπέρματος τῶν ἐλεφάντων εἶρηκε φανερός ἐστιν ἐψευσμένος. φησὶ γὰρ οὕτω σκληρύνεσθαι ξηραίνομενον ὥστε γίνεσθαι ἡλέκτρῳ ὅμοιον. τοῦτο δ' οὐ γίγνεται· μᾶλλον μὲν γὰρ ἕτερον ἐτέρου σπέρμα γεωδέστερον ἀναγκαῖον εἶναι, καὶ μάλιστα τοιοῦτον ὅσοις πολὺ γεῶδες ὑπάρχει κατὰ τὸν ὄγκον τοῦ σώματος, παχὺ δὲ καὶ λευκὸν διὰ τὸ μεμῖχθαι πνεῦμα. καὶ γὰρ λευκὸν ἐστι τὸ σπέρμα πάντων· Ἡρόδοτος γὰρ οὐκ ἀληθῆ λέγει φάσκων μέλαιναν εἶναι τὴν τῶν Αἰθιοπῶν γονὴν, ὥσπερ ἀναγκαῖον ὄν τῶν τὴν χροάν μελάνων εἶναι πάντα μέλανα, καὶ ταῦθ' ὁρῶν καὶ τοὺς ὀδόντας αὐτῶν ὄντας λευκοῦς. αἴτιον δὲ τῆς λευκότητος τοῦ σπέρματος ὅτι ἐστὶν ἡ γονὴ ἀφρός, ὁ δ' ἀφρὸς λευκόν, καὶ μάλιστα τὸ ἐξ ὀλιγίστων συγκείμενον μορίων καὶ οὕτω μικρῶν ὥσπερ ἐκάστης ἀοράτου τῆς πομφόλυγος οὔσης, ὅπερ συμβαίνει καὶ ἐπὶ τοῦ ὕδατος καὶ τοῦ ἐλαίου μιγνυμένων καὶ τριβομένων, καθάπερ ἐλέχθη πρότερον.

Ἔοικε δὲ οὐδὲ τοὺς ἀρχαίους λανθάνειν ἀφρώδης ἡ τοῦ σπέρματος οὔσα φύσις· τὴν γοῦν κυρίαν θεὸν τῆς μίξεως ἀπὸ τῆς δυνάμεως ταύτης προσηγόρευσαν.

Ἡ μὲν οὖν αἰτία τῆς λεχθείσης ἀπορίας εἶρηται, φανερόν δὲ ὅτι διὰ τοῦτ' οὐδὲ πήγνυται· ὁ γὰρ ἀῆρ ἄπηκτος.

Κεφάλαιο 3

Τούτου δ' ἐχόμενον ἐστὶν ἀπορῆσαι καὶ εἰπεῖν, εἰ τῶν προϊεμένων εἰς τὸ θῆλυ γονὴν μηθὲν μόριον ἐστὶ τὸ εἰσελθὼν τοῦ γιγνομένου κυήματος, ποῦ τρέπεται τὸ σωματῶδες αὐτοῦ, εἴπερ ἐργάζεται τῇ δυνάμει τῇ ἐνούσῃ ἐν αὐτῷ. διορίσαι δὲ δεῖ πότερον μεταλαμβάνει τὸ συνιστάμενον ἐν τῷ θήλει ἀπὸ τοῦ εἰσελθόντος τι ἢ οὐθέν, καὶ περὶ ψυχῆς καθ' ἣν λέγεται ζῶον (ζῶον δ' ἐστὶ κατὰ τὸ μόριον τῆς ψυχῆς τὸ αἰσθητικόν) πότερον ἐνυπάρχει τῷ σπέρματι καὶ τῷ κυήματι ἢ οὐ, καὶ πόθεν. οὔτε γὰρ ὡς ἄψυχον ἂν θεῖ τις τὸ κύημα κατὰ πάντα τρόπον ἐστερημένον ζωῆς· οὐδὲν γὰρ ἦττον τὰ τε σπέρματα καὶ τὰ κυήματα τῶν ζῶων ζῇ τῶν φυτῶν, καὶ γόνιμα μέχρι τινός ἐστιν. ὅτι μὲν οὖν τὴν θεραπετικὴν ἔχουσι ψυχὴν φανερόν (δι' ὅτι δὲ ταύτην πρῶτον ἀναγκαῖον ἐστὶ λαβεῖν ἐκ τῶν περὶ ψυχῆς διωρισμένων ἐν ἄλλοις (736b.) φανερόν), προϊόντα δὲ καὶ τὴν αἰσθητικὴν καθ' ἣν ζῶον * * *. οὐ γὰρ ἅμα γίνεταί ζῶον καὶ ἄνθρωπος οὐδὲ ζῶον καὶ ἵππος, ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων ζῴων· ὕστατον γὰρ γίνεταί τὸ τέλος, τὸ δ' ἰδίον ἐστὶ τὸ ἐκάστου τῆς γενέσεως τέλος. διὸ καὶ περὶ νοῦ, πότε καὶ πῶς μεταλαμβάνει καὶ πόθεν τὰ μετέχοντα ταύτης τῆς ἀρχῆς, ἔχει τ' ἀπορίαν πλείστην καὶ δεῖ προθυμεῖσθαι κατὰ δύνανμιν λαβεῖν καὶ καθ' ὅσον ἐνδέχεται.

Τὴν μὲν οὖν θεραπετικὴν ψυχὴν τὰ σπέρματα καὶ τὰ κυήματα τὰ μήπω χωριστὰ δῆλον ὅτι δυνάμει μὲν ἔχοντα θετέον, ἐνεργείᾳ δ' οὐκ ἔχοντα πρὶν ἢ καθάπερ τὰ χωριζόμενα τῶν κυημάτων ἔλκει τὴν τροφήν καὶ ποιεῖ τὸ τῆς τοιαύτης ψυχῆς ἔργον· πρῶτον μὲν γὰρ ἅπαντ' ἔοικε ζῆν τὰ τοιαῦτα φυτοῦ βίον. ἐπομένως δὲ δῆλον ὅτι καὶ περὶ τῆς αἰσθητικῆς λεκτέον ψυχῆς καὶ περὶ τῆς νοητικῆς· πάσας γὰρ ἀναγκαῖον δυνάμει πρότερον ἔχειν ἢ ἐνεργείᾳ. ἀναγκαῖον δὲ ἦτοι μὴ οὐσας πρότερον ἐγγίγνεσθαι πάσας ἢ πάσας προὑπαρχούσας ἢ τὰς μὲν τὰς δὲ μή, καὶ ἐγγίγνεσθαι ἢ ἐν τῇ ὕλῃ μὴ εἰσελθούσας ἐν τῷ τοῦ ἄρρενος σπέρματι ἢ ἐνταῦθα μὲν ἐκεῖθεν ἐλθούσας, ἐν δὲ τῷ ἄρρενι ἢ θύραθεν ἐγγιγνομένας ἀπάσας ἢ μηδεμίαν ἢ τὰς μὲν τὰς δὲ μή.

ὅτι μὲν τοίνυν οὐχ οἷόν τε πάσας προὑπάρχειν φανερόν ἐστιν ἐκ τῶν τοιούτων· ὅσων γὰρ ἐστὶν ἀρχῶν ἢ ἐνέργεια σωματική, δῆλον ὅτι ταύτας ἄνευ σώματος ἀδύνατον ὑπάρχειν, οἷον βαδίζειν ἄνευ ποδῶν· ὥστε καὶ θύραθεν εἰσιέναι ἀδύνατον· οὔτε γὰρ αὐτὰς καθ'

αὐτὰς εἰσιέναι οἷόν τε ἀχωρίστους οὕσας οὐτ' ἐν σώματι εἰσιέναι· τὸ γὰρ σπέρμα περίττωμα μεταβαλλούσης τῆς τροφῆς ἐστίν. λείπεται δὴ τὸν νοῦν μόνον θύραθεν ἐπεισιέναι καὶ θεῖον εἶναι μόνον· οὐθὲν γὰρ αὐτοῦ τῇ ἐνεργείᾳ κοινωνεῖ <ή> σωματικῇ ἐνέργεια.

Πάσης μὲν οὖν ψυχῆς δύνამις ἐτέρου σώματος ἔοικε κεκοινωνηκέναι καὶ θειοτέρου τῶν καλουμένων στοιχείων· ὥς δὲ διαφέρουσι τιμιότητι αἱ ψυχαὶ καὶ ἀτιμία ἀλλήλων οὕτω καὶ ἡ τοιαύτη διαφέρει φύσις. πάντων μὲν γὰρ ἐν τῷ σπέρματι ἐνυπάρχει ὅπερ ποιεῖ γόνιμα εἶναι τὰ σπέρματα, τὸ καλούμενον θερμόν. τοῦτο δ' οὐ πῦρ οὐδὲ τοιαύτη δύνამις ἐστίν ἀλλὰ τὸ ἐμπεριλαμβανόμενον ἐν τῷ σπέρματι καὶ ἐν τῷ ἀφρώδει πνεῦμα καὶ ἡ ἐν τῷ πνεύματι φύσις, ἀνάλογον οὕσα τῷ (737a.) τῶν ἄστρων στοιχείῳ. διὸ πῦρ μὲν οὐθὲν γεννᾷ ζῶον, οὐδὲ φαίνεται συνιστάμενον ἐν πυρουμένοις οὐτ' ἐν ὑγροῖς οὐτ' ἐν ξηροῖς οὐθὲν· ἡ δὲ τοῦ ἡλίου θερμότης καὶ ἡ τῶν ζώων οὐ μόνον ἡ διὰ τοῦ σπέρματος, ἀλλὰ κἂν τι περίττωμα τύχη τῆς φύσεως ὃν ἕτερον, ὅμως ἔχει καὶ τοῦτο ζωτικὴν ἀρχήν. ὅτι μὲν οὖν ἡ ἐν τοῖς ζώοις θερμότης οὔτε πῦρ οὔτε ἀπὸ πυρὸς ἔχει τὴν ἀρχὴν ἐκ τῶν τοιούτων ἐστὶ φανερόν.

Τὸ δὲ τῆς γονῆς σῶμα ἐν ᾧ συναπέρχεται τὸ σπέρματ' ἐν τῇ ψυχικῇ ἀρχῇ, τὸ μὲν χωριστὸν ὃν σώματος ὅσοις ἐμπεριλαμβάνεται τι θεῖον (τοιούτος δ' ἐστὶν ὁ καλούμενος νοῦς) τὸ δ' ἀχώριστον, -τοῦτο τὸ σῶμα τῆς γονῆς διαλύεται καὶ πνευματοῦται φύσιν ἔχον ὑγρὰν καὶ ὑδατώδη. διόπερ οὐ δεῖ ζητεῖν ἀεὶ θύραζε αὐτὸ ἐξιέναι, οὐδὲ μόνον οὐθὲν εἶναι τῆς συστάσεως μορφῆς ὥσπερ οὐδὲ τὸν ὀπὸν τὸν τὸ γάλα συνιστάντα· καὶ γὰρ οὗτος μεταβάλλει καὶ μόνον οὐθὲν ἐστὶ τῶν συνισταμένων ὄγκων.

Περὶ μὲν οὖν ψυχῆς πῶς ἔχει τὰ κυήματα καὶ ἡ γονὴ καὶ πῶς οὐκ ἔχει διώρισται· δυνάμει μὲν γὰρ ἔχει, ἐνεργείᾳ δ' οὐκ ἔχει.

Τοῦ δὲ σπέρματος ὄντος περιττώματος καὶ κινουμένου κίνησιν τὴν αὐτὴν καθ' ἣνπερ τὸ σῶμα αὐξάνεται μεριζομένης τῆς ἐσχάτης τροφῆς, ὅταν ἔλθῃ εἰς τὴν ὑστέρα συνίστησι καὶ κινεῖ τὸ περίττωμα τὸ τοῦ θήλεος τὴν αὐτὴν κίνησιν ἣνπερ αὐτὸ τυγχάνει κινούμενον κάκεῖνο. καὶ γὰρ ἐκεῖνο περίττωμα, καὶ πάντα τὰ μόρια ἔχει δυνάμει, ἐνεργείᾳ δ' οὐθὲν. καὶ γὰρ τὰ τοιαῦτ' ἔχει μόρια δυνάμει ἢ διαφέρει τὸ θῆλυ τοῦ ἄρρενος, ὥσπερ γὰρ καὶ ἐκ πεπηρωμένων ὅτε μὲν γίνεταί πεπηρωμένα ὅτε δ' οὐ, οὕτω καὶ ἐκ θήλεος ὅτε μὲν θῆλυ ὅτε δ' οὐ ἀλλ' ἄρρεν. τὸ γὰρ θῆλυ ὥσπερ ἄρρεν ἐστὶ πεπηρωμένον καὶ

τὰ καταμήνια σπέρμα, οὐ καθαρὸν δέ· ἔν γάρ οὐκ ἔχει μόνον· τὴν τῆς ψυχῆς ἀρχήν. καὶ διὰ τοῦτο ὅσοις ὑπηνέμια γίνεται τῶν ζώων ἀμφοτέρων ἔχει τὰ μέρη τὸ συνιστάμενον ὥόν, ἀλλὰ τὴν ἀρχὴν οὐκ ἔχει, διὸ οὐ γίνεται ἔμψυχον· ταύτην γὰρ τὸ τοῦ ἄρρενος ἐπιφέρει σπέρμα. ὅταν δὲ μετὰσχη τοιαύτης ἀρχῆς τὸ περίττωμα τὸ τοῦ θήλεος κύημα γίνεται.

[[Τοῖς δ' ὕγραῖς μὲν σωματώδεσι δὲ θερμαινομένοις περιίσταται· καθάπερ καὶ ἐν τοῖς ἐψήμασι ψυχομένοις-τὸ περίξηρον. πάντα (737b.) δὲ τὰ σώματα συνέχει τὸ γλίσχρον· ὅπερ καὶ προῖοῦσι καὶ μείζοσι γιγνομένοις ἢ τοῦ νεύρου λαμβάνει φύσις ἥπερ συνέχει τὰ μόρια τῶν ζώων, ἐν μὲν τοῖς οὔσα νεῦρον ἐν δὲ τοῖς τὸ ἀνάλογον. τῆς δ' αὐτῆς μορφῆς ἐστι καὶ δέρμα καὶ φλέψ καὶ ὕμην καὶ πᾶν τὸ τοιοῦτον γένος· διαφέρει γὰρ ταῦτα τῷ μᾶλλον καὶ ἥττον καὶ ὅλως ὑπεροχῇ καὶ ἐλλείψει.]]

Κεφάλαιο 4

Τῶν δὲ ζώων τὰ μὲν ἀτελεστέραν ἔχοντα τὴν φύσιν, ὅταν γένηται κύημα τέλειον ζῶον δὲ μήπω τέλειον, θύραζε προίεται· δι' ἧς δ' αἰτίας εἴρηται πρότερον. τέλειον δ' ἤδη τότε ἔστιν ὅταν τὸ μὲν ἄρρεν ἢ τὸ δὲ θήλυ τῶν κυημάτων· ἐν ὅσοις ἔστιν αὕτη ἡ διαφορὰ τῶν γιγνομένων· ἔνια γὰρ οὔτε θήλυ γεννᾷ οὔτ' ἄρρεν, ὅσα μὴδ' αὐτὰ γίνεταί ἐκ θήλεος καὶ ἄρρενος μὴδ' ἐκ ζώων μιγνυμένων. καὶ περὶ μὲν τῆς τούτων γενέσεως ὕστερον ἐροῦμεν.

Τὰ δὲ ζωοτοκοῦντα ἐν αὐτοῖς τὰ τέλεια τῶν ζώων, μέχρι περ ἂν οὗ γεννήσῃ ζῶον καὶ θύραζε ἐκπέμψῃ, ἔχει συμφυῆς ἐν αὐτῷ τὸ γιγνόμενον ζῶον.

Ὅσα δὲ θύραζε μὲν ζωοτοκεῖ ἐν αὐτοῖς δ' ὠτοκεῖ τὸ πρῶτον, ὅταν γεννήσῃ τὸ ὦν τέλειον, τούτων ἐνίων μὲν ἀπολύεται τὸ ὦν ὥσπερ τῶν θύραζε ὠτοκούντων καὶ τὸ ζῶον ἐκ τοῦ ὦου γίνεταί ἐν τῷ θήλει, ἐνίων δ' ὅταν καταναλωθῇ ἡ ἐν τῷ ὦῳ τροφή τελειοῦται ἀπὸ τῆς ὑστέρας, καὶ διὰ τοῦτο οὐκ ἀπολύεται τὸ ὦν ἀπὸ τῆς ὑστέρας. ταύτην δ' ἔχουσι τὴν διαφορὰν οἱ σελαχῶδεις ἰχθύες περὶ ὧν ὕστερον καθ' αὐτὰ λεκτέον.

Νῦν δ' ἀπὸ τῶν πρώτων ἀρκτέον πρώτων· ἔστι δὲ τὰ τέλεια ζῶα πρῶτα, τοιαῦτα δὲ τὰ ζωοτοκοῦντα καὶ τούτων ἄνθρωπος πρῶτον.

Ἡ μὲν οὖν ἀπόκρισις γίνεταί πᾶσι τοῦ σπέρματος ὥσπερ ἄλλου τινὸς περιττώματος. φέρεται γὰρ ἕκαστον εἰς τὸν οἰκεῖον τόπον οὐθὲν ἀποβιαζομένου τοῦ πνεύματος οὐδ' ἄλλης αἰτίας τοιαύτης ἀναγκαζούσης, ὥσπερ τινὲς φασιν ἔλκειν τὰ αἰδοῖα φάσκοντες ὥσπερ τὰς σικύας τῷ τε πνεύματι βιαζομένων-ὥσπερ ἐνδεχόμενον ἄλλοθι που πορευθῆναι μὴ βιασαμένων ἢ ταύτην τὴν περίττωσιν ἢ τὴν τῆς ὑγρᾶς ἢ ξηρᾶς τροφῆς, ὅτι τὰς ἐξόδους αὐτῶν ἠθροισμένῳ τῷ πνεύματι συνεκκρίνουσιν. τοῦτο δὲ κοινὸν κατὰ πάντων ὅσα δεῖ κινήσαι· διὰ γὰρ τοῦ τὸ πνεῦμα κατασχεῖν (738a.) ἡ ἰσχὺς ἐγγίγνεται, ἐπεὶ καὶ ἄνευ ταύτης τῆς βίας ἐκκρίνεται τὰ περιττώματα καὶ καθεύδουσιν ἂν ἄνετοί τε καὶ πλήρεις περιττώματος οἱ τόποι τύχωσιν ὄντες. ὅμοιον δὲ καὶ εἴ τις φαίῃ τοῖς φυτοῖς ὑπὸ τοῦ πνεύματος ἐκάστοτε τὰ σπέρματα ἀποκρίνεσθαι πρὸς τοὺς τόπους πρὸς οὓς εἴωθε φέρειν τὸν καρπὸν. ἀλλὰ τούτου μὲν αἴτιον, ὥσπερ εἴρηται, τὸ πᾶσιν εἶναι μόρια δεκτικὰ τοῖς περιττώμασι τοῖς τ' ἀχρήστοις, †οῖον

τῇ τε ξηρᾷ καὶ τῇ ὑγρᾷ,† καὶ τῷ αἵματι τὰς καλουμένας φλέβας.

Τοῖς μὲν οὖν θήλεσι περὶ τὸν τῶν ὑστερῶν τόπον, σχιζομένων ἄνωθεν τῶν δύο φλεβῶν τῆς τε μεγάλης καὶ τῆς ἁορτῆς, πολλαὶ καὶ λεπταὶ φλέβες τελευτῶσιν εἰς τὰς ὑστέρας, ὧν ὑπερπληρουμένων ἐκ τῆς τροφῆς καὶ τῆς φύσεως διὰ ψυχρότητα πέττειν οὐ δυναμένης, ἐκκρίνεται διὰ λεπτοτάτων φλεβῶν εἰς τὰς ὑστέρας, οὐ δυναμένων διὰ τὴν στενοχωρίαν δέχεσθαι τὴν ὑπερβολὴν τοῦ πλήθους, καὶ γίνεταί τὸ πάθος οἷον αἰμορροΐς. ἀκριβῶς μὲν οὖν ἡ περίοδος οὐ τέτακται ταῖς γυναιξί, βούλεται δὲ φθινόντων γίνεσθαι τῶν μηνῶν εὐλόγως· ψυχρότερα γὰρ τὰ σώματα τῶν ζώων ὅταν καὶ τὸ περιέχον συμβαίνει γίνεσθαι τοσοῦτον, αἱ δὲ τῶν μηνῶν σύνοδοι ψυχραὶ διὰ τὴν τῆς σελήνης ἀπόλειψιν, διόπερ καὶ χειμερινούς συμβαίνει τὰς συνόδους εἶναι τῶν μηνῶν μᾶλλον ἢ τὰς μεσότητας. μεταβεβληκότος μὲν οὖν εἰς αἷμα τοῦ περιττώματος βούλεται γίνεσθαι τὰ καταμήνια κατὰ τὴν εἰρημένην περίοδον, μὴ πεπεμμένου δὲ κατὰ μικρὸν αἰεὶ τι ἀποκρίνεται· διὸ τὰ λευκὰ μικροῖς ἔτι καὶ παιδίοις οὔσι γίνεταί τοις θήλεσιν. μετριάζουσιν μὲν οὖν ἀμφοτέραι αὗται αἱ ἀποκρίσεις τῶν περιττωμάτων τὰ σώματα σώζουσιν, ἅτε γιγνομένης καθάρσεως τῶν περιττωμάτων ἃ τοῦ νοσεῖν αἷτια τοῖς σώμασιν· μὴ γιγνομένων δὲ ἡ πλειόνων γιγνομένων βλάπτει· ποιεῖ γὰρ ἢ νόσους ἢ τῶν σωμάτων καθαίρεσιν, διὸ καὶ τὰ λευκὰ συνεχῶς γιγνόμενα καὶ πλεονάζοντα τὴν αὔξησιν ἀφαιρεῖται τῶν παιδίων.

Ἐξ ἀνάγκης μὲν οὖν ἡ περίττωσις αὕτη γίνεταί τοις θήλεσι διὰ τὰς εἰρημένας αἰτίας· μὴ δυναμένης τε γὰρ πέττειν τῆς φύσεως ἀνάγκη περίττωμα γίνεσθαι μὴ μόνον τῆς ἀχρήστου τροφῆς ἀλλὰ καὶ τοῦ αἵματος> ἐν ταῖς φλεψίν, ὑπερβάλλειν τε πληθύνοντα κατὰ τὰς λεπτοτάτας φλέβας. ἔνεκα (738b.) δὲ τοῦ βελτίονος καὶ τοῦ τέλους ἡ φύσις καταχρῆται πρὸς τὸν τόπον τοῦτον τῆς γενέσεως χάριν ὅπως οἷον ἔμελλε τοιοῦτον γένηται ἕτερον· ἥδη γὰρ ὑπάρχει δυνάμει γε ὃν τοιοῦτον οἶον ἐστὶ σώματος ἀπόκρισις.

Τοῖς μὲν οὖν θήλεσιν ἅπασιν ἀναγκαῖον γίνεσθαι περίττωμα, τοῖς μὲν αἱματικοῖς πλεῖον καὶ τούτων ἀνθρώπῳ πλεῖστον· ἀνάγκη δὲ καὶ τοῖς ἄλλοις ἀθροίζεσθαί τινα σύστασιν εἰς τὸν ὑστερικὸν τόπον. τὸ δ' αἷτιον ὅτι τοῖς θ' αἱματικοῖς πλεῖον καὶ τούτων ὅτι πλεῖστον τοῖς ἀνθρώποις εἴρηται πρότερον. τοῦ δ' ἐν μὲν τοῖς θήλεσι πᾶσιν ὑπάρχειν περίττωμα τοιοῦτον, ἐν δὲ τοῖς ἄρρεσι μὴ πᾶσιν-ἐνία γὰρ οὐ προῖεται γονήν, ἀλλ' ὥσπερ τὰ προῖεμένα τῇ ἐν τῇ γονῇ κινήσει

δημιουργεῖ τὸ συνιστάμενον ἐκ τῆς ἐν τοῖς θήλεσιν ὕλης, οὕτω τὰ τοιαῦτα [ἐν] τῇ ἐν αὐτοῖς κινήσει ἐν τῷ μορίῳ τούτῳ ὅθεν ἀποκρίνεται τὸ σπέρμα ταῦτό ποιεῖ καὶ συνίστησιν. τοῦτο δ' ἐστὶν ὁ τόπος ὁ περὶ τὸ ὑπόζωμα πᾶσι τοῖς ἔχουσιν· ἀρχὴ γὰρ τῆς φύσεως ἡ καρδιά καὶ τὸ ἀνάλογον, τὸ δὲ κάτω προσθήκη καὶ τούτου χάριν. - αἴτιον δὴ τοῦ τοῖς μὲν ἄρρεσι μὴ πᾶσιν εἶναι περίττωμα γεννητικὸν τοῖς δὲ θήλεσι πᾶσιν, ὅτι τὸ ζῶον σῶμα ἔμψυχόν ἐστιν. ἀεὶ δὲ παρέχει τὸ μὲν θῆλυ τὴν ὕλην τὸ δ' ἄρρεν τὸ δημιουργοῦν· ταύτην γὰρ αὐτῶν φαμεν ἔχειν τὴν δύναμιν ἐκάτερον, καὶ τὸ εἶναι τὸ μὲν θῆλυ τὸ δ' ἄρρεν τοῦτο. ὥστε τὸ μὲν θῆλυ ἀναγκαῖον παρέχειν σῶμα καὶ ὄγκον, τὸ δ' ἄρρεν οὐκ ἀναγκαῖον· οὔτε γὰρ τὰ ὄργανα ἀνάγκη ἐνυπάρχειν ἐν τοῖς γιγνομένοις οὔτε τὸ ποιοῦν. ἔστι δὲ τὸ μὲν σῶμα ἐκ τοῦ θήλεος ἡ δὲ ψυχὴ ἐκ τοῦ ἄρρενος· ἡ γὰρ ψυχὴ οὐσία σώματός τινός ἐστιν. καὶ διὰ τοῦτο ὅσα τῶν μὴ ὁμογενῶν μίγνυται θῆλυ καὶ ἄρρεν (μίγνυται δὲ ὧν ἴσοι οἱ χρόνοι καὶ ἐγγὺς αἱ κυήσεις, καὶ τὰ μεγέθη τῶν σωμάτων μὴ πολὺ διέστηκεν), τὸ μὲν πρῶτον κατὰ τὴν ὁμοιότητα γίγνεται κοινὸν ἀμφοτέρων, οἷον τὰ γιγνόμενα ἐξ ἀλώπεκος καὶ κυνὸς καὶ πέρδικος καὶ ἀλεκτρυόνος, προϊόντος δὲ τοῦ χρόνου καὶ ἐξ ἐτέρων ἕτερα γιγνόμενα τέλος ἀποβαίνει κατὰ τὸ θῆλυ τὴν μορφήν, ὥσπερ τὰ σπέρματα τὰ ξενικὰ κατὰ τὴν χώραν· αὕτη γὰρ ἡ τὴν ὕλην παρέχουσα καὶ τὸ σῶμα τοῖς σπέρμασιν ἐστίν. καὶ διὰ τοῦτο τοῖς μὲν θήλεσι τὸ μόριον τὸ δεκτικὸν οὐ πόρος ἐστίν, ἀλλ' ἔχουσι διάστασιν αἰ (739a.) ὑστέραι· τοῖς δ' ἄρρεσι πόροι τοῖς σπέρμα προἰεμένοις, ἄναιμοι δ' οὗτοι.

Τῶν δὲ περιττωμάτων ἕκαστον ἅμα ἐν τε τοῖς οἰκείοις τόποις ἐστὶ καὶ γίγνεται περίττωμα· πρότερον δ' οὐθέν, ἂν μὴ τι βία πολλῇ καὶ παρὰ φύσιν.

Δι' ἣν μὲν οὖν αἰτίαν ἀποκρίνεται τὰ περιττώματα τὰ γεννητικὰ τοῖς ζώοις εἴρηται.

Ὅταν δ' ἔλθῃ τὸ σπέρμα ἀπὸ τοῦ ἄρρενος τῶν σπέρμα προἰεμένων συνίστησι τὸ καθαρώτατον τοῦ περιττώματος-τὸ γὰρ πλεῖστον ἄχρηστον καὶ ἐν τοῖς καταμηνίοις ἐστὶν ὑγρὸν <ὄν>, ὥσπερ καὶ τῆς τοῦ ἄρρενος γονῆς τὸ ὑγρότατον καὶ τῆς εἰσάπαξ προέσεως· καὶ ἡ προτέρα τῆς ὑστέρας ἄγονος μᾶλλον τοῖς πλείστοις· ἐλάττω γὰρ ἔχει θερμότητα ψυχικὴν διὰ τὴν ἀπενίαν, τὸ δὲ πεπεμμένον πάχος ἔχει καὶ σεσωμάτωται μᾶλλον.

Ὅσαις δὲ μὴ γίγνεται θύραζε τις πρόεσις ἢ τῶν γυναικῶν ἢ τῶν

ἄλλων ζώων διὰ τὸ μὴ ἐνυπάρχειν ἄχρηστον περίττωμα πολὺ ἐν τῇ ἀποκρίσει τῇ τοιαύτῃ, τοσοῦτόν ἐστι τὸ ἐγγιγνόμενον ὅσον τὸ ὑπολειπόμενον τοῖς θύραζε προῖεμένοις ζώοις, ὃ συνίστησιν ἢ τοῦ ἄρρενος δύναμις ἢ ἐν τῷ σπέρματι τῷ ἀποκρινομένῳ, ἢ εἰς τὸ ἄρρεν ἐλθόντος τοῦ ἀνάλογον μορίου ταῖς ὑστέραις, ὅπερ ἐν τισι τῶν ἐντόμων φαίνεται συμβαῖνον.

Ὅτι δ' ἡ γιγνομένη ὑγρότης μετὰ τῆς ἡδονῆς τοῖς θήλεσιν οὐδὲν συμβάλλεται εἰς τὸ κύημα εἴρηται πρότερον. μάλιστα δ' ἂν δόξειεν ὅτι καθάπερ τοῖς ἄρρεσι γίγνεται καὶ ταῖς γυναιξὶ νύκτωρ ὃ καλοῦσιν ἐξονειρώττειν. ἀλλὰ τοῦτο σημεῖον οὐθέν· γίγνεται γὰρ καὶ τοῖς νέοις τῶν ἄρρένων τοῖς μέλλουσι μὲν μηθὲν δὲ προῖεμένοις ἢ τοῖς ἔτι προῖεμένοις ἄγονον.

Ἄνευ μὲν οὖν τῆς τοῦ ἄρρενος προέσεως ἐν τῇ συνουσίᾳ ἀδύνατον συλλαβεῖν καὶ ἄνευ τῆς τῶν γυναικείων περιττώσεως ἢ θύραζε προελθούσης ἢ ἐντὸς ἱκανῆς οὔσης. οὐ συμβαινούσης μέντοι τῆς εἰωθυίας γίγνεσθαι τοῖς θήλεσιν ἡδονῆς περὶ τὴν ὁμιλίαν τὴν τοιαύτην συλλαμβάνουσιν, ἂν τύχη ὁ τόπος γ' ὀργῶν καὶ καταβεβηκυῖαι αἱ ὑστέραι κάτω. ἀλλ' ὥς ἐπὶ τὸ πολὺ συμβαίνει ἐκείνως διὰ τὸ μὴ συμμεμυκέναι τὸ στόμα γιγνομένης τῆς ἐκκρίσεως, μεθ' ἧς εἴωθε γίγνεσθαι καὶ τοῖς ἄρρεσιν ἢ ἡδονῇ καὶ ταῖς γυναιξίν· οὕτω δ' ἔχοντος εὐδοεῖται μᾶλλον καὶ τῷ τοῦ ἄρρενος σπέρματι.

Ἡ δ' ἄφεσις οὐκ ἐντὸς γίγνεται καθάπερ οἶονταί τινες (στενὸν γὰρ τὸ στόμα τῶν ὑστερῶν), ἀλλ' εἰς τὸ πρόσθεν οὐπερ τὸ θῆλυ (739b.) προῖεται τὴν ἐν ἐνίαις αὐτῶν ἱκμάδα γιγνομένην, ἐνταῦθα καὶ τὸ ἄρρεν προῖεται [ἐάν τις ἐξικμάσῃ]. ὅτε μὲν οὖν μένει τοῦτον ἔχουσα τὸν τόπον, ὅτε δέ, ἂν τύχη συμμέτρως ἔχουσα καὶ θερμὴ διὰ τὴν κάθαρσιν ἢ ὑστέρα, εἴσω σπᾶ. σημεῖον δέ· καὶ γὰρ τὰ πρόσθετα ὑγρὰ προστεθέντα ἀφαιρεῖται ξηρά· ἔτι δὲ ὅσα τῶν ζώων πρὸς τῷ ὑποζώματι ἔχει τὰς ὑστέρας καθάπερ ὄρνις καὶ τῶν ἰχθύων οἱ ζωοτοκοῦντες, ἀδύνατον ἐκεῖ μὴ σπᾶσθαι τὸ σπέρμα ἀλλ' ἀφεθὲν ἐλθεῖν.

ἔλκει δὲ τὴν γονὴν ὁ τόπος διὰ τὴν θερμότητα τὴν ὑπάρχουσαν. καὶ ἡ τῶν καταμηνίων δὲ ἐκκρισις καὶ συνάθροισις ἐμπυρεύει θερμότητα ἐν τῷ μορίῳ τούτῳ, ὥστε καθάπερ τὰ κωνικὰ τῶν ἀγγείων ὅταν θερμῷ διακλυσθῇ σπᾶ τὸ ὕδωρ εἰς αὐτὰ καταστρεφομένου τοῦ στόματος. καὶ τοῦτον μὲν τὸν τρόπον γίγνεται

σπάσις, ὥς δέ τινες λέγουσι τοῖς ὀργανικοῖς πρὸς τὴν συνουσίαν μορίοις οὐ γίγνεται κατ' οὐθένα τρόπον.

ἀνάπαλιν δὲ συμβαίνει καὶ τοῖς λέγουσι προῖεσθαι καὶ τὴν γυναικα σπέρμα· προῖεμέναις γὰρ ἔξω συμβαίνει ταῖς ὑστέραις πάλιν εἴσω σπᾶν, εἴπερ μιχθήσεται τῇ γονῇ τῇ τοῦ ἄρρενος. τὸ δ' οὕτω γίγνεσθαι περίεργον, ἡ δὲ φύσις οὐδὲν ποιεῖ περίεργον.

Ὅταν δὲ συστήῃ ἡ ἐν ταῖς ὑστέραις ἀπόκρισις τοῦ θήλεος ὑπὸ τῆς τοῦ ἄρρενος γονῆς, παραπλήσιον ποιούσης ὥσπερ ἐπὶ τοῦ γάλακτος τῆς πυετίας· καὶ γὰρ ἡ πυετία γάλα ἐστὶ θερμότητα ζωτικὴν ἔχον ἢ τὸ ὅμοιον εἰς ἓν ἄγει καὶ συνίστησι, καὶ ἡ γονὴ πρὸς τὴν τῶν καταμηνίων φύσιν ταῦτὸ πέπονθεν· ἡ γὰρ αὕτῃ φύσις ἐστὶ γάλακτος καὶ καταμηνίων-συνιόντος δὴ τοῦ σωματώδους ἐκκρίνεται τὸ ὑγρὸν καὶ περιστάνται κύκλῳ ξηρανομένων τῶν γενηρῶν ὑμένες, καὶ ἐξ ἀνάγκης καὶ ἔνεκά τινος· καὶ γὰρ θερμαινομένων ξηραίνεσθαι ἀναγκαῖον τὰ ἔσχατα καὶ ψυχομένων, καὶ δεῖ μὴ ἐν ὑγρῷ τὸ ζῶον εἶναι ἀλλὰ κεχωρισμένον. καλοῦνται δὲ τούτων οἱ μὲν ὑμένες τὰ δὲ χόρια, διαφέροντα τῷ μᾶλλον καὶ ἥττον· ὁμοίως δ' ἐνυπάρχουσιν ἐν τε τοῖς ὠοτόκοις ταῦτα καὶ τοῖς ζωοτόκοις.

Ὅταν δὲ συστήῃ τὸ κύημα ἤδη παραπλήσιον ποιεῖ τοῖς σπειρομένοις. ἡ μὲν γὰρ ἀρχὴ καὶ ἐν τοῖς σπέρμασιν ἐν αὐτοῖς ἐστὶν ἡ πρώτη· ὅταν δ' αὕτῃ ἀποκριθῇ ἐνοῦσα δυνάμει πρότερον, ἀπὸ ταύτης ἀφίεται ὁ τε βλαστὸς καὶ ἡ ρίζα. αὕτῃ δ' ἐστὶν ἡ τὴν τροφὴν (740a.) λαμβάνει· δεῖται γὰρ αὐξήσεως τὸ φυτόν. οὕτω καὶ ἐν τῷ κυήματι τρόπον τινὰ πάντων ἐνόντων τῶν μορίων δυνάμει ἡ ἀρχὴ πρὸ ὁδοῦ μάλιστα ἐνυπάρχει. διὸ ἀποκρίνεται πρῶτον ἡ καρδία ἐνεργεία. καὶ τοῦτο οὐ μόνον ἐπὶ τῆς αἰσθήσεως δῆλον (συμβαίνει γὰρ οὕτως) ἀλλὰ καὶ ἐπὶ τοῦ λόγου· ὅταν γὰρ ἀπ' ἀμφοῖν ἀποκριθῇ δεῖ αὐτὸ αὐτὸ διοικεῖν τὸ γενόμενον καθάπερ ἀποικισθὲν τέκνον ἀπὸ πατρός. ὥστε δεῖ ἀρχὴν ἔχειν ἀφ' ἧς καὶ ὕστερον ἡ διακόσμησις τοῦ σώματος γίγνεται τοῖς ζώοις. εἰ γὰρ ἔξωθὲν ποτ' ἔσται καὶ ὕστερον ἐνεσομένη οὐ μόνον διαπορήσειεν ἂν τις τὸ πότε, ἀλλ' ὅτι ἀνάγκη, ὅταν ἕκαστον χωρίζηται τῶν μορίων, ταύτην ὑπάρχειν πρῶτον ἐξ ἧς καὶ ἡ αὐξήσις ὑπάρχει καὶ ἡ κίνησις τοῖς ἄλλοις μορίοις. διόπερ ὅσοι λέγουσιν, ὥσπερ Δημόκριτος, τὰ ἔξω πρῶτον διακρίνεσθαι τῶν ζώων, ὕστερον δὲ τὰ ἐντός, οὐκ ὀρθῶς λέγουσιν, ὥσπερ ξυλίνων ἢ λιθίνων ζώων· τὰ μὲν γὰρ τοιαῦτ' οὐκ ἔχει ἀρχὴν ὅλως, τὰ δὲ ζῶα πάντ' ἔχει καὶ ἐντός ἔχει. διὸ πρῶτον ἡ καρδία φαίνεται διωρισμένη

πᾶσι τοῖς ἐναίμοις· ἀρχὴ γὰρ αὕτη καὶ τῶν ὁμοιομερῶν καὶ τῶν ἀνομοιομερῶν. ἤδη γὰρ ἀρχὴν ταύτην ἄξιον ἀκοῦσαι τοῦ ζώου καὶ τοῦ συστήματος ὅταν δέηται τροφῆς· τὸ γὰρ δὴ ὄν αὐξάνεται. τροφή δὲ ζώου ἢ ἐσχάτη αἷμα καὶ τὸ ἀνάλογον, τούτων δ' ἀγγεῖον αἱ φλέβες· διὸ ἡ καρδιά καὶ τούτων ἀρχή. δῆλον δὲ τοῦτο ἐκ τῶν ιστοριῶν καὶ τῶν ἀνατομῶν.

Ἐπεὶ δὲ δυνάμει μὲν ἤδη ζῶον ἀτελὲς δέ, ἄλλοθεν ἀναγκαῖον λαμβάνειν τὴν τροφήν· διὸ χρῆται τῇ ὑστέρα καὶ τῇ ἐχούσῃ ὥσπερ γῆ φυτόν, τοῦ λαμβάνειν τροφήν ἕως ἂν τελεωθῇ πρὸς τὸ εἶναι ἤδη ζῶον δυνάμει πορευτικόν. διὸ ἐκ τῆς καρδίας τὰς δύο φλέβας πρώτας ἢ φύσις ὑπέγραψεν· ἀπὸ δὲ τούτων φλέβια ἀπῆρτηται πρὸς τὴν ὑστέραν ὁ καλούμενος ὀμφαλός. ἔστι γὰρ ὁ ὀμφαλὸς φλέψ, τοῖς μὲν μία τοῖς δὲ πλείους τῶν ζώων. περὶ δὲ ταύτας κέλυφος δερματικὸν [ὁ καλούμενος ὀμφαλός] διὰ τὸ δεῖσθαι σωτηρίας καὶ σκέπης τὴν τῶν φλεβῶν ἀσθένειαν. αἱ δὲ φλέβες οἷον ρίζαι πρὸς τὴν ὑστέραν συνάπτουσι, δι' ὧν λαμβάνει τὸ κύημα τὴν τροφήν. τούτου γὰρ χάριν ἐν ταῖς ὑστέραις μένει τὸ ζῶον, ἀλλ' οὐχ ὡς Δημόκριτός φησιν ἵνα διαπλάττηται τὰ μόρια κατὰ τὰ μόρια τῆς ἐχούσης. τοῦτο γὰρ ἐπὶ τῶν (740b.) ὀστοκούντων φανερόν· ἐκεῖνα γὰρ ἐν τοῖς ὀοῖς λαμβάνει τὴν διάκρισιν κεχωρισμένα τῆς μήτρας.

Απορήσειε δ' ἂν τις εἰ τὸ αἷμα μὲν τροφή ἐστίν, ἡ δὲ καρδιά πρώτη γίγνεται ἔναιμος οὕσα, [τὸ δ' αἷμα τροφή,] ἡ δὲ τροφή θύραθεν, πόθεν εἰσῆλθεν ἡ πρώτη τροφή; ἢ τοῦτ' οὐκ ἀληθὲς ὡς πᾶσα θύραθεν, ἀλλ' εὐθὺς ὥσπερ ἐν τοῖς τῶν φυτῶν σπέρμασιν ἔνεστί τι τοιοῦτον τὸ φαινόμενον πρῶτον γαλακτώδες, οὕτω καὶ ἐν τῇ ὕλῃ τῶν ζώων τὸ περίττωμα τῆς συστάσεως τροφή ἐστίν.

Ἡ μὲν οὖν αὐξησις τῷ κυήματι γίγνεται διὰ τοῦ ὀμφαλοῦ τὸν αὐτὸν τρόπον ὅνπερ διὰ τῶν ριζῶν τοῖς φυτοῖς, καὶ τοῖς ζώοις αὐτοῖς ὅταν ἀπολυθῶσιν ἐκ τῆς ἐν αὐτοῖς τροφῆς· περὶ ὧν ὕστερον λεκτέον κατὰ τοὺς οἰκείους τῶν λόγων καιρούς. ἡ δὲ διάκρισις γίγνεται τῶν μορίων οὐχ ὥς τινες ὑπολαμβάνουσι διὰ τὸ πεφυκέναι φέρεσθαι τὸ ὅμοιον πρὸς τὸ ὅμοιον (πρὸς γὰρ πολλαῖς ἄλλαις αἷς ὁ λόγος οὗτος ἔχει δυσχερεῖαις συμβαίνει χωρὶς ἕκαστον γίνεσθαι τῶν μορίων τῶν ὁμοιομερῶν, οἷον ὅστ' αὐτὰ καὶ νεῦρα καὶ τὰς σάρκας καθ' αὐτάς, εἴ τις ἀποδέξαιτο ταύτην τὴν αἰτίαν)· ἀλλ' ὅτι τὸ περίττωμα τὸ τοῦ θήλεος δυνάμει τοιοῦτόν ἐστιν οἷον φύσει τὸ ζῶον καὶ ἔνεστι δυνάμει τὰ μόρια ἐνεργείᾳ δ' οὐθέν, διὰ ταύτην τὴν αἰτίαν γίγνεται

ἕκαστον αὐτῶν, καὶ ὅτι τὸ ποιητικὸν καὶ τὸ παθητικὸν ὅταν θίγωσιν, ὄν τρόπον ἐστὶ τὸ μὲν ποιητικὸν τὸ δὲ παθητικόν (τὸν δὲ τρόπον λέγω τὸ ὥς καὶ οὗ καὶ ὅτε), εὐθὺς τὸ μὲν ποιεῖ τὸ δὲ πάσχει. ὕλην μὲν οὖν παρέχει τὸ θῆλυ, τὴν δ' ἀρχὴν τῆς κινήσεως τὸ ἄρρεν. ὥσπερ δὲ τὰ ὑπὸ τῆς τέχνης γινόμενα γίνεται διὰ τῶν ὀργάνων- ἔστι δ' ἀληθέστερον εἰπεῖν διὰ τῆς κινήσεως αὐτῶν· αὕτη δ' ἐστὶν ἡ ἐνέργεια τῆς τέχνης, ἡ δὲ τέχνη μορφὴ τῶν γιγνομένων ἐν ἄλλω- οὕτως ἡ τῆς θεραπευτικῆς ψυχῆς δύναμις, ὥσπερ καὶ ἐν αὐτοῖς τοῖς ζώοις καὶ τοῖς φυτοῖς ὕστερον ἐκ τῆς τροφῆς ποιεῖ τὴν αὔξησιν, χρωμένη οἷον ὀργάνοις θερμότητι καὶ ψυχρότητι (ἐν γὰρ τούτοις ἡ κίνησις ἐκείνης, καὶ λόγῳ τινὶ ἕκαστον γίνεται), οὕτω καὶ ἐξ ἀρχῆς συνίστησι τὸ φύσει γινόμενον. ἡ γὰρ αὐτὴ ἐστὶν ὕλη ἣ αὐξάνεται καὶ ἐξ ἧς συνίσταται τὸ πρῶτον, ὥστε καὶ ἡ ποιοῦσα δύναμις ταὐτὸ τῷ ἐξ ἀρχῆς· μείζων δὲ αὕτη ἐστίν. εἰ οὖν αὕτη ἐστὶν ἡ θεραπευτικὴ ψυχὴ, αὕτη ἐστὶ καὶ ἡ γεννώσα· καὶ τοῦτ' ἐστὶν ἡ (741a.) φύσις ἡ ἐκάστου ἐνυπάρχουσα καὶ ἐν φυτοῖς καὶ ἐν ζώοις πᾶσιν, τὰ δ' ἄλλα μόρια τῆς ψυχῆς τοῖς μὲν ὑπάρχει τοῖς δ' οὐχ ὑπάρχει τῶν ζώντων.

Ἐν μὲν οὖν τοῖς φυτοῖς οὐ κεχώρισται τὸ θῆλυ τοῦ ἄρρενος· ἐν δὲ τοῖς ζώοις ἐν οἷς κεχώρισται προσδεῖται τὸ θῆλυ τοῦ ἄρρενος.

Κεφάλαιο 5

Καίτοι τις ἀπορήσειεν ἂν διὰ τίν' αἰτίαν· εἴπερ ἔχει τὸ θῆλυ τὴν αὐτὴν ψυχὴν καὶ ἡ ὕλη τὸ περίττωμα τὸ τοῦ θήλεός ἐστι, τί προσδεῖται τοῦ ἄρρενος ἄλλ' οὐκ αὐτὸ ἐξ αὐτοῦ γεννᾷ τὸ θῆλυ; αἴτιον δ' ὅτι διαφέρει τὸ ζῶον τοῦ φυτοῦ αἰσθήσει· ἀδύνατον δὲ πρόσωπον ἢ χεῖρα ἢ σάρκα εἶναι ἢ ἄλλο τι μόριον μὴ ἐνούσης αἰσθητικῆς ψυχῆς ἢ ἐνεργείᾳ ἢ δυνάμει καὶ ἡ πη ἢ ἀπλῶς· ἔσται γὰρ οἶον νεκρὸς ἢ νεκροῦ μόριον. εἰ οὖν τὸ ἄρρεν ἐστὶ τὸ τῆς τοιαύτης ποιητικὸν ψυχῆς, ὅπου κεχώρισται τὸ θῆλυ καὶ τὸ ἄρρεν ἀδύνατον τὸ θῆλυ αὐτὸ ἐξ αὐτοῦ γεννᾷ ζῶον· τὸ γὰρ εἰρημένον ἦν τὸ ἄρρεν εἶναι· ἐπεὶ ὅτι γ' ἔχει λόγον ἢ λεχθεῖσα ἀπορία φανερόν ἐπὶ τῶν ὀρνίθων τῶν τὰ ὑπηνέμια τικτόντων ὅτι δύναται μέχρι γέ τινος τὸ θῆλυ γεννᾷ. ἔτι δ' ἔχει καὶ τοῦτο ἀπορίαν πῶς τις αὐτῶν τὰ ῥα φήσει ζῆν· οὔτε γὰρ οὕτως ὥς τὰ γόνιμα ῥα ἐνδέχεται (ἐγίγνετο γὰρ ἂν ἐξ αὐτῶν ἐνεργείᾳ ἔμψυχον) οὔθ' οὕτως ὥσπερ ξύλον ἢ λίθος. ἔστι γὰρ καὶ τούτων τῶν ῥων φθορά τις ὥς μετεχόντων τρόπον τινὰ ζωῆς πρότερον. δῆλον οὖν ὅτι ἔχει τινὰ δυνάμει ψυχὴν.

ποῖαν οὖν ταύτην; ἀνάγκη δὴ τὴν ἐσχάτην. αὕτη δ' ἐστὶν ἡ θρεπτική· αὕτη γὰρ ὑπάρχει πᾶσιν ὁμοίως ζῴοις τε καὶ φυτοῖς. διὰ τί οὖν οὐκ ἀποτελεῖ τὰ μόρια καὶ τὸ ζῶον; ὅτι δεῖ αἰσθητικὴν αὐτὰ ἔχειν ψυχὴν· οὐ γάρ ἐστιν ὥσπερ φυτοῦ τὰ μόρια τῶν ζῴων. διὸ δεῖται τῆς τοῦ ἄρρενος κοινωνίας· κεχώρισται γὰρ ἐν τούτοις τὸ ἄρρεν. ὅπερ καὶ συμβαίνει· τὰ γὰρ ὑπηνέμια γίνεταί γόνιμα ἐὰν ἐν τινι καιρῷ τὸ ἄρρεν ἐποχεύσῃ. ἀλλὰ περὶ μὲν τῆς τούτων αἰτίας ὕστερον διορισθήσεται.

Εἰ δ' ἐστὶ τι γένος ὃ θῆλυ μὲν ἐστίν, ἄρρεν δὲ μὴ ἔχει κεχωρισμένον, ἐνδέχεται τοῦτο ζῶον ἐξ αὐτοῦ γεννᾷ. ὅπερ ἀξιόπιστως μὲν οὐ συνῶπται μέχρι γε τοῦ νῦν, ποιεῖ δὲ διστάζειν ἐν τῷ γενεῖ τῶν ἰχθύων· τῶν γὰρ καλουμένων ἐρυθρίνων ἄρρην μὲν οὐθεὶς ὥπται πω, θήλειαι δὲ καὶ κυημάτων πλήρεις. ἀλλὰ τούτων μὲν οὐπω πεῖραν ἔχομεν ἀξιόπιστον· οὔτε δὲ θήλεα οὔτε ἄρρενα καὶ ἐν τῷ τῶν ἰχθύων (741b.) γένει ἐστίν, οἶον αἱ τ' ἐγγέλεις καὶ γένος τι κεστρέων περὶ τοὺς τελματιαίους ποταμούς. ἐν ὅσοις δὲ κεχώρισται τὸ θῆλυ καὶ τὸ ἄρρεν ἀδύνατον αὐτὸ καθ' αὐτὸ τὸ θῆλυ γεννᾷ εἰς τέλος· τὸ γὰρ ἄρρεν μάτην ἂν ἦν, ἡ δὲ φύσις οὐδὲν ποιεῖ μάτην.

διόπερ ἐν τοῖς τοιοῦτοις ἀεὶ τὸ ἄρρεν ἐπιτελεῖ τὴν γένεσιν. ἐμποιεῖ γὰρ τοῦτο τὴν αἰσθητικὴν ψυχὴν ἢ δι' αὐτοῦ ἢ διὰ τῆς γονῆς.

Ἐνυπαρχόντων δ' ἐν τῇ ὕλῃ δυνάμει τῶν μορίων, ὅταν ἀρχὴ γένηται κινήσεως ὥσπερ ἐν τοῖς αὐτομάτοις θαύμασι συνείρεται τὸ ἐφεξῆς· καὶ ὁ βούλονται λέγειν τινὲς τῶν φυσικῶν, τὸ “φέρεσθαι εἰς τὸ ὅμοιον”- λεκτέον οὐχ ὡς τόπον μεταβάλλοντα τὰ μόρια κινεῖσθαι ἀλλὰ μένοντα καὶ ἀλλοιούμενα μαλακότητι καὶ σκληρότητι καὶ χρώμασι καὶ ταῖς ἄλλαις ταῖς τῶν ὁμοιομερῶν διαφοραῖς, γιγνόμενα ἐνεργείᾳ ᾧ ὑπῆρχεν ὄντα δυνάμει πρότερον.

Γίνεται δὲ πρῶτον ἡ ἀρχή. αὕτη δ' ἐστὶν ἡ καρδία τοῖς ἐναίμοις, τοῖς δ' ἄλλοις τὸ ἀνάλογον, ὥσπερ εἴρηται πολλάκις. καὶ τοῦτο φανερόν οὐ μόνον κατὰ τὴν αἴσθησιν ὅτι γίγνεται πρῶτον ἀλλὰ καὶ περὶ τὴν τελευτήν· ἀπολείπει γὰρ τὸ ζῆν ἐντεῦθεν τελευταῖον, - συμβαίνει δ' ἐπὶ πάντων τὸ τελευταῖον γενόμενον πρῶτον ἀπολείπειν τὸ δὲ πρῶτον τελευταῖον, ὥσπερ τῆς φύσεως διανλοδρομούσης καὶ ἀνελιττομένης ἐπὶ τὴν ἀρχὴν ὅθεν ἦλθεν. ἔστι γὰρ ἡ μὲν γένεσις ἐκ τοῦ μὴ ὄντος εἰς τὸ ὄν, ἡ δὲ φθορὰ ἐκ τοῦ ὄντος πάλιν εἰς τὸ μὴ ὄν.

Κεφάλαιο 6

Γίνεται δὲ μετὰ τὴν ἀρχὴν, ὥσπερ ἐλέχθη, τὰ ἐντὸς πρότερον τῶν ἐκτός. φαίνεται δὲ πρότερα τὰ μέγεθος ἔχοντα τῶν ἐλαττόνων, οὐδ' ἓνια γιγνώμενα πρότερον. πρῶτον δὲ τὰ ἄνω διαρθροῦται τοῦ διαζώματος καὶ διαφέρει μεγέθει· τὸ δὲ κάτω καὶ ἔλαττον καὶ ἀδιοριστότερον. καὶ τοῦτο γίγνεται ἐν πᾶσιν ὅσοις τὸ ἄνω καὶ τὸ κάτω διώρισται, πλὴν ἐν τοῖς ἐντόμοις· τούτων δ' ἐν τοῖς σκωληκοτοκουμένοις ἐπὶ τὸ ἄνω ἡ αὔξησις γίγνεται· τὸ γὰρ ἄνω ἐξ ὑπαρχῆς ἔλαττον. ἀδιορίστον δὲ καὶ τὸ ἄνω καὶ τὸ κάτω τοῖς μαλακίοις τῶν πορευτικῶν μόνοις. τὸ δὲ λεχθὲν συμβαίνει καὶ ἐπὶ τῶν φυτῶν, τὸ προτερεῖν τῇ γενέσει τὸ ἄνω κύτος τοῦ κάτωθεν· τὰς γὰρ ρίζας πρότερον ἀφιᾶσι τὰ σπέρματα τῶν πτόρθων.

Διορίζεται δὲ τὰ μέρη τῶν ζώων πνεύματι, οὐ μέντοι οὔτε τῷ τῆς γεννώσης οὔτε τῷ αὐτοῦ καθάπερ τινὲς τῶν (742a.) φυσικῶν φασιν. φανερόν δὲ τοῦτο ἐπὶ τῶν ὀρνίθων καὶ τῶν ἰχθύων καὶ τῶν ἐντόμων· τὰ μὲν γὰρ χωρισθέντα τῆς γεννώσης γίγνεται ἐξ ὧοῦ ἐν ᾧ λαμβάνει τὴν διάρθρωσιν, τὰ δ' ὅλως οὐκ ἀναπνεῖ τῶν ζώων, σκωληκοτοκεῖται δὲ καὶ ὥτοκεῖται· τὰ δ' ἀναπνέοντα καὶ ἐν τῇ μήτρᾳ λαμβάνοντα τὴν διάρθρωσιν οὐκ ἀναπνεῖ πρὶν ἢ ὁ πνεύμων λάβῃ τέλος· διαρθροῦται δὲ καὶ οὗτος καὶ τὰ ἔμπροσθεν μόρια πρὶν ἀναπνεῖν. ἔτι δ' ὅσα πολυσχιδῇ τῶν τετραπόδων, οἷον κύων λέων λύκος ἀλώπηξ θῶς, πάντα τυφλὰ γεννᾶ, καὶ δίσταται τὸ βλέφαρον γενομένων ὕστερον. ὥστε δῆλον ὅτι τὸν αὐτὸν τρόπον καὶ ἐν τοῖς ἄλλοις πᾶσι καθάπερ καὶ τὸ ποιὸν καὶ τὸ ποσὸν γίγνεται δυνάμει προϋπάρχον, ἐνεργεῖα δ' ὕστερον, ὑπὸ τῶν αὐτῶν αἰτίων ὅφ' ὧν περ καὶ τὸ ποιὸν διορίζεται· καὶ γίγνεται δύο ἐξ ἑνός. πνεῦμα δ' ὑπάρχειν ἀναγκαῖον ὅτι ὑγρὸν καὶ θερμόν, τοῦ μὲν ποιοῦντος τοῦ δὲ πάσχοντος.

Τῶν δ' ἀρχαίων τινὲς φυσιολόγων τί μετὰ τί γίγνεται τῶν μορίων ἐπειράθησαν λέγειν, οὐ λίαν ἐμπειρικῶς ἔχοντες τῶν συμβαινόντων. τῶν γὰρ μορίων ὥσπερ καὶ ἐπὶ τῶν ἄλλων πέφυκεν ἕτερον ἐτέρου πρότερον. τὸ δὲ πρότερον ἤδη πολλαχῶς ἐστίν· τό τε γὰρ οὗ ἕνεκα καὶ τὸ τούτου ἕνεκα διαφέρει, καὶ τὸ μὲν τῇ γενέσει πρότερον αὐτῶν ἐστὶ τὸ δὲ τῇ οὐσίᾳ. δύο δὲ διαφορὰς ἔχει καὶ τὸ τούτου ἕνεκα· τὸ μὲν γὰρ ἐστὶν ὅθεν ἡ κίνησις, τὸ δὲ ᾧ χρῆται τὸ οὗ ἕνεκα.

λέγω δ' οἷον τό τε γεννητικόν καί τὸ ὀργανικόν τῷ γεννωμένῳ·
τούτων γάρ τὸ μὲν ὑπάρχειν δεῖ πρότερον, τὸ ποιητικόν, οἷον τὸ
διδάξαν τοῦ μανθάνοντος, τοὺς δ' αὐλοὺς ὕστερον τοῦ μανθάνοντος
αὐλεῖν· περιέργον γὰρ μὴ ἐπισταμένοις αὐλεῖν ὑπάρχειν αὐλοὺς·
τριῶν δ' ὄντων-ένος μὲν τοῦ τέλους ὃ λέγομεν εἶναι οὐ ἔνεκα,
δευτέρου δὲ τῶν τούτου ἔνεκα τῆς ἀρχῆς τῆς κινητικῆς καὶ
γεννητικῆς (τὸ γὰρ ποιητικόν καὶ γεννητικόν, ἧ τοιαῦτα, πρὸς τὸ
ποιούμενόν ἐστι καὶ γεννώμενον), τρίτου δὲ τοῦ χρησίμου καὶ ὃ
χρῆται τὸ τέλος-πρῶτον μὲν ὑπάρχειν ἀναγκαῖόν τι μόριον ἐν ᾧ ἡ
ἀρχὴ τῆς κινήσεως (καὶ γὰρ εὐθὺς τοῦτο τὸ μόριόν ἐστι τοῦ τέλους
ἐν καὶ κυριώτατον), ἔπειτα μετὰ τοῦτο τὸ ὅλον καὶ τὸ τέλος, τρίτον
δὲ καὶ τελευταῖον τὰ ὀργανικὰ τούτοις μέρη πρὸς ἐνίας χρήσεις.

ὥστ' εἴ τι τοιοῦτόν ἐστιν ὅπερ ἀναγκαῖον ὑπάρχειν ἐν τοῖς (742b.)
ζώοις, τὸ πάσης ἔχον τῆς φύσεως ἀρχὴν καὶ τέλος, τοῦτο γίνεσθαι
πρῶτον ἀναγκαῖον, ἧ μὲν κινητικόν πρῶτον, ἧ δὲ μόριον τοῦ τέλους
μετὰ τοῦ ὅλου. ὥστε τῶν μορίων τῶν ὀργανικῶν ὅσα μὲν ἐστι
γεννητικὰ τὴν φύσιν, αἰεὶ πρότερον δεῖ ὑπάρχειν αὐτά (ἄλλου γὰρ
ἔνεκά ἐστιν ὡς ἀρχή), ὅσα δὲ μὴ τοιαῦτα τῶν ἄλλου ἔνεκα ὕστερον.
διὸ οὐ ῥάδιον διελεῖν πότερα πρότερα τῶν μορίων, ὅσα ἄλλου ἔνεκα
ἢ οὐ ἔνεκα ταῦτα. παρεμπίπτει γὰρ τὰ κινητικὰ τῶν μορίων πρότερον
ὄντα τῇ γενέσει τοῦ τέλους, τὰ δὲ κινητικὰ πρὸς τὰ ὀργανικὰ διελεῖν
οὐ ῥάδιον. καίτοι κατὰ ταύτην τὴν μέθοδον δεῖ ζητεῖν τί γίνεται
μετὰ τί· τὸ γὰρ τέλος ἐνίων μὲν ὕστερον ἐνίων δὲ πρότερον. καὶ διὰ
τοῦτο πρῶτον μὲν τὸ ἔχον τὴν ἀρχὴν γίνεται μόριον, εἴτ' ἐχόμενον
τὸ ἄνω κύτος. διὸ τὰ περὶ τὴν κεφαλὴν καὶ τὰ ὄμματα μέγιστα κατ'
ἀρχὰς φαίνεται τοῖς ἐμβρύοις, τὰ δὲ κάτω τοῦ ὀμφαλοῦ, οἷον τὰ
κῶλα, μικρά. τοῦ γὰρ ἄνω τὰ κάτω ἔνεκεν καὶ οὔτε μόρια τοῦ τέλους
οὔτε γεννητικὰ αὐτοῦ.

Οὐ καλῶς δὲ λέγουσιν οὐδὲ τοῦ διὰ τί τὴν ἀνάγκην ὅσοι λέγουσι
ὅτι οὕτως αἰεὶ γίνεται, καὶ ταύτην εἶναι νομίζουσιν ἀρχὴν ἐν αὐτοῖς,
ὥσπερ Δημόκριτος ὁ Ἀβδηρίτης, ὅτι τοῦ μὲν αἰεὶ καὶ ἀπείρου οὐκ
ἐστιν ἀρχή, τὸ δὲ διὰ τί ἀρχή, τὸ δ' αἰεὶ ἄπειρον, ὥστε τὸ ἐρωτᾶν τὸ
διὰ τί περὶ τῶν τοιούτων τινὸς τὸ ζητεῖν εἶναί φησι τοῦ ἀπείρου
ἀρχήν. καίτοι κατὰ τοῦτον τὸν λόγον καθ' ὃν ἀξιούσι τὸ διὰ τί μὴ
ζητεῖν, οὐθενὸς ἀποδείξεις ἔσται τῶν αἰδίων· φαίνεται δ' οὐσα
πολλῶν, τῶν μὲν γιγνομένων αἰεὶ τῶν δ' ὄντων, ἐπεὶ καὶ τὸ τρίγωνον
ἔχειν δυσὶν ὀρθαῖς ἴσας αἰεὶ καὶ τὴν διάμετρον ἀσύμμετρον εἶναι

πρὸς τὴν πλευρὰν αἰδίον, ἀλλ' ὅμως ἐστὶν αὐτῶν αἰτιόν τι καὶ ἀπόδειξις. τὸ μὲν οὖν μὴ πάντων ἀξιοῦν ζητεῖν ἀρχὴν λέγεται καλῶς, τὸ δὲ τῶν ὄντων ἀεὶ καὶ γιγνομένων πάντων οὐ καλῶς, ἀλλ' ὅσαι τῶν αἰδίων ἀρχαὶ τυγχάνουσιν οὕσαι· τῆς γὰρ ἀρχῆς ἄλλη γνῶσις καὶ οὐκ ἀπόδειξις. ἀρχὴ δ' ἐν μὲν τοῖς ἀκινήτοις τὸ τί ἐστίν, ἐν δὲ τοῖς γιγνομένοις ἤδη πλείους-τρόπον δ' ἄλλον καὶ οὐ πᾶσαι τὸν αὐτόν-ὢν μία τὸν ἀριθμὸν ὅθεν ἡ κίνησις ἐστίν. διὸ πάντα τὰ ἔναιμα καρδίαν ἔχει πρῶτον ὥσπερ ἐλέχθη κατ' ἀρχάς· ἐν δὲ τοῖς ἄλλοις τὸ ἀνάλογον γίγνεται τῇ (743a.) καρδίᾳ πρῶτον.

Ἐκ δὲ τῆς καρδίας αἱ φλέβες διατεταμέναι, καθάπερ οἱ τοὺς κανάβους γράφοντες ἐν τοῖς τοίχοις· τὰ γὰρ μέρη περὶ ταύτας ἐστίν, ἅτε γινόμενα ἐκ τούτων. ἡ δὲ γένεσις ἐστὶν τῶν ὁμοιομερῶν ὑπὸ ψύξεως καὶ θερμότητος· συνίσταται γὰρ καὶ πηγνυται τὰ μὲν ψυχρῶ τὰ δὲ θερμῶ. περὶ δὲ τῆς τούτων διαφορᾶς εἴρηται πρότερον ἐν ἑτέροις, ποῖα λυτὰ ὑγρῶ καὶ πυρὶ καὶ ποῖα ἄλυτα ὑγρῶ καὶ ἄτηκτα πυρί. διὰ μὲν οὖν τῶν φλεβῶν καὶ τῶν ἐν ἐκάστοις πόρων διαπιδύουσα ἡ τροφή, καθάπερ ἐν τοῖς ὁμοῖς κεραμίσις τὸ ὕδωρ, γίνονται σάρκες ἢ τὸ ταύταις ἀνάλογον ὑπὸ τοῦ ψυχροῦ συνιστάμεναι, διὸ καὶ λύονται ὑπὸ πυρός. ὅσα δὲ γεγραὰ λίαν τῶν ἀνατελλόντων, ὀλίγην ἔχοντα ὑγρότητα καὶ θερμότητα, ταῦτα δὲ ψυχόμενα ἐξατμίζοντος τοῦ ὑγροῦ μετὰ τοῦ θερμοῦ γίγνεται σκληρὰ καὶ γεώδη τὴν μορφήν, οἷον ὄνυχες καὶ κέρατα καὶ ὅπλα καὶ ῥύγχη· διὸ μαλάττεται μὲν πυρί, τήκεται δ' οὐθέν, ἀλλ' ἔνια τοῖς ὑγροῖς, οἷον τὰ κελύφη τῶν ὥων.

Ὑπὸ δὲ τῆς ἐντὸς θερμότητος τὰ τε νεῦρα καὶ τὰ ὀστέα γίγνεται ξηρανομένης τῆς ὑγρότητος. διὸ καὶ ἄλυτά ἐστι τὰ ὀστέα ὑπὸ τοῦ πυρὸς καθάπερ κέραμος· οἷον γὰρ ἐν καμίνῳ ὠπτημένα ἐστὶν ὑπὸ τῆς ἐν τῇ γενέσει θερμότητος. αὕτη δὲ οὔτε ὅ τι ἔτυχε ποιεῖ σάρκα ἢ ὀστοῦν οὔθ' ὅπου ἔτυχε οὔθ' ὁπότ' ἔτυχε, ἀλλὰ τὸ πεφυκὸς καὶ οὐ πέφυκε καὶ ὅτε πέφυκεν. οὔτε γὰρ τὸ δυνάμει ὄν ὑπὸ τοῦ μὴ τὴν ἐνέργειαν ἔχοντος κινητικοῦ ἔσται, οὔτε τὸ τὴν ἐνέργειαν ἔχον ποιήσει ἐκ τοῦ τυχόντος, ὥσπερ οὔτε κιβωτὸν μὴ ἐκ ξύλου ὁ τέκτων ποιήσειεν ἄν, οὔτ' ἄνευ τούτου κιβωτὸς ἔσται ἐκ τῶν ξύλων.

Ἡ δὲ θερμότης ἐνυπάρχει ἐν τῷ σπερματικῷ περιττώματι τοσαύτην καὶ τοιαύτην ἔχουσα τὴν κίνησιν καὶ τὴν ἐνέργειαν ὅση σύμμετρος εἰς ἕκαστον τῶν μορίων. καθ' ὅσον δ' ἂν ἐλλείπει ἢ υπερβάλλῃ ἢ χειρόν ἀποτελεῖ ἢ ἀνάπηρον τὸ γινόμενον,

παραπλησίως τοῖς ἔξω συνισταμένοις διὰ τῆς ἐψήσεως πρὸς τροφῆς ἀπόλαυσιν ἢ τινα ἄλλην ἐργασίαν. ἀλλ' ἐνταῦθα μὲν ἡμεῖς τὴν τῆς θερμότητος συμμετρίαν εἰς τὴν κίνησιν παρασκευάζομεν, ἐκεῖ δὲ δίδωσιν ἡ φύσις ἡ τοῦ γεννῶντος. τοῖς δὲ αὐτομάτως γιγνομένοις ἡ τῆς ὥρας αἰτία κίνησις καὶ θερμότης.

Ἡ δὲ ψύξις στέρησις θερμότητός ἐστιν. χρῆται δ' ἀμφοτέροις ἡ φύσις ἔχουσι μὲν δύναμιν ἐξ ἀνάγκης ὥστε (743b.) τὸ μὲν τοδὶ τὸ δὲ τοδὶ ποιεῖν, ἐν μέντοι τοῖς γιγνομένοις ἕνεκά τινος συμβαίνει τὸ μὲν ψύχειν αὐτῶν τὸ δὲ θερμαίνειν καὶ γίνεσθαι τῶν μορίων ἕκαστον, τὴν μὲν σάρκα μαλακὴν τῇ μὲν ἐξ ἀνάγκης ποιούντων τοιαύτην τῇ δ' ἕνεκά τινος, τὸ δὲ νεῦρον ξηρὸν καὶ ἐλκτὸν τὸ δ' ὅστουν ξηρὸν καὶ θραυστόν.

Τὸ δὲ δέρμα ξηραίνομένης τῆς σαρκὸς γίγνεται καθάπερ ἐπὶ τοῖς ἐψήμασιν ἡ καλουμένη γραῦς. οὐ μόνον δὲ διὰ τὸ ἔσχατον συμβαίνει αὐτοῦ ἡ γένεσις ἀλλὰ καὶ διότι ἐπιπολάζει τὸ γλίσχρον διὰ τὸ μὴ δύνασθαι ἐξατμίζειν. ἐν μὲν οὖν τοῖς ἄλλοις αὐχμηρὸν τὸ γλίσχρον (διὸ ὀστρακόδερμα καὶ μαλακόστρακα τὰ ἔσχατά ἐστι τῶν ἀναίμων ζώων), ἐν δὲ τοῖς ἐναίμοις τὸ γλίσχρον λιπαρώτερόν ἐστιν. καὶ τούτων ὅσα μὴ γεώδη τὴν φύσιν ἔχει λίαν, ἀθροίζεται τὸ πιμελῶδες ὑπὸ τὴν τοῦ δέρματος σκέπην, ὥς τοῦ δέρματος γιγνομένου ἐκ τῆς τοιαύτης γλισχρότητος· ἔχει γάρ τινα γλισχρότητα τὸ λιπαρόν. πάντα δὲ ταῦτα, καθάπερ εἶπομεν, λεκτέον γίνεσθαι τῇ μὲν ἐξ ἀνάγκης τῇ δ' οὐκ ἐξ ἀνάγκης ἀλλ' ἕνεκά τινος.

Πρῶτον μὲν οὖν τὸ ἄνω κύτος ἀφορίζεται κατὰ τὴν γένεσιν, τὸ δὲ κάτω προϊόντος τοῦ χρόνου λαμβάνει τὴν αὔξησιν ἐν τοῖς ἐναίμοις. ἅπαντα δὲ ταῖς περιγραφαῖς διορίζεται πρότερον, ὕστερον δὲ λαμβάνει τὰ χρώματα καὶ τὰς μαλακότητας καὶ τὰς σκληρότητας, ἀτεχνῶς ὥσπερ ἂν ὑπὸ ζωγράφου τῆς φύσεως δημιουργούμενα· καὶ γὰρ οἱ γραφεῖς ὑπογράψαντες ταῖς γραμμαῖς οὕτως ἐναλείφουσι τοῖς χρώμασι τὸ ζῶον.

Διὰ μὲν οὖν τὸ τὴν ἀρχὴν ἐν τῇ καρδίᾳ τῶν αἰσθήσεων εἶναι καὶ τοῦ ζώου παντὸς αὕτη γίγνεται πρῶτον, -διὰ δὲ τὴν θερμότητα τὴν ταύτης, ἣ τελευτῶσιν αἱ φλέβες ἄνω, τὸ ψυχρὸν συνίστησιν ἀντίστροφον τῇ θερμότητι τῇ περὶ τὴν καρδίαν τὸν ἐγκέφαλον. διόπερ τὰ περὶ τὴν κεφαλὴν λαμβάνει συνεχῇ τὴν γένεσιν μετὰ τὴν καρδίαν, καὶ μεγέθει τῶν ἄλλων διαφέρει· πολὺς γὰρ καὶ ὑγρὸς ἐξ ἀρχῆς ὁ ἐγκέφαλος.

Ἔχει δ' ἀπορίαν τὸ περὶ τοὺς ὀφθαλμοὺς συμβαῖνον τῶν ζώων. μέγιστοι μὲν γὰρ ἐξ ἀρχῆς φαίνονται καὶ πεζοῖς καὶ πλωτοῖς καὶ πτηνοῖς, τελευταῖοι δὲ συνίστανται τῶν μορίων· ἐν τῷ μεταξὺ γὰρ χρόνῳ συμπίπτουσιν. αἴτιον δ' ὅτι τὸ τῶν ὀφθαλμῶν αἰσθητήριόν ἐστι μὲν, ὥσπερ καὶ τὰ ἄλλα αἰσθητήρια, ἐπὶ πόρων· ἀλλὰ τὸ μὲν τῆς ἀφῆς καὶ (744a.) γεύσεως εὐθύς ἐστιν ἡ σῶμα ἢ τοῦ σώματός τι τῶν ζώων, ἡ δ' ὄσφρησις καὶ ἡ ἀκοὴ πόροι συνάπτοντες πρὸς τὸν ἀέρα τὸν θύραθεν, πλήρεις συμφύτου πνεύματος, περαίνοντες δὲ πρὸς τὰ φλέβια τὰ περὶ τὸν ἐγκέφαλον τείνοντα ἀπὸ τῆς καρδίας· ὁ δ' ὀφθαλμὸς σῶμα μόνον ἴδιον ἔχει τῶν αἰσθητηρίων. ἔστι δ' ὑγρὸν καὶ ψυχρὸν καὶ οὐ προϋπάρχον ἐν τῷ τόπῳ-καθάπερ καὶ τὰ ἄλλα μόρια δυνάμει, ἔπειτ' ἐνεργείᾳ γιγνόμενα ὕστερον-ἀλλ' ἀπὸ τῆς περὶ τὸν ἐγκέφαλον ὑγρότητος ἀποκρίνεται τὸ καθαρώτατον διὰ τῶν πόρων οἷ φαίνονται φέροντες ἀπ' αὐτῶν πρὸς τὴν μήνιγγα τὴν περὶ τὸν ἐγκέφαλον. τούτου δὲ τεκμήριον· οὔτε γὰρ ἄλλο μόριον ὑγρὸν καὶ ψυχρὸν ἐστιν ἐν τῇ κεφαλῇ παρὰ τὸν ἐγκέφαλον, τό τ' ὅμμα ψυχρὸν καὶ ὑγρὸν. ἐξ ἀνάγκης οὖν ὁ τόπος λαμβάνει μέγεθος τὸ πρῶτον, συμπίπτει δ' ὕστερον.

καὶ γὰρ περὶ τὸν ἐγκέφαλον συμβαίνει τὸν αὐτὸν τρόπον· τὸ γὰρ πρῶτον ὑγρὸς καὶ πολὺς, ἀποπνέοντος δὲ καὶ πεττομένου σωματοῦταί τε μᾶλλον καὶ συμπίπτει καὶ ὁ ἐγκέφαλος [καὶ τὰ σώματα] καὶ τὸ μέγεθος τὸ τῶν ὀμμάτων. ἐξ ἀρχῆς δὲ διὰ μὲν τὸν ἐγκέφαλον ἡ κεφαλὴ μεγίστη, διὰ δὲ τὸ ὑγρὸν τὸ ἐν τοῖς ὅμμασιν οἱ ὀφθαλμοὶ μεγάλοι φαίνονται. τελευταῖοι δὲ λαμβάνουσι τέλος διὰ τὸ καὶ τὸν ἐγκέφαλον συνίστασθαι μόλις· ὁψὲ γὰρ παύεται τῆς ψυχρότητος καὶ τῆς ὑγρότητος, ἐπὶ πάντων μὲν τῶν ἐχόντων, μάλιστα δ' ἐπὶ τῶν ἀνθρώπων. διὰ γὰρ τοῦτο καὶ τὸ βρέγμα τῶν ὀστέων γίγνεται τελευταῖον· ἤδη γὰρ γεγεννημένων θύραζε τῶν ἐμβρύων μαλακόν ἐστι τοῦτο τὸ ὅστωι τοῖς παιδίοις. αἴτιον δὲ τοῦ μάλιστ' ἐπὶ τῶν ἀνθρώπων τοῦτο συμβαίνειν ὅτι τὸν ἐγκέφαλον ὑγρότατον ἔχουσι καὶ πλεῖστον τῶν ζώων, τούτου δ' αἴτιον ὅτι καὶ τὴν ἐν τῇ καρδίᾳ θερμότητα καθαρωτάτην.

δηλοῖ δὲ τὴν εὐκρασίαν ἡ διάνοια· φρονιμώτατον γὰρ ἐστι τῶν ζώων ἄνθρωπος. ἀκρατῇ δὲ καὶ τὰ παιδιά μέχρι πόρρω τῆς κεφαλῆς ἐστι διὰ τὸ βάρος τὸ περὶ τὸν ἐγκέφαλον.

ὁμοίως δὲ καὶ τῶν μορίων ὅσα δεῖ κινεῖν· ἡ γὰρ ἀρχὴ τῆς κινήσεως ὁψὲ κρατεῖ τῶν ἄνωθεν καὶ τελευταίων ὅσων ἡ κίνησις μὴ

συνήρτηται πρὸς αὐτήν, ὥσπερ τῶν κώλων. τοιοῦτον δ' ἐστὶ μῦριον τὸ βλέφαρον. ἐπεὶ δ' οὐθὲν ποιεῖ περίεργον οὐδὲ μάτην ἢ φύσις δηλὸν ὡς οὐδ' ὕστερον οὐδὲ πρότερον· ἔσται γὰρ τὸ γεγονὸς ἢ μάτην ἢ περίεργον. ὥσθ' ἅμ' ἀνάγκη τὰ (744b.) βλέφαρα διαχωρίζεσθαι τε καὶ δύνασθαι κινεῖν. ὁπὲ μὲν οὖν διὰ τὸ πλῆθος τῆς περὶ τὸν ἐγκέφαλον πέψεως τελειοῦται τὰ ὄμματα τοῖς ζώοις, τελευταῖα δὲ διὰ τὸ σφόδρα κρατούσης τῆς κινήσεως εἶναι τὸ κινεῖν καὶ τὰ οὕτω πόρρω τῆς ἀρχῆς καὶ ἀπεψυγμένα τῶν μορίων. δηλοῖ δὲ τὰ βλέφαρα τοιαύτην ἔχοντα τὴν φύσιν· ἂν γὰρ καὶ ὅποσονοῦν βάρος γένηται περὶ τὴν κεφαλὴν δι' ὕπνον ἢ μέθην ἢ ἄλλο τι τῶν τοιούτων οὐ δυνάμεθα τὰ βλέφαρα αἶρειν, οὕτω βάρος αὐτῶν ἐχόντων μικρόν. περὶ μὲν οὖν ὀφθαλμῶν εἴρηται πῶς γίνονται καὶ δι' ὃ τι καὶ διὰ τίν' αἰτίαν τελευταίαν λαμβάνουσι τὴν διάρθρωσιν.

Τῶν δ' ἄλλων γίνγεται μορίων ἕκαστον ἐκ τῆς τροφῆς, τὰ μὲν τιμιώτατα καὶ μετεिल्ηφότα τῆς κυριωτάτης ἀρχῆς ἐκ τῆς πεπεμμένης καὶ καθαρωτάτης καὶ πρώτης τροφῆς, τὰ δ' ἀναγκαῖα μύρια καὶ τούτων ἔνεκεν ἐκ τῆς χείρονος καὶ τῶν ὑπολειμμάτων καὶ περιττωμάτων. ὥσπερ γὰρ οἰκονόμος ἀγαθὸς καὶ ἡ φύσις οὐθὲν ἀποβάλλειν εἴωθεν ἐξ ὧν ἔστι ποιῆσαι τι χρηστόν. ἐν δὲ ταῖς οἰκονομίαις τῆς γιγνομένης τροφῆς ἢ μὲν βελτίστη τέτακται τοῖς ἐλευθέροις, ἢ δὲ χείρων καὶ τὸ περίττωμα ταύτης <τοῖς> οἰκέταις, τὰ δὲ χείριστα καὶ τοῖς συντρεφομένοις διδόασι ζώοις. καθάπερ οὖν εἰς τὴν αὐξῆσιν ὁ ἴθῦραθεν ταῦτα ποιεῖ νοῦς οὕτως ἐν τοῖς γιγνομένοις αὐτοῖς ἢ φύσις ἐκ μὲν τῆς καθαρωτάτης ὕλης σάρκας καὶ τῶν ἄλλων αἰσθητηρίων τὰ σώματα συνίστησιν, ἐκ δὲ τῶν περιττωμάτων ὅσα καὶ νεῦρα καὶ τρίχας, ἔτι δ' ὄνυχας καὶ ὀπλὰς καὶ πάντα τὰ τοιαῦτα· διὸ τελευταῖα ταῦτα λαμβάνει τὴν σύστασιν ὅταν ἤδη γίγνηται περίττωμα τῆς φύσεως.

Ἡ μὲν οὖν τῶν ὁσίων φύσις ἐν τῇ πρώτῃ συστάσει γίγνεται τῶν μορίων ἐκ τῆς σπερματικῆς περιττώσεως, καὶ τῶν ζώων αὐξανομένων ἐκ τῆς φυσικῆς τροφῆς λαμβάνει τὴν αὐξῆσιν ἐξ ἧσπερ τὰ μύρια τὰ κύρια, ταύτης μέντοι αὐτῆς τὰ ὑπολείμματα καὶ τὰ περιττωματικά. γίγνεται γὰρ ἐν παντὶ τὸ πρῶτον καὶ τὸ δεύτερον τῆς τροφῆς, τὸ μὲν θρεπτικὸν τὸ δ' αὐξητικόν· θρεπτικὸν μὲν ὃ τὸ εἶναι παρέχεται τῷ τε ὄλῳ καὶ τοῖς μορίοις, αὐξητικὸν δὲ τὸ εἰς μέγεθος ποιοῦν τὴν ἐπίδοσιν· περὶ ὧν ὕστερον διοριστέον μᾶλλον. τὸν αὐτὸν δὲ τρόπον τοῖς ὁστοῖς καὶ τὰ νεῦρα συνίσταται καὶ ἐκ τῶν αὐτῶν, ἐκ

τῆς σπερματικῆς περιττώσεως καὶ τῆς θρεπτικῆς.

(745a.) ὄνυχες δὲ καὶ τρίχες καὶ ὄπλα καὶ κέρατα καὶ ῥύγχη καὶ τὰ πληκτρα τῶν ὀρνίθων καὶ εἴ τι τοιοῦτον ἑτερόν ἐστι μόνιον ἐκ τῆς ἐπικτητοῦ τροφῆς καὶ τῆς αὐξητικῆς, ἣν τε παρὰ τοῦ θήλεος ἐπικτᾶται καὶ [τῆς] θύραθεν. καὶ διὰ τοῦτο τὰ μὲν ὅστᾳ μέχρι τινὸς λαμβάνει τὴν αὐξησιν· ἔστι γάρ τι πᾶσι τοῖς ζώοις πέρας τοῦ μεγέθους, διὸ καὶ τῆς τῶν ὀστέων αὐξήσεως. εἰ γὰρ ταῦτ' εἶχεν αὐξησιν ἀεὶ καὶ τῶν ζώων ὅσα ἔχει ὅστουν ἢ τὸ ἀνάλογον ηὐξάνετ' ἂν ἕως ἑξῆ· τοῦ γὰρ μεγέθους ὅρος ἐστὶ ταῦτα τοῖς ζώοις. δι' ἣν μὲν οὖν αἰτίαν οὐκ ἀεὶ λαμβάνουσιν αὐξησιν λεκτέον ὕστερον· τρίχες δὲ καὶ τὰ συγγενῆ τούτοις ἕως ἂν ὑπάρχωσιν αὐξάνονται, καὶ μᾶλλον ἐν νόσοις καὶ τῶν σωμάτων γηρασκόντων καὶ φθινόντων διὰ τὸ λείπεσθαι περίττωμα πλεῖον, ἐλάττονος εἰς τὰ κύρια δαπανωμένου διὰ τὸ γῆρας καὶ τὰς νόσους, ἐπεὶ γ' ὅταν ὑπολείπη καὶ τοῦτο διὰ τὴν ἡλικίαν καὶ αἱ τρίχες ὑπολείπουσιν. τὰ δ' ὅστᾳ τὸναντίον· συμφθίνει γὰρ τῷ σώματι καὶ τοῖς μέρεσιν. αὐξάνονται δ' αἱ τρίχες καὶ τεθνεώτων, οὐ μέντοι γίνονται γ' ἐξ ὑπαρχῆς.

Περὶ δ' ὀδόντων ἀπορήσειεν ἂν τις. εἰσὶ γὰρ τὴν μὲν φύσιν τὴν αὐτὴν ἔχοντες τοῖς ὅστοις καὶ γίνονται ἐκ τῶν ὀστέων, ὄνυχες δὲ καὶ τρίχες καὶ κέρατα καὶ τὰ τοιαῦτα ἐκ τοῦ δέρματος, διὸ καὶ συμμεταβάλλουσι τῷ δέρματι τὰς χροάς· λευκά τε γὰρ καὶ μέλανα γίνονται καὶ παντοδαπὰ κατὰ τὴν τοῦ δέρματος χροάν, οἱ δ' ὀδόντες οὐθέν· ἐκ γὰρ τῶν ὀστέων εἰσιν, ὅσα γε τῶν ζώων ἔχει ὀδόντας καὶ ὅστᾳ. αὐξάνονται δὲ διὰ βίου μόνοι τῶν ἄλλων ὀστέων· τοῦτο δὲ δῆλον ἐπὶ τῶν παρακλινόντων ὀδόντων τὴν ἀφὴν τὴν ἀλλήλων.

αἴτιον δὲ τῆς αὐξήσεως ὥς μὲν ἕνεκά του διὰ τὸ ἔργον· ταχὺ γὰρ ἂν κατετρίβοντο μὴ γιγνομένης τινὸς ἐπιρρύσεως, ἐπεὶ καὶ νῦν ἐνίοις γηράσκουσι τοῖς βρωτικοῖς μὲν μὴ μεγάλους δ' ἔχουσι κατατρίβονται πάμπαν· πλείονι γὰρ λόγῳ καθαιροῦνται τῆς αὐξήσεως. διὸ καὶ τοῦτο εὖ μεμηγάνηται πρὸς τὸ συμβαῖνον ἢ φύσις· συνάγει γὰρ εἰς τὸ γῆρας καὶ τὴν τελευτὴν τὴν ὑπόλειψιν τῶν ὀδόντων. εἰ δ' ἦν μυριετής ὁ βίος ἢ χιλιετής, παμμεγέθεις τ' ἂν ἔδει γίγνεσθαι τοὺς ἐξ ἀρχῆς καὶ φύεσθαι πολλάκις· καὶ γὰρ εἰ συνεχῇ τὴν (745b.) αὐξησιν εἶχον, ὅμως ἂν ἄχρηστοι λεαινόμενοι πρὸς τὴν ἐργασίαν ἦσαν. οὐ μὲν οὖν ἕνεκα λαμβάνουσιν τὴν αὐξησιν εἴρηται· συμβαίνει δὲ μηδὲ τὴν αὐτὴν ἔχειν φύσιν τοῖς ἄλλοις ὅστοις τοὺς ὀδόντας· τὰ μὲν γὰρ ἐν τῇ πρώτῃ συστάσει γίνεταί πάντα καὶ οὐθέν ὕστερον, οἱ δ'

ὀδόντες ὕστερον. διὸ καὶ πάλιν δύνανται φύεσθαι ἐκπεσόντες· ἄπτονται γὰρ ἀλλ’ οὐ συμπεφύκασι τοῖς ὀστοῖς. ἐκ μέντοι τῆς τροφῆς τῆς εἰς τὰ ὀστᾶ διαδιδομένης γίνονται, διὸ τὴν αὐτὴν ἔχουσι φύσιν, καὶ τότε ὅταν ἐκεῖνα ἔχη ἤδη τὸν ἀριθμὸν τὸν αὐτῶν. τὰ μὲν οὖν ἄλλα ζῶα ἔχοντα γίνονται ὀδόντας καὶ τὸ ἀνάλογον τοῖς ὀδοῦσιν, ἐὰν μὴ τι γίγνηται παρὰ φύσιν, διὰ τὸ ἀπολύεσθαι τῆς γενέσεως τετελεσμένα τοῦ ἀνθρώπου μᾶλλον· ὁ δ’ ἄνθρωπος, ἂν μὴ τι συμβῇ παρὰ φύσιν, οὐκ ἔχων. δι’ ἣν δ’ αἰτίαν οἱ μὲν γίνονται τῶν ὀδόντων καὶ ἐκπίπτουσιν οἱ δ’ οὐκ ἐκπίπτουσιν ὕστερον λεχθήσεται.

Διότι δ’ ἐκ περιττώματός ἐστι τὰ τοιαῦτα τῶν μορίων, διὰ τοῦτ’ ἄνθρωπος ψιλότατόν τε κατὰ τὸ σῶμα τῶν ζώων πάντων ἐστὶ καὶ ὀνυχας ἐλαχίστους ἔχει ὥς κατὰ μέγεθος· ἐλάχιστον γὰρ ἔχει περίττωμα γεῶδες· ἔστι δὲ περίττωμα μὲν τὸ ἄπεπτον, τὸ δὲ γεηρὸν ἐν τοῖς σώμασι πάντων ἀπεπτότατον.

Πῶς μὲν οὖν ἕκαστον συνίσταται τῶν μορίων εἴρηται, καὶ τί τῆς γενέσεως αἴτιον.

Κεφάλαιο 7

Ἔχει δὲ τὴν αὐξησιν τὰ ζωτοκούμενα τῶν ἐμβρύων ὥσπερ ἐλέχθη πρότερον διὰ τῆς τοῦ ὀμφαλοῦ προσφύσεως. ἐπεὶ γὰρ ἔνεστιν ἐν τοῖς ζώοις καὶ ἡ θρεπτικὴ δύναμις τῆς ψυχῆς, ἀφήσιν εὐθὺς οἶον ρίζαν τὸν ὀμφαλὸν εἰς τὴν ὑστέραν. ἔστι δὲ ὁ ὀμφαλὸς ἐν κελύφει φλέβες, τοῖς μὲν μείζοσι πλείους οἶον βοῖ καὶ τοῖς τοιούτοις, τοῖς δὲ μέσοις δύο, μία δὲ τοῖς ἐλαχίστοις. διὰ δὲ τούτου λαμβάνει τὴν τροφὴν αἱματικὴν· αἱ γὰρ ὑστέραι ἐράτα φλεβῶν πολλῶν εἰσιν. τὰ μὲν οὖν μὴ ἀμφωδόντα πάντα καὶ τῶν ἀμφωδόντων ὅσων ἡ ὑστέρα μὴ μίαν φλέβα μεγάλην ἔχει διατείνουσιν ἀλλ' ἀντὶ μιᾶς πυκνὰς πολλὰς, ταῦτα ἐν ταῖς ὑστέραις ἔχει τὰς καλουμένας κοτυληδόνας <πρὸς ἃς ὁ ὀμφαλὸς συνάπτει καὶ προσπέφυκεν· ἀποτέττανται γὰρ αἱ φλέβες αἱ διὰ τοῦ ὀμφαλοῦ ἔνθεν καὶ ἔνθεν καὶ σχίζονται πάντῃ κατὰ τὴν ὑστέραν· ἥ δὲ περαίνουσι ταύτῃ γίνονται αἱ κοτυληδόνες> τὸ μὲν περιφερὲς ἔχουσαι πρὸς τὴν ὑστέραν τὸ δὲ κοῖλον πρὸς τὸ ἔμβρυον. μετὰ δὲ τῆς ὑστέρας καὶ τοῦ ἐμβρύου τὸ χόριον καὶ οἱ ὑμένες εἰσιν.

(746a.) αἱ δὲ κοτυληδόνας αὐξανομένου καὶ τελευμένου τοῦ ἐμβρύου γίνονται ἐλάττους καὶ τέλος ἀφανίζονται τελεωθέντος. εἰς τοῦτο γὰρ προεκτίθεται τοῖς ἐμβρύοις ἡ φύσις τὴν αἱματικὴν τροφὴν τῆς ὑστέρας ὥσπερ εἰς μαστούς, καὶ διὰ τὸ ἀθροίζεσθαι κατὰ μικρὸν ἐκ πολλῶν οἶον ἐξάνθημα καὶ φλεγμασία γίνεταί τὸ σῶμα τὸ τῆς κοτυληδόνης. ἕως μὲν ἂν οὖν ἔλαττον ἦ τὸ ἔμβρυον, οὐ δυνάμενον πολλὴν λαμβάνειν τροφὴν, δῆλαί εἰσι καὶ μείζονες, αὐξηθέντος δὲ συμπίπτουσιν.

Τὰ δὲ πολλὰ τῶν κολοβῶν ζώων καὶ ἀμφωδόντων οὐκ ἔχει κοτυληδόνας ἐν ταῖς ὑστέραις, ἀλλ' ὁ ὀμφαλὸς εἰς φλέβα τείνει μίαν, αὕτη δὲ τέταται διὰ τῆς ὑστέρας ἔχουσα μέγεθος. ἐπεὶ δὲ τὰ μὲν μονοτόκα τὰ δὲ πολυτόκα τῶν τοιούτων ἐστὶ ζώων, καὶ τὰ πλείω τῶν ἐμβρύων τὸν αὐτὸν ἔχει τρόπον τῷ ἐνί. δεῖ δὲ ταῦτα θεωρεῖν ἕκ τε τῶν παραδειγμάτων τῶν ἐν ταῖς ἀνατομαῖς καὶ τῶν ἐν ταῖς ἱστορίαις γεγραμμένων. πεφύκασιν γὰρ τὰ ζῷα ἐκ τοῦ ὀμφαλοῦ, ὁ δ' ὀμφαλὸς ἐκ τῆς φλεβὸς ἐφεξῆς ἀλλήλοις, ὥσπερανεὶ παρ' ὀχετὸν τὴν φλέβα ρέουσιν· περὶ δὲ ἕκαστον τῶν ἐμβρύων οἱ θ' ὑμένες καὶ τὸ χόριόν ἐστιν.

Οἱ δὲ λέγοντες τρέφεσθαι τὰ παιδιά ἐν ταῖς ὑστέραις διὰ τοῦ σαρκιδιόν τι βδάλλειν οὐκ ὀρθῶς λέγουσιν· ἐπὶ τε γὰρ τῶν ἄλλων ζώων ταῦτὸν συνέβαινεν ἄν, νῦν δ' οὐ φαίνεται (θεωρῆσαι γὰρ τοῦτο ῥάδιον διὰ τῶν ἀνατομῶν), καὶ περὶ ἅπαντα τὰ ἔμβρυα καὶ τὰ πτηνὰ καὶ τὰ πλωτὰ καὶ τὰ τῶν πεζῶν ὁμοίως λεπτοὶ περιέχουσιν ὑμένες χωρίζοντες ἀπὸ τε τῆς ὑστέρας καὶ τῶν ἐγγιγνομένων ὑγρῶν ἐν οἷς οὗτ' αὐτοῖς ἔνεστι τοιοῦτον οὐθέν, οὔτε διὰ τούτων οὐθενὸς ἐνδέχεται ποιῆσθαι τὴν ἀπόλαυσιν· τὰ δ' ὠτοκούμενα πάντα ὅτι λαμβάνει τὴν αὔξησιν χωρισθέντα τῆς μήτρας ἔξω φανερόν, <ὥστε λέγουσιν οὐκ ὀρθῶς οἱ λέγοντες οὕτως ὥσπερ Δημόκριτος>.

Γίνεται δὲ ὁ συνδυασμὸς τοῖς ζώοις κατὰ φύσιν μὲν τοῖς ὁμογενέσιν, οὐ μὴν ἀλλὰ καὶ τοῖς μὲν σύνεγγυς τὴν φύσιν ἔχουσιν οὐκ ἀδιαφόροις δὲ τῷ εἶδει, ἐὰν τά τε μεγέθη παραπλήσια ἦ καὶ οἱ χρόνοι ἴσοι ὧσι τῆς κυήσεως. σπάνια μὲν οὖν γίνεταί τὰ τοιαῦτα ἐπὶ τῶν ἄλλων, γίνεταί δὲ καὶ ἐπὶ κυνῶν καὶ ἀλωπέκων καὶ λύκων <καὶ θῶων>· καὶ οἱ Ἰνδικοὶ δὲ κύνες ἐκ θηρίου τινὸς κυνώδους γεννῶνται καὶ κυνός. καὶ ἐπὶ τῶν (746b.) ὀρνίθων δὲ τῶν ὀχευτικῶν ὥπται τοῦτο συμβαῖνον, οἷον ἐπὶ περδίκων καὶ ἀλεκτοριδίων· καὶ τῶν γαμψωνύχων οἱ ἱέρακες δοκοῦσιν οἱ διαφέροντες τῷ εἶδει μίγνυσθαι πρὸς ἀλλήλους· καὶ ἐπ' ἄλλων δὲ τινων ὀρνέων ἔχει τὸν αὐτὸν τρόπον. ἐπὶ δὲ τῶν θαλαττίων οὐθὲν ἀξιόλογον ἐώραται, δοκοῦσι δὲ μάλιστα οἱ ῥινοβάται καλούμενοι γίνεσθαι ἐκ ῥίνης καὶ βάτου συνδυαζομένων. λέγεται δὲ καὶ τὸ περὶ τῆς Λιβύης παροιμιαζόμενον ὡς ἀέι τι τῆς Λιβύης τρεφούσης καινόν, διὰ τὸ μίγνυσθαι καὶ τὰ μὴ ὁμόφυλα ἀλλήλοις λεχθῆναι τοῦτο· διὰ γὰρ τὴν σπάνιν τοῦ ὕδατος ἀπαντῶντα πάντα πρὸς ὀλίγους τόπους τοὺς ἔχοντας νάματα μίγνυσθαι καὶ τὰ μὴ ὁμογενῆ.

Τὰ μὲν οὖν ἄλλα τῶν ἐκ τοιαύτης μίξεως γιγνομένων συνδυαζόμενα φαίνεται πάλιν ἀλλήλοις καὶ μιγνύμενα καὶ δυνάμενα τό τε θῆλυ καὶ τὸ ἄρρεν γεννᾶν, οἱ δ' ὀρεῖς ἄγονοι μόνοι τῶν τοιούτων· οὔτε γὰρ ἐξ ἀλλήλων οὗτ' ἄλλοις μιγνύμενοι γεννῶσιν. ἔστι δὲ τὸ πρόβλημα καθόλου μὲν διὰ τίν' αἰτίαν ἄγονον ἢ ἄρρεν ἢ θῆλύ ἐστιν· εἰσὶ γὰρ καὶ γυναιῖκες καὶ ἄνδρες ἄγονοι καὶ τῶν ἄλλων ζώων ἐν τοῖς γένεσιν ἐκάστοις, οἷον ἵπποις καὶ προβάτοις. ἀλλὰ τοῦτο τὸ γένος ὅλον ἄγονόν ἐστι, τὸ τῶν ἡμιόνων. τὰ δ' αἰτία τῆς ἀγονίας ἐπὶ μὲν τῶν ἄλλων πλείω συμβαίνει· καὶ γὰρ ἐκ γενετῆς ὅταν πηρωθῶσι τοὺς τόπους τοὺς πρὸς τὴν μίξιν χρησίμους ἄγονοι

γίνονται καὶ γυναῖκες καὶ ἄνδρες ὥστε τὰς μὲν μὴ ἡβᾶν τοὺς δὲ μὴ γενεῖαν ἀλλ' εὐνουχίας διατελεῖν ὄντας· τοῖς δὲ προϊούσης τῆς ἡλικίας ταὐτὸν συμβαίνει πάσχειν, ὅτε μὲν δι' εὐτροφίαν τῶν σωμάτων (ταῖς μὲν γὰρ πιωτέραις γιγνομέναις τοῖς δ' εὐεκτικωτέροις εἰς τὸ σῶμα καταναλίσκεται τὸ περίττωμα τὸ σπερματικόν, καὶ ταῖς μὲν οὐ γίγνεται καταμήνια τοῖς δὲ γονή), ὅτε δὲ διὰ νόσον οἱ μὲν ὑγρὸν καὶ ψυχρὸν προΐενται, ταῖς δὲ γυναιξὶν αἱ καθάρσεις φαῦλαι καὶ πλήρεις νοσηματικῶν περιττωμάτων. πολλοῖς δὲ καὶ πολλαῖς καὶ διὰ πηρώματα τοῦτο συμβαίνει τὸ πάθος περὶ τὰ μόρια καὶ τοὺς τόπους τοὺς πρὸς τὴν ὁμιλίαν χρησίμους. γίγνεται δὲ τὰ μὲν ἰατὰ τὰ δ' ἀνίατα τῶν τοιούτων, μάλιστα δὲ διατελοῦσιν ἄγονα <τὰ> κατὰ τὴν πρώτην σύστασιν τοιαῦτα γενόμενα· (747a.) γίνονται γὰρ γυναῖκες τε ἄρρενωποι καὶ ἄνδρες θηλυκοί, καὶ ταῖς μὲν οὐ γίγνεται τὰ καταμήνια τοῖς δὲ τὸ σπέρμα λεπτὸν καὶ ψυχρόν. διόπερ εὐλόγως βασανίζεται ταῖς πείραις τό γε τῶν ἀνδρῶν, εἰ ἄγονον, ἐν τῷ ὕδατι· ταχὺ γὰρ διαχεῖται τὸ λεπτὸν καὶ ψυχρὸν ἐπιπολῆς, τὸ δὲ γόνιμον εἰς βυθὸν χωρεῖ· θερμὸν μὲν γὰρ τὸ πεπεμμένον ἐστί, πέπεπται δὲ τὸ συνεστηκὸς καὶ πάχος ἔχον. τὰς δὲ γυναῖκας βασανίζουσι τοῖς τε προσθέτοις, ἐὰν διικνῶνται αἱ ὅσμαι πρὸς τὸ πνεῦμα τὸ θύραζε κάτωθεν ἄνω, καὶ τοῖς ἐγχρίστοις εἰς τοὺς ὀφθαλμοὺς χρώμασιν ἂν χρωματίζωσι τὸ ἐν τῷ στόματι πτύελον.

ταῦτα γὰρ οὐ συμβαίνοντα δηλοῖ τὸ σῶμα τοὺς πόρους δι' ὧν ἀποκρίνεται τὸ περίττωμα συγκεχυμένους ἔχειν καὶ συμπεφυκότας, ὅ τε γὰρ περὶ τοὺς ὀφθαλμοὺς τόπος τῶν περὶ τὴν κεφαλὴν σπερματικώτατός ἐστιν. δηλοῖ δ' ἐν ταῖς ὁμιλίαις μετασχηματιζόμενος ἐπιδήλως μόνος, καὶ τοῖς χρωμένοις πλείοσιν ἀφροδισίοις ἐνδιδόασιν τὰ ὄμματα φανερώς. αἴτιον δ' ὅτι ἡ τῆς γονῆς φύσις ὁμοίως ἔχει τῇ τοῦ ἐγκεφάλου· ὕδατώδης γὰρ ἐστὶν ἡ ὕλη αὐτῆς, ἡ δὲ θερμότης ἐπίκτητος. καὶ αἱ σπερματικαὶ καθάρσεις ἀπὸ τοῦ ὑποζώματός εἰσιν· ἡ γὰρ ἀρχὴ τῆς φύσεως ἐντεῦθεν, ὥστε διικνεῖσθαι πρὸς τὸν θώρακα τὰς κινήσεις ἀπὸ τῶν ἄρθρων· αἱ δ' ἐκ τοῦ θώρακος ὅσμαι πᾶσαι ποιοῦσιν αἴσθησιν διὰ τῆς ἀναπνοῆς.

Κεφάλαιο 8

Ἐν μὲν οὖν τοῖς ἀνθρώποις καὶ τοῖς ἄλλοις γένεσιν, ὥσπερ εἴρηται πρότερον, κατὰ μέρος ἡ τοιαύτη συμβαίνει πῆρωσις, τὸ δὲ τῶν ἡμιόνων γένος ὅλον ἄγονόν ἐστιν. περὶ δὲ τῆς αἰτίας, ὥς μὲν λέγουσιν Ἐμπεδοκλῆς καὶ Δημόκριτος-λέγων ὁ μὲν οὐ σαφῶς Δημόκριτος δὲ γνωρίμως μᾶλλον-οὐ καλῶς εἰρήκασιν. λέγουσι γὰρ ἐπὶ πάντων ὁμοίως τὴν ἀπόδειξιν τῶν παρὰ τὴν συγγένειαν συνδουζομένων. Δημόκριτος μὲν γάρ φησι διεφθάρθαι τοὺς πόρους τῶν ἡμιόνων ἐν ταῖς ὑστέραις διὰ τὸ μὴ ἐκ συγγενῶν γενέσθαι τὴν ἀρχὴν τῶν ζώων. συμβαίνει δ' ἐφ' ἐτέρων ζώων τοῦτο μὲν ὑπάρχειν, γεννᾶν δὲ μηδὲν ἥττον-καίτοι χρῆν, εἴπερ αἴτιον τοῦτ' ἦν τῆς ἀγονίας, ἄγονα καὶ τᾶλλ' εἶναι τὰ μιγνύμενα τὸν τρόπον τοῦτον. Ἐμπεδοκλῆς δ' αἰτιᾶται τὸ μίγμα τὸ τῶν σπερμάτων γίνεσθαι πυκνὸν ἐκ (747b.) μαλακῆς τῆς γονῆς οὕσης ἐκατέρας· συναρμόττειν γὰρ τὰ κοῖλα τοῖς πυκνοῖς ἀλλήλων, ἐκ δὲ τῶν τοιούτων γίνεσθαι ἐκ μαλακῶν σκληρὸν ὥσπερ τῷ καττιτέρῳ μιχθέντα τὸν χαλκόν- λέγων οὕτ' ἐπὶ τοῦ χαλκοῦ καὶ τοῦ καττιτέρου τὴν αἰτίαν ὀρθῶς (εἴρηται δ' ἐν τοῖς Προβλήμασι περὶ αὐτῶν) οὕθ' ὅλως ἐκ γνωρίμων ποιούμενος τὰς ἀρχάς. τὰ γὰρ κοῖλα καὶ τὰ στερεὰ ἀρμόττοντα ἀλλήλοις πῶς ποιεῖ τὴν μίξιν οἶον οἴνου καὶ ὕδατος; τοῦτο γὰρ ὑπὲρ ἡμᾶς ἐστὶ τὸ λεγόμενον· πῶς γὰρ δεῖ λαβεῖν τὰ κοῖλα τοῦ οἴνου καὶ τοῦ ὕδατος λίαν ἐστὶ παρὰ τὴν αἴσθησιν. ἔτι δ' ἐπειδὴ συμβαίνει καὶ ἐξ ἵππων γίνεσθαι ἵππον καὶ ἐξ ὄνων ὄνον καὶ ἐξ ἵππου καὶ ὄνου ἡμίονον, ἀμφοτέρως ἄρρενος καὶ θήλεος ὅποτερουοῦν ὄντος, διὰ τί ἐκ μὲν τούτων γίνεται πυκνὸν οὕτως ὥστ' ἄγονον εἶναι τὸ γενόμενον, ἐκ δὲ ἵππου θήλεος καὶ ἄρρενος ἢ ὄνου θήλεος καὶ ἄρρενος οὐ γίνεται ἄγονον; καίτοι μαλακὸν καὶ τὸ τοῦ ἄρρενος ἵππου ἐστὶ καὶ τὸ τοῦ θήλεος, μίγνυται δὲ καὶ ὁ θῆλυς ἵππος καὶ ὁ ἄρρην τῷ ὄνῳ, καὶ τῷ ἄρρηνι καὶ τῷ θήλει. καὶ διὰ τοῦτο γίνονται ἄγονα ἐξ ἀμφοτέρων, ὥς φησιν, ὅτι ἐξ ἀμφοῖν ἓν τι γίνεται <πυκνόν>, μαλακῶν ὄντων τῶν σπερμάτων. ἔδει οὖν καὶ τὸ ἐξ ἵππου ἄρρενος καὶ θήλεος γιγνόμενον. εἰ μὲν γὰρ θάτερον ἐμίγνυτο μόνον ἐνῆν ἂν λέγειν ὅτι θάτερον αἴτιον τοῦ μὴ γεννᾶν οὐχ ὅμοιον ὃν τῇ τοῦ ὄνου γονῇ· νῦν δ' οἶαπερ οὕση ἐκείνη μίγνυται τοιαύτη καὶ τῇ τοῦ συγγενοῦς. ἔτι δ' ἡ μὲν ἀπόδειξις κατ' ἀμφοτέρων εἴρηται ὁμοίως καὶ τοῦ θήλεος καὶ

τοῦ ἄρρενος, -γεννᾷ δ' ὁ ἄρρην ἐπταέτης ὢν μόνος ὥς φασιν, ἀλλ' ἡ θήλεια ἄγονος ὅλως, καὶ αὕτη τῷ μὴ ἐκτρέφειν εἰς τέλος, ἐπεὶ ἤδη κύημα ἔσχεν ἡμίονος.

Ἴσως δὲ μᾶλλον ἂν δόξειεν ἀπόδειξις εἶναι πιθανὴ τῶν εἰρημένων λογικῇ-λέγω δὲ λογικὴν διὰ τοῦτο ὅτι ὅσῳ καθόλου μᾶλλον πορρωτέρω τῶν οἰκείων ἐστὶν ἀρχῶν. ἔστι δὲ τοιαύτη τις· εἰ γὰρ ἐξ ὁμοειδῶν ἄρρενος καὶ θήλεος ὁμοειδὲς γίνεσθαι πέφυκε τοῖς γεννήσασιν ἄρρεν ἢ θήλυ, οἷον ἐκ κυνὸς ἄρρενος καὶ θήλεος κύων ἄρρην ἢ θήλεια, καὶ ἐξ ἐτέρων τῷ εἶδει ἕτερον τῷ εἶδει, οἷον εἰ κύων ἕτερον λέοντος, καὶ ἐκ κυνὸς ἄρρενος καὶ λέοντος θήλεος ἕτερον καὶ ἐκ λέοντος ἄρρενος καὶ κυνὸς θήλεος ἕτερον· ὥστ' ἐπειδὴ (748a.) γίνεται ἡμίονος ἄρρην καὶ θήλυν ἀδιαφόρων ὄντων τῷ εἶδει ἀλλήλοις, γίνεται δ' ἐξ ἵππου καὶ ὄνον ἡμίονος, ἕτερα δ' ἐστὶ τῷ εἶδει ταῦτα καὶ οἱ ἡμίονοι, ἀδύνατον γενέσθαι ἐξ ἡμιόνων· ἕτερον γὰρ γένος οὐχ οἷόν τε διὰ τὸ ἐξ ἄρρενος καὶ θήλεος τῶν ὁμοειδῶν ταῦτο γίνεσθαι τῷ εἶδει, ἡμίονος δ' ὅτι ἐξ ἵππου καὶ ὄνου γίνεται ἐτέρων ὄντων τῷ εἶδει, ἐκ δὲ τῶν ἐτέρων τῷ εἶδει ἕτερον ἐτέθη γίνεσθαι ζῷον. οὗτος μὲν οὖν ὁ λόγος καθόλου λίαν καὶ κενός· οἱ γὰρ μὴ ἐκ τῶν οἰκείων ἀρχῶν λόγοι κενοί, ἀλλὰ δοκοῦσιν εἶναι τῶν πραγμάτων οὐκ ὄντες. οἱ γὰρ ἐκ τῶν ἀρχῶν τῶν γεωμετρικῶν γεωμετρικοί, ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων· τὸ δὲ κενὸν δοκεῖ μὲν εἶναι τι, ἔστι δ' οὐθέν.

οὐκ ἀληθὲς δέ, ὅτι πολλὰ τῶν μὴ <ἐξ> ὁμοειδῶν γενομένων γίνεται γόνιμα καθάπερ ἐλέχθη πρότερον. τοῦτον μὲν οὖν τὸν τρόπον οὔτε περὶ τῶν ἄλλων δεῖ ζητεῖν οὔτε περὶ τῶν φυσικῶν· ἐκ δὲ τῶν ὑπαρχόντων τῷ γένει τῷ τῶν ἵππων καὶ τῷ τῶν ὄνων θεωρῶν ἂν τις μᾶλλον λάβοι τὴν αἰτίαν, ὅτι πρῶτον μὲν ἐκάτερον αὐτῶν ἐστὶ μονοτόκον ἐκ τῶν συγγενῶν ζώων, ἔπειτ' οὐ συλληπτικά τὰ θήλεα ἐκ τῶν ἀρρένων ἀεὶ, διόπερ τοὺς ἵππους διαλείποντες ὀχεύουσι [διὰ τὸ μὴ δύνασθαι συνεχῶς φέρειν]. ἀλλ' ἡ μὲν ἵππος οὐ καταμηνιώδης ἀλλ' ἐλάχιστον προΐεται τῶν τετραπόδων· ἡ δ' ὄνος οὐ δέχεται τὴν ὀχείαν ἀλλ' ἐξουρεῖ τὸν γόνον, διὸ μαστιγοῦσιν ἀκολουθοῦντες. ἔτι δὲ ψυχρὸν [τὸ] ζῷον ὁ ὄνος ἐστί, διόπερ ἐν τοῖς χειμερινοῖς οὐ θέλει γίνεσθαι τόποις διὰ τὸ δύσριγον εἶναι τὴν φύσιν, οἷον περὶ Σκύθας καὶ τὴν ὁμορον χώραν, οὐδὲ περὶ Κελτοὺς τοὺς ὑπὲρ τῆς Ἰβηρίας· ψυχρὰ γὰρ καὶ αὕτη ἡ χώρα. διὰ ταύτην δὲ τὴν αἰτίαν καὶ τὰ ὀχεῖα ἐπιβάλλουσι τοῖς ὄνοις οὐχ ὥσπερ τοῖς ἵπποις κατ' ἰσημερίαν ἀλλὰ

περὶ τροπὰς θερινάς, ὅπως ἐν ἀλεινῇ γίγνηται ὥρα τὰ πωλία· ἐν τῇ αὐτῇ γὰρ γίγνεται ἐν ἣ ἂν ὀχευθῇ· ἐνιαυτὸν γὰρ κύει καὶ ἵππος καὶ ὄνος. ὄντος δ' ὥσπερ εἴρηται ψυχροῦ τὴν φύσιν καὶ τὴν γονὴν ἀναγκαῖον εἶναι τοῦ τοιοῦτου ψυχράν. σημεῖον δὲ τούτου· διὰ τοῦτο γάρ, ἐὰν μὲν ἵππος ἀναβῇ ἐπὶ ὠχευμένην ὑπὸ ὄνου οὐ διαφθείρει τὴν τοῦ ὄνου ὀχείαν, ὁ δ' ὄνος ἐὰν ἐπαναβῇ διαφθείρει τὴν τοῦ ἵπου διὰ ψυχρότητα τὴν τοῦ σπέρματος.

(748b.) ὅταν μὲν οὖν ἀλλήλοις μιχθῶσι σώζεται διὰ τὴν θατέρου θερμότητα· θερμότερον γὰρ τὸ ἀπὸ τοῦ ἵπου ἀποκρινόμενον· ἡ μὲν γὰρ τοῦ ὄνου ψυχρὰ καὶ ἡ ὕλη καὶ ἡ γονή, ἡ δὲ τοῦ ἵπου θερμότερα. ὅταν δὲ μιχθῇ ἡ θερμὸν ἐπὶ ψυχρὸν ἢ ψυχρὸν ἐπὶ θερμὸν συμβαίνει αὐτὸ μὲν τὸ ἐκ τούτων κύημα γενόμενον σώζεσθαι καὶ ταῦτ' ἐξ ἀλλήλων εἶναι γόνιμα, τὸ δ' ἐκ τούτων μηκέτι γόνιμον ἀλλ' ἄγονον εἰς τελειογονίαν.

Ὅλως δ' ὑπάρχοντος ἑκατέρου εὐφυοῦς πρὸς ἀγονίαν, τῷ τε γὰρ ὄνῳ ὑπάρχει τὰ ἄλλα τὰ εἰρημένα, καὶ ἐὰν μὴ μετὰ τὸν βόλον τὸν πρῶτον ἄρξηται γεννᾶν οὐκέτι γεννᾷ τὸ παράπαν· οὕτως ἐπὶ μικροῦ ἔχεται τὸ ἄγονον εἶναι τὸ σῶμα τῶν ὄνων. ὁμοίως δὲ καὶ ὁ ἵππος· εὐφυῆς γὰρ πρὸς ἀγονίαν καὶ τοσοῦτον λείπει τοῦ ἄγονος εἶναι ὅσον τὸ γενέσθαι τὸ ἐκ τούτου ψυχρότερον· τοῦτο δὲ γίγνεται ὅταν μιχθῇ τῇ τοῦ ὄνου ἀποκρίσει. καὶ ὁ ὄνος δὲ ὡσαύτως μικροῦ δεῖν κατὰ τὸν οἰκεῖον συνδυασμὸν ἄγονον γεννᾷ, ὥστε ὅταν προσγένηται τὸ παρὰ φύσιν, εἰ τότε ἐνὸς μόλις γεννητικὸν ἐξ ἀλλήλων ἦν, τὸ ἐκ τούτων ἔτι μᾶλλον ἄγονον καὶ παρὰ φύσιν οὐθενὸς δεήσει τοῦ ἄγονον εἶναι ἀλλ' ἐξ ἀνάγκης ἔσται ἄγονον.

Συμβαίνει δὲ καὶ τὰ σώματα τῶν ἡμιόνων μεγάλα γίνεσθαι διὰ τὸ τὴν ἀπόκρισιν τὴν εἰς τὰ καταμήνια τρέπεσθαι εἰς τὴν αὔξησιν. ἐπεὶ δ' ἐνιαύσιος ὁ τοκετὸς τῶν τοιούτων οὐ μόνον συλλαβεῖν δεῖ τὴν ἡμίονον ἀλλὰ καὶ ἐκθρέψαι· τοῦτο δ' ἀδύνατον μὴ γιγνομένων καταμηνίων. ταῖς δ' ἡμιόνοις οὐ γίγνεται, ἀλλὰ τὸ μὲν ἄχρηστον μετὰ τοῦ περιττώματος τοῦ ἐκ τῆς κύστεως ἐκκρίνεται (διόπερ οὐδὲ τῶν ἄρθρων οἱ ἡμίονοι οἱ ἄρρενες ὀσφραίνονται τῶν θηλειῶν ὥσπερ τᾶλλα τὰ μώνυχα, ἀλλ' αὐτοῦ τοῦ περιττώματος), τὰ δ' ἄλλα τρέπεται εἰς τὴν τοῦ σώματος αὔξησιν καὶ τὸ μέγεθος. ὥστε συλλαβεῖν μὲν ἐνδέχεται ποτε τὴν θήλειαν, ὅπερ ἤδη φαίνεται γεγονός, ἐκθρέψαι δὲ καὶ ἐξενεγκεῖν εἰς τέλος ἀδύνατον. ὁ δ' ἄρρην ποτὲ γεννήσειεν ἂν διὰ τε τὸ θερμότερον εἶναι τοῦ θήλεος φύσει τὸ

ἄρρεν καὶ διὰ τὸ μὴ συμβάλλεσθαι πρὸς τὴν μίξιν σῶμα μηδὲν τὸ ἄρρεν. τὸ δ' ἀποτελεσθὲν γίγνεται γίννος. τοῦτο δ' ἐστὶν ἡμίονος ἀνάπηρος· καὶ γὰρ ἐκ τοῦ ἵππου καὶ τοῦ ὄνου γίνονται γίννοι ὅταν νοσήσῃ τὸ κύημα (749a.) ἐν τῇ ὑστέρᾳ. ἔστι γὰρ ὁ γίννος ὥσπερ τὰ μετάχοιρα ἐν τοῖς χοίροις· καὶ γὰρ ἐκεῖ τὸ πηρωθὲν ἐν τῇ ὑστέρᾳ καλεῖται μετάχοιρον, γίγνεται δὲ τοιοῦτος ὃς ἂν τύχῃ τῶν χοίρων. ὁμοίως δὲ γίνονται καὶ οἱ πυγμαῖοι· καὶ γὰρ οὗτοι πηροῦνται τὰ μέρη καὶ τὸ μέγεθος ἐν τῇ κύσει καὶ εἰσιν ὥσπερ μετάχοιρα καὶ γίννοι.

Κεφάλαιο 1

Περὶ μὲν οὖν τῆς τῶν ἡμιόνων ἀτεκνίας εἴρηται καὶ περὶ τῶν ζωοτοκούντων καὶ θύραζε καὶ ἐν αὐτοῖς· ἐν δὲ τοῖς φωτοκοῦσι τῶν ἐναίμων τῇ μὲν παραπλησίως ἔχει τὰ περὶ τὰς γενέσεις αὐτοῖς τε καὶ τοῖς πεζοῖς καὶ ταυτόν τι λαβεῖν ἔστι περὶ πάντων, τῇ δ' ἔχει διαφορὰς καὶ πρὸς ἄλληλα καὶ πρὸς τὰ πεζὰ τῶν ζώων. γίγνεται μὲν οὖν ἀπὸ συνδυασμοῦ πάντα ὅλως καὶ προῖεμένου γονὴν εἰς τὸ θῆλυ τοῦ ἄρρενος· τῶν δ' ὀτοκόων αἱ μὲν ὀρνιθες προῖενται τέλειον ὦν καὶ σκληρόδερμον, ἐὰν μὴ τι πηρωθῇ διὰ νόσον, καὶ πάντα δίχροα τὰ τῶν ὀρνίθων ἐστίν, τῶν δ' ἰχθύων οἱ μὲν σελαχῶδεις, ὥσπερ εἴρηται πολλάκις, ἐν αὐτοῖς φωτοκῆσαντες ζωοτοκοῦσι μεταστάντος τοῦ ὦου ἐξ ἄλλου τόπου τῆς ὑστέρας εἰς ἄλλον, μαλακόδερμον δὲ τὸ ὦν καὶ ὁμόχρων ἐστὶν αὐτῶν. εἷς δὲ μόνος οὐ ζωοτοκεῖ τῶν τοιούτων ἐν αὐτῷ, ὁ καλούμενος βάτραχος· περὶ οὗ τὴν αἰτίαν ὕστερον λεκτέον. οἱ δὲ ἄλλοι ὅσοιπερ φωτοκοῦσι τῶν ἰχθύων μονόχρων μὲν προῖενται τὸ ὦν, ἀτελὲς δὲ τοῦτο· λαμβάνει γὰρ ἔξω τὴν αὐξήσιν διὰ τὴν αὐτὴν αἰτίαν δι' ἣνπερ καὶ τὰ ἔσω τελειούμενα τῶν ὦων.

Περὶ μὲν οὖν τῶν ὕστερων τίνας ἔχουσι διαφορὰς καὶ διὰ τίνας αἰτίας εἴρηται πρότερον. καὶ γὰρ τῶν ζωοτοκούντων τὰ μὲν ἄνω πρὸς τῷ ὑποζώματι ἔχει τὰς ὑστέρας τὰ δὲ κάτω πρὸς τοῖς ἄρθροις· ἄνω μὲν τὰ σελαχῶδη, κάτω δὲ τὰ καὶ ἐν αὐτοῖς ζωοτοκοῦντα καὶ θύραζε οἷον ἄνθρωπος καὶ ἵππος καὶ τῶν ἄλλων ἕκαστον τῶν τοιούτων. καὶ τῶν φωτοκοούντων τὰ μὲν κάτω καθάπερ τῶν ἰχθύων οἱ φωτοκοῦντες, τὰ δ' ἄνω καθάπερ οἱ ὀρνιθες.

Συνίσταται μὲν οὖν κυήματα τοῖς ὀρνισι καὶ αὐτόματα, ἃ καλοῦσιν (749b.) ὑπνέμια καὶ ζεφύριά τινες, γίγνεται δὲ ταῦτα τοῖς μὴ πτητικοῖς μηδὲ γαμψώνυξι τῶν ὀρνίθων ἀλλὰ τοῖς πολυγόνοις διὰ τὸ πολὺ περίττωμα ταῦτ' ἔχειν (τοῖς δὲ γαμψώνυξιν εἰς τὰς πτέρυγας καὶ τὰ πτερὰ τρέπεσθαι τὴν τοιαύτην ἀπόκρισιν, τὸ δὲ σῶμα μικρὸν ἔχειν καὶ ξηρόν τε καὶ θερμόν), τὴν δ' ἀπόκρισιν τὴν καταμηνιώδη καὶ τὴν γονὴν περίττωμα εἶναι· ἐπεὶ οὖν καὶ ἡ τῶν πτερῶν φύσις καὶ ἡ τοῦ σπέρματος γίγνεται ἐκ περιττώσεως οὐ δύναται ἡ φύσις ἐπ' ἀμφοτέρω πολυχοεῖν. διὰ τὴν αὐτὴν δὲ ταύτην αἰτίαν καὶ τὰ μὲν γαμψώνυχα οὗτ' ὀχευτικά ἐστιν οὔτε πολύγονα, τὰ δὲ βαρέα καὶ τῶν πτητικῶν ὅσων τὰ σώματα ὀγκώδη It;πολύγονα>, καθάπερ

περιστερᾶς καὶ τῶν τοιούτων. τοῖς μὲν γὰρ βαρέσι καὶ μὴ πτητικοῖς οἶον ἀλεκτορίσι καὶ πέρδιξι καὶ τοῖς ἄλλοις τοῖς τοιούτοις πολὺ γίγνεται περίττωμα τοιοῦτον· διὸ τὰ τε ἄρρενα αὐτῶν ὀχευτικά καὶ τὰ θήλεα προῖεται πολλὴν ὕλην καὶ τίκτει τῶν τοιούτων τὰ μὲν πολλὰ τὰ δὲ πολλάκις, πολλὰ μὲν οἶον ἀλεκτορίσι καὶ πέρδιξι καὶ στρουθὸς ὁ Λιβυκός, τὰ δὲ περιστερῶδη πολλὰ μὲν οὐ, πολλάκις δέ· μεταξὺ γάρ ἐστι ταῦτα τῶν γαμψώνυχων καὶ τῶν βαρέων· πτητικὰ μὲν γὰρ ἐστὶν ὥσπερ τὰ γαμψώνυχα, πλήθῃ δ' ἔχει τοῦ σώματος ὥσπερ τὰ βαρέα, ὥστε διὰ μὲν τὸ πτητικὰ εἶναι καὶ ἐνταῦθα τρέπεσθαι τὸ περίττωμα ὀλίγα τίκτουσι, διὰ δὲ τὸ πλῆθος τοῦ σώματος καὶ διὰ τὸ θερμὴν ἔχειν τὴν κοιλίαν καὶ πεπτικωτάτην, πρὸς δὲ τούτοις καὶ διὰ τὸ ῥαδίως πορίζεσθαι τὴν τροφήν, τὰ δὲ γαμψώνυχα χαλεπῶς, πολλάκις.

Ὀχευτικά δὲ καὶ πολύγονα καὶ τὰ μικρὰ τῶν ὀρνέων ἐστὶ καθάπερ ἐνίστε καὶ τῶν φυτῶν· ἡ γὰρ εἰς τὸ σῶμα αὐξησις γίγνεται περίττωμα σπερματικόν. διὸ καὶ τῶν ἀλεκτορίδων αἱ Ἀδριανικαὶ πολυτοκώταται εἰσιν· διὰ γὰρ μικρότητα τοῦ σώματος εἰς τὴν τέκνωσιν καταναλίσκεται ἡ τροφή. καὶ αἱ ἀγεννεῖς τῶν γενναίων πολυτοκώτεραι· ὑγρότερα γὰρ τὰ σώματα αὐτῶν καὶ ὀγκωδέστερα, τῶν δὲ ἰσχυρότερα καὶ ξηρότερα· ὁ γὰρ θυμὸς ὁ γενναῖος ἐν τοῖς τοιούτοις γίγνεται σῶμασι μᾶλλον. ἔτι δὲ καὶ ἡ τῶν σκελῶν λεπτότης καὶ ἀσθένεια συμβάλλεται πρὸς τὸ τὴν φύσιν τῶν τοιούτων (750a.) ὀχευτικὴν εἶναι καὶ πολύγονον, καθάπερ καὶ ἐπὶ τῶν ἀνθρώπων· ἡ γὰρ εἰς τὰ κῶλα τροφή τρέπεται τοῖς τοιούτοις εἰς περίττωμα σπερματικόν· ὁ γὰρ ἐκεῖθεν ἀφαιρεῖ ἡ φύσις προστίθῃσιν ἐνταῦθα. τὰ δὲ γαμψώνυχα τὴν βάσιν ἰσχυρὰν ἔχει καὶ τὰ σκέλη πάχος ἔχοντα διὰ τὸν βίον· ὥστε διὰ πάσας ταύτας τὰς αἰτίας οὐτ' ὀχευτικά ἐστὶν οὔτε πολύγονα.

μάλιστα δὲ ἡ κεγχρηὶς πολύγονον· μόνον γὰρ σχεδὸν τοῦτο καὶ πίνει τῶν γαμψώνυχων, ἡ δ' ὑγρότης καὶ ἡ σύμφυτος καὶ ἡ ἐπακτὸς σπερματικὸν μετὰ τῆς ὑπαρχούσης αὐτῇ θερμότητος. τίκτει δ' οὐδ' αὕτη πολλὰ λίαν, ἀλλὰ τέτταρα τὸ πλεῖστον.

Ὁ δὲ κόκκυξ ὀλιγοτόκον ἐστὶν οὐκ ὦν γαμψώνυχος ὅτι ψυχρὸς τὴν φύσιν ἐστίν (δηλοῖ δ' ἡ δειλία τοῦ ὀρνέου), τὸ δὲ σπερματικόν ζῶον δεῖ θερμὸν καὶ ὑγρὸν εἶναι. ὅτι δὲ δειλὸν φανερόν· ὑπὸ τε γὰρ τῶν ὀρνέων διώκεται πάντων καὶ ἐν ἀλλοτρίαις τίκτει νεοττιαῖς.

Τὰ δὲ περιστερῶδη δύο ὡς τὰ πολλὰ τίκτειν εἴωθεν· οὔτε γὰρ

μονοτόκοι εἰσὶν (οὐθεὶς γὰρ μονοτόκος ὄρνις πλὴν ὁ κόκκυξ, καὶ οὗτος ἐνίοτε διτοκεῖ) οὔτε πολλὰ τίκτουςιν ἀλλὰ πολλάκις δύο ἢ τρία τὰ πλεῖστα γεννῶσι, τὰ δὲ πολλὰ δύο· οὗτοι γὰρ οἱ ἀριθμοὶ μεταξὺ τοῦ ἐνὸς καὶ πολλῶν.

Ὅτι δὲ τοῖς πολυγόνοις τρέπεται εἰς τὸ σπέρμα ἢ τροφή φανερόν ἐκ τῶν συμβαινόντων. τῶν τε γὰρ δένδρων τὰ πολλὰ πολυκαρπήσαντα λίαν ἐξαυαίνεται μετὰ τὴν φορὰν, ὅταν μὴ ὑπολειφθῇ τῷ σώματι τροφή, καὶ τὰ ἐπέτεια ταὐτὸ πάσχειν ἔοικεν, οἷον τὰ τε χεδροπὰ καὶ ὁ σῖτος καὶ τᾶλλα τὰ τοιαῦτα· τὴν γὰρ τροφήν ἀναλίσκουσιν εἰς τὸ σπέρμα πᾶσαν· ἔστι γὰρ πολὺσπερμον τὸ γένος αὐτῶν. καὶ τῶν ἀλεκτορίδων ἔνιαι πολυτοκήσασαι λίαν οὕτως ὥστε καὶ δύο τεκεῖν ἐν ἡμέρᾳ μετὰ τὴν πολυτοκίαν ἀπέθανον. ὥσπερ ὑπέρνιοι γὰρ γίνονται ταῦτα, καὶ οἱ ὄρνιθες καὶ τὰ φυτὰ· τοῦτο δ' ἐστὶ τὸ πάθος ὑπερβολὴ περιττώματος ἐκκρίσεως. αἴτιον δὲ τὸ τοιοῦτον πάθος καὶ τῷ λέοντι τῆς ἀγονίας τῆς ὕστερον· τὸ μὲν γὰρ πρῶτον τίκει πέντε ἢ ἕξ, εἶτα τῷ ὑστέρῳ ἔτει τέτταρας, πάλιν δὲ τρεῖς σκύμους, εἶτα τὸν ἐχόμενον ἀριθμὸν ἕως ἐνός, εἴτ' οὐθέν, ὡς ἐξαναλίσκομένου τοῦ περιττώματος καὶ ἅμα τῆς ἡλικίας ληγούσης φθίνοντος τοῦ (750b.) σπέρματος.

Τίσι μὲν οὖν γίνεταί τὰ ὑπηνέμια τῶν ὀρνίθων, ἔτι δὲ ποῖοι πολύγονοι καὶ ὀλιγόγονοι αὐτῶν καὶ διὰ τίνας αἰτίας εἴρηται.

Γίνεταί δὲ τὰ ὑπηνέμια, καθάπερ εἴρηται καὶ πρότερον, διὰ τὸ ὑπάρχειν ἐν τῷ θήλει τὴν ὕλην τὴν σπερματικὴν, τοῖς δ' ὀρνέοις μὴ γίνεσθαι τὴν τῶν καταμηνίων ἀπόκρισιν ὥσπερ τοῖς ζωοτόκοις τοῖς ἐναίμοις· πᾶσι γὰρ τούτοις γίνεταί, τοῖς μὲν πλείων τοῖς δ' ἐλάττων τοῖς δὲ τοσαύτη τὸ πλῆθος ὥστε ὅσον γε ἐπισημαίνειν. ὁμοίως δ' οὐδὲ τοῖς ἰχθύσι καθάπερ <οὐδὲ> τοῖς ὄρνισιν· διὸ καὶ τούτοις γίνεταί μὲν ἄνευ ὀχείας σύστασις κυημάτων ὁμοίως καὶ τοῖς ὄρνισιν, ἥττον δ' ἐπιδήλως· ψυχροτέρα γὰρ ἡ φύσις αὐτῶν. ἡ δὲ γιγνομένη τοῖς ζωοτόκοις ἀπόκρισις τῶν καταμηνίων συνίσταται τοῖς ὄρνισι κατὰ τοὺς ἰκνουμένους χρόνους τοῦ περιττώματος, καὶ διὰ τὸ τὸν τόπον εἶναι θερμὸν τὸν πρὸς τῷ διαζώματι τελειοῦται τοῖς μεγέθεσιν, πρὸς δὲ τὴν γένεσιν ἀτελῇ καὶ ταῦτα καὶ τὰ τῶν ἰχθύων ὁμοίως ἄνευ τῆς τοῦ ἄρρενος γονῆς· ἡ δ' αἰτία τούτων εἴρηται πρότερον. οὐ γίνεταί δὲ τὰ ὑπηνέμια τοῖς πτητικοῖς τῶν ὀρνίθων διὰ τὴν αὐτὴν αἰτίαν δι' ἣνπερ οὐδὲ πολυτοκεῖ τὰ τοιαῦτα· τοῖς γὰρ γαμψώνουσιν ὀλίγον τὸ περίττωμα καὶ προσδέονται τοῦ ἄρρενος πρὸς

τὴν ὀρμὴν τῆς τοῦ περιττώματος ἐκκρίσεως. πλείω δὲ τὰ ὑπηνέμια γίγνεται τῶν γονίμων ὥδων, ἐλάττω δὲ τὸ μέγεθος διὰ μίαν αἰτίαν καὶ τὴν αὐτὴν· διὰ μὲν γὰρ τὸ ἀτελεῖ εἶναι ἐλάττω τὸ μέγεθος, διὰ δὲ τὸ τὸ μέγεθος ἔλαττον πλείω τὸν ἀριθμόν. καὶ ἦττον δὲ ἡδέα διὰ τὸ ἀπεπτότερα εἶναι· ἐν πᾶσι γὰρ τὸ πεπεμμένον γλυκύτερον.

Ὅτι μὲν οὖν οὔτε τὰ τῶν ὀρνίθων οὔτε τὰ τῶν ἰχθύων τελειοῦται πρὸς τὴν γένεσιν ἄνευ τῶν ἀρρένων ἱκανῶς ὥπται, περὶ δὲ τοῦ γίγνεσθαι καὶ ἐν τοῖς ἰχθύσι κυήματα ἄνευ τῶν ἀρρένων οὐχ ὁμοίως, μάλιστα δ' ἐπὶ τῶν ποταμίων ἐώραται συμβαῖνον· ἐνιοὶ γὰρ εὐθὺς ἔχοντες ὥα φαίνονται, καθάπερ ἐν ταῖς ἱστορίαις γέγραπται περὶ αὐτῶν. ὅλως δ' ἐν γε τοῖς ὄρνισιν οὐδὲ τὰ γινόμενα διὰ τῆς ὀχείας ὥα θέλει ὥς ἐπὶ τὸ πολὺ λαμβάνειν αὐξήσιν ἐὰν μὴ ὀχεύηται ἢ ὄρνις συνεχῶς. τούτου δ' αἴτιον ὅτι καθάπερ ἐπὶ τῶν γυναικῶν τὸ πλησιάζειν τοῖς ἄρρεσι κατασπᾶ τὴν (751a.) τῶν γυναικείων ἀπόκρισιν (ἔλκει γὰρ τὸ ὑγρὸν ἢ ὑστέρα θερμανθεῖσα καὶ οἱ πόροι ἀναστομοῦνται), τοῦτο συμβαίνει καὶ ἐπὶ τῶν ὀρνίθων ἐπιόντος κατὰ μικρὸν τοῦ καταμηνιώδους περιττώματος, ὃ θύραζε μὲν οὐκ ἀποκρίνεται διὰ τὸ ὀλίγον εἶναι καὶ πρὸς τῷ διαζώματι ἄνω τὰς ὑστέρας, συλλεμβέται δ' εἰς αὐτὴν τὴν ὑστέραν. τοῦτο γὰρ αὖξει τὸ φόν-ὥσπερ τὰ ἔμβρυα τὰ τῶν ζωοτόκων διὰ τοῦ ὀμφαλοῦ-τὸ ἐπιρρέον διὰ τῆς ὑστέρας, ἐπεὶ ὅταν ἄπαξ ὀχευθῇ τὰ ὄρνεα, πάντα σχεδὸν αἰεὶ διατελεῖ ὥα ἔχοντα, μικρὰ δὲ πάντα. διὸ καὶ περὶ τῶν ὑπηνεμίων τινὲς εἰώθασιν λέγειν ὥς οὐ γιγνομένων ἀλλ' ὥς ὑπολειμμάτων ἐκ προτέρας ὀχείας ὄντων. τοῦτο δ' ἐστὶ ψεῦδος· ὥπται γὰρ ἱκανῶς καὶ ἐπὶ νεοττίδων ἀλεκτορίδος καὶ χηνὸς γινόμενα ὑπηνέμια ἄνευ ὀχείας. ἔτι δὲ αἱ πέρδικες αἱ θήλειαι, αἱ τ' ἀνόχευτοι καὶ αἱ ὀχευόμεναι τῶν εἰς τὰς θήρας ἀγομένων, ὀσμώμεναι τοῦ ἄρρενος καὶ ἀκούουσαι τῆς φωνῆς αἱ μὲν πληροῦνται αἱ δὲ τίκτουσι παραχρῆμα. τοῦ δὲ πάθους αἴτιον ταυτὸν ὅπερ ἐπὶ τῶν ἀνθρώπων καὶ τῶν τετραπόδων· ἐὰν γὰρ ὀργῶντα τύχη τὰ σώματα πρὸς τὴν ὀμίλιαν, τὰ μὲν ἰδόντα τὰ δὲ μικρᾷς γενομένης θίξεως προῖεται σπέρμα.

τὰ δὲ τοιαῦτα τῶν ὀρνέων ὀχευτικὰ καὶ πολὺσπερμα τὴν φύσιν ἐστίν, ὥστε μικρᾷς δεῖσθαι κινήσεως ὅταν ὀργῶντα τύχη καὶ γίγνεσθαι ταχὺ τὴν ἔκκρισιν αὐτοῖς, ὥστε τοῖς μὲν ἀνοχεύτοις ὑπηνέμια συνίστασθαι τοῖς δ' ὀχευμένοις αὐξάνεσθαι καὶ τελειοῦσθαι ταχέως.

Τῶν δὲ θύραζε φωτοκούντων οἱ μὲν ὀρνίθες προΐενται τὸ φῶν τέλειον, οἱ δ' ἰχθύες ἀτελέες, ἀλλ' ἔξω λαμβάνει τὴν αὐξησιν, καθάπερ εἴρηται καὶ πρότερον. αἴτιον δ' ὅτι πολύγονόν ἐστι τὸ τῶν ἰχθύων γένος· ἀδύνατον οὖν ἔσω πολλὰ λαμβάνειν τέλος, διόπερ ἀποτίκτουσιν ἔξω. ταχεῖα δ' ἡ πρόεσις· αἱ γὰρ ὑστέραι πρὸς τοῖς ἄρθροις τῶν θύραζε φωτοκούντων ἰχθύων.

Ἔστι δὲ τὰ μὲν τῶν ὀρνίθων δίχροα, τὰ δὲ τῶν ἰχθύων μονόχροα πάντων. τῆς δὲ διχροίας τὴν αἰτίαν ἴδοι τις ἂν ἐκ τῆς δυνάμεως ἐκατέρου τῶν μορίων, τοῦ τε λευκοῦ καὶ τοῦ ὠχροῦ. γίγνεται μὲν γὰρ ἡ ἀπόκρισις ἐκ τοῦ αἵματος (οὐθὲν γὰρ ἄναιμον φωτοκεῖ ζῶον), τὸ (751b.) δ' αἷμα ὅτι ἐστὶν ὕλη τοῖς σώμασιν εἴρηται πολλάκις. τὸ μὲν οὖν ἐστὶν ἐγγύτερον αὐτοῦ τῆς μορφῆς τῶν γιγνομένων, τὸ θερμόν· τὸ δὲ γεωδέστερον τὴν τοῦ σώματος παρέχεται σύστασιν καὶ πορρώτερόν ἐστιν. διόπερ ὅσα δίχροά ἐστι τῶν φῶν, τὴν μὲν ἀρχὴν τὸ ζῶον λαμβάνει ἐκ τοῦ λευκοῦ τῆς γενέσεως (ἐν γὰρ τῷ θερμῷ ἡ ψυχικὴ ἀρχή) τὴν δὲ τροφήν ἐκ τοῦ ὠχροῦ. τοῖς μὲν οὖν τὴν φύσιν θερμότεροις τῶν ζώων διακέκριται χωρὶς ἐξ οὗ τε ἡ ἀρχὴ γίγνεται καὶ ἐξ οὗ τρέφεται, καὶ τὸ μὲν λευκόν ἐστι τὸ δ' ὠχρόν, καὶ πλεον αἰεὶ τὸ λευκὸν καὶ καθαρὸν τοῦ ὠχροῦ καὶ γεώδους· τοῖς δ' ἥττον θερμοῖς καὶ ὑγροτέροις τὸ ὠχρόν πλεον καὶ ὑγρότερον. ὅπερ συμβαίνει ἐπὶ τῶν λιμναίων ὀρνέων· ὑγροτέροι γὰρ τὴν φύσιν καὶ ψυχρότεροι τῶν πεζυόντων εἰσὶν ὀρνέων, ὥστε καὶ τὰ φὰ τῶν τοιούτων πολλὴν ἔχει τὴν καλουμένην λέκιθον καὶ ἥττον ὠχρὰν διὰ τὸ ἥττον ἀποκεκρίσθαι τὸ λευκόν. τὰ δ' ἤδη καὶ ψυχρὰ τὴν φύσιν τῶν φωτοκούντων καὶ ἔτι ὑγρὰ μᾶλλον (τοιούτον δ' ἐστὶ τὸ τῶν ἰχθύων γένος) οὐδ' ἀποκεκριμένον ἔχει τὸ λευκὸν διὰ τε μικρότητα καὶ διὰ τὸ πλῆθος τοῦ ψυχροῦ καὶ γεώδους· διόπερ γίγνεται μονόχροα πάντα τὰ τῶν ἰχθύων καὶ ὥς μὲν ὠχρὰ λευκά, ὥς δὲ λευκὰ ὠχρά.

τὰ δὲ τῶν ὀρνέων καὶ τὰ ὑπηνέμια ἔχει ταύτην τὴν δίχροιαν· ἔχει γὰρ ἐξ οὗ ἐκάτερον ἔσται τῶν μορίων-καὶ ὅθεν ἡ ἀρχὴ καὶ ὅθεν ἡ τροφή-ἀλλὰ ταῦτ' ἀτελῆ καὶ προσδεόμενα τοῦ ἄρρενος· γίγνεται γὰρ τὰ ὑπηνέμια γόνιμα ἐὰν ἔν τινι καιρῷ ὀχευθῇ ὑπὸ τοῦ ἄρρενος. οὐκ ἔστι δὲ τῆς διχροίας αἴτιον τὸ ἄρρεν καὶ τὸ θήλυ-ὥς τοῦ μὲν λευκοῦ ὄντος ἀπὸ τοῦ ἄρρενος τοῦ δ' ὠχροῦ ἀπὸ τοῦ θήλεος-ἀλλ' ἄμφω γίγνεται ἀπὸ τοῦ θήλεος, ἀλλὰ τὸ μὲν ψυχρὸν τὸ δὲ θερμόν. ἐν ὅσοις μὲν οὖν ἐστὶ πολὺ τὸ θερμόν ἀποκρίνεται, ἐν ὅσοις δ' ὀλίγον οὐ

δύναται· διὸ μονόχροα τὰ κυήματα, καθάπερ εἴρηται, τὰ τῶν τοιούτων. ἡ δὲ γονὴ συνέστησε μόνον· καὶ διὰ τοῦτο τὸ μὲν πρῶτον φαίνεται λευκὸν καὶ μικρὸν τὸ κύημα ἐν τοῖς ὄρنيσι, προῖόν δὲ ὥχρον ἅπαν, συμμιγνυμένου ἀεὶ πλείονος αἱματώδους· τέλος δ' ἀποκρινομένου τοῦ θερμοῦ κύκλῳ περιίσταται τὸ (752a.) λευκὸν ὥσπερ ὑγροῦ ζέοντος ὁμοίως πάντη· τὸ γὰρ λευκὸν φύσει μὲν ὑγρόν, ἔχει δ' ἐν αὐτῷ τὴν θερμότητα τὴν ψυχικὴν· διὸ κύκλῳ ἀποκρίνεται, τὸ δ' ὥχρον καὶ γεῶδες ἐντός. καὶ πολλὰ συνεράσας τις ὥα εἰς κύστιν ἢ τι τοιοῦτον ἔψη πυρὶ μὴ θάπτονα ποιοῦντι τὴν τοῦ θερμοῦ κίνησιν ἢ τὴν ἐν τοῖς ὥοις διάκρισιν, ὥσπερ ἐν ἐνὶ ὥῳ καὶ τὸ ἐκ πάντων τῶν ὥων σύστημα τὸ μὲν ὥχρον ἐν μέσῳ γίγνεται, κύκλῳ δὲ λευκόν.

Διότι μὲν οὖν τὰ μὲν μονόχροα τὰ δὲ δίχροα τῶν ὥων εἴρηται.

Κεφάλαιο 2

Αποκρίνεται δ' ἐν τοῖς ῥοῖς ἡ τοῦ ἄρρενος ἀρχὴ καθ' ὃ προσπέφυκε τῇ ὑστέρα τὸ ῥόν, καὶ γίγνεται δὴ ἀνόμοιον τὸ δίχροον ῥόν καὶ οὐ ἀμπαν στρογγύλον ἄλλ' ἐπὶ θάτερα ὀξύτερον διὰ τὸ διαφέρειν δεῖν τοῦ λευκοῦ ἐν ᾧ ἔχει τὴν ἀρχήν. διόπερ σκληρότερον ταύτῃ τὸ ῥόν ἢ κάτωθεν· σκεπάζειν γὰρ δεῖ καὶ φυλάττειν τὴν ἀρχήν. καὶ διὰ τοῦτο ἐξέρχεται ὕστερον τοῦ ῥοῦ τὸ ὀξύ· τὸ γὰρ προσπεφυκὸς ὕστερον ἐξέρχεται, κατὰ τὴν ἀρχὴν δὲ προσπέφυκεν, ἐν τῷ ὀξεῖ δ' ἡ ἀρχή. τὸν αὐτὸν δ' ἔχει τρόπον καὶ ἐν τοῖς τῶν φυτῶν σπέρμασιν· προσπέφυκε γὰρ ἡ ἀρχὴ τοῦ σπέρματος τὰ μὲν ἐν τοῖς κλάδοις τὰ δ' ἐν τοῖς κελύφεσι τὰ δ' ἐν τοῖς περικαρπίοις. δῆλον δ' ἐπὶ τῶν χεδροπῶν· ἥ γὰρ συνήπται τὸ δίθυρον τῶν κυάμων καὶ τῶν τοιούτων σπερμάτων ταύτῃ προσπέφυκεν· ἡ δ' ἀρχὴ ἐνταῦθα τοῦ σπέρματος.

Απορήσειε δ' ἂν τις περὶ τῆς αὐξήσεως τῶν ῥῶν τίνα τρόπον ἐκ τῆς ὑστέρας συμβαίνει. τὰ μὲν γὰρ ζῶα διὰ τοῦ ὀμφαλοῦ λαμβάνει τὴν τροφήν, τὰ δ' ῥὰ διὰ τίνος; ἐπειδήπερ οὐχ ὥσπερ οἱ σκώληκες αὐτὰ δι' αὐτῶν λαμβάνει τὴν αὕξισιν. εἰ δ' ἔστι τι δι' οὗ προσπέφυκε, τοῦτο ποῦ τρέπεται τελεωθέντος; οὐ γὰρ συνεχέρεται καθάπερ ὁ ὀμφαλὸς τοῖς ζῶοις· γίγνεται γὰρ τὸ πέριξ ὄστρακον τελεωθέντος. τὸ μὲν οὖν εἰρημένον ὀρθῶς ζητεῖται· λανθάνει δ' ὅτι τὸ γιγνόμενον ὄστρακον τὸ πρῶτον μαλακὸς ὕμην ἐστίν, τελεωθέντος δὲ γίγνεται σκληρὸν καὶ κραῦρον, οὕτω συμμέτρως ὥστ' ἐξέρχεται μὲν ἔτι μαλακόν (πόνον γὰρ ἂν παρεῖχε τικτόμενον), ἐξελθὼν δ' εὐθὺς πήγνυται ψυχθέν, συνεξατμίζοντος τοῦ ὑγροῦ (752b.) ταχὺ δι' ὀλιγότητα, λειπομένου δὲ τοῦ γεώδους. τούτου δὴ τι τοῦ ὕμενος κατ' ἀρχὰς ὀμφαλῶδές ἐστι κατὰ τὸ ὀξὺ καὶ ἀπέχει ἔτι μικρῶν ὄντων οἷον αὐλός. φανερόν δ' ἐστὶν ἐν τοῖς ἐκβολίμοις τῶν μικρῶν ῥῶν· ἐὰν γὰρ βρεχθῇ ἢ ἄλλως πῶς ῥιγώσασα ἐκβάλλῃ ἢ ὄρνις ἔτι αἵματῶδές τε φαίνεται τὸ κύημα καὶ ἔχον δι' ἑαυτοῦ στόλον μικρὸν ὀμφαλῶδη. μείζονος δὲ γιγνομένου περιτείνεται μᾶλλον οὗτος καὶ ἐλάττων γίγνεται. τελεωθέντος δὲ τὸ ὀξὺ τοῦ ῥοῦ τοῦτο συμβαίνει τὸ πέρας. ὑπὸ δὲ τούτῳ ὁ ἐντὸς ὕμην ὃς ὀρίζει τὸ λευκὸν καὶ τὸ ὠχρὸν ἀπὸ τούτου. τελειωθέντος δ' ἀπολύεται ὅλον τὸ ῥόν καὶ οὐ φαίνεται εὐλόγως ὁ ὀμφαλός· αὐτοῦ γὰρ ἐστὶ τοῦ ἐσχάτου τὸ

ἄκρον.

Ἡ δ' ἔξοδος τοῦναντίον γίνεται τοῖς ῥοῖς ἢ τοῖς ζωοτοκουμένοις· τοῖς μὲν γὰρ ἐπὶ κεφαλὴν καὶ τὴν ἀρχήν, τῷ δ' ῥῷ γίνεται ἡ ἔξοδος οἷον ἐπὶ πόδας. τούτου δ' αἴτιον τὸ εἰρημένον ὅτι προσπέφυκε κατὰ τὴν ἀρχήν.

Ἡ δὲ γένεσις ἐκ τοῦ ῥοῦ συμβαίνει τοῖς ὄρνισιν ἐπαζούσης καὶ συμπεττούσης τῆς ὄρνιθος, ἀποκρινομένου μὲν τοῦ ζῶου ἐκ μέρους τοῦ ῥοῦ, τὴν δ' αὔξησιν λαμβάνοντος καὶ τελειουμένου ἐκ τοῦ λοιποῦ μέρους· ἡ γὰρ φύσις ἅμα τὴν τε τοῦ ζῶου ὕλην ἐν τῷ ῥῷ τίθησι καὶ τὴν ἱκανὴν τροφήν πρὸς τὴν αὔξησιν· ἐπεὶ γὰρ οὐ δύναται τελειοῦν ἐν αὐτῇ ἡ ὄρνις συνεκτίκτεται τὴν τροφήν ἐν τῷ ῥῷ. τοῖς μὲν γὰρ ζωοτοκουμένοις ἐν ἄλλῳ μορίῳ γίνεται ἡ τροφή, τὸ καλούμενον γάλα ἐν τοῖς μαστοῖς· τοῖς δ' ὄρνισι τοῦτο ποιεῖ ἡ φύσις ἐν τοῖς ῥοῖς, τοῦναντίον μέντοι ἢ οἱ τε ἄνθρωποι οἷονται καὶ Ἀλκμαίων φησὶν ὁ Κροτωνιάτης. οὐ γὰρ τὸ λευκὸν ἐστὶ γάλα ἀλλὰ τὸ ὠχρόν· τοῦτο γάρ ἐστιν ἡ τροφή τοῖς νεοτοῖς-οἱ δ' οἷονται τὸ λευκὸν διὰ τὴν ὁμοιότητα τοῦ χρώματος.

Γίνεται μὲν οὖν ἐπαζούσης, ὥσπερ εἴρηται, τῆς ὄρνιθος ὁ νεοττός· οὐ μὴν ἀλλὰ κἂν ἡ ὥρα ἢ εὐκρατος ἢ ὁ τόπος ἀλεινὸς ἐν ᾧ ἂν κείμενα τυγχάνωσιν ἐκπέττεται καὶ τὰ τῶν ὀρνίθων καὶ τὰ τῶν τετραπόδων καὶ ῥοτόκων-πάντα γὰρ εἰς τὴν γῆν ἐκτίκτεται, καὶ συμπέττονται ὑπὸ τῆς ἐν τῇ γῇ θερμότητος· ὅσα δ' ἐπαζεῖ φοιτῶντα τῶν ῥοτόκων καὶ τετραπόδων ταῦτα ποιεῖ μᾶλλον φυλακῆς χάριν.

Τὸν αὐτὸν δὲ τρόπον γίνεται (753a.) τὰ τε τῶν ὀρνίθων ῥὰ καὶ τὰ τῶν ζῶων τῶν τετραπόδων· καὶ γὰρ σκληρόδερμα καὶ δίχροα, καὶ πρὸς τῷ διαζώματι συνίσταται καθάπερ καὶ τὰ τῶν ὀρνίθων, καὶ τᾶλλα ταῦτα πάντα συμβαίνει καὶ ἐντὸς καὶ ἐκτὸς ὥστε ἡ αὐτὴ θεωρία περὶ τῆς αἰτίας ἐστὶ πάντων. ἀλλὰ τὰ μὲν τῶν τετραπόδων δι' ἰσχὺν ἐκπέττεται ὑπὸ τῆς ὥρας, τὰ δὲ τῶν ὀρνέων ἐπικηρότερα, καὶ δεῖται τῆς τεκούσης. εἶκοι δὲ καὶ ἡ φύσις βούλεσθαι τὴν τῶν τέκνων αἴσθησιν ἐπιμελητικὴν παρασκευάζειν· ἀλλὰ τοῖς μὲν χείροσι τοῦτ' ἐμποιεῖ μέχρι τοῦ τεκεῖν μόνον, τοῖς δὲ καὶ περὶ τὴν τελείωσιν, ὅσα δὲ φρονιμώτερα καὶ περὶ τὴν ἐκτροφήν. τοῖς δὲ δὴ μάλιστα κοινωνοῦσι φρονήσεως καὶ πρὸς τελειωθέντα γίνεται συνήθεια καὶ φιλία, καθάπερ τοῖς τε ἀνθρώποις καὶ τῶν τετραπόδων ἐνίοις, τοῖς δ' ὄρνισι μέχρι τοῦ γεννῆσαι καὶ ἐκθρέψαι· διόπερ καὶ μὴ ἐπαζέουσαι

αἱ θήλειαι ὅταν τέκωσι διατίθενται χειρὸν, ὥσπερ ἑνὸς τινος στερισκόμεναι τῶν συμφύτων.

Τελειοῦται δ' ἐν τοῖς ῥοῖς τὰ ζῶα θάπτων ἐν ταῖς ἀλεειναῖς ἡμέραις· συνεργάζεται γὰρ ἡ ὥρα· καὶ γὰρ ἡ πέψις θερμότητός ἐστιν. ἥ τε γὰρ γῆ συμπέττει τῇ θερμότητι καὶ ἡ ἐπφάζουσα ταὐτὸ τοῦτο δρᾷ· προσεγγεῖ γὰρ τὸ ἐν αὐτῇ θερμόν. καὶ διαφθείρεται δὲ τὰ ῥὰ καὶ γίγνεται τὰ καλούμενα οὔρια μᾶλλον κατὰ τὴν θερμὴν ὥραν εὐλόγως· ὥσπερ γὰρ καὶ οἱ οἶνοι ἐν ταῖς ἀλείαις ὀξύνονται ἀνατρεπομένης τῆς ἰλῦος (τοῦτο γὰρ αἴτιον τῆς διαφθορᾶς) καὶ ἐν τοῖς ῥοῖς ἡ λέκιθος· τοῦτο γὰρ ἐν ἀμφοτέροις τὸ γεῶδες, διὸ καὶ ἀναθολοῦται καὶ ὁ οἶνος μιννυμένης τῆς ἰλῦος καὶ τὰ διαφθειρόμενα ῥὰ τῆς λεκίθου.

Τοῖς μὲν οὖν πολυτόκοις συμβαίνει τὸ τοιοῦτον εὐλόγως (οὐ γὰρ ῥάδιον τὴν ἀρμόττουσαν πᾶσιν ἀποδιδόναι θερμασίαν, ἀλλὰ τοῖς μὲν ἐλλείπειν τοῖς δὲ πλεονάζειν καὶ ἀναθολοῦν οἶον σήπουσαν), -τοῖς δὲ γαμψώνυξιν ὀλιγοτόκοις οὗσιν οὐδὲν ἦττον συμβαίνει τοῦτο· πολλάκις μὲν γὰρ καὶ τοῖν δυοῖν θάτερον οὔριον γίγνεται, τὸ δὲ τρίτον ὡς εἰπεῖν ἀεὶ· θερμὰ γὰρ ὄντα τὴν φύσιν οἶον ὑπερζεῖν ποιεῖ τὴν ὑγρότητα τὴν ἐν τοῖς ῥοῖς. ἔχει γὰρ δὴ καὶ τὴν φύσιν ἐναντίαν τό τε ὥχρον καὶ τὸ λευκόν. τὸ μὲν γὰρ (753b.) ὥχρον ἐν τοῖς πάγοις πηγνυται, θερμαινόμενον δὲ ὑγραίνεται· διὸ καὶ συμπεττόμενον ἐν τῇ γῇ ἢ ὑπὸ τοῦ ἐπφάζειν ὑγραίνεται, καὶ τοιοῦτον ὃν γίγνεται τροφή τοῖς συνισταμένοις ζώοις. πυρούμενον δὲ καὶ ὀπτώμενον οὐ γίγνεται σκληρὸν διὰ τὸ εἶναι τὴν φύσιν γεῶδες οὕτως ὥσπερ κηρός· καὶ διὰ τοῦτο θερμαινόμενα μᾶλλον ἢ ἐὰν ἢ μὴ ἔξ ὑγροῦ περιπτώματος διοροῦται καὶ γίγνεται οὔρια. τὸ δὲ λευκὸν ὑπὸ μὲν τῶν πάγων οὐ πηγνυται ἀλλ' ὑγραίνεται μᾶλλον (τὸ δ' αἴτιον εἴρηται πρότερον), πυρούμενον δὲ γίγνεται στερεόν· διὸ καὶ πεττόμενον περὶ τὴν γένεσιν τῶν ζώων παχύνεται. ἐκ τούτου γὰρ συνίσταται τὸ ζῶον, τὸ δ' ὥχρον τροφή γίγνεται, καὶ τοῖς ἀεὶ συνισταμένοις τῶν μορίων ἐντεῦθεν ἡ αὐξησης. διὸ καὶ διώριστα τό τε ὥχρον καὶ τὸ λευκὸν χωρὶς ὑμέσιν ὡς ἔχοντα τὴν φύσιν ἐτέραν. δι' ἀκριβείας μὲν οὖν, ὃν τρόπον ἔχουσι ταῦτα πρὸς ἄλληλα κατ' ἀρχάς τε τῆς γενέσεως καὶ συνισταμένων τῶν ζώων, ἔτι δὲ περὶ τε ὑμένων καὶ περὶ ὀμφαλῶν ἐκ τῶν ἐκ ταῖς ἱστορίαις γεγραμμένων δεῖ θεωρεῖν· πρὸς δὲ τὴν παροῦσαν σκέψιν ἱκανὸν φανερόν εἶναι τοσοῦτον, ὅτι συστάσης πρώτης τῆς καρδίας καὶ τῆς μεγάλης φλεβὸς ἀπὸ ταύτης

ἀφορισθείσης δύο ὀμφαλοὶ ἀπὸ τῆς φλεβὸς τείνουσιν, ὁ μὲν εἰς τὸν ὑμένα τὸν περιέχοντα τὸ ὠχρόν, ὁ δ' ἕτερος εἰς τὸν ὑμένα τὸν χοριοειδῆ ὃς κύκλῳ περιέχει τὸ ζῶον· ἔστι δ' οὗτος περὶ τὸν ὑμένα τὸν τοῦ ὀστράκου. διὰ μὲν οὖν θατέρου λαμβάνει τὴν ἐκ τοῦ ὠχροῦ τροφήν, τὸ δ' ὠχρόν γίγνεται πλεῖον· ὑγρότερον γὰρ γίγνεται θερμαίνόμενον. δεῖ γὰρ τὴν τροφήν σωματώδη οὖσαν ὑγρὰν εἶναι καθάπερ τοῖς φυτοῖς, ζῆ δὲ τὸ πρῶτον καὶ τὰ ἐν τοῖς ῥοῖς γιγνόμενα καὶ τὰ ἐν τοῖς ζῴοις φυτοῦ βίον· τῷ πεφυκέναι γὰρ ἕκ τινος λαμβάνει τὴν πρώτην αὔξησιν καὶ τροφήν. ὁ δ' ἕτερος ὀμφαλὸς τείνει εἰς τὸ περιέχον χόριον. δεῖ γὰρ ὑπολαβεῖν τὰ ῥοτοκούμενα τῶν ζῶων πρὸς μὲν τὸ ὠχρόν οὕτως ἔχειν [τὸν νεοττὸν] ὥσπερ πρὸς τὴν μητέρα τὰ ζῥοτοκούμενα ἔμβρυα ὅταν ἐν τῇ μητρὶ ᾖ (ἐπεὶ γὰρ οὐκ ἐκτρέφονται γε ἐν τῇ μητρὶ τὰ ῥοτοκούμενα ἐκλαμβάνει τι μέρος αὐτῆς), πρὸς δὲ τὸν ἐξωτάτῳ ὑμένα τὸν αἱματώδη ὡς πρὸς τὴν ὑστέρα. ἅμα (754a.) δὲ περὶ τε τὸ ὠχρόν καὶ τὸ χόριον τὸ ἀνάλογον τῇ ὑστέρα τὸ ὀστρακὸν τοῦ ῥοῦ περιπέφυκεν, ὥσπερ ἂν εἴ τις περιθῇ περὶ τε τὸ ἔμβρυον αὐτὸ καὶ περὶ τὴν μητέρα ὅλην. ἔχει δ' οὕτως διότι δεῖ τὸ ἔμβρυον ἔν τε τῇ ὑστέρα εἶναι καὶ πρὸς τῇ μητρὶ. ἐν μὲν οὖν τοῖς ζῥοτοκουμένοις ἢ ὑστέρα ἐν τῇ μητρὶ ἐστίν, ἐν δὲ τοῖς ῥοτοκουμένοις ἀνάπαλιν, ὥσπερ ἂν εἴ τις εἴποι τὴν μητέρα ἐν τῇ ὑστέρα εἶναι· τὸ γὰρ ἀπὸ τῆς μητρὸς γιγνόμενον, ἢ τροφή, τὸ ὠχρόν ἐστίν. αἴτιον δ' ὅτι ἡ ἐκτροφή οὐκ ἐν τῇ μητρὶ ἐστίν.

Αὐξανομένων δὲ πρότερον ὁ ὀμφαλὸς συμπύπτει ὁ πρὸς τὸ χόριον διότι ταύτῃ δεῖ τὸ ζῶον ἐξελθεῖν, τὸ δὲ λοιπὸν τοῦ ὠχροῦ καὶ ὁ ὀμφαλὸς ὁ εἰς τὸ ὠχρόν ὑστερον· δεῖ γὰρ ἔχειν τροφήν εὐθύς τὸ γενόμενον· οὔτε γὰρ ἀπὸ τῆς μητρὸς τιτθεύεται, δι' αὐτοῦ τε οὐκ εὐθύς δύναται πορίζεσθαι τὴν τροφήν· διόπερ ἐντὸς εἰσέρχεται τὸ ὠχρόν μετὰ τοῦ ὀμφαλοῦ καὶ περιφύεται ἢ σάρξ.

Τὰ μὲν οὖν ἐκ τῶν τελείων ῥῶν γιγνόμενα θύραζε τοῦτον γίγνεται τὸν τρόπον ἐπὶ τε τῶν ὀρνίθων καὶ τῶν τετραπόδων ὅσα ῥοτοκεῖ τὸ ῥὸν [τὸ] σκληρόδερμον. διάδηλα δὲ ταῦτα μᾶλλον ἐπὶ τῶν μειζόνων· ἐν γὰρ τοῖς ἐλάττοσιν ἀφανῆ διὰ μικρότητα τῶν ὀγκων ἐστίν.

Κεφάλαιο 3

Ἔτι δ' ἐστὶν φωτόκον τὸ τῶν ἰχθύων γένος. τούτων δὲ τὰ μὲν ἔχοντα κάτω τὴν ὑστέραν ἀτελὲς ὦν τίκτει διὰ τὴν προειρημένην αἰτίαν, τὰ δὲ καλούμενα σελάχη τῶν ἰχθύων ἐν αὐτοῖς μὲν φωτοκεῖ τέλειον ὦν ἔξω δὲ ζωτοκεῖ, πλὴν ἐνὸς ὃν καλοῦσι βάτραχον· οὗτος δ' φωτοκεῖ θύραζε τέλειον ὦν μόνος. αἰτία δ' ἡ τοῦ σώματος φύσις· τὴν τε γὰρ κεφαλὴν πολλαπλασίαν ἔχει τοῦ λοιποῦ σώματος καὶ ταύτην ἀκανθῶδη καὶ σφόδρα τραχεῖαν. διόπερ οὐδ' ὕστερον εἰσδέχεται τοὺς νεοττοὺς οὐδ' ἐξ ἀρχῆς ζωτοκεῖ· τὸ γὰρ μέγεθος καὶ ἡ τραχύτης τῆς κεφαλῆς ὥσπερ καὶ εἰσελθεῖν κωλύει οὕτω καὶ ἐξελθεῖν. ἐπεὶ δὲ μαλακόδερμόν ἐστι τὸ ὦν τὸ τῶν σελαχῶν (οὐ γὰρ δύνανται σκληρύνειν καὶ ξηραίνειν τὸ πέριξ· ψυχρότεροι γὰρ τῶν ὀρνίθων εἰσίν), τὸ τῶν βατράχων ὦν μόνον στερεόν ἐστι καὶ στιφρὸν πρὸς τὴν ἔξω σωτηρίαν, τὰ δὲ τῶν ἄλλων ὑγρὰ καὶ μαλακὰ τὴν φύσιν· (754b.) σκεπάζεται γὰρ ἐντὸς τῷ σώματι τῷ τῆς ἐχούσης.

Ἡ δὲ γένεσις ἐκ τοῦ φωῦ τοῖς τε βατράχοις ἔξω τελειούμενοις καὶ τοῖς ἐντὸς ἡ αὐτῇ, τούτοις δὲ καὶ τοῖς τῶν ὀρνίθων τῇ μὲν ὁμοίᾳ τῇ δὲ διάφορός ἐστιν. πρῶτον μὲν γὰρ οὐκ ἔχουσι τὸν ἕτερον ὀμφαλὸν τὸν εἰς τὸ χόριον τείνοντα ὃ ἐστὶν ὑπὸ τὸ περιέχον ὄστρακον, τούτου δ' αἴτιον ὅτι τὸ πέριξ ὄστρακον οὐκ ἔχουσιν· οὐδὲν γὰρ αὐτοῖς χρήσιμον· σκεπάζει γὰρ ἡ μήτηρ, τὸ δ' ὄστρακόν ἐστι τοῖς ἐκτικτομένοις ὦοις ἀλεωρὰ πρὸς τὰς θύραθεν βλάβας. ἔπειθ' ἡ γένεσις ἐξ ἄκρου μὲν ἐστὶ τοῦ φωῦ καὶ τούτοις ἄλλ' οὐχ ἥ προσπέφυκε πρὸς τὴν ὑστέραν· οἱ γὰρ ὀρνιθες ἐκ τοῦ ὀξέος γίνονται, ταύτῃ δ' ἦν ἡ τοῦ φωῦ πρόσφυσις. αἴτιον δ' ὅτι τὸ μὲν τῶν ὀρνίθων χωρίζεται τῆς ὑστέρας, τῶν δὲ τοιούτων οὐ πάντων ἀλλὰ τῶν πλείστων πρὸς τῇ ὑστέρα προσπέφυκε τὸ ὦν τέλειον. ἐπ' ἄκρῳ δὲ γιγνομένου τοῦ ζώου καταναλίσκεται τὸ ὦν ὥσπερ καὶ ἐπὶ τῶν ὀρνίθων καὶ τῶν ἄλλων τῶν ἀπολελυμένων, καὶ τέλος πρὸς τῇ ὑστέρα ὁ ὀμφαλὸς προσπέφυκε τῶν ἥδη τελείων.

ὁμοίως δ' ἔχει καὶ ὅσων ἀπολέλγεται τὰ φὰ τῆς ὑστέρας· ἐνίοις γὰρ αὐτῶν ὅταν τέλειον γένηται τὸ ὦν ἀπολύεται. Ἀπορήσειαν ἂν οὖν τις διὰ τί διαφέρουσιν αἱ γενέσεις τοῖς ὀρνισι κατὰ τοῦτο καὶ τοῖς ἰχθύσιν. αἴτιον δ' ὅτι τὰ μὲν τῶν ὀρνίθων κεχωρισμένον ἔχει τὸ λευκὸν καὶ τὸ ὠχρόν, τὰ δὲ τῶν ἰχθύων μονόχροα, καὶ πάντῃ

μεμιγμένον τὸ τοιοῦτον ὥστ' οὐθὲν κωλύει ἐξ ἐναντίας ἔχειν τὴν ἀρχήν· οὐ γὰρ μόνον κατὰ τὴν πρόσφυσίν ἐστι τοιοῦτον ἀλλὰ καὶ καταντικρύ, τὴν δὲ τροφὴν ῥᾶον ἔλκειν ἐκ τῆς ὑστέρας πόροις τισὶν ἀπὸ ταύτης τῆς ἀρχῆς. δηλὸν δ' ἐπὶ τῶν μὴ ἀπολυομένων ῥῶν· ἐν ἐνίοις γὰρ τῶν σελαχῶν οὐκ ἀπολύεται τῆς ὑστέρας τὸ ῥὸν ἀλλ' ἐχόμενον μεταχωρεῖ κάτω πρὸς τὴν ζωοτοκίαν, ἐν οἷς τελεωθὲν τὸ ζῶον ἔχει τὸν ὀμφαλὸν ἐκ τῆς ὑστέρας ἀνηλωμένου τοῦ ῥοῦ. φανερόν οὖν ὅτι καὶ πρότερον ἔτεινον οἱ πόροι τοῦ ῥοῦ ἔτι ὄντος περὶ ἐκεῖνο πρὸς τὴν ὑστέραν. τοῦτο δὲ συμβαίνει, καθάπερ εἵπομεν, ἐν τοῖς γαλεοῖς τοῖς λείοις.

Διαφέρει μὲν οὖν ἡ γένεσις κατὰ ταῦτα τῶν ἰχθύων τοῖς ὄρνισι καὶ διὰ τὰς εἰρημένας αἰτίας· τὰ δ' ἄλλα συμβαίνει τὸν (755a.) αὐτὸν τρόπον. τὸν τε γὰρ ὀμφαλὸν ἔχουσι τὸν ἕτερον ὡσαύτως, ὥσπερ οἱ ὄρνιθες πρὸς τὸ ὠχρὸν οὕτως οἱ ἰχθύες πρὸς τὸ ὄλον ῥόν (οὐ γάρ ἐστιν αὐτοῦ τὸ μὲν λευκὸν τὸ δ' ὠχρὸν ἀλλὰ μονόχρων πᾶν), καὶ τρέφονται ἐκ τούτου, καταναλισκόμενου τε ἐπέρχεται καὶ περιφύεται ἡ σὰρξ ὁμοίως.

Περὶ μὲν οὖν τῶν ἐν αὐτοῖς μὲν φωτοκούντων τέλειον ῥὸν θύραζε δὲ ζωοτοκούντων τούτου ἔχει τὸν τρόπον ἡ γένεσις,

Κεφάλαιο 4

οἱ δὲ πλεῖστοι τῶν ἄλλων ἰχθύων ἐκτὸς φωτοκοῦσιν, ἀτελεῖς δ' ὦδον πάντες πλὴν βατράχου· περὶ δὲ τούτου τὸ αἴτιον εἴρηται πρότερον. εἴρηται δὲ καὶ περὶ τῶν ἀτελεῖς τικτόντων τὸ αἴτιον. Ἡ δὲ γένεσις καὶ τούτων ἢ μὲν ἐκ τοῦ ὥου τὸν αὐτὸν ἔχει τρόπον ὥνπερ καὶ τῶν σελαχῶν τῶν ἐντὸς φωτοκοῦντων, πλὴν ἢ γ' αὐξήσις ταχεῖα καὶ ἐκ μικρῶν καὶ τὸ ἔσχατον τοῦ ὥου σκληρότερον. ἢ δὲ τοῦ ὥου αὐξήσις ὁμοία τοῖς σκώληξιν ἐστίν· καὶ γὰρ τὰ σκωληκοτοκοῦντα τῶν ζώων μικρὸν ἀποτίκτει τὸ πρῶτον, τοῦτο δ' αὐξάνεται δι' αὐτοῦ καὶ οὐ διὰ πρόσφυσιν οὐδεμίαν. τὸ δ' αἴτιον παραπλήσιον ὥπερ ἐπὶ τῆς ζύμης· καὶ γὰρ ἡ ζύμη ἐκ μικρᾶς μεγάλης γίγνεται τοῦ μὲν στερεωτέρου ὑγραινομένου τοῦ δ' ὑγροῦ πνευματουμένου. δημιουργεῖ δὲ τοῦτο ἢ τοῦ ψυχικοῦ θερμοῦ φύσις ἐν τοῖς ζώοις, ἐν δὲ ταῖς ζύμαις ἢ τοῦ χυμοῦ τοῦ συγκραθέντος θερμότης. αὐξάνεται μὲν οὖν τὰ ὦα ἐξ ἀνάγκης μὲν διὰ ταύτην τὴν αἰτίαν (ἔχει γὰρ περίττωμα ζυμῶδες), χάριν δὲ τοῦ βελτίονος· ἐν ταῖς ὑστέραις γὰρ ἀδύνατον αὐτοῖς λαμβάνειν ὅλην τὴν αὐξήσιν διὰ τὴν τῶν ζώων πολυτοκίαν τούτων. διὰ τοῦτο γὰρ καὶ μικρὰ ἀάμπαν ἀποκρίνεται καὶ ταχεῖαν λαμβάνει τὴν αὐξήσιν, μικρὰ μὲν διὰ τὸ στενοχωρῆ τὴν ὑστέραν εἶναι πρὸς τὸ πλῆθος τῶν ὦδων, ταχὺ δ' ὥπως μὴ χρονίζόντων ἐν τῇ γενέσει περὶ τὴν αὐξήσιν φθείρηται τὸ γένος, ἐπεὶ καὶ νῦν τὰ πολλὰ φθείρεται τῶν ἐκτικτομένων κυημάτων. διόπερ πολύγονόν ἐστι τὸ γένος τὸ τῶν ἰχθύων· ἀναμάχεται γὰρ ἡ φύσις τῷ πλήθει τὴν φθοράν. εἰσὶ δὲ τινες οἱ διαρρήγνυνται τῶν ἰχθύων, οἷον ἡ καλουμένη βελόνη, διὰ τὸ μέγεθος τῶν ὦδων· αὕτη γὰρ ἀντὶ τοῦ πολλὰ μεγάλα τὰ κυήματα ἴσχει· τοῦ γὰρ πλήθους ἢ φύσις ἀφελοῦσα προσέθηκε πρὸς τὸ μέγεθος.

Ὅτι μὲν οὖν αὐξάνεται τε καὶ δι' ἣν αἰτίαν τὰ (755b.) τοιαῦτα τῶν ὦδων εἴρηται.

Κεφάλαιο 5

Ὅτι δ' ὀτοκοῦσι καὶ οὗτοι οἱ ἰχθύες σημείον τὸ καὶ τοὺς ζωτοκοῦντας τῶν ἰχθύων οἷον τὰ σελάχη ὀτοκεῖν ἐν αὐτοῖς πρῶτον· δηλὸν γὰρ ὅτι τὸ γένος ὅλον ἐστὶν ὀτοκόκον τὸ τῶν ἰχθύων. τέλος μέντοι οὐθέν λαμβάνει τῶν τοιούτων ὦν ὅσων ἐστὶ τὸ μὲν θῆλυ τὸ δ' ἄρρεν καὶ γίνονται ἐξ ὀχείας, ἐὰν μὴ ἐπιρράνη ὁ ἄρρεν τὸν θορόν.

Εἰσὶ δέ τινες οἱ φασὶ πάντας εἶναι τοὺς ἰχθύς θήλεις ἔξω τῶν σελαχῶν, οὐκ ὀρθῶς λέγοντες· οἷονται γὰρ διαφέρειν τῶν νομιζομένων ἄρρενων τοὺς θήλεις αὐτῶν ὥσπερ τῶν φυτῶν ἐν ὅσοις τὸ μὲν καρποφορεῖ τὸ δ' ἄκαρπὸν ἐστὶν, οἷον ἐλάα καὶ κότινος καὶ συκῆ καὶ ἐρινεός· ὁμοίως δὲ καὶ τοὺς ἰχθύς πλὴν τῶν σελαχῶν· τούτοις γὰρ οὐκ ἀμφισβητοῦσιν. καίτοι ὡσαύτως τε διάκεινται οἱ ἄρρενες περὶ τὰ θορικὰ οἱ τε σελαχῶδεις καὶ οἱ ἐν τῷ γένει τῷ τῶν ὀτοκόκων, καὶ σπέρμα κατὰ τὴν ὥραν φαίνεται ἀμφοῖν ἐκθλιβόμενον.

ἔχουσι δὲ καὶ ὑστέρας αἱ θήλειαι· ἔδει δ' οὐ μόνον τοὺς ὀτοκοῦντας ἀλλὰ καὶ τοὺς ἄλλους ἔχειν μὲν, ἀλλὰ διαφορούσας τῶν ὀτοκοῦντων [ὥσπερ αἱ ἡμίονοι ἐν τῷ γένει τῷ τῶν λοφούρων] εἶπερ ἦν θῆλυ τὸ γένος πᾶν ἀλλ' ἄτεκνοί τινες αὐτῶν. νῦν δ' οἱ μὲν ἔχουσι θορικὰ οἱ δ' ὑστέρας, καὶ ἐν ἅπασιν ἔξω δυοῖν, ἐρυθρίνου καὶ χάννης, αὕτη ἐστὶν ἡ διαφορά· οἱ μὲν γὰρ θορικὰ ἔχουσιν οἱ δ' ὑστέρας. ἡ δ' ἀπορία δι' ἣν οὕτως ὑπολαμβάνουσιν εὖλυτος τὸ συμβαῖνον ἀκούσασιν. οὐθέν γὰρ τῶν ὀχευομένων πολλὰ φασὶ τίκτειν, λέγοντες ὀρθῶς· ὅσα γὰρ ἐξ αὐτῶν γεννᾷ τέλεια ἢ ζῶα ἢ ὦα οὐ πολυτοκεῖ οὕτως ὥσπερ οἱ ὀτοκοῦντες τῶν ἰχθύων· ἄπλετον γὰρ τι τὸ τούτων πλῆθος τῶν ὦν ἐστὶν. ἀλλὰ τοῦτο οὐχὶ συνεωράκεσαν ὅτι οὐχ ὁμοιοτρόπως τοῖς τῶν ὀρνίθων ἔχει τὰ περὶ τὰ ὦα τῶν ἰχθύων. οἱ μὲν γὰρ ὀρνίθες καὶ τῶν τετραπόδων ὅσα ὀτοκεῖ, καὶ εἴ τι τῶν σελαχῶδων, τέλειον ὦν γεννῶσι, καὶ οὐ λαμβάνει ἐξεληθὸν αὐξήσιν, -οἱ δ' ἰχθύες ἀτελεῖ, καὶ λαμβάνει θύραζε τὰ ὦα τὴν αὐξήσιν. ἔτι καὶ ἐπὶ τῶν μαλακίων τὸν αὐτὸν ἔχει τρόπον καὶ ἐπὶ τῶν μαλακοστράκων ἃ καὶ συνδυαζόμενα ὀράται διὰ τὸ χρόνιον εἶναι τὸν συνδυασμὸν αὐτῶν· καὶ τούτων φανερόν ἐστι τὸ μὲν ἄρρεν ὄν, τὸ δ' ἔχον ὑστέραν. ἄτοπον δὲ καὶ τὸ μὴ ἐν παντὶ <τῷ> γένει ταύτην (756a.) εἶναι τὴν δύναμιν, ὥσπερ ἐν τοῖς ζωτοκόκοις τὸ μὲν ἄρρεν τὸ

δὲ θῆλυ. αἴτιον δὲ τοῖς ἐκείνως λέγουσι τῆς ἀγνοίας τὸ τὰς διαφορὰς μὴ δῆλας εἶναι παντοδαπὰς οὐσας περὶ τε τὰς ὀχείας τῶν ζώων καὶ τὰς γενέσεις, ἀλλ' ἐξ ὀλίγων θεωροῦντας οἶεσθαι δεῖν ἔχειν ὁμοίως ἐπὶ πάντων.

Διὸ καὶ οἱ λέγοντες τὰς κυήσεις εἶναι ἐκ τοῦ ἀνακάπτειν τὸ σπέρμα τοὺς θήλεις τῶν ἰχθύων οὐ κατανενοηκότες ἔνια λέγουσιν οὕτως. ὑπὸ τὸν αὐτὸν γὰρ καιρὸν οἱ τ' ἄρρενες τὸν θορὸν καὶ αἱ θήλειαι τὰ φά ἔχουσι, καὶ ὅσῳ ἂν ἡ ἐγγυτέρω ἡ θήλεια τοῦ τίκτειν τότε πλείων καὶ ὑγρότερος ὁ θορὸς ἐν τῷ ἄρρενι ἐγγίνεται. καὶ ὥσπερ ἡ αὐξησης κατὰ τὸν αὐτὸν χρόνον τοῦ θοροῦ ἐν τῷ ἄρρενι καὶ τοῦ φῶς ἐν τῇ θηλείᾳ οὕτω καὶ ἡ ἄφεις συμβαίνει· οὔτε γὰρ αἱ θήλειαι ἀθρόα ἐκτίκτουσιν ἀλλὰ κατὰ μικρόν, οὐθ' οἱ ἄρρενες ἀθρόον ἀφιᾶσι τὸν θορόν. καὶ ταῦτα πάντα συμβαίνει κατὰ λόγον· ὥσπερ γὰρ καὶ τὸ τῶν ὀρνέων γένος ἐν ἐνίοις ἴσχει μὲν φά ἄνευ κυήσεως-ὀλίγα δὲ καὶ ὀλιγάκις, ἀλλ' ἐξ ὀχείας τὰ πολλά-τοῦτ' αὐτὸ συμβαίνει καὶ ἐπὶ τῶν ἰχθύων, ἦττον δέ. ἄγονα δὲ καὶ ἀμφοτέροις γίγνεται τὰ αὐτόματα ἐὰν μὴ ἐπιρράνη τὸ ἄρρεν, ἐν ὅσοις γένεσιν αὐτῶν καὶ τὸ ἄρρεν ἐστίν. τοῖς μὲν οὖν ὀρνισι διὰ τὸ τέλεια ἐξιέναι τὰ φά ἔτι ἐντὸς ὄντων ἀνάγκη τοῦτο συμβῆναι· τοῖς δ' ἰχθύσι διὰ τὸ ἀτελεῖ καὶ ἔξω λαμβάνειν τὴν αὐξησην πᾶσιν, εἰ καὶ μητ' ἐντὸς ἐξ ὀχείας γένηται γόνιμον, ὅμως τὰ ἔξω ἐπιρραϊνόμενα σώζεται, καὶ ἐνταῦθα ἀναλίσκεται ὁ θορὸς τοῖς ἄρρεσιν. διὸ καὶ συγκαταβαίνει ἐλαττούμενος ἅμα τοῖς φῶσι τοῖς ἐν τοῖς θήλεσιν· αἰ γὰρ τοῖς ἐκτικτομένοις ἐπιρραίνουσι παρακολουθοῦντες. ὥστε ἄρρενες μὲν καὶ θήλειες εἰσὶ καὶ ὀχεύονται πάντες, εἰ μὴ ἐν τινι γένει ἀδιόριστόν ἐστι τὸ θῆλυ καὶ τὸ ἄρρεν, καὶ ἄνευ τῆς τοῦ ἄρρενος γονῆς οὐ γίγνεται τῶν τοιούτων οὐθέν.

Συμβάλλεται δὲ πρὸς τὴν ἀπάτην αὐτοῖς καὶ τὸ ταχὺν εἶναι τὸν συνδυασμὸν τῶν τοιούτων ἰχθύων ὥστε πολλοὺς λανθάνειν καὶ τῶν ἀλίεων· οὐθεὶς γὰρ αὐτῶν οὐθέν τηρεῖ τοιοῦτον τοῦ γινῶναι χάριν, ἀλλ' ὅμως ὠμμένος ὁ συνδυασμός ἐστιν. τὸν αὐτὸν γὰρ τρόπον οἱ (756b.) τε δελφῖνες ὀχεύονται παραπίπτοντες καὶ οἱ ἰχθύες ὅσοις ἐμποδίζει τὸ οὐραῖον, ἀλλὰ τῶν μὲν δελφίνων χρονιωτέρα ἡ ἀπόλυσίς ἐστι, τῶν δὲ τοιούτων ἰχθύων ταχεῖα. διόπερ ταύτην οὐχ ὀρῶντες, τὰς δ' ἀνακάψεις τοῦ θοροῦ καὶ τῶν φῶν, καὶ οἱ ἀλίεις περὶ τῆς κυήσεως τῶν ἰχθύων τὸν εὐήθη λέγουσι λόγον καὶ τεθρυλημένον ὅνπερ καὶ Ἡρόδοτος ὁ μυθολόγος, ὡς κυῖσκομένων τῶν ἰχθύων ἐκ

τοῦ ἀνακάπτειν τὸν θορόν, οὐ συνορῶντες ὅτι τοῦτ' ἔστιν ἀδύνατον.
ὁ γὰρ πόρος ὁ διὰ τοῦ στόματος εἰσιὼν εἰς τὴν κοιλίαν φέρει ἀλλ'
οὐκ εἰς τὰς ὑστέρας· καὶ τὸ μὲν εἰς τὴν κοιλίαν ἐλθὼν ἀνάγκη τροφήν
γίγνεσθαι (καταπέττεται γάρ), αἱ δ' ὑστέραι φαίνονται πλήρεις ψῶν,
-ἅ πόθεν εἰσῆλθεν;

Κεφάλαιο 6

Ὅμοίως δὲ καὶ περὶ τὴν τῶν ὀρνίθων γένεσιν ἔχει. εἰσὶ γάρ τινες οἱ λέγουσι κατὰ τὸ στόμα μίγνυσθαι τοὺς τε κόρακας καὶ τὴν ἴβιν καὶ τῶν τετραπόδων τίκτειν κατὰ τὸ στόμα τὴν γαλῆν. ταῦτα γὰρ καὶ Ἀναξαγόρας καὶ τῶν ἄλλων τινὲς φυσικῶν λέγουσι λίαν ἀπλῶς καὶ ἀσκεπτῶς λέγοντες, περὶ μὲν οὖν τῶν ὀρνίθων ἐκ συλλογισμοῦ διαψευδόμενοι τῷ τὴν μὲν ὀχείαν ὀλιγάκις ὀρᾶσθαι τὴν τῶν κοράκων, τὴν δὲ τοῖς ῥύγχεσι πρὸς ἄλληλα κοινωνίαν πολλάκις ἦν πάντα ποιεῖται τὰ κορακῶδη τῶν ὀρνέων· δηλὸν δὲ τοῦτο ἐπὶ τῶν τιθασευομένων κολοιῶν. τὸ δ' αὐτὸ τοῦτο ποιεῖ καὶ τὸ τῶν περιστερῶν γένος· ἀλλὰ διὰ τὸ καὶ ὀχευόμενα φαίνεσθαι, διὰ τοῦτο ταύτης οὐ τετυχήκασι τῆς φήμης.

τὸ δὲ κορακῶδες γένος οὐκ ἔστιν ἀφροδισιαστικόν (ἔστι γὰρ τῶν ὀλιγογόνων), ἐπεὶ ὥπται γ' ἤδη καὶ τοῦτο ὀχευόμενον. τὸ δὲ δὴ μὴ συλλογίζεσθαι πῶς εἰς τὰς ὑστέρας ἀφικνεῖται τὸ σπέρμα διὰ τῆς κοιλίας πεττούσης ἀεὶ τὸ ἐγγιγνόμενον καθάπερ τὴν τροφήν, ἄτοπον. ὑστέρας δ' ἔχουσι καὶ ταῦτα τὰ ὄρνεα, καὶ ὥα φαίνεται πρὸς τοῖς ὑποζώμασιν. καὶ ἡ γαλῆ καθάπερ τᾶλλα τετράποδα τὸν αὐτὸν τρόπον ἔχει ἐκείνοις τὰς ὑστέρας-ἐξ ὧν εἰς τὸ στόμα πῇ βαδιεῖται τὸ ἔμβρυον; ἀλλὰ διὰ τὸ τίκτειν ἀμπαν μικρὰ τὴν γαλῆν καθάπερ καὶ τᾶλλα σχιζόποδα, περὶ ὧν (757a.) ὕστερον ἐροῦμεν, τῷ δὲ στόματι πολλάκις μεταφέρειν τοὺς νεοττούς, ταύτην πεποίηκε τὴν δόξαν.

Εὐθηκῶς δὲ καὶ λίαν διεψευσμένοι καὶ οἱ περὶ τρόχου καὶ ὑαίνης λέγοντες. φασὶ γὰρ τὴν μὲν ὕαιναν πολλοί, τὸν δὲ τρόχον Ἡρόδωρος ὁ Ἡρακλεώτης δύο αἰδοῖα ἔχειν, ἄρρενος καὶ θήλεος, καὶ τὸν μὲν τρόχον αὐτὸν αὐτὸν ὀχεύειν, τὴν δ' ὕαιναν ὀχεύειν καὶ ὀχεύεσθαι παρ' ἑτος. ὥπται γὰρ ἡ ὕαινα ἐν ἔχουσα αἰδοῖον· ἐν ἐνίοις γὰρ τόποις οὐ σπάνις τῆς θεωρίας· ἀλλ' ἔχουσιν αἱ ὕαιναι ὑπὸ τὴν κέρκον ὁμοίαν γραμμὴν τῷ τοῦ θήλεος αἰδοίῳ. ἔχουσι μὲν οὖν καὶ οἱ ἄρρενες καὶ αἱ θήλειαι τὸ τοιοῦτον σημεῖον, ἀλλ' ἀλίσκονται οἱ ἄρρενες μᾶλλον· διὸ τοῖς ἐκ παρόδου θεωροῦσι ταύτην ἐποίησε τὴν δόξαν. ἀλλὰ περὶ μὲν τούτων ἄλις τὰ εἰρημένα.

Κεφάλαιο 7

Περὶ δὲ τῆς τῶν ἰχθύων γενέσεως ἀπορήσειεν ἂν τις διὰ τίνα ποτὲ αἰτίαν τῶν μὲν σελαχιδῶν οὐθ' αἱ θήλειαι τὰ κυήματα οὐθ' οἱ ἄρρενες ἀπορραίνοντες ὀρῶνται τὸν θορόν, τῶν δὲ μὴ ζωοτόκων καὶ αἱ θήλειαι τὰ φᾶ καὶ οἱ ἄρρενες τὸν θορόν. αἴτιον δ' ὅτι τὸ γένος οὐ πολὺσπερμον ὅλως τὸ τῶν σελαχιδῶν· καὶ ἔτι αἱ γε θήλειαι πρὸς τῷ διαζώματι τὰς ὑστέρας ἔχουσιν. τὰ γὰρ ἄρρενα τῶν ἀρρένων καὶ τὰ θήλεα τῶν θηλειῶν ὁμοίως διαφέρουσιν· ὀλιγοχούστεροι γὰρ πρὸς τὴν γονὴν οἱ σελαχίδεις εἰσίν. τὸ δ' ἄρρεν γένος ἐν τοῖς φωτόκοις, καθάπερ αἱ θήλειαι τὰ φᾶ διὰ πλῆθος ἀποτίκτουσιν, οὕτως ἐκείνοι ἀπορραίνουσιν· πλείω γὰρ ἔχουσι θορόν ἢ ὅσον πρὸς τὴν ὀχεῖαν ἱκανόν· μᾶλλον γὰρ βούλεται ἡ φύσις δαπανᾶν τὸν θορόν πρὸς τὸ συναύξειν τὰ φᾶ, ὅταν ἀποτεκῇ ἡ θήλεια, ἢ πρὸς τὴν ἐξ ἀρχῆς σύστασιν. καθάπερ γὰρ ἐν τε τοῖς ἄνω καὶ τοῖς ὑπογούις εἴρηται λόγοις, τὰ μὲν τῶν ὀρνέων φᾶ τελειοῦται ἐντός, τὰ δὲ τῶν ἰχθύων ἐκτός. τρόπον γὰρ τίνα ἔοικε τοῖς σκωληκοτοκοῦσιν· ἔτι γὰρ ἀτελέστερον προῖεται τὸ κύημα τὰ σκωληκοτόκα τῶν ζῴων. ἀμφοτέροις δὲ τὴν τελείωσιν καὶ τοῖς τῶν ὀρνίθων φῶις καὶ τοῖς τῶν ἰχθύων ποιεῖ τὸ ἄρρεν, ἀλλὰ τοῖς μὲν τῶν ὀρνίθων ἐντός (τελειοῦται γὰρ ἐντός), τοῖς δὲ τῶν ἰχθύων ἐκτός διὰ τὸ ἔξω προῖεσθαι ἀτελές, ἐπεὶ συμβαίνει γε ἐπ' ἀμφοτέρων (757b.) ταῦτόν.

Τῶν μὲν οὖν ὀρνίθων τὰ τε ὑπηνέμια γίνεταί γόνιμα, καὶ τὰ προωχευμένα ὑφ' ἐτέρου γένους τῶν ἀρρένων μεταβάλλει τὴν φύσιν εἰς τὸν ὕστερον ὀχεύοντα. καὶ τὰ οἰκεῖα δέ, ἴδιανά τε ὄντα ἂν διαλείπη τὴν ὀχεῖαν, ὅταν ὀχευθῇ ἄλλαν ποιεῖ ταχείαν λαμβάνειν τὴν αὐξήσιν· οὐ μέντοι κατὰ πάντα τὸν χρόνον, ἀλλ' ἐάνπερ πρότερον γένηται ἢ ὀχεῖα πρὶν μεταβαλεῖν εἰς τὴν τοῦ λευκοῦ ἀπόκρισιν. τοῖς δὲ τῶν ἰχθύων οὐθὲν ὥρισταί τοιοῦτον ἀλλὰ πρὸς τὸ σῶζεσθαι ταχέως ἐπιρραίνουσιν οἱ ἄρρενες. αἴτιον δ' ὅτι οὐ δίχροα ταῦτα· διόπερ οὐχ ὥρισταί τοιοῦτος καιρὸς τούτοις οἷος ἐπὶ τῶν ὀρνίθων. τοῦτο δὲ συμβέβηκεν εὐλόγως· ὅταν γὰρ τὸ λευκὸν ἀφωρισμένον ἦ καὶ τὸ ὠχρὸν ἀπ' ἀλλήλων, ἔχει ἤδη τὴν ἀπὸ τοῦ ἄρρενος ἀρχὴν (ταύτην γὰρ συμβάλλεται τὸ ἄρρεν). τὰ μὲν οὖν ὑπηνέμια λαμβάνει τὴν γένωσιν μέχρι τοῦ ἐνδεχομένου αὐτοῖς· τελεωθῆναι μὲν γὰρ εἰς ζῶον ἀδύνατον (δεῖ γὰρ αἰσθήσεως), τὴν δὲ

θρεπτικὴν δύναμιν τῆς ψυχῆς ἔχει καὶ τὰ θήλεα καὶ τὰ ἄρρενα καὶ πάντα τὰ ζῶντα, καθάπερ εἴρηται πολλάκις· διόπερ αὐτὸ τὸ φὸν ὥς μὲν φυτοῦ κύημα τέλειόν ἐστιν, ὥς δὲ ζῴου ἀτελές. εἰ μὲν οὖν μὴ ἐνῆν ἄρρεν ἐν τῷ γένει αὐτῶν, ἐγίγνετ' ἂν ὥσπερ καὶ ἐπὶ τῶν ἰχθύων-εἵπερ ἔστι τι τοιοῦτον γένος οἷον ἄνευ ἄρρενος γεννᾶν· εἴρηται δὲ περὶ αὐτῶν καὶ πρότερον ὅτι οὐ πω ὥπται ἱκανῶς-νῦν δ' ἐστὶν ἐν πᾶσι τοῖς ὄρνισι τὸ μὲν θῆλυ τὸ δ' ἄρρεν, ὥσθ' ἡ μὲν φυτὸν τετελέωκεν (διόπερ οὐ μεταβάλλει πάλιν μετὰ τὴν ὀχείαν) ἡ δ' οὐ φυτὸν οὐ τετελέωκεν, οὐδ' ἀποβαίνει ἐξ αὐτοῦ ἕτερον οὐθέν· οὔτε γὰρ ὥς φυτὸν ἀπλῶς οὔθ' ὥς ζῴον ἐκ συνδυασμοῦ γέγονεν. τὰ δ' ἐξ ὀχείας μὲν γενόμενα φὰ διακεκριμένα δ' εἰς τὸ λευκὸν γίγνεται κατὰ τὸ πρῶτον ὀχεῦσαν· ἔχει γὰρ ἀμφοτέρας ἤδη τὰς ἀρχάς.

Κεφάλαιο 8

Τὸν αὐτὸν δὲ τρόπον καὶ τὰ μαλάκια ποιεῖται τὸν τόκον οἶον σηπία καὶ τὰ τοιαῦτα, καὶ τὰ μαλακόστρακα οἶον κάραβοι καὶ τὰ συγγενῇ τούτοις· τίκτει γὰρ ἐξ ὀχείας καὶ ταῦτα καὶ συνδυαζόμενον τὸ ἄρρεν τῷ θήλει πολλάκις ὥπται. διόπερ οὐδ' ἱστορικῶς οὐδὲ ταύτῃ φαίνονται λέγοντες οἱ (758a.) φάσκοντες τοὺς ἰχθῦς πάντας εἶναι θήλεις καὶ τίκτειν οὐκ ἐξ ὀχείας· τὸ γὰρ ταῦτα μὲν ἐξ ὀχείας οἶσθαι ἐκεῖνα δὲ μὴ θαυμαστόν, εἴ τε τοῦτ' ἐλελήθει σημεῖον ἀπειρίας. γίγνεται δὲ ὁ συνδυασμὸς τούτων χρονιώτερος πάντων, ὥσπερ τῶν ἐντόμων, εὐλόγως· ἄναιμα γάρ ἐστι, διόπερ ψυχρὰ τὴν φύσιν.

Ταῖς μὲν οὖν σηπίασι καὶ ταῖς τευθίσιν δύο τὰ ῥα φαίνεται διὰ τὸ διηρθρῶσθαι τὴν ὑστέραν καὶ φαίνεσθαι δικρόαν· τὸ δὲ τῶν πολυπόδων ἐν ῥόν. αἴτιον δ' ἡ μορφή στρογγύλη τὴν ἰδέαν οὔσα καὶ σφαιροειδής· ἡ γὰρ σχίσις ἄδηλος πληρωθείσης ἐστίν. δικρόα δὲ καὶ ἡ τῶν καράβων ἐστὶν ὑστέρα. ἀποτίκτουσι δὲ τὸ κύημα ἀτελὲς καὶ ταῦτα πάντα διὰ τὴν αὐτὴν αἰτίαν. τὰ μὲν οὖν καραβῶδη τὰ θήλεα πρὸς αὐτὰ ποιεῖται τὸν τόκον (διόπερ μείζους ἔχει τὰς πλάκας τὰ θήλεα αὐτῶν ἢ τὰ ἄρρενα, φυλακῆς χάριν τῶν ῥόν), τὰ δὲ μαλάκια ἔξω. καὶ τοῖς μὲν θήλεσι τῶν μαλακίων ἐπιρραίνει ὁ ἄρρην καθάπερ οἱ ἄρρενες ἰχθύες τοῖς ῥοῖς, καὶ γίγνεται συνεχὲς καὶ κολλῶδες· τοῖς δὲ καραβῶδεσιν οὐτ' ὥπται τοιοῦτον οὐτ' εὐλογον· ὑπὸ τε γὰρ τῇ θηλείᾳ τὸ κύημα καὶ σκληρόδερμόν ἐστι, καὶ λαμβάνει αὔξησιν καὶ ταῦτα καὶ τὰ τῶν μαλακίων ἔξω, καθάπερ καὶ τὰ τῶν ἰχθύων.

Προσπέφυκε δ' ἡ γιγνομένη σηπία τοῖς ῥοῖς κατὰ τὸ πρόσθιον· ταύτῃ γὰρ ἐνδέχεται μόνον· ἔχει γὰρ μόνον ἐπὶ ταῦτὸ τὸ ὀπίσθιον μέρος καὶ τὸ πρόσθιον. τὸ δὲ σχῆμα τῆς θέσεως ὃν ἔχει γιγνόμενα τρόπον δεῖ θεωρεῖν ἐκ τῶν ἱστοριῶν.

Κεφάλαιο 9

Περὶ μὲν οὖν τῶν ἄλλων ζώων τῆς γενέσεως εἴρηται, καὶ πεζῶν καὶ πλωτῶν καὶ πτηνῶν· περὶ δὲ τῶν ἐντόμων καὶ τῶν ὀστρακοδέρμων λεκτέον κατὰ τὴν ὑψηγημένην μέθοδον. εἰπωμεν δὴ πρῶτον περὶ τῶν ἐντόμων. ὅτι μὲν οὖν τὰ μὲν ἐξ ὀχείας γίνεταί τῶν τοιούτων τὰ δ' αὐτόματα πρότερον ἐλέχθη, πρὸς δὲ τούτοις ὅτι σκωληκοτοκεῖ καὶ διὰ τίν' αἰτίαν σκωληκοτοκεῖ. σχεδὸν γὰρ ἔοικε πάντα τρόπον τινὰ σκωληκοτοκεῖν τὸ πρῶτον· τὸ γὰρ ἀτελέστατον κύημα τοιοῦτόν ἐστιν, ἐν πᾶσι δὲ καὶ τοῖς ζωοτοκοῦσι καὶ τοῖς ὠοτοκοῦσι τέλειον ὦν τὸ κύημα τὸ πρῶτον ἀδιόριστον ὃν λαμβάνει τὴν αὐξησιν· τοιαύτη δ' ἐστὶν ἡ τοῦ σκώληκος φύσις. μετὰ δὲ τοῦτο τὰ μὲν ὠοτοκεῖ τὸ κύημα τέλειον τὰ δ' ἀτελές, ἔξω (758b.) δὲ γίνεταί τέλειον, καθάπερ ἐπὶ τῶν ἰχθύων εἴρηται πολλάκις. τὰ δ' ἐν αὐτοῖς ζωοτοκοῦντα τρόπον τινὰ μετὰ τὸ σύστημα τὸ ἐξ ἀρχῆς ὠοειδὲς γίνεταί· περιέχεται γὰρ τὸ ὑγρὸν ὑμένι λεπτῷ, καθάπερ ἂν εἴ τις ἀφέλοι τὸ τῶν ὦν ὀστρακον· διὸ καὶ καλοῦσι τὰς τότε γιγνομένας τῶν κυημάτων φθορὰς ἐκρύσεις.

Τὰ δ' ἔντομα καὶ γεννᾷ τὰ γεννῶντα σκώληκας, καὶ τὰ γινόμενα μὴ δι' ὀχείας ἀλλ' αὐτόματα ἐκ τοιαύτης γίνεταί πρῶτον συστάσεως. δεῖ γὰρ καὶ τὰς κάμπας εἶδος τι τιθῆναι σκώληκος, καὶ τὰ τῶν ἀραχνίων. καίτοι δόξειεν ἂν ὦις εἰκέναι διὰ τὴν τοῦ σχήματος περιφέρειαν καὶ τούτων [δὲ] ἓν καὶ πολλὰ τῶν ἄλλων· ἀλλ' οὐ τῷ σχήματι λεκτέον οὐδὲ τῇ μαλακότητι καὶ σκληρότητι (καὶ γὰρ σκληρὰ τὰ κυήματα γίνεταί ἐνίων) ἀλλὰ τῷ ὅλον μεταβάλλειν καὶ μὴ ἐκ μορίου τινὸς γίνεσθαι τὸ ζῶον. προελθόντα δὲ πάντα τὰ σκωληκώδη καὶ τοῦ μεγέθους λαβόντα τέλος οἷον ὦν γίνεταί· σκληρύνεται τε γὰρ περὶ αὐτὰ τὸ κέλυφος καὶ ἀκίνητιζουσι κατὰ τοῦτον τὸν καιρόν.

δηλον δὲ τοῦτο ἐν τοῖς σκώληξι τοῖς τῶν μελιττῶν καὶ σφηκῶν καὶ ταῖς κάμπαις. τούτου δ' αἴτιον ὅτι ἡ φύσις ὥσπερανεὶ πρὸ ὥρας ὠοτοκεῖ διὰ τὴν ἀτέλειαν τὴν αὐτῆς, ὥς ὄντος τοῦ σκώληκος ἔτι ἐν αὐξήσει ὦοι μαλακοῦ. τὸν αὐτὸν δὲ τρόπον καὶ ἐπὶ τῶν ἄλλων συμβαίνει πάντων τῶν μὴ ἐξ ὀχείας γιγνομένων ἐν ἐρίοις ἢ τισιν ἄλλοις τοιούτοις καὶ τῶν ἐν τοῖς ὕδασι. πάντα γὰρ μετὰ τὴν τοῦ σκώληκος φύσιν ἀκίνητίσαντα καὶ τοῦ κελύφους περιξηρανθέντος,

μετὰ ταῦτα τούτου ῥαγέντος ἐξέρχεται καθάπερ ἐξ ὤου ζῶον ἐπιτελεσθὲν ἐπὶ τῆς τρίτης γενέσεως, ὧν τὰ [πλεῖστα] περωτὰ <πλείω> τῶν πεζῶν ἐστίν.

Κατὰ λόγον δὲ συμβαίνει καὶ τὸ θαυμασθὲν ἂν δικαίως ὑπὸ πολλῶν· αἱ τε γὰρ κάμπαι λαμβάνουσαι τὸ πρῶτον τροφήν μετὰ ταῦτα οὐκέτι λαμβάνουσιν, ἀλλ' ἀκίνητίζουσιν αἱ καλούμεναι ὑπὸ τινῶν χρυσαλλίδες, καὶ τῶν σφηκῶν οἱ σκώληκες καὶ τῶν μελιττῶν *** μετὰ ταῦτα αἱ καλούμεναι νύμφαι γίνονται, καὶ τοιοῦτον οὐδὲν ἔχουσιν. καὶ γὰρ ἡ τῶν ὤων φύσις ὅταν λάβῃ τέλος ἀναυξῆς ἐστὶ, τὸ δὲ πρῶτον αὐξάνεται καὶ λαμβάνει τροφήν ἕως ἂν διορισθῇ καὶ γένηται τέλειον ὄν. τῶν δὲ σκωλήκων οἱ μὲν ἔχουσιν ἐν ἑαυτοῖς τὸ τοιοῦτον ὅθεν τρεφομένοις ἐπιγίγνεται (759a.) τὸ τοιοῦτον περίττωμα, <οῖον> οἱ τῶν μελιττῶν καὶ σφηκῶν, οἱ δὲ λαμβάνουσι θύραθεν, ὥσπερ αἱ τε κάμπαι καὶ τῶν ἄλλων τινὲς σκωλήκων.

Διότι μὲν οὖν τριγενῇ τε γίγνεται τὰ τοιαῦτα καὶ δι' ἣν αἰτίαν ἐκ κινουμένων ἀκίνητίζει πάλιν εἴρηται· γίγνεται δὲ τὰ μὲν ἐξ ὀχείας αὐτῶν καθάπερ οἱ τε ὄρνιθες καὶ τὰ ζῴοτoca καὶ τῶν ἰχθύων οἱ πλεῖστοι, τὰ δ' αὐτόματα καθάπερ ἔνια τῶν φυομένων.

Κεφάλαιο 10

Ἡ δὲ τῶν μελιττῶν γένεσις ἔχει πολλὴν ἀπορίαν. εἵπερ γάρ ἐστι καὶ περὶ τοὺς ἰχθῦς τοιαύτη τις γένεσις ἐνίων ὥστ' ἄνευ ὀχείας γεννᾶν, τοῦτο συμβαίνειν ἔοικε καὶ περὶ τὰς μελίττας ἐκ τῶν φαινομένων. ἀνάγκη γὰρ ἦτοι φέρειν αὐτὰς ἄλλοθεν τὸν γόνον ὥσπερ τινὲς φασι-καὶ τοῦτον ἢ φυόμενον αὐτόματον ἢ ἄλλου τινὸς ζώου τίκτοντος-ἢ γεννᾶν αὐτάς· ἢ τὸν μὲν φέρειν τὸν δὲ γεννᾶν (καὶ γὰρ τοῦτο λέγουσιν οἱ τινες ὡς τὸν τῶν κηφήνων μόνων φέρουσι γόνον)· καὶ γεννᾶν ἢ ὀχευομένας ἢ ἀνοχεύτους· καὶ ὀχευομένας γεννᾶν ἦτοι ἕκαστον γένος καθ' αὐτό, ἢ ἓν τι αὐτῶν τᾶλλα, ἢ συνδυαζόμενον ἄλλο γένος ἄλλω, -λέγω δ' οἷον μελίττας μὲν γίνεσθαι ἐκ μελιττῶν συνδυαζομένων, κηφήνας δ' ἐκ κηφήνων καὶ τοὺς βασιλεῖς ἐκ τῶν βασιλέων, ἢ πάντα τᾶλλα ἐξ ἐνὸς οἷον ἐκ τῶν καλουμένων βασιλέων καὶ ἡγεμόνων, ἢ ἐκ τῶν κηφήνων καὶ τῶν μελιττῶν· φασι γὰρ τινες τοὺς μὲν ἄρρενας εἶναι τὰς δὲ θηλείας, οἱ δὲ τὰς μὲν μελίττας ἄρρενας τοὺς δὲ κηφήνας θήλεις.

Ταῦτα δ' ἐστὶ πάντα ἀδύνατα συλλογιζόμενοις τὰ μὲν ἐκ τῶν συμβαινόντων ἰδίᾳ περὶ τὰς μελίττας, τὰ δ' ἐκ τῶν κοινοτέρων τοῖς ἄλλοις ζώοις. εἴτε γὰρ μὴ τίκτουσαι φέρουσιν ἄλλοθεν ἔδει γίνεσθαι μελίττας, καὶ μὴ φερουσῶν τῶν μελιττῶν, ἐν τοῖς τόποις ἐξ ὧν τὸ σπέρμα φέρουσιν. διὰ τί γὰρ μετενεχθέντος μὲν ἔσται, ἐκεῖ δ' οὐκ ἔσται; προσήκει γὰρ οὐδὲν ἦττον, εἴτε φυόμενον ἐν τοῖς ἄνθεσιν αὐτόματον εἴτε ζώου τινὸς τίκτοντος. κἂν εἴ γε ζώου τινὸς ἐτέρου τὸ σπέρμα ἦν, ἐκεῖνο ἔδει γίνεσθαι ἐξ αὐτοῦ ἀλλὰ μὴ μελίττας. ἔτι δὲ τὸ μὲν μέλι κομίζειν εὖλογον (τροφή γάρ), τὸ δὲ τὸν γόνον ἀλλότριον ὄντα καὶ μὴ τροφήν ἄτοπον. τίνος γὰρ χάριν; πάντα γὰρ ὅσα πραγματεύεται περὶ τὰ τέκνα περὶ τὸν φαινόμενον οἰκεῖον (759b.) διαπονεῖται γόνον.

Ἀλλὰ μὴν οὐδὲ τὰς μὲν μελίττας θηλείας εἶναι τοὺς δὲ κηφήνας ἄρρενας εὖλογον· οὐδενὶ γὰρ τὸ πρὸς ἀλκὴν ὄπλον τῶν θηλειῶν ἀποδίδωσιν ἢ φύσις, εἰσὶ δ' οἱ μὲν κηφήνες ἄκεντροι, αἱ δὲ μέλιτται πᾶσαι κέντρον ἔχουσιν. οὐδὲ τοῦναντίον εὖλογον, τὰς μὲν μελίττας ἄρρενας τοὺς δὲ κηφήνας θήλεις· οὐδὲν γὰρ τῶν ἀρρένων εἴωθε διαπονεῖσθαι περὶ τὰ τέκνα, νῦν δ' αἱ μέλιτται τοῦτο ποιοῦσιν. ὅλως δ' ἐπειδὴ φαίνεται ὁ μὲν τῶν κηφήνων γόνος ἐγγιγνόμενος καὶ

μηθενὸς ὄντος κηφήνος, ὁ δὲ τῶν μελιττῶν οὐκ ἐγγιγνόμενος ἄνευ τῶν βασιλέων (διὸ καὶ φασὶ τινες τὸν τῶν κηφήνων φέρεσθαι μόνον), δηλὸν ὥς οὐκ ἐξ ὀχείας γίνονται, οὔτ' ἐξ ἑκατέρου τοῦ γένους αὐτοῦ αὐτῷ συνδουζομένου οὔτ' ἐκ μελιττῶν καὶ κηφήνων. τό τε τοῦτον φέρειν μόνον διὰ τε τὰ εἰρημένα ἀδύνατον, καὶ οὐκ εὐλογον μὴ περὶ πᾶν τὸ γένος αὐτῶν ὁμοίον τι συμβαίνειν πάθος. ἀλλὰ μὴν οὐδ' αὐτὰς τὰς μελίττας ἐνδέχεται τὰς μὲν ἄρρενας εἶναι τὰς δὲ θηλείας· ἐν πᾶσι γὰρ διαφέρει τοῖς γένεσι τὸ θῆλυ καὶ τὸ ἄρρεν. κἂν ἐγγένων αὐταὶ αὐτάς· νῦν δ' οὐ φαίνεται γιγνόμενος ὁ γόνος αὐτῶν ἐὰν μὴ ἐνῶσιν οἱ ἡγεμόνες, ὥς φασιν. κοινὸν δὲ καὶ πρὸς τὴν ἐξ ἀλλήλων γένεσιν καὶ πρὸς τὴν ἐκ τῶν κηφήνων, καὶ χωρὶς καὶ μετ' ἀλλήλων, τὸ μηδέποτε ὄφθαι ὀχευόμενον μηθέν αὐτῶν· εἰ δ' ἦν ἐν αὐτοῖς τὸ μὲν θῆλυ τὸ δ' ἄρρεν πολλάκις ἂν τοῦτο συνέβαιnen. λείπεται δ', εἴπερ ἐξ ὀχείας γίγνεται, τοὺς βασιλεῖς γεννᾶν συνδουζομένους.

Ἄλλ' οἱ κηφήνες φαίνονται γιγνόμενοι καὶ μὴ ἐνότων ἡγεμόνων, ὧν οὔτε φέρειν οἶόν τε τὸν γόνον τὰς μελίττας οὔτε γεννᾶν αὐτάς ὀχευόμενας. λείπεται δὴ, καθάπερ φαίνεται συμβαῖνον ἐπὶ τινων ἰχθύων, τὰς μελίττας ἄνευ ὀχείας γεννᾶν τοὺς κηφήνας, τῷ μὲν γεννᾶν οὐσας θηλείας, ἐχούσας δ' ἐν αὐταῖς ὥσπερ τὰ φυτὰ καὶ τὸ θῆλυ καὶ τὸ ἄρρεν. διὸ καὶ τὸ πρὸς τὴν ἀλκὴν ἔχουσιν ὄργανον· οὐ γὰρ δεῖ θῆλυ καλεῖν ἐν ᾧ ἄρρεν μὴ ἐστί κεχωρισμένον. εἰ δ' ἐπὶ τῶν κηφήνων τοῦτο φαίνεται συμβαῖνον καὶ γιγνόμενοι μὴ ἐξ ὀχείας, ἤδη καὶ κατὰ τῶν μελιττῶν καὶ τῶν βασιλέων τὸν αὐτὸν ἀναγκαῖον εἶναι λόγον καὶ μὴ γεννᾶσθαι ἐξ ὀχείας. εἰ μὲν οὖν ἄνευ τῶν βασιλέων ἐφαίνετ' ἐγγιγνόμενος ὁ γόνος (760a.) τῶν μελιττῶν, κἂν τὰς μελίττας ἀναγκαῖον ἦν ἐξ αὐτῶν ἄνευ ὀχείας γίγνεσθαι. νῦν δ' ἐπειδὴ τοῦτ' οὐ φασιν οἱ περὶ τὴν θεραπείαν τούτων τῶν ζώων ὄντες, λείπεται τοὺς βασιλεῖς καὶ αὐτοὺς γεννᾶν καὶ τὰς μελίττας.

Ὅντος δὴ περιττοῦ τοῦ γένους καὶ ἰδίου τοῦ τῶν μελιττῶν καὶ ἡ γένεσις αὐτῶν ἴδιος εἶναι φαίνεται. τὸ μὲν γὰρ γεννᾶν τὰς μελίττας ἄνευ ὀχείας εἶη ἂν καὶ ἐπ' ἄλλων ζώων συμβαῖνον, ἀλλὰ τὸ μὴ τὸ αὐτὸ γένος γεννᾶν ἴδιον· οἱ γὰρ ἐρυθρίνοι γεννῶσιν ἐρυθρίνους καὶ αἱ χάνναι χάννας. αἴτιον δ' ὅτι καὶ αὐταὶ γεννῶνται αἱ μέλιτται οὐχ ὥσπερ αἱ μυῖαι καὶ τὰ τοιαῦτα τῶν ζώων ἀλλ' ἐξ ἐτέρου μὲν συγγενοῦς δὲ γένους· γίνονται γὰρ ἐκ τῶν ἡγεμόνων. διὸ καὶ ἔχει ἀνάλογόν πως ἡ γένεσις αὐτῶν· οἱ μὲν γὰρ ἡγεμόνες μεγέθει μὲν

ὅμοιοί εἰσι τοῖς κηφήσι, τῷ δὲ κέντρον ἔχειν ταῖς μελίτταις· αἱ μὲν οὖν μέλιτται κατὰ τοῦτ' εἰκόσιν αὐτοῖς, οἱ δὲ κηφήνες κατὰ τὸ μέγεθος· ἀνάγκη γάρ τι παραλλάττειν, εἰ μὴ δεῖ αἰεὶ τὸ αὐτὸ γένος ἐξ ἐκάστου γίνεσθαι (τοῦτο δ' ἀδύνατον· πᾶν γὰρ ἂν τὸ γένος ἡγεμόνες ἦσαν). αἱ μὲν οὖν μέλιτται κατὰ τὴν δύναμιν αὐτοῖς ὁμοιώνται καὶ τῷ τίκτειν, οἱ δὲ κηφήνες κατὰ τὸ μέγεθος. [εἰ δ' εἶχον καὶ κέντρον ἡγεμόνες ἂν ἦσαν. νῦν δὲ τοῦτο λείπεται τῆς ἀπορίας· οἱ γὰρ ἡγεμόνες ἀμφοτέροις εἰκόσιν ἐν τῷ αὐτῷ τοῖς γένεσι, τῷ μὲν κέντρον ἔχειν ταῖς μελίτταις τῷ δὲ μεγέθει τοῖς κηφήσιν.] ἀναγκαῖον δὲ καὶ τοὺς ἡγεμόνας γίνεσθαι ἐκ τινος. ἐπεὶ οὖν οὐτ' ἐκ τῶν μελιττῶν οὐτ' ἐκ τῶν κηφήνων αὐτοῖς ἀναγκαῖον καὶ αὐτοὺς γεννᾶν.

γίνονται δ' ἐπὶ τέλει οἱ κύτταροι αὐτῶν καὶ οὐ πολλοὶ τὸν ἀριθμόν. ὥστε συμβαίνει τοὺς μὲν ἡγεμόνας γεννᾶν μὲν καὶ αὐτούς, γεννᾶν δὲ καὶ ἄλλο τι γένος (τοῦτο δ' ἐστὶ τὸ τῶν μελιττῶν), τὰς δὲ μελίττας ἄλλο μὲν τι γεννᾶν, τοὺς κηφήνας, αὐτὰς δὲ μηκέτι γεννᾶν, ἀλλὰ τοῦτ' ἀφηρηθῆναι αὐτῶν. ἐπεὶ δ' αἰεὶ τὸ κατὰ φύσιν ἔχει τάξιν, διὰ τοῦτο τῶν κηφήνων ἀναγκαῖον καὶ τὸ ἄλλο τι γένος γεννᾶν ἀφηρηθῆναι. ὅπερ καὶ φαίνεται συμβαῖνον· αὐτοὶ μὲν γὰρ γίνονται, ἄλλο δ' οὐθὲν γεννῶσιν ἀλλ' ἐν τῷ τρίτῳ ἀριθμῷ πέρας ἔσχεν ἡ γένεσις. καὶ οὕτω δὴ συνέστηκε τῇ φύσει (760b.) καλῶς ὥστ' αἰεὶ διαμένειν ὄντα τὰ γένη καὶ μηδὲν ἐλλείπειν, μὴ πάντων γεννώντων. εὐλογον δὲ καὶ τοῦτο συμβαίνειν, ἐν μὲν ταῖς εὐετηρίαις μέλι καὶ κηφήνας γίνεσθαι πολλοὺς, ἐν δὲ ταῖς ἐπομβρίαις ὅλως γόνον πολύν. αἱ μὲν γὰρ ὑγρότητες περίττωμα ποιοῦσι πλεῖον ἐν τοῖς σώμασι τῶν ἡγεμόνων, αἱ δ' εὐετηρίαὶ ἐν τοῖς τῶν μελιττῶν· ἐλάττω γὰρ ὄντα τῷ μεγέθει δεῖται τῆς εὐετηρίας μᾶλλον. εὖ δὲ καὶ τὸ τοὺς βασιλεῖς ὥσπερ πεποιημένους ἐπὶ τέκνωσιν ἔσω μένειν ἀφειμένους τῶν ἀναγκαίων ἔργων, καὶ μέγεθος δὲ ἔχειν ὥσπερ ἐπὶ τεκνοποιίᾳ συστάντος τοῦ σώματος αὐτῶν· τοὺς τε κηφήνας ἀργοὺς ἅτ' οὐδὲν ἔχοντας ὄπλον πρὸς τὸ διαμάχεσθαι περὶ τῆς τροφῆς καὶ διὰ τὴν βραδυτῆτα τὴν τοῦ σώματος.

αἱ δὲ μέλιτται μέσαι [τὸ μέγεθός] εἰσιν ἀμφοῖν (χρήσιμοι γὰρ οὕτω πρὸς τὴν ἐργασίαν), καὶ ἐργάτιδες ὥς καὶ τέκνα τρέφουσαι καὶ πατέρας. ὁμολογούμενον δ' ἐστὶ καὶ τὸ ἐπακολουθεῖν τοῖς βασιλεῦσι τῷ τὴν γένεσιν ἐκ τούτων εἶναι τὴν τῶν μελιττῶν (εἰ γὰρ μηθὲν τοιοῦτον ὑπῆρχεν, οὐκ εἶχε λόγον τὰ συμβαίνοντα περὶ τὴν ἡγεμονίαν αὐτῶν), καὶ τὸ τοὺς μὲν ἔαν μηθὲν ἐργαζομένους ὥς

γονεῖς, τοὺς δὲ κηφήνας κολάζειν ὥς τέκνα· κάλλιον γὰρ τὰ τέκνα κολάζειν καὶ ὧν μηθέν ἐστιν ἔργον. τὸ δὲ τὰς μελίττας γεννᾶν πολλὰς αὐτοὺς ὄντας ὀλίγους τοὺς ἡγεμόνας παραπλήσιον ἔοικε συμβαίνειν τῇ γενέσει τῇ τῶν λεόντων, οἱ τὸ πρῶτον πέντε γεννήσαντες ὕστερον ἐλάττω γεννῶσι καὶ τέλος ἓν, εἴτ' οὐδέν. οἱ δ' ἡγεμόνες τὸ μὲν πρῶτον πλῆθος, ὕστερον δ' ὀλίγους αὐτοὺς, κάκειων μὲν ἐλάττω τὸν γόνον, αὐτῶν δ' ἐπεὶ τοῦ πλήθους ἀφεῖλε, τὸ μέγεθος αὐτοῖς ἀπέδωκεν ἡ φύσις.

Ἐκ μὲν οὖν τοῦ λόγου τὰ περὶ τὴν γένεσιν τῶν μελιττῶν τοῦτον ἔχειν φαίνεται τὸν τρόπον καὶ ἐκ τῶν συμβαίνειν δοκούντων περὶ αὐτάς· οὐ μὴν εἰληπταί γε τὰ συμβαίνοντα ἰκανῶς, ἀλλ' ἐάν ποτε ληφθῇ τότε τῇ αἰσθήσει μᾶλλον τῶν λόγων πιστευτέον, καὶ τοῖς λόγοις ἐὰν ὁμολογούμενα δεικνύωσι τοῖς φαινομένοις.

[[Πρὸς δὲ τὸ μὴ ἐξ ὀχείας γίγνεσθαι σημεῖον καὶ τὸ τὸν γόνον φαίνεσθαι μικρὸν ἐν τοῖς τοῦ κηρίου κυτταρίοις· ὅσα δ' ἐξ ὀχείας τῶν ἐντόμων γεννᾶται συνδυάζεται (761a.) μὲν πολὺν χρόνον, τίκτει δὲ ταχέως καὶ μέγεθος ἔχον σκωληκοειδές.]]

Περὶ δὲ τὴν γένεσιν τὴν τῶν συγγενῶν ζώων αὐταῖς, οἷον ἀνθρηνῶν τε καὶ σφηκῶν, τρόπον τιν' ἔχει παραπλησίως πᾶσιν, ἀφήρηται δὲ τὸ περιττὸν εὐλόγως· οὐ γὰρ ἔχουσιν οὐθὲν θεῖον ὥσπερ τὸ γένος τὸ τῶν μελιττῶν. γεννῶσι μὲν γὰρ αἱ μῆτραι καλούμεναι καὶ τὰ πρῶτα συμπλάττουσι τῶν κηρίων, ὀχευόμεναι δὲ γεννῶσιν ὑπ' ἀλλήλων· ὥπται γὰρ πολλάκις ὁ συνδυασμὸς αὐτῶν. πόσας δ' ἔχουσι διαφορὰς ἢ πρὸς ἄλληλα τῶν τοιούτων γενῶν ἕκαστον ἢ πρὸς τὰς μελίττας ἐκ τῶν περὶ τὰς ἱστορίας ἀναγεγραμμένων δεῖ θεωρεῖν.

Κεφάλαιο 11

Καὶ περὶ μὲν τῶν ἐντόμων τῆς γενέσεως εἴρηται πάντων, περὶ δὲ τῶν ὀστρακοδέρμων λεκτέον.

Ἐχει δὲ καὶ τούτων τὰ περὶ τὴν γένεσιν τῇ μὲν ὁμοίως τῇ δ' οὐχ ὁμοίως τοῖς ἄλλοις. καὶ τοῦτ' εὐλόγως συμβαίνει· πρὸς μὲν γὰρ τὰ ζῶα φυτοῖς εἰκόμασι πρὸς δὲ τὰ φυτὰ ζώοις, ὥστε τρόπον μὲν τινα ἀπὸ σπέρματος φαίνεσθαι γιγνόμενα, τρόπον δ' ἄλλον οὐκ ἀπὸ σπέρματος, καὶ τῇ μὲν αὐτόματα τῇ δ' ἀφ' αὐτῶν, ἢ τὰ μὲν οὕτως τὰ δ' ἐκείνως. διὰ δὲ τὸ τοῖς φυτοῖς ἀντίστροφον ἔχειν τὴν φύσιν, διὰ τοῦτο ἐν μὲν τῇ γῇ τῶν ὀστρακοδέρμων οὐθὲν ἢ μικρόν τι γίνεταί γένος, οἷον τὸ τῶν κοχλιῶν κἂν εἴ τι τοιοῦτον ἕτερον μὲν σπάνιον δέ, ἐν δὲ τῇ θαλάττῃ καὶ τοῖς ὁμοίοις ὑγροῖς πολλὰ καὶ παντοδαπὴν ἔχοντα μορφήν. τὸ δὲ τῶν φυτῶν γένος ἐν μὲν τῇ θαλάττῃ καὶ τοῖς τοιούτοις μικρὸν καὶ ἀμπαν ὥς εἰπεῖν οὐθέν, ἐν δὲ τῇ γῇ τὰ τοιαῦτα γίνεταί πάντα· τὴν γὰρ φύσιν ἀνάλογον ἔχει, καὶ διέστηκεν ὅσῳ ζωτικώτερον τὸ ὑγρὸν τοῦ ξηροῦ καὶ γῆς ὕδωρ τοσοῦτον ἢ τῶν ὀστρακοδέρμων φύσις τῆς τῶν φυτῶν, ἐπεὶ βούλεται γε ὥς τὰ φυτὰ πρὸς τὴν γῆν οὕτως ἔχειν τὰ ὀστρακόδερμα πρὸς τὸ ὑγρὸν, ὥς ὄντα τὰ μὲν φυτὰ ὥσπερανει ὄστρεα χερσαῖα τὰ δὲ ὄστρεα ὥσπερανει φυτὰ ἐνυδρα.

Διὰ τοιαύτην δ' αἰτίαν καὶ πολύμορφα τὰ ἐν τῷ ὑγρῷ μᾶλλον ἐστὶ τῶν ἐν τῇ γῇ· τό τε γὰρ ὑγρὸν εὐπλαστοτέραν ἔχει τὴν φύσιν τῆς γῆς καὶ σωματικὴν οὐ πολλῷ ἥττον, καὶ μάλιστα τὰ ἐν τῇ θαλάττῃ τοιαῦτα· (761b.) τὸ μὲν γὰρ πότιμον γλυκὺ μὲν καὶ τρόφιμον, ἥττον δὲ σωματῶδες καὶ ψυχρόν ἐστιν. διόπερ ὅσα ἄναιμα καὶ μὴ θερμὰ τὴν φύσιν οὐ γίνεταί ἐν ταῖς λίμναις οὐδὲ τῶν ἀλμυρῶν ἐν τοῖς ποτιμωτέροις ἀλλ' ἥττον, οἷον τὰ ὀστρακόδερμα καὶ τὰ μαλάκια καὶ τὰ μαλακόστρακα (πάντα γὰρ ἄναιμα καὶ ψυχρὰ ταῦτα τὴν φύσιν ἐστίν), ἐν δὲ ταῖς λιμνοθαλάτταις καὶ πρὸς ταῖς ἐκβολαῖς τῶν ποταμῶν γίνονται· ζητοῦσι γὰρ ἅμα τὴν τ' ἀλέαν καὶ τὴν τροφήν, ἢ δὲ θάλαττα ὑγρά τε καὶ σωματώδης πολλῷ μᾶλλον τοῦ ποτίμου καὶ θερμὴ τὴν φύσιν ἐστί, καὶ κεκοινώνηκε πάντων τῶν μορίων, ὑγροῦ καὶ πνεύματος καὶ γῆς, ὥστε καὶ πάντων μετέχειν τῶν καθ' ἕκαστον γιγνομένων ἐν τοῖς τόποις ζῶων. τὰ μὲν γὰρ φυτὰ θείη τις ἂν γῆς, ὕδατος δὲ τὰ ἐνυδρα, τὰ δὲ πεζὰ ἀέρος· τὸ δὲ μᾶλλον καὶ ἥττον καὶ

ἐγγύτερον καὶ πορρώτερον πολλὴν ποιεῖ καὶ θαυμαστὴν διαφορὰν. τὸ δὲ τέταρτον γένος οὐκ ἐπὶ τούτων τῶν τόπων δεῖ ζητεῖν· καίτοι βούλεται γέ τι κατὰ τὴν τοῦ πυρὸς εἶναι τάξιν· τοῦτο γὰρ τέταρτον ἀριθμεῖται τῶν σωμάτων. ἀλλὰ τὸ μὲν πῦρ αἰεὶ φαίνεται τὴν μορφήν οὐκ ἰδίαν ἔχον, ἀλλ' ἐν ἐτέρῳ τῶν σωμάτων· ἢ γὰρ ἀήρ ἢ καπνὸς ἢ γῆ φαίνεται τὸ πεπυρωμένον. ἀλλὰ δεῖ τὸ τοιοῦτον γένος ζητεῖν ἐπὶ τῆς σελήνης· αὕτη γὰρ φαίνεται κοινωνοῦσα τῆς τετάρτης ἀποστάσεως. ἀλλὰ περὶ μὲν τούτων ἄλλος ἂν εἴη λόγος.

Ἡ δὲ τῶν ὀστρακοδέρμων συνίσταται φύσις τῶν μὲν αὐτόματος, ἐνίων δὲ προεϊμένων τινὰ δύναμιν ἀφ' αὐτῶν, πολλάκις δὲ γιγνομένων καὶ τούτων ἀπὸ συστάσεως αὐτομάτου. δεῖ δὴ λαβεῖν τὰς γενέσεις τὰς τῶν φυτῶν. τούτων γὰρ γίγνεται τὰ μὲν ἀπὸ σπέρματος τὰ δ' ἀπὸ σπαραγμάτων ἀποφυτευομένων, ἔνια δὲ τῷ παραβλαστάνειν, οἷον τὸ τῶν κρομμύων γένος. τοῦτον μὲν οὖν οἱ μύες γίνονται τὸν τρόπον· παραφύονται γὰρ ἐλάττους αἰεὶ παρὰ τὴν ἀρχὴν. κήρυκες δὲ καὶ πορφύραι καὶ τὰ λεγόμενα κηριάζειν οἷον ἀπὸ σπερματικῆς φύσεως προῖενται μυξώδεις ὑγρότητας. σπέρμα δ' οὐθὲν τούτων δεῖ νομίζειν ἀλλὰ κατὰ τὸν εἰρημένον τρόπον μετέχειν τῆς ὁμοιότητος τοῖς φυτοῖς· διὸ καὶ γίγνεται πλῆθος τῶν τοιούτων ὅταν ἅπαξ (762a.) γένηται τι. πάντα μὲν γὰρ ταῦτα καὶ αὐτόματα συμβαίνει γίνεσθαι, κατὰ λόγον δὲ καὶ ὑπαρξάντων συνίστασθαι μᾶλλον. περιγίγεσθαι γάρ τι περίττωμα πρὸς ἐκάστῳ τῆς ἀρχῆς εὐλογον ἀφ' ἧς παραβλαστάνει τῶν παραφυομένων ἕκαστον. ἐπεὶ δὲ παραπλησίαν ἔχει τὴν δύναμιν ἢ τροφὴ καὶ τὸ ταύτης περίττωμα, τῶν κηριαζόντων ὁμοίαν εἰκὸς ἐστὶν εἶναι τῇ ἐξ ἀρχῆς συστάσει οὐσίαν· διόπερ εὐλογον γίνεσθαι καὶ ἐκ ταύτης.

Ὅσα δὲ μῆτε παραβλαστάνει μῆτε κηριάζει, τούτων δὲ πάντων ἡ γένεσις αὐτόματός ἐστιν. πάντα δὲ τὰ συνιστάμενα τὸν τρόπον τοῦτον καὶ ἐν γῇ καὶ ἐν ὕδατι φαίνεται γιγνώμενα μετὰ σήψεως καὶ μιγνυμένου τοῦ ὀμβρίου ὕδατος· ἀποκρinoμένου γὰρ τοῦ γλυκέος εἰς τὴν συνισταμένην ἀρχὴν τὸ περιττεῦον τοιαύτην λαμβάνει μορφήν. γίγνεται δ' οὐθὲν σηπόμενον ἀλλὰ πεττόμενον· ἢ δὲ σῆψις καὶ τὸ σαπρὸν περίττωμα τοῦ πεφθέντος ἐστίν· οὐθὲν γὰρ ἐκ παντὸς γίγνεται καθάπερ οὐδ' ἐν τοῖς ὑπὸ τῆς τέχνης δημιουργουμένοις· οὐθὲν γὰρ ἂν ἔδει ποιεῖν· νῦν δὲ τὸ μὲν ἢ τέχνη τῶν ἀχρήστων ἀφαιρεῖ, τὸ δ' ἢ φύσις.

Γίγνονται δ' ἐν γῇ καὶ ἐν ὑγρῷ τὰ ζῶα καὶ τὰ φυτὰ διὰ τὸ ἐν γῇ

μὲν ὕδωρ ὑπάρχειν ἐν δ' ὕδατι πνεῦμα, ἐν δὲ τούτῳ παντὶ θερμότητα ψυχικὴν, ὥστε τρόπον τινὰ πάντα ψυχῆς εἶναι πλήρη· διὸ συνίσταται ταχέως ὁπόταν ἐμπεριληφθῇ. ἐμπεριλαμβάνεται δὲ καὶ γίγνεται θερμαινομένων τῶν σωματικῶν ὑγρῶν οἷον ἀφρώδης πομφόλυξ. αἱ μὲν οὖν διαφοραὶ τοῦ τιμιώτερον εἶναι τὸ γένος καὶ ἀτιμότερον τὸ συνιστάμενον ἐν τῇ περιλήψει τῆς ἀρχῆς τῆς ψυχικῆς ἐστίν. τούτου δὲ καὶ οἱ τόποι αἴτιοι καὶ τὸ σῶμα τὸ περιλαμβανόμενον. ἐν δὲ τῇ θαλάττῃ πολὺ τὸ γεῶδες ἔνεστιν· διόπερ ἐκ τῆς τοιαύτης συστάσεως ἢ τῶν ὀστρακοδέρμων γίγνεται φύσις, κύκλω μὲν τοῦ γεώδους σκληρυνομένου καὶ πηγνυμένου τὴν αὐτὴν πῆξιν τοῖς ὀστοῖς καὶ τοῖς κέρασι (πυρὶ γὰρ ἄτηκτα ταῦτ' ἐστίν), ἐντὸς δὲ περιλαμβανομένου τοῦ τὴν ζωὴν ἔχοντος σώματος.

Μόνον δὲ τῶν τοιούτων συνδυαζομένων ἐώραται τὸ τῶν κοχλιῶν γένος. εἰ δ' ἐκ τοῦ συνδυασμοῦ ἢ γενεαὶς αὐτῶν ἐστίν ἢ μὴ οὐπω συνῶπται ἱκανῶς.

Ζητήσῃς δ' ἂν τις βουλόμενος ὀρθῶς ζητεῖν τί (762b.) τὸ κατὰ τὴν ὑλικὴν ἀρχὴν συνιστάμενόν ἐστιν ἐν τοῖς τοιούτοις. ἐν μὲν γὰρ τοῖς θήλεσι περίττωμά τι τοῦ ζώου τοῦτ' ἐστίν, ὃ ἢ παρὰ τοῦ ἄρρενος ἀρχὴ κινουσα, δυνάμει τοιοῦτον ὃν οἷον ἀφ' οὗπερ ἦλθεν, ἀποτελεῖ τὸ ζῶον. ἐνταῦθα δὲ τί δεῖ λέγειν τὸ τοιοῦτον, καὶ πόθεν καὶ τίς ἢ κινουσα ἀρχὴ ἢ κατὰ τὸ ἄρρεν; δεῖ δὴ λαβεῖν ὅτι καὶ ἐν τοῖς ζώοις τοῖς γεννῶσιν ἐκ τῆς εἰσιούσης τροφῆς ἢ ἐν τῷ ζῳῷ θερμότης ἀποκρίνουσα καὶ συμπτέτουσα ποιεῖ τὸ περίττωμα, τὴν ἀρχὴν τοῦ κυήματος. ὁμοίως δὲ καὶ ἐν τοῖς φυτοῖς, πλὴν ἐν μὲν τούτοις καὶ ἐν τισὶ τῶν ζώων οὐθὲν προσδεῖται τῆς τοῦ ἄρρενος ἀρχῆς (ἔχει γὰρ ἐν αὐτοῖς μεμιγμένην), τὸ δὲ τῶν πλείστων ζώων περίττωμα προσδεῖται. τροφή δ' ἐστὶ τοῖς μὲν ὕδωρ καὶ γῆ, τοῖς δὲ τὰ ἐκ τούτων, ὥσθ' ὅπερ ἢ ἐν τοῖς ζώοις θερμότης ἐκ τῆς τροφῆς ἀπεργάζεται, τοῦθ' ἢ τῆς ὥρας ἐν τῷ περιέχοντι θερμότης ἐκ θαλάττης καὶ γῆς συγκρίνει πέττουσα καὶ συνίστησιν. τὸ δ' ἐναπολαμβανόμενον ἢ ἀποκρινόμενον ἐν τῷ πνεύματι τῆς ψυχικῆς ἀρχῆς κύημα ποιεῖ καὶ κίνησιν ἐντίθησιν. ἢ μὲν οὖν τῶν φυτῶν τῶν ἀπὸ ταυτομάτου γιγνομένων σύστασις ὁμοειδής ἐστίν· ἕκ τινος γὰρ μορίου γίγνεται, καὶ τὸ μὲν ἀρχὴ τὸ δὲ τροφή γίγνεται ἢ πρώτη τοῖς ἐκφυομένοις. -τὰ δὲ τῶν ζώων σκωληκοτοκεῖται, καὶ τῶν ἀναίμων ὅσα μὴ ἀπὸ ζώων γίγνεται καὶ τῶν ἐναίμων, οἷον γένος τι κεστρέων καὶ ἄλλων ποταμίων ἰχθύων, ἔτι δὲ τὸ τῶν ἐγγέλεων γένος· ἅπαντα γὰρ ταῦτα

καίπερ ὀλίγαίμων ἔχοντα τὴν φύσιν ὅμως ἔναιμά ἐστι, καὶ καρδίαν ἔχουσι τὴν ἀρχὴν τὴν τῶν μορίων αἱματικήν. τὰ δὲ καλούμενα γῆς ἔντερα σκώληκος ἔχει φύσιν, ἐν οἷς ἐγγίγνεται τὸ σῶμα τὸ τῶν ἐγγέλεων. διὸ καὶ περὶ τῆς τῶν ἀνθρώπων καὶ τετραπόδων γενέσεως ὑπολάβοι τις ἄν, εἴπερ ἐγίγνοντό ποτε γηγενεῖς ὥσπερ φασί τινες, δύο τρόπων τούτων γίνεσθαι τὸν ἕτερον· ἢ γὰρ ὡς σκώληκος συνισταμένου τὸ πρῶτον ἢ ἐξ ὧν. -ἀναγκαῖον γὰρ ἢ ἐν αὐτοῖς ἔχειν τὴν τροφήν εἰς τὴν αὔξησιν (τὸ δὲ τοιοῦτον κύημα σκώληξ ἐστίν) ἢ λαμβάνειν ἄλλοθεν, τοῦτο δ' ἢ ἐκ τῆς γεννώσης ἢ ἐκ μορίου τοῦ κυήματος· ὥστ' εἰ θάτερον ἀδύνατον, ἐπιρρεῖν ἐκ τῆς γῆς ὥσπερ ἐν τοῖς ἄλλοις (763a.) ζῴοις ἐκ τῆς μητρός, ἀναγκαῖον ἐκ μορίου λαμβάνειν τοῦ κυήματος· τὴν δὲ τοιαύτην ἐξ ὧν λέγομεν εἶναι γένεσιν.

-ὅτι μὲν οὖν, εἴπερ ἦν τις ἀρχὴ τῆς γενέσεως πᾶσι τοῖς ζῴοις, εὐλόγον τοῖν δυοῖν τούτοις εἶναι τὴν ἐτέραν φανερόν· ἦττον δ' ἔχει λόγον ἐκ τῶν ὧν· οὐθενὸς γὰρ τοιαύτην ὁρῶμεν ζῴου γένεσιν ἀλλὰ τὴν ἐτέραν, καὶ τῶν ἐναίμων τῶν ῥηθέντων καὶ τῶν ἀναίμων. τοιαῦτα δ' ἐστὶ τῶν τ' ἐντόμων ἔνια καὶ τὰ ὀστρακόδερμα περὶ ὧν ὁ λόγος· οὐ γὰρ ἐκ μορίου γίνονται τινος ὥσπερ τὰ ὠτοκούμενα, ποιοῦνται δὲ καὶ τὴν αὔξησιν ὁμοίως τοῖς σκώληξιν. ἐπὶ τὰ ἄνω γὰρ καὶ τὴν ἀρχὴν αὐξάνονται οἱ σκώληκες· ἐν τῷ κάτω γὰρ ἡ τροφή τοῖς ἄνω. καὶ τοῦτό γε ὁμοίως ἔχει τοῖς ἐκ τῶν ὧν, πλὴν ἐκεῖνα μὲν καταναλίσκει πᾶν, ἐν δὲ τοῖς σκωληκοτοκουμένοις ὅταν αὐξηθῇ ἐκ τῆς ἐν τῷ κάτω μορίῳ συστάσεως τὸ ἄνω μόριον, οὕτως ἐκ τῆς ὑπολοιπῆς διαρθροῦται τὸ κάτωθεν. αἴτιον δ' ὅτι καὶ ὕστερον ἢ τροφή ἐν τῷ μορίῳ τῷ ὑπὸ τὸ ὑπόζωμα γίγνεται πᾶσιν. ὅτι δὲ τοῦτον τὸν τρόπον ποιεῖται τὰ σκωληκώδη τὴν αὔξησιν δῆλον ἐπὶ τῶν μελιττῶν καὶ τῶν τοιούτων· κατ' ἀρχὰς γὰρ τὸ μὲν κάτω μόριον μέγα ἔχουσι τὸ δ' ἄνω μικρόν. καὶ ἐπὶ τῶν ὀστρακοδέρμων δὲ τὸν αὐτὸν τρόπον ἔχει τὰ περὶ τὴν αὔξησιν. φανερόν δὲ καὶ τοῦτ' ἐπὶ τῶν στρομβωδῶν <ἐν> ταῖς ἐλίκαις· αἱ γὰρ αὐξανομένων γίνονται μείζους ἐπὶ τὸ πρόσθιον καὶ τὴν καλουμένην κεφαλὴν.

Ὅν μὲν οὖν τρόπον ἔχει ἡ γένεσις καὶ τούτων καὶ τῶν ἄλλων τῶν αὐτομάτων εἴρηται σχεδόν.

Ὅτι δὲ συνίσταται αὐτόματα πάντα τὰ ὀστρακόδερμα φανερόν ἐκ τῶν τοιούτων ὅτι πρὸς τε τοῖς πλοίοις γίγνεται σηπομένης τῆς ἀφρώδους ἰλύος, καὶ πολλαχοῦ οὐ πρότερον οὐθὲν ὑπῆρχε τοιοῦτον,

ὕστερον δι' ἔνδειαν ὕγρου τοῦ τόπου βορβορωθέντος ἐγένετο τὰ καλούμενα λιμνόστρεα τῶν ὀστρακηρῶν, οἷον περὶ Ῥόδον παραβαλόντος ναυτικοῦ στόλου καὶ ἐκβληθέντων κεραμίων εἰς τὴν θάλατταν, χρόνου γενομένου καὶ βορβόρου περὶ αὐτὰ συναλισθέντος ὀστρεα εὐρίσκοντ' ἐν αὐτοῖς. ὅτι δ' οὐδ' ἀφήσι τὰ τοιαῦτα οὐθὲν ἀφ' αὐτῶν γεννητικὸν τεκμήριον· (763b.) ἐπεὶ γὰρ Χῖοί τινες ἐκ Πύρρας τῆς ἐν Λέσβῳ τῶν ὀστρέων διεκόμισαν ζῶντα καὶ εἰς τόπους τινὰς τῆς θαλάττης εὐριπώδεις καὶ ὁμόρρους ἀφεῖσαν, πλείω μὲν τῷ χρόνῳ οὐδὲν ἐγένετο, τὸ δὲ μέγεθος εἰς αὔξησιν ἐπέδωκε πολὺ. τὰ δὲ λεγόμενα ὥα οὐθὲν συμβάλλεται πρὸς τὴν γένεσιν ἀλλ' ἐστὶν εὐτροφίας σημεῖον, οἷον ἐν τοῖς ἐναίμοις ἢ πιότης· διὸ καὶ πρὸς τὴν ἐδωδὴν γίγνεται εὐχυμα κατὰ τοὺς καιροὺς τούτους.

Κεφάλαιο 1

Περὶ μὲν οὖν τῆς γενέσεως τῆς τῶν ζώων εἴρηται καὶ κοινῇ καὶ χωρὶς περὶ πάντων. ἐπεὶ δ' ἐν τοῖς τελειοτάτοις αὐτῶν ἐστὶ τὸ θῆλυ καὶ τὸ ἄρρεν κεχωρισμένον, καὶ ταύτας τὰς δυνάμεις ἀρχὰς φαμεν εἶναι πάντων καὶ ζώων καὶ φυτῶν, ἀλλὰ τὰ μὲν αὐτὰς ἀχωρίστους ἔχει τὰ δὲ κεχωρισμένας, λεκτέον περὶ τῆς γενέσεως τῆς τούτων πρώτον· ἔτι γὰρ ἀτελῶν ὄντων ἐν τῷ γένει διορίζεται τὸ θῆλυ καὶ τὸ ἄρρεν. πότερον δὲ καὶ πρὶν δῆλην τὴν διαφορὰν εἶναι πρὸς τὴν αἴσθησιν ἡμῶν τὸ μὲν θῆλυ τὸ δ' ἄρρεν ἐστίν, ἐν τῇ μητρὶ λαβόντα τὴν διαφορὰν ἢ πρότερον, ἀμφισβητεῖται.

φασὶ γὰρ οἱ μὲν ἐν τοῖς σπέρμασιν εἶναι ταύτην τὴν ἐναντίωσιν εὐθύς, οἷον Ἀναξαγόρας καὶ ἕτεροι τῶν φυσιολόγων· γίνεσθαι τε γὰρ ἐκ τοῦ ἄρρενος τὸ σπέρμα, τὸ δὲ θῆλυ παρέχειν τὸν τόπον, καὶ εἶναι τὸ μὲν ἄρρεν ἐκ τῶν δεξιῶν τὸ δὲ θῆλυ ἐκ τῶν ἀριστερῶν, καὶ τῆς ὑστέρας τὰ μὲν ἄρρενα ἐν τοῖς (764a.) δεξιοῖς εἶναι τὰ δὲ θήλεα ἐν τοῖς ἀριστεροῖς. οἱ δ' ἐν τῇ μήτρᾳ, καθάπερ Ἐμπεδοκλῆς· τὰ μὲν γὰρ εἰς θερμὴν ἐλθόντα τὴν ὑστέραν ἄρρενα γίνεσθαι φησι τὰ δ' εἰς ψυχρὰν θήλεα, τῆς δὲ θερμότητος καὶ τῆς ψυχρότητος τὴν τῶν καταμνηνίων αἰτίαν εἶναι ῥύσιν, ἢ ψυχροτέραν οὖσαν ἢ θερμότεραν καὶ παλαιότεραν ἢ προσφατωτέραν. Δημόκριτος δὲ ὁ Ἀβδηρίτης ἐν μὲν τῇ μητρὶ γίνεσθαι φησι τὴν διαφορὰν τοῦ θήλεος καὶ τοῦ ἄρρενος, οὐ μέντοι διὰ θερμότητά γε ἢ ψυχρότητα τὸ μὲν γίνεσθαι θῆλυ τὸ δ' ἄρρεν ἀλλ' ὅποτέρου ἂν κρατήσῃ τὸ σπέρμα τὸ ἀπὸ τοῦ μορίου ἐλθὼν ᾧ διαφέρουσιν ἀλλήλων τὸ θῆλυ καὶ τὸ ἄρρεν.

τοῦτο γὰρ ὡς ἀληθῶς Ἐμπεδοκλῆς ῥαθυμότερον ὑπέιληφεν οἰόμενος ψυχρότητι καὶ θερμότητι διαφέρειν μόνον ἀλλήλων, ὁρῶν ὅλα τὰ μόρια μεγάλην ἔχοντα διαφορὰν τὴν τε τῶν αἰδοίων καὶ τὴν τῆς ὑστέρας. εἰ γὰρ πεπλασμένων τῶν ζώων, τοῦ μὲν τὰ μόρια ἔχοντος τὰ τοῦ θήλεος τοῦ δὲ τὰ τοῦ ἄρρενος, καθάπερ εἰς κάμινον εἰς τὴν ὑστέραν τεθείη, τὸ μὲν ἔχον ὑστέραν εἰς θερμὴν τὸ δὲ μὴ ἔχον εἰς ψυχρὰν, ἔσται θῆλυ τὸ οὐκ ἔχον ὑστέραν καὶ ἄρρεν τὸ ἔχον. τοῦτο δ' ἀδύνατον. ὥστε ταύτη γε βέλτιον ἂν λέγοι Δημόκριτος· ζητεῖ γὰρ ταύτης τῆς γενέσεως τὴν διαφορὰν καὶ πειράται λέγειν-εἰ δὲ καλῶς ἢ μὴ καλῶς ἕτερος λόγος. ἀλλὰ μὴν κἂν εἰ τῶν μορίων τῆς διαφορᾶς αἴτιον ἢ θερμότης καὶ ἢ ψυχρότης τοῦτο λεκτέον ἦν τοῖς

ἐκείνως λέγουσιν· τοῦτο γάρ ἐστιν ὡς εἰπεῖν τὸ λέγειν περὶ γενέσεως ἄρρενος καὶ θήλεος· τοῦτο γὰρ διαφέρει φανερώς. οὐ μικρὸν δὲ ἔργον τὸ ἀπ' ἐκείνης τῆς ἀρχῆς περὶ τῆς γενέσεως τούτων τῶν μορίων τὴν αἰτίαν συναγαγεῖν, ὡς ἀναγκαῖον ἀκολουθεῖν ψυχομένῳ μὲν τῷ ζῳῷ γίνεσθαι τοῦτο τὸ μόριον ἦν καλοῦσιν ὑστέραν, θερμαινομένῳ δὲ μὴ γίνεσθαι. τὸν αὐτὸν δὲ τρόπον καὶ περὶ τῶν εἰς τὴν ὁμιλίαν συντελούντων μορίων· καὶ γὰρ ταῦτα διαφέρει καθάπερ εἴρηται πρότερον.

Ἔτι δὲ γίνεταί διδύμα θήλυ καὶ ἄρρεν ἅμα ἐν τῷ αὐτῷ μορίῳ πολλάκις τῆς ὑστέρας-καὶ τοῦθ' ἱκανῶς τεθεωρήκαμεν ἐκ τῶν ἀνατομῶν ἐν πᾶσι τοῖς ζωοτοκοῦσι, καὶ ἐν τοῖς πεζοῖς καὶ ἐν τοῖς ἰχθύσιν· περὶ ὧν εἰ μὲν μὴ συνεωράκει εὐλόγως ἡμάρτανε ταύτην τὴν αἰτίαν εἰπὼν, εἰ δ' (764b.) ἑωρακῶς, ἄτοπον τὸ ἔτι νομίζειν αἰτίαν εἶναι τὴν τῆς ὑστέρας θερμότητα ἢ ψυχρότητα· ἅμφω γὰρ ἂν ἐγίγνετο ἢ θήλεα ἢ ἄρρενα, νῦν δὲ τοῦτ' οὐχ ὀρῶμεν συμβαῖνον.

Λέγοντί τε τὰ μόρια διεσπᾶσθαι τοῦ γιγνομένου (τὰ μὲν γὰρ ἐν τῷ ἄρρενί φησιν εἶναι τὰ δ' ἐν τῷ θήλει, διὸ καὶ τῆς ἀλλήλων ὁμιλίας ἐπιθυμεῖν) ἀναγκαῖον καὶ τῶν τοιούτων διηρησθαι τὸ μέγεθος καὶ γίνεσθαι σύνοδον, ἀλλ' οὐ διὰ ψύξιν ἢ θερμασίαν. ἀλλὰ περὶ μὲν τῆς τοιαύτης αἰτίας τοῦ σπέρματος τάχ' ἂν εἴη πολλὰ λέγειν· ὅλως γὰρ ἔοικεν ὁ τρόπος τῆς αἰτίας πλασματώδης εἶναι. εἰ δ' ἐστὶ περὶ σπέρματος οὕτως ἔχον ὥσπερ τυγχάνομεν εἰρηκότες, καὶ μήτ' ἀπὸ παντὸς ἀπέρχεται μήθ' ὅλως τὸ ἀπὸ τοῦ ἄρρενος παρέχει τοῖς γιγνομένοις ὕλην μηδεμίαν, καὶ πρὸς τοῦτον καὶ πρὸς Δημόκριτον καὶ εἴ τις ἄλλος οὕτω τυγχάνει λέγων ὁμοίως ἀπαντητέον. οὔτε γὰρ διεσπασμένον ἐνδέχεται τὸ σῶμα τοῦ σπέρματος εἶναι, τὸ μὲν ἐν τῷ θήλει τὸ δ' ἐν τῷ ἄρρενι, καθάπερ Ἐμπεδοκλῆς φησιν εἰπὼν· ἀλλὰ διέσπασται μελέων φύσις, ἡ μὲν ἐν ἀνδρός ... οὐτ' ἐξ ἐκατέρου πᾶν ἀποκρινόμενον τῷ κρατῆσαι τι μέρος ἄλλου μέρους γίνεσθαι τὸ μὲν θήλυ τὸ δ' ἄρρεν.

ὅλως δὲ τό γε τὴν τοῦ μέρους ὑπεροχὴν κρατήσασαν ποιεῖν θήλυ βέλτιον μὲν ἢ μηθὲν φροντίσαντα τὸ θερμὸν αἰτιασθαι μόνον, τὸ μέντοι συμβαίνειν ἅμα καὶ τὴν τοῦ αἰδοίου μορφὴν ἐτέραν δεῖται λόγου πρὸς τὸ συνακολουθεῖν ἀεὶ ταῦτ' ἀλλήλοις. εἰ γὰρ ὅτι σύνεγγυς, καὶ τῶν λοιπῶν ἕκαστον ἔδει μορίων ἀκολουθεῖν-ἐτέρῳ γὰρ ἕτερον ἐγγὺς τῶν νικόντων-ὥστε ἅμα θήλύ τ' ἂν ἦν καὶ τῇ μητρὶ εὐκοὸς ἢ ἄρρεν καὶ τῷ πατρὶ.

ἔτι ἄτοπον καὶ τὸ μόνον ταῦτ' οἶσθαι δεῖν γίνεσθαι τὰ μόρια καὶ μὴ τὸ σύνολον μεταβεβληκέναι σῶμα, καὶ μάλιστα καὶ πρῶτον τὰς φλέβας περὶ ἃς ὡς περὶ ὑπογραφὴν τὸ σῶμα περὶκεῖται τὸ τῶν σαρκῶν. ἃς οὐ διὰ τὴν ὑστέραν εὐλογον γενέσθαι ποιᾷς τινας, ἀλλὰ μᾶλλον δι' ἐκείνας τὴν ὑστέραν· ὑποδοχὴ γὰρ αἷματός τινος ἐκάτερον, προτέρα δ' ἢ τῶν φλεβῶν. τὴν δὲ κινουσαν ἀρχὴν ἀναγκαῖον ἀεὶ προτέραν εἶναι καὶ τῆς γενέσεως αἰτίαν τῷ ποιᾶν εἶναι τινα. συμβαίνει μὲν οὖν ἡ διαφορὰ τῶν μερῶν τούτων πρὸς ἄλληλα τοῖς θήλεσι καὶ τοῖς ἄρρεσιν, ἀλλ' οὐκ ἀρχὴν οἰητέον οὐδ' αἰτίαν (765a.) εἶναι ταύτην ἀλλ' ἑτέραν, κἂν εἰ μηθὲν ἀποκρίνεται σπέρμα μήτε ἀπὸ τοῦ θήλεος μήτ' ἀπὸ τοῦ ἄρρενος, ἀλλ' ὅπως δὴ ποτε συνίσταται [τὸ σπέρμα] τὸ γινόμενον.

Ὁ δ' αὐτὸς λόγος καὶ πρὸς τοὺς λέγοντας τὸ μὲν ἄρρεν ἀπὸ τῶν δεξιῶν εἶναι τὸ δὲ θῆλυ ἀπὸ τῶν ἀριστερῶν, ὅσπερ καὶ πρὸς Ἑμπεδοκλέα καὶ πρὸς Δημόκριτον. εἴτε γὰρ μηδεμίαν ὕλην συμβάλλεται τὸ ἄρρεν οὐθὲν ἂν λέγοιεν οἱ λέγοντες οὕτως· εἴτε καὶ συμβάλλεται καθάπερ φασίν, ὁμοίως ἀναγκαῖον ἀπαντᾶν καὶ πρὸς τὸν Ἑμπεδοκλέους λόγον ὃς διορίζει τὸ θῆλυ πρὸς τὸ ἄρρεν θερμότητι καὶ ψυχρότητι τῆς ὑστέρας.

οἱ δὲ τὸ αὐτὸ τοῦτο ποιοῦσι τοῖς δεξιοῖς καὶ τοῖς ἀριστεροῖς ὀρίζοντες, ὁρῶντες διαφέροντα τὸ θῆλυ καὶ τὸ ἄρρεν καὶ μορίοις ὅλοις-ὧν διὰ τίν' αἰτίαν ὑπάρξει τοῖς ἐκ τῶν ἀριστερῶν, τοῖς δ' ἐκ τῶν δεξιῶν οὐχ ὑπάρξει τὸ σῶμα τὸ τῆς ὑστέρας; ἂν γὰρ ἔλθῃ μὲν μὴ σχῇ δὲ τοῦτο τὸ μόριον, ἔσται θῆλυ οὐκ ἔχον ὑστέραν καὶ ἄρρεν ἔχον, ἂν τύχῃ. ἔτι δ' ὅπερ εἴρηται καὶ πρότερον, ὥπται καὶ θῆλυ ἐν τῷ δεξιῷ μέρει τῆς ὑστέρας καὶ ἄρρεν ἐν τῷ ἀριστερῷ καὶ ἄμφω ἐν τῷ αὐτῷ μέρει, καὶ τοῦτ' οὐχ ὅτι ἅπαξ ἀλλὰ πλεονάκις [ἢ τὸ ἄρρεν μὲν ἐν τοῖς δεξιοῖς τὸ θῆλυ δ' ἐν τοῖς ἀριστεροῖς· οὐχ ἦττον δὲ ἀμφοτέρω γίγνεται ἐν τοῖς δεξιοῖς]. παραπλησίως δέ τινες πεπεισμένοι τούτοις εἰσὶ καὶ λέγουσιν ὡς τὸν δεξιὸν ὄρχιν ἀποδουμένους ἢ τὸν ἀριστερὸν συμβαίνει τοῖς ὀχεύουσιν ἀρρενοτοκεῖν ἢ θηλυτοκεῖν· οὕτω γὰρ καὶ Λεωφάνης ἔλεγεν. ἐπὶ τε τῶν ἐκτεμνομένων τὸν ἕτερον ὄρχιν τὸ αὐτὸ τοῦτο συμβαίνειν τινές φασιν, οὐκ ἀληθῆ λέγοντες ἀλλὰ μαντευόμενοι τὸ συμβησόμενον ἐκ τῶν εἰκότων καὶ προλαμβάνοντες ὡς οὕτως ἔχον πρὶν γινόμενον οὕτως ἰδεῖν, ἔτι δ' ἀγνοοῦντες ὡς οὐθὲν συμβάλλεται πρὸς τὴν γένεσιν τῆς ἀρρενογονίας καὶ θηλυγονίας τὰ μόρια ταῦτα τοῖς ζώοις.

τούτου δὲ σημεῖον ὅτι πολλὰ τῶν ζώων αὐτά τε θήλεα καὶ ἄρρενά ἐστι, καὶ γεννᾷ τὰ μὲν θήλεα τὰ δ' ἄρρενα ὄρχεις οὐκ ἔχοντα, καθάπερ τὰ μὴ ἔχοντα πόδας, οἷον τό τε τῶν ἰχθύων γένος καὶ τὸ τῶν ὄφεων.

Τὸ μὲν οὖν θερμότητα καὶ ψυχρότητα αἰτίαν οἶεσθαι τοῦ ἄρρενος καὶ τοῦ θήλεος καὶ τὸ τὴν ἀπόκρισιν ἀπὸ τῶν δεξιῶν (765b.) γίνεσθαι ἢ τῶν ἀριστερῶν ἔχει τινὰ λόγον· θερμότερα γὰρ τὰ δεξιὰ τοῦ σώματος τῶν ἀριστερῶν καὶ τὸ σπέρμα τὸ πεπεμμένον θερμότερον, τοιοῦτον δὲ τὸ συνεστός, γονιμώτερον δὲ τὸ συνεστός μᾶλλον. ἀλλὰ λίαν τὸ λέγειν οὕτω πόρρωθέν ἐστιν ἅπτεσθαι τῆς αἰτίας, δεῖ δ' ὅτι μάλιστα προσάγειν ἐκ τῶν ἐνδεχομένων ἐγγὺς τῶν πρώτων αἰτίων.

Περὶ μὲν οὖν ὅλου τε τοῦ σώματος καὶ τῶν μορίων, τί τε ἕκαστόν ἐστι καὶ διὰ τίν' αἰτίαν εἴρηται πρότερον ἐν ἐτέροις. ἀλλ' ἐπεὶ τὸ ἄρρεν καὶ τὸ θήλυ διώρισται δυνάμει τινὶ καὶ ἀδυναμίᾳ· τὸ μὲν γὰρ δυνάμενον πέττειν καὶ συνιστάναι τε καὶ ἐκκρίνειν σπέρμα ἔχον τὴν ἀρχὴν τοῦ εἶδους ἄρρεν (λέγω δ' ἀρχὴν οὐ τὴν τοιαύτην ἐξ ἧς ὥσπερ ὕλης γίγνεται τοιοῦτον οἷον τὸ γεννῶν, ἀλλὰ τὴν κινουσαν πρώτην, ἐάν τ' ἐν αὐτῷ ἐάν τ' ἐν ἄλλῳ τοῦτο δύνηται ποιεῖν), τὸ δὲ δεχόμενον μὲν ἀδυνατοῦν δὲ συνιστάναι καὶ ἐκκρίνειν θήλυ-ἐτι εἰ πᾶσα πέψις ἐργάζεται θερμῷ, ἀνάγκη καὶ τῶν ζώων τὰ ἄρρενα τῶν θήλεων θερμότερα εἶναι. διὰ γὰρ ψυχρότητα καὶ ἀδυναμίαν πολυαιμεῖ κατὰ τόπους τινὰς τὸ θήλυ μᾶλλον, καὶ ἔστιν αὐτὸ τούναντίον σημεῖον ἢ δι' ἣνπερ αἰτίαν οἰονταί τινες τὸ θήλυ θερμότερον εἶναι τοῦ ἄρρενος, διὰ τὴν τῶν καταμηνίων πρόεσιν· τὸ μὲν γὰρ αἷμα θερμόν, τὸ δὲ πλεῖον ἔχον μᾶλλον. ὑπολαμβάνουσι δὲ τοῦτο γίνεσθαι τὸ πάθος δι' ὑπερβολὴν αἵματος καὶ θερμότητος, ὥσπερ ἐνδεχόμενον αἷμα εἶναι πᾶν ὁμοίως, ἄνπερ μόνον ὕγρον ἢ καὶ τὴν χροάν αἱματῶδες, καὶ οὐκ ἔλαττον γινόμενον καὶ καθαρώτερον τοῖς εὐτροφοῦσιν. οἱ δ' ὥσπερ τὸ κατὰ τὴν κοιλίαν περίττωμα, τὸ πλεῖον τοῦ ἐλάττονος οἰονται σημεῖον εἶναι θερμῆς φύσεως μᾶλλον. καίτοι τούναντίον ἐστίν· ὥσπερ γὰρ καὶ ἐκ τῆς πρώτης τροφῆς ἐκ πολλῆς ὀλίγον ἀποκρίνεται τὸ χρήσιμον ἐν ταῖς περὶ τοὺς καρποὺς ἐργασίαις, καὶ τέλος οὐθὲν μέρος τὸ ἐσχατον πρὸς τὸ πρῶτον πληθός ἐστιν, οὕτω πάλιν καὶ ἐν τῷ σώματι διαδεχόμενα τὰ μέρη ταῖς ἐργασίαις τὸ τελευταῖον ἀμπαν μικρὸν ἐξ ἀπάσης γίγνεται τῆς τροφῆς. τοῦτο δὲ ἐν μὲν τισιν αἷμά ἐστιν ἐν δὲ τισι τὸ ἀνάλογον.

Ἐπεὶ δὲ τὸ μὲν δύναται τὸ δ' ἀδυνατεῖ ἐκκρίναι τὸ περίττωμα καθαρὸν, ἀπάσῃ δὲ δυνάμει ὄργανόν τί ἐστι, καὶ (766a.) τῇ χειρὸν αποτελούσῃ ταῦτό καὶ τῇ βέλτιον, τὸ δὲ θῆλυ καὶ τὸ ἄρρεν πλεοναχῶς λεγομένου τοῦ δυνατοῦ καὶ τοῦ ἀδυνάτου τοῦτον ἀντίκειται τὸν τρόπον, ἀνάγκη ἄρα καὶ τῷ θήλει καὶ τῷ ἄρρενι εἶναι ὄργανον· τῷ μὲν οὖν ἢ ὑστέρα τῷ δ' ὁ περίνεός ἐστιν. ἅμα δ' ἢ φύσις τὴν τε δυνάμιν ἀποδίδωσιν ἐκάστῳ καὶ τὸ ὄργανον· βέλτιον γὰρ οὕτως. διὸ ἕκαστοι οἱ τόποι ἅμα ταῖς ἐκκρίσεσι γίνονται καὶ ταῖς δυνάμεσιν, ὥσπερ οὐτ' ὄψις ἄνευ ὀφθαλμῶν οὐτ' ὀφθαλμὸς τελειοῦται ἄνευ ὄψεως, καὶ κοιλία καὶ κύστις ἅμα τῷ δύνασθαι τὰ περιττώματα γίνεσθαι. ὄντος δὲ τοῦ αὐτοῦ ἐξ οὗ τε γίνεταί καὶ αὖξεται-τοῦτο δ' ἐστὶν ἢ τροφή-ἕκαστον ἂν γίνοιτο τῶν μορίων ἐκ τοιαύτης ὕλης ἧς δεκτικόν ἐστι καὶ τοιοῦτου περιττώματος. ἔτι δὲ γίνεταί πάλιν ὥς φαμεν ἐκ τοῦ ἐναντίου πῶς.

τρίτον δὲ πρὸς τούτοις ληπτέον ὅτι εἴπερ ἢ φθορὰ εἰς τοῦναντίον, καὶ τὸ μὴ κρατούμενον ὑπὸ τοῦ δημιουργοῦντος ἀνάγκη μεταβάλλειν εἰς τοῦναντίον. τούτων δ' ὑποκειμένων ἴσως ἂν ἤδη μᾶλλον εἴη φανερόν δι' ἣν αἰτίαν γίνεταί τὸ μὲν θῆλυ τὸ δ' ἄρρεν. ὅταν γὰρ μὴ κρατῇ ἢ ἀρχὴ μὴδὲ δύνηται πέψαι δι' ἑνδεῖαν θερμότητος μὴδ' ἀγάγῃ εἰς τὸ ἴδιον εἶδος τὸ αὐτοῦ ἀλλὰ ταύτη ἡττηθῇ, ἀνάγκη εἰς τοῦναντίον μεταβάλλειν. ἐναντίον δὲ τῷ ἄρρενι τὸ θῆλυ καὶ ταύτῃ ἢ τὸ μὲν ἄρρεν τὸ δὲ θῆλυ. ἐπεὶ δ' ἔχει διαφορὰν ἐν τῇ δυνάμει, ἔχει καὶ τὸ ὄργανον διαφέρον ὥστ' εἰς τοιοῦτον μεταβάλλει. ἐνὸς δὲ μορίου ἐπικαίρου μεταβάλλοντος ὅλη ἢ σύστασις τοῦ ζώου πολὺ τῷ εἶδει διαφέρει. ὁρᾷν δ' ἔξεστιν ἐπὶ τῶν εὐνούχων οἱ ἐνὸς μορίου πηρωθέντος τοσοῦτον ἐξαλλάττουσι τῆς ἀρχαίας μορφῆς καὶ μικρὸν ἐλλείπουσι τοῦ θήλεος τὴν ιδέαν. τούτου δ' αἴτιον ὅτι ἔνια τῶν μορίων ἀρχαί εἰσιν-ἀρχῆς δὲ κινηθείσης πολλὰ ἀνάγκη μεθίστασθαι τῶν ἀκολουθούντων.

Εἰ οὖν τὸ μὲν ἄρρεν ἀρχὴ τις καὶ αἴτιον-ἔστι δ' ἄρρεν ἢ δύναταί τι, θῆλυ δὲ ἢ ἀδυνατεῖ-τῆς δὲ δυνάμεως ὅρος καὶ τῆς ἀδυναμίας τὸ πεπτικὸν εἶναι ἢ μὴ πεπτικὸν τῆς ὑστάτης τροφῆς, ὁ ἐν μὲν τοῖς ἐναίμοις αἷμα καλεῖται ἐν δὲ τοῖς ἄλλοις τὸ ἀνάλογον, τούτου δὲ τὸ αἴτιον ἐν τῇ ἀρχῇ καὶ τῷ μορίῳ τῷ ἔχοντι τὴν τῆς φυσικῆς θερμότητος ἀρχήν, ἀναγκαῖον ἄρα ἐν τοῖς ἐναίμοις συνίστασθαι (766b.) καρδίαν καὶ ἢ ἄρρεν ἔσεσθαι ἢ θῆλυ τὸ γινόμενον, ἐν δὲ τοῖς ἄλλοις γένεσιν οἷς ὑπάρχει τὸ θῆλυ καὶ τὸ ἄρρεν τὸ τῇ καρδίᾳ

ἀνάλογον. ἡ μὲν οὖν ἀρχὴ τοῦ θήλεος καὶ τοῦ ἄρρενος καὶ ἡ αἰτία αὕτη καὶ ἐν τούτῳ ἐστίν. θῆλυ δ' ἤδη καὶ ἄρρεν ἐστὶν ὅταν ἔχη καὶ τὰ μόρια οἷς διαφέρει τὸ θῆλυ τοῦ ἄρρενος· οὐ γὰρ καθ' ὅτιον μέρος ἄρρεν οὐδὲ θῆλυ ὥσπερ οὐδ' ὅρων καὶ ἀκοῦον.

Ἀναλαμβάνοντες δὲ πάλιν λέγομεν ὅτι τὸ μὲν σπέρμα ὑπόκειται περιττώμα τροφῆς ὃν τὸ ἔσχατον (ἔσχατον δὲ λέγω τὸ πρὸς ἕκαστον φερόμενον, διὸ καὶ ἔοικε τὸ γεννώμενον τῷ γεννήσαντι· οὐθὲν γὰρ διαφέρει ἀφ' ἐκάστου τῶν μορίων ἀπελθεῖν ἢ πρὸς ἕκαστον προσελθεῖν-ὀρθότερον δ' οὕτως). διαφέρει δὲ τὸ τοῦ ἄρρενος σπέρμα ὅτι ἔχει ἀρχὴν ἐν ἑαυτῷ τοιαύτην οἷαν κινεῖν ἥ καὶ ἐν τῷ ζῳῳ καὶ διαπέττειν τὴν ἐσχάτην τροφήν, τὸ δὲ τοῦ θήλεος ὕλην μόνον.

κρατήσαν μὲν οὖν εἰς αὐτὸ ἄγει, κρατηθὲν δ' εἰς τοῦναντίον μεταβάλλει ἢ εἰς φθοράν. ἐναντίον δὲ τῷ ἄρρενι τὸ θῆλυ, θῆλυ δὲ τῇ ἀπεψία καὶ τῇ ψυχρότητι τῆς αἱματικῆς τροφῆς. ἡ δὲ φύσις ἐκάστῳ τῶν περιττωμάτων ἀποδίδωσι τὸ δεκτικὸν μόριον. τὸ δὲ σπέρμα περιττώμα, τοῦτο δὲ τοῖς μὲν θερμότεροις καὶ ἄρρεσι τῶν ἐναίμων εὐογκον τῷ πλήθει, διὸ τὰ δεκτικὰ μόρια πόροι ταύτης τῆς περιττώσεως εἰσι τοῖς ἄρρεσιν· τοῖς δὲ θήλεσι δι' ἀπεψίαν πλῆθος αἱματικόν (ἀκατέργαστον γάρ), ὥστε καὶ μόριον δεκτικὸν ἀναγκαῖον εἶναι τι, καὶ εἶναι τοῦτο ἀνόμοιον καὶ μέγεθος ἔχειν. διὸ τῆς ὑστέρας τοιαύτη ἡ φύσις ἐστίν. τούτῳ δὲ τὸ θῆλυ διαφέρει τῷ μορίῳ τοῦ ἄρρενος.

Κεφάλαιο 2

Διὰ τίνα μὲν οὖν αἰτίαν γίνεται τὸ μὲν θῆλυ τὸ δ' ἄρρεν εἴρηται.

Τεκμήρια δὲ τὰ συμβαίνοντα τοῖς εἰρημένοις. τά τε γὰρ νέα θηλυτόκα μᾶλλον τῶν ἀκμαζόντων, καὶ τὰ πρεσβύτερα μᾶλλον· τοῖς μὲν γὰρ οὐπω τέλειον τὸ θερμὸν τοῖς δ' ἀπολείπει. καὶ τὰ μὲν ὑγρότερα τῶν σωμάτων καὶ γυναικικώτερα θηλυγόνα μᾶλλον, καὶ τὰ σπέρματα τὰ ὑγρά τῶν συνεστηκότων. πάντα γὰρ ταῦτα γίνεται δι' ἑνδεῖαν θερμότητος φυσικῆς, καὶ τὸ βορείοις ἀρρενοτοκεῖν μᾶλλον ἢ νοτίοις. <ὑγρότερα γὰρ τὰ σώματα νοτίοις> (34b) ὥστε καὶ περιττωματικώτερα. τὸ δὲ πλεῖον περίττωμα δυσπεπτότερον· διὸ τοῖς μὲν ἄρρεσιν ὑγρότερον τὸ (767a.) σπέρμα, ταῖς δὲ γυναῖξιν ἢ τῶν καταμηνίων ἔκκρισις.

Καὶ τὸ γίνεσθαι δὲ τὰ καταμήνια κατὰ φύσιν φθινόντων τῶν μηνῶν μᾶλλον διὰ τὴν αὐτὴν αἰτίαν συμβαίνει. ψυχρότερος γὰρ ὁ χρόνος οὗτος τοῦ μηνὸς καὶ ὑγρότερος διὰ τὴν φθίσιν καὶ τὴν ἀπόλειψιν τῆς σελήνης· ὁ μὲν γὰρ ἥλιος ἐν ὅλῳ τῷ ἐνιαυτῷ ποιεῖ χειμῶνα καὶ θέρος, ἢ δὲ σελήνη ἐν τῷ μηνί (τοῦτο δ' οὐ διὰ τὰς τροπὰς, ἀλλὰ τὸ μὲν αὐξανόμενου συμβαίνει τοῦ φωτὸς τὸ δὲ φθίνοντος). φασι δὲ καὶ οἱ νομεῖς διαφέρειν πρὸς θηλυγονίαν καὶ ἀρρενογονίαν οὐ μόνον ἐὰν συμβαίῃ τὴν ὀχεῖαν γίνεσθαι βορείοις ἢ νοτίοις ἀλλὰ καὶ ὅταν ὀχευόμενα βλέπῃ πρὸς νότον ἢ βορέαν· οὕτω μικρὰν ἐνίοτε ῥοπὴν αἰτίαν γίνεσθαι τῆς ψυχρότητος καὶ θερμότητος, ταῦτα δὲ τῆς γενέσεως.

Διέστηκε μὲν οὖν ὅλως πρὸς ἄλληλα τό τε θῆλυ καὶ τὸ ἄρρεν πρὸς τὴν ἀρρενογονίαν καὶ θηλυγονίαν διὰ τὰς εἰρημένας αἰτίας, οὐ μὴν ἀλλὰ καὶ δεῖ συμμετρίας πρὸς ἄλληλα· πάντα γὰρ τὰ γιγνόμενα κατὰ τέχνην ἢ φύσιν λόγῳ τινί ἐστιν. τὸ δὲ θερμὸν λίαν μὲν κρατοῦν ξηραίνει τὰ ὑγρά, πολὺ δὲ ἐλλεῖπον οὐ συνίστησιν, ἀλλὰ δεῖ πρὸς τὸ δημιουργούμενον ἔχειν τοῦτον τὸν τοῦ μέσου λόγον· εἰ δὲ μή, καθάπερ ἐν τοῖς ἐψομένοις προσκάει μὲν τὸ πλεῖον πῦρ, οὐχ ἔψει δὲ τὸ ἔλαττον, ἀμφοτέρως δὲ συμβαίνει μὴ τελειοῦσθαι τὸ γιγνόμενον, οὕτω καὶ ἐν τῇ τοῦ ἄρρενος μίξει καὶ τοῦ θήλεος δεῖ τῆς συμμετρίας. καὶ διὰ τοῦτο πολλοῖς καὶ πολλαῖς συμβαίνει μετ' ἀλλήλων μὲν μὴ γεννᾶν, διαζευχθεῖσι δὲ γεννᾶν, καὶ ὅτε μὲν νέοις ὅτε δὲ πρεσβυτέροις οὗσι ταύτας γίνεσθαι τὰς ὑπεναντιώσεις, ὁμοίως περὶ

τε γένεσιν καὶ ἀγονίαν καὶ ἀρρενογονίαν καὶ θηλυγονίαν. διαφέρει δὲ καὶ χώρα χώρας εἰς ταῦτα καὶ ὕδωρ ὕδατος διὰ τὰς αὐτὰς αἰτίας· ποιὰ γὰρ τις ἢ τροφή γίγνεται μάλιστα καὶ τοῦ σώματος ἢ διάθεσις διὰ τε τὴν κρᾶσιν τοῦ περιεστῶτος ἀέρος καὶ τῶν εἰσιόντων, μάλιστα δὲ διὰ τὴν τοῦ ὕδατος τροφήν· τοῦτο γὰρ πλεῖστον εἰσφέρονται, καὶ ἐν πᾶσιν ἐστὶ τροφή τοῦτο, καὶ ἐν τοῖς ξηροῖς. διὸ καὶ τὰ ἀτέραμνα ὕδατα καὶ ψυχρὰ τὰ μὲν ἀτεκνίαν ποιεῖ τὰ δὲ θηλυτοκίαν.

Κεφάλαιο 3

Αἱ δ' αὐταὶ αἰτίαι καὶ τοῦ τὰ μὲν εἰκότα γίνεσθαι τοῖς τεκνώσασιν τὰ δὲ μὴ εἰκότα, καὶ τὰ μὲν πατρὶ τὰ (767b.) δὲ μητρὶ κατὰ τε ὅλον τὸ σῶμα καὶ κατὰ μόριον ἕκαστον, καὶ μᾶλλον αὐτοῖς ἢ τοῖς προγόνοις, καὶ τούτοις ἢ τοῖς τυχοῦσι, καὶ τὰ μὲν ἄρρενα μᾶλλον τῷ πατρὶ τὰ δὲ θήλεα τῇ μητρὶ, τὰ δ' οὐθενὶ τῶν συγγενῶν ὅμως δ' ἀνθρώπῳ γέ τι, τὰ δ' οὐδ' ἀνθρώπῳ τὴν ιδέαν ἀλλ' ἤδη τέρατι. καὶ γὰρ ὁ μὴ εἰκῶς τοῖς γονεῦσιν ἤδη τρόπον τινὰ τέρας ἐστίν· παρεκβέβηκε γὰρ ἡ φύσις ἐν τούτοις ἐκ τοῦ γένους τρόπον τινά. ἀρχὴ δὲ πρώτη τὸ θῆλυ γίνεσθαι καὶ μὴ ἄρρεν-ἀλλ' αὕτη μὲν ἀναγκαία τῇ φύσει· δεῖ γὰρ σώζεσθαι τὸ γένος τῶν κεχωρισμένων κατὰ τὸ θῆλυ καὶ τὸ ἄρρεν, ἐνδεχομένου δὲ μὴ κρατεῖν ποτε τοῦ ἄρρενος, ἢ διὰ νεότητα ἢ γῆρας ἢ δι' ἄλλην τινὰ αἰτίαν τοιαύτην, ἀνάγκη γίνεσθαι θηλυτοκίαν ἐν τοῖς ζώοις. τὸ δὲ τέρας οὐκ ἀναγκαῖον πρὸς τὴν ἕνεκά του καὶ τὴν τοῦ τέλους αἰτίαν, ἀλλὰ κατὰ συμβεβηκὸς ἀναγκαῖον, ἐπεὶ τὴν γ' ἀρχὴν ἐντεῦθεν δεῖ λαμβάνειν. εὐπέπτου μὲν γὰρ οὔσης τῆς περιττώσεως ἐν τοῖς καταμηνίοις τῆς σπερματικῆς καθ' αὐτὴν ποιήσει τὴν μορφήν ἢ τοῦ ἄρρενος κίνησις· τὸ γὰρ γονὴν λέγειν ἢ κίνησιν τὴν αὐξουσαν ἕκαστον τῶν μορίων οὐθὲν διαφέρει, οὐδὲ τὴν αὐξουσαν ἢ τὴν συνιστᾶσαν ἐξ ἀρχῆς· ὁ γὰρ αὐτὸς λόγος τῆς κινήσεως. ὥστε κρατούσης μὲν ἄρρεν τε ποιήσει καὶ οὐ θῆλυ, καὶ εἰκότως τῷ γεννῶντι ἀλλ' οὐ τῇ μητρὶ· μὴ κρατήσαν δέ, καθ' ὁποῖαν ἂν μὴ κρατήσῃ δύναμιν, τὴν ἔλλειψιν ποιεῖ κατ' αὐτήν. λέγω δ' ἐκάστην δύναμιν τόνδε τὸν τρόπον· τὸ γεννῶν ἐστὶν οὐ μόνον ἄρρεν ἀλλὰ καὶ τοῖον ἄρρεν οἷον Κορίσκος ἢ Σωκράτης, καὶ οὐ μόνον Κορίσκος ἐστὶν ἀλλὰ καὶ ἄνθρωπος. καὶ τοῦτον δὴ τὸν τρόπον τὰ μὲν ἐγγύτερον τὰ δὲ πορρώτερον ὑπάρχει τῷ γεννῶντι καθὸ γεννητικόν, ἀλλ' οὐ κατὰ συμβεβηκὸς οἷον εἰ γραμματικὸς ὁ γεννῶν ἢ γείτων τίνος. αἱ δ' ἰσχύει πρὸς τὴν γένεσιν μᾶλλον τὸ ἴδιον καὶ τὸ καθ' ἕκαστον. ὁ γὰρ Κορίσκος καὶ ἄνθρωπός ἐστι καὶ ζῶον, ἀλλ' ἐγγύτερον τοῦ ἰδίου τὸ ἄνθρωπος ἢ τὸ ζῶον. γεννᾷ δὲ καὶ τὸ καθ' ἕκαστον καὶ τὸ γένος, ἀλλὰ μᾶλλον τὸ καθ' ἕκαστον· τοῦτο γὰρ ἡ οὐσία. καὶ γὰρ τὸ γινόμενον γίγνεται μὲν καὶ ποιόν τι, ἀλλὰ καὶ τόδε τι-καὶ τοῦθ' ἡ οὐσία. διόπερ ἀπὸ τῶν δυνάμεων ὑπάρχουσιν αἱ κινήσεις ἐν τοῖς σπέρμασι πάντων τῶν

τοιούτων, δυνάμει δὲ καὶ τῶν προγόνων, μᾶλλον δὲ τοῦ ἐγγύτερον αἰεὶ (768a.) τῶν καθ' ἕκαστόν τινος· λέγω δὲ καθ' ἕκαστον τὸν Κορίσκον καὶ τὸν Σωκράτην. ἐπεὶ δ' ἐξίσταται πᾶν οὐκ εἰς τὸ τυχὸν ἀλλ' εἰς τὸ ἀντικείμενον, καὶ τὸ ἐν τῇ γενέσει μὴ κρατούμενον ἀναγκαῖον ἐξίστασθαι καὶ γίγνεσθαι τὸ ἀντικείμενον καθ' ἣν δύναμιν οὐκ ἐκράτησε τὸ γεννῶν καὶ κινεῖν. ἐὰν μὲν οὖν ἢ ἄρρεν θῆλυ γίγνεται, ἐὰν δὲ ἢ Κορίσκος ἢ Σωκράτης οὐ τῷ πατρὶ ἔοικὸς ἀλλὰ τῇ μητρὶ γίγνεται· ἀντίκειται γὰρ ὥσπερ τῷ ὅλως πατρὶ μήτηρ καὶ τῷ καθ' ἕκαστον γεννῶντι ἢ καθ' ἕκαστον γεννῶσα. ὁμοίως δὲ καὶ κατὰ τὰς ἐχομένας δυνάμεις· αἰεὶ γὰρ εἰς τὸν ἐχόμενον μεταβαίνει μᾶλλον τῶν προγόνων, καὶ ἐπὶ πατέρων καὶ ἐπὶ μητέρων. ἔνεισι δ' αἱ μὲν ἐνεργεῖα τῶν κινήσεων αἱ δὲ δυνάμει, ἐνεργεῖα μὲν αἱ τοῦ γεννῶντος καὶ τοῦ καθόλου οἷον ἀνθρώπου καὶ ζώου, δυνάμει δὲ αἱ τοῦ θήλεος καὶ τῶν προγόνων. μεταβάλλει μὲν οὖν ἐξιστάμενον πρὸς τὰ ἀντικείμενα, λύονται δὲ αἱ κινήσεις αἱ δημιουργοῦσαι εἰς τὰς ἐγγύς, οἷον ἢ τοῦ γεννῶντος ἂν λυθῇ κινήσεις ἐλαχίστη διαφορᾷ μεταβαίνει εἰς τὴν τοῦ πατρός, δεύτερον δ' εἰς τὴν τοῦ πάππου· καὶ τοῦτον δὴ τὸν τρόπον [καὶ ἐπὶ τῶν ἀρρένων] καὶ ἐπὶ τῶν θηλειῶν ἢ τῆς γεννώσης εἰς τὴν τῆς μητρός, ἐὰν δὲ μὴ εἰς ταύτην εἰς τὴν τῆς τήθης· ὁμοίως δὲ καὶ ἐπὶ τῶν ἄνωθεν.

Μάλιστα μὲν οὖν πέφυκεν ἢ ἄρρεν καὶ ἢ πατὴρ ἅμα κρατεῖν καὶ κρατεῖσθαι· μικρὰ γὰρ ἡ διαφορὰ ὥστ' οὐκ ἔργον ἅμα συμβῆναι ἀμφοτέρω· ὁ γὰρ Σωκράτης ἀνὴρ τοιόσδε τις. διὸ ὡς ἐπὶ τὸ πολὺ τὰ μὲν ἄρρενα τῷ πατρὶ ἔοικεν τὰ δὲ θήλεα τῇ μητρὶ, ἅμα γὰρ εἰς ἄμφω ἔκστασις ἐγένετο· ἀντίκειται δὲ τῷ μὲν ἄρρενι τὸ θῆλυ τῷ δὲ πατρὶ ἢ μήτηρ, ἢ δ' ἔκστασις εἰς τὰ ἀντικείμενα. ἐὰν δ' ἢ μὲν ἀπὸ τοῦ ἄρρενος κρατήσῃ κινήσεις ἢ δ' ἀπὸ τοῦ Σωκράτους μὴ κρατήσῃ, ἢ αὕτη μὲν ἐκείνη δὲ μή, τότε συμβαίνει γίγνεσθαι ἄρρενά τε μητρὶ ἔοικότα καὶ θήλεα πατρὶ. ἐὰν δὲ λυθῶσιν αἱ κινήσεις, καὶ ἢ μὲν ἄρρεν μείνῃ, ἢ δὲ τοῦ Σωκράτους λυθῇ εἰς τὴν τοῦ πατρός, ἔσται ἄρρεν τῷ πάππῳ ἔοικὸς ἢ τῶν ἄλλων τινὶ τῶν ἄνωθεν προγόνων κατὰ τοῦτον τὸν λόγον· κρατηθέντος δὲ ἢ ἄρρεν θῆλυ ἔσται καὶ ἔοικὸς μάλιστα μὲν τῇ μητρὶ, ἐὰν δὲ καὶ αὕτη λυθῇ ἢ κινήσεις μητρὶ μητρὸς ἢ ἄλλῃ τινὶ τῶν ἄνωθεν ἔσται (768b.) ἢ ὁμοιότης κατὰ τὸν αὐτὸν λόγον. ὁ δ' αὐτὸς τρόπος καὶ ἐπὶ τῶν μορίων· καὶ γὰρ τῶν μορίων τὰ μὲν τῷ πατρὶ ἔοικε πολλάκις τὰ δὲ τῇ μητρὶ τὰ δὲ τῶν προγόνων τισίν· ἔνεισι γὰρ καὶ τῶν μορίων αἱ μὲν ἐνεργεῖα κινήσεις

αἱ δὲ δυνάμει, καθάπερ εἴρηται πολλάκις. καθόλου δὲ δεῖ λαβεῖν ὑποθέσεις, μίαν μὲν τὴν εἰρημένην ὅτι ἔνεισι τῶν κινήσεων αἱ μὲν δυνάμει αἱ δ' ἐνεργεία, ἄλλας δὲ δύο ὅτι κρατούμενον μὲν ἐξίσταται εἰς τὸ ἀντικείμενον, λυόμενον δὲ εἰς τὴν ἐχομένην κίνησιν, καὶ ἦττον μὲν λυόμενον εἰς τὴν ἐγγὺς μᾶλλον δὲ εἰς τὴν πορρώτερον. τέλος δ' οὕτω συγγέονται ὥστε μηθενὶ εἰκέναι τῶν οἰκείων καὶ συγγενῶν ἀλλὰ λείπεσθαι τὸ κοινὸν μόνον καὶ εἶναι ἄνθρωπον. τούτου δ' αἴτιον ὅτι πᾶσιν ἀκολουθεῖ τοῦτο τοῖς καθ' ἕκαστον· καθόλου γὰρ ὁ ἄνθρωπος, ὁ δὲ Σωκράτης πατήρ καὶ ἡ μήτηρ ἥτις ποτ' ἦν τῶν καθ' ἕκαστον.

Αἴτιον δὲ τοῦ μὲν λύεσθαι τὰς κινήσεις ὅτι τὸ ποιοῦν καὶ πάσχει ὑπὸ τοῦ πάσχοντος, οἷον τὸ τέμνον ἀμβλύνεται ὑπὸ τοῦ τεμνομένου καὶ τὸ θερμαῖνον ψύχεται ὑπὸ τοῦ θερμαινομένου, καὶ ὅλως τὸ κινεῖν ἔξω τοῦ πρώτου ἀντικινεῖται τινα κίνησιν οἷον τὸ ὠθοῦν ἀντὼθεῖται πῶς καὶ ἀντιθλίβεται τὸ θλίβον, ἐνίοτε δὲ καὶ ὅλως ἔπαθε μᾶλλον ἢ ἐποίησεν, καὶ ἐψύχθη μὲν τὸ θερμαῖνον ἐθερμάνθη δὲ τὸ ψύχον, ὅτε μὲν οὐθέν ποιῆσαν ὅτε δὲ ἦττον ἢ παθόν· εἴρηται δὲ περὶ αὐτῶν ἐν τοῖς περὶ τοῦ ποιεῖν καὶ πάσχειν διωρισμένοις, ἐν ποίοις ὑπάρχει τῶν ὄντων τὸ ποιεῖν καὶ πάσχειν.

Ἐξίσταται δὲ τὸ πάσχον καὶ οὐ κρατεῖται ἢ δι' ἔλλειψιν δυνάμεως τοῦ πέττοντος καὶ κινεῦντος ἢ διὰ πλῆθος καὶ ψυχρότητα τοῦ πεττομένου καὶ διοριζομένου· τῇ μὲν γὰρ κρατοῦν τῇ δὲ οὐ κρατοῦν ποιεῖ πολύμορφον τὸ συνιστάμενον, οἷον ἐπὶ τῶν ἀθλητῶν συμβαίνει διὰ τὴν πολυφαγίαν· διὰ πλῆθος γὰρ τροφῆς οὐ δυναμένης τῆς φύσεως κρατεῖν ὥστ' ἀνάλογον αὔξειν καὶ διαμένειν ὁμοίαν τὴν μορφήν, ἄλλοιᾳ γίνεταί τὰ μέρη καὶ σχεδὸν ἐνίοθ' οὕτως ὥστε μηθέν εἰκέναι τῷ πρότερον. παραπλήσιον δὲ τούτῳ καὶ τὸ νόσημα τὸ καλούμενον σατυριᾶν· καὶ γὰρ ἐν τούτῳ διὰ ρεύματος [ἢ πνεύματος] ἀπέπτου πλῆθος εἰς μόρια τοῦ προσώπου παρεμπεσόντος ἄλλου ζῶου καὶ σατύρου φαίνεται τὸ πρόσωπον.

(769a.) Διὰ τίνα μὲν οὖν αἰτίαν θήλεα καὶ ἄρρενα γίνεταί, καὶ τὰ μὲν εἰκότα τοῖς γονεῦσι, θήλεά τε θήλεσι καὶ ἄρρενα ἄρρεσι, τὰ δ' ἀνάπαλιν θήλεά τε τῷ πατρὶ καὶ ἄρρενα τῇ μητρί, καὶ ὅλως τὰ μὲν τοῖς προγόνοις εἴκει τὰ δ' οὐθενί, καὶ ταῦτα καὶ καθ' ὅλον τὸ σῶμα καὶ τῶν μορίων ἕκαστον, διώριστα περὶ πάντων.

Εἰρήκασι δέ τινες τῶν φυσιολόγων καὶ ἕτεροι περὶ τούτων διὰ τίν' αἰτίαν ὅμοια καὶ ἀνόμοια γίνεταί τοῖς γονεῦσιν· δύο δὲ τρόπους

λέγουσι τῆς αἰτίας. ἔνιοι μὲν γάρ φασιν ἅφ' ὁποτέρου ἂν ἔλθῃ σπέρμα πλέον τούτῳ γίνεσθαι μᾶλλον ἐοικός, ὁμοίως παντί τε πᾶν καὶ μέρος, ὥς ἀπιόντος ἅφ' ἐκάστου τῶν μορίων σπέρματος· ἂν δ' ἴσον ἔλθῃ ἅφ' ἐκατέρου τούτων οὐδετέρῳ γίνεσθαι ὅμοιον. εἰ δὲ τοῦτ' ἔστι ψεῦδος καὶ μὴ ἀπὸ παντὸς ἀπέρχεται δῆλον ὥς οὐδὲ τῆς ὁμοιότητος καὶ ἀνομοιότητος αἴτιον ἂν εἴῃ τὸ λεχθέν. ἔτι δὲ πῶς ἅμα θῆλυ μὲν πατρὶ ἐοικός ἄρρεν δὲ μητρὶ ἐοικός οὐκ εὐπόρως δύνανται διορίζειν· οἱ μὲν γὰρ ὥσπερ Ἐμπεδοκλῆς λέγοντες ἡ Δημόκριτος περὶ τοῦ θήλεος καὶ ἄρρενος τὴν αἰτίαν ἄλλον τρόπον ἀδύνατα λέγουσιν· οἱ δὲ τῷ πλεῖον ἢ ἔλαττον ἀπέναι ἀπὸ τοῦ ἄρρενος ἢ θήλεος, διὰ τοῦτο γίνεσθαι τὸ μὲν θῆλυ τὸ δ' ἄρρεν, οὐκ ἂν ἔχοιεν ἀποδειξαι τίνα τρόπον τό τε θῆλυ τῷ πατρὶ ἐοικός ἔσται καὶ τὸ ἄρρεν τῇ μητρὶ· ἅμα γὰρ ἐλθεῖν πλεῖον ἀπ' ἀμφοτέρων ἀδύνατον. ἔτι δὲ διὰ τίν' αἰτίαν ἐοικός γίγνεται τοῖς προγόνοις ὥς ἐπὶ τὸ πολὺ καὶ τοῖς ἄποθεν; οὐ γὰρ ἀπ' ἐκείνων γ' ἀπελήλυθεν οὐθέν τοῦ σπέρματος.

Ἀλλὰ μᾶλλον οἱ τὸν λειπόμενον τρόπον λέγοντες περὶ τῆς ὁμοιότητος καὶ τᾶλλα βέλτιον καὶ τοῦτο λέγουσιν. εἰσὶ γάρ τινες οἱ φασὶ τὴν γονὴν μίαν οὔσαν οἶον πανσπερμίαν εἶναι τίνα πολλῶν· ὥσπερ οὖν εἴ τις κεράσειε πολλοὺς χυμοὺς εἰς ἓν ὑγρὸν κᾶπειτ' ἐντεῦθεν λαμβάνοι, καὶ δύναται ἂν λαμβάνειν μὴ ἴσον ἀεὶ ἅφ' ἐκάστου, ἀλλ' ὅτε μὲν τοῦ τοιοῦδε πλεῖον ὅτε δὲ τοῦ τοιοῦδε, ὅτε δὲ τοῦ μὲν λαβεῖν τοῦ δὲ μηθὲν λαβεῖν-τοῦτο συμβαίνειν καὶ ἐπὶ τῆς γονῆς πολυμιγοῦς οὔσης· ἅφ' οὗ γὰρ ἂν τῶν γεννώντων πλεῖστον ἐγγένηται, τούτῳ γίνεσθαι τὴν μορφήν ἐοικός. οὗτος δὲ ὁ λόγος οὐ σαφὴς μὲν καὶ πλασματίας ἐστὶ πολλαχῇ, (769b.) βούλεται δὲ καὶ βέλτιον λέγειν μὴ ἐνεργεῖα ὑπάρχειν ἀλλὰ κατὰ δύναμιν ἣν λέγει πανσπερμίαν· ἐκείνως μὲν γὰρ ἀδύνατον, οὕτως δὲ δυνατόν.

Οὐ ρᾶδιον δὲ οὐδὲ τρόπον ἓνα τῆς αἰτίας ἀποδιδόντας τὰς αἰτίας εἰπεῖν περὶ πάντων· τοῦ τε γίνεσθαι θῆλυ καὶ ἄρρεν, καὶ διὰ τί τὸ μὲν θῆλυ τῷ πατρὶ πολλάκις <ὅμοιον> τὸ δ' ἄρρεν τῇ μητρὶ, καὶ πάλιν τῆς πρὸς τοὺς προγόνους ὁμοιότητος, ἔτι δὲ διὰ τίν' αἰτίαν ὅτε μὲν ἄνθρωπος μὲν τούτων δ' οὐθενὶ προσόμοιος, ὅτε δὲ προῖδον οὕτω τέλος οὐδὲ ἄνθρωπος ἀλλὰ ζῷόν τι μόνον φαίνεται τὸ γιγνόμενον, ἃ δὴ καὶ λέγεται τέρατα.

Καὶ γὰρ ἐχόμενον τῶν εἰρημένων ἐστὶν εἰπεῖν περὶ τῶν τοιούτων τὰς αἰτίας. τέλος γὰρ τῶν μὲν κινήσεων λυομένων τῆς δ' ὕλης οὐ

κρατουμένης μένει τὸ καθόλου μάλιστα-τοῦτο δ' ἐστὶ τὸ ζῶον. τὸ δὲ γινόμενον κριοῦ κεφαλὴν φασιν ἢ βοὸς ἔχειν καὶ ἐν τοῖς ἄλλοις ὁμοίως ἑτέρου ζώου, μόσχον παιδὸς κεφαλὴν ἢ πρόβατον βοός. ταῦτα δὲ πάντα συμβαίνει μὲν διὰ τὰς προειρημένας αἰτίας, ἔστι δ' οὐθὲν ὧν λέγουσιν ἄλλ' εἰκότα μόνον-ὅπερ γίγνεται καὶ μὴ πεπηρωμένων. διὸ πολλάκις οἱ σκώπτοντες εἰκάζουσι τῶν μὴ καλῶν ἐνίους τοὺς μὲν αἰγὶ φουσῶντι πῦρ τοὺς δ' οἷι κυρίττοντι. φυσιογνώμων δέ τις ἀνῆγε πάσας εἰς δύο ζώων ἢ τριῶν ὄψεις, καὶ συνέπειθε πολλάκις λέγων. ὅτι δ' ἐστὶν ἀδύνατον γίγνεσθαι τέρας τοιοῦτον, ἕτερον ἐν ἑτέρῳ ζῶον, δηλοῦσιν οἱ χρόνοι τῆς κύσεως πολὺ διαφέροντες ἀνθρώπου καὶ προβάτου καὶ κυνὸς καὶ βοός· ἀδύνατον δ' ἕκαστον γενέσθαι μὴ κατὰ τοὺς οἰκείους χρόνους.

Τὰ μὲν οὖν τοῦτον τὸν τρόπον λέγεται τῶν τεράτων, τὰ δὲ τῷ πολυμερῇ τὴν μορφήν ἔχειν, πολύποδα καὶ πολυκέφαλα γινόμενα.

Πάρεγγυς δ' οἱ λόγοι τῆς αἰτίας καὶ παραπλήσιοι τρόπον τινά εἰσιν οἳ τε περὶ τῶν τεράτων καὶ οἳ περὶ τῶν ἀναπήρων ζώων· καὶ γὰρ τὸ τέρας ἀναπηρία τίς ἐστίν.

Κεφάλαιο 4

Δημόκριτος μὲν οὖν ἔφησε γίγνεσθαι τὰ τέρατα διὰ τὸ δύο γονὰς πίπτειν, τὴν μὲν πρότερον ὀρμήσασαν It;καὶ μὴ ἐξελθοῦσαν> τὴν δ' ὕστερον καὶ ταύτην [ἐξελθοῦσαν] ἐλθεῖν εἰς τὴν ὑστέραν, ὥστε συμφύεσθαι καὶ ἐπαλλάττειν τὰ μόρια. ταῖς δ' ὀρνισιν ἐπεὶ συμβαίνει ταχεῖαν γίγνεσθαι τὴν ὀχέαν ἀεὶ, τὰ τ' ὧὰ καὶ τὴν χροάν αὐτῶν ἐπαλλάττειν φησίν. εἰ δὲ συμβαίνει ἐξ ἐνὸς (770a.) σπέρματος πλείω γίγνεσθαι καὶ μιᾶς συνουσίας, ὅπερ φαίνεται, βέλτιον μὴ κύκλω περιέειναι παρέντας τὴν σύντομον· τοῖς γὰρ τοιούτοις μάλιστ' ἀναγκαῖον τοῦτο συμβαίνειν ὅταν μὴ διακριθῶσιν ἀλλ' ἅμα τὰ σπέρματα ἔλθωσιν. εἰ μὲν οὖν αἰτιάσασθαι δεῖ τὴν ἀπὸ τοῦ ἄρρενος γονήν, τοῦτον ἂν τὸν τρόπον εἴη λεκτέον· ὅλως δὲ μᾶλλον τὴν αἰτίαν οἰητέον ἐν τῇ ὕλῃ καὶ τοῖς συνισταμένοις κυήμασιν εἶναι. διὸ καὶ γίνονται τὰ τοιαῦτα τῶν τεράτων ἐν μὲν τοῖς μονοτόκοις σπάνια πάμπαν, ἐν δὲ τοῖς πολυτόκοις μᾶλλον, καὶ μάλιστ' ἐν ὀρνισι, τῶν δ' ὀρνίθων ἐν ταῖς ἀλεκτορίσιν· αὗται γὰρ πολυτοκοῦσιν οὐ μόνον τῷ πολλάκις τίκτειν ὥσπερ τὸ τῶν περιστερῶν γένος ἀλλὰ καὶ τῷ πολλὰ ἅμα ἔχειν κυήματα καὶ πᾶσαν ὥραν ὀχεύεσθαι. διόπερ καὶ πολλὰ δίδυμα τίκτουσιν· συμφύεται γὰρ διὰ τὸ πλησίον ἀλλήλων εἶναι τὰ κυήματα καθάπερ ἐνίοτε πολλὰ τῶν περικαρπίων. τούτων δὲ ὅσων μὲν ἂν αἱ λέκιθοι διορίζονται κατὰ τὸν ὑμένα, δύο γίνονται νεοττοὶ κεχωρισμένοι περιττὸν οὐδὲν ἔχοντες, -ὅσων δὲ συνεχεῖς καὶ μὴ διείργει μηθέν, ἐκ τούτων οἱ νεοττοὶ γίνονται τερατώδεις, σῶμα μὲν καὶ κεφαλὴν μίαν ἔχοντες σκέλη δὲ τέτταρα καὶ πτέρυγας διὰ τὸ τὰ μὲν ἄνωθεν ἐκ τοῦ λευκοῦ γίγνεσθαι καὶ πρότερον, ταμειομένης ἐκ τῆς λεκίθου τῆς τροφῆς αὐτοῖς, τὸ δὲ κάτω μόριον ὑστερίζει μὲν, τὴν δὲ τροφήν εἶναι μίαν καὶ ἀδιόριστον.

Ἡδὴ δὲ καὶ ὄφιν ὥπται δικέφαλος διὰ τὴν αὐτὴν αἰτίαν· φτοκεῖ γὰρ καὶ πολυτοκεῖ καὶ τοῦτο τὸ γένος. σπανιώτερον δὲ τὸ τερατώδες ἐπ' αὐτῶν διὰ τὸ σχῆμα τῆς ὑστέρας· στοιχηδὸν γὰρ κεῖται τὸ πλῆθος τῶν ὧων διὰ τὸ μῆκος αὐτῆς. καὶ περὶ τὰς μελίττας καὶ τοὺς σφήκας οὐδὲν γίγνεται τοιοῦτον· ἐν κεχωρισμένοις γὰρ κυτταρίοις ὁ τόκος ἐστὶν αὐτῶν. περὶ δὲ τὰς ἀλεκτορίδας τοῦναντίον συμβέβηκεν, ἥ καὶ δῆλον ὡς ἐν τῇ ὕλῃ τὴν αἰτίαν δεῖ νομίζειν τῶν τοιούτων· καὶ γὰρ τῶν ἄλλων ἐν τοῖς πολυτόκοις μᾶλλον. διὸ ἐν ἀνθρώπῳ ἦττον·

ὥς γὰρ ἐπὶ τὸ πολὺ μονοτόκον ἐστὶ καὶ τελειογόνον, ἐπεὶ καὶ τούτων ἐν οἷς τόποις πολύγονοι αἱ γυναῖκες εἰσι τοῦτο συμβαίνει μᾶλλον, οἷον περὶ Αἴγυπτον. ἐν δὲ ταῖς αἰξὶ καὶ τοῖς προβάτοις γίνεταί μᾶλλον· πολυτοκώτερα γὰρ ἐστίν. ἔτι δὲ μᾶλλον ἐν τοῖς πολυσχιδέσιν· πολυτόκα γὰρ ἐστὶ τὰ (770b.) τοιαῦτα τῶν ζώων καὶ οὐ τελειογόνα, καθάπερ ἡ κύων· τὰ γὰρ πολλὰ τίκτει τυφλὰ τούτων. δι' ἣν δ' αἰτίαν τοῦτο συμβαίνει καὶ δι' ἣν αἰτίαν πολυτοκοῦσιν ὕστερον λεκτέον. ἀλλὰ προωδοποιῆται τῇ φύσει πρὸς τὸ τερατοτοκεῖν τῷ μὴ γεννᾶν ὅμοια διὰ τὴν ἀτέλειαν· ἔστι δὲ καὶ τὸ τέρας τῶν ἀνομοίων. διόπερ ἐπαλλάττει τοῦτο τὸ σύμπτωμα τοῖς τοιοῦτοις τὴν φύσιν. ἐν γὰρ τούτοις μάλιστα γίνεταί καὶ τὰ μετάχοιρα καλούμενα. ταῦτα δ' ἐστὶ κατὰ τι πεπονθότα τερατῶδες· τὸ γὰρ ἐκλείπειν ἢ προσεῖναι τι τερατῶδες. ἔστι γὰρ τὸ τέρας τῶν παρὰ φύσιν τι, παρὰ φύσιν δ' οὐ πᾶσαν ἀλλὰ τὴν ὥς ἐπὶ τὸ πολὺ· περὶ γὰρ τὴν αἰὲ καὶ τὴν ἐξ ἀνάγκης οὐθὲν γίνεταί παρὰ φύσιν, ἀλλ' ἐν τοῖς ὥς ἐπὶ τὸ πολὺ μὲν οὕτω γιγνομένοις ἐνδεχομένοις δὲ καὶ ἄλλως, ἐπεὶ καὶ τούτων ἐν ὅσοις συμβαίνει παρὰ τὴν τάξιν μὲν ταύτην, αἰὲ μέντοι μὴ τυχόντως, ἦττον εἶναι δοκεῖ τέρας διὰ τὸ καὶ τὸ παρὰ φύσιν εἶναι τρόπον τινὰ κατὰ φύσιν, ὅταν μὴ κρατήσῃ τὴν κατὰ τὴν ὕλην ἢ κατὰ τὸ εἶδος φύσιν. διόπερ οὔτε τὰ τοιαῦτα τέρατα λέγουσιν οὗτ' ἐν τοῖς ἄλλοις ἐν ὅσοις εἰώθε τι γίνεσθαι, καθάπερ ἐν τοῖς περικαρπίοις. ἔστι γὰρ τις ἄμπελος ἦν καλοῦσιν τινες κάπνεον, ἦν ἂν ἐνέγκῃ μέλανας βότρυας οὐ κρίνουσι τέρας διὰ τὸ πλειστάκις εἰωθῆναι ταύτην τοῦτο ποιεῖν. αἴτιον δ' ὅτι μεταξὺ λευκῆς ἐστὶ τὴν φύσιν καὶ μελαίνης ὥστ' οὐ πόρρωθεν ἢ μετάβασιν οὐδ' ὥσπερανει παρὰ φύσιν· οὐ γὰρ εἰς ἄλλην φύσιν. ἐν δὲ τοῖς πολυτόκοις ταῦτα συμβαίνει διὰ τὸ τὴν πολυτοκίαν ἐμποδίζειν τὰς τελειώσεις ἀλλήλων καὶ τὰς κινήσεις τὰς γεννητικάς.

Περὶ δὲ τῆς πολυτοκίας καὶ τοῦ πλεονασμοῦ τοῦ τῶν μερῶν, καὶ τῆς ὀλιγοτοκίας καὶ μονοτοκίας καὶ τῆς ἐνδείας τῶν μερῶν ἀπορήσειεν ἂν τις. γίνεταί γὰρ ἐνίοτε τὰ μὲν πλείους ἔχοντα δακτύλους τὰ δ' ἓνα μόνον, καὶ περὶ τὰ ἄλλα μέρη τὸν αὐτὸν τρόπον· καὶ γὰρ πλεονάζει καὶ κολοβὰ γίνεταί. τὰ δὲ καὶ δύο ἔχοντα αἰδοῖα, τὸ μὲν ἄρρενος τὸ δὲ θήλεος, καὶ ἐν ἀνθρώποις καὶ μάλιστα περὶ τὰς αἰγας· γίνονται γὰρ ἅς καλοῦσιν τραγαῖνας διὰ τὸ θήλεος καὶ ἄρρενος ἔχειν αἰδοῖον-ἥδη δὲ καὶ κέρας αἰξ ἔχουσα ἐγένετο πρὸς τῷ σκέλει. γίνονται δὲ μεταβολαὶ καὶ (771a.) πηρώσεις <καὶ

πλεονασμοί> καὶ περὶ τὰ ἐντὸς μόρια τῷ ἢ μὴ ἔχειν ἓνα ἢ κεκολοβωμένα ἔχειν καὶ πλείω καὶ μεθεστῶτα τοὺς τόπους.

καρδίαν μὲν οὖν οὐθὲν πώποτε ἐγένετο ζῶον οὐκ ἔχον, σπλήνα δ' οὐκ ἔχον καὶ δύο ἔχον, καὶ νεφρὸν ἓνα· ἦπαρ δ' οὐκ ἔχον μὲν οὐθέν, οὐχ ὅλον δὲ ἔχον. ταῦτα δὲ πάντα ἐν τοῖς τελειωθείσι καὶ ζῶσιν. εὐρίσκεται καὶ χολήν οὐκ ἔχοντα, πεφυκότα ἔχειν· τὰ δὲ πλείους ἔχοντα μιᾶς. ἤδη δ' ἐγένετο καὶ μεθεστηκότα κατὰ τόπον-τὸ μὲν ἦπαρ ἐν τοῖς ἀριστεροῖς, ὁ δὲ σπλὴν ἐν τοῖς δεξιοῖς. καὶ ταῦτα μὲν ἔν γε τετελεσμένοις ὥπται τοῖς ζώοις ὥσπερ εἴρηται· ἐν δὲ τοῖς τικτομένοις ἔχοντα πολλήν καὶ παντοδαπὴν ταραχήν. τὰ μὲν οὖν μικρὸν παρεκβαίνοντα τὴν φύσιν ζῆν εἴωθεν, τὰ δὲ πλεῖον οὐ ζῆν ὅταν ἐν τοῖς κυρίοις τοῦ ζῆν γένηται τὸ παρὰ φύσιν.

Ἡ δὲ σκέψις ἐστὶν ἡ περὶ τούτων πότερον τὴν αὐτὴν αἰτίαν δεῖ νομίζειν τῆς μονοτοκίας καὶ τῆς ἐνδείας τῶν μερῶν καὶ τοῦ πλεονασμοῦ καὶ τῆς πολυτοκίας ἢ μὴ τὴν αὐτήν.

Πρῶτον μὲν οὖν διὰ τί τὰ μὲν ἐστὶ πολυτόκα τὰ δὲ μονοτόκα, τοῦτ' ἂν τις δόξειεν εὐλόγως θαυμάζειν. τὰ γὰρ μέγιστα μονοτόκα τῶν ζώων ἐστίν, οἷον ἐλέφας κάμηλος ἵππος καὶ τὰ μώνυχα· τούτων δὲ τὰ μὲν μείζω τῶν ἄλλων, τὰ δὲ πολὺ διαφέρει κατὰ τὸ μέγεθος. κύων δὲ καὶ λύκος καὶ τὰ πολυσχιδῆ πάντα πολυτόκα σχεδόν, καὶ τὰ μικρὰ τῶν τοιούτων οἷον τὸ τῶν μυῶν γένος. τὰ δὲ δίχηλα ὀλιγοτόκα πλὴν ὕος· αὕτη δὲ τῶν πολυτόκων ἐστίν. εὐλογον γὰρ τὰ μὲν μεγάλα πλείω δύνασθαι γεννᾶν καὶ σπέρμα φέρειν πλεῖον. αἴτιον δ' αὐτὸ τὸ θαυμάζομενον τοῦ μὴ θαυμάζειν· διὰ γὰρ τὸ μέγεθος οὐ πολυτοκοῦσιν· ἢ γὰρ τροφή καταναλίσκεται τοῖς τοιούτοις εἰς τὴν αὐξήσιν τοῦ σώματος-τοῖς δ' ἐλάττωσιν ἀπὸ τοῦ μεγέθους ἢ φύσις ἀφελοῦσα πρὸς τὸ περίττωμα προστίθῃσι τὸ σπερματικὸν τὴν ὑπεροχήν. ἔτι δὲ τὸ γεννῆσαν σπέρμα πλεῖον μὲν τὸ τοῦ μείζονος ἀναγκαῖον εἶναι, μικρὸν δὲ τὸ τῶν ἐλαττόνων.

πολλὰ μὲν οὖν μικρὰ γένοιντ' ἂν ἐν ταυτῷ, μεγάλα δὲ πολλὰ χαλεπόν. τοῖς δὲ μέσοις μεγέθεσι τὸ μέσον ἀπέδωκεν ἡ φύσις. τοῦ μὲν οὖν τὰ μὲν εἶναι μεγάλα τῶν ζώων τὰ δ' ἐλάττω τὰ δὲ μέσα πρότερον εἰρήκαμεν τὴν αἰτίαν· (771b.) μονοτόκα δέ, τὰ δ' ὀλιγοτόκα, τὰ δὲ πολυτόκα τῶν ζώων ἐστίν. ὥς μὲν ἐπὶ τὸ πολὺ τὰ μὲν μώνυχα μονοτόκα, τὰ δὲ δίχηλα ὀλιγοτόκα, τὰ δὲ πολυσχιδῆ πολυτόκα. τούτου δ' αἴτιον ὅτι ὥς ἐπὶ τὸ πολὺ τὰ μεγέθη διώρισται κατὰ τὰς διαφορὰς ταύτας. οὐ μὴν ἔχει γ' οὕτως ἐπὶ πάντων· αἴτιον

γὰρ μέγεθος καὶ μικρότης τῶν σωμάτων τῆς ὀλιγοτοκίας καὶ πολυτοκίας ἀλλ’ οὐ τὸ μώνυχον ἢ πολυσχιδὲς ἢ δίχηλον εἶναι τὸ γένος. τούτου δὲ μαρτύριον· ὁ γὰρ ἐλέφας μέγιστον τῶν ζώων, ἔστι δὲ πολυσχιδὲς, ἢ τε κάμηλος δίχηλον τῶν λοιπῶν μέγιστον ὄν. οὐ μόνον δ’ ἐν τοῖς πεζοῖς ἀλλὰ καὶ ἐν τοῖς πτηνοῖς καὶ ἐν τοῖς πλωτοῖς τὰ μὲν μεγάλα ὀλιγοτόκα ἐστὶ τὰ δὲ μικρὰ πολυτόκα διὰ τὴν αὐτὴν αἰτίαν. ὁμοίως δὲ καὶ τῶν φυτῶν οὐ τὰ μέγιστα φέρει πλεῖστον καρπόν.

Διὰ τί μὲν οὖν τῶν ζώων τὰ μὲν πολυτόκα τὰ δ’ ὀλιγοτόκα τὰ δὲ μονοτόκα τὴν φύσιν ἐστὶν εἴρηται-τῆς δὲ νῦν ῥηθείσης ἀπορίας μᾶλλον ἢ τις εὐλόγως θαυμάσειεν ἐπὶ τῶν πολυτοκούντων, ἐπειδὴ φαίνεται πολλάκις ἀπὸ μιᾶς ὁχείας κυϊσκόμενα τὰ τοιαῦτα τῶν ζώων. τὸ δὲ σπέρμα τὸ τοῦ ἄρρενος, -εἴτε συμβάλλεται πρὸς τὴν ὕλην μόριον γιγνόμενον τοῦ κυήματος καὶ τῷ τοῦ θήλεος σπέρματι μιγνύμενον, εἴτε καὶ μὴ τοῦτον τὸν τρόπον ἀλλ’ ὥσπερ φαμὲν συνάγον καὶ δημιουργοῦν τὴν ὕλην τὴν ἐν τῷ θήλει καὶ τὸ περίττωμα τὸ σπερματικόν, καθάπερ ὁ ὁπὸς τὴν ὑγρότητα τοῦ γάλακτος, -διὰ τίνα ποτ’ αἰτίαν οὐχ ἔν ἀποτελεῖ ζῶον μέγεθος ἔχον, ὥσπερ ἐνταῦθα ὁ ὁπὸς οὐ κεχώριται τῷ συνιστάναι ποσόν τι, ἀλλ’ ὅσῳπερ ἂν εἰς πλεῖον ἔλθῃ καὶ πλείων τοσοῦτω τὸ πηγνύμενόν ἐστι μείζον; τὸ μὲν οὖν ἔλκειν φάναι τοὺς τόπους τῆς ὑστέρας τὸ σπέρμα καὶ διὰ τοῦτο πλείω γίγνεσθαι, διὰ τὸ τῶν τόπων πλήθος καὶ τὰς κοτυληδόνας οὐχ ἔν οὔσας, οὐθέν ἐστιν· ἐν ταῦτῳ γὰρ γίνονται τόφω ὑστέρας δύο πολλάκις, ἐν δὲ τοῖς πολυτόκοις ὅταν πληρωθῇ τῶν ἐμβρύων ἐφεξῆς κείμενα φαίνεται. τοῦτο δὲ δῆλον ἐκ τῶν ἀνατομῶν ἐστίν. ἀλλ’ ὥσπερ καὶ τελειουμένων τῶν ζώων ἔστιν ἐκάστου τι μέγεθος καὶ ἐπὶ τὸ μείζον καὶ ἐπὶ τὸ ἔλαττον, ὧν οὐτ’ ἂν μείζον γένοιτο οὐτ’ ἔλαττον, ἀλλ’ ἐν τῷ μεταξύ διαστήματι τοῦ μεγέθους λαμβάνουσι πρὸς ἄλληλα τὴν ὑπεροχὴν καὶ τὴν (772a.) ἔλλειψιν, καὶ γίγνεται <ὁ μὲν> μείζον ὁ δ’ ἐλάττων ἄνθρωπος καὶ τῶν ἄλλων ζώων ὁτιοῦν, -οὕτω καὶ ἐξ ἧς γίγνεται ὕλης σπερματικῆς οὐκ ἔστιν ἀόριστος οὐτ’ ἐπὶ τὸ πλεῖον οὐτ’ ἐπὶ τὸ ἔλαττον ὥστ’ ἐξ ὁποσησοῦν γίγνεσθαι τῷ πλήθει. ὅσα γοῦν τῶν ζώων διὰ τὴν εἰρημένην αἰτίαν πλεῖον προῖεται περίττωμα ἢ εἰς ἐνὸς ζώου ἀρχήν, οὐκ ἐνδέχεται ἐκ ταύτης ἐν γίγνεσθαι πάσης ἀλλὰ τοσαῦτα ὅσα τοῖς μεγέθεσιν ὥρισται τοῖς ἰκνουμένοις, οὐδὲ τὸ τοῦ ἄρρενος σπέρμα ἢ ἡ δύναμις ἢ ἐν τῷ σπέρματι οὐθέν συστήσει πλεῖον ἢ ἔλαττον τοῦ πεφυκότος.

ὁμοίως τ' εἰ πλεῖον σπέρμα ἀφήσῃ τὸ ἄρρεν ἢ δυνάμεις πλείους ἐν διαιρουμένῳ τῷ σπέρματι, οὐθὲν ποιήσει μείζον τὸ πλείστον ἀλλὰ καὶ τοῦναντίον διαφθερεῖ καταξηραίνον. οὐδὲ γὰρ τὸ πῦρ θερμαίνει τὸ ὕδωρ μᾶλλον, ὅσῳ περ ἂν ἢ πλεῖον, ἀλλ' ἔστιν ὅρος τις τῆς θερμότητος, ἧς ὑπαρχούσης ἐὰν αὐξή τις τὸ πῦρ, θερμὸν μὲν οὐκέτι γίνεταί μᾶλλον, ἐξατμίζει δὲ μᾶλλον καὶ τέλος ἀφανίζεται καὶ γίνεταί ξηρόν. ἐπεὶ δὲ φαίνεται συμμετρίας δεῖσθαί τινος πρὸς ἄλληλα τό τε περίττωμα τὸ τοῦ θήλεος καὶ τὸ παρὰ τοῦ ἄρρενος (ὅσα προῖεται σπέρμα τῶν ἀρρένων), τὰ πολυτόκα τῶν ζώων εὐθὺς ἀφήσῃ τὸ μὲν ἄρρεν δυνάμενον πλείω συνιστάναί μεριζόμενον, τὸ δὲ θῆλυ τοσοῦτον ὥστε πλείους γίνεσθαι συστάσεις. τὸ δ' ἐπὶ τοῦ γάλακτος παράδειγμα λεχθὲν οὐχ ὁμοίον ἐστίν· ἡ μὲν γὰρ τοῦ σπέρματος θερμότης οὐ μόνον συνίστησι ποσὸν ἀλλὰ καὶ ποιόν τι, ἡ δ' ἐν τῷ ὀπῷ καὶ τῇ πυετίᾳ τὸ ποσὸν μόνον. τοῦ μὲν οὖν πολλὰ γίνεσθαι τὰ κύηματα καὶ μὴ συνεχῆς ἐν ἐκ πάντων ἐν τοῖς πολυτόκοις τοῦτ' αὐτὸ αἴτιον ὅτι οὐκ ἐξ ὅποσου οὖν γίνεταί κύημα, ἀλλ' ἐὰν τε ὀλίγον ἢ οὐκ ἔσται, ἐὰν τε πολὺ λίαν· ὥριστα γὰρ ἡ δύναμις καὶ τοῦ πάσχοντος καὶ τῆς θερμότητος τῆς ποιούσης. ὁμοίως δὲ καὶ ἐν τοῖς μονοτόκοις καὶ μεγάλοις τῶν ζώων οὐ πολλὰ γίνεταί ἐκ πολλοῦ περιττώματος· καὶ γὰρ ἐν ἐκείνοις ἐκ ποσοῦ τινος ποσόν τι τὸ ἐργαζόμενον ἐστίν. οὐ προῖεται μὲν οὖν πλείω τοιαύτην ὕλην διὰ τὴν προειρημένην αἰτίαν· ἦν δὲ προῖεται τοσαύτη κατὰ φύσιν ἐστὶν ἐξ ἧς ἐν γίνεταί κύημα μόνον. ἐὰν δὲ ποτε πλεῖον ἔλθῃ διτοκεῖ τότε. διὸ καὶ δοκεῖ τερατώδη τὰ τοιαῦτ' εἶναι μᾶλλον, ὅτι γίνεταί παρὰ τὸ ὥς ἐπὶ τὸ πολὺ καὶ τὸ εἰωθός.

Ὁ δὲ (772b.) ἄνθρωπος ἐπαμφοτερίζει πᾶσι τοῖς γένεσιν· καὶ γὰρ μονοτοκεῖ καὶ ὀλιγοτοκεῖ καὶ πολυτοκεῖ ποτε, μάλιστα δὲ μονοτόκον τὴν φύσιν ἐστί· διὰ μὲν τὴν ὑγρότητα τοῦ σώματος καὶ θερμότητα πολυτόκον (τοῦ γὰρ σπέρματος ἡ φύσις ὑγρὰ καὶ θερμή), διὰ δὲ τὸ μέγεθος ὀλιγοτόκον καὶ μονοτόκον. διὰ δὲ τοῦτο καὶ τοὺς τῆς κυήσεως χρόνους μόνῳ τῶν ζώων ἀνωμάλους εἶναι συμβέβηκεν. τοῖς μὲν γὰρ ἄλλοις εἰς ἐστὶν ὁ χρόνος, τοῖς δ' ἀνθρώποις πλείους· καὶ γὰρ ἐπτάμηνα καὶ δεκάμηνα γεννῶνται καὶ κατὰ τοὺς μεταξὺ χρόνους· καὶ γὰρ τὰ ὀκτάμηνα ζῆ μὲν, ἦττον δέ. τὸ δ' αἴτιον ἐκ τῶν νῦν λεχθέντων συνίδοι τις ἂν, εἴρηται δὲ περὶ αὐτῶν ἐν τοῖς Προβλήμασιν. καὶ περὶ μὲν τούτων διωρίσθω τὸν τρόπον τοῦτον.

Τῶν δὲ πλεοναζόντων μορίων παρὰ φύσιν τὸ αὐτὸ αἴτιον καὶ τῆς

διδυμοτοκίας. ἤδη γὰρ ἐν τοῖς κυήμασι συμβαίνει τὸ αἷτιον ἐὰν πλείων ὕλη συστήῃ ἢ κατὰ τὴν τοῦ μορίου φύσιν· τότε γὰρ συμβαίνει μὲν μόριον μεῖζον τῶν ἄλλων ἔχειν, οἷον δάκτυλον ἢ χεῖρα ἢ πόδα ἢ τι τῶν ἄλλων ἀκρωτηρίων ἢ μελῶν, ἢ σχισθέντος τοῦ κυήματος πλείω γίνεσθαι καθάπερ ἐν τοῖς ποταμοῖς αἱ δῖναι· καὶ γὰρ ἐν τούτοις τὸ φερόμενον ὑγρὸν καὶ κίνησιν ἔχον ἂν ἀντικρούσῃ, δύο ἐξ ἐνὸς γίνονται συστάσεις ἔχουσαι τὴν αὐτὴν κίνησιν· τὸν αὐτὸν δὲ τρόπον καὶ ἐπὶ τῶν κυημάτων συμβαίνει. προσφύεται δὲ μάλιστα μὲν πλησίον ἀλλήλων, ἐνίοτε δὲ καὶ πόρρω διὰ τὴν γιγνομένην ἐν τῷ κυήματι κίνησιν, μάλιστα δὲ διὰ τὸ τὴν τῆς ὕλης ὑπεροχὴν ὅθεν ἀφηρέθη ἐκεῖ ἀποδιδόναι, τὸ δ' εἶδος ἔχειν ὅθεν ἐπλεόνασεν.

Ὅσα δὲ συμβαίνει τοιαῦτα ὥστε δύο ἔχειν αἰδοῖα, τὸ μὲν ἄρρενος τὸ δὲ θήλεος, αἰ μὲν τῶν πλεοναζόντων γίνεταί τὸ μὲν κύριον τὸ δ' ἄκυρον τῷ κατὰ τὴν τροφὴν αἰεὶ ἀμαυροῦσθαι ἅτε παρὰ φύσιν ὄν, προσπέφυκε δ' ὥσπερ τὰ φύματα· καὶ γὰρ ταῦτα λαμβάνει τροφὴν καίπερ ὄντα ὑστερογενῇ καὶ παρὰ φύσιν. γίνεταί δὲ κρατήσαντος μὲν τοῦ δημιουργοῦντος ὅμοια δύο καὶ κρατηθέντος ὅλως· ἂν δὲ τῇ μὲν κρατήσει τῇ δὲ κρατηθῇ, τὸ μὲν θῆλυ τὸ δὲ ἄρρεν· οὐθὲν γὰρ διαφέρει τοῦτο λέγειν ἐπὶ τῶν μορίων ἢ ἐπὶ τοῦ ὅλου δι' ἣν αἰτίαν γίνεταί τὸ μὲν θῆλυ τὸ δ' ἄρρεν. ὅσα δ' ἐλλείποντα γίνεταί τῶν τοιούτων μορίων οἷον ἀκρωτηρίου τινὸς ἢ τῶν ἄλλων μελῶν, τὴν αὐτὴν δεῖ νομίζειν αἰτίαν ἥνπερ καὶ ἐὰν ὅλον τὸ (773a.) γιγνόμενον ἀμβλωθῇ-ἀμβλώσεις δὲ γίνονται πολλαὶ τῶν κυημάτων.

Διαφέρουσι δ' αἱ μὲν παραφύσεις τῆς πολυτοκίας τὸν εἰρημένον τρόπον, τὰ δὲ τέρατα τούτων τῷ τὰ πολλὰ αὐτῶν εἶναι σύμφυτον. ἔνια δὲ καὶ τοῦτον τὸν τρόπον, ἐὰν ἐπὶ μειζόνων γένωνται καὶ κυριωτέρων μορίων, οἷον ἔνια ἔχει δύο σπλῆνας καὶ πλείους νεφρούς. ἔτι δὲ μεταστάσεις τῶν μορίων παρατρεπομένων τῶν κινήσεών εἰσι καὶ τῆς ὕλης μεθισταμένης. ἐν δ' εἶναι τὸ ζῶον τὸ τερατῶδες ἢ πλείω συμπεφυκότα δεῖ νομίζειν κατὰ τὴν ἀρχήν, οἷον εἰ τοιοῦτόν ἐστιν ἡ καρδία μόριον, τὸ μὲν μίαν ἔχον καρδίαν ἐν ζῶον, τὰ δὲ πλεονάζοντα μόρια παραφύσεις, τὰ δὲ πλείω ἔχοντα δύο μὲν εἶναι, συμπεφυκέναι δὲ διὰ τὴν τῶν κυημάτων σύναψιν.

Συμβαίνει δὲ πολλάκις καὶ τῶν οὐ δοκούντων ἀναπήρων εἶναι ζῶων πολλοῖς ἤδη τετελειωμένοις τοὺς μὲν συμπεφυκέναι τῶν πόρων τοὺς δὲ παρεκτετράφθαι. καὶ γὰρ θήλεσί τιςιν ἤδη τὸ στόμα τῶν ὑστερῶν συμπεφυκὸς διετέλεσεν, ἤδη δ' ὥρας οὔσης τῶν

καταμηνίων καὶ πόνων ἐπιγιγνομένων ταῖς μὲν αὐτόματον ἐρράγη ταῖς δ' ὑπὸ ἀτρῶν διηρέθη· τὰς δὲ διαφθαρῆναι συνέπεσεν ἡ βία γενομένης τῆς ῥήξεως ἢ γενέσθαι μὴ δυναμένης. καὶ τῶν παίδων ἐνίοις οὐ κατὰ τὸ αὐτὸ συνέπεσε τὸ πέρας τοῦ αἰδοίου καὶ ὁ πόρος ἢ διέρχεται τὸ περίττωμα τὸ ἐκ τῆς κύστεως ἀλλ' ὑποκάτωθεν· διὸ καὶ καθήμενοι οὐροῦσι, τῶν δὲ ὄρχεων ἀνεσπασμένων ἄνω δοκοῦσι τοῖς ἄποθεν ἅμα θήλεος ἔχειν αἰδοῖον καὶ ἄρρενος. ἤδη δὲ καὶ ὁ τῆς ξηραῖς τροφῆς πόρος συμπεφυκὼς ἐπὶ τινων ζώων γέγονε, καὶ προβάτων καὶ ἄλλων, ἐπεὶ καὶ βοῦς ἐν Περίνθῳ ἐγένετο ἢ διὰ τῆς κύστεως λεπτὴ διηθουμένη τροφή διεχώρει, καὶ ἀνατμηθέντος τοῦ ἀρχοῦ ταχὺ πάλιν συνεφύετο, καὶ οὐκ ἐπεκράτουν διαιροῦντες.

Περὶ μὲν οὖν ὀλιγοτοκίας καὶ πολυτοκίας καὶ περὶ παραφύσεως τῶν πλεοναζόντων [ἢ ἐλλειπόντων] μορίων, ἔτι δὲ περὶ τῶν τερατωδῶν εἴρηται.

Κεφάλαιο 5

Τῶν δὲ ζῴων τὰ μὲν ὅλως οὐκ ἐπικυῖσκειται τὰ δ' ἐπικυῖσκειται, καὶ τῶν ἐπικυῖσκομένων τὰ μὲν δύναται τὰ κυήματα ἐκτρέφειν, τὰ δὲ ποτὲ μὲν ποτὲ δ' οὐ. τοῦ δὲ μὴ ἐπικυῖσκεισθαι αἴτιον ὅτι (773b.) μονοτόκα ἐστίν. τὰ τε γὰρ μώνυχα οὐκ ἐπικυῖσκειται καὶ τὰ τούτων μείζονα· διὰ γὰρ τὸ μέγεθος τὸ περίττωμα ἀναλίσκεται εἰς τὸ κύημα. πᾶσι γὰρ ὑπάρχει μέγεθος τούτοις σώματος, τῶν δὲ μεγάλων καὶ τὰ ἔμβρυα μεγάλα κατὰ λόγον ἐστίν· διὸ καὶ τὸ τῶν ἐλεφάντων ἔμβρυον ἡλίκον μόσχος ἐστίν. τὰ δὲ πολυτόκα ἐπικυῖσκειται διὰ τὸ καὶ τῶν πλειόνων τοῦ ἐνὸς εἶναι θατέρῳ θάτερον ἐπικύημα. τούτων δ' ὅσα μὲν μέγεθος ἔχει, καθάπερ ἄνθρωπος, ἐὰν μὲν ἡ ἑτέρα ὀχεία τῆς ἑτέρας γένηται πάρεγγυς, ἐκτρέφει τὸ ἐπικυηθέν· ἥδη γὰρ ὥπται τὸ τοιοῦτον συμβεβηκός. αἴτιον δὲ τὸ εἰρημένον· καὶ γὰρ ἐν τῇ μιᾷ συνουσίᾳ πλεῖον τὸ ἀπὶόν ἐστι σπέρμα, ὃ μερισθὲν ποιεῖ πολυτοκεῖν, ὧν ὑστερίζει θάτερον.

ὅταν δ' ἥδη τοῦ κυήματος ηὔξημένου συμβῇ γίνεσθαι τὴν ὀχείαν ἐπικυῖσκειται μὲν ποτε, ὀλιγάκις μέντοι διὰ τὸ τὴν ὑστέραν συμμύειν ὥς τὰ πολλὰ μέχρι τῶν κυουμένων ταῖς γυναιξίν. ἂν δὲ συμβῇ ποτε (καὶ γὰρ τοῦτ' ἥδη γέγονεν), οὐ δύναται τελειοῦν, ἀλλὰ κυήματ' ἐκπίπτει παραπλήσια τοῖς καλουμένοις ἐκτρώμασιν. ὥσπερ γὰρ ἐπὶ τῶν μονοτόκων διὰ τὸ μέγεθος εἰς τὸ προϋπάρχον τὸ περίττωμα τρέπεται πᾶν, οὕτω καὶ τούτοις, πλὴν ἐκείνοις μὲν εὐθύς, τούτοις δ' ὅταν αὐξηθῇ τὸ ἔμβρυον· τότε γὰρ ἔχουσι παραπλησίως τοῖς μονοτόκοις. ὁμοίως δὲ διὰ τὸν ἄνθρωπον φύσει πολυτόκον εἶναι, καὶ περιεῖναι τι τῷ μεγέθει τῆς ὑστέρας καὶ τοῦ περιττώματος, μὴ μέντοι τοσοῦτον ὥστε ἕτερον ἐκτρέφειν, μόνα τῶν ζῴων ὀχείαν ἐπιδέχεται κυοῦντα γυνή καὶ ἵππος, ἡ μὲν διὰ τὴν εἰρημένην αἰτίαν ἡ δ' ἵππος διὰ τε τὴν τῆς φύσεως στερρότητα καὶ τὸ περιεῖναι τι τῆς ὑστέρας μέγεθος, πλεον μὲν ἢ τῷ ἐνί, ἔλαττον δὲ ἢ ὥστε ἄλλο ἐπικυῖσκεισθαι τέλειον. ἔστι δὲ φύσει ἀφροδισιαστικὸν διὰ τὸ ταῦτο πεπονθῆναι τοῖς στερροῖς· ἐκεῖνά τε γὰρ τοιαῦτ' ἐστὶ διὰ τὸ μὴ γίνεσθαι καθαροῖν (τοῦτο δ' ἐστὶν ὥσπερ τοῖς ἄρρεσι τὸ ἀφροδισιάσαι) καὶ αἱ ἵπποι αἱ θήλειαι ἥκιστα προῖενται καθαροῖν.

ἐν πᾶσι δὲ τοῖς ζωοτοκοῦσι τὰ στερρὰ τῶν θηλέων ἀφροδισιαστικὰ διὰ τὸ παραπλησίως ἔχειν τοῖς ἄρρεσιν ὅταν

συνειλεγμένον μὲν ἢ τὸ σπέρμα, μὴ ἀποκρινόμενον δέ. τοῖς (774a.) γὰρ θήλεσιν ἢ τῶν καταμηνίων κάθαρσις σπέρματος ἐξοδός ἐστιν· ἔστι γὰρ τὰ καταμήνια σπέρμα ἄπεπτον ὥσπερ εἴρηται πρότερον. διὸ καὶ τῶν γυναικῶν ὅσαι πρὸς τὴν ὁμιλίαν ἀκρατεῖς τὴν τοιαύτην, ὅταν πολυτοκῇσιν παύονται τῆς πτοήσεως· ἐκκεκριμένη γὰρ ἡ σπερματικὴ περίττωσις οὐκέτι ποιεῖ τῆς ὁμιλίας ταύτης ἐπιθυμίαν. ἐν δὲ τοῖς ὄρνισιν αἱ θήλειαι τῶν ἀρρένων ἡττόν εἰσιν ἀφροδισιαστικαὶ διὰ τὸ πρὸς τῷ ὑποζώματι τὰς ὑστέρας ἔχειν, τὰ δ' ἄρρενα τούναντίον· ἀνεσπασμένους γὰρ ἔχει τοὺς ὄρχεις ἐντός, ὥστ' ἂν ἢ τι γένος τῶν τοιούτων ὀρνίθων φύσει σπερματικὸν ἀεὶ δεῖσθαι τῆς ὁμιλίας ταύτης. τοῖς μὲν οὖν θήλεσι τὸ κάτω καταβαίνειν τὰς ὑστέρας, τοῖς δ' ἄρρεσι τὸ ἀνασπᾶσθαι τοὺς ὄρχεις συμβαίνει πρὸ ὁδοῦ πρὸς τὴν ὀχείαν.

Δι' ἣν μὲν οὖν αἰτίαν τὰ μὲν οὐκ ἐπικυῖσκειται παντελῶς τὰ δ' ἐπικυῖσκειται μὲν, τὰ δὲ κύηματα ἐκτρέφει ὅτε μὲν ὅτε δ' οὐ, καὶ διὰ τίν' αἰτίαν τὰ μὲν ἀφροδισιαστικὰ τὰ δ' οὐκ ἀφροδισιαστικὰ τῶν τοιούτων ἐστίν, εἴρηται.

Ἐνια δὲ τῶν ἐπικυῖσκομένων καὶ πολὺν χρόνον διαλειπούσης τῆς ὀχείας δύναται τὰ κύηματα ἐκτρέφειν, ὅσων σπερματικόν τε τὸ γένος ἐστὶ καὶ μὴ τὸ σῶμα μέγεθος ἔχει καὶ τῶν πολυτόκων ἐστίν· διὰ μὲν γὰρ τὸ πολυτοκεῖν εὐρυχωρίαν ἔχει τῆς ὑστέρας, διὰ δὲ τὸ σπερματικὸν εἶναι πολὺ προῖεται περίττωμα τῆς καθάρσεως· διὰ δὲ τὸ μὴ τὸ σῶμα μέγεθος ἔχειν ἀλλὰ πλείονι λόγῳ τὴν κάθαρσιν ὑπερβάλλειν τῆς εἰς τὸ κύημα τροφῆς δύναταί τε συνίστασθαι ζῶα καὶ ὕστερον καὶ ταῦτ' ἐκτρέφειν. ἔτι δ' αἱ ὑστέραι τῶν τοιούτων οὐ συμμεμύκασιν διὰ τὸ περιεῖναι περίττωμα τῆς καθάρσεως. τοῦτο δὲ καὶ ἐπὶ γυναικῶν ἤδη συμβέβηκεν· γίνεταί γάρ τιςι κυούσαις κάθαρσις καὶ διὰ τέλους. ἀλλὰ ταύταις μὲν παρὰ φύσιν (διὸ βλάπτει τὸ κύημα), τοῖς δὲ τοιούτοις τῶν ζώων κατὰ φύσιν· οὕτω γὰρ τὸ σῶμα συνέστηκεν ἐξ ἀρχῆς, οἷον τὸ τῶν δασυπόδων· τοῦτο γὰρ ἐπικυῖσκειται τὸ ζῶον· οὔτε γὰρ τῶν μεγάλων ἐστὶ πολυτόκον τε (πολυσχιδὲς γάρ, τὰ δὲ πολυσχιδῆ πολυτόκα) καὶ σπερματικόν. δηλοῖ δ' ἡ δασύτης· ὑπερβάλλει γὰρ τοῦ τριχώματος τὸ πλῆθος· καὶ γὰρ ὑπὸ τοὺς πόδας καὶ ἐντός τῶν γνάθων τοῦτ' ἔχει τρίχας μόνον τῶν ζώων. ἡ δὲ δασύτης σημεῖον (774b.) πλῆθους περιττώματός ἐστι, διὸ καὶ τῶν ἀνθρώπων οἱ δασεῖς ἀφροδισιαστικοὶ καὶ πολὺσπερμοὶ μᾶλλον εἰσι τῶν λείων. ὁ μὲν οὖν δασύπους τὰ μὲν τῶν κυημάτων

ἀτελῇ πολλάκις ἔχει, τὰ δὲ προΐεται τετελειωμένα τῶν τέκνων.

Κεφάλαιο 6

Τῶν δὲ ζωοτόκων τὰ μὲν ἀτελῇ προῖται ζῶα τὰ δὲ τετελειωμένα, τὰ μὲν μώνυχα τετελειωμένα καὶ τὰ δίχηλα, τῶν δὲ πολυσχιδῶν ἀτελῇ τὰ πολλά. τούτου δ' αἴτιον ὅτι τὰ μὲν μώνυχα μονοτόκα ἐστί, τὰ δὲ δίχηλα ἢ μονοτόκα ἢ διτόκα ὡς ἐπὶ τὸ πολὺ, ῥάδιον δὲ τὰ ὀλίγα ἐκτρέφειν. τῶν δὲ πολυσχιδῶν ὅσα ἀτελῇ τίκεται πάντα πολυτόκα· διὸ νέα μὲν ὄντα δύναται τὰ κυήματα τρέφειν, ὅταν δ' αὐξηθῇ καὶ λάβη μέγεθος οὐ δυναμένου τοῦ σώματος ἐκτρέφειν προῖται καθάπερ τὰ σκωληκοτόκα τῶν ζώων. καὶ γὰρ τούτων τὰ μὲν ἀδιάρθρωτα σχεδὸν γεννᾷ καθάπερ ἁλώπηξ ἄρκτος λέων, παραπλησίως δ' ἓν καὶ τῶν ἄλλων· τυφλὰ δὲ πάντα σχεδόν, οἷον ταῦτά τε καὶ ἔτι κύων λύκος θῶς. μόνον δὲ πολυτόκον ὃν ἡ ὕς τελειοτοκεῖ, καὶ ἐπαλλάττει τοῦτο μόνον· πολυτοκεῖ μὲν γὰρ ὡς τὰ πολυσχιδῇ, δίχηλον δ' ἐστί καὶ μώνυχον· εἰσὶ γὰρ που μώνυχες ὕες. πολυτοκεῖ μὲν οὖν διὰ τὴν εἰς τὸ μέγεθος τροφήν εἰς τὴν σπερματικὴν ἀποκρίνεσθαι περίττωσιν· τοῦτο γὰρ ὡς μώνυχον ὃν οὐκ ἔχει μέγεθος, ἅμα δὲ καὶ μᾶλλον ὥσπερ ἀμφισβητοῦν τῇ φύσει τῇ τῶν μωνύχων-δίχηλόν ἐστιν. διὰ μὲν οὖν τοῦτο καὶ μονοτοκεῖ ποτε καὶ διτοκεῖ καὶ πολυτοκεῖ τὰ πλεῖστα, ἐκτρέφει δ' εἰς τέλος διὰ τὴν τοῦ σώματος εὐβοσίαν· ἔχει γὰρ ὡς πείρα γῇ φυτοῖς ἱκανὴν καὶ δαψιλῇ τροφήν.

Τίκτουσι δ' ἀτελῇ καὶ τυφλὰ καὶ τῶν ὀρνίθων τινὲς ὅσοι πολυτοκοῦσιν αὐτῶν μὴ σωμάτων ἔχοντες μέγεθος οἷον κορώνη κίττα στρουθοὶ χελιδόνες, καὶ τῶν ὀλιγοτοκούντων ὅσα μὴ δαψιλῇ τροφήν συνεκτίκεται τοῖς τέκνοις οἷον φάττα καὶ τρυγῶν καὶ περιστερά. καὶ διὰ τοῦτο τῶν χελιδόνων ἐάν τις ἔτι νέων ὄντων ἐκκεντήσῃ τὰ ὄμματα πάλιν ὑγιάζονται· γιγνομένων γὰρ ἄλλ' οὐ γεγεννημένων φθείρονται, διόπερ φύονται καὶ βλαστάνουσιν ἐξ ἀρχῆς. ὅλως δὲ προτερεῖ μὲν τῆς τελειογονίας διὰ τὴν ἀδυναμίαν τοῦ ἐκτρέφειν, ἀτελῇ δὲ γίγνεται διὰ τὸ προτερεῖν. δῆλον δὲ τοῦτο καὶ ἐπὶ τῶν ἐπταμήνων· διὰ (775a.) γὰρ τὸ ἀτελῇ εἶναι πολλάκις ἓν αὐτῶν γίγνεται οὐδὲ τοὺς πόρους ἔχοντά πω διηρθρωμένους, οἷον ὠτων καὶ μυκτῆρων, ἀλλ' ἐπαυξανομένοις διαρθροῦται, καὶ βιοῦσι πολλὰ τῶν τοιούτων.

Γίγνεται δὲ ἀνάπηρα μᾶλλον ἐν τοῖς ἀνθρώποις τὰ ἄρρενα τῶν θηλέων, ἐν δὲ τοῖς ἄλλοις οὐθὲν μᾶλλον. αἴτιον δ' ὅτι ἐν τοῖς

ἀνθρώποις πολὺ διαφέρει τὸ ἄρρεν τοῦ θήλεος τῇ θερμότητι τῆς φύσεως, διὸ κινητικώτερα ἐστὶ κυούμενα τὰ ἄρρενα τῶν θηλέων· διὰ δὲ τὸ κινεῖσθαι θραύεται μᾶλλον· εὐφθαρτον γὰρ τὸ νέον διὰ τὴν ἀσθένειαν. διὰ τὴν αὐτὴν δὲ ταύτην αἰτίαν καὶ τελειοῦται τὰ θήλεα τοῖς ἄρρεσιν οὐχ ὁμοίως ἐν ταῖς γυναιξίν, <ἐν δὲ τοῖς ἄλλοις ζώοις ὁμοίως· οὐθὲν γὰρ ὑστερεῖ τὸ θῆλυ πλέον τοῦ ἄρρενος ὥσπερ ἐν ταῖς γυναιξίν>· ἐν μὲν γὰρ τῇ μητρὶ ἐν πλείονι χρόνῳ διακρίνεται τὸ θῆλυ τοῦ ἄρρενος, ἐξελθόντων δὲ πάντα πρότερον ἐπιτελεῖται οἷον ἥβη καὶ ἀκμὴ καὶ γῆρας τοῖς θήλεσιν ἢ τοῖς ἄρρεσιν· ἀσθενέστερα γὰρ ἐστὶ καὶ ψυχρότερα τὰ θήλεα τὴν φύσιν, καὶ δεῖ ὑπολαμβάνειν ὥσπερ ἀναπηρίαν εἶναι τὴν θηλότητα φυσικὴν. ἔσω μὲν οὖν διακρίνεται διὰ τὴν ψυχρότητα βραδέως (ἡ γὰρ διάκρισις πέψις ἐστί, πέττει δ' ἡ θερμότης, εὐπεπτον δὲ τὸ θερμότερον), ἐκτὸς δὲ διὰ τὴν ἀσθένειαν ταχὺ συνάπτει πρὸς τὴν ἀκμὴν καὶ τὸ γῆρας· πάντα γὰρ τὰ ἐλάττω πρὸς τὸ τέλος ἔρχεται θάττον ὥσπερ καὶ ἐν τοῖς κατὰ τέχνην ἔργοις καὶ ἐν τοῖς ὑπὸ φύσεως συνισταμένοις. διὰ τὸ εἰρημένον δ' αἴτιον καὶ ἐν τοῖς ἀνθρώποις τὰ διδυμοτοκούμενα θῆλυ καὶ ἄρρεν ἦττον σώζεται, ἐν δὲ τοῖς ἄλλοις οὐθὲν ἦττον· τοῖς μὲν γὰρ παρὰ φύσιν τὸ ἰσοδρομεῖν, οὐκ ἐν ἴσοις χρόνοις γιγνομένης τῆς διακρίσεως ἄλλ' ἀνάγκη τὸ ἄρρεν ὑστερεῖν ἢ τὸ θῆλυ προτερεῖν, ἐν δὲ τοῖς ἄλλοις οὐ παρὰ φύσιν. συμβαίνει δὲ καὶ διαφορὰ περὶ τὰς κήσεις ἐπὶ τε τῶν ἀνθρώπων καὶ ἐπὶ τῶν ἄλλων ζώων· τὰ μὲν γὰρ εὐθηνεῖ μᾶλλον τοῖς σώμασι τὸν πλεῖστον χρόνον, τῶν δὲ γυναικῶν αἱ πολλαὶ δυσφοροῦσι περὶ τὴν κύησιν. ἔστι μὲν οὖν αἰτίον τι τούτων καὶ διὰ τὸν βίον· ἐδραῖαι γὰρ οὔσαι πλείονος γέμουσι περιττώματος, ἐπεὶ ἐν οἷς ἔθνεσι πονητικὸς ὁ τῶν γυναικῶν βίος οὐθ' ἡ κύησις ὁμοίως ἐπίδηλός ἐστι, τίκτουσί τε ῥαδίως κάκεῖ καὶ πανταχοῦ αἱ εἰωθυῖαι πονεῖν· ἀναλίσκει γὰρ ὁ πόνος τὰ περιττώματα, ταῖς δ' ἐδραΐαις ἐνυπάρχει πολλὰ τοιαῦτα διὰ τὴν ἀπονίαν καὶ τὸ μὴ γίγνεσθαι καθάρσεις κυούσαις, ἢ τε ὠδὶς (775b.) ἐπίπονός ἐστιν· ὁ δὲ πόνος γυμνάζει τὸ πνεῦμα ὥστε δύνασθαι κατέχειν ἐν ᾧ τὸ τίκτειν ἐστὶ ῥαδίως ἢ χαλεπῶς. ἔστι μὲν οὖν ὥσπερ εἴρηται καὶ ταῦτα συμβαλλόμενα πρὸς τὴν διαφορὰν τοῦ πάθους τοῖς ἄλλοις ζώοις καὶ ταῖς γυναιξί, μάλιστα δ' ὅτι τοῖς μὲν αὐτῶν ὀλίγη γίνεταί καθαρις τοῖς δ' οὐκ ἐπίδηλος ὅλως, ταῖς δὲ γυναιξὶ πλείστη τῶν ζώων, ὥστε μὴ γιγνομένης τῆς ἐκκρίσεως διὰ τὴν κύησιν ταῖς μὲν ταραχὴν παρέχει· καὶ γὰρ μὴ κυούσαις ὅταν αἱ καθάρσεις μὴ γίνωνται νόσοι

συμβαίνουσιν, καὶ τὸ πρῶτον δὲ ταραττονται συλλαβοῦσαι μᾶλλον αἱ πλεῖσται τῶν γυναικῶν· τὸ γὰρ κύημα κωλύειν μὲν δύναται τὰς καθάρσεις, διὰ μικρότητα δὲ οὐδὲν ἀναλίσκει πλῆθος τοῦ περιττώματος τὸ πρῶτον, ὕστερον δὲ κουφίζει μεταλαμβάνον· ἐν δὲ τοῖς ἄλλοις ζώοις διὰ τὸ ὀλίγον εἶναι σύμμετρον γίγνεται πρὸς τὴν αὔξησιν τῶν ἐμβρύων, καὶ ἀναλικομένων τῶν περιττωμάτων τῶν ἐμποδιζόντων τὴν τροφὴν εὐημερεῖ τοῖς σώμασι μᾶλλον. καὶ ἐν τοῖς ἐνύδροις τὸν αὐτὸν τρόπον καὶ ἐν τοῖς ὄρνισιν. ἤδη δὲ μεγάλων γιγνομένων τῶν κυημάτων, ὅσοις μηκέτι συμβαίνει ἡ εὐτροφία τῶν σωμάτων, αἴτιον τὸ τὴν αὔξησιν τοῦ κυήματος δεῖσθαι πλείονος ἢ τῆς περιττωματικῆς τροφῆς. ὀλίγαις δὲ τισι τῶν γυναικῶν βέλτιον ἔχειν τὰ σώματα συμβαίνει κυοῦσαις-αὐταὶ δ' εἰσὶν ὅσαις μικρὰ τὰ περιττώματα ἐν τῷ σώματι ὥστε καταναλίσκεσθαι μετὰ τῆς εἰς τὸ ἔμβρυον τροφῆς.

Κεφάλαιο 7

Περὶ δὲ τῆς καλουμένης μύλης ῥητέον ἢ γίνεταί μὲν ὀλιγάκις ταῖς γυναιξί, γίνεταί δέ τις τοῦτο τὸ πάθος κυοῦσαις. τίκτουσι γὰρ ὃ καλοῦσι μύλην. ἤδη γὰρ συνέβη τινὶ γυναικὶ συγγενομένη τῷ ἀνδρὶ καὶ δοξάσῃ συλλαβεῖν, τὸ μὲν πρῶτον ὃ τε ὄγκος ηὔξανετο τῆς γαστρὸς καὶ τᾶλλα ἐγίνετο κατὰ λόγον, ἐπεὶ δὲ ὁ χρόνος ἦν τοῦ τόκου οὗτ' ἔτικτεν οὔτε ὁ ὄγκος ἐλάττων ἐγίνετο, ἀλλ' ἔτη τρία ἢ τέτταρα οὕτω διετέλει ἕως δυσεντερίας γενομένης καὶ κινδυνεύσασα ὑπ' αὐτῆς ἔτεκε σάρκα ἣν καλοῦσι μύλην. ἐνίαις δὲ καὶ συγκαταγερᾷσκει τοῦτο τὸ πάθος καὶ συναποθνήσκει. τὰ δὲ θύραζε ἐξιόντα τῶν τοιούτων γίνεταί σκληρὰ οὕτως ὥστε μόλις διακόπτεσθαι καὶ σιδήρῳ. περὶ μὲν οὖν τῆς τοῦ πάθους αἰτίας εἴρηται ἐν τοῖς Προβλήμασιν· πάσχει γὰρ ταῦτόν τὸ κύημα (776a.) ἐν τῇ μήτρᾳ ὅπερ ἐν τοῖς ἐψομένοις τὰ μωλυνόμενα, καὶ οὐ διὰ θερμότητα, ὥσπερ τινὲς φασιν, ἀλλὰ μᾶλλον δι' ἀσθένειαν θερμότητος (ἔοικε γὰρ ἡ φύσις ἀσθενεῖν καὶ οὐ δύνασθαι τελειῶσαι οὐδ' ἐπιθεῖναι τῇ γενέσει πέρας· διὸ καὶ συγκαταγερᾷσκει ἢ πολὺν ἐμμένει χρόνον· οὔτε γὰρ ὥς τετελεσμένον οὔθ' ὥς πάμπαν ἀλλότριον ἔχει τὴν φύσιν)· τῆς γὰρ σκληρότητος ἡ ἀπεψία αἰτία· ἀπεψία γάρ τις καὶ ἡ μώλυνσίς ἐστιν.

Ἀπορίαν δ' ἔχει διὰ τί ποτ' ἐν τοῖς ἄλλοις οὐχὶ γίνεταί ζῳοίς, εἰ μὴ τι πάμπαν λέληθεν. αἴτιον δὲ δεῖ νομίζειν ὅτι μόνον ὑστερικόν ἐστιν ἡ γυνὴ τῶν ἄλλων ζῳῶν καὶ περὶ τὰς καθάρσεις πλεονάζει καὶ οὐ δύναται πέττειν αὐτάς· ὅταν οὖν ἐκ δυσπέπτου ἱκμάδος συστῇ τὸ κύημα τότε γίνεταί ἡ καλουμένη μύλη ἐν ταῖς γυναιξὶν εὐλόγως ἢ μάλιστα ἢ μόναις.

Κεφάλαιο 8

Τὸ δὲ γάλα γίγνεται τοῖς θήλεσιν ὅσα ζωοτοκεῖ ἐν αὐτοῖς χρήσιμον μὲν εἰς τὸν χρόνον τὸν τοῦ τόκου· τῆς γὰρ τροφῆς χάριν αὐτὸ τῆς θύραζε ἐποίησεν ἢ φύσις τοῖς ζώοις ὥστ' οὐτ' ἐλλείπειν αὐτὸ ἐν τῷ χρόνῳ τούτῳ οὐθὲν οὐθ' ὑπερβάλλειν οὐθὲν· ὅπερ καὶ φαίνεται συμπύπτον ἂν μὴ τι γένηται παρὰ φύσιν. τοῖς μὲν οὖν ἄλλοις ζώοις διὰ τὸ τὸν χρόνον ἓνα τῆς κυήσεως εἶναι πρὸς τοῦτον ἀπαντᾷ τὸν καιρὸν ἢ πέψις αὐτοῦ· τοῖς δ' ἀνθρώποις ἐπεὶ πλείους οἱ χρόνοι κατὰ τὸν πρῶτον ἀναγκαῖον ὑπάρχειν· διὸ πρὸ τῶν ἑπτὰ μηνῶν ἄχρηστον τὸ γάλα ταῖς γυναιξί, τότε δ' ἤδη γίγνεται χρήσιμον. εὐλόγως δὲ συμβαίνει καὶ διὰ τὴν ἐξ ἀνάγκης αἰτίαν πεπεμμένον εἰς τοὺς τελευταίους χρόνους· τὸ μὲν γὰρ πρῶτον ἢ τοῦ τοιοῦτου περιττώματος ἀπόκρισις εἰς τὴν τῶν ἐμβρύων ἀναλίσκεται γένεσιν· πάντων δ' ἢ τροφή τὸ γλυκύτατον καὶ πεπεμμένον, ὥστ' ἀφαιρουμένης τῆς τοιαύτης δυνάμεως ἀνάγκη τὸ λοιπὸν ἀλμυρὸν γίνεσθαι καὶ δύσχυμον.

τελευτουμένων δὲ τῶν κυημάτων πλέον τε τὸ περιττώμα τὸ περιγιγνόμενον (ἔλαττον γὰρ τὸ ἀναλίσκόμενον) καὶ γλυκύτερον, οὐκ ἀφαιρουμένου ὁμοίως τοῦ εὐπέπτου. οὐ γὰρ ἔτι εἰς πλάσιν τοῦ ἐμβρύου γίγνεται ἡ δαπάνη ἀλλ' εἰς μικρὰν αὐξησιν, ὥσπερ ἐστηκὸς ἤδη διὰ τὸ τέλος ἔχειν τὸ ἐμβρυον· ἔστι γάρ (776b.) τις καὶ κυήματος τελείωσις. διόπερ ἐξέρχεται καὶ μεταβάλλει τὴν γένεσιν ὡς ἔχον τὰ αὐτοῦ καὶ οὐκέτι λαμβάνει τὸ μὴ αὐτοῦ, ἐν ᾧ καιρῷ γίγνεται τὸ γάλα χρήσιμον.

Εἰς δὲ τὸν ἄνω τόπον καὶ τοὺς μαστοὺς συλλέγεται διὰ τὴν ἐξ ἀρχῆς τάξιν τῆς συστάσεως. τὸ μὲν γὰρ ἄνω τοῦ ὑποζώματος τὸ κύριον τῆς ζωῆς ἐστὶ, τὸ δὲ κάτω τῆς τροφῆς καὶ τοῦ περιττώματος, ὅπως ὅσα πορευτικὰ τῶν ζώων ἐν αὐτοῖς ἔχοντα τὴν τῆς τροφῆς αὐτάρκειαν μεταβάλλῃ τοὺς τόπους. ἐντεῦθεν δὲ καὶ ἡ σπερματικὴ περίττωσις ἀποκρίνεται διὰ τὴν εἰρημένην αἰτίαν ἐν τοῖς κατ' ἀρχὰς λόγοις. ἔστι δὲ τό τε τῶν ἀρρένων περίττωμα καὶ τὰ καταμήνια τοῖς θήλεσιν αἱματικῆς φύσεως. τούτου δ' ἀρχὴ καὶ τῶν φλεβῶν ἢ καρδία· αὕτη δ' ἐν τοῖς μορίοις τούτοις. διὸ πρῶτον ἐνταῦθα ἀναγκαῖον γίνεσθαι τὴν μεταβολὴν ἐπίδηλον τῆς τοιαύτης περιττώσεως. διόπερ αἱ τε φωναὶ μεταβάλλουσι καὶ τῶν ἀρρένων καὶ

τῶν θηλειῶν ὅταν ἄρχωνται σπέρμα φέρειν (ἢ γὰρ ἀρχὴ τῆς φωνῆς ἐντεῦθεν· ἀλλοία δὲ γίγνεται ἀλλοίου γιγνομένου τοῦ κινουντος), καὶ τὰ περὶ τοὺς μαστοὺς αἴρεται καὶ τοῖς ἄρρεσιν ἐπιδήλως, μᾶλλον δὲ τοῖς θήλεσιν· διὰ γὰρ τὸ κάτω τὴν ἔκκρισιν γίνεσθαι πολλὴν κενὸς ὁ τόπος γίγνεται ὁ τῶν μαστῶν αὐταῖς καὶ σομφός-ὁμοίως δὲ καὶ τοῖς κάτω τοὺς μαστοὺς ἔχουσιν. γίγνεται μὲν οὖν ἐπίδηλος καὶ ἡ φωνὴ καὶ τὰ περὶ τοὺς μαστοὺς καὶ ἐν τοῖς ἄλλοις ζώοις τοῖς ἐμπείροις περὶ ἕκαστον γένος, ἐπὶ δὲ τῶν ἀνθρώπων διαφέρει πλείστον. αἴτιον δὲ τὸ πλείστην εἶναι τὴν περίττωσιν τοῖς θήλεσι τούτοις τῶν θηλέων καὶ τοῖς ἄρρεσι τῶν ἀρρένων ὡς κατὰ μέγεθος [ταῖς μὲν τὴν τῶν καταμηνίων, τοῖς δὲ τὴν τοῦ σπέρματος πρόεσιν]. ὅταν οὖν μὴ λαμβάνῃ μὲν τὸ ἔμβρυον τὴν τοιαύτην ἀπόκρισιν, κωλὴ δὲ θύραζε βαδίζειν, ἀναγκαῖον εἰς τοὺς κενοὺς τόπους ἀθροίζεσθαι τὸ περίττωμα πᾶν, ὅσοιπερ ἂν ᾧσιν ἐπὶ τῶν αὐτῶν πόρων. ἔστι δ' ἐκάστοις τοιοῦτος ὁ τῶν μαστῶν τόπος δι' ἀμφοτέρας τὰς αἰτίας ἕνεκά τε τοῦ βελτίστου γεγυνῶς τοιοῦτος καὶ ἐξ ἀνάγκης· ἐνταῦθα δὲ ἤδη συνίσταται καὶ γίγνεται πεπεμμένη τροφὴ τοῖς ζώοις. τῆς δὲ πέψεως ἔστι μὲν λαβεῖν τὴν εἰρημένην αἰτίαν, ἔστι δὲ καὶ (777a.) τὴν ἐναντίαν· εὖλογον γὰρ καὶ μείζον ὄν τὸ ἔμβρυον πλείω λαμβάνειν τροφὴν ὥστε ἔλαττον περιγίγνεσθαι περὶ τὸν χρόνον τοῦτον· πέττεται δὲ θᾶπτον τὸ ἔλαττον.

Ὅτι μὲν οὖν ἔστι τὸ γάλα τὴν αὐτὴν ἔχον φύσιν τῇ ἀποκρίσει ἐξ ἧς γίγνεται ἕκαστον, δῆλον, εἴρηται δὲ καὶ πρότερον. ἢ γὰρ αὐτὴ ὕλη ἢ τε τρέφουσα καὶ ἐξ ἧς συνιστᾶ τὴν γένεσιν ἢ φύσις. ἔστι δὲ τοῦτο ἡ αἵματικὴ ὑγρότης τοῖς ἐναίμοις· τὸ γὰρ γάλα πεπεμμένον αἷμά ἐστιν ἄλλ' οὐ διεφθαρμένον. Ἐμπεδοκλῆς δ' ἢ οὐκ ὀρθῶς ὑπελάμβανεν ἢ οὐκ εὖ μετήνεγκε ποιήσας ὡς τὸ γάλα μηνὸς ἐν ὀγδοάτῳ δεκάτῃ πύον ἔπλετο λευκόν. σαπρότης γὰρ καὶ πέψις ἐναντίον, τὸ δὲ πύον σαπρότης τίς ἐστίν, τὸ δὲ γάλα τῶν πεπεμμένων. οὐ γίνονται δὲ οὔτε θηλαζόμεναι αἱ καθάρσεις κατὰ φύσιν οὔτε συλλαμβάνουσι θηλαζόμεναι· κἂν συλλάβωσιν, ἀποσβέννυται τὸ γάλα διὰ τὸ τὴν αὐτὴν εἶναι φύσιν τοῦ γάλακτος καὶ τῶν καταμηνίων· ἢ δὲ φύσις οὐ δύναται πολυχοεῖν οὕτως ὥστ' ἐπαμφοτερίζειν, ἄλλ' ἂν ἐπὶ θάτερα γένηται ἢ ἀπόκρισις ἀναγκαῖον ἐπὶ θάτερα ἐκλείπειν, ἐὰν μὴ γίγνηται τι βίαιον καὶ παρὰ τὸ ὡς ἐπὶ τὸ πολὺ. τοῦτο δ' ἤδη παρὰ φύσιν· ἐν γὰρ τοῖς μὴ ἀδυνάτοις ἄλλως ἔχειν ἄλλ' ἐνδεχομένοις τὸ κατὰ φύσιν ἔστι τὸ ὡς ἐπὶ τὸ πολὺ.

Καλῶς δὲ διώρισται τοῖς χρόνοις καὶ ἡ γένεσις ἡ τῶν ζώων· ὅταν γὰρ διὰ τὸ μέγεθος μηκέτι ἱκανὴ ᾖ τῷ κυουμένῳ ἡ διὰ τοῦ ὀμφαλοῦ τροφή, ἅμα τὸ γάλα γίγνεται χρήσιμον πρὸς τὴν γιγνομένην τροφήν, καὶ οὐκ εἰσιούσης διὰ τοῦ ὀμφαλοῦ τροφῆς συμπίπτουσιν αὐταὶ αἱ φλέβες περὶ ἃς ὁ καλούμενος ὀμφαλὸς ἐστὶ χιτῶν, καὶ διὰ ταῦτα καὶ τότε συμβαίνει θύραζε ἡ ἔξοδος.

Κεφάλαιο 9

Ἐπὶ κεφαλὴν δ' ἡ γένεσις ἐστὶ τοῖς ζῴοις πᾶσιν ἢ κατὰ φύσιν διὰ τὸ τὰ ἄνω τοῦ ὀμφοῦ μείζω ἔχειν ἢ τὰ κάτω. καθάπερ οὖν ἐν ζυγοῖς ἡρτημένα ἐξ αὐτοῦ ῥέπει ἐπὶ τὸ βάρος· ἔχει δὲ τὰ μείζω πλεῖον βάρος.

Κεφάλαιο 10

Οἱ δὲ χρόνοι τῆς κηΐσεως ἑκάστω τῶν ζῶων ὠρισμένοι τυγχάνουσιν ὥς μὲν ἐπὶ τὸ πολὺ κατὰ τοὺς βίους· τῶν γὰρ χρονιωτέρων καὶ τὰς γενέσεις εὐλογον εἶναι χρονιωτέρας. οὐ μὴν τοῦτό γ' ἐστὶν αἴτιον ἄλλ' ὥς ἐπὶ τὸ πολὺ τοῦτο (777b.) συμβέβηκεν· τὰ γὰρ μείζω καὶ τελειότερα τῶν ἐναίμων ζῶων καὶ ζῶσι πολὺν χρόνον-οὐ μέντοι τὰ μείζω πάντα μακροβιώτερα. πάντων γὰρ ἄνθρωπος πλεῖστον ζῆ χρόνον πλὴν ἐλέφαντος, ὅσων ἀξιόπιστον ἔχομεν τὴν πείραν· ἔλαττον δ' ἐστὶ τὸ γένος τὸ τῶν ἀνθρώπων ἢ τὸ τῶν λοφούρων καὶ πολλῶν ἄλλων. αἴτιον δὲ τοῦ μὲν εἶναι μακρόβιον ὅτιοῦν ζῶον τὸ κεκρᾶσθαι παραπλησίως πρὸς τὸν περιέχοντα ἀέρα, καὶ δι' ἄλλα συμπτώματ' ἅττα φυσικὰ περὶ ὧν ὕστερον ἐροῦμεν, - τῶν δὲ χρόνων τῶν περὶ τὴν κήσιν τὸ μέγεθος τῶν γεννωμένων· οὐ γὰρ ῥάδιον ἐν ὀλίγῳ χρόνῳ λαμβάνειν τὴν τελείωσιν τὰς μεγάλας συστάσεις οὔτε ζῶων οὔτε τῶν ἄλλων ὥς εἰπεῖν οὐθενός. διόπερ ἵπποι καὶ τὰ συγγενῇ ζῶα τούτοις ἐλάττω ζῶντα χρόνον κυεῖ γε πλείω χρόνον· τῶν μὲν γὰρ ἐνιαύσιος ὁ τόκος τῶν δὲ δεκάμηνος ὁ πλεῖστος. διὰ τὴν αὐτὴν δ' αἰτίαν πολυχρόνιος καὶ ὁ τῶν ἐλεφάντων ἐστὶ τόκος· διετὴς γὰρ ἡ κήσις διὰ τὴν ὑπερβολὴν τοῦ μεγέθους.

Εὐλόγως δὲ πάντων οἱ χρόνοι καὶ τῶν κηΐσεων καὶ γενέσεων καὶ τῶν βίων μετρεῖσθαι βούλονται κατὰ φύσιν περιόδοις. λέγω δὲ περίοδον ἡμέραν καὶ νύκτα καὶ μῆνα καὶ ἐνιαυτὸν καὶ τοὺς χρόνους τοὺς μετρούμενους τούτοις, ἔτι δὲ τὰς τῆς σελήνης περιόδους. εἰσὶ δὲ περίοδοι σελήνης πανσελήνης τε καὶ φθίσις καὶ τῶν μεταξὺ χρόνων αἱ διχοτομίαι· κατὰ γὰρ ταύτας συμβάλλει πρὸς τὸν ἥλιον· ὁ γὰρ μείζω κοινὴ περίοδος ἐστὶν ἀμφοτέρων. ἔστι δὲ ἡ σελήνη ἀρχὴ διὰ τὴν πρὸς τὸν ἥλιον κοινωνίαν καὶ τὴν μετάληψιν τὴν τοῦ φωτός· γίγνεται γὰρ ὥσπερ ἄλλος ἥλιος ἐλάττων· διὸ συμβάλλεται εἰς πάσας τὰς γενέσεις καὶ τελειώσεις. αἱ γὰρ θερμότητες καὶ ψύξεις μέχρι συμμετρίας τινὸς ποιοῦσι τὰς γενέσεις, μετὰ δὲ ταῦτα τὰς φθοράς· τούτων δ' ἔχουσι τὸ πέρασ καὶ τῆς ἀρχῆς καὶ τῆς τελευτῆς αἱ τούτων κινήσεις τῶν ἄστρον. ὥσπερ γὰρ καὶ θάλατταν καὶ πᾶσαν ὀρῶμεν τὴν τῶν ὑγρῶν φύσιν ἰσταμένην καὶ μεταβάλλουσαν κατὰ τὴν τῶν πνευμάτων κίνησιν καὶ στάσιν, τὸν δ' ἀέρα καὶ τὰ πνεύματα κατὰ τὴν τοῦ ἡλίου καὶ τῆς σελήνης περίοδον, οὕτω καὶ τὰ ἐκ τούτων

φυόμενα καὶ τὰ ἐν τούτοις ἀκολουθεῖν ἀναγκαῖον· (778a.) κατὰ λόγον γὰρ ἀκολουθεῖν καὶ τὰς τῶν ἀκυροτέρων περιόδους ταῖς τῶν κυριωτέρων. βίος γάρ τις καὶ πνεύματός ἐστι καὶ γένεσις καὶ φθίσις. τῆς δὲ τῶν ἄστρον τούτων περιφορᾶς τάχ' ἂν ἕτεραί τινες εἶεν ἀρχαί. βούλεται μὲν οὖν ἡ φύσις τοῖς τούτων ἀριθμοῖς ἀριθμεῖν τὰς γενέσεις καὶ τὰς τελευτάς, οὐκ ἀκριβοῖ δὲ διὰ τε τὴν τῆς ὕλης ἀοριστίαν καὶ διὰ τὸ γίγνεσθαι πολλὰς ἀρχὰς αἱ τὰς γενέσεις τὰς κατὰ φύσιν καὶ τὰς φθορὰς ἐμποδίζουσαι πολλάκις αἵτιαι τῶν παρὰ φύσιν συμπιπτόντων εἰσίν.

Περὶ μὲν οὖν τῆς ἔσωθεν τροφῆς τῶν ζώων καὶ τῆς θύραζε γενέσεως εἴρηται, καὶ χωρὶς περὶ ἐκάστου καὶ κοινῇ περὶ πάντων.

Βιβλίο 5

Κεφάλαιο 1

Περὶ δὲ τῶν παθημάτων οἷς διαφέρουσι τὰ μόρια τῶν ζώων θεωρητέον νῦν. λέγω δὲ τὰ τοιαῦτα παθήματα τῶν μορίων οἷον γλαυκότητα ὁμμάτων καὶ μελανίαν, καὶ φωνῆς ὀξύτητα καὶ βαρύτητα, καὶ χρώματος [ἢ σώματος] καὶ τριχῶν ἢ πτερῶν διαφοράς. τυγχάνει δὲ τῶν τοιούτων ἓνια μὲν ὅλοις ὑπάρχοντα τοῖς γένεσιν, ἐνίοις δ' ὅπως ἔτυχεν, οἷον μάλιστ' ἐπὶ τῶν ἀνθρώπων τοῦτο συμβέβηκεν. ἔτι δὲ κατὰ τὰς τῶν ἡλικιῶν μεταβολὰς τὰ μὲν ὁμοίως πᾶσιν ὑπάρχει τοῖς ζώοις τὰ δ' ὑπεναντίως, ὥσπερ περὶ τε φωνὰς καὶ περὶ τριχῶν χρώας· τὰ μὲν γὰρ οὐ πολιοῦται πρὸς τὸ γῆρας ἐπιδήλως, ὁ δ' ἄνθρωπος μάλιστα τοῦτο πάσχει τῶν ἄλλων ζώων. καὶ τὰ μὲν εὐθὺς ἀκολουθεῖ γενομένοις, τὰ δὲ προϊούσης τῆς ἡλικίας γίνεται δῆλα καὶ γηρασκόντων.

Περὶ δὲ τούτων καὶ τῶν τοιούτων πάντων οὐκέτι τὸν αὐτὸν τρόπον δεῖ νομίζειν εἶναι τῆς αἰτίας. ὅσα γὰρ μὴ τῆς φύσεως ἔργα κοινῇ μὴδ' ἴδια τοῦ γένους ἐκάστου, τούτων οὐθὲν ἕνεκά του τοιοῦτον οὔτ' ἐστὶν οὔτε γίνεται. ὀφθαλμὸς μὲν γὰρ ἕνεκά του, γλαυκὸς δ' οὐχ ἕνεκά του πλὴν ἂν ἴδιον ἢ τοῦ γένους τοῦτο τὸ πάθος. οὔτε δ' ἐπ' ἐνίων πρὸς τὸν λόγον συντείνει τὸν τῆς οὐσίας, ἀλλ' ὥς ἐξ ἀνάγκης γιγνομένων εἰς τὴν ὕλην καὶ τὴν (778b.) κινήσασαν ἀρχὴν ἀνακτέον τὰς αἰτίας. ὥσπερ γὰρ ἐλέχθη κατ' ἀρχὰς ἐν τοῖς πρώτοις λόγοις, οὐ διὰ τὸ γίγνεσθαι ἕκαστον ποιόν τι, διὰ τοῦτο ποιόν τί ἐστὶν ὅσα τεταγμένα καὶ ὠρισμένα ἔργα τῆς φύσεως ἐστὶν, ἀλλὰ μᾶλλον διὰ τὸ εἶναι τοιαδὶ γίνεται τοιαῦτα· τῇ γὰρ οὐσίᾳ ἢ γένεσις ἀκολουθεῖ καὶ τῆς οὐσίας ἕνεκά ἐστὶν, ἀλλ' οὐχ αὕτη τῇ γενέσει. οἱ δ' ἀρχαῖοι φυσιολόγοι τοῦναντίον ᾤθησαν· τούτου δ' αἴτιον ὅτι οὐχ ἐώρων πλείους οὐσας τὰς αἰτίας, ἀλλὰ μόνον τὴν τῆς ὕλης καὶ τὴν τῆς κινήσεως-καὶ ταύτας ἀδιορίστως· τῆς δὲ τοῦ λόγου καὶ τῆς τοῦ τέλους ἀνεπισκέπτως εἶχον.

Ἔστι μὲν οὖν ἕκαστον ἕνεκά του, γίνεται δ' ἤδη διὰ τε ταύτην τὴν αἰτίαν καὶ διὰ τὰς λοιπὰς ὅσαπερ ἐν τῷ λόγῳ ἐνυπάρχει τῷ ἐκάστου ἢ ἐστὶν ἕνεκά του ἢ οὐ ἕνεκα. τῶν δὲ μὴ τοιούτων ὅσων ἐστὶ γένεσις, ἤδη τούτων τὸ αἴτιον ἐν τῇ κινήσει δεῖ καὶ τῇ γενέσει ζητεῖν ὥς ἐν αὐτῇ τῇ συστάσει τὴν διαφορὰν λαμβανόντων. ὀφθαλμὸν μὲν γὰρ ἐξ ἀνάγκης ἔξει (τοιόνδε γὰρ ζῶον ὑπόκειται ὄν),

τοιόνδε δὲ ὀφθαλμὸν ἐξ ἀνάγκης μέν, οὐ τοιαύτης δ' ἀνάγκης ἀλλ' ἄλλον τρόπον, ὅτι τοιονδὶ ἢ τοιονδὶ ποιεῖν πέφυκε καὶ πάσχειν.

Διωρισμένων δὲ τούτων λέγωμεν περὶ τῶν ἐφεξῆς συμβαινόντων. πρῶτον μὲν οὖν ὅταν γένωνται τὰ παιδία πάντων, μάλιστα τῶν ἀτελεῖ; τικτόντων, καθεύδειν εἴωθε διὰ τὸ καὶ ἐν τῇ μήτρᾳ, ὅταν λάβῃ πρῶτον αἴσθησιν, καθεύδοντα διατελεῖν. ἔχει δ' ἀπορίαν περὶ τῆς ἐξ ἀρχῆς γενέσεως πότερον ἐγρήγορσις ὑπάρχει τοῖς ζῴοις πρότερον ἢ ὕπνος. διὰ γὰρ τὸ φαίνεσθαι προϊούσης τῆς ἡλικίας ἐγειρόμενα μᾶλλον εὖλογον τούναντίον ἐν τῇ ἀρχῇ τῆς γενέσεως ὑπάρχειν, τὸν ὕπνον. ἔτι δὲ διὰ τὸ τὴν μετάβασιν ἐκ τοῦ μὴ εἶναι εἰς τὸ εἶναι διὰ τοῦ μεταξὺ γίνεσθαι· ὁ δ' ὕπνος εἶναι δοκεῖ τὴν φύσιν τῶν τοιούτων οἶον τοῦ ζῆν καὶ τοῦ μὴ ζῆν μεθόριον, καὶ οὔτε μὴ εἶναι παντελῶς ὁ καθεύδων οὔτ' εἶναι. τῷ γὰρ ἐγρηγορέναι τὸ ζῆν μάλισθ' ὑπάρχει διὰ τὴν αἴσθησιν. εἰ δ' ἐστὶν ἀναγκαῖον ἔχειν αἴσθησιν τὸ ζῶν, καὶ τότε πρῶτόν ἐστι ζῶν ὅταν αἴσθησις γένηται πρῶτον, τὴν μὲν ἐξ ἀρχῆς διάθεσιν οὐχ ὕπνον ἀλλ' ὅμοιον ὕπνῳ δεῖ νομίζειν, οἷανπερ ἔχει καὶ τὸ τῶν φυτῶν γένος· (779a.) καὶ γὰρ συμβέβηκε κατὰ τοῦτον τὸν χρόνον τὰ ζῶα φυτοῦ βίον ζῆν-τοῖς δὲ φυτοῖς ὑπάρχειν ὕπνον ἀδύνατον· οὐθεὶς γὰρ ὕπνος ἀνέγερτος, τὸ δὲ τῶν φυτῶν πάθος τὸ ἀνάλογον τῷ ὕπνῳ ἀνέγερτον-καθεύδειν μὲν οὖν τὰ ζῶα τὸν πλείω χρόνον ἀναγκαῖον διὰ τὸ τὴν αὐξῆσιν καὶ τὸ βάρος ἐπικεῖσθαι τοῖς ἄνω τόποις (εἰρήκαμεν δὲ τὴν αἰτίαν τοῦ καθεύδειν τοιαύτην οὔσαν ἐν ἐτέροις)· ἀλλ' ὅμως ἐγειρόμενα φαίνεται καὶ ἐν τῇ μήτρᾳ (δῆλον δὲ γίγνεται τοῦτο ἐν ταῖς ἀνατομαῖς καὶ ἐν τοῖς ὀτοκουμένοις), εἴτ' εὐθὺς καθεύδουσι καὶ καταφέρονται πάλιν. διόπερ καὶ ἐξελθόντα τὸν πολὺν διάγει χρόνον καθεύδοντα.

Καὶ ἐγρηγορότα μὲν οὐ γελᾷ τὰ παιδία, καθεύδοντα δὲ καὶ δακρύει καὶ γελᾷ. συμβαίνουσι γὰρ καὶ καθεύδουσι αἰσθήσεις τοῖς ζῴοις, οὐ μόνον τὰ καλούμενα ἐνύπνια ἀλλὰ καὶ παρὰ τὸ ἐνύπνιον, καθάπερ τοῖς ἀνισταμένοις καθεύδουσι καὶ πολλὰ πράττουσιν ἄνευ τοῦ ἐνυπνιάζειν. εἰσὶ γὰρ τινες οἱ καθεύδοντες ἀνίστανται καὶ πορεύονται βλέποντες ὥσπερ ἐγρηγορότες. τούτοις γὰρ γίγνεται τῶν συμβαινόντων αἴσθησις, οὐκ ἐγρηγορόσι μὲν, οὐ μέντοι ὥς ἐνύπνιον. τὰ δὲ παιδία εἰκόασιν, ὥσπερ ἀνεπιστήμονα τοῦ ἐγρηγορέναι, διὰ συνήθειαν ἐν τῷ καθεύδειν αἰσθάνεσθαι καὶ ζῆν. προϊόντος δὲ τοῦ χρόνου καὶ τῆς αὐξήσεως εἰς τὸ κάτω μεταβαινούσης ἐγείρονται τε μᾶλλον ἤδη καὶ τὸν πλείω χρόνον οὕτω διάγουσιν. μᾶλλον δὲ τῶν

ἄλλων ζώων ἐν ὕπνῳ τὸ πρῶτον διατελοῦσιν· ἀτελέστατα γὰρ γεννᾶται τῶν τετελεσμένων καὶ τὴν αὐξήσιν ἔχοντα μάλιστα ἐπὶ τὸ ἄνω μέρος τοῦ σώματος.

Γλαυκότερα δὲ τὰ ὄμματα τῶν παιδίων εὐθὺς γενομένων ἐστὶ πάντων, ὕστερον δὲ μεταβάλλει πρὸς τὴν ὑπάρχειν μέλλουσιν φύσιν αὐτοῖς· ἐπὶ δὲ τῶν ἄλλων ζώων οὐ συμβαίνει τοῦτ' ἐπιδήλως. τούτου μὲν οὖν αἴτιον τὸ μονόχροα τὰ ὄμματα τῶν ἄλλων εἶναι μᾶλλον, οἷον οἱ βόες μελανόφθαλμοι, τὸ δὲ τῶν προβάτων ὕδαρες πάντων, τῶν δὲ χαροπὸν ὅλον τὸ γένος ἢ γλαυκόν, ἕνια δ' αἰγῳπὰ καθάπερ καὶ τὸ τῶν αἰγῶν αὐτὸ πλῆθος. τὰ δὲ τῶν ἀνθρώπων ὄμματα πολύχροα συμβέβηκεν εἶναι· καὶ γὰρ γλαυκοὶ καὶ χαροποὶ καὶ μελανόφθαλμοί (779b.) τινὲς εἰσιν, οἱ δ' αἰγῳποί. ὥστε τὰ μὲν ἄλλα ὥσπερ οὐδ' ἀλλήλων διαφέρουσιν οὕτως οὐδ' αὐτὰ αὐτῶν· οὐ γὰρ πέφυκε πλείους μιᾶς ἴσχειν χροᾶς. μάλιστα δὲ τῶν ἄλλων ζώων ἵππος πολύχρων ἐστίν· καὶ γὰρ ἐτερόγλαυκοὶ τινες αὐτῶν γίνονται. τοῦτο δὲ τῶν μὲν ἄλλων οὐθὲν πάσχει ζώων ἐπιδήλως, ἄνθρωποι δὲ γίνονται τινες ἐτερόγλαυκοι.

Τοῦ μὲν οὖν τᾶλλα ζῶα νέα ὄντα καὶ πρεσβύτερα μὴθὲν ἐπίδηλον μεταβάλλειν, ἐπὶ δὲ τῶν παιδίων τοῦτο συμβαίνειν, ἱκανὴν οἰητέον αἰτίαν εἶναι καὶ ταύτην ὅτι τῶν μὲν μονόχρων τῶν δὲ πολύχρων τὸ μόριόν ἐστιν· τοῦ δὲ γλαυκότερα καὶ μὴ χροᾶν ἄλλην ἴσχειν αἴτιον ὅτι ἀσθενέστερα τὰ μόρια τῶν νέων, ἀσθένεια δέ τις ἢ γλαυκότης.

Δεῖ δὲ λαβεῖν καθόλου περὶ τῆς διαφορᾶς τῶν ὀμμάτων διὰ τίν' αἰτίαν τὰ μὲν γλαυκὰ τὰ δὲ χαροπὰ τὰ δ' αἰγῳπὰ τὰ δὲ μελανόμματα ἐστίν. τὸ μὲν οὖν ὑπολαμβάνειν τὰ μὲν γλαυκὰ πυρώδη, καθάπερ Ἐμπεδοκλῆς φησι, τὰ δὲ μέλανα πλεῖον ὕδατος ἔχειν ἢ πυρός, καὶ διὰ τοῦτο τὰ μὲν ἡμέρας οὐκ ὀξὺ βλέπειν, τὰ γλαυκὰ, δι' ἔνδειαν ὕδατος, θάτερα δὲ νύκτωρ δι' ἔνδειαν πυρός, οὐ λέγεται καλῶς, εἴπερ μὴ πυρὸς τὴν ὄψιν θετέον ἀλλ' ὕδατος πᾶσιν. ἔτι δ' ἐνδέχεται τῶν χρωμάτων τὴν αἰτίαν ἀποδοῦναι καὶ κατ' ἄλλον τρόπον, ἀλλ' εἴπερ ἐστὶν ὥσπερ ἐλέχθη πρότερον ἐν τοῖς περὶ τὰς αἰσθήσεις καὶ τούτων ἔτι πρότερον ἐν τοῖς περὶ ψυχῆς διωρισμένοις, καὶ ὅτι ὕδατος καὶ δι' ἣν αἰτίαν ὕδατος ἀλλ' οὐκ ἀέρος ἢ πυρὸς τὸ αἰσθητήριον τοῦτ' ἐστὶ, ταύτην αἰτίαν ὑποληπτέον εἶναι τῶν εἰρημένων. οἱ μὲν γὰρ ἔχουσι τῶν ὀφθαλμῶν πλεον ὑγρόν, οἱ δ' ἔλαττον τῆς συμμετρου κινήσεως, οἱ δὲ σύμμετρον. τὰ μὲν οὖν ἔχοντα τῶν ὀμμάτων πολὺ τὸ ὑγρὸν μελανόμματα ἐστὶ διὰ τὸ μὴ εὐδίοπτ' εἶναι τὰ πολλὰ, γλαυκὰ

δὲ τὰ ὀλίγον, καθάπερ φαίνεται καὶ ἐπὶ τῆς θαλάττης· τὸ μὲν γὰρ εὐδίοπτον αὐτῆς γλαυκὸν φαίνεται, τὸ δ' ἦττον ὕδατῶδες, τὸ δὲ μὴ διωρισμένον διὰ βάθος μέλαν καὶ κυανοειδές. τὰ δὲ μεταξὺ τῶν ὁμμάτων τούτων τῷ μᾶλλον ἤδη διαφέρει καὶ ἦττον.

Τὴν δ' αὐτὴν αἰτίαν οἰητέον καὶ τοῦ τὰ μὲν γλαυκὰ μὴ εἶναι ὀξυωπὰ τῆς ἡμέρας, τὰ δὲ (780a.) μελανόμματα τῆς νυκτός. τὰ μὲν γὰρ γλαυκὰ δι' ὀλιγότητα τοῦ ὑγροῦ κινεῖται μᾶλλον ὑπὸ τοῦ φωτός καὶ τῶν ὀρατῶν ἢ ὑγρὸν καὶ ἢ διαφανές. ἔστι δ' ἡ τοῦτου τοῦ μορίου κίνησις ὅρασις ἢ διαφανές ἄλλ' οὐχ ἢ ὑγρὸν. τὰ δὲ μελανόμματα διὰ πλῆθος τοῦ ὑγροῦ ἦττον κινεῖται. ἀσθενές γὰρ τὸ νυκτερινὸν φῶς· ἅμα γὰρ καὶ δυσκίνητον ἐν τῇ νυκτὶ ὅλως γίνεταί τὸ ὑγρὸν. δεῖ δὲ οὔτε μὴ κινεῖσθαι αὐτὸ οὔτε μᾶλλον ἢ ἢ διαφανές· ἐκκρούει γὰρ ἡ ἰσχυροτέρα κίνησις τὴν ἀσθενεστέραν. διὸ καὶ ἀπὸ τῶν ἰσχυρῶν χρωμάτων μεταβάλλοντες οὐχ ὀρῶσι, καὶ ἐκ τοῦ ἡλίου εἰς τὸ σκότος ἰόντες· ἰσχυρὰ γὰρ οὔσα ἢ ἐνυπάρχουσα κίνησις κωλύει τὴν θύραθεν-καὶ ὅλως οὔτε σθένουσα οὔτε ἀσθενῆς ὄψις τὰ λαμπρὰ δύναται ὀρᾶν διὰ τὸ πάσχειν τι μᾶλλον καὶ κινεῖσθαι τὸ ὑγρὸν. δηλοῖ δὲ καὶ τὰ ἀρρωστήματα τῆς ὄψεως ἑκατέρας. τὸ μὲν γὰρ γλαύκωμα γίνεταί μᾶλλον τοῖς γλαυκοῖς, οἱ δὲ νυκτάλωπες καλούμενοι τοῖς μελανοφθάλμοις. ἔστι δὲ τὸ μὲν γλαύκωμα ξηρότης τις [μᾶλλον] τῶν ὁμμάτων, διὸ καὶ συμβαίνει μᾶλλον γηράσκουσιν· ξηραίνεται γὰρ ὥσπερ καὶ τὸ ἄλλο σῶμα καὶ ταῦτα τὰ μόρια πρὸς τὸ γῆρας· ὁ δὲ νυκτάλωψ ὑγρότητος πλεονασμός, διὸ τοῖς νεωτέροις γίνεταί μᾶλλον· ὑγρότερος γὰρ ὁ ἐγκέφαλος τούτων. ἢ δὲ μέση τοῦ πολλοῦ καὶ τοῦ ὀλίγου ὑγροῦ βελτίστη ὄψις· οὔτε γὰρ ὥς ὀλίγη οὔσα διὰ τὸ ταραττεσθαι ἐμποδίζει τὴν τῶν χρωμάτων κίνησιν, οὔτε διὰ τὸ πλῆθος παρέχει δυσκινήσιαν.

Οὐ μόνον δὲ τὰ εἰρημένα αἰτία τοῦ ἀμβλῦναι ἢ ὀξὺν ὀρᾶν ἀλλὰ καὶ ἡ τοῦ δέρματος φύσις τοῦ ἐπὶ τῇ κόρῃ καλουμένη· δεῖ γὰρ αὐτὸ διαφανές εἶναι, τοιοῦτον δ' ἀναγκαῖον εἶναι τὸ λεπτὸν καὶ λευκὸν καὶ ὁμαλόν-λεπτὸν μὲν ὅπως ἢ θύραθεν εὐθυπορῇ κίνησις, ὁμαλὸν δ' ὅπως μὴ ἐπισκιάζει ῥυτιδούμενον (καὶ γὰρ διὰ τοῦθ' οἱ γέροντες οὐκ ὀξὺν ὀρῶσιν· ὥσπερ γὰρ καὶ τὸ ἄλλο δέρμα καὶ τὸ τοῦ ὁμματος ῥυτιδοῦνται τε καὶ παχύτερον γίνεταί γηράσκουσιν), λευκὸν δὲ διὰ τὸ τὸ μέλαν μὴ εἶναι διαφανές· αὐτὸ γὰρ τοῦτ' ἔστι τὸ μέλαν, τὸ μὴ διαφαινόμενον. διόπερ οὐδ' οἱ λαμπτήρες δύνανται φαίνειν ἐὰν ὣσιν ἐκ τοιούτου δέρματος.

Ἐν μὲν οὖν τῷ γήρᾳ καὶ ταῖς νόσοις (780b.) διὰ ταύτας τὰς αἰτίας οὐκ ὀξὺ βλέπουσι, τὰ δὲ παιδία δι' ὀλιγότητα τοῦ ὑγροῦ γλαυκὰ φαίνεται τὸ πρῶτον. ἑτερόγλαυκοι δὲ γίνονται μάλιστα οἱ ἄνθρωποι καὶ οἱ ἵπποι διὰ τὴν αὐτὴν αἰτίαν δι' ἥνπερ ὁ μὲν ἄνθρωπος πολιοῦται μόνον, τῶν δ' ἄλλων ἵππος μόνος ἐπιδήλως γηράσκων λευκαίνεται τὰς τρίχας. ἥ τε γὰρ πολιότης ἀσθένειά τις ἐστὶ τοῦ ὑγροῦ τοῦ ἐν τῷ ἐγκεφάλῳ καὶ ἀπεψία, καὶ ἡ γλαυκότης· τὸ γὰρ λίαν λεπτὸν ἢ λίαν παχὺ τὴν αὐτὴν ἔχει δύναμιν· τὸ μὲν τῷ ὀλίγῳ τὸ δὲ τῷ πολλῷ ὑγρῷ. ὅταν οὖν μὴ δύνηται ἀπαρτίσαι ἡ φύσις ὁμοίως ἢ πέψασα τὸ ἐν ἀμφοτέροις ὑγρὸν ἢ μὴ πέψασα, ἀλλὰ τὸ μὲν τὸ δὲ μή, τότε συμβαίνει γίνεσθαι ἑτερογλαυκοὺς.

Περὶ δὲ τοῦ τὰ μὲν ὀξυπα εἶναι τῶν ζώων τὰ δὲ μὴ δύο τρόποι τῆς αἰτίας εἰσὶν. διχῶς γὰρ λέγεται τὸ ὀξὺ σχεδόν, καὶ περὶ τὸ ἀκούειν καὶ τὸ ὀσφραίνεσθαι ὁμοίως τοῦτ' ἔχει. λέγεται γὰρ ὀξὺ ὁρᾶν ἐν μὲν τὸ πόρρωθεν δύνασθαι ὁρᾶν, ἐν δὲ τὸ τὰς διαφορὰς ὅτι μάλιστα διαισθάνεσθαι τῶν ὀρωμένων. ταῦτα δ' οὐχ ἅμα συμβαίνει τοῖς αὐτοῖς. ὁ γὰρ αὐτὸς ἐπηλυγασάμενος τὴν χεῖρα ἢ δι' αὐλοῦ βλέπων τὰς μὲν διαφορὰς οὐθὲν μᾶλλον οὐδ' ἤττον κρινεῖ τῶν χρωμάτων, ὥσπερ δὲ πορρώτερον· οἱ γοῦν ἐκ τῶν ὀρυγμάτων καὶ φρεάτων ἐνίοτε καὶ ἀστέρας ὁρῶσιν. ὥστ' εἴ τι τῶν ζώων ἔχει μὲν προβολὴν τοῦ ὄμματος πολλήν, τὸ δ' ἐν τῇ κόρῃ ὑγρὸν μὴ καθαρὸν μηδὲ σύμμετρον τῇ κινήσει τῇ θύραθεν μηδὲ τὸ ἐπιπολῆς δέρμα λεπτόν, τοῦτο περὶ μὲν τὰς διαφορὰς οὐκ ἀκριβώσκει τῶν χρωμάτων, πόρρωθεν δ' ἔσται ὁρατικὸν [ὥσπερ εἰ καὶ ἐγγύθεν] μᾶλλον τῶν τὸ μὲν ὑγρὸν καθαρὸν ἐχόντων καὶ τὸ σκέπασμα αὐτοῦ, μὴ ἐχόντων δ' ἐπισκύνιον πρὸ τῶν ὀμμάτων μηθέν. -τοῦ μὲν γὰρ οὕτως ὀξὺ ὁρᾶν ὥστε διαισθάνεσθαι τὰς διαφορὰς ἐν αὐτῷ τῷ ὀμματί ἐστὶν ἡ αἰτία· ὥσπερ γὰρ ἐν ἱματίῳ καθαρῷ καὶ αἱ μικραὶ κηλίδες ἐνδηλοὶ γίνονται οὕτω καὶ ἐν τῇ καθαρᾷ ὄψει καὶ αἱ μικραὶ κινήσεις δῆλαι καὶ ποιοῦσιν αἴσθησιν.

τοῦ δὲ τὰ πόρρωθεν ὁρᾶν καὶ τὴν ἀπὸ τῶν πόρρωθεν ὁρατῶν ἀφικνεῖσθαι κίνησιν ἡ θέσις αἰτία τῶν ὀφθαλμῶν· τὰ μὲν γὰρ ἐξόφθαλμα οὐκ εὐπα πόρρωθεν, τὰ δ' ἐντὸς ἔχοντα (781a.) τὰ ὄμματα ἐν κοίλῳ κείμενα ὁρατικὰ τῶν πόρρωθεν διὰ τὸ τὴν κίνησιν μὴ σκεδάννυσθαι εἰς ἀχανεὺς ἀλλ' εὐθυπορεῖν.

οὐθὲν γὰρ διαφέρει τὸ λέγειν ὁρᾶν, ὥσπερ τινὲς φασι, τῷ τὴν ὄψιν ἐξιέναι (ἂν γὰρ μὴ ἦ τι πρὸ τῶν ὀμμάτων, διασκεδαννυμένην ἀνάγκη

ἐλάττω προσπίπτειν τοῖς ὀρωμένοις καὶ ἦττον τὰ πόρρωθεν ὀρᾶν), ἢ τὸ τῇ ἀπὸ τῶν ὀρωμένων κινήσει ὀρᾶν. ὁμοίως γὰρ ἀνάγκη καὶ τὴν ὄψιν τῇ κινήσει ὀρᾶν. μάλιστα μὲν οὖν ἐωρᾶτο ἂν τὰ πόρρωθεν εἰ ἀπὸ τῆς ὄψεως εὐθὺς συνεχῆς ἦν πρὸς τὸ ὀρώμενον οἷον αὐλός· οὐ γὰρ ἂν διελύετο ἢ κίνησις ἢ ἀπὸ τῶν ὀρατῶν· εἰ δὲ μή, ὅσῳ περ ἂν ἐπὶ πλεον ἐπέχῃ τοσούτῳ ἀκριβέστερον τὰ πόρρωθεν ὀρᾶν ἀνάγκη.

Καὶ τῆς μὲν τῶν ὀμμάτων διαφορᾶς ἔστωσαν αὗται αἱ αἰτίαι.

Κεφάλαιο 2

Τὸν αὐτὸν δὲ τρόπον ἔχει καὶ περὶ τὴν ἀκοὴν καὶ τὴν ὀσφρησιν· ἐν μὲν γὰρ ἐστὶ τοῦ ἀκριβῶς ἀκούειν καὶ ὀσφραίνεσθαι τὸ τὰς διαφορὰς τῶν ὑποκειμένων αἰσθητῶν ὅτι μάλιστα αἰσθάνεσθαι πάσας, ἐν δὲ τὸ πόρρωθεν καὶ ἀκούειν καὶ ὀσφραίνεσθαι. τοῦ μὲν οὖν τὰς διαφορὰς κρίνειν καλῶς τὸ αἰσθητήριον αἴτιον, ὥσπερ ἐπὶ τῆς ὀψεως, ἂν ἢ καθαρὸν αὐτό τε καὶ ἡ περὶ αὐτὸ μῆνιξ. [[οἱ γὰρ πόροι τῶν αἰσθητηρίων πάντων, ὥσπερ εἴρηται ἐν τοῖς περὶ αἰσθήσεως, τείνουσι πρὸς τὴν καρδίαν, τοῖς δὲ μὴ ἔχουσι καρδίαν πρὸς τὸ ἀνάλογον. ὁ μὲν οὖν τῆς ἀκοῆς, ἐπεὶ ἐστὶ τὸ αἰσθητήριον ἀέρος, ἢ τὸ πνεῦμα τὸ σύμφυτον ποιεῖται ἐνίοις μὲν τὴν σφύξιν τοῖς δὲ τὴν ἀναπνοὴν καὶ εἰσπνοὴν, ταύτη περαίνει· διὸ καὶ ἡ μάθησις γίνεταί τῶν λεγομένων ὥστ' ἀντιφθέγγεσθαι τὸ ἀκουσθέν· οἷς γὰρ ἡ κίνησις εἰσῆλθε διὰ τοῦ αἰσθητηρίου τοιαύτη πάλιν, οἷον ἀπὸ χαρακτῆρος τοῦ αὐτοῦ καὶ ἐνός, διὰ τῆς φωνῆς γίνεταί ἡ κίνησις ὥσθ' ὁ ἤκουσε τοῦτ' εἰπεῖν. καὶ χασμώμενοι καὶ ἐκπνέοντες ἤττον ἀκούουσιν ἢ εἰσπνέοντες διὰ τὸ ἐπὶ τῷ πνευματικῷ μορίῳ τὴν ἀρχὴν τοῦ αἰσθητηρίου εἶναι τοῦ τῆς ἀκοῆς, καὶ σείεσθαι καὶ κινεῖσθαι ἅμα κινουντος τοῦ ὀργάνου τὸ πνεῦμα· κινεῖται γὰρ κινεῖν τὸ ὄργανον. καὶ ἐν ταῖς ὑγραῖς ὥραις καὶ κράσεσι συμβαίνει τὸ αὐτὸ πάθος * * * καὶ τὰ ὦτα πληροῦσθαι δοκεῖ πνεύματος (781b.) διὰ τὸ γειννᾶν †τῇ ἀρχῇ τοῦ πνευματικοῦ τόπου†. ἡ μὲν οὖν περὶ τὰς διαφορὰς ἀκρίβεια τῆς κρίσεως καὶ τῶν ψόφων καὶ τῶν ὁσμῶν ἐν τῷ τὸ αἰσθητήριον καθαρὸν εἶναι καὶ τὸν ὑμένα τὸν ἐπιπολῆς ἐστίν· πᾶσαι γὰρ αἱ κινήσεις διάδηλοι καθάπερ ἐπὶ τῆς ὀψεως καὶ ἐπὶ τῶν τοιούτων συμβαίνουσιν]].

καὶ τὸ πόρρωθεν δὲ αἰσθάνεσθαι, τὰ δὲ μὴ αἰσθάνεσθαι, ὁμοίως συμβαίνει ὥσπερ ἐπὶ τῆς ὀψεως. τὰ γὰρ ἔχοντα πρὸ τῶν αἰσθητηρίων ἐπὶ πολὺ οἷον ὀχετοὺς διὰ τῶν μορίων, ταῦτα πόρρωθεν αἰσθητικά ἐστίν. διὸ ὅσων οἱ μυκτῆρες μακροί, οἷον τῶν Λακωνικῶν κυνιδίων, ὀσφραντικά· ἄνω γὰρ ὄντος τοῦ αἰσθητηρίου αἱ πόρρωθεν κινήσεις οὐ διασπῶνται ἀλλ' εὐθυποροῦσιν, ὥσπερ τοῖς ἐπηλυγαζομένοις πρὸ τῶν ὀμμάτων. ὁμοίως δὲ καὶ ὅσοις τὰ ὦτα μακρὰ καὶ ἀπογεγεισσώμενα πόρρωθεν, οἷα ἔχουσιν ἔνια τῶν τετραπόδων, καὶ ἔσω τὴν ἐλίκην μακράν· καὶ γὰρ ταῦτα ἐκ πολλοῦ λαμβάνοντα τὴν

κίνησιν ἀποδίδωσι πρὸς τὸ αἰσθητήριον.

Τὴν μὲν οὖν πόρρωθεν ἀκρίβειαν τῶν αἰσθήσεων ἥκιστα ὥς εἰπεῖν ἄνθρωπος ἔχει ὥς κατὰ μέγεθος τῶν ζώων, τὴν δὲ περὶ τὰς διαφορὰς μάλιστα πάντων εὐαίσθητον. αἴτιον δ' ὅτι τὸ αἰσθητήριον καθαρὸν καὶ ἥκιστα γεῶδες καὶ σωματῶδες, καὶ φύσει λεπτοδερμότατον τῶν ζώων ὥς κατὰ μέγεθος ἄνθρωπός ἐστιν.

Εὐλόγως δ' ἀπείργασται ἡ φύσις καὶ τὰ περὶ τὴν φώκην· τετράπουν γὰρ ὄν καὶ ζωοτόκον οὐκ ἔχει ὧτα ἀλλὰ πόρους μόνον. αἴτιον δ' ὅτι ἐν ὑγρῷ αὐτῇ ὁ βίος. τὸ γὰρ τῶν ὄτων μόνον πρόσκειται τοῖς πόροις πρὸς τὸ σῶζειν τὴν τοῦ πόρρωθεν ἀέρος κίνησιν· οὐθὲν οὖν χρήσιμόν ἐστιν αὐτῇ, ἀλλὰ καὶ τοῦναντίον ἀπεργάζοιτ' ἂν δεχόμενα εἰς αὐτὰ ὑγροῦ πλῆθος.

Καὶ περὶ μὲν ὄψεως καὶ ἀκοῆς καὶ ὁσφρήσεως εἴρηται.

Κεφάλαιο 3

Τὰ δὲ τριχώματα διαφέρουσι καὶ πρὸς αὐτὰ τοῖς ἀνθρώποις κατὰ τὰς ἡλικίας καὶ πρὸς τὰ γένη τῶν ἄλλων ζώων, ὅσαπερ ἔχει τρίχας αὐτῶν. ἔχει δ' ὅσαπερ ἐν αὐτοῖς ζωοτοκεῖ πάντα σχεδόν· καὶ γὰρ τὰ ἀκανθώδεις ἔχοντα τῶν τοιούτων τριχῶν εἰδός τι ὑποληπτέον, οἷον τὰς τε τῶν χερσαίων ἐχίνων καὶ εἴ τι ἄλλο τοιοῦτόν ἐστι (782a.) τῶν ζωοτόκων. εἰσὶ δὲ διαφοραὶ τῶν τριχῶν κατὰ τε σκληρότητα καὶ μαλακότητα καὶ κατὰ μῆκος καὶ βραχύτητα καὶ εὐθύτητα καὶ οὐλότητα καὶ πλῆθος καὶ ὀλιγότητα, πρὸς δὲ τούτοις καὶ κατὰ τὰς χροᾶς, κατὰ τε λευκότητα καὶ μελανίαν καὶ τὰς μεταξὺ τούτων. ἐνίαις δὲ τούτων τῶν διαφορῶν καὶ κατὰ τὰς ἡλικίας διαφέρουσι νέα τε καὶ παλαιούμενα, μάλιστα δὲ τοῦτ' ἐπίδηλον ἐπὶ τῶν ἀνθρώπων· καὶ γὰρ δασύνεται μᾶλλον πρεσβύτερα γιγνόμενα καὶ φαλακροῦνται τῆς κεφαλῆς ἐνιοὶ τὰ πρόσθεν. καὶ παῖδες μὲν ὄντες οὐ γίνονται φαλακροί, -οὐδ' αἱ γυναῖκες· οἱ δ' ἄνδρες προϊούσης ἤδη τῆς ἡλικίας. καὶ πολιοῦνται δὲ τὰς κεφαλὰς γηράσκοντες οἱ ἄνθρωποι, τῶν δ' ἄλλων ζώων οὐθενὶ τοῦθ' ὥς εἰπεῖν γίγνεται ἐπίδηλον, μάλιστα δ' ἵππῳ τῶν ἄλλων. καὶ φαλακροῦνται μὲν οἱ ἄνθρωποι τὰ ἔμπροσθεν τῆς κεφαλῆς, πολλοὶ δὲ πρῶτον γίνονται τοὺς κροτάφους· φαλακροῦται δ' οὐθεὶς οὔτε τούτους οὔτε τὰ ὀπισθεν τῆς κεφαλῆς. ὅσα δὲ τῶν ζώων μὴ ἔχει τρίχας ἀλλὰ τὸ ἀνάλογον αὐταῖς, οἷον ὄρνιθες μὲν πτερὰ τὸ δὲ τῶν ἰχθύων γένος λεπίδας, καὶ τούτοις συμβαίνει τῶν τοιούτων παθημάτων ἕνια κατὰ τὸν αὐτὸν λόγον.

Τίνος μὲν οὖν ἔνεκα τὸ τῶν τριχῶν ἢ φύσις ἐποίησε γένος τοῖς ζώοις εἴρηται πρότερον ἐν ταῖς αἰτίαις ταῖς περὶ τὰ μέρη τῶν ζώων· τίνων δ' ὑπαρχόντων καὶ διὰ τίνας ἀνάγκας συμβαίνει τούτων ἕκαστον δηλῶσαι τῆς μεθόδου τῆς νῦν ἐστίν.

Παχύτητος μὲν οὖν καὶ λεπτότητος αἰτίον ἐστὶ μάλιστα τὸ δέρμα· τοῖς μὲν γὰρ παχὺ τοῖς δὲ λεπτὸν καὶ τοῖς μὲν μανὸν τοῖς δὲ πυκνόν ἐστίν. ἔτι δὲ συναίτιον καὶ τῆς ἐνούσης ὑγρότητος ἢ διαφορά· τοῖς μὲν γὰρ ὑπάρχει λιπαρὰ τοῖς δ' ὑδατώδης. ὅλως μὲν γὰρ ἢ τοῦ δέρματος φύσις ὑπόκειται γεώδης· ἐπιπολῆς γὰρ οὐσα ἐξατμίζοντος τοῦ ὑγροῦ στερεὰ γίγνεται καὶ γεώδης, αἱ δὲ τρίχες καὶ τὸ ἀνάλογον αὐταῖς οὐκ ἐκ τῆς σαρκὸς γίνονται ἀλλ' ἐκ τοῦ δέρματος

ἐξατμίζοντος καὶ ἀναθυμιωμένου ἐν αὐτοῖς τοῦ ὑγροῦ. διὸ παχεῖαι μὲν ἐκ τοῦ παχέος λεπταὶ δὲ ἐκ τοῦ λεπτοῦ δέρματος γίνονται. ἂν μὲν οὖν ἦ τὸ δέρμα μανότερον καὶ παχύτερον, παχεῖαι διὰ τε τὸ πλῆθος τοῦ γεώδους καὶ (782b.) διὰ τὸ μέγεθος τῶν πόρων εἰσίν· ἂν δὲ πυκνότερον, λεπταὶ διὰ τὴν στενότητα τῶν πόρων. ἔτι δ' ἂν ἦ ἡ ἱκμὰς ὑδατώδης ταχὺ ἀναξηρανομένης οὐ λαμβάνουσι μέγεθος αἱ τρίχες, ἂν δὲ λιπαρὰ τὸνναντίον· οὐ γὰρ εὐξήραντον τὸ λιπαρόν. διόπερ ὅλως μὲν τὰ παχυδερμότερα παχυτριχώτερα τῶν ζώων, οὐ μέντοι τὰ μάλιστα μᾶλλον διὰ τὰς εἰρημένας αἰτίας, οἷον τὸ τῶν ὑδν γένος πρὸς τὸ τῶν βοῶν πέπονθε καὶ πρὸς ἐλέφαντα καὶ πρὸς πολλὰ τῶν ἄλλων. διὰ τὴν αὐτὴν δ' αἰτίαν καὶ αἱ ἐν τῇ κεφαλῇ τρίχες τοῖς ἀνθρώποις παχύταται· τοῦ γὰρ δέρματος τοῦτο παχύτατον καὶ ἐπὶ πλείστη ὑγρότητι, ἔτι δ' ἔχει μανότητα πολλήν. αἴτιον δὲ καὶ τοῦ μακρὰς [ἢ βραχείας] τὰς τρίχας <ἔχειν> τὸ μὴ εὐξήραντον εἶναι τὸ ἐξατμίζον ὑγρόν. τοῦ δὲ μὴ εὐξήραντον εἶναι δύο αἰτίαι, τὸ τε ποσὸν καὶ τὸ ποιόν· ἂν τε γὰρ πολὺ ἦ τὸ ὑγρὸν οὐκ εὐξήραντον, καὶ ἂν λιπαρόν. καὶ διὰ τοῦτο τοῖς ἀνθρώποις αἱ ἐκ τῆς κεφαλῆς τρίχες μακρόταται· ὁ γὰρ ἐγκέφαλος ὑγρὸς καὶ ψυχρὸς ὢν πολλὴν παρέχει δαψίλειαν τοῦ ὑγροῦ.

Εὐθύτριχα δὲ καὶ οὐλότριχα γίνεται διὰ τὴν ἐν ταῖς θριξίν ἀναθυμίασιν. ἂν μὲν γὰρ ἦ καπνώδης, θερμὴ οὖσα καὶ ξηρὰ οὕλην τὴν τρίχα ποιεῖ. κάμπτεται γὰρ διὰ τὸ δύο φέρεσθαι φοράς· τὸ μὲν γὰρ γεῶδες κάτω τὸ δὲ θερμὸν ἄνω φέρεται. εὐκάμπτου δ' οὕσης δι' ἀσθένειαν στρέφεται· τοῦτο δ' ἐστὶν οὐλότης τριχός. ἐνδέχεται μὲν οὖν οὕτω λαβεῖν τὴν αἰτίαν, ἐνδέχεται δὲ καὶ διὰ τὸ ὀλίγον ἔχειν τὸ ὑγρόν, πολὺ δὲ τὸ γεῶδες ὑπὸ τοῦ περιέχοντος ξηρανομένας συσπᾶσθαι. κάμπτεται γὰρ τὸ εὐθὺ ἐὰν ἐξατμίζεται καὶ συντρέχει ὥσπερ ἐπὶ τοῦ πυρὸς καιομένη θρίξ, ὡς οὕσης τῆς οὐλότητος συσπάσεως δι' ἔνδειαν ὑγροῦ ὑπὸ τῆς τοῦ περιέχοντος θερμότητος. σημεῖον δ' ὅτι καὶ σκληρότεραι αἱ οὐλαι τρίχες τῶν εὐθειῶν εἰσίν· τὸ γὰρ ξηρὸν σκληρόν. εὐθύτριχα δὲ ὅσα ὑγρότητ' ἔχει πολλήν· ῥέον γὰρ ἄλλ' οὐ στάζον προέρχεται ἐν ταύταις τὸ ὑγρόν. καὶ διὰ τοῦτο οἱ μὲν ἐν τῷ Πόντῳ Σκύθαι καὶ Θρᾷκες εὐθύτριχες· καὶ γὰρ αὐτοὶ ὑγροὶ καὶ ὁ περιέχων αὐτοὺς ἄηρ ὑγρὸς· Αἰθίοπες δὲ καὶ οἱ ἐν τοῖς θερμοῖς (783a.) οὐλότριχες· ξηροὶ γὰρ οἱ ἐγκέφαλοι καὶ ὁ ἄηρ ὁ περιέχων.

Ἔστι δ' ἓν αἰ τῶν παχυδέρμων λεπτότριχα διὰ τὴν εἰρημένην αἰτίαν πρότερον· ὅσῳ γὰρ ἂν λεπτότεροι οἱ πόροι ὧσιν τοσοῦτω

λεπτοτέρας ἀναγκαῖον γίνεσθαι τὰς τρίχας· διὸ τὸ τῶν προβάτων γένος τοιαύτας ἔχει τὰς τρίχας· τὸ γὰρ ἔριον τριχῶν πληθὺς ἐστίν· ἔστι δ' ἓν τῶν ζῶων ἃ μαλακὴν μὲν ἔχει τὴν τρίχα, ἥττον δὲ λεπτὴν, οἷον τὸ τῶν δασυπόδων πρὸς τὸ τῶν προβάτων πέπονθεν· τῶν γὰρ τοιούτων ἐπιπολῆς ἡ θρίξ τοῦ δέρματος· διὸ μῆκος οὐκ ἴσχει ἀλλὰ συμβαίνει παραπλήσιον ὥσπερ τὰ ἀπὸ τῶν λίνων ξυόμενα· καὶ γὰρ ταῦτα μῆκος μὲν οὐθὲν ἴσχει, μαλακὰ δ' ἐστὶ καὶ οὐ δέχεται πλοκὴν· τὰ δ' ἐν τοῖς ψυχροῖς πρόβατα τοῦναντίον πέπονθε τοῖς ἀνθρώποις· οἱ μὲν γὰρ Σκύθαι μαλακότριχες, τὰ δὲ πρόβατα τὰ Σαυροματικὰ σκληρότριχα· τούτου δ' αἴτιον ταὐτὸ καὶ ἐπὶ τῶν ἀγρίων πάντων· ἡ γὰρ ψυχρότης σκληρύνει διὰ τὸ ξηραίνειν πηγνύουσα· ἐκθλιβομένου γὰρ τοῦ θερμοῦ συνεξατμίζει τὸ ὑγρὸν καὶ γίνονται καὶ αἱ τρίχες καὶ τὸ δέρμα γεῶδες καὶ σκληρόν· αἴτιον δὲ τοῖς μὲν ἀγρίοις ἡ θυραυλία τοῖς δ' ὁ τόπος τοιοῦτος ὢν· σημεῖον δὲ καὶ τὸ ἐπὶ τῶν ποντίων ἐχίνων συμβαῖνον οἷς χρῶνται πρὸς τὰς στραγγουρίας· καὶ γὰρ οὗτοι διὰ τὸ ἐν ψυχρᾷ εἶναι τῇ θαλάττῃ διὰ τὸ βάθος (καθ' ἐξήκοντα γὰρ καὶ ἔτι πλειόνων γίνονται ὀργυῶν) αὐτοὶ μὲν μικροί, τὰς δὲ ἀκάνθας μεγάλας ἔχουσι καὶ σκληράς-μεγάλας μὲν διὰ τὸ ἐνταῦθα τὴν τοῦ σώματος τετράφθαι αὔξησιν (ὀλιγόθερμοι γὰρ ὄντες καὶ οὐ πέττοντες τὴν τροφὴν πολὺ περίττωμα ἔχουσιν, αἱ δ' ἄκανθαι καὶ αἱ τρίχες καὶ τὰ τοιαῦτα γίνονται ἐκ περιττώματος), σκληρὰς δὲ καὶ λελιθωμένας διὰ τὴν ψυχρότητα καὶ τὸν πάγον· τὸν αὐτὸν δὲ τρόπον καὶ τᾶλλα τὰ φυόμενα σκληρότερα συμβαίνει γίνεσθαι καὶ γεωδέστερα καὶ λιθωδέστερα τὰ ἐν τοῖς προσβόρροις τῶν πρὸς νότον καὶ τὰ προσήνεμα τῶν ἐν κοίλοις· ψύχεται γὰρ πάντα μᾶλλον καὶ ἐξατμίζει τὸ ὑγρὸν· σκληρύνει μὲν οὖν καὶ τὸ θερμὸν καὶ τὸ ψυχρόν· ἐξατμίζεσθαι γὰρ ὑπ' ἀμφοτέρων συμβαίνει τὸ ὑγρὸν, ὑπὸ μὲν τοῦ θερμοῦ καθ' αὐτὸ ὑπὸ δὲ τοῦ ψυχροῦ κατὰ συμβεβηκός (μετὰ τοῦ θερμοῦ γὰρ συνεξέρχεται· οὐθὲν γὰρ ὑγρὸν ἄνευ θερμοῦ)· ἀλλὰ τὸ μὲν ψυχρὸν (783b.) οὐ μόνον σκληρύνει ἀλλὰ καὶ πυκνοῖ, τὸ δὲ θερμὸν μανότερον ποιεῖ.

Διὰ τὴν αὐτὴν δ' αἰτίαν καὶ πρεσβυτέρων γιγνομένων τοῖς μὲν τρίχας ἔχουσι σκληρότεραι γίνονται αἱ τρίχες τοῖς δὲ πτερωτοῖς καὶ λεπιδωτοῖς τὰ πτερὰ καὶ αἱ λεπίδες· τὰ γὰρ δέρματα γίνονται σκληρότερα καὶ παχύτερα πρεσβυτέρων γιγνομένων· ξηραίνεται γάρ, καὶ τὸ γῆράς ἐστι κατὰ τοῦνομα γεηρὸν διὰ τὸ ἀπολείπειν τὸ θερμὸν καὶ μετ' αὐτοῦ τὸ ὑγρὸν.

Φαλακροῦνται δ' ἐπιδήλως οἱ ἄνθρωποι μάλιστα τῶν ζώων. ἔστι δέ τι καθόλου τὸ τοιοῦτον πάθος· καὶ γὰρ τῶν φυτῶν τὰ μὲν αἰείφυλλα τὰ δὲ φυλλοβολεῖ, καὶ τῶν ὀρνίθων οἱ φωλεύοντες ἀποβάλλουσι τὰ πτερὰ. τοιοῦτον δέ τι πάθος καὶ ἡ φαλακρότης ἐστὶν ἐπὶ τῶν ἀνθρώπων ὅσοις συμβαίνει φαλακροῦσθαι· κατὰ μέρος μὲν γὰρ ἀπορρεῖ καὶ τὰ φύλλα τοῖς φυτοῖς πᾶσι καὶ τὰ πτερὰ καὶ αἱ τρίχες τοῖς ἔχουσιν, ὅταν δ' ἀθρόον γένηται τὸ πάθος λαμβάνει τὰς εἰρημένας ἐπωνυμίας· φαλακροῦσθαί τε γὰρ λέγεται καὶ φυλλορροεῖν <καὶ πετορροεῖν>. αἴτιον δὲ τοῦ πάθους ἔνδεια ὑγρότητος θερμῆς, τοιοῦτον δὲ μάλιστα τῶν ὑγρῶν τὸ λιπαρόν· διὸ καὶ τῶν φυτῶν τὰ λιπαρὰ αἰείφυλλα μᾶλλον. ἀλλὰ περὶ μὲν τούτων ἐν ἄλλοις τὸ αἴτιον λεκτέον· καὶ γὰρ ἄλλα συναίτια τούτου τοῦ πάθους αὐτοῖς. γίνεταί δὲ τοῖς μὲν φυτοῖς ἐν τῷ χειμῶνι τὸ πάθος (αὕτη γὰρ ἡ μεταβολὴ κυριωτέρα τῆς ἡλικίας) καὶ τοῖς φωλεύουσιν δὲ τῶν ζώων (καὶ γὰρ ταῦτα ἦττον τῶν ἀνθρώπων ὑγρὰ καὶ θερμὰ τὴν φύσιν ἐστίν)· οἱ δ' ἄνθρωποι ταῖς ἡλικίαις χειμῶνα καὶ θέρος ἄγουσιν. διὸ πρὶν ἀφροδισιάζειν οὐ γίνεταί φαλακρὸς οὐδεὶς· τότε δὲ τοῖς τοιοῦτοις τὴν φύσιν μᾶλλον. φύσει γὰρ ἐστὶν ὁ ἐγκέφαλος ψυχρότατον τοῦ σώματος, ὁ δ' ἀφροδισιασμὸς καταψύχει· καθαρᾶς γὰρ καὶ φυσικῆς θερμότητος ἀπόκρισις ἐστίν. εὐλόγως οὖν ὁ ἐγκέφαλος αἰσθάνεται πρῶτον· τὰ γὰρ ἀσθενῇ καὶ φαύλως ἔχοντα μικρᾶς αἰτίας καὶ ῥοπῆς ἐστίν. ὥστ' ἂν τις ἀναλογίσηται ὅτι αὐτός τε ὀλιγόθερμος ὁ ἐγκέφαλος, ἔτι δ' ἀναγκαῖον τὸ πέριξ δέρμα τοιοῦτον εἶναι μᾶλλον, καὶ τούτου τὴν τῶν τριχῶν φύσιν ὅσῳ πλεῖστον ἀφέστηκεν, εὐλόγως ἂν δόξειε τοῖς σπερματικοῖς περὶ ταύτην τὴν ἡλικίαν συμβαίνειν φαλακροῦσθαι. διὰ τὴν αὐτὴν δ' αἰτίαν καὶ τῆς κεφαλῆς τὸ (784a.) πρόσθιον μόνον γίνονται φαλακροὶ καὶ τῶν ζώων οἱ ἄνθρωποι μόνοι-τὸ μὲν πρόσθιον ὅτι ἐνταῦθα ὁ ἐγκέφαλος, τῶν δὲ ζώων μόνον ὅτι πολὺ πλεῖστον ἔχει ἐγκέφαλον καὶ μάλιστα ὑγρὸν ὁ ἄνθρωπος. καὶ αἱ γυναῖκες οὐ φαλακροῦνται· παραπλησία γὰρ ἡ φύσις τῇ τῶν παιδίων· ἄγονα γὰρ σπερματικῆς ἐκκρίσεως ἀμφοτέρα. καὶ εὐνοῦχος οὐ γίνεταί φαλακρὸς διὰ τὸ εἰς τὸ θῆλυ μεταβάλλειν. καὶ τὰς ὑστερογενεῖς τρίχας ἢ οὐ φύουσιν ἢ ἀποβάλλουσιν, ἂν τύχωσιν ἔχοντες οἱ εὐνοῦχοι, πλὴν τῆς ἥβης· καὶ γὰρ αἱ γυναῖκες τὰς μὲν οὐκ ἔχουσι τὰς δ' ἐπὶ τῇ ἥβῃ φύουσιν. ἡ δὲ πῆρως αὕτη ἐκ τοῦ ἄρρενος εἰς τὸ θῆλυ μεταβολὴ ἐστίν.

Τοῦ δὲ τὰ μὲν φωλεύοντα πάλιν δασύνεσθαι καὶ τὰ

φυλλοβολήσαντα πάλιν φύειν φύλλα, τοῖς δὲ φαλακροῖς μὴ ἀναφύεσθαι πάλιν, αἴτιον ὅτι τοῖς μὲν αἱ ὥραι τροπαί εἰσι τοῦ σώματος μᾶλλον, ὥστ' ἐπεὶ μεταβάλλουσιν αὐται μεταβάλλει καὶ τὸ φύειν καὶ τὸ ἀποβάλλειν τοὺς μὲν τὰ πτερὰ καὶ τὰς τρίχας, τὰ δὲ φύλλα τὰ φυτά. τοῖς δ' ἀνθρώποις κατὰ τὴν ἡλικίαν γίγνεται χειμὼν καὶ θέρος καὶ ἔαρ καὶ μετόπωρον, ὥστ' ἐπεὶ αἱ ἡλικίαι οὐ μεταβάλλουσιν οὐδὲ τὰ πάθη τὰ διὰ ταύτας μεταβάλλει, καίπερ τῆς αἰτίας ὁμοίας οὔσης.

Καὶ περὶ μὲν τᾶλλα πάθη τὰ τῶν τριχῶν σχεδὸν εἴρηται.

Κεφάλαιο 4

Τῶν δὲ χρωμάτων αἴτιον τοῖς μὲν ἄλλοις ζώοις καὶ τοῦ μονόχροα εἶναι καὶ τοῦ ποικίλα ἢ τοῦ δέρματος φύσις· τοῖς δ' ἀνθρώποις οὐδὲν πλὴν τῶν πολιῶν, οὐ τῶν διὰ γῆρας ἀλλὰ τῶν διὰ νόσον· ἐν γὰρ τῇ καλουμένη λεύκῃ λευκαὶ γίνονται αἱ τρίχες-ἂν δ' αἱ τρίχες ὥσι λευκαὶ <διὰ γῆρας> οὐκ ἀκολουθεῖ τῷ δέρματι ἢ λευκότης. αἴτιον δ' ὅτι ἐκ τοῦ δέρματος φύονται· ἐκ νενοσηκότος οὖν καὶ λευκοῦ τοῦ δέρματος καὶ ἡ θριξὶ συννοσεῖ, νόσος δὲ τριχὸς πολιότης ἐστίν. ἡ δὲ δι' ἡλικίαν τῶν τριχῶν πολιότης γίνεταί δι' ἀσθένειαν καὶ ἔνδειαν θερμότητος. καὶ γὰρ ἡλικία πᾶσα ῥέπει ἀποκλίνοντος τοῦ σώματος ἐν τῷ γῆρα ἐπὶ ψύξιν· τὸ γὰρ γῆρας ψυχρὸν καὶ ξηρὸν ἐστίν. δεῖ δὲ νοῆσαι τὴν εἰς ἕκαστον μῦριον ἀφικνουμένην τροφήν ὅτι πέττει μὲν ἢ ἐν ἐκάστῳ οἰκεῖα (784b.) θερμότης, ἀδυνατούσης δὲ φθείρεται καὶ πῆρωσις γίνεταί ἢ νόσος.

ἀκριβέστερον δὲ περὶ τῆς τοιαύτης αἰτίας ὕστερον λεκτέον ἐν τοῖς περὶ αὐξήσεως καὶ τροφῆς. ὅσοις οὖν τῶν ἀνθρώπων ὀλιγόθερμός ἐστιν ἢ τῶν τριχῶν φύσις καὶ πλείων ἢ εἰσιοῦσα ὑγρότης ἐστί, τῆς οἰκείας θερμότητος ἀδυνατούσης πέττειν σήπεται ὑπὸ τῆς ἐν τῷ περιέχοντι θερμότητος. γίνεταί δὲ σῆψις ὑπὸ θερμότητος μὲν πᾶσα, οὐ τῆς συμφύτου δέ, ὥσπερ εἴρηται ἐν ἐτέροις. ἐστὶ δ' ἡ σῆψις καὶ ὕδατος καὶ γῆς καὶ τῶν σωματικῶν πάντων τῶν τοιούτων, διὸ καὶ τῆς γεώδους ἀτμίδος οἶον ὁ λεγόμενος εὐρώς· καὶ γὰρ ὁ εὐρώς ἐστὶ σαπρότης γεώδους ἀτμίδος. ὥστε καὶ ἡ ἐν ταῖς θριξὶ τοιαύτη οὖσα τροφή οὐ πεττομένη σήπεται, καὶ γίνεταί ἢ καλουμένη πολιὰ. λευκὴ δὲ ὅτι καὶ ὁ εὐρώς μόνον τῶν σαπρῶν ὡς εἰπεῖν λευκὸν ἐστίν. αἴτιον δὲ τούτου ὅτι πολὺν ἔχει ἀέρα· πᾶσα γὰρ ἡ γεώδης ἀτμὶς ἀέρος ἔχει δύναμιν παχέος.

ὥσπερ γὰρ ἀντεστραμμένον τῇ πάχνῃ ὁ εὐρώς ἐστίν· ἂν μὲν γὰρ παγῇ ἢ ἀνιοῦσα ἀτμὶς πάχνῃ γίνεταί, ἐὰν δὲ σαπῇ εὐρώς. διὸ καὶ ἐπιπολῆς ἐστὶν ἄμφω· ἡ γὰρ ἀτμὶς ἐπιπολῆς. καὶ εὖ δὴ οἱ ποιηταὶ ἐν ταῖς κωμωδίαις μεταφέρουσι σκώπτοντες τὰς πολιὰς καλοῦντες γήρως εὐρώτα καὶ πάχνην. τὸ μὲν γὰρ τῷ γένει τὸ δὲ τῷ εἶδει ταυτόν ἐστιν, ἢ μὲν πάχνῃ τῷ γένει (ἀτμὶς γὰρ ἄμφω), ὁ δὲ εὐρώς τῷ εἶδει (σῆψις γὰρ ἄμφω). σημεῖον δ' ὅτι τοιοῦτόν ἐστιν· καὶ γὰρ ἐκ νόσων πολλοῖς πολιαὶ ἀνέφυσαν, ὕστερον δ' ὑγιασθεῖσι μέλαιναι ἀντὶ

τούτων. αἴτιον δ' ὅτι ἐν τῇ ἀρρωστίᾳ, ὥσπερ καὶ τὸ ὅλον σῶμα ἐν ἐνδείᾳ φυσικῆς θερμότητός ἐστιν, οὕτω καὶ τῶν ἄλλων μορίων καὶ τὰ πάνυ μικρὰ μετέχει τῆς ἀρρωστίας ταύτης. περίττωμα δὲ πολὺ ἐγγίγνεται ἐν τοῖς σώμασι καὶ ἐν τοῖς μορίοις· διόπερ ἢ ἐν ταῖς σαρκὶν ἀπεψία ποιεῖ τὰς πολιάς. ὑγιάναντες δὲ καὶ ἰσχύσαντες πάλιν μεταβάλλουσι καὶ γίνονται ὥσπερ ἐκ γερόντων νέοι· διὸ καὶ τὰ πάθη συµμεταβάλλουσιν. ὀρθῶς δ' ἔχει καὶ λέγειν τὴν μὲν νόσον γῆρας ἐπίκτητον, τὸ δὲ γῆρας νόσον φυσικὴν· ποιοῦσι γοῦν νόσοι τινὲς ταυτὰ ἅπερ καὶ τὸ γῆρας.

Τοὺς δὲ κροτάφους πολιοῦνται πρῶτον. τὰ μὲν γὰρ ὀπισθεν (785a.) κενὰ ὑγρότητός ἐστι διὰ τὸ μὴ ἔχειν ἐγκέφαλον, τὸ δὲ βρέγμα πολλὴν ἔχει ὑγρότητα-τὸ δὲ πολὺ οὐκ εὐσηπτον. αἱ δ' ἐν τοῖς κροτάφοις τρίχες οὐθ' οὕτως ὀλίγον ἔχουσιν ὑγρὸν ὥστε πέττειν οὔτε πολὺ ὥστε μὴ σήπεσθαι· μέσος γὰρ ὢν ὁ τόπος ἀμφοτέρων ἐκτὸς ἀμφοτέρων τῶν παθῶν ἐστιν.

Περὶ μὲν οὖν τῆς τῶν ἀνθρώπων πολιότητος εἴρηται τὸ αἴτιον.

Κεφάλαιο 5

Τοῖς δ' ἄλλοις ζώοις τοῦ μὴ γίνεσθαι διὰ τὴν ἡλικίαν ταύτην τὴν μεταβολὴν ἐπιδήλως τὸ αὐτὸ αἴτιον ὅπερ εἴρηται καὶ ἐπὶ τῆς φαλακρότητος· ὀλίγον γὰρ ἔχουσι καὶ <ῆττον> ὑγρὸν τὸν ἐγκέφαλον ὥστε μὴ ἐξαδυνατεῖν τὸ θερμὸν πρὸς τὴν πέψιν. τοῖς δ' ἵπποις πάντων ἐπισημαίνει μάλιστα ὧν ἴσμεν ζώων ὅτι λεπτότατον τὸ ὀστοῦν ὡς κατὰ μέγεθος ἔχουσι τὸ περὶ τὸν ἐγκέφαλον τῶν ἄλλων. τεκμήριον δ' ὅτι καίριος ἡ πληγὴ εἰς τὸν τόπον τοῦτον γίνεται αὐτοῖς· διὸ καὶ Ὅμηρος οὕτως ἐποίησεν· ἵνα τε πρῶται τρίχες ἵππων κρανίῳ ἐμπεφύασι, μάλιστα δὲ καίριόν ἐστιν.

ῥαδίως οὖν ἐπιρρεούσης τῆς ὑγρότητος διὰ τὴν λεπτότητα τοῦ ὀστοῦ, τῆς δὲ θερμότητος ἐλλειπούσης διὰ τὴν ἡλικίαν, ἐπιπολιοῦνται αἱ τρίχες αὗται. καὶ αἱ πυρραὶ δὲ θᾶττον πολιοῦνται τρίχες τῶν μελαινῶν· ἔστι γὰρ καὶ ἡ πυρρότης ὥσπερ ἀρρωστία τριχός, τὰ δ' ἀσθενῇ γηράσκει πάντα θᾶττον. μελαντέρας δὲ γίνεσθαι γηρασκούσας λέγεται τὰς γεράνους. αἴτιον δ' ἂν εἴη τοῦ πάθους τὸ φύσει λεπτοτέραν αὐτῶν εἶναι τὴν τῶν περῶν φύσιν, πλεόν τε γηρασκόντων εἶναι τὸ ὑγρὸν ἐν τοῖς πτεροῖς ἢ ὥστε εὐσηπτον εἶναι.

Ὅτι δὲ γίνεται ἡ πολιά σήψει τινὶ καὶ ὅτι οὐκ ἔστιν, ὥσπερ οἶονταί τινες, αὖανσις, σημεῖον [τοῦ προτέρου ῥηθέντος] τὸ τὰς σκεπαζομένης τρίχας πῖλοις ἢ καλύμμασι πολιοῦσθαι θᾶττον (τὰ γὰρ πνεύματα κωλύει τὴν σῆψιν, ἡ δὲ σκέπη ἄπνοιαν ποιεῖ) καὶ τὸ βοηθεῖν τὴν ἄλειψιν τὴν τοῦ ὕδατος καὶ τοῦ ἐλαίου μιγνυμένων. τὸ μὲν γὰρ ὕδωρ ψύχει, τὸ δ' ἔλαιον μιγνύμενον κωλύει ξηραίνεσθαι ταχέως· τὸ γὰρ ὕδωρ εὐξήραντον. ὅτι δ' οὐκ ἔστιν αὖανσις, οὐδ' ὥσπερ ἡ πόα αὐαινομένη λευκαίνεται οὕτω καὶ ἡ θρίξ, σημεῖον ὅτι φύονται εὐθέως ἔναια πολιαί· αὖον δ' οὐθὲν φύεται. λευκαίνονται δὲ καὶ ἐπ' ἄκρου πολλαί· ἐν γὰρ τοῖς ἐσχάτοις καὶ λεπτοτάτοις ἐλαχίστη θερμότης (785b.) ἐγγίγνεται.

Τοῖς δ' ἄλλοις ζώοις ὅσοις γίνονται λευκαὶ αἱ τρίχες, φύσει ἄλλ' οὐ πάθει συμβαίνει γίνεσθαι τοῦτο. αἴτιον δὲ τῶν χρωμάτων τὸ δέρμα τοῖς ἄλλοις· τῶν μὲν γὰρ λευκῶν λευκὸν τὸ δέρμα, τῶν δὲ μελάνων μέλαν, τῶν δὲ ποικίλων καὶ γιγνομένων ἐκ συμμίξεως τῇ μὲν λευκὸν τῇ δὲ μέλαν φαίνεται ὄν. ἐπὶ δὲ τῶν ἀνθρώπων οὐθὲν

αἴτιον τὸ δέρμα· καὶ γὰρ οἱ λευκοὶ σφόδρα μελαίνας ἔχουσιν. αἴτιον δ' ὅτι λεπτότατον πάντων δέρμα ὁ ἄνθρωπος ἔχει ὥς κατὰ μέγεθος, διόπερ οὐθὲν ἰσχύει πρὸς τὴν τῶν τριχῶν μεταβολήν, ἀλλὰ διὰ τὴν ἀσθένειαν τὸ δέρμα καὶ μεταβάλλει αὐτὸ τὴν χροάν καὶ γίγνεται ὑπὸ ἡλίων καὶ πνευμάτων μελάντερον· αἱ δὲ τρίχες οὐθὲν συµμεταβάλλουσιν. ἐν δὲ τοῖς ἄλλοις τὸ δέρμα χώρας ἔχει δύναμιν διὰ τὸ πάχος· διὸ αἱ μὲν τρίχες κατὰ τὸ δέρμα μεταβάλλουσι, τὰ δὲ δέρματα οὐθὲν κατὰ τὰ πνεύματα καὶ τὸν ἥλιον.

Κεφάλαιο 6

Τῶν δὲ ζώων τὰ μὲν ἐστὶ μονόχροα (λέγω δὲ μονόχροα ὧν τὸ γένος ὅλον ἐν χρῶμα ἔχει οἷον λέοντες πυρροὶ πάντες, καὶ τοῦτο καὶ ἐπ' ὀρνίθων καὶ ἐπ' ἰχθύων ἐστὶ καὶ τῶν ἄλλων ζώων ὁμοίως), τὰ δὲ πολύχροα μὲν, ὁλόχροα δὲ (λέγω δὲ ὧν τὸ σῶμα ὅλον τὴν αὐτὴν ἔχει χροάν, οἷον βοῦς ἐστὶν ὅλος λευκὸς ἢ ὅλος μέλας), τὰ δὲ ποικίλα. τοῦτο δὲ διχῶς, τὰ μὲν τῷ γένει, ὥσπερ πάρδαλις καὶ ταῶς καὶ τῶν ἰχθύων ἔνιοι οἷον αἱ καλούμεναι θράτται, - τῶν δὲ τὸ μὲν γένος ἅπαν οὐ ποικίλον, γίγνονται δὲ ποικίλοι οἷον βόες καὶ αἶγες, καὶ ἐν τοῖς ὀρνισιν οἷον αἱ περιστεραι· καὶ ἄλλα δὲ γένη τὸ αὐτὸ πάσχει τῶν ὀρνίθων. μεταβάλλει δὲ τὰ ὁλόχροα πολλῶ μᾶλλον τῶν μονοχρόων, καὶ εἰς τὴν ἀλλήλων χροάν τὴν ἀπλὴν, οἷον ἐκ λευκῶν μέλανα καὶ ἐκ μελάνων λευκά, καὶ μεμιγμένα ἐξ ἀμφοτέρων, διὰ τὸ ὅλῳ τῷ γένει ὑπάρχειν ἐν τῇ φύσει τὸ μὴ μίαν ἔχειν χροάν· εὐκίνητον γὰρ ὑπάρχει ἐπ' ἀμφοτέρα τὸ γένος ὥστε καὶ εἰς ἄλληλα μεταβάλλειν καὶ ποικίλλεσθαι μᾶλλον. τὰ δὲ μονόχροα τοῦναντίον· οὐ γὰρ μεταβάλλει ἂν μὴ διὰ πάθος, καὶ τοῦτο σπάνιον· ἤδη γὰρ ὥπται καὶ πέρδιξ λευκὴ καὶ κόραξ καὶ στρουθὸς καὶ ἄρκτος. συμβαίνει

δὲ ταῦτα ὅταν ἐν τῇ γενέσει διαστραφῇ· εὐφθαρτον γὰρ (786a.) καὶ εὐκίνητον τὸ μικρόν, τὸ δὲ γιγνόμενον τοιοῦτον· ἐν μικρῷ γὰρ ἡ ἀρχὴ τοῖς γιγνομένοις.

Μάλιστα δὲ μεταβάλλουσι καὶ τὰ φύσει ὁλόχροα μὲν ὄντα τῷ γένει δὲ πολύχροα διὰ τὰ ὕδατα· τὰ μὲν γὰρ θερμὰ λευκὴν ποιεῖ τὴν τρίχα τὰ δὲ ψυχρὰ μέλαιναν ὥσπερ καὶ ἐπὶ τῶν φυτῶν. αἴτιον δ' ὅτι τὰ θερμὰ πνεύματος πλεον ἔχει ἢ ὕδατος, ὁ δ' ἀῆρ διαφανόμενος λευκότητα ποιεῖ καθάπερ καὶ τὸν ἀφρόν. διαφέρει μὲν οὖν, ὥσπερ καὶ τὰ δέρματα τὰ διὰ πάθος λευκὰ τῶν διὰ τὴν φύσιν, οὕτω καὶ ἐν ταῖς θριξίν ἢ τε διὰ νόσον καὶ ἡλικίαν, καὶ ἡ διὰ φύσιν λευκότης τῶν τριχῶν τῷ τὸ αἴτιον ἕτερον εἶναι· τὰς μὲν γὰρ ἡ φυσικὴ θερμότης ποιεῖ λευκὰς τὰς δ' ἡ ἀλλοτρία. τὸ δὲ λευκὸν ὁ ἀτμιδώδης ἀῆρ παρέχεται ἐγκατακλειόμενος ἐν πᾶσιν. διὸ καὶ ὅσα μὴ μονόχροά ἐστι τὰ ὑπὸ τὴν γαστέρα πάντα λευκότερά ἐστιν. καὶ γὰρ θερμότερα καὶ ἡδυκρεώτερα πάντα τὰ λευκὰ ὥς εἰπεῖν ἐστὶ διὰ τὴν αὐτὴν αἰτίαν· ἡ μὲν γὰρ πέψις γλυκέα ποιεῖ, τὴν δὲ πέψιν τὸ θερμόν. ἡ δ' αὐτὴ αἰτία καὶ τῶν μονοχρόων μὲν μελάνων δ' ἢ λευκῶν· θερμότης γὰρ καὶ

ψυχρότης αἰτία τῆς φύσεως τοῦ δέρματος καὶ τῶν τριχῶν· ἔχει γὰρ ἕκαστον τῶν μορίων θερμότητα οἰκείαν.

Ἐτι δ' αἱ γλῶτται διαφέρουσι τῶν ἀπλῶν τε καὶ ποικίλων καὶ τῶν ἀπλῶν μὲν διαφερόντων δέ, οἷον λευκῶν καὶ μελάνων. αἴτιον δὲ τὸ εἰρημένον πρότερον, ὅτι τὰ δέρματα ποικίλα τῶν ποικίλων, καὶ τῶν λευκοτρίχων καὶ τῶν μελανοτρίχων τῶν μὲν λευκὰ τῶν δὲ μέλανα. τὴν δὲ γλῶτταν δεῖ ὑπολαβεῖν ὥσπερ ἐν μόριον τῶν ἐξωτερικῶν εἶναι, μὴ ὅτι ἐν τῷ στόματι σκεπάζεται, ἀλλ' οἷον χεῖρα ἢ πόδα· ὥστ' ἐπεὶ τῶν ποικίλων τὸ δέρμα οὐ μονόχρων, καὶ τοῦ ἐπὶ τῇ γλώττῃ δέρματος τοῦτ' αἴτιον.

Μεταβάλλουσι δὲ τὰ χρώματα καὶ τῶν ὀρνίθων τινὲς καὶ τῶν τετραπόδων τῶν ἀγρίων ἔνια κατὰ τὰς ὥρας. αἴτιον δ' ὅτι ὥσπερ οἱ ἄνθρωποι κατὰ τὴν ἡλικίαν μεταβάλλουσι, τοῦτ' ἐκείνοις συμβαίνει κατὰ τὰς ὥρας· μείζων γὰρ διαφορὰ αὕτη τῆς κατὰ τὴν ἡλικίαν τροπῆς.

Εἰσὶ δὲ καὶ τὰ παμφαγώτερα ποικιλώτερα ὥς ἐπὶ τὸ πλεῖστον εἰπεῖν εὐλόγως, οἷον αἱ μέλιτται (786b.) μονόχροα μᾶλλον ἢ αἱ ἀνθρῆναι καὶ σφῆκες· εἰ γὰρ αἱ τροφαὶ αἰτίαι τῆς μεταβολῆς, εὐλόγως αἱ ποικίλαι τροφαὶ παντοδαπωτέρας ποιοῦσι τὰς κινήσεις καὶ τὰ περιττώματα τῆς τροφῆς, ἐξ ὧν καὶ τρίχες καὶ πτερὰ καὶ δέρματα γίνονται.

Καὶ περὶ μὲν χρωμάτων καὶ τριχῶν διωρίσθω τὸν τρόπον τοῦτον.

Κεφάλαιο 7

Περὶ δὲ φωνῆς, ὅτι τὰ μὲν βαρύφωνα τῶν ζώων ἐστὶ τὰ δ' ὀξύφωνα, τὰ δ' εὐτόνα καὶ πρὸς ἀμφοτέρας ἔχοντα τὰς ὑπερβολὰς συμμετρως, ἔτι δὲ τὰ μὲν μεγαλόφωνα τὰ δὲ μικρόφωνα καὶ λειότητι καὶ τραχύτητι καὶ εὐκαμψία καὶ ἀκαμψία διαφέροντα ἀλλήλων, ἐπισκεπτέον διὰ τίνας αἰτίας ὑπάρχει τούτων ἕκαστον. περὶ μὲν οὖν ὀξύτητος καὶ βαρύτητος τὴν αὐτὴν αἰτίαν οἰητέον εἶναι ἥνπερ ἐπὶ τῆς μεταβολῆς ἥν μεταβάλλει νέα ὄντα καὶ πρεσβύτερα. τὰ μὲν γὰρ ἄλλα πάντα νεώτερα ὄντα ὀξύτερον φθέγγεται, τῶν δὲ βοῶν οἱ μόσχοι βαρύτερον. τὸ δ' αὐτὸ συμβαίνει καὶ ἐπὶ τῶν ἄρρένων καὶ θηλειῶν· ἐν μὲν γὰρ τοῖς ἄλλοις γένεσι τὸ θῆλυ ὀξύτερον φθέγγεται τοῦ ἄρρενος (μάλιστα δ' ἐπίδηλον ἐπὶ τῶν ἀνθρώπων τοῦτο· μάλιστα γὰρ τούτοις ταύτην τὴν δύναμιν ἀποδέδωκεν ἡ φύσις διὰ τὸ λόγῳ χρῆσθαι μόνους τῶν ζώων, τοῦ δὲ λόγου ὕλην εἶναι τὴν φωνήν), ἐπὶ δὲ τῶν βοῶν τούναντίον· βαρύτερον γὰρ αἱ θήλειαι φθέγγονται τῶν ταύρων. -τίνος μὲν οὖν ἕνεκα φωνὴν ἔχει τὰ ζῶα καὶ τί ἐστὶ φωνὴ καὶ ὅλως ὁ ψόφος, τὰ μὲν ἐν τοῖς περὶ αἰσθήσεως εἴρηται τὰ δ' ἐν τοῖς περὶ ψυχῆς. ἐπεὶ δὲ βαρὺ μὲν ἐστὶν ἐν τῷ βραδείῳ εἶναι τὴν κίνησιν, ὅξυ δ' ἐν τῷ ταχεῖαν, τοῦ δὴ βραδέως ἢ ταχέως πότερον τὸ κινεῖν αἴτιον ἢ τὸ κινούμενον, ἔχει τινὰ ἀπορίαν. φασι γὰρ τινες τὸ μὲν πολὺ βραδέως κινεῖσθαι τὸ δ' ὀλίγον ταχέως, καὶ ταύτην αἰτίαν εἶναι τοῦ τὰ μὲν βαρύφωνα εἶναι τὰ δ' ὀξύφωνα, λέγοντες μέχρι τινὸς καλῶς, ὅλως δ' οὐ καλῶς. τῷ μὲν γὰρ γένει ὀρθῶς ἔοικε λέγεσθαι τὸ βαρὺ ἐν μεγέθει τινὶ εἶναι τοῦ κινουμένου. εἰ γὰρ τοῦτο, καὶ μικρὸν καὶ βαρὺ φθέγγεσθαι οὐ ῥάδιον, ὁμοίως δὲ οὐδὲ μέγα καὶ ὀξύ. καὶ δοκεῖ γενναιοτέρας εἶναι φύσεως ἢ βαρυφωνία, καὶ ἐν τοῖς (787a.) μέλεσι τὸ βαρὺ τῶν συντόνων βέλτιον· τὸ γὰρ βέλτιον ἐν ὑπεροχῇ, ἢ δὲ βαρύτης ὑπεροχὴ τις. ἀλλ' ἐπειδὴ ἐστὶν ἕτερον τὸ βαρὺ καὶ τὸ ὅξυ ἐν φωνῇ μεγαλοφωνίας καὶ μικροφωνίας (ἐστὶ γὰρ καὶ ὀξύφωνα μεγαλόφωνα, καὶ μικρόφωνα βαρύφωνα ὡσαύτως), ὁμοίως δὲ καὶ κατὰ τὸν μέσον τόνον τούτων-περὶ ὧν τίτιν ἂν τις ἄλλω διορίσειεν (λέγω δὲ μεγαλοφωνίαν καὶ μικροφωνίαν) ἢ πλήθει καὶ ὀλιγότητι τοῦ κινουμένου; εἰ οὖν κατὰ τὸν λεγόμενον ἔσται διορισμὸν τὸ ὅξυ καὶ βαρὺ, συμβήσεται τὰ αὐτὰ εἶναι βαρύφωνα καὶ μεγαλόφωνα καὶ ὀξύφωνα καὶ μικρόφωνα. τοῦτο δὲ ψεῦδος.

αἴτιον δ' ὅτι τὸ μέγα καὶ τὸ μικρὸν καὶ τὸ πολὺ καὶ τὸ ὀλίγον τὰ μὲν ἀπλῶς λέγεται τὰ δὲ πρὸς ἄλληλα. μεγαλόφωνα μὲν οὖν ἐστὶν ἐν τῷ πολὺ ἀπλῶς εἶναι τὸ κινούμενον, μικρόφωνα δὲ ἐν τῷ ὀλίγον, βαρύφωνα δὲ καὶ ὀξύφωνα ἐν τῷ πρὸς ἄλληλα ταύτην ἔχειν τὴν διαφοράν. ἐὰν μὲν γὰρ ὑπερέχηι τὸ κινούμενον τῆς τοῦ κινούντος ἰσχύος, ἀνάγκη βραδέως φέρεσθαι τὸ φερόμενον, ἂν δ' ὑπερέχηται, ταχέως. τὸ δ' ἰσχύον διὰ τὴν ἰσχὺν ὅτε μὲν πολὺ κινοῦν βραδεῖαν ποιεῖ τὴν κίνησιν, ὅτε δὲ διὰ τὸ κρατεῖν ταχεῖαν. κατὰ τὸν αὐτὸν δὲ λόγον καὶ τῶν κινούντων τὰ ἀσθενῆ τὰ μὲν πλείω κινοῦντα τῆς δυνάμεως βραδεῖαν ποιεῖ τὴν κίνησιν, τὰ δὲ δι' ἀσθένειαν ὀλίγον κινοῦντα ταχεῖαν.

Αἱ μὲν οὖν αἰτίαι τῶν ἐναντιώσεων αὗται τοῦ μήτε πάντα τὰ νέα ὀξύφωνα εἶναι μήτε βαρύφωνα, μήτε τὰ πρεσβύτερα, μήτε τὰ ἄρρενα καὶ θήλεα, πρὸς δὲ τούτοις καὶ τοῦ τοὺς κάμνοντας ὅζυ φθέγγεσθαι καὶ τοὺς εὖ τὸ σῶμα ἔχοντας, ἔτι δὲ καὶ γέροντας γιγνομένους μᾶλλον ὀξυφωνότερους γίνεσθαι τῆς ἡλικίας ἐναντίας οὔσης τῇ τῶν νέων.

Τὰ μὲν οὖν πλεῖστα νεώτερα ὄντα καὶ τὰ θήλεα δι' ἀδυναμίαν ὀλίγον κινοῦντα ἀέρα ὀξύφωνα ἐστὶν· ταχὺ γὰρ ὁ ὀλίγος φέρεται, τὸ δὲ ταχὺ ὅζυ ἐν φωνῇ. οἱ δὲ μόσχοι καὶ αἱ βόες αἱ θήλειαι, οἱ μὲν διὰ τὴν ἡλικίαν αἱ δὲ διὰ τὴν φύσιν τῆς θηλότητος, οὐκ ἰσχυρὸν ἔχουσι τὸ μόριον ᾧ κινουσι, πολὺ δὲ κινοῦντα (787b.) βαρύφθογγά ἐστιν· βαρὺ γὰρ τὸ βραδέως φερόμενον, ὁ δὲ πολὺς ἀὴρ φέρεται βραδέως. πολλὴν δὲ κινουσι ταῦτα, τὰ δ' ἄλλ' ὀλίγον, διὰ τὸ τὸ ἀγγεῖον δι' οὗ πρῶτον φέρεται τὸ πνεῦμα τούτοις μὲν διάσπτη' ἔχειν μέγα καὶ πολλὴν ἀναγκάζεσθαι ἀέρα κινεῖν, τοῖς δ' ἄλλοις εὐταμίευστον εἶναι. προϊούσης δὲ τῆς ἡλικίας ἰσχύει μᾶλλον τοῦτο τὸ μόριον τὸ κινοῦν ἐν ἐκάστοις, ὥστε μεταβάλλουσιν εἰς τοῦναντίον, καὶ τὰ μὲν ὀξύφωνα βαρυφωνότερα γίνεταί αὐτὰ αὐτῶν, τὰ δὲ βαρύφωνα ὀξυφωνότερα· διόπερ οἱ ταῦροι ὀξυφωνότεροι τῶν μόσχων καὶ τῶν θηλειῶν βοῶν. ἔστι μὲν οὖν πᾶσιν ἡ ἰσχύς ἐν τοῖς νεύροις, διὸ καὶ τὰ ἀκμάζοντα ἰσχύει μᾶλλον· ἀναρθρα γὰρ τὰ νέα μᾶλλον καὶ ἄνευρα. ἔτι δὲ τοῖς ἐν νέοις οὐπω ἐπιτέταται, τοῖς δὲ γεγηρακόσιν ἤδη ἀνεῖται ἡ συντονία· διὸ ἅμφω ἀσθενῆ καὶ ἀδύνατα πρὸς τὴν κίνησιν. μάλιστα δ' οἱ ταῦροι νευρώδεις, καὶ ἡ καρδία· διόπερ σύντονον ἔχουσι τοῦτο τὸ μόριον ᾧ κινουσι τὸ πνεῦμα ὥσπερ χορδὴν τεταμένην νευρίνην. δηλοῖ δὲ τοιαύτη τὴν φύσιν οὕσα ἡ καρδία τῶν

βοῶν τῷ καὶ ὁστοῦν ἐγγίγνεσθαι ἐν ἐνίαις αὐτῶν· τὰ δ' ὅσα ζητεῖ τὴν τοῦ νεύρου φύσιν.

Ἐκτεμνόμενα δὲ πάντα εἰς τὸ θῆλυ μεταβάλλει, καὶ διὰ τὸ ἀνίεσθαι τὴν ἰσχὺν τὴν νευρώδη ἐν τῇ ἀρχῇ ὁμοίαν ἀφήσει φωνὴν τοῖς θήλεσιν. ἡ δ' ἄνεσις παραπλησία γίνεται ὥσπερ ἂν εἴ τις χορδὴν κατατείνας σύντονον ποιήσῃε τῷ ἐξάσαι τι βάρος, οἷον δὴ ποιοῦσιν αἱ τοὺς ἰστοὺς ὑφαίνουσαι· καὶ γὰρ αὗται τὸν στήμονα κατατείνουσι προσάπτουσαι τὰς καλουμένας λαιάς. οὕτω γὰρ καὶ ἡ τῶν ὄρχεων φύσις προσήρτηται πρὸς τοὺς σπερματικούς πόρους, οὗτοι δ' ἐκ τῆς φλεβὸς ἧς ἡ ἀρχὴ ἐκ τῆς καρδίας πρὸς αὐτῷ τῷ κινουντι τὴν φωνήν. διὸ καὶ τῶν σπερματικῶν πόρων μεταβαλλόντων πρὸς τὴν ἡλικίαν ἐν ἣ ἤδη δύνανται τὸ σπέρμα ἐκκρίνειν συµμεταβάλλει καὶ τοῦτο τὸ μόριον. τούτου δὲ μεταβάλλοντος καὶ ἡ φωνὴ μεταβάλλει, μᾶλλον μὲν τοῖς ἄρρεσιν, συμβαίνει δὲ ταῦτό καὶ ἐπὶ τῶν θηλειῶν ἀλλ' ἀδηλότερον, καὶ γίνεται ὁ (788a.) καλοῦσί τινες τραγίζειν, ὅταν ἀνώμαλος ἦ ἡ φωνή. μετὰ δὲ ταῦτα καθίσταται εἰς τὴν τῆς ἐπιούσης ἡλικίας βαρύτητα ἢ ὀξύφωνίαν. ἀφαιρουμένων δὲ τῶν ὄρχεων ἀνίεται ἡ κατὰ τας τῶν πόρων ὥσπερ ἀπὸ τῆς χορδῆς καὶ τοῦ στήμονος ἀφαιρουμένου τοῦ βάρους. τούτου δ' ἀνιεμένου καὶ ἡ ἀρχὴ ἢ κινουσα τὴν φωνὴν ἐκλύεται κατὰ τὸν αὐτὸν λόγον. διὰ μὲν οὖν ταύτην τὴν αἰτίαν τὰ ἐκτεμνόμενα μεταβάλλει εἰς τὸ θῆλυ τὴν τε φωνὴν καὶ τὴν ἄλλην μορφήν διὰ τὸ συμβαίνειν ἀνίεσθαι τὴν ἀρχὴν ἐξ ἧς ὑπάρχει τῷ σώματι ἢ συντονία, ἀλλ' οὐχ ὥσπερ τινὲς ὑπολαμβάνουσιν αὐτοὺς τοὺς ὄρχεις εἶναι σύναμμα πολλῶν ἀρχῶν-ἀλλὰ μικραὶ μεταστάσεις μεγάλων αἰτίαι γίνονται, οὐ δι' αὐτάς, ἀλλ' ὅταν συμβαίῃ ἀρχὴν συµμεταβάλλειν. αἱ γὰρ ἀρχαὶ μεγέθει οὐσαι μικραὶ τῇ δυνάμει μεγάλαί εἰσιν· τοῦτο γὰρ ἐστὶ τὸ ἀρχὴν εἶναι, τὸ αὐτὴν μὲν αἰτίαν εἶναι πολλῶν, ταύτης δ' ἄλλο ἄνωθεν μηθέν.

Τῷ δὲ φύσει τὰ μὲν τοιαῦτα συνίστασθαι τῶν ζώων ὥστε βαρύφωνα εἶναι τὰ δ' ὀξύφωνα συμβάλλεται καὶ ἡ θερμότης τοῦ τόπου καὶ ἡ ψυχρότης. τὸ μὲν γὰρ θερμὸν πνεῦμα διὰ παχύτητα ποιεῖ βαρυφωνίαν, τὸ δὲ ψυχρὸν διὰ λεπτότητα τούναντίον. δηλὸν δὲ τοῦτο καὶ ἐπὶ τῶν αὐλῶν· οἱ γὰρ θερμοτέρῳ τῷ πνεύματι χρώμενοι καὶ τοιοῦτον προῖέμενοι οἷον οἱ αἰάζοντες βαρύτερον αὐλοῦσιν. τῆς δὲ τραχυφωνίας αἴτιον καὶ τοῦ λείαν εἶναι τὴν φωνὴν καὶ πάσης τῆς τοιαύτης ἀνωμαλίας τὸ τὸ μόριον καὶ τὸ ὄργανον δι' οὗ φέρεται ἡ

φωνή ἢ τραχὺ ἢ λεῖον εἶναι ἢ ὅλως ὀμαλὸν ἢ ἀνώμαλον (δῆλον δ' ὅταν ὑγρότης τις ὑπάρχη περὶ τὴν ἀρτηρίαν ἢ τραχύτης γένηται ὑπὸ τινος πάθους· τότε γὰρ καὶ ἡ φωνὴ γίγνεται ἀνώματος)-τῆς δ' εὐκαμψίας <καὶ τῆς ἀκαμψίας> ἂν μαλακὸν ἢ σκληρὸν ἢ τὸ ὄργανον· τὸ μὲν γὰρ μαλακὸν δύναται ταμιεύεσθαι καὶ παντοδαπὸν γίγνεσθαι, τὸ δὲ σκληρὸν οὐ δύναται. καὶ τὸ μὲν μαλακὸν καὶ μικρὸν δύναται καὶ μέγα φθέγγεσθαι, διὸ καὶ ὀξὺ καὶ βαρὺ· ταμιεύεται γὰρ ῥαδίως τοῦ πνεύματος, καὶ αὐτὸ γιγνόμενον ῥαδίως μέγα καὶ μικρόν· ἡ δὲ σκληρότης ἀταμίευτον.

Περὶ μὲν οὖν φωνῆς (788b.) ὅσα μὴ πρότερον ἐν τοῖς περὶ αἰσθήσεως διώρισται καὶ ἐν τοῖς περὶ ψυχῆς τοσαῦτ' εἰρήσθω.

Κεφάλαιο 8

Περὶ δὲ ὀδόντων, ὅτι μὲν οὐχ ἑνὸς χάριν οὐδὲ πάντα τοῦ αὐτοῦ ἕνεκα τὰ ζῶα ἔχουσιν ἀλλὰ τὰ μὲν διὰ τὴν τροφήν τὰ δὲ καὶ πρὸς ἀλκήν καὶ πρὸς τὸν ἐν τῇ φωνῇ λόγον, εἴρηται πρότερον· διότι δ' οἱ μὲν πρόσθιοι γίνονται πρότερον οἱ δὲ γόμφιοι ὕστερον, καὶ οὗτοι μὲν οὐκ ἐκπίπτουσιν ἐκεῖνοι δ' ἐκπίπτουσι καὶ φύονται πάλιν, τοῖς περὶ γενέσεως λόγοις τὴν αἰτίαν συγγενῇ δεῖ νομίζειν.

Εἴρηκε μὲν οὖν περὶ αὐτῶν καὶ Δημόκριτος, οὐ καλῶς δ' εἴρηκεν· οὐ γὰρ ἐπὶ πάντων σκεψάμενος καθόλου λέγει τὴν αἰτίαν. φησὶ γὰρ ἐκπίπτειν μὲν διὰ τὸ πρὸ ὥρας γίνεσθαι τοῖς ζῴοις· ἀκμαζόντων γὰρ ὡς εἰπεῖν φύεσθαι κατὰ γε φύσιν, τοῦ δὲ πρὸ ὥρας γίνεσθαι τὸ θηλάζειν αἰτιᾶται. καίτοι θηλάζει γε καὶ ὕς, οὐκ ἐκβάλλει δὲ τοὺς ὀδόντας· ἔτι δὲ τὰ καρχαρόδοντα θηλάζει μὲν πάντα, οὐκ ἐκβάλλει δ' ἑνία αὐτῶν πλὴν τοὺς κυνόδοντας, οἷον οἱ λέοντες. τοῦτο μὲν οὖν ἡμαρτε καθόλου λέγων οὐ σκεψάμενος τὸ συμβαῖνον ἐπὶ πάντων. δεῖ δὲ τοῦτο ποιεῖν· ἀνάγκη γὰρ τὸν λέγοντα καθόλου τι λέγειν περὶ πάντων. ἐπεὶ δὲ τὴν φύσιν ὑποτιθέμεθα, ἐξ ὧν ὀρῶμεν ὑποτιθέμενοι, οὗτ' ἐλλείπουσαν οὔτε μάταιον οὐθὲν ποιοῦσαν τῶν ἐνδεχομένων περὶ ἕκαστον, ἀνάγκη δὲ τοῖς μέλλουσι λαμβάνειν τροφήν μετὰ τὴν [τοῦ γάλακτος] ἀπογαλάκτισιν ἔχειν ὄργανα πρὸς τὴν ἐργασίαν τῆς τροφῆς· εἰ οὖν συνέβαινε, ὡς ἐκεῖνος λέγει, πρὸς ἡβην, ἐνέλειπεν ἂν ἡ φύσις τῶν ἐνδεχομένων αὐτῇ τι ποιεῖν, καὶ τὸ τῆς φύσεως ἔργον ἐγίγνετ' ἂν παρὰ φύσιν. τὸ γὰρ βία παρὰ φύσιν, βία δὲ φησι συμβαίνειν τὴν γένεσιν τῶν ὀδόντων. ὅτι μὲν οὖν τοῦτ' οὐκ ἀληθὲς φανερόν ἐκ τούτων καὶ τοιούτων ἄλλων.

Γίνονται δὲ πρότερον οὗτοι τῶν πλατέων, πρῶτον μὲν ὅτι καὶ τὸ ἔργον τὸ τούτων πρότερον (πρότερον γὰρ ἐστὶ τοῦ λεᾶναι τὸ διελεῖν, εἰσὶ δ' ἐκεῖνοι μὲν ἐπὶ τῷ λεαίνειν οὗτοι δ' ἐπὶ τῷ διαιρεῖν), ἔπειθ' ὅτι τὸ ἔλαττον, κἂν ἅμα ὀρμηθῇ, θᾶττον γίνεσθαι πέφυκε τοῦ μείζονος. εἰσὶ δ' ἐλάττους οὗτοι τῷ (789a.) μεγέθει τῶν γομφίων [καὶ] τῷ τὸ ὀστοῦν τῆς σιαγόνης ἐκεῖ μὲν πλατὺ εἶναι, πρὸς δὲ τῷ στόματι στενόν. ἐκ μὲν οὖν τοῦ μείζονος πλείω ἀναγκαῖον ἐπιρρεῖν τροφήν, ἐκ δὲ τοῦ στενωτέρου ἐλάττω.

Τὸ δὲ θηλάζειν αὐτὸ μὲν οὐθὲν συμβάλλεται, ἡ δὲ τοῦ γάλακτος θερμότης ποιεῖ θᾶττον βλαστάνειν τοὺς ὀδόντας. σημεῖον δ' ὅτι καὶ

αὐτῶν τῶν θηλαζόντων τὰ θερμότερα γάλακτι χρώμενα τῶν παιδίων ὀδοντοφυεῖ θᾶπτον· αὐξητικὸν γὰρ τὸ θερμόν.

Ἐκπίπτουσι δὲ γενόμενοι τοῦ μὲν βελτίονος χάριν, ὅτι ταχὺ ἀμβλύνεται τὸ ὀξύ· δεῖ οὖν ἐτέρους διαδέχεσθαι πρὸς τὸ ἔργον. τῶν δὲ πλατέων οὐκ ἔστιν ἀμβλύτης ἀλλὰ τῷ χρόνῳ τριβόμενοι λεαίνονται μόνον. ἐξ ἀνάγκης δ' ἐκπίπτουσιν ὅτι τῶν μὲν ἐν πλατεΐᾳ τῇ σιαγόνι καὶ ἰσχυρῷ ὀστῷ αἱ ρίζαι εἰσὶ, τῶν δὲ προσθίων ἐν λεπτῷ, διὸ ἀσθενεῖς καὶ εὐκίνητοι. φύονται δὲ πάλιν ὅτι ἐν φυομένῳ ἔτι τῷ ὀστῷ ἢ ἐκβολῇ γίγνεται καὶ ἔτι ὥρας οὔσης γίνεσθαι ὀδόντας. τούτου δὲ σημεῖον ὅτι καὶ οἱ πλατεῖς φύονται πολὺν χρόνον· οἱ γὰρ τελευταῖοι ἀνατέλλουσι περὶ τὰ εἴκοσιν ἔτη, ἐνίοις δ' ἤδη καὶ γηράσκουσι γεγένηται οἱ ἔσχατοι παντελῶς διὰ τὸ πολλὴν εἶναι τροφήν ἐν τῇ εὐρυχωρίᾳ τοῦ ὀστοῦ. τὸ δὲ πρόσθιον διὰ τὴν λεπτότητα ταχὺ (789b.) λαμβάνει τέλος, καὶ οὐ γίγνεται περίττωμα ἐν αὐτῷ ἀλλ' εἰς τὴν αὐξήσιν ἀναλίσκεται ἢ τροφή τὴν οἰκεῖαν.

Δημόκριτος δὲ τὸ οὗ ἔνεκεν ἀφείξ λέγειν πάντα ἀνάγει εἰς ἀνάγκην οἷς χρῆται ἢ φύσις-οὔσι μὲν τοιούτοις, οὐ μὴν ἀλλ' ἔνεκά τινος οὔσι καὶ τοῦ περὶ ἕκαστον βελτίονος χάριν. ὥστε γίνεσθαι μὲν οὐθὲν κωλύει οὔτω καὶ ἐκπίπτειν, ἀλλ' οὐ διὰ ταῦτα ἀλλὰ διὰ τὸ τέλος· ταῦτα δ' ὥς κινοῦνται καὶ ὥς ὄργανα καὶ ὥς ὕλη αἰτία, ἐπεὶ καὶ τὸ τῷ πνεύματι ἐργάζεσθαι τὰ πολλὰ εἰκὸς ὥς ὄργανω-οῖον γὰρ ἓνια πολύχρηστά ἐστι τῶν περὶ τὰς τέχνας, ὥσπερ ἐν τῇ χαλκευτικῇ ἢ σφύρα καὶ ὁ ἄκμων, οὔτω καὶ τὸ πνεῦμα ἐν τοῖς φύσει συνεστῶσιν. ὅμοιον δ' ἔοικε τὸ λέγειν τὰ αἰτία ἐξ ἀνάγκης κἂν εἴ τις διὰ τὸ μαχαίριον οἶοιτο τὸ ὕδωρ ἐξεληλυθέναι μόνον τοῖς ὕδρωπιῶσιν, ἀλλ' οὐ διὰ τὸ ὑγιαίνειν οὗ ἔνεκα τὸ μαχαίριον ἔτεμεν.

Περὶ μὲν οὖν ὀδόντων, διότι οἱ μὲν ἐκπίπτουσι καὶ γίνονται πάλιν οἱ δ' οὐ, καὶ ὅλως διὰ τίν' αἰτίαν γίνονται εἴρηται. εἴρηται δὲ καὶ περὶ τῶν ἄλλων τῶν κατὰ τὰ μόρια παθημάτων ὅσα γίνεσθαι συμβαίνει μὴ ἔνεκά του ἀλλ' ἐξ ἀνάγκης καὶ διὰ τὴν αἰτίαν τὴν κινητικὴν.

Περί Χρωμάτων (791a) On Colours

[791a] Ἀπλᾶ τῶν χρωμάτων ἐστὶν ὅσα τοῖς στοιχείοις συνακολουθεῖ, οἷον πυρὶ καὶ ἀέρι καὶ ὕδατι καὶ γῇ. ἀήρ μὲν γὰρ καὶ ὕδωρ καθ' ἑαυτὰ τῇ φύσει λευκά, τὸ δὲ πῦρ καὶ ὁ ἥλιος ξανθά. καὶ ἡ γῆ δ' ἐστὶ φύσει λευκή, παρὰ δὲ τὴν βαφὴν πολύχρους φαίνεται. δῆλον δ' ἐπὶ τῆς τέφρας τοῦτ' ἐστίν· ἐκκαυθέντος γὰρ τοῦ τὴν βαφὴν πεποιηκότος ὑγροῦ λευκὴ γίνεται, οὐ παντελῶς δὲ διὰ τὸ τῷ καπνῷ βεβᾶσθαι μέλανι ὄντι. διὸ καὶ ἡ κονία ξανθὴ γίνεται, τοῦ φλογοειδοῦς καὶ μέλανος ἐπιχρώζοντος τὸ ὕδωρ. τὸ δὲ μέλαν χρῶμα συνακολουθεῖ τοῖς στοιχείοις εἰς ἄλληλα μεταβαλλόντων. τὰ δ' ἄλλα ἐκ τούτων εὐσύννοπτα τῇ μίξει κεραννυμένων ἀλλήλοις γίνεται. τὸ δὲ σκότος ἐκλείποντος τοῦ φωτός γίνεται. τριχῶς γὰρ τὸ μέλαν ἡμῖν φαίνεται. ἡ γὰρ ὅλως τὸ μὴ ὀρώμενόν ἐστι τῇ φύσει μέλαν (ἀπάντων γὰρ τῶν τοιούτων ἀνακλᾶται τι φῶς μέλαν), ἡ ἀφ' ὧν μηδὲν ὅλως φέρεται φῶς πρὸς τὰς ὄψεις· τὸ γὰρ μὴ ὀρώμενον, ὅταν ὁ περιέχων τόπος ὀρᾷται, φαντασίαν ποιεῖ μέλανος. φαίνεται δὲ καὶ τὰ τοιαῦτα ἡμῖν ἅπαντα μέλανα, ἀφ' ὧν ἀραιὸν καὶ ὀλίγον ἰσχυρῶς ἀνακλᾶται τὸ φῶς. διὸ καὶ αἱ σκιαὶ φαίνονται μέλαιναί. ὁμοίως δὲ καὶ τὸ ὕδωρ, ὅταν τραχυνηθῇ, καθάπερ ἡ τῆς θαλάττης φρίκη· διὰ γὰρ τὴν τραχύτητα τῆς ἐπιφανείας ὀλίγων τῶν αὐγῶν προσπιπτουσῶν καὶ διασπωμένου τοῦ φωτός, τὸ σκιερὸν μέλαν φαίνεται. καὶ τὸ νέφος, ὅταν ᾗ πυκνὸν ἰσχυρῶς, διὰ τοῦτο. κατὰ τὰ αὐτὰ δὲ τούτοις καὶ τὸ ὕδωρ καὶ ὁ ἀήρ, ὅταν ᾗ μὴ παντελῶς διαδύνον τὸ φῶς. καὶ γὰρ ταῦτα εἶναι δοκεῖ μέλανα, βάθος ἔχοντα, διὰ τὸ παντελῶς ἀραιὰς ἀνακλᾶσθαι [791b] τὰς ἀκτῖνας· τὰ γὰρ μεταξὺ μόρια τοῦ φωτός αὐτῶν ἅπαντα εἶναι δοκεῖ μέλανα διὰ τὸ σκότος. ὅτι δὲ τὸ σκότος οὐ χρῶμα ἀλλὰ στέρησις ἐστὶ φωτός, οὐ χαλεπὸν ἐξ ἄλλων τε πολλῶν καταμαθεῖν, καὶ μάλιστα ἐκ τοῦ μηδὲ αἰσθητὸν εἶναι τὸ πηλίκον καὶ ποῖόν τι τῷ σχήματι τετύχηκεν ὃν τὸ σκότος, καθάπερ ἐπὶ τῶν ἄλλων ὁρατῶν. τὸ δὲ φῶς ὅτι πυρὸς ἐστὶ χρῶμα, δῆλον ἐκ τοῦ μηδεμίαν ἄλλην ἢ ταύτην ἔχον εὐρίσκεσθαι χροῶν, καὶ διὰ τὸ μόνον τοῦτο δι'

ἑαυτοῦ ὁρατὸν γίνεσθαι, τὰ δ' ἄλλα διὰ τούτου. ἐπισκεπτέον δὲ τοῦτο. ἔνια γὰρ οὐκ ὄντα πῦρ οὐδὲ πυρὸς εἶδη τὴν φύσιν φῶς ποιεῖν φαίνεται. εἰ μὴ ἄρα τὸ μὲν τοῦ πυρὸς χρῶμα φῶς ἐστίν, οὐ μέντοι καὶ τὸ φῶς πυρὸς ἐστὶ χρῶμα μόνου, ἀλλ' ἐνδέχεται μὴ μόνῳ μὲν ὑπάρχειν τῷ πυρὶ τὴν χροάν ταύτην, εἶναι μέντοι χρῶμα τὸ φῶς αὐτοῦ. οὐδενὶ γοῦν ἄλλῳ τὴν ὄρασιν αὐτοῦ συμβαίνει γίνεσθαι πλὴν τῷ φωτὶ, καθάπερ καὶ τὴν τῶν ἄλλων σωμάτων ἀπάντων τῇ τοῦ σώματος φαντασίᾳ. τὸ δὲ μέλαν χρῶμα συμβαίνει γίνεσθαι, ὅταν ὁ ἀῆρ καὶ τὸ ὕδωρ ὑπὸ τοῦ πυρὸς διακαυθῇ, διὸ καὶ πάντα τὰ καόμενα μελαίνεται, καθάπερ ξύλα καὶ ἄνθρακες σβεσθέντος τοῦ πυρὸς, καὶ ὁ ἐκ τοῦ κεράμου καπνὸς ἐκκρινομένου τοῦ ἐνυπάρχοντος ἐν τῷ κεράμῳ ὕγρου καὶ καομένου. διὸ καὶ τοῦ καπνοῦ γίνεται μελάντατος ὁ ἀπὸ τῶν πίωνων καὶ λιπαρῶν, οἷον ἐλαίου καὶ πίττης καὶ δαδός, διὰ τὸ μάλιστα ταῦτα κάεσθαι καὶ συνέχειαν ποιεῖν. μέλανα δὲ καὶ ταῦτα γίνεται, δι' ὅσων ῥεῖ τὸ ὕδωρ, ὅταν βρυωθέντων πρῶτον ἀναξηρανθῇ τὸ ὕγρον, καθάπερ καὶ τὰ ἐν τοῖς τοίχοις κονιάματα. ὁμοίως δὲ καὶ οἱ [792a] καθ' ὕδατος λίθοι· καὶ γὰρ οὗτοι βρυωθέντες, ὕστερον ἀποξηραινόμενοι τῷ χρώματι γίνονται μέλανεσ. τὰ μὲν οὖν ἀπλᾶ τῶν χρωμάτων ταῦτα καὶ τοσαῦτά ἐστιν.

Τὰ δ' ἄλλα ἐκ τούτων τῇ κράσει καὶ τῷ μᾶλλον καὶ ἥττον γιγνόμενα πολλὰς καὶ ποικίλας ποιεῖ χρωμάτων φαντασίας. κατὰ μὲν τὸ μᾶλλον καὶ ἥττον, ὥσπερ τὸ φοινικοῦν καὶ τὸ ἀλουργές, κατὰ δὲ τὴν κρᾶσιν, ὥσπερ τὸ λευκὸν καὶ τὸ μέλαν, ὅταν μιχθέντα φαιοῦ ποιήσῃ φαντασίαν. διὸ τὸ μέλαν καὶ σκιερὸν τῷ φωτὶ μιγνύμενον φοινικοῦν. τὸ γὰρ μέλαν μιγνύμενον τῷ τε τοῦ ἡλίου καὶ τῷ ἀπὸ τοῦ πυρὸς φωτὶ θεωροῦμεν ἀεὶ γιγνόμενον φοινικοῦν, καὶ τὰ μέλανα πυρωθέντα πάντα εἰς χρῶμα μεταβάλλοντα φοινικοῦν· αἱ τε γὰρ καπνώδεις φλόγες καὶ οἱ ἄνθρακες, ὅταν ᾧσι διακεκαυμένοι, φαίνονται χρῶμα ἔχοντες φοινικοῦν. τὸ δ' ἀλουργές εὐανθές μὲν γίνεται καὶ λαμπρόν, ὅταν τῷ μετρίῳ λευκῷ καὶ σκιερῷ κραθῶσιν ἀσθενεῖς αἱ τοῦ ἡλίου αὐγαί. διὸ καὶ περὶ ἀνατολὰς καὶ δύσεις ὁ ἀῆρ πορφυροειδὴς ἐστὶν ὅτε φαίνεται, περὶ ἀνατολὴν καὶ δύσιν ὄντος τοῦ ἡλίου· ἀσθενεῖς γὰρ οὔσαι τότε μάλιστα πρὸς σκιερὸν ὄντα τὸν ἀέρα προσβάλλουσιν. φαίνεται δὲ καὶ ἡ θάλαττα πορφυροειδής, ὅταν τὰ κύματα μετεωρίζόμενα κατὰ τὴν ἐγκλισιν σκιασθῇ· πρὸς γὰρ τὸν ταύτης κλισμὸν ἀσθενεῖς αἱ τοῦ ἡλίου αὐγαὶ προσβάλλουσαι ποιοῦσι φαίνεσθαι τὸ χρῶμα ἀλουργές. ὁ καὶ ἐπὶ τῶν πτερωμάτων θεωρεῖται

γιγνόμενον· ἐντεινόμενα γάρ πως πρὸς τὸ φῶς ἀλουργές ἔχει τὸ χρῶμα. ἐλάττονος δὲ τοῦ φωτὸς προσβάλλοντος ζοφερόν, ὃ καλοῦσιν ὄρφνιον· πολὺ δὲ καὶ τῷ πρώτῳ μέλανι κραθὲν φοινικοῦν. εὐανθὲς δ' ὃν καὶ στίλβον εἰς τὸ φλογοειδὲς χρῶμα μεταβάλλει. κατὰ γὰρ τὴν πρὸς ἄλληλα κρᾶσιν οὕτως ληπτέον, ἐξ ὑποκειμένου θεωρημένου χρώματος ποιοῦντας τὴν μίξιν, ἀλλὰ μὴ πάντων ὁμοίαν γένεσιν ποιοῦντας. ἔστι γὰρ τῶν χρωμάτων οὐχ ἀπλᾶ μὲν, λόγον δ' ἔχει πρὸς τινα τὸν αὐτὸν τῶν συνθέτων ὥνπερ τὰ ἀπλᾶ πρὸς ἑαυτά, διὰ τὸ τὰ ἀπλᾶ πρὸς μίξιν ἑνὸς ἔχειν, [792b] καὶ μὴ εὐσημον ἐν τῷ παντί, καὶ προστεθεωρημένον κατασκευάζειν ὁμοίως. τὴν γὰρ τοῦ ἀλουργοῦ ἢ φοινικιοῦ κρᾶσιν λέγοντας ἀνάγκη ὁμοίως τοῖς ἐκ τούτων μιγνυμένοις καὶ ποιοῦσιν ἄλλην χροάν τὴν γένεσιν διηγῆσθαι, καὶ μὴ ὁμοίαν ἔμφασιν ποιεῖν. διόπερ ἐκ τοῦ προκατεσκευασμένου ληπτέον καὶ θεωρητέον τὴν κρᾶσιν, οἷον ὅτι τὸ οἶνωπὸν χρῶμα γίνεται, ὅταν ἀκράτῳ τῷ μέλανι καὶ στίλβοντι κραθῶσιν αὐγαὶ ἡεροειδεῖς, ὥσπερ καὶ αἱ τῶν βοτρῶν ῥᾶγες· καὶ γὰρ τούτων οἶνωπὸν φαίνεται τὸ χρῶμα ἐν τῷ πεπαίνεσθαι· μελαινομένων γὰρ τὸ φοινικοῦν εἰς τὸ ἀλουργές μεταβάλλει. κατὰ δὲ τὸν ὑποδεδειγμένον τρόπον θεωρητέον πάσας τὰς τῶν χρωμάτων διαφοράς, ἐκ κινήσεως τὴν ὁμοιότητα λαμβάνοντας κατ' αὐτὸ τὸ φαινόμενον, τὴν ἐν ἐκάστῳ μίξιν ὁμοιοῦντας καὶ ἐπὶ τῶν κατὰ μέρος ἐν γενέσει τινὶ καὶ κράσει ποιοῦντων φαντασίαν, καὶ πίστιν προσφερομένους. δεῖ δὲ καὶ πάντων τούτων ποιεῖσθαι τὴν θεωρίαν μὴ καθάπερ οἱ ζωγράφοι τὰ χρώματα ταῦτα κεραννύντας, ἀλλ' ἀπὸ τῶν εἰρημένων τὰς ἀνακλωμένας αὐγάς πρὸς ἀλλήλας συμβάλλοντας· μάλιστα γὰρ δύναται ἂν τις κατὰ φύσιν θεωρῆσαι τὰς τῶν χρωμάτων κράσεις. τὰς δὲ πίστεις καὶ τὰ ὅμοια δεῖ ἐν οἷς ἡ γένεσις ἔσται φανερά τῶν χρωμάτων. ταῦτα δὲ μάλιστά ἐστι τό τ' ἀπὸ τοῦ ἡλίου φῶς καὶ τὸ ἀπὸ τοῦ πυρὸς καὶ ὁ ἀήρ καὶ τὸ ὕδωρ· κεραννύμενα γὰρ τῷ μᾶλλον καὶ ἥττον ταῦτα μάλιστα πάσας ὡς εἰπεῖν τὰς χροάς ἀποτελεῖ. ἐπιληπτέον δὲ καὶ ἀπὸ τῶν ἄλλων χρωμάτων ταῖς αὐγαῖς κεραννυμένων τὴν ὁμοιότητα· οἱ γὰρ ἄνθρακες καὶ ὁ καπνὸς καὶ ὁ ἰὸς καὶ τὸ θεῖον καὶ τὰ πτερώματα κεραννύμενα τὰ μὲν ταῖς τοῦ ἡλίου αὐγαῖς, τὰ δὲ ταῖς τοῦ πυρός, πολλὰς καὶ ποικίλας ποιοῦσι μεταβολὰς χρωμάτων. τὰ δὲ καὶ τῇ πέψει θεωρητέον, γινόμενα ἐν φυτοῖς καὶ καρποῖς καὶ τριχώμασι καὶ πτερώμασι καὶ τοῖς τοιοῦτοις πᾶσιν.

Δεῖ δὲ μὴ λανθάνειν τὸ πολυειδὲς καὶ τὸ ἄπειρον τῶν χρωμάτων, διὰ πόσα συμβαίνει γίνεσθαι. εὐρήσομεν γὰρ [793a] ἥτοι διὰ τὸ τῷ φωτὶ καὶ ταῖς σκιαῖς ἀνίσως καὶ ἀνωμάλως λαμβάνεσθαι· καὶ γὰρ αἱ σκιαὶ καὶ τὸ φῶς κατὰ τὸ μᾶλλον καὶ ἥττον πολὺ διαφέρουσιν αὐτῶν, ὥστε καὶ καθ' αὐτὰς καὶ μετὰ τῶν χρωμάτων μιγνύμεναι ποιοῦσι μεταβολὰς χρωμάτων, ἢ τῷ τὰ κεραννύμενα τῷ πλήθει καὶ ταῖς δυνάμεσι διαφέρειν, ἢ τῷ λόγους ἔχειν μὴ τοὺς αὐτοὺς. πολλὰς γὰρ καὶ τὸ ἀλουργές ἔχει διαφορὰς καὶ τὸ φοινικιοῦν καὶ τὸ λευκὸν καὶ τῶν ἄλλων ἕκαστον καὶ κατὰ τὸ μᾶλλον καὶ ἥττον καὶ κατὰ τὴν πρὸς ἄλληλα μίξιν καὶ εἰλικρίνειαν αὐτῶν. ποιεῖ δὲ διαφορὰν καὶ τὸ λαμπρὸν ἢ στίλβον εἶναι τὸ μιγνύμενον ἢ τοῦναντίον αὐχμηρὸν καὶ ἀλαμπές. ἔστι δὲ τὸ στίλβον οὐκ ἄλλο τι ἢ συνέχεια φωτὸς καὶ πυκνότης. τὸ γὰρ χρυσοειδὲς γίνεται, ὅταν τὸ ξανθὸν καὶ τὸ ἡλιῶδες πυκνωθὲν ἰσχυρῶς στίλβῃ. διὸ καὶ οἱ τῶν περιστερῶν τράχηλοι καὶ τῶν ὑδάτων οἱ σταλαγμοὶ φαίνονται χρυσοειδεῖς τοῦ φωτὸς ἀνακλωμένου. ἔστι δὲ ἃ λειοῦμενα τρίψει καὶ δυνάμεσί τιςιν ἀλλοίας ἴσχει καὶ ποικίλας χροᾶς, ὥσπερ καὶ ὁ ἄργυρος παρατριβόμενος καὶ χρυσὸς καὶ χαλκὸς καὶ σίδηρος. καί τινα γένη λίθων διαφόρους ποιεῖ χροᾶς, καθάπερ καὶ ... μέλαινα γὰρ οὔσαι λευκάς γράφουσι γραμμὰς, διὰ τὸ πάντων τῶν τοιούτων τὰς μὲν ἐξ ἀρχῆς συστάσεις ἐκ μικρῶν εἶναι μορίων καὶ πυκνῶν καὶ μελάνων, ὑπὸ δὲ τῆς ἐν τῇ γενέσει βαφῆς ἀπάντων τῶν πόρων κεχρωσμένων δι' ὧν διελήλυθεν αὐτῶν ἡ βαφή, ἄλλην ἐσχηκέναι τὴν τοῦ χρώματος φαντασίαν. ὁ δ' ἀποτριβόμενος ἀπ' αὐτῶν οὐκέτι γίνεται χρυσοειδὴς οὐδὲ χαλκοειδὴς οὐδ' ἄλλην οὐδεμίαν τοιαύτην ἔχων χροιάν, ἀλλὰ πάντως μέλας, διὰ τὸ τοὺς μὲν πόρους παρατριβομένων αὐτῶν ἀναρρήγνυσθαι, δι' ὧν ἡ βαφή διελήλυθε, φύσει δὲ καὶ τῶν αὐτῶν εἶναι. τοῦ γὰρ προτέρου χρώματος οὐκέτι ὄντος ἡμῖν φανεροῦ παρὰ τὸ διασπᾶσθαι τὴν βαφήν, τὸ κατὰ φύσιν ὑπάρχον αὐτοῖς χρῶμα ὀρώμεν· διὸ καὶ πάντα φαίνεται μέλανα. ἐν δὲ τῷ παρατρίβεσθαι πρὸς ὁμαλές καὶ λεῖον ἕκαστον τούτων, καθάπερ καὶ πρὸς τὰς [793b] βασάνους, ἀποβάλλοντα ἀπολαμβάνει πάλιν τὴν χροᾶν ἐν τῇ συνάψει καὶ συνεχείᾳ, τὸ τῆς βαφῆς διαφαινόμενον. ἐπὶ δὲ τῶν καυστῶν καὶ διαλυομένων καὶ τηκομένων ἐν τῷ πυρὶ ταῦτα πλείστας ἔχει χροᾶς, ὅσων ὁ καπνὸς ἐστὶ λεπτὸς καὶ ἀεροειδὴς καὶ τὰ χρώματα σκιώδη, ὥσπερ ὁ τε ἀπὸ τοῦ θείου καὶ τῶν ἰωμένων χαλκείων, καὶ ὅσα ἐστὶ πυκνὰ καὶ λεῖα, καθάπερ ὁ

ἄργυρος. ἐπὶ δὲ τῶν ἄλλων ὅσα σκιώδεις ἔχει τὰς χροάς καὶ λειότητος μετέχει, ὥσπερ τὸ ὕδωρ καὶ τὰ νέφη καὶ τὰ πτερώματα τῶν ὀρνίθων· καὶ γὰρ ταῦτα διὰ τε τὴν λειότητα καὶ τὰς προσπιπτούσας αὐγὰς, ἄλλοτε ἄλλως κεραυννύμενας, ποιεῖ διαφόρους τὰς χροάς, καθάπερ καὶ τὸ σκότος. τῶν δὲ χρωμάτων οὐδὲν ὀρώμεν εἰλικρινὲς οἷον ἐστίν, ἀλλὰ πάντα κεκραμένα ἐν ἐτέροις· καὶ γὰρ ἂν μηδενὶ τῶν ἄλλων, ταῖς γε τοῦ φωτὸς αὐγαῖς καὶ ταῖς σκιαῖς κεραυννύμενα ἄλλοῖα, καὶ οὐχ οἷά ἐστι, φαίνεται. διὸ καὶ τὰ ἐν σκιᾷ θεωρούμενα καὶ ἐν φωτὶ καὶ ἡλίῳ, καὶ σκληρᾷ αὐγῇ ἢ μαλακῇ, καὶ κατὰ τὰς ἐγκλίσεις οὕτως ἢ οὕτως ἔχοντι, καὶ κατὰ τὰς ἄλλας διαφοράς, ἄλλοῖα φαίνεται. καὶ ταῖς πρὸς τῷ πυρὶ καὶ τῇ σελήνῃ, καὶ ταῖς τῶν λύχνων αὐγαῖς, διὸ καὶ τὸ φῶς ἐκάστου τούτων ἁλλοιοτέραν ἔχει χροάν. καὶ τῇ πρὸς ἄλληλα δὲ μίξει τῶν χρωμάτων· δι' ἀλλήλων γὰρ φερόμενα χρώζεται. τὸ γὰρ φῶς ὅταν προσπεσὸν ὑπὸ τινων χρωσθῇ, καὶ γένηται φοινικιοῦν ἢ ποῶδες, καὶ τὸ ἀνακλασθὲν προσπέσῃ πρὸς ἕτερόν τι χρῶμα, πάλιν ὑπ' ἐκείνου κεραυννύμενον ἄλλην τινὰ λαμβάνει τοῦ χρώματος κρᾶσιν. καὶ τοῦτο πάσχον συνεχῶς μὲν οὐκ αἰσθητῶς δὲ ἐνίοτε παραγίνεται πρὸς τὰς ὁψεις ἐκ πολλῶν μὲν κεκραμένον χρωμάτων, ἐνὸς δέ τινος τῶν μάλιστα ἐπικρατούντων ποιοῦν τὴν αἴσθησιν. διὸ καὶ καθ' ὕδατος ὕδατοειδῇ μᾶλλον φαίνεται, καὶ τὰ ἐν τοῖς κατόπτροις ὁμοίως ἔχοντα χροάς ταῖς τῶν κατόπτρων. ὁ καὶ περὶ τὸν ἀέρα οἰητέον συμβαίνειν. ὥστε ἐκ τριῶν εἶναι τὰς χροάς ἀπάσας μεμιγμένας, τοῦ φωτός, καὶ δι' ὧν φαίνεται τὸ φῶς, οἷον τοῦ τε ὕδατος [794a] καὶ τοῦ ἀέρος, καὶ τρίτου τῶν ὑποκειμένων χρωμάτων, ἀφ' ὧν ἀνακλᾶσθαι συμβαίνει τὸ φῶς. τὸ δὲ λευκὸν καὶ διαφανὲς ὅταν μὲν ἀραιὸν ᾖ σφόδρα, φαίνεται τῷ χρώματι ἀεροειδές· ἐπὶ δὲ τῶν πυκνῶν ἐπὶ πάντων ἐπιφαίνεται τις ἀχλύς, καθάπερ ἐπὶ τοῦ ὕδατος καὶ ὕαλου καὶ τοῦ ἀέρος, ὅταν ᾖ παχύς. τῶν γὰρ αὐγῶν διὰ τὴν πυκνότητα πανταχόθεν ἐκλείπουσῶν, οὐ δυνάμεθα τὰ ἐντὸς αὐτῶν ἀκριβῶς διορᾶν. ὁ δ' ἄηρ ἐγγύθεν μὲν θεωρούμενος οὐδὲν ἔχειν φαίνεται χρῶμα (διὰ γὰρ τὴν ἀραιότητα ὑπὸ τῶν αὐγῶν κρατεῖται, χωριζόμενος ὑπ' αὐτῶν πυκνοτέρων οὐσῶν καὶ διαφαινομένων δι' αὐτοῦ), ἐν βάθει δὲ θεωρουμένου, ἐγγυτάτῳ φαίνεται τῷ χρώματι κυανοειδὲς διὰ τὴν ἀραιότητα. ἢ γὰρ λείπει τὸ φῶς, ταύτῃ σκότῳ διειλημμένος φαίνεται κυανοειδής. ἐπιπυκνωθεὶς δέ, καθάπερ καὶ τὸ ὕδωρ, πάντων λευκώτατόν ἐστιν.

Τὰ δὲ βαπτόμενα πάντα τὰς χροάς ἀπὸ τῶν βαπτόντων

λαμβάνει. πολλά μὲν γὰρ τοῖς ἄνθεσι βάπτεται τοῖς φυομένοις, πολλά δὲ ρίζαις, πολλά δὲ φλοιοῖς ἢ ξύλοις ἢ φύλλοις ἢ καρποῖς. ἔτι δὲ πολλά μὲν γῆ, πολλά δ' ἀφρῶ, πολλά δὲ καὶ μελανθηρία. τὰ δὲ καὶ τοῖς τῶν ζώων χυλοῖς, καθάπερ καὶ τὸ ἀλουργές τῇ πορφύρᾳ. τὰ δὲ οἶνῳ, τὰ δὲ καπνῷ, τὰ δὲ κονία, τὰ δὲ θαλάττῃ, ὥσπερ τὰ τριχώματα τῶν θαλαττίων· καὶ γὰρ ταῦτα πάντα ὑπὸ τῆς θαλάττης γίνονται πυρρά. καὶ ὅλως ὅσα χρώας ἰδίας ἔχει. αἰεὶ γὰρ ἀπὸ πάντων αὐτῶν, ἅμα τῷ τε ὑγρῷ καὶ θερμῷ τῶν χρωμάτων συνεισιόντων εἰς τοὺς τῶν βαπτομένων πόρους, ὅταν ἀποξηρανθῇ, τὰς ἀπ' ἐκείνων χρώας λαμβάνει. διὸ καὶ πολλάκις αὐτῶν ἐκπλύνεται, τῶν ἀνθῶν ἐκ τῶν πόρων ἐκρύνεσθαι. πολλὰς δὲ καὶ αἱ στύψεις ἐν τῇ βαφῇ ποιοῦσι διαφορὰς καὶ μίξεις, καὶ τὰ πάθη τῶν βαπτομένων, ὥσπερ καὶ ἐπὶ τῆς κράσεως εἴρηται πρότερον. βάπτεται δὲ καὶ τὰ μέλανα τῶν ἐρίων, οὐ μὴν ὁμοίως γε τῷ χρώματι γίνεσθαι λαμπρά, διὰ τὸ βάπτεσθαι τοὺς πόρους αὐτῶν εἰς τοὺς τῶν ἀνθῶν εἰσιόντας, τὰ δὲ μεταξὺ [794b] διαστήματα τῆς τριχὸς μηδεμίαν λαμβάνειν βαφὴν. ταῦτα λευκὰ μὲν ὄντα, καὶ παρ' ἄλληλα κείμενα τοῖς χρώμασι, ποιεῖ πάντα φαίνεσθαι τὰ ἄνθη λαμπρότερα· τὰ μέλανα δὲ τοῦναντίον σκιερὰ καὶ ζοφώδη. διὸ καὶ τὸ καλούμενον ὄρφνιον εὐανθέστερον γίνεται τῶν μελάνων ἢ τῶν λευκῶν· οὕτω γὰρ ἀκρατέστερον αὐτῶν φαίνεται τὸ ἄνθος, κεραννύμενον ταῖς τοῦ μέλανος ἀυγαῖς. καθ' αὐτὸ μὲν γὰρ τὸ μεταξὺ διάστημα τῶν πόρων οὐχ ὁράται διὰ σμικρότητα, καθάπερ οὐδὲ καττίερος τῷ χαλκῷ κραθεῖς, οὐδὲ τῶν ἄλλων οὐθὲν τῶν τοιούτων. τῶν δὲ βαπτομένων τὰ χρώματα ἀλλοιοῦνται διὰ τὰς εἰρημένας αἰτίας.

Τὰ δὲ τριχώματα καὶ τὰ πτερώματα καὶ τὰ ἄνθη καὶ οἱ καρποὶ καὶ τὰ φυτὰ πάντα ὅτι μὲν ἅμα τῇ πέψει πάσας τὰς τῶν χρωμάτων λαμβάνει μεταβολὰς, φανερόν ἐκ πολλῶν· τίνες δὲ εἰσιν ἐκάστοις τῶν φυομένων ἀρχαὶ τῶν χρωμάτων, καὶ ποίας τὰς μεταβολὰς ἐκ ποίων λαμβάνουσι, καὶ δι' ἧς αἰτίας ταῦτα πάσχει, κἂν εἴ τινας ἄλλας ἀπορίας αὐτοῖς συμβαίνει παρακολουθεῖν, περὶ πάντων τούτων ἐπισκεπτέον ἐκ τῶν τοιούτων. ἐν πᾶσι δὲ τοῖς φυτοῖς ἀρχὴ τὸ ποῶδες ἐστὶ τῶν χρωμάτων· καὶ γὰρ οἱ βλαστοὶ καὶ τὰ φύλλα καὶ οἱ καρποὶ γίνονται κατ' ἀρχὰς ποῶδεις. ἴδιοι δ' ἂν τις τοῦτο καὶ ἐπὶ τῶν ὑομένων ὑδάτων· ὅπου ἂν πλείονα χρόνον συστή τὸ ὕδωρ, πάλιν ἀποξηραίνόμενον γίνεται τῷ χρώματι ποῶδες. κατὰ λόγον δὲ συμβαίνει καὶ τὸ πρῶτον ἐν πᾶσι τοῖς φυομένοις τοῦτο συνίστασθαι τῶν χρωμάτων. τὰ γὰρ ὕδατα πάντα χρονοζόμενα κατ' ἀρχὰς μὲν

γίνεται χλωρά, κεραννύμενα ταῖς τοῦ ἡλίου αὐγαῖς, κατὰ μικρὸν δὲ μελαινόμενα, πάλιν μιγνύμενα τῷ χλωρῷ, γίνεται ποώδη. τὸ γὰρ ὑγρὸν, ὥσπερ εἴρηται, καθ' ἑαυτὸ παλαιούμενον καὶ καταξηραινόμενον μελαίνεται, καθάπερ καὶ τὰ ἐν ταῖς δεξαμεναῖς κονιάματα· καὶ γὰρ τούτων ὅσα μὲν ἐστὶν αἰεὶ καθ' ὕδατος, ταῦτα μὲν ἅπαντα γίνεταί μέλανα διὰ τὸ καθ' αὐτὰ μὴ ξηραίνεσθαι διαψυχόμενον τὸ ὑγρὸν, ὅσον δ' [795a] ἀπαντλούμενον ἡλιοῦται, τὸ μὲν ποῶδες γίνεται διὰ τὸ τὸ ξανθὸν τῷ μέλανι κεράννυσθαι. μᾶλλον μὲν οὖν τοῦ ὑγροῦ μελαιομένου τὸ ποῶδες γίνεται κατακορὲς ἰσχυρῶς καὶ πρασοειδές. διὸ καὶ πάντων οἱ παλαιοὶ βλαστοὶ πολὺ μᾶλλον εἰσι τῶν νέων μέλανες· οἱ δὲ ξανθότεροι διὰ τὸ μήπω τὸ ὑγρὸν ἐν αὐτοῖς μελαίνεσθαι. τῆς γὰρ αὐξήσεως αὐτῶν βραδυτέρας γιγνομένης, καὶ τῆς ὑγρασίας πολὺν χρόνον ἐμμενούσης, διὰ τὸ ψυχόμενον ἰσχυρῶς μελαίνεσθαι τὸ ὑγρὸν, γίνεται πρασοειδὲς ἀκράτῳ τῷ μέλανι κεραννύμενον. ἐν ὅσοις δὲ τὸ ὑγρὸν μὴ μίγνυται ταῖς τοῦ ἡλίου αὐγαῖς, τούτων διαμένει τὸ χρῶμα λευκόν, ἐὰν μὴ χρονιζόμενον καὶ καταξηραινόμενον μελανθῇ πρότερον. διὸ καὶ τὰ μὲν ὑπὲρ γῆς χλωρὰ πάντων τῶν φυομένων τὸ πρῶτόν ἐστι, τὰ δὲ κατὰ γῆς, καυλοὶ καὶ ρίζαι λευκαί. καὶ οἱ βλαστοὶ κατὰ γῆς μὲν ὄντες εἰσι λευκοί, περιαιρεθείσης δὲ τῆς γῆς τὸ μὲν ἐξ ἀρχῆς, ὡς προείρηται, πάντες γίνονται ποιῶδεις διὰ τὸ καὶ τὴν ὑγρασίαν τὴν διὰ τῶν βλαστῶν εἰς αὐτοὺς διηθουμένην τοιαύτην ἔχειν τὴν τοῦ χρώματος φύσιν, καὶ ταχέως αὐτὴν εἰς τὴν αὐξήσιν καταναλίσκεσθαι τὴν τῶν καρπῶν· ὅταν δὲ μηκέτι αὐξάνωνται διὰ τὸ μὴ κρατεῖν ἤδη τὸ θερμὸν τῆς ἐπιρρεούσης τροφῆς, ἀλλὰ καὶ τοῦναντίον ἀναλύηται τὸ ὑγρὸν ὑπὸ τῆς θερμότητος. ὅταν δὲ πεπαίνωνται οἱ καρποὶ πάντες, καὶ τῆς ὑπαρχούσης ἐν αὐτοῖς ὑγρασίας συνεψομένης ὑπὸ τε τοῦ ἡλίου καὶ τῆς τοῦ ἀέρος θερμότητος ἕκαστοι ἀπολαμβάνουσι τὰς ἀπὸ τῶν φυτῶν χροάς, καθάπερ καὶ τὰ βαπτόμενα τῶν ἀνθῶν. διὸ κατὰ μικρὸν χρώζονται, καὶ μάλιστα αὐτῶν τὰ πρὸς τὸν ἥλιον ἐστραμμένα καὶ τὴν ἀλέαν. ὥστε καὶ τὰς χροάς αὐτῶν ἅμα ταῖς ὥραις ἀπάντων μεταβάλλειν. φανερόν δὲ τοῦτο ἐστίν· οἱ γὰρ τοῦ ποῶδους χρώματος ἅπαντες ἤδη πεπαινόμενοι μεταβάλλουσιν εἰς τὸ κατὰ φύσιν χρῶμα. καὶ γὰρ λευκοὶ καὶ μέλανες καὶ φαιοὶ καὶ ξανθοὶ καὶ μελανοειδεῖς καὶ σκιοειδεῖς καὶ [795b] φοινικιοὶ καὶ οἰνωποὶ καὶ κροκοειδεῖς καὶ σχεδὸν ἀπάσας ἔχοντες γίνονται τὰς τῶν χρωμάτων διαφοράς. ἐπεὶ δὲ τὰ πλεῖστα γίνεται τῶν χρωμάτων πλειόνων

κεραννυμένων ἀλλήλοις, φανερόν ὅτι καὶ τὰς ἐν τοῖς φυτοῖς χροὰς ἀνάγκη τὰς αὐτὰς ἔχειν κράσεις· διὰ γὰρ τούτων τὸ ὑγρὸν διηθούμενον, καὶ μεθ' ἑαυτοῦ συνεκκλύζον, ἀπάσας λαμβάνει τὰς τῶν χρωμάτων δυνάμεις. καὶ τούτου συνεψομένου περὶ τὰς τῶν καρπῶν πένγεις ὑπὸ τε τοῦ ἡλίου καὶ τῆς τοῦ ἀέρος θερμότητος, ἕκαστα καθ' ἑαυτὰ συνίσταται τῶν χρωμάτων, τὰ μὲν θάττον τὰ δὲ βραδύτερον, καθάπερ συμβαίνει καὶ περὶ τὴν βαφὴν τὴν τῆς πορφύρας. καὶ γὰρ ταύτην ὅταν κόψαντες ἅπασαν ἐξ αὐτῆς τὴν ὑγρασίαν ἐκκλύσωσι, καὶ ταύτην ἐγγέαντες ἔψωσιν ἐν ταῖς χύτραις, τὸ μὲν πρῶτον οὐδὲν ὅλως ἐν τῇ βαφῇ τῶν χρωμάτων φανερόν ἐστι διὰ τὸ κατὰ μικρὸν ἕκαστον αὐτῶν τοῦ ὑγροῦ συνεψομένου μᾶλλον καὶ τῶν ἔτι ὑπαρχόντων ἐν αὐτοῖς χρωμάτων μιγνυμένων ἀλλήλοις πολλὰς καὶ ποικίλας λαμβάνειν διαφοράς· καὶ γὰρ μέλαν καὶ λευκὸν καὶ ὄρφνιον καὶ ἀεροειδὲς καὶ τότε ἅπαν γίνεται συνεψηθέντων, ὥστε διὰ τὴν κρᾶσιν μηκέτι καθ' αὐτὸ μηδὲν τῶν ἄλλων χρωμάτων φανερόν εἶναι. τὸ δ' αὐτὸ τοῦτο συμβαίνει καὶ ἐπὶ τῶν καρπῶν. ἐν πολλοῖς γὰρ διὰ τὸ μὴ πάσας ἅμα γίνεσθαι τὰς τῶν χρωμάτων πένγεις, ἀλλὰ τὰ μὲν αὐτῶν συνίστασθαι πρότερον τὰ δ' ὕστερον, ἐξ ἐτέρων εἰς ἕτερα μεταβάλλουσιν, ὥπερ καὶ οἱ βότρυες καὶ οἱ φοῖνικες. καὶ γὰρ τούτων ἔνιοι τὸ μὲν πρῶτον γίνονται φοινικοῖ, τοῦ δὲ μέλανος ἐν αὐτῷ συνισταμένου μεταβάλλουσι πάλιν εἰς τὸ οἰνωπόν· τὸ δὲ τελευταῖον γίνονται κυανοειδεῖς, ὅταν ἤδη καὶ τὸ φοινικιοῦν πολλῷ καὶ ἀκράτῳ τῷ μέλανι μιχθῇ. τὰ γὰρ ὕστερον ἐπιγινόμενα τῶν χρωμάτων, ὅταν κρατήσῃ, τὰς προτέρας χροὰς ἐξαλλάττει. μάλιστα δὲ τοῦτο ἐπὶ τῶν μελάνων καρπῶν φανερόν ἐστιν· σχεδὸν γὰρ αὐτῶν οἱ πλείστοι, καθάπερ [796a] εἴρηται, κατ' ἀρχὰς μὲν ἐκ τοῦ ποώδους μεταβάλλοντες μικρὸν ἐπιφοινικίζουσι καὶ γίνονται πυρροί, ταχὺ δὲ μεθίστανται πάλιν ἐκ τοῦ πυρροῦ καὶ ἀκράτου τοῦ μέλανος ἐν τοῖς τοιούτοις ἐνυπάρχοντος. δηλοῖ δέ· καὶ γὰρ τὰ κλήματα καὶ τὰ ἔρια καὶ τὰ φύλλα πάντων ἐστὶ τῶν τοιούτων μέλανα διὰ τὸ πλείστην ἐν αὐτοῖς ὑπάρχειν τὴν τοιαύτην χροάν, ἐπεὶ διότι γε τῶν καρπῶν οἱ μέλανες ἀμφοτέρων τῶν χρωμάτων μετέχουσι, φανερόν ἐστιν· πάντων γὰρ ὁ χυλὸς γίνεται τῶν τοιούτων οἰνωπός. τὰ δὲ χρώματα ἐν τῇ γενέσει προτερεῖ τὰ φοινικιά τῶν μελάνων. δηλοῖ δέ· καὶ γὰρ τὰ ὑπὸ τοὺς σταλαγμοὺς ἐδάφη, καὶ ὅλως ὅπου συμβαίνει γίνεσθαι μετρία ὑδάτων ἔκρυσις ἐν τόποις σκιεροῖς, ἅπαντα μεταβάλλει πρῶτον ἐκ τοῦ ποώδους εἰς τὸ

φοινικιοῦν χρώμα, καὶ γίνεται τὸ ἔδαφος ὡς ἂν αἵματος ἀρτίως ἐπεσφαγμένου κατὰ τὸν τόπον τοῦτον, καθ' ὃν ἂν λάβῃ τὸ ποῶδες τῶν χρωμάτων τὴν πέψιν· τὸ δὲ τελευταῖον καὶ τοῦτο μέλαν ἰσχυρῶς γίνεται καὶ κυανοειδές. ὅπερ συμβαίνει καὶ ἐπὶ τῶν καρπῶν. ὅτι δὲ χρωμάτων ὕστερον ἐπιγινομένων, ὅταν κρατῇται τὰ πρότερον, τὸ χρώμα τῶν καρπῶν μεταβάλλει, καὶ διὰ τῶν τοιούτων ῥάδιον συνιδεῖν. καὶ γὰρ τῆς ροιᾶς ὁ καρπὸς καὶ τὰ τῶν ῥόδων φύλλα κατ' ἀρχὰς μὲν γίνεται λευκά, τὸ δὲ τελευταῖον ἤδη χρωζομένων ἐν αὐτοῖς τῶν χυλῶν ὑπὸ τῆς πέψεως ἀποχραίνεται, καὶ μεταβάλλει πάλιν εἰς τὸ τοῦ ἀλουργοῦ χρώμα καὶ τὸ φοινικιοῦν. τὰ δὲ καὶ πλείους ἐπ' αὐτοῖς ἔχει χροᾶς, καθάπερ καὶ ἐπὶ τῆς μήκωνος ὁ ὀπὸς καὶ τῆς ἐλαίας ὁ ἀμόργης· καὶ γὰρ οὗτος τὸ μὲν πρῶτον γίνεται λευκός, καθάπερ καὶ ὁ τῆς ροιᾶς καρπός, λευκανθεὶς δὲ πάλιν εἰς τὸ φοινικιοῦν μεταβάλλει χρώμα, τὸ δὲ τελευταῖον πολλῷ τῷ μέλανι κραθεὶς γίνεται κυανοειδής. διὸ καὶ τὰ τῆς μήκωνος φύλλα τὰ μὲν ἄνω ἔχει φοινικιοῦντα παρὰ τὸ γίνεσθαι ταχεῖαν αὐτῶν τὴν ἔκπεσιν, τὰ δὲ πρὸς ταῖς ἀρχαῖς μέλανα, ἤδη τούτου τοῦ [796b] χρώματος ἐν αὐτοῖς ἐπικρατοῦντος, ὥσπερ καὶ ἐπὶ τοῦ καρποῦ· καὶ γὰρ τὸ τελευταῖον γίνεται μέλας. ἐν ὅσοις δ' ὑπάρχει τῶν φυτῶν ἐν χρώμα μόνον, οἷον τὸ λευκὸν ἢ τὸ μέλαν ἢ τὸ φοινικιοῦν ἢ τὸ ἀλουργές, τούτων δὲ πάντων οἱ καρποὶ διαμένουσιν ἀεὶ τὴν αὐτὴν ἔχοντες τοῦ χρώματος φύσιν, ὅταν ἅπαξ ἐκ τοῦ ποῶδους εἰς ἄλλην χροᾶν μεταβάλλωσιν. τὰ δ' ἄνθη τοῖς καρποῖς ἐπ' ἐνίων μὲν ὁμόχροα συμβαίνει γίνεσθαι, καθάπερ ἔχει καὶ ἐπὶ τῆς ροιᾶς· καὶ γὰρ ὁ καρπὸς αὐτῆς γίνεται φοινικιοῦς καὶ τὸ ἄνθος· ἐπ' ἐνίων δὲ πολὺ τῷ χρώματι διαφέρει, οἷον ἐπὶ τε τῆς δάφνης καὶ τοῦ κιττοῦ· τὸ μὲν γὰρ ἄνθος ἐστὶν αὐτῶν ἀπάντων ξανθόν, ὁ δὲ καρπὸς τῶν μὲν μέλας τῶν δὲ φοινικιοῦς. ὁμοίως δ' ἔχει καὶ ἐπὶ τῆς μηλέας· καὶ γὰρ ταύτης τὸ μὲν ἄνθος ἐστὶ λευκὸν ἐπιπορφυρίζον, ὁ δὲ καρπὸς ξανθός. τῆς δὲ μήκωνος τὸ μὲν ἄνθος φοινικιοῦν, ὁ δὲ καρπὸς ὁ μὲν μέλας ὁ δὲ λευκός, παρὰ τὸ καὶ τὰς πέψεις τῶν ἐνυπαρχόντων ἐν αὐτοῖς χυλῶν κατ' ἄλλους γίνεσθαι χρόνους. ῥάδιον δὲ τοῦτο ἐκ πολλῶν συνιδεῖν· καὶ γὰρ τῶν καρπῶν ἔνιοι, καθάπερ εἴρηται, πολλὰς διαφορὰς ἅμα τῇ πέψει λαμβάνουσιν. διὸ καὶ τὰς ὁσμάς καὶ τοὺς χυλοὺς πολὺ διαφόρους συμβαίνει τοῖς ἄνθεσι καὶ τοῖς καρποῖς συνακολουθεῖν. ἔτι δὲ μᾶλλον τοῦτό ἐστιν ἐπ' αὐτῶν τῶν ἀνθῶν φανερόν· τοῦ γὰρ αὐτοῦ φύλλου τὸ μὲν ἐστὶ μέλαν τὸ δὲ φοινικιοῦν, ἐνίων δὲ τὸ μὲν τι

λευκὸν τὸ δὲ πορφυροειδές. οὐχ ἥκιστα δὲ τοῦτο φανερόν ἐστιν ἐπὶ τῆς ἱρίδος· πολλὰς γὰρ ἔχει καὶ τοῦτο τὸ ἄνθος ἐν αὐτῷ ποικιλίας παρὰ τὰς τῆς πέψεως διαφοράς, ὥσπερ καὶ τῶν βοτρύων, ὅταν ἤδη πεπαινόμενοι τυγχάνωσιν. διὸ καὶ πάντων μάλιστα συμβαίνει πέττεσθαι τῶν ἀνθῶν τὰ ἄκρα, τὰ δὲ πρὸς ταῖς ἀρχαῖς ἀχρύτερα γίνεται πολλῶ. σχεδὸν γὰρ ἐνίων ὥσπερ ἐκκάεται τὸ ὑγρὸν πρότερον ἢ λαβεῖν τὴν οἰκείαν πέψιν. διὸ καὶ τὰ μὲν ἄνθη τῷ χρώματι διαμένει, οἱ δὲ καρποὶ πεττόμενοι μεταβάλλουσιν· τὰ μὲν γὰρ διὰ [797a] μικρότητα τῆς τροφῆς ταχέως ἐκπέττεται, οἱ δὲ καρποὶ διὰ τὸ πλῆθος τῆς ὑγρασίας εἰς πάσας ἅμα τῇ πέψει τὰς κατὰ φύσιν χροὰς μεταβάλλουσιν. φανερόν δὲ τοῦτο ἐστί, καθάπερ εἴρηται πρότερον, καὶ ἐπὶ τῶν βαπτομένων ἀνθῶν. τὰ μὲν γὰρ ἐξ ἀρχῆς, ὅταν βάπτοντες τὴν πορφύραν καθῶσι τὰς αἱματίδας, ὄρφναι γίνονται καὶ μέλαιναι καὶ ἀεροειδεῖς· τοῦ δ' ἄνθους συνεψηθέντος ἱκανῶς ἀλουργές γίνεται εὐανθές καὶ λαμπρόν. ὥστ' ἀνάγκη καὶ τῶν ἀνθῶν ὁμοίως πολλὰ τοῖς χρώμασι τῶν καρπῶν διαλλάττειν, καὶ τὰ μὲν ὑπερβαίνειν τὰ δὲ ἀπολείπειν τῶν κατὰ φύσιν χρωμάτων, διὰ τὸ τῶν μὲν ἀτελῆ τῶν δὲ τελείαν γίνεσθαι τὴν πέψιν. τὰ μὲν οὖν ἄνθη καὶ τοὺς καρποὺς διὰ ταύτας τὰς αἰτίας συμβαίνει τοῖς χρώμασιν ἀλλήλων διαφέρειν· τὰ δὲ φύλλα τῶν πλείστων δένδρων τὸ τελευταῖον γίνεται ξανθὰ διὰ τὸ τῆς τροφῆς ὑπολειπούσης φθάνειν αὐτὰ καταξηραίνόμενα πρότερον ἢ μεταβάλλειν εἰς τὸ κατὰ φύσιν χρῶμα, ἐπεὶ καὶ τῶν ἀπορρεόντων καρπῶν ἔνιοι γίνονται τῷ χρώματι ξανθοὶ διὰ τὸ καὶ τούτων τῆς πέψεως πρότερον τὴν τροφήν ὑπολείπειν. ἔτι δὲ ὁ τε σῖτος καὶ τὰ φυόμενα πάντα· καὶ γὰρ ταῦτα τὸ τελευταῖον γίνεται ξανθὰ. τὸ γὰρ ὑγρὸν ἐν αὐτοῖς οὐκέτι μελαινόμενον διὰ τὸ καταξηραίνεσθαι ταχέως ποιεῖ τὴν τοῦ χρώματος μεταβολήν. μελαινόμενον γὰρ καὶ τῷ χλωρῷ κεραννύμενον γίνεται, καθάπερ εἴρηται, ποῶδες· ἀσθενεστέρου δὲ τοῦ μέλανος αἰετινομένου, πάλιν κατὰ μικρὸν εἰς τὸ χλωρὸν μεταβάλλει χρῶμα, καὶ τὸ τελευταῖον γίνεται ξανθόν, ἐπεὶ τὰ γε τῆς ἀπίου φύλλα καὶ τῆς ἀνδράχνης καὶ τινῶν ἄλλων πεττόμενα γίνεται φοινικῖα. πλὴν ὅσα καὶ τούτων καταξηραίνεται ταχέως, ταῦτα γίνεται ξανθὰ διὰ τὸ τούτων πρὸ τῆς πέψεως τὴν τροφήν ὑπολείπειν. τὰς μὲν οὖν τῶν φυτῶν διαφοράς μάλιστα εὐλογον συμβαίνειν διὰ τὰς εἰρημένας αἰτίας.

Γίνεται δὲ καὶ τὰ τριχώματα καὶ τὰ πτερώματα καὶ τὰ δέρματα καὶ ἵππων καὶ βοῶν καὶ προβάτων καὶ ἀνθρώπων καὶ τῶν ἄλλων

ζώων ἀπάντων καὶ λευκὰ καὶ [797b] φαιὰ καὶ πυρρὰ καὶ μέλανα διὰ τὴν αὐτὴν αἰτίαν, λευκὰ μὲν ὅταν ᾖ ὑπὸ τῆς πέψεως τὸ ὑγρὸν τὸ οἰκεῖον ἔχον χρῶμα καταξηρανθῇ, μέλανα δὲ τοῦναντίον ὅταν αὐτῶν ἐν τῇ γενέσει τὸ περὶ τὸν χρῶτα ὑγρὸν, καθάπερ ἐν τοῖς ἄλλοις ἅπασι, παλαιούμενον καὶ χρονιζόμενον διὰ τὸ πλῆθος μελανθῇ· πάντων γὰρ τῶν τοιούτων ὁ τε χρῶς καὶ τὰ δέρματα γίνεται μέλανα. φαιὰ δὲ καὶ πυρρὰ καὶ ξανθὰ καὶ τὰς ἄλλας ἔχοντα χροῖας, ὅσα φθάνει καταξηραίνόμενα πρότερον ἢ τελέως ἐν αὐτοῖς μεταβάλλειν εἰς τὸ μέλαν χρῶμα τὸ ὑγρὸν. οἷς δ' ἂν ἀνωμάλως τοῦτο συμβῇ, καὶ τὰ χρώματα τοιαῦτα γίνεται ποικίλα. διὸ καὶ πάντα τοῖς δέρμασι καὶ τῷ χρώματι συνακολουθεῖ, ἐπεὶ καὶ τῶν ἀνθρώπων τῶν ἐμπύρρων καὶ τὰ τριχώματα γίνεται λευκόπυρρα, τῶν δὲ μελάνων μέλανα· καὶ κατὰ μέρος τι τοῦ σώματος ἐξανθήσῃ λεύκη, καὶ τὰς τρίχας ἴσχουσιν ἅπαντες λευκὰς κατὰ τὸν τόπον τοῦτον, καθάπερ καὶ τὰ ποικίλα τῶν ζώων. οὕτως ἅπαντα τὰ τριχώματα καὶ τὰ πτερώματα τοῖς δέρμασι συνακολουθεῖ, καὶ τὰ κατὰ μέρος καὶ τὰ κατὰ σῶμα ὅλον. ὁμοίως δὲ τούτοις ὀπλαὶ καὶ χηλαὶ καὶ ῥύγχη καὶ κέρατα· καὶ γὰρ ταῦτα τῶν μὲν μελάνων γίνεται μέλανα, τῶν δὲ λευκῶν λευκά, διὰ τὸ καὶ τούτοις ἅπασι διὰ τοῦ σώματος τὴν τροφήν εἰς τὴν ἐκτὸς περιοχὴν διηθεῖσθαι. ὅτι δὲ τοῦτό ἐστιν αἴτιον, οὐ χαλεπὸν ἐκ πολλῶν συνιδεῖν. τῶν τε γὰρ παιδίων ἀπάντων αἱ κεφαλαὶ κατ' ἀρχὰς μὲν γίνονται πυρραὶ διὰ τὴν ὀλιγότητα τῆς τροφῆς. φανερόν δὲ τοῦτό ἐστιν· καὶ γὰρ ἀσθενεῖς αἱ τρίχες καὶ ἀραιαὶ καὶ βραχεῖαι τὸ πρῶτον ἅπασιν ἐπιγίνονται τοῖς παιδίοις. προϊούσης δὲ τῆς ἡλικίας μελαίνονται πάλιν χρωζόμενοις αὐτοῖς διὰ τὸ πλῆθος τῆς ἐπιρρεούσης τροφῆς. ὁμοίως δὲ καὶ περὶ τὴν ἥβην καὶ τὸ γένειον, ὅταν ἄρχωνται τὸ πρῶτον ἡβᾶν καὶ γενειᾶν, καὶ αὗται γίνονται κατ' ἀρχὰς μὲν πυρραὶ ταχέως διὰ τὴν ὀλιγότητα τῆς ὑγρασίας ἐν αὐταῖς καταξηραίνουμένης, τῆς τροφῆς δὲ πλέον ἐπὶ τὸν τόπον ἐπιφερομένης μελαίνονται πάλιν. αἱ δὲ ἐπὶ τοῦ σώματος πλείστον χρόνον πυρραὶ διαμένουσι διὰ τὴν ἔνδειαν τῆς τροφῆς, [798a] ἐπεὶ καθ' ὃν ἂν χρόνον αὐξηθῶσι, καὶ ταύτας ὁμοίως συμβαίνει μελαίνεσθαι καθάπερ καὶ τὰς ἐπὶ τῆς ἥβης καὶ τῆς κεφαλῆς. φανερόν δ' ἐστίν· καὶ γὰρ ὅσα μῆκος ἔχει τῶν τριχωμάτων, ὥς τὸ πολὺ ἐστὶ τὰ μὲν πρὸς τῷ σώματι μελάντερα, τὰ δὲ πρὸς τοῖς ἄκροις ξανθότερα. καὶ αἱ μὲν τῶν προβάτων καὶ ἵππων καὶ ἀνθρώπων, διὰ τὸ τὴν τροφήν ἐλαχίστην αὐτοῖς ἐπὶ τούτους φέρεσθαι τοὺς τόπους, καὶ καταξηραίνεσθαι

ταχέως. γίνονται δὲ καὶ τὰ πτερώματα τῶν μελάνων ὀρνίθων τὰ μὲν πρὸς τῷ σώματι μελάντερα πάντων, τὰ δὲ πρὸς τοῖς ἄκροις ξανθότερα. τὸν αὐτὸν δὲ τρόπον τοῦτον καὶ τὰ περὶ τὸν τράχηλον, καὶ ὅλως ὅσα βραχεῖαν τὴν τροφήν λαμβάνει. δῆλον δέ· καὶ γὰρ πρὸ τῆς πολιώσεως ἅπαντα τὰ τριχώματα μεταβάλλει καὶ γίνεται πυρρὰ διὰ τὸ πάλιν τὴν τροφήν ὑπολείπουσαν καταξηραίνεσθαι ταχέως. τὸ δὲ τελευταῖον λευκά, πρότερον ἢ μελανθῆναι τὸ ὑγρὸν, τῆς τροφῆς ἐν αὐτοῖς ἐκπεττομένης. μάλιστα δὲ τοῦτο ἐπὶ τῶν ὑποζυγίων φανερόν ἐστιν· πάντων γὰρ τὰ τριχώματα γίνεται λευκά. τῶν γὰρ τόπων οὐ δυναμένων ὁμοίως ἐπισπᾶσθαι τὴν τροφήν διὰ τὴν ἀσθένειαν τὴν τοῦ θερμοῦ, ταχέως καταξηραίνόμενον τὸ ὑγρὸν γίνεται λευκόν. καὶ τὰ περὶ τοὺς κροτάφους μάλιστα πάντων πολιοῦνται, καὶ ὅλως περὶ τοὺς ἀσθενεῖς καὶ πεπονηκότας τῶν τόπων. παρὸ καὶ παρὰ πάντα μάλιστα εἰς τοῦτο τὸ χρῶμα μεταβάλλει, ὅταν τὴν φύσιν παραλλάξῃ τὴν οἰκείαν. καὶ γὰρ λαγῶς ἤδη γέγονε λευκός, καὶ μέλας δέ ποτε ἐφῆνε καὶ ἔλαφος καὶ ἄρκτος, ὁμοίως δὲ τούτοις καὶ ὄρτυξ καὶ πέρδιξ καὶ χελιδών. ὅταν γὰρ ἀσθενήσωσι τῇ γενέσει, πάντα τὰ τοιαῦτα διὰ τὴν ὀλιγότητα τῆς τροφῆς πρὸ ὥρας ἐκπεττόμενα γίνεται λευκά. οὕτως καὶ τὰ τῶν παίδων εὐθὺς καὶ τὰς κεφαλὰς ἴσχει λευκάς καὶ τὰ βλέφαρα καὶ τὰς ὀφρῦς, ὥσπερ καὶ τῶν ἄλλων ἐκάστῳ πρὸς τὸ γῆρας φανερῶς ἅπασι δι' ἀσθένειαν καὶ ὀλιγότητα [τῆς τροφῆς] συμβαίνει τὸ πάθος. διὸ [798b] καὶ τὰ πλεῖστα τῶν ζώων ἀσθενέστερα γίνεται τὰ λευκὰ τῶν μελάνων· πρότερον γὰρ ἢ τὴν αὔξησιν αὐτῶν τελειωθῆναι διὰ τὴν ὀλιγότητα τῆς τροφῆς ἐκπεττόμενα γίνεται λευκά, καθάπερ καὶ τῶν καρπῶν ὅσοι νενοσηκότες τυγχάνουσιν· καὶ γὰρ οὗτοι πολὺ μᾶλλον δι' ἀσθένειαν ἐκπέττονται. ὅσα δὲ γίνεται λευκά, πολὺ διαφέροντα ἐκ τῶν ἄλλων, οἷον ἵπποι καὶ κύνες. τὰ δὲ τοιαῦτα μεταβάλλει πάντα ἐκ τοῦ κατὰ φύσιν χρώματος εἰς τὸ λευκὸν διὰ τὴν εὐτροφίαν. τὸ γὰρ ὑγρὸν ἐν τοῖς τοιούτοις οὐ χρονιζόμενον, ἀλλ' ἀναλίσκόμενον διὰ τὴν αὔξησιν, οὐ γίνεται μέλαν. τὰ πλεῖστα γὰρ ἐστὶ τῶν τοιούτων ὑγρά καὶ εὐσαρκα διὰ τὴν εὐτροφίαν. διόπερ οὐδὲ μεταβάλλει τὰ λευκὰ τῶν τριχωμάτων. φανερόν δὲ τοῦτο ἐστίν· καὶ γὰρ τὰ μέλανα πρότερον τῆς πολιώσεως γίνεται πυρρὰ, ἤδη τῆς τροφῆς ἐν αὐτοῖς ὑπολειπούσης καὶ μᾶλλον ἐκπεττομένης, τὸ δὲ τελευταῖον λευκά. καίτοι τινὲς ὑπολαμβάνουσι μέλανα γίνεσθαι πάντα διὰ τὸ συγκάεσθαι τὴν τροφήν αὐτῶν ὑπὸ τοῦ θερμοῦ καθάπερ καὶ τὸ αἷμα

καὶ τῶν ἄλλων ἕκαστον, διαμαρτάνοντες. ἓνια γὰρ καὶ τῶν ζώων εὐθύς ἐν ἀρχῇ γίνεται μέλανα, οἷον κύνες καὶ αἶγες καὶ βόες, καὶ ὅλως ὅσων τὰ δέρματα καὶ τὰ τριχώματα κατ' ἀρχὰς ἔχει τροφήν, προΐουσης δὲ τῆς ἡλικίας ἥττον. καίτοι γε οὐκ ἔχρην, ἀλλὰ πάντων ἔδει καὶ τὰ τριχώματα μελαίνεσθαι κατὰ τὴν ἀκμὴν, καθ' ὃν ἂν χρόνον μάλιστα αὐτῶν ἰσχύη καὶ τὸ θερμόν, καὶ μᾶλλον ἅπαντα πολιοῦσθαι κατ' ἀρχάς. πολὺ γὰρ ἀπάντων ἀπὸ πρώτης ἀσθενέστερόν τι γίνεται τὸ θερμόν ἢ καθ' ὃν χρόνον ἄρχεται τὰ τριχώματα αὐτῶν λευκαίνεσθαι. φανερόν δὲ τοῦτο ἐστὶ καὶ ἐπὶ τῶν λευκῶν, ἓνια μὲν γὰρ εὐθύς ἴσχει τὸ χρῶμα λευκότετον, ὅσα καὶ τούτων πλείστην ἔχει κατ' ἀρχὰς τροφήν, καὶ μὴ πρὸ ὥρας ἐν αὐτῇ καταξηραίνεται τὸ ὑγρόν· προΐουσης δὲ τῆς ἡλικίας ξανθά, τροφῆς αὐτοῖς ἐλάττονος ὕστερον ἐπιρρεούσης. τὰ δὲ ἐν ἀρχῇ μὲν γίνεται ξανθά, κατὰ δὲ τὴν ἀκμὴν λευκότετα, [799a] καθάπερ καὶ τῶν ὀρνίθων μεταβάλλουσι τὰ χρώματα πάλιν τῆς τροφῆς ἐν αὐτοῖς ὑπολειπούσης. δηλοῖ δέ· πάντα γὰρ αὐτὰ γίνεται ξανθά καὶ περὶ τὸν τράχηλον, καὶ ὅλως ὅσα σπανίζει τροφῆς τῆς ἐν αὐτοῖς ὑπολειπούσης. δηλον δέ· ὥσπερ γὰρ καὶ τὸ πυρρὸν εἰς τὸ μέλαν μεταβάλλει καὶ τὸ μέλαν πάλιν εἰς τὸ πυρρόν, οὕτω καὶ τὸ λευκὸν εἰς τὸ ξανθόν. συμβαίνει δὲ τοῦτο καὶ ἐπὶ τῶν φυτῶν· ἓνια γὰρ ἐκ τῆς ὑστέρας πέψεως ἀνατρέχει πάλιν ἐπὶ τὴν προτέραν. μάλιστα δὲ τοῦτο καὶ ἐπὶ τῆς ροιᾶς φανερόν ἐστιν. τὸ μὲν γὰρ ἐξ ἀρχῆς οἱ κόκκοι γίνονται φοινικοῖ, καὶ τὰ φύλλα, δι' ὀλιγότητα τῆς τροφῆς ἐκπεττομένης· ὕστερον δὲ πάλιν μεταβάλλουσιν εἰς τὸ ποῶδες χρῶμα, πολλῆς τροφῆς ἐπιρρεούσης καὶ τῆς πέψεως οὐχ ὁμοίως δυναμένης κρατεῖν· τὸ τελευταῖον δὲ πεττομένης ἤδη τῆς τροφῆς πάλιν γίνεται τὸ χρῶμα φοινικιοῦν. καθόλου δὲ εἰπεῖν καὶ περὶ τῶν ἄλλων τριχωμάτων καὶ πτερωμάτων, ἅπαντα λαμβάνει τὰς μεταβολάς, οἷς μὲν, καθάπερ εἴρηται, τῆς τροφῆς ἐν αὐτοῖς ὑπολειπούσης, οἷς δὲ τοῖναντίον πλεοναζούσης. διόπερ ἄλλα κατ' ἄλλους χρόνους τῆς ἡλικίας καὶ λευκότετα καὶ μελάντατα γίνεται τῶν τριχωμάτων, ἐπεὶ [799b] καὶ τῶν κοράκων τὰ πτερώματα τὸ τελευταῖον εἰς τὸ ξανθὸν χρῶμα μεταβάλλει, τῆς τροφῆς ἐν αὐτοῖς ὑπολειπούσης. τῶν δὲ τριχωμάτων οὐδὲν οὔτε φοινικιοῦν οὔθ' ἄλουργές οὔτε πράσινον οὔτε ἄλλην οὐδεμίαν ἔχον τοιαύτην γίνεται χροάν, διὰ τὸ πάντα τὰ τοιαῦτα χρώματα γίνεσθαι μιγνυμένων αὐτοῖς τῶν τοῦ ἡλίου αὐγῶν, ἔτι δὲ τῶν τριχωμάτων ἀπάντων τῶν ὑγρῶν

ἐντὸς τῆς σαρκὸς συμβαίνειν τὰς μεταβολάς, καὶ μηδεμίαν αὐτὰ λαμβάνειν μίξιν. δῆλον δ' ἐστίν· καὶ γὰρ τῶν πτερωμάτων τὸ μὲν ἐξ ἀρχῆς οὐδὲν γίνεται τῷ χρώματι τοιοῦτον, ἀλλὰ καὶ τὰ ποικίλα τῶν ὀρνέων πάνθ' ὥς εἰπεῖν μέλανα, οἷον ὃ τε ταῶς καὶ ἡ περιστερὰ καὶ ἡ χελιδὼν· ὕστερον δὲ λαμβάνει πάσας τὰς τοιαύτας ποικιλίας, ἥδη τῆς πέψεως αὐτῶν ἔξω τοῦ σώματος γιγνομένης, ἔν τε τοῖς πτερώμασι καὶ τοῖς καλαίοις· ὥστε συμβαίνει, καθάπερ καὶ ἐπὶ τῶν φυτῶν, καὶ τούτων ἔξω τοῦ σώματος γίγνεσθαι τὴν τῶν χρωμάτων πέψιν. διὸ καὶ τὰ λοιπὰ τῶν ζώων, τὰ τ' ἔνυδρα καὶ τὰ ἔρπετα καὶ τὰ κογχύλια, παντοδαπὰς ἴσχει χρωμάτων μορφάς, πολλῆς καὶ τούτοις τῆς πέψεως γινομένης. τὴν μὲν οὖν περὶ τὰ χρώματα θεωρίαν μάλιστ' ἂν τις ἐκ τῶν εἰρημένων δύναιτο συνιδεῖν.

[800a] Τὰς δὲ φωνὰς ἀπάσας συμβαίνει γίνεσθαι καὶ τοὺς ψόφους ἢ τῶν σωμάτων ἢ τοῦ ἀέρος πρὸς τὰ σώματα προσπίπτοντος, οὐ τῷ τὸν ἀέρα σχηματίζεσθαι, καθάπερ οἶονταί τινες, ἀλλὰ τῷ κινεῖσθαι παραπλησίως αὐτὸν συστελλόμενον καὶ ἐκτεινόμενον καὶ καταλαμβάνομενον, ἔτι δὲ συγκρούοντα διὰ τὰς τοῦ πνεύματος καὶ τῶν χορδῶν γιγνομένας πληγὰς. ὅταν γὰρ τὸν ἐφεξῆς ἀέρα πλήξῃ τὸ πνεῦμα τὸ ἐμπίπτον αὐτῷ, ὃ ἤρᾳ ἤδη φέρεται βία, τὸν ἐχόμενον αὐτοῦ προωθῶν ὁμοίως, ὥστε πάντῃ τὴν φωνὴν διατείνειν τὴν αὐτήν, ἐφ' ὅσον συμβαίνει γίνεσθαι καὶ τοῦ ἀέρος τὴν κίνησιν. διαχεῖται γὰρ ἐπὶ πλέονα ἢ βία τῆς κινήσεως αὐτοῦ γιγνομένης, ὥσπερ καὶ τὰ πνεύματα τὰ ἀπὸ τῶν ποταμῶν καὶ ἀπὸ τῆς χώρας ἀποπνέοντα. τῶν δὲ φωνῶν τυφλαὶ μὲν εἰσι καὶ νεφώδεις ὅσαι τυγχάνουσιν αὐτοῦ καταπεπνιγμένοι· λαμπραὶ δὲ οὗσαι πόρρω διατείνουσι, καὶ πάντα πληροῦσι τὸν συνεχῆ τόπον. ἀναπνέομεν δὲ τὸν μὲν ἀέρα πάντες τὸν αὐτόν, τὸ δὲ πνεῦμα καὶ τὰς φωνὰς ἐκπέμπομεν ἀλλοίᾳς διὰ τὰς τῶν ὑποκειμένων ἀγγείων διαφοράς, δι' ὧν ἐκάστου τὸ πνεῦμα περαιούται [τὰ] πρὸς τὸν ἔξω τόπον. ταῦτα δὲ ἐστὶν ἢ τε ἀρτηρία καὶ ὁ πνεύμων καὶ τὸ στόμα. πλείστην μὲν οὖν διαφορὰν ἀπεργάζονται τῆς φωνῆς αἱ τε τοῦ ἀέρος πληγαὶ καὶ οἱ τοῦ στόματος σχηματισμοί. φανερόν δ' ἐστίν· καὶ γὰρ τῶν φθόγγων αἱ διαφοραὶ πᾶσαι γίνονται διὰ ταύτην τὴν αἰτίαν, καὶ τοὺς αὐτοὺς ὁρῶμεν μιμουμένους καὶ ἵππων φωνὰς καὶ βατράχων καὶ ἀηδόνων καὶ γεράνων καὶ τῶν ἄλλων ζώων σχεδὸν ἀπάντων, τῷ αὐτῷ χρωμένους πνεύματι καὶ ἀρτηρία, παρὰ τὸν ἀέρα διαφόρως ἐκπέμπειν αὐτοὺς ἐκ τοῦ στόματος. πολλὰ δὲ καὶ τῶν ὀρνέων, ὅταν ἀκούσωσι, μιμοῦνται τὰς τῶν ἄλλων φωνὰς διὰ τὴν εἰρημένην αἰτίαν. ὁ δὲ πνεύμων ὅταν ᾖ μικρὸς καὶ πυκνὸς καὶ σκληρὸς, οὔτε δέχεσθαι τὸν ἀέρα δύναται πολὺν εἰς αὐτόν οὔτε ἐκπέμπειν πάλιν ἔξω, οὐδὲ τὴν πληγὴν ἰσχυρὰν οὐδὲ εὖρωστον ποιεῖσθαι τὴν τοῦ πνεύματος. διὰ γὰρ τὸ εἶναι σκληρὸς καὶ πυκνὸς καὶ συνδεδεμένος

οὐ δύναται λαμβάνειν τὴν διαστολὴν ἐπὶ πολὺν τόπον, οὐδὲ πάλιν ἐκ πολλοῦ διαστήματος συνάγων [800b] ἑαυτὸν ἐκθλίβειν βίᾳ τὸ πνεῦμα, καθάπερ οὐδ' ἡμεῖς ταῖς φύσιν, ὅταν ὥσι σκληραὶ καὶ μήτε διαστελλεσθαι μήτε πιέζεσθαι δύνωνται ῥαδίως. τοῦτο γὰρ ἐστὶ τὸ ποιοῦν τὴν τοῦ πνεύματος πληγὴν εὐρωστον, ὅταν ὁ πνεύμων ἐκ πολλοῦ διαστήματος συνάγων αὐτὸν ἐκθλίβῃ τὸν ἀέρα βιαίως. δηλὸν δὲ τοῦτ' ἐστίν· οὐδὲ γὰρ τῶν ἄλλων μορίων οὐθὲν ἐκ μικρᾶς ἀποστάσεως δύναται ποιεῖσθαι τὴν πληγὴν ἰσχυράν. οὔτε γὰρ τῷ σκέλει δυνατόν ἐστιν οὔτε τῇ χειρὶ πατάξαι σφοδρῶς οὐδὲ ἀπορριῖναι πόρρω τὸ πληγόν, ἐὰν μὴ τις αὐτῶν ἑκατέρω ἐκ πολλοῦ λάβῃ τῆς πληγῆς τὴν ἀπόστασιν. εἰ δὲ μή, σκληρὰ μὲν ἡ πληγὴ γίνεταί διὰ τὴν συντονίαν, ἐκβιάζεσθαι δὲ οὐ δύναται πόρρω τὸ πληγόν, ἐπεὶ οὔθ' οἱ καταπέλται μακρὰν δύνανται βάλλειν οὔθ' ἡ σφενδόνη οὔτε τόξον, ἂν ἡ σκληρὸν καὶ μὴ δύνηται κάμπτεσθαι, μηδὲ τὴν ἀναγωγὴν ἢ νευρὰ λαμβάνειν ἐπὶ πολὺν τόπον. ἐὰν δὲ μέγας ὁ πνεύμων ἡ καὶ μαλακὸς καὶ εὐτονος, πολὺν τὸν ἀέρα δύναται δέχεσθαι, καὶ τοῦτον ἐκπέμπειν πάλιν, ταμιευόμενος ὡς ἂν βούληται διὰ τὴν μαλακότητα καὶ διὰ τὸ ῥαδίως αὐτὸν συστέλλειν. ἡ δὲ ἀρτηρία μακρὰ μὲν ὅταν ἡ καὶ στενὴ, χαλεπῶς ἐκπέμπουσιν ἔξω τὴν φωνὴν καὶ μετὰ βίας πολλῆς διὰ τὸ μῆκος τῆς τοῦ πνεύματος φορᾶς. φανερόν δ' ἐστίν· πάντα γὰρ τὰ τοὺς τραχήλους ἔχοντα μακροὺς φθέγγονται βιαίως, οἷον οἱ χῆνες καὶ γέρανοι καὶ ἀλεκτρυόνες. μᾶλλον δὲ τοῦτο καταφανές ἐστιν ἐπὶ τῶν αὐτῶν· πάντες γὰρ χαλεπῶς πληροῦσι τοὺς βόμβυκας καὶ μετὰ συντονίας πολλῆς διὰ τὸ μῆκος τῆς ἀποστάσεως. ἔτι δὲ τὸ πνεῦμα διὰ τὴν στενοχωρίαν ὅταν ἐντὸς θλιβόμενον εἰς τὸν ἔξω τόπον ἐκπέσῃ, παραχρῆμα διαχεῖται καὶ σκεδάννυται, καθάπερ καὶ τὰ ρεύματα φερόμενα διὰ τῶν εὐρίπων, ὥστε μὴ δύνασθαι τὴν φωνὴν συμμένειν μηδὲ διατείνειν ἐπὶ πολὺν τόπον. ἅμα δὲ καὶ δυσταμίευτον ἀνάγκη πάντων τῶν τοιούτων εἶναι τὸ πνεῦμα καὶ μὴ ῥαδίως ὑπηρετεῖν. ὅσων δὲ ἐστὶ μέγα τὸ διάστημα τῆς ἀρτηρίας, τῶν δὲ τοιούτων ἔξω μὲν περαιουῖσθαι συμβαίνει τὸ πνεῦμα ῥαδίως, ἐντὸς δὲ φερόμενον διαχεῖσθαι διὰ τὴν εὐρυχωρίαν, καὶ τὴν φωνὴν γίνεσθαι κενὴν καὶ μὴ συνεστῶσαν, ἔτι δὲ [801a] μὴ δύνασθαι διαιρεῖσθαι τῷ πνεύματι τοὺς τοιούτους διὰ τὸ μὴ συνερείδεσθαι τὴν ἀρτηρίαν αὐτῶν. ὅσων δ' ἐστὶ ἀνωμάλως καὶ μὴ πάντοθεν ἔχει τὴν διάστασιν ὁμοίαν, τούτους ἀναγκαῖον ἀπασῶν μετέχειν τῶν δυσχερειῶν. καὶ γὰρ ἀνωμάλως αὐτοῖς ἀνάγκη τὸ πνεῦμα ὑπηρετεῖν

καὶ θλίβεσθαι καὶ καθ' ἕτερον τόπον διαχεῖσθαι πάλιν. βραχείας δὲ τῆς ἀρτηρίας οὕσης ταχὺ μὲν ἀνάγκη τὸ πνεῦμα ἐκπέμπειν καὶ τὴν πληγὴν ἰσχυροτέραν γίνεσθαι τὴν τοῦ ἀέρος, πάντας δὲ τοὺς τοιούτους ὀξύτερον φωνεῖν διὰ τὸ τάχος τῆς τοῦ πνεύματος φορᾶς. οὐ μόνον δὲ συμβαίνει τὰς τῶν ἀγγείων διαφοράς, ἀλλὰ καὶ τὰ πάθη πάντα τὰς φωνὰς ἀλλοιοῦν. ὅταν μὲν γὰρ ὥσιν ὑγρασίας πλήρη πολλῆς ὅ τε πνεύμων καὶ ἡ ἀρτηρία, διασπᾶται τὸ πνεῦμα καὶ οὐ δύναται περαιοῦσθαι εἰς τὸν ἔξω τόπον συνεχῶς διὰ τὸ προσκόπτειν καὶ γίνεσθαι παχὺν καὶ ὑγρὸν καὶ δυσκίνητον, καθάπερ καὶ περὶ τοὺς κατάρρους καὶ τὰς μέθας. ἐὰν δὲ ξηρὸν ᾖ τὸ πνεῦμα παντελῶς, σκληροτέρα ἡ φωνὴ γίγνεται καὶ διεσπασμένη· συνέχει γὰρ ἡ νοτὶς, ὅταν ᾖ λεπτή, τὸν ἀέρα, καὶ ποιεῖ τινὰ τῆς φωνῆς ἀπλότητα. τῶν μὲν οὖν ἀγγείων αἱ διαφοραὶ καὶ τῶν παθῶν τῶν περὶ αὐτὰ γιγνομένων τοιαύτας ἕκασται τὰς φωνὰς ἀποτελοῦσιν. αἱ δὲ φωναὶ δοκοῦσι μὲν εἶναι καθ' οὓς ἂν ἕκασται γίνωνται τόπους, ἀκούομεν δὲ πασῶν αὐτῶν, ὅταν ἡμῖν προσπέσωσι πρὸς τὴν ἀκοήν. ὁ γὰρ ὡσθὲς ὑπὸ τῆς πληγῆς ἀῆρ μέχρι μὲν τινος φέρεται συνεχῆς, ἔπειτα κατὰ μικρὸν αἰὶ διακινεῖται μᾶλλον, καὶ τούτῳ γινώσκομεν πάντας τοὺς ψόφους καὶ τοὺς πόρρω γιγνομένους καὶ τοὺς ἐγγύς. δῆλον δ' ἐστίν· ὅταν γάρ τις λαβὼν κέραμον ἢ αὐλὸν ἢ σάλπιγγα, προσθεῖς τε ἑτέρῳ πρὸς τὴν ἀκοήν, διὰ τούτων λαλῇ, πᾶσαι δοκοῦσιν αἱ φωναὶ παντελῶς εἶναι πλησίον τῆς ἀκοῆς διὰ τὸ μὴ σκεδάννυσθαι τὸν ἀέρα φερόμενον, ἀλλὰ διατηρεῖσθαι τὴν φωνὴν ὁμοίαν ὑπὸ τοῦ περιέχοντος ὀργάνου. καθάπερ οὖν καὶ ἐπὶ τῆς γραφῆς, ὅταν τις τοῖς χρώμασι τὸ μὲν ὅμοιον ποιήσῃ τῷ πόρρω τὸ δὲ τῷ πλησίον, τὸ μὲν ἡμῖν ἀνακεχωρηκέναι δοκεῖ τῆς γραφῆς τὸ δὲ προέχειν, ἀμφοτέρων αὐτῶν ὄντων ἐπὶ τῆς αὐτῆς ἐπιφανείας. οὕτω καὶ ἐπὶ τῶν ψόφων καὶ τῆς φωνῆς, ὅταν ἡ μὲν ἤδη διαλελυμένη προσπίπτῃ πρὸς τὴν ἀκοήν ἡ δὲ τις συνεχῆς, ἀμφοτέρων αὐτῶν ἀφικνουμένων πρὸς τὸν αὐτὸν τόπον, ἡ μὲν ἀφεστηκέναι πόρρω δοκεῖ τῆς ἀκοῆς ἡ δ' εἶναι σύνεγγυς, διὰ τὸ τὴν μέντοι πόρρωθεν [801b] ὁμοίαν εἶναι, τὴν δὲ πλησίον. σαφεῖς δὲ μάλιστα αἱ φωναὶ γίνονται παρὰ τὴν ἀκρίβειαν τὴν τῶν φθόγων. ἀδύνατον γὰρ μὴ τελέως τούτων διηρθρωμένων τὰς φωνὰς εἶναι σαφεῖς, καθάπερ καὶ τὰς τῶν δακτυλίων σφραγίδας, ὅταν μὴ διατυπωθῶσιν ἀκριβῶς. διόπερ οὔτε τὰ παιδία δύνανται διαλέγεσθαι σαφῶς, οὔτε οἱ μεθύοντες, οὔτε οἱ γέροντες, οὔθ' ὅσοι φύσει τραυλοὶ τυγχάνουσιν ὄντες, οὔθ' ὅλως ὅσων εἰσὶν αἱ γλῶτται καὶ τὰ στόματα

δυσκίνητα. ὥσπερ γὰρ καὶ τὰ χαλκεῖα καὶ τὰ κέρατα συνηχοῦντα ποιεῖ τοὺς ἀπὸ τῶν ὀργάνων φθόγγους σαφεστέρους, οὕτως καὶ ἐπὶ τῆς διαλέκτου πολλὴν ἀσάφειαν ἀπεργάζεται τὰ ἐκπίπτοντα τῶν πνευμάτων ἐκ τοῦ στόματος, ὅταν μὴ διατυπωθῶσιν ὁμοίως. οὐ μόνον δὲ ἑαυτῶν τινὰ παρεμφαίνουσιν ἀσάφειαν, ἀλλὰ καὶ τοὺς διηρθρωμένους τῶν φθόγγων ἐμποδίζουσιν, ἀνομοίας αὐτῶν γιγνομένης τῆς περὶ τὴν ἀκοὴν κινήσεως. διὸ καὶ μᾶλλον ἐνὸς ἀκούοντες συνίεμεν ἢ πολλῶν ἅμα ταῦτὰ λεγόντων, καθάπερ καὶ ἐπὶ τῶν χορδῶν· καὶ πολὺ ἦττον, ὅταν προσανλῇ τις ἅμα καὶ κιθαρίζῃ, διὰ τὸ συγχέσθαι τὰς φωνὰς ὑπὸ τῶν ἐτέρων. οὐχ ἥκιστα δὲ τοῦτο ἐπὶ τῶν συμφωνιῶν φανερόν ἐστιν· ἀμφοτέρους γὰρ ἀποκρύπτεσθαι τοὺς ἤχους συμβαίνει ὑπ' ἀλλήλων. ἀσαφεῖς μὲν οὖν φωναὶ γίνονται διὰ τὰς εἰρημένας αἰτίας, λαμπραὶ δὲ γίνονται καθάπερ ἐπὶ τῶν χρωμάτων· καὶ γὰρ ἐκεῖ τὰ μάλιστα δυνάμενα τὰς ὀψεις κινεῖν, ταῦτα εἶναι συμβαίνει τῶν χρωμάτων λαμπρότατα. τὸν αὐτὸν τρόπον τῶν φωνῶν ταύτας ὑποληπτέον εἶναι λαμπροτάτας, ὅσαι μάλιστα δύνανται προσπίπτουσαι κινεῖν τὴν ἀκοήν. τοιαῦται δὲ εἰσιν αἱ σαφεῖς καὶ πυκναὶ καὶ καθαραὶ καὶ πόρρω δυνάμεναι διατείνειν· καὶ γὰρ ἐν τοῖς ἄλλοις αἰσθητοῖς ἅπασιν τὰ ἰσχυρότερα καὶ πυκνότερα καὶ καθαρώτερα σαφεστέρας ποιεῖ τὰς αἰσθήσεις. δῆλον δέ· τὸ γὰρ τελευταῖον αἱ φωναὶ πᾶσαι γίνονται κωφαί, τοῦ ἀέρος ἤδη διαχεομένου. δῆλον δ' ἐστὶ κατὰ τῶν αὐλῶν. τὰ γὰρ ἔχοντα τῶν δευτέρων τὰς γλώττας πλαγίας μαλακωτέραν μὲν ἀποδίδωσι τὴν φωνήν, οὐχ ὁμοίως δὲ λαμπράν· τὸ γὰρ πνεῦμα φερόμενον εὐθέως εἰς εὐρυχωρίαν ἐμπίπτει, καὶ οὐκέτι φέρεται σύντονον οὐδὲ συνεστηκός, ἀλλὰ διεσκεδασμένον. ἐν δὲ ταῖς σκληροτέραις γλώτταις ἢ φωνὴ γίνεται σκληροτέρα καὶ λαμπροτέρα, ἂν πίεσις τις αὐτὰς μᾶλλον τοῖς χεῖλεσι, διὰ τὸ φέρεσθαι τὸ πνεῦμα βιαίότερον. αἱ μὲν οὖν λαμπραὶ τῶν φωνῶν γίνονται διὰ τὰς εἰρημένας αἰτίας· [802a] παρὸ καὶ δοκοῦσιν οὐ χεῖρους εἶναι τῶν λευκῶν αἱ καλούμεναι φαιαί. πρὸς γὰρ τὰ πάθη καὶ τὰς πρεσβυτέρας ἡλικίας μᾶλλον ἀρμόττουσιν αἱ τραχύτεραι καὶ μικρὸν ὑποσυγκεχυμένα καὶ μὴ λίαν ἔχουσαι τὸ λαμπρὸν ἐκφανές. ἅμα δὲ καὶ διὰ τὴν συντονίαν οὐχ ὁμοίως εἰσὶν εὐπειθεῖς. τὸ γὰρ βίᾳ φερόμενον δυσταμίευτον. οὔτε γὰρ ἐπιτεῖναι ῥάδιον, ὥς βούλεται τις, οὔτε ἀνιέναι. ἐπὶ δὲ τῶν αὐλῶν γίνονται αἱ φωναὶ λαμπραί, καὶ τῶν ἄλλων ὀργάνων, ὅταν τὸ ἐκπίπτον πνεῦμα πυκνὸν ᾗ καὶ σύντονον. ἀνάγκη γὰρ καὶ τοῦ ἔξωθεν

ἀέρος τοιαύτας γίνεσθαι τὰς πληγὰς, καὶ μάλιστα τὰς φωνὰς οὕτω διαπέμπεσθαι συνεστώσας πρὸς τὴν ἀκοήν, ὥσπερ καὶ τὰς ὁσμὰς καὶ τὸ φῶς καὶ τὰς θερμότητας. καὶ γὰρ πάντα ταῦτα ἀραιότερα φαινόμενα πρὸς τὴν αἴσθησιν ἀσημότερα γίνεται, καθάπερ καὶ οἱ χυλοὶ κραθέντες τῷ ὕδατι καὶ ἑτέροις χυλοῖς. τὸ γὰρ ἑαυτοῦ παρέχον αἴσθησιν ἀσαφεῖς ἐκάστω ποιεῖ τὰς δυνάμεις. ἀπὸ δὲ τῶν ἄλλων ὀργάνων οἱ τῶν κεράτων ἦχοι πυκνοὶ καὶ συνεχεῖς πρὸς τὸν ἀέρα προσπίπτοντες ποιοῦσι τὰς φωνὰς ἀμαυράς· διὸ δεῖ τὸ κέρας τὴν φύσιν ἔχειν τῆς αὐξήσεως ὁμαλὴν καὶ λείαν καὶ μὴ ταχέως ἐκδεδραμηκυῖαν. ἀνάγκη γὰρ μαλακώτερα καὶ χυνότερα γίνεσθαι τὰ τοιαῦτα τῶν κεράτων, ὥστε τοὺς ἦχους διασπᾶσθαι καὶ μὴ συνεχεῖς ἐκπίπτειν δι' αὐτῶν μηδὲ γεγωνεῖν ὁμοίως διὰ τὴν μαλακότητα καὶ τὴν ἀραιότητα τῶν πόρων. μηδὲ πάλιν εἶναι δυσανξὴ τὴν φύσιν, μηδὲ τὴν σύμφυσιν ἔχειν πυκνὴν καὶ σκληρὰν καὶ δύσφορον· καθ' ὃ τι γὰρ ἂν προσκόπη φερόμενος ὁ ἦχος, αὐτοῦ λαμβάνει τὴν κατάπαυσιν καὶ οὐκέτι περαιοῦται πρὸς τὸν ἔξω τόπον, ὥστε κωφούς καὶ ἀνωμάλους ἐκπίπτειν τοὺς ἦχους ἐκ τῶν τοιούτων κεράτων. ὅτι δὲ ἡ φορὰ γίνεται κατὰ τὴν εὐθυπορίαν, φανερόν ἐστιν ἐπὶ τῶν ἰστών καὶ ὅλως ἐπὶ τῶν ξύλων τῶν μεγάλων, ὅταν αὐτὰ βασανίζωσιν. ὅταν γὰρ κρούσωσιν ἐκ τοῦ ἑτέρου ἄκρου, κατὰ τὸ ἕτερον ὁ ἦχος φέρεται συνεχῆς, ἐὰν μὴ τι ἔχη σύντριμμα τὸ ξύλον· εἰ δὲ μὴ, μέχρι τούτου προελθὼν αὐτοῦ καταπαύεται διασπασθεῖς. περικάμπει δὲ καὶ τοὺς ὄζους, καὶ οὐ δυνατὸς δι' αὐτῶν εὐθυπορεῖν. κατάδηλον δὲ τοῦτό ἐστι καὶ ἐπὶ τῶν χαλκείων, ὅταν ῥινῶσι τὰς ἀπηρητημένας στολίδας τῶν ἀνδριάντων ἢ τὰ πετερίδια, τῷ συμμύειν· διὸ ῥοῖζον καὶ πολὺν ἦχον ἀφίᾳσι καὶ ψόφον. ἂν δέ τις αὐτὰ ταινία διαδήσῃ, παύεσθαι συμβαίνει τὸν ἦχον· ἔως γὰρ τούτου προελθὼν ὁ τρόμος, ὅταν προσκόπη πρὸς τὸ μαλακόν, αὐτοῦ ποιεῖται [802b] τὴν κατάπαυσιν. πολὺ δὲ καὶ ἡ ὀπτησις ἢ τῶν κεράτων συμβάλλεται καὶ πρὸς εὐφωνίαν. μᾶλλον μὲν γὰρ κατοπηθέντα παραπλήσιον τὸν ἦχον ἔχουσι τῷ κεράμῳ διὰ τὴν σκληρότητα καὶ τὴν σύγκαυσιν· ἐὰν δέ τις αὐτὰ καταδεέστερον ὀπτήσῃ, ἀπαλώτερον μὲν ἀφίᾳσι διὰ τὴν μαλακότητα τὸν ἦχον, οὐ δύναται δὲ γεγωνεῖν ὁμοίως. διὸ καὶ τὰς ἡλικίας ἐκλέγονται· τὰ μὲν γὰρ τῶν γερόντων ἐστὶ ξηρὰ καὶ πεπωρωμένα καὶ χαῦνα, τὰ δὲ τῶν νέων ἀπαλὰ παντελῶς καὶ πολλὴν ἔχοντα ἐν αὐτοῖς ὕγρασίαν. δεῖ δὲ εἶναι, καθάπερ εἴρηται, τὸ κέρας ξηρὸν καὶ πυκνὸν ὁμαλῶς καὶ εὐθύπορον καὶ λεῖον. οὕτω γὰρ ἂν

μάλιστα συμβαίνοι καὶ τοὺς ἤχους πυκνοὺς καὶ λείους καὶ ὁμαλοὺς φέρεσθαι δι' αὐτῶν, καὶ τοῦ ἔξωθεν ἀέρος τὰς πληγὰς γίνεσθαι τοιαύτας, ἐπεὶ καὶ τῶν χορδῶν εἰσὶν αἱ λειόταται βέλτισται καὶ τοῖς πᾶσιν ὁμαλώταται, καὶ τὴν κατεργασίαν ἔχουσι πάντοθεν ὁμοίαν, καὶ τὰς συμβολὰς ἀδήλους τὰς τῶν νεύρων· οὕτω γὰρ συμβαίνει καὶ ταύτας ποιεῖσθαι τὰς τοῦ ἀέρος πληγὰς ὁμοιοτάτας. δεῖ δὲ καὶ τῶν αὐλῶν εἶναι τὰς γλώττας πυκνὰς καὶ λείας καὶ ὁμαλὰς, ὅπως ἂν καὶ τὸ πνεῦμα διαπορεύηται δι' αὐτῶν λείον καὶ ὁμαλὸν καὶ μὴ διεσπασμένον. διὸ καὶ τὰ βεβρεγμένα τῶν ζευγῶν καὶ τὰ πεπωκότα τὸ σίαλον εὐφωνότερα γίνονται, τὰ δὲ ξηρὰ κακόφωνα. ὁ γὰρ ἀῆρ διὰ ὑγροῦ καὶ λείου φέρεται μαλακὸς καὶ ὁμαλός. δηλὸν δέ· καὶ γὰρ αὐτὸ τὸ πνεῦμα, ὅταν ἔχη νοτίδα, πολὺ ἤττον προσκόπτει πρὸς τὰ ζεύγη καὶ διασπᾶται· τὸ δὲ ξηρὸν μᾶλλον ἀντιλαμβάνεται καὶ τὴν πληγὴν ποιεῖται σκληροτέραν διὰ τὴν βίαν. αἱ μὲν οὖν διαφοραὶ τῶν ἤχων γίνονται διὰ τὰς εἰρημένας αἰτίας. σκληραὶ δ' εἰσὶ τῶν φωνῶν ὅσαι βιαίως πρὸς τὴν ἀκοὴν προσπίπτουσι· διὸ καὶ μάλιστα παρέχουσι τὸν τόνον. τοιαῦται δ' εἰσὶν αἱ δυσκινητότεραι καὶ μετὰ πλείστης φερόμεναι βίας· τὸ γὰρ ὑπεῖκον ταχέως οὐ δύναται τὴν πληγὴν ὑπομένειν, ἀλλ' ἀποπηδᾷ πρότερον. δηλὸν δέ· τὰ γὰρ ὑπέρογκα τῶν βελῶν βαιοτάτην φέρεται τὴν φορὰν, καὶ τὰ ρεύματα φερόμενα διὰ τῶν εὐρίπων· καὶ γὰρ ταῦτα γίνονται σφοδρότατα περὶ αὐτὰς τὰς στενοχωρίας οὐ δυνάμενα ταχέως ὑπεῖκειν, ἀλλὰ ὑπὸ πολλῆς ὠθούμενα βίας. ὁμοίως δὲ τοῦτο συμβαίνει καὶ περὶ τὰς φωνὰς καὶ τοὺς ψόφους. φανερόν δ' ἐστίν· πάντες γὰρ οἱ βίαιοι γίνονται σκληροί, καθάπερ καὶ τῶν κιβωτίων καὶ τῶν στροφέων, ὅταν ἀνοίγωνται βιαίως, καὶ τοῦ χαλκοῦ καὶ τοῦ σιδήρου. καὶ γὰρ ἀπὸ τῶν ἀκμόνων γίνεται σκληρὸς [803a] καὶ μαλακός, ὅταν ἐλαύνωσι κατεψυγμένον καὶ σκληρὸν ἤδη τὸν σίδηρον. ἔτι δὲ ἀπὸ τῆς ρίνης, ὅταν ρινῶσι καὶ χαράττωσι τὰ σιδήρια καὶ τοὺς πρίονας, ἐπεὶ καὶ τῶν βροντῶν αἱ βαιοτάται γίνονται σκληρόταται καὶ τῶν ὑδάτων τὰ καλούμενα ῥαγδαῖα τὴν βίαν. ἡ μὲν γὰρ ταχυτῆς τοῦ πνεύματος ποιεῖ τὴν φωνὴν ὀξεῖαν, ἡ δὲ βία σκληράν. διόπερ οὐ μόνον συμβαίνει τοὺς αὐτοὺς ὅτε μὲν ὀξύτεραν ὅτε δὲ βαρυτέραν, ἀλλὰ καὶ σκληροτέραν καὶ μαλακωτέραν. καίτοι τινὲς ὑπολαμβάνουσι διὰ τὴν σκληρότητα τῶν ἀρτηριῶν τὰς φωνὰς γίνεσθαι σκληράς, διαμαρτάνοντες· τοῦτο μὲν γὰρ βραχὺ τι συμβάλλεται παντελῶς, ἀλλ' ἡ τοῦ πνεύματος γιγνομένη πληγὴ

βιαίως ὑπὸ τοῦ πνεύμονος. ὥσπερ γὰρ καὶ τὰ σώματα τῶν μὲν ἐστὶν ὑγρὰ καὶ μαλακὰ τῶν δὲ σκληρὰ καὶ σύντονα, τὸν αὐτὸν τρόπον καὶ ὁ πνεύμων. διόπερ τῶν μὲν μαλακὸν ἐκπίπτει τὸ πνεῦμα, τῶν δὲ σκληρὸν καὶ βίαιον, ἐπεὶ διότι γε τὴν ἀρτηρίαν αὐτὴν μικρὰν τινα συμβαίνει παρέχεσθαι δύναμιν, ῥάδιον συνιδεῖν. οὐδεμία γὰρ ἐστὶν ἀρτηρία σκληρὰ τοῖς αὐλοῖς ὁμοίως· ἀλλ' οὐθὲν ἦττον δι' αὐτοῦ καὶ διὰ τούτων φερομένου τοῦ πνεύματος οἱ μὲν μαλακῶς αὐλοῦσιν οἱ δὲ σκληρῶς. δῆλον δὲ τοῦτ' ἐστὶ καὶ ἐπ' αὐτῆς τῆς αἰσθήσεως· καὶ γὰρ ἂν ἐπιτείνῃ τις τὸ πνεῦμα βιαιότερον, εὐθέως ἡ φωνὴ γίνεταί σκληροτέρα διὰ τὴν βίαν, κἂν ἡ μαλακωτέρα. τὸν αὐτὸν δὲ τρόπον καὶ ἐπὶ τῆς σάλπιγγος· διὸ καὶ πάντες, ὅταν κωμάζωσιν, ἀνιάσιν ἐν τῇ σάλπιγγι τὴν τοῦ πνεύματος συντονίαν, ὅπως ἂν ποιῶσι τὸν ἦχον ὡς μαλακώτατον. φανερόν δ' ἐστὶ καὶ ἐπὶ τῶν ὀργάνων. καὶ γὰρ αἱ κατεστραμμένοι χορδαί, καθάπερ εἴρηται, τὰς φωνὰς ποιοῦσι σκληροτέρας, καὶ τὰ κατωπημένα τῶν κεράτων. κἂν τις ἅπτηται τῶν χορδῶν ταῖς χερσὶ βιαίως καὶ μὴ μαλακῶς, ἀνάγκη καὶ τὴν ἀνταπόδοσιν αὐτὰς οὕτω πάλιν ποιεῖσθαι βιαιότεραν. αἱ δὲ ἦττον κατεστραμμένοι καὶ τὰ ὠμότερα τῶν κεράτων τὰς φωνὰς ποιεῖ μαλακωτέρας, καὶ τὰ μακρότερα τῶν ὀργάνων. αἱ γὰρ τοῦ ἀέρος πληγαὶ καὶ βραδύτεραι καὶ μαλακώτεραι γίνονται διὰ τὰ μήκη τῶν τόπων, αἱ δ' ἐπὶ τῶν βαρυτέρων σκληρόταται διὰ τὴν κατάτασιν τῶν χορδῶν. δῆλον δ' ἐστίν· καὶ γὰρ αὐτοῦ τοῦ ὀργάνου σκληροτέρας συμβαίνει γίνεσθαι τὰς φωνάς, ὅταν μὴ κατὰ μέσον τις ἅπτηται τῶν χορδῶν, διὰ τὸ μᾶλλον αὐτῶν τὰ πρὸς αὐτῷ τῷ ζυγῷ καὶ τῷ χορδοτόνῳ κατατετάσθαι. συμβαίνει δὲ καὶ τὰ ναρθήκινα τῶν ὀργάνων τὰς φωνὰς ἔχειν ἀπαλωτέρας· οἱ γὰρ ἦχοι [803b] πρὸς μαλακὸν προσπίπτοντες οὐχ ὁμοίως ἀποπηδῶσι μετὰ βίας. τραχύνεσθαι δὲ συμβαίνει τὰς φωνάς, ὅταν ἡ πληγὴ μὴ μία γένηται τοῦ ἀέρος παντός, ἀλλὰ πολλαχῇ κατὰ μικρὰ διεσπασμένη. καθ' αὐτὸ γὰρ ἕκαστον τῶν τοῦ ἀέρος μορίων προσπίπτει πρὸς τὴν ἀκοήν, ὡς ἂν ἀπὸ πληγῆς ἐτέρας ὅν, διεσπασμένην ποιεῖ τὴν αἴσθησιν, ὥστε τὴν μὲν διαλείπειν τὴν φωνήν, τὴν δὲ προσπίπτειν βιαιότερον, καὶ γίνεσθαι τὴν ἀφὴν τῆς ἀκοῆς ἀνομοίαν, ὥσπερ καὶ ὅταν τι τῶν τραχέων ἡμῖν προσπίπτῃ πρὸς τὸν χρῶτα. μάλιστα δὲ τοῦτο συμφανές ἐστὶν ἐπὶ τῆς ρίνης· διὰ γὰρ τὸ τὴν τοῦ ἀέρος πληγὴν ἅμα γίνεσθαι κατὰ μικρὰ καὶ πολλά, τραχεῖς οἱ ψόφοι προσπίπτουσιν ἀπ' αὐτῶν πρὸς τὴν ἀκοήν, καὶ μᾶλλον, ὅταν πρὸς

σκληρόν τι παρατρίβονται, καθάπερ καὶ ἐπὶ τῆς ἀφῆς· τὰ γὰρ σκληρὰ καὶ τραχέα βιαιότερον ποιεῖται τὴν αἴσθησιν. δῆλον δὲ τοῦτο ἐστὶ καὶ ἐπὶ τῶν ρευμάτων· τοῦ γὰρ ἐλαίου γίνεται πολὺ πάντων τῶν ὑγρῶν ὁ ψόφος ἀδηλότερος διὰ τὴν συνέχειαν τὴν τῶν μορίων. λεπταὶ δ' εἰσὶ τῶν φωνῶν, ὅταν ὀλίγον ᾗ τὸ πνεῦμα τὸ ἐκπίπτον. διὸ καὶ τῶν παιδίων γίνονται λεπταί, καὶ τῶν γυναικῶν καὶ τῶν εὐνούχων, ὁμοίως δὲ καὶ τῶν διαλελυμένων διὰ νόσον ἢ πόνον ἢ ἀτροφίαν· οὐ δύνανται γὰρ πολὺ τὸ πνεῦμα διὰ τὴν ἀσθένειαν ἐκπέμπειν. δῆλον δ' ἐστὶ καὶ ἐπὶ τῶν χορδῶν· ἀπὸ γὰρ τῶν λεπτῶν καὶ τὰ φωνία γίνεται λεπτὰ καὶ στενὰ καὶ τριχῶδη, διὰ τὸ καὶ τοῦ ἀέρος τὴν πληγὴν γίνεσθαι κατὰ στενόν. οἷας γὰρ ἂν τὰς ἀρχὰς ἔχωσι τῆς κινήσεως αἱ τοῦ ἀέρος πληγαί, τοιαύτας καὶ τὰς φωνὰς συμβαίνει γίνεσθαι προσπιπτούσας πρὸς τὴν ἀκοήν, οἷον ἀραιὰς ἢ πυκνάς, ἢ μαλακὰς ἢ σκληράς, ἢ λεπτὰς ἢ παχεῖας. αἰ γὰρ ὁ ἕτερος ἀῆρ τὸν ἕτερον κινῶν ὡσαύτως ποιεῖ τὴν φωνὴν ἅπασαν ὁμοίαν, καθάπερ ἔχει καὶ ἐπὶ τῆς ὀξύτητος καὶ τῆς βαρύτητος· καὶ γὰρ τὰ τάχῃ τὰ τῆς πληγῆς τὰ ἕτερα τοῖς ἐτέροις συνακολουθοῦντα διαφυλάττει τὰς φωνὰς ταῖς ἀρχαῖς ὁμοίως. αἱ δὲ πληγαὶ γίνονται μὲν τοῦ ἀέρος ὑπὸ τῶν χορδῶν πολλαὶ καὶ κεχωρισμέναι, διὰ δὲ μικρότητα τοῦ μεταξὺ χρόνου τῆς ἀκοῆς οὐ δυναμένης συναισθάνεσθαι τὰς διαλείψεις, μία καὶ συνεχὴς ἡμῖν ἡ φωνὴ φαίνεται, καθάπερ καὶ ἐπὶ τῶν χρωμάτων· καὶ γὰρ τούτων τὰ διεστηκότα δοκεῖ πολλάκις ἡμῖν συνάπτειν ἀλλήλοις, ὅταν φέρονται ταχέως. τὸ δὲ αὐτὸ συμβαίνει τοῦτο καὶ περὶ τὰς συμφωνίας. διὰ γὰρ τὸ περισυγκαταλαμβάνεσθαι τοὺς ἐτέρους ἤχους ὑπὸ τῶν ἐτέρων, καὶ γίνεσθαι τὰς καταπαύσεις αὐτῶν ἅμα, [804a] λανθάνουσιν ἡμᾶς αἱ μεταξὺ γιγνόμεναι φωναί. πλεονάκις μὲν γὰρ ἐν πάσαις ταῖς συμφωνίαις ὑπὸ τῶν ὀξυτέρων φθόγγων αἱ τοῦ ἀέρος γίνονται πληγαὶ διὰ τὸ τάχος τῆς κινήσεως· τὸν δὲ τελευταῖον τῶν ἤχων ἅμα συμβαίνει προσπίπτειν ἡμῖν πρὸς τὴν ἀκοήν καὶ τὸν ἀπὸ τῆς βραδυτέρας γιγνόμενον. ὥστε τῆς ἀκοῆς οὐ δυναμένης αἰσθάνεσθαι, καθάπερ εἴρηται, τὰς μεταξὺ φωνὰς, ἅμα δοκοῦμεν ἀμφοτέρων τῶν φθόγγων ἀκούειν συνεχῶς. παχεῖαι δ' εἰσὶ τῶν φωνῶν τοῦναντίον, ὅταν ᾗ τὸ πνεῦμα πολὺ καὶ ἀθρόον ἐκπίπτον· διὸ καὶ τῶν ἀνδρῶν εἰσὶ παχύτεραι καὶ τῶν τελείων αὐλῶν, καὶ μᾶλλον ὅταν πληρώσῃ τις αὐτοὺς τοῦ πνεύματος. φανερόν δ' ἐστίν· καὶ γὰρ ἂν πίεσῃ τις τὰ ζεύγη, μᾶλλον ὀξύτερα ἢ φωνὴ γίνεσθαι καὶ λεπτοτέρα. καὶ

κατασπάση τις τὰς σύριγγας, κἂν δὲ ἐπιλάβῃ, παμπλείων ὁ ὄγκος γίγνεται τῆς φωνῆς διὰ τὸ πλῆθος τοῦ πνεύματος, καθάπερ καὶ ἀπὸ τῶν παχυτέρων χορδῶν. παχεῖαι δὲ γίνονται καὶ τῶν τραγιζόντων καὶ τῶν βραγχίωντων, καὶ μετὰ τοὺς ἐμέτους, διὰ τὴν τραχύτητα τῆς ἀρτηρίας καὶ διὰ τὸ μὴ ὑπεξάγειν ἀλλ' αὐτοῦ προσκόπτουσιν ἀνειλεῖσθαι τὴν φωνὴν καὶ λαμβάνειν ὄγκον, καὶ μάλιστα διὰ τὴν ὑγρότητα τοῦ σώματος. λιγυραὶ δ' εἰσὶ τῶν φωνῶν αἱ λεπταὶ καὶ πυκναί, καθάπερ καὶ ἐπὶ τῶν τεττίγων καὶ τῶν ἀκρίδων καὶ αἱ τῶν ἀηδόνων, καὶ ὅλως ὅσαις λεπταῖς οὖσαις μηθεὶς ἀλλότριος ἦχος παρακολουθεῖ. ὅλως γὰρ οὐκ ἔστιν οὗτ' ἐν ὄγκῳ φωνῆς τὸ λιγυρόν, οὗτ' ἐν τόνοις ἀνιεμένοις καὶ βαρέσιν, οὗτ' ἐν ταῖς τῶν φθόγγων ἀφαῖς, ἀλλὰ μᾶλλον ὀξύτητι καὶ λεπτότητι καὶ ἀκριβείᾳ. διὸ καὶ τῶν ὀργάνων τὰ λεπτὰ καὶ σύντονα καὶ μὴ ἔχοντα κέρας τὰς φωνὰς ἔχει λιγυρωτέρας· ὁ γὰρ ἀπὸ τῶν ὑδάτων ἦχος, καὶ ὅλως ὅταν ἀπὸ τινος γιγνόμενος παρακολουθῇ, συνεχεῖ τὴν ἀκρίβειαν τὴν τῶν φθόγγων. σαθραὶ δ' εἰσὶ καὶ παρερρηκυῖαι τῶν φωνῶν ὅσαι μέχρι τινὸς φερόμεναι συνεχεῖς διασπῶνται. φανερώτατον δὲ τοῦτ' ἐστὶν ἐπὶ τοῦ κεράμου· πᾶς γὰρ ὁ ἐκ πληγῆς ῥαγεὶς ποιεῖ τὸν ἦχον σαθρόν, διασπωμένης τῆς κινήσεως κατὰ τὴν πληγὴν, ὥστε μηκέτι γίνεσθαι τοὺς ἐκπίπτοντας ἦχους συνεχεῖς. ὁμοίως δὲ τοῦτο συμβαίνει καὶ ἐπὶ τῶν ἐρρωγόντων κεράτων καὶ ἐπὶ τῶν χορδῶν τῶν παρανενευρισμένων. ἐπὶ πάντων γὰρ τῶν τοιούτων μέχρι μὲν [804b] τινος ὁ ἦχος φέρεται συνεχῆς, ἔπειτα διασπᾶται, καθ' ὃ τι ἂν ἢ μὴ συνεχὲς τὸ ὑποκείμενον, ὥστε μὴ μίαν γίνεσθαι πληγὴν ἀλλὰ διεσπασμένην, καὶ φαίνεσθαι τὸν ἦχον σαθρόν. σχεδὸν γὰρ παραπλήσiai τυγχάνουσιν οὖσαι ταῖς τραχείαις· πλὴν ἐκεῖναι μὲν εἰσιν ἀπ' ἀλλήλων κατὰ μικρὰ μέρη διεσπασμένα, τῶν δὲ σαθρῶν αἱ πλεῖσται τὰς μὲν ἀρχὰς ἔχουσι συνεχεῖς, ἔπειτ' εἰς πλείω μέρη τὴν διαίρεσιν λαμβάνουσιν. δασεῖαι δ' εἰσὶ τῶν φωνῶν ὅσαις ἔσωθεν τὸ πνεῦμα εὐθέως συνεκβάλλομεν μετὰ τῶν φθόγγων, ψιλαὶ δ' εἰσὶ τοῦναντίον ὅσαι γίνονται χωρὶς τῆς τοῦ πνεύματος ἐκβολῆς. ἀπορρηγνυσθαι δὲ συμβαίνει τὰς φωνὰς, ὅταν μηκέτι δύνωνται τὸν ἀέρα μετὰ πληγῆς ἐκπέμπειν, ἀλλ' ὁ περὶ τὸν πνεῦμονα τόπος αὐτῶν ὑπὸ τῆς διαστάσεως ἐκλυθῇ. ὥπερ γὰρ καὶ τὰ σκεῦη καὶ τοὺς ὄμους ἐκλύεσθαι συμβαίνει τὸ τελευταῖον συντόνως, οὕτως καὶ τὸν περὶ τὸν πνεῦμονα τόπον. κοῦφον γὰρ ἔξω φέρεσθαι τὸ πνεῦμα διὰ τὸ μὴ γίνεσθαι βίαιον αὐτοῦ τὴν πληγὴν· ἅμα δὲ καὶ διὰ τὸ

τετραχύνθαι τὴν ἀρτηρίαν αὐτῶν ἰσχυρῶς, οὐ δύναται τὸ πνεῦμα ἔξω φέρεσθαι συνεχές, ἀλλὰ διεσπασμένον, ὡς ἀπερρωγυίας γίνεσθαι τὰς φωνὰς αὐτῶν. καὶ τινες οἶονται διὰ τὴν τοῦ πνεύμονος γλισχρότητα τὸ πνεῦμα οὐ δύνασθαι περαιοῦσθαι περὶ τὸν ἔξω τόπον, διαμαρτάνοντες· φθέγγονται μὲν γὰρ ἄλλ’ οὐ δύνανται γεγωνεῖν διὰ τὸ μὴ γίνεσθαι μετὰ συντονίας τὴν τοῦ ἀέρος πληγὴν, ἀλλὰ μόνον φωνοῦσιν, ὡς ἂν ἀπ’ αὐτοῦ τοῦ φάρυγγος τὸ πνεῦμα βιαζόμενον. τῶν δ’ ἰσχυροφώνων οὔτε περὶ τὰς φλέβας οὔτε περὶ τὰς ἀρτηρίας ἐστὶ τὸ πάθος, ἀλλὰ περὶ τὴν κίνησιν τῆς γλώττης. χαλεπῶς γὰρ αὐτὴν μεταφέρουσιν, ὅταν ἕτερον δέη φθόγγον εἰπεῖν. διὸ καὶ πολὺν χρόνον τὸ αὐτὸ ῥῆμα λέγουσιν, οὐ δυνάμενοι τὸ ἐξῆς εἰπεῖν, ἀλλὰ συνεχῶς τῆς κινήσεως καὶ τοῦ πνεύμονος αὐτῶν ἐπὶ τὴν αὐτὴν ὁρμὴν φερομένου διὰ τὸ πλῆθος καὶ τὴν βίαν τοῦ πνεύματος. ὥσπερ γὰρ καὶ τὸ σῶμα ὅλον τῶν τρεχόντων βιαίως χαλεπὸν ἐστὶν ἐκ τῆς ὁρμῆς εἰς ἄλλην κίνησιν μεταστῆσαι, τὸν αὐτὸν τρόπον καὶ κατὰ μέρος. διὸ καὶ πολλάκις τὸ μὲν ἐξῆς εἰπεῖν οὐ δύνανται, τὸ δὲ μετὰ τοῦτο λέγουσι ῥαδίως, ὅταν ἄλλην ποιήσωνται τῆς κινήσεως ἀρχήν. δῆλον δ’ ἐστίν· καὶ γὰρ τοῖς ὀργιζομένοις τοῦτο συμβαίνει πολλάκις διὰ τὸ βίαιον αὐτῶν γίνεσθαι τὴν τοῦ πνεύματος φορὰν.

Φυσιογνωμονικά (805a) Physiognomonics

[805a] Ὅτι αἱ διάνοιαι ἔπονται τοῖς σώμασι, καὶ οὐκ εἰσὶν αὐταὶ καθ' ἑαυτὰς ἀπαθεῖς οὐσαὶ τῶν τοῦ σώματος κινήσεων. τοῦτο δὲ δῆλον πάνυ γίνεται ἔν τε ταῖς μέθαις καὶ ἔν τε ταῖς ἀρρωστίαις· πολὺ γὰρ ἐξαλλάττουσαι φαίνονται αἱ διάνοιαι ὑπὸ τῶν τοῦ σώματος παθημάτων. καὶ τούναντίον δὴ τοῖς τῆς ψυχῆς παθήμασι τὸ σῶμα συμπάσχον φανερόν γίνεται περὶ τε τοὺς ἔρωτας καὶ τοὺς φόβους τε καὶ τὰς λύπας καὶ τὰς ἡδονάς. ἔτι δὲ ἔν τοις φύσει γινομένοις μᾶλλον ἂν τις συνίδοι ὅτι οὕτως ἔχει πρὸς ἄλληλα σῶμά τε καὶ ψυχὴ συμφυῶς ὥστε τῶν πλείστων ἀλλήλοις αἷτια γίνεσθαι παθημάτων. οὐδὲν γὰρ πώποτε ζῶον γεγένηται τοιοῦτον ὃ τὸ μὲν εἶδος ἔσχεν ἑτέρου ζώου, τὴν δὲ διάνοιαν ἄλλου, ἀλλ' ἀεὶ τοῦ αὐτοῦ τό τε σῶμα καὶ τὴν ψυχὴν, ὥστε ἀναγκαῖον ἔπεσθαι τῷ τοιῷδε σώματι τοιάνδε διάνοιαν. ἔτι δὲ καὶ τῶν ἄλλων ζώων οἱ περὶ ἕκαστον ἐπιστήμονες ἐκ τῆς ιδέας δύνανται θεωρεῖν, ἵππικοὶ τε ἵππους καὶ κυνηγέται κύνες. εἰ δὲ ταῦτα ἀληθῆ εἴη (ἀεὶ δὲ ταῦτα ἀληθῆ ἐστίν), εἴη ἂν φυσιογνωμονεῖν. οἱ μὲν οὖν προγεγενημένοι φυσιογνώμονες κατὰ τρεῖς τρόπους ἐπεχείρησαν φυσιογνωμονεῖν, ἕκαστος καθ' ἓνα. οἱ μὲν γὰρ ἐκ τῶν γενῶν τῶν ζώων φυσιογνωμονοῦσι, τιθέμενοι καθ' ἕκαστον γένος εἶδος τι ζώου καὶ διάνοιαν. οἱ δ' ἐπὶ τούτοις σῶμά τι, εἴτα τὸν ὅμοιον τῷ σώματι σῶμα ἔχοντα καὶ τὴν ψυχὴν ὁμοίαν ὑπελάμβανον. ἄλλοι δὲ τινες τοῦτο μὲν ἐποιοῦν, οὐκ ἐξ ἀπάντων δὲ τῶν ζώων ἐδοκίμαζον, ἀλλ' ἐξ αὐτοῦ τοῦ τῶν ἀνθρώπων γένους, διελόμενοι κατὰ τὰ ἔθνη, ὅσα διέφερε τὰς ὄψεις καὶ τὰ ἦθη, οἷον Αἰγύπτιοι καὶ Θρᾷκες καὶ Σκύθαι, ὁμοίως τὴν ἐκλογὴν τῶν σημείων ἐποιοῦντο. οἱ δὲ τινες ἐκ τῶν ἡθῶν τῶν ἐπιφανομένων, οἷα διαθέσει ἔπεται ἕκαστον ἦθος, τῷ ὀργιζομένῳ, τῷ φοβουμένῳ, τῷ ἀφροδισιάζοντι, καὶ τῶν ἄλλων δὴ παθημάτων ἐκάστω. ἔστι δὲ κατὰ πάντας τούτους τοὺς τρόπους φυσιογνωμονεῖν, καὶ ἔτι κατ' ἄλλους, καὶ τὴν ἐκλογὴν τῶν σημείων ἀνομοίως ποιεῖσθαι. οἱ μὲν οὖν κατὰ [805b] τὰ ἦθη μόνον φυσιογνωμονοῦντες ἀμαρτάνουσιν, πρῶτον μὲν

ὅτι ἔνιοι οὐχ οἱ αὐτοὶ ὄντες τὰ ἐπὶ τῶν προσώπων ἦθη τὰ αὐτὰ ἔχουσιν, οἷον ὃ τε ἀνδρεῖος καὶ ὁ ἀναιδῆς τὰ αὐτὰ ἔχουσι, τὰς διανοίας πολὺ κεχωρισμένοι, δεύτερον δὲ ὅτι κατὰ χρόνους τινὰς τὰ ἦθη οὐ τὰ αὐτὰ ἀλλ' ἐτέρων ἔχουσιν· δυσανάοις τε γὰρ οὐσιν ἐνίστε συνέβη τὴν ἡμέραν ἠδέως διαγαγεῖν καὶ τὸ ἦθος λαβεῖν τὸ τοῦ εὐθύμου, καὶ τούναντίον εὐθυμον λυπηθῆναι, ὥστε τὸ ἦθος τὸ ἐπὶ τοῦ προσώπου μεταβαλεῖν. ἔτι πρὸς τούτοις περὶ ὀλίγων ἂν τις τοῖς ἐπιφαινομένοις τεκμαίροιτο. οἱ δ' ἐκ τῶν θηρίων φυσιογνωμονοῦντες οὐκ ὀρθῶς τὴν ἐκλογὴν τῶν σημείων ποιοῦνται. οὐ γὰρ δὴ ἐκάστου τῶν ζώων τὴν ιδέαν διεξεληθόντα ἔστιν εἰπεῖν ὅτι, ὅς ἂν ὁμοιος τούτῳ τὸ σῶμα ᾗ, καὶ τὴν ψυχὴν ὁμοιος ἔσται. πρῶτον μὲν γὰρ ὡς ἀπλῶς εἰπεῖν οὕτως ὁμοιον θηρίῳ ἄνθρωπον οὐδεὶς ἂν εὖροι, ἀλλὰ προσεικτότα μὲν τι. ἔτι πρὸς τούτοις τὰ ζῷα ὀλίγα μὲν τὰ ἴδια ἔχει σημεῖα, πολλὰ δὲ τὰ κοινά· ὥστε ἐπειδὰν ὁμοιός τις ᾗ μὴ κατὰ τὸ ἴδιον ἀλλὰ κατὰ τὸ κοινόν, τί μᾶλλον οὗτος λέοντι ἢ ἐλάφῳ ὁμοιότερος; εἰκὸς γὰρ τὰ μὲν ἴδια τῶν σημείων ἰδιόν τι σημαίνειν, τὰ δὲ κοινὰ κοινόν. τὰ μὲν οὖν κοινὰ τῶν σημείων οὐδὲν ἂν διασαφηθῇ τῷ φυσιογνωμονοῦντι. εἰ δέ τις τὰ ἴδια ἐκάστου τῶν θηρίων ἐκλέξειεν, οὐκ ἂν ἔχοι ἀποδοῦναι οὐ ἔστι ταῦτα σημεῖα. εἰκὸς γὰρ τοῦ ἰδίου, ἰδιον δὲ οὐδενὸς οὐδὲν τῶν ζώων τῶν φυσιογνωμονουμένων ἔν γε τῇ διανοίᾳ ἔχοι ἂν τις λαβεῖν· οὔτε γὰρ ἀνδρεῖον μόνον ὁ λέων ἐστίν, ἀλλὰ καὶ ἄλλα πολλὰ, οὔτε δειλὸν ὁ λαγῶς, ἀλλὰ καὶ ἄλλα μυρία. εἰ οὖν μήτε τὰ κοινὰ σημεῖα ἐκλέξαντι σαφές τι γίνεται μήτε τὰ ἴδια, οὐκ ἂν εἴη καθ' ἕκαστον τῶν ζώων σκέπτεσθαι, ἀλλ' ἐξ ἀνθρώπων τὴν ἐκλογὴν ποιητέον τῶν τὸ αὐτὸ πάθος πασχόντων, οἷον, ἂν μὲν ἀνδρεῖου ἐπισκοπῇ τις τὰ σημεῖα, τὰ ἀνδρεῖα τῶν ζώων εἰς ἓν λαβόντα δεῖ ἐξετάσαι, ποῖα παθήματα τούτοις μὲν ἅπασιν ὑπάρχει, τῶν δὲ ἄλλων ζώων οὐδενὶ συμβέβηκεν. εἰ γὰρ [806a] οὕτω τις ἐκλέξειεν, ὅτι ταῦτά ἐστι τὰ σημεῖα ἀνδρείας τοῖς προκριθεῖσι ζώοις, μὴ μόνον ἀνδρείας κοινὸν ὑπάρχειν πάθημα τῶν ἐν τῇ διανοίᾳ, ἀλλὰ καὶ ἄλλο τι· οὕτω δ' ἂν ἀπορήσειε πότερον ἀνδρείας ἢ θατέρου τὰ σημεῖα ἐστίν. ἀλλὰ δεῖ ἐκ πλείστων τε ἐκλέγεσθαι ζώων, καὶ μηδὲν πάθος κοινὸν ἐχόντων ἐν τῇ διανοίᾳ ἄλλο τι, οὐ ἂν τὰ σημεῖα σκοπῇ. ὅσα μὲν οὖν τῶν σημείων μόνιμά ἐστι, μόνιμον ἂν τι καὶ σημαῖνοι· ὅσα δὲ ἐπιγινόμενά τε καὶ ἀπολείποντα, πῶς ἂν τὸ σημεῖον ἀληθὲς εἴη τοῦ ἐν τῇ διανοίᾳ μὴ μένοντος; εἰ μὲν γὰρ μόνιμον ἐπιγινόμενόν τε καὶ ἀπολείπον σημειόν

τις ὑπολάβοι, ἐνδέχοιτο μὲν ἂν αὐτὸ ἀληθὲς εἶναι, οὐ μὴν ἐπεικὲς ἂν εἶη, μὴ αἰεὶ τῷ πράγματι παρεπόμενον. ὅσα δὲ παθήματα ἐγγινόμενα τῇ ψυχῇ μηδὲν τι ἐνδιαλλάττει τὰ σημεῖα τὰ ἐν τῷ σώματι, οἷς χρῆται ὁ φυσιογνώμων, οὐκ ἂν εἶη τὰ τοιαῦτα γνωρίσματα τῇ τέχνῃ, οἷον τὰ περὶ τὰς δόξας καὶ τὰς ἐπιστήμας ἱατρὸν ἢ κιθαριστὴν οὐκ ἐνδέχεται γνωρίζειν· ὁ γὰρ μαθὼν ὅ τι μάθημα, οὐδὲν ἐξήλλαξε τῶν σημείων οἷς χρῆται ὁ φυσιογνώμων.

Δεῖ δὴ οὖν ὀρίσαι περὶ ποῖα ἄττα ἐστὶν ἡ φυσιογνωμονία, ἐπειδὴ οὐ περὶ πάντα, καὶ ἐκ τίνων ἕκαστα σημεῖα λαμβάνεται, ἔπειτ' ἐφεξῆς καθ' ἐν ἕκαστον περὶ τῶν ἐπιφανεστέρων δηλῶσαι. ἡ μὲν οὖν φυσιογνωμονία ἐστὶ, καθάπερ καὶ τοῦνομα αὐτῆς λέγει, περὶ τὰ φυσικὰ παθήματα τῶν ἐν τῇ διανοίᾳ, καὶ τῶν ἐπικτήτων ὅσα παραγινόμενα μεθίστησι τῶν σημείων τῶν φυσιογνωμονουμένων. ὁποῖα δὲ ταῦτά ἐστιν, ὕστερον δηλωθήσεται. ἐξ ὧν δὲ γενῶν τὰ σημεῖα λαμβάνεται, νῦν ἐρῶ, καὶ ἔστιν ἅπαντα· ἕκ τε γὰρ τῶν κινήσεων φυσιογνωμονοῦσι, καὶ ἐκ τῶν σχημάτων, καὶ ἐκ τῶν χρωμάτων, καὶ ἐκ τῶν ἡθῶν τῶν ἐπὶ τοῦ προσώπου ἐμφαινομένων, καὶ ἐκ τῶν τριχωμάτων, καὶ ἐκ τῆς λειότητος, καὶ ἐκ τῆς φωνῆς, καὶ ἐκ τῆς σαρκός, καὶ ἐκ τῶν μερῶν, καὶ ἐκ τοῦ τύπου ὅλου τοῦ σώματος. καθόλου μὲν οὖν τοιαῦτά ἐστιν ἃ λέγουσιν οἱ φυσιογνώμονες περὶ ὅλων τῶν γενῶν ἐν οἷς ἐστὶ τὰ σημεῖα. εἰ μὲν οὖν ἀσαφὴς ἢ μὴ εὖσημος ἦν ἡ τοιαύτη διέξοδος, ἀπέχρησεν ἂν τὰ εἰρημένα. νυνὶ δ' ἴσως βέλτιόν ἐστι καθ' ἕκαστον περὶ πάντων, ὅσα ἐπιφανῇ παρὰ τῶν φυσιογνωμονουμένων, [806b] ἀκριβέστερον φράσαι, τὰ τε σημεῖα λέγοντα, οἷά τ' ἐστὶν ἕκαστα καὶ ἐπὶ τί ἀναφέρεται, ὅσα μὴ ἐν τοῖς προειρημένοις δεδήλωται. αἱ μὲν οὖν χροιαὶ σημαίνουσιν αἱ μὲν ὀξεῖαι θερμὸν καὶ ὑφαιμον, αἱ δὲ λευκέρυθροι εὐφυίαν, ὅταν ἐπὶ λείου χρωτὸς συμβῇ τοῦτο τὸ χρῶμα. τὰ δὲ τριχώματα τὰ μὲν μαλακὰ δειλόν, τὰ δὲ σκληρὰ ἀνδρεῖον. τοῦτο δὲ τὸ σημεῖον εἴληπται ἐξ ἀπάντων τῶν ζώων. δειλότατον μὲν γὰρ ἐστὶν ἔλαφος λαγωγὸς πρόβατα, καὶ τὴν τρίχα μαλακωτάτην ἔχει· ἀνδρεϊότατον δὲ λέων, ὅς ἄγριος, καὶ τρίχα σκληροτάτην φέρει. ἔστι δὲ καὶ ἐν τοῖς ὄρνισι τὸ αὐτὸ τοῦτο ἰδεῖν· καθόλου τε γὰρ ὅσοι μὲν σκληρὸν τὸ πτερὸν ἔχουσιν, ἀνδρεῖοι, ὅσοι δὲ μαλακόν, δειλοί, καὶ κατὰ μέρη ἔστι ταὐτὸ τοῦτο ἰδεῖν ἐν τε τοῖς ὀρνυξι καὶ ἐν τοῖς ἀλεκτρούσιν. ὁμοίως δὲ καὶ ἐπὶ τῶν γενῶν τῶν ἀνθρώπων ταὐτὸ τοῦτο συμπίπτει· οἱ μὲν γὰρ ὑπὸ ταῖς ἄρκτοις οἰκοῦντες ἀνδρεῖοί τε

εἰσι καὶ σκληρότριχες, οἱ δὲ πρὸς μεσημβρίαν δειλοί τε καὶ μαλακὸν τρίχωμα φέρουσιν. ἡ δὲ δασύτης ἡ περὶ τὴν κοιλίαν λαλιὰν σημαίνει. τοῦτο δὲ ἀναφέρεται εἰς τὸ γένος τῶν ὀρνίθων· ἴδιον γὰρ ὀρνιθος τῶν περὶ τὸ σῶμα ἡ δασύτης ἡ περὶ τὴν κοιλίαν, τῶν δὲ περὶ διάνοιαν ἡ λαλιά. ἡ δὲ σὰρξ ἡ μὲν σκληρὰ καὶ εὐεκτική φύσει ἀναίσθητον σημαίνει, ἡ δὲ λεία καὶ εὐφυέα καὶ ἀβέβαιον, ἐὰν μὴ ἐπ' ἰσχυροῦ σώματος καὶ τὰ ἀκρωτήρια ἐγκρατῆ ἔχοντος τοῦτο συμβῇ. αἱ δὲ κινήσεις αἱ μὲν νωθραὶ μαλακὴν διάνοιαν, αἱ δὲ ὀξεῖαι ἔνθερμον. ἐπὶ δὲ τῆς φωνῆς ἡ μὲν βαρεῖα καὶ ἐπιτεινομένη ἀνδρεῖον, ἡ δὲ ὀξεῖα καὶ ἀνειμένη δειλόν. τὰ δὲ σχήματα καὶ τὰ παθήματα τὰ ἐπιφανόμενα ἐπὶ τῶν προσώπων κατὰ τὰς ὁμοιότητας λαμβάνεται τῷ πάθει. ὅταν γὰρ πάσχη τι, γίνεται οἷον εἰ τοιοῦτον ἔχει ὅταν τις ὀργίζεται, ὀργίλον τὸ σημεῖον τοῦ αὐτοῦ γένους. τὸ δὲ ἄρρεν τοῦ θήλεος μεῖζον καὶ ἰσχυρότερον, καὶ τὰ ἀκρωτήρια τοῦ σώματος ἰσχυρότερα καὶ λιπαρώτερα καὶ εὐεκτικώτερα καὶ βελτίω κατὰ πάσας τὰς ἀρετάς. ἰσχυρότερα δὲ τῶν ἐπὶ τοῖς μέρεσι σημείων ἐστὶ τὰ ἐν τοῖς ἡθεσι τοῖς ἐν τοῖς ἐπιφανομένοις λαμβανόμενα καὶ τὰ κατὰ τὰς κινήσεις καὶ τὰ σχήματα. ὅλως δὲ τὸ ἐνὶ μὲν πιστεύειν [807a] τῶν σημείων εὐηθες· ὅταν δὲ πλείω συμφωνοῦντα καθ' ἑνὸς λάβῃ, μᾶλλον ἤδη κατὰ τὸ εἰκὸς ἂν τις ὑπολαμβάνοι ἀληθῆ εἶναι τὰ σημεῖα. ἔστι δὲ ἄλλος τρόπος καθ' ὃν ἂν τις φυσιογνωμονοίῃ· οὐδεὶς μέντοι ἐπικεχειρήκεν. οἷον εἰ ἀνάγκη ἐστὶ τὸν ὀργίλον καὶ τὸν δυσάνιον καὶ μικρὸν τὸ ἥθος φθονερὸν εἶναι, εἰ καὶ μὴ ἐστὶ φθονεροῦ σημεῖα, ἐξ ἐκείνων δὲ τῶν προτέρων ἐνδέχοιτο ἂν τῷ φυσιογνώμονι καὶ τὸν φθονερὸν εὐρίσκειν, μάλιστα μὲν ἂν ὁ τοιοῦτος ἴδιος τρόπος εἴη τοῦ πεφιλοσοφηκότος. τὸ γὰρ δύνασθαι τινῶν ὄντων ἀναγκαῖον εἶναι, ἴδιον ὑπολαμβάνοιμεν φιλοσοφίας· ὅπερ ἐστὶν ὅτε ἐναντιοῦται τούτῳ κατὰ τὰ πάθη φυσιογνωμονεῖν καὶ τὰ κακά.

Περὶ φωνῆς κατὰ μὲν τὸ πάθος ἐπισκοπῶν ὀξεῖαν οἰηθεῖν ἂν τις δυεῖν ἔνεκεν τιθέναι τοῦ θυμοειδοῦς. ὁ γὰρ ἀγανακτῶν καὶ ὀργιζόμενος ἐπιτείνειν εἴωθε τὸν φθόγγον καὶ ὀξὺ φθέγγεσθαι, ὁ δὲ ῥαθύμως διακείμενος τόν τε τόνον ἀνίησι καὶ βαρὺ φθέγγεται. τῶν δ' αὖ ζῴων τὰ μὲν ἀνδρεῖα βαρύφωνα ἐστὶ, τὰ δὲ δειλὰ ὀξύφωνα, λέων μὲν καὶ ταῦρος, καὶ κύων ὑλακτικός, καὶ τῶν ἀλεκτρυόνων οἱ εὐψυχοὶ βαρύφωνοι φθέγγονται· ἔλαφος δὲ καὶ λαγὼς ὀξύφωνα ἐστίν. ἀλλ' ἴσως καὶ ἐν τούτοις κρεῖσσόν ἐστι μὴ ἐν τῷ βαρεῖαν ἢ

ὀξεῖαν εἶναι τὴν φωνὴν αὐτῶν ἀνδρεῖον ἢ δειλὸν τιθέναι, ἀλλ' ἐν τῷ τὴν μὲν ἐρρωμένην ἀνδρείου τὴν δὲ ἀνειμένην καὶ ἀσθενῆ δειλοῦ ὑποληπτέον εἶναι. ἔστι δὲ κράτιστον, ὅταν τὰ σημεῖα μὴ ὁμολογούμενα ἀλλ' ὑπεναντιούμενα, μηδὲν τιθέναι, εἰ μὴ ἔστι τῶν διηρημένων ποῖα ποίων πιστότερα, καὶ μάλιστα μὲν εἰς εἶδη ἀλλὰ μὴ εἰς ὅλα τὰ γένη ἀναφέρειν. ὁμοιότερα γάρ ἐστι τῷ ζητούμενῳ· οὐ γὰρ ὅλον τὸ γένος τῶν ἀνθρώπων φυσιογνωμονοῦμεν, ἀλλὰ τινα τῶν ἐν τῷ γένει.

Ἀνδρείου σημεῖα τρίχωμα σκληρόν, τὸ σχῆμα τοῦ σώματος ὀρθόν, ὅστ' αἰ καὶ πλευраὶ καὶ τὰ ἀκρωτήρια τοῦ σώματος ἰσχυρὰ καὶ μεγάλα, καὶ κοιλία πλατεῖα καὶ προσεσταλμένη· ὠμοπλάται πλατεῖαι καὶ διεσθηκυῖαι, οὔτε λίαν συνδεδεμέναι οὔτε παντάπασι ἀπολελυμέναι· τράχηλος ἐρρωμένος, οὐ σφόδρα σαρκώδης· τὸ στήθος σαρκώδες τε καὶ πλατὺ, ἰσχίον προσεσταλμένον, γαστροκνημίαι κάτω [807b] προσεσπασμέναι· ὄμμα χαροπόν, οὔτε λίαν ἀνεπτυγμένον οὔτε παντάπασι συμμύον· αὐχμηρότερον τὸ χρῶμα τὸ ἐπὶ τοῦ σώματος· ὀξὺ μέτωπον, εὐθύ, οὐ μέγα, ἰσχνόν, οὔτε λεῖον οὔτε παντάπασι ῥυτιδῶδες. δειλοῦ σημεῖα τριχωμάτιον μαλακόν, τὸ σῶμα συγκεκαθικόν, οὐκ ἐπισπερχής· αἰ δὲ γαστροκνημίαι ἄνω ἀνέσπασμέναι· περὶ τὸ πρόσωπον ὕψυχρος· ὄμματα ἀσθενῆ καὶ σκαρδαμύττοντα, καὶ τὰ ἀκρωτήρια τοῦ σώματος ἀσθενῆ, καὶ μικρὰ σκέλη, καὶ χεῖρες λεπτὰ καὶ μακρά· ὀσφὺς δὲ μικρὰ καὶ ἀσθενής· τὸ σχῆμα σύντονον ἐκ ταῖς κινήσεσιν· οὐκ ἰταμὸς ἀλλ' ὕπιος καὶ τεθαμβηκώς· τὸ ἦθος τὸ ἐπὶ τοῦ προσώπου εὐμετάβολον, κατηφές. εὐφυοῦς σημεῖα σὰρξ ὑγροτέρα καὶ ἀπαλωτέρα, οὐκ εὐεκτικὴ οὐδὲ πιμελώδης σφόδρα· τὰ περὶ τὰς ὠμοπλάτας καὶ τράχηλον ἰσχνότερα, καὶ τὰ περὶ τὸ πρόσωπον, καὶ σύνδετα τὰ περὶ τὰς ὠμοπλάτας, καὶ τὰ κάτω ἀφειμένα· εὐλυτα τὰ περὶ τὰς πλευράς· καὶ τὸν νῶτον ἀσαρκότερος· τὸ σῶμα λευκέρυθρον καὶ καθαρόν· τὸ δερμάτιον λεπτόν, τριχωμάτιον μὴ λίαν σκληρόν μηδὲ λίαν μέλαν, ὄμμα χαροπόν, ὑγρόν. ἀναισθήτου σημεῖα τὰ περὶ τὸν αὐχένα καὶ τὰ σκέλη σαρκώδη καὶ συμπεπλεγμένα καὶ συνδεδεμένα, κοτύλη στρογγύλη, ὠμοπλάται ἄνω ἀνέσπασμέναι, μέτωπον μέγα περιφερὲς σαρκώδες, ὄμμα χλωρόν κωφόν, κνῆμαι περὶ σφυρὸν παχεῖαι σαρκώδεις στρογγύλαι, σιαγόνες μεγάλαι σαρκώδεις, ὀσφὺς σαρκώδης, σκέλη μακρά, τράχηλος παχύς, πρόσωπον σαρκώδες, ὑπόμακρον ἱκανῶς. τὰς δὲ

κινήσεις καὶ τὸ σχῆμα καὶ τὸ ἦθος τὸ ἐπὶ τοῦ προσώπου ἐπιφαινόμενον κατὰ τὰς ὁμοιότητας ἀναλαμβάνει. ἀναιδοῦς σημεῖα ὀμμάτων ἀνεπτυγμένον καὶ λαμπρόν, βλέφαρα ὕφαιμα καὶ παχέα· μικρὸν ἔγκυρτος· ὠμοπλάται ἄνω ἐπηρμέναι· τῷ σχήματι μὴ ὀρθὸς ἀλλὰ μικρῷ προπετέστερος, ἐν ταῖς κινήσεσιν ὀξύς, ἐπίπυρρος τὸ σῶμα· τὸ χρῶμα ὕφαιμον· στρογγυλοπρόσωπος· τὸ στήθος ἀνεσπασμένον. κοσμίον σημεῖα. ἐν ταῖς κινήσεσι βραδύς, καὶ διάλεκτος βραδεῖα καὶ φωνὴ πνευματώδης καὶ ἀσμενής, ὀμμάτων ἀλαμπές μέλαν καὶ μήτε λίαν ἀνεπτυγμένον μήτε παντάπασι συμμεμνυκός, σκαρδαμυκτικὸν βραδέως· τὰ μὲν γὰρ ταχέως [808a] σκαρδαμύττοντα τῶν ὀμμάτων τὰ μὲν δειλὸν τὰ δὲ θερμὸν σημαίνει. εὐθύμου σημεῖα μέτωπον εὐμέγεθες καὶ σαρκῶδες καὶ λεῖον, τὰ περὶ τὰ ὄμματα ταπεινότερα. καὶ ὑπνωδέστερον τὸ πρόσωπον φαίνεται, μήτε δεδορκὸς μήτε σύννου. ἐν τε ταῖς κινήσεσι βραδὺς ἔστω καὶ ἀνειμένος· τῷ σχήματι καὶ τῷ ἦθει τῷ ἐπὶ τοῦ προσώπου μὴ ἐπισπερχής ἀλλὰ ἀγαθὸς φαιnéσθω. ἀθύμου σημεῖα. τὰ ῥυτιδῶδη τῶν προσώπων καὶ ἰσχνὰ ὄμματα κατακεκλασμένα, ἅμα δὲ καὶ τὰ κεκλασμένα τῶν ὀμμάτων, δύο σημαίνει, τὸ μὲν μαλακὸν καὶ θῆλυ, τὸ δὲ κατηφές καὶ ἄθυμον. ἐν τῷ σχήματι ταπεινὸς καὶ ταῖς κινήσεσιν ἀπηγορευκός. κιναίδου σημεῖα ὄμμα κατακεκλασμένον, γονύκροτος· ἐγκλίσεις τῆς κεφαλῆς εἰς τὰ δεξιὰ· αἱ φοραὶ τῶν χειρῶν ὕπτια καὶ ἔκλυτοι, καὶ βαδίσεις διτταί, ἡ μὲν περινεύοντος, ἡ δὲ κρατοῦντος τὴν ὀσφύν· καὶ τῶν ὀμμάτων περιβλέψεις, οἷος ἂν εἴη Διονύσιος ὁ σοφιστής. πικροῦ σημεῖα τὸ πρόσωπον σεσηρός· μελανόχρως, ἰσχνός· τὰ περὶ τὸ πρόσωπον διεξυσμένα, τὸ πρόσωπον ῥυτιδῶδες ἄσαρκον· εὐθύθριξ καὶ μελάνθριξ. θυμώδους σημεῖα. ὀρθὸς τὸ σῶμα, τῷ σχήματι εὐπλευρος, εὐθυμος, ἐπίπυρρος· ὠμοπλάται διεστηκυῖαι καὶ μεγάλαι καὶ πλατεῖαι· ἀκρωτήρια μέγала καὶ ἐγκρατῆ· λεῖος καὶ περὶ τὰ στήθη καὶ περὶ βουβῶνας, εὐπῶγων· εὐαυξῆς ὁ περίδρομος τῶν τριχῶν, κάτω κατεληλυθός. πραέος σημεῖα. ἰσχυρὸς τὸ εἶδος, εὐσαρκος· ὑγρὰ σὰρξ καὶ πολλή· εὐμεγέθης καὶ σύμμετρος· ὕπτιος τῷ σχήματι· ὁ περίδρομος τῶν τριχῶν ἀνεσπασμένος. εἴρωνος σημεῖα πίονα τὰ περὶ τὸ πρόσωπον, καὶ τὰ περὶ τὰ ὄμματα ῥυτιδῶδη· ὑπνώδες τὸ πρόσωπον τῷ ἦθει φαίνεται. μικροψύχου σημεῖα. μικρομελής, μικρογλάφυρος, ἰσχνός, μικρόμματος καὶ μικροπρόσωπος, οἷος ἂν εἴη Κορίνθιος ἢ Λευκάδιος. φιλόκυβοι γαλεαγκῶνες καὶ ὀρχησταί. φιλολοῖδοροι οἷς

τὸ ἄνω χεῖλος μετέωρον· καὶ τὰ εἶδη προπετεῖς, ἐπίπυρροι. ἐλεήμονες ὅσοι γλαφυροὶ καὶ λευκόχροοι καὶ λιπαρόμματοι καὶ τὰ ῥινία ἄνωθεν διεξυσμένοι, καὶ ἀεὶ δακρύουσιν. οἱ αὐτοὶ οὗτοι καὶ φιλογύναιοι καὶ θηλυγόνιοι καὶ περὶ τὰ ἥθη ἐρωτικοὶ καὶ ἀειμνήμονες καὶ εὐφυεῖς καὶ ἔνθερμοι. τούτων δὲ σημεῖα [808b] εἴρηται. ἐλεήμων ὁ σοφὸς καὶ δειλὸς καὶ κόσμιος, ἀνελέητος ἀμαθὴς καὶ ἀναιδής. ἀγαθοὶ φαγεῖν οἷς τὸ ἀπὸ τοῦ ὀμφαλοῦ πρὸς στήθος μεῖζόν ἐστιν ἢ τὸ ἐντεῦθεν πρὸς τὸν αὐχένα. λάγνου σημεῖα. λευκόχρως καὶ δασὺς εὐθείαις θριξὶ καὶ παχείαις καὶ μελαίναις· καὶ οἱ κρόταφοι δασεῖς εὐθείαις θριξί· λιπαρὸν τὸ ὀμμάτιον καὶ μάργον. φίλυπνοι οἱ τὰ ἄνω μεῖζω ἔχοντες καὶ γυπώδεις καὶ θερμοί, εὐεκτικὴν σάρκα ἔχοντες, καὶ γλαφυροὶ τὰ εἶδη, καὶ δασεῖς τὰ περὶ τὴν κοιλίαν. μνήμονες οἱ τὰ ἄνω ἐλάττονα ἔχοντες καὶ γλαφυρὰ καὶ σαρκωδέστερα.

Δοκεῖ δέ μοι ἡ ψυχὴ καὶ τὸ σῶμα συμπαθεῖν ἀλλήλοις· καὶ ἡ τῆς ψυχῆς ἕξις ἀλλοιουμένη συναλλοιοῖ τὴν τοῦ σώματος μορφήν, πάλιν τε ἡ τοῦ σώματος μορφή ἀλλοιουμένη συναλλοιοῖ τὴν τῆς ψυχῆς ἕξιν. ἐπειδὴ γὰρ ἐστὶ ψυχῆς τὸ ἀνιᾶσθαι τε καὶ εὐφραίνεσθαι, καταφανὲς ὅτι οἱ ἀνιώμενοι σκυθρωπότεροί εἰσι καὶ οἱ εὐφραίνόμενοι ἱλαροί. εἰ μὲν οὖν ἦν τῆς ψυχῆς λελυμένης ἔτι τὴν ἐπὶ τοῦ σώματος μορφήν μένειν, ἦν μὲν ἂν καὶ οὕτως ἡ ψυχὴ τε καὶ τὸ σῶμα συμπαθῇ, οὐ μέντοι συνδιατελοῦντα ἀλλήλοις. νῦν δὲ καταφανὲς ὅτι ἐκάτερον ἐκατέρῳ ἔπεται. μάλιστα μέντοι ἐκ τοῦδε δῆλον γένοιτο. μανία γὰρ δοκεῖ εἶναι περὶ ψυχὴν, καὶ οἱ ἰατροὶ φαρμάκοις καθαίροντες τὸ σῶμα καὶ διαίταις τισὶ πρὸς αὐτοῖς χρησάμενοι ἀπαλλάττουσι τὴν ψυχὴν τῆς μανίας. ταῖς δὲ τοῦ σώματος θεραπείαις καὶ ἅμα ἢ τε τοῦ σώματος μορφή λέλυται καὶ ἡ ψυχὴ μανίας ἀπήλλακται. ἐπειδὴ οὖν ἅμα ἀμφοτέρω λύονται, δῆλον ὅτι συνδιατελοῦσιν ἀλλήλοις. συμφανὲς δὲ καὶ ὅτι ταῖς δυνάμεσι τῆς ψυχῆς ὅμοιαι αἱ μορφαὶ τοῖς σώμασιν ἐπιγίνονται, ὥστ' ἐστὶν ἅπαντα ἐν τοῖς ζώοις τοῦ αὐτοῦ τινὸς δηλωτικά. πολλὰ δὲ καὶ ὧν διαπράττεται τὰ ζῶα, τὰ μὲν ἴδια ἐκάστου γένους πάθη τῶν ζώων ἐστί, τὰ δὲ κοινά. ἐπὶ μὲν οὖν τοῖς ἰδίοις ἔργοις τῆς ψυχῆς ἴδια τὰ πάθη κατὰ τὸ σῶμα, ἐπὶ δὲ τοῖς κοινοῖς τὰ κοινά. κοινὰ μὲν οὖν ἐστὶν ὕβρις τε καὶ ἡ περὶ τὰ ἀφροδίσια ἔκστασις. τῶν μὲν οὖν λοφούρων κοινόν ἐστὶν ὕβρις, τῶν δὲ ὄνων τε καὶ συῶν ἡ περὶ τὰ ἀφροδίσια ἕξις. ἴδιον δ' ἐστὶν ἐπὶ μὲν τῶν κυνῶν τὸ λοῖδορον, ἐπὶ δὲ τῶν ὄνων τὸ ἄλυπον. ὥς μὲν [809a] οὖν τὸ κοινόν τε καὶ τὸ ἴδιον χρῆ

διελέσθαι, εἴρηται. δεῖ μέντοι πρὸς ἅπαντα πολλῆς συνηθείας, εἰ μέλλει τις αὐτὸς ἔσεσθαι ἰκανὸς περὶ τούτων ἕκαστα λέγειν. ἐπειδὴ γὰρ τὰ ὀρώμενα ἐπὶ τῶν σωμάτων λέγεται ἀναφέρεσθαι ἐπὶ τὰς ὁμοιότητας τὰς τε ἀπὸ τῶν ζώων καὶ τὰς ἀπὸ τῶν πράξεων γινόμενας, καὶ ιδέαι τινὲς ἄλλαι ἀπὸ θερμότητων καὶ ἀπὸ ψυχροτήτων γίνονται, ἔστι τε τούτων ἓνα τῶν ἐπιφαινομένων ἐπὶ τε τοῖς σώμασι μικραῖς διαφοραῖς κεχρημένα καὶ τῷ αὐτῷ ὀνόματι προσαγορευόμενα, οἷον αἱ τε ἀπὸ φόβων ὠχρότητες καὶ ἀπὸ πόνων (αὗται γὰρ ὀνόματί τε τῷ αὐτῷ κέχρηται, καὶ διαφορὰν μικρὰν ἔχουσι πρὸς ἀλλήλας), μικρὰς δὲ οὐσης τῆς διαφορᾶς οὐ ῥάδιον γινώσκειν ἀλλὰ ἢ ἐκ τῆς συνηθείας τῆς μορφῆς τὴν ἐπιπρέπειαν εἰληφότα, ἔστι μὲν οὖν καὶ τάχιστος καὶ ἄριστος ὁ ἀπὸ τῆς ἐπιπρεπείας, καὶ ἔστι γε οὕτως τούτῳ χρώμενον πολλὰ διαγινώσκειν. καὶ οὐ μόνον καθόλου χρήσιμον ἐστίν, ἀλλὰ καὶ πρὸς τὴν τῶν σημείων ἐκλογὴν· ἕκαστον γὰρ τῶν ἐκλεγόμενων καὶ πρέπειν δεῖ τοιοῦτον οἷον τὸ ἐκλεγόμενον θέλει. ἔτι τε κατὰ τὴν ἐκλογὴν τῶν σημείων, καὶ τῷ συλλογισμῷ, ᾧ δεῖ χρῆσθαι ὅπου ἂν τι τύχη, προστιθέντας τοῖς προσοῦσι τὰ προσήκοντα, οἷον εἰ ἀναιδὴς τε εἴη καὶ μικρολόγος, καὶ κλέπτῃς ἂν εἴη καὶ ἀνελεύθερος, καὶ κλέπτῃς μὲν ἐπομένως τῇ ἀναιδείᾳ, τῇ δὲ μικρολογίᾳ ἀνελεύθερος. ἐπὶ μὲν οὖν τῶν τοιούτων ἐκάστου δεῖ τοῦτον τὸν τρόπον προσαρμόζοντα τὴν μέθοδον ποιῆσθαι.

Νυνὶ δὲ πρῶτον πειράσομαι τῶν ζώων διελέσθαι, ὅποια αὐτῶν προσήκει διαλλάττειν πρὸς τὸ εἶναι ἀνδρεῖα καὶ δειλὰ καὶ δίκαια καὶ ἄδिका. διαιρετέον δὲ τὸ τῶν ζώων γένος εἰς δύο μορφάς, εἰς ἄρσεν καὶ θῆλυ, προσάπτοντα τὸ πρέπον ἐκατέρᾳ μορφῇ. ἔστι δὲ ὅμοια. ἐπιχειροῦμεν οὖν τρέφειν τῶν θηρίων προσηγέστερα καὶ μαλακώτερα τὰς ψυχὰς τὰ θήλεα τῶν ἀρρένων, ἥττόν τε ῥωμαλεούμενα, τὰς τε τροφὰς καὶ τὰς χειροθεσίας μᾶλλον προσδεχόμενα. ὥστε τοιαῦτα ὄντα εἴη που ἂν ἀθυμότερα τῶν ἀρρένων. καταφανὲς δὲ τοῦτο ἐξ ἡμῶν πού ἐστιν, ὅτι ἐπὶ ὑπὸ θυμοῦ κρατηθῶμεν, δυσπαραπιστότεροί τε, καὶ μάλιστα ἐρρώμεθα πρὸς τὸ μηδαμῇ μηδὲν εἶξαι, ἐπὶ τὸ βιάζεσθαι δὲ καὶ πρᾶξαι φερόμεθα, πρὸς ὃ ἂν ὁ θυμὸς ὀρμήσῃ. δοκεῖ δέ μοι καὶ κακουργότερα γίνεσθαι τὰ θήλεα τῶν ἀρρένων, καὶ προπετέστερά τε καὶ ἀναλκέστερα. [809b] αἱ μὲν οὖν γυναῖκες καὶ τὰ περὶ ἡμᾶς τρεφόμενα καὶ πάνυ που φανερά ὄντα· τὰ δὲ περὶ τὴν ὕλην πάντες

ὁμολογοῦσιν οἱ νομεῖς τε καὶ θηρευταὶ ὅτι τοιαῦτά ἐστιν οἷα προεῖρηται. ἀλλὰ μὴν καὶ τόδε δῆλον, ὅτι ἕκαστον ἐν ἐκάστῳ γένει θῆλυ ἄρρενος μικροκεφαλώτερόν ἐστι καὶ στενωπροσωπότερον καὶ λεπτοτραχηλότερον, καὶ τὰ στήθη ἀσθενέστερα ἔχει, καὶ ἀπλευρότερα ἐστὶ, τὰ τε ἰσχία καὶ τοὺς μηρούς περισαρκότερα τῶν ἀρρένων, γονύκροτα δὲ καὶ τὰς κνήμας λεπτὰς ἔχοντα, τοὺς τε πόδας κομψότερους, τὴν τε τοῦ σώματος ὅλην μορφήν ἡδῖω μάλιστ' ἂν ἢ γενναιοτέραν, ἀνευρότερα δὲ καὶ μαλακώτερα, ὑγροτέραις σαρκὶ κεκρημένα. τὰ δὲ ἄρρενα τούτοις ἅπασιν ἐναντία, τὴν φύσιν ἀνδρειοτέραν καὶ δικαιοτέραν εἶναι γένει, τὴν δὲ τοῦ θήλεος δειλοτέραν καὶ ἀδικοτέραν. τούτων οὕτως ἐχόντων, φαίνεται τῶν ζώων ἀπάντων λέων τελεώτατα μετετληφέναι τῆς τοῦ ἄρρενος ιδέας. ἔστι γὰρ ἔχων στόμα εὐμέγεθες, τὸ δὲ πρόσωπον τετραγωνότερον, οὐκ ἄγαν ὀστῶδες, τὴν ἄνω τε γένυν οὐ προεξεστηκυῖαν ἀλλὰ ἰσορροποῦσαν τῇ κάτω, ῥῖνα δὲ παχυτέραν ἢ λεπτοτέραν, χαροπούς ὀφθαλμοὺς ἐγκοίλους, οὐ σφόδρα περιφερεῖς οὔτε ἄγαν προμήκεις, μέγεθος δὲ μέτριον, ὄφρυν εὐμεγέθη, μέτωπον τετράγωνον, ἐκ μέσου ὑποκοιλότερον, πρὸς δὲ τὰς ὀφρῦς καὶ τὴν ῥῖνα ὑπὸ τοῦ μετώπου οἷον νέφος ἐπανεστηκός. ἄνωθεν δὲ τοῦ μετώπου κατὰ τὴν ῥῖνα ἔχει τρίχας ἐκκλινεῖς οἷον ἂν ἄσιλον, κεφαλὴν μετρίαν, τράχηλον εὐμήκη, πάχει σύμμετρον, θριξὶ ξανθαῖς κεκρημένον, οὐ φριξαῖς οὔτε ἄγαν ἀπεστραμμέναις· τὰ περὶ τὰς κλεῖδας εὐλυτώτερα μᾶλλον ἢ συμπεφραγμένα· ὦμους ῥωμαλέους, καὶ στήθος νεανικόν, καὶ τὸ μετάφρενον πλατὺ καὶ εὐπλευρον καὶ εὐνωτον ἐπικεικῶς· ζῶον ἀσαρκότερον τὰ ἰσχία καὶ τοὺς μηρούς· σκέλη ἐρρωμένα καὶ νευρώδη, βάσιν τε νεανικὴν, καὶ ὅλον τὸ σῶμα ἀρθρῶδες καὶ νευρῶδες, οὔτε λίαν σκληρόν οὔτε λίαν ὑγρόν. βαδίζον δὲ βραδέως, καὶ μεγάλα διαβαῖνον, καὶ διασαλεῦον ἐν τοῖς ὤμοις, ὅταν πορεύηται. τὰ μὲν οὖν περὶ τὸ σῶμα τοιοῦτον· τὰ δὲ περὶ τὴν ψυχὴν δοτικὸν καὶ ἐλεύθερον, μεγαλόψυχον καὶ φιλόνικον, καὶ πρᾶν καὶ δίκαιον καὶ φιλόστοργον πρὸς ἃ ἂν ὁμιλήσῃ. ἡ δὲ πάρδαλις τῶν ἀνδρείων εἶναι δοκούντων θηλυμορφότερόν ἐστιν, ὅτι μὴ κατὰ τὰ σκέλη· τούτοις δὲ συνεργεῖ καὶ τι ἔργον ῥώμης ἀπεργάζεται. ἔστι γὰρ ἔχων πρόσωπον μικρόν, στόμα μέγα, ὀφθαλμοὺς μικροὺς, [810a] ἐκλεύκους, ἐγκοίλους, αὐτοὺς δὲ περιπολαιότερους· μέτωπον προμηκέστερον, πρὸς τὰ ὦτα περιφερέστερον ἢ ἐπιπεδώτερον· τράχηλον μακρὸν ἄγαν καὶ λεπτόν, στήθος ἄπλευρον, καὶ μακρὸν

νῶτον, ἰσχία σαρκώδη καὶ μηρούς, τὰ δὲ περὶ τὰς λαγόνας καὶ γαστέρα ὁμαλὰ μᾶλλον· τὸ δὲ χρῶμα ποικίλον, καὶ ὅλον ἄναρθρόν τε καὶ ἀσύμμετρον. ἡ μὲν οὖν τοῦ σώματος ἰδέα τοιαύτη, τὰ δὲ περὶ τὴν ψυχὴν μικρὸν καὶ ἐπὶ κλοπον καὶ ὅλως εἰπεῖν δολερὸν. τὰ μὲν οὖν ἐκπρεπέστερα μετεिल्φότα ζῶα τῶν δοκούντων ἀνδρείων εἶναι τῆς τε τοῦ ἄρρενος ιδέας καὶ τῆς τοῦ θήλεος εἴρηται. τὰ δ' ἄλλα οἷα τυγχάνει, ῥάδιον ἤδη μετιέναι. ὅσα δὲ πρὸς τὸ φυσιογενωμονῆσαι συνιδεῖν ἀρμόττει ἀπὸ τῶν ζώων, ἐν τῇ τῶν σημείων ἐκλογῇ ῥηθήσεται.

Ἡ δὲ ἐκλογὴ τῶν σημείων ἡ κατὰ τοὺς ἀνθρώπους ὧδε λαμβάνεται. ὅσοις οἱ πόδες εὐφυεῖς τε καὶ μεγάλοι διηρθρωμένοι τε καὶ νευρώδεις, ἐρρωμένοι τὰ περὶ τὴν ψυχὴν· ἀναφέρεται ἐπὶ τὸ ἄρρεν γένος. ὅσοι δὲ τοὺς πόδας μικροὺς στενοὺς ἀνάρθρους ἔχουσιν, ἡδίους τε ἰδεῖν ἢ ῥωμαλεωτέρους, μαλακοὶ τὰ περὶ τὴν ψυχὴν· ἀναφέρεται ἐπὶ τὸ θῆλυ γένος. οἷς τῶν ποδῶν οἱ δάκτυλοι καμπύλοι, ἀναιδεῖς, καὶ ὅσοις ὄνυχες καμπύλαι· ἀναφέρεται ἐπὶ τοὺς ὄρνεις τοὺς γαμψόνυχας. οἷς τῶν ποδῶν τὰ δάκτυλα συμπεφραγμένα ἐστί, δειμαλέοι· ἀναφέρεται ἐπὶ τοὺς ὄρνυγας τοὺς στενόποδας τῶν λιμναίων. ὅσοις τὰ περὶ τὰ σφυρὰ νευρώδη τε καὶ διηρθρωμένα ἐστίν, εὐρωστοὶ τὰς ψυχάς· ἀναφέρεται ἐπὶ τὸ ἄρρεν γένος. ὅσοι τὰ σφυρὰ σαρκώδεις καὶ ἄναρθροι, μαλακοὶ τὰς ψυχάς· ἀναφέρεται ἐπὶ τὸ θῆλυ γένος. ὅσοι τὰς κνήμας ἔχουσιν ἡρθρωμένας τε καὶ νευρώδεις καὶ ἐρρωμένας, εὐρωστοὶ τὴν ψυχὴν· ἀναφέρεται ἐπὶ τὸ ἄρρεν. ὅσοι δὲ τὰς κνήμας λεπτὰς νευρώδεις ἔχουσι, λάγνοι· ἀναφέρεται ἐπὶ τοὺς ὄρνιθας. ὅσοι τὰς κνήμας περιπλέους σφόδρα ἔχουσιν, οἷον ὀλίγου διαρρηγνυμένας, βδελυροὶ καὶ ἀναιδεῖς· ἀναφέρεται ἐπὶ τὴν ἐπιπρέπειαν. οἱ γονύκροτοι κίναῖδοι· ἀναφέρεται ἐπὶ τὴν ἐπιπρέπειαν. οἱ τοὺς μηροὺς ὀστώδεις καὶ νευρώδεις ἔχοντες εὐρωστοὶ· ἀναφέρεται ἐπὶ τὸ ἄρρεν. οἱ δὲ τοὺς μηροὺς ὀστώδεις καὶ περιπλέους ἔχοντες μαλακοὶ· ἀναφέρεται [810b] ἐπὶ τὸ θῆλυ. ὅσοι δὲ πῦγα ὀξεῖαν ὀστώδη ἔχουσιν, εὐρωστοὶ, ὅσοι δὲ σαρκώδη πίονα ἔχουσι, μαλακοὶ. ὅσοι δὲ ἔχουσιν ὀλίγην σάρκα, οἷον ἀπωμοργμένα, κακοήθεις· ἀναφέρεται ἐπὶ τοὺς πιθήκους. οἱ ζωνοὶ φιλόθηροι· ἀναφέρεται ἐπὶ τοὺς λέοντας καὶ τοὺς κύνας. ἴδοι δ' ἂν τις καὶ τῶν κυνῶν τοὺς φιλοθηροτάτους ζωνοὺς ὄντας. οἷς τὰ περὶ τὴν κοιλίαν λαπαρά, εὐρωστοὶ· ἀναφέρεται ἐπὶ τὸ ἄρρεν. ὅσοι δὲ μὴ λαπαροί, μαλακοὶ· ἀναφέρεται ἐπὶ τὴν ἐπιπρέπειαν. ὅσοις τὸ νῶτον εὐμέγεθές

Μακροβάμων καὶ βραδυβάμων εἶη ἂν νωθρεπιθέτης τελεστικός, ὅτι τὸ μακρὰ βαίνειν ἀνυστικόν, τὸ βραδέως δὲ μελλητικόν. βραχυβάμων βραδυβάμων νωθρεπιθέτης οὐ τελεστικός, ὅτι τὸ βραχέα βαίνειν καὶ βραδέως οὐκ ἀνυστικόν. μακροβάμων ταχυβάμων οὐκ ἐπιθετικός, τελεστικός, ὅτι τὸ μὲν τάχος τελεστικόν, ἡ δὲ μακρότης οὐκ ἀνυστικόν. βραχυβάμων ταχυβάμων ἐπιθετικός, οὐ τελεστικός. περὶ δὲ χειρὸς καὶ πήχεος καὶ βραχίονος φορᾶς, αἱ αὐταὶ ἀναφέρονται. οἱ δὲ τοῖς ὤμοις ἐπισαλεύοντες ὀρθοῖς ἐκτεταμένοις γαλεαγκῶνες· ἀναφέρεται ἐπὶ τοὺς ἵππους. οἱ τοῖς ὤμοις ἐπενσαλεύοντες ἐγκεκυφότες μεγαλόφρονες· ἀναφέρεται ἐπὶ τοὺς λέοντας. οἱ δὲ τοῖς ποσὶν ἐξεστραμμένοις πορευόμενοι καὶ ταῖς κνήμαις θηλείαις· ἀναφέρεται ἐπὶ τὰς γυναῖκας. οἱ δὲ τοῖς σώμασι περικλῶμενοι καὶ ἐντριβόμενοι κόλακες· ἀναφέρεται ἐπὶ τὸ πάθος. οἱ ἐγκλινόμενοι εἰς τὰ δεξιὰ ἐν τῷ πορεύεσθαι κίναιδοι· ἀναφέρεται ἐπὶ τὴν ἐπιπρέπειαν. οἱ εὐκινήτους τοὺς ὀφθαλμοὺς ἔχοντες ὀξεῖς, ἄρπαστικοί· ἀναφέρεται ἐπὶ τοὺς ἰέρακας. οἱ σκαρδαμύκται δειλοί, ὅτι ἐν τοῖς ὄμμασι πρῶτα τρέπονται. οἱ κατιλλαντιωρίαν τε, καὶ οἷς τὸ ἕτερον βλέφαρον ἐπιβέβηκε τοῖς ὀφθαλμοῖς, κατὰ μέσον τῆς ὄψεως ἐστηκυίας, καὶ οἱ ὑπὸ βλέφαρα τὰ ἄνω τὰς ὀψίας ἀνάγοντες, μαλακόν τε βλέποντες, καὶ οἱ τὰ βλέφαρα ἐπιβεβληκότες, ὅλως τε πάντες οἱ μαλακόν τε καὶ διακεχυμένον βλέποντες, ἀναφέρονται ἐπὶ τὴν ἐπιπρέπειαν καὶ τὰς γυναῖκας. οἱ τοὺς ὀφθαλμοὺς διὰ συχνοῦ χρόνου κινοῦντες, ἔχοντές τε βάμμα λευκώματος ἐπὶ τῷ ὀφθαλμῷ, ὥς προσεστηκότας, ἐννοητικοί· ἂν γὰρ πρὸς τινὶ ἐννοίᾳ σφόδρα γένηται ἡ ψυχὴ, ἴσταται καὶ ἡ ὄψις.

Οἱ μέγα φωνοῦντες βαρύτονον ὕβρισταί· ἀναφέρεται ἐπὶ τοὺς

όνους. ὅσοι δὲ φωνοῦσιν ἀπὸ βαρέος ἀρξάμενοι, τελευτῶσι δὲ εἰς ὀξύ, δυσθυμικοί, ὀδύρται· ἀναφέρεται ἐπὶ τοὺς βοῦς καὶ ἐπὶ τὸ πρέπον τῇ φωνῇ. ὅσοι δὲ ταῖς φωναῖς ἀξείαις μαλακαῖς κεκλασμέναις διαλέγονται, κίναιδοι· ἀναφέρεται [813b] ἐπὶ τὰς γυναῖκας καὶ ἐπὶ τὴν ἐπιτρέπειαν. ὅσοι βαρύτονον φωνοῦσι μέγα, μὴ πεπλεγμένον, ἀναφέρεται ἐπὶ τοὺς εὐρώστους κύνας καὶ ἐπὶ τὴν ἐπιτρέπειαν. ὅσοι μαλακὸν ἄτονον φωνοῦσι, πραεῖς· ἀναφέρεται ἐπὶ τὰς οἷς. ὅσοι δὲ φωνοῦσιν ὀξύ καὶ ἐγκεκραγός, μάργοι· ἀναφέρεται ἐπὶ τὰς αἴγας.

Οἱ μικροὶ ἄγαν ὀξεῖς· τῆς γὰρ τοῦ αἵματος φορᾶς μικρὸν τόπον κατεχούσης καὶ αἱ κινήσεις ταχὺ ἄγαν ἀφικνοῦνται ἐπὶ τὸ φρονοῦν. οἱ δὲ ἄγαν μεγάλοι βραδεῖς· τῆς γὰρ τοῦ αἵματος φορᾶς μέγαν τόπον κατεχούσης αἱ κινήσεις βραδέως ἀφικνοῦνται ἐπὶ τὸ φρονοῦν. ὅσοι τῶν μικρῶν ξηραῖς σαρκὶ κεκρημένοι εἰσὶν ἢ καὶ χρώμασιν, ἃ διὰ θερμότητα τοῖς σώμασιν ἐπιγίνονται, οὐδὲν ἀποτελοῦσιν· οὔσης γὰρ τῆς φορᾶς ἐν μικρῷ καὶ ταχείας διὰ τὸ πυρῶδες, οὐδέποτε κατὰ ταῦτόν ἐστι τὸ φρονεῖν, ἀλλὰ ἄλλοτ' ἐπ' ἄλλων, πρὶν τὸ ὑπερέχον περᾶναι. ὅσοι δὲ τῶν μεγάλων ὑγραῖς σαρκὶ κεκρημένοι, ἢ καὶ χρώμασιν ἃ διὰ ψυχρότητα ἐγγίνονται, οὐδὲν ἐπιτελοῦσιν· οὔσης γὰρ τῆς φορᾶς ἐν μεγάλῳ τόπῳ καὶ βραδείας διὰ τὴν ψυχρότητα, οὐ συνανύει ἀφικνουμένην ἐπὶ τὸ φρονοῦν. ὅσοι δὲ τῶν μικρῶν ὑγραῖς σαρκὶ κεκρημένοι εἰσὶ καὶ χρώμασι διὰ ψυχρότητα, γίνονται ἐπιτελεστικοί· οὔσης γὰρ τῆς κινήσεως ἐν μικρῷ, τὸ δυσκίνητον τῆς κράσεως συμμετρίαν παρέσχε τὸ πρῶτον ἐπιτελεῖν. ὅσοι δὲ τῶν μεγάλων ξηραῖς σαρκὶ κεκρημένοι εἰσὶ καὶ χρώμασι διὰ θερμότητα, γίνονται ἐπιτελεστικοὶ καὶ αἰσθητικοί· τὴν γὰρ τοῦ μεγέθους ὑπερβολὴν σαρκῶν τε καὶ χρώματος ἢ θερμότης ἠκέσατο, ὥστε σύμμετρον εἶναι πρὸς τὸ ἐπιτελεῖν. τὰ μὲν οὖν μεγέθεσιν ὑπερβάλλοντα τῶν σωμάτων ἢ σμικρότησιν ἐλλείποντα, ὡς τυχόντα ἐπιτελεστικά ἐστι καὶ ὡς ἀτελῇ, εἴρηται. ἢ δὲ τούτων μέση φύσις πρὸς τὰς αἰσθήσεις κρατίστη καὶ τελεστικωτάτη, οἷς ἂν ἐπιθῇται· αἱ γὰρ κινήσεις οὐ διὰ πολλοῦ οὔσαι ραδίως ἀφικνοῦνται πρὸς τὸν νοῦν· οὔσαί τε οὐ κατὰ μικρὸν ὑπερχωροῦσιν. ὥστε τὸν τελεώτατον πρὸς τὸ ἐπιτελεῖν τε ἃ ἂν προθῇται καὶ αἰσθάνεσθαι μέλλοντα μέτριον δεῖ εἶναι τὸ μέγεθος. οἱ ἀσύμμετροι πανοῦργοι· [814a] ἀναφέρεται ἐπὶ τὸ πάθος καὶ τὸ θῆλυ. εἰ γὰρ οἱ ἀσύμμετροι πανοῦργοι, οἱ σύμμετροι δίκαιοι ἂν εἶσαν καὶ ἀνδρεῖοι. τὴν δὲ τῆς συμμετρίας ἀναφορὰν πρὸς τὴν τῶν σωμάτων εὐαγωγίαν καὶ

εὐφυΐαν ἀνοιστέον, ἀλλ' οὐ πρὸς τὴν τοῦ ἄρρενος ιδέαν, ὥσπερ ἐν ἀρχῇ διηρέθη. καλῶς δ' ἔχει καὶ πάντα τὰ σημεῖα, ὅσα προείρηται, ἀναφέρειν ἐπὶ τὴν ἐπιπρέπειαν καὶ εἰς ἄρρεν καὶ θῆλυ· ταῦτα γὰρ τελεωτάτην διαίρεσιν διήρηται, καὶ ἐδείχθη ἄρρεν θήλεος δικαιότερον καὶ ἀνδρειότερον καὶ ὅλως εἰπεῖν ἄμεινον. ἐν ἀπάσῃ δὲ [814b] τῇ τῶν σημείων ἐκλογῇ ἕτερα ἐτέρων σημεῖα μᾶλλον δηλοῦσιν ἐναργῶς τὸ ὑποκείμενον. ἐναργέστερα δὲ τὰ ἐν ἐπικαιροτάτοις τόποις ἐγγινόμενα. ἐπικαιρότατος δὲ τόπος ὁ περὶ τὰ ὄμματά τε καὶ τὸ μέτωπον καὶ κεφαλὴν καὶ πρόσωπον, δεύτερος δὲ ὁ περὶ τὰ στήθη καὶ ὦμους, ἔπειτα περὶ τὰ σκέλη τε καὶ πόδας· τὰ δὲ περὶ τὴν κοιλίαν ἥκιστα. ὅλως δὲ εἰπεῖν οὗτοι οἱ τόποι ἐναργέστατα σημεῖα παρέχονται, ἐφ' ὧν καὶ φρονήσεως πλείστης ἐπιπρέπεια γίνεται.

Περὶ Θαυμασίων Ἀκουσμάτων (830a) On Marvellous Things Heard

1 Ἐν τῇ Παιονίᾳ φασὶν ἐν τῷ ὄρει τῷ Ἡσαίνῳ καλουμένῳ, ὃ τὴν Παιονικὴν καὶ τὴν Μαιδικὴν ὀρίζει, εἶναι τι θηρίον τὸ καλούμενον βόλινθον, ὑπὸ δὲ τῶν Παιόνων μόναιπον. τοῦτον λέγουσι τὴν μὲν ὅλην φύσιν παραπλήσιον εἶναι βοί, διαφέρειν δὲ τῷ μεγέθει καὶ τῇ εὐρωστίᾳ, προσέτι δὲ καὶ τῇ χαίτῃ• ἔχει γὰρ ἀπὸ τοῦ αὐχένος, ὥσπερ ὁ ἵππος, κατατείνουσιν βαθεῖαν σφόδρα, καὶ ἀπὸ τῆς κορυφῆς ἕως τῶν ὀφθαλμῶν. τὰ δὲ κέρατα οὐχ ὥσπερ οἱ βόες, ἀλλὰ κατεστραμμένα, καὶ τὸ ὀξὺ κάτω παρὰ τὰ ὦτα• χωρεῖν δὲ αὐτὰ ἡμιχόου πλεῖον ἐκάτερον αὐτῶν, καὶ μέλανα σφόδρα εἶναι, διαστίλβειν δὲ ὡσανεὶ λελεπισμένα. ὅταν δὲ ἐκδαρῇ τὸ δέρμα, κατέχειν τόπον ὀκτακλίνου. ἡνίκα δὲ πληγῇ, φεύγει, κἂν ἐξαδυνατοῦν μένει. ἔστι δὲ ἡδύκρεων. ἀμύνεται δὲ λακτίζον καὶ προσανοδεῦον ὡς ἐπὶ τέτταρας ὀργυιάς• ῥαδίως δὲ χρῆται τούτῳ καὶ πολλάκις τῷ εἶδει, καὶ ἐπικαίει δ' ὥστ' ἀποψήχεσθαι τὰς τρίχας τῶν κυνῶν. τεταραγμένου μὲν οὖν τοῦτο ποιεῖν φασὶ τὸν ἄφοδον, ἀταράχου δὲ μὴ ἐπικαίειν. ὅταν δὲ τίκτωσι, πλείους γενόμενοι καὶ συναχθέντες ἅμα πάντες οἱ μέγιστοι τίκτουσι καὶ κύκλῳ προσανοδεύουσι• πολλὸν γάρ τι τούτου τοῦ περιττώματος τὸ θηρίον προίεται.

p240 2 Ἡ τοὺς ἐν Ἀραβίᾳ φασὶ καμήλους μὴ ἀναβαίνειν ἐπὶ τὰς μητέρας, ἀλλὰ κἂν βιάσῃται τις, οὐ θέλουσι. καὶ γὰρ ποτε λέγεται, ἐπεὶ οὐκ ἦν ὀχεῖον, τὸν ἐπιμελητὴν καλύψαντα ἐφεῖναι τὸν πῶλον. ὁ δὲ τὸ ὀχεύειν¹ τότε μὲν, ὡς ἔοικε, συνετέλεσε, μικρῷ δ' ὕστερον δάκνων τὸν καμηλίτην ἀπέκτεινεν.

3 Τοὺς κόκκυγας φασὶ τοὺς ἐν Ἑλίκῃ, ὅταν μέλλωσι τίκτειν, μὴ ποιεῖν νεοττιάν, ἀλλ' ἐν ταῖς τῶν φαττῶν ἢ ταῖς τῶν τρυγόνων ἐντίκτειν, καὶ μήτ' ἐπ' ὠάζειν μήτ' ἐκκολάπτειν μήτε τρέφειν αὐτούς• ἀλλ' ὅταν γεννηθῇ ὁ νεοττὸς καὶ ἐκτραφῇ, μέθ' ὧν ἂν οὗτος συνῇ, τούτους ἐκ τῆς νεοττιᾶς ἐκβάλλειν. γίγνεται δ', ὡς ἔοικε, μέγας καὶ

καλός, ὥστε ῥαδίως κατακρατεῖν τῶν λοιπῶν. τούτῳ δὲ χαίρειν φασὶ καὶ τὰς φάττας οὕτως ὥστε καὶ αὐτὰς συνεκβάλλειν ἐκείνῳ τοὺς ἰδίους νεοττούς.

4 Αἱ ἐν Κρήτῃ αἶγες ὅταν τοξευθῶσι, ζητοῦσιν, ὡς ἔοικε, τὸ δίκταμον τὸ ἐκεῖ φυόμενον. ὅταν γὰρ φάγωσιν, εὐθὺς ἐκβάλλουσι τὰ τοξεύματα.

5 Φασὶ τινὰς ἐν Ἀχαΐᾳ τῶν ἐλάφων, ὅταν ἀποβάλωσι τὰ κέρατα, εἰς τοιούτους τόπους ἔρχεσθαι ὥστε μὴ ῥαδίως εὑρεθῆναι. τοῦτο δὲ ποιεῖν διὰ τὸ μὴ ἔχειν ᾧ ἀμυνοῦνται, 831 καὶ διὰ τὸ πονεῖν τοὺς τόπους ὅθεν τὰ κέρατα ἀπέβαλον. πολλαῖς δὲ καὶ κισσὸν ἐπιπεφυκότα ἐν τῷ τῶν κεράτων τόπῳ ὁρᾶσθαι.

6 Ἐν Ἀρμενίᾳ φάρμακόν τί φασὶ φύεσθαι ὃ καλεῖται παρδάλειον. τούτῳ οὖν, ὅταν ὀφθῇ πάρδαλις, κρίσαντες τὸ ἱερεῖον ἀφιᾶσιν. ἡ δὲ ὅταν ᾄψηται αὐτοῦ, ζητεῖ, ὡς ἔοικε, τὴν τοῦ ἀνθρώπου κόπρον. διὸ καὶ οἱ κυνηγοὶ εἰς ἀγγεῖον αὐτὴν p242 ἐμβαλόντες ἕκ τινος δένδρου κρεμῶσιν, ἵνα προσαλλομένη καὶ ὑπέρκωτος γενομένη ὑπ' αὐτοῦ παραλυθῇ καὶ ὑποχείριος γένηται.

7 Ἐν Αἰγύπτῳ δὲ τοὺς τροχίλους φασὶν εἰσπετομένους εἰς τὰ στόματα τῶν κροκοδείλων καθαίρειν αὐτῶν τοὺς ὀδόντας, τὰ σαρκία τὰ ἐνεχόμενα τοῖς ῥύγχεσιν ἐξέλκοντας• τοὺς δ' ἥδεσθαι καὶ μηδὲν βλάπτειν αὐτούς.

8 Τοὺς ἐν Βυζαντίῳ φασὶν ἐχίνους αἰσθάνεσθαι ὅτε βόρεια καὶ νότια πνεῖ πνεύματα, καὶ μεταβάλλειν εὐθὺς τὰς ὁπὰς, καὶ ὅταν μὲν ᾗ νότια, ἐκ τοῦ ἐδάφους τὰς ὁπὰς ποιεῖσθαι, ὅταν δὲ βόρεια, ἐκ τῶν τοίχων.

9 Αἱ ἐν Κεφαλληνίᾳ αἶγες οὐ πίνουσιν, ὡς ἔοικεν, ὥσπερ καὶ τᾶλλα τετράποδα, καθ' ἡμέραν δὲ πρὸς τὸ πέλαγος ἀντία τὰ πρόσωπα ποιήσασαι χάσκουσιν εἰσδεχόμεναι τὰ πνεύματα.

10 Φασὶν ἐν Συρίᾳ τῶν ἀγρίων ὄνων ἓνα ἀφηγεῖσθαι τῆς ἀγέλης, ἐπειδὴν δέ τις νεώτερος ὢν τῶν πώλων ἐπὶ τινὰ θήλειαν ἀναβῇ, τὸν ἀφηγούμενον θυμοῦσθαι, καὶ διώκειν ἕως τούτου ἕως ἂν καταλάβῃ τὸν πῶλον, καὶ ὑποκύψας ἐπὶ τὰ ὀπίσθια σκέλη τῶν στόματι ἀποσπάσῃ τὰ αἰδοῖα.

11 Τὰς χελώνας λέγουσιν, ὅταν ἔχεως φάγωσιν, ἐπεσθίειν τὴν ὀρίγανον, ἐὰν δὲ μὴ θᾷττον εὖρη, ἀποθνήσκειν. πολλοὺς δ' ἀποπειράζοντας τῶν ἀγραυλούντων εἰ τοῦτ' ἀληθές ἐστιν, ὅταν ἴδωσιν αὐτὴν τοῦτο πράττουσαν, ἐκτίλλειν τὴν ὀρίγανον• τοῦτο δὲ

ὅταν ποιήσωσι, μετὰ μικρὸν αὐτὴν ὀραῖσθαι ἀποθνήσκουσιν.

12 Ἡ τοῦ τῆς ἱκτιδος λέγεται αἰδοῖον εἶναι οὐχ ὅμοιον τῇ φύσει τῶν λοιπῶν ζώων, ἀλλὰ στερεὸν ὡς πᾶσι παντὸς οἷον ὁστοῦν, ὅπως ἂν ποτε διακειμένη τύχη. φασὶ δὲ στραγγουρίας αὐτὸ φάρμακον εἶναι ἐν τοῖς ἀρίστοις, καὶ δίδοσθαι ἐπιζυόμενον.

13 Τὸν δρυοκολάπτην φασὶ τὸ ὄρνεον ἐπὶ τῶν δένδρων βαδίζειν ὥσπερ τοὺς ἀσκαλαβώτας, καὶ ὑπτίον καὶ ἐπὶ τὴν γαστέρα. νέμεσθαι δὲ λέγεται καὶ τοὺς ἐκ τῶν δένδρων σκώληκας, καὶ οὕτω σφόδρα κατὰ βάθους ὀρύττειν τὰ δένδρα ζητοῦντα τοὺς σκώληκας ὥστε καὶ καταβάλλειν αὐτά.

14 Φασὶ τοὺς πελεκᾶνας τὰς ἐν τοῖς ποταμοῖς γινομένας κόγχας ὀρύττοντας καταπίνειν, ἔπειτα ὅταν πληθὸς εἰσφρήσωσιν αὐτῶν, ἐξεμεῖν, εἴθ' οὕτως τὰ μὲν κρέα ἐσθίειν τῶν κόγχων, τῶν δ' ὀστράκων μὴ ἄπτεσθαι.

15 Ἐν Κυλλήνῃ φασὶ τῆς Ἀρκαδίας τοὺς κοσσύφους λευκοὺς γίνεσθαι, ἄλλοθι δ' οὐδαμῇ, καὶ φωνὰς ποικίλας προῖεσθαι, ἐκπορεύεσθαι τε πρὸς τὴν σελήνην. τὴν δ' ἡμέραν εἴ τις ἐπιχειροίη, σφόδρα δυσθηράτους εἶναι.

16 Λέγεται δ' ὑπὸ τινων μέλι τὸ καλούμενον ἄνθινον περὶ Μῆλον καὶ Κνίδον γίνεσθαι εὐῶδες μὲν τῇ ὁσμῇ, ὀλιγοχρόνιον δέ, ἐν τούτῳ δὲ καὶ τὴν ἐριθάκην γίνεσθαι.

17 Περί Καππαδοκίαν ἐν τισὶ τόποις ἄνευ κηρίου φασὶν ἐργάζεσθαι τὸ μέλι, γίνεσθαι δὲ τὸ πάχος ὅμοιον ἐλαίῳ.

18 Ἐν Τραπεζοῦντι τῇ ἐν τῷ Πόντῳ γίνεται τὸ ἀπὸ τῆς πύξου μέλι βαρύοσμον• καὶ φασὶ τοῦτο τοὺς μὲν ὑγιαίνοντας ἐξιστάναι, τοὺς δ' ἐπιλήπτους καὶ τελέως ἀπαλλάττειν.

19 Φασὶ δὲ καὶ ἐν Λυδίᾳ ἀπὸ τῶν δένδρων τὸ μέλι συλλέγεσθαι πολὺ, καὶ ποιεῖν ἐξ αὐτοῦ τοὺς ὡς πᾶσι παντὸς οἷον ὁστοῦν, ὅπως ἂν ποτε διακειμένη τύχη. φασὶ δὲ στραγγουρίας αὐτὸ φάρμακον εἶναι ἐν τοῖς ἀρίστοις, καὶ δίδοσθαι ἐπιζυόμενον.

13 Τὸν δρυοκολάπτην φασὶ τὸ ὄρνεον ἐπὶ τῶν δένδρων βαδίζειν ὥσπερ τοὺς ἀσκαλαβώτας, καὶ ὑπτίον καὶ ἐπὶ τὴν γαστέρα. νέμεσθαι δὲ λέγεται καὶ τοὺς ἐκ τῶν δένδρων σκώληκας, καὶ οὕτω σφόδρα κατὰ βάθους ὀρύττειν τὰ δένδρα ζητοῦντα τοὺς σκώληκας ὥστε καὶ καταβάλλειν αὐτά.

14 Φασὶ τοὺς πελεκᾶνας τὰς ἐν τοῖς ποταμοῖς γινομένας κόγχας ὀρύττοντας καταπίνειν, ἔπειτα ὅταν πληθὸς εἰσφρήσωσιν αὐτῶν, ἐξεμεῖν, εἴθ' οὕτως τὰ μὲν κρέα ἐσθίειν τῶν κόγχων, τῶν δ' ὀστράκων μὴ ἄπτεσθαι.

15 Ἐν Κυλλήνῃ φασὶ τῆς Ἀρκαδίας τοὺς κοσσύφους λευκοὺς γίνεσθαι, ἄλλοθι δ' οὐδαμῇ, καὶ φωνὰς ποικίλας προῖεσθαι, ἐκπορεύεσθαι τε πρὸς τὴν σελήνην. τὴν δ' ἡμέραν εἴ τις ἐπιχειροίη, σφόδρα δυσθηράτους εἶναι.

16 Λέγεται δ' ὑπὸ τινων μέλι τὸ καλούμενον ἄνθινον περὶ Μῆλον καὶ Κνίδον γίνεσθαι εὐῶδες μὲν τῇ ὁσμῇ, ὀλιγοχρόνιον δέ, ἐν τούτῳ δὲ καὶ τὴν ἐριθάκην γίνεσθαι.

17 Περί Καππαδοκίαν ἐν τισὶ τόποις ἄνευ κηρίου φασὶν ἐργάζεσθαι τὸ μέλι, γίνεσθαι δὲ τὸ πάχος ὅμοιον ἐλαίῳ.

18 Ἐν Τραπεζοῦντι τῇ ἐν τῷ Πόντῳ γίνεται τὸ ἀπὸ τῆς πύξου μέλι βαρύοσμον• καὶ φασὶ τοῦτο τοὺς μὲν ὑγιαίνοντας ἐξιστάναι, τοὺς δ' ἐπιλήπτους καὶ τελέως ἀπαλλάττειν.

19 Φασὶ δὲ καὶ ἐν Λυδίᾳ ἀπὸ τῶν δένδρων τὸ μέλι συλλέγεσθαι πολὺ, καὶ ποιεῖν ἐξ αὐτοῦ τοὺς ὡς πᾶσι παντὸς οἷον ὁστοῦν, ὅπως ἂν ποτε διακειμένη τύχη. φασὶ δὲ στραγγουρίας αὐτὸ φάρμακον εἶναι ἐν τοῖς ἀρίστοις, καὶ δίδοσθαι ἐπιζυόμενον.

22 Ἐν Ἰλλυριοῖς φασὶ τοὺς Ταυλαντίους καλουμένους ἐκ τοῦ μέλιτος ποιεῖν οἶνον. ὅταν δὲ τὰ κηρία ἐκθλίψωσιν, ὕδωρ ἐπιχέοντες ἔψουσιν ἐν λέβητι ἕως ἂν ἐκλίπη τὸ ἥμισυ, ἔπειτα εἰς κεράμια ἐκχέαντες [καὶ ἡμίσεα ποιήσαντες] τιθέασιν εἰς σανίδας• ἐν ταύταις δὲ φασὶ ζεῖν πολὺν χρόνον, καὶ γίνεσθαι οἰνώδες καὶ ἄλλως ἥδὺ καὶ εὖτονον. ἤδη δὲ τισὶ καὶ τῶν ἐν Ἑλλάδι συμβεβηκέναι λέγουσι τοῦτο, ὥστε μὴδὲν διαφέρειν οἶνου παλαιοῦ• καὶ ζητοῦντας ὕστερον τὴν κρᾶσιν μὴ δύνασθαι εὐρεῖν.

23 Περί Θετταλίαν μνημονεύουσιν ὄφεις ζωογονηθῆναι τοσοῦτους ὥστε, εἰ μὴ ὑπὸ τῶν πελαργῶν ἀνηροῦντο, ἐκχωρῆσαι ἂν αὐτούς. διὸ δὴ καὶ τιμῶσι τοὺς πελαργούς, καὶ κτενεῖν οὐ νόμος• καὶ ἐάν τις κτείνη, ἔνοχος τοῖς αὐτοῖς γίνεται οἷσπερ καὶ ὁ ἀνδροφόνος.

24 Ὡσαύτως καὶ ἐν Λακεδαιμόνι κατά τινας χρόνους μνημονεύεται γενέσθαι τοσοῦτον πλῆθος ὄφεων ὥστε διὰ σπανοσιτίαν καὶ τροφῇ τοὺς p248Λάκωνας χρῆσθαι αὐτοῖς• ὅθεν καὶ τὴν Πυθίαν φασὶ προσαγορεῦσαι αὐτοὺς ὀφιοδείρους.

25 Ἐν Κύπρῳ τῇ νήσῳ λέγεται τοὺς μῦς τὸν σίδηρον ἐσθίειν.

26 Φασὶ δὲ καὶ τοὺς Χάλυβας ἐν τινὶ ὑπερκειμένῳ αὐτοῖς νησιδίῳ τὸ χρυσίον συμφορεῖσθαι παρὰ πλειόνων. διὸ δὴ καὶ τοὺς ἐν τοῖς μετάλλοις ἀνασχίζουσιν, ὡς ἔοικεν.

27 Λέγεται δὲ ἐκ Σούσων εἰς Μηδίαν ἰοῦσιν ἐν τῷ δευτέρῳ σταθμῷ σκορπίων ἄπλετόν τι πλῆθος γίνεσθαι. διὸ καὶ ὁ βασιλεὺς ὁ Περσῶν, ὅτε διοδεύοι, τρεῖς ἡμέρας ἔμενε, πᾶσι τοῖς αὐτοῦ συντάσσων ἐκθηρεύειν• τῷ δὲ πλείστους θηρεύσαντι ἄθλον ἐδίδου.

28 Ἐν Κυρήνῃ δὲ φασιν οὐχ ἐν εἶναι μύων γένος, ἀλλὰ πλείω καὶ διάφορα καὶ ταῖς μορφαῖς καὶ ταῖς χροαῖς• ἐνίους γὰρ πλατυπροσώπους, ὥσπερ αἱ γαλαῖ, γίνεσθαι, τινὰς δὲ ἐχινώδεις, οὓς καλοῦσιν ἐχίνας.

29 Περί Κιλικίαν δὲ φασιν εἶναι ὕδατος συστρεμμάτιον, εἰς ὃ τὰ πεπνιγμένα τῶν ὀρνέων καὶ τῶν λοιπῶν ζῶων ὅταν ἀποβαφῇ, πάλιν ἀναβῶι.

30 Ἐν δὲ Σκύθαις τοῖς καλουμένοις Γελωνοῖς φασὶ θηρίον τι γίνεσθαι, σπάνιον μὲν ὑπερβολῇ, ὃ ὀνομάζεται τάρανδος• λέγεται δὲ τοῦτο μεταβάλλειν τὰς χροὰς τῆς τριχὸς καθ' ὃν ἂν καὶ τόπον ᾗ. διὰ δὲ τοῦτο εἶναι δυσθήρατον [καὶ διὰ τὴν μεταβολὴν] καὶ γὰρ δένδρεσι καὶ τόποις, καὶ ὅλως ἐν οἷς ἂν ᾗ, τοιοῦτον τῇ χροίᾳ γίνεσθαι. θαυμασιώτατον δὲ τὸ τὴν τρίχα μεταβάλλειν• τὰ γὰρ λοιπὰ τὸν

χρῶτα, οἶον ὃ τε χαμαιλέον καὶ ὁ πολύπους. p250τὸ δὲ μέγεθος ὥσανεὶ βοῦς. τοῦ δὲ προσώπου τὸν τύπον ὅμοιον ἔχει ἐλάφω.

31 Λέγεται δὲ τινα ἐν Ἀβύδῳ παρακόψαντα τῇ διανοίᾳ καὶ εἰς τὸ θέατρον ἐρχόμενον ἐπὶ πολλὰς ἡμέρας θεωρεῖν, ὡς ὑποκρινομένων τινῶν, καὶ ἐπισημαίνεσθαι• καὶ ὡς κατέστη τῆς παρακοπῆς, ἔφησεν ἐκεῖνον αὐτῷ τὸν χρόνον ἥδιστα βεβιωθῆαι.

32 Καὶ ἐν Τάραντι δὲ φασιν οἰνοπώλην τινὰ τὴν μὲν νύκτα μαίνεσθαι, τὴν δ' ἡμέραν οἰνοπωλεῖν. καὶ γὰρ τὸ κλειδίον τοῦ οἰκήματος πρὸς τῷ ζωνίῳ διεφύλαττε, πολλῶν δ' ἐπιχειρούντων παρελῆσθαι καὶ λαβεῖν οὐδέποτε ἀπώλεσεν.

33 Ἐν Τήνῳ τῇ νήσῳ φασὶν εἶναι φιάλιον σύγκραμα ἔχον, ἐξ οὗ πῦρ ἀνάπτουσι πάνυ ῥαδίως. καὶ ἐν Βιθυνίᾳ δὲ τῆς Θράκης ἐν τοῖς μετάλλοις γίνεται ὁ καλούμενος σπίνος, ἐξ οὗ φασὶ πῦρ ἀνάπτεσθαι.

34 Ἐν δὲ Λιπάρᾳ τῇ νήσῳ λέγουσιν εἶναι τινα εἰσπνοήν, εἰς ἣν ἐὰν κρύψωσι χύτραν, ἐμβαλόντες ὃ ἂν ἐθέλωσιν ἔψουσιν.

35 833aἜστι δὲ καὶ ἐν Μηδίᾳ καὶ ἐν Ψιττακηνῇ τῆς Περσίδος πυρὰ καιόμενα, τὸ μὲν ἐν Μηδίᾳ ὀλίγον, τὸ δ' ἐν Ψιττακηνῇ πολὺ καὶ καθαρὸν τῇ φλογί• διὸ καὶ μαγειρεῖα πρὸς αὐτῷ κατασκεύασεν ὁ Περσῶν βασιλεύς. ἄμφω δ' ἐν ὁμαλοῖς τόποις καὶ οὐκ ἐν ὑψηλοῖς. ταῦτα δὲ καὶ νύκτωρ καὶ μέθ' ἡμέραν φανερά, τὰ δὲ περὶ Παμφυλίαν νύκτωρ μόνον.

36 Φασὶ δὲ καὶ περὶ Ἀιτιανίαν, πρὸς τοῖς ὁρίοις τῆς Ἀπολλωνιάτιδος, εἶναι τινα πέτραν ἐξ ἧς τὸ μὲν ἀνιὸν πῦρ οὐ φανερόν ἐστιν, ἐπειδὰν δὲ ἔλαιον ἐπιχυθῇ ἐπ' αὐτήν, ἐκφλογούται.

p252 37 Λέγεται δὲ καὶ τὰ ἔξω στηλῶν Ἡρακλείων καίεσθαι, τὰ μὲν διὰ παντός, τὰ δὲ νύκτωρ μόνον, ὡς ὁ Ἄννωνος περίπλους ἱστορεῖ. καὶ τὸ ἐν Λιπάρᾳ δὲ φανερόν καὶ φλογῶδες, οὐ μὴν ἡμέρας, ἀλλὰ νύκτωρ μόνον. εἶναι δὲ καὶ ἐν Πιθηκούσαις φασὶ πυρῶδες μὲν καὶ θερμὸν ἐκτόπως, οὐ μὴν καιόμενον.

38 Τὸ δ' ἐν τῇ Λιπάρᾳ ποτὲ καὶ ἐκλιπεῖν φησὶ Ξενοφάνης ἐπ' ἔτη ἑκκαίδεκα, τῷ δὲ ἐβδόμῳ ἐπανελθεῖν. τὸν δ' ἐν τῇ Αἴτνῃ ῥύακα οὔτε φλογώδη φασὶν οὔτε συνεχῇ, ἀλλὰ διὰ πολλῶν ἐνῶν γίνεσθαι.

39 Λέγεται δὲ καὶ περὶ Λυδίαν ἀναξέσαι πῦρ ἀάμπληθες, καὶ καίεσθαι ἐφ' ἡμέρας ἐπτά.

40 Θαυμαστὸν δὲ τὸ ἐν Σικελίᾳ περὶ τὸν ῥύακα γινόμενον• τὸ γὰρ πλάτος ἐστὶ τὸ τῆς τοῦ πυρὸς ἀναξέσεως τεσσαράκοντα σταδίων, τὸ δὲ ὕψος δι' οὐ φέρεται, τριῶν.

41 Φασί δὲ τὸν ἐν τῇ Θράκῃ λίθον τὸν καλούμενον σπίνον διακοπέντα καίεσθαι, καὶ συντεθέντα πρὸς ἑαυτόν, ὥσπερ τὴν σμαρίλιν, οὕτως κάκεϊνον εἰς ἑαυτόν τεθέντα καὶ ἐπιρραϊνόμενον ὕδατι καίεσθαι. τὸ δ' αὐτὸ ποιεῖν καὶ τὸν μαριέα.

42 Περὶ Φιλίππους τῆς Μακεδονίας εἶναι λέγουσι μέταλλα, ἐξ ὧν τὰ ἐκβαλλόμενα ἀποσύρματα αὐξάνεσθαι φασὶ καὶ φύειν χρυσίον, καὶ τοῦτ' εἶναι φανερόν.

43 ἡ Φασί δὲ καὶ ἐν Κύπρῳ περὶ τὸν καλούμενον Τυρρίαν χαλκὸν ὅμοιον γίνεσθαι. κατακόψαντες γάρ, ὡς ἔοικεν, εἰς μικρὰ σπείρουσιν αὐτόν• εἴθ' ὑδάτων ἐπιγενομένων αὐξάνεται καὶ ἐξανήσι καὶ οὕτως συνάγεται.

p254 44 Φασί δὲ καὶ ἐν Μήλῳ τῇ νήσῳ ἐν τοῖς ἐξορυσσομένοις τόποις τῆς γῆς πάλιν ἀναπληρώματα γίνεσθαι.

45 Περὶ Παιονίαν λέγουσιν, ὅταν συνεχεῖς ὄμβροι γένωνται, εὐρίσκεσθαι περιτηκομένης τῆς γῆς χρυσὸν τὸν καλούμενον ἄπυρον. λέγουσι δ' ἐν τῇ Παιονίᾳ οὕτω χρυσίζειν τὴν γῆν ὥστε πολλοὺς εὐρηκεῖν καὶ ὑπὲρ μνᾶν χρυσοῦ ὀλκήν. τῷ δὲ βασιλεῖ τινά φασιν εὐρόντα ἀνενεγκεῖν δύο βώλους, τὸν μὲν τρεῖς μνᾶς ἄγοντα, τὸν δὲ πέντε• οὓς φασιν ἐπὶ τῆς τραπέζης αὐτῷ παρακεῖσθαι, καὶ ἐπ' ἐκείνων πρῶτον, εἴ τι ἐσθίει, ἀπάρχεσθαι.

46 Φασί δὲ καὶ ἐν Βάκτροις τὸν Ὠξὸν ποταμὸν καταφέρειν βωλία χρυσοῦ πλήθει πολλά, καὶ ἐν Ἰβηρίᾳ δὲ τὸν καλούμενον Θεόδωρον ποταμὸν ἐκβράσσειν τε πολὺ περὶ τὰ χεῖλη χρυσίον, ὁμοίως δὲ καὶ καταφέρειν.

47 Λέγουσι δὲ καὶ ἐν Πιερίᾳ τῆς Μακεδονίας ἄσημόν τι χρυσίον κατορυγμένον ὑπὸ τῶν ἀρχαίων βασιλέων, χασμάτων τεττάρων ὄντων, ἐξ ἐνὸς αὐτῶν ἀναφῆναι χρυσίον τὸ μέγεθος σπιθαμιαῖον.

48 Λέγεται δὲ ἰδιαιτάτην εἶναι γένεσιν σιδήρου τοῦ Χαλυβικοῦ καὶ τοῦ Ἀμισηνοῦ. συμφύεται γάρ, ὥς γε λέγουσιν, ἐκ τῆς ἄμμου τῆς καταφερομένης ἐκ τῶν ποταμῶν. ταύτην δ' οἱ μὲν ἀπλῶς φασὶ πλύναντας καμινεύειν, οἱ δὲ τὴν ὑπόστασιν τὴν γενομένην ἐκ τῆς πλύσεως πολλάκις πλυθεῖσαν συγκαίειν, παρεμβάλλειν δὲ τὸν πυρίμαχον καλούμενον λίθον• εἶναι δ' ἐν τῇ χώρᾳ πολὺν. οὗτος δ' ὁ σίδηρος πολὺ τῶν ἄλλων γίνεται καλλίων. εἰ δὲ μὴ ἐν μιᾷ καμίνῳ ἐκαίετο, οὐδὲν ἔν, ὥς ἔοικε, p256διέφερε τὰργυρίου. μόνον δὲ φασιν αὐτὸν ἀνιώτον εἶναι, οὐ πολὺν δὲ γίνεσθαι.

49 834a Φασί δὲ καὶ ἐν Ἰνδοῖς τὸν χαλκὸν οὕτως εἶναι λαμπρὸν

καὶ καθαρὸν καὶ ἀνίωτον, ὥστε μὴ διαγινώσκεσθαι τῇ χροᾷ πρὸς τὸν χρυσόν, ἀλλ' ἐν τοῖς Δαρείου ποτηρίοις βατιακᾶς εἶναί τινας καὶ πλείους, ἃς εἰ μὴ τῇ ὁσμῇ, ἄλλως οὐκ ἦν διαγινῶναι πότερόν εἰσι χαλκαὶ ἢ χρυσαῖ.

50 Τὸν κασσίτερον τὸν Κελτικὸν τήκεσθαι φασὶ πολὺ τάχιον μολύβδου. σημεῖον δὲ τῆς εὐτηξίας, ὅτι τήκεσθαι δοκεῖ καὶ ἐν τῷ ὕδατι• χρώζει γοῦν, ὡς ἔοικε, ταχύ. τήκεται δὲ καὶ ἐν τοῖς ψύχεσιν, ὅταν γένηται πάγη, ἐγκατακλειομένου ἐντός, ὡς φασί, καὶ συνωθουμένου τοῦ θερμοῦ τοῦ ἐνυπάρχοντος αὐτῷ διὰ τὴν ἀσθένειαν.

51 Ἐν τῷ Πανθείῳ ἐστὶν ἐλαία, καλεῖται δὲ καλλιστέφανος• ταύτης πάντα τὰ φύλλα ταῖς λοιπαῖς ἐλαίαις ἐναντία πέφυκεν• ἔξω γὰρ ἀλλ' οὐκ ἐντός ἔχει τὰ χλωρά. ἀφίησί τε τοὺς πτόρθους ὥσπερ ἡ μύρτος εἰς τοὺς στεφάνους συμμέτρως. ἀπὸ ταύτης φυτὸν λαβὼν ὁ Ἡρακλῆς ἐφύτευσεν Ὀλυμπίασιν, ἀφ' ἧς οἱ στέφανοι τοῖς ἀθληταῖς δίδονται. ἔστι δὲ αὕτη παρὰ τὸν Ἴλισσὸν ποταμόν, σταδίους ἐξήκοντα τοῦ ποταμοῦ ἀπέχουσα• περιωκοδόμηται δέ, καὶ ζημία μεγάλη τῷ θιγόντι αὐτῆς ἐστίν. ἀπὸ ταύτης δὲ τὸ φυτὸν λαβόντες ἐφύτευσαν Ἡλεῖοι ἐν Ὀλυμπίᾳ, καὶ τοὺς στεφάνους ἀπ' αὐτῆς ἔδωκαν.

52 Ἐν τοῖς περὶ Λυδίας μετάλλοις τοῖς περὶ Πέργαμον, ἃ δὴ καὶ Κροῖσος εἰργάσατο, πολέμου τινὸς γενομένου κατέφυγον οἱ ἐργαζόμενοι ἐπ' αὐτά, τοῦ δὲ στομίου ἐποικοδομηθέντος ἀπεπνίγησαν• p258καὶ ὕστερον χρόνῳ πολλῷ τῶν μετάλλων ἀνακαθαρθέντων εὐρέθη οἷς ἐχρῶντο ἀγγεῖοις πρὸς τὰς ὑπὸ χεῖρα χρείας ἀπολελιθωμένα, οἷον ἀμφορεῖς καὶ τὰ τοιουτότροπα. ταῦτα δὴ πεπληρωμένα οὗ τινὸς ἔτυχον ὕγρου ἐλελίθωτο, καὶ προσέτι τὰ ὁστά τῶν ἀνθρώπων.

53 Ἐν τῇ Ἀσκανίᾳ λίμνῃ οὕτω νιτρῶδές ἐστι τὸ ὕδωρ ὥστε τὰ ἱμάτια οὐδενὸς ἐτέρου ρύμματος προσδεῖσθαι• κἂν πλείω χρόνον ἐν τῷ ὕδατι ἐάσῃ τις, διαπίπτει.

54 Περὶ τὴν Ἀσκανίαν λίμνην Πυθόπολις ἐστὶ κόμη ἀπέχουσα Κίου ὡς σταδίους ἑκατὸν εἴκοσι, ἐν ἣ τοῦ χειμῶνος ἀναξηραίνεται πάντα τὰ φρέατα ὥστε μὴ ἐνδέχεσθαι βάψαι τὸ ἀγγεῖον, βτοῦ δὲ θέρους πληροῦται ἕως τοῦ στόματος.

55 Ὁ πορθμὸς ὁ μεταξὺ Σικελίας καὶ Ἰταλίας αὔξεται καὶ φθίνει ἅμα τῷ σεληνίῳ.

56 Καὶ διότι ἐπὶ τῆς ὁδοῦ τῆς εἰς Συρακούσας κρήνη ἐστὶν ἐν λειμῶνι οὔτε μεγάλη οὔτε ὕδωρ ἔχουσα πολὺ• συναπαντήσαντος δὲ εἰς τὸν τόπον ὄχλου πολλοῦ παρέσχεν ὕδωρ ἄφθονον.

57 Ἔστι δὲ καὶ κρήνη τις ἐν Παλικοῖς τῆς Σικελίας, ὡς δεκάκλινος• αὕτη δ' ἀναρρίπτει ὕδωρ εἰς ὕψος ἕξ πήχεις, ὥστε ὑπὸ τῶν ιδόντων νομίζεσθαι κατακλυσθήσεσθαι τὸ πεδίον• καὶ πάλιν εἰς ταὐτὸ καθίσταται. ἔστι δὲ καὶ ὄρκος, ὃς ἅγιος αὐτόθι δοκεῖ εἶναι• ὅσα γὰρ ὁμνυσί τις, γράψας εἰς πινακίδιον ἐμβάλλει εἰς τὸ ὕδωρ. ἐὰν μὲν οὖν εὐορκῇ, ἐπιπολάζει τὸ πινακίδιον• ἐὰν δὲ μὴ εὐορκῇ, τὸ μὲν πινακίδιον βαρὺ γενόμενον ἀφανίζεσθαι φασί, τὸν δ' ἄνθρωπον πίμπρασθαι. διὸ δὴ λαμβάνειν p260τὸν ἱερέα παρ' αὐτοῦ ἐγγύας ὑπὲρ τοῦ καθαίρειν τινὰ τὸ ἱερόν.

58 Δημόνησος ἡ Καλχηδονίων² νῆσος ἀπὸ Δημονήσου τοῦ πρώτου ἐργασαμένου τὴν ἐπωνυμίαν εἴληφεν• ἔχει δ' ὁ τόπος κυανοῦ τὸ μέταλλον καὶ χρυσοκόλλης. ταύτης δ' ἡ καλλίστη πρὸς χρυσίον εὐρίσκει τιμὴν• καὶ γὰρ φάρμακον ὀφθαλμῶν ἐστίν. ἔστι δὲ αὐτόθι χαλκὸς κολυμβητῆς ἐν δυοῖν ὀργυιαῖς τῆς θαλάσσης• ὅθεν ὁ ἐν Σικυῶνι ἐστὶν ἀνδριάς ἐν τῷ ἀρχαίῳ νεῷ τοῦ Ἀπόλλωνος καὶ ἐν Φενεῷ οἱ ὀρεῖχαλκοι καλοῦμενοι. ἐπιγέγραπται δ' αὐτοῖς “Ἡρακλῆς Ἀμφιτρύωνος Ἥλιν ἐλὼν ἀνέθηκεν.” αἰρεῖ δὲ τὴν Ἥλιν ἡγουμένης κατὰ χρησμόν γυναικός, ἧς τὸν πατέρα Αὐγείαν ἀπέκτεινεν. οἱ δὲ τὸν χαλκὸν ὀρύττοντες ὀξυδερκέστατοι γίνονται, καὶ οἱ βλεφαρίδας μὴ ἔχοντες φύουσι• παρὸ καὶ οἱ ἱατροὶ τῷ ἄνθει τοῦ χαλκοῦ καὶ τῇ τέφρᾳ τῇ Φρυγίᾳ χρῶνται πρὸς τοὺς ὀφθαλμούς.

59 Ἔστι δὲ αὐτόθι σπήλαιον ὃ καλεῖται γλαφυρόν• ἐν δὲ τούτῳ κίονες πεπήγασιν ἀπὸ τινων σταλαγμῶν. ἀποδηλοῖ δὲ τοῦτο ἐν τῇ συναγωγῇ τῇ πρὸς τὸ ἔδαφος• ἔστι γὰρ ταύτη στενωτάτον.

60 835aἘκ τοῦ ζεύγους δὲ τῶν ἀετῶν θάτερον τῶν ἐγγόνων ἀλαιοῖος γίνεται παραλλάξ, ἕως ἂν σύζυγα γένηται. ἐκ δὲ ἀλαιοῖων φήνη γίνεται, ἐκ δὲ τούτων περκνοὶ καὶ γῦπες• οὗτοι δ' οὐκέτι διορίζουσι περὶ τοὺς γῦπας, ἀλλὰ γεννῶσι τοὺς μεγάλους γῦπας• οὗτοι δ' εἰσὶν ἄγονοι. σημεῖον δὲ τοῦτο, διότι νεοττιὰν οὐδεὶς ἐώρακε γυπὸς μεγάλου.

61 Θαυμαστὸν δὲ τί φασιν ἐν Ἰνδοῖς περὶ τὸν ἐκεῖ μόλυβδον συμβαίνειν• ὅταν γὰρ τακεῖς εἰς ὕδωρ καταχυθῇ ψυχρόν, ἐκπηδᾷ ἐκ τοῦ ὕδατος.

p262 62 Φασὶ τὸν Μοσσύνοικον χαλκὸν λαμπρότατον καὶ

λευκότατον εἶναι, οὐ παραμιγνυμένου αὐτῷ κασσιτέρου, ἀλλὰ γῆς τινὸς αὐτοῦ γινομένης καὶ συνευνομένης αὐτῷ. λέγουσι δὲ τὸν εὐρόντα τὴν κρᾶσιν μηδένα διδάξαι• διὸ τὰ προγεγονότα ἐν τοῖς τόποις χαλκώματα διάφορα, τὰ δ' ἐπιγιγνόμενα οὐκέτι.

63 Ἐν τῷ Πόντῳ λέγουσι τοῦ χειμῶνος τῶν ὀρνέων τινὰ εὐρίσκεσθαι φωλεύοντα, οὔτε ἀφοδεύοντα, οὔτε δὲ ὅταν τὰ περὰ αὐτῶν τίλλωσιν, αἰσθάνεσθαι, οὔτε ὅταν ἐπὶ τὸν ὀβελίσκον ἀναπαρῇ. ἀλλ' ὅταν ὑπὸ τοῦ πυρὸς διακαυθῇ. πολλοὺς δὲ καὶ τῶν ἰχθύων λέγουσι περικοπέντας καὶ περιτμηθέντας μὴ αἰσθάνεσθαι, ἀλλ' ὅταν ὑπὸ τοῦ πυρὸς διαθερμανθῶσιν.

64 Ἡ μέλιττα δοκεῖ τὰς τροπὰς σημαίνειν τῷ ἐπὶ τὰ ἔργα βαδίζειν, ὃ καὶ οἱ μελιττοπόλοι σημείῳ χρῶνται• ἡρεμία γὰρ αὐτῶν γίνεται. δοκοῦσι δὲ καὶ οἱ τέττιγες ἄδειν μετὰ τροπὰς.

65 Φασὶ δὲ καὶ τὸν ἐχῖνον ἄσιτον διαμένειν ἄχρι ἐνιαυτοῦ.

66 Τὸν δὲ γαλεώτην, ὅταν ἐκδύσῃται τὸ δέρμα, καθάπερ οἱ ὄφεις, ἐπιστραφέντα καταπίνειν• τηρεῖσθαι γὰρ ὑπὸ τῶν ἱατρῶν διὰ τὸ χρήσιμον εἶναι τοῖς ἐπιληπτικοῖς.

67 Λέγουσι δὲ καὶ τὸ τῆς ἄρκτου στέαρ, ὅταν διαπεπηγὸς ᾖ διὰ τὸν χειμῶνα, καθ' ὃν ἂν χρόνον ἐκείνη φωλεῦῃ, αὐξάνεσθαι καὶ ὑπεραίρειν τὰ ἀγγεῖα ἐν οἷς ἂν ᾖ.

68 Ἐν Κυρήνῃ φασὶ τοὺς ὄντας βατράχους ἀφώνους τὸ παράπαν εἶναι. καὶ ἐν Μακεδονίᾳ ἐν τῇ τῶν Ἡμαθιωτῶν χώρα τοὺς σὺς εἶναι μώνυχας.

p264 69 Ἐν Καππαδοκίᾳ φασὶν ἡμίονους εἶναι γονίμους καὶ ἐν Κρήτῃ αἰγεῖρους καρποφόρους.

70 Φασὶ δὲ καὶ ἐν Σερίφῳ τοὺς βατράχους οὐκ ἄδειν• εἰ δὲ εἰς ἄλλον τόπον μετενεχθῶσιν, ἄδουσιν.

71 Ἐν Ἰνδοῖς ἐν τῷ Κέρατι καλουμένῳ ἰχθυδία φασὶ γίνεσθαι ἃ ἐν τῷ ξηρῷ πλανᾶται καὶ ἄλιν ἀποτρέχει εἰς τὸν ποταμόν.

72 Φασὶ δὲ καὶ περὶ Βαθυλῶνά τινες ἰχθύας τινὰς μένειν ἐν ταῖς τρώγλαις ταῖς ἐχούσαις ὑγρότητα ξηραίνομένου τοῦ ποταμοῦ• τούτους ἐξίσοντας ἐπὶ τὰς ἄλως νέμεσθαι, καὶ βαδίζειν ἐπὶ τῶν πτερύγων, καὶ ἀνακινεῖν τὴν οὐράν• καὶ ὅταν διώκωνται, φεύγειν καὶ εἰσδύντας ἀντιπροσώπως ἵστασθαι• πολλάκις γὰρ προσιέναι τινὰς καὶ ἐρεθίζειν. ἔχουσι δὲ τὴν κεφαλὴν ὁμοίαν βατράχῳ θαλαττίῳ, τὸ δὲ ἄλλο σῶμα κωβίῳ, βραγχία δὲ ὥσπερ καὶ οἱ ἄλλοι ἰχθύες.

73 Ἐν Ἡρακλείᾳ δὲ τῇ ἐν τῷ Πόντῳ καὶ ἐν Ῥηγίῳ γίνεσθαι φασιν

ὀρυκτοὺς ἰχθῦς, τούτους δὲ μάλιστα κατὰ τὰ ποτάμια καὶ τὰ ἔνυδρα χωρία. συμβαίνειν δέ ποτε ἀναξηραιομένων τῶν χωρίων κατὰ τινας χρόνους συστέλλεσθαι κατὰ γῆς, εἴτα μᾶλλον ἀναξηραιομένης διώκοντας τὴν ὑγρότητα διέσθαι εἰς τὴν ἰλύν,³ εἴτα ξηραιομένης διαμένειν ἐν τῇ ἱκμάδι, ὥσπερ τὰ ἐν ταῖς φωλεαῖς διαρκοῦντα. ὅταν δὲ ἀνασκάπτονται πρὶν ἢ τὰ ὕδατα ἐπιγενέσθαι, τότε κινεῖσθαι.

74 Φασὶ δὲ καὶ περὶ Παφλαγονίαν τοὺς ὀρυκτοὺς γίνεσθαι ἰχθῦς κατὰ βάθους, τούτους δὲ τῇ ἀρετῇ ἀγαθοὺς, οὔτε ὑδάτων φανερῶν πλησίον p266δόντων οὔτε ποταμῶν ἐπιρρεόντων, ἀλλ' αὐτῆς ζωογονούσης τῆς γῆς.

75 Τὰς ἐν Ἠπείρῳ ἐλάφους κατορύττειν φασὶ τὸ δεξιὸν κέρας, ὅταν ἀποβάλωσι, καὶ εἶναι πρὸς πολλὰ χρήσιμον.

76 Καὶ τὴν λύγκα δέ φασι τὸ οὔρον κατακαλύπτειν διὰ τὸ πρὸς ἄλλα τε χρήσιμον εἶναι καὶ τὰς σφραγίδας.

77 Φασὶ δὲ καὶ τὴν φώκην ἐξεμεῖν τὴν πυτίαν, ὅταν ἀλίσκηται· εἶναι δὲ φαρμακῶδες καὶ τοῖς ἐπιλήπτοις χρήσιμον.

78 Λέγεται δὲ περὶ τὴν Ἰταλίαν ἐν τῷ Κιρκαίῳ ὄρει φάρμακόν τι φύεσθαι θανάσιμον, ὃ τοιαύτην ἔχει τὴν δύναμιν ὥστε, ἂν προσρανθῇ τινί, παραχρῆμα πίπτειν ποιεῖ, 836α καὶ τὰς τρίχας τὰς ἐν τῷ σώματι ἀπομαδᾶν, καὶ τὸ σύνολον τοῦ σώματος διαρρεῖν τὰ μέλη, ὥστε τὴν ἐπιφάνειαν τοῦ σώματος εἶναι τῶν ἀπολλυμένων ἐλεεινήν. τοῦτο δέ φασι μέλλοντας διδόναι Κλεωνύμῳ τῷ Σπαρτιάτῃ Αὐλὸν τὸν Πευκέστιον καὶ Γαῖον φωραθῆναι, καὶ ἐξετασθέντας ὑπὸ Ταραντίνων θανατωθῆναι.

79 Ἐν τῇ Διομηδεῖᾳ νήσῳ, ἣ κεῖται ἐν τῷ Ἀδρία, φασὶν ἱερὸν τι εἶναι τοῦ Διομήδους θαυμαστόν τε καὶ ἅγιον, περὶ δὲ τὸ ἱερὸν κύκλῳ περικαθῆσθαι ὄρνιθας μεγάλους τοῖς μεγέθεσι, καὶ ῥύγχῃ ἔχοντας μεγάλα καὶ σκληρά. τούτους λέγουσιν, ἐὰν μὲν Ἕλληνες ἀποβαίνωσιν εἰς τὸν τόπον, ἡσυχίαν ἔχειν, ἐὰν δὲ τῶν βαρβάρων τινὲς τῶν περιοίκων, ἀνίπτασθαι καὶ αἰωρουμένους καταράσσειν αὐτοὺς εἰς τὰς κεφαλὰς αὐτῶν, καὶ τοῖς ῥύγχεσι τιτρώσκοντας ἀποκτείνειν. μυθεύεται δὲ τούτους γενέσθαι ἐκ τῶν ἐταίρων τῶν τοῦ Διομήδους, p268ναυαγησάντων μὲν αὐτῶν περὶ τὴν νῆσον, τοῦ δὲ Διομήδους δολοφονηθέντος ὑπὸ τοῦ Αἰνέου τοῦ τότε βασιλέως τῶν τόπων ἐκείνων γενομένου.

80 Παρὰ τοῖς Ὀμβρικοῖς φασὶ τὰ βοσκήματα τίκτειν τρις τοῦ ἐνιαυτοῦ, καὶ τοὺς καρποὺς αὐτοῖς τὴν γῆν πολλαπλασίους ἀνίσθαι

τῶν καταβαλλομένων• εἶναι δὲ καὶ τὰς γυναῖκας πολυγόνους καὶ σπανίως ἐν τίκτειν, τὰς δὲ πλείστας δύο καὶ τρία.

81 Ἐν ταῖς Ἠλεκτρῖσι νήσοις, αἱ κεῖνται ἐν τῷ μυχῷ τοῦ Ἀδρίου, φασὶν εἶναι δύο ἀνδριάντας ἀνακειμένους, τὸν μὲν κασσιτέρινον τὸν δὲ χαλκοῦν, εἰργασμένους τὸν ἀρχαῖον τρόπον. λέγεται δὲ τούτους Δαϊδάλου εἶναι ἔργα, ὑπόμνημα τῶν πάλοι, ὅτε Μίνω φεύγων ἐκ Σικελίας καὶ Κρήτης εἰς τούτους τοὺς τόπους παρέβαλε. ταύτας δὲ τὰς νήσους φασὶ προκεχωκέναι τὸν Ἡριδανὸν ποταμόν. ἔστι δὲ καὶ λίμνη, ὡς ἔοικε, πλησίον τοῦ ποταμοῦ, ὕδωρ ἔχουσα θερμόν• ὁσμὴ δ' ἀπ' αὐτῆς βαρεῖα καὶ χαλεπὴ ἀποπνεῖ, καὶ οὔτε ζῶον οὐδὲν πίνει ἐξ αὐτῆς οὔτε ὄρνεον ὑπερίπτεται, ἀλλὰ πίπτει καὶ ἀποθνήσκει. βῆχει δὲ τὸν μὲν κύκλον σταδίων διακοσίων, τὸ δὲ εὖρος ὡς δέκα. μυθεύουσι δὲ οἱ ἐγχώριοι Φαέθοντα κεραυνωθέντα πεσεῖν εἰς ταύτην τὴν λίμνην. εἶναι δ' ἐν αὐτῇ αἰγείρους πολλὰς, ἐξ ὧν ἐκπίπτειν τὸ καλούμενον ἤλεκτρον. τοῦτο δὲ λέγουσιν ὅμοιον εἶναι κόμμι, ἀποσκληρύνεσθαι δὲ ὥσανεὶ λίθον, καὶ συλλεγόμενον ὑπὸ τῶν ἐγχωρίων διαφέρεσθαι εἰς τοὺς Ἑλληνας. εἰς ταύτας οὖν τὰς νήσους Δαΐδαλόν φασιν ἐλθεῖν, καὶ κατασχόντα αὐτὰς ἀναθεῖναι ἐν μιᾷ αὐτῶν τὴν αὐτοῦ εἰκόνα, καὶ τὴν τοῦ υἱοῦ Ἰκάρου ἐν τῇ ἐτέρᾳ. ὕστερον δ' ἐπιπλευσάντων ἐπ' αὐτοὺς Πελασγῶν p270τῶν ἐκπεσόντων ἐξ Ἀργους φυγεῖν τὸν Δαΐδαλον, καὶ ἀφικέσθαι εἰς Ἴκαρον τὴν νῆσον.

82 Ἐν τῇ Σικελίᾳ περὶ τὴν καλουμένην Ἐνναν σπήλαιόν τι λέγεται εἶναι, περὶ ὃ κύκλῳ πεφυκέναι φασὶ τῶν τε ἄλλων ἀνθέων πλῆθος ἀνὰ πᾶσαν ὥραν, πολὺ δὲ μάλιστα τῶν ἴων ἀπέραντόν τινα τόπον συμπεπληρῶσθαι, ἃ τὴν σύνεγγυς χώραν εὐωδίας πληροῖ, ὥστε τοὺς κυνηγοῦντας, τῶν κυνῶν κρατουμένων ὑπὸ τῆς ὁσμῆς, ἐξαδυνατεῖν τοὺς λαγῶς ἰχνεύειν. διὰ δὲ τούτου τοῦ χάσματος ἀσυμφανής ἐστὶν ὑπόνομος, καθ' ὃν φασὶ τὴν ἀρπαγὴν ποιήσασθαι τὸν Πλούτωνα τῆς Κόρης. εὐρίσκεσθαι δὲ φασὶ ἐν τούτῳ τῷ τόπῳ πυροὺς οὔτε τοῖς ἐγχωρίοις ὁμοίους οἷς χρῶνται οὔτε ἄλλοις ἐπεισάκτοις, ἀλλ' ἰδιότητά τινα μεγάλην ἔχοντας. καὶ τούτῳ σημειοῦνται τὸ πρῶτως παρ' αὐτοῖς φανῆναι πύρινον καρπόν. ὅθεν καὶ τῆς Δήμητρος ἀντιποιοῦνται, φάμενοι παρ' αὐτοῖς τὴν θεὸν γεγονέναι.

83 Ἐν Κρήτῃ λύκους καὶ ἄρκτους τοὺς τ' ἔχεις, ὁμοίως δὲ καὶ τὰ παραπλήσια τούτοις θηρία οὐ φασὶ γίνεσθαι διὰ τὸ τὸν Δία γενέσθαι

ἐν αὐτῇ.

84 Ἐν τῇ θαλάσῃ τῇ ἔξω Ἡρακλείων στηλῶν φασὶν ὑπὸ Καρχηδονίων νῆσον εὐρεθῆναι ἐρήμην, ἔχουσαν ὕλην τε παντοδαπὴν καὶ ποταμοὺς πλωτοὺς, καὶ τοῖς λοιποῖς καρποῖς θαυμαστὴν, ἀπέχουσαν δὲ πλειόνων ἡμερῶν πλοῦν• ἐν ἣ ἐπιμισγομένων τῶν Καρχηδονίων πολλάκις διὰ τὴν εὐδαιμονίαν, ἐνίων γε μὴν καὶ οἰκοῦντων, 837α τοὺς προεστῶτας τῶν Καρχηδονίων ἀπείπασθαι θανάτῳ ζημιοῦν τοὺς εἰς αὐτὴν πλευσομένους, καὶ τοὺς ἐνοικοῦντας πάντας ἀφανίσαι, ἵνα μὴ διαγγέλλωσι, p272μῆδὲ πλῆθος συστραφέν ἐπ' αὐτῶν ἐπὶ τὴν νῆσον κυρίας τύχῃ καὶ τὴν τῶν Καρχηδονίων εὐδαιμονίαν ἀφέλῃται.

85 Ἐκ τῆς Ἰταλίας φασὶν ἕως τῆς Κελτικῆς καὶ Κελτολιγύων καὶ Ἰβήρων εἶναι τινα ὁδὸν Ἡράκλειαν καλουμένην, δι' ἣς ἐάν τε Ἕλλην ἐάν τε ἐγγώριός τις πορεύηται, τηρεῖσθαι ὑπὸ τῶν παροικούντων, ὅπως μῆδὲν ἀδικηθῇ• τὴν γὰρ ζημίαν ἐκτίνειν καθ' οὗς ἂν γένηται τὸ ἀδίκημα.

86 Φασὶ δὲ παρὰ τοῖς Κελτοῖς φάρμακον ὑπάρχειν τὸ καλούμενον ὑπ' αὐτῶν τοξικόν• ὃ λέγουσιν οὕτω ταχεῖαν ποιεῖν τὴν φθορὰν ὥστε τῶν Κελτῶν τοὺς κυνηγοῦντας, ὅταν ἔλαφον ἢ ἄλλο τι ζῷον τοξεύσωσιν, ἐπιτρέχοντας ἐκ σπουδῆς ἐκτέμνειν τῆς σαρκὸς τὸ τετρωμένον πρὸ τοῦ τὸ φάρμακον διαδῦναι, ἅμα μὲν τῆς προσφορᾶς ἔνεκα, ἅμα δὲ ὅπως μὴ σαπῇ τὸ ζῷον. εὐρήσθαι δὲ τοῦτο λέγουσιν ἀντιφάρμακον τὸν τῆς δρυὸς φλοιόν• οἱ δ' ἕτερόν τι φύλλον, ὃ καλοῦσι κοράκιον διὰ τὸ κατανοηθῆναι ὑπ' αὐτῶν κόρακα, γευσάμενον τοῦ φαρμάκου καὶ κακῶς διατιθέμενον, ἐπὶ τὸ φύλλον ὀρμήσαντα τοῦτο καὶ καταπιόντα παύσασθαι τῆς ἀλγηδόνος.

87 Ἐν τῇ Ἰβηρίᾳ λέγουσι τῶν δρυμῶν ἐμπρησθέντων ὑπὸ τινων ποιμένων, καὶ τῆς γῆς διαθερμανθείσης ὑπὸ τῆς ὕλης, φανερῶς ἀργύρῳ ρεῦσαι τὴν χώραν, καὶ μετὰ χρόνον σεισμῶν ἐπιγενομένων καὶ τῶν τόπων ραγέντων ἀμπληθες συναχθῆναι ἀργύριον, ὃ δὴ καὶ τοῖς Μασσαλιώταις πρόσδοτον ἐποίησεν οὐ τὴν τυχοῦσαν.

88 Ἐν ταῖς Γυμνησίαις ταῖς κειμέναις νήσοις κατὰ τὴν Ἰβηρίαν, ἃς μετὰ τὰς λεγομένας ἐπὶ p274μεγίστας λέγουσιν εἶναι, φασὶν ἔλαιον μὴ γίνεσθαι ἐξ ἐλαίων, ἐκ δὲ τῆς τερμίνθου κομιδῇ πολὺ καὶ εἰς πάντα ἀρμόττον. λέγουσι δὲ οὕτω τοὺς οἰκοῦντας αὐτὰς Ἰβήρας καταγύνους εἶναι ὥστε ἀντὶ ἐνὸς σώματος θηλυκοῦ διδόναι τοῖς ἐμπόροις τέτταρα καὶ πέντε σώματα ἄρρενα. βστρατευόμενοι δὲ

παρὰ Καρχηδονίοις τοὺς μισθοὺς ὅταν λάβωσιν, ἄλλο μὲν, ὡς ἔοικεν, οὐδὲν ἀγοράζουσι, γυναῖκας δέ. οὐ γὰρ χρυσίον οὐδὲ ἀργύριον ἔξεστι παρ' αὐτοῖς οὐδένα ἔχειν. ἐπιλέγεται δέ τι τοιοῦτον ἐπὶ τῷ κωλύειν χρήματα εἰσάγειν αὐτούς, ὅτι τὴν στρατείαν Ἡρακλῆς ἐποίησατο ἐπὶ τὴν Ἰβηρίαν διὰ τοὺς τῶν ἐνοικούντων πλούτους.

89 Ἐν τῇ τῶν Μασσαλιωτῶν χώρα περὶ τὴν Λιγυστικήν φασι εἶναι τινα λίμνην, ταύτην δὲ ἀναζεῖν καὶ ὑπερχεῖσθαι, καὶ τοσοῦτους ἰχθὺς ἐκβάλλειν τὸ πλῆθος ὥστε μὴ πιστεύειν. ἐπειδὴν δὲ οἱ ἐτησίου πνεύσωσιν, ἐπιχώννυσθαι τὸ ἔδαφος ἐπ' αὐτήν, καὶ τοιοῦτον κονιορτὸν γίνεσθαι αὐτόθι, καὶ ἀποστερεοῦσθαι τὴν ἐπιφάνειαν αὐτῆς ὥσανεὶ ἔδαφος. τοῖς δὲ τριόδουσι διακόπτοντας τοὺς ἐγγωρίους ἐτοίμως ὅσους ἂν βούλωνται ἰχθύας ἐξαίρειν ἐξ αὐτῆς.

90 Λέγεται δὲ τινες τῶν Λιγύων οὕτω σφενδονᾶν εὖ ὥστε, ὅταν πλείους ἴδωσιν ὄρνιθας, διερεθίζεσθαι πρὸς ἀλλήλους ποῖον ἕκαστος παρασκευάζεται βαλεῖν, ὡς ἐτοίμως ἀπάντων τευξομένων.

91 Ἴδιον δέ φασι καὶ τοῦτο παρ' αὐτοῖς εἶναι• αἱ γυναῖκες ἅμα ἐργαζόμεναι τίκτουσιν, καὶ τὸ παιδίον ὕδατι περικλύσασαι παραχρῆμα σκάπτουσι καὶ σκάλλουσι καὶ τᾶλλα οἰκονομοῦσιν ἃ καὶ μὴ τικτούσαις αὐταῖς ἦν πρακτέον.

92 Θαῦμα δὲ καὶ τοῦτο παρὰ τοῖς Λίγυσι• φασι γὰρ παρ' αὐτοῖς ποταμὸν εἶναι οὗ τὸ ρεῦμα αἶρεται μετέωρον καὶ ρεῖ, ὥστε τοὺς πέραν μὴ ὁρᾶσθαι.

93 Ἐν δὲ τῇ Τυρρηνίᾳ λέγεται τις νῆσος Αἰθάλεια ὀνομαζομένη, ἐν ἣ ἐκ τοῦ αὐτοῦ μετάλλου πρότερον μὲν χαλκὸς ὠρύσσετο, ἐξ οὗ φασι πάντα κεχαλκευμένα παρ' αὐτοῖς εἶναι, ἔπειτα μηκέτι εὐρίσκεσθαι, χρόνου δὲ διελθόντος πολλοῦ φανῆναι ἐκ τοῦ αὐτοῦ μετάλλου σίδηρον, ὃ νῦν ἔτι χρῶνται Τυρρηνοὶ οἱ τὸ καλούμενον Ποπλώνιον οἰκοῦντες.

94 Ἔστι δὲ τις ἐν τῇ Τυρρηνίᾳ πόλις Οἶναρέα καλουμένη, ἣν ὑπερβολῇ φασὶν ὀχυρὰν εἶναι• ἐν γὰρ μέσῃ αὐτῇ λόφος ἐστὶν ὑψηλός, τριάκοντα σταδίους ἀνέχων ἄνω, καὶ κάτω ὕλην παντοδαπὴν καὶ ὕδατα. 838αφοβούμενους οὖν τοὺς ἐνοικοῦντας λέγουσι μὴ τις τύραννος γένηται, προΐστασθαι αὐτῶν τοὺς ἐκ τῶν οἰκετῶν ἡλευθερωμένους• καὶ οὗτοι ἄρχουσιν αὐτῶν, κατ' ἐνιαυτὸν δ' ἄλλους ἀντικαθιστάναι τοιούτους.

95 Ἐν τῇ Κύμῃ τῇ περὶ τὴν Ἰταλίαν δείκνυται τις, ὡς ἔοικε,

θάλαμος κατάγειος Σιβύλλης τῆς χρησμολόγου, ἣν πολυχρονιωτάτην γενομένην παρθένον διαμεῖναι φασιν, οὐσαν μὲν Ἑρυθραίαν, ὑπὸ τινων δὲ τὴν Ἰταλίαν κατοικούντων Κυμαίαν, ὑπὸ δὲ τινων Μελάγκραιραν καλουμένην. τοῦτον δὲ τὸν τόπον λέγεται κυριεύεσθαι ὑπὸ Λευκανῶν. εἶναι δὲ λέγουσιν ἐν ἐκείνοις τοῖς τόποις περὶ τὴν Κύμην ποταμόν τινα Κετὸν ὀνομαζόμενον, εἰς ὃν φασι τὸν πλεῖω χρόνον τὸ ἐμβληθὲν πρῶτον περιφύεσθαι καὶ τέλος ἀπολιθοῦσθαι.

p278 96 Ἀλκιμένει τῷ Συβαρίτῃ φασὶ κατασκευασθῆναι ἱμάτιον τοιοῦτον τῇ πολυτελείᾳ, ὥστε προτίθεσθαι αὐτὸ ἐπὶ Λακινίῳ τῇ πανηγύρει τῆς Ἥρας, εἰς ἣν συμπορεύονται πάντες Ἰταλιῶται, τῶν τε δεικνυμένων μάλιστα πάντων ἐκεῖνο θαυμάζεσθαι• οὗ φασὶ κυριεύσαντα Διονύσιον τὸν πρεσβύτερον ἀποδόσθαι Καρχηδονίοις ἑκατὸν καὶ εἴκοσι ταλάντων. ἦν δ' αὐτὸ μὲν ἀλουργές, τῷ δὲ μεγέθει πεντεκαιδεκάπηχυ, ἑκατέρωθεν δὲ διείληπτο ζωδίοις ἐνυφασμένοις, ἄνωθεν μὲν Σούσοις, κάτωθεν δὲ Πέρσαις• ἀνὰ μέσον δὲ ἦν Ζεὺς, Ἥρα, Θέμις, Ἀθηνᾶ, Ἀπόλλων, Ἀφροδίτη. παρὰ δ' ἐκάτερον πέρας Ἀλκιμένης ἦν, ἑκατέρωθεν δὲ Σύβαρις.

97 Περὶ τὴν ἄκραν τὴν Ἰαπυγίαν φασὶν ἔκ τινος τόπου, ἐν ᾧ συνέβη γενέσθαι, ὡς μυθολογοῦσιν, Ἡρακλεῖ πρὸς γίγαντας μάχην, ῥεῖν ἰχῶρα πολλὴν καὶ τοιοῦτον ὥστε διὰ τὸ βάρος τῆς ὀσμῆς ἅπλουν εἶναι τὴν κατὰ τὸν τόπον θάλασσαν. λέγουσι δὲ πολλαχοῦ τῆς Ἰταλίας Ἡρακλέους εἶναι πολλὰ μνημόσυνα ἐν ταῖς ὁδοῖς ἃς ἐκεῖνος ἐπορεύθη. περὶ δὲ Πανδοσίαν τῆς Ἰαπυγίας ἵχνη τοῦ θεοῦ δείκνυται, ἐφ' ᾧ οὐδενὶ ἐπιβατέον.

98 b Ἔστι καὶ περὶ ἄκραν Ἰαπυγίαν λίθος ἀμαξιαῖος, ὃν ὑπ' ἐκείνου ἀρθέντα μετατεθῆναί φασιν, ἀφ' ἐνὸς δὲ δακτύλου κινεῖσθαι συμβέβηκεν.

99 Ἐν τῇ τῶν Ὀρχομενίων πόλει τῇ ἐν Βοιωτοῖς φανῆναί φασιν ἀλώπεκα, ἣν κυνὸς διώκοντος εἰσδῦναι εἰς τινα ὑπόνομον, καὶ τὸν κύνα συνεισδῦναι αὐτῇ, καὶ ὑλακτοῦντα ἦχον μέγαν ποιεῖν ὥσανεὶ εὐρυχωρίας τινὸς ὑπαρχούσης αὐτῷ• τοὺς δὲ κυνηγέτας ἔννοιαν λαβόντας δαιμονίαν, ἀναρρήξαντας τὴν εἰσδυσιν συνῶσαι καὶ αὐτούς• ἰδόντας p280 δὲ διὰ τινων ὀπῶν εἰσερχόμενον ἔσω τὸ φῶς, εὐσυνόπτως τὰ λοιπὰ θεάσασθαι, καὶ ἐλθόντας ἀπαγγεῖλαι τοῖς ἄρχουσιν.

100 Ἐν τῇ Σαρδοῖ τῇ νήσῳ κατασκευάσματα φασιν εἶναι εἰς τὸν

Ἑλληνικὸν τρόπον διακείμενα τὸν ἀρχαῖον, ἄλλα τε πολλὰ καὶ καλὰ καὶ θόλους περισσοῖς τοῖς ῥυθμοῖς κατεξεσμένους• τούτους δ' ὑπὸ Ἰολάου τοῦ Ἰφικλέους κατασκευασθῆναι, ὅτε τοὺς Θεσπιάδας τοὺς ἐξ Ἡρακλέους παραλαβὼν ἐπλευσεν εἰς ἐκείνους τοὺς τόπους ἐποικίσων, ὡς κατὰ συγγένειαν αὐτῷ τὴν Ἡρακλέους προσήκοντας διὰ τὸ πάσης τῆς πρὸς ἐσπέραν κύριον Ἡρακλέα γενέσθαι. αὕτη δὲ ἡ νῆσος, ὡς ἔοικεν, ἐκαλεῖτο μὲν πρότερον Ἰχνοῦσσα διὰ τὸ ἐσχηματίζεσθαι τῇ περιμέτρῳ ὁμοιότατα ἀνθρωπίνῳ ἴχνει, εὐδαίμων δὲ καὶ ἀάμφορος ἔμπροσθεν λέγεται εἶναι• τὸν γὰρ Ἀρισταῖον, ὃν φασι γεωργικώτατον εἶναι ἐπὶ τῶν ἀρχαίων, τοῦτον αὐτῶν ἄρξαι μυθολογοῦσιν, ὑπὸ μεγάλων ὀρνέων ἔμπροσθεν καὶ πολλῶν κατεχομένων. νῦν μὲν οὖν οὐκέτι φέρει τοιοῦτον οὐδὲν διὰ τὸ κυριευθεῖσαν ὑπὸ Καρχηδονίων ἐκκοπῆναι πάντας τοὺς χρησίμους εἰς προσφορὰν καρπούς, καὶ θάνατον τὴν ζημίαν τοῖς ἐγχωρίοις τετάχθαι, ἐάν τις τῶν τοιούτων τι ἀναφυτεύῃ.

101 Ἐν μιᾷ τῶν ἐπτὰ νήσων τῶν Αἰόλου καλουμένων, ἣ καλεῖται Λιπάρα, τάφον εἶναι μυθολογοῦσι, περὶ οὗ καὶ ἄλλα μὲν πολλὰ καὶ τερατώδη λέγουσι, τοῦτο δ' ὅτι οὐκ ἀσφαλές ἐστι προσελθεῖν πρὸς ἐκεῖνον τὸν τόπον τῆς νυκτός, συμφωνοῦσιν• ἐξακούεσθαι γὰρ τυμπάνων καὶ κυμβάλων ἦχον γέλωτά τε μετὰ θορύβου καὶ κροτάλων ἐναργῶς. p282839αλέγουσι δέ τι τερατωδέστερον γεγενῆσθαι περὶ τὸ σπήλαιον• πρὸ ἡμέρας γὰρ ἐγκοιμηθῆναι τινα ἐν αὐτῷ οἰνωμένον, καὶ τοῦτον ὑπὸ τῶν οἰκετῶν ζητούμενον ἐφ' ἡμέρας τρεῖς διατελέσαι, τῇ δὲ τετάρτῃ εὗρεθέντα ὡς νεκρὸν ἀποκομισθῆναι ὑπὸ τῶν οἰκείων εἰς τὸν ἴδιον τάφον, καὶ τῶν νομιζομένων τυχόντα πάντων ἐξαίφνης ἀναστῆναι, καὶ διηγεῖσθαι τὰ καθ' ἑαυτὸν συμβεβηκότα. τοῦτο μὲν οὖν ἡμῖν φαίνεται μυθωδέστερον• ὅμως μέντοι ἔδει μὴ παραλιπεῖν ἀμνημόνευτον αὐτό, τῶν περὶ τὸν τόπον ἐκεῖνον τὴν ἀναγραφὴν ποιοῦμενον.

102 Περὶ τὴν Κύμην τὴν ἐν Ἰταλίᾳ λίμνη ἐστὶν ἡ προσαγορευομένη ἄορνος, αὕτη μὲν, ὡς ἔοικεν, οὐκ ἔχουσα τι θαυμαστόν• περικεῖσθαι γὰρ λέγουσι περὶ αὐτὴν λόφους κύκλῳ, τὸ ὕψος οὐκ ἐλάσσους τριῶν σταδίων, καὶ αὐτὴν εἶναι τῷ σχήματι κυκλοτερεῇ, τὸ βάθος ἔχουσιν ἀνυπέρβλητον. ἐκεῖνο δὲ θαυμάσιον φαίνεται• ὑπερκειμένων γὰρ αὐτῇ πυκνῶν δένδρων, καὶ τινων ἐν αὐτῇ κατακεκλιμένων, οὐδὲν ἔστιν ἰδεῖν φύλλον ἐπὶ τοῦ ὕδατος ἐφ'esθηκός, ἀλλ' οὕτω καθαρώτατόν ἐστι τὸ ὕδωρ ὥστε τοὺς

θεωμένους θαυμάζειν. περί δὲ τὴν ἀπέχουσιν ἡπειρον αὐτῆς οὐ πολὺ θερμὸν ὕδωρ πολλαχόθεν ἐκπίπτει, καὶ ὁ τόπος ἅπας καλεῖται Πυριφλεγέθων. ὅτι δὲ οὐδὲν διίπταται ὄρνεον αὐτήν, ψεῦδος• οἱ γὰρ παραγενόμενοι λέγουσι πληθὸς τι κύκνων ἐν αὐτῇ γίνεσθαι.

103 Φασὶ τὰς Σειρηνοῦσας νήσους κεῖσθαι μὲν ἐν τῇ Ἰταλίᾳ περὶ τὸν πορθμὸν ἐπ' αὐτῆς τῆς ἄκρας, ὅς κεῖται πρὸ τοῦ προπεπτωκότος τόπου καὶ διαλαμβάνοντος τοῖς κόλποις τὸν τε περιέχοντα τὴν Κύμην καὶ τὸν διειληφότα τὴν Ποσειδωνίαν p284καλουμένην• ἐν ᾧ καὶ νεῶς αὐτῶν ἱδρύται, καὶ τιμῶνται καθ' ὑπερβολὴν ὑπὸ τῶν περιοίκων θυσίαις ἐπιμελῶς• ὧν καὶ τὰ ὀνόματα μνημονεύοντες καλοῦσι τὴν μὲν Παρθενόπην, τὴν δὲ Λευκωσίαν, τὴν δὲ τρίτην Λίγειαν.

104 βΛέγεται δὲ μεταξὺ τῆς Μεντορικῆς καὶ τῆς Ἰστριανῆς ὄρος τι εἶναι τὸ καλούμενον Δέλφιον, ἔχον λόφον ὑψηλόν. ἐπὶ τοῦτον τὸν λόφον ὅταν ἀναβαίνωσιν οἱ Μέντορες οἱ ἐπὶ τοῦ Ἀδρίου οἰκοῦντες, ἀποθεωροῦσιν, ὥς ἔοικε, τὰ εἰς τὸν Πόντον εἰσπλέοντα πλοῖα. εἶναι δὲ καὶ τινὰ τόπον ἐν τοῖς ἀνὰ μέσον διαστήμασιν, εἰς ὃν ἀγορᾶς κοινῆς γινομένης πωλεῖσθαι παρὰ μὲν τῶν ἐκ τοῦ Πόντου ἐμπόρων ἀναβαινόντων τὰ Λέσβια καὶ Χία καὶ Θάσια, παρὰ δὲ τῶν ἐκ τοῦ Ἀδρίου τοὺς Κερκυραῖκους ἀμφορεῖς.

105 Φασὶ δὲ καὶ τὸν Ἴστρον ῥέοντα ἐκ τῶν Ἐρκυνίων καλουμένων δρυμῶν σχίζεσθαι, καὶ τῇ μὲν εἰς τὸν Πόντον ῥεῖν, τῇ δὲ εἰς τὸν Ἀδρίαν ἐκβάλλειν. σημεῖον δὲ οὐ μόνον ἐν τοῖς νῦν καιροῖς ἐωράκαμεν, ἀλλὰ καὶ ἐπὶ τῶν ἀρχαίων μᾶλλον, οἷον τὰ ἐκεῖ ἅπλωτα εἶναι• καὶ γὰρ Ἰάσονα τὸν μὲν εἰσπλουν κατὰ Κυανέας, τὸν δὲ ἐκ τοῦ Πόντου ἔκπλουν κατὰ τὸν Ἴστρον ποιήσασθαί φασι• καὶ φέρουσιν ἄλλα τε τεκμήρια οὐκ ὀλίγα, καὶ κατὰ μὲν τὴν χώραν βωμοὺς ὑπὸ τοῦ Ἰάσονος ἀνακειμένους δεικνύουσιν, ἐν δὲ μιᾷ τῶν νήσων τῶν ἐν τῷ Ἀδρίᾳ ἱερὸν Ἀρτέμιδος ὑπὸ Μηδεΐας ἱδρυμένον. ἔτι δὲ λέγουσιν ὥς οὐκ ἂν παρέπλευσε τὰς Πλαγκτὰς καλουμένας, εἰ μὴ ἐκεῖθεν ἀπέπλει. καὶ ἐν τῇ Αἰθαλείᾳ δὲ νήσῳ, τῇ κειμένη ἐν τῷ Τυρρηνικῷ πελάγει, ἄλλα τε δεικνύουσι μνημεῖα p286τῶν ἀριστέων καὶ τὸ ἐπὶ τῶν ψήφων δὲ λεγόμενον• παρὰ γὰρ τὸν αἰγιαλὸν ψήφους φασὶν εἶναι ποικίλας, ταύτας δ' οἱ Ἕλληνες οἱ τὴν νῆσον οἰκοῦντες λέγουσι τὴν χροιάν λαβεῖν ἀπὸ τῶν στλεγγισμάτων ὧν ἐποιοῦντο ἀλειφόμενοι• ἀπὸ ἐκείνων γὰρ τῶν χρόνων οὔτε πρότερον ἐωρᾶσθαι μυθολογοῦσι τοιαύτας ψήφους οὔθ' ὕστερον ἐπιγενομένας. ἔτι δὲ

τούτων φανερώτερα σημεία λέγουσιν, ὅτι οὐ διὰ τῶν Συμπληγάδων ἐγένετο ὁ ἔκπλους, αὐτῷ τῷ ποιητῇ ἐν ἐκείνοις τοῖς τόποις μάρτυρι χρώμενοι. τὴν γὰρ δυσχέρειαν τοῦ κινδύνου ἐμφανίζοντα λέγειν ὅτι οὐκ ἔστι παραπλεῦσαι τὸν τόπον,

ἀλλὰ θ' ὁμοῦ πίνακας τε νεῶν καὶ σώματα φωτῶν
κύμαθ' ἄλως φορέουσι πυρὸς τ' ὀλοοῖο θύελλα.

840απερὶ μὲν οὖν τὰς Κυανέας οὐ λέγεται πῦρ ἀναπέμπειν, περὶ δὲ τὸν πορθμὸν τὸν διαλαμβάνοντα τὴν Σικελίαν, ἐφ' ἑκάτερα κειμένων τῶν τοῦ πυρὸς ἀναφυσημάτων, καὶ τῆς τε νήσου συνεχῶς καιομένης, καὶ τοῦ περὶ τὴν Αἴτνην ρεύματος πολλάκις τὴν χώραν ἐπιδεδραμηκότος.

106 Ἐν Τάραντι ἐναγίζειν κατὰ τινὰς χρόνους φασὶν Ἀτρείδαις καὶ Τυδεΐδαις καὶ Αἰακίδαις καὶ Λαερτιάδαις, καὶ Ἀγαμεμνονίδαις δὲ χωρὶς θυσίαν ἐπιτελεῖν ἐν ἄλλῃ ἡμέρᾳ ἰδίᾳ, ἐν ἣ νόμιμον εἶναι ταῖς γυναιξὶ μὴ γεύσασθαι τῶν ἐκείνοις θυομένων. ἔστι δὲ καὶ Ἀχιλλέως νεὼς παρ' αὐτοῖς. λέγεται δὲ μετὰ τὸ παραλαβεῖν τοὺς Ταραντίνους Ἡράκλειαν τὸν τόπον καλεῖσθαι ὃν νῦν κατοικοῦσιν, ἐν δὲ τοῖς ἄνω χρόνοις τῶν Ἰώνων κατεχόντων Πλεῖον• ἔτι δὲ ἐκείνων ἔμπροσθεν ὑπὸ τῶν Τρώων τῶν κατασχόντων αὐτὴν Σίγειον ὠνομάσθαι.

p288 107 Παρὰ δὲ τοῖς Συβαρίταις λέγεται Φιλοκτῆτην τιμᾶσθαι. κατοικῆσαι γὰρ αὐτὸν ἐκ Τροίας ἀνακομισθέντα τὰ καλούμενα Μύκαλλα τῆς Κροτωνιάτιδος, ἃ φασιν ἀπέχειν ἑκατὸν εἴκοσι σταδίων, καὶ ἀναθεῖναι ἱστοροῦσι τὰ τόξα τὰ Ἡράκλεια αὐτὸν εἰς τὸ τοῦ Ἀπόλλωνος τοῦ ἁλίου. ἐκεῖθεν δὲ φασὶ τοὺς Κροτωνιάτας κατὰ τὴν ἐπικράτειαν ἀναθεῖναι αὐτὰ εἰς τὸ Ἀπολλώνιον τὸ παρ' αὐτοῖς. λέγεται δὲ καὶ τελευτήσαντα ἐκεῖ κεῖσθαι αὐτὸν παρὰ τὸν ποταμὸν τὸν Σύβαριν, βοηθήσαντα Ῥοδίους τοῖς μετὰ Τληπολέμου εἰς τοὺς ἐκεῖ τόπους ἀπενεχθεῖσι καὶ μάχην συνάψασι πρὸς τοὺς ἐνοικοῦντας τῶν βαρβάρων ἐκείνην τὴν χώραν.

108 Περὶ δὲ τὴν Ἰταλίαν τὴν καλουμένην Γαργαρίαν, ἐγγὺς Μεταποντίου, Ἀθηνᾶς ἱερὸν εἶναι φασὶν Ἑλληνίας, ἔνθα τὰ τοῦ Ἐπειοῦ λέγουσιν ἀνακεῖσθαι ὄργανα, ἃ εἰς τὸν δούρειον ἵππον ἐποίησεν, ἐκείνου τὴν ἐπωνυμίαν ἐπιθέντος. φανταζομένην γὰρ αὐτῷ τὴν Ἀθηνᾶν κατὰ τὸν ὕπνον ἀξιοῦν ἀναθεῖναι τὰ ὄργανα, καὶ διὰ τοῦτο βραδυτέρας τυγχάνοντα τῆς ἀναγωγῆς εἰλεῖσθαι ἐν τῷ τόπῳ, μὴ δυνάμενον ἐκπλεῦσαι• ὅθεν Ἑλληνίας Ἀθηνᾶς τὸ ἱερὸν προσαγορεύεσθαι.

109 βλέγεται περὶ τὸν ὀνομαζόμενον τῆς Δαυνίας τόπον ἱερὸν εἶναι Ἀθηνᾶς Ἀχαΐας καλούμενον, ἐν ᾧ δὴ πελέκεις χαλκοῦς καὶ ὅπλα τῶν Διομήδους ἐταίρων καὶ αὐτοῦ ἀνακεῖσθαι. ἐν τούτῳ τῷ τόπῳ φασὶν εἶναι κύνας οἱ τοὺς ἀφικνουμένους τῶν Ἑλλήνων οὐκ ἀδικοῦσιν, ἀλλὰ σαίνουσιν ὥσπερ τοὺς συνθηεστάτους. πάντες δὲ οἱ Δαύνιοι καὶ οἱ πλησιόχωροι αὐτοῖς μελανειμονοῦσι, καὶ ἄνδρες καὶ γυναῖκες, διὰ ταύτην, ὡς ἔοικε, τὴν αἰτίαν. p290τὰς γὰρ Τρωάδας τὰς ληφθείσας αἰχμαλώτους καὶ εἰς ἐκείνους τοὺς τόπους ἀφικομένας, εὐλαβηθείσας μὴ πικρᾶς δουλείας τύχωσιν ὑπὸ τῶν ἐν ταῖς πατρίσι προὔπαρχουσῶν τοῖς Ἀχαιοῖς γυναικῶν, λέγεται τὰς ναῦς αὐτῶν ἐμπρῆσαι, ἵν' ἅμα μὲν τὴν προσδοκωμένην δουλείαν ἐκφύγωσιν, ἅμα δ' ὅπως μετ' ἐκείνων μένειν ἀναγκασθέντων συναρμοσθεῖσαι κατάσχωσιν αὐτοὺς ἄνδρας. πάνυ δὲ καὶ τῷ ποιητῇ καλῶς πέφρασαι περὶ αὐτῶν• ἐλκεσιπέπλους γὰρ καὶ βαθυκόλπους κᾶκείνας, ὡς ἔοικεν, ἰδεῖν ἔστιν.

110 Ἐν δὲ τοῖς Πευκετίνοισι εἶναί φασιν Ἀρτέμιδος ἱερὸν, ἐν ᾧ τὴν διωνομασμένην ἐν ἐκείνοις τοῖς τόποις χαλκῆν ἔλικα ἀνακεῖσθαι λέγουσιν, ἔχουσαν ἐπίγραμμα “Διομήδης Ἀρτέμιδι.” μυθολογεῖται δ' ἐκεῖνον ἐλάφῳ περὶ τὸν τράχηλον περιθεῖναι, τὴν δὲ περιφῦναι, καὶ τοῦτον τὸν τρόπον εὕρισκομένην ὑπὸ Ἀγαθοκλέους ὕστερον τοῦ βασιλέως Σικελιωτῶν εἰς τὸ τοῦ Διὸς ἱερὸν ἀνατεθῆναι φασιν.

111 Ἐν τῇ ἄκρᾳ τῆς Σικελίας τῇ καλουμένῃ Πελωριάδι τοσοῦτον γίνεσθαι κρόκον, ὥστε παρὰ τισὶ μὲν τῶν ἐν ἐκείνοις τοῖς τόποις κατοικούντων μὴ γνωρίζεσθαι Ἑλλήνων ποῖόν τί ἐστι τὸ ἄνθος, ἐπὶ δὲ τῆς Πελωριάδος ἀμάξας κατακομίζειν μεγάλας τοὺς βουλομένους, καὶ κατὰ τὴν ἑαρινὴν ὥραν τὰς στρωμνὰς καὶ τὰς σκηνὰς ἐκ κρόκου κατασκευάζειν.

112 Φησὶν εἶναι ὁ Πολύκριτος ὁ τὰ Σικελικὰ γεγραφὼς ἐν ἔπεσιν ἐν τινὶ τόπῳ τῆς μεσογείου λιμνίον τι ἔχον ὅσον ἀσπίδος τὸ περίμετρον, τοῦτο δ' ἔχει ὕδωρ διαυγὲς μὲν μικρῷ δὲ θολερώτερον. p292841αεἰς τοῦτ' οὖν ἂν τις εἰσβῇ λούσασθαι χρεῖαν ἔχων, αὔξεται εἰς εὖρος, ἂν δὲ καὶ δεύτερος,⁴ μᾶλλον πλατύνεται• τὸ δὲ πέρας ἕως εἰς πεντήκοντα ἀνδρῶν ὑποδοχὴν μείζον γενόμενον διευρύνεται. ἐπειδὴν δὲ τοῦτον τὸν ἀριθμὸν λάβῃ, ἐκ βάθους πάλιν ἀνοικοῦν ἐκβάλλειν μετέωρα τὰ σώματα τῶν λουομένων ἔξω ἐπὶ τὸ ἔδαφος• ὡς δ' ἂν τοῦτο γένηται, εἰς τὸ ἀρχαῖον πάλιν σχῆμα τῆς περιμέτρου καθίσταται. οὐ μόνον δ' ἐπὶ ἀνθρώπων τοῦτο περὶ αὐτὸ γίνεται, ἀλλὰ

καὶ ἂν τι τετράπουν εἰσβῇ, τὸ αὐτὸ πάσχει.

113 Ἐν δὲ τῇ ἐπικρατείᾳ τῶν Καρχηδονίων φασὶν ὅρος εἶναι ὃ καλεῖται Οὐράνιον, παντοδαπῆς μὲν ὕλης γέμον, πολλοῖς δὲ διαπεποικιλμένον ἄνθεσιν, ὥστε τοὺς συνεχεῖς τόπους ἐπὶ πολὺ μεταλαμβάνοντας τῆς εὐδίας αὐτοῦ ἡδίστην τινὰ τοῖς ὁδοιποροῦσι προσβάλλειν τὴν ἀναπνοήν. πρὸς δὴ τοῦτον τὸν τόπον κρήνην ἐλαίου φασὶν εἶναι, τὴν δὲ ὁσμὴν ἔχειν τῆς κέδρου τοῖς ἀποπτίσμασιν ὁμοίαν. δεῖν δέ φασι τὸν προσιόντα πρὸς αὐτὴν ἀγνὸν εἶναι, καὶ τούτου γινομένου πλεῖον ἀναβλύζειν αὐτὴν τὸ ἔλαιον, ὥστε ἀσφαλῶς ἀρύεσθαι.

114 Φασὶ καὶ ταύτης τῆς κρήνης πλησίον εἶναί τινα πέτραν αὐτοφυῆ, μεγάλην τῷ μεγέθει. ταύτην οὖν λέγουσιν, ἐπειδὴ μὲν ἡ θέρος, φλόγα ἀναπέμπειν πυρός, χειμῶνος δὲ γενομένου ἐκ τοῦ αὐτοῦ τόπου κρουνὸν ὕδατος ἀναρραίνειν οὕτω ψυχροῦ ὥστε χιόνι συμβαλλόμενον μηδὲν διαφέρειν. καὶ τοῦτό φασιν οὐκ ἀπόκρυφον οὐδὲ μικρὸν χρόνον φαίνεσθαι, ἀλλὰ τὸ μὲν πῦρ ἀνιέναι τὴν θερείαν ὅλην, τὸ δὲ ὕδωρ πάντα τὸν χειμῶνα.

115 Λέγεται δὲ καὶ περὶ τὴν τῶν Σιντῶν καὶ p294Μαιδῶν χώραν καλουμένην τῆς Θράκης ποταμόν τινα εἶναι Πόντον προσαγορευόμενον, ἐν ᾧ καταφέρεσθαι τινας λίθους οἱ καίονται καὶ τοῦναντίον πάσχουσι τοῖς ἐκ τῶν ξύλων ἄνθραξι• ῥιπιζόμενοι γὰρ σβέννυνται ταχέως, ὕδατι δὲ ῥαίνόμενοι ἀναλάμπουσι καὶ ἀνάπτουσι κάλλιον. παραπλησίαν δὲ ἀσφάλτῳ, ὅταν καίωνται, καὶ πονηρὰν οὕτως ὁσμὴν καὶ δριμεῖαν ἔχουσιν ὥστε μηδὲν τῶν ἐρπετῶν ὑπομένειν ἐν τῷ τόπῳ καιομένων αὐτῶν.

116 Εἶναι δέ φασι καὶ τόπον τινὰ παρ' αὐτοῖς οὐ λίαν μικρόν, ἀλλ' ὥς ἂν εἰκοσί που σταδίων, ὃς φέρει κριθὰς αἷς οἱ μὲν ἄνθρωποι χρῶνται, οἱ δ' ἵπποι καὶ βόες οὐκ ἐθέλουσιν αὐτὰς ἐσθίειν, οὐδ' ἄλλο οὐδέν. ἀλλ' οὐδὲ τῶν ὕων οὐδὲ τῶν κυνῶν οὐδεμία τολμᾷ γεύσασθαι τῆς κόπρου τῶν ἀνθρώπων, οἵτινες ἂν ἐκ τῶν κριθῶν τούτων μᾶζαν φαγόντες ἢ ἄρτον ἀφοδεύωσι, τῷ θνήσκειν.

117 Ἐν δὲ Σκοτούσαις τῆς Θετταλίας φασὶν εἶναι κρηνίδιον τι μικρόν, ἐξ οὗ ῥεῖ τοιοῦτον ὕδωρ ὃ τὰ μὲν ἔλκη καὶ θλάσματα ταχέως ὑγιενὰ ποιεῖ καὶ τῶν ἀνθρώπων καὶ τῶν ὑποζυγίων, ἂν δέ τις ξύλον μὴ παντάπασι συντρίψας ἀλλὰ σχίσας ἐμβάλῃ, συμφύεται καὶ πάλιν εἰς τὸ αὐτὸ καθίσταται.

118 Περὶ δὲ τὴν Θράκην τὴν ὑπὲρ Ἀμφίπολιν φασὶ γίνεσθαι τι

τερατῶδες καὶ ἄπιστον τοῖς μὴ θεταμένοις. ἐξιώντες γὰρ οἱ παῖδες ἐκ τῶν κωμῶν καὶ τῶν ἐγγὺς χωρίων ἐπὶ θήραν τῶν ὀρνιθαρίων συνθηρεῦν παραλαμβάνουσι τοὺς ἱέρακας, καὶ τοῦτο ποιοῦσιν οὕτως. ἐπειδὰν προέλθωσιν εἰς τόπον ἐπιτήδειον, καλοῦσι τοὺς ἱέρακας ὀνομαστί κεκραγότες• οἱ δ' ὅταν ἀκούσωσι τῶν παίδων τὴν p296φωνήν, παραγινόμενοι κατασοβοῦσι τοὺς ὀρνιθας• οἱ δὲ δεδιότες ἐκείνους καταφεύγουσιν εἰς τοὺς θάμνους, ὅπου αὐτοὺς οἱ παῖδες ξύλοις τύπτοντες λαμβάνουσιν. ὁ δὲ πάντων ἄν τις μάλιστα θαυμάσειεν• οἱ μὲν γὰρ ἱέρακες ὅταν αὐτοὶ τινα λάβωσι τῶν ὀρνίθων, καταβάλλουσι τοῖς θηρεύουσιν, οἱ δὲ παῖδες ἀπάντων τῶν ἀλλόντων μέρος τι τοῖς ἱέραξιν ἀποδόντες ἀπέρχονται.

119 Θαυμαστὸν δέ τι καὶ παρὰ τοῖς Ἑνετοῖς φασὶ γίνεσθαι. ἐπὶ γὰρ τὴν χώραν αὐτῶν πολλάκις κολοιδῶν ἀναριθμήτους μυριάδας ἐπιφέρεσθαι καὶ τὸν σῖτον αὐτῶν σπειράντων καταναλίσκειν• οἷς τοὺς Ἑνετοὺς πρὸ τοῦ ἐρίπτασθαι μέλλειν ἐπὶ τὰ μεθόρια τῆς γῆς προτιθέναι δῶρα, παντοδαπῶν καρπῶν καταβάλλοντας σπέρματα, ὧν ἐὰν μὲν γεύσωνται οἱ κολοιοί, 842αοὺχ ὑπερβαίνουνσιν ἐπὶ τὴν χώραν αὐτῶν, ἀλλ' οἶδασιν οἱ Ἑνετοὶ ὅτι ἔσονται ἐν εἰρήνῃ• ἐὰν δὲ μὴ γεύσωνται, ὥσει πολεμίων ἔφοδον αὐτοῖς γινομένην οὕτω προσδοκῶσιν.

120 Ἐν δὲ τῇ Χαλκιδικῇ τῇ ἐπὶ Θράκης πλησίον Ὀλύνθου φασὶν εἶναι Κανθαρώλεθρον ὀνομαζόμενον τόπον, μικρῷ μείζονα τὸ μέγεθος ἄλλω, εἰς ὃν τῶν μὲν ἄλλων ζῶων ὅταν τι ἀφίκηται, πάλιν ἀπέρχεται, τῶν δὲ κανθάρων τῶν ἐλθόντων οὐδεὶς, ἀλλὰ κύκλω περιόντες τὸ χωρίον λιμῷ τελευτῶσιν.

121 Ἐν δὲ Κύκλωσι τοῖς Θραξὶ κρηνίδιον ἐστὶν ὕδωρ ἔχον ὃ τῇ μὲν ὄψει καθαρὸν καὶ διαφανὲς καὶ τοῖς ἄλλοις ὅμοιον, ὅταν δὲ πῖη τι ζῷον ἐξ αὐτοῦ, παραχρῆμα διαφθείρεται.

122 Φασὶ δὲ καὶ ἐν τῇ Κραστωνίᾳ παρὰ τὴν Βισαλτῶν χώραν τοὺς ἀλίσκομένους λαγῶς δύο ἥπατα ἔχειν, καὶ τόπον τινὰ εἶναι ὅσον πλεθριαῖον, p298εἰς ὃν ὃ τι ἂν εἰσέλθῃ ζῷον ἀποθνήσκει. ἔστι δὲ καὶ ἄλλο αὐτόθι ἱερὸν Διονύσου μέγα καὶ καλόν, ἐν ᾧ τῆς ἐορτῆς καὶ τῆς θυσίας οὔσης λέγεται, ὅταν μὲν ὁ θεὸς εὐετηρίαν μέλλῃ ποιεῖν, ἐπιφαίνεσθαι μέγα σέλας πυρός, καὶ τοῦτο πάντας ὅρᾳν τοὺς περὶ τὸ τέμενος διατρίβοντας, ὅταν δ' ἀκαρπίαν, μὴ φαίνεσθαι τοῦτο τὸ φῶς, ἀλλὰ σκότος ἐπέχειν τὸν τόπον ὥσπερ καὶ τὰς ἄλλας νύκτας.

123 Ἐν Ἥλιδι λέγουσιν εἶναί τι οἶκημα σταδίου ἀπέχον ὀκτῶ

μάλιστα τῆς πόλεως, εἰς ὃ τιθέασι τοῖς Διονυσίοις λέβητας χαλκοῦς τρεῖς κενούς. τοῦτο δὲ ποιήσαντες παρακαλοῦσι τῶν Ἑλλήνων τῶν ἐπιδημούντων τὸν βουλόμενον ἐξετάσαι τὰ ἀγγεῖα καὶ τοῦ οἴκου κατασφραγίζεσθαι τὰς θύρας. καὶ ἐπειδὰν μέλλωσιν ἀνοίγειν, ἐπιδείξαντες τοῖς πολίταις καὶ τοῖς ξένοις τὰς σφραγίδας, οὕτως ἀνοίγουσιν. οἱ δ' εἰσελθόντες εὐρίσκουσι τοὺς μὲν λέβητας οἴνου πλήρεις, τὸ δὲ ἔδαφος καὶ τοὺς τοίχους ὑγεῖς, ὥστε μηδεμίαν εἶναι ὑποψίαν λαβεῖν ὡς τέχνη τινὶ κατασκευάζουσιν. εἶναι δέ φασι παρ' αὐτοῖς καὶ ἰκτίνους, οἱ παρὰ μὲν τῶν διὰ τῆς ἀγορᾶς τὰ κρέα φερόντων ἀρπάζουσι, βτῶν δὲ ἱεροθύτων οὐχ ἄπτονται.

124 Ἐν Κορωνείᾳ δὲ τῆς Βοιωτίας λέγεται τοὺς ἀσπάλακας τὰ ζῶα μὴ δύνασθαι ζῆν μηδ' ὀρύσσειν τὴν γῆν, τῆς λοιπῆς Βοιωτίας πολὺ πλῆθος ἐχούσης.

125 Ἐν Λουσοῖς δὲ τῆς Ἀρκαδίας κρήνην εἶναι τινὰ φασιν, ἐν ἣ ἡ χερσαῖοι μύες γίνονται καὶ κολυμβῶσι, τὴν δίαιταν ἐν ἐκείνῃ ποιούμενοι. λέγεται δ' αὐτὸ τοῦτο καὶ ἐν Λαμψάκῳ εἶναι.

126 Ἐν δὲ Κράννωνι τῆς Θετταλίας φασὶ δύο κόρακας εἶναι μόνους ἐν τῇ πόλει. οὗτοι ὅταν p300ἐκνεοττεύσωσιν, ἑαυτοὺς μὲν, ὡς ἔοικεν, ἐκτοπίζουσιν, ἐτέρους δὲ τοσοῦτους τῶν ἐξ αὐτῶν γενομένων ἀπολείπουσιν.

127 Ἐν δὲ Ἀπολλωνίᾳ τῇ πλησίον κειμένη τῆς τῶν Ἀτλαντίνων χώρας φασὶ γίνεσθαι ἄσφαλτον ὀρυκτὴν καὶ πίσσαν, τὸν αὐτὸν τρόπον ἐκ τῆς γῆς ἀναπηδῶσαν τοῖς ὕδασιν, οὐδὲν διαφέρουσιν τῆς Μακεδονικῆς, μελαντέραν δὲ καὶ παχυτέραν πεφυκέναι ἐκείνης. οὐ πόρρω δὲ τούτου τοῦ χωρίου πῦρ ἐστὶ καιόμενον πάντα τὸν χρόνον, ὡς φασὶν οἱ κατοικοῦντες περὶ τὴν χώραν ἐκείνην. ὁ δὲ καιόμενος τόπος ἐστὶν οὐ πολὺς, ὡς ἔοικεν, ἀλλ' ὅσον μάλιστα πεντακλίνου τὸ μέγεθος. ὄζει δὲ θείου καὶ στυπτηρίας, καὶ ἐφύκε περὶ αὐτὸν πόα τε βαθεῖα, ὃ καὶ θαυμάσειεν ἂν τις μάλιστα, καὶ δένδρα μεγάλα, οὐκ ἀπέχοντα τοῦ πυρὸς πῆχεις τέσσαρας. καίεται δὲ συνεχῶς περὶ Λυκίαν καὶ Μεγάλην πόλιν τὴν ἐν Πελοποννήσῳ.

128 Λέγεται δὲ καὶ ἐν Ἰλλυριοῖς τίκτειν τὰ βοσκήματα δις τοῦ ἐνιαυτοῦ, καὶ τὰ πλεῖστα διδυμοτοκεῖν, καὶ πολλὰ δὲ τρεῖς ἢ τέσσαρας ἐρίφους τίκτειν, ἓνια δὲ καὶ πέντε καὶ πλείους, ἔτι δὲ γάλακτος ἀφίεναι ῥαδίως τρία ἡμίχρα. λέγουσι δὲ καὶ τὰς ἀλεκτορίδας οὐχ ὥσπερ παρὰ τοῖς ἄλλοις ἅπαξ τίκτειν, ἀλλὰ δις ἢ τρίς τῆς ἡμέρας.

129 Λέγεται δὲ καὶ ἐν Παιονίᾳ τοὺς βοῦς τοὺς ἀγρίους πολὺ μεγίστους ἀπάντων τῶν ἐν τοῖς λοιποῖς ἔθνεσι γίνεσθαι, καὶ τὰ κέρατα αὐτῶν χωρεῖν τέσσαρας χόας, ἐνίων δὲ καὶ πλεῖον.

130 843a Περὶ δὲ τοῦ πορθμοῦ τῆς Σικελίας καὶ ἄλλοι μὲν πλείους γεγράφασι, καὶ οὗτος δὲ φησι συμβαίνειν τερατῶδες. ἐκ γὰρ τοῦ Τυρρηνικοῦ p302 πελάγους πολλῷ ῥοῖζω φερόμενον τὸν κλύδωνα προσβάλλειν πρὸς ἀμφοτέρω τὰ ἀκρωτήρια, τὸ μὲν τῆς Σικελίας, τὸ δὲ τῆς Ἰταλίας, τὸ προσαγορευόμενον Ῥήγιον, καὶ φερόμενον ἐκ μεγάλου πελάγους εἰς στενὸν συγκλείεσθαι, τούτου δὲ γινομένου κύμα μετέωρον αἶρειν σὺν πολλῷ βρόμῳ ἐπὶ πάντῃ πολὺν τόπον τῆς ἄνω φορᾶς, ὥστε τοῖς μακρὰν ἀπέχουσι σύνοπτον εἶναι τὸν μετεωρισμόν, οὐχ ὅμοιον φαινόμενον θαλάσσης ἀναφορᾷ, λευκὸν δὲ καὶ ἀφρῶδες, παραπλήσιον δὲ τοῖς συρμοῖς τοῖς γινομένοις ἐν τοῖς ἀνυπερβλήτοις χειμῶσι. καὶ ποτὲ μὲν ἀλλήλοις συμπίπτειν ἐπ' ἀμφοτέρων τῶν ἀκρωτηρίων τοὺς κλύδωνας, καὶ ποιεῖν συγκλυσμὸν ἄπιστον μὲν διηγεῖσθαι, ἀνυπομόνητον δὲ τῇ ὄψει θεάσασθαι• ποτὲ δὲ δισταμένους ἐκ τῆς πρὸς ἀλλήλους συρράξεως οὕτω βαθεῖαν καὶ φρικώδη τὴν ἄποψιν ποιεῖν τοῖς ἐξ ἀνάγκης θεωμένοις, ὥστε πολλοὺς μὲν μὴ κρατεῖν ἑαυτῶν, ἀλλὰ πίπτειν σκοτουμένους ὑπὸ δέους. ἐπειδὴν δὲ προσπεσὸν τὸ κύμα πρὸς ὅποτερον οὖν τῶν τόπων καὶ μετεωρισθὲν ἕως τῶν ἄκρων πάλιν εἰς τὴν ὑπορρέουσαν θάλασσαν κατενεχθῇ, τότε δὴ πάλιν σὺν πολλῷ μὲν βρυχηθμῷ μεγάλαις δὲ καὶ ταχείαις δίναις τὴν θάλασσαν ἀναζεῖν καὶ μετεωρίζεσθαι κυκλωμένην ἐκ βυθῶν, παντοδαπὰς δὲ χροὰς μεταλλάσσειν• ποτὲ μὲν γὰρ ζοφεράν, ποτὲ δὲ κυανὴν, πολλάκις δὲ πορφυρίζουσιν διαφαίνεσθαι. τὸν δὲ δρόμον καὶ τὸ μήκος αὐτῆς, ἔτι δὲ πρὸς τούτοις τὴν ἀνάρροϊαν, οὐδὲ ἀκούειν οὐδὲν ἐρπετὸν οὐθ' ὄραν ὑπομένειν, φεύγειν δὲ πάντα πρὸς τὰς ὑποκειμένας ὑπωρείας. λήγοντος δὲ τοῦ κλύδωνος τὰς δίνας μετεώρους φέρεσθαι ποικίλας οὕτω τὰς ἀναστροφὰς ποιουμένας, ὥστε p304 δοκεῖν πρηστήρων ἢ τινῶν ἄλλων μεγάλων ὄφεων σπειράματι παρομοίους τὰς κινήσεις ἀποτελεῖν.

131 b Φασὶν οἰκοδομοῦντων Ἀθηναίων τὸ τῆς Δήμητρος ἱερὸν τῆς ἐν Ἐλευσίνι περιεχομένην στήλην πέτραις εὗρεθῆναι χαλκῇν, ἐφ' ἧς ἐπεγέγραπτο “Δηϊότης τόδε σῆμα”, ἣν οἱ μὲν λέγουσι Μουσαίου εἶναι γυναῖκα, τινὲς δὲ Τριπτολέμου μητέρα γενέσθαι.

132 Ἐν μᾶ τῶν Αἰόλου προσαγορευομένων νήσων πληθός τί

φασι γενέσθαι φοινίκων, ὅθεν καὶ Φοινικώδη καλεῖσθαι. οὐκ ἂν οὖν εἶη τὸ λεγόμενον ὑπὸ Καλλισθένους ἀληθές, ὅτι ἀπὸ Φοινίκων τῆς Συρίας τῶν τὴν παραλίαν οἰκούντων τὸ φυτὸν ἔλαβε τὴν προσηγορίαν. ἀλλὰ καὶ αὐτοὺς τοὺς Φοίνικας ὑπὸ τῶν Ἑλλήνων φασί τινες [φοίνικας] προσαγορευθῆναι διὰ τὸ πρῶτους πλέοντας τὴν θάλασσαν, ἧ ἂν ἀποβαίησαν, πάντας ἀποκτείνειν καὶ φονεύειν. καὶ κατὰ γλῶσσαν δ' ἐστὶ τὴν Περραιβῶν τὸ αἰμάζει φοινίξει.

133 Τῆς καλουμένης Αἰνιакῆς χώρας περὶ τὴν ὀνομαζομένην Ὑπάτην λέγεται παλαιὰ τις στήλη εὑρεθῆναι, ἣν οἱ Αἰνιᾶνες τίνος ἦν εἰδέναι βουλόμενοι, ἔχουσιν ἐπιγραφὴν ἀρχαίοις γράμμασιν, ἀπέστειλαν εἰς Αθήνας τινὰς κομίζοντας αὐτήν. πορευομένων δὲ διὰ τῆς Βοιωτίας, καὶ τισι τῶν ξένων ὑπὲρ τῆς ἀποδημίας ἀνακοινουμένων, λέγεται αὐτοὺς εἰσαχθῆναι εἰς τὸ καλούμενον Ἰσμήνιον ἐν Θήβαις• ἐκεῖθεν γὰρ μάλιστα ἂν εὑρεθῆναι τὴν τῶν γραμμάτων ἐπιγραφὴν, λέγοντες εἶναι τινα ἀναθήματα ὁμοίους ἔχοντα τοὺς ῥυθμοὺς τῶν γραμμάτων ἀρχαῖα. ὅθεν αὐτοὺς φασιν ἀπὸ τῶν p306γνωριζομένων τὴν εὑρεσιν ποιησαμένους τῶν ἐπιζητουμένων, ἀναγράψαι τούσδε τοὺς στίχους•

844ατούτῳ τῷ ἐπιγράμματι ἐπεχώρησε καὶ ὁ τόπος ἐκεῖνος Ἑρυθρος καλούμενος, καὶ ὅτι ἐκεῖθεν τὰς βοῦς καὶ οὐκ ἐξ Ἑρυθρίας ἦγαγεν• οὐδὲ γὰρ ἐν τοῖς κατὰ Λιβύην καὶ Ἰβηρίαν τόποις οὐδαμοῦ τὸ ὄνομα φασι λέγεσθαι τῆς Ἑρυθρίας.

134 Τῆς δὲ Λιβύης ἐν Ἰτύκῃ τῇ καλουμένῃ, ἣ κεῖται μὲν, ὡς λέγουσιν, ἐν τῷ κόλπῳ τῷ μεταξὺ Ἑρμαίας καὶ τῆς Ἰππου ἄκρας, ἐπέκεινα δὲ Καρχηδόνης ὡς σταδίους διακοσίους (ἢ καὶ πρότερον κτισθῆναι λέγεται ὑπὸ Φοινίκων αὐτῆς τῆς Καρχηδόνης ἔτεσι διακοσίους ὀγδοήκοντα ἐπτά, ὡς ἀναγέγραπται ἐν ταῖς Φοινικικαῖς ἱστορίαις), γίνεσθαί φασιν ἄλλας ὀρυκτοὺς, ἐπὶ τρεῖς ὀργυῖας τὸ βάθος, τῇ ὧσιν λευκοὺς καὶ οὐ στερεοὺς, ἀλλ' ὁμοίους τῷ γλισχροτάτῳ γλοιῷ• καὶ ὅταν ἀνενεχθῶσιν εἰς τὸν ἥλιον, ἀποστερεοῦσθαι καὶ γίνεσθαι ὁμοίους τῷ Παρίῳ λίθῳ. γλύφεσθαι δὲ

ἐξ αὐτῶν λέγουσι ζῳδια καὶ ἄλλα σκεύη.

135 Τοὺς πρώτους τῶν Φοινίκων ἐπὶ Ταρτησσὸν πλεύσαντας λέγεται τοσοῦτον ἀργύριον ἀντιφορτίσασθαι, ἔλαιον καὶ ἄλλον ναυτικὸν ῥῶπον εἰσαγαγόντας, ὥστε μηκέτι ἔχειν δύνασθαι μήτε ἐπιδέξασθαι τὸν ἄργυρον, ἀλλ' ἀναγκασθῆναι ἀποπλέοντας p308 ἐκ τῶν τόπων τὰ τε ἄλλα πάντα ἀργυρᾷ οἷς ἐχρῶντο κατασκευάσασθαι, καὶ δὴ καὶ τὰς ἀγκύρας πάσας.

136 Λέγουσι τοὺς Φοίνικας τοὺς κατοικοῦντας τὰ Γάδεια καλούμενα, ἔξω πλέοντας Ἡρακλείων στηλῶν ἀπηλιώτη ἀνέμῳ ἡμέρας τέτταρας, παραγίνεσθαι εἰς τινὰς τόπους ἐρήμους, θρύου καὶ φύκους πλήρεις, οὓς ὅταν μὲν ἄμπωτις ἢ μὴ βαπτίζεσθαι, ὅταν δὲ πλημμύρα, κατακλύζεσθαι, ἐφ' ὧν εὐρίσκεσθαι ὑπερβάλλον θύννων πληθος, καὶ τοῖς μεγέθεσιν ἄπιστον καὶ τοῖς πάχεσιν, ὅταν ἐποκέλωσιν• οὓς ταριχεύοντες καὶ συντιθέντες εἰς ἀγγεῖα διακομίζουσιν εἰς Καρχηδόνα. ὧν Καρχηδόνιοι μόνων οὐ ποιοῦνται τὴν ἐξαγωγήν, ἀλλὰ διὰ τὴν ἀρετὴν ἣν ἔχουσι κατὰ τὴν βρῶσιν αὐτοὶ καταναλίσκουσιν.

137 Ἐν τῇ Πηδασίᾳ τῆς Καρίας θυσία τῷ Δίι συντελεῖται, ἐν ἣ πέμπουσιν αἰγὰ τινὰ, περὶ ἣν θαυμαστὸν τί φασι γίνεσθαι. βαδίζουσα γὰρ ἐκ Πηδάσων σταδίους ἑβδομήκοντα δι' ὄχλου πολλοῦ τοῦ θεωροῦντος οὔτε διαταράττεται κατὰ τὴν πορείαν οὔτ' ἐκτρέπεται τῆς ὁδοῦ, δεδεμένη δὲ σχοινίῳ προπορεύεται τοῦ τὴν ἱερωσύνην ἔχοντος. θαυμαστὸν δ' ἐστὶ καὶ τὸ δύο κόρακας εἶναι διὰ τέλους περὶ τὸ τοῦ Διὸς ἱερόν, ἄλλον δὲ μηδένα προσιέναι πρὸς τὸν τόπον, καὶ τὸν ἕτερον αὐτῶν ἔχειν τὸ πρόσθεν τοῦ τραχήλου λευκόν.

138 Ἐν Ἰλλυριοῖς δὲ τοῖς Ἀρδιαίοις καλουμένοις, παρὰ τὰ μεθόρια τῶν Αὐταριατῶν κἀκείνων, φασὶν ὅρος εἶναι μέγα, τούτου δὲ πλησίον ἄγκος, ὅθεν ὕδωρ ἀναπηδᾷ, οὐ πᾶσαν ὥραν ἀλλὰ τοῦ ἥρος, πολὺ τῷ πλήθει, ὃ λαμβάνοντες τὰς μὲν p310 ἡμέρας ἐν τῷ στεγνῷ φυλάττουσι, τὰς δὲ νύκτας εἰς τὴν αἰθρίαν τιθέασιν. καὶ πέντε ἢ ἕξ ἡμέρας τοῦτο ποιησάντων αὐτῶν πηγνυται τὸ ὕδωρ, καὶ γίνεται κάλλιστον ἄλας, ὃ ἐνεκεν τῶν βοσκημάτων μάλιστα διατηροῦσιν• οὐ γὰρ εἰσάγονται πρὸς αὐτοὺς ἄλες διὰ τὸ κατοικεῖν πόρρω αὐτοὺς θαλάσσης καὶ εἶναι αὐτοὺς ἀμίκτους. πρὸς οὖν τὰ βοσκήματα πλείστην αὐτοῦ χρεῖαν ἔχουσιν• ἀλίζουσι γὰρ αὐτὰ δις τοῦ ἐνιαυτοῦ. ἐὰν δὲ μὴ ποιήσωσι τοῦτο, συμβαίνει αὐτοῖς ἀπόλλυσθαι τὰ πλεῖστα τῶν βοσκημάτων.

139 Ἐν Ἀργεὶ δέ φασι γίνεσθαι ἀκρίδος τι γένος ὃ καλεῖται σκορπιομάχον. ὅταν γὰρ ἴδῃ τάχιστα σκορπίον, ἀνθίσταται αὐτῷ• ὡσαύτως δὲ καὶ ὁ σκορπίος ἐκείνῃ. καὶ κύκλῳ περιουῶσα τρίζει περὶ αὐτόν• τὸν δὲ τὸ κέντρον ἐπαίροντα ἀντιπεριάγειν ἐν τῷ αὐτῷ τόπῳ, εἴτα κατὰ μικρὸν ἀνιέναι τὸ κέντρον, καὶ τέλος ὅλον ἐκτείνεσθαι, τῆς ἀκρίδος κύκλῳ τρεχούσης. τὰ τελευταῖα δὲ προσελθοῦσα κατεσθίει αὐτόν ἢ ἀκρίς. ἀγαθὸν δέ φασιν εἶναι καὶ πρὸς τὰς πληγὰς τοῦ σκορπίου ἐπιφαγεῖν αὐτήν.

140 Τοὺς ἐν Νάξῳ σφηκὰς φασιν, ὅταν φάγωσι τοῦ ἔχεως (προσφυλῆς δ' αὐτοῖς ἢ σάρξ, ὡς ἔοικεν, ἐστίν), ἐπειδὴν τινα κεντήσωσι, περιωδύνουσιν οὕτω ποιεῖν ὥστε χαλεπωτέραν φαίνεσθαι τῆς πληγῆς τῶν ἔχεων.

141 845aΦασὶ τὸ Σκυθικὸν φάρμακον, ᾧ ἀποβάπτουσι τοὺς ὀιστούς, συντίθεσθαι ἐξ ἐχίδνης. τηροῦσι δέ, ὡς ἔοικεν, οἱ Σκύθαι τὰς ἤδη ζωοτοκούσας, καὶ λαβόντες αὐτὰς τήκουσιν ἡμέρας τινάς. ὅταν δὲ ἱκανῶς αὐτοῖς δοκῇ σεσηφθαι πᾶν, τὸ τοῦ ἀνθρώπου αἷμα εἰς χυτρίδιον ἐγγέοντες p312εἰς τὰς κοπρίας κατορύττουσι πωμάσαντες. ὅταν δὲ καὶ τοῦτο σαπῇ, τὸ ὑφιστάμενον ἐπάνω τοῦ αἵματος, ὃ δὴ ἐστὶν ὕδατῶδες, μινύουσι τῷ τῆς ἐχίδνης ἰχῶρι, καὶ οὕτω ποιοῦσι θανάσιμον.

142 Ἐν Κουρίῳ τῆς Κύπρου ὄφεών τι γένος εἶναι φασιν, ὃ τὴν δύναμιν ὁμοίαν ἔχει τῇ ἐν Αἰγύπτῳ ἀσπίδι, πλὴν ὅτι τοῦ χειμῶνος ἐὰν δάκη, οὐδὲν ἐργάζεται, εἴτε δι' ἄλλην τινὰ αἰτίαν, εἴτε διότι τὸ ζῶον δυσκίνητον γίνεται ὑπὸ τοῦ ψύχους ἀποπηγνύμενον καὶ τελέως ἀδύνατον, ἐὰν μὴ θερμανθῇ.

143 Ἐν Κέφ φασὶν εἶναι τι γένος ἀχέρδου, ὑφ' ἧς ἐὰν τις πληγῇ τῇ ἀκάνθῃ, ἀποθνήσκει.

144 Ἐν Μυσίᾳ φασὶν ἄρκτων τι γένος εἶναι λευκόν, αἷ ὅταν κυνηγῶνται, ἀφιασι τοιαύτην πνοὴν ὥστε τῶν κυνῶν τὰς σάρκας σήπειν, ὡσαύτως δὲ καὶ τῶν λοιπῶν θηρίων, ἀβρώτους τε ποιεῖν. ἐὰν δέ τις καὶ βιάσῃται καὶ ἐγγίσῃ, ἀφιασὶν ἐκ τοῦ στόματος φλέγμα πάμπολύ τι, ὡς ἔοικεν, ὃ προσφυσᾷ πρὸς τὰ πρόσωπα τῶν κυνῶν, ὡσαύτως δὲ καὶ τῶν ἀνθρώπων, ὥστε καὶ ἀποπνίγειν καὶ ἀποτυφλοῦν.

145 Ἐν δὲ τῇ Ἀραβίᾳ ὑαῖνῶν τι γένος φασὶν εἶναι, ὃ ἐπειδὴν προῖδῃ τι θηρίον ἢ ἀνθρώπου ἐπιβῇ ἐπὶ τὴν σκιάν, ἀφωνίαν ἐργάζεται καὶ πῆξις τοιαύτην ὥστε μὴ δύνασθαι κινεῖν τὸ σῶμα.

τοῦτο δὲ ποιεῖν καὶ ἐπὶ τῶν κυνῶν.

146 Κατὰ δὲ Συρίαν εἶναί τί φασι ζῶον ὃ καλεῖται λεοντοφόνον• ἀποθνήσκει γὰρ ὁ λέων, ὡς ἔοικεν, ὅταν αὐτοῦ φάγη. ἐκὼν μὲν οὖν τοῦτο οὐ ποιεῖ, ἀλλὰ φεύγει τὸ ζῶον• ὅταν δὲ συλλαβόντες αὐτὸ οἱ κυνηγέται καὶ ὀπτήσαντες ὥσπερ ἄλφιτα λευκὰ p314περιπάσσωσιν ἄλλω ζῳῷ, γευσάμενοι⁸ ἀπόλλυσθαι φασι παραχρῆμα. κακοὶ καὶ προσουροῦν τὸν λέοντα τοῦτο τὸ ζῶον.

147 βΛέγεται καὶ τοὺς γῦπας ὑπὸ τῆς τῶν μύρων ὁσμῆς ἀποθνήσκειν, ἐάν τις αὐτοὺς χρίσῃ ἢ δῶ τι μεμυρισμένον φαγεῖν. ὡσαύτως δὲ καὶ τοὺς κανθάρους ὑπὸ τῆς τῶν ρόδων ὁσμῆς.

148 Καὶ ἐν Σικελίᾳ δέ φασι καὶ ἐν Ἰταλίᾳ τοὺς γαλεώτας θανάσιμον ἔχειν τὸ δῆγμα, καὶ οὐχ ὥσπερ τοὺς παρ' ἡμῖν ἀσθενὲς καὶ μαλακόν. εἶναι δὲ καὶ μυῶν γένος ἐφιπτάμενον, ὃ ὅταν δάκῃ, ἀποθνήσκειν ποιεῖ.

149 Ἐν δὲ τῇ Μεσοποταμίᾳ τῆς Συρίας φασὶ καὶ ἐν Ἰστροῦντι ὀφειδιά τινα γίνεσθαι, ἃ τοὺς ἐγχωρίους οὐ δάκνει, τοὺς ξένους δὲ ἀδικεῖ σφόδρα.

150 Περὶ δὲ τὸν Εὐφράτην καὶ τελείως φασὶ τοῦτο γίνεσθαι. πολλοὺς γὰρ φαίνεσθαι περὶ τὰ χεῖλη τοῦ ποταμοῦ καὶ διανέοντας ἐφ' ἐκάτερα, ὥστε τῆς δειλῆς ἐνταῦθα θεωρουμένους ἅμα τῇ ἡμέρᾳ ἐπὶ θατέρου μέρους φαίνεσθαι, καὶ τοὺς ἀναπαυομένους τῶν μὲν Σύρων μὴ δάκνειν, τῶν δ' Ἑλλήνων μὴ ἀπέχεσθαι.

151 Ἐν Θεσσαλίᾳ φασὶ τὸν ἱερὸν καλούμενον ὄφιν πάντας ἀπολλύειν, οὐ μόνον ἐὰν δάκῃ, ἀλλὰ καὶ ἐὰν θίγῃ. διὸ καὶ ὅταν φανῇ καὶ τὴν φωνὴν ἀκούσωσι (φαίνεται δὲ σπανίως), φεύγουσι καὶ οἱ ὄφεις καὶ οἱ ἔχεις καὶ τᾶλλα πάντα θηρία. τῷ δὲ μεγέθει οὐκ ἔστι μέγας ἀλλὰ μέτριος. ἐν Τήνῳ δὲ ποτέ φασιν αὐτὸν τῇ πόλει κατὰ Θετταλίαν ἀναιρεθῆναι ὑπὸ γυναικός, γενέσθαι δὲ τὸν θάνατον τοιόνδε. γυναῖκα κύκλον γράψασαν καὶ τὰ φάρμακα θεῖσαν εἰσβῆναι εἰς τὸν κύκλον, αὐτὴν καὶ p316τὸν υἱόν, εἴτα μιμεῖσθαι τὴν φωνὴν τοῦ θηρίου• τὸ δ' ἀντάδειν καὶ προσιέναι. ἄδοντας δὲ καταδαρθεῖν τὴν γυναῖκα, καὶ ἐγγυτέρω προσιόντος μᾶλλον, ὥστε μὴ δύνασθαι κρατεῖν τοῦ ὕπνου. τὸν δ' υἱὸν παρακαθήμενον ἐγείρειν τύπτοντα, κελευούσης ἐκείνης, καὶ λέγειν ὅτι ἐὰν μὲν καθυπνώσῃ, ἀπολεῖται καὶ αὐτὴ καὶ ἐκεῖνος, ἐὰν δὲ βιάσῃται καὶ προσαγάγῃται τὸ θηρίον, σωθήσονται. ὡς δὲ προσῆλθεν ὁ ὄφις εἰς τὸν κύκλον, αὖτον εὐθὺς γενέσθαι αὐτόν.

152 Λέγεται περὶ τὰ Τύανα ὕδωρ εἶναι ὀρκίου Διός (καλοῦσι δὲ αὐτὸ Ἀσβαμαῖον), οὗ πηγὴ ἀναδίδεται πάνυ ψυχρά, παφλάζει δὲ ὥσπερ οἱ λέβητες. 846α τοῦτο εὐόρκους μὲν ἡδὺ τε καὶ ἴλεων, ἐπιόρκους δὲ παρὰ πόδας ἢ δίκη. ἀποσκήπτει γὰρ καὶ εἰς ὀφθαλμούς καὶ εἰς χεῖρας καὶ εἰς πόδας, ἀλίσκονται τε ὑδέροις καὶ φθόαις• καὶ οὐδὲ πρόσθεν ἀπελθεῖν δυνατόν, ἀλλ' αὐτόθι ἔχονται καὶ ὀλοφύρονται πρὸς τῷ ὕδατι, ὁμολογοῦντες ἃ ἐπιώρκησαν.

153 Ἀθήνησί φασι τὸν ἱερὸν τῆς ἐλαίας θαλλὸν ἐν ἡμέρᾳ μιᾷ βλαστῆσαι καὶ πλείονα γενέσθαι, ταχὺ δὲ αὖ πάλιν συστέλλεσθαι.

154 Τῶν ἐν Αἴτνῃ κρατήρων ἀναρραγόντων καὶ ἀνὰ τὴν γῆν φερομένων ἔνθα καὶ ἔνθα χειμάρρου δίκην, τὸ τῶν εὐσεβῶν γένος ἐτίμησε τὸ δαιμόνιον. περικαταληφθέντων γὰρ ὑπὸ τοῦ ρεύματος διὰ τὸ βαστάζειν γέροντας ἐπὶ τῶν ὤμων γονεῖς καὶ σώζειν, πλησίον αὐτῶν γενόμενον τὸ τοῦ πυρὸς ρεῦμα ἐξεσχίσθη, παρέτρεψέ τε τοῦ φλογμοῦ τὸ μὲν ἔνθα τὸ δὲ ἔνθα, καὶ ἐτήρησεν ἀβλαβεῖς ἅμα τοῖς γονεῦσι τοὺς νεανίσκους.

p318 155 Λέγεται τὸν ἀγαματοποιὸν Φειδίαν κατασκευάζοντα τὴν ἐν ἀκροπόλει Ἀθηνᾶν ἐν μεσότητι ταύτης τῆς ἀσπίδος τὸ ἑαυτοῦ πρόσωπον ἐντυπώσασθαι, καὶ συνδῆσαι τῷ ἀγάλματι διὰ τινος ἀφανοῦς δημιουργίας, ὥστ' ἐξ ἀνάγκης, εἴ τις βούλοιτο αὐτὸ περιαιρεῖν, τὸ σύμπαν ἄγαλμα λυεῖν τε καὶ συγχεῖν.

156 Φασὶν ὡς ἀνδριάς ὁ τοῦ Βίτυος ἐν Ἄργει ἀπέκτεινε <τὸν αἴτιον> τοῦ θανάτου τῷ Βίτυϊ, θεωροῦντι ἐμπεσών. ἔοικεν οὖν οὐκ εἰκῇ τὰ τοιαῦτα γίνεσθαι.

157 Φασὶ τοὺς κύνας μόνον διώκειν τὰ θηρία πρὸς τὰς κορυφὰς τῶν Μελάνων καλουμένων ὀρῶν, ἀλλ' ἀναστρέφειν, ὅταν ἄχρι τούτων διώκωσιν.

158 Ἐν τῷ Φάσιδι ποταμῷ γεννᾶσθαι ῥάβδον ὀνομαζομένην λευκόφυλλον, ἣν οἱ ζηλότυποι τῶν ἀνδρῶν δρεπόμενοι ρίπτουσι περὶ τὸν παρθένιον θάλαμον, καὶ ἀνόθευτον τηροῦσι τὸν γάμον.

159 Ἐν δὲ τῷ Τίγριδι γίνεσθαι φασὶ λίθον μωδῶν κεκλημένον βαρβαρικῶς, τῇ χρῶα πάνυ λευκόν, ὃν ἐὰν κατέχη τις, ὑπὸ θηρίων οὐδὲν ἀδικεῖται.

160 Ἐν δὲ τῷ Σκαμάνδρῳ γίνεσθαι φασὶ βοτάνην σίστρον καλουμένην, βπαραπλησίαν ἐρεβίνθῳ, κόκκους δ' ἔχει σειομένους, ὅθεν τὴν προσηγορίαν ἔλαβε• ταύτην τοὺς κατέχοντας μῆτε δαιμόνιον μῆτε φαντασίαν ἠντιναοῦν φοβεῖσθαι.

161 Περί Λιβύην ἄμπελός ἐστιν ἣν καλοῦσι μαινομένην τινές, ἡ τῶν καρπῶν τοὺς μὲν πεπαίνει, τοὺς δ' ὀμφακῶδεις ἔχει, τοὺς δ' ἀνθοῦντας καὶ βραχύν τινα χρόνον.

162 Περί τὸ Σίπυλον ὄρος γίνεσθαί φασι λίθον p320παρόμοιον κυλίνδρῳ, ὃν οἱ εὐσεβεῖς υἱοὶ ὅταν εὕρωσιν, ἐν τῷ τεμένει τῆς μητρὸς τῶν θεῶν τιθέασι, καὶ οὐδέποτε χάριν ἀσεβείας ἀμαρτάνουσιν, ἀλλ' αἰεὶ εἰσι φιλοπάτορες.

163 Ἐν ὄρει Τηϋγέτῳ γίνεσθαι βοτάνην καλουμένην χαρισίαν, ἣν γυναῖκες ἕαρος ἀρχομένου τοῖς τραχήλοις περιάπτουσι, καὶ ὑπὸ τῶν ἀνδρῶν συμπαθέστερον ἐρῶνται.

164 Ὅθρυς ὄρος ἐστὶ Θετταλίας, ὃ φέρει ὄφεις τοὺς λεγομένους σῆπας, οἳ οὐκ ἔχουσι μίαν χροιάν, ἀλλ' αἰεὶ ὁμοιοῦνται τῷ χώρῳ ἐν ᾧ οἰκοῦσι. τινὲς δὲ αὐτῶν ὅμοιον ἔχουσι τὸ χρῶμα τοῖς κόχλοις τῆς γῆς. ἄλλοις δὲ χλοάζουσά ἐστιν ἡ φολίς. ὅσοι δὲ αὐτῶν ἐν ψαμάθοις διατρίβουσι, ταύταις ἐξομοιοῦνται κατὰ τὸ χρῶμα. δάκνοντες δὲ ἐμποιοῦσι δίψος. ἔστι δὲ αὐτῶν τὸ δῆγμα οὐ τραχὺ καὶ ἔμυρον, ἀλλὰ κακότηες.

165 Τοῦ περκνοῦ ἔχεως τῇ ἐχίδνῃ συγγινομένου, ἡ ἔχιδνα ἐν τῇ συνουσίᾳ τὴν κεφαλὴν ἀποκόπτει. διὰ τοῦτο καὶ τὰ τέκνα, ὥσπερ τὸν θάνατον τοῦ πατρὸς μετερχόμενα, τὴν γαστέρα τῆς μητρὸς διαρρήγνυσιν.

166 Ἐν τῷ Νεῖλῳ ποταμῷ γεννᾶσθαι λίθον φασὶ κυάμῳ παρόμοιον, ὃν ἂν κύνες ἴδωσιν, οὐχ ὑλακτοῦσι. συντελεῖ δὲ καὶ τοῖς δαίμονι τι γενομένοις κατόχοις• ἅμα γὰρ τῷ προστεθῆναι ταῖς ῥίσιν ἀπέρχεται τὸ δαιμόνιον.

167 Ἐν δὲ τῷ Μαιάνδρῳ ποταμῷ τῆς Ἀσίας λίθον φασὶ σῶφρονα καλούμενον κατ' ἀντίφρασιν• ὃν ἐάν τις εἷς τινος ἐμβάλῃ κόλπον, ἐμμανὴς γίνεται καὶ φονεῦει τινὰ τῶν συγγενῶν.

168 Ῥῆνος καὶ Ἰστρος οἱ ποταμοὶ ὑπ' ἄρκτον p322ρέουσιν, ὁ μὲν Γερμανοὺς ὁ δὲ Παίονας παραμείβων• καὶ θέρους μὲν ναυσίπορον ἔχουσι τὸ ρεῖθρον, τοῦ δὲ χειμῶνος παγέντες ὑπὸ κρύους ἐν πεδίου σχήματι καθιππεύονται.

169 Περί τὴν Θούριον πόλιν δύο ποταμούς φασιν εἶναι, Σύβαριν καὶ Κραῖθιν. ὁ μὲν οὖν Σύβαρις τοὺς πίνοντας ἀπ' αὐτοῦ πτυρτικούς εἶναι ποιεῖ, ὁ δὲ Κραῖθις τοὺς ἀνθρώπους ξανθότριχας λουομένους.

170 Ἐν δὲ Εὐβοίᾳ δύο ποταμούς εἶναι, ὧν ἅφ' οὗ μὲν τὰ πίνοντα πρόβατα λευκὰ γίνονται• ὡς ὀνομάζεται Κέρβης• ὁ δὲ Νηλεὺς, ὃς

μέλανα ποιεῖ.

171 847a Παρὰ Λυκόρμα ποταμῷ γεννᾶσθαι βοτάνην λόγχη παρόμοιον, συντελοῦσαν πρὸς ἀμβλυωπίαν ἄριστα.

172 Τὴν ἐν Συρακούσαις τῆς Σικελίας πηγὴν Ἀρέθουσαν διὰ πενταετηρίδος κινεῖσθαι λέγουσιν.

173 Ἐν ὄρει Βερεκυνθίῳ γεννᾶσθαι λίθον καλούμενον μάχαιραν, ὃν ἐὰν εὗρη τις τῶν μυστηρίων τῆς Ἑκάτης ἐπιτελουμένων ἐμμανὴς γίνεται, ὥς Εὐδοξὸς φησιν.

174 Ἐν ὄρει δὲ Τμώλῳ γεννᾶσθαι λίθον παρόμοιον κισσήρει, ὃς τετράκις τῆς ἡμέρας ἀλλάσσει τὴν χροάν• βλέπεσθαι δὲ ὑπὸ παρθένων τῶν μὴ τῷ χρόνῳ φρονήσεως μετεχουσῶν.

175 Ἐν Ἀρτέμιδος Ὀρθωσίας βωμῷ ταῦρον ἵστασθαι χρύσειον, ὃς κυνηγῶν εἰσελθόντων φωνὴν ἐπαφήσιν.

176 Ἐν Αἰτωλοῖς φασὶν ὄραν τοὺς ἀσπάλακας ἀμυδρῶς, καὶ οὐδὲ σιτεῖσθαι γῆν ἀλλ' ἀκρίδας.

177 Τοὺς ἐλέφαντάς φασι κύειν ἔτη δύο, οἱ δὲ μῆνας ὀκτωκαίδεκα• ἐν δὲ τῇ ἐκτέξει δυστοκεῖν.

p324 178 Δημάρατον Τιμαίου τοῦ Λοκροῦ ἀκουστὴν νοσήσαντα ἄφωνόν φασιν ἐπὶ δέκα γενέσθαι ἡμέρας• ἐν δὲ τῇ ἐνδεκάτῃ ἀνανήψας βραδέως ἐκ τῆς παρακοπῆς ἔφησεν ἐκεῖνον τὸν χρόνον ἥδιστα αὐτῷ βεβιωσθαι.

Μηχανικα (847a) Mechanics

[847a] Θαυμάζεται τῶν μὲν κατὰ φύσιν συμβαινόντων, ὅσων ἀγνοεῖται τὸ αἷτιον, τῶν δὲ παρὰ φύσιν, ὅσα γίνεται διὰ τέχνην πρὸς τὸ συμφέρον τοῖς ἀνθρώποις. ἐν πολλοῖς γὰρ ἡ φύσις ὑπεναντίον πρὸς τὸ χρήσιμον ἡμῖν ποιεῖ· ἡ μὲν γὰρ φύσις ἀεὶ τὸν αὐτὸν ἔχει τρόπον καὶ ἀπλῶς, τὸ δὲ χρήσιμον μεταβάλλει πολλαχῶς. ὅταν οὖν δέῃ τι παρὰ φύσιν πρᾶξαι, διὰ τὸ χαλεπὸν ἀπορίαν παρέχει καὶ δεῖται τέχνης. διὸ καὶ καλοῦμεν τῆς τέχνης τὸ πρὸς τὰς τοιαύτας ἀπορίας βοηθοῦν μέρος μηχανήν. καθάπερ γὰρ ἐποίησεν Ἀντιφῶν ὁ ποιητής, οὕτω καὶ ἔχει· τέχνη γὰρ κρατοῦμεν, ὧν φύσει νικώμεθα. τοιαῦτα δὲ ἐστὶν ἐν οἷς τὰ τε ἐλάττωνα κρατεῖ τῶν μειζόνων, καὶ τὰ ῥοπήν ἔχοντα μικρὰν κινεῖ βάρη μεγάλα, καὶ πάντα σχεδὸν ὅσα τῶν προβλημάτων μηχανικὰ προσαγορεύομεν. ἔστι δὲ ταῦτα τοῖς φυσικοῖς προβλήμασιν οὔτε ταῦτά πάμπαν οὔτε κεχωρισμένα λίαν, ἀλλὰ κοινὰ τῶν τε μαθηματικῶν θεωρημάτων καὶ τῶν φυσικῶν· τὸ μὲν γὰρ ὥς διὰ τῶν μαθηματικῶν δηλόν, τὸ δὲ περὶ ὃ διὰ τῶν φυσικῶν. περιέχεται δὲ τῶν ἀπορουμένων [847b] ἐν τῷ γένει τούτῳ τὰ περὶ τὸν μοχλόν. ἄτοπον γὰρ εἶναι δοκεῖ τὸ κινεῖσθαι μέγα βάρος ὑπὸ μικρᾶς ἰσχύος, καὶ ταῦτα μετὰ βάρους πλείονος· ὃ γὰρ ἄνευ μοχλοῦ κινεῖν οὐ δύναται τις, τοῦτο ταῦτὸ βάρος, προσλαβὼν ἔτι τὸ τοῦ μοχλοῦ βάρος, κινεῖ θάπτον. πάντων δὲ τῶν τοιούτων ἔχει τῆς αἰτίας τὴν ἀρχὴν ὁ κύκλος. καὶ τοῦτο εὐλόγως συμβέβηκεν· ἐκ μὲν γὰρ θαυμασιωτέρου συμβαίνειν τι θαυμαστὸν οὐδὲν ἄτοπον, θαυμασιώτατον δὲ τὸ τάναντία γίνεσθαι μετ' ἀλλήλων. ὁ δὲ κύκλος συνέστηκεν ἐκ τοιούτων· εὐθύς γὰρ ἐκ κινουμένου τε γεγένηται καὶ μένοντος, ὧν ἡ φύσις ἐστὶν ὑπεναντία ἀλλήλοις. ὥστ' ἐνταῦθα ἔστιν ἐπιβλέψασιν ἦττον θαυμάζειν τὰς συμβαινούσας ὑπεναντιώσεις περὶ αὐτόν. πρῶτον μὲν γὰρ τῇ περιεχούσῃ γραμμῇ τὸν κύκλον, πλάτος οὐθὲν ἔχούσῃ, τάναντία πῶς προσεμφαίνεται, τὸ κοῖλον καὶ τὸ κυρτόν. ταῦτα δὲ διέστηκεν ἀλλήλων ὃν τρόπον τὸ μέγα καὶ τὸ μικρόν· ἐκείνων τε γὰρ μέσον τὸ ἴσον καὶ τούτων τὸ εὐθύ. διὸ μεταβάλλοντα εἰς ἄλληλα τὰ μὲν ἀναγκαῖον ἴσα γενέσθαι πρότερον ἢ τῶν [848a] ἄκρων ὁποτερονοῦν, τὴν δὲ γραμμὴν εὐθεῖαν, ὅταν ἐκ κυρτῆς εἰς κοῖλον ἢ πάλιν ἐκ ταύτης γίνηται κυρτὴ καὶ περιφερής. ἐν μὲν οὖν τοῦτο τῶν ἀτόπων ὑπάρχει περὶ τὸν κύκλον, δευτέρον δὲ ὅτι

ἅμα κινεῖται τὰς ἐναντίας κινήσεις· ἅμα γὰρ εἰς τὸν ἔμπροσθεν κινεῖται τόπον καὶ τὸν ὀπισθεν. ἢ τε γράφουσα γραμμὴ τὸν κύκλον ὡσαύτως ἔχει· ἐξ οὗ γὰρ ἄρχεται τόπου τὸ πέρας αὐτῆς, εἰς τὸν αὐτὸν τοῦτον τόπον ἔρχεται πάλιν· συνεχῶς γὰρ κινουμένης αὐτῆς τὸ ἔσχατον πάλιν ἀπῆλθε πρῶτον, ὥστε καὶ φανερόν ὅτι μετέβαλεν ἐντεῦθεν. διό, καθάπερ εἴρηται πρότερον, οὐδὲν ἄτοπον τὸ πάντων εἶναι τῶν θαυμάτων αὐτὸν ἀρχήν. τὰ μὲν οὖν περὶ τὸν ζυγὸν γινόμενα εἰς τὸν κύκλον ἀνάγεται, τὰ δὲ περὶ τὸν μοχλὸν εἰς τὸν ζυγόν, τὰ δ' ἄλλα πάντα σχεδὸν τὰ περὶ τὰς κινήσεις τὰς μηχανικὰς εἰς τὸν μοχλόν. ἔτι δὲ διὰ τὸ μιᾶς οὔσης τῆς ἐκ τοῦ κέντρου γραμμῆς μὴθὲν ἕτερον ἐτέρῳ φέρεσθαι τῶν σημείων τῶν ἐν αὐτῇ ἰσοταχῶς, ἀλλ' αἰεὶ τὸ τοῦ μένοντος πέρατος πορρώτερον ὢν θάττον, πολλὰ τῶν θαυμαζομένων συμβαίνει περὶ τὰς κινήσεις τῶν κύκλων· περὶ ὧν ἐν τοῖς ἐπομένοις προβλήμασιν ἔσται δῆλον. διὰ δὲ τὸ τὰς ἐναντίας κινήσεις ἅμα κινεῖσθαι τὸν κύκλον, καὶ τὸ μὲν ἕτερον τῆς διαμέτρου τῶν ἄκρων, ἐφ' οὗ τὸ Α, εἰς τοῦμπροσθεν κινεῖσθαι, θάτερον δέ, ἐφ' οὗ τὸ Β, εἰς τοῦπισθεν, κατασκευάζουσιν τινες ὥστ' ἀπὸ μιᾶς κινήσεως πολλοὺς ὑπεναντίους ἅμα κινεῖσθαι κύκλους, ὥσπερ οὗς ἀνατιθέασιν ἐν τοῖς ἱεροῖς ποιήσαντες τροχίσκους χαλκοὺς τε καὶ σιδηροὺς. εἰ γὰρ εἴη τοῦ ΑΒ κύκλου ἀπτόμενος ἕτερος κύκλος ἐφ' οὗ ΓΔ, τοῦ κύκλου τοῦ ἐφ' οὗ ΑΒ κινουμένης τῆς διαμέτρου εἰς τοῦμπροσθεν, κινηθήσεται ἡ ΓΔ εἰς τοῦπισθεν τοῦ κύκλου τοῦ ἐφ' οὗ Α, κινουμένης τῆς διαμέτρου περὶ τὸ αὐτό. εἰς τοῦναντίον ἄρα κινηθήσεται ὁ ἐφ' οὗ ΓΔ κύκλος τῷ ἐφ' οὗ τὸ ΑΒ· καὶ πάλιν αὐτὸς τὸν ἐφεξῆς, ἐφ' οὗ ΕΖ, εἰς τοῦναντίον αὐτῷ κινήσει διὰ τὴν αὐτὴν αἰτίαν. τὸν αὐτὸν δὲ τρόπον καὶ πλείους ὥσι, τοῦτο ποιήσουσιν ἐνὸς μόνου κινηθέντος. ταύτην οὖν λαβόντες ὑπάρχουσιν ἐν τῷ κύκλῳ τὴν φύσιν οἱ δημιουργοὶ κατασκευάζουσιν ὄργανον κρύπτοντες τὴν ἀρχήν, ὅπως ἢ τοῦ μηχανήματος φανερόν μόνον τὸ θαυμαστόν, τὸ δ' αἴτιον ἄδηλον.

[848b] Πρῶτον μὲν οὖν τὰ συμβαίνοντα περὶ τὸν ζυγὸν ἀπορεῖται, διὰ τίνα αἰτίαν ἀκριβέστερά ἐστι τὰ ζυγὰ τὰ μείζω τῶν ἐλαττόνων. τούτου δὲ ἀρχή, διὰ τί ποτε ἐν τῷ κύκλῳ ἡ πλεῖον ἀφεστηκυῖα γραμμὴ τοῦ κέντρου τῆς ἐγγὺς τῇ αὐτῇ ἰσχυῖ κινουμένης θάττον φέρεται τῆς ἐλάττονος; τὸ γὰρ θάττον λέγεται διχῶς· ἢν τε γὰρ ἐν ἐλάττονι χρόνῳ ἴσον τόπον διεξέλθῃ, θάττον εἶναι λέγομεν, καὶ ἐὰν ἐν ἴσῳ πλείῳ. ἡ δὲ μείζων ἐν ἴσῳ χρόνῳ γράφει μείζονα κύκλον· ὁ

γὰρ ἐκτὸς μείζων τοῦ ἐντός. αἴτιον δὲ τούτων ὅτι φέρεται δύο φορὰς ἢ γράφουσα τὸν κύκλον. ὅταν μὲν οὖν ἐν λόγῳ τινὶ φέρηται, ἐπ' εὐθείας ἀνάγκη φέρεσθαι τὸ φερόμενον, καὶ γίνεται διάμετρος αὐτῇ τοῦ σχήματος ὃ ποιοῦσιν αἱ ἐν τούτῳ τῷ λόγῳ συντεθεῖσαι γραμμαί. ἔστω γὰρ ὁ λόγος ὃν φέρεται τὸ φερόμενον, ὃν ἔχει ἡ AB πρὸς τὴν AG· καὶ τὸ μὲν AG φερέσθω πρὸς τὸ B, ἡ δὲ AB ὑποφερέσθω πρὸς τὴν HG· ἐννέχθω δὲ τὸ μὲν A πρὸς τὸ Δ, ἡ δὲ ἐφ' ἧ AB πρὸς τὸ E. εἰ οὖν ἐπὶ τῆς φορᾶς ὁ λόγος ἦν ὃν ἡ AB ἔχει πρὸς τὴν AG, ἀνάγκη καὶ τὴν AD πρὸς τὴν AE τοῦτον ἔχειν τὸν λόγον. ὅμοιον ἄρα ἐστὶ τῷ λόγῳ τὸ μικρὸν τετράπλευρον τῷ μείζονι, ὥστε καὶ ἡ αὐτὴ διάμετρος αὐτῶν, καὶ τὸ A ἔσται πρὸς Z. τὸν αὐτὸν δὴ τρόπον δειχθήσεται καὶ ὅπου οὖν διαληφθῇ ἡ φορὰ· αἰεὶ γὰρ ἔσται ἐπὶ τῆς διαμέτρου. φανερόν οὖν ὅτι τὸ κατὰ τὴν διάμετρον φερόμενον ἐν δύο φοραῖς ἀνάγκη τὸν τῶν πλευρῶν φέρεσθαι λόγον. εἰ γὰρ ἄλλον τινά, οὐκ οἰσθήσεται κατὰ τὴν διάμετρον. ἐὰν δὲ ἐν μηδενὶ λόγῳ φέρηται δύο φορὰς κατὰ μηδένα χρόνον, ἀδύνατον εὐθεῖαν εἶναι τὴν φορὰν. ἔστω γὰρ εὐθεῖα. τεθείσης οὖν ταύτης διαμέτρου, καὶ παραπληρωθεῖσῶν τῶν πλευρῶν, ἀνάγκη τὸν τῶν πλευρῶν λόγον φέρεσθαι τὸ φερόμενον· τοῦτο γὰρ δέδεικται πρότερον. οὐκ ἄρα ποιήσει εὐθεῖαν τὸ ἐν μηδενὶ λόγῳ φερόμενον μηδένα χρόνον. ἐὰν γάρ τινα λόγον ἐνεχθῇ ἐν χρόνῳ τινί, τοῦτον ἀνάγκη τὸν χρόνον εὐθεῖαν εἶναι φορὰν διὰ τὰ προειρημένα. ὥστε περιφερὲς γίνεται, δύο φερόμενον φορὰς ἐν μηδενὶ λόγῳ μηδένα χρόνον. ὅτι μὲν τοίνυν ἡ τὸν κύκλον γράφουσα φέρεται δύο φορὰς ἅμα, φανερόν ἐκ τε τούτων, καὶ ὅτι τὸ φερόμενον κατ' εὐθεῖαν ἐπὶ τὴν κάθετον ἀφικνεῖται, [849a] ὥστε εἶναι πάλιν αὐτὴν ἀπὸ τοῦ κέντρου κάθετον. ἔστω κύκλος ὁ ABΓ, τὸ δ' ἄκρον τὸ ἐφ' οὗ B φερέσθω ἐπὶ τὸ Δ· ἀφικνεῖται δέ ποτε ἐπὶ τὸ Γ. εἰ μὲν οὖν ἐν τῷ λόγῳ ἐφέρετο ὃν ἔχει ἡ BΔ πρὸς τὴν ΔΓ, ἐφέρετο ἂν τὴν διάμετρον τὴν ἐφ' ἧ BΓ. νῦν δέ, ἐπεὶ περ ἐν οὐδενὶ λόγῳ, ἐπὶ τὴν περιφέρειαν φέρεται τὴν ἐφ' ἧ BEΓ. ἐὰν δὲ δυοῖν φερομένοιν ἀπὸ τῆς αὐτῆς ἰσχύος τὸ μὲν ἐκκρούοιτο πλεῖον τὸ δὲ ἔλαττον, εὐλογον βραδύτερον κινηθῆναι τὸ πλεῖον ἐκκρουόμενον τοῦ ἔλαττον ἐκκρουομένου· ὃ δοκεῖ συμβαίνειν ἐπὶ τῆς μείζονος καὶ ἐλάττονος τῶν ἐκ τοῦ κέντρου γραφουσῶν τοὺς κύκλους. διὰ γὰρ τὸ ἐγγύτερον εἶναι τοῦ μένοντος τῆς ἐλάττονος τὸ ἄκρον ἢ τὸ τῆς μείζονος, ὥσπερ ἀντισπώμενον εἰς τοῦναντίον, ἐπὶ τὸ μέσον βραδύτερον φέρεται τὸ τῆς ἐλάττονος ἄκρον. πάσῃ μὲν οὖν κύκλον γραφοῦσῃ τοῦτο

συμβαίνει, καὶ φέρεται τὴν μὲν κατὰ φύσιν κατὰ τὴν περιφέρειαν, τὴν δὲ παρὰ φύσιν εἰς τὸ πλάγιον καὶ τὸ κέντρον. μείζω δ' αἰετὴν παρὰ φύσιν ἢ ἐλάττων φέρεται· διὰ γὰρ τὸ ἐγγύτερον εἶναι τοῦ κέντρου τοῦ ἀντισπῶντος κρατεῖται μᾶλλον. ὅτι δὲ μείζον τὸ παρὰ φύσιν κινεῖται ἢ ἐλάττων τῆς μείζονος τῶν ἐκ τοῦ κέντρου γραφουσῶν τοὺς κύκλους, ἐκ τῶνδε δῆλον. ἔστω κύκλος ἐφ' οὗ ΒΓΔΕ, καὶ ἄλλος ἐν τούτῳ ἐλάττων, ἐφ' οὗ ΧΝΜΞ, περὶ τὸ αὐτὸ κέντρον τὸ Α· καὶ ἐκβεβλήσθωσαν αἱ διάμετροι, ἐν μὲν τῷ μεγάλῳ, ἐφ' ὧν ΓΔ καὶ ΒΕ, ἐν δὲ τῷ ἐλάττονι αἱ ΜΧ ΝΞ· καὶ τὸ ἐτερόμηκες παραπεπληρώσθω, τὸ ΔΨΡΓ. εἰ δὴ ἡ ΑΒ γράφουσα κύκλον ἥξει ἐπὶ τὸ αὐτὸ ὅθεν ὠρμήθη ἐπὶ τὴν ΑΕ, δῆλον ὅτι φέρεται πρὸς αὐτήν. ὁμοίως δὲ καὶ ἡ ΑΧ πρὸς τὴν ΑΧ ἥξει. βραδύτερον δὲ φέρεται ἡ ΑΧ τῆς ΑΒ, ὥσπερ εἴρηται, διὰ τὸ γίνεσθαι μείζονα τὴν ἔκκρουσιν καὶ ἀντισπᾶσθαι μᾶλλον τὴν ΑΧ. ἤχθω δὲ ἡ ΑΘΗ, καὶ ἀπὸ τοῦ Θ κάθετος ἐπὶ τὴν ΑΒ ἢ ΘΖ ἐν τῷ κύκλῳ, καὶ πάλιν ἀπὸ τοῦ Θ ἤχθω παρὰ τὴν ΑΒ ἢ ΘΩ, καὶ ἡ ΩΥ ἐπὶ τὴν ΑΒ κάθετον, καὶ ἡ ΗΚ. αἱ δὴ ἐφ' ὧν ΩΥ καὶ ΘΖ ἴσαι. ἡ ἄρα ΒΥ ἐλάττων τῆς ΧΖ· αἱ γὰρ ἴσαι εὐθεῖαι ἐπ' ἀνίσους κύκλους ἐμβληθεῖσαι πρὸς ὀρθὰς τῇ διαμέτρῳ ἔλαττον τμήμα ἀποτέμνουσι τῆς διαμέτρου ἐν τοῖς μείζοσι κύκλοις, ἔστι δὲ ἡ ΩΥ ἴση τῇ ΘΖ. ἐν ὅσῳ [849b] δὴ χρόνῳ ἡ ΑΘ τὴν ΧΘ ἐννήχθη, ἐν τοσούτῳ χρόνῳ ἐν τῷ κύκλῳ τῷ μείζονι μείζονα τῆς ΒΩ ἐνήνεκται τὸ ἄκρον τῆς ΒΑ. ἡ μὲν γὰρ κατὰ φύσιν φορὰ ἴση, ἡ δὲ παρὰ φύσιν ἐλάττων· ἡ δὲ ΒΥ τῆς ΖΧ. δεῖ δὲ ἀνάλογον εἶναι, ὥς τὸ κατὰ φύσιν πρὸς τὸ κατὰ φύσιν, τὸ παρὰ φύσιν πρὸς τὸ παρὰ φύσιν. μείζονα ἄρα περιφέρειαν διελέλυθε τὴν ΗΒ τῆς ΩΒ. ἀνάγκη δὲ τὴν ΗΒ ἐν τούτῳ τῷ χρόνῳ διεληλυθέναι· ἐνταῦθα γὰρ ἔσται, ὅταν ἀνάλογον ἀμφοτέρως συμβαίνει τὸ παρὰ φύσιν πρὸς τὸ κατὰ φύσιν. εἰ δὴ μείζον ἐστὶ τὸ κατὰ φύσιν ἐν τῇ μείζονι, καὶ τὸ παρὰ φύσιν μᾶλλον ἢ ἐνταῦθα συμπύπτει μοναχῶς, ὥστε τὸ Β ἐννήχθαι ἢ τὴν ΒΗ ἐν τῷ ἐφ' οὗ Χ σημείῳ. ἐνταῦθα γὰρ κατὰ φύσιν μὲν γίνεται τῷ Β σημείῳ τὸ κέντρον (ἔστι γὰρ αὐτὴ ἀπὸ τοῦ Η κάθετος), παρὰ φύσιν δὲ εἰς τὸ ΚΒ. ἔστι δὲ ὥς τὸ ΗΚ πρὸς τὸ ΚΒ, τὸ ΘΖ πρὸς τὸ ΖΧ. φανερόν δὲ εἶναι ἐπιζευχθῶσιν ἀπὸ τῶν ΒΧ ἐπὶ τὰ ΗΘ. εἰ δὲ ἐλάττων ἢ μείζων τῆς ΗΒ ἔσται, ἢ ἐννήχθη τὸ Β, οὐχ ὁμοίως ἔσται οὐδὲ ἀνάλογον ἐν ἀμφοῖν τὸ κατὰ φύσιν πρὸς τὸ παρὰ φύσιν. δι' ἣν μὲν τοίνυν αἰτίαν ἀπὸ τῆς αὐτῆς ἰσχύος φέρεται θᾶπτον τὸ πλεον ἀπέχον τοῦ κέντρου σημείου, δῆλον διὰ τῶν εἰρημένων· διότι δὲ τὰ

μὲν μείζω ζυγὰ ἀκριβέστερά ἐστι τῶν ἐλαττόνων, φανερόν ἐκ
 τούτων. γίνεται γὰρ τὸ μὲν σπάρτον κέντρον (μένει γὰρ τοῦτο), τὸ δὲ
 ἐπὶ ἐκάτερον μέρος τῆς πλάστιγγος αἱ ἐκ τοῦ κέντρου. ἀπὸ οὖν τοῦ
 αὐτοῦ βάρους ἀνάγκη θάπτον κινεῖσθαι τὸ ἄκρον τῆς πλάστιγγος,
 ὅσῳ ἂν πλεῖον ἀπέχη τοῦ σπάρτου, καὶ ἔνια μὲν μὴ δῆλα εἶναι ἐν
 τοῖς μικροῖς ζυγοῖς πρὸς τὴν αἴσθησιν ἐπιτιθέμενα βάρη, ἐν δὲ τοῖς
 μεγάλοις δῆλα οὐθὲν γὰρ κωλύει ἔλαττον κινήσθαι μέγεθος ἢ ὥστε
 εἶναι τῇ ὄψει φανερόν. ἐπὶ δὲ τῆς μεγάλης πλάστιγγος ποιεῖ ὁρατὸν
 τὸ αὐτὸ βάρος μέγεθος. ἔνια δὲ δῆλα μὲν ἐπ' ἀμφοῖν ἐστίν, ἀλλὰ
 πολλῶ μᾶλλον ἐπὶ τῶν μειζόνων διὰ τὸ πολλῶ μείζον γίνεσθαι τὸ
 μέγεθος τῆς ροπῆς ὑπὸ τοῦ αὐτοῦ βάρους ἐν τοῖς μείζουσι. καὶ διὰ
 τοῦτο τεχνάζουσιν οἱ ἀλουργοπῶλαι πρὸς τὸ παρακρούεσθαι
 ἱστάντες, τό τε σπάρτον οὐκ ἐν μέσῳ τιθέντες, καὶ μόλυβδον τῆς
 φάλαγγος εἰς θάτερον μέρος ἐγχεόντες, ἢ τοῦ ξύλου τὸ πρὸς τὴν
 ρίζαν πρὸς ὃ βούλονται ῥέπειν ποιοῦντες, ἢ ἐὰν ἔχη ὅζον· βαρύτερον
 [850a] γὰρ ἐν ᾧ μέρος ἢ ρίζα τοῦ ξύλου ἐστίν, ὃ δὲ ὅζος ρίζα τίς
 ἐστιν.

Διὰ τί, ἐὰν μὲν ἄνωθεν ἦ τὸ σπαρτίον, ὅταν κάτωθεν ῥέψαντος
 ἀφέλῃ τὸ βάρος, πάλιν ἀναφέρεται τὸ ζυγόν, ἐὰν δὲ κάτωθεν ὑποστῇ,
 οὐκ ἀναφέρεται ἀλλὰ μένει; ἢ διότι ἄνωθεν μὲν τοῦ σπαρτίου ὄντος
 πλεῖον τοῦ ζυγοῦ γίνεται τὸ ἐπέκεινα τῆς καθέτου; τὸ γὰρ σπαρτίον
 ἐστὶ κάθετος. ὥστε ἀνάγκη ἐστὶ κάτω ῥέπειν τὸ πλεόν, ἕως ἂν ἔλθῃ ἢ
 δίχα διαιροῦσα τὸ ζυγὸν ἐπὶ τὴν κάθετον αὐτήν, ἐπικειμένου τοῦ
 βάρους ἐν τῷ ἀνεσπασμένῳ μορίῳ τοῦ ζυγοῦ. ἔστω ζυγὸν ὀρθὸν ἐφ'
 οὗ ΒΓ, σπαρτίον δὲ τὸ ΑΔ. ἐκβαλλόμενον δὴ τοῦτο κάτω κάθετος
 ἔσται ἐφ' ἧς ἢ ΑΔΜ. ἐὰν οὖν ἐπὶ τὸ Β ἢ ροπή ἐπιτεθῇ, ἔσται τὸ μὲν
 Β οὗ τὸ Ε, τὸ δὲ Γ οὗ τὸ Ζ, ὥστε ἢ δίχα διαιροῦσα τὸ ζυγὸν πρῶτον
 μὲν ἦν ἢ ΔΜ τῆς καθέτου αὐτῆς, ἐπικειμένης δὲ τῆς ροπῆς ἔσται ἢ
 ΔΘ· ὥστε τοῦ ζυγοῦ ἐφ' ᾧ ΕΖ τὸ ἕξω τῆς καθέτου τῆς ἐφ' ἧς ΑΒ,
 τοῦ ἐν ᾧ ΦΠ, μείζω τοῦ ἡμίσεος. ἐὰν οὖν ἀφαιρεθῇ τὸ βάρος ἀπὸ
 τοῦ Ε, ἀνάγκη κάτω φέρεσθαι τὸ Ζ· ἔλαττον γὰρ ἐστὶ τὸ Ε. ἐὰν μὲν
 οὖν ἄνω τὸ σπαρτίον ἔχη, πάλιν διὰ τοῦτο ἀναφέρεται τὸ ζυγόν. ἐὰν
 δὲ κάτωθεν ἦ τὸ ὑποκείμενον, τοῦναντίον ποιεῖ· πλεῖον γὰρ γίνεται
 τοῦ ἡμίσεος τοῦ ζυγοῦ τὸ κάτω μέρος ἢ ὡς ἢ κάθετος διαιρεῖ ὥστε
 οὐκ ἀναφέρεται· κουφότερον γὰρ τὸ ἐπηρτημένον. ἔστω ζυγὸν τὸ
 ἐφ' οὗ ΝΞ, τὸ ὀρθόν, κάθετος δὲ ἢ ΚΛΜ. δίχα δὴ διαιρεῖται τὸ ΝΞ.
 ἐπιτεθέντος δὲ βάρους ἐπὶ τὸ Ν, ἔσται τὸ μὲν Ν οὗ τὸ Ο, τὸ δὲ Ξ οὗ

τὸ Ρ, ἢ δὲ ΚΛ οὗ τὸ ΛΘ, ὥστε μεῖζόν ἐστι τὸ ΚΟ τοῦ ΑΡ τῷ ΘΚΛ. καὶ ἀφαιρεθέντος οὖν τοῦ βάρους ἀνάγκη μένειν· ἐπίκειται γὰρ ὥσπερ βάρος ἢ ὑπεροχὴ ἢ τοῦ ἡμίσεος τοῦ ἐν ᾧ τὸ Κ.

Διὰ τί κινουῦσι μεγάλα βάρη μικραὶ δυνάμεις τῷ μοχλῷ, ὥσπερ ἐλέχθη καὶ κατ' ἀρχήν, προσλαβόντι βάρος ἔτι τὸ τοῦ μοχλοῦ; ῥᾶον δὲ τὸ ἐλαττόν ἐστι κινῆσαι βάρος, ἐλαττον δὲ ἐστὶν ἄνευ τοῦ μοχλοῦ. ἢ ὅτι αἰτιόν ἐστιν ὁ μοχλός, ζυγὸν [ὦν] κάτωθεν ἔχον τὸ σπαρτίον καὶ εἰς ἄνισα διηρημένον; τὸ γὰρ ὑπομόχλιον ἀντὶ σπαρτίου γίνεται· μένει γὰρ ἄμφω ταῦτα, ὥσπερ τὸ κέντρον. ἐπεὶ δὲ θάττον ὑπὸ τοῦ ἴσου βάρους κινεῖται ἢ μεῖζων τῶν ἐκ τοῦ κέντρου, ἔστι δὲ τρία τὰ περὶ τὸν μοχλόν, τὸ μὲν ὑπομόχλιον, σπάρτον καὶ κέντρον, δύο δὲ βάρη, ὅ τε κινῶν καὶ τὸ κινούμενον· ὁ [850b] οὖν τὸ κινούμενον βάρος πρὸς τὸ κινῶν, τὸ μῆκος πρὸς τὸ μῆκος ἀντιπέπονθεν. αἰεὶ δὲ ὅσῳ ἂν μεῖζον ἀφεστήκη τοῦ ὑπομοχλίου, ῥᾶον κινήσει. αἰτία δὲ ἐστὶν ἢ προλεχθεῖσα, ὅτι ἢ πλεῖον ἀπέχουσα ἐκ τοῦ κέντρου μεῖζονα κύκλον γράφει. ὥστε ἀπὸ τῆς αὐτῆς ἰσχύος πλέον μεταστήσεται τὸ κινῶν τὸ πλεῖον τοῦ ὑπομοχλίου ἀπέχον. ἔστω μοχλὸς ἐφ' οὗ ΑΒ, βάρος δὲ ἐφ' ᾧ τὸ Γ, τὸ δὲ κινῶν ἐφ' ᾧ τὸ Δ, ὑπομόχλιον ἐφ' ᾧ τὸ Ε, τὸ δὲ ἐφ' ᾧ τὸ Δ κινῆσαν ἐφ' ᾧ τὸ Η, κινούμενον δὲ τὸ ἐφ' οὗ Γ, βάρος ἐφ' οὗ Κ.

Διὰ τί οἱ μεσόνεοι μάλιστα τὴν ναῦν κινουῦσιν; ἢ διότι ἡ κόπη μοχλός ἐστιν; ὑπομόχλιον μὲν γὰρ ὁ σκαλμός γίνεται (μένει γὰρ δὴ τοῦτο), τὸ δὲ βάρος ἢ θάλαττα, ἣν ἀπωθεῖ ἡ κόπη· ὁ δὲ κινῶν τὸν μοχλόν ὁ ναύτης ἐστίν. αἰεὶ δὲ πλέον βάρος κινεῖ, ὅσῳ ἂν πλέον ἀφεστήκη τοῦ ὑπομοχλίου ὁ κινῶν τὸ βάρος· μεῖζων γὰρ οὕτω γίνεται ἢ ἐκ τοῦ κέντρου, ὁ δὲ σκαλμός ὑπομόχλιον ὦν κέντρον ἐστίν. ἐν μέσῃ δὲ τῇ νηὶ πλεῖστον τῆς κόπης ἐντός ἐστιν· καὶ γὰρ ἡ ναῦς ταύτῃ εὐρυτάτῃ ἐστίν, ὥστε πλεῖον ἐπ' ἀμφοτέρα ἐνδέχεσθαι μέρος τῆς κόπης ἐκατέρου τοίχου ἐντὸς εἶναι τῆς νεώς. κινεῖται μὲν οὖν ἡ ναῦς διὰ τὸ ἀπερειδομένης τῆς κόπης εἰς τὴν θάλασσαν τὸ ἄκρον τῆς κόπης τὸ ἐντὸς προϊέναι εἰς τὸ πρόσθεν, τὴν δὲ ναῦν προσδεδεμένην τῷ σκαλμῷ συμπροΐεναι, ἢ τὸ ἄκρον τῆς κόπης. ἢ γὰρ πλείστην θάλασσαν διαιρεῖ ἡ κόπη, ταύτῃ ἀνάγκη μάλιστα προωθεῖσθαι· πλείστην δὲ διαιρεῖ ἢ πλεῖστον μέρος ἀπὸ τοῦ σκαλμοῦ τῆς κόπης ἐστίν. διὰ τοῦτο οἱ μεσόνεοι μάλιστα κινουῦσιν· μέγιστον γὰρ ἐν μέσῃ νηὶ τὸ ἀπὸ τοῦ σκαλμοῦ τῆς κόπης τὸ ἐντός ἐστίν.

Διὰ τί τὸ πηδάλιον μικρὸν ὄν, καὶ ἐπ' ἐσχάτῳ τῷ πλοίῳ, τοσαύτην δύναμιν ἔχει ὥστε ὑπὸ μικροῦ οἴακος καὶ ἐνὸς ἀνθρώπου δυνάμεως, καὶ ταύτης ἡρεμαίας, μεγάλα κινεῖσθαι μεγέθη πλοίων; ἢ διότι καὶ τὸ πηδάλιον ἐστὶ μοχλός, καὶ μοχλεῦει ὁ κυβερνήτης. ἢ μὲν οὖν προσήρμωσται τῷ πλοίῳ, γίνεται ὑπομόχλιον, τὸ δὲ ὅλον πηδάλιον ὁ μοχλός, τὸ δὲ βάρος ἢ θάλασσα, ὁ δὲ κυβερνήτης ὁ κινῶν. οὐ κατὰ πλάτος δὲ λαμβάνει τὴν θάλασσαν, ὥσπερ ἡ κώπη, τὸ πηδάλιον. οὐ γὰρ εἰς τὸ πρόσθεν κινεῖ τὸ πλοῖον, ἀλλὰ κινούμενον κλίνει, πλαγίως τὴν θάλατταν δεχόμενον. ἐπεὶ γὰρ τὸ βάρος ἦν ἢ θάλασσα, τὸνναντίον ἀπεριεσπόμενον κλίνει τὸ πλοῖον. τὸ γὰρ ὑπομόχλιον εἰς τὸνναντίον στρέφεται, [851a] ἢ θάλασσα δὲ ἐντός· ἐκεῖνο δὲ εἰς τὸ ἐκτός. τούτῳ δὲ ἀκολουθεῖ τὸ πλοῖον διὰ τὸ συνδεδέσθαι. ἢ μὲν οὖν κώπη κατὰ πλάτος τὸ βάρος ὠθοῦσα καὶ ὑπ' ἐκείνου ἀντρωθουμένη εἰς τὸ εὐθὺ προάγει· τὸ δὲ πηδάλιον, ὥσπερ κἀθηται πλάγιον, τὴν εἰς τὸ πλάγιον, ἢ δεῦρο ἢ ἐκεῖ, ποιεῖ κίνησιν. ἐπ' ἄκρου δὲ καὶ οὐκ ἐν μέσῳ κεῖται, ὅτι ῥᾶστον τὸ κινούμενον κινῆσαι ἀπ' ἄκρου κινοῦν. τάχιστα γὰρ φέρεται τὸ πρῶτον μέρος διὰ τὸ ὥσπερ ἐν τοῖς φερομένοις ἐπὶ τέλει λήγειν τὴν φοράν, οὕτω καὶ τοῦ συνεχοῦς ἐπὶ τέλους ἀσθενεστάτη ἐστὶν ἢ φορά. εἰ δὲ ἀσθενεστάτη, ῥαδίᾳ ἐκκρούειν. διὰ τε δὴ ταῦτα ἐν τῇ πρῦμνῃ τὸ πηδάλιον ἐστὶ, καὶ ὅτι ἐνταῦθα μικρᾶς κινήσεως γενομένης πολλῶ μείζον τὸ διάστημα ἐπὶ τῷ ἐσχάτῳ γίνεται, διὰ τὸ τὴν ἴσην γωνίαν ἐπὶ μείζονα καθῆσθαι, καὶ ὅσῳ ἂν μείζους ὦσιν αἱ περιέχουσαι. δῆλον δὲ ἐκ τούτου καὶ δι' ἣν αἰτίαν μᾶλλον προέρχεται εἰς τὸνναντίον τὸ πλοῖον ἢ ἡ τῆς κώπης πλάτη· τὸ αὐτὸ γὰρ μέγεθος τῇ αὐτῇ ἰσχύϊ κινούμενον ἐν ἀέρι πλέον ἢ ἐν τῷ ὕδατι πρόεισιν. ἔστω γὰρ ἡ Α Β κώπη, τὸ δὲ Γ ὁ σκαλμός, τὸ δὲ Α τὸ ἐν τῷ πλοίῳ, ἡ ἀρχὴ τῆς κώπης, τὸ δὲ Β τὸ ἐν τῇ θαλάττῃ. εἰ δὴ τὸ Α οὗ τὸ Δ μετακεκίνηται, τὸ Β οὐκ ἔσται οὗ τὸ Ε· ἴση γὰρ ἢ Β Ε τῇ ΑΔ. ἴσον οὖν μετακεχωρηκός ἔσται. ἀλλ' ἦν ἔλαττον. ἔσται δὴ οὗ τὸ Ζ ἢ τὸ Θ. ἄρα τοίνυν τὴν ΑΒ, καὶ οὐχ ἡ τὸ Γ, καὶ κάτωθεν. ἐλάττων γὰρ ἢ ΒΖ τῆς ΑΔ, ὥστε καὶ ἡ ΘΖ τῆς ΔΘ· ὅμοια γὰρ τὰ τρίγωνα. καθεστηκός δὲ ἔσται καὶ τὸ μέσον, τὸ ἐφ' οὗ Γ· εἰς τὸνναντίον γὰρ τῷ ἐν τῇ θαλάττῃ ἄκρῳ τῷ Β μεταχωρεῖ, ἥπερ τὸ ἐν τῷ πλοίῳ ἄκρον τὸ Α μὴ ἐχώρει οὗ τὸ Δ. ὥστε μετακινηθήσεται τὸ πλοῖον, καὶ ἐκεῖ οὗ ἢ ἀρχὴ τῆς κώπης μεταφέρεται. τὸ δ' αὐτὸ καὶ τὸ πηδάλιον ποιεῖ, πλὴν ὅτι εἰς τὸ πρόσθεν οὐδὲν συμβάλλεται τῷ πλοίῳ, ὥσπερ ἐλέχθη ἐπὶ ἄνω, ἀλλὰ

μόνον τὴν πρύμναν εἰς τὸ πλάγιον ἀπωθεῖ ἔνθα ἢ ἔνθα· εἰς τοῦναντίον γὰρ ἡ πρῶρα οὕτω νεύει. ἡ μὲν δὴ τὸ πηδάλιον προσέζειυκται, δεῖ οἷόν τι τοῦ κινουμένου μέσον νοεῖν, καὶ ὥσπερ ὁ σκαλμὸς τῇ κώπῃ· τὸ δὲ μέσον ὑποχωρεῖ, ἥ ὁ οἶαξ μετακινεῖται. ἐὰν μὲν εἴσω ἄγῃ, καὶ ἡ πρύμνα δεῦρο μεθέστηκεν· ἡ δὲ πρῶρα εἰς τοῦναντίον νεύει· ἐν γὰρ τῷ αὐτῷ οὔσης τῆς πρῶρας τὸ πλοῖον μεθέστηκεν ὅλον.

Διὰ τί, ὅσῳ ἂν ἡ κεραία ἀνωτέρα ἦ, θᾶττον πλεῖ τὰ πλοῖα τῷ αὐτῷ ἰστίῳ καὶ τῷ αὐτῷ πνεύματι; ἡ διότι γίνεται ὁ μὲν ἰστὸς μοχλός, ὑπομόχλιον δὲ τὸ ἐδώλιον ἐν ᾧ [851b] ἐμπέπηγεν, ὃ δὲ δεῖ κινεῖν βάρος, τὸ πλοῖον, τὸ δὲ κινεῖν τὸ ἐν τῷ ἰστίῳ πνεῦμα. εἰ δ' ὅσῳ ἂν πορρώτερον ἦ τὸ ὑπομόχλιον, ῥᾶον κινεῖ καὶ θᾶττον ἡ αὐτὴ δύναμις τὸ αὐτὸ βάρος, ἢ οὖν κεραία ἀνώτερον ἀγομένη καὶ τὸ ἰστίον πορρώτερον ποιεῖ τοῦ ἐδωλίου ὑπομοχλίου ὄντος.

Διὰ τί, ὅταν ἐξ οὐρίας βούλονται διαδραμεῖν μὴ οὐρίου τοῦ πνεύματος ὄντος, τὸ μὲν πρὸς τὸν κυβερνήτην τοῦ ἰστίου μέρος στέλλονται, τὸ δὲ πρὸς τὴν πρῶραν ποδιαῖον ποιησάμενοι ἐφιασιν; ἡ διότι ἀντισπᾶν τὸ πηδάλιον πολλῷ μὲν ὄντι τῷ πνεύματι οὐ δύναται, ὀλίγῳ δέ, ὃ ὑποστέλλονται. προάγει μὲν οὖν τὸ πνεῦμα, εἰς οὐριον δὲ καθίστησι τὸ πηδάλιον, ἀντισπῶν καὶ μοχλεῖν τὴν θάλατταν. ἅμα δὲ καὶ οἱ ναῦται μάχονται τῷ πνεύματι· ἀνακλίνουσι γὰρ ἐπὶ τὸ ἐναντίον ἑαυτούς.

Διὰ τί τὰ στρογγύλα καὶ περιφερῆ τῶν σχημάτων εὐκίνητοτερα; τριχῶς δὲ ἐνδέχεται τὸν κύκλον κυλισθῆναι· ἡ γὰρ κατὰ τὴν ἀνῆδα, συµμεταβάλλοντος τοῦ κέντρου, ὥσπερ ὁ τροχὸς ὁ τῆς ἀμάξης κυλίσταται· ἡ περὶ τὸ κέντρον μόνον, ὥσπερ αἱ τροχιλαί, τοῦ κέντρου μένοντος· ἡ παρὰ τὸ ἐπίπεδον, τοῦ κέντρου μένοντος, ὥσπερ ὁ κεραμεικὸς τροχὸς κυλινδεται. εἰ μὲν δὴ τάχιστα τὰ τοιαῦτα, διὰ τε τὸ μικρῷ ἅπτεσθαι τοῦ ἐπιπέδου, ὥσπερ ὁ κύκλος κατὰ στιγμὴν, καὶ διὰ τὸ μὴ προσκόπτειν· ἀφέστηκε γὰρ τῆς γῆς ἡ γωνία. καὶ ἔτι ᾧ ἂν ἀπαντήσῃ σῶματι, πάλιν τούτου κατὰ μικρὸν ἅπτεται. εἰ δ' εὐθύγραμμον ἦν, τῇ εὐθείᾳ ἐπὶ πολὺ ἥπτετο ἂν τοῦ ἐπιπέδου. ἔτι ἡ ῥέπει ἐπὶ τὸ βάρος, ταύτῃ κινεῖ ὁ κινῶν. ὅταν μὲν γὰρ πρὸς ὀρθιον ἢ διάμετρος ἦ τοῦ κύκλου τῷ ἐπιπέδῳ, ἀπτομένου τοῦ κύκλου κατὰ στιγμὴν τοῦ ἐπιπέδου, ἴσον τὸ βάρος ἐπ' ἀμφοτέρα διαλαμβάνει ἢ διάμετρος· ὅταν δὲ κινῆται, εὐθὺς πλέον ἐφ' ᾧ κινεῖται, ὥσπερ ῥέπον. ἐντεῦθεν εὐκίνητοτερον τῷ ὠθοῦντι εἰς

τοῦμπροσθεν· ἐφ’ ὃ γὰρ ῥέπει ἕκαστον, εὐκίνητόν ἐστιν, εἵπερ καὶ τὸ ἐπὶ τὸ ἐναντίον τῆς ῥοπῆς δυσκίνητον. ἔτι λέγουσί τινες ὅτι καὶ ἡ γραμμὴ ἢ τοῦ κύκλου ἐν φορᾷ ἐστὶν αἰεὶ, ὥσπερ τὰ μένοντα, διὰ τὸ ἀντρείδειν, οἷον καὶ τοῖς μείζουσι κύκλοις ὑπάρχει πρὸς τοὺς ἐλάττονας. θάττον γὰρ ὑπὸ τῆς ἴσης ἰσχύος κινοῦνται οἱ μείζους καὶ τὰ βάρη κινοῦσι, διὰ τὸ ῥοπήν τινα ἔχειν τὴν γωνίαν τὴν τοῦ μείζονος κύκλου πρὸς τὴν τοῦ ἐλάττονος, καὶ εἶναι ὅπερ ἡ διάμετρος πρὸς τὴν διάμετρον. ἀλλὰ μὴν πᾶς κύκλος μείζων πρὸς [852a] ἐλάττονα· ἅπειροι γὰρ οἱ ἐλάττονες. εἰ δὲ καὶ πρὸς ἕτερον ἔχει ῥοπήν ὁ κύκλος, ὁμοίως δὲ εὐκίνητος, καὶ ἄλλην ἂν ἔχοι ῥοπήν ὁ κύκλος καὶ τὰ ὑπὸ κύκλου κινούμενα, κἂν μὴ τῇ ἀνίδι ἁπτηται τοῦ ἐπιπέδου, ἀλλ’ ἢ παρὰ τὸ ἐπίπεδον, ἢ ὡς αἱ τροχιλαί· καὶ γὰρ οὕτως ἔχοντα ῥᾶστα κινοῦνται καὶ κινοῦσι τὸ βάρος. ἢ οὐ τῷ κατὰ μικρὸν ἅπτεσθαι καὶ προσκρούειν, ἀλλὰ δι’ ἄλλην αἰτίαν. αὕτη δὲ ἐστὶν ἡ εἰρημένη πρότερον, ὅτι ἐκ δύο φορῶν γεγένηται ὁ κύκλος, ὥστε μίαν αὐτῶν αἰεὶ ἔχειν ῥοπήν, καὶ οἷον φερόμενον αὐτὸν αἰεὶ κινοῦσιν οἱ κινοῦντες, ὅταν κινῶσι κατὰ τὴν περιφέρειαν ὁπωσοῦν. φερομένην γὰρ αὐτὴν κινοῦσιν· τὴν μὲν γὰρ εἰς τὸ πλάγιον αὐτοῦ κίνησιν ὠθεῖ τὸ κινοῦν, τὴν δὲ ἐπὶ τῆς διαμέτρου αὐτὸς κινεῖται.

Διὰ τί τὰ διὰ τῶν μειζόνων κύκλων αἰρόμενα καὶ ἐλκόμενα ῥᾶον καὶ θάττον κινοῦμεν; οἷον καὶ αἱ τροχιλαί αἱ μείζους τῶν ἐλαττόνων, καὶ αἱ σκυτάλαι ὁμοίως. ἢ διότι ὅσῳ ἂν μείζων ἢ ἐκ τοῦ κέντρου ἦ, ἐν τῷ ἴσῳ χρόνῳ πλεον κινεῖται χωρίον, ὥστε καὶ τοῦ ἴσου βάρους ἐπόντος ποιήσει τὸ αὐτό, ὥσπερ εἵπομεν καὶ τὰ μείζω ζυγὰ τῶν ἐλαττόνων ἀκριβέστερα εἶναι. τὸ μὲν γὰρ σπαρτίον ἐστὶ κέντρον, τοῦ δὲ ζυγοῦ αἱ ἐπὶ τάδε τοῦ σπαρτίου αἱ ἐκ τοῦ κέντρου.

Διὰ τί ῥᾶον, ὅταν ἄνευ βάρους ἦ, κινεῖται τὸ ζυγόν, ἢ ἔχον βάρος; ὁμοίως δὲ καὶ τροχὸς ἢ ἄλλο τοιοῦτο τὸ βαρύτερον μὲν μείζον δὲ τοῦ ἐλάττονος καὶ κουφοτέρου. ἢ ὅτι οὐ μόνον εἰς τούναντίον τὸ βαρὺ, ἀλλὰ καὶ εἰς τὸ πλάγιον δυσκίνητόν ἐστιν. ἐναντίον γὰρ τῇ ῥοπῇ κινήσαι χαλεπῶς, ἐφ’ ὃ δὲ ῥέπει, ῥαδίως· εἰς δὲ τὸ πλάγιον οὐ ῥέπει.

Διὰ τί ἐπὶ τῶν σκυτάλων ῥᾶον τὰ φορτία κομίζεται ἢ ἐπὶ τῶν ἀμαξῶν, ἐχουσῶν τῶν μὲν μεγάλους τροχοὺς, τῶν δὲ μικροὺς; ἢ διότι ἐπὶ τῶν σκυτάλων οὐδεμίαν ἔχει πρόσκοψιν, τὸ δὲ ἐπὶ τῶν ἀμαξῶν τὸν ἄξονα, καὶ προσκόπτει αὐτῷ· ἐκ τε γὰρ τῶν ἄνωθεν πιέζει αὐτὸν καὶ ἐκ τῶν πλαγίων. τὸ δὲ ἐπὶ τῶν σκυτάλων ἐπὶ δύο

τούτων κινεῖται, τῇ τε κάτω χώρα ὑποκειμένη καὶ τῷ βάρει τῷ ἐπικειμένῳ· ἐπ' ἀμφοτέρων γὰρ τούτων κυλίνεται τῶν τόπων ὁ κύκλος καὶ φερόμενος ὠθεῖται.

Διὰ τί πορρωτέρω τὰ βέλη φέρεται ἀπὸ τῆς σφενδόνης ἢ ἀπὸ τῆς χειρός; καίτοι κρατεῖ γε ὁ βάλλων τῇ χειρὶ [852b] μᾶλλον ἢ ἀπαρτήσας τὸ βάρος. καὶ ἔτι οὕτω μὲν δύο βάρη κινεῖ, τὸ τε τῆς σφενδόνης καὶ τὸ βέλος, ἐκείνως δὲ τὸ βέλος μόνον. πότερον ὅτι ἐν μὲν τῇ σφενδόνῃ κινούμενον τὸ βέλος ρίπτει ὁ βάλλων (περιαγαγὼν γὰρ κύκλῳ πολλάκις ἀφήσιν), ἐκ δὲ τῆς χειρὸς ἀπὸ τῆς ἡρεμίας ἢ ἀρχῇ· πάντα δὲ εὐκίνητότερα κινούμενα ἢ ἡρεμοῦντα. ἢ διὰ τε τοῦτο, καὶ διότι ἐν μὲν τῷ σφενδονᾶν ἢ μὲν χεῖρ γίνεται κέντρον, ἢ δὲ σφενδόνη ἢ ἐκ τοῦ κέντρου· ὅσῳ ἂν ἡ μείζων ἢ ἀπὸ τοῦ κέντρου, κινεῖται θάττον. ἢ δὲ ἀπὸ τῆς χειρὸς βολὴ πρὸς τὴν σφενδόνην βραχεῖα ἐστίν.

Διὰ τί ῥᾶον κινοῦνται περὶ τὸ αὐτὸ ζυγὸν οἱ μείζους τῶν ἐλαττόνων κόλλοπες, καὶ οἱ αὐτοὶ ὄνοι οἱ λεπτότεροι ὑπὸ τῆς αὐτῆς ἰσχύος τῶν παχυτέρων; ἢ διότι ὁ μὲν ὄνος καὶ τὸ ζυγὸν κέντρον ἐστίν, τὰ δὲ ἀπέχοντα μεγέθη αἱ ἐκ τοῦ κέντρου; θάττον δὲ κινοῦνται καὶ πλεόν ἀπὸ τῆς αὐτῆς ἰσχύος αἱ τῶν μειζόνων κύκλων ἢ αἱ τῶν ἐλαττόνων· ὑπὸ τῆς αὐτῆς γὰρ ἰσχύος θάττον μεθίσταται τὸ ἄκρον τὸ πορρώτερον τοῦ κέντρου. διὸ πρὸς μὲν τὸ ζυγὸν τοὺς κόλλοπας ὄργανα ποιοῦνται, οἷς ῥᾶον στρέφουσιν· ἐν δὲ τοῖς λεπτοῖς ὄνοις πλεῖον γίνεται τὸ ἔξω τοῦ ξύλου, αὕτη δὲ γίνεται ἢ ἐκ τοῦ κέντρου.

Διὰ τί τὸ αὐτὸ μέγεθος ξύλον ῥᾶον κατεάσσεται περὶ τὸ γόνυ, ἐὰν ἴσον ἀποστήσας τῶν ἄκρων ἐχόμενος καταγνύη, ἢ παρὰ τὸ γόνυ ἐγγὺς ὄντος· καὶ ἐὰν πρὸς τὴν γῆν ἐρείσας καὶ τῷ ποδὶ προσβάς πόρρωθεν τῇ χειρὶ καταγνύη, ἢ ἐγγύθεν; ἢ διότι ἔνθα μὲν τὸ γόνυ κέντρον, ἔνθα δὲ ὁ πούς, ὅσῳ δ' ἂν πορρώτερον ἦ τοῦ κέντρου, ῥᾶον κινεῖται ἅπαν. κινήθηναι δὲ ἀνάγκη καταγνύμενον.

Διὰ τί περὶ τοὺς αἰγιαλοὺς αἱ καλούμεναι κρόκαι στρογγύλαι εἰσίν, ἐκ μακρῶν τῶν λίθων καὶ ὀστράκων τὸ ἐξ ὑπαρχῆς ὄντων; ἢ διότι τὰ πλεῖον ἀπέχοντα τοῦ μέσου ἐν ταῖς κινήσεσι θάττον φέρεται. τὸ μὲν γὰρ μέσον γίνεται κέντρον, τὸ δὲ διάστημα ἢ ἐκ τοῦ κέντρου. ἀεὶ δὲ ἡ μείζων ἀπὸ τῆς ἴσης κινήσεως μείζω γράφει κύκλον. τὸ δ' ἐν ἴσῳ χρόνῳ μείζω διεξιὼν θάττον φέρεται. τὰ δὲ φερόμενα θάττον ἐκ τοῦ ἴσου ἀποστήματος σφοδρότερον τύπτει. τὰ δὲ τύπτοντα μᾶλλον καὶ αὐτὰ τύπτεται μᾶλλον. ὥστε ἀνάγκη θραύεσθαι αἰεὶ τὰ πλεόν

ἀπέχοντα τοῦ μέσου. τοῦτο δὲ πάσχοντα ἀνάγκη γίνεσθαι περιφερῆ. ταῖς δὲ κρόκαις διὰ [853a] τὴν τῆς θαλάττης κίνησιν, διὰ τὸ μετὰ τῆς θαλάττης κινεῖσθαι, συμβαίνει αἰεὶ ἐν κινήσει εἶναι καὶ κυλιομέναις προσκόπτειν. τοῦτο δὲ ἀνάγκη μάλιστα συμβαίνειν αὐτοῖς τοῖς ἄκροις.

Διὰ τί, ὅσῳ ἂν ᾗ μακρότερα τὰ ξύλα, τοσούτῳ ἀσθενέστερα γίνεται, καὶ κάμπτεται αἰρόμενα μᾶλλον, κἂν ᾗ τὸ μὲν βραχύ, ὅσον δίπηχυ, λεπτόν, τὸ δὲ ἑκατὸν πηχῶν παχύ; ἢ διότι μοχλὸς γίνεται καὶ βάρος καὶ ὑπομόχλιον ἐν τῷ αἵρεσθαι τοῦ ξύλου τὸ μήκος; τὸ μὲν γὰρ πρῶτον μέρος αὐτοῦ, ὃ ἡ χεὶρ αἶρει, οἷον ὑπομόχλιον γίνεται, τὸ δ' ἐπὶ τῷ ἄκρῳ βάρος. ὥστε ὅσῳ ἂν ᾗ μακρότερον τὸ ἀπὸ τοῦ ὑπομοχλίου, τοσούτῳ ἀνάγκη κάμπτεσθαι μᾶλλον· ὅσῳ γὰρ ἂν πλεον ἀπέχη τοῦ ὑπομοχλίου, τοσούτῳ ἀνάγκη κάμπτεσθαι μειζον. ἀνάγκη οὖν αἵρεσθαι τὰ ἄκρα τοῦ μοχλοῦ. ἐὰν οὖν ᾗ καμπτόμενος ὁ μοχλὸς, ἀνάγκη αὐτὸν κάμπτεσθαι μᾶλλον αἰρόμενον. ὅπερ συμβαίνει ἐπὶ τῶν ξύλων τῶν μακρῶν· ἐν δὲ τοῖς βραχέσιν ἐγγὺς τὸ ἔσχατον τοῦ ὑπομοχλίου γίνεται τοῦ ἡρεμοῦντος.

Διὰ τί τῷ σφηνί ὄντι μικρῷ μεγάλα βάρη δίσταται καὶ μεγέθη σωμάτων, καὶ θλίψεις ἰσχυρὰ γίνεται; ἢ διότι ὁ σφήν δύο μοχλοὶ εἰσιν ἐναντίοι ἀλλήλοις, ἔχει δὲ ἑκάτερος τὸ μὲν βάρος τὸ δὲ ὑπομόχλιον, ὃ καὶ ἀνασπᾷ ἢ πιέζει. ἔτι δὲ ἡ τῆς πληγῆς φορὰ τὸ βάρος, ὃ τύπτει καὶ κινεῖ, ποιεῖ μέγα· καὶ διὰ τὸ κινούμενον κινεῖν τῇ ταχυτῇ ἰσχύει ἔτι πλεον. μικρῷ δὲ ὄντι μεγάλαι δυνάμεις ἀκολουθοῦσι· διὸ λανθάνει κινῶν παρὰ τὴν ἀξίαν τοῦ μεγέθους. ἔστω σφήν ἐφ' ᾧ ABΓ, τὸ δὲ σφηνούμενον ΔΕΗΖ. μοχλὸς δὴ γίνεται ἡ AB, βάρος δὲ τὸ τοῦ Β κάτωθεν, ὑπομόχλιον δὲ τὸ ΖΔ. ἐναντίος δὲ τούτῳ μοχλὸς τὸ ΒΓ. ἢ δὲ ΑΓ κοπτομένη ἑκατέρα τούτων χρηταὶ μοχλῶ· ἀνασπᾷ γὰρ τὸ Β.

Διὰ τί, ἐὰν τις δύο τροχιλέας ποιήσας ἐπὶ δυσὶ ξύλοις συμβάλλουσιν ἑαυτοῖς ἐναντίως αὐταῖς κύκλῳ περιβάλλῃ καλωδίον, ἔχον τὸ ἄρτημα ἐκ θατέρου τῶν ξύλων, θάτερον δὲ ᾗ προσεληρμισμένον ἢ προστεθειμένον κατὰ τὰς τροχαλίας, ἐὰν ἔλκη τις τῇ ἀρχῇ τοῦ καλωδίου, μεγάλα βάρη προσάγει, κἂν ᾗ μικρὰ ἢ ἔλκουσα ἰσχύς; ἢ διότι τὸ αὐτὸ βάρος ἀπὸ ἐλάττονος ἰσχύος, εἰ μοχλεύεται, ἐγείρεται, ἢ ἀπὸ χειρός; ἢ δὲ τροχιλέα τὸ αὐτὸ ποιεῖ τῷ μοχλῶ, [853b] ὥστε ἡ μία ῥᾶον ἔλξει, καὶ ἀπὸ μιᾶς ὀλκῆς τοῦ κατὰ χεῖρα πολὺ ἔλξει βαρύτερον. τοῦτο δ' αἱ δύο τροχαλαὶ πλεον ἢ

διπλασίῳ τάχει αἵρουσαι. ἔλαττον γὰρ ἔτι ἡ ἐτέρα ἔλκει ἢ εἰ αὐτὴ καθ' ἑαυτὴν εἴλκεν, ὅταν παρὰ τῆς ἐτέρας ἐπιβληθῇ τὸ σχοινίον· ἐκείνη γὰρ ἔτι ἔλαττον ἐποίησε τὸ βάρος. καὶ οὕτως ἐὰν εἰς πλείους ἐπιβάλληται τὸ καλώδιον, ἐν ὀλίγαις τροχιλαῖς πολλὴ γίνεται διαφορά, ἢ ὥστε ὑπὸ τῆς πρώτης τοῦ βάρους ἔλκοντος τέτταρας μῶας, ὑπὸ τῆς τελευταίας ἔλκεσθαι πολλῷ ἐλάττω. καὶ ἐν τοῖς οἰκοδομικοῖς ἔργοις ῥαδίως κινουσι μεγάλα βάρη· μεταφέρουσι γὰρ ἀπὸ τῆς αὐτῆς τροχιλαῖς ἐφ' ἐτέραν, καὶ πάλιν ἀπ' ἐκείνης εἰς ὄνους καὶ μοχλοῦς· τοῦτο δὲ ταυτόν ἐστι τῷ ποιεῖν πολλὰς τροχιλαῖς.

Διὰ τί, ἐὰν μὲν τις ἐπιθῇ ἐπὶ τὸ ξύλον πέλεκυν μέγαν καὶ φορτίον μέγα ἐπ' αὐτῷ, οὐ διαιρεῖ τὸ ξύλον, ὃ τι καὶ λόγου ἄξιον· ἐὰν δὲ ἄρας τὸν πέλεκυν τις πατάξῃ αὐτῷ, διασχίζει, ἔλαττον βάρος ἔχοντος τοῦ τύπτοντος πολὺ μᾶλλον ἢ τοῦ ἐπικειμένου καὶ πιεζοῦντος; ἢ διότι πάντα τῇ κινήσει ἐργάζεται, καὶ τὸ βαρὺ τὴν τοῦ βάρους κίνησιν λαμβάνει μᾶλλον κινούμενον ἢ ἡρεμοῦν; ἐπικείμενον οὖν οὐ κινεῖται τὴν τοῦ βάρους κίνησιν, φερόμενον δὲ ταύτην τε καὶ τὴν τοῦ τύπτοντος. ἔτι δὲ καὶ γίνεται σφὴν ὁ πέλεκυς· ὁ δὲ σφὴν μικρὸς ὢν μεγάλη διίστησι διὰ τὸ εἶναι ἐκ δύο μοχλῶν ἐναντίως συγκειμένων.

Διὰ τί αἱ φάλαγγες τὰ κρέα ἰσθᾶσιν ἀπὸ μικροῦ ἀρτήματος μεγάλα βάρη, τοῦ ὅλου ἡμιζυγίου ὄντος; οὗ μὲν γὰρ τὸ βάρος ἐντίθεται, κατήρηται μόνον ἡ πλάστιγξ, ἐπὶ θάτερον δὲ ἡ φάλαγξ ἐστὶ μόνον. ἢ ὅτι ἅμα συμβαίνει ζυγὸν καὶ μοχλὸν εἶναι τὴν φάλαγγα; ζυγὸν μὲν γὰρ, ἢ τῶν σπαρτίων ἕκαστον γίνεται τὸ κέντρον τῆς φάλαγγος. τὸ μὲν οὖν ἐπὶ θάτερα ἔχει πλάστιγγα, τὸ δὲ ἐπὶ θάτερα ἀντὶ τῆς πλάστιγγος τὸ σφαίρωμα, ὃ τῷ ζυγῷ ἔγκειται, ὥσπερ εἴ τις τὴν ἐτέραν πλάστιγγα καὶ τὸν σταθμὸν ἐπιθεῖ ἐπὶ τὸ ἄκρον τῆς πλάστιγγος· δηλὸν γὰρ ὅτι ἔλκει τοσοῦτον βάρος ἐν τῇ ἐτέρᾳ κείμενον πλάστιγγι. ὅπως δὲ τὸ ἐν ζυγὸν πολλὰ ἢ ζυγά, τοιαῦτα τὰ σπαρτία πολλὰ ἔγκειται ἐν τῷ τοιούτῳ ζυγῷ, ὢν ἐκάστου τὸ ἐπὶ τὰδε ἐπὶ τὸ σφαίρωμα τὸ ἡμισυ τῆς φάλαγγός ἐστι, καὶ ὁ σταθμὸς δι' ἴσου τῶν ἀπ' ἀλλήλων τῶν σπαρτίων κινουμένων, ὥστε συμμετρεῖσθαι πόσον βάρος [854a] ἔλκει τὸ ἐν τῇ πλάστιγγι κείμενον· ὥστε γινώσκειν, ὅταν ὀρθῇ ἡ φάλαγξ ἢ, ἀπὸ ποίου σπάρτου πόσον βάρος ἔχει ἡ πλάστιγξ, καθάπερ εἴρηται. ὅλως μὲν ἐστὶ τοῦτο ζυγόν, ἔχον μίαν μὲν πλάστιγγα, ἐν ἣ ἴσταται τὸ βάρος, τὴν δ' ἐτέραν, ἐν ἣ τὸ σταθμὸν ἐν τῇ φάλαγγι. διὸ σφαίρωμά ἐστιν ἡ φάλαγξ ἐπὶ θάτερον.

τοιούτον δὲ ὄν πολλὰ ζυγά ἐστι, καὶ τοσαῦτα ὅσαπέρ ἐστι τὰ σπαρτία. αἰεὶ δὲ τὸ ἐγγύτερον σπαρτίον τῆς πλάστιγγος καὶ τοῦ ἱσταμένου βάρους μεῖζον ἔλκει βάρος, διὰ τὸ γίνεσθαι τὴν μὲν φάλαγγα πᾶσαν μοχλὸν ἀνестραμμένον (ὑπομόχλιον μὲν γὰρ τὸ σπαρτίον ἕκαστον ἄνωθεν ὄν, τὸ δὲ βάρος τὸ ἐνὸν ἐν τῇ πλάστιγγι), ὅσῳ δ' ἂν μακρότερον ἦ τὸ μήκος τοῦ μοχλοῦ τοῦ ἀπὸ τοῦ ὑπομοχλίου, τοσούτῳ ἐκεῖ μὲν ῥᾶον κινεῖ, ἐνταῦθα δὲ σήκωμα ποιεῖ, καὶ ἴστησι τὸ πρὸς τὸ σφαίρωμα βάρος τῆς φάλαγγος.

Διὰ τί οἱ ἰατροὶ ῥᾶον ἐξαιροῦσι τοὺς ὀδόντας προσλαμβάνοντες βάρος τὴν ὀδοντάγραν ἢ τῇ χειρὶ μόνη ψιλῇ; πότερον διὰ τὸ μᾶλλον ἐξολισθαίνειν διὰ τῆς χειρὸς τὸν ὀδόντα ἢ ἐκ τῆς ὀδοντάγρας; ἢ μᾶλλον ὀλισθαίνει τῆς χειρὸς ὁ σίδηρος, καὶ οὐ περιλαμβάνει αὐτὸν κύκλῳ· μαλθακὴ γὰρ οὕσα ἡ σὰρξ τῶν δακτύλων καὶ προσμένει μᾶλλον καὶ περιαρμόττει. ἄλλ' ὅτι ἡ ὀδοντάγρα δύο μοχλοὶ εἰσιν ἀντικείμενοι, ἐν τὸ ὑπομόχλιον ἔχοντες τὴν σύναψιν τῆς θερμαστρίδος· τοῦ ῥᾶον οὖν κινῆσαι χρῶνται τῷ ὀργάνῳ πρὸς τὴν ἐξαίρεσιν. ἔστω γὰρ τῆς ὀδοντάγρας τὸ μὲν ἕτερον ἄκρον ἐφ' ᾧ τὸ Α, τὸ δὲ ἕτερον, τὸ Β, ὃ ἐξαιρεῖ· ὁ δὲ μοχλὸς ἐφ' ᾧ ΑΔΖ, ὁ δὲ ἄλλος μοχλὸς ἐφ' ᾧ Β ΓΕ, ὑπομόχλιον δὲ τὸ ΓΘΔ· ὁ δὲ ὀδὸς ἐφ' οὗ Ι σύναψις· ὁ δὲ τὸ βάρος. ἐκατέρῳ οὖν τῶν ΒΖ καὶ ἅμα λαβὼν κινεῖ. ὅταν δὲ κινήσῃ, ἐξεῖλε ῥᾶον τῇ χειρὶ ἢ τῷ ὀργάνῳ.

Διὰ τί τὰ κάρυα ῥαδίως καταγνύουσιν ἄνευ πληγῆς ἐν τοῖς ὀργάνοις ἃ ποιοῦσι πρὸς τὸ καταγνύναι αὐτά; πολλὴ γὰρ ἀφαιρεῖται ἰσχὺς ἢ τῆς φορᾶς καὶ βίας. ἔτι δὲ σκληρῷ καὶ βαρεῖ συνθλίβων θᾶπτον ἂν κατάξαι ἢ ξυλίνῳ καὶ κούφῳ τῷ ὀργάνῳ. ἢ διότι οὕτως ἐπ' ἀμφοτέρα θλίβεται ὑπὸ δύο μοχλῶν τὸ κάρυον, τῷ δὲ μοχλῷ ῥαδίως διαιρεῖται τὰ βάρη; τὸ γὰρ ὄργανον ἐκ δύο σύγκειται μοχλῶν, ὑπομόχλιον ἐχόντων τὸ αὐτό, τὴν συναψὴν ἐφ' ἧς τὸ Α. ὥσπερ [854b] οὖν εἰ ἦσαν ἐκβεβλημένοι, ὑφ' ὧν κινουμένων εἰς τὰ τῶν ΓΔ ἄκρα αἱ ΕΖ συνήγοντο ῥαδίως ἀπὸ μικρᾶς ἰσχύος· ἦν οὖν ἐν τῇ πληγῇ τὸ βάρος ἐποίει, ταύτην ἢ κρείττων ταύτης, ἢ τὸ ΕΓ καὶ ΖΔ, μοχλοὶ ὄντες ποιοῦσι· τῇ ἄρσει γὰρ εἰς τοῦναντίον αἵρονται, καὶ θλίβοντες καταγνύουσι τὸ ἐφ' ᾧ Κ. δι' αὐτὸ δὲ τοῦτο καὶ ὅσῳ ἂν ἐγγύτερον ἦ τῆς Α τὸ Κ, συντρίβεται θᾶπτον· ὅσῳ γὰρ ἂν πλεῖον ἀπέχη τοῦ ὑπομοχλίου ὁ μοχλός, ῥᾶον κινεῖ καὶ πλεῖον ἀπὸ τῆς ἰσχύος τῆς αὐτῆς. ἔστιν οὖν τὸ μὲν Α ὑπομόχλιον, ἢ δὲ ΔΑΖ μοχλός, καὶ ἡ ΓΑΕ. ὅσῳ ἂν οὖν τὸ Κ ἐγγυτέρῳ ἦ τῆς γωνίας τῶν Α, τοσούτῳ

ἐγγύτερον γίνεται τῆς συναφῆς τῶν Α· τοῦτο δέ ἐστι τὸ ὑπομόχλιον. ἀνάγκη τοίνυν ἀπὸ τῆς αὐτῆς ἰσχύος συναγούσης τὸ ΖΕ αἶρεσθαι πλέον. ὥστε ἐπεὶ ἐστὶν ἐξ ἐναντίας ἡ ἄρσις, ἀνάγκη θλίβεσθαι μᾶλλον· τὸ δὲ μᾶλλον θλιβόμενον κατὰγνυται θάττων.

Διὰ τί φερομένων δύο φορὰς ἐν τῷ ρόμβῳ τῶν ἄκρων σημείων ἀμφοτέρων, οὐ τὴν ἴσην ἐκάτερον αὐτῶν εὐθεῖαν διέρχεται, ἀλλὰ πολλαπλασίαν θάτερον; ὁ αὐτὸς δὲ λόγος καὶ διὰ τί τὸ ἐπὶ τῆς πλευρᾶς φερόμενον ἐλάττω διέρχεται τῆς πλευρᾶς. τὸ μὲν γὰρ τὴν διάμετρον τὴν ἐλάττω, ἡ δὲ τὴν πλευρὰν τὴν μείζω, καὶ ἡ μὲν μίαν, τὸ δὲ δύο φέρεται φορὰς. φερέσθω γὰρ ἐπὶ τῆς ΑΒ τὸ μὲν Α πρὸς τὸ Β, τὸ δὲ Β πρὸς τὸ Δ τῷ αὐτῷ τάχει· φερέσθω δὲ καὶ ἡ ΑΒ ἐπὶ τῆς ΑΓ παρὰ τὴν ΓΔ τῷ αὐτῷ τάχει τούτοις. ἀνάγκη δὴ τὸ μὲν Α ἐπὶ τῆς ΑΔ διαμέτρου φέρεσθαι, τὸ δὲ Β ἐπὶ τῆς ΒΓ, καὶ ἅμα διεληλυθέναι ἐκατέραν, καὶ τὴν ΑΒ τὴν ΑΓ πλευράν. ἐννέχθω γὰρ τὸ μὲν Α τὴν ΑΕ, ἡ δὲ Α Β τὴν ΑΖ, καὶ ἔστω ἐκβεβλημένη ἡ ΖΗ παρὰ τὴν ΑΒ, καὶ ἀπὸ τοῦ Ε πεπληρώσθω. ὅμοιον οὖν γίνεται τὸ παραπληρωθὲν τῷ ὅλῳ. ἴση ἄρα ἡ ΑΖ τῇ ΑΕ, ὥστε τὸ Α ἐπὶ τῆς πλευρᾶς ἐνήνεκται τῆς ΑΕ. ἡ δὲ ΑΒ τὴν ΑΖ εἴη ἂν ἐννεγεμένη. ἔσται ἄρα ἐπὶ τῆς διαμέτρου κατὰ τὸ Θ. καὶ αἰεὶ δὲ ἀνάγκη αὐτὸ φέρεσθαι κατὰ τὴν διάμετρον. καὶ ἅμα ἡ πλευρὰ ἡ ΑΒ τὴν πλευρὰν τὴν ΑΓ δίδεισι, καὶ τὸ Α τὴν διάμετρον δίδεισι τὴν ΑΔ. ὁμοίως δὲ δειχθήσεται καὶ τὸ Β ἐπὶ τῆς ΑΓ διαμέτρου φερόμενον. ἴση γάρ ἐστιν ἡ ΒΕ τῇ ΒΗ. παραπληρωθέντος οὖν ἀπὸ τοῦ Η, ὁμοίον ἐστὶ τῷ ὅλῳ τὸ ἐντός. καὶ τὸ Β ἐπὶ τῆς διαμέτρου ἔσται κατὰ τὴν σύναψιν τῶν πλευρῶν, καὶ ἅμα δίδεισιν ἢ [855a] τε πλευρὰ τὴν πλευρὰν καὶ τὸ Β τὴν ΒΓ διάμετρον. ἅμα ἄρα καὶ τὸ Β τὴν πολλαπλασίαν τῆς ΑΒ δίδεισι καὶ ἡ πλευρὰ τὴν ἐλάττωνα πλευράν, τῷ αὐτῷ τάχει φερόμενα, καὶ ἡ πλευρὰ μείζω τοῦ Α διελήλυθε μίαν φορὰν φερομένη. ὅσῳ γὰρ ἂν ὀξύτερος γένηται ὁ ρόμβος, ἡ μὲν διάμετρος ἡ ἐλάττων γίνεται, ἡ δὲ ΒΓ μείζων, ἡ δὲ πλευρὰ τῆς ΒΓ ἐλάττων. ἀτοπον γάρ, ὥσπερ ἐλέχθη, τὸ δύο φορὰς φερόμενον ἐνίστε βραδύτερον φέρεσθαι τοῦ μίαν, καὶ ἀμφοτέρων ἰσοταχῶν σημείων δοθέντων μείζω διεξιέναι θάτερον. αἴτιον δὲ ὅτι τοῦ μὲν ἀπὸ τῆς ἀμβλείας φερομένου σχεδὸν ἐναντίαι ἀμφοτέραι γίνονται, ἦν τε αὐτὴ φέρεται καὶ ἦν ὑπὸ τῆς πλευρᾶς ὑποφέρεται, τοῦ δὲ ἀπὸ τῆς ὀξείας συμβαίνει φέρεσθαι ἐπὶ τὸ αὐτό. συνεπουρίζει γὰρ ἡ τῆς πλευρᾶς τὴν ἐπὶ τῆς διαμέτρου· καὶ ὅσῳ ἂν τὴν μὲν ὀξυτέραν ποιήσῃ, τὴν δὲ ἀμβλυτέραν, ἡ μὲν βραδυτέρα ἔσται, ἡ δὲ θάττων. αἰ

μὲν γὰρ ἐναντιώτεραι γίνονται διὰ τὸ ἀμβλυτέραν γίνεσθαι τὴν γωνίαν, αἱ δὲ μᾶλλον ἐπὶ τὰ αὐτὰ διὰ τὸ συνάγεσθαι τὰς γραμμάς. τὸ μὲν γὰρ Β σχεδὸν ἐπὶ τὸ αὐτὸ φέρεται κατ' ἀμφοτέρας τὰς φοράς· συνεπυρρίζεται οὖν ἡ ἐτέρα, καὶ ὅσῳ ἂν ὀξύτερα γίνηται ἡ γωνία, τοσοῦτῳ μᾶλλον. τὸ Α δὲ ἐπὶ τοῦναντίον· αὐτὸ μὲν γὰρ πρὸς τὸ Β φέρεται, ἡ δὲ πλευρὰ ὑποφέρει αὐτὸ πρὸς τὸ Δ. καὶ ὅσῳ ἂν ἀμβλυτέρα ἡ γωνία ᾗ, ἐναντιώτεραι αἱ φοραὶ γίνονται· εὐθυτέρα γὰρ ἡ γραμμὴ γίνεται. εἰ δ' ὅλως εὐθεῖα γένοιτο, παντελῶς ἂν εἴησαν ἐναντίαι. ἡ δὲ πλευρὰ ὑπ' οὐθενὸς κωλύεται μίαν φερομένη φοράν. εὐλόγως οὖν τὴν μείζω διέρχεται.

Απορεῖται διὰ τί ποτε ὁ μείζων κύκλος τῷ ἐλάττωι κύκλῳ ἴσην ἐξελίττεται γραμμὴν, ὅταν περὶ τὸ αὐτὸ κέντρον τεθῶσι; χωρὶς δὲ ἐκκυλιόμενοι, ὥσπερ τὸ μέγεθος αὐτῶν πρὸς τὸ μέγεθος ἔχει, οὕτως καὶ αἱ γραμμαὶ αὐτῶν γίνονται πρὸς ἀλλήλας. ἔτι δὲ ἐνὸς καὶ τοῦ αὐτοῦ κέντρου ὄντος ἀμφοῖν, ὅτε μὲν τηλικαύτη γίνεται ἡ γραμμὴ ἣν ἐκκυλίνονται, ἡλίκην ὁ ἐλάττων κύκλος καθ' αὐτὸν ἐκκυλίεται, ὅτε δὲ ὅσην ὁ μείζων. ὅτι μὲν οὖν μείζω ἐκκυλίεται ὁ μείζων, φανερόν. γωνία μὲν γὰρ δοκεῖ κατὰ τὴν αἴσθησιν εἶναι ἡ περιφέρεια ἐκάστου τῆς οἰκείας διαμέτρου, ἡ τοῦ μείζονος κύκλου μείζων, ἡ δὲ τοῦ ἐλάττονος ἐλάττων, ὥστε τὸν αὐτὸν τοῦτον ἔξουσι λόγον, καθ' ὃς ἐξεκυλίσθησαν [855b] αἱ γραμμαὶ πρὸς ἀλλήλας κατὰ τὴν αἴσθησιν. ἀλλὰ μὴν καὶ ὅτι τὴν ἴσην ἐκκυλίνονται, ὅταν περὶ τὸ αὐτὸ κέντρον κείμενοι ᾦσι, δηλόν· καὶ οὕτως γίνεται ὅτε μὲν ἴση τῇ γραμμῇ ἣν ὁ μείζων κύκλος ἐκκυλίεται, ὅτε δὲ ἐλάττων. ἔστω γὰρ κύκλος ὁ μείζων μὲν ἐφ' οὗ τὰ ΔΖΓ, ὁ δὲ ἐλάττων ἐφ' οὗ τὰ ΕΗΒ, κέντρον δὲ ἀμφοῖν τὸ Α· καὶ ἣν μὲν ἐξελίττεται καθ' αὐτὸν ὁ μέγας, ἡ ἐφ' ἧς ΖΙ ἔστω, ἣν δὲ ὁ ἐλάττων καθ' αὐτόν, ἡ ἐφ' ἧς ΗΚ, ἴση τῇ ΑΖ. ἐὰν δὴ κινῶ τὸν ἐλάττονα, τὸ αὐτὸ κέντρον κινῶ, ἐφ' οὗ τὸ Α· ὁ δὲ μέγας προσηρμόσθω. ὅταν οὖν ἡ ΑΒ ὀρθὴ γένηται πρὸς τὴν ΗΚ, ἅμα καὶ ἡ ΑΓ γίνεται ὀρθὴ πρὸς τὴν ΖΛ, ὥστε ἔσται ἴσην ἀεὶ διεληλυθυῖα, τὴν μὲν ΗΚ, ἐφ' ᾗ ΗΒ περιφέρεια, τὴν δὲ ΖΛ ἡ ἐφ' ἧς ΖΓ. εἰ δὲ τὸ τέταρτον μέρος ἴσην ἐξελίττεται, δηλόν ὅτι καὶ ὁ ὅλος κύκλος τῷ ὅλῳ κύκλῳ ἴσην ἐξελιχθήσεται, ὥστε ὅταν ἡ ΒΗ γραμμὴ ἔλθῃ ἐπὶ τὸ Κ, καὶ ἡ ΖΓ ἔσται περιφέρεια ἐπὶ τῆς ΖΛ, καὶ ὁ κύκλος ὅλος ἐξελιγμένος. ὁμοίως δὲ καὶ ἐὰν τὸν μέγαν κινῶ, ἐναρμόσας τὸν μικρόν, τοῦ αὐτοῦ κέντρου ὄντος, ἅμα τῇ ΑΓ ἡ ΑΒ κάθετος καὶ ὀρθὴ ἔσται, ἡ μὲν πρὸς τὴν ΖΙ, ἡ δὲ πρὸς τὴν ΗΘ. ὥστε ὅταν ἴσην ἡ μὲν τῇ

ΗΘ ἔσται διεληλυθυῖα, ἡ δὲ τῇ ΖΙ, καὶ γένηται ὀρθὴ πάλιν ἡ ΖΑ πρὸς τὴν ΖΛ, καὶ ἡ ΑΓ ὀρθὴ πάλιν, ὥς τὸ ἐξ ἀρχῆς ἔσονται ἐπὶ τῶν ΘΙ. τὸ δὲ μήτε στάσεως γινομένης τὸ μείζον τῷ ἐλάττονι, ὥστε μένειν τινὰ χρόνον ἐπὶ τοῦ αὐτοῦ σημείου· κινοῦνται γὰρ συνεχῶς ἄμφω ἀμφοτεράκις. μὴ ὑπερπηδῶντος τοῦ ἐλάττονος μηθὲν σημεῖον, τὸν μὲν μείζω τῷ ἐλάττονι ἴσην διεξιέναι, τὸν δὲ τῷ μείζονι, ἄτοπον. ἔτι δὲ μιᾶς κινήσεως οὔσης ἀεὶ τὸ κέντρον τὸ κινούμενον ὅτε μὲν τὴν μεγάλην ὅτε δὲ τὴν ἐλάττονα ἐκκυλίεσθαι θαυμαστόν. τὸ γὰρ αὐτὸ τῷ αὐτῷ τάχει φερόμενον ἴσην πέφυκε διεξιέναι· τῷ αὐτῷ δὲ τάχει ἴσην ἐστὶ κινεῖν ἀμφοτεράκις. ἀρχὴ δὲ ληπτέα ἦδε περὶ τῆς αἰτίας αὐτῶν, ὅτι ἡ αὐτὴ δύναμις καὶ ἴση τὸ μὲν βραδύτερον κινεῖ μέγεθος, τὸ δὲ ταχύτερον. εἰ δὴ τι εἶη ὃ μὴ πέφυκεν ὑφ' ἑαυτοῦ κινεῖσθαι, ἐὰν τοῦτο ἅμα καὶ αὐτὸ κινῇ τὸ πεφυκὸς κινεῖσθαι, βραδύτερον κινήσεται ἢ εἰ αὐτὴ καθ' αὐτὴν ἐκινεῖτο. καὶ ἐὰν μὲν πεφυκὸς ἢ κινεῖσθαι, μὴ συγκινῆται δὲ μηθέν, ὡσαύτως ἔξει. καὶ ἀδύνατον δὴ κινεῖσθαι πλέον ἢ τὸ κινοῦν· οὐ γὰρ τὴν αὐτοῦ κινεῖται κίνησιν, ἀλλὰ [856a] τὴν τοῦ κινοῦντος. εἶη δὴ κύκλος ὁ μὲν μείζων τὸ Α, ὁ δὲ ἐλάττων ἐφ' ᾧ Β. εἰ ὠθοίη δ' ὁ ἐλάττων τὸν μείζω, μὴ κυλιόμενου αὐτοῦ, φανερόν ὅτι τοσοῦτον δίεισι τῆς εὐθείας ὁ μείζων, ὅσον ἐώσθη ὑπὸ τοῦ ἐλάττονος. τοσοῦτον δὲ γε ἐώσθη ὅσον ὁ μικρὸς ἐκινήθη. ἴσην ἄρα τῆς εὐθείας διεληλύθασιν. ἀνάγκη τοίνυν καὶ εἰ κυλιόμενος ὁ ἐλάττων τὸν μείζω ὠθοίη, κυλισθῆναι μὲν ἅμα τῇ ὥσει, τοσοῦτον δ' ὅσον ὁ ἐλάττων ἐκυλίσθη, εἰ μηθὲν αὐτὸς τῇ αὐτῇ κινήσει κινεῖται. ὥς γὰρ καὶ ὅσον ἐκίνει, τοσοῦτον κεκινήσθαι ἀνάγκη τὸ κινούμενον ὑπ' ἐκείνου. ἀλλὰ μὴν ὃ τε κύκλος τοσοῦτον ἐκίνησε τὸ αὐτό, κύκλω τε καὶ ποδιαίαν (ἔστω γὰρ τοσοῦτον ὃ ἐκινήθη), καὶ ὁ μέγας ἄρα τοσοῦτον ἐκινήθη. ὁμοίως δὲ καὶ ὁ μέγας τὸν μικρὸν κινήσῃ, ἔσται κεκινήμενος ὁ μικρὸς ὥς καὶ ὁ μείζων. καθ' αὐτὸν μὲν δὴ κινήθεις ὅποτεροσοῦν, ἐὰν τε ταχὺ ἐὰν τε βραδέως· τῷ αὐτῷ δὲ τάχει εὐθύς ὅσην ὁ μείζων πέφυκεν ἐξελιχθῆναι γραμμὴν. ὅπερ καὶ ποιεῖ τὴν ἀπορίαν, ὅτι οὐκέτι ὁμοίως ποιοῦσιν ὅταν συναρμοσθῶσιν. τὸ δ' ἔστιν, εἰ ὁ ἕτερος ὑπὸ τοῦ ἑτέρου κινεῖται οὐχ ἢν πέφυκεν, οὐδὲ τὴν αὐτοῦ κίνησιν. οὐθὲν γὰρ διαφέρει περιθεῖναι καὶ ἐναρμόσαι ἢ προσθεῖναι ὅποτερονοῦν ὁποτέρῳ· ὁμοίως γάρ, ὅταν ὁ μὲν κινῇ ὁ δὲ κινῆται ὑπὸ τούτου, ὅσον ἂν κινῇ ἄτερος, τοσοῦτον κινήσεται ἄτερος. ὅταν μὲν οὖν προσκείμενον κινῇ ἢ προσκρεμάμενον, οὐκ ἀεὶ κυλίνει τις· ὅταν δὲ

περὶ τὸ αὐτὸ κέντρον τεθῶσιν, ἀνάγκη κυλίεσθαι ἀεὶ τὸν ἕτερον ὑπὸ τοῦ ἐτέρου. ἀλλ' οὐθὲν ἦττον οὐ τὴν αὐτοῦ κίνησιν ἄτερος κινεῖται, ἀλλ' ὥσπερ ἂν εἰ μηδεμίαν εἶχε κίνησιν. κὰν ἔχη, μὴ χρῆται δ' αὐτῇ, ταῦτ' οὐ συμβαίνει. ὅταν μὲν οὖν ὁ μέγας κινή ἐνδεδεμένον τὸν μικρόν, ὁ μικρὸς κινεῖται ὅσηνπερ οὗτος· ὅταν δὲ ὁ μικρὸς, πάλιν ὁ μέγας ὅσην οὗτος. χωριζόμενος δὲ ἐκάτερος αὐτὸν κινεῖ αὐτός. ὅτι δὲ τοῦ αὐτοῦ κέντρου ὄντος καὶ κινουῦντος τῷ αὐτῷ τάχει συμβαίνει ἄνισον διεξιέναι αὐτοὺς γραμμὴν, παραλογίζεται ὁ ἀπορῶν σοφιστικῶς. τὸ αὐτὸ μὲν γάρ ἐστι κέντρον ἀμφοῖν, ἀλλὰ κατὰ συμβεβηκός, ὡς μουσικὸν καὶ λευκόν· τὸ γὰρ εἶναι ἐκατέρου κέντρου τῶν κύκλων οὐ τῷ αὐτῷ χρῆται. ὅταν μὲν οὖν ὁ κινῶν ᾗ ὁ μικρὸς, ὡς ἐκείνου κέντρον καὶ ἀρχή, ὅταν δὲ ὁ μέγας, ὡς ἐκείνου. οὐκ οὖν τὸ αὐτὸ κινεῖ ἀπλῶς, ἀλλ' ἔστιν ὥς.

Διὰ τί τὰς κλίνας ποιοῦσι διπλασιοπλεύρους, τὴν μὲν [856b] ἐξ ποδῶν καὶ μικρῷ μείζω πλευράν, τὴν δὲ τριῶν; καὶ διὰ τί ἐντείνουσιν οὐ κατὰ διάμετρον; ἢ τὸ μὲν μέγεθος τηλικαύτας, ὅπως τοῖς σώμασιν ὧσι σύμμετροι; γίνονται γὰρ οὕτω διπλασιόπλευροι, τετραπῆχεις μὲν τὸ μήκος, διπῆχεις δὲ τὸ πλάτος. ἐντείνουσιν δὲ οὐ κατὰ διάμετρον ἀλλ' ἀπ' ἐναντίας, ὅπως τὰ τε ξύλα ἦττον διασπᾶται· τάχιστα γὰρ σχίζεται κατὰ φύσιν διαιρούμενα ταύτη, καὶ ἐλκόμενα πονεῖ μάλιστα. ἔτι ἐπειδὴ δεῖ βάρος δύνασθαι τὰ σπαρτία φέρειν, οὕτως ἦττον πονέσει λοξοῖς τοῖς σπαρτίοις ἐπιτιθεμένου τοῦ βάρους ἢ πλαγίοις. ἔτι δὲ ἔλαττον οὕτω σπαρτίον ἀναλίσκεται. ἔστω γὰρ κλίνη ἢ AZHI, καὶ δίχα διηρήσθω ἢ ZH κατὰ τὸ B. ἴσα δὴ τρυπήματά ἐστιν ἐν τῇ ZB καὶ ἐν τῇ ZA. καὶ γὰρ αἱ πλευραὶ ἴσαι εἰσίν· ἢ γὰρ ὅλη ZH διπλασία ἐστίν. ἐντείνουσιν δ' ὡς γέγραπται, ἀπὸ τοῦ A ἐπὶ τὸ B, εἴτα οὗ τὸ Γ, εἴτα οὗ τὸ Δ, εἴτα οὗ τὸ Θ, εἴτα οὗ τὸ E. καὶ οὕτως ἀεὶ, ἕως ἂν εἰς γωνίαν καταστρέψωσιν ἄλλην· δύο γὰρ ἔχουσι γωνίαι τὰς ἀρχὰς τοῦ σπαρτίου. ἴσα δὲ ἐστὶ τὰ σπαρτία κατὰ τὰς κάμψεις, τὸ τε AB καὶ BΓ τῷ ΓΔ καὶ ΔΘ. καὶ τὰ ἄλλα δὲ τὰ τοιαῦτά ἐστιν, ὅτι οὕτως ἔχει ἢ αὐτὴ ἀπόδειξις. ἢ μὲν γὰρ AB τῇ EΘ ἴση· ἴσαι γὰρ εἰσιν αἱ πλευραὶ τοῦ BHK A χωρίου, καὶ τὰ τρυπήματα ἴσα διέστηκεν. ἢ δὲ BH ἴση τῇ KA· ἢ γὰρ B γωνία ἴση τῇ H. ἐν ἴσοις γὰρ ἢ μὲν ἐκτός, ἢ δὲ ἐντός· καὶ ἢ μὲν B ἐστὶν ἡμίσεια ὀρθῆς· ἢ γὰρ ZB ἴση τῇ ZA· καὶ γωνία δὲ ἢ κατὰ τὸ Z ὀρθή. ἢ δὲ B γωνία ἴση τῇ κατὰ τὸ H· ἢ γὰρ κατὰ τὸ Z ὀρθή, ἐπειδὴ διπλασιόπλευρον τὸ ἑτερόμηκες καὶ πρὸς μέσον κέκλασται. ὥστε ἢ AΓ τῇ EH ἴση. ταύτη δὲ ἢ KΘ.

παράλληλος γάρ. ὥστε ἡ ΒΓ ἴση τῇ ΚΘ. ἡ δὲ ΓΕ τῇ ΔΘ. ὁμοίως δὲ καὶ αἱ ἄλλαι δείκνυνται ὅτι ἴσαι εἰσὶν αἱ κατὰ τὰς κάμπυεις δύο ταῖς δυσίν. ὥστε δηλὸν ὅτι τὰ τηλικάυτα σπαρτία ὅσον τὸ ΑΒ, τέσσαρα τοσαῦτ' ἐνεστὶν ἐν τῇ κλίνῃ· ὅσον δ' ἐστὶ τὸ πλῆθος τῶν ἐν τῇ ΖΗ πλευρᾷ τρυπημάτων, καὶ ἐν τῷ ἡμίσει τῷ ΖΒ τὰ ἡμίση. ὥστε ἐν τῇ ἡμισείᾳ κλίνῃ τηλικάυτα μεγέθη σπαρτίων ἐστὶν ὅσον τῷ ΒΑ ἐνεστι, τοσαῦτα δὲ τὸ πλῆθος ὅσαπερ ἐν τῷ ΒΗ τρυπήματα. ταῦτα δὲ οὐδὲν διαφέρει λέγειν ἢ ὅσα ἐν τῇ ΑΖ καὶ ΒΖ τὰ συνάμφω. εἰ δὲ κατὰ διάμετρον ἐνταθῇ τὰ σπαρτία, ὡς ἐν τῇ ΑΒΓΔ κλίνῃ ἔχει, τὰ ἡμίσεά εἰσιν οὐ τοσαῦτα [857a] ὅσα αἱ πλευраὶ ἀμφοῖν, αἱ ΑΖ ΖΗ· τὰ ἴσα δέ, ὅσα ἐν τῷ ΖΒΖΑ τρυπήματα ἐνεστὶν. μείζονες δὲ εἰσιν αἱ ΑΖ ΒΖ δύο οὗσαι τῆς ΑΒ. ὥστε καὶ τὸ σπαρτίον μείζον τοσούτῳ ὅσον αἱ πλευраὶ ἄμφω μείζους εἰσὶ τῆς διαμέτρου.

Διὰ τί χαλεπώτερον τὰ μακρὰ ξύλα ἀπ' ἄκρου φέρειν ἐπὶ τῷ ὧμῳ ἢ κατὰ τὸ μέσον, ἴσου τοῦ βάρους ὄντος; πότερον ὅτι σαλευομένου τοῦ ξύλου τὸ ἄκρον κωλύει φέρειν, μᾶλλον ἀντισπῶν τῇ σαλεύσει τὴν φορὰν; ἢ κὰν μηθὲν κάμπηται μηδ' ἔχη πολὺ μῆκος, ὅμως χαλεπώτερον φέρειν ἀπ' ἄκρου; ἀλλ' ὅτι καὶ ῥᾶον αἴρεται ἀπ' ἄκρου ἢ ἐκ μέσου, διὰ τὸ αὐτὸ καὶ φέρειν οὕτω ῥάδιον. αἴτιον δὲ ὅτι ἐκ μέσου μὲν αἰρόμενον ἀεὶ ἐπικουφίζει ἀλλήλα τὰ ἄκρα, καὶ θάτερον μέρος τὸ ἐπὶ θάτερον εὖ αἶρει. ὥσπερ γὰρ κέντρον γίνεται τὸ μέσον, ἧ ἔχει τὸ αἶρον ἢ φέρον. εἰς τὸ ἄνω οὖν κουφίζεται ἐκάτερον τῶν ἄκρων εἰς τὸ κάτω ῥέπον. ἀπὸ δὲ τοῦ ἄκρου αἰρόμενον ἢ φερόμενον οὐ ποιεῖ τοῦτο, ἀλλ' ἅπαν τὸ βάρος ῥέπει ἐφ' ἐν μέσον, εἰς ὅπερ αἴρεται ἢ φέρεται. ἔστω μέσον ἐφ' οὗ Α, ἄκρα ΒΓ. αἰρομένου οὖν ἢ φερομένου κατὰ τὸ Α, τὸ μὲν Β κάτω ῥέπον ἄνω αἶρει τὸ Γ, τὸ δὲ Γ κάτω ῥέπον τὸ Β ἄνω αἶρει· ἅμα δὲ αἰρόμενα ἄνω ποιεῖ ταῦτα.

Διὰ τί, ἐὰν ᾗ λίαν μακρὸν τὸ αὐτὸ βάρος, χαλεπώτερον φέρειν ἐπὶ τοῦ ὧμου, κὰν μέσον φέρῃ τις, ἢ ἐὰν ἔλαττον ᾗ; πάλαι ἐλέγχθη ὡς οὐκ ἔστιν αἴτιον ἡ σάλευσις· ἀλλ' ἡ σάλευσις νῦν αἰτιόν ἐστιν. ὅταν γὰρ ᾗ μακρότερον, τὰ ἄκρα σαλεύεται, ὥστε εἴη ἂν καὶ τὸν φέροντα χαλεπώτερον φέρειν μᾶλλον. αἴτιον δὲ τοῦ σαλεύεσθαι μᾶλλον, ὅτι τῆς αὐτῆς κινήσεως οὔσης μεθίσταται τὰ ἄκρα, ὅσῳπερ ἂν ᾗ μακρότερον τὸ ξύλον. ὁ μὲν γὰρ ὧμος κέντρον, ἐφ' οὗ τὸ Α (μένει γὰρ τοῦτο), αἱ δὲ ΑΒ καὶ ΑΓ αἱ ἐκ τοῦ κέντρου. ὅσῳ δ' ἂν ᾗ μείζον τὸ ἐκ τοῦ κέντρου ἢ τὸ ΑΒ ἢ καὶ τὸ ΑΓ, πλέον μεθίσταται μέγεθος.

δέδεικται δὲ τοῦτο πρότερον.

Διὰ τί ἐπὶ τοῖς φρέασι τὰ κηλῶνεια ποιοῦσι τοῦτον τὸν τρόπον; προστιθέασι γὰρ βάρος ἐν τῷ ξύλῳ τὸν μόλιβδον, ὄντος βάρους τοῦ κάδου αὐτοῦ, καὶ κενοῦ καὶ πλήρους ὄντος. ἢ ὅτι ἐν δυσὶ χρόνοις διηρημένου τοῦ ἔργου (βάψαι γὰρ δεῖ, καὶ τοῦτ' ἄνω ἐλκύσαι) συμβαίνει καθιέναι μὲν κενὸν ῥαδίως, [857b] αἶρειν δὲ πλήρη χαλεπῶς; λυσιτελεῖ οὖν μικρῷ βραδύτερον εἶναι τὸ καταγαγεῖν πρὸς τὸ πολὺ κουφίσαι τὸ βάρος ἀνάγοντι. τοῦτο οὖν ποιεῖ ἐπ' ἄκρῳ τῷ κηλωνεῖῳ ὁ μόλιβδος προσκείμενος ἢ ὁ λίθος. καθιμῶντι μὲν γὰρ γίνεται βάρος μεῖζον ἢ εἰ μόνον κενὸν δεῖ κατάγειν τὸν κάδον· ὅταν δὲ πλήρης ᾖ, ἀνάγει ὁ μόλιβδος, ἢ ὅ τι ἂν ᾖ τὸ προσκείμενον βάρος. ὥστ' ἐστὶ ῥᾶον αὐτῷ τὰ ἄμφω ἢ ἐκείνῳ.

Διὰ τί, ὅταν φέρωσιν ἐπὶ ξύλου ἢ τινος τοιούτου δύο ἄνθρωποι ἴσον βάρος, οὐχ ὁμοίως θλίβονται, ἐὰν μὴ ἐπὶ τῷ μέσῳ ἢ τὸ βάρος, ἀλλὰ μᾶλλον ὅσῳ ἂν ἐγγύτερον ἢ τῶν φερόντων; ἢ διότι μοχλὸς μὲν γίνεται οὕτως ἐχόντων τὸ ξύλον, τὸ δὲ βάρος ὑπομόχλιον, ὁ δὲ ἐγγύτερος τοῦ βάρους τῶν φερόντων τὸ βάρος τὸ κινούμενον, ἄτερος δὲ τῶν φερόντων τὸ βάρος ὁ κινῶν. ὅσῳ γὰρ πλέον ἀπέχει τοῦ βάρους, τοσοῦτ' ῥᾶον κινεῖ, καὶ θλίβει μᾶλλον τὸν ἕτερον εἰς τὸ κάτω, ὥσπερ ἀντερειδόντος τοῦ βάρους τοῦ ἐπικειμένου καὶ γινομένου ὑπομοχλίου. ἐν μέσῳ δὲ ὑποκειμένου τοῦ βάρους, οὐδὲν μᾶλλον ἄτερος θατέρῳ γίνεται βάρος, οὐδὲ κινεῖ, ἀλλ' ὁμοίως ἐκάτερος ἐκατέρῳ γίνεται βάρος.

Διὰ τί οἱ ἀνιστάμενοι πάντες πρὸς ὀξεῖαν γωνίαν τῷ μηρῷ ποιήσαντες τὴν κνήμην ἀνίστανται, καὶ τῷ θώρακι πρὸς τὸν μηρόν; εἰ δὲ μή, οὐκ ἂν δύναιτο ἀναστῆναι. πότερον ὅτι τὸ ἴσον ἡρεμίας πανταχοῦ αἴτιον, ἢ δὲ ὀρθὴ γωνία τοῦ ἴσου, καὶ ποιεῖ στάσιν· διὸ καὶ φέρεται πρὸς ὁμοίας γωνίας τῇ περιφερείᾳ τῆς γῆς. οὐ γὰρ ὅτι καὶ πρὸς ὀρθὴν ἔσται τῷ ἐπιπέδῳ. ἢ ὅτι ἀνιστάμενος γίνεται ὀρθός, ἀνάγκη δὲ τὸν ἐστῶτα κάθετον εἶναι πρὸς τὴν γῆν. εἰ οὖν μέλλει ἔσεσθαι πρὸς ὀρθὴν, τοῦτο δὲ ἐστὶ τὸ τὴν κεφαλὴν ἔχειν κατὰ τοὺς πόδας, καὶ γίνεσθαι δὴ ὅτε ἀνίσταται. ὅταν μὲν οὖν καθήμενος ᾖ, παράλληλον ἔχει τὴν κεφαλὴν καὶ τοὺς πόδας, καὶ οὐκ ἐπὶ μιᾷς εὐθείας. ἢ κεφαλὴ Α ἔστω, θώραξ ΑΒ, μηρὸς ΒΓ, κνήμη ΓΔ. πρὸς ὀρθὴν δὲ γίνεται ὁ τε θώραξ [ἐφ' ὧν ΑΒ] τῷ μηρῷ καὶ ὁ μηρὸς τῇ κνήμῃ οὕτως καθημένῳ. ὥστε οὕτως ἔχοντα ἀδύνατον ἀναστῆναι. ἀνάγκη δὲ ἐγκλῖναι τὴν κνήμην καὶ ποιεῖν τοὺς πόδας ὑπὸ τὴν

κεφαλὴν. τοῦτο δὲ ἔσται, ἐὰν ἡ ΓΔ ἐφ' ἧς τὰ ΓΖ γένηται, καὶ ἅμα ἀναστῆναι συμβήσεται, καὶ ἔχειν ἐπὶ [858a] τῆς αὐτῆς ἴσης τὴν κεφαλὴν τε καὶ τοὺς πόδας. ἡ δὲ ΓΖ ὀξεῖαν ποιεῖ γωνίαν πρὸς τὴν ΒΓ.

Διὰ τί ῥᾶον κινεῖται τὸ κινούμενον ἢ τὸ μένον, οἷον τὰς ἀμάξας θᾶπτον κινουμένας ὑπάγουσιν ἢ ἀρχομένας; ἢ ὅτι χαλεπώτατον μὲν τὸ εἰς τοῦναντίον κινούμενον κινῆσαι βάρος; ἀφαιρεῖται γάρ τι τῆς τοῦ κινούντος δυνάμεως, κἂν πολὺ θᾶπτον ᾗ· ἀνάγκη γὰρ βραδυτέραν γίνεσθαι τὴν ὥσιν τοῦ ἀντωθουμένου. δεύτερον δέ, ἐὰν ἡρεμῇ· ἀντιτείνει γὰρ καὶ τὸ ἡρεμοῦν. τὸ δὲ κινούμενον ἐπὶ τὸ αὐτὸ τῷ ὠθοῦντι ὅμοιον ποιεῖ ὥσπερ ἂν εἰ αὐξήσειέ τις τὴν τοῦ κινούντος δύναμιν καὶ ταχυτῆτα· ὁ γὰρ ὑπ' ἐκείνου ἂν ἔπασχε, τοῦτο αὐτὸ ποιεῖ εἰς τὸ πρὸ ὁδοῦ κινούμενον.

Διὰ τί παύεται φερόμενα τὰ ῥιφέντα; πότερον ὅταν λήγῃ ἡ ἰσχὺς ἢ ἀφείσα, ἢ διὰ τὸ ἀντισπᾶσθαι, ἢ διὰ τὴν ῥοπήν, ἐὰν κρείττων ᾗ τῆς ἰσχύος τῆς ῥιψάσης; ἢ ἄτοπον τὸ ταῦτ' ἀπορεῖν, ἀφέντα τὴν ἀρχήν.

Διὰ τί φέρεται τι οὐ τὴν αὐτοῦ φοράν, μὴ ἀκολουθοῦντος καὶ ὠθοῦντος τοῦ ἀφέντος; ἢ δῆλον ὅτι ἐποίησε τοιοῦτον τὸ πρῶτον ὡς θάτερον ὠθεῖν, καὶ τοῦθ' ἕτερον· παύεται δέ, ὅταν μηκέτι δύνηται ποιεῖν τὸ προωθοῦν τὸ φερόμενον ὥστε ὠθεῖν, καὶ ὅταν τὸ τοῦ φερομένου βάρος ῥέπῃ μᾶλλον τῆς εἰς τὸ πρόσθεν δυνάμεως τοῦ ὠθοῦντος.

Διὰ τί οὔτε τὰ ἐλάττονα οὔτε τὰ μεγάλα πόρρω φέρεται ῥιπτούμενα, ἀλλὰ δεῖ συμμετρίαν τινὰ ἔχειν πρὸς τὸν ῥιπτοῦντα; πότερον ὅτι ἀνάγκη τὸ ῥιπτούμενον καὶ ὠθούμενον ἀντερείδειν ὅθεν ὠθεῖται; τὸ δὲ μὴθὲν ὑπεῖκον διὰ μέγεθος ἢ μὴδὲν ἀντερεῖσαν δι' ἀσθένειαν οὐ ποιεῖ ῥῖπιν οὐδὲ ὥσιν. τὸ μὲν οὖν πολὺ ὑπερβάλλον τῆς ἰσχύος τῆς ὠθούσης οὐθὲν ὑπεῖκει, τὸ δὲ πολὺ ἀσθενέστερον οὐδὲν ἀντερείδει. ἢ ὅτι τοσοῦτον φέρεται τὸ φερόμενον, ὅσον ἂν ἀέρα κινήσῃ εἰς βάθος; τὸ δὲ μὴδὲν κινούμενον οὐδ' ἂν κινήσειεν οὐδέν. συμβαίνει δὴ ἀμφοτέρω τούτοις ἔχειν. [858b] τό τε γὰρ σφόδρα μέγα καὶ τὸ σφόδρα μικρὸν ὥσπερ οὐθὲν κινούμενά ἐστι· τὸ μὲν γὰρ αὐτὸ καθ' ἑν κινεῖ, τὸ δ' οὐθὲν κινεῖται.

Διὰ τί τὰ φερόμενα ἐν τῷ δινουμένῳ ὕδατι εἰς τὸ μέσον τελευτῶντα φέρονται ἅπαντα; πότερον ὅτι μέγεθος ἔχει τὸ φερόμενον, ὥστε ἐν δυσὶ κύκλοις εἶναι, τῷ μὲν ἐλάττονι τῷ δὲ

μείζονι, ἐκότερον αὐτοῦ τῶν ἄκρων. ὥστε περισπᾶ ὁ μείζων διὰ τὸ φέρεσθαι θάπτον, καὶ πλάγιον ἀπωθεῖ αὐτὸ εἰς τὸν ἐλάττω. ἐπεὶ δὲ πλάτος ἔχει τὸ φερόμενον, καὶ οὗτος πάλιν τὸ αὐτὸ ποιεῖ, καὶ ἀπωθεῖ εἰς τὸν ἐντός, ἕως ἂν εἰς τὸ μέσον ἔλθῃ. καὶ τότε μένει διὰ τὸ ὁμοίως ἔχειν πρὸς ἅπαντας τοὺς κύκλους τὸ φερόμενον, διὰ τὸ μέσον· καὶ γὰρ τὸ μέσον ἴσον ἀπέχει ἐν ἐκάστῳ τῶν κύκλων. ἢ ὅτι ὅσων μὲν μὴ κρατεῖ ἡ φορὰ τοῦ δινουμένου ὕδατος διὰ τὸ μέγεθος, ἀλλ' ὑπερέχει τῇ βαρύτητι τῆς τοῦ κύκλου ταχυτήτος, ἀνάγκη ὑπολείπεσθαι καὶ βραδύτερον φέρεσθαι. βραδύτερον δὲ ὁ ἐλάττων κύκλος φέρεται· τὸ αὐτὸ γὰρ ἐν ἴσῳ χρόνῳ ὁ μέγας τῷ μικρῷ στρέφεται κύκλῳ, ὅταν ὦσι περὶ τὸ αὐτὸ μέσον. ὥστε εἰς τὸν ἐλάττονα κύκλον ἀναγκαῖον ἀπολείπεσθαι, ἕως ἂν ἐπὶ τὸ μέσον ἔλθῃ. ὅσων δὲ πρότερον κρατεῖ ἡ φορὰ, λήγουσα ταὐτὸ ποιήσει. δεῖ γὰρ τὸν μὲν εὐθύ, τὸν δὲ ἕτερον κρατεῖν τῇ ταχυτῇ τοῦ βάρους, ὥστε εἰς τὸν ἐντός ἀεὶ κύκλον ὑπολείπεσθαι πᾶν. ἀνάγκη γὰρ αὐτὸ ἐντός ἢ ἐκτός κινεῖσθαι τὸ μὴ κρατούμενον. ἐν αὐτῷ δὲ τοίνυν ἐν ᾧ ἐστίν, ἀδύνατον φέρεσθαι τὸ μὴ κρατούμενον. ἔτι δὲ ἦττον ἐν τῷ ἐκτός· θάπτων γὰρ ἡ φορὰ τοῦ ἐκτός κύκλου. λείπεται δὲ εἰς τὸν ἐντός τὸ μὴ κρατούμενον μεθίστασθαι. ἀεὶ δὲ ἕκαστον ἐπιδίδωσιν εἰς τὸ μὴ κρατεῖσθαι. ἐπεὶ δὲ πέρας τοῦ μὴ κινεῖσθαι ποιεῖ τὸ εἰς μέσον ἐλθεῖν, μένει δὲ τὸ κέντρον μόνον, ἅπαντα ἀνάγκη εἰς τοῦτο δὴ ἀθροίζεσθαι.

A. ΟΣΑ ΙΑΤΡΙΚΑ.

[859a] Διὰ τί αἱ μεγάλαι ὑπερβολαὶ νοσώδεις; ἢ ὅτι ὑπερβολὴν ἢ ἔλλειψιν ποιοῦσιν; τοῦτο δὲ ἦν ἡ νόσος.

Διὰ τί [δὲ] τὰς νόσους ὑγιαίνουν πολλὰκις, ὅταν πολὺ ἐκστῇ τις; καὶ ἐνίων ἱατρῶν τοιαύτη ἡ τέχνη· ὑπερβολαῖς γὰρ ἰῶνται οἶνου ἢ ὕδατος ἢ ἄλμης ἢ σίτου ἢ λιμοῦ. ἢ ὅτι ἐναντία ἀλλήλοις τὰ τὴν νόσον ποιοῦντα· εἰς τὸ μέσον οὖν ἄγει θάτερον ἐκάτερα.

Διὰ τί αἱ τῶν ὥρῶν μεταβολαὶ καὶ πνεύματα ἐπιτείνουσιν ἢ παύουσι καὶ κρίνουσι τὰς νόσους καὶ ποιοῦσιν; ἢ ὅτι θερμαὶ καὶ ψυχραὶ εἰσι καὶ ὑγραὶ καὶ ξηραὶ, αἱ δὲ νόσοι τούτων εἰσὶν ὑπερβολαί, ἡ δὲ ὑγεία ἰσότης. ἐὰν οὖν δι' ὑγρότητα καὶ ψύξιν, ἡ ἐναντία ὥρα παύει· ἐὰν δὲ ἐναντία ὥρα ἔχῃται, ἡ ὁμοία κρᾶσις ἐπιγενομένη ἐπέτεινε καὶ ἀνεῖλεν. διὰ ταῦτα δὲ καὶ νοσίζουσι τοὺς ὑγιαίνοντας, ὅτι μεταβάλλουσαι λύουσι τὴν κρᾶσιν· ἅμα γὰρ ταῖς οἰκείαις ὥραις καὶ ἡλικίαις καὶ τόποις αὐξάνεται. διὸ δεῖ ἐν ταῖς μεταβολαῖς μάλιστα διακυβεῖν. ὁ δὲ καθόλου περὶ τῶν ὥρῶν εἴρηται, καὶ κατὰ μέρος τὸ αὐτὸ αἴτιον. αἱ γὰρ τῶν πνευμάτων μεταβολαὶ καὶ τῶν ἡλικιῶν καὶ τόπων ὥρας τινὸς εἰσι μεταβολαί. διὸ καὶ ταῦτα ἐπιτείνει καὶ παύει καὶ κρίνει καὶ ποιεῖ, ὥσπερ αἱ ὥραι, καὶ ἐπιτολαὶ τῶν ἄστρον, ὥσπερ Ὁρίων καὶ Ἀρκτοῦρος καὶ Πλειὰς καὶ Κύων, ὥσπερ πνευμάτων καὶ ὑδάτων καὶ εὐδιῶν καὶ χειμῶνων καὶ ἀλέας.

Διὰ τί ἐν ταῖς μεταβολαῖς τῶν ὥρῶν ἐμέτοις οὐ δεῖ χρῆσθαι; ἢ ἵνα μὴ γένηται συντάραξις διαφόρων γινομένων τῶν περιττωμάτων διὰ τὰς μεταβολὰς.

[859b] Διὰ τί καὶ οἱ κιβδηλιῶντες καὶ ὑπὸ λιμοῦ τοὺς πόδας οἰδοῦσιν; ἢ διὰ τὴν σύντηξιν ἀμφότεροι; συντήκονται δὲ οἱ μὲν διὰ λιμὸν διὰ τὸ ὅλως μὴ λαμβάνειν τροφήν, οἱ δὲ κιβδηλιῶντες διὰ τὸ μὴδὲν ἀπολαβεῖν ἢς λαμβάνουσι τροφῆς.

Διὰ τί τῶν ἀπὸ χολῆς νοσημάτων ἐν τῷ θέρει (πυρέττουσι γὰρ μάλιστα ἐν τῷ θέρει) τὰ ὀξέα ἀπὸ χολῆς ὄντα ἐν τῷ χειμῶνι γίνεται μᾶλλον; ἢ ὅτι μετὰ πυρετοῦ ὄντα ὀξέα ἐστὶ διὰ τὸ βίαια εἶναι, ἡ δὲ βία παρὰ φύσιν. ὑγραινομένων γὰρ τινων τόπων θερμὴ φλεγμασία γίνεται· ἡ δὲ φλεγμασία ὑπερβολὴ θερμότητος οὕσα ποιεῖ τοὺς πυρετούς. ἐν μὲν οὖν τῷ θέρει ξηραὶ καὶ θερμαὶ εἰσιν αἱ νόσοι, ἐν δὲ τῷ χειμῶνι ὑγραὶ καὶ θερμαί, διὸ ὀξεῖαι· ταχέως γὰρ ἀναιροῦσιν· οὐ

γὰρ θέλει πέττεσθαι διὰ τὸ πλῆθος τοῦ περιττώματος.

Διὰ τί ποτε ὁ λοιμὸς μόνη τῶν νόσων μάλιστα τοὺς πλησιάζοντας τοῖς θεραπευομένοις προσαναπίμπλησιν; ἢ ὅτι μόνη τῶν νόσων κοινὴ ἐστὶν ἅπασιν, ὥστε διὰ τοῦτο πᾶσιν ἐπιφέρει τὸν λοιμόν, ὅσοι φαύλως ἔχοντες προϋπάρχουσιν. καὶ γὰρ διὰ τὸ ὑπέκκαυμα τῆς νόσου τῆς παρὰ τῶν θεραπευομένων γινομένης ταχέως ὑπὸ τοῦ πράγματος ἀλίσκονται.

Διὰ τί τοῦ χειμῶνος βορείου γενομένου, ἐὰν τὸ ἔαρ ἔπομβρον γένηται καὶ νότιον, τὸ θέρος νοσῶδες γίνεται πυρετοῖς καὶ ὀφθαλμίαις; ἢ ὅτι τὰ τε σώματα ἐκδέχεται τὸ θέρος πολλὴν ἔχοντα ἁλλοτρίαν ὑγρότητα, καὶ ἡ γῆ καὶ ὁ τόπος ἐν ᾧ ἂν οἰκῶσι, γίνεται ἔφυδρος καὶ τοιοῦτος οἷοι λέγονται οἱ αἰὲ νοσῶδεις τόποι; πρῶτον μὲν οὖν ὀφθαλμίαι γίνονται τηκομένης τῆς περὶ τὴν κεφαλὴν περιττώσεως, ἔπειτα πυρετοί. [860a] δεῖ γὰρ νοῆσαι ὅτι τὸ αὐτὸ καὶ θερμότατον γίνεται καὶ ψυχρότατον, οἷον ὕδωρ καὶ λίθος ὁ μὲν ζεῖ, τὸ δὲ κάει μᾶλλον. ἐν τε οὖν ἀέρι πνίγη γίνεται θερμαινομένου τοῦ ἀέρος διὰ πάχος, καὶ ἐν τοῖς σώμασιν ὡσαύτως πνίγη καὶ καύματα, τὸ δὲ ἐν σώματι καῦμα πυρετός ἐστιν, ἐν δὲ ὀφθαλμοῖς ὀφθαλμία. ὅλως δὲ καὶ ἡ μεταβολὴ ἰσχυρὰ οὕσα τὰ σώματα φθείρει, ὅταν τοῦ ἔαρος ὑγροῦ ὄντος εὐθὺς ἐπιλαμβάνῃ τὸ θέρος θερμὸν ὄν καὶ ξηρόν. ἔτι δὲ χαλεπώτερον, ἐὰν καὶ τὸ θέρος ἔπομβρον γένηται. ἔχει γὰρ ὁ ἥλιος ὕλην ἣν ποιήσει ζεῖν καὶ ἐν τοῖς σώμασι καὶ ἐν τῇ γῇ καὶ ἀέρι· διὸ γίνονται πυρετοὶ καὶ ὀφθαλμίαι.

Διὰ τί, ἐὰν ὁ χειμῶν νότιος γένηται καὶ ἔπομβρος, τὸ δὲ ἔαρ αὐχμηρὸν καὶ βόρειον, νοσῶδες γίνεται καὶ τὸ ἔαρ καὶ τὸ θέρος; ἢ ὅτι ἐν μὲν τῷ χειμῶνι διὰ τὴν ἀλέαν καὶ ὑγρότητα ὁμοίως τὰ σώματα διάκειται τῇ ὥρᾳ; ὑγρὰ γὰρ ἀνάγκη εἶναι καὶ οὐ συνεστηκότα. οὕτω δὲ ἐχόντων, τὸ ἔαρ ψυχρὸν ὄν ἔπηξε καὶ ἐσκήρυνεν αὐτὰ διὰ τὸν αὐχμόν, ὥστε ταῖς μὲν κυούσαις ὁ τόκος ὁ ἑαρινὸς εἰς ἐκτρώσεις γίνεται διὰ τὴν θερμασίαν καὶ τὸν σφακελισμὸν τὸν γινόμενον ὑπὸ τῆς ξηρᾶς ψυχρότητος, ἅτε οὐκ ἐκκρινομένης τῆς ὑγρότητος, τὰ δὲ κυόμενα παιδία ἀσθενῇ γίνεται καὶ πηρὰ διὰ τὴν ὑπερβολὴν τοῦ ψύχους· συμβέβηκε γὰρ τότε γεννώμενα [ἐν εὐδία] καὶ συστῆναι καὶ τραπῆναι ἐν τῇ τεκούσῃ. τοῖς δὲ ἄλλοις, ἅτε ἐν τῷ ἔαρι οὐκ ἀποκαθαρθέντος τοῦ φλέγματος τὴν ὑπερβολὴν, ὃ συμβαίνει ὅταν ἀλεινὸν γένηται, ἀλλὰ διὰ ψῦχος συστάντος, ὅταν ἐπιλάβῃ τὸ θέρος καὶ ἡ ἀλέα τήκουσα βία, τοῖς μὲν χολώδεσι καὶ ξηροῖς, διὰ τὸ μὴ

διερὰ εἶναι τὰ σώματα αὐτοῖς ἀλλὰ τὴν φύσιν αὖτον ἔχειν, γίνονται μὲν ὑγρότητες, αὗται δὲ λεπταί, ὥστε ὀφθαλμίαις ξηραῖς ἀλίσκονται, οἱ δὲ φλεγματώδεις βράγχοις καὶ εἰς τὸν πνεύμονα κατάρροις. ταῖς γυναιξὶ δὲ δυσεντερίαι γίνονται διὰ τὴν ὑγρότητα καὶ ψυχρότητα τῆς φύσεως, τοῖς δὲ γεραιτέροις ἀποπληξίαι, ὅταν ἀθρόον λυθὲν ὑγρὸν ἐπιέσῃ καὶ δι' ἀσθένειαν τοῦ συμφύτου θερμοῦ παγῇ.

Διὰ τί, ἐὰν μὲν τὸ θέρος αὐχμηρὸν γένηται καὶ βόρειον, τὸ δὲ μετόπωρον ἐναντίον, ὑγρὸν καὶ νότιον, ἐν τῷ χειμῶνι κεφαλαλγία τε γίνονται καὶ βράγχοι καὶ βῆχες, [860b] καὶ τελευτῶσιν εἰς φθίσεις; ἢ ὅτι λαμβάνει ὕλην πολλὴν ὁ χειμῶν, ὥστ' αὐτῷ ἔργον ἐστὶ πῆξαι τὴν ὑγρότητα καὶ φλέγμα ποιῆσαι; ἐν μὲν οὖν ταῖς κεφαλαῖς ὅταν ὑγρασία γένηται, βάρη ποιεῖ, ἐὰν δὲ ἡ πολλὴ καὶ ψυχρά, σφακελισμούς· ἐὰν δὲ διὰ πλῆθος μὴ πῆξῃ, ῥεῖ εἰς τὸν ἐχόμενον τόπον, ὅθεν αἱ βῆχες καὶ οἱ βράγχοι καὶ αἱ φθόαι γίνονται.

Διὰ τί, ἐὰν βόρειον γένηται τὸ θέρος καὶ αὐχμῶδες, καὶ τὸ μετόπωρον, συμφέρει τοῖς φλεγματώδεσι καὶ ταῖς γυναιξίν; ἢ ὅτι ἡ φύσις ἐπὶ θάτερα ἀμφοῖν ὑπερβάλλει, ὥστε εἰς τοὐναντίον ἢ ὥρα ἐλκύσασα καθίστησιν εἰς τὴν εὐκρασίαν· καὶ παραχρῆμά τε ὑγιαίνουσιν, ἐὰν μὴ τι δι' ἑαυτοὺς ἀμαρτάνωσι, καὶ εἰς τὸν χειμῶνα οὐχ ὑγροὶ ἀφικνοῦνται, ἔχοντες ὑπεκκαύματα τῷ ψύχει.

Διὰ τί τοῖς χολώδεσι νοσῶδές ἐστι τὸ βόρειον καὶ αὐχμῶδες θέρος καὶ μετόπωρον; ἢ ὅτι ἐπὶ ταὐτὸ ῥέπει αὐτοῖς τὸ σῶμα καὶ αἱ ὥραι, ὥστε ὥσπερ πῦρ ἐπὶ πυρὶ γίνεται. ξηραينوμένων γὰρ τῶν σωματῶν, καὶ τοῦ γλυκυτάτου μὲν ἐξικμαζομένου ἐξ αὐτῶν, ὑπερθερμαινομένων δὲ λίαν, ἀνάγκη διὰ μὲν τὰς συντήξεις ὀφθαλμίας ξηρὰς γίνεσθαι, διὰ δὲ τὸ χολῶδες τοὺς ὑπολειπομένους εἶναι χυμούς, ὑπερθερμαινομένων δὲ καὶ τούτων πυρετοὺς ὀξεῖς γίνεσθαι ἅτε ὑπ' ἀκράτου τῆς χολῆς, ἐνίοις δὲ μανίας, οἷς ἂν μέλαινα χολὴ φύσει ἐνῇ· αὕτη γὰρ ἐπιπολάζει ἀναξηραينوμένων τῶν ἐναντίων χυμῶν.

Διὰ τί τὸ τὰ ὕδατα μεταβάλλειν νοσῶδές φασιν εἶναι, τὸ δὲ τὸν αέρα οὐ; ἢ ὅτι τοῦτο γίνεται τροφή, καὶ ἔχοντες καὶ ἀπολελαυκότες τοῦ ὕδατος ἀπέρχονται, τοῦ δὲ αέρος οὐδέν; ἔτι ὕδατος μὲν πολλὰ εἶδη ἐστὶ καὶ διάφορα καθ' αὐτά, αέρος δὲ οὐ, ὥστε καὶ τοῦτο αἴτιον. ἐν μὲν γὰρ τῷ αέρι σχεδὸν τῷ αὐτῷ συμβαίνει διατελεῖν καὶ ἀποδημοῦντας, ἐν δὲ ὕδασιν ἄλλοις· διὸ καλῶς δοκεῖ νοσώδης ἢ τοῦ ὕδατος μεταβολὴ εἶναι.

Διὰ τί μᾶλλον ἢ τοῦ ὕδατος ἢ ἡ τῶν σιτίων μεταβολή νοσώδης; ἢ ὅτι πλεῖστον ἀναλίσκομεν τὸ ὕδωρ; ἔν τε γὰρ τοῖς σιτίοις ὑπάρχει καὶ ὄψοις, καὶ ἐν τῷ πόματι τὸ πλεῖστον ὕδωρ.

[861a] Διὰ τί ἡ μεταβολή νοσώδης; ἢ ὅτι πᾶσα μὲν ἡ μεταβολή καὶ ὥρας καὶ ἡλικίας εὐκίνητον. εὐκίνητα γὰρ τὰ ἄκρα, οἶον καὶ αἱ ἀρχαὶ καὶ αἱ τελευταί. ὥστε καὶ αἱ τροφαὶ ἕτεραι οὔσαι ἀλλήλας φθείρουσιν· αἱ μὲν γὰρ ἄρτι, αἱ δὲ οὐπω προσπεφύκασιν. ἔτι δὲ ὥσπερ ἡ ποικίλη τροφή νοσώδης (ταραχώδης γὰρ καὶ οὐ μία πέψις), οὕτω συμβαίνει μεταβάλλουσι τὸ ὕδωρ ποικίλη πόματος χρῆσθαι τῇ τροφῇ· καὶ ἡ τοιαύτη τροφή κυριωτέρα τῆς ξηρᾶς ἐστὶ τῷ πλεῖστον εἶναι καὶ ἐξ αὐτῶν τῶν σιτίων τὸ ὑγρὸν γίνεσθαι τροφήν.

Διὰ τί ἡ τῶν ὑδάτων μεταβολή τοῖς ἔχουσι φθεῖρας ποιεῖ πολλοὺς ἔχειν; ἢ ὅτι ἀπεψία γινομένη τοῦ ὑγροῦ διὰ τὴν ταραχήν, ἢ γίνεται διὰ τὴν ποικίλιαν τοῦ ὕδατος πυκνὰ μεταβάλλουσιν, ὑγρότητα ἐμποιεῖ, καὶ μάλιστα ἐν τῷ ἐπιτηδεῖως ὑπάρχοντι τόπῳ; ὁ δὲ ἐγκέφαλος ὑγρός· διὸ καὶ ἡ κεφαλὴ ἀεὶ μάλιστα. δηλοῖ δέ, ὅτι αἱ τρίχες ἔνεισι μάλιστα ἐν αὐτῇ. ἡ δὲ τοῦ τόπου τούτου ὑγρότης φθειρῶν ποιητικὴ. δηλοῖ δὲ ἐπὶ τῶν παίδων· ὑγροκέφαλοί τε γὰρ εἰσι, καὶ πολλάκις ἢ κορυζῶσιν ἢ αἷμα ποιεῖ ρεῖν, καὶ φθεῖρας πλείους οἱ ἐν ταύτῃ τῇ ἡλικίᾳ ἔχουσιν.

Διὰ τί ἀπὸ Πλειάδος μέχρι ζεφύρου οἱ τὰς μακρὰς νόσους κάμνοντες μάλιστα ἀναιροῦνται, καὶ οἱ γέροντες μᾶλλον τῶν νέων; πότερον ὅτι δύο ἐστὶ τὰ φθαρτικώτατα, ὑπερβολή τε καὶ ψυχρος; τὸ γὰρ ζῆν θερμόν, ἡ δὲ ὥρα αὕτη ἄμφω ταῦτ' ἔχει· ψυχρά τε γὰρ ἐστὶ, καὶ ἀκμαϊότατος ὁ χειμῶν· τὸ λοιπὸν γὰρ ἔαρ ἐστίν. ἢ ὅτι ὁμοίως μὲν διάκεινται τοῖς γέρουσι τῶν καμνόντων οἱ τὰς μακρὰς κάμνοντες ἀσθενείας; οἶον γὰρ ἤδη γῆρας ἡ μακρὰ ἀσθένεια συμβαίνει· τὸ γὰρ σῶμα ἀμφοῖν ξηρὸν καὶ ψυχρόν ἐστὶ, τῶν μὲν δι' ἡλικίαν, τῶν δὲ διὰ νόσον. ὁ δὲ χειμῶν καὶ οἱ πάγοι ὑπερβολή ἐστὶ ψυχρότητος καὶ ξηρότητος. μικρᾶς οὖν δεομένοις αὐτοῖς ῥοπῆς γίνεται οἶον πῦρ ἐπὶ πυρὶ ὁ χειμῶν, καὶ φθείρει διὰ ταῦτα.

Διὰ τί ἐν τοῖς ἐλώδεσι τὰ μὲν ἐν τῇ κεφαλῇ ἔλκη ταχὺ ὑγιαίνεται, τὰ δὲ ἐν ταῖς κνήμαις μόλις; ἢ ὅτι βαρεῖα ἡ ὑγρότης διὰ τὸ γεώδης εἶναι, τὰ δὲ βαρέα εἰς τὸ κάτω ἀποχωρεῖ; τὰ μὲν οὖν ἄνω ἔκκριτα διὰ τὸ ἀποκεχωρηκέναι εἰς τὰ κάτω, τὰ δὲ κάτω πολλῆς γέμει περιττώσεως καὶ εὐσήπτου.

[861b] Διὰ τί, ἐὰν τοῦ χειμῶνος γενομένου βορείου καὶ τοῦ ἔαρος

νοτίου καὶ ἐπόμβρου τὸ θέρος λίαν αὐχμηρὸν γένηται, θανατῶδες γίνεται τὸ μετόπωρον πᾶσι, μάλιστα δὲ τοῖς παιδίοις, καὶ τοῖς ἄλλοις δὲ δυσεντερία καὶ τεταρταῖοι χρόνιοι γίνονται ἐν αὐτῷ; ἢ ὅτι μετρίου μὲν ἐπιγενομένου ὕδατος θερινοῦ καταψυχθὲν τὸ ζέον ὑγρὸν ἐν ἡμῖν λωφᾷ, ὅσον ἡθροίσθη ἐν τῷ ἥρι γενομένῳ [τῷ] ὑγρῷ; εἰ δὲ μή, τὰ μὲν παιδία διὰ τὸ ὑγρὰ εἶναι φύσει καὶ θερμὰ ὑπερζει τῷ πάθει, διὰ τὸ μὴ καταψυχθῆναι. ὅσα δὲ μὴ τοῦ θέρους, τοῦ μετοπώρου ὅσον ἐκζει. αἱ δὲ περιττώσεις ἐὰν μὴ εὐθὺς ἀνέλωσι, περὶ πνεύμονα καὶ ἀρτηρίαν γινόμεναι - ἄνω γὰρ πρῶται συνίστανται διὰ τὸ ὑπὸ τοῦ ἀέρος ἡμᾶς θερμαίνεσθαι· διὰ γὰρ ταῦτα καὶ ὀφθαλμιαὶ πυρετῶν πρότερον γίνονται ἐν τῷ νοσερῷ θέρει. ἐὰν οὖν μὴ ἐν τοῖς ἄνω, καθάπερ εἴρηται, τὰ περιττώματα εὐθὺς ἀνέλη, καταβαίνουσιν εἰς τὰς κοιλίας ἅπερτα ὄντα, τοῦτο δὲ ἐστὶ δυσεντερία, διὰ τὸ μὴ ἐκκρίνεσθαι ὑπὸ πλήθους τὸ ὑγρὸν. καὶ ἐὰν παύσωνται, τεταρταῖοι γίνονται τοῖς σωζομένοις· ἡ γὰρ τοῦ ἀπέπτου ὑπόστασις μονιμωτάτη ἐστὶ καὶ σύντονος γίνεται τῷ σώματι, καθάπερ ἡ μέλαινα χολή.

Διὰ τί, ἐὰν τὸ θέρος ἔπομβρον γένηται καὶ νότιον, καὶ τὸ μετόπωρον, ὁ χειμὼν νοσερὸς γίνεται; ἢ ὅτι σφόδρα ὑγρὰ τὰ σώματα ὁ χειμὼν λαμβάνει, καὶ ἡ μεταβολὴ ἔτι μεγάλη γίνεται ἐξ ἀλέας πολλῆς καὶ οὐκ ἐκ προσαγωγῆς, διὰ τὸ καὶ τὸ μετόπωρον γίνεσθαι ἀλεινόν, ὥστε τοῖς μὲν γίνεσθαι ἀνάγκη τὰ ὀξέα νοσήματα, μὴ ἀραιοῖς οὔσι· τοῖς γὰρ τοιούτοις ἄνω μᾶλλον τὰ ὑγρὰ περιττώματα ἀθροίζεται, διὰ τὸ τούτους μὲν τοὺς τόπους ἔχειν χώραν, τοὺς δὲ κάτω ἐτέρους εἶναι. οἱ οὖν ὄντες πυκνόσαρκοι οὐ πολλὰ περιττώματα δέχονται. ψυχομένης οὖν τῆς περιττώσεως τῆς ἐν τοῖς ἄνω μέρεσι τοῦ σώματος, ὥσπερ τοῖς οἰνωμένοις ὅταν ῥιγῶσι, τὰ εἰρημένα νοσήματα συμβαίνει γίνεσθαι. τοῖς δὲ ἀραιότεροις πυρετῶν γινομένων, τοὺς ἀπὸ πλείστης ἀπεψίας γινομένους πυρετοὺς καύσους συμβαίνει γίνεσθαι, διὰ τὸ τοῖς τοιούτοις ἐσκεδάσθαι μὲν μᾶλλον κατὰ πᾶν τὸ σῶμα τὰ ὑγρὰ ἢ τοῖς πυκνοσάρκοις, συνισταμένης δὲ τῆς σαρκὸς αὐτῶν ὑπὸ τοῦ χειμῶνος θερμαίνόμενα τὰ ὑγρὰ πυρετοὺς ποιεῖν. ἡ γὰρ παντὸς τοῦ σώματος ὑπερβάλλουσα [862a] θερμότης ἐστὶ πυρετός· ἐπιτεινομένη δὲ διὰ τὸ πλῆθος τῆς ἐνυπαρχούσης αὐτοῖς ὑγρότητος καῦσος γίνεται.

Διὰ τί, ὅταν ἐκ γῆς ἀτμὸς ἀνίη πολλὸς ὑπὸ τοῦ ἡλίου, τὸ ἔτος λοιμῶδες γίνεται; ἢ ὅτι ὑγρὸν ἀνάγκη καὶ ἔπομβρον τὸ ἔτος σημαίνει, καὶ τὴν γῆν ὑγρὰν ἀνάγκη εἶναι; οἷον οὖν ἐν ἐλώδει τόπω

ἡ οἰκησις γίνεται. νοσώδης δὲ ἡ τοιαύτη ἐστίν. καὶ τὰ σώματα δὴ τότε ἀνάγκη περίττωμα πολὺ ἔχειν, ὥστε ἐν τῷ θέρει ἔχειν ὕλην νοσώδη.

Διὰ τί γίνεται τὰ ἔτη νοσώδη, ὅταν γένηται φορὰ τῶν μικρῶν βατράχων τῶν φρυνοιδῶν; ἢ ὅτι ἕκαστον εὐσθενεῖ ἐν τῇ οἰκειᾷ χώρᾳ τῆς φύσεως; καὶ ταῦτα δὴ φύσει ἐστὶν ὑγρὰ, ὥστε ἔπομβρον καὶ ὑγρὸν σημαίνει τὸν ἐνιαυτὸν γίνεσθαι. τὰ δὲ τοιαῦτα ἔτη νοσώδη ἐστίν· ὑγρὰ γὰρ τὰ σώματα ὄντα πολὺ ἔχει τὸ περίττωμα, ὃ ἐστὶ τῶν νόσων αἴτιον.

Διὰ τί οἱ νότοι οἱ ξηροὶ καὶ μὴ ὕδατώδεις πυρετώδεις εἰσίν; ἢ ὅτι ὑγρότητα καὶ θερμὴν ἀλλοτρίαν ποιοῦσιν; εἰσὶ γὰρ ὑγροὶ καὶ θερμοὶ φύσει. τοῦτο δ' ἐστὶ πυρετῶδες· ὁ γὰρ πυρετὸς ἐξ ἀμφοτέρας τῆς τούτων ἐστὶν ὑπερβολῆς. ὅταν μὲν οὖν ἄνευ ὕδατος πνέωσι, ταύτην ἐν ἡμῖν ποιοῦσι τὴν διάθεσιν, ὅταν δὲ ἅμα ὕδατι, τὸ ὕδωρ καταψύχει ἡμᾶς. οἱ δὲ ἐκ θαλάττης νότοι καὶ συμφέρουσι τοῖς φυτοῖς· ἐψυγμένοι γὰρ ἀπὸ τῆς θαλάττης ἀφικνοῦνται πρὸς αὐτά. αἱ δ' ἐρυσίβαι γίνονται ὑπὸ ὑγρότητος καὶ θερμῆς ἀλλοτρίας.

Διὰ τί ἐν τοῖς νότοις βαρύτερον ἔχουσι καὶ ἀδυνατώτερον οἱ ἄνθρωποι; ἢ ὅτι ἐξ ὀλίγου πολὺ ὑγρὸν γίνεται, διατηκόμενον διὰ τὴν ἀλέαν, καὶ ἐκ πνεύματος κούφου ὑγρὸν βαρὺ; ἔτι δὲ ἡ δύναμις ἡμῶν ἐν τοῖς ἄρθροις ἐστί, ταῦτα δὲ ἀνίεται ὑπὸ τῶν νοτίων. δηλοῦσι δὲ οἱ ψόφοι τῶν κεκολλημένων. τὸ γὰρ γλίσχρον ἐν τοῖς ἄρθροις πεπηγὸς μὲν κινεῖσθαι κωλύει ἡμᾶς, ὑγρὸν δὲ λίαν ὃν συντείνεσθαι.

Διὰ τί ἄρρωστοῦσι μὲν μᾶλλον τοῦ θέρους, ἀποθνήσκουσι δὲ μᾶλλον οἱ ἄρρωστοῦντες τοῦ χειμῶνος; ἢ ὅτι τοῦ χειμῶνος διὰ τὴν πυκνότητα ἐντὸς τῶν σωμάτων συνεσταλμένου τοῦ θερμοῦ, καὶ πονοῦντες μᾶλλον, εἰ μὴ πέττοιμεν, τῶν ἐν ἡμῖν συνισταμένων περιττωμάτων, ἰσχυρὰν ἀνάγκη τὴν ἀρχὴν [862b] εἶναι τῆς νόσου; τοιαύτην δὲ οὕσαν φθαρτικὴν εἰκὸς ἐστὶν αὐτὴν εἶναι. ἐν δὲ τῷ θέρει, μανοῦ καὶ κατεψυγμένου παντὸς τοῦ σώματος καὶ ἐκλελυμένου πρὸς τοὺς πόνους ὄντος, ἀρχὰς νόσων ἀνάγκη πλείους μὲν γίνεσθαι διὰ τε κόπους καὶ ἀπεψίαν τῶν εἰσφερομένων (καὶ γὰρ οἱ νέοι καρποὶ τότε εἰσίν), ἀλλ' οὐχ οὕτως ἰσχυράς, διὸ εὐβοήθητοι.

Διὰ τί μετὰ τὰς τροπὰς ἀμφοτέρας μέχρι ἑκατὸν ἡμερῶν ἀποθνήσκουσι μάλιστα; ἢ ὅτι ἄχρι τοσούτου ἑκατέρᾳ ἡ ὑπερβολὴ διέχει, ἢ τε τοῦ θερμοῦ καὶ τοῦ ψυχροῦ; ἢ δὲ ὑπερβολὴ τοῖς ἀσθενέσι ποιεῖ τὰς νόσους καὶ τὰς φθοράς.

Διὰ τί τὸ ἔαρ καὶ τὸ φθινόπωρον νοσώδῃ; ἢ ὅτι αἱ μεταβολαὶ νοσώδεις; τὸ δὲ μετόπωρον τοῦ ἔαρος νοσωδέστερον, ὅτι μᾶλλον τοῦ θερμοῦ ψυχομένου ἢ τοῦ ψυχροῦ θερμαινομένου νοσοῦμεν. ἐν μὲν οὖν τῷ ἔαρι τὸ ψυχρὸν θερμαίνεται, ἐν δὲ τῷ μετοπῶρῳ τὸ θερμὸν ψύχεται.

Διὰ τί ἐν τῷ χειμῶνι ἐλάττω μὲν τὰ ἀρρωστήματα ἢ ἐν τῷ θέρει, θανάσιμα δὲ μᾶλλον; ἢ ὅτι ἐν μὲν τῷ θέρει ἀπὸ μικρᾶς προφάσεως τὰ ἀρρωστήματα, ἐν δὲ τῷ χειμῶνι οὐ; πεπτικώτεροι γὰρ καὶ ὑγιεινότεροι ἡμῶν αὐτῶν, ὥστε εἰκότως τὰ ἀπὸ μείζονος προφάσεως γινόμενα μείζω καὶ ἀναιρετικώτερα. ταῦτὸ δὲ τοῦτο καὶ ἐπὶ τῶν ἀθλητῶν καὶ ὅλως ἐπὶ τῶν ὑγιεινῶς διακειμένων ὁρῶμεν· ἢ γὰρ οὐ λαμβάνονται νόσῳ, ἢ ταχὺ συναπίασι· μεγάλης γὰρ αἰτίας δέονται.

Διὰ τί τοῦ μὲν φθινοπώρου καὶ τοῦ χειμῶνος οἱ καῦσοι μᾶλλον γίνονται ἐν ταῖς ψυχραῖς ὥραις, τοῦ δὲ θέρους τὰ ρίγη ἐνοχλεῖ καυμάτων ὄντων; ἢ ὅτι τῶν κατὰ τὸν ἄνθρωπον ἡ χολὴ μὲν ἐστὶ θερμὸν, τὸ δὲ φλέγμα ψυχρὸν; ἐν μὲν οὖν τῷ θέρει τὸ ψυχρὸν ἀναλύεται, καὶ διαχυθὲν ρίγη καὶ τρόμους παρασκευάζει· ἐν δὲ τῷ χειμῶνι τὸ θερμὸν ὑπὸ τῆς ὥρας κρατεῖται κατεψυγμένον. οἱ δὲ καῦσοι μᾶλλον ἐνοχλοῦσι τοῦ χειμῶνος καὶ τοῦ φθινοπώρου, ὅτι διὰ τὸ ψῦχος τὸ θερμὸν εἴσω συστέλλεται, ὃ δὲ καῦσος ἔσθθεν ἐστὶ καὶ οὐκ ἐπιπολῆς· εἰκότως οὖν οἱ καῦσοι ταύτην τὴν ὥραν γίνονται. καταμάθοι δ' ἂν τις τοῦτο ἀκριβέστερον ἐπὶ τῶν ψυχρολουτρούντων τοῦ χειμῶνος καὶ τῶν τοῦ χειμῶνος λουομένων τῷ θερμῷ, ὅτι οἱ μὲν τῷ ψυχρῷ λουόμενοι, ἀπορριγώσαντες ὀλίγον χρόνον ἕως λούονται, τὴν λοιπὴν ἡμέραν [863a] οὐδὲν πάσχουσιν ὑπὸ τοῦ ψυχροῦ, οἱ δὲ τῷ θερμῷ ὕδατι χρησάμενοι δυσριγοτέρως διάγουσι. τῶν μὲν γὰρ τῷ ψυχρῷ λουομένων πυκνοῦται ἡ σὰρξ καὶ συστέλλεται εἴσω τὸ θερμὸν, τῶν δὲ θερμολουτρούντων ἡ σὰρξ ἀραιοῦται καὶ τὸ θερμὸν ἕως τοῦ ἕξω τόπου περισπᾶται.

Τίς καταπλάσματος ἀρετὴ; ἢ διὰ τὸ χυτικὸν εἶναι καὶ ἰδρῶτα ποιοῖ καὶ ἀποπνοήν;

Τῷ δῆλον ὅταν ἔμπυον; ἢ ἐὰν καταχεομένου τοῦ θερμοῦ ἀλλαγῇ, ἔμπυον, εἰ δὲ μή, οὐ;

Ποῖα δεῖ καίειν ἢ ποῖα δεῖ τέμνειν; ἢ ὅσα μὲν ἔχει στόμα μέγα καὶ οὐ ταχὺ συμφύεται, ταῦτα καίειν δεῖ, ὅπως ἡ ἐσχάρα ἐκεῖ πέσῃ; οὕτω γὰρ οὐκ ἔσται ὑπουλα.

Τίς ἐναίμου ἀρετή; ἢ τὸ ξηραντικὸν εἶναι καὶ τῆς ἐπιούσης περιπτώσεως σταλτικὸν ἄνευ ἐσχαρώσεως καὶ σήψεως τῆς σαρκός; οὕτω γὰρ ἂν ἀφλέγμαντον εἴη καὶ συμφυτικόν. μὴ ἐπιρρέοντος μὲν γὰρ ἀφλέγμαντον ἔσται, ξηρὸν δὲ ὃν συμφύσεται· ἕως δ' ἂν ὑγρορροῇ, οὐ συμφύσεται. διὰ τοῦτο οὖν δριμέα τὰ πλεῖστα, ὥστε ἀποστύφειν.

Ποῖα τέμνειν δεῖ καὶ ποῖα καίειν, καὶ ποῖα οὐ, ἀλλὰ φαρμάκοις; ἢ τὰ μὲν ἐπὶ ταῖς μασχάλαις καὶ βουβῶσι φαρμάκῳ; μετὰ γὰρ διαίρεσιν τὰ μὲν ἐπίπονα, τὰ δὲ ἐπικίνδυνα. καίειν δὲ τὰ πλατέα τῶν φυμάτων καὶ πολὺ πρόβλημα ἔχοντα, καὶ ἐν φλεβώδεσι καὶ μὴ εὐσάρκοις. τέμνειν δὲ τὰ εἰς ὅζῳ συνηγμένα καὶ τὰ μὴ ἐν στερεοῖς.

Διὰ τί, ἐὰν χαλκῷ τις τηθηῇ, ῥᾶον ὑγιάζεται ἢ σιδήρῳ; πότερον ὅτι λειότερον, ὥσθ' ἦττον σπαράττει καὶ ποιεῖ πληγὴν; ἢ εἵπερ ἀκμὴν μᾶλλον ὁ σίδηρος λαμβάνει, ῥᾶον καὶ ἀπαθεστέρα ἢ διαίρεσις; ἀλλὰ μὴν φαρμακῶδες ὁ χαλκός, ἢ δὲ ἀρχὴ ἰσχυρά. τὸ οὖν εὐθύς ἅμα τῇ τομῇ θᾶπτον τὸ φάρμακον ποιεῖ τὴν σύμφυσιν.

Διὰ τί δὲ καὶ τὰ διὰ χαλκοῦ καύματα θᾶπτον ὑγιάζεται; ἢ ὅτι μανότερον καὶ ἦττον σωματικόν, ἐν δὲ τοῖς στερεωτέροις πλείων ἢ θερμότης.

Πότερον ἢ πτισάνη κουφοτέρα ἢ κριθίνη καὶ βελτίων πρὸς τὰ ἄρρωστήματα ἢ ἡ πυρίνη; δοκεῖ γὰρ τισιν αὕτη [863b] σημεῖον ποιούμενοις τοὺς μεταχειριζομένους, ὅτι πολὺ εὐχρόστεροι οἱ περὶ τὴν τῶν ἀλεύρων ἐργασίαν ἢ τὴν τῶν ἀλφίτων. εἴθ' ὅτι ὑγροτέρα ἢ κριθή, τὸ δὲ ὑγρότερον πλέονος πέψεως. ἢ οὐθὲν κωλύει ἔνια ἔχειν δυσπεπτότερα καὶ ἔνια πρὸς κουφότητα χρησιμώτερα; οὐ γὰρ μόνον ὑγροτέρα ἐστὶν ἡ κριθή τοῦ πυροῦ, ἀλλὰ καὶ ψυχροτέρα. δεῖ δὲ τὸ ρόφημα καὶ τὸ προσφερόμενον τοιοῦτον εἶναι τῷ πυρέττοντι, ὃ τροφήν τε βραχεῖαν ποιήσει καὶ καταψύξει. ἢ δὲ πτισάνη τοῦτο ἔχει ἢ κριθίνη· διὰ γὰρ τὸ ὑγρότερον ἢ σωματωδέστερον εἶναι ὀλίγον δίδωσι, καὶ τοῦτο ψυκτικόν.

Διὰ τί τὴν αἰμωδίαν παύει ἢ ἀνδράχην καὶ ἄλεις; ἢ ὅτι ἡ μὲν ὑγρότητά τινα ἔχει; φανερά δὲ αὕτη μασωμένοις τε, καὶ ἐὰν συνθλασθῇ χρόνον τινά· ἔλκεται γὰρ ἡ ὑγρότης. τὸ δὲ γλίσχρον εἰσδυόμενον ἐξάγει τὸ ὅζῳ. καὶ γὰρ ὅτι συγγενής, ἢ ὁξύτης σημαίνει· ἔχει γὰρ τινα ὁξύτητα ὁ χυμός. ὁ δὲ ἄλς συντήκων ἐξάγει καὶ τὴν ὁξύτητα. διὰ τί οὖν ἢ κονία καὶ τὸ νίτρον οὐ; ἢ ὅτι στύφει καὶ οὐ τήκει;

Διὰ τί τοὺς μὲν θερινοὺς κόπους λουτρῷ ἰᾶσθαι δεῖ, τοὺς δὲ χειμερινοὺς ἀλείμματι; ἢ τοὺς μὲν ἀλείμματι διὰ τὰς φρίκας καὶ τὰς γινομένας μεταβολάς; θέρμη γὰρ λύειν δεῖ, ἢ ποιήσει ἀλεάζειν· τὸ δ' ἔλαιον θερμόν. ἐν δὲ τῷ θέρει καθυγραίνειν· ἡ γὰρ ὥρα ξηρά, καὶ οὐ φοβεραὶ αἱ φρίκαι διὰ τὴν εἰς ἀλέαν ἔκκλινιν. ὀλιγοσιτία δὲ καὶ κωθωνισμὸς θέρους, τὸ μὲν ὅλως, τὸ δὲ μᾶλλον, ὁ μὲν πότος θέρους ὅλως διὰ τὴν ξηρότητα, ἡ δὲ ὀλιγοσιτία κοινὸν μὲν, μᾶλλον δὲ θέρους· ἐκθερμαίνεται γὰρ διὰ τὴν ὥραν ὑπὸ τῶν σιτίων.

Διὰ τί τῶν φαρμάκων τὰ μὲν τὴν κοιλίαν λύει, τὴν δὲ κύστιν οὐ, τὰ δὲ τὴν μὲν κύστιν λύει, τὴν κοιλίαν δὲ οὐ; ἢ ὅσα μὲν ἐστὶν ὑγρὰ τὴν φύσιν καὶ ὕδατος μεστά, ταῦτα ἂν ἦ φαρμακώδη, λύει τὴν κύστιν; ἐκεῖ γὰρ ὑφίσταται τὰ ἄπεπτα τῶν ὑγρῶν· ὑποδοχὴ γὰρ ἐστὶν ἡ κύστις τοῦ μὴ πεττομένου ὑγροῦ ἐν τῇ κοιλίᾳ, ὃ οὐ μένει, ἀλλὰ πρὶν ποιῆσαι τι ἢ παθεῖν ὑποχωρεῖ. ὅσα δὲ ἐκ γῆς τὴν φύσιν ἐστίν, [864a] ἂν ἦ φαρμακώδη, ταῦτα δὲ τὴν κοιλίαν λύει· εἰς ταύτην γὰρ ἡ φορὰ τῶν γεωδῶν. ὥστε ἂν ἦ κινητικόν, ταραττεῖ.

Διὰ τί δὲ τὰ μὲν τὴν ἄνω κοιλίαν τὰ δὲ τὴν κάτω κινεῖ, οἷον ἐλλέβορος μὲν τὴν ἄνω, σκαμμωνία δὲ τὴν κάτω, τὰ δὲ ἄμφω, οἷον ἐλατήριον καὶ τῆς θαψίας ὁ ὁπός; ἢ ὅτι τὰ μὲν ἐστὶ θερμὰ τὰ δὲ ψυχρὰ τῶν φαρμάκων τῶν τὴν κοιλίαν κινούντων, ὥστε τὰ μὲν διὰ τὴν θερμότητα εὐθὺς ἐν τῇ ἄνω κοιλίᾳ ὄντα φέρεται ἐξ αὐτῆς πρὸς τὸν ἄνω τόπον, κάκειθεν συντήξαντα μάλιστα μὲν τὰ ἀλλοτριώτατα καὶ ἥκιστα συμπεφυκότα, ἂν δὲ ἰσχυρὸν ἦ τὸ φάρμακον ἢ πλεονοδοθῇ τῆς φύσεως, ἀνάγει εἰς τὴν ἄνω κοιλίαν ταῦτά τε καὶ ἐάν τι περίπτωμα ἦ, καὶ διὰ τὴν θερμότητα ταραττον τὸ πνεῦμα πολὺ γινόμενον ὑπ' αὐτοῦ, προσιστὰν τοὺς ἐμέτους ποιεῖ. τὰ δὲ ψυχρὰ τὴν φύσιν αὐτῶν διὰ βάρος καὶ πρὶν παθεῖν τι ἢ ποιῆσαι κάτω φέρεται, κάκειθεν ὀρμῶντα τὸ αὐτὸ δρᾷ τοῖς ἄνω· κατὰ γὰρ τοὺς πόρους ἀνιόντα ἐκεῖθεν, καὶ κινήσαντα ὧν ἂν κρατήσῃ περιπτωμάτων καὶ συντηγμάτων, λαβόντα τὴν αὐτὴν ἄγει ὁδόν. ὅσα δὲ ἀμφοῖν μετέχει καὶ ἐστὶ μικτὰ τῶν φαρμακωδῶν ἐκ θερμοῦ καὶ ψυχροῦ, ταῦτα δὲ δι' ἑκατέραν τὴν δύναμιν ἀπεργάζεται ἄμφω, ὥσπερ καὶ νῦν παρασκευάζουσιν οἱ ἱατροὶ μιγνύντες ἀλλήλοις.

Διὰ τί τὰ φάρμακα καθαίρει, ἄλλα δὲ πικρότερα ὄντα καὶ στρυφνότερα καὶ τοῖς ἄλλοις τοῖς τοιούτοις ὑπερβάλλοντα οὐ καθαίρει; ἢ διότι οὐ διὰ τὰς τοιαύτας δυνάμεις καθαίρει, ἀλλ' ὅτι ἄπεπτά ἐστιν; ὅσα γὰρ δι' ὑπερβολὴν θερμότητος ἢ ψυχρότητος,

μικρὰ ὄντα τοὺς ὄγκους, ἅπεπτά ἐστι καὶ οἷα κρατεῖν ἀλλὰ μὴ κρατεῖσθαι ὑπὸ τῆς τῶν ζώων θερμότητος, εὐδιάχυτα ὄντα ὑπὸ τῶν δύο κοιλιῶν, ταῦτα φάρμακά ἐστιν. ὅταν γὰρ εἰς τὴν κοιλίαν εἰσέλθωσι καὶ διαχυθῶσι, φέρονται καθ' οὐσπερ ἡ τροφή πόρους εἰς τὰς φλέβας, οὐ πεφθέντα δὲ ἀλλὰ κρατήσαντα ἐκπίπτει φέροντα τὰ ἐμπόδια αὐτοῖς· καὶ καλεῖται τοῦτο κάθαρσις. χαλκὸς δὲ καὶ ἄργυρος καὶ τὰ τοιαῦτα ἅπεπτα μὲν ἐστὶν ὑπὸ τῆς τῶν ζώων θερμότητος, ἀλλ' οὐκ εὐδιάχυτα ταῖς κοιλίαις. ἔλαιον δὲ καὶ μέλι καὶ γάλα καὶ τὰ [864b] τοιαῦτα τῆς τροφῆς καθαίρει, ἀλλ' οὐ τῷ ποιῷ ἀλλὰ τῷ ποσῷ· ὅταν γὰρ διὰ πλῆθος ἅπεπτα γένηται, τότε καθαίρει, ἅνπερ καθαίρη. διὰ δύο γὰρ αἰτίας ἅπεπτά ἐστὶν, διὰ τὸ ποιὰ αὐτὰ εἶναι ἢ διὰ τὸ ποσά. διόπερ οὐ φάρμακόν ἐστιν οὐδὲν τῶν εἰρημένων· οὐδὲ γὰρ διὰ δύναμιν καθαίρει. στρυφνότης δὲ καὶ πικρότης συμβέβηκε τοῖς φαρμάκοις καὶ δυσωδία τῷ ἐναντίον εἶναι τῇ τροφῇ τὸ φάρμακον. τὸ μὲν γὰρ πεφθὲν ὑπὸ τῆς φύσεως, τοῦτο προσφύεται τοῖς σώμασι καὶ καλεῖται τροφή· τὸ δὲ μὴ πεφυκὸς κρατεῖσθαι, εἰσιὼν δὲ εἰς τὰς φλέβας καὶ δι' ὑπερβολὴν θερμότητος ἢ ψυχρότητος ταράττον, αὕτη δὲ φαρμάκου φύσις ἐστίν.

Διὰ τί τὸ μὲν πέπερι πολὺ μὲν ὄν τὴν κύστιν λύει, ὀλίγον δὲ τὴν κοιλίαν, ἢ δὲ σκαμμωνία πολλὴ οὖσα τὴν κοιλίαν λύει, ὀλίγη δὲ καὶ παλαιὰ τὴν κύστιν; ἢ διότι ἐκάτερον ἐκατέρας ἐστὶ κινητικώτερα; τὸ μὲν γὰρ πέπερι οὐρητικόν ἐστὶν, ἢ δὲ σκαμμωνία καθαρτικόν. τὸ μὲν οὖν πέπερι πολὺ μὲν ὄν φέρεται εἰς τὴν κύστιν καὶ οὐ διαχεῖται εἰς τὴν κοιλίαν, ὀλίγον δὲ ὄν κρατηθὲν διαλύει καὶ γίνεται φάρμακον αὐτῆς. ἢ δὲ σκαμμωνία πολλὴ μὲν οὖσα εἰς τοῦτο κρατεῖται ὥστε διαχυθῆναι, διαχυθεῖσα δὲ γίνεται φάρμακον διὰ τὴν εἰρημένην ἐν τοῖς ἀνωτέρω αἰτίαν· ὀλίγη δὲ οὖσα μετὰ τοῦ ποτοῦ ἀναπίνεται εἰς τοὺς πόρους, καὶ ταχὺ πρὶν ταράξαι καταφέρεται εἰς τὴν κύστιν, καὶ ἐκεῖ τῇ αὐτῆς δυνάμει ἀπάγει τὰ περιττώματα καὶ τὰ συντήγματα ὅσα ἐξ ἐπιπολῆς ἐστίν. ἢ δὲ πολλή, ὥσπερ εἴρηται, διὰ τὴν ἰσχὺν πολὺν χρόνον ἐμμείναςα κατάγει πολλὴν κάθαρσιν καὶ γεῶδη.

Διὰ τί τὰς αὐτὰς φλεγμασίας οἱ μὲν ψύχοντες ὑγιάζουσιν, οἱ δὲ θερμαίνοντες πέττουσιν; ἀλλ' οἱ μὲν ἀλλοτρίᾳ θερμότητι, οἱ δὲ καταψύχοντες τὴν οἰκείαν συνάγουσιν.

Διὰ τί μεταβάλλειν δεῖ τὰ καταπλάσματα; ἢ ὅτι ὥς μᾶλλον αἰσθάνηται; τὰ γὰρ συνήθη ὥσπερ ἐπὶ τῶν ἐδεσμάτων οὐκέτι φάρμακα ἀλλὰ τροφή γίνεται, οὕτω καὶ ἐπὶ τῶν τοιούτων.

Διὰ τί ὑγιεινὸν τὸ τῆς τροφῆς μὲν ὑποστέλλεσθαι, [865a] πονεῖν δὲ πλείω; ἢ ὅτι τοῦ νοσεῖν αἷτιον περιττώματος πλῆθος, τοῦτο δὲ γίνεται, ἥνικα τροφῆς ὑπερβολὴ ἢ πόνων ἔνδεια.

Διὰ τί τὰ φάρμακα καὶ τὰ πικρὰ ὡς ἐπὶ τὸ πολὺ καὶ τὰ δυσώδη καθαίρει; ἢ ὅτι ἅπαντα τὰ δυσώδη καὶ πικρὰ ἄπεπτα ἔστι; διὸ καὶ τὰ φάρμακα πικρὰ καὶ δυσώδη· τῷ γὰρ ἄπεπτα εἶναι καὶ κινητικὰ μετὰ πικρότητος φάρμακά ἐστιν. καὶ ἐὰν δοθῇ πλείω, διαφθείρει. ὅσα δέ, καὶ μικρὰ δοθῇ, διαφθαρτικά, ταῦτα οὐ φάρμακα λέγεται εἶναι ἀλλὰ θανατηφόρα. οὐδ' ὅσα μὴ τῷ ποιῶ καθαίρει, οὐκ ἔστι φάρμακα. καὶ γὰρ τῆς τροφῆς πολλὰ μὲν ταῦτο ποιεῖ, ἐὰν ποσὰ δοθῇ, οἶον γάλα, ἔλαιον, γλεῦκος· ἅπαντα δὲ ταῦτα διὰ τὸ μὴ εἶναι εὐπεπτα καθαίρει, καὶ τούτοις οἷς μὴ εὐπεπτα καθαίρει, καὶ τούτους. ἔστι γὰρ ἄλλα ἄλλοις εὐπεπτα καὶ δύσπεπτα. διὸ οὐ πᾶσι ταῦτα φαρμακώδη, ἀλλ' ἐνίοις ἴδια. ὅλως γὰρ τὸ φάρμακον δεῖ οὐ μόνον μὴ πέττεσθαι ἀλλὰ καὶ κινητικὸν εἶναι, ὥσπερ καὶ τὸ γυμνάσιον ἐξῶθεν ἦκον ἢ ἔσωθεν τῇ κινήσει ἐκκρίνει τὰ ἀλλότρια.

Διὰ τί τὰ μὲν εὐώδη οὖρητικά καὶ σπέρματα καὶ φυτά; ἢ ὅτι θερμὰ καὶ εὐπεπτα, τὰ δὲ τοιαῦτα οὖρητικά· ταχὺ γὰρ λεπτύνει ἢ ἐνοῦσα θερμότης, καὶ ἡ ὁσμὴ οὐ σωματώδης, ἐπεὶ καὶ τὰ ὁσμώδη, οἶον σκόροδα, διὰ τὴν θερμότητα οὖρητικά, μᾶλλον μέντοι συντηκτικά· θερμὰ δὲ τὰ εὐώδη σπέρματα.

Διὰ τί δεῖ πρὸς μὲν τὰ μὴ καθαρὰ καὶ φαῦλα τῶν ἐλκῶν ξηροῖς καὶ δριμέσι καὶ στρυφνοῖς χρῆσθαι φαρμάκοις, πρὸς δὲ τὰ καθαρὰ καὶ ὑγιαζόμενα ὑγροῖς καὶ μόνοις; ἢ διότι ἀπὸ μὲν τῶν μὴ καθαρῶν δεῖ ἀφαιρεῖν τι; τοῦτο δ' ἔστιν ὑγρότης ἀλλοτρία, ἣν ἀφαιρεῖν δεῖ. τὰ δηκτικά δὲ καὶ δριμέα καὶ στρυφνὰ τοιαῦτα, καὶ τὸ ξηρὸν μᾶλλον τοῦ ὑγροῦ. τὰ δὲ καθαρὰ συνεπουλώσεως δεῖται μόνον.

Διὰ τί συμφέρει πρὸς τὰ ἀπὸ φλέγματος νοσήματα λαγνεία; ἢ ὅτι τὸ σπέρμα περιττώσεως ἀπόκρισις καὶ φύσει ὁμοιον φλέγματι, ὥστε ἀφαιρουσα πολὺ φλεγματοῦδες ὠφελεῖ ἢ συνουσία. πότερον δὲ τροφήν προσφέρειν ἀρχομένῳ βέλτιον ἢ ὕστερον; ἢ ἀρχομένῳ, ὅπως μὴ προεξησθηνικότι ἢ φλεγμασία ἐπιπίπτῃ; ἢ οὖν ἀπισχναντέον εὐθύς, ἢ οὕτω προσοιστέον· ἀναλαμβάνειν χρὴ πρῶτον τοῖς ῥοφήμασι· [865b] πραότερα γὰρ καὶ λειότερα καὶ εὐτηκτότερα, καὶ ἐκδέξασθαι τὴν τροφήν ἐκ τούτου ῥαδίον ἔστιν ἀσθενεῖ σώματι. οὐ γὰρ ἐν τῇ κοιλίᾳ δεῖ παθεῖν τὰ σῖτα πρῶτον, διαχυθῆναι τε καὶ θερμανθῆναι μετὰ πόνου τῷ σώματι ταῦτα πέπονθεν.

Διὰ τί δεῖ σκοπεῖν τὰ περὶ τὸ οὖρον σημεῖα, ἀπολαμβάνοντα τὴν οὖρησιν, εἰ ἤδη πέπεπται, ἢ μὴ μᾶλλον καὶ συνεχῶς οὖροῦντα; ἢ διότι σημεῖον μὲν τοῦ πεπέφθαι, ἐὰν ἦ πυρρόν; τοῦτο δὲ γίνεται μᾶλλον διαλαμβάνουσιν. ἢ διότι ἔνοπτρον γίνεται ἅπαν μᾶλλον ὑγρὸν χρώας ὀλίγον ἢ πολὺ ὄν; ἐν μὲν γὰρ τῷ πολλῷ ὑγρῷ τὰ σχήματα ἐνορᾶται, ἐν δὲ τῷ ὀλίγῳ τὰ χρώματα, οἷον καὶ ἐπὶ τῆς δρόσου καὶ τῶν ῥανίδων καὶ ἐπὶ τῶν δακρύων τῶν ἐπὶ ταῖς βλεφαρίσι. συνεχῶς μὲν οὖν ἀφιέμενον γίνεται πλεῖον, διασπώμενον δὲ δέχεται μᾶλλον· ὥστε κἂν ἢ αὐτὸ τοιοῦτον ἤδη διὰ τὴν πέψιν, καὶ φαίνεται μᾶλλον τῆς ἀνακλάσεως γινομένης καὶ ἐνόπτρου ἔνοπτον διὰ τὴν διαίρεσιν.

ὅτι οὐ δεῖ πυκνοῦν τὴν σάρκα πρὸς ὑγείαν, ἀλλ' ἀραιοῦν· ὥσπερ γὰρ πόλις ὑγιεινὴ καὶ τόπος εὐπνους (διὸ καὶ ἡ θάλασσα ὑγιεινὴ), οὕτω καὶ σῶμα τὸ εὐπνουν μᾶλλον ὑγιεινόν. δεῖ γὰρ ἢ μὴ ὑπάρχειν μηθὲν περίττωμα, ἢ τούτου ὡς τάχιστα ἀπαλλάττεσθαι, καὶ αἰεὶ οὕτως ἔχειν τὸ σῶμα ὥστε λαμβάνον εὐθὺς ἐκκρίνειν τὴν περίττωσιν, καὶ εἶναι ἐν κινήσει καὶ μὴ ἡρεμεῖν. τὸ μὲν γὰρ μένον σήπει, ὥσπερ ὕδωρ τὸ μὴ κινούμενον, σηπόμενον δὲ νοσοποιεῖ· τὸ δὲ ἐκκρινόμενον πρὸ τοῦ διαφθαρῆναι χωρίζεται. τοῦτο οὖν πυκνουμένης μὲν τῆς σαρκὸς οὐ γίνεται (ὥσπερ γὰρ ἐμφράττονται οἱ πόροι), ἀραιουμένης δὲ συμβαίνει. διὸ καὶ οὐ δεῖ ἐν τῷ ἡλίῳ γυμνὸν βαδίζειν· συνίσταται γὰρ ἡ σὰρξ καὶ κομιδῇ ἀποσαρκοῦται, καὶ ὑγρότερον τὸ σῶμα γίνεται· τὸ μὲν γὰρ ἐντὸς διαμένει, τὸ δ' ἐπιπολῆς ἀπαλλάττεται, ὥσπερ καὶ τὰ κρέα τὰ ὀπτὰ τῶν ἐφθῶν μᾶλλον. οὐδὲ τὰ στήθη γυμνὰ ἔχοντα βαδίζειν· ἀπὸ γὰρ τῶν ἄριστα ῥυτιδιωμένων τοῦ σώματος ὁ ἥλιος ἀφαιρεῖ, ἃ ἥκιστα δεῖται ἀφαιρέσεως, ἀλλὰ μᾶλλον τὰ ἐντός. ἐκεῖθεν μὲν οὖν διὰ τὸ πόρρω εἶναι, ἐὰν μὴ μετὰ πόνου, οὐκ ἔστιν ἰδρῶτα ἀγαγεῖν, ἀπὸ τούτου δὲ διὰ τὸ πρόχειρον ῥόδιον.

Διὰ τί ποτε τοῖς χιμέτλοις καὶ τὸ ψυχρὸν ὕδωρ [866a] συμφέρει καὶ τὸ θερμόν; ἢ ὅτι τὰ χίμετλα δι' υπερβολὴν γίνεται ὑγροῦ; τὸ μὲν οὖν ψυχρὸν συνίστησι καὶ τραχύνει τὸ ὑγρὸν, τὸ δὲ θερμὸν ἐκπνευματοῖ καὶ ἔξοδον ποιεῖ τῷ πνεύματι, ἀραιοῦν τὴν σάρκα.

Διὰ τί τὸ ψυχρὸν καὶ ποιεῖ καὶ παύει τὰ χίμετλα, καὶ τὸ θερμὸν τὰ πυρίκαυστα; ἢ διὰ τὸ αὐτό; ποιεῖ μὲν συντήκοντα, παύει δὲ μᾶλλον ξηραίνοντα.

Ἐν τοῖς πυρετοῖς διδόναι δεῖ τὸ ποτὸν πολλάκις καὶ κατ' ὀλίγον. τὸ μὲν γὰρ πολὺ παραρρεῖ, τὸ δὲ ὀλίγον μὲν πολλάκις δὲ διαβρέχει καὶ εἰς τὰς σάρκας χωρεῖ. οἷα γὰρ τὰ ἐν τῇ γῇ, ἐὰν μὲν κατὰ πολὺ ἔλθῃ τὸ ὕδωρ, παραρρεῖ, ἐὰν δὲ κατ' ὀλίγον, βρέχει μόνον, τὸ αὐτὸ καὶ ἐν τοῖς πυρετοῖς. τὰ γὰρ ῥέοντα ὕδατα ἐὰν τις κατ' ὀλίγον ἄγῃ, ὁ ὀχετὸς ἐκπίνει· ἐὰν δὲ τὸ ἴσον ἀθρόον ἄγῃ, ὅπου ἂν ἄγῃ, χωρεῖ. ἔπειτα κατακεῖσθω ἀκίνητος ὡς μάλιστα, ἀκίνητος μὲν, ὅτι καὶ τὸ πῦρ φανερώς, ἐὰν τις μὴ κινῇ, καταμαραίνεται. πρὸς πνεῦμα δὲ μὴ κατακεῖσθω, διότι ὁ ἄνεμος τὸ πῦρ ἐξεγείρει καὶ ῥιπτιζόμενον τὸ πῦρ ἐξ ὀλίγου πολὺ γίνεται. περιστέλλεσθαι δὲ τούτου ἔνεκεν, ὅτι πυρὶ ἐὰν ἀναπνοὴν μὴ διδῶς, σβέννυται. καὶ τὰ ἱμάτια μὴ ἀπογυμνούσθω, ἕως ἂν νοτὶς ἐγγένηται· τὸ φανερόν γὰρ πῦρ τὸ ὑγρὸν σβέννυσιν. κατὰ ταῦτα δὲ καὶ ἐν τῇ φύσει. ἐπὶ δὲ τῶν διαλειπόντων πυρετῶν προπαρασκευάζειν δεῖ καὶ ἐκλύοντα, καὶ πυριάματα πρὸς τοὺς πόδας παρατιθέντα, καὶ περιεσταλμένον ἀναπαύεσθαι, ὅπως ὅτι θερμότητος ἧ πρό τοῦ τὴν λῆψιν εἶναι. καὶ γὰρ ὅπου πολὺ πῦρ, λύχνος οὐ δυνήσεται καίεσθαι· τὸ γὰρ πῦρ τὸ πολὺ τὸ ὀλίγον ἄγει πρὸς ἑαυτό. τούτου ἕνεκα πολὺ πῦρ ἐν τῷ σώματι παρασκευάζειν δεῖ, ὅτι ὀλίγον ὁ πυρετὸς πῦρ ἔχει, ὥστε τὸ πολὺ πῦρ τὸ ὀλίγον πρὸς ἑαυτὸ ἄγει.

Τεταρταίοις πυρετοῖς δεῖ μὴ λεπτύνειν, ἀλλὰ πῦρ ἐν τοῖς σώμασιν ἐμποιεῖν εἰσάγοντα. δεῖ δὲ καὶ τοῖς γυμνασίοις χρῆσθαι. ἡ δὲ ἡμέρα ἢ λῆψις, λουσάμενον ὕπνον μὴ ζητεῖν. διὰ δὲ τοῦτο καὶ συμφέρει θερμαίνουσα δίαιτα, ὅτι ἀσθενῆς ὁ τεταρταῖος πυρετός· εἰ γὰρ μὴ ἦν ἀσθενῆς, οὐκ ἂν τεταρταῖος ἐγένετο. ὀρθῶς; ὅπου πῦρ πολὺ, λύχνος οὐ δύναται καίεσθαι· τὸ γὰρ πολὺ τὸ ὀλίγον πρὸς ἑαυτό [866b] ἀρπάζει. τούτου δ' ἕνεκεν πολὺ πῦρ ἐν τῷ σώματι ἐμποιεῖν, ὅτι ὀλίγον ὁ πυρετὸς πῦρ ἔχει. ἔστι δὲ τὸ καθ' ἡμέραν διαίτημα τὸ μὲν πῦρ τὸ δὲ νοτίδα εἰς τὸ σῶμα εἰσάγοντα. εἰσὶ δὲ νόσοι αἱ μὲν ἀπὸ πυρός, αἱ δὲ ἀπὸ νοτίδος. ἰατρεύονται δὲ αἱ μὲν ἀπὸ πυρὸς νόσοι νοτίδι, αἱ δὲ ἀπὸ νοτίδος πυρὶ· νοτίδα γὰρ ξηραίνει.

Β. ΟΣΑ ΠΕΡΙ ΙΔΡΩΤΑ.

Διὰ τί οὔτε συντείνουσιν οὔτε κατέχουσι τὸ πνεῦμα γίνεται ἰδρώς, ἀλλὰ μᾶλλον ἀνιέσιν; ἢ ὅτι τὸ πνεῦμα κατεχόμενον πληροῖ τὰς φλέβας, ὥστε κωλύει ἐξιέναι, ὥσπερ τὸ ὕδωρ τὸ ἐκ τῶν κλεψυδρῶν, ὅταν πλήρεις οὖσας ἐπιλάβῃ τις. ὅταν δὲ ἐξέλθῃ, πολὺς γίνεται διὰ τὸ ἐν αὐτῇ ἐπιληψία ἀθροισθῆναι κατὰ μικρόν.

Διὰ τί οὐχ ἰδροῦσι τὰ ἐν θερμῷ ὕδατι μέρη, οὐδ' ἂν θερμὰ ἦ; ἢ διότι κωλύει τὸ ὕδωρ τήκεσθαι, ὃ δὲ ἰδρώς τὸ κακῶς προσφοδομημένον ἐστὶν ἐν τῇ σαρκί, ὃ κωλύει τήκεσθαι, ὅταν ἐκκρίνηται διὰ θερμότητα.

Διὰ τί ὁ ἰδρώς ἀλμυρόν; ἢ διότι γίνεται ὑπὸ κινήσεως καὶ θερμότητος, ἀποκρινούσης ὅσον ἀλλότριον ἔνεστιν ἐν τῇ προσφύσει τῆς τροφῆς πρὸς αἷμα καὶ τὰς σάρκας; τοῦτο γὰρ τάχιστα ἀφίσταται διὰ τὸ μὴ οἰκεῖον εἶναι καὶ ἔξω ἐξικμάζει. ἀλμυρὸς δ' ἐστὶ διὰ τὸ τὸ γλυκύτατον καὶ κουφότατον εἰς τὸ σῶμα ἀνηλῶσθαι, τὸ δὲ ἀλλοτριώτατον καὶ ἀπεπτότατον ἀπολύεσθαι. τὸ τοιοῦτον δὲ ἐν μὲν τῇ κάτω ὑποστάσει οὔρον καλεῖται, ἐν δὲ σαρκὶ ἰδρώς· ἅμφω δὲ ἀλμυρὰ διὰ τὴν αὐτὴν αἰτίαν.

Διὰ τί τὰ ἄνω ἰδροῦσι μᾶλλον τῶν κάτω; πότερον τὸ θερμὸν ἄνω καὶ ἀνέρχεται καὶ ἐστὶν ἄνω, τοῦτο δὲ ἄνω φέρει τὸ ὑγρόν; ἢ ὅτι πνεῦμα ποιεῖ τὸν ἰδρῶτα, τοῦτο δὲ ἐν τοῖς ἄνω; ἢ διότι ἄπεπτον ὑγρὸν ὁ ἰδρώς ἐστὶ, τοιοῦτο δὲ ἐν τοῖς ἄνω; ἢ γὰρ κρᾶσις ἄνω.

Διὰ τί τὰς χεῖρας γυμναζόμενοις μάλιστα ἰδρώς γίνεται, ἐὰν τὰ ἄλλα ὁμοιοσχημονῶμεν; ἢ διότι ἰσχύομεν μάλιστα τούτῳ τῷ τόπῳ; τούτῳ γὰρ τὸ πνεῦμα κατέχομεν τῷ ἔγγιστα τοῦ ἰσχύοντος· πονοῦντες δὲ μᾶλλον ἰσχύομεν· οὕτω δὲ ἔχοντες τὸ πνεῦμα μᾶλλον κατέχομεν. [867a] εἶτα καὶ τῇ τριβομένη συμπονοῦμεν μᾶλλον ἢ ὅταν ἄλλο μέρος τριβώμεθα· τῇ γὰρ καθέξει τοῦ πνεύματος καὶ τριβόμενοι γυμναζόμεθα καὶ τρίβοντες.

Διὰ τί ὁ ἰδρώς ἐκ τῆς κεφαλῆς ἢ οὐκ ὄζει ἢ ἥττον τοῦ ἐκ τοῦ σώματος; ἢ ὅτι εὐπνους ὁ τῆς κεφαλῆς τόπος; δηλοῖ δὲ μανὸς ὢν τῇ τῶν τριχῶν ἐκφύσει. δυσώδεις δὲ οἱ τόποι καὶ τὰ ἐν αὐτοῖς γίνεται, ὅσα μὴ εὐπνοα.

Διὰ τί οἱ γυμναζόμενοι ἐὰν διαναπαυσάμενοι παλαίωσιν, μᾶλλον ἰδροῦσιν ἢ ἐὰν συνεχῶς; ἢ διὰ τὸ ἀθροίζεσθαι

διαναπαυομένων· ἔπειτα τοῦτον τὸν ἰδρῶτα ἐξάγει ὕστερον ἢ πάλῃ. ἡ δὲ συνεχὴς ἀναξηραίνει ὥσπερ ὁ ἥλιος.

Διὰ τί μᾶλλον ἰδρουσιν, ὅταν μὴ διὰ πολλοῦ χρόνου χρῶνται ταῖς ἀφιδρώσεσιν; ἢ διότι οἱ ἰδρῶτες γίνονται οὐ μόνον δι' ὑγρότητα, ἀλλὰ καὶ διὰ τὸ τοὺς πόρους ἀνεῶχθαι μᾶλλον καὶ ἀραιὰ τὰ σώματα εἶναι; τοῖς μὲν οὖν μὴ χρωμένοις συμμεμύκασιν οἱ πόροι, τοῖς χρωμένοις δ' ἀναστομοῦνται.

Διὰ τί τοῦ ἡλίου μᾶλλον θερμαίνοντος τοὺς γυμνοὺς ἢ τοὺς ἀμπεχομένους, ἰδρουσι μᾶλλον οἱ ἀμπεχόμενοι; πότερον ὅτι τοὺς πόρους συμμύειν ποιεῖ ἐκκαίων ὁ ἥλιος; ἢ διότι τὰς ἀτμίδας ξηραίνει; ἀμπεχομένοις δὲ ταῦτα ἤττον συμβαίνει.

Διὰ τί ἰδρουσι μάλιστα τὰ πρόσωπα; ἢ ὅσα ἀραιὰ καὶ ὑγρὰ μάλιστα, διὰ δὲ τούτων ὁ ἰδρῶς διαπορεύεται. δοκεῖ δὲ πηγὴ εἶναι ἡ κεφαλὴ τοῦ ὑγροῦ· διὸ καὶ αἱ τρίχες, διὰ τὸ πολὺ ὑγρόν. ὁ δὲ τόπος ἀραιὸς καὶ ἰσχνός· δίδεισιν ἄρα κατὰ φύσιν. Διὰ τί οὐτ' ἀθρόου ὄντος τοῦ πυρὸς μᾶλλον ἰδρουσιν, οὐτ' ἐλάττονος ἀεὶ, ἀλλὰ πλείονος ἐπεισφερομένου; οἱ γὰρ ἐν τοῖς πυριατηρίοις ἰδρουσι μᾶλλον ἢ εὐθύς εἰ εἶη τοσοῦτον. ἢ ὅτι τὸ σύμμετρον ἕκαστον ἐργάζεται; οὐκοῦν εἰ τοσοῦτον ποιεῖ, τὸ πλεῖον οὐ ποιήσει πλεῖον ἢ μᾶλλον τούναντίον, ὅτι τῷ σύμμετρον εἶναι ἐργάζεται τὸ ἔργον. διὰ μὲν οὖν τοῦτο οὐχὶ πρὸς πλεῖον μᾶλλον ἰδρουσι, διὰ δὲ τὸ πρὸς ἕκαστον ἄλλην εἶναι συμμετρίαν, καὶ τὸ πεποιηκὸς μηκέτι ποιεῖν προστιθεμένου μᾶλλον. οὐ γὰρ ταῦτο προοδοποιεῖται εἰς ἕκαστον καὶ ἐπιτηδείως ἔχειν παρασκευάζει, καὶ ἤδη τοῦτο ἐργάζεται, ἀλλ' ἕτερον. τὸ μὲν οὖν ὀλίγον μᾶλλον ἢ πολὺ προωδοποίησε καὶ παρεσκεύασε τὸ σῶμα πρὸς [867b] τὸ ἰδρῶν· ἄλλης δὲ δεῖ συμμετρίας καὶ πλείονος πρὸς τὸ ποιῆσαι. τοῦτο δὲ οὐκέτι ποιεῖ ὁ πεποίηκεν, ἀλλὰ μετ' αὐτὸ ὕστερον, ἄλλο τῆς συμμετρίας γινόμενον.

Διὰ τί ἀποστλεγγισαμένοις μᾶλλον ῥεῖ ὁ ἰδρῶς ἢ ἐῶσιν ἐπιμεῖναι; πότερον διὰ τὸ καταψύχεσθαι ὑπὸ τοῦ ἔξω; ἢ ὅτι ὥσπερ πῶμα γίνεται ὁ ἔξω ἰδρῶς ἐπὶ τοῖς πόροις, ὥστε κωλύει τοῦ ἔσωθεν τὴν ὀρμήν.

Διὰ τί τὸ πῆγανον δυσώδεις τοὺς ἰδρῶτας ποιεῖ, καὶ ἔνια τῶν μύρων; ἢ ὅτι ὦν ἐν τῇ ὁσμῇ βαρύτες ἐνι, ταῦτα κεραννύμενα ταῖς περιττωματικαῖς ὑγρότησι κακωδεστέραν ποιεῖ τὴν ὁσμήν;

Διὰ τί ἰδρουμένον τὸν νῶτον μᾶλλον ἢ τὰ πρόσθεν; ἢ ὅτι ἐν μὲν τῷ πρόσθεν ἐστὶ τόπος ἐντός, εἰς ὃν ἀποχετεύεται τὸ ὑγρόν, ἐν δὲ τῷ

ὅπισθεν οὐκ ἔστιν, ἀλλ' ἔξω τὴν ἔκκρισιν ἀναγκαῖον γίνεσθαι. τὸ δ' αὐτό ἐστιν αἷτιον καὶ ὅτι τὴν κοιλίαν ἤττον ἰδροῦμεν ἢ τὸ στήθος. ἔτι δὲ ὅτι μᾶλλον διαφυλακτικόν ἐστι τοῦ ἰδρώτος τὰ νῶτα καὶ τὰ ὀπισθεν ἢ τὰ πρόσθεν διὰ τὸ μᾶλλον τὰ ἔμπροσθεν τῶν ὀπισθεν ἀποψύχεσθαι. ὅπερ ἐστὶν αἷτιον καὶ τοῦ τὰς μασχάλας ἰδροῦν τάχιστα καὶ μάλιστα· ἥκιστα γὰρ ψύχονται. ἔτι δὲ σαρκωδέστερά ἐστι τὰ περὶ τὸν νῶτον τῶν πρόσθεν, ὥστε ὑγρότερα. πλείων δὲ ὑγρότης ἐστὶν ἐν τοῖς ὀπισθεν· ὁ γὰρ μυελὸς κατὰ τὴν ράχιν ὧν ὑγρασίαν πολλὴν παρέχει.

Διὰ τί ἐφ' ἧ κατακείμεθα, οὐχ ἰδροῦμεν; ἢ ὅτι θερμὸς ὢν ὁ τόπος ᾧ ἀπτόμεθα, κωλύει διεξιέναι τὸν ἰδῶτα· ἀναξηραίνει γὰρ αὐτόν. ἔτι δὲ θλίβεται, θλιβόμενον δὲ διαχεῖται τὸ αἷμα, οὗ συμβαίνοντος καταψύχεται μᾶλλον. σημεῖον δὲ ἡ νάρκη· κατάψυξις τε γὰρ ἐστὶ τὸ πάθος, καὶ γίνεται ἐκ θλίψεως ἢ πληγῆς.

Διὰ τί οἱ καθεύδοντες μᾶλλον ἰδροῦσιν; ἢ διὰ τὴν ἀντιπερίστασιν; ἀθροισθὲν γὰρ τὸ θερμὸν ἐντὸς ἐξελαύνει τὸ ὑγρόν.

Διὰ τί τὸ πρόσωπον μάλιστα ἰδροῦσιν ἀσάρκωτατον ὄν; ἢ ὅτι εὐίδρωτα μὲν ὅσα ὑφυγρα καὶ ἀραιά, ἡ δὲ κεφαλὴ τοιαύτη; ὑγρότητα γὰρ οἰκείαν ἔχει πλείστην. δηλοῦσι δὲ αἱ φλέβες τείνουσαι ἐντεῦθεν, καὶ οἱ κατάρροι ἐξ αὐτῆς, καὶ ὁ ἐγκέφαλος ὑγρός, καὶ οἱ πόροι πολλοί. σημεῖον δὲ αἱ τρίχες ὅτι πολλοὶ οἱ πόροι εἰσὶ, περαίνοντες [868a] ἔξω. οὐκ οὖν ἐκ τῶν κάτω ὁ ἰδρὼς ἀλλ' ἐκ τῆς κεφαλῆς γίνεται. διὸ ἰδροῦσι καὶ πρῶτον καὶ μάλιστα τὸ μέτωπον· ὑπόκειται γὰρ πρῶτον· τὸ δὲ ὑγρὸν κάτω ρεῖ ἀλλ' οὐκ ἄνω.

Διὰ τί οἱ ἰδροῦντες ἐὰν ψυχθῶσιν ἢ ὕδατι ἢ πνεύματι, ναυτιῶσιν; πότερον τὸ ὑγρὸν ψυχθὲν ἔσθῃ ἀθρόον, ἔμπροσθεν οὐκ ἡρεμοῦν διὰ τὸ ρεῖν; ἢ καὶ τὸ πνεῦμα διὸν ἔξω γινόμενον ἰδρὼς διὰ τὴν ψύξιν, τοῦτο ἔσω ψυχθὲν πρὶν ἐξελθεῖν ὑγρὸν ἐγένετο, καὶ προσπεσὸν ποιεῖ τὴν ναυτίαν;

Διὰ τί ποτε ἐκ τῆς κεφαλῆς καὶ τῶν ποδῶν μάλιστα οἱ ἰδρῶτες γίνονται θερμαινομένων; ἢ ὅτι τὸ θερμαίνόμενον ἐφέλκει ἐφ' ἑαυτὸ τὸ ὑγρὸν, τὸ δὲ ὑγρὸν οὐκ ἔχει ὅπῃ καταναλίσκηται διὰ τὸ εἶναι τοὺς τόπους τούτους ὁστώδεις. ἐκπίπτει οὖν ἔξω.

Διὰ τί οἱ πονοῦντες, ὅταν παύσωνται, ἰδροῦσιν; ἔδει γάρ, εἴπερ ὁ πόνος αἷτιος, ὅταν πονῶσιν. πότερον ὅτι πονούντων μὲν ὑπὸ τοῦ πνεύματος αἱ φλέβες ἐμφυσώμεναι τοὺς πόρους συμμεμυκέναι ποιοῦσι, παυσαμένων δὲ συνίζουσιν, ὥστε δι' εὐρυτέρων γινομένων

τῶν πόρων ῥᾶον διέρχεται τὸ ὑγρόν· ἢ ὅτι πονούντων μὲν ἀποκρίνει ἢ κίνησις ἐκ τοῦ συμπεφυκότος ὑγροῦ πνεῦμα, καὶ διὰ θερμότητα τὴν ἀπὸ τῆς κινήσεως γίνεται τὸ ὑγρὸν πνεῦμα ἐπιπολῆς· ὅταν δὲ παύσῃται πονῶν, ἅμα καὶ ἡ θερμότης λήγει, καὶ ἐκ τοῦ πνεύματος πυκνουμένου ὑγρότης γίνεται, ὁ καλούμενος ἰδρῶς.

Πότερον δεῖ μᾶλλον τοῦ θέρους παρασκευάζειν τὸ ἰδροῦν ἢ τοῦ χειμῶνος; ἢ ὅτε μᾶλλον ὑγροὶ καὶ χαλεπώτεροι ἄνευ ἐπιμελείας γένοιντ’ ἄν, ὥστε τοῦ χειμῶνος ἂν δέοι μᾶλλον, ἢ μεγάλη ἡ μεταβολὴ καὶ τὰ περιττώματα οὐ συνεκπύεσσεται. πάλιν ψυχθέντος ἔτι παρὰ φύσιν τὸ τοῦ χειμῶνος. δῆλον ἄρα ὅτι τοῦ θέρους μᾶλλον. καὶ γὰρ τὰ ὑγρά σήπεται μᾶλλον ἅπαντα τοῦ θέρους· διὸ τότε δεῖ ἀπαντλεῖν. διὰ τοῦτο δὲ καὶ οἱ ἀρχαῖοι πάντες οὕτως ἔλεγον.

Διὰ τί ἀεὶ τοῦ σώματος ῥέοντος καὶ τῆς ἀπορροῆς γινομένης ἐκ τῶν περιττωμάτων οὐ κουφίζεται τὸ σῶμα, ἐὰν μὴ ἀφιδρώσῃ; ἢ ὅτι ἐλάττων ἢ ἔκκρισις. ὅταν γὰρ ἐξ ὑγροῦ μεταβάλλῃ εἰς ἀέρα, πλεῖον γίνεται ἐξ ἐλάττονος· [868b] τὸ γὰρ ὑγρὸν διακρινόμενον πλεῖον. ὥστε πλείονι χρόνῳ ἢ ἔκκρισις. διὰ τε τοῦτο καὶ ὅτι δι’ ἐλαττόνων πόρων ἢ ἔκκρισίς ἐστιν. ἔτι τὸ γλίσχρον καὶ τὸ κολλῶδες μετὰ μὲν τοῦ ὑγροῦ ἐκκρίνεται διὰ τὴν κατάμιξιν, μετὰ δὲ τοῦ πνεύματος ἀδυνατεῖ. μάλιστα δὲ τοῦτ’ ἐστὶ τὸ λυποῦν. διὸ καὶ οἱ ἔμετοι τῶν ἰδρώτων κουφίζουσι μᾶλλον, ὅτι συνεξάγουσι τοῦτο ἅτε παχύτεροι καὶ σωματωδέστεροι ὄντες. καὶ ὅτι τῇ μὲν σαρκὶ πόρρω ὁ τόπος οὗτος, ἐν ᾧ τὸ γλίσχρον καὶ τὸ κολλῶδες, ὥστε ἔργον μεταστῆσαι, τῇ δὲ κοιλίᾳ ἐγγύς· ἢ γὰρ ἐν αὐτῇ ἐγγίνεται ἢ πλησίον· διὸ καὶ δυσεξάγωγον ἄλλως.

Διὰ τί ἥττον ἰδροῦσιν ἐν αὐτῷ τῷ πονεῖν ἢ ἀνέντες; ἢ ὅτι πονοῦντες μὲν ποιοῦσι, πεπονηκότες δὲ πεποιήκασιν; εἰκότως οὖν ἐκκρίνεται πλέον· ὅτε μὲν γὰρ γίνεται, ὅτε δὲ ἐστίν. ἢ ὅτι πονούντων μὲν συγκλείονται τῆς σαρκὸς οἱ πόροι διὰ τὴν κάθεξιν τοῦ πνεύματος, ὅταν δ’ ἀνῶσιν, ἀνοίγονται; διὸ καὶ τὸ πνεῦμα κατέχοντες ἥττον ἰδροῦσιν.

Διὰ τί οὐχὶ ὅταν τροχάζωμεν, ὁ ἰδρῶς πλείων, καὶ ὅταν ἐν κινήσει ἢ τὸ σῶμα, ἀλλ’ ὅταν παύσωνται; ἢ ὅτι τότε μὲν ὥσπερ ὑπὸ τῆς χειρὸς ἢ ἄλλου τινὸς ἔστιν ὕδωρ ῥέον ἀποφρᾶξαι πανταχόθεν συναθροισζόμενον, ὅταν δὲ ἀφεθῇ, πλέον ἢ ὅσον ἐξ ἀρχῆς. ὥς δὲ ὑπὸ τῆς χειρὸς, οὕτω καὶ ὑπὸ τοῦ πνεύματος ἔστιν ἀποληφθῆναι, ὥσπερ ἐν τῇ κλεψύδρᾳ, καὶ πάλιν πρὸς τὴν κύστιν· ἀπολαμβάνει γὰρ ἐντός.

ὁμοίως οὖν πολλῆς κινήσεως οὔσης τὸ πνεῦμα ἐναπολαμβάνεται· διὸ καὶ αἱ φλέβες διατείνονται τοῦ ὑγροῦ οὐ δυναμένου ἐξιέναι. ἀπολαμβάνόμενον δὲ ἀθρόον τὸ ὑγρόν, ὅταν ἀνεθῇ τὸ πνεῦμα, ἀθρόον ἐξέρχεται.

Διὰ τί, ὅταν πίωσιν, ἤττον ἰδρουῖσιν ἐπιφαγόντες; ἢ διότι τὰ σιτία ἐπισπᾶται μὲν τὴν ὑγρότητα καθαπερεὶ σπόγγος ἐμπεσών, ἔστι δὲ κωλύσαι τὴν ὀρμὴν οὐ μικρὸν μέρος, ὥσπερ ἐν τοῖς ρεύμασι, τὸ ἐπιλαβεῖν τοὺς πόρους προσενγκάμενον τὴν τροφήν.

Διὰ τί οἱ ἀγωνιῶντες ἰδρουῖσι τοὺς πόδας, τὸ δὲ πρόσωπον οὐ; μᾶλλον γὰρ εὐλογον, ὅταν πᾶν ἰδρῶσι τὸ σῶμα, τότε μᾶλλον καὶ τοὺς πόδας· ψυχρότατος γὰρ ὁ τόπος, διὸ ἥκιστα ἰδρουῖσιν. καὶ οἱ ἱατροὶ ἐν ταῖς ἀρρωστίαις μάλιστα περιστέλλειν τοὺς πόδας παραγγέλλουσιν, ὅτι εὐψυκτοὶ εἰσιν, [869a] ὥστε ἀρχὴν ῥαδίως ῥίγους ποιοῦσι καὶ τῷ ἄλλῳ σώματι. ἢ ὅτι καὶ ἡ ἀγωνία ἐστὶ θερμότητος οὐ μετᾶστασις ὥσπερ ἐν τῷ φόβῳ ἐκ τῶν ἄνω τόπων εἰς τοὺς κάτω (διὸ καὶ αἱ κοιλίαι λύονται τῶν φοβουμένων) ἀλλ' αὐξησις θερμοῦ, ὥσπερ ἐν τῷ θυμῷ; καὶ γὰρ ὁ θυμὸς ζέσις τοῦ θερμοῦ ἐστὶ τοῦ περὶ τὴν καρδίαν· καὶ ὁ ἀγωνιῶν οὐ διὰ φόβον καὶ διὰ ψύξιν πάσχει, ἀλλὰ διὰ τὸ μέλλον.

Διὰ τί τὸ πρόσωπον ἐξερυθροὶ γίνονται, οὐχ ἰδρουῖσι δέ; ἢ διὰ τὸ μᾶλλον θερμαίνεσθαι, ὥστε τὸ μὲν ἐν τῷ προσώπῳ ὑγρὸν ξηραίνει ἢ θερμότης ἐπιπολάζουσα, τὸ δὲ ἐν τοῖς ποσὶ συντήκει διὰ τὸ ἐλάττων μὲν εἶναι, πλείων δὲ τῆς ἐμφύτου καὶ προϋπαρχούσης.

Διὰ τί καθεύδοντες ἰδρουῖσι μᾶλλον ἢ ἐγρηγορότες; ἢ ὅτι ἔσωθεν ἢ ἀρχὴ τοῦ ἰδρῶτος, θερμότερα δὲ τὰ ἐντός, ὥστε καὶ ἐκκρίνει διαχέουσα ἢ ἐντὸς θερμότης τὸ ἐντὸς ὑγρόν. ὅτι αἰεὶ ἔοικεν ἀπορρεῖν τι τοῦ σώματος, ἀλλὰ διὰ τὸ μηθὲν εἶναι πρὸς ὃ προσπίπτον ἀλίσθησεται λανθάνει. σημεῖον δέ· τὰ γὰρ κοῖλα τοῦ σώματος αἰεὶ ἰδροῖ.

Διὰ τί ἐν τοῖς πυριατηρίοις μᾶλλον ἰδρουῖσιν, ὅταν ἦ ψυχρός; ἢ ὅτι τὸ θερμὸν οὐ βαδίζει ἔξω διὰ τὴν τοῦ ψυχροῦ περίστασιν (κωλύεται γὰρ ὑπὸ τούτου), ἀλλ' ἐντὸς κατειλούμενον καὶ μένον διαλύει τὰ ἐν ἡμῖν ὑγρά, καὶ ἰδρῶτα ποιεῖ ἐξ αὐτῶν.

Διὰ τί ὠφελιμώτερός ἐστιν ὁ ἰδρῶς, κἂν ἐλάττων ἐπέλθῃ, ὁ γυμνοῦ τροχάζοντος γενόμενος ἢ ὁ ἐν ἱματίῳ; ἢ τὸ μὲν πονεῖν τοῦ μὴ πονεῖν βέλτιόν ἐστι καθόλου, καὶ ὁ ἰδρῶς δὲ ὁ μετὰ πόνου τοῦ ἄνευ πόνου βελτίων ἐστὶ, καὶ ὁ μᾶλλον δὲ μετὰ πόνου τοῦ ἤττον βελτίων;

μᾶλλον δ' ἐστὶ μετὰ πόνου ὁ γυμνοῦ τροχάζοντος γινόμενος. ἐὰν γὰρ μὴ πολλῇ συντονίᾳ τροχάσῃ, οὐ δύναται ἰδρῶσαι γυμνὸς ὢν· ἐν ἱματίῳ γὰρ κἂν πάνυ μετρίως τροχάσῃ, ταχὺ ἰδροῖ διὰ τὴν ἀπὸ τοῦ ἱματίου ἀλέαν. καὶ εὐχρύτεροι δὲ γίνονται οἱ γυμνοὶ τρέχοντες τοῦ θέρους τῶν ἐν ἱματίοις, ὅτι ὥσπερ ἅπαντες οἱ ἐν τοῖς εὐπνουστέροις τόποις οἰκοῦντες εὐχρύτεροί εἰσι τῶν ἐν τοῖς καταπεπνιγμένοις οἰκούντων, οὕτω καὶ αὐτὸς αὐτοῦ ὁ ἄνθρωπος, ὅταν ὥσπερ ἐν εὐπνοίᾳ ᾗ, τότε εὐχρύτερός ἐστιν ἢ ὅταν καταπεπνιγμένος ᾗ καὶ περιεχόμενος ὑπὸ τινος ἀλέας πολλῆς, ὃ συμβαίνει μᾶλλον [869b] τῷ ἐν ἱματίῳ τρέχοντι. διὰ ταῦτα δὲ καὶ οἱ πολλὸν χρόνον καθεύδοντες ἀχρύτεροί εἰσι τῶν μέτριον χρόνον καθευδόντων· καταπέπνικται γὰρ καὶ ὁ καθεύδων.

Διὰ τί οἱ ἀγωνιῶντες ἰδροῦσι τοὺς πόδας, τὸ δὲ πρόσωπον οὐ, ἐν τῷ ἄλλῳ βίῳ ἰδρύντων ἡμῶν μάλιστα μὲν τὸ πρόσωπον, ἥκιστα δὲ τοὺς πόδας; ἢ ὅτι ἡ ἀγωνία φόβος τίς ἐστι πρὸς ἀρχὴν ἔργου, ὁ δὲ φόβος κατάψυξις τῶν ἄνω· διὸ καὶ ὠχρίῳσι τὰ πρόσωπα οἱ ἀγωνιῶντες. κινοῦνται δὲ καὶ σκαίρουσι τοῖς ποσίν· ποιοῦσι γὰρ τοῦτο οἱ ἀγωνιῶντες καὶ καθάπερ γυμνάζονται· διόπερ εἰκότως ἰδροῦσι ταῦτα οἷς πονοῦσιν. καὶ τρίβουσι δὲ τὰς χεῖρας καὶ συγκαθιάσι καὶ ἐκτείνονται καὶ ἐξάλλονται καὶ οὐδέποτε ἡρεμοῦσιν· ὀρμητικοὶ γάρ εἰσι πρὸς τὸ ἔργον διὰ τὸ τὸ θερμὸν αὐτῶν ἡθροῖσθαι εἰς τὸν περὶ τὸ στήθος τόπον ὄντα εὐσωματωδέστερον· ὅθεν πάντῃ διάττοντος αὐτοῦ τε καὶ τοῦ αἵματος συμβαίνει πυκνὴν καὶ ποικίλῃν γίνεσθαι κίνησιν. μάλιστα δὲ ἰδροῦσι τοὺς πόδας, ὅτι οὗτοι μὲν συνεχῶς πονοῦσι, τὰ δὲ ἄλλα μέρη τοῦ σώματος ἀναπαύσεως τυγχάνει ταῖς τῶν σχημάτων καὶ κινήσεων μεταβολαῖς.

Διὰ τί ἐν τοῖς πυριατηρίοις οὔτε ἀθρόου τοῦ πυρὸς ὄντος μᾶλλον ἰδροῦσιν, οὔτ' ἐλάττονος αἰετινομένου, ἀλλὰ πλείονος; ἐπεισφερομένου γὰρ τὰ πυριατήρια μᾶλλον ἰδροῦσιν ἢ εἴπερ εὐθύς ἐξ ἀρχῆς τοσοῦτον ἦν τὸ πῦρ. ἢ τὸ μὲν πολὺ ἐκ πρώτης ξηρὰν λαμβάνον τὴν ἐπιπολῆς σάρκα καὶ δέρμα καίει καὶ ὀστρακοῖ, γενομένη δὲ τοιαύτῃ τέγγει τοὺς ἰδρῶτας. τὸ δὲ ὀλίγον μᾶλλον τὴν σάρκα ἀνιέν αὐτὴν τε ἀραιοῖ, καὶ τὰ ἐντὸς καθάπερ ὀργάζει πρὸς τὴν διάκρισιν καὶ ἐξαγωγήν. οὕτω δ' ἐχούσης αὐτῆς, ἐπεισενεχθὲν πλέον πῦρ καὶ εἰσδυόμενον εἰς βάθος τῆς σαρκὸς δι' ἀραιότητα ἐξατμίζει τε τὰ προμαλαχθέντα ὑγρά, καὶ τὰ λεπτὰ αὐτῶν ἀποκρῖνον ἐξάγει μετὰ τοῦ πνεύματος.

Πότερον δεῖ μᾶλλον τοῦ θέρους παρασκευάζειν τὸ ἰδροῦν ἢ τοῦ χειμῶνος; ἢ τοῦ μὲν χειμῶνος συστελλόμενον ἐντὸς τὸ θερμὸν ἐκπέττει καὶ πνευματοῖ τὰ ἐν ἡμῖν ὑγρά, διὸ πάντων αὐτῶν ἢ τῶν πλείστων ἀναλίσκομένων οὐδὲν δεῖται συγγενοῦς ἀποκρίσεως. τοῦ δὲ θέρους δι' ἀραιᾶς τῆς σαρκὸς ἐκπίπτοντος τοῦ θερμοῦ ἦττον πέττεται τὰ ἐν ἡμῖν ὑγρά· διὸ δεῖται ἀπαντλήσεως. ἐμμείναντα γὰρ διὰ τὴν [870a] ὥραν σήπεται καὶ νοσοποιεῖ. σήπεται γὰρ πᾶν τὸ σηπόμενον ὑπ' ἄλλοτρίου θερμοῦ, ὑπὸ δὲ τοῦ οἰκείου πέττεται. ἐν μὲν οὖν τῷ θέρει τὸ ἀλλότριον ἰσχύει, διὸ σήπεται πάντα μᾶλλον ἐν αὐτῷ, ἐν δὲ τῷ χειμῶνι τὸ οἰκεῖον, διὸ οὐ σήπει ὁ χειμῶν.

Διὰ τί τῶν ἰδρώτων γινομένων ὑπὸ τῆς ἐντὸς θερμασίας ἢ ὑπὸ τῆς ἐκτὸς προσπιπτούσης, πρὸς ἐνίων ἰδρώτων φρίττομεν; ἢ διότι ὑπὸ μὲν τῆς ἐντὸς θερμασίας ὅταν ἐκπίπτωσιν ἐκ πολλοῦ τόπου εἰς ὀλίγον, συστελλομένοις πρὸς τὴν περιοχὴν παντελῶς τὰς τοῦ θερμοῦ περιόδους ἀποφράττουσιν, εἴτα ἡ φρίκη ἐγγίνεται; ἔτι τῆς σαρκὸς παντελῶς διαβρόχου γινομένης καὶ τοῦ θερμοῦ διεξιόντος. ἢ δὲ ἐκτὸς θερμασία προσπίπτουσα ἀραιοῖ τὸν χρῶτα πρῶτον· εἴτα τὸ ἐντὸς τῆς φύσεως θερμὸν ἀποκρινάμενον τὴν φρίκην ἐποίησεν.

Διὰ τί τῶν ἰδρώτων οἱ θερμοὶ κρίνονται βελτίους εἶναι τῶν ψυχρῶν; ἢ ὅτι πᾶς μὲν ἰδρῶς περιττώματός τινος ἔκκρισις ἐστίν, εἰκὸς δὲ τὸ μὲν ὀλίγον περίττωμα ἐκθερμαίνεσθαι, τὸ δὲ πλεῖον μὴ ὁμοίως, ὥστε ὁ ψυχρὸς ἰδρῶς πολλοῦ περιττώματος ἂν εἴη σημεῖον· διὸ καὶ μακροτέρας τὰς νόσους δηλοῖ.

Διὰ τί τῶν ἰδρώτων διὰ θερμασίαν γινομένων πρὸς τὸ πολὺ πῦρ ἦττον ἰδροῦμεν; ἢ διότι ἦτοι σφόδρα θερμαινομένου τοῦ σώματος εἰς πνεύματα ὑγρά διαλύεται, ἢ ἐκπίπτοντος τοῦ ὑγροῦ καὶ ταχὺ περιξηραινομένου τὴν αἴσθησιν οὐ λαμβάνομεν;

Διὰ τί τοῦ ἡλίου μᾶλλον θερμαίνοντος, ἐὰν μηδὲν περίβλημα ἔχωμεν, ἰδρῶτες γίνονται τοῖς ἱματίοις περιστελλομένοις; καὶ περὶ τούτου ταῦτα ἐροῦμεν τῷ προτέρῳ.

Διὰ τί τῶν ὀξειῶν κινήσεων μᾶλλον θερμαίνειν δοκουσῶν, τῶν δὲ νοθρῶν ἦττον, αἱ πρὸς τὸ σιμὸν πορεῖαι νοθρότεραι οὔσαι ἰδρῶτάς τε μᾶλλον ἐκκρίνουσι καὶ τὸ πνεῦμα προσιστᾶσιν, ὥς θερμαίνουσαι μᾶλλον τῶν κατάντων; ἢ ὅτι τοῖς βάρεσιν εἰς τὸ κάτω φέρεσθαι κατὰ φύσιν ἐστίν, εἰς δὲ τὸ ἄνω παρὰ φύσιν. ἢ οὖν τοῦ θερμοῦ φύσις ἢ φέρουσα ἡμᾶς πρὸς μὲν τὰ κατάντη οὐθὲν συμπονεῖ, πρὸς δὲ τὰ σιμὰ φορτηγοῦσα διατελεῖ. ὥστε διὰ μὲν τὴν τοιαύτην

κίνησιν ἐκθερμαίνεται, καὶ μᾶλλον τοὺς ἰδρῶτας ἐκκρίνει, καὶ τὸ πνεῦμα προσίστησιν. συμβάλλεται δέ τι [870b] ἐν ταῖς πορείαις καὶ ἡ τοῦ σώματος σύγκαμψις πρὸς τὸ μὴ εὐθυπορεῖν τὸ πνεῦμα προσιστᾶσα.

Διὰ τί τῶν ἰδρώτων γινομένων, ὅσῳ ἂν ἐπιβάλληται τις μᾶλλον, οὐχ οἱ τὰ πλεῖστα τῶν ἱματίων ἐπιβαλλόμενοι ἰδροῦσιν; καὶ περὶ τούτου ταῦτα ἐροῦμεν τῷ ἐπάνω.

Διὰ τί τῶν σωμάτων ξηροτέρων ὄντων τοῦ θέρους ἢ τοῦ χειμῶνος ἰδρωτικωτέρως διακείμεθα τοῦ θέρους; ἢ ὅτι τοῦ μὲν θέρους ἀραιῶν τῶν σωμάτων ὄντων τὸ τῆς φύσεως θερμὸν οὐ πολλὸν κατέχεται; διαλύει οὖν τὰ ὑγρά εἰς πνεῦμα. τοῦ δὲ χειμῶνος πεπυκνωμένων ἐκτὸς τῶν σωμάτων, πολλὸν κατειλημμένον τὸ τῆς φύσεως θερμὸν εἰς πνεῦμα οὐ διαλύει τὰ ὑγρά. ἔτι δὲ καὶ τοῦ μὲν θέρους πολλὸν προσφερόμεθα τὸ ὑγρὸν, τοῦ δὲ χειμῶνος τούναντίον.

Διὰ τί οἱ ἀπὸ τοῦ αὐτομάτου γινόμενοι τοῖς ὑγιαίνουσιν ἰδρῶτες φαυλότεροι δοκοῦσιν εἶναι τῶν ὑπὸ τῶν πόνων; ἢ ὅτι οἱ μὲν πόνοι ἀπαντλοῦντες ἀεὶ τὸ περιττεῦον ὑγρὸν ξηροτέραν τὴν σάρκα παρασκευάζουσιν, ὥστε τὰς κοιλίας τῶν πόρων ὑγιεινὰς εἶναι καὶ τῇ τοῦ θερμοῦ ἡθίσει μηδεμίαν ἔμφραξιν γίνεσθαι, οἱ δ' αὐτόματοι μὲν προσαγορευόμενοι ἰδρῶτες, γινόμενοι δ' ἐξ ἀνάγκης, ὅταν ὑπὸ πλείονος ὑγρασίας συγχεομένων τῶν τῆς φύσεως πόρων τὰ θερμὰ μὴ παντελῶς καταλαμβάνηται, ἀλλ' ἔτι ἀπομάχεσθαι καὶ ἐκκρίνειν αὐτὸ δύνηται, εὐλόγως νόσου σημεῖα φαίνεται. τότε γὰρ ὑπὸ πλείονος ὑγρασίας ἢ τοῦ συμμέτρου κατὰ φύσιν ψύχεται, ἢ τε σὰρξ δίομβρος γενομένη τὴν κακίστην πρὸς ὑγίαν διάθεσιν λαμβάνει.

Διὰ τί τοῦ χειμῶνος ἰδρῶτες ἥσσον γίνονται, καὶ ἡμεῖς οὐχ ὁμοίως παρασκευάζειν βουλόμεθα, ὑγροτέρων ὄντων τῶν σωμάτων τοῦ χειμῶνος; ἢ ἥσσον μὲν ἰδροῦμεν, ὅτι τὰ ὑγρά τοῦ χειμῶνος πέπηγε καὶ συνέστηκε σφόδρα· δυσδιαλυτώτερα οὖν. οὐχ ὑπολαμβάνομεν δὲ δεῖν ἰδρωτοποιεῖσθαι τοῦ χειμῶνος, διότι ἡ τοιαύτη διάθεσις ὑγιεινή, ὁ δὲ τοὺς ἰδρῶτας ἐμποιῶν τήκει καὶ συγχεῖ τὴν ἑξίν· ἔτι τε καὶ ἀραιοτέραν τοῦ προσήκοντος ἐμποιῶν τό τε ἐντὸς θερμὸν ἀποκρίνων ἔλαττον ποιεῖ, ὥστε μὴ ὁμοίως δύνασθαι τῷ περιέχοντι ψυχρῷ ἀντιτετάχθαι· τό τε ἐκτὸς ὑγρὸν ῥαδιέστερον παρεμπεσεῖται τοῖς σώμασιν, ἀραιῶν τῶν πόρων διὰ τὰς ἰδρωτοποιίας ὄντων.

Γ. ΟΣΑ ΠΕΡΙ ΟΙΝΟΠΟΣΙΑΝ ΚΑΙ ΜΕΘΗΝ.

[871a] Διὰ τί οἱ μεθύοντες θερμοῦ ὄντος τοῦ οἴνου δύσριγοί εἰσι, καὶ τάχιστα ἀλίσκονται ὑπὸ πλευρίτιδος καὶ τῶν τοιούτων; ἢ διότι πολὺ ὑγρὸν ἐὰν ψυχθῇ, πολὺ ψυχρὸν γίνεται, ὥστε κρατεῖν τῆς φυσικῆς θερμότητος; γίνεται γὰρ ὁμοιον ὥσπερ ἂν εἰ ἐσθῆς βεβρεγμένη εἴη ὑγρῷ ψυχρῷ, οὕτως ἡ σὰρξ ἐνδοθεν.

Διὰ τί οὐχ οἱ σφόδρα μεθύοντες παροινοῦσιν, ἀλλ' οἱ ἀκροθώρακες μάλιστα; ἢ ὅτι οὐθ' οὕτως ὀλίγον πεπώκασιν ὥστε ὁμοίως ἔχειν τοῖς νήφουσιν, οὐθ' οὕτως ὥστε διαλύεσθαι, ὅπερ πάσχουσιν οἱ πολὺ πεπωκότες; ἔτι οἱ μὲν νήφοντες μᾶλλον ὀρθῶς κρίνουσιν, οἱ δὲ σφόδρα μεθύοντες οὐδ' ἐγχειροῦσι κρίνειν· οἱ δὲ ἀκροθώρακες κρίνουνσι μὲν διὰ τὸ μὴ σφόδρα μεθεῖν, κακῶς δὲ διὰ τὸ μὴ νήφειν, καὶ ταχὺ τῶν μὲν καταφρονοῦσιν, ὑπὸ τῶν δὲ ὀλιγωρεῖσθαι δοκοῦσιν.

Διὰ τί μᾶλλον κραιπαλῶσιν οἱ ἀκρατέστερον πίνοντες ἢ οἱ ὅλως ἄκρατον; πότερον διὰ τὴν λεπτότητα ὁ κεκραμένος μᾶλλον εἰσδύεται εἰς πλείους τόπους καὶ στενωτέρους, ὁ δὲ ἄκρατος ἤττον, ὥστε δυσεξαγωγότερος ὁ κεκραμένος; ἢ διότι ἐλάττω πίνουσιν ἄκρατον διὰ τὸ μὴ δύνασθαι, καὶ ἀπεμοῦσι μᾶλλον; ἔτι δὲ συμπέττει τὰ λοιπὰ θερμότερος ὢν, καὶ αὐτὸς αὐτόν· ὁ δὲ ὑδαρῆς τοῦναντίον.

Διὰ τί τῶν οἰνοφλύγων τὸ σπέρμα οὐ γόνιμον ὥς ἐπὶ τὸ πολὺ; ἢ ὅτι ἡ κρᾶσις τοῦ σώματος ἐξύγρानται; τὰ δὲ ὑγρά σπέρματα οὐ γόνιμα, ἀλλὰ τὰ συνεστῶτα καὶ πάχος ἔχοντα.

Διὰ τί οἱ οἰνόφλυγες τρέμουσι, καὶ μᾶλλον ὅσῳ ἂν ἀκρατοποιῶσιν; ἔστι δὲ ὁ μὲν οἶνος θερμαντικόν, ὁ δὲ τρόμος γίνεται μάλιστα ἀπὸ ψυχροῦ, διὸ οἱ ῥιγῶντες μάλιστα τρέμουσιν. πολλοῖς δ' ἤδη χρωμένοις μόνον ἀκράτῳ τροφῆς χάριν τρόμοι ἰσχυροὶ συνέβησαν, ὥστε ἀπορρίπτειν τοὺς θλίβοντας, καὶ τῷ θερμῷ ὕδατι λουόμενοι ἀναισθητῶς εἶχον. ἢ ὅτι γίνεται μὲν ὁ τρόμος διὰ κατάψυξιν, γίνεται δὲ ἡ περισταμένου ἐντὸς τοῦ θερμοῦ διὰ τὸ ἐκτὸς ψυχρός, οἶον τοῦ χειμῶνος, ἢ σβεννυμένου τοῦ κατὰ φύσιν θερμοῦ, σβεννυμένου μὲν τῷ ἐναντίῳ, ἢ διὰ χρόνον, οἶον γῆρας, ἢ τῇ τοῦ ἄλλοτρίου θερμοῦ ὑπερβολῇ, ὃ συμβαίνει τῷ ἐν τῷ ἡλίῳ ἢ πυρὶ καιομένῳ. συμβαίνει δὲ τοῦτο καὶ τοῖς τῷ ἀκράτῳ οἴνῳ χρωμένοις. ὢν γὰρ θερμός, ὅταν ὑπερτείνηται [871b] δυνάμει τῇ τοῦ σώματος

οἰκείᾳ θερμότητι μινγνύμενος, ἀποσβέννυσιν αὐτό· σβεσθέντος δὲ καὶ ψυχθέντος τοῦ σώματος συμβαίνει τοὺς τρόμους γίνεσθαι. ἔστι δὲ καὶ παρὰ πάντα τὰ εἰρημένα ἄλλος τρόπος καταψύξεως. ἀναιρεθείσης δὲ τῆς ὕλης, ἣ τὸ θερμὸν ἐκάστω τρέφεται, συμβαίνει καὶ τὸ θερμὸν φθείρεσθαι. τοῦτο δὲ ἐπὶ μὲν τῶν ἀψύχων ἐπὶ τοῦ λύχνου ἐστὶ φανερόν (τοῦ γὰρ ἐλαίου ἀναλωθέντος συμβαίνει σβέννυσθαι τὸ φῶς), ἐπὶ δὲ τῶν ἐμψύχων τό τε γῆρας ταῦτο ποιεῖ τοῦτο καὶ τῶν νόσων αἱ μακραὶ καὶ συντηκτικαί. ἀναιρουμένης γὰρ ἡ λεπτυνομένης τῆς τοῦ θερμοῦ τροφῆς ἐκλύειν αὐτὸ συμβαίνει. ὑγρῷ μὲν γὰρ τρέφεται τὸ θερμὸν, τούτῳ δὲ οὐ τῷ τυχόντι, ἀλλὰ λείῳ καὶ πλείονι. διὸ τοῖς νοσοῦσι τὰς εἰρημένας νόσους καὶ πρεσβυτέροις φθειρομένου τοῦ τοιούτου καὶ ἀλλοιουμένου (δριμὺ γὰρ καὶ αὐχμηρὸν ἀντὶ λείου καὶ λιπαροῦ γίνεται) συμβαίνει ἐκλείπειν αὐτό. σημεῖον δὲ τῶν εἰρημένων ἐστὶν αἱ γινόμεναι βοήθειαι τοῖς μαράνσει τὸν βίον ἐκλείπουσιν· ὅ τι γὰρ ἂν ἐπιστάξῃ τις αὐτοῖς τῶν τροφωδῶν ὑγρῶν, προσαναφέρεσθαι συμβαίνει τὸ δὲ ὀπτικὸν αὐτῶν, ὡς τῇ τοῦ τοιούτου ἐκλείπει γινομένης τῆς διαλύσεως. ἔοικε δὲ τοῖς ἀκρατοποτοῦσι τοῦτ' εἶναι αἷτιον. ὦν γὰρ θερμὸς ὁ οἶνος μετὰ τῆς φύσει ὑπαρχούσης θερμότητος μᾶλλον ἀναλίσκει τὰ ἐν τῷ σώματι ὑπάρχοντα ἐφόδια τῷ οἰκείῳ θερμῷ. διὸ συμβαίνει τοὺς μὲν ὑδρωπικοὺς αὐτῶν γίνεσθαι, τοὺς δὲ ῥευματικούς, τοὺς δὲ εἰς τὴν κοιλίαν. τὰ τε γὰρ λοιπὰ αὐτοῖς ὑγρὰ δριμέα ἐστὶ, καὶ τὰ εἰσιόντα δι' ἀσθένειαν τοῦ οἰκείου θερμοῦ ἀπαλὰ ὄντα οὐ παχύνεται. ἀσθενὲς δὲ ἐστὶ τὸ θερμὸν τῷ τὴν ὕλην εἶναι τοιαύτην ἐν ᾧ ἔτι σώζεται, καθάπερ τὸ καλάμινον πῦρ· καὶ γὰρ τοῦτο διὰ τὴν τῆς ὕλης ἀσθένειαν ἀσθενέστερόν ἐστι τοῦ ξυλίνου.

Διὰ τί οἱ μεθύοντες θερμοῦ ὄντος τοῦ οἴνου δύσριγοί εἰσι, καὶ τάχιστα ἀλίσκονται ὑπὸ πλευρίτιδος καὶ τῶν τοιούτων νόσων; ἢ ὅτι τὸ πολὺ ὑγρὸν ἔαν ψυχθῇ, πολὺ ψυχρὸν γίνεται, ὥστε κρατεῖν τῆς φυσικῆς θερμότητος, πάντα δὲ τὰ ὑγρότερα θερμότερά ἐστι τὴν φύσιν. σημεῖον δέ· θερμαίνεται μὲν γὰρ τοῖς ἐκτός, ὑγραίνεται δὲ οὐ. εἰ δ' ἥττον ἐστὶ θερμά, καὶ ἀπολείπει δῆλον ὅτι θάπτον αὐτὰ ἡ θερμότης ἢ ὑγρότης, ὥστε λειφθέντων ψυχρῶν ὑγρῶν [872a] εἰκότως ῥιγοῦσιν τε μᾶλλον οἱ μεθύοντες καὶ τὰ τοῦ ῥίγους οἰκεία πάσχουσι πάθη.

Διὰ τί οἱ μὲν παῖδες θερμοὶ ὄντες οὐ φίλοινοί εἰσι, Σκύθαι δὲ καὶ οἱ ἄνδρες οἱ ἀνδρεῖοι θερμοὶ ὄντες φίλοινοι; ἢ ὅτι οἱ μὲν θερμοὶ

ὄντες καὶ ξηροὶ (ἢ γὰρ τοῦ ἀνδρὸς ἕξις τοιαύτη), οἱ δὲ παῖδες ὕγροὶ καὶ θερμοί. ἢ δὲ φιλοποσία ἐστὶν ἐπιθυμία ὕγρου τινός. ἢ οὖν ὕγρότης κωλύει διψητικούς εἶναι τοὺς παῖδας· ἔνδεα γὰρ τις ἐστὶν ἢ ἐπιθυμία.

Διὰ τί μεθύοντες μᾶλλον διαισθανόμεθα τὰ ἄλυκὰ καὶ τὰ μοχθηρὰ ὕδατα, νήφοντες δὲ ἤττον; ἢ ὅτι τὸ οἰκεῖον ὑπὸ τοῦ οἰκείου ἐστὶν ἀπαθές, καὶ τὸ ὁμοίως διακείμενον, τὰ δὲ ἐναντία τῶν ἐναντίων ἐστὶν αἰσθητικώτατα. ὁ μὲν οὖν μεθύων γλυκεῖς ἐν αὐτῷ χυμοὺς ἔχει (τοιοῦτο γὰρ ὁ οἶνος δοκεῖ), καὶ τῶν φαύλων χυμῶν αἰσθητικώτερός ἐστιν, ὁ δὲ νήφων δριμεῖς καὶ ἄλυκούς. τῆς τροφῆς οὖν πεπεμμένης οἱ περιττωματικοὶ ἐπιπολάζουσιν. οὗτοί τε οὖν εἰσὶν ἀπαθεῖς ὑπὸ τῶν ὁμοίων, καὶ τὸν ἔχοντα ποιοῦσιν.

Διὰ τί τοῖς μεθύουσι σφοδρὰ κύκλω πάντα φαίνεται φέρεσθαι, καὶ ἤδη ἀπτομένης τῆς μέθης ἀθρεῖν τὰ πόρρω οὐ δύνανται; διὸ καὶ σημεῖον τῆς μέθης αὐτὸ ποιοῦνται τινες. ἢ ὅτι κινεῖται ὑπὸ τῆς θερμότητος τοῦ οἴνου ἢ ὄψις πυκνάκις; διαφέρει οὖν οὐθὲν τὴν ὄψιν κινεῖν ἢ τὸ ὀρώμενον· ταῦτο γὰρ ποιεῖ πρὸς τὸ φαίνεσθαι τὰ εἰρημένα. ἐπεὶ δὲ καὶ περὶ τὰ πλησίον ὄντα διαμνύδεσθαι τὴν ὄψιν συμβαίνει τῶν μεθυόντων, καὶ περὶ τὰ πόρρω μᾶλλον εἰκὸς ταῦτα πᾶσχειν. διόπερ ἐκεῖνα μὲν ὅλως οὐχ ὁράται, τὰ δ' ἐγγὺς οὐκ ἐν ᾧ τόπῳ ἐστὶν ὁρᾶ. κύκλω δὲ φαίνεται φέρεσθαι, καὶ οὐκ ἐγγὺς καὶ πόρρω, ὅτι εἰς μὲν τὸ πόρρω διὰ τε τὴν κύκλω κίνησιν ἀδυνατωτέρα ἐστὶ φέρεσθαι ἢ ὄψις. ἅμα γὰρ τὰναντία ποιεῖν οὐ ράδιον. ἔστι δὲ ἢ μὲν πόρρω ἐπιθυμία σφοδρά, ἢ δὲ κύκλω ἐν ᾧ τοῦνομα σημαίνει σχήματι. διὰ τε οὖν τὰ εἰρημένα πόρρω οὐ φέρεται· καὶ εἰ φέροιτο τὸ ἐγγὺς καὶ πόρρω, οὐκ ἂν ταῦθ' ὀρώη. ἀπολείποι γὰρ ἂν ἐν θατέρῳ χρόνῳ αὐτῶν τὸ ὀρώμενον ἐν ταῦτῳ τόπῳ, ἀπολείπων δὲ οὐκ ἂν ὀρώη. κύκλω δὲ φέρεται διὰ τὸ ὑπάρχον σχῆμα τῆς ὄψεως. ἔστι γὰρ κῶνος, οὗ ἢ βάσις κύκλος, ἐν ᾧ κινουμένη ὁρᾶ μὲν τοῦτο διὰ [872b] τὸ μηδέποτε ἀπολείπειν αὐτό, διέγυσται δὲ τῷ τόπῳ διὰ τὸ μὴ τὴν αὐτὴν ὄψιν ἐπιβάλλειν ἐπ' αὐτό. ταῦτόν γὰρ ἂν ἦν ἢ τοῦτο πρὸς τὴν ὄψιν κινεῖν ἢ τὴν ὄψιν πρὸς τοῦτο.

Διὰ τί τοῖς μεθύουσιν ἐνίστε πολλὰ φαίνεται τὸ ἐν ὀρώσιν; ἢ καθάπερ εἴρηται, κινουμένης τῆς ὄψεως συμβαίνει μηθένα χρόνον τὴν αὐτὴν ἐπὶ ταυτοῦ ἡρεμεῖν ὄψιν; τὸ δ' ἐν ταῦτῳ χρόνῳ ἐτέρως ὀρώμενον ὀψιαίτερον εἶναι δοκεῖ· ἀφῇ γὰρ ὄψεως ὁράται τὸ ὀρώμενον, ἅπτεσθαι δὲ πλείοσιν ἅμα τοῦ αὐτοῦ ἀδύνατον. ὄντος δὲ

ἀναισθήτου τοῦ μεταξύ χρόνου, ἐν ᾧ ἡ ὄψις ἤπτετο καὶ παρήλλαττε τὸ ὀρώμενον, εἷς εἶναι δοκεῖ χρόνος ἐν ᾧ τε ἤπται καὶ παρήλλαχεν· ὥστ' ἐν τῷ αὐτῷ χρόνῳ ταύτου πλειόνων ἀπτομένων ὄψεων πλείω δοκεῖ εἶναι τὰ ὀρώμενα, διὰ τὸ ταῦτα κατὰ τὸν αὐτὸν τρόπον ἀδύνατον εἶναι ἅπτεσθαι.

Διὰ τί οἱ μεθύνοντες ἀφροδισιάζουσιν ἀδύνατοί εἰσιν; ἢ ὅτι δεῖ τινὰ τόπον ἐκθερμανθῆναι μᾶλλον τοῦ ἄλλου σώματος, τοῦτο δὲ ποιεῖν διὰ τὸ πλῆθος τῆς ἐν ὄλῳ τῷ σώματι θερμασίας ἀδυνατοῦσιν· ἀποσβέννυται γὰρ τὸ ὑπὸ τῆς κινήσεως γινόμενον θερμὸν ὑπὸ τοῦ περιέχοντος μᾶλλον, ὅτι πολὺ ἐστὶν ἐν αὐτοῖς τὸ ὑγρὸν καὶ ἄπεπτον. ἔτι δὲ τὸ σπέρμα ἐκ τροφῆς, τροφή δὲ πᾶσα πέττεται· ἥς πληρωθέντες ὀρμητικοί εἰσι πρὸς τὰ ἀφροδίσια. διὸ καὶ κελεύουσιν τινες πρὸς τὴν πρᾶξιν τὴν τοιαύτην ἀριστᾶν μὲν πολὺ, δειπνεῖν δὲ ὀλίγον, ἵνα ἢ αὐτοῖς ἐλάττω τὰ ἄπεπτα τῶν πεπεμμένων.

Διὰ τί ὁ γλυκὺς καὶ ἄκρατος καὶ ὁ κυκεὼν μεταξύ διαπινόμενοι ἐν τοῖς πότοις νήφουσιν; καὶ διὰ τί ἤττον μεθύσκονται ταῖς μεγάλαις κωθωνιζόμενοι; ἢ πάντων τὸ αὐτὸ αἰτίον ἐστίν, ἡ παράκρουσις τοῦ ἐπιπολῆς θερμοῦ; τὸ γὰρ μεθύειν ἐστίν, ὅταν ἢ τὸ θερμὸν ἐν τοῖς περὶ τὴν κεφαλὴν τόποις.

Διὰ τί τοῦ γλυκέος ἐπιπολαστικοῦ ὄντος, ἐάν τις μεθύων ἤδη ἐπιπῇ γλυκύ, καταπέττεται ὁ ἐνυπάρχων οἶνος καὶ ἤττον ἐνοχλεῖ; ἢ ὅτι τὸ μὲν γλυκὺ λεαντικόν τέ ἐστι καὶ γλίσχρον (ἐμφράττει οὖν τοὺς πόρους), τὸ δὲ αὐστηρὸν τραχυντικόν· καὶ τὸ μὲν εὐπετῇ ποιεῖ τῷ θερμῷ τὴν ἀναφοράν, ὁ δὲ γλυκὺς στέγει αὐτό, τοὺς πόρους ἐμφράττων. [873a] ὅτι δὲ τῶν ἄνω θερμανθέντων ἐστὶν ἡ μέθη, εἴρηται. ἔτι δὲ ὁ μὲν γλυκὺς ἄνοδος, ὁ δὲ αὐστηρὸς οὐ· ὁσμή δὲ πᾶσα βαρύνει κεφαλὴν.

Διὰ τί ἀπὸ τοῦ κεκραμένου μὲν ἀκρατεστέρου δὲ ἔωθεν μᾶλλον πονοῦσι τὴν κεφαλὴν ἢ ἀπὸ τοῦ ἀκράτου; ἢ ὅτι ὁ μὲν ἄκρατος παχυμερὴς ὢν εἰς τοὺς περὶ τὴν κεφαλὴν πόρους στενοὺς ὄντας αὐτὸς μὲν οὐκ εἰσπίπτει, ἡ δὲ δύναμις αὐτοῦ, ἡ ὁσμή καὶ θερμότης· ὁ δὲ κεκραμένος μυχθεὶς λεπτῷ τῷ ὕδατι αὐτὸς εἰσδύεται, ἔχων δὲ σῶμα, καὶ τῆς δυνάμεως πολὺ τῆς τοῦ ἀκράτου, δυσπεπτότερός ἐστιν. τὰ τε γὰρ ὑγρά πάντων δυσπεπτότατα, καὶ τὰ σώματα τῶν ἐν αὐτοῖς δυνάμεων.

Διὰ τί μᾶλλον δύνανται πιεῖν εἰς μέθην οἱ ἀγύμναστοι τῶν γεγυμνασμένων, καὶ ῥᾶον ἀπαλλάττουσιν; ἢ ὅτι οἱ ἔχοντες

περίττωμα καὶ ὑγρὸν ἐν αὐτοῖς οὐρητικοὶ γίνονται· ὅπερ ποιεῖ δύνασθαι πίνειν καὶ ὕστερον κούφως ἔχειν διὰ τὸ μὴ ἐμμένειν πολὺ ὑγρὸν οἰνώδες. οἱ μὲν οὖν ἀγύμναστοι ὑγροὶ καὶ περιττωματικοὶ εἰσιν, οἱ δὲ γεγυμνασμένοι ξηροί, ὥστ' εἰς τὸ σῶμα τούτοις ἡ ὑγρότης ἡ οἰνηρὰ ἀφικνεῖται. εὐθύς τε οὖν ἀντισπᾶ τῇ οὐρήσει ἡ φορὰ αὕτη, καὶ ὕστερον ἐμμένον τὸ ὑγρὸν τοῦτο ἐν τῷ σώματι βάρος ποιεῖ.

Διὰ τί ὁ οἶνος καὶ τετυφωμένους ποιεῖ καὶ μανικούς; ἐναντία γὰρ ἡ διάθεσις· ὁ μὲν γὰρ μᾶλλον ἤδη ἐν κινήσει, ὁ δὲ ἤττον. ἢ ὥσπερ Χαιρήμων εἶπε, “τῶν χρωμένων γὰρ τοῖς τρόποις κεράννυται.” τὰναντία οὖν ποιεῖ οὐ ταῦτ' ἀλλὰ τὰ μὴ ὁμοίως ἔχοντα, ὥσπερ καὶ τὸ πῦρ τὰ μὲν ξηραίνει τὰ δὲ ὑγραίνει, ἀλλ' οὐ ταῦτά, καὶ τήκει τὸν κρύσταλλον καὶ πήγνυσι τοὺς ἄλας. καὶ ὁ οἶνος (ὑγρὸς γάρ ἐστι τὴν φύσιν) τοὺς μὲν βραδυτέρους ἐπιτείνει καὶ θάπτους ποιεῖ, τοὺς δὲ θάπτους ἐκλύει. διὸ ἔνιοι τῶν μελαγχολικῶν τῇ φύσει ἐν ταῖς κραιπάλαις ἐκλελυμένοι γίνονται ἀμπαν. ὥσπερ γὰρ τὸ λουτρὸν τοὺς μὲν συνδεδεμένους τὸ σῶμα καὶ σκληροὺς εὐκινήτους ποιεῖ, τοὺς δὲ εὐκινήτους καὶ ὑγροὺς ἐκλύει, οὕτως ὁ οἶνος, ὥσπερ λούων τὰ ἐντός, ἀπεργάζεται τοῦτο.

Διὰ τί ἡ κράμβη παύει τὴν κραιπάλην; ἢ ὅτι τὸν [873b] μὲν χυλὸν γλυκὺν καὶ ῥυπτικὸν ἔχει (διὸ καὶ κλύζουσιν αὐτῷ τὴν κοιλίαν οἱ ἱατροί), αὕτη δ' ἐστὶ ψυχρά. σημεῖον δέ· πρὸς γὰρ τὰς σφοδρὰς διαρροίας χρῶνται αὐτῇ οἱ ἱατροί, ἔψοντες σφόδρα καὶ ἀποξυλίζοντες καὶ ψύχοντες. συμβαίνει δὲ τῶν κραιπαλόντων τὸν μὲν χυλὸν αὐτῆς εἰς τὴν κοιλίαν κατασπᾶν τὰ ἐν αὐτοῖς ὑγρά, οἰνηρὰ καὶ ἅπεπτα ὄντα, αὐτὴν δὲ ὑπολειπομένην ἐν τῇ ἄνω κοιλίᾳ ψύχειν τὸ σῶμα. ψυχομένου δὲ ὑγρά λεπτὰ συμβαίνει εἰς τὴν κύστιν φέρεσθαι. ὥστε κατ' ἀμφοτέρω τῶν ὑγρῶν ἐκκρινομένων διὰ τοῦ σώματος, καὶ καταψυχομένου, εἰκότως ἀκραίπαλοι γίνονται· ὁ γὰρ οἶνος ὑγρὸς καὶ θερμὸς ἐστίν. ἔτι δὲ συμβαίνει τῶν ὑγρῶν κατασπωμένων καὶ ἐκκρινομένων κάτω καὶ πνεῦμα ἐπάγεσθαι αὐτοῖς, ὅπερ μόνον ἀπὸ τοῦ οἴνου εἰς τὴν κεφαλὴν φερόμενον τὸν κάρων καὶ τὴν κραιπάλην ποιεῖ. κάτω δὲ ὀρμήσαντος καὶ καταψυχομένου τοῦ σώματος διὰ τὰ εἰρημένα, λύεται ὁ τῆς κραιπάλης πόνος. ἔστι γὰρ ἡ κραιπάλη ζέσις τις καὶ φλεγμασία λήγουσα. λυπεῖ δὲ μᾶλλον τῆς μέθης, ὅτι ἐκείνη μὲν ἐξίστησιν, ἡ δὲ κραιπάλη ἐν αὐτοῖς οὖσι τὸν πόνον παρέχει· καθάπερ οὖν καὶ ὑπὸ

τῶν πυρετῶν οἱ λαμβανόμενοι παίζουνσι μᾶλλον ἢ ἀλγοῦσι, παρ' αὐτοῖς δὲ γενόμενοι οἱ αὐτοί, κουφισθέντες τοῦ πάθους, ἀλγοῦσιν. ταῦτα γὰρ καὶ ἐπὶ τῆς κραιπάλης καὶ ἐπὶ τῆς μέθης συμβαίνει.

Διὰ τί μᾶλλον ἐμετιᾶν ποιεῖ ὁ ὕδαρῆς οἶνος ἢ τὸ ὕδωρ καὶ ὁ ἄκρατος; ἢ ὅτι ἐμεῖν μὲν μάλιστα ποιεῖ τὰ ἐπιπολαστικά καὶ ὅσα ἀηδὴ ἐστίν. ἔστι δὲ ὁ μὲν οἶνος κατακρουστικός, τὸ δὲ ὕδωρ λεπτὸν καὶ οὐκ ἀηδές. διὰ μὲν οὖν τὸ λεπτὸν [καὶ οὐκ ἀηδές] εἶναι κάτω διέρχεται ταχύ, διὰ δὲ τὸ μὴ ἀηδές οὐ ποιεῖ καρδιώττειν. ὁ δὲ κεκραμένος λίαν οὐκ ἔστι λεπτὸς ὥστε διαρρεῖν ταχύ, διὰ δὲ τὸ μικρὸν ἔχειν οἶνου ἀηδὴς ἐστίν· ταραττει γὰρ τὴν αἴσθησιν τῷ πλείους ἐν αὐτῇ τὰς κινήσεις ἐμποιεῖν, τὴν τ' ἀπὸ τοῦ οἶνου καὶ τοῦ ὕδατος· αἰσθηταὶ γὰρ ἄμφω γίνονται. ὁ δ' εὐκράτος τὴν μὲν τοῦ ὕδατος αἴσθησιν ἀφανίζει, οἶνου δὲ μαλακοῦ ποιεῖ αἴσθησιν· διὸ ἡδέως πίνεται. ἀηδὴς δὲ ὢν ὁ ὕδαρῆς οἶνος ἐπιπολαστικός ἐστι· τὸ δὲ τοιοῦτον ἐμετικόν ἐστίν.

Διὰ τί μεθύοντες μᾶλλον διαισθανόμεθα τὰ ἀλυκὰ [874a] καὶ τὰ μοχθηρὰ ὕδατα, νήφοντες δ' ἥττον; ἢ ὅτι τὰ λυπηρὰ μᾶλλον δῆλα τοῖς μὴ ἐπιθυμοῦσι, τοὺς δ' ἐπιθυμοῦντας διαλανθάνει; ὁ μὲν οὖν ἡδέως ἔχων ὁμοίως τῷ ἐπιθυμοῦντι ἔχει, ὁ δὲ νήφων οὕτως ἔχει· ὁ δὲ μεθύων πλήρης.

Διὰ τί τοῖς μεθύουσι σφόδρα κύκλω πάντα φαίνεται φέρεσθαι, καὶ ἤδη ἀποτέμνης μᾶλλον τῆς μέθης ἀριθμεῖν τὰ πόρρω οὐ δύνανται; διὸ καὶ σημεῖον τῆς μέθης ποιοῦνται αὐτό τινες. ἢ ὅτι κινεῖται ὑπὸ τῆς θερμότητος τοῦ οἶνου ἢ ὅψις πυκνάκις; ὥσπερ οὖν ὅταν ὑποθῇ τις ὑπὸ τὸν ὀφθαλμόν, δύο φαίνεται, οὕτω καὶ τοῖς μεθύουσιν. οὐδὲν γὰρ διαφέρει, ἐὰν μὲν ὑποθῇ, κινή δὲ τὴν ὄψιν, οὐδ' ἐὰν ἔξωθεν ἢ ἔσωθεν· ἀμφοτέρως γὰρ τὸ αὐτὸ πάσχει ἢ ὅψις. ὥστε οὐ δόξει μένειν τὸ ὁρώμενον, καὶ τὸ πόρρωθεν ἔτι μᾶλλον· ἔτι γὰρ ἥττον κρατεῖ ἀποτεινομένης τῆς ὄψεως, καὶ πλεον τὸ διάστημα ἐπὶ τῷ ἄκρῳ ποιεῖ ἢ ἐγγὺς αὕτη κινήσεις. ἂν δὲ σφόδρα κινήται καὶ ὁμαλῶς ἄνω καὶ κάτω, ἥττον κρατήσῃ τοῦ πόρρω. πάντα δὲ ἀποτεινόμενα κύκλω φέρεται, οἷον οἱ οἰστοὶ καὶ τὰ καταρτώμενα. καὶ ἢ ὅψις οὖν δι' ἀσθένειαν ταὐτὸ πάσχει ὥσπερ ἂν εἰ πόρρω ἐφέρετο. διαφέρει δ' οὐδὲν τὴν ὄψιν κινεῖν ἢ τὸ ὁρώμενον· ταὐτὸ γὰρ ποιεῖ πρὸς τὸ φαίνεσθαι.

Διὰ τί, ὅταν ἀθρόως πίνωσι, ξηρότεραι αἱ κοιλῖαι γίνονται, ὅτε δεῖ ὑγραίνεσθαι μᾶλλον ὑπὸ τοῦ πλείονος; ἢ ὅτι τοῦ μὲν πολλοῦ καὶ

ἀθρόου οὐ κρατεῖ ἡ κοιλία, ἀλλ' εἰς τὸν αὐτοῦ ἔρχεται τόπον ἀπαθές; ἔστι δὲ ὑγροῦ τόπος ἀπέπτου ἢ κύστις. τοῦ δὲ ὀλίγου κρατεῖ καὶ πέττει, ὥστε μένον ὑγραίνει.

Διὰ τί μᾶλλον κραιπαλῶσιν οἱ εὐκρατον πίνοντες ἢ οἱ ἄκρατον; ἢ διὰ τὴν λεπτότητα εἰς πλείους τρόπους ὁ κεκραμένος εἰσέρχεται, καθάπερ ἐν τοῖς ἱματίοις, καὶ ἔστι δυσεξαγωγότερος· τὸ δὲ ὕδωρ λεπτομερέστερον μὲν, ἀλλ' εὐέξοδον. ἢ διότι ἔλαττον πίνουσιν ἄκρατον διὰ τὸ μὴ δύνασθαι, καὶ μᾶλλον ἀπεμοῦσιν; ἔτι δὲ συμπέττει τὰ λοιπά. ταῦτο δ' ἐστὶ πρόβλημα.

Διὰ τί ὑπὸ τοῦ ἀκράτου ἀποθνήσκουσιν, ἐὰν τις προῖσχνάνας πολὺ πῖνῃ; καὶ μὴ προῖσχνάναντες δὲ πολλοὶ τῶν φιλοπότων ἀθρόον πολὺ πίνοντες ξηροὶ γίνονται· δοκεῖ γὰρ ὅ τε οἶνος τῶν θερμῶν εἶναι τὴν φύσιν καὶ τὸ ζῆν, τὸ δὲ [874b] ἀποθνήσκειν κατάψυξις. ἢ ὥσπερ καὶ ἀπὸ τοῦ κωνείου, σβεννυμένου κατὰ μικρὸν τοῦ θερμοῦ τοῦ οἰκείου. ἀλλὰ τρόπον ἕτερον· τὸ μὲν γὰρ τῇ ψυχρότητι πῆγνυσι τὸ ὑγρὸν καὶ θερμόν, ὁ δ' οἶνος τῇ θερμότητι τῇ αὐτοῦ μαραίνει τὴν φυσικὴν θερμότητα. ὥσπερ οὖν ὑπὸ τοῦ πολλοῦ πυρὸς καὶ ἡλίου τὸ ὀλίγον πῦρ ἀποσβέννυται, οὕτως ἢ ἐν τοῖς σώμασι θερμότης ὑπὸ τῆς ἐν τῷ οἴνῳ, ἐὰν ὑπερβάλλῃ.

Διὰ τί οἱ μεθύοντες ἀριδάκρυοι μᾶλλον; ἢ ὅτι θερμοὶ καὶ ὑγροὶ γίνονται· ἀκρατεῖς οὖν εἰσίν, ὥστε ὑπὸ μικρῶν κινεῖσθαι.

Διὰ τί ἦττον μεθύσκονται ταῖς μεγάλαις κωθωνιζόμενοι; πάντων γὰρ ταῦτο αἴτιον ἢ κατάκρουσις, τουτέστιν ἐπιπολῆς. τὸ μὲν γὰρ μεθύειν ἐν τοῖς περὶ κεφαλὴν τοποῖς. ἢ ὅτι δεῖ πρὸς τοὺς ὕπνους ὑγρότητα ἐνυπάρχειν θερμῇ; αὕτη γὰρ εὐπεπτος. ἂν δὲ μὴ ἐνῇ ὑγρότης ὀλίγη ἢ δύσπεπτος, οὐ γίνεται ὕπνος. διὸ ἐν τοῖς κόποις καὶ μετὰ τὰ σιτία καὶ τοὺς πότους ὑπνωτικώτατοι γίνονται ὑπὸ τῆς θερμῆς. τοῖς δὲ μελαγχολικοῖς καὶ τοῖς μεγάλας πυρίας ἀγρυπνία, τοῖς μὲν ὅτι κατέψυκται τὸ ὑγρὸν, τοῖς δὲ ὅτι οὐκ ἔστιν ἢ ὀλίγον. φανερόν οὖν ὅτι εἰς ταῦτα βλέπτειν καθ' ἕτερον τῶν παθῶν.

Διὰ τί οἱ οἰνόφλυγες τρέμουσι, καὶ μᾶλλον ὅσῳ ἂν ἀκρατοποιῶσιν; ἔστι δὲ ὁ μὲν οἶνος θερμαντικός, ὁ δὲ τρόμος γίνεται μάλιστα ὑπὸ ψυχροῦ, διὸ οἱ ῥιγῶντες μάλιστα τρέμουσιν. πολλοῖς δ' ἤδη χρωμένοις μόνῳ ἀκράτῳ τροφῆς χάριν τρόμοι τε ἰσχυροὶ συνέβησαν, ὥστε ἀπορρίπτειν τοὺς θλίβοντας, καὶ τῷ θερμῷ ὕδατι λουόμενοι ἀναισθήτως εἶχον. ἕτεροι δὲ τοῦτον τὸν τρόπον διαιτῶμενοι, καὶ τρίψεσι χρώμενοι καὶ τροφῇ κρέασι, πρὸς

ἀποπληκτικὰς ἀρρωστίας ἤλασαν· οἷς τρόμοι μὲν διὰ τὴν ἀκινήσιαν ἦττον ἐνέπιπτον, πόνος δὲ ἰσχυρὸς καὶ τὸ μὴ δύνασθαι ἡσυχάζειν. ἔτι τοῦ μὲν τρόμου αἰτία ἡ ψυχρότης· φαίνονται γάρ, ὥσπερ εἴρηται, οἱ τε ῥιγῶντες τοῦτο πάσχοντες καὶ οἱ σφόδρα γέροντες. ἀμφοτέρων δὲ τούτων τῶν μὲν τὸ πάθος ψυχρόν, τῶν δὲ ἡ ἡλικία· ὁ δὲ οἶνος θερμαντικώτατος, ὥσθ' ὑπεναντίον ἂν τι συμβαίνοι. ἢ οὐθὲν κωλύει γίνεσθαι ταῦτο ὑπὸ ἐναντίων, μὴ ὡσαύτως δὲ ποιούντων, οἶον καὶ ὑπὸ τῶν πάγων ἀποκάεται καὶ ὑπὸ θερμοῦ, ὅταν ὁ πάγος ἀθρόον ποιήσῃ τὸ [875a] θερμόν· ὥστ' ἔστι μὲν ὡς ὑπ' ἐναντίων τὸ πάθος τὸ αὐτὸ συμβαίνειν, ἔστι δὲ ὡς ὑπὸ τοῦ αὐτοῦ τὸ αὐτό. ὁ δὲ τρόμος γίνεται μὲν ὑπ' ἐνδείας θερμοῦ, οὐ παντὸς ἀλλὰ τοῦ οἰκείου. φθείρεται δὲ τὸ θερμόν ἢ μαράνσει ἢ σβέσει, σβέσει μὲν ὑπὸ τῶν ἐναντίων, ὑπὸ ψυχροῦ καὶ ὑγροῦ, μαράνσει δὲ ἐνδείᾳ τροφῆς, οἶον οἱ λύχνοι, ὅταν μὴ ἔχωσιν ὑπέκκαυμα μηδ' ἔλαιον· ἢ ὑπὸ θερμοῦ ἀλλοτρίου, οἶον τὸ πῦρ ἐν τῷ ἡλίῳ καὶ οἱ λύχνοι παρὰ τῷ πυρί. οἱ μὲν οὖν ῥιγῶντες ὑπὸ ψυχροῦ σβεννυμένου τοῦ θερμοῦ τρέμουσιν. διὸ καὶ τοῖς προσχεομένοις τὸ θερμόν αἱ φρῖκαι γίνονται· ἐγκατακλειόμενον γὰρ τὸ ψυχρὸν εἶσω καὶ ἀντιπεριστάμενον ἴσθησι τὰς τρίχας· καὶ τῷ ἀρχομένῳ πυρέττειν τὸ γινόμενον ῥίγος δι' ὁμοίαν αἰτίαν γίνεται. ἐν δὲ τῷ γῆρα τὸ θερμόν μαραίνεται τῆς τροφῆς ὑπολειπούσης. τροφή μὲν γὰρ ὑγρὸν τῷ θερμῷ, τὸ δὲ γῆρας ψυχρόν. οἱ δὲ οἰνόφλυγες μαραινομένης μὲν τῆς οἰκείας θερμότητος τρέμουσιν, καὶ εἴ τινας ἄλλοι τοῦτο πάσχουσι διὰ τὸν οἶνον, οὐ τὸν αὐτὸν δὲ τρόπον τοῖς διὰ γῆρας, ἀλλ' ἔτι τρίτος ἦν τρόπος τῆς τοῦ θερμοῦ φθορᾶς. ὅταν γὰρ ὑπερβάλλοντι χρῶνται ἐν τῷ σώματι, πολλὴ οὕσα ἡ θερμότης ἢ ἀποσβέννυσιν ἢ ἀσθενῇ ποιεῖ τὴν οἰκείαν θερμότητα ἢ ἰσχύομεν· ἔστι γὰρ ὅταν μὴ κρατῇ τὸ κινεῖν τοῦ κινουμένου, οἶον ὅταν ξύλον μακρὸν καὶ μέγα μὴ εὐκρατῶς ἔχη τις, τὸ ἄκρον τρέμει. γίνεται δὲ τοῦτο ἢ τῷ τὸ ἐχόμενον μεῖζον εἶναι ἢ τῷ τὸ κινεῖν ἔλαττον. συμβαίνει δὲ σβεννυμένου τοῦ θερμοῦ (δοκεῖ γὰρ αἴτιον τοῦτο εἶναι τοῦ κινεῖσθαι τοῖς ζώοις) μὴ κρατεῖν τὴν φύσιν. σημεῖον δ' ὅτι διὰ ψυχρότητα γίνεται τὸ πάθος τοῖς οἰνόφλυξι καὶ τοῖς πρεσβύταις, ὅτι ἄνευ ῥίγους γίνεται ὁ τρόμος.

Διὰ τί ὁ ἀκροθώραξ μᾶλλον παροινεῖ τοῦ μᾶλλον μεθύοντος καὶ τοῦ νήφοντος; ἢ ὅτι ὁ μὲν νήφων εὖ κρίνει, ὁ δὲ παντάπασιν μεθύων διὰ τὸ τὰς αἰσθήσεις ἐπιπεπλασμένας εἶναι, οὐ δυνάμενος τὸ βάρος φέρειν, οὐ κρίνει· οὐ κρίνων δὲ οὐ παροινεῖ. ὁ δὲ ἀκροθώραξ

κρίνει τε καὶ διὰ τὸν οἶνον κακῶς κρίνει, ὥστε παροινεῖ· ὥσπερ καὶ Σάτυρον τὸν Κλαζομένιον ὄντα φιλολοίδορον, φεύγοντα δίκην, ἵνα ὑπὲρ τοῦ πράγματος λέγῃ καὶ μὴ λοιδορῇται, τὰ ὧτα ἐπέπλασαν, ἵνα μὴ ἀκούων εἰς λοιδορίαν τρέπηται· παυομένου δὲ τοῦ ἀντιδίκου ἀφεῖλον· μικρὰ δὲ ἀκούσας ἔτι λέγοντος οὐκ ἀπέσχετο ἀλλὰ κακῶς ἔλεγε, διὰ τὸ αἰσθάνεσθαι μὲν κακῶς δὲ κρίνειν.

[875b] Διὰ τί πρὸς τὸν γλυκὺν οἶνον ἡδίων ὄντα οὐ γίνονται οἰνόφλυγες; ἢ ὅτι οὐκ ἴδιον χυμὸν ἔχει ὁ γλυκύς, ἀλλ' ἀλλότριον; φιλόγλυκος οὖν μᾶλλον ἢ φίλοινος ἔσται ὁ κεκρατημένος.

Διὰ τί οἱ οἰνόφλυγες ὑπὸ τοῦ ἡλίου θερμαινόμενοι μάλιστα χαίρουσιν; ἢ ὅτι δέονται πέψεως; ἔτι δὲ καὶ διὰ τὸ κατεψύχθαι· διὸ καὶ αἱ ἀποπληξίαί καὶ αἱ ἀποναρκώσεις τάχιστα μετὰ τοὺς πότους γίνονται.

Διὰ τί τοῖς μεθύουσιν ἐνίοτε πολλὰ φαίνεται τὸ ἐν ὀρώσιν; ἢ ὅτι αἱ ἀρχαὶ τῶν ὄψεων ἔσω μὲν κινουῦνται ὑπὸ τοῦ οἴνου, καθάπερ ἡ ὅλη κεφαλὴ, κινουμένων δὲ τῶν ἀρχῶν οὐκ εἰς ταὐτὸ συμβάλλουσιν αἱ ὄψεις, ἀλλ' οἶον ἐπὶ μέρος ἐκάτερον τοῦ ὀρωμένου· διὸ δύο φαίνεται. ταὐτὸ δὲ τοῦτο γίνεται καὶ ἐάν τις κάτωθεν πιέσῃ τὴν ὄψιν· ἐκίνησε γὰρ τὴν ἀρχὴν τῆς ὄψεως, ὥστε μηκέτι εἰς ταὐτὸ συμβάλλειν τῇ ἐτέρᾳ. ἢ μὲν οὖν τοιαύτη κίνησις ἐξῶθεν γίνεται, ἢ δὲ ἀπὸ τοῦ οἴνου ἔσωθεν. διαφέρει δ' οὐθέν· ταῦτα γὰρ ποιήσει ὁπωσοῦν κινηθεῖσα.

Διὰ τί τῶν μεθύοντων ἡ γλῶττα πταίει; πότερον ὅτι καθάπερ τὸ ὅλον σῶμα ἐν τῇ μέθῃ σφάλλεται, οὕτω καὶ ἡ γλῶττα σφαλλομένη πταίει καὶ οὐ δύναται τὴν λέξιν διαρθροῦν; ἢ σπογγώδης ἐστὶν ἡ τῆς γλώττης σάρξ· βρεχομένη οὖν ἐξαίρεται· τούτου δὲ συμβαίνοντος διὰ τὸ πάχος τὸ ἀπὸ τοῦ ὄγκου δυσκινητοτέρα οὔσα οὐ δύναται διακριβοῦν. ἢ διότι οὔτε ἐν τῷ ὑγρῷ δυνάμεθα λαλεῖν διὰ τὴν ἀπουσίαν τοῦ ἀέρος, οὔθ' ὅταν εἰς τὸ στόμα λάβωμεν ὑγρόν; ἐν τῇ μέθῃ οὖν ἐν ὑγρῷ πολλῷ τῆς γλώττης οὔσης οὐκ ἀκριβοῦμεν· τὸ δὲ μὴ ἀκριβοῦν ἐστὶ τὸ πταίνειν. ἢ διότι ἐν ταῖς μέθαις ἡ ψυχὴ συμπαθὴς γινομένη πταίει; τῆς ψυχῆς οὖν τοῦτο πασχούσης εἰκὸς καὶ τὴν γλῶτταν ταὐτὸ πάσχειν· ἀπ' ἐκείνης γὰρ ἡ τοῦ λέγειν ἀρχή. διὸ καὶ χωρὶς τῆς μέθης, ὅταν ἡ ψυχὴ πάθῃ τι, συμπάσχει καὶ ἡ γλῶττα, οἶον τῶν φοβουμένων.

Διὰ τί οἱ οἰνόφλυγες καὶ οἱ περὶ τὴν θάλατταν χαίρουσιν ἡλίῳ; ἢ διότι οἱ μὲν οἰνόφλυγες δέονται πέψεως, καὶ ἅμα συμβαίνει τινὰς

τόπους κατεψύχθαι; διὸ καὶ ἀποπληξίαι καὶ ἀποναρκώσεις μετὰ τοὺς πότους. οἱ δὲ θαλάττιοι διὰ τὸ ἀεὶ ἐν ὑγρῷ εἶναι τοῦτο ποιοῦσιν.

Διὰ τί οἱ μεθύοντες ἀδύνατοι ἀφροδισιάζουσιν; ἢ ὅτι δεῖ μᾶλλον τινα τόπον ἐκθερμανθῆναι τοῦ ἄλλου σώματος, [876a] οἱ δὲ διὰ τὸ πλῆθος τῆς θερμασίας ἀδυνατοῦσιν. ἀποσβέννυνται οὖν τὸ ἀπὸ τῆς κινήσεως, θερμὸν γινόμενον ὑπὸ τοῦ περιέχοντος. ἢ διότι δεῖ μὲν ἐκθερμανθῆναι τοὺς κάτω τόπους, ὁ δ' οἶνος ἄνω πέφυκε φέρεσθαι, ὥστε ἐκεῖ ποιεῖ τὴν θερμασίαν, ἐντεῦθεν δὲ ἀπάγει. καὶ μετὰ τὰ σιτία ἥκιστα ἀφροδισιαστικοί, καὶ κελεύουσιν ἀριστὰν μὲν πολὺ δειπνεῖν δὲ ὀλίγον· ἀπέπτων μὲν γὰρ ὄντων ἄνω φέρεται, πεπεμμένων δὲ κάτω τὸ θερμὸν καὶ τὸ ὑγρόν· ἡ δὲ τοῦ σπέρματος γένεσις ἐκ τούτων. καὶ οἱ κοπιῶντες ἐξονειρώττουσιν, ὅτι ὑγρὸς καὶ θερμὸς ὁ κόπος· ἐὰν οὖν ἐν τῷ τόπῳ τούτῳ γένηται ἡ περίπτωσις, συμβαίνει ἐξονειρώττειν. διὰ ταυτὸ δὲ καὶ ἐπὶ τοῖς ἀρρωστήμασιν, ὅσοις γίνεται, συμβαίνει. καὶ τοῖς φοβουμένοις καὶ τοῖς ἀποθνήσκουσι συμβαίνει ὡσαύτως.

Διὰ τί νέοι ὄντες ἐνουροῦσι μᾶλλον, ὅταν μεθυσθῶσιν, ἢ πρεσβύτεροι; ἢ διὰ τὸ θερμοὺς καὶ ὑγροὺς εἶναι πολὺ τὸ συρρυνῆν γίνεται περίττωμα, διὰ τὸ μὴ ἀναλίσκειν τὸ σῶμα τὸ ὑγρόν, ὥστε ὑπερχεῖται· πρεσβυτέροις δὲ γινομένοις διὰ ξηρότητα τὴν ὑπερβολὴν ἀντισπᾶ τὸ σῶμα. ἢ ὅτι μᾶλλον ὑπνωτικώτεροί εἰσιν οἱ νέοι τῶν πρεσβυτέρων; διὸ τοὺς μὲν νέους καθύπνους ὄντας λανθάνει ἡ ὁρμὴ τοῦ οὔρου ἐκπίπτουσα πρὶν διεγερθῆναι, τοὺς δὲ πρεσβυτέρους οὐ, καθάπερ οὐδὲ τῶν ἔξωθεν κινήσεων οὐδὲν ἥττον τι λανθάνει αὐτοὺς ἢ τοὺς νέους. δῆλον δέ· καὶ γὰρ αὐτοὶ οἱ νέοι ἐν τοῖς βαθυτάτοις ὕπνοις μάλιστα ἐνουροῦσιν.

Διὰ τί τὸ ἔλαιον πρὸς τὰς μέθας συμφέρει, καὶ τοῦ δύνασθαι πίνειν τὸ καταρροφεῖν; ἢ διότι οὐρητικόν ἐστι καὶ τῷ πόματι προοδοποιεῖ;

Δ. ΟΣΑ ΠΕΡΙ ΑΦΡΟΔΙΣΙΑ.

Διὰ τί ὁ ἀφροδισιάζων καὶ ὁ ἀποθνήσκων ἀναβάλλει τὰ ὄμματα, καθεύδων δὲ καταβάλλει; ἢ διότι ἄνωθεν τὸ θερμὸν ἐξιὼν ἀναστρέφει ἵνα περ ὀρμᾷ· ἐν δὲ τῷ ὕπνῳ κάτω συνάγεται, διὸ ῥέπει κάτω; συγκλείονται δὲ οἱ ὀφθαλμοὶ παρὰ τὸ μὴ ὑπάρχειν ἔτι νοτίδα.

Διὰ τί τῶν πλείοσιν ἀφροδισίοις χρωμένων ἐπιδηλότατα ἐνδίδωσι τὰ ὄμματα καὶ τὰ ἰσχία, τὰ μὲν ἐγγὺς ὄντα, τὰ δὲ πόρρω; πότερον ὅτι καὶ ἐν αὐτῇ τῇ συνουσίᾳ ἐπιδηλότατα συμπονεῖ ταῦτα τῇ ἐργασίᾳ συνιόντα περὶ [876b] τὴν πρόεσιν τοῦ σπέρματος; συνεκθλίβεται οὖν μάλιστα ἐντεῦθεν ὅσον εὔτηκτον τῆς τροφῆς ἔνεστι διὰ τὴν θλίψιν. ἢ διότι παραθερμαίνόμενα τήκεται μάλιστα· ὁ δὲ ἀφροδισιασμὸς θερμότητα ἐργάζεται. μάλιστα δὲ ταῦτα θερμαίνεται, ἃ κινεῖται ἐν τῇ ἐργασίᾳ. οἱ δὲ ὀφθαλμοὶ καὶ τὰ περὶ τὴν ἔδραν ἐπιδήλως συμπονεῖ. οὔτε γὰρ μὴ συναγαγόντι τὰ περὶ τὴν ἔδραν ἐνδέχεται προσέσθαι, οὔτε μὴ τῶν ὀφθαλμῶν καταβληθέντων· τὰ μὲν γὰρ περὶ τὴν ἔδραν συνιόντα θλίβει, οἷον ἐκ κύστεως τῇ χειρὶ τὸ ὑγρόν, ἢ δὲ τῶν ὀφθαλμῶν συναγωγή τὰ ἀπὸ τοῦ ἐγκεφάλου. ὅτι δὲ μεγάλην ἔχουσι τὰ ὄμματα τὴν δύναμιν καὶ ὁ τόπος αὐτῶν πρὸς γένεσιν, δηλοῖ ἢ τῶν ἀτέκνων καὶ γονίμων γυναικῶν τοῖς ἐναλείμμασι πείρα, ὥς δέον ταύτῃ διελθεῖν εἰς τὸ σπέρμα δύναμιν. πίονα δὲ ἄμφω τυγχάνει ὄντα πάντων ἀεί, ἀρχὸς τε καὶ ὄμματα· διὰ μὲν οὖν τὴν συνεργίαν κοινωνεῖ τῆς θερμασίας, διὰ δὲ ταύτην λεπτύνεται καὶ συναποκρίνεται πολὺ εἰς τὸ σπέρμα. οὔτε γάρ, ἂν μὴ πῖον ᾗ, ὁμοίως γρύσει ἡ θερμότης, οὔτε πῖον ὃν μὴ συμπονοῦν, οἷον ἐν τῇ κοιλίᾳ· ἀλλὰ οἱ νεφροὶ τῶν ἄλλων μάλιστα αἰσθάνονται διὰ τὴν γειννίασιν. καὶ αὐτὴ δὲ ἡ τοῦ σπέρματος πάροδος παρὰ τοὺς τόπους τούτους οὔσα ἐπιδηλότατα ἱκανὴ ἐστὶ λεπτύνειν· ἀφαιρεῖ γάρ, ἀλλ' οὐ προστίθῃσι πλησιάζουσα.

Διὰ τί καὶ οἱ ἀφροδισιάζοντες καὶ οἱ εὐνούχοι οὐ χρώμενοι ἀφροδισίοις ὁμοίως ἀμφοτέρω τὰ ὄμματα πρὸς ὀξυωπίαν βλάπτονται; ἢ ὅτι τοῖς μὲν διὰ λαγνείαν, τοῖς δὲ διὰ τὴν πῆρωσιν τὰ ἄνω ξηρὰ γίνεται μᾶλλον τοῦ δέοντος, ἐπιδηλότατα δ' ἐν τούτοις, ὅσων τὸ ἔργον ἐστὶν ἀκριβές· ἢ δ' ὅψις τοιοῦτον. κατασπωμένων δὲ τῶν ὑγρῶν τὰ ἄνω ξηραίνεται. ὁ μὲν οὖν ἀφροδισιασμὸς δηλὸν ὅτι τοῦτο ποιεῖ· τοῖς δὲ εὐνούχοις τὰ τε σκέλη οἶδεῖ καὶ αἱ κοιλίαι

εὐλυτοὶ ὥς κάτω μεθισταμένου τοῦ ὑγροῦ.

Διὰ τί ἄνθρωπος μόνον, ὅταν ἄρχηται δύνασθαι ἀφροδισιάζειν, ἡβᾷ, τῶν δὲ ἄλλων ζώων ὅσα τρίχας ἔχει οὐθέν; ἢ ἐπειδὴ κατὰ τὰς ἡλικίας μεταβάλλει τὰ ζῶα εἰς τοῦναντίον; φωνή τε γὰρ βαρεῖα ἐξ ὀξεῖας γίνεται, καὶ δασύνεται ἐκ ψιλῶν· δῆλον οὖν ὥς καὶ τὰ ἐκ γενετῆς δασέα ζῶα ψιλοῦν· ἂν, οὐ δασύνοιτο, σπερματικά γινόμενα. οὐ πάσχει δὲ τοῦτο διὰ τὸ τὰ σπερμαίνοντα ξηρότερα γίνεσθαι καὶ [877a] ἀραιότερα, ἐξ ὧν θρίξ φύεται. δῆλον δὲ ἐκ τοῦ μὴ ἐν ταῖς οὐλαῖς φύεσθαι τρίχας· στεγανὰ γὰρ αἱ οὐλαί, ἀλλ' οὐκ ἀραιαί. μηδὲ τοῖς παιδίοις καὶ γυναιξίν· ὑγρὰ γὰρ καὶ ἄμφω, ἀλλ' οὐ ξηρά.

Διὰ τί ἡ ἀνυποδησία οὐ συμφέρει πρὸς ἀφροδισιασμούς; ἢ ὅτι τὸ μέλλον ἀφροδισιάζειν σῶμα δεῖ τὰ ἐντὸς θερμὸν εἶναι καὶ ὑγρόν; τοιοῦτον δὲ ἐν τοῖς ὕπνοις μᾶλλον ἢ ἐν τῷ ἐγρηγορέναι· διὸ καὶ ταχὺ καὶ ἄνευ ἐργασίας οἱ ἐξονειρωγμοὶ γίνονται, ἐγρηγοροῦσι δὲ μετὰ πόνου. ἅμα δὲ τὸ σῶμα τοιοῦτον καὶ οἱ πόδες ὑγρότεροι καὶ θερμότεροι· σημεῖον δέ, ὅτι καθευδόντων θερμοί, ὥς ἅμα τοῖς ἐντὸς οὕτως ἔχοντες. ἢ δ' ἀνυποδησία τοῦναντίον ποιεῖ· ξηραίνει γὰρ καὶ ψύχει. ὥστ', εἴτε ἀδύνατον μὴ θερμῶν ὄντων ἀφροδισιάσαι εἴτε χαλεπόν, ἀνάγκη ἀσύμφορον εἶναι πρὸς τὴν τῶν ἀφροδισίων χρῆσιν.

Διὰ τί ἐκλύεται μάλιστα τῶν ζώων ἀφροδισιάσας ἄνθρωπος; ἢ διότι πλεῖστον προίεται σπέρμα κατὰ λόγον τοῦ σώματος; διὰ τί δὲ πλεῖστον προίεται; ἢ ὅτι ἥκιστα ἐκπονεῖ τὴν τροφήν καὶ φύσει ὑγρὸν καὶ θερμὸν ἐστὶ τῶν ζώων μάλιστα; ὧν τὸ μὲν ποιεῖ σπέρμα πολὺ, τὸ δὲ τὴν φύσιν σπερματικὴν ποιεῖ· καὶ γὰρ τὸ σπέρμα τοιοῦτόν ἐστιν, ἕως ἂν σώζηται.

Διὰ τί τοῦ ἀφροδισιάζειν γινομένου διὰ θερμότητα, τοῦ δὲ φόβου ὄντος ψυκτικοῦ καὶ τοῦ ἀποθνήσκειν, ἐνίοις, ὅταν γένωνται ἐν τούτοις τοῖς πάθεσι, σπέρμα προέρχεται; ἢ ὅτι ψυχομένων ἐνίων τόπων ἕτεροι ὑποθερμαίνονται, τὴν τε οἰκείαν ἔχοντες θερμότητα καὶ δεχόμενοι τὴν τῶν καταψυχομένων τόπων; ἄστε καταψυχομένων μὲν συμβαίνει, οὐ διὰ τὸ ψύχεσθαι μέντοι, ἀλλὰ διὰ τὸ θερμαίνεσθαι. δῆλον δὲ καὶ τῇ ὄψει· τῶν γὰρ φοβουμένων τὰ ἄνω λειφαίμει, τὰ δὲ κάτω ὑγραίνεται, καὶ κοιλία καὶ κύστις λύεται. ὑπὸν οὖν τὸ θερμὸν ἐν μὲν τῷ φόβῳ κάτω, ἐν δὲ τῷ θανάτῳ κάτωθεν ἄνω, ἐξυγραῖνον τῇ θερμότητι ποιεῖ τὴν τοῦ σπέρματος ἔξοδον.

Διὰ τί οὐ δεῖ μὴ ὀργῶντα οὔτε ἀφροδισιάζειν οὔτε ἐμεῖν οὔτε πτάρνυσθαι οὔτε φῦσαν ἀφιέναι; ἢ ὅτι μὴ ὀργῶντες ὁμοίως ἔχομεν

τοῖς ἐκ τῆς γῆς ἀνασπωμένοις, οἷς προσεκοπᾶται τι ἀλλότριον ἢ ἐγκαταλείπεται ἀποσπασθέν· ἅπαν δὲ ὁ δεῖ μὲν ἐξαρθῆναι, κολοβὸν δὲ ὑπολείπεται, [877b] πλείω χρόνον παρέξει πόνον. ἐὰν τέ τις κινήσῃ τι ἀλλότριον, τοῦτο πόνον παρέξει, οὐκ ἐν τῇ αὐτοῦ χώρα ὄν· ἂ συμβῇσεται τοῖς μὴ ὀργῶσι ποιοῦσί τι τῶν εἰρημένων.

Διὰ τί νήστεις θάττον ἀφροδισιάζουσιν; ἢ διότι οἱ πόροι κενώτεροι οἱ τοῦ σώματος νήστεσι, πλήρεσι δὲ πλήρεις· κωλύουσιν οὖν τὴν εἰς τὸ σπέρμα ὑγρότητα διεξιέναι. δῆλον δὲ ἐπὶ τῆς κύστεως· οὐ γὰρ δύνανται πλήρους οὔσης ταχὺ ἀφροδισιάζειν.

Διὰ τί οἱ νέοι ὅταν πρῶτον ἀφροδισιάζουσιν ἄρχωνται, αἷς ἂν ὀμιλήσωσι, μετὰ τὴν πρᾶξιν μισοῦσιν; ἢ διὰ τὸ μεγάλην γίνεσθαι τὴν μεταβολήν; τῆς γὰρ συμβαινούσης ὕστερον ἀηδίας μεμνημένοι, ὡς αἰτίαν ἢ ἐπλησίασαν φεύγουσιν.

Διὰ τί οἱ ἱππεύοντες συνεχῶς ἀφροδισιαστικώτεροι γίνονται; ἢ ὅτι διὰ τὴν θερμότητα καὶ τὴν κίνησιν ταῦτο πάσχουσιν ὅπερ ἐν τῇ ὀμιλίᾳ; διὸ καὶ τῇ τῆς ἐπεχούσης ἡλικίας ἐπιδόσει περὶ τὰ αἰδοῖα μείζω τὰ μόρια ταῦτα γίνεται. αἰεὶ οὖν τῇ κινήσει ταύτῃ χρωμένων εὖροα τὰ σώματα γίνεται καὶ προωδοπεποιημένα πρὸς τὸν ἀφροδισιασμόν.

Διὰ τί, ὅταν ἄρξωνται ἀφροδισιάζειν δύνασθαι, οἱ χρῶτες ὄζουσι, πρότερον δ' οὐκ ὄζουσι πρὸ ἥβης οὔτε οἱ ἄνδρες οὔτε αἱ γυναῖκες; ἢ ὅτι τὰ ἄπεπτα τοὺς τε χυμοὺς αἰεὶ χεῖρους ἔχει (ἢ γὰρ ὀξυτέρους ἢ ἀλμυρωτέρους ἢ πικροτέρους) καὶ τὰς ὀσμὰς δυσωδεστέρας, τὰ δὲ πεπεμμένα ἢ γλυκεῖς ἢ ἥττον ἀγλυκεῖς, καὶ τὰς ὀσμὰς εὐωδεστέρας ἢ ἥττον δυσώδεις; τοῦτο δ' ἐστὶ δῆλον ἐπὶ πάντων θεωμένοις καὶ φυτῶν καὶ ζῴων. ἀφαιρεθέντων δὲ τῶν εὐπέπτων, τὰ ὑπολειπόμενα ἄπεπτα, οἷον δὴ καὶ ἐπὶ τῆς τέφρας ἀναλωθέντος τοῦ γλυκέος πικρὰ ἢ κονία, καὶ ὁ ἰδρῶς ἀλμυρός. πέττει δὲ ἡ φυσικὴ θερμότης τὸ σπέρμα, ὃ μικρὸν ὄν πολλὴν ἔχει δύναμιν· ἐκ πολλοῦ γὰρ ὀλίγον συγκεκεφαλαίωται. διὸ ὅταν ἀπέλθῃ, ἐκλύονται ὡς ἐπὶ τὸ πολὺ μᾶλλον καὶ καταψύχονται· ὥστε ἀπεπτότεροι οἱ χυμοὶ γίνονται μᾶλλον, ἀναστομουμένων τῶν πόρων διὰ τὴν ἔκκρισιν αὐτοῦ. ἀλμυρώτεροι οὖν οἱ τῶν παίδων ἰδρῶτες καὶ δυσωδέστεροι διὰ τὴν ἀπεψίαν· καὶ ἐὰν τύχῃ τοιαύτῃ ἡ φύσις οὔσα ὥστε δυσώδῃ ἔχειν τὴν ὑπόστασιν τοῦ ἰδρῶτος, τούτοις μᾶλλον ἐπισημαίνει καὶ ἐν τοῖς τόποις τούτοις μάλιστα, οἷον μασχάλη, ἐν ᾧ μάλιστα καὶ τοῖς ἄλλοις.

[878a] Διὰ τί, ἐὰν μὲν ἐκ τοῦ σπέρματος τοῦ ἡμετέρου γένηται τὸ ζῷον, τοῦτο ἡμέτερον ἔκγονόν ἐστιν, ἐὰν δὲ ἐξ ἄλλου τινὸς ἢ μέρους ἢ ἀποκρίσεως, οὐχ ἡμέτερον; γίνεται γὰρ σηπομένων πολλὰ καὶ ἐκ τοῦ σπέρματος. τί δὴ οὖν, ἐὰν μὲν τοιοῦτον οἶον ἡμεῖς, ἡμέτερον, ἐὰν δὲ ἀλλότριον, οὐ; ἢ γὰρ ἅπαντα προσήκει ἢ οὐθέν. ἢ πρῶτον μὲν, ὅτι οὕτω μὲν ἐξ ἡμετέρου γίνεται, ἐκείνως δὲ ἐξ ἀλλοτρίου, ὅσα ἐξ ἀποκαθάρματος γίνεται καὶ ἐκκρίσεως; καὶ ὅλως οὐθέν τῶν τοῦ ζῶου ζῷον γεννᾷ ἀλλ' ἢ τὸ σπέρμα. τὸ δὲ βλάπτει καὶ τὸ κακὸν οὐθενός ἐστιν οἰκεῖον, οὐδὲ τὸ ἀλλότριον· οὐ γὰρ ταῦτο τούτου τι εἶναι καὶ τούτου ἀλλότριον ἢ ἕτερον ἢ κακόν. αἱ δὲ ἐκκρίσεις καὶ σήψεις οὐχ ἡμέτερα, ἀλλ' ἕτερα καὶ ἀλλότρια τῆς φύσεως ἡμῶν εἰσίν. οὐ γὰρ ὅσα ἐν τῷ σώματι γίνεται, τοῦ σώματος θετέον, ἐπεὶ καὶ φύματα γίνεται, ἃ αἵρουσι καὶ ἐκβάλλουσιν. καὶ ὅλως ὅσα παρὰ φύσιν, πάντα ἀλλότρια· παρὰ φύσιν δὲ πολλὰ καὶ τῶν συγγινομένων ἐστίν. εἰ οὖν ἐκ μόνου τούτου τῶν ἡμετέρων γίνεται ζῷον, ὀρθῶς ἂν τὸ ἐκ τούτου γινόμενον ἔκγονον ἡμέτερον εἴη μόνον. καὶ ἐκ τοῦ σπέρματος δὲ ἂν τι ἄλλο γένηται, οἶον σκώληξ σαπέντος, ἢ καὶ ἐν τῇ μήτρᾳ διαφθαρέντος, οἶον ἃ λέγεται τέρατα, οὐκ ἔκγονα λεκτέον. ὅλως γὰρ ἐκ διεφθαρμένου γινόμενα οὐκέτι ἐξ ἡμετέρου ὄντος γίνεται, ἀλλ' ἐξ ἀλλοτρίου, ὥσπερ τὰ ἐκ τῶν ἀποκρίσεων, οἶον τὸ ἐκ τῆς κόπρου. σημεῖον δὲ ὅτι ἐκ διεφθαρμένου πάντα τὰ τοιαῦτα γίνεται· μὴ ἐκ διαφθειρομένου γὰρ τοιοῦτον πέφυκε γίνεσθαι οἶον ἂν ἢ ἐξ οὗ τὸ σπέρμα, ἐὰν ἐξ ἵππου, ἵππος, ἐὰν δὲ ἐξ ἀνθρώπου, ἄνθρωπος. καὶ αὐτό τε οὐ τιμῶμεν τὸ σπέρμα, οὐδὲ πᾶν τὸ ἐν τῇ γενέσει περαινόμενον. καὶ γὰρ ὑγρὸν καὶ ὄγκος τις καὶ σὰρξ γίνεται. ποτὲ δέ, διὰ τὸ μήπω ἔχειν τὴν φύσιν, ἀλλ' ἢ τοσοῦτον μόνον τῆς φύσεως, ὅτι οὕτω διάκειται ὥστε γενέσθαι ἐξ αὐτοῦ τοιοῦτον οἶον ἡμεῖς· ἐκ δὲ διεφθαρμένου οὐδὲ τοιοῦτον. διὰ ταῦτα οὔτε ἐξ ἑτέρου τῶν ἐν ἡμῖν οὔτε ἐκ τούτου διεφθαρμένου ἢ ἀτελῶς ἔχοντος τὸ ἔκγονόν ἐστιν ἡμέτερον.

Διὰ τί ἐν τῷ ὕδατι ἤττον δύνανται ἀφροδισιάζειν οἱ ἄνθρωποι; ἢ ὅτι ἐν ὕδατι οὐθέν τήκεται, ὅσα ὑπὸ πυρὸς τήκεται, οἶον μόλιβδος ἢ κηρός· ἢ δὲ γονὴ τηκομένη φαίνεται πυρί· πρὶν μὲν γὰρ ἢ τριῖσις ἐκθερμάνῃ, οὐ τήκεται. οἱ δὲ ἰχθύες οὐ τρίψει ὀχεύουσιν.

[878b] Διὰ τί τὸ ἀφροδισιάζειν ἡδιστον, καὶ πότερον ἐξ ἀνάγκης ἢ ἕνεκά τινος ὑπάρχει τοῖς ζώοις; ἢ ἡδὺ μὲν ἐστίν ἤτοι διὰ τὸ ἀπὸ παντὸς τοῦ σώματος ἀπιέναι τὸ σπέρμα, ὥσπερ τινές φασιν, ἢ καὶ

ἀπὸ παντὸς μὲν μὴ ἀπιέναι, διὰ δὲ τοιούτου εἰς ὃ πάντες συντείνουσιν οἱ πόροι τῶν φλεβῶν; οὔσης οὖν τῆς ἡδονῆς ὁμοίας τῆς ἐν τῷ κνησμῷ, τοῦτο συμβαίνει γίνεσθαι ὥσπερ δι' ὅλου τοῦ σώματος. ὁ δὲ κνησμός ἡδύς ἐστιν, ὑγροῦ ἐξόδος πνευματώδους ἐγκατακεκλεισμένου παρὰ φύσιν. ἡ δὲ γονὴ τοιούτου εἰς τὸ κατὰ φύσιν ἐξόδος. ἔστι δὲ καὶ ἐξ ἀνάγκης ἡδὺ καὶ ἔνεκά τινος, ἐξ ἀνάγκης μὲν ὅτι ἡ εἰς τὸ κατὰ φύσιν ὁδὸς ἡδύ ἐστιν, ἐὰν ἡ αἰσθητή, ἔνεκα δὲ τινος ἵνα γένεσις ἢ ζῶων· διὰ γὰρ τὴν ἡδονὴν μᾶλλον ὁρμᾷ πρὸς τὴν μῖξιν τὰ ζῶα.

Διὰ τί ἡ λαγνεῖα πρὸς νοσήματ' ἔνια τῶν ἀπὸ φλέγματος συμφέρει; ἢ ὅτι περιττώματός ἐστιν ἐξόδος, ὥστε συνεκκρίνεται πολλὴ περίπτωσις; τὸ δὲ φλέγμα περίπτωμα.

Διὰ τί τὰ ἀφροδίσια τὴν κοιλίαν ψύχει καὶ ξηραίνει; ἢ ψύχει μὲν, ὅτι ἐκκρίνεται τὸ θερμὸν ἐν τῇ μίξει; ξηραίνει δὲ ἡ μῖξις· ἐξατμίζεται γὰρ τοῦ θερμοῦ ἐξιόντος, ἐξέρχεται δὲ ψυχομένου. ἔτι καὶ ἡ θερμότης ἐν τῇ ὁμιλίᾳ ξηραίνει.

Διὰ τί, ὅσοις αἱ βλεφαρίδες ῥέουσι, λάγνοι; ἢ διὰ τὸ αὐτὸ καὶ διότι οἱ φαλακροί; ἔστι γὰρ μόρια ἅμφω ταῦτα τοῦ αὐτοῦ. ἔστι δὲ τὸ αἷτιον· ὁπόσαι πρεσβυτέρου γινομένου μὴ αὐξάνονται τῶν συγγενικῶν τριχῶν, ἅπασαι τοῦτο πάσχουσιν ἐν ταῖς λαγνεῖαις. κεφαλὴ γὰρ καὶ ὀφρὺς καὶ βλεφαρίς συγγενικαὶ τρίχες. τούτων δὲ μόνον ἐνίοις αἱ ὀφρὺες δασύνονται πρεσβυτέροις γινομένοις (δι' ἣν δὲ αἰτίαν, εἴρηται ἐν ἄλλοις), αἱ ἕτεραι δὲ διὰ τὸ αὐτὸ ἅμφω λείπουσιν. αἷτιον δὲ ὅτι καταψύχει τὰ ἄνω ἢ λαγνεῖα ὀλίγαιμα ὄντα, ὥστε οὐ πέττει τὴν τροφήν ὁ τόπος· οὐ λαμβάνουσαι δὲ τροφήν ἐκρέουσιν αἱ τρίχες.

Διὰ τί οὐρητιῶντες οὐ δύνανται ἀφροδισιάζειν; ἢ ὅτι πλήρεις γίνονται οἱ πόροι; τὸ δὲ πλεῆρες ὑγροῦ οὐ δέχεται ἄλλο ὑγρόν.

Διὰ τί αἱ ἱξίαι τοὺς ἔχοντας κωλύουσι γενεᾶν, καὶ ἀνθρώπους καὶ τῶν ἄλλων ζῶων ὃ τι ἂν ἔχη; ἢ ὅτι ἡ ἱξία γίνεται μεταστάντος πνεύματος· διὸ καὶ ὠφελεῖ πρὸς τὰ μελαγχολικά. ἔστι δὲ καὶ ὁ ἀφροδισιασμός μετὰ πνεύματος [879a] ἐξόδου. εἰ οὖν ὁδοποιεῖται ἡ ὁρμὴ γινομένου αὐτοῦ, οὐ ποιεῖ ὁρμᾶν τὸ σπέρμα, ἀλλὰ καταψύχεται· μαραίνει οὖν τὴν συντονίαν τοῦ αἰδοίου.

Διὰ τί οἱ ἀφροδισιάζοντες ἐκλύονται καὶ ἀσθενέστεροι γίνονται ὥς ἐπὶ τὸ πολὺ; πότερον διὰ τὸ ἀπὸ πάντων ἐκκρισιν εἶναι τὸ σπέρμα, ὥστε οἶον οἰκοδομήματος αἱ ἀρμονίαι, καὶ τοῦ σώματος

οὕτω σειομένη ἢ σύνθεσίς ἐστι τῷ ἀπεληλυθέναι τι, οἷον εἰ τὸ αἷμα ἐξέλθοι ἢ πᾶν ὃ τι ἄλλο μέρος. οὕτω σφόδρα ἐπικαίρον τὸ ἐξιόν ἐστι, καὶ ὃ ἐκ πολλῆς γίνεται τροφῆς ὀλίγον, οἷον τὸ ἀμύλιον ἐκ τοῦ σταιτός.

Διὰ τί οἱ ἀφροδισιάζοντες καὶ οὐρητιῶντες ἐντείνουσιν; ἢ ὅτι πληρουμένων τῶν πόρων ὑγρότητος, τὸ σπέρμα ὑπεξιὸν ἐν ἐλάττονι τόπῳ πλείονά τε ὄγκον ποιεῖ καὶ αἶρει; ἐπικέεται γὰρ τὸ αἰδοῖον ἐπὶ τοῖς πόροις.

Διὰ τί ἡ σύντασις γίνεται τοῦ αἰδοίου καὶ ἡ αὔξησις; ἢ διὰ δύο, διὰ τε τὸ βάρος ἐπιγίνεσθαι ἐν τῷ ὀπισθεν τῶν ὄρχεων αἶρεσθαι (ὑπομόχλιον γὰρ οἱ ὄρχεις γίνονται) καὶ διὰ τὸ πνεύματος πληροῦσθαι τοὺς πόρους. ἢ τοῦ ὑγροῦ αὐξανομένου καὶ μεθισταμένου ἢ ἐξ ὑγροῦ γινομένου ὁ ὄγκος μείζων γίνεται; τὰ λῖαν δὲ μεγάλα ἦττον αἶρεται διὰ τὸ πορρωτέρῳ τὸ βάρος τοῦ ὑπομοχλίου γίνεσθαι.

Διὰ τί οἱ ἀφροδισιάζοντες ἢ οἱ τοιοῦτοι δυσώδεις, οἱ δὲ παῖδες οὐ; καὶ τοῦ καλουμένου γράσου ὄζουσιν. ἢ τῶν πνευμάτων, ὥσπερ εἴρηται, τὰ μὲν τῶν παιδίων πέττει τὸ ὑγρὸν καὶ τοὺς ἰδρώτας, οἱ δὲ τῶν ἀνδρῶν ἄπεπτοι;

Διὰ τί ἐν τῷ θέρει οἱ μὲν ἄνδρες ἦττον δύνανται ἀφροδισιάζειν αἱ δὲ γυναῖκες μᾶλλον, καθάπερ καὶ ὁ ποιητὴς λέγει ἐπὶ τῷ σκολύμῳ “μαχλόταται δὲ γυναῖκες, ἀφαιρότατοι δὲ τοὶ ἄνδρες.” πότερον ὅτι οἱ ὄρχεις καθιένται μᾶλλον ἢ ἐν τῷ χειμῶνι; ἀνάγκη δέ, εἰ μέλλει ἀφροδισιάζειν, ἀνασπάσαι. ἢ ὅτι αἱ θερμαὶ φύσεις ἐν τῷ θέρει συμπίπτουσιν ὑπερβάλλοντος τοῦ θερμοῦ, αἱ δὲ ψυχραὶ θάλπουσιν; ἔστι δὲ ὁ μὲν ἀνὴρ ξηρὸς καὶ θερμός, ἡ δὲ γυνὴ ψυχρὰ καὶ ὑγρά. τοῦ μὲν οὖν ἀνδρὸς ἡμαύρωται ἡ δύναμις, τῶν δὲ θάλλει ἐπανισουμένη τῷ ἐναντίῳ.

Διὰ τί ἔνιοι ἀφροδισιαζόμενοι χαίρουσι, καὶ οἱ μὲν ἅμα δρῶντες, οἱ δ' οὐ; ἢ ὅτι ἔστιν ἐκάστη περιττώσει τόπος [879b] εἰς ὃν πέφυκεν ἀποκρίνεσθαι κατὰ φύσιν, καὶ πόνου ἐγγινομένου τὸ πνεῦμα ἐξιὸν ἀνοιδεῖν ποιεῖ, καὶ συνεκκρίνει αὐτήν, οἷον τὸ μὲν οὔρον εἰς κύστιν, ἡ δ' ἐξικμασμένη τροφή εἰς κοιλίαν, τὸ δὲ δάκρυον εἰς ὄμματα, μύξαι δ' εἰς μυκτῆρας, αἷμα δὲ εἰς φλέβας. ὁμοίως δὴ τούτοις καὶ ἡ γονὴ εἰς ὄρχεις καὶ αἰδοῖα. οἷς δὴ οἱ πόροι μὴ κατὰ φύσιν ἔχουσιν, ἀλλ' ἢ διὰ τὸ ἀποτυφλωθῆναι τοὺς εἰς τὸ αἰδοῖον, οἷον συμβαίνει τοῖς εὐνούχοις καὶ εὐνουχίαις, ἢ καὶ ἄλλως, εἰς τὴν

ἔδραν συρρεῖ ἡ τοιαύτη ἱκμάς· καὶ γὰρ διεξέρχεται ταύτη. σημεῖον δ' ἐν τῇ συνουσίᾳ ἡ συναγωγή τοῦ τοιούτου τόπου καὶ ἡ σύντηξις τῶν περὶ τὴν ἔδραν. ἐὰν οὖν υπερβάλλῃ τις τῇ λαγνείᾳ, τούτοις ἐνταῦθα συνέρχεται, ὥστε ὅταν ἡ ἐπιθυμία γένηται, τοῦτ' ἐπιθυμεῖ τῆς τρίψεως εἰς ὃ συλλέγεται. ἡ δ' ἐπιθυμία καὶ ἀπὸ σιτίων καὶ ἀπὸ διανοίας γίνεται. ὅταν γὰρ κινήθῃ ὑφ' ὅτουοῦν, ἐνταῦθα τὸ πνεῦμα συντρέχει, καὶ τὸ τοιοῦτο περίττωμα συρρεῖ οὗ πέφυκεν. κὰν μὲν λεπτὸν ἦ ἡ πνευματῶδες, τούτου ἐξελθόντος, ὥσπερ αἱ συντάσεις τοῖς παισὶ καὶ τοῖς ἐν ἡλικίᾳ, ἐνίοτε οὐθενὸς ὑγροῦ ἐκκριθέντος, παύονται. ὅταν δὲ κατασβεσθῇ τὸ ὑγρόν. ἐὰν δὲ μηδέτερον τούτων πάθῃ, ἐπιθυμεῖ ἕως ἂν τι τούτων συμβῇ. οἱ δὲ φύσει θηλυδρῖαι οὕτω συνεστᾶσιν ὥστ' ἐκεῖ μὲν μὴ ἐκκρίνεσθαι ἢ ὀλίγην, οὐπὲρ τοῖς ἔχουσι κατὰ φύσιν ἐκκρίνεται, εἰς δὲ τὸν τόπον τοῦτον. αἴτιον δὲ ὅτι παρὰ φύσιν συνεστᾶσιν· ἄρσενες γὰρ ὄντες οὕτω διάκεινται ὥστε ἀνάγκη τὸν τόπον τοῦτον πεπηρῶσθαι αὐτῶν. πῆρως δὲ ἡ μὲν ὅλως ποιεῖ φθόρον, ἡ δὲ διαστροφὴν. ἐκείνη μὲν οὖν οὐκ ἔστιν· γυνὴ γὰρ ἂν ἐγένετο. ἀνάγκη ἄρα παρεστράφθαι καὶ ἄλλοθί που ὁρμᾶν τῆς γονικῆς ἐκκρίσεως. διὸ καὶ ἅπληστοι, ὥσπερ αἱ γυναῖκες· ὀλίγη γὰρ ἡ ἱκμάς, καὶ οὐ βιάζεται ἐξιέναι, καὶ κατανύχεται ταχύ. καὶ ὅσοις μὲν ἐπὶ τὴν ἔδραν, οὗτοι πάσχειν ἐπιθυμοῦσιν, ὅσοις δ' ἐπ' ἀμφοτέρα, οὗτοι καὶ δρᾶν καὶ πάσχειν· ἐφ' ὁπότερα δὲ πλεῖον, τούτου μᾶλλον ἐπιθυμοῦσιν. ἐνίοις δὲ γίνεται καὶ ἐξ ἔθους τὸ πάθος τοῦτο. ὅσα γὰρ ἂν ποιῶσι, συμβαίνει αὐτοῖς χαίρειν καὶ προΐεσθαι τὴν γονὴν οὕτως. ἐπιθυμοῦσιν οὖν ποιεῖν οἷς ἂν ταῦτα γίνηται, καὶ μᾶλλον τὸ ἔθος ὥσπερ φύσις γίνεται. διὰ τοῦτο ὅσοι ἂν μὴ πρὸ ἥβης ἀλλὰ περὶ ἥβην ἐθισθῶσιν ἀφροδισιάζεσθαι, [880a] διὰ τὸ γίνεσθαι αὐτοῖς ἐν τῇ χρειᾷ τὴν μνήμην, ἅμα δὲ τῇ μνήμῃ τὴν ἡδονήν, διὰ δὲ τὸ ἔθος ὥσπερ πεφυκότες ἐπιθυμοῦσι πάσχειν· τὰ μέντοι πολλὰ καὶ τὸ ἔθος ὥσπερ πεφυκόσι γίνεται. ἐὰν δὲ τύχῃ λάγνος ὢν καὶ μαλακός, καὶ θάπτον ἕκαστα τούτων συμβαίνει.

Διὰ τί μάλιστα αἰσχύνονται ὁμολογεῖν οἱ ἐπιθυμοῦντες ἀφροδισιάζεσθαι, ἀλλ' οὐ πιεῖν οὐδὲ φαγεῖν οὐδὲ ἄλλο τῶν τοιούτων οὐδέν; ἢ ὅτι τῶν μὲν πλείστων ἀναγκαῖαι αἱ ἐπιθυμίαι, ἔνια δὲ καὶ ἀναιρεῖ τοὺς μὴ τυγχάνοντας· ἡ δὲ τῶν ἀφροδισίων ἐκ περιουσίας ἐστίν.

Διὰ τί οἱ μὲν ἄνδρες τοῦ χειμῶνος, αἱ δὲ γυναῖκες τοῦ θέρους ὁρμητικώτεραι πρὸς τὰ ἀφροδίσια; ἢ ὅτι οἱ μὲν ἄνδρες θερμοὶ

μᾶλλον καὶ ξηροὶ τὰς φύσεις, αἱ δὲ γυναῖκες ὑγραὶ καὶ κατεψυγμέναι; τοῖς μὲν οὖν τὸ ὑγρὸν καὶ τὸ θερμὸν αὐταρκες πρὸς τὴν ὀρμὴν τοῦ χειμῶνος (ἡ δὲ τοῦ σπέρματος γένεσις ἐκ τούτων), ταῖς δὲ τὸ θερμὸν ἔλαττον καὶ τὸ ὑγρὸν ἐστὶ πεπηγὸς διὰ τὴν ἔνδειαν τοῦ πυρός· τοῦτο δὲ θέρουσ. ταῖς μὲν οὖν σύμμετρον τὸ θερμὸν, τοῖς δὲ πλέον τοῦ ἱκανοῦ· τὸ γὰρ ἄγαν πολὺ ἐκλύει τῆς δυνάμεως. διὸ καὶ τὰ παιδιά τοῦ θέρους λεπτότερα· συμβαίνει γὰρ πῦρ ἐπὶ πῦρ φέρειν.

Διὰ τί ὅσοι θερμοὶ τὴν φύσιν, ἐὰν ἰσχυροὶ ὥσι καὶ εὐτραφεῖς, ἐὰν μὴ ἀφροδισιάσωσι, χολή τε προΐσται αὐτοῖς πολλάκις καὶ ἐκπικρον ὑποχωρεῖ καὶ φλέγμα ἀλμυρὸν γίνεται, καὶ ἀλλοχροοῦσιν; ἢ ὅτι μετὰ τοῦ σπέρματος αἰεὶ περίττωμα συναπέρχεται; διὸ καὶ ἐνίοις τῶν πνευματικῶν ἰχθύων πλύντρον ὄζει ἡ γονή. ἀφροδισιάζουσι μὲν οὖν τοῦτο συναπέρχεται, ὥστ' οὐ λυπεῖ· μὴ ἀπτομένοις δὲ τῆς ὁμιλίας τὸ περίττωμα ἐκπικροῦται ἢ ἀλμυρὸν γίνεται.

Διὰ τί ἀφροδισιαστικοὶ οἱ μελαγχολικοί; ἢ ὅτι πνευματώδεις, τὸ δὲ σπέρμα πνεύματος ἐξοδός ἐστιν. οἷς οὖν πολὺ τὸ τοιοῦτον, ἀνάγκη πολλάκις ἐπιθυμεῖν τούτους ἀποκαθαίρεσθαι· κουφίζονται γάρ.

Διὰ τί καὶ οἱ ὄρνιθες καὶ οἱ δασεῖς ἄνθρωποι λάγνοι; πότερον ὅτι ὑγρότητα ἔχουσι πολλήν; ἢ οὐ (τὸ γὰρ θῆλυ ὑγρὸν μὲν, ἀλλ' οὐ δασύ), ἀλλ' ὅτι ἀμφοτέραι αἱ φύσεις πεπτικαὶ πολλῆς ὑγρότητος διὰ θερμότητα; σημεῖον δὲ αἱ τρίχες καὶ τὰ πετερά. ἢ ὅτι πολὺ τὸ ὑγρὸν, καὶ κρατεῖται ὑπὸ τοῦ θερμοῦ; οὔτε γὰρ ἂν μὴ πολλῆς οὔσης τῆς ὑγρότητος [880b] οὔτε μὴ κρατουμένης ἐξεφύετο τοῖς μὲν αἱ τρίχες τοῖς δὲ τὰ πετερά. τὸ δὲ σπέρμα γίνεται ἐν τοῖς τοιούτοις πλεῖστον καὶ τόποις καὶ ὥραις, οἷον ἐν τῷ ἔαρι· ἡ γὰρ φύσις αὐτοῦ ὑγρὰ καὶ θερμή. διὰ ταῦτο δὲ καὶ οἱ ὄρνιθες λάγνοι καὶ οἱ χωλοί· ἡ γὰρ τροφή ἀμφοτέροις κάτω μὲν ὀλίγη διὰ τὴν ἀναπηρίαν τῶν σκελῶν, εἰς δὲ τὸν ἄνω τόπον ἔρχεται καὶ εἰς σπέρμα συγκρίνεται.

Διὰ τί, ἐὰν ἀφροδισιάξῃ ὁ ἄνθρωπος, οἱ ὀφθαλμοὶ ἀσθενοῦσι μάλιστα; ἢ δῆλον ὅτι ἀπολείποντος τοῦ ὑγροῦ τοῦτο γίνεται; τεκμήριον δ' ὅτι ἡ γονὴ ψυχρά ἐστιν· οὐ γὰρ γίνεται ὑγρά, ἐὰν μὴ διαθερμάνῃ τὰ θερμά. οὐδὲ δεῖται τήξεως· κέχυται γὰρ ἐν τῷ ἀνθρώπῳ ὥσπερ τὸ αἶμα.

Ε. ΟΣΑ ΑΠΟ ΚΟΠΟΥ.

Διὰ τί μακροὶ μὲν ὄντες οἱ περίπατοι ἐν τοῖς ὁμαλέσι κοπιαιώτεροί εἰσι τῶν ἀνωμάτων, βραχεῖς δὲ ἀκοπώτεροις ἢ ὅτι ἢ τε πολλὴ κίνησις ποιεῖ κόπον καὶ ἢ ἰσχυρά. τοιαύτη δὲ ἢ σπασματώδης, πολλὴ δὲ ἢ συνεχὴς καὶ μία. ἐν μὲν οὖν τοῖς ἀνάντεσιν, ἐὰν ἢ μακρά, ἀνάπαυσις γίνεται ἢ μεταβολή, καὶ οὐ μακρὰ ἢ κίνησις, οὐδὲ ἵππων αὐτῶν, διὰ τὴν μεταβολήν· ἐν δὲ τοῖς ὁμαλέσιν ἢ ὁμοιότης τοῦ σχήματος οὐ διαλαμβάνει οὐδὲ ἀναπαύει τὰ μέρη, ἀλλὰ συνεργάζεται πρὸς τὸ συνεχῇ τὴν κίνησιν εἶναι. ὅταν δὲ ἢ βραχεῖα, διὰ μὲν τὸ πλῆθος τῆς κινήσεως ἐν τοῖς ἐπιπέδοις οὐ γίνεται κόπος· ἐν δὲ τοῖς ἀνάντεσιν διὰ τὸ τὴν μεταβολήν ἰσχυρὰν γίνεσθαι καὶ ἐναντίαν, ὅτε μὲν ἄνω ὅτε δὲ κάτω, ποιεῖ κόπον. τοιαύτη δέ, ὡς φαμέν, ἐν τοῖς ἀνάντεσιν, ἐν δὲ τοῖς πεδινοῖς τούναντίον.

Διὰ τί τοῖς λειποψυχοῦσι καὶ τοῖς ἐκ τῶν γυμνασίων διαλυομένοις ἐλάττους τε οἱ ὄγκοι καὶ ὀξύτεραι δοκοῦσιν εἶναι αἱ φωναί; ἢ ὅτι αἱ τε φωναὶ ἐλάττους φαινόμεναι ὀξύτεραι φαίνονται (σημεῖον δὲ ὅτι μιμούμενοι τοὺς πόρρωθεν ὀξὺ φθέγγονται) καὶ οἱ ὄγκοι ἐλάττους;

Διὰ τί ἢ γαστήρ μόνον λεπτύνεται τῶν γυμναζομένων; ἢ ὅτι πλείστη ἢ πιμελὴ περὶ τὴν γαστέρα;

Διὰ τί τὸ πῖον τετριμμένον γίνεται τοῖς πονοῦσιν; ἢ διότι τὸ πῖον τήκεται θερμαινόμενον, ἢ δὲ κίνησις θερμαίνει, ἢ δὲ σὰρξ οὐ τήκεται.

Διὰ τί δὲ τὰ περὶ τὴν κοιλίαν πιότατα; πότερον ὅτι [881a] ἐγγύς ἐστι τῆς τροφῆς; ἐν ὅσῳ οὖν τᾶλλα παρ' ἐκείνης λαμβάνει, αὐτὴ πολλάκις λαμβάνει. ἢ ὅτι ἥκιστα πονεῖ· καμπὰς γὰρ οὐκ ἔχει.

Διὰ τί οἱ κόποι μᾶλλον παύονται, ὅταν τις τῷ ἐλαίῳ ὕδωρ συμμίξας ἀνατρίψῃται; ἢ ὅτι μᾶλλον εἰσδύεται τὸ ἔλαιον μετὰ τοῦ ὕδατος; ἐὰν δὲ αὐτὸ καθ' αὐτὸ ἦ, οὐχ ὁμοίως παρεισδύνει διὰ τὸ ἐπιπολαστικὸν εἶναι. μᾶλλον οὖν μαλάττεται τὸ σῶμα εἰσδυομένου, ἐπεὶ τὸ ἔλαιόν ἐστι φύσει θερμόν, τὰ δὲ θερμὰ καὶ ξηραίνει καὶ σκληρύνει, πρὸς δὲ τοὺς κόπους ἀξύμφορόν ἐστιν ἢ ξηρασία καὶ ἢ σκληρότης· μετὰ δὲ τοῦ ὕδατος ἀνατριφθὲν ἥττον ξηραίνει.

Διὰ τί τοῖς κοπιῶσι προστάττουσιν ἐμεῖν, εἴπερ ὁ ἔμετος κοπῳδὲς ἐστίν; ἢ κόπος γίνεται ὅσῳ θλωμένων καὶ πιεζομένων καὶ

κοπιωμένων, ταῦτα δὲ ὑπὸ τῶν ἐκτός τινος πάσχοι ἂν ἢ τῶν ἐν τῷ σώματι, καὶ τοῦτο διττῶς· ἢ γὰρ σαρκῶν ὑπερτεινουσῶν τὴν δύναμιν αὐτῶν, ἢ σώματος μιχθέντος συχνοῦ τῷ ἄλλῳ σώματι, χώραν οἰκείαν οὐκ ἔχοντος, οἷα τὰ περιττώματά ἐστιν. πάντα γὰρ τὰ ἐκτός ἡμῖν περιεπτόμενα βάρη κοπωδέστερα τῶν τοῦ σώματος μερῶν, κὰν τύχη σταθμῷ ὄντα αὐτῶν ἐλαφρότερα. σημεῖον δὲ τῶν εἰρημένων· οἱ γὰρ πλεῖον βεβρωκότες καὶ πεπωκότες, ἔλαττον πονήσαντες ἢ νήστεις ὄντες, μᾶλλον κοπιῶσι διὰ τὸ μὴ τὴν οἰκείαν χώραν ἔχειν τὰ σιτία ὄντα ἅπεπτα. ἐπεὶ δὲ ὁ κόπος σύντηξιν ποιεῖ, ἢ δὲ σύντηξις περίττωμά ἐστι, τοῦτό ἐστιν ὃ τὸν κόπον ἐν ἡμῖν ποιεῖ, πλανώμενον ἀτάκτως καὶ προσπίπτον ὁστοῖς τε καὶ νεύροις καὶ τοῖς ἐντὸς τῆς σαρκὸς ἀραιοῖς οὖσι καὶ ἀνεωγμένοις. ὁ οὖν ἔμετος ἐξάγων αὐτὸ ὃν αἴτιον τοῦ κόπου, εἰκότως ἀκόπους ποιεῖ· λείπει γὰρ οἷον ἦν ἐν ἀρχῇ τοῦ πόνου τὸ σῶμα. κοπῶδες δ' ἐστὶν ὁ ἔμετος οὐ τῇ τῆς γινομένης ἐν αὐτῷ κινήσεως ὑπερβολῇ, ἀλλ' ὅταν συμβῇ μὴ καλῶς ἐξεμέσαι· λειφθέντων γὰρ πολλῶν σιτίων, καὶ περιττωμάτων τούτοις ἐνόντων, τὸν τοῦ ἐμέτου κόπον γίνεσθαι συμβαίνει, καθάπερ ἐπὶ τῶν πεπληρωμένων εἴρηται. εἰ οὖν μὴδ' ἐκείνοις ὁ πόνος ἐστὶ τοῦ κόπου αἴτιος, ἀλλὰ τὸ οὕτως ἔχοντας πονῆσαι, οὐδ' ἂν τοῖς μὴ ἐξαιροῦσι τὰ σιτία ὁ ἔμετος εἴη τοῦ κόπου αἴτιος· χρῆν γὰρ πᾶσι τοῖς ἐμοῦσι γίνεσθαι κόπον, γίνονται δὲ ἀκοπώτεροι πολλοὶ ἐμέσαντες.

Διὰ τί κοπιαιώτερόν ἐστι τῷ βραχίονι τὸ διὰ κενῆς [881b] ρίπτειν ἢ λιθάζοντα; ἢ ὅτι σπασμωδέστερον τὸ διὰ κενῆς ἐστίν; οὐ γὰρ ἀπερείδεται πρὸς οὐδέν, ὥσπερ ὁ βάλλων πρὸς τὸ ἐν τῇ χειρὶ βέλος. ὁμοίως δὲ τούτῳ καὶ ὁ πένταθλος πρὸς τοὺς ἀλτῆρας καὶ ὁ θέων παρασείων πρὸς τὰς χεῖρας. διὸ ὁ μὲν μεῖζον ἄλλεται ἔχων ἢ μὴ ἔχων ἀλτῆρας, ὁ δὲ θᾶττον θεῖ παρασείων ἢ μὴ παρασείων.

Διὰ τί ἡ ταχυδρομία καὶ ἐπ' ἀνθρώπου καὶ ἐπὶ τῶν ἄλλων ζώων νοσηματικούς ποιεῖ τὰ περὶ τὴν κεφαλὴν; καίτοι ὅλως ὁ δρόμος κατασπᾶν δοκεῖ κάτω τὰ περιττώματα, ὥσπερ ὁ περίπατος· διὸ καὶ παχύνονται τὰ σκέλη οἱ πολλὰ περιπατοῦντες, ὅτι εἰς τὰ κάτω ὑπονοστεῖ ἄνωθεν καὶ ἡ τροφή καὶ τὰ περιττώματα. ἢ ἡ μὲν κίνησις ταῦτό ποιεῖ, ἀλλ' ἡ ταχεῖα διὰ τὴν συντονίαν καὶ τὴν ἀπνευστίαν ἐκθερμαίνει τὴν κεφαλὴν, καὶ τὰς φλέβας ἐμφυσᾷ τὰς ἐν αὐτῇ, καὶ σπαστικὰς τῶν θύραθεν ποιεῖ δυνάμεων, οἷον ψύχους καὶ ἀλέας καὶ τῶν ἐκ τοῦ θώρακος, ὧν εἰσιόντων νοσεῖν ἀναγκαῖον τὸν τόπον ἐστίν.

Διὰ τί κοπιῶσι μὲν μᾶλλον ἐν τοῖς ὁμαλοῖς ἢ ἐν τοῖς ἀνωμάλοις τόποις, θάττον δὲ βαδίζουσι τὴν ὁμαλὴν ὁδὸν ἢ τὴν ἀνώμαλον; ἢ ὅτι ἀκοπώτερον μὲν ἐστὶ τὸ μὴ ἀεὶ ἐν τῷ αὐτῷ σχήματι ποιεῖσθαι τὴν κίνησιν, ὃ συμβαίνει ἐν τῇ ἀνωμάλῳ πορείᾳ μᾶλλον; θάττον δὲ πορεύονται, ὅτι ἦττον παρὰ φύσιν κινοῦνται. ἐν μὲν οὖν τῷ ὁμαλῷ μικρὰ ἢ ἄρσις καὶ θέσις καὶ πυκνὴ ἐστίν, ἐν δὲ τῷ ἀνωμάλῳ τοῦναντίον. ἔστι δὲ τὸ αἶρειν παρὰ φύσιν· βία γάρ ἐστι πᾶσα ἄρσις. τὸ δὲ παρ' ἐκάστην βάσιν γινόμενον μικρὸν πολὺ γίνεται παρὰ πολλάς.

Διὰ τί τὰ ἐπίπεδα κοπιαιώτερα ἐγκατακεῖσθαι τῶν κοίλων ἐστίν; ἢ διὰ τὸ αὐτὸ καὶ τὰ κυρτὰ τῶν ἐπιπέδων; ἐφ' ἓνα γὰρ τόπον συναθροιζόμενον τὸ βάρος ἐν τῇ καθέδρᾳ ἢ κατακλίσει τῇ θλίψει ποιεῖ πόνον. τὸ μὲν οὖν κυρτὸν τοῦ εὐθέως, τοῦτο δὲ τοῦ κοίλου μᾶλλον τοιοῦτόν ἐστι· τὸ γὰρ σῶμα ἡμῶν ἐστὶ περιφερέστερον ἢ εὐθύτερον, τῶν δὲ τοιούτων κατὰ πλεον ἄπτεται τὰ κοῖλα ἢ τὰ ἐπίπεδα. διὰ ταῦτα δὲ καὶ τὰ ἐνδιδόντα τῶν μὴ ἐνδιδόντων ἀκοπώτερά ἐστι καὶ ἐγκατακλιθῆναι καὶ ἐνέζεσθαι.

Διὰ τί οἱ βραχεῖς περίπατοι κοπῶδεις εἰσίν; ἢ ὅτι ἀνώμαλοι εἰσι; πολλάκις γὰρ ἴστασθαι ποιοῦσιν. τὸ δ' ἐκ τοῦ ἐναντίου εἰς τοῦναντίον πυκνὰ μεταβάλλειν κοπῶδές [882a] ἐστὶ· συνήθειαν γὰρ οὐδετέρῳ ποιεῖ, ὃ ἐστὶν ἄκοπον. ἀμφοῖν δ' ἅμα οὐκ ἐνδέχεται συνήθειαν γίνεσθαι.

Διὰ τί οἱ ἐπὶ τῶν ἵππων ὀχοῦμενοι, ὅσῳ ἂν μᾶλλον θέῃ ὁ ἵππος, τοσοῦτῳ μᾶλλον δακρύουσι τὰ ὄμματα; πότερον διὰ τὸ ψυχρότερον εἶναι τὸν ἀεὶ προσπίπτοντα ἀέρα, ὅσῳ ἂν ἐλάττω χρόνον ἄπτηται τοῦ σώματος, ὅπερ ἐπὶ τῶν γυμνῶν θεόντων συμβαίνει; τὸ δὲ ψυχρός δάκρυον ποιεῖ. ἢ διὰ τοῦναντίον; καὶ γὰρ τὸ θερμὸν ποιεῖ δακρύειν, οἷον ὁ ἥλιος· ἢ δὲ κίνησις θερμότητα ποιεῖ. ἢ διὰ τὴν ὑπὸ τοῦ ἀέρος πληγὴν; ὥς γὰρ οἱ ἄνεμοι ταράττουσιν οἱ ἐξ ἐναντίας τὰ ὄμματα, οὕτως ὁ ἀήρ προσπίπτων, ὅσῳ ἂν θάττον ἐλαύνῃ, τοσοῦτῳ μᾶλλον ποιεῖ τὴν πληγὴν μαλακὴν.

Διὰ τί τὰ μὲν ἄλλα τριβόμενα σαρκοῦνται μέρη, ἢ δὲ γαστήρ λεπτοτέρα γίνεται; ἢ οὐδὲ αὕτῃ ἐκ προσαγωγῆς, ἀλλὰ στιφροτέρα; οὐ μὴν ἀλλ' οὐχ ὁμοίως γε καὶ ἡ σὰρξ, διὸ καὶ τὸ πρόβλημά ἐστιν. ὅλως γὰρ ἐν τοῖς γυμνασίοις καὶ πόνοις μάλιστα λεπτύνεται ἡ γαστήρ. αἴτιον δ' ὅτι τὰ πίονα θερμαινόμενα τήκεται, καὶ τὰ φύσει τάσιν ἔχοντα μᾶλλον. τὸ δὲ δέρμα ἐστὶ φύσει ἔχον τάσιν· ἀλλὰ διὰ τὸ

πιαίνεσθαι τάχιστα ἀεί τινα ἔχει πύοτητα, ἐὰν μὴ κάμνη τινὰ νόσον. αἴτιον δὲ τούτου ὅτι ἐγγύς ἐστι τῆς τροφῆς. ἐπεὶ οὖν ὅλως ἢ πιμελὴ οὐκ ἔστι φύσει ἀλλ' ἐπικτήτον, καὶ οὐ τῶν ἀναγκαίων μερῶν ὥσπερ ἢ σάρξ, καὶ ἢ τῶν γυμνασίων κινήσεις καὶ ἢ τῆς τρίψεως θερμαίνουσαι τήκουσιν αὐτὴν καὶ τὴν τροφήν ἐκπλεονάζουσιν νέμονται τοῖς ἄλλοις μορίοις. διὸ αἱ μὲν καθέδραι τὴν κοιλίαν πιαίνουσι, τὸ δ' ἄλλο σῶμα λεπτύνουσιν, αἱ δὲ κινήσεις καὶ αἱ τρίψεις τὴν μὲν κοιλίαν λεπτύνουσιν, τὸ δ' ἄλλο σῶμα παχύνουσιν.

Διὰ τί ἐκ τῶν μακρῶν καὶ σφοδρῶν ὁδῶν καὶ δρόμων, ὅταν στῇ τις ἐπ' ἄκρων τῶν δακτύλων, σείονται τῶν ποδῶν αἱ πτέρναι καὶ σπᾶται κάτω προπετῶς; ἢ διὰ τὴν συνέχειαν καὶ σφοδρότητα τῆς κινήσεως οὐκ ἀναπαύεται ὁ σεισμὸς τῷ ἀνθρώπῳ τῶν νεύρων; τοῦ μὲν γὰρ ὅλου σώματος κρατεῖ ἡ ψυχὴ πολλάκις, μορίων δ' οὐ, ὁπόταν πῶς κινηθῇ, οἷον καὶ καρδίας καὶ αἰδοίου. αἴτιον δ' ὅτι πνεῦμα πολὺ περὶ τὰ νεῦρα ἐκκαίεται, ὃ οὐχ ἅμα ἐκψύχεται στάντι. τοῦτο οὖν σείον ὥσπερ ὑποσπῶν τῇ κινήσει κατασπᾶ τε, καὶ τοῦ πορρωτάτω ἤκιστα ποιεῖ κρατεῖν· τοιοῦτον δὲ αἱ πτέρναι, οἷον τοῖς ὀργιζομένοις τὸ κάτω χεῖλος.

[882b] Διὰ τί οἱ μὴ σφόδρα συντόνως τρέχοντες ἐν τῷ ῥυθμῷ ἀναπνεύουσιν; πότερον ὅτι πᾶς ῥυθμὸς ὠρισμένη μετρεῖται κινήσει, τοιαύτη δ' ἐστὶν ἡ δι' ἴσου οὔσα, ὅπερ οἱ τροχάζοντες ποιοῦσιν. ἅμα οὖν ἀρχόμενοι τροχάζειν ἀναπνεύουσιν, ὥστε τὴν ἀναπνοὴν δι' ἴσου γινομένην, διὰ τὸ τῇ ἴσῃ κινήσει μετρεῖσθαι, ῥυθμὸν ποιεῖν. ἢ ὅτι πᾶσα μὲν ἀπλῶς ἀναπνοὴ δι' ἴσου γίνεται τοῖς κατὰ φύσιν αὐτῇ χρωμένοις καὶ μὴ κατέχουσιν; καθημένοις μὲν οὖν καὶ βαδίζουσι μετρίως οὔσης τῆς τοῦ σώματος κινήσεως, οὐκ εὐδηλὸς ὁ ῥυθμὸς γίνεται· συντόνως δὲ τρέχουσιν, οὐ παρακολουθούσης τῇ κινήσει τῆς αἰσθήσεως, οὐ δυνάμεθα συνορᾶν τὸν τῆς ἀναπνοῆς ῥυθμόν. ἐν δὲ τῷ μετρίως τροχάζειν μέτρον ἢ κινήσεις αἰσθητὸν τῆς ἀναπνοῆς ποιοῦσα τὸν ῥυθμὸν δηλοῖ.

Διὰ τί ἐν τῷ τροχάζειν ἐκπνευματοῦσθαι δοκεῖ ἡμῖν ὁ ἀήρ; πότερον ὅτι κινούμενοι διὰ τοῦ τροχάζειν τὸν συνεχῇ τοῖς σώμασιν ἡμῶν ἀέρα κινούμεν, ὃ ἐστὶ πνεῦμα; διόπερ οὐ δοκεῖ μόνον, ἀλλὰ καὶ κατ' ἀλήθειαν ἐκπνευματοῦται ὁ ἀήρ. ἢ διότι τροχάζοντες προσκόπτομεν τῷ ἀέρι, τούτου δὲ συμβαίνοντος μᾶλλον αἰσθησιν λαμβάνομεν τοῦ ἀέρος διὰ τῆς κινήσεως. εἰκότως οὖν ἡμῖν ἐκπνευματοῦσθαι δοκεῖ· τοῦτο γὰρ συμβαίνει διὰ τὴν φορὰν.

Διὰ τί μᾶλλον θεόντες ἢ βαδίζοντες πίπτουσιν; ἢ ὅτι μᾶλλον πρὶν κινεῖσθαι αἵρουσιν; τὸ γὰρ θέειν τοῦ βαδίζειν τούτῳ διαφέρει.

Διὰ τί ποτε ἀναβαίνοντες μὲν τὰ γόνατα πονοῦμεν, καταβαίνοντες δὲ τοὺς μηρούς; ἢ ὅτι ὅταν μὲν ἀναβαίνωμεν, ἀναρριπτοῦμεν ἄνω τὸ σῶμα, καὶ ἡ σπᾶσις πολλὴ τοῦ σώματος καὶ ἡ ἀπὸ τῶν γονάτων γίνεται, διὸ πονοῦμεν τὰ γόνατα· ἐν δὲ τοῖς κατάντεσι, διὰ τὸ ὑποφέρεσθαι τοῖς σκέλεσι, τοῖς μηροῖς ἀποστηριζόμενοι πονοῦμεν αὐτούς. εἴθ' ἅπαν τὸ παρὰ φύσιν γινόμενον πόνον καὶ λύπην παρασκευάζει. ἔστι δὲ τὸ κατὰ φύσιν τοῖς μὲν γόνασιν ἢ εἰς τὸ πρόσθεν κλάσις, τοῖς δὲ μηροῖς ἢ εἰς τοῦπισθεν. ἐν μὲν οὖν τοῖς ἀνάντεσι τὰ γόνατα κλᾶται εἰς τοῦπισθεν διὰ τὸ ἀποστηρίζεσθαι βούλεσθαι, ἐν τοῖς κατάντεσι δ' οἱ μηροὶ εἰς τοῦμπροσθεν κλῶνται διὰ τὸ προπετὲς ἡμῶν εἶναι τὸ σῶμα.

Διὰ τί ποτε ἐν ταῖς ὁδοῖς τῶν μηρῶν τὸ μέσον μάλιστα πονοῦμεν; ἢ ὅτι παντὸς μακροῦ καὶ ἐνὸς ὄντος, ἐστηριγμένου δέ, τοῦ μέσου ὁ πόνος μάλιστα γίνεται; διὸ καὶ κατάγνυται [883a] μάλιστα ἐντεῦθεν. ὁ δὲ μηρός ἐστι τοιοῦτον· διὸ καὶ τὸ μέσον αὐτοῦ μάλιστα πονοῦμεν.

Διὰ τί οἱ ὑγροὶ ταχὺ πνίγονται πονήσαντες καὶ ὑπὸ τοῦ καύματος; ἢ ὅτι ἐκθερμαινόμενον τὸ ὑγρὸς ἀήρ γίνεται, καὶ κάει μᾶλλον τὸ πλεόν; ὅταν οὖν μὴ δύνηται ὑπεξάγειν διὰ τὸ πληθος, οὐ γίνεται κατάψυξις, ὥστε ταχὺ ἐκπυροῦται ὑπὸ τοῦ συμφύτου καὶ ἐπικτήτου θερμοῦ. διὸ καὶ οἱ γινόμενοι ἰδρῶτες τοῖς γυμναζομένοις καὶ ὅλως τοῖς πονοῦσι καὶ ἡ τοῦ πνεύματος ἔξοδος ὠφέλιμον· διακρινομένου γὰρ καὶ λεπτυνομένου τοῦ ὑγροῦ πνεῦμα γίνεται.

Διὰ τί τὰ σύμμετρα τῶν σωμάτων κάμνει τε πολλάκις καὶ ἀπαλλάττει ῥᾶον; ἢ διὰ ταῦτ' ἄμφω; ὁμαλὸν γὰρ τὸ σύμμετρον, τὸ δὲ ὁμαλὸν ὁμοπαθέστερον· ἐὰν οὖν τι πονήσῃ μέρος, εὐθὺς συμπονεῖ τὸ ὅλον. τὸ δὲ ἀσύμμετρον, ἅτε μᾶλλον ἀπηρητημένον, οὐ συναπολαύει τῶν μερῶν. κάμνει μὲν οὖν πολλάκις διὰ τοῦτο, ῥᾶον δὲ ἀπαλλάττει, ὅτι πᾶν κοινωνεῖ τὸ σῶμα· εἰς πλείω γὰρ διανεμόμενον τὸ πάθος γίνεται ἀσθενέστερον, ὥστε εὐαπαλλακτότερον. τὸ δὲ ἀσύμμετρον, ἅτε οὐ κοινοῦν τοῖς μέρεσιν, ἐλαττονάκις μὲν κάμνει, χαλεπώτερον δὲ ἀπαλλάττει· σφοδρὸν γὰρ τὸ πάθος.

Διὰ τί κοπιῶσι μὲν μᾶλλον ἐν τοῖς ὁμαλοῖς ἢ ἐν τοῖς ἀνωμάλοις, θᾶπτον δὲ βαδίζουσι τὴν ὁμαλὴν ἢ τὴν ἀνώμαλον; ἢ ὅτι

ἀκοπώτερον μὲν τὸ μὴ ἀεὶ ἐν τῇ ἀνωμάλῳ πορείᾳ μᾶλλον, θᾶπτον δὲ πορεύονται, ὅπου ἐν τῷ ἴσῳ χρόνῳ ἐλάττων ἢ ἀναφορά. ἐν μὲν οὖν τῷ ὁμαλῷ μικρὰ ἢ ἄρσις καὶ πυκνή, ἐν δὲ τῷ ἀνωμάλῳ τούναντίον. τὸ δὲ παρ' ἐκάστην βάσιν γινόμενον πολὺ γίνεται παρὰ πολλάς.

Διὰ τί καταβαίνοντες μὲν τὰ κατάντη τοὺς μηροὺς μάλιστα πονοῦμεν, ἀναβαίνοντες δὲ τὰς κνήμας; ἢ ὅτι ἀναβαίνοντες μὲν τῷ αἶρειν τὸ σῶμα; ἅπαν γὰρ γίνεται φορτίον τὸ σῶμα. ὃ οὖν ἅπαν ἐπίκειται καὶ ὃ αἶρομεν, τοῦτο μάλιστα πονεῖ. ἢ δὲ κνήμη τοῦτο. ἔσχατον γάρ, μῆκος ἔχον, καὶ οὐχ ὥσπερ ὁ πούς πλάτος ἔχει· διὸ σαλεύεται. ὥστε οἷον τῷ ὣμῳ τὰ βάρη κινούμεν, καὶ ἐπὶ τούτῳ ἔχομεν. τοιγαροῦν καὶ πονοῦμεν τὸν ὥμον μάλιστα. καταβαίνοντες δὲ τῷ ἐμπίπτειν τὸ σῶμα κάτω καὶ προωθεῖν παρὰ φύσιν ὁ πόνος ἐστίν, ὥστε ὃ μάλιστα ἐμπίπτει καὶ σαλεύει, τοῦτο παρέχει τὸν πόνον. ἢ μὲν οὖν κνήμη μένει, τὸ δὲ βάρος ὁ θώραξ γίνεται· ὁ δὲ μηρὸς δέχεται τε καὶ σαλεύεται διὰ τὸ μῆκος τε ἔχειν καὶ στρέφεσθαι ἄνωθεν, ἢ ὁ θώραξ ἐμπίπτει.

Διὰ τί πλείων δοκεῖ ἡ ὁδὸς εἶναι, ὅταν μὴ εἰδότες βαδίζωμεν πόση τις, ἢ ὅταν εἰδότες, ἐὰν τᾶλλα ὁμοίως ἔχοντες τύχωμεν; ἢ ὅτι τὸ εἰδέναι πόση τὸ εἰδέναι ἐστὶ τὸν ἀριθμὸν αὐτοῦ· καὶ πλείον ἀεὶ τὸ ἀόριστον τοῦ ὠρισμένου; ὥσπερ οὖν εἰ ἥδει ὅτι τοσήδε, πεπερασμένην ἀνάγκη εἶναι, οὕτω καὶ εἰ μὴ οἶδεν, ὥς ἀντιστρέφοντος παραλογίζεται ἡ ψυχὴ, καὶ φαίνεται εἶναι ἄπειρος. ἔτι τὸ ποσὸν ὠρισμένον καὶ τὸ ὠρισμένον ποσόν. ὅταν τοίνυν μὴ φαίνεται ὠρισμένον, ὥσπερ ἄπειρον φαίνεται εἶναι, διὰ τὸ τὸ πεφυκὸς ὠρίσθαι, ἐὰν μὴ ἦ ὠρισμένον, ἄπειρον εἶναι, ὥστε καὶ τὸ φαινόμενον μὴ ὠρίσθαι φαίνεσθαι ἀνάγκη πως ἀπέραντον.

Διὰ τί τοὺς μηροὺς μᾶλλον ἢ τὰς κνήμας κοπιῶσιν; πότερον ὅτι ἐγγὺς τοῦ τόπου τοῦ ἔχοντος τὸ περίττωμα, ὥστε ἂν ὑπερβάλλῃ διὰ τὴν κίνησιν τῇ θερμότητι, συσπῶσιν οἱ μῆροὶ μᾶλλον καὶ πλείον ἢ αἱ κνήμαι; ἢ διὰ τὸ συμφυεῖς εἶναι μᾶλλον τοὺς μηρούς; μάλιστα γὰρ πονοῦσι τῇ τοῦ συνεχοῦς διαστάσει. καὶ γὰρ ἂν μηδὲν ἔχοντες περίττωμα κοπιᾶσωσιν, ὅμως τοὺς μηροὺς καὶ τὴν ὀσφὺν πονοῦσι μᾶλλον. ἢ ὅτι καθάπερ οἱ βουβῶνες γίνονται πληγέντες διὰ τὴν συνάρτησιν τῶν φλεβῶν καὶ νεύρων, οὕτω καὶ οὗτος; ἐγγυτέρῳ δὲ τῆς ἀρχῆς ὁ μηρὸς. ἢ διότι μᾶλλον ἐν τῷ αὐτῷ σχήματι ὁ μηρὸς τῆς κνήμης; τοῦτο δὲ κοπιαιώτερον. ἢ ὅτι σαρκώδης, ὥστε πολὺ τὸ κατὰ φύσιν ἔχον ἐν αὐτῷ;

Διὰ τί ἐνίοις, ὅταν πονήσωσιν, ἔλκη ἐκφύουσιν; ἢ ὅταν τὸ σῶμα ἀκάθαρτον ᾖ, ἢ κίνησις θερμαίνουσα καὶ ἄλλα περιττώματα συνεξικμάζει μετὰ τοῦ ἰδρώτος; παχέα δὲ ὄντα καὶ χυμοὺς ἔχοντα μοχθηροὺς, ὀξεῖς καὶ πικροὺς καὶ ἀλμυροὺς, τὰ περιττώματα ἐκκρίνεσθαι μὲν οὐ δύναται διὰ πάχος, ἐξαίρεται δὲ διὰ τῆς σαρκὸς καὶ ἐξελκοῖ διὰ πικρότητα τοῦ χυμοῦ.

Διὰ τί τοῖς ἐκ τῶν γυμνασίων καὶ φαρμακοποσιῶν οὐκ εὐθὺς προσφέρουσι τροφήν; ἢ διότι καθαίρεται τὸ σῶμα ἔτι, καὶ οὐκ ἀναπέπταται πονοῦν, καὶ ἀποκέκριται τὰ περιττώματα;

Διὰ τί χαλεπώτερον θεῖν ἢ βαδίζειν; ἢ ὅτι πλεῖον φορτίον φέρει ὁ θεῶν; ὅταν γὰρ ᾖ μετέωρος, ἅπαν ἐφ' αὐτῷ ἔχει. ὁ δὲ βαδίζων, οἷον οἱ ἐπὶ τοῖς τειχίοις ἀναπαυόμενοι, ἐπιθείς ἔχει ἐπὶ τῷ ἡρεμοῦντι.

[884a] Διὰ τί ἐκ τῶν γυμνασίων οὐ πεινώσιν εὐθύς; πότερον διὰ τὴν ὑπόλειψιν τῆς συντήξεως, ἕως ἀντιπεφθῆ; ἢ διὰ τὸ πνεῦμα ὃ ποιεῖ ὁ πόνος ἐκ τοῦ ὑγροῦ; ἢ διὰ τὴν δίψαν ἢ γίνεται ἐκ τοῦ θερμαίνεσθαι πονοῦντας; πάντα γὰρ συμβαίνει ταῦτα.

Διὰ τί ἐξονειρωκτικοὶ εἰσιν οἱ κοπιῶντες καὶ φθισιῶντες; ἢ ὅτι ὅλως ἐξονειρωκτικοὶ οἱ θερμοὶ καὶ ὑγροί; τὸ γὰρ σπέρμα τοιοῦτόν ἐστι τὴν φύσιν. τὸ τοιοῦτο δὲ ἐξ οὗτω διακειμένων μάλιστα γίνεται, ὅταν ἡ ἀπὸ τοῦ ὕπνου θερμότης προσγένηται· μικρὰς γὰρ ῥοπῆς τὰ σώματα δεῖται, καὶ ταύτης ἔσωθεν ἀλλ' οὐκ ἔξωθεν. οἱ δὲ φθισικοὶ καὶ κοπιῶντες οὗτω διάκεινται· οἱ μὲν γὰρ κοπιῶντες διὰ τὸν κόπον καὶ τὴν κίνησιν συντήγματος θερμοῦ πλήρεις εἰσίν, οἱ δὲ φθισικοὶ διὰ τὸν κατάρρουν καὶ τὴν γινομένην θέρμην ὑπὸ τῆς φλεγμασίας.

Διὰ τί τὸ ἀριστερόν σκέλος χαλεπώτερον τρίβεσθαι ὑφ' ἑαυτοῦ πολὺν χρόνον ἢ τὸ δεξιόν; ἢ ὅτι τοῖς δεξιοῖς πονεῖν δυνάμεθα; ἐν δὲ τοῖς παρὰ φύσιν ἢ τοῦ ἀριστεροῦ σκέλους τρῖσις ἐξεστραμμένως γίνεται. τὰ δὲ παρὰ φύσιν ποιούμενα χαλεπά. τῇ δὲ ἀριστερᾷ τὰ δεξιὰ οὐθὲν ἐπίδηλον διὰ τὸ μηθετέρως ἰσχύειν.

Διὰ τί ὑγιεινὸν τὸ τροφῆς μὲν ὑποστέλλεσθαι, πονεῖν δὲ πλείω; ἢ ὅτι τοῦ νοσεῖν αἴτιον περιττώματος πλῆθος; τοῦτο δὲ γίνεται ἢ διὰ τροφῆς ὑπερβολὴν ἢ διὰ πόνων ἔνδειαν.

Διὰ τί οὐ δεῖ πυκνοῦν τὴν σάρκα πρὸς ὑγίειαν, ἀλλ' ἀραιοῦν; ὥσπερ γὰρ πόλις ὑγιεινὴ καὶ τόπος εὐπνους (διὸ καὶ ἡ θάλαττα ὑγιεινή), οὗτω καὶ σῶμα τὸ εὐπνουν μᾶλλον ὑγιεινόν. δεῖ γὰρ ἢ μὴ ὑπάρχειν μηθὲν περίττωμα, ἢ τούτου ὥς τάχιστα ἀπαλλάττεσθαι· καὶ δεῖ οὕτως ἔχειν τὰ σώματα ὥστε λαμβάνοντα εὐθὺς ἐκκρίνειν τὴν

περίττωσιν, καὶ εἶναι ἐν κινήσει καὶ μὴ ἡρεμεῖν. τὸ μὲν γὰρ μένον σήπεται, ὥσπερ ὕδωρ, τὸ δὲ σηπόμενον καὶ μὴ κινούμενον νοσοποιεῖ· τὸ δ' ἐκκρινόμενον πρὸ τοῦ διαφθαρῆναι χωρίζεται. τοῦτ' οὖν πυκνουμένης μὲν τῆς σαρκὸς οὐ γίνεται (ὥσπερ γὰρ ἐμφράττονται οἱ πόροι), ἀραιουμένης δὲ συμβαίνει. διὸ καὶ οὐ δεῖ ἐν τῷ ἡλίῳ γυμνὸν βαδίζειν· συνίσταται γὰρ ἡ σὰρξ, καὶ κομιδῇ ἀποσαρκοῦνται, καὶ ὑγρότερον τὸ σῶμα γίνεται. τὸ μὲν γὰρ ἐντὸς δὴ μένει, τὸ δ' [884b] ἐπιπολῆς ἀπαλλάττεται, ὥσπερ καὶ τὰ κρέα τὰ ἐφθὰ τῶν ὀπτῶν μᾶλλον. οὐδὲ τὰ στήθη γυμνὰ ἔχοντα βαδίζειν· ἀπὸ γὰρ τῶν ἄριστα ὠκοδομημένων ὁ ἥλιος ἀφαιρεῖ, ὃ ἥκιστα δεῖται ἀφαιρέσεως, ἀλλὰ μᾶλλον τὰ ἐντός. ἐκεῖθεν μὲν οὖν διὰ τὸ πόρρω εἶναι, ἂν μὴ μετὰ πόνου, οὐκ ἔστιν ἰδρῶτ' ἀναγαγεῖν, ἀπὸ τούτου δὲ διὰ τὸ πρόχειρον εἶναι ῥάδιον.

Διὰ τί κοπῶδεις οἱ βραχεῖς τῶν περιπάτων; ἢ ὅτι πολλάκις συνίστανται καὶ οὐχ ὁμαλῶς κινοῦνται περὶ τὰς καμπάς; τὸ δὲ τοιοῦτον κοπῶδες.

Διὰ τί ἐστηκότες ἐν τῷ ἡλίῳ μᾶλλον θερμαίνονται ἢ κινούμενοι, καὶ ταῦτα τῆς κινήσεως θερμαντικῆς οὔσης; ἢ οὐ πᾶσα κίνησις θερμαίνει, ἀλλ' ἐνία ψυχῇ, οἷον καὶ ἐπὶ τῶν τὰς χύτρας τὰς ἐψημένας φυσώντων καὶ κινούντων συμβαίνει. εἰ οὖν ἐστηκότι μὲν προσμένει τὸ θερμόν, προσμένον δὲ μᾶλλον θερμαίνει ἢ κινούμενον (ἀεὶ γὰρ τὸ σῶμα ἴδιον ἡμῶν ἀτμίδα τινὰ χλιαρὰν ἀφίησιν ἀφ' ἑαυτοῦ, ἢ θερμαίνει τὸν ἐγγὺς ἀέρα ὥσπερ δαλὸς παρών), ἡρεμούντων μὲν ἡμῶν θερμὸς γίνεται ὁ περιέχων ἡμᾶς ἀήρ διὰ τὰ εἰρημένα, κινουμένων δὲ πνεῦμα γίνεται, ὃ καταψύχει ἡμᾶς· πᾶν γὰρ πνεῦμα ψυχρόν ἐστιν.

Διὰ τί οἱ ἐπὶ τῶν ἵππων ὀχούμενοι, ὅσῳ ἂν θᾶττον θέῃ ὁ ἵππος, τοσοῦτῳ μᾶλλον δακρύουσι τὰ ὄμματα, καὶ οἱ πεζοί, ὅσῳ ἂν μᾶλλον τρέχωσιν; πότερον διὰ τὸ ψυχρὸν εἶναι τὸν προσπίπτοντα ἐέρα; τὸ γὰρ ψυχρὸς δακρύειν ποιεῖ· συστέλλον γὰρ καὶ πυκνοῦν τὴν σάρκα ἐκκαθαίρει τὸ ὑγρόν. ἢ διὰ τούναντίον; τὸ γὰρ θερμόν ποιεῖ ἰδρῶτας, τὸ δὲ δάκρυον ἰδρῶς τίς ἐστι. διὸ καὶ γίνονται ὑπὸ θερμασίας ἄμφω ταῦτα, καὶ ἀλυκά ἐστιν ὁμοίως. ἢ δὲ κίνησις θερμότητα ποιεῖ. ἢ διὰ τὴν ὑπὸ τοῦ ἀέρος πληγὴν; ὥς γὰρ οἱ ἄνεμοι ταραττοῦσιν οἱ ἐξ ἐναντίας τὰ ὄμματα, οὕτω καὶ ὁ ἀήρ ὁ προσπίπτων, ὅσῳ ἂν θᾶττον ἐλαύνῃ ἢ αὐτὸς τρέχῃ, τοσοῦτῳ μᾶλλον ποιεῖ πληγὴν μαλακὴν, δι' ἣν γίνεται δακρύειν, ἀραιουμένων τῶν τοῦ ὀφθαλμοῦ πόρων ὑπὸ τῆς

πληγῆς· πᾶσα γὰρ πληγὴ διαιρετικόν ἐστὶν ἢ θλαστικόν.

Διὰ τί δεῖ τοὺς μὲν θερινοὺς κόπους λουτρῷ ἰᾶσθαι, τοὺς δὲ χειμερινοὺς ἀλείμματι; ἢ τούτους μὲν διὰ τὰς φρίκας καὶ τὰς γινομένας μεταβολὰς θερμῷ δεῖ λύειν, ὃ ποιήσῃ ἀλεάζειν (τὸ δὲ ἔλαιον θερμόν)· ἐν δὲ τῷ θέρει καθυγραίνειν. [885a] ἡ γὰρ ὥρα ξηρά, καὶ οὐ γίνονται φρίκαι διὰ τὴν ἀλέαν. ὀλιγοσιτία δὲ καὶ κωθωνισμὸς θέρους, τὸ μὲν ὅλως, τὸ δὲ μᾶλλον, ὃ μὲν πότος θέρους ὅλως διὰ τὴν ξηρότητα, ἡ δὲ ὀλιγοσιτία κοινὸν μὲν, μᾶλλον δὲ θέρους· ἐκθερμαίνεται γὰρ μᾶλλον διὰ τὴν ὥραν ὑπὸ τῶν σιτίων.

Διὰ τί οἱ θέοντες εὐτόνωνς μάλιστα λαμβάνουσι σπᾶσματα, ὅταν τις θεοῦσιν αὐτοῖς ὑποστῇ; ἢ ὅτι ταῦτα μάλιστα διασπᾶται, ἃ εἰς τοῦναντίον τε καὶ ἰσχυρῶς ἔλκεται καὶ κινεῖται; ὅταν οὖν θέοντος καὶ σφοδρῶς ὠθουμένων τῶν μορίων εἰς τὸ πρόσθεν ὑποστῇ τις, συμβαίνει ἅμα ἀντισπᾶν εἰς τοῦναντίον, ἔτι φερομένων εἰς τοῦμπροσθεν, ὥστε ἡ σπᾶσις τοσοῦτῳ ἰσχυροτέρα γίνεται, ὅσῳ ἂν θέωσι σφοδρότερον.

Διὰ τί τῶν περιπάτων οἱ κατὰ τὰς ὁδοὺς ἀκοπώτεροί εἰσιν, οἱ ἀνώμαλοι τῶν εὐθέων; ἢ διὰ τὸ τὴν φορὰν ὀρθὴν εἶναι κατὰ φύσιν παντὶ τῷ σώματι; οἱ δ' ἐν τοῖς ὀμαλοῖς τῶν ἀνωμάτων κοπιωδέστεροι· τοῖς γὰρ αὐτοῖς μέρεσι τοὺς πόνους παρέχουσιν, οἱ δ' ἐν τοῖς ἀνωμαλοῖς διαμερίζουσι μᾶλλον εἰς ἅπαν τὸ σῶμα. αἱ δὲ ἀλέαι μᾶλλον ἰσχυνοῦσι τῶν ἐν τοῖς ψύχεσιν· τοῖς γὰρ ἔξω μέρεσι πλείονα τὸν πόνον παρέχονται, διὸ καὶ τοὺς ἰδρῶτας ἐμποιοῦντες ἰσχναίνουσιν. οἱ δ' ἐν τοῖς ψύχεσι στιφροτέραν τὴν σάρκα ποιοῦσι καὶ τῶν σιτίων ἐπιθυμητικωτέρους· τοῖς γὰρ ἔσω μέρεσι τὴν αὔξησιν τοῦ θερμοῦ ποιοῦνται, καὶ δυσκινήτων γινομένων ὑπὸ τοῦ ψύχους τὸν μὲν ἔσω τόπον καθαίρουσι, τὴν θερμασίαν αὐξάνοντες ἐν αὐτῷ, τὴν δὲ σάρκα στερεὰν ποιοῦσιν, οὐ δυνάμενοι κρατεῖν διὰ πάσης αὐτῆς. ὁμοίως οἱ ἀνάντεις τῶν κατάντων ἐπιπονώτεροι καὶ ἰσχναντικώτεροι. οἱ μὲν γὰρ ἀνάντεις τὴν ὀσφὺν μάλιστα ποιοῦσι πονεῖν, οἱ δὲ κατάντεις τοὺς μηρούς· τοῖς γὰρ μηροῖς τὸ βάρος πᾶν ἐμπύπτον κόπους εἴωθε παρέχειν. ἄνω γὰρ παρὰ φύσιν ὑπὸ τοῦ θερμοῦ βία φερόμενος ἐκθερμαίνει. διὸ τοὺς τε ἰδρῶτας ἐμποιοῦσι, καὶ τὸ πνεῦμα μετεωρίζοντες ἰσχναίνουσιν, καὶ τὴν ὀσφὺν ὀδυνῶσιν· τὰ γὰρ σκέλη χαλεπῶς ἀναγόμενα τὴν ὀσφὺν κάμπτουσιν τε καὶ ἀνασπῶσιν, ὅφ' ὧν ἀναγκάζονται μάλιστα πονεῖν. οἱ δ' ἐν ἀντιτύποις περίπατοι τοῖς τε μυσὶ καὶ τοῖς τεταμένοις τῶν σκελῶν παρέχουσι

κόπους· συντάσεις γὰρ ἐμποιοῦσι τοῖς νεύροις καὶ τοῖς μυσί, βιαίας [885b] γενομένης τῆς ἀπερείσεως αὐτοῖς. οἱ δ' ἐν τοῖς μαλακοῖς τοῖς ἄρθροις κοπιώδεις εἰσίν· τῶν γὰρ ἄρθρων πυκνὰς τὰς κάμψεις ποιοῦσιν, ἅτε ἐνδιδούσης τῆς βάσεως. τὸ δ' αὐτό ἐστὶ πρόβλημα.

Διὰ τί πρὸς τὰ σιμὰ χαλεπῶς βαδίζομεν; ἢ διότι πᾶσα πορεία ἐξ ἄρσεως καὶ θέσεως συντελεῖται; τὸ μὲν οὖν ἄραι παρὰ φύσιν, τὸ δὲ θεῖναι κατὰ φύσιν, τὸ δὲ προσθεῖναι μεσότης· ἐν δὲ τῷ πρὸς τὰ σιμὰ βαδίζειν πολὺ τὸ παρὰ φύσιν.

Διὰ τί οἱ ἀφ' ἵππων ἥττον πίπτουσιν; ἢ διὰ τὸ φοβεῖσθαι φυλάττονται μᾶλλον;

Ζ. ΟΣΑ ΕΚ ΤΟΥ ΠΩΣ ΚΕΙΣΘΑΙ ΚΑΙ ΕΣΧΗΜΑΤΙΣΘΑΙ ΣΥΜΒΑΙΝΕΙ.

Διὰ τί ἡ καθέδρα τοὺς μὲν παχύνει τῶν ἀνθρώπων, τοὺς δὲ ἰσχναίνει; πότερον ὅτι αἱ ἕξεις διαφέρουσιν; οἱ μὲν γὰρ θερμοὶ εἰσιν, οἱ δὲ ψυχροί. οἱ μὲν οὖν θερμοὶ παχύνονται (κρατεῖ γὰρ τὸ σῶμα τῆς τροφῆς διὰ τὴν θερμασίαν)· οἱ δ' ἐψυγμένοι, διὰ τὸ δεῖσθαι ἐπεισάκτου θερμότητος καὶ τοῦτο πάσχειν μάλιστα τὸ σῶμα ὑπὸ τῶν κινήσεων, οὐ δύνανται πέττειν ἡρεμοῦντες. ἢ ὅτι οἱ μὲν περιττωματικοὶ εἰσι, καὶ δέονται κινήσεως ἢ ἀναλώσει ταῦτα, οἱ δὲ οὐ;

Διὰ τί δεῖ ποιεῖν διάτασιν τῶν μερῶν, ὃ ποιεῖ ὁ γυμναζόμενος; ἢ ὅτι δεῖ τῷ οἰκείῳ πνεύματι καθαίρεσθαι τοὺς πόρους;

Διὰ τί συγκεκαμμένον βέλτιον κατακεῖσθαι, καὶ πολλοὶ γε παραγγέλλουσι τοῦτο καὶ τῶν ἱατρῶν; ἢ ὅτι ἀλεαίνουσα ἡ κοιλία θάπτον πέττει; οὕτω δὲ ἀλεαίνει μᾶλλον. ἔτι δεῖ τοῖς πνεύμασι τόπον διδόναι εἰς ὃν ἀπερείσονται· οὕτω γὰρ ἤκιστα λυπήσουσιν αἱ φῦσαι. διὰ τοῦτο γὰρ καὶ ἰξίαί καὶ τὰ ἄλλα ἀποστήματα ὑγιεινόν, ὅτι ἔχουσι κοιλίας εἰς ἃς ἀποδέχονται τὰ πνεύματα. ἐκτεταμένου μὲν οὖν οὐ γίνεται κοιλία (ἅπαντα γὰρ τὸν τόπον τὰ σπλάγχνα κατέχει), συγκαμφθέντος δὲ γίνεται.

Διὰ τί ἀνισταμένοις ὕλιγγος μᾶλλον γίνεται ἢ καθίζουσιν; ἢ διότι ἡρεμοῦσι τὸ ὑγρὸν εἰς ἓν μόριον ἀθρόον ἀποκλίνει; διὸ καὶ τὰ ὤμα φᾶ οὐ δύναται δινεῖσθαι, ἀλλὰ καταπίπτει. κινούμενον δὲ τὸ ὑγρὸν ὁμοίως ἔχει. ἀνίστανται μὲν [886a] οὖν ἡρεμήσαντες, ὅτε οὕτως διάκεινται· καθιζάνουσι δὲ ἐν κινήσει γενόμενοι, ὅτε ὁμαλῶς ἔχει τὸ ὑγρὸν καὶ ἐσκέδασται.

Διὰ τί ἐπὶ τὰ δεξιὰ κατακειμένοις μᾶλλον ἐπέρχεται ὕπνος; πότερον ὅτι ἐναντίως ἔχοντες ἐργηγόρασι καὶ καθεύδουσιν; ἐπεὶ οὖν ἐργηγορότες ἐπὶ τὰ ἀριστερὰ κατάκεινται, τοῦναντίον ἔσται ἐπ' ἄλλης ἀρχῆς καὶ τῆς ἐναντίας. ἢ ὅτι ἀκινήσια ὁ ὕπνος; τὰ οὖν κινητικὰ μέρη δεῖ ἡρεμεῖν, τὰ δὲ δεξιὰ κινητικά. οὕτω δὲ κατακειμένων οἷον δέδεται ἀρχὴ τις ἐπεγερτική.

Διὰ τί ναρκῶσιν; καὶ διὰ τί χεῖρας καὶ πόδας μᾶλλον; ἢ ὅτι κατάψυξις ἐστὶν ἡ νάρκη; διὰ στέρησιν γὰρ αἵματος γίνεται καὶ μετάστασιν. ἀσαρκότατα δὲ ταῦτα καὶ νευρωδέστατα, μάλιστα δὲ οἱ

πόδες. ὥστε προοδοποιεῖται ὑπὸ τῆς φύσεως πρὸς τὸ καταψύχεσθαι ταχέως.

Διὰ τί κατακείμεθα μὲν ἐπὶ τὰ ἀριστερὰ ἡδέως, καθεύδομεν δὲ ἐπὶ τὰ δεξιὰ μᾶλλον; πότερον ὅτι ἀποστραφέντες πρὸς τὸ φῶς οὐ βλέπομεν; ἐν γὰρ τῷ σκότει θάπτον ὕπνος λαμβάνει. ἢ διότι ἐγρηγόραμεν κατακείμενοι ἐπὶ τοῖς ἀριστεροῖς, καὶ αἱ χρήσεις ἡμῶν οὕτω πρόχειροι, ὥστε πρὸς τὸ ἐναντίον σχῆμα πρὸ ἔργου; παρακαλεῖ δὲ ἕκαστον πρὸς τὸ ἔργον τὸ σχῆμα μᾶλλον.

Ζ. ΟΣΑ ΕΚ ΣΥΜΠΑΘΕΙΑΣ.

Διὰ τί τοῖς χασμωμένοις ἀντιχασμῶνται ὥς ἐπὶ τὸ πολὺ; ἢ διότι, ἐὰν ἀναμνησθῶσιν ὀργῶντες, ἐνεργοῦσι, μάλιστα δὲ τὰ εὐκίνητα, οἷον οὐροῦσιν. ἢ δὲ χάσμη πνεῦμα καὶ ὑγροῦ κίνησίς ἐστιν. πρόχειρον οὖν, ἐὰν μόνον νοήσῃ· ἔστι γὰρ πλησίον.

Διὰ τί, ἐὰν μὲν τινα ἴδωμεν τὴν χεῖρα ἐκτείνοντα ἢ τὸν πόδα ἢ ἄλλο τι τῶν τοιούτων, οὐκ ἀντιποιοῦμεν τὸ αὐτό, ἐὰν δὲ χασμώμενον, ἀντιχασμώμεθα; ἢ οὐδὲ τοῦτο ἀεὶ, ἀλλ' ἐὰν ὀργῶν τύχῃ τὸ σῶμα καὶ οὕτω διακείμενον ὥστε τὸ ὑγρὸν ἀναθερμαίνεσθαι; τότε γὰρ ἡ μνήμη τὴν κίνησιν ποιεῖ, ὥσπερ καὶ πρὸς ἀφροδίσια καὶ ἐδωδὴν· τὸ γὰρ ποιῆσαν μνήμην εἶναι τὸ ἔχον ὁρμὴν πρὸς τὸ φαντασθὲν πάθος.

Διὰ τί, ἐπειδὰν πρὸς τὸ πῦρ στῶμεν, οὐρητιῶμεν, καὶ ἐὰν πρὸς ὕδωρ, οἷον ἐὰν πρὸς ποταμόν, οὐροῦσιν; ἢ ὅτι τὸ πᾶν [886b] ὕδωρ ὑπόμνησιν δίδωσι τῆς ἐν τῷ σώματι ὑγρότητος, καὶ ἐκκαλεῖται τὸ προσιόν; αὐτὸ δὲ τὸ πῦρ διαχαλᾷ τὸ πεπηγὸς ἐν τῷ σώματι, ὥσπερ ὁ ἥλιος τὴν χιόνα.

Διὰ τί ἀπὸ μὲν νόσων ἐνίων νοσοῦσιν οἱ πλησιάζοντες, ἀπὸ δὲ ὑγιείας οὐδεὶς ὑγιάζεται; ἢ ὅτι ἡ μὲν νόσος κίνησις, ἢ δὲ ὑγίεια ἡρεμία; ἢ μὲν οὖν κινεῖ, ἢ δ' οὐθέν. ἢ διότι τὸ μὲν ἄκοντι τὸ δ' ἐκόντι γίνεται; καὶ ἄρα τὰ ἀκούσια τῶν ἐκουσίων καὶ τῶν ἐκ προνοίας, διαφέρει.

Διὰ τί τῶν μὲν διὰ τῆς ἀκοῆς λυπηρῶν ἔνια φρίττειν ἡμᾶς ποιεῖ, οἷον πρίων ἀκονώμενος καὶ κίσηρις τεμνομένη καὶ λίθος ἀλούμενος, τὰ δὲ διὰ τῆς ὄψεως σημεῖα τῶν παθῶν αὐτὰ ἡμῖν τὰ πάθη ἐμποιεῖ; αἰμωδιῶμέν τε γὰρ τοὺς ὀξὺ ὀρῶντες ἐσθίοντας, καὶ τοὺς ἀπαγχομένους ἔνιοι ὀρῶντες ἐκψύχουσιν. ἢ διότι φωνὴ μὲν πᾶσα καὶ ψόφος πνεῦμα ἐστίν; τοῦτο δὲ εἰσδυόμενον ἡμῖν πέφυκε κινεῖν. κινήσει δὲ μᾶλλον ἢ διὰ μέγεθος ἢ διὰ πληγὴν σφοδροτέραν, ποιοῦν ἢ ἀλλοιοῦν τι τῶν ἐν ἡμῖν. τὰ μὲν οὖν μεγάλα καὶ λεῖα πνεύματα τὸν τῆς αἰσθήσεως τόπον τὸν αὐτὸν κινεῖ, διὸ καὶ ἡδύνει τὰ τοιαῦτα· τὰ δὲ τραχέα, πληγὴν ποιοῦντα σφοδράν, σείει τε τὸν τόπον καὶ πόρρω διαδίδωσι τῇ τῆς πληγῆς δυνάμει. διαδίδωσι δὲ καὶ τὰ ψυχρὰ πόρρω· δύναμις γὰρ τίς ἐστιν ἡ ψυχρότης. αὕτη μὲν οὖν ὅτι φρίττειν ποιεῖ, εἴρηται. τὰ δὲ τραχέα τῷ πληγὴν ποιεῖν πυκνήν,

προσκόποντα τῇ ἀρχῇ τῶν τριχῶν, ἀπωθεῖ αὐτὴν εἰς τοῦναντίον· ἀπωθουμένης δὲ ἀνάγκη τὴν κορυφὴν τῆς τριχὸς ἀνάπαλιν γίνεσθαι, διὸ συμβαίνει ἴστασθαι αὐτάς· πᾶσαι γὰρ νενεύκασι κάτω. ἡ δὲ φορὰ τοῦ διὰ τῆς ἀκοῆς πνεύματος εἰς τὸ σῶμα ἄνωθεν κάτω ἐστίν. ὄντων οὖν τραχέων τῶν εἰρημένων ψόφων, ἡ φρίκη γίνοιτ' ἂν διὰ τὰ εἰρημένα. γίνονται δ' αὗται μᾶλλον τῷ ἄλλῳ σώματι ἢ ἐν τῇ κεφαλῇ διὰ τὸ τὰς ἐνταῦθα τρίχας ἀσθενεστέρας εἶναι καὶ τὸ πάθος ἀσθενές. τῆς μὲν οὖν ἀκοῆς οὔσης ἀμβλυτέρας αἰσθήσεως ἢ τῆς ὄψεως, ἐπιπόλαια καὶ τὰ πάθη γίνεται ἀπ' αὐτῆς· ἡ δὲ φρίκη τοιοῦτον, διὸ καὶ ἀπὸ πολλῶν καὶ ἀνομοίων γίνεται. τῆς δὲ ὄψεως ἐναργεστάτης οὔσης αἰσθήσεως, ἀνάλογον καὶ τὰ συμβαίνοντα γίνεται ἀπ' αὐτῆς· διὸ ταῦτα μὲν τὰ ἀπὸ τῆς ἀληθείας πάθη συμβαίνει γίνεσθαι ἀπ' αὐτῆς, ἐλαφρότερα [887a] δὲ τῆς ἀληθείας. ἀπὸ δὲ τῆς ἀκοῆς αὐτὰ μὲν οὐ, τὴν δ' ἀπ' αὐτῶν προσδοκίαν φρίττομεν· ἀλγεινοῦ γὰρ κακοῦ προσδοκία ἐστίν.

Διὰ τί χασμησαμένοις ἀντιχασμῶνται, καὶ ὅταν οὐροῦντα ἴδωσιν, οὐροῦσι, καὶ μάλιστα τὰ ὑποζύγια; ἢ διὰ τὴν μνήμην; ὅταν γὰρ μνησθῇ, κινεῖται τοῦτο τὸ μέρος. τοῖς μὲν οὖν ἀνθρώποις, διὰ τὸ εὐαίσθητοτέροις εἶναι, ἰδοῦσιν εὐθὺς συμβαίνει καὶ κινεῖσθαι καὶ ἀναμιμνήσκεσθαι· τοῖς δὲ ὑποζυγίοις οὐκ αὐταρκες τὸ ἰδεῖν, ἀλλὰ προσδέονται καὶ ἄλλης αἰσθήσεως· διὸ καὶ ὀσφρανθέντα, ὅτι εὐκίνητοτέρα αὕτη ἡ αἴσθησις τοῖς ἄνευ λόγου. καὶ διὰ τοῦτο εἰς τὸν αὐτὸν τόπον ἅπαντα οὐρεῖ, οὗ ἂν τὸ πρῶτον οὐρήσῃ. τότε γὰρ μάλιστα κινοῦνται, ὅταν ὀσφρανθῶσιν· ὀσφραίνονται δ', ὅταν πλησιάσωσιν.

Διὰ τί, ἐπειδὰν τεμνόμενόν τινα ἴδωμεν ἢ καιόμενον ἢ στρεβλούμενον ἢ ἄλλο τι τῶν δεινῶν πάσχοντα, συναλγοῦμεν τῇ διανοίᾳ; ἢ ὅτι ἡ φύσις ἡμῖν κοινὴ ἅπασιν; συνήλγησεν οὖν, ἐπειδὰν τι τοιοῦτον ἴδῃ, τῷ πάσχοντι διὰ τὴν οἰκειότητα. ἢ ὅτι ὥσπερ αἱ ῥῖνες καὶ αἱ ἀκοαὶ λαμβάνουσιν τινὰς ἀπορροίας κατὰ τὰς οἰκείας δυνάμεις, οὕτω καὶ ἡ ὄψις αὐτὸ πάσχει καὶ ἀπὸ τῶν ἡδέων καὶ λυπηρῶν;

Διὰ τί ἀπὸ φθίσεως καὶ ὀφθαλμίας καὶ ψώρας οἱ πλησιάζοντες ἀλίσκονται, ἀπὸ δὲ ὕδρωπος καὶ πυρετῶν καὶ ἀποπληξίας οὐχ ἀλίσκονται, οὐδὲ τῶν ἄλλων; ἢ ἡ μὲν ὀφθαλμία, ὅτι εὐκίνητότατον ὁ ὀφθαλμός, καὶ μάλιστα ὁμοιοῦται τῷ ὀρωμένῳ τῶν ἄλλων, οἷον κινεῖται ἀπὸ κινουμένου ὥστε καὶ ἀντιβλέπων τεταραγμένῳ ταράττεται μάλιστα; ἢ δὲ φθίσις, ὅτι πνεῦμα φαῦλον ποιεῖ καὶ βαρὺ,

τάχιστα δὲ τὰ νοσήματα ταῦτα ἄπτεται πάντων, ὅσα τούτου φθειρομένου γίνεται, οἷον τὰ λοιμώδη. ὁ δὲ πλησιάζων τοιοῦτον ἀναπνεῖ. νοσεῖ μὲν οὖν, ὅτι νοσῶδες· ἀπὸ μόνου δέ, ὅτι ἐκπνεῖ, νοσεῖ, οἱ δὲ ἄλλοι ἐτέραν· τὴν αὐτὴν δὲ νόσον, ὅτι ᾧ ἂν ἀσθενήσῃ, τούτῳ ἀναπνεῖ τοιοῦτον οἷον εἰ πεπονθὼς ἦν. ἡ δὲ ψώρα μᾶλλον τῶν ἄλλων, οἷον λέπρας καὶ τῶν τοιούτων, ὅτι ἐπιπολῆς τε καὶ γλίσχρον τὸ ἀπορρέον· τὰ γὰρ κνησμώδη τοιαῦτα. διὸ αὐτὰ τῷ ἐπιπολῆς γίνεσθαι καὶ γλίσχρον εἶναι ἄπτεται. τῶν δ' ἄλλων τὰ μὲν οὐχ ἄπτεται διὰ τὸ μὴ ἐπιπολῆς γίνεσθαι, τὰ δὲ ὄντα ἐπιπολῆς, ὅτι προσμένει διὰ ξηρότητα.

[887b] Διὰ τί τὴν αἰμωδίαν παύει ἡ ἀνδράχνη καὶ ἄλες; ἢ ὅτι ἡ μὲν ὑγρότητά τινα ἔχει; φανερὰ δὲ αὕτη μασωμένοις τε, καὶ συντεθῆ χρόνον τινά· ἔλκεται γὰρ ἡ ὑγρότης. τὸ δὲ γλίσχρον εἰσδυόμενον ἐξάγει τὸ ὀξύ. καὶ γὰρ ὅτι συγγενὴς ἡ ὀξύτης σημαίνει· ἔχει γάρ τινα ὀξύτητα ὁ χυλός. ὁ δὲ ἄλλς συντήκων ἐξάγει καὶ τὴν ὀξύτητα. διὰ τί οὖν ἡ κονία καὶ τὸ νίτρον οὐ; ἢ ὅτι στύφει καὶ οὐ τήκει;

Η. ΟΣΑ ΕΚ ΡΙΓΟΥΣ ΚΑΙ ΦΡΙΚΗΣ.

Διὰ τί οἱ ρίγωντες πελιδνοὶ γίνονται; ἢ διότι τὸ αἷμα πήγνυται διὰ τὸ ψῦχος, πηγνύμενον δὲ μελαίνεται διὰ τὴν ἀπουσίαν τοῦ θερμοῦ; τὸ δὲ λευκὸν τοῦ πυρός. διὸ καὶ τοῖς πρεσβύταις μάλιστα πελιδνοῦται ἡ σὰρξ, ὅτι ἐλαχίστην ἔχει θερμότητα.

Διὰ τί οἱ ρίγωντες καθεύδειν οὐ δύνανται; ἢ διότι πάντες οἱ ρίγωντες μᾶλλον τὸ πνεῦμα κατέχουσιν, ὁ δὲ καθεύδων ἐκπνεῖ μᾶλλον ἢ εἰσπνεῖ, ὥστε χαλεπὸν ρίγωντα καθεύδειν· ἅμα γὰρ ποιεῖν τάναντία ἀδύνατον.

Διὰ τί ἐν τῷ ψύχει ὀξύτεροι καὶ οἱ ἀσθενήσαντες καὶ οἱ λυπούμενοι καὶ οἱ ὀργιζόμενοι; ἢ στιφρότερον ποιεῖ τὸ καταπύχεσθαι;

Διὰ τί οἱ ἀθληταὶ δύσριγοι εὖ ἔχοντες; ἢ ὅτι καθαρὰ καὶ εὐπνοὺς ἡ ἔξις καὶ ἀπίμελος; ἡ τοιαύτη δὲ εὐπαθεστάτη ὑπὸ τοῦ ἀέρος, ὅταν εὐδίοδός τε ἦ καὶ μὴ ἔχῃ θερμότητα ἐν αὐτῇ· ἡ δὲ πιμελὴ θερμόν, ἂν μὴ δίυγρος.

Διὰ τί μάλιστα τὰ ἀκρωτήρια ρίγωσιν; ἢ διὰ στενότητα; καὶ οἱ πόροι ἐν αὐτοῖς στενοὶ ὄντες ὀλίγαιμοί εἰσιν, ὥστε καὶ ὀλιγόθερμοί εἰσι· τὸ γὰρ αἷμα θερμόν.

Διὰ τί, ἐὰν μετέωροι ᾧσιν οἱ πόδες, μᾶλλον ρίγοῦσιν; πότερον ὑποπνεῖ μᾶλλον; ἢ ὅτι ἐν ἐλάττονι γίνεται τὸ αἷμα κάτω, ὥστε τὸ ἄλλο εὐψυκτότερον ἐκλείποντος τοῦ θερμοῦ;

Διὰ τί οἱ παχεῖς σφόδρα ρίγοῦσι, τῆς πιότητος θερμῆς οὕσης; ἢ διὰ τὸ μέγεθος τοῦ πάχους τοῦ μὲν ἔσωθεν θερμοῦ πόρρω γίνονται τὰ ἔσχατα, τοῦ δὲ ἔξω ψυχροῦ ἐγγύς;

Διὰ τί πατέντες καὶ οὐρήσαντες φρίττουσιν; ἢ ὅτι κενοῦνται αἱ φλέβες ἐν ἀμφοτέροις, κενωθέντων δὲ ὁ ἀήρ εἰσέρχεται ψυχρός, ὁ ποίων φρίττειν.

Διὰ τί μάλιστα βουλιμιῶσιν ἐπὶ τῷ ψύχει, καὶ τοῦ χειμῶνος μᾶλλον ἢ τοῦ θέρους; ἢ διότι ἡ μὲν βουλιμία γίνεται [888a] δι' ἔνδειαν τῆς ξηρᾶς τροφῆς, ἐν δὲ τῷ ψύχει καὶ τῷ χειμῶνι συστελλομένου τοῦ ἐντὸς θερμοῦ εἰς ἐλάττω τοῦτο θᾶπτον ὑπολείπει ἡ ἐντὸς τροφή· τούτου δὲ γινομένου μᾶλλον βουλιμιᾶν εἰκός. ἡ δ' ἐν τῇ βουλιμίᾳ ἐκλυσίς καὶ ἀδυναμία γίνεται συντήξεως γινομένης ἐν τῷ σώματι διὰ τὴν τοῦ θερμοῦ ἄθροισιν, ἧς ῥυείσης μὲν εἰς τὸν τῶν

σιτίων τόπον αὐτὴ τροφή γίνεται τῷ σώματι, ἐὰν δ' ἐπὶ τὰς ἀρχὰς τῆς ἀναπνοῆς ἔλθῃ, ἀφωνία καὶ ἀδυναμία συμβαίνει, ἀφωνία μὲν διὰ τὸ ἐμφράττεσθαι τὸν τοῦ πνεύματος πόρον, ἀδυναμία δὲ διὰ τὴν τοῦ σώματος ἀτροφίαν καὶ σύντηξιν. ταχεῖαι δὲ καὶ ἀπ' ὀλίγων αἰ βοήθειαι γίνονται τοῖς τοιούτοις διὰ τὴν ἀρχὴν τοῦ πάθους ἔξωθεν γίνεσθαι. συστέλλον γὰρ τὸ ἐντὸς ψυχρὸν τὸ θερμὸν ἡμῶν ποιεῖ τὴν βουλιμίαν. καθάπερ οὖν ἐν τῷ φόβῳ τρέμοντες καὶ ὠχρίωντες, ἀφέντες τοῦ κινδύνου, παραχρῆμα οἱ αὐτοὶ γίνονται, οὕτω καὶ οἱ βουλιμῶντες, μικρὰ προσενεγκάμενοι ἐξ ἄρτου, βία κινηθέντες ἐκ τῆς φύσεως, μὴ φθαρέντες δέ· ταχεῖα ἢ ἀποκάθαρσις γίνεται. ταῦτο γὰρ ἀντέτεινε τὴν τε κατὰ φύσιν ἀγωγὴν, καὶ καθίστησιν εἰς τὴν φύσιν. ἀφεῖναι οὖν μόνον αὐτὴν δεῖ, καὶ καθάπερ τῶν παιδίων τὰ ἀντιτείνοντα εἰς τοῦπισθεν τὰ σπαρτία· καὶ γὰρ ταῦτα ἀφεθέντων τῶν σπαρτίων εὐθὺς πεπτώκασιν ὕπτια.

Διὰ τί οἱ γεγυμνασμένοι δυσριγότεροι τῶν ἀγυμνάστων; πότερον ὅτι τὸ πῖον ὑπὸ τῶν πόνων ἐξήρηται, τοῦτο δὲ ἀλέαν παρέχει· θερμὸν γὰρ τὸ λιπαρόν. ἢ ὅτι εὐπνότερα τὰ σώματα καὶ ἀραιότερα διὰ τὸ τὸ πῖον καὶ τὸ περίττωμα ἐξηρηθῆναι, ὥστε οὐδὲν ἀποστέγειν τὸ ψῦχος; ἢ διὰ τὴν τῶν πόρων ἀποστόμωσιν τοῖς ἰδρῶσιν οἷον πολλὰ θύραι ἐξήρηνται; φανερόν δὲ ὅτι οὐχ ἡ αὐτὴ ἔξις πρὸς ὑγίαν καὶ ἰσχὺν συμφέρει· ἢ μὲν γὰρ πίων, ἢ δὲ ἀραιὰ φαίνεται οὕσα.

Διὰ τί φρίττουσι καὶ τῷ θερμῷ καὶ τῷ ψυχρῷ προσχεόμενοι; ἄτοπον γὰρ τὰ ἐναντία τοῦ αὐτοῦ εἶναι αἷτια. ἢ διότι ὑπὸ μὲν τοῦ ψυχροῦ προσχεόμενοι τὸ ἐντὸς θερμὸν σβεννύμενον ποιεῖ τὴν φρίκην, ὑπὸ δὲ τοῦ θερμοῦ τὸ ἐκτὸς ψυχρὸν ἀντιπεριεστάμενον εἰς ἓν καὶ ἀθροιζόμενον τῇ φυγῇ ἔσω; ὥστε ὑπὸ τοῦ αὐτοῦ ἄμφω γίνεται, ἀλλ' ὅτε μὲν ὑπὸ τοῦ ἔσω, ὅτε δὲ ὑπὸ τοῦ ἔξωθεν.

Διὰ τί φρίττουσιν αἱ τρίχες ἐν τῷ δέρματι; ἢ ὅταν συσπάσῃσι τὸ δέρμα, εἰκότως ἐξανέστησαν· συσπῶσι δὲ καὶ ὑπὸ ῥίγους καὶ ὑπ' ἄλλων παθῶν.

[888b] Διὰ τί ἐν τῇ τελευταίᾳ προέσει τοῦ οὔρου φρίττομεν; ἢ ὅτι ἐνόντος μὲν τοῦ ὑγροῦ θερμοῦ πλήρεις ἢ τε κύστις καὶ οἱ περὶ αὐτὴν πόροι, ἐξελθόντος δὲ ἀέρος ψυχροῦ ἐνέπλησεν· οὐδὲν γὰρ κενὸν δεῖ εἶναι, ἀλλ' ἢ ἀέρος ἢ σώματος πλήρες. ἅτε οὖν εἰσεληλυθὸς ψυχροῦ ἀέρος εἰκότως φρίττειν συμβαίνει.

Διὰ τί τῶν ῥιγόντων ἢ γλῶττα, καθάπερ τῶν μεθύνων,

πταίει; πότερον ὑπὸ τοῦ ψύχους πηγνυμένη καὶ σκληρυνομένη δυσκίνητος γίνεται, τούτου δὲ συμβαίνοντος οὐ δύναται σαφηνίζειν; ἢ τῶν ἐκτὸς πυκνουμένων διὰ τὸ ψῦχος εἴσω συρρυνέν τὸ ὑγρὸν ἐξυγραίνει τὴν γλῶτταν, διόπερ οὐ δύναται ἡ γλῶττα τὸ αὐτῆς ποιεῖν, καθάπερ εἴρηται καὶ ἐπὶ τῶν μεθύνοντων. ἢ διὰ τὸν ἀπὸ τοῦ ῥίγους τρόπον ἀτάκτου τῆς κινήσεως οὔσης οὐ δύναται τὰ λεγόμενα διαρθροῦν ἡ γλῶττα· διόπερ καὶ πταίει.

Διὰ τί τῶν ῥιγόντων ὀρθαὶ αἱ ἐν τῷ σώματι τρίχες γίνονται; ἢ διότι ἀπὸ τῆς καταψύξεως τὸ θερμὸν εἰς τὸν ἐντὸς τόπον ἀθροίζεται, ἐκλείποντος δ' ἐκ τῆς σαρκὸς τοῦ θερμοῦ συνίσταται μᾶλλον, συναγομένης δὲ ὀρθότεραι αἱ τρίχες γίνονται. ἢ διότι

Διὰ τί τοῦ χειμῶνος τρέχοντες μᾶλλον ῥιγῶμεν ἢ ἐστῶτες; ἢ ὅτι ὁ ἀήρ ὁ περὶ τὸ σῶμα ἐστῶτων μὲν, ἐπειδὴν ἅπαξ συνθερμανθῇ, οὐκέτι ἐνοχλεῖ, τρεχόντων δὲ ἀεὶ ἄλλος καὶ ἄλλος προσπίπτει ψυχρὸς ὢν, διόπερ μᾶλλον ῥιγῶμεν; ἔτι δὲ καὶ κινούμενος ψυχρότερος γίνεται ὁ ἀήρ· τοῦτο δὲ ἐν τῷ τρέχειν μάλιστα συμπίπτει.

Διὰ τί ὑποφάσκοντος μᾶλλον ψῦχος ἢ ἐγγυτέρω τοῦ ἡλίου ὄντος; ἢ ὅτι πλείων ὁ χρόνος τῆς τοῦ ἡλίου ἀπουσίας, ὥστε μᾶλλον ἀπέψυκται ἡ γῆ; ἢ ὅτι πρὸς ἡμέραν ἡ δρόσος πίπτει ὥπερ πάχνη, ταῦτα δὲ ψυχρά; ἢ καὶ ταῦτα πίπτει διὰ τὸ κρατεῖσθαι τὸ ἀναφερόμενον θερμὸν, κρατεῖται δὲ διὰ τὴν τοῦ ἡλίου ἀπουσίαν· διὸ καὶ πλείον μὲν ἀπέχοντος οὐ πίπτει, ἐγγυτέρω δὲ ὄντος πίπτει καὶ πηγνυται· διότι μᾶλλον ἀπέψυκται ὁ τόπος, πλείω χρόνον τοῦ ἡλίου ἀπόντος. ἢ ὅτι πρὸς ἡμέραν μᾶλλον τὰ ἐκ νυκτῶν πνεύματα τῆς ψύξεως; ἢ ἡμῖν δοκεῖ μᾶλλον εἶναι ψῦχος διὰ τὸ πεπεφθαι τὰ σιτία; κενώτεροι δὲ ὄντες δυσριγότεροι. σημεῖον δὲ τὸ μετὰ τοὺς ἐμέτους μάλιστα ῥιγοῦν.

Διὰ τί πονοῦσιν, ὅταν ῥιγῶντας πρὸς τὸ πῦρ φέρωσιν· ὅταν δὲ κατὰ μικρὸν χλιαίνωσιν, οὐ; ἢ ὅτι ὅλως ἐκ τῶν ἐναντίων [889a] τοῦναντίον γινόμενον μεγάλην ποιεῖ τὴν μεταβολήν; ὥπερ ἐπὶ τῶν δένδρων, εἰ μὲν κατὰ μικρὸν κάμπτοι τις, οὐκ ἂν πονοῖ, εἰ δὲ σφοδρότερον καὶ μὴ κατὰ μικρόν, κλῶνται. εἰ οὖν τὸ ὅμοιον ὑπὸ τοῦ ὁμοίου ἀπαθές, τὸ δὲ θερμὸν τοῦ ῥιγῶντος εἴσω συνίσταται καὶ συνέρχεται, τὸ δὲ ὑγρὸν καταλείπεται καὶ τὸ ψυχρόν, τὸ δὲ ἐναντίον τοῦ ἐναντίου φθαρτικόν· ὥστε ἐὰν μὲν χλιαίνῃ, κατὰ μικρὸν ἐξέρχεται τὸ θερμὸν καὶ ἥττον πονεῖ, ἐὰν δὲ μὴ ἀναχλιάνῃ, προσάγει μᾶλλον.

Διὰ τί ψυχθέντες μᾶλλον ἀπὸ τῆς αὐτῆς θερμασίας καίόμεθα καὶ ἀλγοῦμεν; πότερον διὰ πυκνότητα στέγει ἡ σὰρξ τὸ προσπίπτον θερμόν; διὸ μόλιβδος ἐρίου θερμότερος, ἢ βίαιος γίνεται τοῦ θερμοῦ ἢ δίοδος διὰ τὸ πεπηγέναι ὑπὸ τοῦ ψυχους τοὺς πόρους.

Διὰ τί οἱ ὀργιζόμενοι οὐ ῥιγῶσιν; ἢ ὅτι ἡ ὀργὴ τῇ δειλίᾳ ἐναντίον καὶ ὁ θυμός; ἔστι δὲ ἡ μὲν ὀργὴ ἀπὸ τοῦ πυρός· πολὺ γὰρ τὸ πῦρ κατέχοντες εἴσω χλιαίνονται. μάλιστα δ' ἔστιν ἐπὶ τῶν παιδίων καταμαθεῖν. οἱ μὲν γὰρ ἄνδρες βλάπτονται, τὰ δὲ παιδιά πρῶτον μὲν τὸ πνεῦμα πολὺ ἀναλαμβάνουσιν, εἴτα ἐρυθριῶσιν· πολὺ γὰρ εἴσω ὃν τὸ θερμόν καὶ ἐξυγραῖνον ἐρυθρίαν ποιεῖ, ἐπεὶ εἴ τις αὐτοῖς πολὺ τοῦ ψυχροῦ προσχέοι, παύσονται· ἂν ὀργιζόμενοι· κατασβεσθεῖν γὰρ ἂν αὐτῶν τὸ θερμόν. οἱ δὲ δειλοὶ καὶ φοβούμενοι τοῦναντίον. ῥιγῶσί τε γὰρ καὶ ψυχροὶ καὶ ὠχροὶ γίνονται· ἐκλείπει γὰρ τὸ θερμόν αὐτοῖς ἐκ τῶν ἐπιπολῆς τόπων.

Διὰ τί, ὅταν φρίξωμεν, αἱ τρίχες ὀρθαὶ ἴστανται; ἢ διὰ τὸ ἐν ὑγρῷ πεφυκέναι κατακεκλειῖσθαι; κρατεῖ γὰρ τοῦ ὑγροῦ τὸ βάθος τῆς τριχός. ἢ δὲ φρίκη γίνεται ὑπὸ τοῦ ψυχροῦ, τὸ δὲ ψῦχος κατὰ φύσιν πῆγνυσι τὸ θερμόν. ὅταν οὖν μεταβάλλῃ τὸ ὑγρόν, ἐξ οὗ πεφύκασιν αἱ τρίχες, καὶ παγῇ, μεταβάλλειν εἰκὸς καὶ τὰς τρίχας. εἰς μὲν οὖν τοῦναντίον εἰ μεταβάλλουσιν, ἢ ἐν ταύτῃ μένουσιν, ἢ ἐπικρατήσῃ πάλιν ἡ θριξ τοῦ ὑγροῦ· οὐκ εἰκὸς δὲ πεπηγότος καὶ πεπυκνωμένου τοῦ ὑγροῦ τὴν τρίχα τῷ βάρει κρατεῖν. εἰ δὲ μηδαμόσε κεκλίσθαι δυνατόν τὴν τρίχα τῷ τὸ ὑγρὸν πεπηγέναι, λείπεται ἐστάναι ὀρθήν. ἢ διότι ὑπὸ τῆς καταψύξεως τὸ θερμόν εἰς τὸν ἐντὸς τόπον ἀθροίζεται, ἐκλείποντος δὲ ἐκ τῆς σαρκὸς τοῦ θερμοῦ συνίσταται μᾶλλον ἢ σὰρξ, συναγομένης δὲ ὀρθότεραι αἱ τρίχες γίνονται, καθάπερ ἐάν τις εἰς [889b] τὴν γῆν ἐμπήξας κάρφος ἢ ἄλλο τι συντάττῃ καὶ πάντοθεν συνάγῃ τὴν γῆν, μᾶλλον ὀρθοῦται ἢ ἐὰν ἐξ μὴ συνεστηκυῖαν.

Διὰ τί οἱ ῥιγῶντες μάλιστα οὐ καθεύδουσιν; ἢ διότι ὁ ῥιγῶν μᾶλλον κατέχει τὸ πνεῦμα ἢ ἐκπνεῖ, ὁ δὲ καθεύδων ἐκπνεῖ ἢ εἰσπνεῖ; ἐναντίως οὖν ποιεῖ ἔχειν τὸ ῥίγος τῷ καθεύδειν.

Θ. ΟΣΑ ΠΕΡΙ ΥΠΩΠΙΑ ΚΑΙ ΟΥΛΑΣ ΚΑΙ ΜΩΛΩΠΑΣ.

Διὰ τί τοὺς μώλωπας κωλύει τὰ νεόδρατα δέρματα προστιθέμενα, καὶ μάλιστα κριῶν, καὶ ὡὰ ἐπικαταγνύμενα; ἢ ὅτι ἄμφω κωλύει τὴν ἄθροισιν τοῦ ὑγροῦ καὶ τὴν ἔπαρσιν; τὸ γὰρ ἀφηλκωμένον ἔλκει ἐπαίρεται διὰ τὴν θερμασίαν· τὰ τε δὴ ὡὰ διὰ τὴν γλισχρότητα κατακολλῶντα κωλύει ἐπαίρεσθαι, καθάπερ καὶ τὰ καύματα, ὥσπερ καὶ ἡ κόλλα, καὶ τὰ δέρματα τῇ τε γλισχρότητι προσκολλᾶται, καὶ ἅμα τῇ θερμότητι συμπέττει καὶ παύει τὴν φλεγμασίαν· οὐδὲ γὰρ ἀφαιροῦσιν ἡμερῶν τινῶν. ἐξάγειν δὲ βούλονται τὴν φλεγμασίαν καὶ οἱ τῷ ἀλὶ καὶ τῷ ὄξει τρίβοντες.

Διὰ τί ἐν μὲν τῷ ἄλλῳ σώματι αἱ οὐλαὶ μέλαιναι, ἐν δὲ τῷ ὀφθαλμῷ λευκαί; ἢ ὅτι ἐναντίαν χροάν ἢ οὐλὴ λαμβάνει τῇ πρότερον, ὥσπερ πᾶν τὸ νενοσηκός; ἐν τῷ μέλανι δὲ τοῦ ὀφθαλμοῦ τὰ ἔλκη. οὐ μὴν οὐδὲ ἐν τῷ σώματι μέλαιναι εὐθύς, ἀλλ' ἐξ ἀρχῆς λευκαί, οὐδὲ ἐν τῷ ὀφθαλμῷ αἰεὶ μέλαιναι, ἀλλ' ἀποκαθίστανται τῷ χρόνῳ, ἢ ἀπλῶς ἢ εἰς τὸ μᾶλλον.

Διὰ τί ὁ νάρθηξ τὰ κύκλω τῆς πληγῆς ποιεῖ ἐρυθρά, τὸ δὲ μέσον λευκόν; πότερον ὅτι ἀποπιέζει τὸ αἷμα ἐκ τοῦ μέσου, καθὼ μάλιστα προσπίπτει περιφερῆς ὢν; ἢ ἔδει ἐπανίεναι διὰ γε τοῦτο πάλιν· ἀλλ' αἵματος συνδρομὴ τὸ ἐρύθημά ἐστι, συνδρομὴ δ' εἰς τὸν πληγέντα τόπον.

Διὰ τί τῷ μὲν νάρθηκι σφόδρα τυπτόμενον τὸ μέσον τῆς σαρκὸς λευκὸν γίνεται, τὸ δὲ κύκλω ἐρυθρόν, ξύλῳ δὲ ἐρυθρότερον τὸ μέσον; ἢ ὅτι ὁ μὲν νάρθηξ διὰ κουφότητα, ἐὰν σφόδρα πατάξῃ, τὸ ἐπιπολῆς διεσκέδασεν αἷμα, ὥστε ὅθεν μὲν ἐξέλιπε, λευκὸν φαίνεται, οὗ δὲ πλεόν ἦλθεν, ἐρυθρότερον. οἰδησάσης δὲ τῆς πληγῆς, οὐ ταχέως ἀποκαθίσταται τὸ σκεδασθὲν αἷμα διὰ τὸ ὀλίγον τε εἶναι καὶ τὴν φορὰν εἰς τὸ πρόσαντες εἶναι· πλήθει γὰρ βιασθὲν δεῖ τὴν [890a] παρὰ φύσιν φορὰν ἐνεχθῆναι. διὰ δὲ τῶν σκληρῶν αἱ πληγαὶ διὰ τὸ βάρος καὶ τὴν ἰσχὺν θλίψιν καὶ θλάσιν ποιοῦσιν. θλιβόμενον μὲν οὖν κοῖλον γίνεται, θλώμενον δὲ ἀραιόν· τομὴ γὰρ καὶ διαίρεσίς ἐστι μαλακῇ ἢ θλάσις. κοίλου δὲ καὶ ἀραιοῦ γενομένου τοῦ μέσου, φέρεται εἰς αὐτὸ ἐκ τῶν πέριξ ἐπιπολῆς αἷμα· κάτω τε γὰρ πέφυκε φέρεσθαι, καὶ εἰς τὰ ἀραιὰ τῷ εἴκειν αὐτά. ἀθροιζομένου δ' ἐνταῦθα εἰκότως τοῦ αἵματος τοῦτο μὲν ἐρυθραίνει, ἃ δὲ ἀπολείπει,

λευκαίνει.

Διὰ τί αἱ οὐλαὶ μέλαιναι τῶν σπληγιόντων; ἢ ὅτι αἷμα διεφθαρμένον ἔχουσι διὰ τὴν ἐκ τοῦ σπληνὸς σύμμιξιν νοσώδους αἵματος καὶ ὑδαροῦς; ἡ μὲν οὖν οὐλὴ τὸ δέρμα λεπτὸν καὶ ἐπιπόλαιον ἴσχει· τὸ δὲ αἷμα, διὰ τὸ ὑδαρὲς καὶ θερμὸν εἶναι μέλαν ὄν, τοιαύτην ποιεῖ τὴν οὐλὴν διαφαινόμενον· καὶ δὴ πλεονάκις ἡ οὐλὴ ἐν τούτῳ γίνεται μελαντέρα. γίνεται δὲ διὰ ταυτό· δι' ἀσθένειαν γὰρ τοῦ δέρματος καταψύχεται τὸ αἷμα, καὶ ἐξατμίζοντος τοῦ θερμοῦ γίνεται μελάντερον. ὁμοίως δὲ καὶ τοῖς πρεσβύταις οἱ τε χρωῶτες μελάντεροι γίνονται, καὶ αἱ οὐλαὶ αἱ συγγενεῖς μελάντεραι ἢ νέοις· οἷον ὑπόπιον γὰρ αὐτοῖς ἅπαν τὸ σῶμα οὐ διὰ λεπτότητα τοῦ δέρματος, ἀλλ' ὅτι τὸ θερμὸν ἐκλέλοιπεν.

Πότερον ὅσα τοῦ αὐτοῦ αἷτια, τὴν αὐτὴν ἔχει δύναμιν εἰς τὸ ποιεῖν ἢ οὐ; λέγω δὲ οἷον ἐπεὶ τὰ ὑπόπια καὶ ὁ χαλκὸς ἐξάγει καὶ ἡ ῥαφανὶς καὶ ὁ κύαμος διαμασώμενος καὶ ὁ πνεύμων καὶ ἡ ἄργιλος καὶ ἕτερ' ἅττα, τῇ αὐτῇ δυνάμει, ἢ ὁ μὲν χαλκὸς τῷ ἰὸν εἶναι, τὸν δὲ ἰὸν φαρμακώδη, ὁ δὲ κύαμος καὶ ὁ πνεύμων καὶ ἡ ἄργιλος τῷ ἐπισπᾶν ἐφ' αὐτὰ διὰ μανότητα, ἄλλα δὲ δι' ἐτέρας αἰτίας; ἢ τὸ μὲν ἔσχατον ἐπὶ πάντων τῶν τοιούτων ταυτό (πολλὰ γὰρ καὶ ἐναντία τούτοις, καθάπερ καὶ τὸ θερμὸν καὶ τὸ ψυχρόν), τὰ δὲ πρὸ τούτων οὐδὲν κωλύει ἕτερα.

Διὰ τί αἱ μὲν ἄλλαι οὐλαὶ μέλαιναι γίνονται, αἱ δὲ ἐν τῷ ὀφθαλμῷ λευκαί; ἢ διότι μεταβάλλουσιν ἐν ᾧ ἂν ᾧσι πρὸς τὰς χροιάς, ἐν δὲ τῷ ὀφθαλμῷ μέλανι ὄντι γίνονται, ὥστε ἀνάγκη λευκάς γίνεσθαι.

Διὰ τί ἀλγεινότερα ἢ πληγὴ τοῦ νάρθηκος ἢ ἐνίων σκληροτέρων, ἐάν τις κατὰ λόγον σκοπῇ τύπτων; εὐλογώτερον γὰρ τὴν τοῦ σκληροτέρου εἶναι ἀλγεινότεραν· μάλλον γὰρ [890b] τύπτει. ἢ ὅτι ἡ σὰρξ ἀλγεῖ οὐ μόνον τυπτομένη ἀλλὰ καὶ τύπτουσα; ὑπὸ μὲν οὖν τῶν σκληρῶν τύπτεται μόνον (ὑπεῖκει γὰρ διὰ τὴν σκληρότητα αὐτῶν), ὑπὸ δὲ τοῦ νάρθηκος ἄμφω αὐτῇ συμβαίνει, τύπτεσθαι τε καὶ διὰ κουφότητα τοῦ βάρους τύπτειν μὴ εἰκουςαν, ὥστε διπλασία γίνεται ἡ πληγὴ.

Διὰ τί ἡ θαψία καὶ ὁ κύαθος τὰ ὑπόπια παύει, ἡ μὲν ἀρχόμενα, ὁ δὲ ὕστερον, ἐναντία ὄντα; ὁ μὲν γὰρ κύαθος ψυχρός, ὥσπερ καὶ ὁ ποιητὴς φησι “ψυχρὸν δ' ἔλε χαλκὸν ὁδοῦσιν”, ἡ δὲ θαψία θερμὸν καὶ καυστικόν. ἢ ὁ μὲν κύαθος ὥσπερ τοῖς μικροψυχοῦσι τὸ ὕδωρ;

ἀπαντῶσα γὰρ ἡ ψύξις κωλύει ἐξιέναι τὸ θερμὸν ἐκ τοῦ αἵματος ἐξ ἐπιπολῆς διὰ τὴν πληγὴν συνδραμόντος, καὶ ὅταν ἐξέλθῃ τὸ θερμὸν, πηγνυμένου. ὥσπερ γὰρ ἂν εἰ ἔξω ὄν πηγνυται, καὶ ἐγγὺς τοῦ ἔξω τὸ αἷμα, ὅταν ᾗ ὑπὸ τὸ δέρμα, κωλυθέντος διεξιέναι τοῦ θερμοῦ, διὰ τὴν ψυχρότητα τοῦ χαλκοῦ πηγνυται, ἀλλὰ πάλιν διαχεῖται καὶ ἐπανέρχεται ὅθεν συνέδραμεν. ἡ δὲ θαψία θερμὴ οὖσα τὸ αὐτὸ ποιεῖ· κωλύει γὰρ πηγνυσθαι θερμὴ οὖσα.

Διὰ τί τὰ ὑπώπια διαλύεται προσέχουσι τὰ χαλκᾶ, οἷον κυάθους καὶ τὰ τοιαῦτα; ἢ διότι ψυχρὸν ὁ χαλκός ἐστιν; κωλύει οὖν τὸ θερμὸν ἐξιέναι ἐκ τοῦ συνιόντος αἵματος ὑπὸ τῆς πληγῆς, οὗ ἐξελθόντος ἐκ τοῦ ἐπιπολῆς γίνεται ὑπόπιον. διὸ καὶ ταχὺ δεῖ προστιθέναι πρὶν παγῆναι. καὶ ἡ θαψία δὲ μετὰ μέλιτος βοηθεῖ διὰ τὸ αὐτὸ· θερμὴ γὰρ οὖσα κωλύει ψύχεσθαι τὸ αἷμα.

Διὰ τί ποτε, ὅταν ἐν τῷ αὐτῷ τόπῳ πλεονάκις ἔλκος γένηται, ἡ οὐλὴ μέλαινα γίνεται; ἢ ὁπότεν γένηται ἔλκος, πᾶν ἀσθενές ἐστὶ τοῦτο, καὶ ὅσῳ ἂν πλεονάκις, τοσούτῳ μᾶλλον· τὸ δὲ ἀσθενές κατεψυγμένον καὶ ὑγρότητος πλήρες; διὸ καὶ μέλαν φαίνεται, εἰ τὰ μεγάλα ἔλκη καὶ πολυχρόνια μελαίνας τὰς οὐλὰς ἴσχει. τὸ δὲ πολλάκις λαβεῖν ἔλκος οὐδὲν ἄλλ' ἢ πολὺν χρόνον ἔχειν ἐστὶν ἔλκος.

Διὰ τί ποτε πρὸς τὰ ὑπώπια τοὺς κυάθους προστιθέμεθα; ἢ διότι, ὅταν πληγῶμεν, ὁ τόπος καταψύχεται, τὸ δὲ θερμὸν ὑποχωρεῖ. προστιθέμενος οὖν ὁ κύαθος, ψυχροῦ ὄντος τοῦ χαλκοῦ, διακωλύει τὸ θερμὸν ἐκπορεύεσθαι.

Διὰ τί ἐν ταῖς οὐλαῖς οὐ γίνονται τρίχες; ἢ ὅτι οἱ πόροι ἐπιτυφλοῦνται ἐξ ὧν αἱ τρίχες, καὶ παραλλάττουσιν;

[891a] Διὰ τί οἰδημα καὶ πελιώματα λαμβάνουσιν αἱ πληγαί; ἢ διότι κατὰ τοῦτον τὸν τρόπον διασταλέντα τὰ ὑγρά, εἰς τοὺς πλησίον τόπους προσκόψαντα ἀποπάλλεται πάλιν καὶ τῇ κολλήσῃ ὑγρὸν συνήγαγεν; ἐὰν δὲ καὶ φλέβιά τινα ῥαγῇ, ὕφαιμος ἢ συνδρομὴ γίνεται.

I. ΕΠΙΤΟΜΗ ΦΥΣΙΚΩΝ.

Διὰ τί τὰ μὲν βήττει, τὰ δ' οὐ, οἷον ἄνθρωπος μὲν βήττει, βοῦς δὲ οὐ; πότερον τῷ εἰς ἄλλο τι τρέπεσθαι τοῖς πλείστοις ζώοις τὸ περιττώμα, ἀνθρώπῳ δὲ δεῦρο; ἢ ὅτι ἐγκέφαλον πλεῖστον καὶ ὑγρότατον ἔχει ὁ ἄνθρωπος, ἢ δὲ βῆξ καταρρέοντος γίνεται φλέγματος.

Διὰ τί ἀνθρώπῳ μόνῳ τῶν ζώων αἷμα ῥεῖ ἐκ τῶν μυκτῆρων; ἢ ὅτι ἐγκέφαλον ἔχει πλεῖστον καὶ ὑγρότατον, ἀφ' οὗ αἱ φλέβες πληρούμεναι τοῦ περιττώματος διὰ τῶν πόρων προίενται τὴν ῥύσιν; λεπτότερον γὰρ γίνεται τοῦ αἵματος τοῦ καθαροῦ τὸ νοσερόν, τοῦτο δὲ ἐστὶ τὸ μιχθὲν τοῖς τοῦ ἐγκεφάλου περιττώμασι, καὶ ἐστὶ καθάπερ ἰχώρ.

Διὰ τί τῶν ζώων τὰ μὲν ὑπὸ σάρκα, τὰ δὲ κατὰ σάρκα πίονά ἐστι, τὰ δὲ κατ' ἀμφοτέρα; ἢ ὅσων μὲν πυκνὴ ἡ σὰρξ, μετὰ τὸ δέρματος καὶ τῆς σαρκὸς συστέλλεται ἡ ἰκμὰς διὰ τὸ ταύτη εἶναι τὸ δέρμα ἀφεστὸς φύσει· ἢ πεττομένη γίνεται πιμελή. ὅσα δὲ ἀραιότεραν ἔχει τὴν σάρκα τό τε δέρμα προεστός, κατὰ σάρκα πίονα γίνεται. τὰ δὲ ἀμφοτέρως ἔχοντα ἐπ' ἀμφοτέρα πιαίνεται.

Διὰ τί οἱ παῖδες καὶ αἱ γυναῖκες ἥττον ἔχουσι λεύκην τῶν ἀνδρῶν, καὶ τῶν μὲν γυναικῶν αἱ πρεσβύτιδες μᾶλλον; ἢ ὅτι ἡ λεύκη ἐστὶ πνεύματος ἔξοδος, ἐστὶ δὲ τὰ μὲν τῶν παίδων οὐκ εὐπνοα σώματα ἀλλὰ πυκνά, καὶ τὰ τῶν γυναικῶν ἥττον ἢ τὰ τῶν ἀνδρῶν· εἰς τὰ καταμήνια γὰρ τρέπεται· δηλοῖ δὲ ἡ λειότης τὴν πυκνότητα τῆς σαρκός. τὰ δὲ τῶν πρεσβυτέρων καὶ τῶν γράων εὐπνοα· μόνα γάρ, ὥσπερ τὰ παλαιὰ οἰκοδομήματα, διεστῶσαν ἔχει τὴν σύνθεσιν τῶν μορίων.

Διὰ τί ἄνθρωπος μόνον ἴσχει λεύκην; πότερον ὅτι λεπτοδερμότατον τῶν ζώων ἐστίν, ἅμα δὲ καὶ πνευματωδέστερον; σημεῖον δέ, ὅτι ἡ λεύκη ἐν τοῖς λεπτοδερμοτάτοις μάλιστα καὶ πρῶτον γίνεται μέρεσιν. ἢ διὰ ταῦτά τε, καὶ [891b] ὅτι μόνον πολιοῦται τῶν ζώων; ἐν γὰρ ταῖς λεύκαις πολιαὶ γίνονται αἱ τρίχες, ὥστε ἀδύνατον, ὅσα μὴ πολιοῦται, λεύκην ἴσχειν.

Διὰ τί αἶγες μὲν καὶ πρόβατα ἀμέλγονται πλεῖστον γάλα, οὐ μέγιστον σῶμα ἔχοντα, ἄνθρωπος δὲ καὶ βοῦς ἔλαττον ὥς κατὰ λόγον; πότερον ὅτι εἰς τὸ σῶμα ἀναλίσκεται, τοῖς δὲ ἄλλοις εἰς τὸ

περίττωμα, τοῖς δὲ προβάτοις καὶ ταῖς αἰξὶ τὸ περιγινόμενον τοῦ περιπτώματος γάλα γίνεται πᾶν; ἢ ὅτι πολυτοκώτερά ἐστι τῶν μεγάλων, ὥστε πλεῖον σπᾶ περίττωμα διὰ τὸ πλείω τρέφειν; ἢ δι' ἀσθένειαν τῶν σωμάτων πλεῖον περίττωμα γίνεται κύουσιν αὐτοῖς; τὸ δὲ γάλα γίνεται ἐκ τοῦ περιπτώματος.

Διὰ τί τῶν ζώων τὰ μὲν, μεταβάλλοντα τὰ ὕδατα, μεταβάλλει τὰς χροὰς καὶ ὅμοια γίνεται τοῖς ἐκεῖ, οἷον αἶγες, τὰ δὲ οὐ, οἷον ἄνθρωποι; καὶ ὅλως δὲ διὰ τί τὰ μὲν μεταβάλλει, τὰ δὲ οὐ, οἷον κόραξ οὐ μεταβάλλει; ἢ ὧν μὲν οὐ κρατεῖ ἡ φύσις τοῦ ὕγρου, ὥσπερ ἡ τῶν ὀρνέων (διὸ καὶ κύστιν οὐκ ἔχει), οὐ μεταβάλλει; καὶ διὰ τί οὐκ αὐτὰ ἀλλὰ τὰ ἔκγονα μεταβάλλει; ἢ ὅτι ἀσθενέστερα τὰ νέα τῶν γεννησάντων;

Διὰ τί τὰ ἄρσενα μείζω τῶν θηλειῶν ὡς ἐπίπαν ἐστίν; πότερον ὅτι θερμότερα, τοῦτο δὲ αὐξητικόν; ἢ ὅτι ὀλόκληρα, τὰ δὲ πεπῆρωται; ἢ ὅτι τὰ μὲν ἐν πολλῷ χρόνῳ τελειοῦται, τὰ δὲ ἐν ὀλίγῳ;

Διὰ τί τὰ μὲν ταχυτόκα τῶν ζώων ἐστί, τῶν δὲ πολυχρόνιος ἡ κύησις; ἢ ὅτι τὰ μακροβιότερα βραδύτερον πέφυκε τελειοῦσθαι; ἔστι δὲ βραδυτόκα τὰ μακρόβια. οὐ μέντοι τὰ μάλιστα, οἷον ἵππος ἀνθρώπου βραδυτοκώτερον μὲν, ὀλιγοχρονιώτερον δέ. τούτου δὲ αἴτιον ἡ σκληρότης τῶν ὑστερῶν· ὥσπερ γὰρ ἡ ξηρὰ γῆ οὐ ταχὺ ἐκτρέφει, οὕτω καὶ ἡ τοῦ ἵππου ὑστέρα.

Διὰ τί τοῖς ἄλλοις ζώοις τὰ ἔκγονα μᾶλλον τὰς φύσεις ὁμοιοῦται ἢ τοῖς ἀνθρώποις; ἢ ὅτι ὁ μὲν ἄνθρωπος πολλαχῶς διατίθεται τὴν ψυχὴν κατὰ τὴν ὁμιλίαν, καθὼς δ' ἂν ὁ πατήρ καὶ ἡ μήτηρ διατεθῶσιν, οὕτω ποικίλλεται καὶ τὰ τικτόμενα. τὰ δὲ ἄλλα ζῶα τὰ μὲν πλεῖστα πρὸς αὐτὸ τοῦτό εἰσιν. ἔτι δὲ οὐ πληροῦται ὡς ἐπὶ τὸ πολὺ διὰ ταύτην τὴν ἐπιθυμίαν.

[892a] Διὰ τί οἱ λευκοὶ ἄνθρωποι καὶ ἵπποι ὡς ἐπὶ τὸ πολὺ γλαυκοί; ἢ διότι τριῶν χρωμάτων ὄντων τοῖς ὅμμασι, μέλανος καὶ αἰγωποῦ καὶ γλαυκοῦ, τῷ τοῦ σώματος χρώματι καὶ τὸ τοῦ ὀφθαλμοῦ χρῶμα ἀκολουθεῖ, τοῦτο δὲ ἐστὶ γλαυκότης.

Διὰ τίνα αἰτίαν οἱ νάνοι γίνονται; ἔτι δὲ μᾶλλον καθόλου, διὰ τί τὰ μὲν ὅλως μεγάλα, τὰ δὲ μικρά; εἴτα οὕτω σκεπτέον. δύο δὴ τὰ αἴτια· ἢ γὰρ ὁ τόπος ἢ ἡ τροφή. ὁ μὲν οὖν τόπος, ἐὰν ᾗ στενός, ἢ δὲ τροφή, ἐὰν ᾗ ὀλίγη, ὥσπερ καὶ ἤδη γεγεννημένων πειρῶνται μικροὺς ποιεῖν, οἷον οἱ τὰ κυνίδια τρέφοντες ἐν τοῖς ὀρυγοτροφεῖσι. ὅσοις μὲν οὖν ὁ τόπος αἴτιος, οὗτοι πυγμαῖοι γίνονται. τὰ μὲν γὰρ πλάτη

καὶ τὰ μήκη ἔχοντες γίνονται κατὰ τὸ τῶν τεκόντων μέγεθος, μικροὶ δὲ ὅλως. τούτου δὲ αἴτιον, ὅτι διὰ τὴν στενότητα τοῦ τόπου συγκλῶμεναι αἱ εὐθεῖαι καμπύλαι γίνονται. ὥσπερ οὖν οἱ ἐπὶ τῶν καπηλείων γραφόμενοι μικροὶ μὲν εἰσι, φαίνονται δ' ἔχοντες πλάτη καὶ βάθη, ὁμοίως συμβαίνει καὶ τοῖς πυγμαίοις. ὅσοι δὲ διὰ τροφῆς ἔνδειαν ἀτελεῖς γίνονται, οὗτοι καὶ παιδαριώδη τὰ μέλη ἔχοντες φαίνονται, καὶ ἐνίους ἰδεῖν ἔστι μικροὺς μὲν σφόδρα, συμμέτρους δέ, ὥσπερ τὰ Μελιταῖα κυνίδια. αἴτιον δὲ ὅτι οὐχ ὥς ὁ τόπος ἢ φύσις ποιεῖ.

Διὰ τί τῶν ζώων τὰ μὲν ἐξ ἀλλήλων γίνεται, τὰ δ' ἐκ τινων συγκρινομένων ὁμοίως τῆς ἐξ ἀρχῆς γενέσεως αὐτοῖς ὑπαρξάσης; καθάπερ οἱ περὶ φύσεως λέγοντες λέγουσι καὶ τὴν ἐξ ἀρχῆς γένεσιν τῶν ζώων γενέσθαι, διὰ τὰς μεταβολὰς καὶ μετακινήσεις τοῦ κόσμου καὶ τοῦ παντὸς οὕτω μεγάλας· καὶ νῦν εἴπερ μέλλει πάλιν ἔσεσθαι, τοιαύτας τινὰς ὑπάρξει δεῖ κινήσεις; ἡ μὲν γὰρ ἀρχὴ παντὸς ἔργου μέγιστον· ἤμισυ γάρ· τὸ δὲ σπέρμα ἀρχή. τῶν μὲν οὖν μικρῶν ὅσα γίνεται μὴ ἐξ ἀλλήλων, αἴτιον τοιαῦτα γενέσθαι ὥσπερ ἐξ ἀρχῆς ἐγεννήθησαν ἡ τοῦ σπέρματος μικρότης· τοῦ γὰρ ἐλάττονος καὶ ἡ ἀρχὴ ἐλάττων. ὥστε ἱκαναὶ καὶ αἱ τούτου μεταβολαὶ πρὸς τὸ γεννῆσαι αὐτῷ τὸ σπέρμα. ὅπερ συμβαίνει· γίνονται γὰρ ἐν ταῖς μεταβολαῖς μάλιστα. τοῖς δὲ μείζοσι μείζονος δεῖ καὶ μεταβολῆς.

Διὰ τί τὰ μὲν πολύτεκνα τῶν ζώων, οἷον ὕς, κύων, [892b] λαγῶς, τὰ δὲ οὐ, οἷον ἄνθρωπος, λέων; ἢ ὅτι τὰ μὲν πολλὰς μήτρας καὶ τύπους ἔχει, ἃς καὶ ἰμπλασθαι ἐπιθυμεῖ καὶ εἰς ἃ σχίζεται ἡ γονή, τὰ δὲ τοῦναντίον.

Διὰ τί ἐλάχιστον διάστημα τῶν ὁμμάτων ὁ ἄνθρωπος ἔχει τῶν ζώων κατὰ μέγεθος; ἢ διότι μάλιστα κατὰ φύσιν ἔχει τῶν ἄλλων, ἡ δὲ αἴσθησις φύσει τὸ ἔμπροσθεν· ἐφ' ὃ γὰρ ἡ κίνησις, τοῦτο δεῖ προορᾶν. ὅσῳ δ' ἂν ἢ πλεῖον τὸ διάστημα τῶν ὁμμάτων, τοσούτῳ μᾶλλον αἱ ὄψεις ἔσσονται ἐν τῷ πλαγίῳ. εἰ οὖν ἔχειν δεῖ κατὰ φύσιν, ὅτι ὀλίγιστον δεῖ τὸ διάστημα εἶναι· οὕτω γὰρ εἰς τὸ πρόσθεν μάλιστα πορεύσεται. ἔτι δὲ τοῖς ἄλλοις ζώοις, ἐπεὶ χεῖρας οὐκ ἔχουσιν, ἀναγκαῖον παρορᾶν εἰς τὰ πλάγια. διὸ πλεῖον διέστηκε τὰ ὅμματα αὐτῶν, καὶ μάλιστα τῶν προβάτων, διὰ τὸ μάλιστα ποιεῖσθαι τὴν πορείαν κύπτοντα.

Διὰ τί τὰ ἄλλα ζῷα τὰ μὲν οὐκ ἐξονειρώττει, τὰ δὲ ὀλιγάκις; πότερον ὅτι οὐδὲν ὕπτιον κατάκειται, ἐξονειρώττει δὲ οὐδὲν μὴ

ὑπτιον; ἢ ὅτι οὐκ ἐνυπνιάζει τὰ ἄλλα ὁμοίως, ὁ δὲ ἐξονειρωγμὸς μετὰ φαντασίας γίνεται.

Διὰ τί τῶν ζώων τὰ μὲν κινεῖ τὴν κεφαλὴν, τὰ δὲ οὐ κινεῖ; ἢ ὅτι ἓνια οὐκ ἔχει αὐχένα; διὸ ταῦτα οὐ κινεῖ τὴν κεφαλὴν.

Διὰ τί ἄνθρωπος πτάρνυται τῶν ζώων μάλιστα; πότερον ὅτι τοὺς πόρους εὐρεῖς ἔχει δι' ὧν τὸ πνεῦμα καὶ ὁσμη εἰσέρχεται; τούτοις γὰρ πνεύματος πληρουμένοις πτάρνυται. ὅτι δὲ εὐρεῖς, σημεῖον ὅτι ἤκιστα ὁσφραντικὸν τῶν ἄλλων ζώων· ἀκριβέστεροι δὲ οἱ λεπτότεροι. εἰ οὖν εἰς μὲν τοὺς εὐρεῖς πλεόν καὶ πλεονάκις εἰσέρχεται τὸ ὑγρὸν, οὗ πνευματουμένου ὁ παρμὸς γίνεται, τοιούτους δὲ μάλιστα τῶν ζώων οἱ ἄνθρωποι ἔχουσι, πλειστάκις ἂν πτάρνοιντο εἰκότως. ἢ ὅτι ἐλάχιστοι κατὰ τὸ μῆκος οἱ μυκτῆρες, ὥστε τὸ θερμανθὲν ὑγρὸν ταχὺ δύναται πνεῦμα γίνεσθαι. ἐν δὲ τοῖς ἄλλοις διὰ μῆκος καταψύχεται πρότερον.

Διὰ τί ἡ γλῶττα οὐδενὸς περὰ τῶν ζώων; ἢ ὅτι τὸ πῖον πυκνόν, ἡ δὲ γλῶττα ἀραιὰ φύσει ἐστίν, ὅπως τοὺς χυμοὺς γνωρίζῃ;

Διὰ τί τὰ θήλεα συντάσει οὐρεῖ, τὰ δὲ ἄρρενα οὐ; ἢ ὅτι πορρώτερόν ἐστιν ἡ κύστις ἡ τῶν θηλειῶν, καὶ εἰς βάθος καὶ εἰς μῆκος; μεταξὺ γὰρ αὐτῶν ἡ μήτρα τῆς ἔδρας καὶ [893a] στῆς κύστεως. ὥστε δεῖται βίας πλείονος τὸ ἐκπεμπόμενον διὰ γε τὴν ἀπόστασιν τῆς μήτρας. βιάζεται δὲ συντεῖνον τῷ πνεύματι.

Διὰ τί τῶν ζώων ὅσα μὴ πέτεται, πάντα ἀποβάλλει τὰς χειμερινὰς τρίχας, πλὴν ὅς; καὶ γὰρ κύων ἀποβάλλει καὶ βοῦς. ἢ ὅτι θερμότατον ἡ ὕς ἐστί, καὶ ἐκ θερμοῦ πεφύκασιν αἱ τρίχες αὐτῇ; τοιοῦτον γὰρ ἐστὶ τὸ λιπαρόν. τῶν μὲν οὖν ἄλλων ἢ διὰ τὸ ἀποψύχεσθαι τὸ ὑγρὸν ἀποπίπτουσιν, ἢ πέττειν τροφήν οὐ δυναμένης τῆς οἰκείας θερμότητος, ἢ διὰ τὸ μηδὲν πάσχειν τὴν ὑγρότητα τὴν ἐν αὐτῇ, διὰ τὸ πέττεσθαι καλῶς τὴν τροφήν, οὐκ ἀποβάλλει τὰς τρίχας. ὁπότε γὰρ ἡ αἰτία τῆς ἀποβολῆς ἐστίν, ἰκανὴ ἡ πίπτῃς κωλύσαι. πρόβατα δὲ καὶ ἄνθρωποι διὰ πλῆθος καὶ πυκνότητα τῆς τριχὸς ἀπαθῇ ἐστίν· οὐ γὰρ δικνεῖται ἡ ψύξις εἰς βάθος, ὥστε πῆξαι τὴν ὑγρότητα ἢ πέσαι κωλύσαι τὴν θερμότητα.

Διὰ τί τῶν μὲν προβάτων μαλακώτεραι αἱ τρίχες ἀναφύονται τιλλόμεναι, τῶν δὲ ἀνθρώπων σκληρότεραι; ἢ ὅτι τῶν μὲν προβάτων ἐκ τοῦ ἐπιπολῆς πεφύκασιν; διὸ καὶ ἀλύπως ἐκσπῶνται, μενούσης τῆς ἀρχῆς τῆς τροφῆς ἀδιαφθόρου, ἢ ἐστὶν ἐν σαρκί. τὰ μὲν οὖν περιτώματα ἀνοιχθέντων ἐξατμίζει μᾶλλον, τὸ δὲ ἔριον σαρκὸς

οἰκείαν τροφήν λαμβάνει· σὰρξ δὲ μαλακοῖς καὶ γλυκέσι τρέφεται. αἱ δὲ τῶν ἀνθρώπων τρίχες ἐκ βάθους πεφυκυῖαι βία καὶ μετ' ἀλγηδόνης ἐκσπῶνται. δῆλον δέ· ἐπισπῶνται γὰρ αἷμα. τραυματιζομένου οὖν τοῦ τόπου συμβαίνει αὐτὸν καὶ οὐλοῦσθαι. διὸ τέλος μὲν συμβαίνει γίνεσθαι τοῖς τιλλομένοις· ἕως δ' ἂν ἀνίωσι τρίχες, σκληρὰς ἀνιέναι διὰ τὸ τὴν μὲν τροφώδη τῆς σαρκὸς ἐκλελοιπέναι πᾶσαν τροφήν, ἐκ περιττωμάτων δ' αὐτὰς γίνεσθαι. σημεῖον δέ· τῶν μὲν γὰρ πρὸς μεσημβρίαν πάντων σκληραὶ εἰσιν αἱ τρίχες διὰ τὸ τὸ ἐκτὸς θερμὸν εἰς βάθος διυκνούμενον ἐξατμίζειν τὴν εὐπεπτον τροφήν, τῶν δὲ ὑπὸ τὰς ἄρκτους μαλακαί· τούτοις γὰρ ἐπιπολῆς μᾶλλον ἐστὶ τό θ' αἷμα καὶ οἱ γλυκεῖς χυμοί· διὸ καὶ εὐχροοὶ εἰσιν.

Διὰ τί αἱ μὲν τῶν προβάτων τρίχες ὅσῳ ἂν μακρότεραι ᾖσι, σκληρότεραι γίνονται, αἱ δὲ τῶν ἀνθρώπων μαλακώτεραι; ἢ ὅτι αἱ τῶν προβάτων, οἷαν εἴρηται τροφήν ἔχουσαι, μακρὰν τῆς ἀρχῆς ἀπαρτῶμεναι ἀτροφώτεραί εἰσι, καὶ ῥαδίως ἐξ αὐτῶν ἐξατμίζεται ὑπὸ τοῦ [893b] θερμοῦ ἢ ἐνυπάρχουσα τροφή δι' εὐπεψίαν; ξηραινόμεναι δὲ ξηρότεραι γίνονται· τὸ γὰρ ὑγρὸν μαλακόν. αἱ δὲ τῶν ἀνθρώπων ἐλάττω μὲν, μᾶλλον δὲ τῆς ἀρχῆς. πέττεται δὲ αὐταῖς μᾶλλον διὰ τὸ ἐλάττω εἶναι· πεττομένη δὲ μαλακωτέραν ποιεῖ τὴν τρίχα· πάντα γὰρ τὰ πεπεμμένα τῶν ἀπέπτων μαλακώτερα ἐστίν. ἐκ περιττώματος γὰρ πλείστου ἢ τοῦ ἀνθρώπου θριξ ἢ ἢ τοῦ προβάτου. σημεῖον δέ· τὰ γὰρ νέα πρόβατα τῶν παλαιῶν μαλακώτερα ἔχει τὰ ἔρια.

Διὰ τί οἱ ἄνθρωποι καὶ οἱ ὄρνια οἱ δασεῖς λάγνοι εἰσίν; ἢ ὅτι θερμοὶ καὶ ὑγροὶ τὴν φύσιν εἰσίν, δεῖ δὲ ἀμφοῖν πρὸς τὴν ὀχέαν. τὸ μὲν γὰρ θερμὸν ἐκκρίνει, τὸ δὲ ὑγρὸν ἐκκρίνεται. διὰ τὸ αὐτὸ δὲ καὶ οἱ χῶλοι ἄνδρες· ἢ γὰρ τροφή αὐτοῖς ὀλίγη μὲν κάτω ἀφικνεῖται διὰ τὴν ἀναπηρίαν τῶν σκελῶν, εἰς δὲ τὸν ἐπάνω τόπον ἔρχεται πολλή, καὶ εἰς σπέρμα συγκρίνεται.

Διὰ τί ὁ ἄνθρωπος χαίτην οὐκ ἔχει; ἢ διότι πώγωνα ἔχει, ὥστε ἢ ἐκεῖ ἀπελθοῦσα τροφή τῆς τοιαύτης περιττώσεως εἰς τὰς σιαγόνas ἔρχεται;

Διὰ τί πάντα τὰ ζῶα ἀρτίους τοὺς πόδας ἔχει; ἢ ὅτι οὐκ ἐνδέχεται κινεῖσθαι μὴ ἐστηκότος τινός, ἂν μὴ ἄλληται; ἐπεὶ τοίνυν ἐκ δυοῖν τινοῖν κίνησιν ἀνάγκη τῇ πορείᾳ εἶναι, ἕκ τε κινήσεως καὶ στάσεως, ταῦτα δὲ δύο, καὶ ἄρτια ἤδη. καὶ τετράποδα, διότι πλείους·

τοὺς μὲν γὰρ δύο κινεῖ, οἱ δὲ δύο ἐστήκασιν. καὶ οἱ ἕξ· καὶ τὰ ἄλλα δὲ δύο ἔτι· τούτων δὲ τὸ μὲν κινεῖται, τὸ δὲ ἔστηκεν.

Διὰ τί τοῖς μὲν ἵπποις καὶ τοῖς ὄνοις ἐκ τῶν οὐλῶν φύονται τρίχες, τοῖς δὲ ἀνθρώποις οὐ; ἢ διότι τοῖς μὲν ἄλλοις ζώοις ἐστὶ τὸ δέρμα μέρος τῆς σαρκός, ἀνθρώπῳ δὲ καθάπερ πάθος σαρκός; δοκεῖ γὰρ αὐτῆς τὸ ἐπιπολῆς καταψυχόμενον στερεώτερον γίνεσθαι, καθάπερ τῶν ἐφθῶν ἀλεύρων αἱ γραῖαι καλούμεναι. ἐπεὶ οὖν κἀκεῖναι εἰσιν ἄλευρον ἐφθόν, καὶ τὸ τοῦ ἀνθρώπου καλούμενον δέρμα σὰρξ ἂν εἴη. τραυματισθέντος δὲ ἡ τριβέντος ἀνθρώπου μὲν τὴν σάρκα συμβαίνει πυκνοῦσθαι· διὸ ἡλλωιωμένης τῆς ἐπιπολῆς σαρκὸς οὐ τὴν αὐτὴν φύσιν λαμβάνει τὰ τραύματα ἥπερ καὶ ἐκ γενετῆς· ἀλλοιωθείσης δ' αὐτῆς μὴ γίνεσθαι ἔτι τὸ ἐξ αὐτῆς οὐθέν ἄτοπον, καθάπερ καὶ ἐκ τῶν ἀλωπεκιῶν καλουμένων· καὶ γὰρ αὗται τῆς ἐπιπολῆς σαρκὸς φθοραὶ καὶ ἀλλοιώσεις εἰσίν. τῶν δὲ ὑποζυγίων τριβέντων καὶ ὑγιαζομένων [894a] πάλιν ἀναπληροῦται τὰ νενοσηκότα μέρη τοῦ σώματος τῶν αὐτῶν μὲν, ἀσθενεστέρων δ' ἢ ἐξ ἀρχῆς ἦν. ἐπεὶ δ' ἐστὶ καὶ τὸ δέρμα μέρος αὐτῶν, γίνονται τε ἂν καὶ φύονται τρίχες (ἐκ δέρματος γὰρ φύονται τρίχες), λευκαὶ δὲ φύονται διὰ τὸ τὸ δέρμα ἀσθενέστερον γεγονέναι τοῦ ἐξ ἀρχῆς, καὶ τὴν λευκὴν ἀσθενεστάτην εἶναι τρίχα.

Διὰ τί ἐν μὲν τοῖς ἄλλοις ζώοις διαμένει ὁμοίως τὰ δίδυμα θήλεα καὶ ἄρρενα ὄντα, ἐν δὲ τοῖς ἀνθρώποις οὐ; ἢ διότι τούτῳ ἀσθενῇ μάλιστα τὰ δίδυμα· μονοτόκον γὰρ ἐστίν. ἐν δὲ τοῖς διδύμοις παρὰ φύσιν τὸ θῆλυ γίνεσθαι καὶ ἄρρεν, ὥστε ὁ μάλιστα ἐστὶ παρὰ φύσιν, τοῦτο καὶ ἀσθενέστατον.

Διὰ τί τοῖς μὲν ἵπποις καὶ τοῖς ὄνοις ἐκ τῶν οὐλῶν φύονται τρίχες, τοῖς δὲ ἀνθρώποις οὐ; ἢ διότι ἡ οὐλὴ κωλύει διὰ τὴν πύκνωσιν ἢ διὰ τὸ φθείρειν τὴν τροφήν; τοῖς μὲν οὖν ἀνθρώποις παντελῶς κωλύει διὰ τὴν ἀσθένειαν τῆς τριχός, τοῖς δὲ ἵπποις οὐκ ἐκώλυσε, διέφθειρε δέ.

Διὰ τί τοῖς ζώοις ἄρτιοι πόδες; ἢ ὅτι παντὸς μὲν τοῦ κινουμένου ἀνάγκη τι ἡρεμεῖν, συνέβαινε δὲ περιττῶν ὄντων μὴ γίνεσθαι τοῦτο· ὅπερ κατὰ τὴν ἀντιστοιχίαν τῶν ποδῶν ἦν ἡ κίνησις.

Διὰ τί ἐλάττω χρόνον τὰ ζῷα καθεύδει ἢ ἐγρήγορεν, οὐ συνεχῶς δέ; ἢ διὰ τὸ μὴ ἅμα πᾶσαν πέττεσθαι τὴν περίττωσιν; ἀλλ' ὅταν τι πεφθῇ, κουφισθὲν διεγείρεται. καὶ πλεονάκις δ' ἐγείρονται, ὅσοις ψυχρὸς ὁ τόπος ὁ πέττων ἐστὶ τὴν περίττωσιν· ταχὺ γὰρ

παύεται καὶ πολλάκις, ἡ δὲ διάπαυσις ἔγερσίς ἐστιν. ἡδὺ δέ, οὐδὲ εἰκός, διὰ τὸ ἀνάπαυσιν εἶναι φαίνεται. ἀλλ' οὐδ' ἐνταῦθα πλείω χρόνον ἢ ἀνάπαυσις γίνεται τῶν κατὰ φύσιν ἔργων· οὐδ' εἰ τὸ ἐσθίειν ἥδιον τοῦ μῆ, ὅμως πλείω χρόνον ἐσθίουσιν ἢ ἀσιτοῦσιν.

Διὰ τί τῶν ζώων τὰ μὲν εὐθὺς ἀκολουθεῖ τοῖς γεννήσασι, τὰ δ' ὀψέ, οἷον ἄνθρωπος, ἢ μόλις, ἢ οὐδέποτε; ἢ διότι τὰ μὲν ταχὺ ἀπολαμβάνει τὸ γνωρίζειν, τὰ δ' ὀψέ; καὶ τὰ μὲν ἀναίσθητα τοῦ ὠφελουῦντος, τὰ δὲ ἔχει αἰσθησιν. ὅσα μὲν οὖν ἄμφω ἔχει ταῦτα (λέγω δ' οἷον καὶ αἰσθησιν τοῦ ὠφελουῦντος καὶ ἐπιτέλεσιν τοῦ σώματος), ἀκολουθεῖ, τὰ δὲ μὴ ἄμφω οὐ ποιεῖ τοῦτο· δεῖ γὰρ δύνασθαι καὶ διαισθάνεσθαι.

Διὰ τί λεύκη οὐ γίνεται τοῖς ἄλλοις ζώοις; πότερον ὅτι τοῖς μὲν ἄλλοις νόσημα, τοῖς δὲ ἀνθρώποις γίνεται διάλευκα [894b] τὰ δέρματα καὶ αἱ τρίχες αὐτῶν; ἀλλ' ὅμως ἀπορήσειεν ἂν τις διὰ τί ὕστερον οὐ γίνεται ἀλλ' ἐκ γενετῆς ἢ ποικιλία. ἢ ὅτι τὰ δέρματα τῶν ἄλλων ζώων σκληρά, ἄνθρωπος δὲ φύσει λεπτοδερμότατος; ἢ δὲ λεύκη πνεύματός ἐστιν ἔκκρισις, ὃ κωλύεται διὰ τὴν πυκνότητα ἐξιέναι τοῖς ἄλλοις ζώοις τοῦ δέρματος.

Διὰ τί ἐν μὲν τῇ λεύκῃ πολιαὶ γίνονται, ὅπου δὲ πολιαί, οὐκ αἰεὶ λεύκη; ἢ διότι αἱ τρίχες ἐκ τοῦ δέρματος εἰσίν, ἢ δὲ πολιαὶ ὥσπερ σαπρότης τις τῶν τριχῶν ἐστίν. ὅταν μὲν οὖν τὸ δέρμα κάμνη, ἀνάγκη καὶ τὴν τρίχα ἐξ ἐκείνου οὔσαν κάμνειν· ὅταν δὲ ἡ θρίξ, οὐκ ἀνάγκη τὸ δέρμα.

Διὰ τί τῶν ζώων τὰ μὲν χαλεπά ἐστὶ μετὰ τὸν τόκον, οἷον κύων καὶ ὄξ, τὰ δὲ οὐδὲν ἐπιδήλως, οἷον γυνή, πρόβατον; ἢ ὅτι ὅσα μὲν περιττωματικὰ πραέα; ἀπέρχεται γὰρ ἐν τῷ τόκῳ τὰ λυποῦντα. τούτοις δὲ ἀπὸ τῶν εὖ ἐχόντων γίνεται ἡ ἀφαίρεσις, ὥστε ἡ ἰσχνότης ποιεῖ διὰ τὴν ἔξιν τὴν ὀργήν, ὥσπερ καὶ αἱ ἀλεκτορίδες οὐ τεκοῦσαι χαλεπαί, ἀλλ' ἐπφάζουσαι, διὰ τὴν ἀσιτίαν.

Διὰ τί οἱ εὐνοῦχοι τὰ μὲν ἄλλα εἰς τὸ θῆλυ διαφθειρόμενοι μεταβάλλουσι· καὶ γὰρ φωνὴν θηλυκὴν ἴσχουσι καὶ ὀξύτητα καὶ ἀναρθρίαν, καὶ οὕτω σφόδρα μεταπίπτουσιν ὥς καὶ ἐν τοῖς ἄλλοις ζώοις τὰ ἐκτεμνόμενα. ἐναντίως δ' οἱ ταῦροι καὶ οἱ κριοὶ τὰ κέρατα ἴσχουσι, διότι καὶ τὰ θήλεα ἐναντίως αὐτῶν ἔχει. διὸ οἱ μὲν μείζω ἐκτεμνόμενοι ἴσχουσιν, οἱ δὲ ἐλάττω. τὸ δὲ μέγεθος μόνον οἱ εὐνοῦχοι εἰς τὸ ἄρρεν μεταβάλλουσιν· μείζους γὰρ γίνονται. ἔστι δὲ τοῦτο τοῦ ἄρρενος· τὰ γὰρ θήλεα ἐλάττω ἐστὶ τῶν ἀρρένων. ἢ οὐδὲ

τοῦτο εἰς τὸ ἄρρεν, ἀλλ' εἰς τὸ θῆλυ; οὐ γὰρ εἰς πᾶν τὸ μέγεθος, ἀλλ' εἰς τὸ μῆκος μόνον, τὸ δὲ ἄρρεν καὶ εἰς πλάτος καὶ εἰς βάθος· τότε γὰρ τετελειώται. ἔτι δὲ ὡς ἔχει τὸ θῆλυ πρὸς τὸ ἄρρεν, οὕτως αὐτοῦ τοῦ θήλεος ἢ παρθένος πρὸς τὴν γυναῖκα· ἢ μὲν γὰρ ἤδη γενναία, ἢ δὲ οὐ. εἰς τὴν τούτων οὖν μεταβάλλει· ἐπὶ μῆκος γὰρ ταύταις ἢ αὐξήσις. διὸ καὶ Ὅμηρος εὖ τὸ “μῆκος δ' ἔπορ” Ἀρτεμις ἀγνή,” ὡς διὰ τὴν παρθενίαν, ὃ εἶχε, δυναμένης δοῦναι. οὐκ οὖν εἰς τὸ ἄρρεν κατὰ τὸ μέγεθος μεταβάλλει. οὐ γὰρ εἰς τὸ τέλειον μεταβάλλει. οἱ δὲ εὐνοῦχοι εἰς μέγεθος τὸ μῆκος ἐπιδιδόασιν.

Διὰ τί οἱ εὐνοῦχοι ἢ ὅλως οὐκ ἴσχουσιν ἢ ἥττον ἰξίας; [895a] ἢ ὅτι μεταβάλλουσι τὴν φύσιν ἐν τῇ ἐκτμήσει εἰς τὰ ἄγονα; τοιαῦτα δὲ παῖς καὶ γυνή, ὧν οὐδέτερον ἴσχει ἰξίας, εἰ μὴ τι σπάνιον γυνή.

Διὰ τί μᾶλλον ἄνθρωπος πολλὰς φωνὰς ἀφήσι, τὰ δὲ ἄλλα μίαν, ἀδιάφορα ὄντα τῷ εἶδει; καὶ τοῦ ἀνθρώπου μία φωνή, ἀλλὰ διάλεκτοι πολλαί.

Διὰ τί δὲ αὐτὴ ἄλλη, τοῖς δὲ ἄλλοις οὐ; ἢ ὅτι οἱ μὲν ἄνθρωποι γράμματα πολλὰ φθέγγονται, τῶν δὲ ἄλλων τὰ μὲν οὐδέν, ἔνια δὲ δύο ἢ τρία τῶν ἀφώνων; ταῦτα δὲ ποιεῖ μετὰ τῶν φωνηέντων τὴν διάλεκτον. ἔστι δὲ ὁ λόγος οὐ τὸ τῇ φωνῇ σημαίνειν, ἀλλὰ τοῖς πάθεσιν αὐτῆς, καὶ μὴ ὅτι ἀλγεῖν χαίρει. τὰ δὲ γράμματα πάθη ἐστὶ τῆς φωνῆς. ὁμοίως δὲ οἷ τε παῖδες καὶ τὰ θηρία δηλοῦσιν· οὐ γὰρ πω οὐδὲ τὰ παιδιά φθέγγονται τὰ γράμματα.

Διὰ τί μόνον τῶν ζώων ἄνθρωπος γίνεται ἰσχνόφωνον; πότερον ὅτι καὶ ἐνεόν, ἢ δὲ ἰσχυροφωνία ἐνεότης ἐστίν; ἀλλὰ δὴ καὶ οὐδ' ὅλως πεπλήρωται τοῦτο τὸ μόριον. ἢ ὅτι κοινωνεῖ μᾶλλον λόγου, τὰ δ' ἄλλα φωνῆς; ἔστι δὲ ἡ ἰσχυροφωνία οὐ κατὰ τὸ ὄνομα ἐν ἡ οὐ συνεχῶς διεξιέναι.

Διὰ τί ἄνθρωπος γίνεται ἐκ γενετῆς χωλὸς μάλιστα τῶν ἄλλων ζώων; πότερον ὅτι ἰσχυρὰ τῶν ἄλλων ἐστὶ σκέλη τῶν ζώων; ὁστῶδη γὰρ καὶ νευρώδη καὶ τετράποδα καὶ ὄρنيθες ἔχουσιν, οἱ δὲ ἄνθρωποι σαρκώδη· διὰ τὴν ἀπαλότητα οὖν θᾶττον πηροῦνται ἐν τῇ κινήσει. ἢ διότι μόνον τῶν ζώων πολλοὺς ἔχει χρόνους τῆς γενέσεως; καὶ γὰρ ἐπτάμηνα καὶ ὀκτάμηνα καὶ δεκάμηνα γίνεται. τοῖς δ' ἄλλοις εἰς χρόνος τῆς τελειώσεως γέγονεν οὐ διατρίψας· τοῖς δ' ἀνθρώποις πολὺς ὁ χρόνος γίνεται τῆς ἐν πλήθει διατριβῆς, ὥστε κινουμένων διὰ τὸ ἀπαλὰ εἶναι καὶ θραύεται τὰ ἀκρωτήρια ἐν τῷ πλείονι χρόνῳ πλείω.

Διὰ τί οἱ εὐνοῦχοι ἐλκώδεις τὰς κνήμας ἴσχουσι καὶ σαπράς; πότερον ὅτι καὶ αἱ γυναῖκες, οἱ δ' εὐνοῦχοι γυναικικοί; ἢ τοῦτο μὲν συμβέβηκεν, αἴτιον δὲ καὶ ταῖς γυναιξιν ὅτι ἡ θερμότης κάτω ὀρμᾷ. δηλοῖ δὲ τὰ γυναικεῖα. διὸ οὔτε οἱ εὐνοῦχοι οὔτε γυναῖκες δασεῖς γίνονται, διὰ πολλὴν ὑγρότητα.

Διὰ τί τῶν ζώων οὐθὲν λιθιᾷ ἀλλ' ἢ ἄνθρωπος; ἢ ὅτι τῶν μὲν ὑποζυγίων καὶ τῶν πολυνόχων οἱ πόροι τῆς κύστεως εὐρεῖς εἰσίν; ὅσα δὲ μὴ τὸ πρῶτον, ὕστερον δὲ ζωοτοκεῖ [895b] ἐν αὐτοῖς, οἷον ἔνιοι τῶν ἰχθύων, τούτων δὲ οὐδὲν κύστιν ἔχει, ἀλλ' εἰς τὴν κοιλίαν αὐτοῖς ἡ τοιαύτη συνθλίβεται ὑπόστασις, οἷον καὶ τοῖς ὄρνισιν, ὥστε ταχὺ καὶ διεξέρχεται κατὰ τὴν ἔδραν. ὁ δὲ ἄνθρωπος κύστιν τε ἔχει καὶ στενὸν τὸν καυλὸν ὡς κατὰ μέγεθος. διὰ μὲν οὖν τὸ ἔχειν τοῦτο τὸ μόριον συνθλίβεται τὸ γεῶδες εἰς τὴν κύστιν (διὸ καὶ χρώζονται αἱ ἀμίδες ὑπ' αὐτοῦ), διὰ δὲ τὴν θερμότητα τοῦ τόπου συμπέττεται καὶ παχύνεται μᾶλλον, ἐμμένει δὲ καὶ αὐξάνεται διὰ τὴν στενότητα τοῦ οὐρητήρος· οὐ γὰρ δυνάμενα τὰ γεῶδη ὑποστήματα ῥαδίως ὑπεξιέναι, πρὸς ἄλληλα ὑποστρεφόμενα λίθος γίνεται.

Διὰ τί οὐκ ἐρεύγεται τὰ ὑποζύγια, οὐδὲ οἱ βόες καὶ τὰ κερατοφόρα, οὐδὲ οἱ ὄρνιθες; ἢ διὰ ξηρότητα τῆς κοιλίας; ταχὺ γὰρ ἀναλίσκεται τὸ ὑγρὸν καὶ διηθεῖται· ἐμμένοντος δὲ καὶ πνευματουμένου γίνεται ὁ ἐρευγμός. τοῖς δὲ λοφούροις διὰ μῆκος τοῦ αὐχένος εἰς τὸ κάτω ὀρμᾷ τὸ πνεῦμα, διὸ καὶ ἀποψοφοῦσι μάλιστα. οἱ ὄρνιθες δὲ καὶ τὰ κερατοφόρα οὐ ποιεῖ οὐδέτερον. οὐδὲ ἐρεύγονται δὲ ὅσα μηρυκάζει, διὰ τὸ πολλὰς ἔχειν κοιλίας καὶ τὸν καλούμενον κεκρύφαλον· διὰ πολλῶν οὖν γίνεται καὶ ἄνω καὶ κάτω τῷ πνεύματι ἡ πορεία, καὶ φθάνει ἀναλίσκόμενον τὸ ὑγρὸν πρὶν ἐκπνευματωθῆναι καὶ ποιῆσαι ἢ ἐρυγεῖν ἢ ψοφῆσαι.

Διὰ τί, ὅσα μὲν ἡμερα τῶν ζώων ἐστί, πάντως καὶ ἄγρια, ὅσα δὲ ἄγρια, οὐ πάντως ἡμερα; καὶ γὰρ ἄνθρωποι που φαίνονται ἄγριοι ὄντες καὶ κύνες ἐν Ἰνδοῖς καὶ ἵπποι ἄλλοθι, ἀλλ' οὐ λέοντες ἡμεροὶ οὐδὲ παρδάλεις οὐδ' ἔχεις οὐδ' ἄλλα πολλὰ. ἢ ὅτι ῥᾶον τὸ φαῦλον καὶ γενέσθαι ἐξ ἀρχῆς καὶ μεταβαλεῖν εἰς αὐτό; ἢ γὰρ φύσις οὐχ ἡ πρώτη ἀλλ' ἡ ἐν τέλει ἐργώδης τυχεῖν εὐθύς. διὸ πάντα καὶ τὰ ἡμερα ἄγρια γίνονται τὸ πρῶτον μᾶλλον ἢ ἡμερα, οἷον παιδίον ἢ ἀνὴρ παμφάγον καὶ τῷ θυμῷ ζῶν· ἀλλ' ἀσθενέστερα. ὥσπερ οὖν καὶ ἐπὶ τῶν τῆς τέχνης ἔργων, οὕτως ἔχει καὶ ἐπὶ τῶν τῆς φύσεως ἔργων. καὶ γὰρ ἐπὶ τούτων πάντ' ἐστὶ φαύλως εἰργασμένα, καὶ πλείω τὰ φαῦλα,

κλίνη καὶ ἱμάτιον καὶ ἄλλ' ὅτιοῦν. καὶ ὁ μὲν ἐστὶ καλόν, λαβεῖν ἔστιν ἅπαν καὶ φαῦλον, ὃ δὲ φαῦλον, οὐ πᾶν καὶ καλόν, οἷον εἴ τις ἐπὶ τῶν ἀρχαίων γραφέων καὶ ἀνδριαντοποιῶν σκοπεῖ τὰ ἔργα· οὐ γὰρ ἦν πώποτε οὐδαμῇ γραφὴ σπουδαία οὐδὲ ἀνδριάς, φαῦλα δὲ ἦν. ὁμοίως δὲ καὶ ἡ φύσις φαῦλα μὲν πάντα [896a] ποιεῖ, καὶ πλείους καὶ πλείω, σπουδαῖα δ' ἐλάττω, καὶ οὐ πάντα δύνатаι. τὸ δὲ ἡμερον βέλτιον, τὸ δὲ ἄγριον φαῦλον. φύσει δὲ οὐ τῇ ἐξ ἀρχῆς, ἀλλ' ἐφ' ἣν οἶμαι ῥᾶον, ποιεῖ σπουδαῖα καὶ ἡμερα. τὰ δὲ ἐναντία ἢ οὐδέποτε ἢ μόλις, καὶ ἔν τισι τόποις καὶ ἐν χρόνοις, ἢ ἀρτίου, ἢ ποτὲ ἔν τινι κράσει τοῦ ὅλου, γίνονται ἡμερα τὰ ζῶα πάντα. τὸ δ' αὐτὸ καὶ ἐπὶ τῶν χυτῶν πάντων ἐστίν· ὅσα μὲν γὰρ ἡμερα, καὶ ἄγρια, οὐ πάντα δὲ δύνатаι ἡμεροῦσθαι, ἀλλ' ὅμως εἰσὶν ἐν ἰδίᾳ χώρᾳ πρὸς πολλὰ ἰδίως ἐχούση, ὥστε ἡμελημένα καὶ ἄγρια κρείττω καὶ ἡμερώτερα φύεσθαι τῶν ἐν ἄλλῃ γεωργομένων.

Διὰ τί τοῖς μὲν ἀνθρώποις οἱ ὀμφαλοὶ μεγάλοι γίνονται, τοῖς δ' ἄλλοις ζώοις οὐ φανεροί; ἢ διότι τοῖς μὲν διὰ τὸ πολὺν χρόνον εἶσω μένειν ἀφαναίνονται καὶ εὐθὺς τείνονται, ὅλον δ' ἐπανοιδοῦσι τὰ ἔλκη, διὸ ἔνιοι τῶν ὀμφαλῶν καὶ αἰσχίους εἰσίν· ὁ δὲ ἄνθρωπος ἀτελὴς ἐξέρχεται, ὥστε ἔφυγροι καὶ ἄναιμοι οἱ ὀμφαλοὶ ἀκολουθοῦσιν. ὅτι δὲ τὰ μὲν τετελειωμένα τὰ δὲ ἀτελὴ ἐξέρχεται, σημεῖον ὅτι τὰ μὲν εὐθὺς δύνатаι ζῆν, τὰ δὲ παιδία ἐπιμελείας δεῖται.

Διὰ τί τὰ μὲν τῶν ζώων ἅπαξ ὀχεύεται, τὰ δὲ πολλάκις, καὶ τὰ μὲν ὥρα ἔτους, τὰ δ' ὅτε ἔτυχεν, ἄνθρωπος μὲν ἀεί, τὰ δὲ ἄγρια οὐ πολλάκις, καὶ ὅς μὲν ἄγριος ἅπαξ, ἡμερος δὲ πολλάκις; ἢ διὰ τὴν τροφήν καὶ ἀλέαν καὶ πόνον; ἐν πλησμονῇ γὰρ Κύπρις. ἔπειτα τὰ αὐτὰ ἄλλοθι μὲν ἅπαξ τίκτει, ἄλλοθι δὲ πλεονάκις, οἷον τὰ πρόβατα ἐν Μαγνησίᾳ καὶ Λιβύῃ τίκτει δῖς. τὸ δ' αἴτιον ἢ πολυχρονία τοῦ τόκου· οὐ γὰρ ἐπιθυμεῖ ὅταν πλησθῇ, ὥσπερ οὐδὲ τροφῆς τὰ πλήρη. τὰ δὲ κυοῦντα ἥττον ὀχείας ἐπιθυμεῖ διὰ τὸ μὴ γίνεσθαι τὴν κάθαρσιν.

Διὰ τί τῶν ἀνθρώπων οἱ ἀραιοὺς ἔχοντες τοὺς ὀδόντας βραχύβιοι ὥς ἐπὶ τὸ πολὺ; ἢ ὅτι σημεῖον τοῦ τὸ ὀστοῦν πυκνὸν εἶναι; ὥς ὁ ἐγκέφαλος ἀσθενῆς οὐκ εὐπνοῶν, ὥστε ὑγρὸς ὢν τὴν φύσιν ταχὺ σήπεται. καὶ γὰρ τὰ ἄλλα μὴ κινούμενα καὶ ἀπατμίζοντα. διὸ καὶ ἄνθρωπος τὴν κεφαλὴν δασύτατον, καὶ τὸ ἄρρεν τοῦ θήλεος μακροβιώτερον διὰ τὰς ῥαφάς. δεῖ δὲ ἰδεῖν καὶ ἐπὶ τῶν ἄλλων.

Διὰ τί δέ, ὅσοι τὴν διὰ τῆς χειρὸς τομὴν ἔχουσι δι' ὅλης,

μακροβιώτεροι; ἢ διότι τὰ ἀναρθρα βραχυβιώτατα, ὥς τὰ ἔνυγρα; εἰ δὲ τὰ ἀναρθρα βραχύβια, δῆλον ὅτι τὰ ἡρθρωμένα τοῦναντίον. τοιαῦτα δὲ ὦν καὶ τὰ φύσει ἀναρθρα μάλιστα ἡρθρωται· τῆς δὲ χειρὸς τὸ εἶσω ἀναρθρότατον.

Διὰ τί τῶν ζώων ἄνθρωπος ἢ μόνον ἢ μάλιστα διαστρέφεται; ἢ ὅτι ἢ μόνον ἢ μάλιστα ληπτὸν ἐν τῇ νηπιότητι γίνεται, ὅτε καὶ διαστρέφεσθαι συμβαίνει πᾶσιν.

Διὰ τί τῶν ζώων ἄνθρωπος μάλιστα καπνίζεται; ἢ ὅτι μάλιστα δακρύει, ἢ δὲ κάπνισις μετὰ δακρύου;

Διὰ τί ἵππος ἵππῳ χαίρει καὶ ἐπιθυμεῖ, ἄνθρωπος δὲ ἀνθρώπῳ, καὶ ὅλως δὲ τὰ συγγενῇ τοῖς συγγενέσι καὶ ὁμοίοις; οὐ γὰρ δὴ ὁμοίως ὅτι πᾶν ζῶον καλόν, ἢ δὲ ἐπιθυμία τοῦ καλοῦ. ἔδει οὖν τὸ καλὸν ἥδιον εἶναι. νῦν δὲ μᾶλλον οὐ πᾶν κάλλος ἡδύ, τὸ καλὸν καὶ τὸ ἡδύ. οὐδὲ πᾶσιν ἢ ἡδονὴ ἢ τὸ καλὸν ἡδύ, οἷον φαγεῖν ἢ πιεῖν ἐστὶν ἥδιον ἐτέρῳ καὶ ἀφροδισιάσαι ἄλλῳ. διότι μὲν οὖν ἕκαστον τῷ συγγενεῖ μιγνύμενον μάλιστα καὶ ἥδιστα ἀφροδισιάζει, ἄλλο πρόβλημα· ὅτι δὲ καὶ κάλλιστον, οὐκέτι ἀληθές. ἀλλὰ ἡμεῖς τὸ εἰς τὴν συνουσίαν ἡδύ, ὅτι ὁ μὲν καλόν, ὅτι ἐπιθυμοῦντες χαίρομεν ὁρῶντες. καίτοι καὶ ἐπὶ τῶν ἄλλων ἐπιθυμιῶν ἔχει ὁμοίως· διψῶντες γὰρ ἥδιον ὁρῶσι τὸ πόμα. τὸ μὲν οὖν πρὸς χρεῖαν τινὰ καλόν, οὗ καὶ μάλιστα ἐπιθυμοῦμεν, τοῦτο δοκεῖ ἥδιστον εἶναι, τὸ δὲ καθ' αὐτὸ οὐκέτι οὕτως. σημεῖον δὲ τούτου· δοκοῦσι γὰρ ἡμῖν καὶ ἄνδρες καλοὶ εἶναι, πρὸς τὴν συνουσίαν βλέψασιν. ἄρ' οὖν οὕτως ὥστε καὶ ἡσθῆναι ὁρῶσι μᾶλλον τῶν εἰς συνουσίαν; οὐδέν γε κωλύει, εἰ μὴ ἐπιθυμοῦντες τύχοιμεν. οὕτω δὲ πόμα κάλλιον· εἰ γὰρ διψῶντες τύχοιμεν, ἥδιον ὀψόμεθα.

Διὰ τί ποτε τοῦ μὲν ἀνθρώπου τὰ ἔμπροσθεν δασύτερα τῶν ὀπισθεν ἐστὶ, τῶν δὲ τετραπόδων τὰ ὀπισθεν; ἢ ὅτι πάντα τὰ δίποδα τὰ ἔμπροσθεν ἔχει δασύτερα; οἱ γὰρ ὄρνιθες τὸν αὐτὸν τρόπον τοῖς ἀνθρώποις ἔχουσιν. ἢ τὰ ἀσθενέστερα μᾶλλον αἰεὶ σκεπάζειν ἢ φύσις εἶωθεν, ἀσθενὲς δὲ ἕκαστόν ἐστὶ τινὰ τρόπον. τῶν δὲ τετραπόδων ἀπάντων τὰ ὀπισθεν ἀσθενέστερά ἐστὶ τῶν ἔμπροσθεν διὰ τὸν τόπον· ὑπὸ γὰρ τῶν ψυχῶν καὶ καυμάτων μᾶλλον δυνατά ἐστὶ πάσχειν· τῶν δὲ ἀνθρώπων τὰ ἔμπροσθεν ἀσθενέστερά ἐστὶ καὶ τὸ αὐτὸ πέπονθεν.

[897a] Διὰ τί ἄνθρωπος τῶν ζώων μάλιστα πτάρνυται; ἢ ὅτι καὶ κορυζᾷ μάλιστα; τούτου δ' αἰτίον ἐστὶν ὅτι τοῦ θερμοῦ ὄντος περὶ

τὴν καρδίαν καὶ πεφυκότος ἄνω φέρεσθαι τοῖς μὲν ἄλλοις ζώοις ἢ κατὰ φύσιν αὐτοῦ φορά ἐστὶν ἐπὶ τοὺς ὠμούς, ἐντεῦθεν δὲ ἐξ ἀνακλάσεως σχιζόμενον τὸ μὲν ἐπὶ τὸν τράχηλον καὶ τὴν κεφαλὴν φέρεται αὐτοῦ, τὸ δὲ εἰς τὴν ῥάχιν καὶ τὴν ὀσφύν, διὰ τὸ ἐπὶ τῆς αὐτῆς εὐθείας εἶναι ταῦτα πάντα καὶ παρὰ τὴν βάσιν. φερόμενον δὲ ὁμοίως τὸ σῶμα καὶ τὰ ὑγρὰ μερίζει εἰς αὐτὰ ὁμαλῶς· ἔπεται γὰρ τὰ ὑγρὰ τῷ θερμῷ. διὸ οὐδὲ πᾶν κορυζᾷ τὰ τετράποδα ζῶα, οὐδὲ πτάρνυται· ὁ γὰρ πταρμὸς ἢ πνεύματος ἀθρόου φορά ἐστὶν, ὑγρῶν ἐξατμιζόντων τι μᾶλλον τοῦ σώματος, ἢ ὑγρῶν ἀπέπτων. διὸ πρὸ τῶν κατάρρων γίνεται, ἃ οὐ συμβαίνει τοῖς ἄλλοις ζώοις, διὰ τὸ τὴν τοῦ θερμοῦ φορὰν ὁμαλίζειν ἐν αὐτῷ εἰς τὸ πρόσθεν καὶ ὀπισθεν. τοῦ δὲ ἀνθρώπου πρὸς ὀρθῇ πεφυκότος τῇ βάσει, καθάπερ τὰ φυτά, συμβαίνει τοῦ θερμοῦ φορὰν ἐπὶ τὴν κεφαλὴν γίνεσθαι πλείστην καὶ σφοδροτάτην. φερόμενόν τε ἐνταῦθα ἀραιοῖ καὶ θερμαίνει τοὺς περὶ αὐτὴν πόρους. ὄντες δὲ τοιοῦτοι δεκτικοὶ γίνονται τῶν ὑγρῶν μᾶλλον ἢ οἱ κάτω τῆς καρδίας πόροι. ὅταν οὖν συμβῇ ἐξυγρανθῆναι μᾶλλον τοῦ δέοντος καὶ καταψυγῆναι, ἔξωθεν συμβαίνει τὸ θερμόν, τροφήν τε ἔχον καὶ συστελλόμενον ἐντός, αὔξεσθαι, αὐξανόμενον δὲ φέρεσθαι ἐπὶ τὴν κεφαλὴν καὶ τοὺς ἐν αὐτῇ πόρους· εἰς οὓς ἀκολουθοῦντα τὰ ὑγρά, ὄντα λεπτὰ καὶ ἄεπτα, πληροῖ αὐτοὺς καὶ τοὺς κατάρρους ποιεῖ, καὶ πταρμούς ὁμοίως. ἐν γὰρ ταῖς ἀρχαῖς τῶν κατάρρων τὸ θερμόν προαναφερόμενον τοῦ ὑγροῦ, καὶ πνευματοῦν τοὺς πόρους, τῇ τ' ἐκβολῇ τοῦ πνεύματος τοὺς πταρμούς ποιεῖ καὶ τῇ πρὸ τῶν ὑγρῶν ἀναγωγῇ, ἃ ἐστὶ λεπτὰ καὶ δριμέα. διὸ καὶ συμβαίνει μετὰ τῶν τῆς κορύξης πταρμῶν ὑδατῶδη ἀπομύττεσθαι. πάντων δὲ τούτων ὀρμησάντων τὰ συνεχῇ καὶ πάθος ἔχοντα ὑγρά ἐφίσταται αὐτοῖς, καὶ ἐμφράττει τοὺς περὶ τὴν κεφαλὴν καὶ τὴν ῥῖνα πόρους· ὀγκηρότερα γὰρ γινόμενα καὶ διατείνοντα ποιεῖ τοὺς περὶ τὴν κεφαλὴν πόνους. σημεῖον δὲ τὸ μήτ' ἐκτός ἢ δι' αὐτῶν πνεῦμα ἀφεῖσθαι. διὸ οὔτε πτάρνυνται οὔτε ὀσφραίνονται οἱ κορυζῶντες. οἱ δὲ ἄνευ κορύξης γινόμενοι διὰ μὲν τὰς αὐτὰς αἰτίας γίνονται, μικρὰς δὲ καὶ ἐλαφρὰς ἀρχὰς λαβόντες. ὥστε [897b] συναχθέντα τὰ ὑγρά τῷ θερμῷ, ἐκπνευματούμενα ὑπ' αὐτοῦ δι' ὀλιγότητα, εἰσπίπτει κατὰ τὰς ῥῖνας. ποιεῖ δὲ τὸν ψόφον τοῦ πνεύματος οὐχ ἥττον ἢ βία τῆς φορᾶς ἢ τὸ πλῆθος αὐτοῦ. ἐνεχθέντος γὰρ τοῦ θερμοῦ πρὸς ὀρθὴν πρὸς τὸν ἐγκέφαλον καὶ προσπεσόντος αὐτῷ, ἀνακλᾶται ἐπὶ τὰς ῥῖνας διὰ τὸ τοὺς ταύτῃ πόρους ἐκτός ἀπὸ τοῦ ἐγκεφάλου διατείνειν.

παρὰ φύσιν οὖν τῆς ἐκτὸς κλάσεως φορᾶς γινομένης ἐπὶ τὰς ρίνας τῷ πνεύματι, σφοδρὰν συμβαίνει γίνεσθαι· διὸ ποιεῖ τοὺς ψόφους. τῶν δὲ ἄλλων ζώων συμβαίνει μάλιστα κορυζᾶν τοὺς ὄρνιθας διὰ τὸ μάλιστα ὁμοιόσχημον εἶναι ἄνθρωπον· ἥττον δὲ ἢ ἄνθρωπος πάσχει αὐτό, ὅτι τὰ πολλὰ κάτω ἔχει τὴν κεφαλὴν διὰ τὸ τὴν νομὴν ἀπὸ τῆς γῆς εἶναι.

Διὰ τί τὰ θαλάττια ζῶα τῶν ἐν τῇ γῇ μείζω καὶ εὐτραφέστερά ἐστιν; ἢ ὅτι ὁ ἥλιος καταδαπανῶν τὰ περιέχοντα τὴν γῆν ἀφαιρεῖται τὴν τροφήν; διὸ καὶ τὰ κατακεκλειμένα εὐτραφέστερά ἐστιν. πάντων οὖν τούτων ἀπήλλακται τὰ θαλάττια ζῶα.

Διὰ τί ποτε τὰ μὲν ἄλλα ζῶα πλεονάκις τὴν ξηρὰν τροφήν ἢ τὴν ὑγρὰν προσάγεται, ὁ δὲ ἄνθρωπος τὴν ὑγρὰν ἢ τὴν ξηρὰν; ἢ ὅτι φύσει ὁ ἄνθρωπος θερμότατον; πλείστης οὖν καταψύξεως δεῖται.

Διὰ τί οἱ εὐνοῦχοι οὐ γίνονται φαλακροί; ἢ ὅτι πολὺν ἔχουσι τὸν ἐγκέφαλον; τοῦτο δὲ συμβέβηκεν αὐτοῖς διὰ τὸ μὴ συγγίνεσθαι ταῖς γυναιξίν· ἡ γὰρ γονή ἐστὶν ἀπὸ τοῦ ἐγκεφάλου χωροῦσα διὰ τῆς ῥάχεως. διὰ τοῦτο δὲ οὐ δοκοῦσι καὶ οἱ βόες οἱ ἐκτομῖαι μεγάλα τὰ κέρατα ἴσχειν, ὅταν ἐκτμηθῶσιν. δοκεῖ δὲ ἡ αὐτὴ αἰτία εἶναι καὶ ὅτι αἱ γυναῖκες καὶ οἱ παῖδες οὐκ εἰσὶ φαλακροί.

Διὰ τί τὰ μὲν εὐθὺς δύνανται δι' αὐτῶν τρέφεσθαι μετὰ τὴν γένεσιν, τὰ δὲ οὐ; ἢ ὅσα ὀλιγοχρονιώτερα τῶν μνήμης δεκτικῶν; διὸ ἅπαντα καὶ τελευτᾷ θάπτον.

Διὰ τί ποτε ὁ μὲν ἄνθρωπος πλείω τὴν ὑποχώρησιν ποιεῖται τὴν ὑγρὰν τῆς ξηρᾶς, οἱ δὲ ἵπποι καὶ οἱ ὄνοι τὴν ξηρὰν; ἢ διότι ταῦτα μὲν τὰ ζῶα πλείονι τροφῇ χρῆται τῇ ξηρᾷ, ὁ δὲ ἄνθρωπος ὑγρᾷ μᾶλλον ἢ τῇ ξηρᾷ; πᾶσα δὲ περίττωσις ἀπὸ τῆς τροφῆς ἐστί, καὶ ἀπὸ τῆς πλείονος πλείω. τὰ μὲν οὖν τῇ ὑγρᾷ μᾶλλον, τὰ δὲ τῇ ξηρᾷ πλείονι τροφῇ χρῆται· διότι τὰ μὲν τῶν ζώων ἐστὶ φύσει [898a] ξηρά, τὰ δὲ ὑγρά. τὰ μὲν οὖν τῇ φύσει ξηρά τῆς ὑγρᾶς μᾶλλον ἐπιθυμεῖ (ταύτης γὰρ ἐνδεέστερά εἰσι), τὰ δὲ τῇ φύσει ὑγρά τῆς ξηρᾶς· ταύτης γὰρ ἐνδεέστερα καθέστηκεν.

Διὰ τί ὄρνιθες καὶ ἄνθρωποι καὶ τῶν ζώων τὰ ἀνδρεῖα σκληρότερα; ἢ ὅτι ὁ θυμὸς μετὰ θερμότητος; ὁ γὰρ φόβος κατάψυξις. ὅσων οὖν τὸ αἷμα ἐνθερμόν ἐστί, καὶ ἀνδρεῖα καὶ θυμοειδῆ· τὸ δὲ αἷμα τροφή. ὅσα δὲ θερμῷ ἄρδεται τῶν φυομένων, σκληρότερα πάντα. Διὰ τί τέρατα τίκτουσι μάλιστα τὰ τετράποδα τὰ μὴ μεγάλα, ἄνθρωπος δὲ καὶ τὰ μεγάλα ἥττον, οἷον ἵπποι καὶ ὄνοι;

ἢ ὅτι πολύγονα ταῦτα, οἷον κύνες καὶ ὕες καὶ αἶγες καὶ πρόβατα, πολὺ μᾶλλον τῶν μεγάλων, ἐκείνων δὲ τὰ μὲν ὅλως μονοτόκα, τὰ δὲ ὥς ἐπὶ τὸ πολὺ. τὰ δὲ τέρατα γίνεται ἐπαλλαττόντων τῶν σπερμάτων ἀλλήλοις καὶ συγχεομένων ἐν τῇ ἐξόδῳ τῆς γονῆς ἢ ἐν τῇ μίξει τῇ ἐν τῇ ὑστέρα τῆς θηλείας. διὸ καὶ ὀρνιθες αὐτὰ ποιοῦσιν· τὰ γὰρ ὡὰ δίδυμα τίκτουσι, τὰ δὲ τέρατα ἐκ τῶν διδύμων γίνεται, ὧν ἡ λέκιθος τῷ ὑμένι οὐ διαιρεῖται.

Διὰ τί ἡ κεφαλὴ δασεῖα τῶν ἀνθρώπων μᾶλλον τοῦ ἄλλου σώματος καὶ οὐ κατὰ λόγον, τοῖς δὲ ἄλλοις ζώοις τούναντίον; ἢ ὅτι καὶ τῶν ἄλλων τὰ μὲν εἰς ὀδόντας ἐκδίδωσι καθ' ὑπερβολὴν τῆς τροφῆς, τὰ δὲ εἰς κέρατα, τὰ δὲ εἰς τρίχας; ὅσα μὲν εἰς κέρατα, ἤττον τὴν κεφαλὴν ἔχει δασεῖαν· ἐκεῖ γὰρ ἀνήλωται· ὅσα δὲ εἰς ὀδόντας, μᾶλλον μὲν τῶν κερατοφόρων (ἔχει γὰρ λοφιάν), ἤττον δὲ τῶν τοιούτων, οἷον ὀρνέων. ἔχουσι γὰρ ταῦτα καὶ τὴν τῶν ἀνθρώπων· ὁ ἐκείνοις πολλαχῇ διὰ πληθος, τοῦτο εἰς κεφαλὴν ἐκδίδωσιν· οὐδὲ γὰρ οὐδὲν ἔχει, οὐδὲ πολὺ οὕτως ὥστε πανταχῇ.

Διὰ τί ἄνθρωπος μόνος τῶν ζῶων πολιὰς ἔχει; ἢ ὅτι τὰ μὲν πλεῖστα τῶν ζῶων ρυάδα τὴν τρίχα ἀνὰ πᾶν ἔτος ἔχει, οἷον ἵππος, βοῦς, ἔνια δὲ ρυάδα μὲν οὐκ ἔχει, βραχύβια δὲ εἰσι, καθάπερ πρόβατον καὶ ἄλλα· οὗ ἡ θριξ ὥσπερ οὐ γηράσκουσα οὐδὲ πολιοῦται. ὁ δὲ ἄνθρωπος οὔτε ρυάδα ἔχει τὴν τρίχα, μακρόβιον τέ ἐστιν, ὥστε ὑπὸ τοῦ χρόνου πολιοῦται.

Διὰ τί, ὅσοις τὰ ἀπὸ τοῦ ὀμφαλοῦ κάτω μείζονα ἢ [898b] τὰ πρὸς τὰ στήθη, βραχύβιοι καὶ ἀσθενεῖς; ἢ ὅτι ἡ κοιλία ψυχρὰ διὰ μικρότητα, ὥστε οὐ πεπτική ἀλλὰ περιττωματική; οἱ δὲ τοιοῦτοι νοσακεροί.

Διὰ τί τὰ μὲν γίνεται τῶν ζῶων οὐ μόνον ἐξ ἀλλήλων ἀλλὰ καὶ αὐτόματα, τὰ δ' ἐξ ἀλλήλων μόνον, οἷον ἄνθρωπος καὶ ἵππος; ἢ καὶ εἰ καὶ μὴ δι' ἑτέρας αἰτίας, ἀλλ' ὅτι τοῖς μὲν ὀλίγος ὁ χρόνος τῆς γενέσεως, ὥστε ἡ γεννητικὴ ὥρα ὑπερτείνει καὶ ἐνδέχεται γενέσθαι ἐν τῇ μεταβολῇ τῶν ὥρων, τῶν δὲ πολὺ ἡ γένεσις ὑπερτείνει. ἐνιαύσιοι γὰρ ἢ δεκάμηνοί εἰσιν· ὥστε ἀνάγκη γίνεσθαι ἢ ἐξ ἀλλήλων γίνεσθαι.

Διὰ τί τῶν Αἰθιοπῶν οἱ μὲν ὀδόντες λευκοί, καὶ λευκότεροι ἢ τῶν ἄλλων, οἱ δὲ ὄνυχες οὐκέτι; ἢ οἱ μὲν ὄνυχες, ὅτι καὶ τὸ δέρμα μέλαν, καὶ μελάντερον ἢ τῶν ἄλλων, οἱ δὲ ὄνυχες ἐκ τοῦ δέρματος φύονται. οἱ δὲ ὀδόντες λευκοί διὰ τί; ἢ ὅτι ἐξ ὧν τὸ ὑγρὸν ἐξάγει ὁ

ἥλιος ἄνευ τοῦ ἐπιβάπτειν, λευκαίνεται, οἶον καὶ τὸν κηρόν; τὸ μὲν οὖν δέριμα ἐπιβάπτει, τοὺς δὲ ὀδόντας οὐκ ἐπιβάπτει, ἀλλὰ τὸ ὑγρὸν διὰ τὴν ἀλέαν ἐξατμίζεται ἐξ αὐτῶν.

Διὰ τί τὰ μὲν ἀφαιρουμένης τῆς κεφαλῆς ἀποθνήσκει εὐθὺς ἢ ταχύ, τὰ δὲ οὐ; ἢ ὅσα ἄναιμα καὶ ὀλιγότροφα, τοῦτο πάσχει; οὐτε τροφῆς γὰρ δεῖται ταχύ, οὐτε ἐγγεῖται αὐτῶν τὸ θερμὸν ἐν τῷ ὑγρῷ, ὧν ἄνευ οὐχ οἶόν τε ζῆν τοῖς ἐναίμοις. τούτοις δὲ οἶόν τέ ἐστιν· ἀπνευστὶ ζῆν γὰρ δύνανται πολὺ μᾶλλον. ἢ δὲ αἰτία ἐν ἑτέροις εἴρηται.

ΙΑ. ΟΣΑ ΠΕΡΙ ΦΩΝΗΣ.

Διὰ τί τῶν αἰσθήσεων ἐκ γενετῆς μάλιστα τὴν ἀκοὴν πηροῦνται; ἢ ὅτι ἀπὸ τῆς αὐτῆς ἀρχῆς εἶναι δόξειεν ἂν ἢ τε ἀκοὴ καὶ ἡ φωνή; ῥᾶστα δὲ δοκεῖ διαφθείρεσθαι ἡ διάλεκτος οὕσα εἶδος φωνῆς, καὶ χαλεπώτατα ἐπιτελεῖσθαι. σημεῖον δὲ ὅτι μετὰ τὸ γενέσθαι πολὺν χρόνον ἐνεοὶ ἐσμεν· τὸ μὲν γὰρ πρῶτον ὅλως οὐδὲ λαλοῦμεν οὐδέν, εἴτα ὁπῆ ποτε ψελλίζομεν. διὰ τε τὸ τὴν διάλεκτον εὐφθαρτον εἶναι, τὴν αὐτὴν δὲ ἀρχὴν ἀμφοτέρων εἶναι καὶ τῆς διαλέκτου (φωνὴ γάρ τις καὶ τῆς ἀκοῆς ὥσπερ καὶ εἰ συμβεβηκότος), ῥᾶστα τῶν αἰσθήσεων φθείρεται, καὶ οὐ καθ' αὐτήν, ἡ ἀκοή. τεκμήριον δὲ ἔστι καὶ ἐκ τῶν ἄλλων ζώων λαβεῖν, ὅτι παντελῶς [899a] εὐφθαρτός ἐστιν ἡ ἀρχὴ τῆς διαλέκτου· λαλεῖ γὰρ οὐθέν τῶν ἄλλων ζώων πλὴν ἀνθρώπου, καὶ οὗτοι δὲ ὁπῆ ποτε, καθάπερ εἴρηται.

Διὰ τί οἱ κωφοὶ πάντες διὰ τῶν ῥινῶν φθέγγονται; ἢ διὰ τὸ ἐγγὺς τοῦ εἶναι ἐνεοὺς εἶναι; οἱ δὲ ἐνεοὶ λαλοῦσι διὰ τῶν ῥινῶν· ταύτῃ γὰρ αὐτῶν ἐκπίπτει τὸ πνεῦμα διὰ τὸ τῷ στόματι μεμυκέναι. μεμύκασι δέ, ὅτι οὐθέν εἰς φωνὴν χρῶνται τῇ γλώττῃ.

Διὰ τί μεγάλωφονοι πάντες εἰσὶν οἱ θερμοὶ τὴν φύσιν; ἢ ὅτι ἀνάγκη καὶ ἀέρα πολὺν καὶ ψυχρὸν ἐν τούτοις εἶναι; ἔλκει γὰρ τὸ πνεῦμα τὸ θερμὸν πρὸς ἑαυτὸ καὶ ἀέρα, καὶ πλείω τὸ πλείον. ἡ δὲ μεγάλη φωνὴ γίνεται ἐν τῷ πολὺν ἀέρα κινεῖν, καὶ ὀξεῖα ἐν τῷ ταχέως· βαρεῖα δὲ ἡ ἐν τῷ βραδέως.

Διὰ τί οἱ κωφοὶ πάντες διὰ τῶν ῥινῶν φθέγγονται; ἢ διὰ τὸ βιαιότερον πνεῖν τοὺς κωφοὺς; ἐγγὺς γὰρ τοῦ ἐνεοὶ εἶναι εἰσὶν. διίσταται οὖν τῶν μυκτῆρων ὁ πόρος ὑπὸ τοῦ πνεύματος· οἱ τοιοῦτοι δὲ διὰ ῥινῶν φθέγγονται.

Διὰ τί εὐηκοώτερα τὰ τῆς νυκτός; ἢ ὅτι μᾶλλον ἡρεμία διὰ τὴν τοῦ θερμοτάτου ἀπουσίαν; διὸ καὶ ὥς ἐπὶ τὸ πολὺ ἀταρακτότερα. ὁ γὰρ ἥλιος ὁ κινῶν.

Διὰ τί πόρρωθεν αἱ φωναὶ ὀξύτεροι δοκοῦσιν εἶναι; οἱ γοῦν μιμούμενοι τοὺς σφόδρα πόρρω ὄντας καὶ βοῶντας ὀξὺ φθέγγονται καὶ ὅμοιον τοῖς ἀπηχοῦσιν, καὶ τῆς ἡχοῦς ὀξύτερος φαίνεται ὁ ψόφος. ἔστι δὲ πόρρω· ἀνακλᾶται γάρ. οὐκοῦν ἐπεὶ ὀξὺ μὲν ἐν ψόφῳ τὸ ταχύ, βαρὺ δὲ τὸ βραδύ, ἔδει βαρυτέρας πόρρωθεν φαίνεσθαι τὰς

φωνάς. τὰ γὰρ αὐτὰ φερόμενα πάντα βραδύτερον φέρεται ὅσῳ ἂν ἀπέχη τῆς ἀρχῆς πλεῖον, καὶ τέλος πίπτει. πότερ' οὖν ὅτι οἱ μιμούμενοι ἀμενηνῇ τῇ φωνῇ μιμοῦνται, καὶ λεπτὴν τὴν πόρρωθεν φωνήν; λεπτή δὲ βαρεῖα οὐκ ἔστιν, οὐδὲ μικρὸν καὶ ἀμενηνὸν φθέγγεσθαι βαρὺ ἀλλ' ὀξύ ἀνάγκη. ἢ οὐ μόνον οἱ μιμούμενοι διὰ τοῦτο μιμοῦνται, ἀλλὰ καὶ οἱ ψόφοι αὐτοὶ ὀξύτεροι γίνονται; αἴτιον δὲ ὅτι ὁ ἀήρ ὁ φερόμενος ποιεῖ τὸν ψόφον· καὶ ὥσπερ τὸ πρῶτον ψοφεῖ τὸ κινήσαν τὸν ἀέρα, οὕτω δεῖ πάλιν ποιῆσαι τὸν ἀέρα ἀεὶ ἄλλον κινουντα εἶναι, τὸ δὲ κινούμενον. διὸ ὁ ψόφος συνεχής, ὅτι ἀεὶ ἐκδέχεται [899b] κινουντα κινῶν, ἕως ἂν ἀπομαρανθῇ, ὃ ἐπὶ τῶν σωμάτων ἐστὶ τὸ πεσεῖν, ὅταν μηκέτι δύνηται ὠθεῖν ὁ ἀήρ ἔνθα μὲν τὸ βέλος ἔνθα δὲ τὸν ἀέρα. ἢ μὲν γὰρ φωνὴ γίνεται ἢ συνεχὴς ἀέρος ὠθουμένου ὑπ' ἀέρος, τὸ δὲ βέλος φέρεται σώματος ὑπ' ἀέρος κινουμένου. ἐνταῦθα μὲν οὖν ἀεὶ τὸ αὐτὸ φέρεται σῶμα, ἕως ἂν καταπέσῃ, ἐκεῖ δὲ ἀεὶ ἕτερος ἀήρ. καὶ πρῶτον ἐλάττω θᾶπτον μὲν κινεῖται, ἐπ' ὀλίγον δέ. διὸ πόρρω ὀξύτεραι καὶ λεπτότεραι αἱ φωναί. τὸ γὰρ θᾶπτον ὀξύ, ὥσπερ καὶ διηπόρηται. ὥσπερ ἡ αὐτὴ αἰτία δι' ἣν καὶ οἱ μὲν παῖδες καὶ οἱ κάμνοντες ὀξύ φθέγγονται, οἱ δὲ ἄνδρες καὶ οἱ ὑγιαίνοντες βαρὺ. τὸ δὲ τοῖς ἐγγὺς μὴ ἐπίδηλον εἶναι τὴν φωνὴν ἢ βαρυτέραν ἢ ὀξυτέραν γινομένην, καὶ ὅλως μὴ ὁμοίως ἔχειν τοῖς ῥιπτομένοις βάρεσιν, αἴτιον ὅτι τὸ μὲν ῥιφθὲν ἐν φέρεται ἀεὶ τὸ αὐτό, ὁ δὲ ψόφος ἀήρ ἐστὶν ὠθούμενος ὑπὸ ἀέρος. διὸ καὶ τὸ μὲν εἰς ἐν πίπτει, ἢ δὲ φωνὴ πανταχῇ, ὥσπερ ἂν εἰ τὸ ῥιφθὲν ἅμα φερόμενον ἀπείρως θρυφθεῖ, καὶ ἔτι εἰς τοῦπισθεν.

Διὰ τί αἱ νεηλιφεῖς οἰκίαι μᾶλλον ἡχοῦσιν; ἢ ὅτι μᾶλλον ἀνάκλασις γίνεται διὰ τὴν λειότητα; λειότεραι δὲ διὰ τὸ ἀρραγὲς καὶ τὸ συνεχές. δεῖ δὲ μὴ παντελῶς ὑγρὰν ἀλλ' ἤδη ξηρὰν λαμβάνειν· ἀπὸ πηλοῦ γὰρ οὐκ ἔστιν ἀνάκλασις. διὰ ταῦτα γὰρ καὶ τὰ κονιάματα μᾶλλον ἡχεῖ. συμβάλλεται δὲ ἴσως καὶ ἡ ἀκίνησία τοῦ ἀέρος· ἀθρόος γὰρ ἰὼν μᾶλλον ἀποπλήττεται τὸν προσπίπτοντα.

Διὰ τί, ἐὰν τις πίθον καὶ κεράμια κενὰ κατορύξῃ καὶ πωμάσῃ, μᾶλλον ἡχεῖ τὰ οἰκήματα, καὶ ἐὰν φρέαρ ἢ λάκκος ἢ ἐν τῇ οἰκίᾳ; ἢ ὅτι ἐπεὶ ἀνάκλασις ἢ ἡχώ, δεῖ περιειλημμένον ἀθρόον εἶναι τὸν ἀέρα, καὶ ἔχειν πρὸς ὃ ἀνακλασθήσεται, προσπίπτον πυκνὸν καὶ λεῖον; οὕτω γὰρ μάλιστα ἡχος γίνεται. τὸ μὲν οὖν φρέαρ καὶ ὁ λάκκος ἔχει τὴν στενότητα καὶ τὴν ἄθροισιν, οἱ δὲ πίθοι καὶ τὰ κεράμια καὶ τὴν πυκνότητα τῶν περιεχόντων, ὥστε ἐξ ἀμφοτέρων τὸ συμβαῖνον. καὶ

γὰρ τὰ κοῖλα μᾶλλον ἤχει· διὰ τοῦτο καὶ ὁ χαλκὸς μάλιστα τῶν ἄλλων. ὅτι δὲ κατορωρυγμένα, οὐθὲν ἄτοπον· ἡ γὰρ φωνὴ φέρεται κάτω οὐχ ἦττον. ὅλως δὲ πανταχῇ δοκεῖ καὶ κύκλῳ φέρεσθαι.

Διὰ τί δὲ μᾶλλον, ἐὰν κατορύξη τις, ἤχει, ἢ ἐὰν μή; [900a] ἢ ὅτι περιστεγόμενα μᾶλλον εἰς αὐτὰ δέχεται καὶ κατέχει τὸν ἀέρα; συμβαίνει δὲ καὶ τὴν πληγὴν σφοδρότεραν γίνεσθαι.

Διὰ τί τὸ ὕδωρ τὸ ψυχρὸν ἐκ τοῦ αὐτοῦ ἀγγείου ἐκχεόμενον ὀξύτερον ποιεῖ τὸν ψόφον; ἢ ὅτι θάπτων ἢ φορά; βαρύτερον γάρ. ἢ δὲ θάπτων ὀξύτερον ποιεῖ τὸν ψόφον. τὸ δὲ θερμὸν καὶ τῇ μανότητι καὶ τῇ ἀναφορᾷ κουφίζει. παρόμοιον δὲ ὅτι καὶ αἱ δᾶδες καιόμεναι ἀσθενεστέρα τὴν πληγὴν ποιοῦσιν.

Διὰ τί τοῖς ἡγρυπνηκόσιν ἡ φωνὴ τραχυτέρα; ἢ διότι ὑγρότερον τὸ σῶμα διὰ τὴν ἀπεψίαν, καὶ οὐχ ἥκιστα περὶ τὸν ἄνω τόπον, διὸ καὶ βάρος ἐν τῇ κεφαλῇ· ὑγρότητός τε περὶ τὸν βρόγχον οὔσης ἀνάγκη καὶ τραχυτέραν εἶναι τὴν φωνήν. ἡ μὲν γὰρ τραχύτης διὰ τὴν ἀνωμαλίαν, ἡ δὲ βαρύτης διὰ τὴν ἔμφραξιν· βαρυτέρα γὰρ ἡ φορά.

Διὰ τί μετὰ τὰ σιτία τάχιστα ἀπορρήγνυται ἡ φωνή; ἢ ὅτι κοπτόμενος μὲν ὁ τόπος ἐκθερμαίνεται, θερμαινόμενος δὲ ἔλκει τὴν ὑγρότητα; πλείων δὲ αὕτη καὶ ἐτοιμοτέρα διὰ τὴν προσφοράν.

Διὰ τί οἱ κλαίοντες ὀξὺ φθέγγονται, οἱ δὲ γελῶντες βαρὺ; ἢ ὅτι οἱ μὲν ὀλίγον κινουσι πνεῦμα δι' ἀσθένειαν, οἱ δὲ σφοδρῶς, ὃ ποιεῖ ταχὺ φέρεσθαι τὸ πνεῦμα; τὸ δὲ ταχὺ ὀξὺ· καὶ γὰρ ἀπὸ συντόνου τοῦ σώματος ῥιπτούμενον ταχὺ φέρεται. ὁ δὲ γελῶν τὸναντίον διαλελυμένως· οἱ δὲ ἀσθενεῖς ὀξὺ· ὀλίγον γὰρ ἀέρα κινουσιν· οἱ δὲ ἐπιπολῆς. ἔτι οἱ μὲν γελῶντες θερμὸν τὸ πνεῦμα ἀφιᾶσιν, οἱ δὲ κλαίοντες, ὥσπερ καὶ ἡ λύπη κατάψυξις ἐστὶ τοῦ τόπου τοῦ περὶ τὰ στήθη, καὶ τὸ πνεῦμα ψυχρότερον ἀφιᾶσιν. τὸ μὲν οὖν θερμὸν πολὺν ἀέρα κινεῖ, ὥστε βραδέως φέρεσθαι, τὸ δὲ ψυχρὸν ὀλίγον. συμβαίνει δὲ τοῦτο καὶ ἐπὶ τῶν αὐλῶν· οἱ γὰρ θερμοὶ τῷ πνεύματι αὐλοῦντες πολὺ βαρύτερον αὐλοῦσιν.

Διὰ τί οἱ παῖδες καὶ τὰ ἄλλα τῶν ζώων τὰ νέα ὀξύτερον φθέγγονται τῶν τελείων, καὶ ταῦτα τῆς ὀξύτητος σφοδρότητος οὔσης; ἢ ἡ φωνὴ ἐστὶν ἀέρος κίνησις, καὶ ἡ θάπτων ὀξύτερα; ῥῥον δὲ καὶ θάπτων ὁ ὀλίγος τοῦ πολλοῦ κινεῖται ἀήρ. κινεῖται δὲ ἢ συγκρινόμενος ἢ διακρινόμενος ὑπὸ θερμοῦ. ἐπεὶ δὲ ἡ μὲν εἰσπνοὴ ἐστὶ ψυχροῦ εἰσαγωγή, συγκρίνοιτ' ἂν ἐν αὐτῇ ὁ ἐν ἡμῖν ἀήρ· ἡ δὲ

ἐκπνοή, θερμοῦ κινήσαντος ἀέρα, γίνοιτ' ἂν ἡ φωνή· ἐκπνέοντες γάρ, οὐκ εἰσπνέοντες [900b] φωνοῦμεν. ἐπεὶ δὲ τὰ νέα θερμότερά ἐστι τῶν πρεσβυτέρων καὶ τοὺς ἐν αὐτοῖς πόρους στενωτέρους ἔχει, ἐλάττω ἂν ἀέρα ἔχοι ἐν ἑαυτοῖς. ὄντος δὲ τοῦ τε κινουμένου ἐλάττονος καὶ τοῦ κινούντος θερμοῦ πλείονος ἐν αὐτοῖς, θάπτον ἂν δι' ἄμφω ἡ κίνησις γένοιτο τοῦ ἀέρος· ἡ δὲ θάπτων ὀξυφωνοτέρα ἂν εἴη διὰ τὰ προειρημένα.

Διὰ τί οἱ κλαίοντες ὀξὺ φθέγγονται, οἱ δὲ γελῶντες βαρὺ; ἢ ὅτι οἱ μὲν κλαίοντες συντείνοντες καὶ συνάγοντες τὸ στόμα φωνοῦσιν; τῇ τε δὴ συντονία κινεῖται ταχὺ ὁ ἐν αὐτοῖς ἀήρ, καὶ τῷ διὰ στενοῦ τοῦ στόματος φέρεσθαι θάπτον φέρεται· δι' ἄμφω οὖν ὀξεῖα γίνεται ἡ φωνή. οἱ δὲ γελῶντες ἀνέντες τὸν τόνον γελῶσι καὶ κεχηνότες. ἐκπέμποντες οὖν διὰ τοῦτ' εὐρέως καὶ βραδέως τὸν ἀέρα εἰκότως βαρυφωνοῦσιν.

Διὰ τί οἱ ἄγονοι, οἷον παῖδες, γυναῖκες, καὶ οἱ ἤδη γέροντες καὶ οἱ εὐνοῦχοι, ὀξὺ φθέγγονται, οἱ δὲ ἄνδρες βαρὺ; ἢ καθάπερ ἡ γραμμὴ καὶ τὰ ἄλλα λεπτὰ ἐν διάστημα ἔχει, τὰ δὲ παχέα πλείω, οὕτω καὶ ἡ λεπτὴ φωνὴ ἐν ἂν ἔχει διάστημα. ῥᾶον δὲ καὶ ποιῆσαι καὶ κινήσαι ἐστὶν ἐν ἡ πλείω. ἐχόντων οὖν τῶν προειρημένων πνεῦμα ἀσθενές, κινεῖ αὐτῷ ἀέρα ὀλίγον. ἐλάχιστος δὲ ἐστὶν ὁ ἐν διάστημα ἔχων· ὃς ἔσται λεπτὸς διὰ τὰ προειρημένα. καὶ ἡ ἀπ' αὐτοῦ φωνὴ γινομένη τοιαύτη· ἡ δὲ λεπτὴ φωνὴ ὀξεῖα ἐστὶν. οἱ μὲν οὖν ἄγονοι διὰ ταῦτα ὀξύφωνοί εἰσιν· οἱ δὲ ἄνδρες ἰσχύοντες τῷ πνεύματι πολὺν ἀέρα κινοῦσι, πολλὺς δὲ ὦν βραδέως ἂν κινοῖτο καὶ βαρεῖαν φωνὴν ποιεῖ. ἐποίει γὰρ ἢ τε λεπτὴ καὶ ἡ ταχεῖα κίνησις ὀξεῖαν φωνήν, ὦν οὐδέτερον ἐπὶ τοῦ ἀνδρὸς συμβαίνει γίνεσθαι.

Διὰ τί αἱ φωναὶ βαρύτεραι ἡμῖν εἰσὶ τοῦ χειμῶνος; ἢ ὅτι παχύτερος ὁ ἀήρ ἐστι τότε, καὶ ὁ ἐν ἡμῖν καὶ ὁ ἐκτός; παχύτερου δὲ ὄντος βραδυτέρα ἡ κίνησις γίνεται, ὥστε ἡ φωνὴ βαρυτέρα. ἔτι ὑπνωτικώτεροί ἐσμεν τοῦ χειμῶνος ἢ τοῦ θερούς, καὶ καθεύδομεν πλείω χρόνον· ἐκ δὲ τῶν ὑπνων βαρύτεροί ἐσμεν. ἐν ᾧ οὖν πλείονα χρόνον καθεύδομεν ἢ ἐγρηγόραμεν (οὗτος δὲ ἐστὶν ὁ χειμῶν), ἐν τούτῳ ἂν εἴημεν βαρυφωνότεροι ἢ ἐν ᾧ τοῦναντίον. τοῦ γὰρ μεταξὺ τῆς ἐγέρσεως ὄντος ὀλίγου χρόνου, ἢ ἐν τῷ ὑπνῷ ἕξις γενομένη διαμένει πρὸς τὴν καθύπνωσιν.

Διὰ τί ἐκ τῶν πότων καὶ τῶν ἐμέτων καὶ ἐν τοῖς ψύχεσι [901a] βαρύτερον φθέγγονται; ἢ διὰ τὴν ἔμφραξιν τοῦ φάρυγγος τὴν

γινομένην ὑπὸ τοῦ φλέγματος; ἐπικατασπᾶ γὰρ ρευσμάτιον εἰς αὐτόν· καὶ τοῖς μὲν ὁ ἔμετος ἢ ὁ πότος, τοῖς δὲ ἡ ὥρα καὶ τὸ συμπλήρωμα στενώτερον ποιεῖ τὸν φάρυγγα, ὥστε βραδυτέρα γίνεται ἡ φορὰ τοῦ πνεύματος. ἡ δὲ βραδεῖα φορὰ βαρεῖαν ποιεῖ τὴν φωνήν.

Διὰ τί ἐγγύθεν μὲν ἡ βαρυτέρα μᾶλλον ἐξακούεται, πόρρωθεν δὲ ἤττον; ἢ διότι ἡ βαρυτέρα φωνὴ πλείω μὲν ἀέρα κινεῖ, οὐκ εἰς μῆκος δέ; πόρρωθεν μὲν οὖν ἤττον ἀκούομεν, διότι ἐπ' ἔλαττον κινεῖται, ἐγγύθεν δὲ μᾶλλον, διότι πλείων ἡμῖν ἀήρ πρὸς τὸ αἰσθητήριον προσπίπτει. ἡ δὲ ὀξεῖα πόρρω ἀκούεται, ὅτι λεπτοτέρα ἐστὶ, τὸ δὲ λεπτὸν τὴν εἰς μῆκος αὐξησιν ἔχει. λέγοι δ' ἂν τις ὅτι καὶ θάπτων ἐστὶν ἡ ποιούσα αὐτὴν κίνησις. εἴη δ' ἂν τοῦτο, εἰ πυκνὸν μὲν στενὸν δ' εἴη τὸ κινεῖν πνεῦμα τὸν ἀέρα. ὁ τε γὰρ ὀλίγος εὐκίνητοτερός ἐστιν ἀήρ (κινεῖται γὰρ ὀλίγος ὑπὸ τοῦ στενοῦ), καὶ τὸ πυκνὸν πλείους πληγὰς ποιεῖ, αἱ τὸν ψόφον ποιούσιν. ἰδεῖν δ' ἔστι τοῦτο ἐπὶ τῶν ὀργάνων· αἱ γὰρ λεπτότεραι χορδαὶ ὀξύτεραί εἰσι, τῶν ἄλλων τῶν αὐτῶν ὑπαρχόντων αὐταῖς.

Διὰ τί ἡ φωνὴ ὀξύτερα φαίνεται τοῖς μακροτέραν ἀφεστηκόσι, τοῦ ὀξέος ὄντος ἐν τῷ ταχέως φέρεσθαι; τὸ δὲ μακροτέρω φερόμενον βραδυτέρον κινεῖται. ἢ ὅτι ἡ ὀξύτης τῆς φωνῆς οὐ μόνον ἐστὶν ἐν τῷ ταχέως κινεῖσθαι, ἀλλὰ καὶ ἐν τῷ λεπτότατον ψόφον γίνεσθαι· τοῖς δὲ μακροτέραν ἀφεστηκόσιν αἰεὶ λεπτοτέρα ἡ φωνὴ ἀφικνεῖται διὰ τὴν ὀλιγότητα τοῦ ἀέρος τοῦ κινουμένου. μαραίνεται γὰρ ἡ κίνησις, μαραινόμενος δὲ ὁ ἀριθμὸς μὲν εἰς τὸ ἐν τελευτᾷ, σῶμα δὲ εἰς διάστημα ἓν, ὃ ἐστὶν ἐν σώματι λεπτότης. ὁμοίως δὲ [καὶ] ἐν φωνῇ.

Διὰ τί καὶ οἱ γεγυμνασμένοι καὶ οἱ ἀσθενεῖς ὀξύ φθέγγονται; ἢ ὅτι οἱ μὲν ἀσθενεῖς ὀλίγον ἀέρα κινεῖσιν, ὁ δὲ ὀλίγος τοῦ πλείονος θᾶπτον φέρεται· οἱ δὲ γεγυμνασμένοι ἰσχυρῶς κινεῖσιν τὸν ἀέρα, ὁ δὲ ἰσχυρῶς κινούμενος ἀήρ θᾶπτον φέρεται. τὸ δὲ ταχὺ ἐν φορᾷ ἐν φωνῇ ὀξύ ἐστίν.

Διὰ τί τοῖς μετὰ τὰ σιτία κεκραγόςιν ἡ φωνὴ διαφθείρεται; [901b] καὶ πάντας ἂν ἴδοιμεν τοὺς φωνασκοῦντας, οἷον ὑποκριτὰς καὶ χορευτὰς καὶ τοὺς ἄλλους τοὺς τοιούτους, ἔωθέν τε καὶ νήστεις ὄντας τὰς μελέτας ποιουμένους. ἢ τὸ διαφθεῖρεσθαι τὴν φωνὴν οὐθὲν ἕτερόν ἐστιν ἢ τὸν τόπον διαφθεῖρεσθαι καθ' ὃν τὸ πνεῦμα διεξέρχεται; διὸ καὶ οἱ βραγχιῶντες διαφθεῖρονται τὰς φωνάς, οὐ τῷ τὸ πνεῦμα γίνεσθαι χειρόν, ὃ ποιεῖ τὴν φωνήν, ἀλλὰ τῷ τετραχύνθαι

τὴν ἀρτηρίαν. ὑπὸ δὲ τῆς θερμασίας τῆς σφοδρᾶς μάλιστα τραχύνεσθαι πέφυκεν ὁ τόπος οὗτος. διὸ καὶ οὐθ' οἱ πυρέττοντες οὔτε οἱ σφόδρα πεπυρεχότες εὐθὺς μετὰ τὴν ἄνεσιν τοῦ πυρετοῦ ἄδειν δύνανται· τετράχυνται γὰρ ὁ φάρυξ αὐτοῖς διὰ τὴν θερμασίαν. ἀπὸ δὲ τῶν σιτίων εἰκὸς εἶναι τὸ πνεῦμα καὶ πολὺ καὶ θερμόν· τὸ δὲ τοιοῦτον εὐλογόν ἐστι διεξιὼν ἐλκοῦν τε καὶ τραχύνειν τὴν ἀρτηρίαν· τούτου δὲ συμβαίνοντος εἰκότως ἡ φωνὴ διαφθείρεται.

Διὰ τί, εἴπερ ἡ φωνὴ ἐστὶν ἀήρ τις ἐσχηματισμένος καὶ φερόμενος, διαλύεται πολλάκις τὸ σχῆμα, ἡ δὲ ἡχώ, ἥ γίνεται πληγέντος τοῦ τοιούτου πρὸς τι στερεόν, οὐ διαλύεται αὕτη, ἀλλὰ σαφῶς ἀκούομεν αὐτῆς; ἢ ὅτι ἀνάκλασις ἐστὶν, ἀλλ' οὐ κατάκλασις; οὕτω δὲ τό θ' ὅλον διαμένει, καὶ δύο μέρη ὁμοιοσχήμονα ἐξ αὐτοῦ γίνεται· πρὸς ὁμοίαν γὰρ γωνίαν ἐστὶν ἡ ἀνάκλασις. διὸ καὶ ὁμοία γίνεται ἡ τῆς ἡχοῦς φωνὴ τῇ ἐξ ἀρχῆς.

Διὰ τί τῶν μὲν ἄλλων ζώων τὰ νέα καὶ νήπια ὀξύτερον φθέγγονται τῶν τελείων, οἱ δὲ μόσχοι βαρύτερον τῶν τελείων βοῶν; ἢ ὅτι ἐν ἐκάστῳ γένηι τὸ νήπιον ὁμοίον ἐστὶ τῷ ἐν αὐτῷ θήλει; τῶν βοῶν δὲ αἱ θήλειαι βαρύτερον φθέγγονται τῶν ἀρρένων, οἱ δὲ μόσχοι ταύταις ὁμοιότεροί εἰσιν ἢ τοῖς ἄρρεσιν· τὰ δὲ ἄλλα τοῦναντίον.

Διὰ τί, ὅταν ἀχυρωθῶσιν αἱ ὀρχήστραι, ἦττον οἱ χοροὶ γεγώνασιν; ἢ διὰ τὴν τραχύτητα προσπίπτουσα ἡ φωνὴ οὐ πρὸς λεῖον τὸ ἔδαφος ἦττον γίνεται μία, ὥστ' ἐλάττων; οὐ γὰρ συνεχῆς. ὥσπερ καὶ τὸ φῶς ἐπὶ τῶν λείων μᾶλλον [φαίνει] διὰ τὸ μὴ διαλαμπάνεσθαι τοῖς ἐμποδίζουσιν.

[902a] Διὰ τί ποτε ὁ ἄλς, ὅταν εἰς πῦρ ἐμβληθῇ, ψοφεῖ; ἢ ὅτι ὁ ἄλς ὑγρὸν ἔχει οὐ πολὺ, ὃ ὑπὸ τοῦ θερμοῦ ἐκπνευματούμενον καὶ βίᾳ ἐκπύπτον σχίζει τὸν ἄλα; τὸ δὲ σχιζόμενον ἅπαν ψοφεῖ.

Διὰ τί ποτε τῶν παιδίων ἔνια, πρὶν ἥκειν τὴν ἡλικίαν ἐν ἣ σαφηνίζειν ὥρα αὐτοῖς, φθεγξάμενα καὶ σαφῶς εἰπόντα πάλιν ὁμοίως διάγουσιν, ἕως ἂν ἔλθῃ ὁ εἰωθὺς χρόνος; ἃ δὴ πολλοὶ τέρατα νομίζουσιν εἶναι. ἤδη δ' ἔνια λέγεται καὶ εὐθὺς γινόμενα φθέγξασθαι. ἢ ὅτι ὥς μὲν ἐπὶ πολὺ τὰ πλείω τε τῶν γινομένων γίνεται κατὰ φύσιν, διὸ ὀλίγοις τοῦτο συμβαίνει, καὶ φύσει ἅμα κατάλληλα τελειοῦται· διὸ καὶ ἀκούει τε ἅμα καὶ φωνεῖ καὶ ξυνήσι κατὰ τὴν ἀκοὴν καὶ λέγει καὶ σαφηνίζει. οὐ μὴν ἀλλὰ πολλάκις οὐκ ἀπαρτίζει τὰ αὐτά, ἀλλὰ τὰ μὲν ξυνήσι πρότερον ἢ τοῦτο τὸ μόριον ἀπολυθῆναι ᾧ διαλέγεται, τοῖς δὲ τοῦναντίον. ταῦτα μὲν οὖν οὐκ ἂν διαλεχθεῖη

συνετῶς (ἃ γὰρ ἂν ἀκούσωσι, διαλέγονται)· ἀλλ' ὅταν ἤκη καιρὸς ἀμφοῖν, ἀποδιδόασι τὸ κατὰ φύσιν. ὅσοις δὲ ἔμπροσθεν ἢ κατὰ τὴν ἀκοὴν αἰσθησις διακριβοῦται ἐν τῇ ψυχῇ, ὃ πρῶτῳ κινουσι τὴν φωνὴν καὶ ποιουσι λόγον, τούτοις ἐνίστε γίνεται ἤδη ξυνιῆσι πολλὰ καὶ δυνάμεις τις τοῦ μορίου καὶ ἀπόλυσις, μάλιστα μὲν μετὰ ὕπνον τινὰ (τούτου δ' αἴτιον ὅτι ὁ ὕπνος καὶ τὰ σώματα νωθρότερα ποιεῖ καὶ τὰ μόρια ἀναπαύσας), εἰ δὲ μή, καὶ ἄλλην μεταβολὴν λαβόντα τοιαύτην. πολλὰ δὲ ἔχομεν τοιαῦτα ποιεῖν, ἃ μικρῶν δεῖται καιρῶν· κἄπειτα οὐκέτι ὁμοίως ἔχει, ὅταν οὕτω τύχη τὸ μόριον ἔχον καὶ ἀπολυθέν· ὅταν ἐπιπολῆς ἢ ἐν τῇ αἰσθήσει ὦν ἐκινήθη διάνοια, κατὰ τὴν ἀκοὴν τοῦτο ἐπανήλθε καὶ ἐφθέγγατο. πολλάκις δὲ καὶ μέλη καὶ ῥήματα ἐπέρχεται οὐκ ἐκ προαιρέσεως ἡμῖν· ἀλλ' ἐὰν τὸ πρῶτον προελόμενοι εἴπωμεν, ὕστερον ἄνευ προαιρέσεως λέγομεν ἢ ἄδομεν, καὶ οὐ δύναται ἐκ τοῦ στόματος ἐξελθεῖν. οὕτω καὶ τοῖς παιδίοις, ὅταν συμβῇ τοῦτο λεπτόν, εἴτα πάλιν καταστῇ εἰς τὴν φύσιν ἐκεῖνο τὸ μόριον, ἕως ἂν ἡ ὥρα ἔλθῃ ἰσχυῖσαι αὐτὸ καὶ ἀποκριθῇται.

Διὰ τί ἔνια ψοφεῖ καὶ κινεῖται ἐξαίφνης, οἷον τὰ κιβώτια, οὐδενὸς αἰσθητοῦ κινουντος; καίτοι κρεῖττον γέγονε τὸ κινεῖν τοῦ κινουμένου. ὁ δὲ αὐτὸς λόγος καὶ φθορᾶς καὶ γήρωος· ὑπὸ ἀναισθήτου γὰρ φθείρεται τὰ λεγόμενα ὑπὸ [902b] τοῦ χρόνου πάντα. ἢ ὅμοιον τοῦτο τοῖς σταλαγμοῖς καὶ τοῖς ὑπὸ τῶν ἐκφυομένων αἰρομένοις λίθοις; οὐ γὰρ τὸ τελευταῖον αἶρει ἢ κινεῖ, ἀλλὰ τὸ συνεχές. ἐπὶ δὲ τούτου συνέβη ἀναισθήτου ὄντος αἰσθητὴν γίνεσθαι τὴν κίνησιν. οὕτω δὲ καὶ τὸ περιεχόμενον αἰσθητοῖς χρόνοις κινεῖται καὶ διαιρεῖται εἰς ἀναισθητα, τῷ δὲ παντὶ καὶ συνεχεῖ ἐκίνησε καὶ διέφθειρεν. συνεχές δέ ἐστιν οὐκ ἐν τῷ νῦν, ἀλλ' ἐν τῷ ὀρισμένῳ χρόνῳ ὑπὸ τοῦ νῦν.

Διὰ τί οἱ χασμώμενοι ἤττον ἀκούουσιν; ἢ ὅτι τοῦ ἐξιόντος πνεύματος ἐν τῇ χάσμῃ πολὺ καὶ εἰς τὰ ὦτα χωρεῖ ἔσωθεν, ὥστε καὶ τῇ αἰσθήσει ἐπίδηλον εἶναι τὴν κίνησιν ἣν ποιεῖ περὶ τὴν ἀκοὴν, μάλιστα δ' ἐκ τῶν ὕπνων; ὁ δὲ ψόφος ἀῆρ ἢ πάθος ἀέρος ἐστίν. ἀντιπαίοντος οὖν τοῦ ἔσωθεν εἰσέρχεται ὁ ἔξωθεν ψόφος, καὶ ὑπὸ τῆς κινήσεως καὶ τοῦ ἔξωθεν ψόφου ἐκκρούεται ἡ κίνησις.

Διὰ τί ἰσχνόφωνοι παῖδες ὄντες μᾶλλον ἢ ἄνδρες; ἢ ὥσπερ καὶ τῶν χειρῶν καὶ τῶν ποδῶν αἰεὶ ἤττον κρατοῦσι παῖδες ὄντες, καὶ ὅσοι ἐλάττους οὐ δύναται βαδίζειν, ὁμοίως καὶ τῆς γλώττης οἱ νεώτεροι οὐ δύναται; ἐὰν δὲ παντάπασι μικροὶ ᾖσιν, οὐδὲ φθέγγεσθαι

δύνανται ἄλλ' ἢ ὥσπερ τὰ θηρία, διὰ τὸ μὴ κρατεῖν. εἴη δ' ἂν οὐ μόνον ἐπὶ τοῦ ἰσχυοφώνου, ἀλλὰ καὶ τραυλοὶ καὶ ψελλοί. ἡ μὲν οὖν τραυλότης τῷ γράμματός τινος μὴ κρατεῖν, καὶ τοῦτο οὐ τὸ τυχόν, ἡ δὲ ψελλότης τῷ ἐξαίρειν τι, ἡ γράμμα ἢ συλλαβὴν, ἡ δὲ ἰσχυοφωνία ἀπὸ τοῦ μὴ δύνασθαι ταχὺ συνάψαι τὴν ἑτέραν συλλαβὴν πρὸς τὴν ἑτέραν. ἅπαντα δὲ δι' ἀδυναμίαν· τῇ γὰρ διανοίᾳ οὐχ ὑπηρετεῖ ἡ γλῶττα. ταῦτό δὲ τοῦτο καὶ οἱ μεθύοντες πάσχουσι καὶ οἱ πρεσβῦται· ἦττον δὲ πάντα συμβαίνει.

Διὰ τί ἡ φωνὴ τρέμει καὶ τῶν ἀγωνιόντων καὶ τῶν δεδιότων; ἡ ὅτι σείεται ἡ καρδιά τοῦ θερμοῦ ἐξιόντος; ἀμφοτεράκις δὲ πάσχουσι τοῦτο· καὶ γὰρ τοῖς ἀγωνιῶσι συμβαίνει καὶ τοῖς φοβουμένοις. σειομένης δὲ οὐ γίνεται μία ἡ πληγὴ ἀλλὰ πλείους, ὥσπερ ἡ τῶν παρανενευρισμένων χορδῶν.

Διὰ τί οἱ μὲν ἀγωνιῶντες βαρὺ φθέγγονται, οἱ δὲ φοβούμενοι ὀξύ; ἡ ὅτι τοῖς μὲν φοβουμένοις καταπύχεται ὁ τόπος ὁ περὶ τὴν καρδίαν, κάτω ὀρμῶντος τοῦ θερμοῦ, ὥστε ὀλίγον ἀέρα κινουσιν; ἡ γὰρ ἰσχὺς ἐν τῷ θερμῷ· τοῖς [903a] δὲ ἄνω φέρεται τὸ θερμόν, ὥσπερ τοῖς αἰσχυνομένοις· δι' αἰσχύνην γὰρ καὶ ἀγωνιῶσιν. τοῖς δὲ αἰσχυνομένοις ἄνω φέρεται πρὸς τὸ πρόσωπον· σημεῖον δὲ ὅτι ἐξέρυθροι γίνονται μᾶλλον. συντήκει οὖν καὶ παχὺν ποιεῖ τὸν ἀέρα ὃ φθέγγονται· ὁ δὲ τοιοῦτος βραδέως ὠθεῖται· τὸ δὲ βραδὺ ἐν φωνῇ βαρὺ ἐστίν.

Διὰ τί εὐηκοωτέρα ἡ νύξ τῆς ἡμέρας ἐστίν; πότερον ὥσπερ Ἀναξαγόρας φησί, διὰ τὸ τῆς μὲν ἡμέρας σίζειν καὶ ψοφεῖν τὸν ἀέρα θερμαινόμενον ὑπὸ τοῦ ἡλίου, τῆς δὲ νυκτὸς ἡσυχίαν ἔχειν ἅτε ἐκλελοιπότης τοῦ θερμοῦ, εἶναι δὲ μᾶλλον ἀκουστὸν μηθενὸς ὄντος ψόφου; ἡ ὅτι διὰ τοῦ κενωτέρου μᾶλλον ἀκουστόν ἐστιν ἢ διὰ τοῦ πλήρους; ἔστι δὲ τῆς μὲν ἡμέρας ὁ ἀὴρ πυκνὸς ἅτε πεπληρωμένος ὑπὸ τοῦ φωτὸς καὶ τῶν ἀκτίνων, τῆς δὲ νυκτὸς ἀραιότερος διὰ τὸ ἀπεληλυθῆναι ἐξ αὐτοῦ τὸ πῦρ καὶ τὰς ἀκτῖνας, σώματα ὄντα. ἡ ὅτι τῆς μὲν ἡμέρας τὰ σώματα πρὸς πολλὰ τὴν διάνοιαν ἔλκει· διὸ οὐκ εὐκρινές ἐστι πρὸς τὴν ἀκοήν. καὶ τῷ πράττειν ἡμᾶς πάντα μᾶλλον ἐν τῇ ἡμέρᾳ ἢ τῇ νυκτί, καὶ αὐτὰ περὶ τὰς πράξεις ἐστίν. χωρισθεῖσα δὲ αἴσθησις διανοίας καθάπερ ἀναίσθητον πόνον ἔχει, ὥσπερ εἴρηται τὸ νοῦς ὀρᾷ καὶ νοῦς ἀκούει. νυκτὸς δὲ τῆς ὄψεως ἀργούσης καὶ τῆς διανοίας μᾶλλον ἡρεμούσης ὁ τῆς ἀκοῆς πόρος μᾶλλον ἀνεωγμένος, καθάπερ τῆς ἡμέρας, δεκτικὸς μὲν ἐστὶ τῶν ἤχων ὁμοίως,

ἐξαγγελτικὸς δὲ μᾶλλον τῇ διανοίᾳ διὰ τὸ μήτε αὐτὴν ἐνεργεῖν μήθ' ὑπὸ τῆς ὀψεως παρενοχλεῖσθαι, καθάπερ καὶ τῆς ἡμέρας.

Διὰ τί οἱ ἄγονοι, οἷον παῖδες καὶ γυναῖκες καὶ οἱ ἤδη γέροντες καὶ οἱ εὐνοῦχοι, ὅξυ φθέγγονται, οἱ δὲ ἄνδρες βαρύτερον; ἢ δι' ἀσθένειαν τοῦ κινουντος μορίου τὸν ἀέρα; ὀλίγον γὰρ τὸ ἀσθενὲς κινεῖ, ὁ δὲ ὀλίγος ταχὺ φέρεται, τὸ δὲ ταχὺ φερόμενον ὅξυ. ἢ διότι ὁ πόρος ὁ πρῶτος, δι' οὗ ἡ φωνὴ φέρεται, τοῖς μὲν ἀγόνοις μικρός, ὥστε ὀλίγον ἐξ αὐτοῦ τὸ ὠθοῦν τὸν ἀέρα, ὀλίγος δὲ ὢν ταχὺ φέρεται δι' εὐρέος τοῦ ἄνω φάρυγγος· ἀκμάζουσι δὲ καὶ ἀνδρουμένοις δίσταται οὗτος, ὥστερ καὶ ἐπὶ τοὺς ὄρχεις, ὥστε καὶ πλείων ἐστὶν ὁ ὠθούμενος. βραδύτερον οὖν διῶν βαρὺς γίνεται.

Διὰ τί οἱ ἰσχνόφωνοι οὐ δύνανται διαλέγεσθαι μικρόν; [903b] ἢ ὅτι ἴσχονται τοῦ φωνεῖν, ἐμποδίζοντός τινος; οὐκ ἴσης δὲ ἰσχύος οὐδ' ὁμοίας κινήσεως, μὴ ἐμποδίζοντός τε τὴν κίνησιν μηδενὸς καὶ ἐμποδίζοντος, βιάσασθαι δεῖ. ἢ δὲ φωνὴ κίνησις ἐστὶ· μεῖζον δὲ φθέγγονται μᾶλλον οἱ τῇ ἰσχυΐ χρώμενοι. ὥστ' ἐπεὶ ἀνάγκη ἀποβιάζεσθαι τὸ κωλῶν, ἀνάγκη μεῖζον φθέγγεσθαι τοὺς ἰσχυοφώνους.

Διὰ τί δὲ ἀγωνιῶντες μὲν μᾶλλον ἰσχνόφωνοι γίνονται, ἐν δὲ ταῖς μέθαις ἤττον; ἢ ὅτι ἀποπληξία ὁμοίον ἐστὶ τὸ πάθος μέρους τινὸς τῶν ἐντός, ὃ ἀδυνατοῦσι κινεῖν, ἐμποδίζοντος διὰ τὴν κατάψυξιν; ὁ μὲν οὖν οἶνος φύσει θερμὸς ὢν λύει τὴν κατάψυξιν μᾶλλον, ἢ δὲ ἀγωνία ποιεῖ· φόβος γάρ τις ἢ ἀγωνία, ὁ δὲ φόβος κατάψυξις.

Διὰ τί ἔξωθεν εἰς τὰς οἰκίας εἰσακούεται μᾶλλον ἢ ἔσωθεν ἔξω; ἢ ὅτι ἔξωθεν ὁ ψόφος διὰ τὸ ἀχανὲς εἶναι διασπᾶται, ὥστε οὐχ ἱκανὸν ἕκαστον μέρος ἀκουσθῆναι, ἢ ἤττον; ἔξωθεν δὲ ἔσω εἰς ἐλάττω τόπον καὶ ἀέρα ἐστῶτα ἢ φωνὴ βαδίζουσα ἀθρόα ἔρχεται, ὥστε μεῖζον οὖσα ἀκούεται μᾶλλον.

Διὰ τί οἱ ἰσχνόφωνοι μελαγχολικοί; ἢ ὅτι τὸ τῇ φαντασίᾳ ἀκολουθεῖν ταχέως τὸ μελαγχολικὸν εἶναι ἐστίν, οἱ δὲ ἰσχνόφωνοι τοιοῦτοι· προτερεὶ γὰρ ἡ ὁρμὴ τοῦ λέγειν τῆς δυνάμεως αὐτοῖς, ὡς θᾶπτον ἀκολουθοῦσης τῆς ψυχῆς τῷ φανέντι. καὶ οἱ τραυλοὶ δὲ ὡσαύτως· βραχύτερα γὰρ τὰ μόρια ταῦτα τοῖς τοιούτοις. σημεῖον δέ· οἰνωμένοι γὰρ τοιοῦτοι γίνονται, ὅτε μάλιστα τοῖς φαινομένοις ἀκολουθοῦσι, καὶ οὐ τῷ οἴνῳ.

Διὰ τί τὰ πράσα συμφέρει πρὸς εὐφωνίαν, ἐπεὶ καὶ τοῖς

πέρδιζιν; ἢ ὅτι καὶ τὰ σκόροδα ἐφθὰ λεαίνει, τὰ δὲ πράσα γλισχρότητα ἔχει τινά; ρυπτικὸν δὲ τοῦ φάρυγγος.

Διὰ τί τὰ μὲν ἄλλα ὀξύτερον φθέγγεται σφοδρότερα ὄντα, ὁ δὲ ἄνθρωπος ἀσθενῶν; ἢ διότι ἐλάττω κινεῖ ἀέρα, οὗτος δὲ ταχὺ διέρχεται, τὸ δὲ ταχὺ ὁζὺν ποιεῖ τὸν ψόφον.

Διὰ τί ἀκούουσι μᾶλλον κατέχοντες τὸ πνεῦμα ἢ ἐκπνέοντες; διὸ καὶ ἐν ταῖς θήραις παραγγέλλουσιν ἑαυτοῖς μὴ πνευστιᾶν. πότερον ὅτι τὸ αἰσθητικὸν ἄνω ἔρχεται αἰρομένων τῶν φλεβῶν; καθευδόντων γὰρ κάτω· διὸ καὶ μᾶλλον τε ἐκπνέουσι καθεύδοντες ἢ εἰσπνέουσι, καὶ ἀνήκοοί εἰσιν. [904a] ἢ καὶ τὸ αἷμα ἀνέρχεται ἐκπεπνευκότος, ὥστε κενοῦται τὰ ἄνω; ἀκούουσι δὲ τῷ κενῷ. ἢ ὅτι ὁ φυσιασμός ψόφος τίς ἐστίν, οὗτος δὲ ἐν τῷ ἐκπνεῖν γινόμενος κωλύει ἀκούειν.

Διὰ τί θάττον μὲν ψοφοῦσι καὶ πηδῶσιν οἱ μικροὶ ἄλεις, μείζω δὲ ψοφοῦσι καὶ πηδῶσιν οἱ μεγάλοι; ἢ διότι οἱ μὲν ταχὺ σχίζονται (οὐ γὰρ πολὺ ὁ δεῖ διελθεῖν τῷ πυρί) διὰ τὴν μικρότητα, οἱ δὲ βραδέως· μείζον γὰρ ἔργον τὸ μείζον διασχίσει ἢ τὸ μικρόν. ψοφεῖ δὲ ὁ μὲν μικρὸς μικρόν, ἢ γὰρ πληγὴ μικρά, ὁ δὲ μείζων μεγάλη, μεγάλη γὰρ ἢ πληγὴ· ὁ δὲ ψόφος πληγὴ ἐστίν. καὶ πηδᾷ δὲ μᾶλλον τὸ ἰσχυρότερον, ἢ πληγῇ· ἥττον γὰρ ἐνδίδωσιν.

Διὰ τί, ἐὰν εἰς πολὺ πῦρ ἐμβάλλῃ τις τὸ αὐτὸ μέγεθος ἄλός, ἥττον ψοφεῖ ἢ οὐ ψοφεῖ; ἢ ὅτι φθάνει κατακαυθεῖς πρὶν σχισθῆναι; καίεται μὲν γὰρ τῷ τὸ ὑγρὸν ἀναλωθῆναι, ψοφεῖ δὲ τῷ σχισθῆναι.

Διὰ τί οἱ χασμώμενοι ἥττον ἀκούουσιν; ἢ ὅτι τὸ πνεῦμα ἐναπολαμβάνουσιν, τὸ δὲ ἀπολαμβανόμενον πνεῦμα περὶ τὰ ὦτα ἀθροίζεται. σημεῖον δέ· ἐν γὰρ τοῖς ὥσι ψόφος γίνεται ὅταν χασμησώμεθα. τὸ δὲ ἀπολαμβανόμενον πνεῦμα κωλύει ἀκούειν. ἔτι δὲ καὶ φωνὴ τις γίνεται τῶν χασμωμένων· τοῦτο δὲ κωλυτικὸν τοῦ ἀκούειν. καὶ συμπίεζεσθαι ἀναγκαῖον τὰς ἀκοὰς διασπωμένου τοῦ στόματος.

Διὰ τί τῆς φωνῆς, ἐπειδὴ ῥύσις τίς ἐστι, φύσιν ἐχούσης ἄνω φέρεσθαι, μᾶλλον ἐστὶν εὐήκοος ἄνωθεν κάτω ἢ κάτωθεν ἄνω; ἢ ὅτι ἢ φωνὴ ἀήρ τίς ἐστι μεθ' ὑγροῦ· βαρυνόμενος οὖν οὗτος ὑπὸ τοῦ ὑγροῦ φέρεται κάτω καὶ οὐκ ἄνω· τοῦ γὰρ ὑγροῦ κατὰ φύσιν ἢ κάτω φορά. διὸ τοῖς κάτω μᾶλλον ἀκούεται. ἢ τοῦτο μὲν ὑπὸ τῆς τοῦ ζῆφου φωνῆς μόνον γίνεται (αὕτη γὰρ μεθ' ὑγροῦ), τὸ δὲ συμβαῖνόν ἐστι καὶ ἐπὶ τῶν ἄλλων ψόφον; καθάπερ οὖν ἢ ὄψις, ἐὰν μὲν ἄνωθεν

κάτω προσπέσῃ, τὴν ἀνάκλασιν ἄνω ποιεῖται, κάτωθεν δὲ ἄνω προσπεσοῦσα ἀνεκλάσθη κάτω, τὸν αὐτὸν τρόπον ἢ φωνὴ ἢ φύσιν ἔχουσα ἄνω φέρεσθαι, προσκόψασα τῷ ἐξ ἐναντίας ἀέρι, βιάζεσθαι μὲν οὐ δύναται πλείονα ὄντα καὶ βαρύτερον, ἀνακλασθεῖς δὲ ὁ κινηθεὶς αἷρ ἐπὶ τὸνναντίον ἠνέχθη κάτω, διὸ καταχεόμενος ἀκούεται κάτω μᾶλλον. τοιοῦτο δὲ καὶ τὸ περὶ τὴν ἡχὴ συμβαῖνον ἐστίν, ἀνάκλασις τῆς φωνῆς ἐπὶ τὸνναντίον.

[904b] Διὰ τί μεθύνοντων μᾶλλον ἀπορρήγνυνται ἢ φωνὴ ἢ νηφόντων; ἢ διὰ τὸ πεπληρωῶσθαι ταχέως ἀπορρηγνύασι τὴν φωνήν; σημεῖον δὲ τούτου· οὔτε γὰρ οἱ χοροὶ μελετῶσιν ἐξ ἀρίστου οὔτε οἱ ὑποκριταί, ἀλλὰ νήστεις ὄντες. ἐν δὲ τῇ μέθῃ πληρέστεροι ὄντες εὐλόγως μᾶλλον ἀπορρήγνυνται τὰς φωνάς.

Διὰ τί ποτε τῶν ὀξυτέρων φωνῶν πορρώτερον ἀκούουσιν; ἢ διότι τὸ ὀξύ ἐν φωνῇ ταχύ ἐστι, θάπτον δὲ κινεῖται τὰ βία μᾶλλον φερόμενα, τὰ δὲ σφοδρότερον φερόμενα ἐπὶ πλεον φέρεται.

Διὰ τί κατέχοντες τὸ πνεῦμα μᾶλλον ἀκούομεν; ἢ ὅτι ἡ ἀνάπνευσις ψόφον τινὰ παρέχει. εἰκότως οὖν τότε μᾶλλον ἀκούομεν, ὅταν ἦττων ὁ ψόφος ἦ· ἦττων γὰρ ὁ ψόφος, ὅταν κατέχωμεν τὸ πνεῦμα.

Διὰ τί τὸ μὲν φῶς οὐ διέρχεται διὰ τῶν πυκνῶν, λεπτότερον ὂν καὶ πόρρω ὂν καὶ θάπτον, ὁ δὲ ψόφος διέρχεται; ἢ διότι τὸ μὲν φῶς κατ' εὐθεΐαν φέρεται, ὥστε ἂν ἀντιφράξῃ τι τὴν εὐθυωρίαν, ὅλως ἀποκέκλεισται, ὁ δὲ ψόφος φέρεται καὶ οὐκ εὐθὺ διὰ τὸ πνεῦμα εἶναι; διὸ πανταχόθεν ψοφοῦντες ἀκούομεν, καὶ οὐ μόνον τῶν κατ' εὐθυωρίαν τοῖς ὡσίν.

Διὰ τί ποτε οἱ μὲν γελῶντες βαρὺ φθέγγονται, οἱ δὲ κλαίοντες ὀξύ; ἢ διότι ἀπὸ τῶν συντόνων ὀξεῖα ἢ φωνή, τὸ δὲ ὀξύ ἐστὶν ἀσθενές; ἄμφω δὲ ταῦτα μᾶλλον τοῖς κλαίουσιν ὑπάρχει· καὶ γὰρ συντέννεται μᾶλλον οἱ κλαίοντες καὶ ἀσθενέστεροί εἰσιν.

Διὰ τί, εἴπερ ἡ φωνὴ αἷρ τις ἐσχηματισμένος ἐστί, φερομένη διαλύεται πολλάκις τὸ σχῆμα, ἢ δὲ ἡχώ, ἢ γίνεται πληγέντος τοῦ τοιούτου πρὸς τι στερεόν, οὐ διαλύεται, ἀλλὰ σαφῶς ἀκούομεν; ἢ διότι ἀνάκλασις ἐστίν, οὐ κατάκλασις; τοῦτο δὲ ὅλον ἀφ' ὅλου. εἴτα τὸ πάθος ἀφ' ὁμοίου· ἀπὸ γὰρ τοῦ ἀέρος ἀνακλᾶται ἐν τῷ κοίλῳ, οὐκ ἀπὸ τοῦ κοίλου.

Διὰ τί ἐνός τε καὶ πολλῶν φθεγγομένων ἅμα οὔτε ἴσος ὁ φθόγγος, οὔτε ἐπὶ πλεῖον γεγωνόσιν ὡς κατὰ λόγον εἰς τὸ πόρρω; ἢ

ὅτι ἕκαστος τὸν καθ' αὐτὸν ἀέρα προωθεῖ, ἀλλ' οὐ τὸν αὐτόν, πλὴν ἐπὶ μικρόν; ὅμοιον δὴ συμβαίνει ὥσπερ ἂν εἰ πολλοὶ μὲν εἶεν οἱ βάλλοντες, ἕκαστος μέντοι λίθῳ ἐτέρῳ, ἢ οἱ γε πλεῖστοι. οὔτε γὰρ ἐκεῖ πόρρω [905a] οὐθὲν ἀφίξεται βέλος, ἢ οὐ κατὰ λόγον, οὔτε ἐνταῦθα. οὐ γὰρ ἐνὸς ἢ τοσαύτῃ φωνῇ ἀλλὰ πολλῶν. ἐγγύθεν μὲν οὖν κατὰ λόγον πολλὴ φαίνεται ἡ φωνή (καὶ γὰρ τὰ βέλη πλείω τεύξεται τοῦ αὐτοῦ), πόρρωθεν δὲ οὐκέτι.

Διὰ τί ἀγωνιῶντες μὲν βαρύτερον φθέγγονται, φοβούμενοι δὲ ὀξύτερον; καίτοι καὶ ἡ αἰδῶς φόβος τίς ἐστιν. ἢ διαφέρει πολὺ τὸ πάθος; οἱ μὲν γὰρ αἰδούμενοι ἐρυθριῶσιν (ἡ δὲ ἀγωνία αἰσχὺνη τίς ἐστιν), οἱ δὲ φοβούμενοι ὠχριῶσιν. φανερόν οὖν ὅτι τοῖς μὲν φοβουμένοις ἐκλείπει ἄνωθεν τὸ θερμόν, ὥστε κινεῖ ἀσθενὲς ὄν ὀλίγον ἀέρα τὸ πνεῦμα, τὸ δὲ ὀλίγον ταχὺ φέρεται, τὸ δὲ ταχὺ ἐν φωνῇ τὸ ὀξύ· τοῖς δὲ αἰδουμένοις ἄνω ἔρχεται τὸ θερμόν περὶ τὰ στήθη. σημεῖον δὲ ὅτι γίνονται ἐξέρυθροι. πολλὴν δὲ κινεῖ ἀέρα ἡ πολλὴ δύναμις, τὸ δὲ πολὺ βραδέως φέρεται, τὸ δὲ βραδὺ ἐν φωνῇ βαρὺ.

Διὰ τί ἰσχνόφωνοι γίνονται; ἢ αἴτιον ἡ κατάψυξις τοῦ τόπου ᾧ φθέγγονται, ἢ ὥσπερ ἀποπληξία τοῦ μέρους τούτου ἐστίν; διὸ καὶ θερμαινόμενοι ὑπὸ οἴνου καὶ τοῦ λέγειν συνεχῶς ῥᾶον συνείρουσι τὸν λόγον.

Διὰ τί μόνον τῶν ἄλλων ζῶων ἄνθρωπος γίνεται ἰσχνόφωνον; ἢ ὅτι λόγου κοινωνεῖ μόνον, τὰ δὲ ἄλλα φωνῆς; οἱ δὲ ἰσχνόφωνοι φωνοῦσι μὲν, λόγον δὲ οὐ δύνανται συνείρειν.

Διὰ τί τοῦ μὲν χειμῶνος ὀξύτερον φθέγγονται καὶ νήφοντες, θέρους δὲ καὶ μεθύοντες βαρύτερον; ἢ ὅτι ὀξύτερα μὲν ἐστὶν ἡ ταχυτέρα, ταχυτέρα δὲ ἐστὶν ἡ ἀπὸ συντεταμένου φωνῆ; τῶν δὲ νηφόντων καὶ ἐν τῷ χειμῶνι τὰ σώματα συνέστηκε μᾶλλον ἢ μεθύοντων καὶ ἐν τῷ θέρει· τὸ γὰρ θερμόν καὶ αἱ ἀλέαι διαλύουσι τὰ σώματα.

Διὰ τί ἡ φωνὴ ὕστατον τελειοῦται τοῖς ἀνθρώποις τῶν φθεγγομένων; ἢ διότι πλείστας ἔχει διαφορὰς καὶ εἶδη; τὰ γὰρ ἄλλα ζῶα ἢ οὐθὲν γράμμα ἢ ὀλίγα διαλέγονται. τὸ δὲ ποικιλώτατον καὶ πλείστας ἔχον διαφορὰς ἀνάγκη ἐν πλείστῳ χρόνῳ ἀποτελεῖσθαι.

Διὰ τί ἡ μὲν ὄψις οὐ διέρχεται διὰ τῶν στερεῶν, ἡ δὲ φωνὴ διέρχεται; ἢ ὅτι τῆς μὲν ὀψεως μία φορὰ ἡ κατ' εὐθεῖαν (σημεῖον δὲ αἶ τε τοῦ ἡλίου ἀκτῖνες, καὶ ὅτι ἐξ ἐναντίας μόνον ὁρῶμεν), τῆς δὲ

φωνῆς πολλαί; ἀκούομεν γὰρ πανταχόθεν. ὅταν οὖν κωλυθῇ κατ' εὐθεϊαν ἐκπίπτειν διὰ τὸ μὴ κατ' ἀλλήλους εἶναι τοὺς πόρους, ἀδυνατεῖ διορᾶν.

[905b] ὁ δὲ ἀήρ καὶ ἡ φωνή, ἅτε πανταχοῦ φερομένη, διὰ παντὸς διαπίπτει καὶ ἀκούεται. ἐν δὲ τοῖς ὑδροῖς αἱ μὲν ὄψεις διορῶσιν, αἱ δὲ φωναὶ οὐκ ἀκούονται ἢ μόλις, λεπτοτέρου ὄντος τοῦ ὑδροῦ ἢ τῆς γῆς, ὅτι οἱ πόροι μικροὶ καὶ πυκνοὶ καὶ κατ' ἀλλήλους, ὥστε οὐ κωλύεται ἡ ὄψις εὐθυπορεῖν. διὰ τοῦτο καὶ διὰ μὲν τῆς ὑέλου διορᾶται πυκνῆς οὕσης, διὰ δὲ τοῦ νάρθηκος ἀραιοῦ ὄντος οὐ διορᾶται. ἔτι τῆς μὲν οἱ πόροι κατάλληλοι, τῶν δὲ παραλλάττοντες· οὐδὲν δ' ὄφελος εἶναι μεγάλους, ἐὰν μὴ κατ' εὐθεϊαν ὦσιν. ἡ δὲ φωνὴ οὐκ ἀκούεται, ὅτι ἐλάττω τὰ διάκενα τὰ ἐν τῷ ὕδατι τοῦ ἀέρος, ὥστε οὐ δύναται δέχεσθαι, οὐδὲ μεῖναι τὴν φωνήν, ἀλλὰ μόλις ἡ μετὰ φωνῆς. ἡ γὰρ φωνὴ ἀήρ τις. οὐ γὰρ ἅπαν τὸ μανότερον διυτικώτερον, ἂν μὴ καὶ οἱ πόροι ὥσιν ἀρμόττοντες τῷ διόντι. ὥστ' οὐδὲ συνιτικώτερον εἰς αὐτό, ἂν μὴ δεκτικοὶ ὦσιν οἱ πόροι τῶν σωμάτων. καίτοι τὸ μανὸν μαλακὸν καὶ δυνάμενον εἰς αὐτὸ συνιέναι. ἀλλ' ἔνια κωλύεται διὰ τὴν μικρότητα τῶν πόρων, οἷον ἡ ὑέλος· ταύτης γὰρ οὐ συνάγονται, μανοτέρας οὕσης τοῦ νάρθηκος, διὰ τὴν εἰρημένην αἰτίαν. ὁμοίως δὲ καὶ τὸ ὕδωρ καὶ εἴ τι ἄλλο τοιοῦτον. ὥστε καὶ τόδε φανερόν, διότι τοῦ μανοῦ καὶ μαλακοῦ ἢ αὐτοῦ ὄντος ἢ παραπλησίου τὴν φύσιν, οὐ τὸ μανότερον μᾶλλον συνάγεται εἰς αὐτό· ἡ γὰρ αὐτὴ αἰτία πάντων.

Διὰ τί γίνεται ἐλάττων μὲν ἡ φωνὴ ἐξαιρουμένων, ὁμοία δὲ τὸν χαρακτῆρα; ἢ ὅτι ἐμέμικτο αὐτοῖς; τὸ δὲ μεμιγμένον οὐ τῇ μὲν ἐστὶ τῇ δὲ οὐ, ἀλλὰ πάντῃ. ὁμοίως οὖν πανταχόθεν ἐξαιρουμένων συνέρχεται ὁμοίως, ὥστ' ἑλαττόν τε ἀνάγκη καὶ ὅμοιον εἶναι.

Διὰ τί ἰσχνόφωνοι γίνονται; πότερον διὰ θερμότητα προπετέστεροί εἰσιν, ὥστε προσπταίοντες ἐπίσχουσιν, ὥσπερ οἱ ὀργιζόμενοι; καὶ γὰρ οὗτοι πλήρεις ἄσθματος γίνονται. πολὺ μὲν οὖν τὸ πνεῦμα συμβαίνει. ἢ διὰ τὴν ζέσιν τοῦ θερμοῦ ἀσθμαίνουσιν, διὰ τὸ πολὺ εἶναι καὶ μὴ φθάνειν ὑπεξιδόν τῷ τῆς ἀναπνοῆς καιρῷ; ἢ μᾶλλον τὸναντίον κατάψυξις ἢ θερμότης τοῦ τόπου ᾧ φθέγγονται, ὥσπερ ἀποπληξία τοῦ μέρους τούτου; διὸ καὶ θερμαινόμενοι ὑπὸ οἴνου καὶ τοῦ λέγειν συνεχῶς ῥᾶον συνείρουσι τὸν λόγον.

Διὰ τί τοῦ χειμῶνος αἱ φωναὶ βαρύτεραι; ἢ ὅτι παχύτερος ὁ ἀήρ, παχυτέρου δὲ ὄντος βραδυτέρα ἡ κίνησις, ὥσθ' ἡ φωνὴ

βαρυτέρα. ἢ διότι διὰ τῶν στέρνων βραδύτερον [906a] χωρεῖ ὁ ἀήρ, συμφράττεται δὲ τὸ περὶ τὸν φάρυγγα ὑπὸ τε τοῦ ψυχροῦ καὶ τοῦ ἐπιρρέοντος φλέγματος.

Διὰ τί τὰ παιδιά καὶ αἱ γυναῖκες καὶ οἱ εὐνούχοι καὶ οἱ γέροντες φθέγγονται ὀξύ; ἢ ὅτι θάπτων κίνησις ἐστὶν ἢ ὀξύτερα; ἔστι δὲ τὸ αὐτὸ πλείονος δυσκινήτοτερον, ὥστε οἱ ἐν ἀκμῇ πλείω συνεπισπῶνται τὸν ἀέρα· οὗτος οὖν βραδύτερον ἰὼν βαρυτέραν παρασκευάζει τὴν φωνήν. ἐν δὲ τοῖς παιδίοις καὶ εὐνούχοις διὰ τὸ ἐλάττω ἔχειν ἐναντίως. τρέμειν δὲ τοὺς πρεσβύτας οὐ δυναμένους κρατεῖν, ὥσπερ τοῖς ἀδυνάτοις καὶ παιδίοις, ὅταν μακρὸν ξύλον λάβωσιν ἀπ' ἄκρου, τὸ ἕτερον ἄκρον σείεται διὰ τὸ μὴ κρατεῖν. διὰ τοῦτο καὶ οἱ πρεσβῦται τρέμουσιν. τὸ αὐτὸ δὲ ὑποληπτέον καὶ ἐπὶ τῶν ἀγωνιόντων καὶ φοβουμένων καὶ ῥιγόντων αἴτιον τοῦ τρόμου τῆς φωνῆς. τοῦ γὰρ ἔχοντος τὴν φωνὴν τοιαύτην, τῶν τοιούτων παθῶν εἴσω περιεστηκότος τοῦ πλείστου, λοιπὸν ὀλίγον ὃν οὐ δύναται κρατεῖν τῆς φωνῆς· διὸ καὶ σείεται καὶ τρέμει. διὸ καὶ οἱ τεχνικοὶ τῶν συνειδότην ὅτι ἀγωνιῶσι μικρὸν διαλέγονται ἀπ' ἀρχῆς, καὶ ἄχρι οὗ ἂν καταστῶσιν· μικρᾶς γὰρ οὔσης τῆς φωνῆς ῥᾶον κρατοῦσιν.

ΙΒ. ΟΣΑ ΠΕΡΙ ΤΑ ΕΥΩΔΗ.

Διὰ τί τῶν θυμιαμάτων ἤττον αἰσθάνονται πλησίον ὄντες; πότερον ὅτι ἀκρατεστέρα κερασθεῖσα ἢ ἀπόρροια τῷ ἀέρι ἡδίων, ὥσπερ ἡ σμύρνη τῶν ἱατρῶν; ἢ καὶ τοὺναντίον εἶη ἂν, ὥστε ἀφαιρεῖσθαι τὸ πῦρ τὴν ὁσμὴν διὰ τὸ καίειν; ἢ γὰρ ὁσμὴ θυμωμένων. διὸ καὶ ἐπὶ τῶν ἀνθράκων οὐκ ὄζει, πορρώτερον δὲ καθαρώτερον φαίνεται καὶ λεπτότατον τοῦτο.

Διὰ τί αἱ ὁσμαι ἤττον εὐώδεις τῶν θυμιαμάτων καὶ τῶν ἀνθῶν ἐκ τοῦ ἐγγύς; πότερον ὅτι συναπέρχεται τῇ ὁσμῇ καὶ γῆς μόρια, ἃ προκαταφέρεται διὰ βάρος, ὥστε καθαρὰ πορρώτερον γίνεται ἢ ὁσμῇ; ἢ οὔτε ἐγγὺς οὔσης τῆς ἀρχῆς πλεῖστον γίνεται τὸ ρέον, οὔτε λίαν πόρρω; τὸ μὲν γὰρ οὐπω πολύ, τὸ δὲ διασπᾶται.

Λέγεται γὰρ ὡς εὐώδη γίνεται τὰ δένδρα εἰς ἅπερ ἂν ἡ ἴρις κατασκήψῃ. πότερον οὖν ἀληθές ἐστιν ἢ ψεῦδος; καὶ εἰ ἀληθές, διὰ τί τιν' αἰτίαν εἶη τὸ συμβαῖνον; ὅτι μὲν [906b] οὖν οὔτε πάντα οὔτε ἀεί, δῆλον· πολλάκις γὰρ ἡ ἴρις μὲν γέγονε, τὰ δὲ δένδρα οὐθὲν ἐπίδηλα φαίνεται. ὅταν τε γένηται τοῦτο, οὐκ ἐν πάσῃ γίνεται ὕλη, ἐπεὶ συμβαίνει γέ ποτε· διὸ καὶ λέγεται. τὸ δ' αἴτιον κατὰ συμβεβηκὸς τῇ ἰριδι ἀποδοτέον, ἄλλως τε καὶ εἰ μὴ ἐστὶ τις φύσις ἢ ἴρις, ἀλλὰ τῆς ὀψεως πάθος ἀνακλωμένης. γίνεται δέ, ὥσπερ ἐλέχθη, οὐχ ὅπως οὖν ἐχούσης τῆς ὕλης τὸ πάθος· οὔτε γὰρ ἐν τοῖς χλωροῖς δένδροις οὔτε ἐν τοῖς αὖοις, ἀλλ' ἐν τῇ ἐμπερησμένη ὕλῃ φασὶν οἱ νομεῖς μετὰ τὰ ἐπὶ τῇ ἰριδι ὕδατα γίνεσθαι ἐπίδηλον τὴν εὐωδίαν, καὶ μάλιστα οὗ ἂν ἀσπάλαθος ἦ καὶ ῥάμνος καὶ ὧν τὰ ἄνθη εὐώδη ἐστίν. αἴτιον δὲ τῆς εὐωδίας ἐστίν, ὅπερ καὶ ἐπὶ τῆς γῆς· διαθέρμου γὰρ καὶ διακεκαυμένης οὔσης, ὃ ἂν ἐκφύσῃ, τὸ πρῶτον εὐῶδες ὄζει. τὰ γὰρ πυρούμενά πως τῶν ὑγρότητα ἐχόντων ὀλίγην εὐώδη γίνεται· πέττει γὰρ τὸ θερμὸν αὐτήν. διὸ καὶ τῆς ὅλης γῆς εὐωδέστερα τὰ πρὸς τὸν ἥλιον τῶν πρὸς ἄρκτον ἐστίν. τούτων δὲ τὰ πρὸς ἕω τῶν πρὸς μεσημβρίαν, ὅτι γεώδης μᾶλλον ὁ τόπος ὁ περὶ τὴν Συρίαν καὶ Ἀραβίαν ἐστίν, ἢ δὲ Λιβύη ἀμμώδης καὶ ἄνικμος. δεῖ γὰρ μήτε πολλὴν εἶναι τὴν ἱκμάδα, ἅπεπτος γάρ ἐστιν ἢ πολλή, μήτε ἄνικμον, οὐ γὰρ γίνεται ἀτμῖς. ὃ συμβαίνει καὶ περὶ τὴν νεόκαυστον ὕλην καὶ τὸ γένος τοιαύτην ὥστε ἔχειν εὐωδίαν σὺν αὐτῇ. δηλοῖ δὲ τοῖς ἄνθεσιν· ἀφίησι γὰρ ἐν τούτοις τὴν ὁσμὴν. δοκεῖ δὲ ἐν οἷς ἂν

ἐνσκήψῃ ἡ ἴρις γίνεσθαι, ὅτι οὐδὲν ἄνευ ὕδατος οἷόν τε γίνεσθαι· βραχεῖσά τε γὰρ ἡ ὕλη καὶ τῷ ἐνόντι θερμῷ πέψασα τὴν ἐν αὐτῇ γινομένην ἀτμίδα ἀφήσιν. οὔτε πολὺ τὸ ὕδωρ δεῖ εἶναι· ἐκκλύζει γὰρ τὸ πολὺ λίαν, καὶ σβέννυσι τὴν θερμότητα τὴν ἐνυπάρχουσαν ἀπὸ τῆς πυρώσεως. τὰ δὲ μετὰ τὴν ἴριν ὕδατα οὐ πολλὰ γίνεται ἀλλὰ μέτρια ὥς εἰπεῖν. καὶ ἐὰν πολλὰ γίνωνται ἱριδες, οὐ πολὺ γίνεται, ἀλλὰ πολλάκις μὲν ὀλίγον δέ. διὸ εἰκότως τούτου γινομένου, οὐθὲν ἄλλο ὀρῶντες διάφορον πλὴν τὴν ἴριν, ταύτῃ τὴν αἰτίαν προσέθεσαν τῆς εὐωδίας.

Διὰ τί τὰ ἄνθη καὶ τὰ θυμιώμενα πόρρωθεν μᾶλλον ἥδιον ὀζει, ἐγγύθεν δὲ τὰ μὲν ποωδέστερον τὰ δὲ καπνωδέστερον; ἢ ὅτι ἡ ὁσμὴ θερμότης τίς ἐστὶ καὶ τὰ εὐώδη θερμά, τὸ δὲ θερμὸν κοῦφον, ὥστε διὰ μὲν τοῦτο πορρωτέρω [907a] διόντων ἀμιγέστερα γίνεται ἡ ὁσμὴ τῶν συμπαρεπομένων ὁσμῶν ἀπὸ τῶν φύλλων καὶ τοῦ καπνοῦ, ὄντος ὕδατῶδους ἀτμοῦ, πλησίον δὲ ὄντων τὰ μεμιγμένα αὐτοῖς συνῶζει ἐν οἷς ἐστίν.

Διὰ τί πάντα μᾶλλον ὀζει κινούμενα; ἢ ὅτι ἀναπίμπλησι πλείω ἀέρα ἢ ἡσυχάζοντα; διαπέμπεται οὖν ἡ ὁσμὴ θάττον οὕτω πρὸς τὴν αἴσθησιν ἡμῖν.

Διὰ τί τοῦ χειμῶνος ἥττον ὁσφραινόμεθα, καὶ ἐν τοῖς πάγεσιν ἥκιστα; ἢ ὅτι ὁ ἀῆρ ἀκινήτοτερός ἐστιν ἐν τῷ ψύχει; οὐκ οὖν ἀφικνεῖται ὁμοίως ἡ κίνησις ἢ ἀπὸ τοῦ σώματος τοῦ τὴν ὁσμὴν ἔχοντος διὰ τὴν δυσκινήσιάν τῆς ἀπορροῆς καὶ τοῦ ἀέρος ἐν ᾧ ἐστίν.

Διὰ τί δριμύτερον ὀζει τῶν ἀρωμάτων ἐπὶ τέφρας θυμιωμένων ἢ ἐπὶ τοῦ πυρός, καὶ μᾶλλον καὶ πλείω χρόνον τὴν αὐτῶν ὁσμὴν ἔχει ἐπὶ τῆς τέφρας θυμιώμενα; ἢ ὅτι ἀπεπτοτέρα ἐστὶν ἡ ὁσμὴ ἐπὶ τῆς τέφρας· διὸ καὶ πλείων. τὸ δὲ πῦρ παχὺ πέττον αὐτῶν τὴν δύναμιν, ἄλλοιοῖ τὴν ὁσμὴν· ἡ γὰρ πέψις ἀλλοίωσις ἐστὶ τοῦ πεττομένου.

Διὰ τί ἥδιον ὀζει τῶν ρόδων ὧν ὁ ὀμφαλὸς τραχὺς ἐστὶν ἢ ὧν λεῖος; ἢ ὅτι μᾶλλον ὀζει ἡδὺ ὅσα τὴν φύσιν ἀπείληφε τὴν αὐτῶν; ἀκανθῶδες δὲ φύσει τὸ ρόδον ἐστί, διὸ μᾶλλον ἔχον τὰ κατὰ φύσιν ἥδιστα ὀζει.

Διὰ τί αἱ ὁσμαι ἐγγύθεν ἥττον εὐώδεις καὶ θυμιαμάτων καὶ ἀνθῶν; ἢ ὅτι πλησίον μὲν συναποφέρεται τὸ γεῶδες, ὥστε κεραννύμενον ἀσθενεστέραν ποιεῖ τὴν δύναμιν, εἰς δὲ τὸ πόρρω καταφέρεται ἡ ὁδμή. διὰ ταῦτα δὲ καὶ τριφθέντα τὰ ἄνθη ἀπόλλυσι τὴν ὁσμὴν.

Πότερον αἱ ὁσμαι καπνὸς ἢ ἀήρ ἢ ἀτμίς; διαφέρει γάρ, ἢ τὸ μὲν ὑπὸ τοῦ πυρός, τὸ δὲ καὶ ἄνευ τούτου γίνεται. καὶ πότερον ἀπὸ τῆς αἰσθήσεώς τι πρὸς ἐκεῖνα ἢ ἀπ' ἐκείνων πρὸς τὴν αἴσθησιν ἀφικνεῖται, αἰετὶν κινεῖν τὸν πλησίον ἀέρα; καὶ εἰ ἀπ' ἐκείνων ἀπορρεῖ, ἔδει ἔλαττον γίνεσθαι· καίτοι τὰ εὐωδέστατα ὁρῶμεν μάλιστα διαμένοντα.

Διὰ τί δριμύτερον ὄζει μᾶλλον τῶν ἀρωμάτων ἐπὶ τέφρας θυμωμένων ἢ ἐπὶ τοῦ πυρός; ἢ διότι ἀπεπτοτέρα ἢ ὁσμή ἐπὶ τῆς τέφρας· διὸ καὶ πλείων; πολὺ οὖν καὶ τοῦ γεώδους συναναθυμῖται καὶ γίνεται καπνός· τὸ δὲ πῦρ φθάνει ἐκκαῖον τὸ γεῶδες αὐτῶν, ὥστε ἢ ὁσμή καθαρωτέρα [907b] καὶ εἰλικρινὴς ἀφικνεῖται ἄνευ τοῦ καπνοῦ. διὸ καὶ τριβόμενα ἤττον εὐώδη τὰ ἄνθη· τὸ γὰρ γεῶδες καὶ ἢ τριῖψις κινεῖ, καὶ ἢ βραδεῖα θερμότης οὐ φθείρει.

Διὰ τί τὰ εὐώδη οὐρητικά καὶ σπέρματα καὶ φυτά; ἢ ὅτι θερμὰ καὶ λεπτά, τὰ δὲ τοιαῦτα οὐρητικά; ταχὺ γὰρ λεπτύνει ἢ ἐνοῦσα θερμότης, καὶ ἢ ὁσμή οὐ σωματώδης, ἐπεὶ καὶ τὰ μὴ εὐώδη, οἷον σκόροδα, διὰ τὴν θερμότητα οὐρητικά, μᾶλλον μέντοι τηκτικά. θερμὰ δὲ τὰ εὐώδη σπέρματα, διότι ὅλως ἢ ὁσμή διὰ θερμότητα γίνεται. ἀλλὰ τὰ δυσώδη ἄπεπτά ἐστιν· δεῖ δὲ μὴ μόνον θερμὰ εἶναι ἀλλὰ καὶ εὐπεπτα, εἰ ἔσται οὐρητικά, ὅπως συγκατιόντα λεπτύνῃ τὰ ὑγρά.

Διὰ τί ποτε οἱ κεκραμένοι τῶν οἴνων θᾶπτον τῶν ἀκράτων ὄζουσιν; ἢ ὅτι ὁ κεκραμένος ἀσθενέστερος τοῦ ἀκράτου ἐστίν; τὸ δὲ ἀσθενέστερον ὑπὸ πάντων ἐξίσταται τοῦ ἰσχυροτέρου. εἴτα ὁ κεκραμένος ἐστὶν εὐπετέστερος τοῦ ἀκράτου. εὐπετέστερον δὲ ἐστὶν ὑπάρξαι ὥτινιοῦν, καὶ ἐκλαβεῖν τι τῶν μὴ ὑπαρχόντων. ὁ μὲν οὖν ἄκρατος ὁσμώδης ἐστίν, ὁ δὲ κεκραμένος ἄνοσμος.

ΙΓ. ΟΣΑ ΠΕΡΙ ΤΑ ΔΥΣΩΔΗ.

Διὰ τί τὸ μὲν οὔρον, ὅσῳ ἂν χρονίζεται ἐν τῷ σώματι, δυσωδέστερον γίνεται, ἢ δὲ κόπρος ἦττον; ἢ ὅτι ἡ μὲν ξηραίνεται μᾶλλον χρονιζομένη (τὸ δὲ ξηρὸν ἀσηπτότερον), τὸ δὲ οὔρον παχύνεται, πρόσφατόν τε ὄν ὁμοιότερον τῷ ἐξ ἀρχῆς ἐστὶ πόματι.

Διὰ τί τὰ δυσώδη τοῖς ἐδηδοκόσιν οὐ δοκεῖ ὄζειν; ἢ διὰ τὸ συντετρῆσθαι τὴν ὄσφρησιν τῷ στόματι κατὰ τὸν οὐρανὸν πλήρης ἢ αἰσθησις γίνεται ταχύ, καὶ τῆς τε ἔσω οὐκέθ' ὁμοίως αἰσθάνεται (τὸ γὰρ πρῶτον αἰσθάνονται πάντες, ὅταν δὲ ἄψωνται, οὐκέτι, ὥσπερ συμφυοῦς) καὶ ἡ ἔξωθεν ἡ ὁμοία ἀφανίζεται ὑπὸ τῆς ἔσω.

Διὰ τί τριβόμενα τὰ ἄνθη δυσωδέστερα; ἢ διότι συμμίγνυται τῇ ὁσμῇ τὸ γεῶδες τὸ ἐν τῷ ἄνθει.

Διὰ τί τῶν μὲν ζώων οὐθὲν εὐῶδές ἐστιν ἔξω τῆς παρδάλεως (αὕτη δὲ καὶ αὐτοῖς τοῖς θηρίοις· φασὶ γὰρ αὐτῆς τὰ θηρία ἡδέως ὀσμάσθαι), φθειρόμενα δὲ καὶ δυσώδη ἐστίν, τῶν δὲ φυτῶν πολλὰ καὶ φθειρόμενα καὶ αὐαινόμενα ἔτι μᾶλλον εὐώδη γίνεται; πότερον ὅτι τῆς δυσωδίας αἴτιον ἀπεψία τις περιττώματος; διὸ καὶ οἱ ἰδρώτες ἐνίοις καὶ ἐνίστε τοιοῦτοῖ εἰσι, μάλιστα δὲ οἷς μὴ ἀεὶ τοιοῦτοι ἐκ τῶν νόσων γίνονται. καὶ αἱ φῦσαι δὲ καὶ οἱ ἐρυγμοὶ οἱ τῶν ἀπέπτων δυσώδεις εἰσίν. τὸ αὐτὸ δὲ αἴτιον καὶ τοῦ ἐν ταῖς σαρκὶ καὶ τῷ ἀνάλογον· λέγω δὲ ἀνάλογον τὸ ἀντὶ σαρκὸς τοῖς ἄλλοις ἐνυπάρχον ζώοις. ἔστι γὰρ καὶ ἐνταῦθα περίττωμα ἐνίοις ἄπεπτον· τοῦτο οὖν ζώντων τε αἴτιον τῆς δυσωδίας ἐστὶ καὶ φθειρομένων σηπόμενον. διὸ καὶ τὰ πίονα καὶ ὁστᾶ καὶ τρίχες οὐ δυσώδη ἐστίν, ὅτι τὰ μὲν πέττεται, τὰ δὲ οὐκ ἔχει ὑγρότητα. τοῖς δὲ φυτοῖς οὐκ ἐνὶ περίττωμα. ἢ ἔστι μὲν τι καὶ τούτοις, ἀλλ' ὅτι ξηρὰ καὶ θερμὰ τὰ φυτὰ τὴν φύσιν ἐστίν, ὥστε εὐπεπτοτέρα ἢ ἰκμὰς καὶ οὐ πηλώδης ἐστὶν αὐτῶν; δηλοῖ δὲ καὶ τῆς γῆς ἢ ἐν τοῖς θερμοῖς εὐώδης οὖσα, Συρία καὶ Ἀραβία, καὶ τὰ εὐώδη τάκεῖθεν, ὅτι ξηρὰ καὶ θερμὰ ἐστίν· τὰ δὲ τοιαῦτα ἄσηπτα. τὰ δὲ ζῶα οὐ τοιαῦτά ἐστι καὶ θερμά, ὥστε αἱ τε περιττώσεις ἄπεπτοι καὶ δυσώδεις αὐτῶν εἰσὶ, καὶ διαφυσήσεις ὁμοίως· καὶ διαφθειρομένων σήπεται ἡ ὑγρότης, τῶν δὲ οὐ· οὐ γὰρ ἔχουσιν.

Διὰ τί τὰ δυσώδη θερμὰ ὄντα μᾶλλον δυσώδη ἐστίν ἢ ἐψυγμένα; ἢ ὅτι ἐστὶν ἡ ὁσμὴ ἀτμὸς καὶ ἀπορροή τις; ὃ τ' οὖν ἀτμὸς ὑπὸ θερμοῦ γίνεται καὶ ἡ ἀπορροή· κίνησις γάρ τις ἐστὶ, τὸ δὲ

θερμὸν κινητικόν. τὸ δὲ ψυχρὸν τούναντίον στατικόν καὶ συσταλτικόν καὶ φορὸν δὲ κάτω, τὸ δὲ θερμὸν καὶ αἱ ὁσμαι πᾶσαι ἀνωφερεῖς διὰ τὸ ἐν ἀέρι τε εἶναι καὶ τὸ αἰσθητήριον αὐτῶν ἄνω εἶναι, μὴ κάτω· πρὸς γὰρ ἐγκέφαλον περαίνουσα ἡ ὁσμή αἰσθησιν ποιεῖ.

Διὰ τί, ἐάν τις σκόροδα φάγη, τὸ οὔρον ὅζει, ἄλλων δὲ ἐχόντων ἰσχυρὰν ὁσμήν οὐκ ὅζει ἐδεσθέντων; πότερον, ὥσπερ τινὲς τῶν ἡρακλειτιζόντων φασὶν ὅτι ἀναθυμιᾶται, ὥσπερ ἐν τῷ ὄλῳ, καὶ ἐν τῷ σώματι, εἴτα πάλιν ψυχθὲν συνίσταται ἐκεῖ μὲν ὑγρόν, ἐνταῦθα δὲ οὔρον, ἢ ἐκ τῆς τροφῆς ἀναθυμίασις, ἐξ οὗ ἐγένετο αὕτη συμμιγνυμένη, ποιεῖ τὴν ὁσμήν; αὕτη γάρ ἐστιν, ὅταν μεταβάλλῃ. ἢ ἔδει καὶ τὰ ἄλλα τοῦτο ποιεῖν, ὅσα ἰσχυρὰς ὁσμάς ἔχει· νῦν δὲ οὐ ποιεῖ. ἔτι συγκρινόμενα ἐκ τῆς ἀτμίδος οὐκ εἰς τὸ ἀρχαῖον ἔρχεται, οἶον οἶνος ἐξ οἴνου, ἀλλ' οὐχ ὕδωρ, ὥστε [908b] καὶ τοῦτο ψεῦδος. ἀλλ' ὅτι μόνον φυσητικὸν τῆς κάτω κοιλίας τῶν ὁσμήν ἐχόντων ἰσχυρὰν ἅμα καὶ οὐρητικὴν, τὰ δὲ ἄλλα ἄνω ποιεῖ, οἶον ἡ ῥάφανος, καὶ τὰ πνεύματα. ἢ οὐκ οὐρητικά. κάτω δὲ τρία ὑπάρχει ταῦτα· καὶ γὰρ οὐρητικόν, καὶ πνεῦμα ποιεῖ, καὶ τοῦτο κάτω. ὁ δὲ τόπος ὁ περὶ τὰ αἰδοῖα καὶ τὴν κύστιν τῶν τοιούτων ἀπολαύει διὰ τὴν γεινίασιν, καὶ ὅτι πνευματικός ἐστιν· δηλοῖ δὲ ἡ συντονία τοῦ αἰδοίου. δηλον οὖν ὅτι ἀφικνεῖται τὸ περίττωμα εἰς τὴν κύστιν αὐτοῦ μάλιστα τῶν τοιούτων ἅμα τῷ πνεύματι, ὃ μιγνύμενον ποιεῖ τοῦ οὔρου τὴν ὁσμήν.

Διὰ τί τὰ στόματα μηδὲν ἐδηδοκότων ἀλλὰ νηστευσάντων ὅζει μᾶλλον (ὃ καλεῖται νηστείας ὅζειν), φαγόντων δὲ οὐκέτι, ὅτε ἔδει μᾶλλον; ἢ ὅτι κινουμένης τῆς κοιλίας θερμότερος ὁ ἀὴρ γινόμενος διὰ τὴν ἀκίνησίαν σήπει τὸ πνεῦμα καὶ τὰ φλεγματώδη περιττώματα; ὅτι δὲ θερμότερος γίνεται, σημεῖον ὅτι καὶ δίψαν ποιεῖ ἡ νηστεία μᾶλλον. φαγόντων δὲ διὰ τὸ ἐλάττων εἶναι ἡ ὁσμή τῆς τῶν σιτίων παύεται· κρατεῖ γὰρ τῆς θερμότητος ἡ τῶν σιτίων θερμότης, ὥστε μηθὲν πάσχειν.

Διὰ τί ἡ μασχάλη δυσωδέστατον τῶν τόπων; πότερον ὅτι ἀπνούστατός ἐστιν; ἔστι δὲ ἡ δυσωδία ἐν τοῖς τοιούτοις μάλιστα, διὰ τὸ σῆψιν γίνεσθαι ὑπὸ τῆς ἡσυχίας τῆς ὑγρότητος· ἢ διότι ἀκίνητος καὶ ἀγύμναστος.

Διὰ τί οἱ τοῦ γράσου ὅζοντες, ὅταν ἀλείφονται μύρῳ, δυσωδέστεροι γίνονται; ἢ διότι τοῦτο ἐπὶ πολλῶν γίνεται, οἶον ὅζον καὶ γλυκὺν συμμιγθὲν τὸ ὅλον γλυκύτερον ἐγένετο. εἴτα ἰδρώσαντες

πάντες δυσωδέστεροί εἰσι, τὸ δὲ μύρον θερμαντικόν ἐστιν· ἰδρῶτας οὖν παρασκευάζει.

Διὰ τί τῶν ἐγκύρτων καὶ κυφοτέρων δυσσομοτέρα καὶ βαρυτέρα ἢ ὁσμή τοῦ πνεύματος; ἢ διότι συγκέκλεισται ὁ τόπος ὁ περὶ τὸν πνεύμονα καὶ ἀνέσπασται ἐκ τῆς εὐθυωρίας, ὥστε οὐκ εὐπνοῦς, ἀλλὰ σήπεται ἢ ἰκμᾶς καὶ τὸ πνεῦμα μᾶλλον εἴσω ἐγκατακλειόμενον;

Διὰ τί τὰ πολλὰ τῶν μύρων συνεξιδρῶσαι δυσώδη, ἔνια δὲ ἡδίω ἢ οὐ χεῖρω; ἢ ὅσα μὲν τῇ κινήσει ἢ τῇ τρίψει μεταβάλλοντα, χεῖρω τὰ τοιαῦτα, ὅσα δὲ μή, τούναντίον; ἔστι δὲ ἔνια τοιαῦτα, ὥσπερ καὶ τῶν ἀνθῶν, ἐξ ὧν γίνονται [909a] αἱ εὐωδίαί, τὰ μὲν τριβόμενα ἢ θερμαινόμενα ἢ ξηραίνόμενα φαῦλα, οἷον τὰ λευκόϊα, τὰ δὲ ὅμοια, οἷον τὰ ρόδα. καὶ τῶν μύρων δὴ ὅσα ἐκ τοιούτων ἐστί, μεταβάλλει, τὰ δὲ οὐ· διὸ τὸ ρόδιον ἡκιστα. καὶ δυσώδη δὲ φαίνεται μᾶλλον, ὅσων οἱ ἰδρῶτες δυσώδεις, καὶ διὰ τὸ μίγνυσθαι τῷ ἐναντίῳ, ὥσπερ τὸ μέλι μετὰ τοῦ ἀλὸς οὐ μᾶλλον γλυκὺ ἀλλ' ἥττον.

Διὰ τί πάντα μᾶλλον ὀζει κινούμενα; ἢ διότι ἀναπίμπλησι τὸν ἀέρα; διαπέμπεται οὖν θάττον ἢ ὁσμή πρὸς τὴν αἴσθησιν.

ΙΔ. ΟΣΑ ΠΕΡΙ ΚΡΑΣΕΙΣ.

Διὰ τί θηριώδεις τὰ ἔθη καὶ τὰς ὄψεις οἱ ἐν ταῖς ὑπερβολαῖς ὄντες ἢ ψυχους ἢ καύματος; ἢ διὰ τὸ αὐτό; ἢ γὰρ ἀρίστη κρᾶσις καὶ τῇ διανοίᾳ συμφέρει, αἱ δὲ ὑπερβολαὶ ἐξιστᾶσι, καὶ ὥσπερ τὸ σῶμα διαστρέφουσιν, οὕτω καὶ τὴν τῆς διανοίας κρᾶσιν.

Διὰ τί ἐν τῷ Πόντῳ ὁ σῖτος ἐαθεῖς ἐν τῷ ψύχει πολλὰ ἔτη γίνεται ἄκοπος; ἢ ὅτι ἐξικμάζεται τὸ ἀλλότριον ὑγρὸν μετὰ τοῦ θερμοῦ, ὥσπερ ἐν ταῖς σταφυλαῖς; ἕνια μὲν γὰρ ὑπὸ τοῦ ψυχροῦ, ἕνια δὲ ἅμα τῷ θερμῷ.

Διὰ τί ἐν τῇ ψυχροτάτῃ χώρα οἱ καῦσοι μᾶλλον γίνονται; ἢ διότι ἀντιπερίιστησι τὸ ψυχὸς εἶσω τὴν θερμότητα; ἐν δὲ τῷ θέρει τοῦναντίον συμβαίνει, τὰ εἶσω ψυχρότερα. ὁ δὲ καῦσος πυρετὸς τῶν ἔξω κατεψυγμένων τὰ ἔσω θερμότητι υπερβάλλει.

Διὰ τί οἱ Αἰθίοπες καὶ οἱ Αἰγύπτιοι βλαιοσοὶ εἰσιν; ἢ διότι ὑπὸ θερμοῦ, ὥσπερ καὶ τὰ ξύλα διαστρέφεται ξηραίνόμενα, οὕτω καὶ τὰ τῶν ζώων σώματα; δηλοῦσι δὲ καὶ αἱ τρίχες· οὐλοτέρας γὰρ ἔχουσιν, ἢ δὲ οὐλότης ἐστὶν ὥσπερ βλαισότης τῶν τριχῶν.

Διὰ τί ἐν τοῖς νοτίοις μᾶλλον θηλυτοκοῦσιν αἱ ὀχεῖαι; ἢ ὅτι τὸ πλεῖον ὑγρὸν βραδύτερον παχύνεται; ἐν δὲ τοῖς νοτίοις διὰ τὴν ὑγρότητα τῆς κρᾶσεως ὑγρότερον τὸ σπέρμα γίνεται.

Διὰ τί ἐν τοῖς ἐλώδεσι τὰ μὲν ἐν τῇ κεφαλῇ ἔλκη ταχὺ ὑγιαίνεται, τὰ δὲ ἐν ταῖς κνήμαις μόλις; ἢ ὅτι βαρεῖα ἢ ὑγρότης διὰ τὸ γεώδης εἶναι, τὰ δὲ βαρέα εἰς τὸ κάτω ὑποχωρεῖ; τὰ μὲν οὖν ἄνω εὐπεπτα διὰ τὸ ὑποκεχωρηκέναι εἰς τὸ κάτω, τὰ δὲ κάτω πολλῆς γέμει τῆς περιττώσεως καὶ εὐσήπτου.

[909b] Διὰ τί οἱ μὲν ἐν τοῖς εὐπνόοις τόποις βραδέως γηράσκουσιν, οἱ δὲ ἐν τοῖς κοίλοις καὶ ἐλώδεσι ταχέως; ἢ τὸ γῆρας σηπεδὼν τίς ἐστί, σήπεται δὲ τὸ ἡρεμοῦν· τὸ δὲ ἐν κινήσει ὃν ἢ ὅλως ἄσαπὲς ἢ ἥττον τοῦτο πάσχει, οἷον τὸ ὕδωρ. ἐν μὲν οὖν τοῖς ὑψηλοῖς διὰ τὴν εὐπνοίαν ὁ ἀῆρ ἐν κινήσει ἐστίν, ἐν δὲ τοῖς κοίλοις μένει. ἔτι δὲ ἐκεῖ μὲν διὰ τὴν κίνησιν αἰεὶ καθαρὸς ὁ ἀῆρ καὶ ἕτερος γίνεται, ἐν δὲ τοῖς ἐλώδεσι μένει.

Διὰ τί οἱ μὲν ἐν τοῖς θερμοῖς τόποις δειλοὶ εἰσιν, οἱ δὲ ἐν τοῖς ψυχροῖς ἀνδρεῖοι; ἢ ὅτι ἐναντίως τοῖς τόποις καὶ ταῖς ὥραις ἢ φύσις ἔχει, διὰ τὸ ὁμοίως ἐχόντων ἀνάγκη διακαίεσθαι ταχέως. ἀνδρεῖοι δὲ

είσιν οἱ τὴν φύσιν θερμοί, δειλοὶ δὲ οἱ κατεψυγμένοι. συμβαίνει δὲ τοὺς μὲν ἐν τοῖς θερμοῖς ὄντας κατεψῦχθαι, τοὺς δὲ ἐν τοῖς ψυχροῖς ἐκτεθερμάνθαι τὴν φύσιν. μεγάλοι δὲ ἄμφω εἰσίν, οἱ μὲν ἐν τοῖς ψυχροῖς διὰ τὴν ἐν αὐτοῖς σύμφυτον θερμότητα, οἱ δ' ἐν τοῖς θερμοῖς διὰ τὴν ἐν τῷ τόπῳ· ἐν γὰρ τοῖς θερμοῖς καὶ ὑπὸ τοῦ θερμοῦ αὐξάνονται. τὸ δὲ ψυχρὸς πηλητικόν ἐστιν. ἅτε οὖν τῶν μὲν ἐν αὐτοῖς ἐχόντων τὴν ἀρχὴν τῆς αὐξήσεως σφοδράν, τῶν δὲ οὐ κωλυομένων ὑπὸ τῆς ἔξωθεν ψυχρότητος, εἰκότως ἐπὶ πολὺ τὴν αὐξησιν ἐπιδέχονται. οἱ δὲ περὶ ἡμᾶς ἦττον διὰ τὸ ἐλάττω τε ἔχειν τὴν ἀρχὴν ἐν αὐτοῖς, καὶ διὰ τὸ τοὺς ἐν τοῖς ψυχροῖς συμπλεῖσθαι.

Διὰ τί μακρόβιοι μᾶλλον εἰσιν οἱ ἐν τοῖς θερμοῖς τόποις οἰκοῦντες; ἢ διὰ τὸ ξηροτέραν ἔχειν τὴν φύσιν, τὸ δὲ ξηρότερον ἀσαπέστερον εἶναι καὶ πολυχρονιώτερον, τὸν δὲ θάνατον οἷον σῆψίν τινα εἶναι; ἢ διότι ὁ μὲν θάνατός ἐστι ψύξις τοῦ ἐντὸς θερμοῦ, καταψύχεται δὲ πᾶν ὑπὸ τοῦ περιέχοντος καὶ ψυχρότερου; ἔστι δὲ ὁ περιέχων ἄῃρ ἐν μὲν τοῖς ἀλεινοῖς τόποις θερμός, ἐν δὲ τοῖς ψυχροῖς ψυχρός, ὥστε θᾶττον καὶ μᾶλλον φθείρει τὸ ἐν αὐτοῖς θερμόν.

Διὰ τί οἱ ἐν τοῖς θερμοῖς τόποις μακροβιώτεροι; ἢ ὅτι μᾶλλον τὸ θερμόν καὶ τὸ ὑγρὸν σώζουσιν; ὁ γὰρ θάνατος ἢ τούτων φθορά.

Διὰ τί ἐν τοῖς ἐλώδεσι τόποις ὑπνωδέστεροι γινόμεθα; ἢ διότι κατεψυγμένοι μᾶλλον ἐν αὐτοῖς ἐσμέν, ἢ δὲ κατάψυξις ἡσυχία τις οὔσα παρασκευάζει ὕπνον, ὁ δὲ ὕπνος ἐν τῷ ἡσυχάζειν παραγίνεται.

[910a] Διὰ τί οἱ ἐν τοῖς πλοίοις εὐχροοί, ἐπὶ ὕδατος διαιτώμενοι, μᾶλλον τῶν ἐν τοῖς ἔλεσιν; ἢ ἡ ὥρα καὶ τὸ εὐπνουν αἴτιον; ὥχροὺς δὲ τὸ ὕδωρ ποιεῖ, ὅταν σήπηται, ὃ πάσχει δι' ἀκινήσιάν· διὸ ἐν τοῖς ἐλώδεσιν ὕπωχροι.

Διὰ τί ἐν τοῖς χειμερινοῖς χωρίοις πνίγη σφοδρὰ γίνεται πολλά, καὶ μᾶλλον ἢ ἐν τοῖς ἀλεινοῖς; πότερον διὰ τὴν ὑγρότητα τοῦ ἀέρος; ἀπὸ γὰρ τῆς αὐτῆς θερμότητος ὕδωρ θερμότερον γίνεται τοῦ ἀέρος, ὥστε καὶ ὁ ἄῃρ ὑγρότερος τοῦ θερμοῦ. ἢ οὐδὲ ἔστι ξηρότερος ὁ ἄῃρ ἐν τοῖς τόποις τοιοῦτοις, ἀλλὰ φαίνεται παρὰ τὸ ἐναντίον, ὥσπερ ὁ ἐκ νεφέλης ἥλιος παρὰ τὸ ἐκ τῆς σκιάς θιγγάνεσθαι.

Διὰ τί οἱ πρὸς μεσημβρίαν οἰκοῦντες μᾶλλον εἰσι μελανόφθαλμοι; ἢ γλαυκὰ μὲν ἐστι τὰ ὄμματα δι' ὑπερβολὴν τοῦ ἐντὸς θερμοῦ, μέλανα δὲ διὰ τὴν τούτου ἀπουσίαν, ὥσπερ καὶ Ἐμπεδοκλῆς φησίν. καθάπερ οὖν τῶν πρὸς ἄρκτον οἰκούντων γλαυκὰ τὰ ὄμματά ἐστι τῷ τὸ ἐντὸς θερμόν κωλύεσθαι διεκπίπτειν

διὰ τὸ ἐκτὸς ψυχρόν, οὕτω τῶν πρὸς μεσημβρίαν οἰκούντων τὸ μὲν ὑγρὸν διὰ τὸ περιέχον θερμὸν οὐκ ἐκπίπτει, τὸ δὲ θερμὸν μηδενὸς ἀντιφράττοντος ἐκπίπτει, τὸ δὲ λειπόμενον ὑγρὸν μέλαν ποιεῖ· τῇ γὰρ τοῦ φωτὸς ἀπουσίᾳ τὸ λειπόμενόν ἐστι σκοτῶδες. ἢ τοῖς τοῦ λοιποῦ σώματος χρώμασιν ὁμοιοῦται τὸ ἐν τῷ ὀφθαλμῷ χρῶμα; διὸ τῶν πρὸς ἄρκτον λευκῶν ὄντων γλαυκὰ τὰ ὄμματα (τοῦ γὰρ λευκοῦ τοῦτο ἐγγὺς τὸ χρῶμα), καὶ τῶν πρὸς μεσημβρίαν μελάνων ὄντων μέλανα καὶ τὰ ὄμματα.

Διὰ τί οἱ ἐν τοῖς θερμοῖς τόποις σοφώτεροί εἰσιν ἢ ἐν τοῖς ψυχροῖς; πότερον διὰ τὸ αὐτὸ δι' ὅπερ καὶ οἱ γέροντες τῶν νέων; οἱ μὲν γὰρ διὰ τὴν ψυχρότητα τοῦ τόπου ἐπανιούσης τῆς φύσεως αὐτῶν θερμότεροί εἰσι πολύ, ὥστε λίαν μεθύουσιν εἰκόσιν, καὶ οὐκ εἰσι ζητητικοὶ ἀλλὰ ἀνδρεῖοι καὶ εὐέλπιδες· οἱ δὲ ἐν τοῖς ἀλεινοῖς νήφουσι διὰ τὸ κατεψύχθαι. πανταχοῦ δὲ οἱ φοβούμενοι τῶν θαρρύντων μᾶλλον ἐπιχειροῦσι ζητεῖν, ὥστε καὶ εὐρίσκουσι μᾶλλον. ἢ διὰ τὸ πολυχρονιώτερον τὸ γένος εἶναι τοῦτο, τοὺς δὲ ὑπὸ τοῦ κατακλυσμοῦ ἀπολέσθαι, ὥστε εἶναι καθάπερ νέους πρὸς γέροντας τοὺς ἐν τοῖς ψυχροῖς τόποις πρὸς τοὺς ἐν τοῖς θερμοῖς οἰκοῦντας.

Διὰ τί οἱ μὲν ἐν τοῖς θερμοῖς τόποις δειλοὶ εἰσιν, οἱ δὲ ἐν τοῖς ψυχροῖς ἀνδρεῖοι; ἢ ὅτι ἐναντίως τοῖς τόποις καὶ [910b] ταῖς ὥραις ἢ φύσιν ἔχει, διὰ τὸ ὁμοίως ἐχόντων διακάεσθαι ἂν ταχέως; ἀνδρεῖοι δὲ εἰσιν οἱ τὴν φύσιν θερμοί, δειλοὶ δὲ οἱ κατεψυγμένοι. συμβαίνει δὴ τοὺς μὲν ἐν τοῖς θερμοῖς ὄντας καταψύχεσθαι (ἄрайοῦ γὰρ ὄντος αὐτοῖς τοῦ σώματος τὸ θερμὸν αὐτῶν ἕξω διεκπίπτει), τοὺς δ' ἐν τοῖς ψυχροῖς ἐκτεθερμάνθαι τὴν φύσιν διὰ τὸ ἐκ τοῦ ἐκτὸς ψυχροῦ πυκνοῦσθαι τὴν σάρκα, πυκνουμένης δὲ ἐντὸς συστέλλεσθαι τὸ θερμὸν.

ΙΕ. ΟΣΑ ΜΑΘΗΜΑΤΙΚΗΣ ΜΕΤΕΧΕΙ ΘΕΩΡΙΑΣ.

Διὰ τί διάμετρος καλεῖται μόνη τῶν δίχα διαιρουσῶν τὰ εὐθύγραμμα ἢ ἐκ γωνίας εἰς γωνίαν ἀχθεῖσα γραμμὴ; ἢ ὅτι διάμετρος δίχα διαιρεῖ, καθάπερ τοῦνομα ὑποσημαίνει, οὐ φθείρουσα τὸ μετρούμενον; ἢ μὲν οὖν κατὰ τὰς συνθέσεις διαιροῦσα (λέγω δὲ τὰς γωνίας) διάμετρος ἔσται· οὐ γὰρ φθείρει ἀλλὰ διαιρεῖ, καθάπερ οἱ τὰ στρατιωτικὰ σκεύη διαιροῦντες. ἢ δὲ κατὰ τὰς γραμμὰς σύνθετα τέμνουσα φθείρει· σύγκειται γὰρ τὸ εὐθύγραμμον κατὰ τὰς γωνίας.

Διὰ τί διάμετρος καλεῖται; ἢ διότι δίχα μόνη διαιρεῖ; ὥσπερ οὖν εἴ τις εἴποι διχάμετρός ἐστιν. καὶ διὰ τί μόνη τῶν δίχα τοῦτο καλεῖται. ἢ ὅτι κατὰ μέλη ἢ κέκαμπται μόνη διαιρεῖ, αἱ δὲ ἄλλαι κατὰ πλευράς;

Διὰ τί πάντες ἄνθρωποι, καὶ βάρβαροι καὶ Ἕλληνες, εἰς τὰ δέκα καταριθμοῦσι, καὶ οὐκ εἰς ἄλλον ἀριθμόν, οἷον β', γ', δ', ε', εἶτα πάλιν ἐπαναδιπλοῦσιν, ἐν πέντε, δύο πέντε, ὥσπερ ἑνδεκα, δώδεκα; οὐδ' αὖ ἐξωτέρῳ παυσάμενοι τῶν δέκα, εἶτα ἐκεῖθεν ἐπαναδιπλοῦσιν; ἔστι μὲν γὰρ ἕκαστος τῶν ἀριθμῶν ὁ ἔμπροσθεν καὶ ἐν ἡ δύο, καὶ οὗτος ἄλλος τις, ἀριθμοῦσι δ' ὁμῶς ὀρίσαντες ἄχρι τῶν δέκα. οὐ γὰρ δὴ ἀπὸ τύχης γε αὐτὸ ποιοῦντες φαίνονται καὶ ἀεὶ· τὸ δὲ ἀεὶ καὶ ἐπὶ πάντων οὐκ ἀπὸ τύχης, ἀλλὰ φυσικόν. πότερον ὅτι τὰ δέκα τέλειος ἀριθμός; ἔχων γὰρ πάντα τὰ τοῦ ἀριθμοῦ εἶδη, ἄρτιον περιττόν, τετράγωνον κύβον, μήκος ἐπίπεδον, πρῶτον σύνθετον. ἢ ὅτι ἀρχὴ ἡ δεκάς; ἐν γὰρ καὶ δύο καὶ τρία καὶ τέτταρα γίνεται δεκάς. ἢ ὅτι τὰ φερόμενα σώματα ἐννέα; ἢ ὅτι ἐν δέκα ἀναλογίαις τέτταρες κυβικοὶ ἀριθμοὶ ἀποτελοῦνται, ἐξ ὧν φασὶν ἀριθμῶν οἱ Πυθαγόρειοι τὸ πᾶν συνεστάναι; ἢ ὅτι πάντες ὑπῆρξαν ἄνθρωποι ἔχοντες δέκα δακτύλους; οἷον οὖν ψήφους ἔχοντες τοῦ οἰκείου [911a] ἀριθμοῦ, τούτῳ τῷ πλήθει καὶ ἄλλα ἀριθμοῦσιν. μόνοι δὲ ἀριθμοῦσι τῶν Θρακῶν γένος τι εἰς τέτταρα, διὰ τὸ ὥσπερ τὰ παιδιά μὴ δύνασθαι μνημονεύειν ἐπὶ πολὺ, μηδὲ χρῆσιν μηδενὸς εἶναι πολλοῦ αὐτοῖς.

ὅτι ἡ γῆ κέντρον· ἀεὶ γὰρ ὅμοια τὰ φαινόμενα ἡμῖν σχήματα. δοκεῖ τοῦτο εἶναι, ἐὰν μὴ ἀπὸ τοῦ μέσου τις θεωρῇ, ἀλλ' ὅτε μὲν τρίγωνα ὅτε δὲ τραπέζια ὅτε δὲ ἄλλοῖα ἐδόκει ἡ γῆ μέσον ἡμῖν, εἰ ἀπὸ τούτων ἐνὶ ἡμᾶς θεωρεῖν. οὔσης γὰρ σφαιροειδοῦς τῆς γῆς ταῦτ' ὁ κέντρον τούτου καὶ τῆς γῆς ἔσται. ἡμεῖς δὲ ἐπάνω τῆς γῆς

οικοῦμεν, ὥστε οὐκ ἀπὸ τούτου, ἀλλὰ τὸ ἡμῖς τῆς διαμέτρου ἀφεστῶσιν ἡμῖν τοιαῦτα φαίνεται. τί οὖν κωλύει πλέονος γενομένου τοῦ διαστήματος διαμένειν τὴν τῶν σχημάτων φαντασίαν;

Διὰ τί τοῦ ἡλίου ὁμοτόνως φερομένου ἐν τῷ ἴσῳ χρόνῳ, οὐχ ἡ αὐτὴ αὐξήσις καὶ φθίσις τῶν σκιῶν; ἢ ὅτι ἴσαι γίνονται αἱ γωνίαι πρὸς τὰ ὁρώμενα, αἱ ἀπὸ τῶν ἀκτίνων ὑπὸ ταῖς ἴσαις περιφερείαις; εἰ δ' αὖται καὶ ἐμβαλλόμεναι ποιοῦσιν ἀκτῖνας ἐν τῷ τριγώνῳ, ὅπερ ἔχεται ὑπὸ τε τῆς πρώτης ἀκτίνος καὶ τοῦ ὁρωμένου καὶ τῆς σκιάς. εἰ δ' αἱ γωνίαι ἴσαι, ἀνάγκη τὴν πορρωτέρῳ γραμμὴν τοῦ ὁρωμένου μείζω εἶναι τῆς ἐγγυτέρῳ· τοῦτο γὰρ ἴσμεν. διηρήσθω οὖν ἡ περιφέρεια εἰς ἴσα ὅσαοῦν πλήθει, ὁράσθω δὲ τὸ Θ. ὅταν οὖν ὁ ἥλιος ἐπὶ τοῦ Α προσλαβὼν τὸ Θ ποιήσῃ τινὰ σκιὰν ἐν τῷ ΘΑ, ἀνάγκη δὴ τὴν ἀκτῖνα ἐπὶ τὸ Α πίπτειν. ὅταν δ' ἔλθῃ ἐπὶ τὸ Β, ἢ ἀπὸ τοῦ Β ἀκτὶς ἐντὸς τῆς ΘΑ πεσεῖται, καὶ ὅταν πάλιν ἐπὶ τὸ Γ μεταβῇ, ὡσαύτως· εἰ δὲ μή, εὐθεῖα εὐθείας διχῇ ἄσεται. ἐπεὶ οὖν ἴση ἡ ΑΒ τῇ ΒΓ, καὶ αἱ γωνίαι αἱ ὑπὸ ταύτης αἱ πρὸς τῷ Δ ἴσαι ἔσονται· πρὸς τῷ κέντρῳ γάρ. εἰ δὲ τῇ τοῦ Δ, καὶ ἐν τῷ τριγώνῳ· κατὰ κορυφὴν γὰρ ταύταις. ὥστ' ἐπεὶ εἰς ἴσα διαιρεῖται ἡ γωνία, μείζων ἔσται ἡ ΔΕ τῆς ΕΖ τῇ ΔΘ. ὁμοίως δὲ καὶ αἱ ἄλλαι ὥς ποιοῦσιν αἱ ἀπὸ τῆς περιφερείας ἀκτῖνες. ἅμα δὲ δῆλον καὶ ὅτι κατὰ μεσημβρίαν ἐλαχίστην ἀναγκαῖον εἶναι τὴν σκιάν, καὶ ὅτι αἱ ἐπιδόσεις τότε ἐλάχισται. μάλιστα γὰρ καθ' ἡμᾶς ὁ ἥλιος τῆς μεσημβρίας ἐστί, καὶ πνῆγος γίνεται διὰ τε τὴν εἰρημένην αἰτίαν, καὶ ὅτι ἀπνεύματος· ὅταν γὰρ διακρίνῃ τὸν πρὸς τῇ γῇ ἀέρα, πνεῦμα γίνεται. εἰ οὖν ἅμα ἐν ἀμφοτέροις [911b] τοῖς ἡμισφαιρίοις, εἰκότως ἂν αἱ μέσαι νύκτες καὶ ἡ μεσημβρία ἀπνεύματοι εἶεν.

Διὰ τί ὁ ἥλιος διὰ τῶν τετραπλεύρων διέχων οὐκ εὐθύγραμμα ποιεῖ τὰ σχήματα ἀλλὰ κύκλους, οἷον ἐν ταῖς ῥινίν; ἢ ὅτι ἡ τῶν ὄψεων ἔκπτωσις κῶνός ἐστι, τοῦ δὲ κῶνου κύκλος ἡ βάσις, ὥστε πρὸς ὃ ἂν προσπίπτωσιν αἱ τοῦ ἡλίου ἀκτῖνες, κυκλοτερεῖς φαίνονται. ἀναγκαῖον μὲν γὰρ ἐστί καὶ τὸ ὑπὸ τοῦ ἡλίου σχῆμα ὑπ' εὐθειῶν περιέχεσθαι, εἴπερ αἱ ἀκτῖνες εὐθεῖαι. ὅταν γὰρ εὐθεῖαι πρὸς εὐθεῖαν προσπίπτωσιν, εὐθύγραμμον ποιοῦσιν. ἐπὶ δὲ τῶν ἀκτίνων συμβαίνει τοῦτο· πρὸς εὐθεῖαν γὰρ προσπίπτουσι τὴν τοῦ ῥιπὸς γραμμὴν, ἢ δι' οὗ λάμπουσι, καὶ αὐταὶ εὐθεῖαί εἰσιν, ὥστε πρὸς εὐθεῖαν ἔσται ἡ ἔκπτωσις. ἀλλὰ διὰ τὸ ἀσθενεῖς εἶναι τὰς ἀποσχιζομένας ἀπὸ τῶν ὄψεων πρὸς τὰ ἄκρα τῶν εὐθειῶν, οὐχ

ὁρᾶται τὰ ἐν ταῖς γωνίαις· ἀλλ' ὅσον μὲν τῆς εὐθείας ἐνυπάρχει ἐν τῷ κώνῳ, ποιεῖ αὐτήν, τὸ δὲ λοιπὸν οὐ ποιεῖ, ἀλλὰ λανθάνουσιν αἱ ὄψεις ἐπιπίπτουσαι. πολλὰ γὰρ οὐχ ὁρῶμεν ἐφ' ἃ διικνεῖται ἡ ὄψις, οἷον τὰ ἐν τῷ σκότει. ὅμοιον δὲ τούτῳ καὶ τὸ τὸ τετράγωνον πολυγωνοειδὲς φαίνεσθαι, ἐὰν δὲ πλεον ἀφιστῇ, κύκλον. ὄντος γὰρ κώνου τῆς τῶν ὀψεων ἐκπτώσεως, ἀφισταμένου τοῦ σχήματος εἰς τὸ πόρρω αἱ μὲν εἰς τὰς γωνίας ἀποσχιζόμεναι τῶν ὀψεων διὰ τὸ ἀσθενεῖς εἶναι καὶ ὀλίγαι οὐχ ὁρῶσι, πλεονος τοῦ ἀποστήματος γινομένου, αἱ δὲ εἰς τὸ μέσον προσπίπτουσαι, ἀθρόαι καὶ ἰσχυραὶ οὔσαι, διαμένουσιν. ἐγγὺς μὲν οὖν ὄντος τοῦ σχήματος δύνανται καὶ τὰ ἐν ταῖς γωνίαις ὁρᾶν, πόρρω δὲ αὐτοῦ γινομένου ἀδυνατοῦσιν. διὸ καὶ ἡ περιφερὴς ἀπαγομένη εὐθεῖα φαίνεται. καὶ ἡ σελήνη ὑπὸ εὐθειῶν δοκεῖ περιέχεσθαι τῇ ὀγδόῃ, ἐὰν μὴ κατὰ τὸ πλάτος ἀλλὰ κατὰ τὴν περιέχουσαν γραμμὴν αἱ ὄψεις προσπίπτωσιν. ἐγγὺς μὲν γὰρ οὔσης τῆς περιφερείας δύνανται διακρίνειν αἱ ὄψεις, ὅσῳ ἐγγύτερόν ἐστι θάτερον θατέρου μέρους τῆς περιφερείας· πόρρω δὲ γινομένης οὐ διαισθάνεται, ἀλλὰ δοκεῖ αὐτῇ ἐξ ἴσου εἶναι. διὸ καὶ εὐθεῖα φαίνεται.

Διὰ τί τῆς σελήνης σφαιροειδοῦς οὔσης εὐθεῖαν ὁρῶμεν, ὅταν ᾗ διχότομος; ἢ ὅτι ἐν τῷ αὐτῷ ἐπιπέδῳ ἡ ὄψις γίνεται καὶ ἡ τοῦ κύκλου περιφέρεια, ἣν ὁ ἥλιος ποιεῖ προσβάλλων τῇ σελήνῃ; ὅτε δὲ τοῦτο γένοιτο, εὐθεῖα γραμμὴ ἐφαίνετο [912a] ὁ ἥλιος. ἐπεὶ γὰρ ἀνάγκη τὸ προσβάλλον τὰς ὄψεις πρὸς τὴν σφαῖραν κύκλον ὁρᾶν, ἡ δὲ σελήνη σφαιροειδής, καὶ ὁ ἥλιος ὁρᾷ αὐτήν, κύκλος ἂν εἴη ὁ ὑπὸ τοῦ ἡλίου γινόμενος. οὗτος οὖν ὅταν μὲν ἐξ ἐναντίας ἡμῖν γένηται, ὅλος φαίνεται καὶ δοκεῖ πανσέληνος εἶναι· ὅταν δὲ παραλλάττῃ διὰ τὴν τοῦ ἡλίου μετάβασιν, ἡ περιφέρεια αὐτοῦ κατὰ τὴν ὄψιν γίνεται, ὥστε εὐθεῖα φαίνεται. τὸ δὲ ἕτερον μέρος περιφερές, ὅτι ἐξ ἐναντίας κεῖται τῇ ὄψει ἡμισφαίριον. τὸ δὲ τοιοῦτο ἐφαίνετο ἡμικύκλιον. αἰὶ γὰρ ἡ σελήνη κατ' ἀντικρὺ ἐστι τῆς ὀψεως. ἀλλ' ὅταν ὁ ἥλιος ἐπιβάλλῃ, οὐχ ὁρῶμεν, καὶ ἀναπληροῦται μετὰ τὴν ὀγδόην ἐκ τοῦ μέσου, ὅτι ἐπιπαρεξιών ὁ ἥλιος ἐκκλινέστερον ἡμῖν ποιεῖ τὸν κύκλον. οὕτω δὲ τιθέμενος πρὸς τὴν ὄψιν ὁ κύκλος κώνου τομῇ ἐμφορῆς ἐγένετο. μηνοειδής δὲ φαίνεται, ὅταν ὁ ἥλιος μεταβῇ. ὅταν γὰρ κατὰ τὰ ἔσχατα σημεῖα, καθ' ἃ διχότομος φαίνεται, ὁ κύκλος ὁ τοῦ ἡλίου γένηται, περιφέρεια φαίνεται ἡ τοῦ κύκλου. οὐ γὰρ ἔτι κατ' εὐθεῖαν ἐστι τῇ ὄψει, ἀλλὰ παραλλάττει. τούτου δὲ γινομένου,

καὶ διὰ τῶν αὐτῶν σημείων τοῦ κύκλου ὄντος, ἀνάγκη μηνοειδῇ φαίνεσθαι. μέρος γάρ τι τοῦ κύκλου κατὰ τὴν ὄψιν εὐθύς ἐστι, τοῦ προτέρου ἐξ ἐναντίας ὄντος, ὥστε τοῦ λαμπροῦ ἀποτέμνεται· εἴθ' οὕτως καὶ τὰ ἄκρα μένουσιν ἐν τῷ αὐτῷ, ὥστε ἀνάγκη μηνοειδῇ φαίνεσθαι. μᾶλλον δὲ καὶ ἥττον διὰ τὴν τοῦ ἡλίου κίνησιν. μεταβαίνοντος γὰρ τοῦ ἡλίου καὶ ὁ κύκλος ὃν ὀρᾷ ἐπιστρέφεται, ἐν τοῖς αὐτοῖς σημείοις ὢν· ἀπείρους γὰρ ἐγκλίσεις ἐγχωρεῖ αὐτὸν κλιθῆναι, εἴπερ γραφῆναι τοὺς μεγίστους κύκλους διὰ τῶν αὐτῶν σημείων ἀπείρους ἐνδέχεται.

Διὰ τί ὁ ἥλιος καὶ ἡ σελήνη σφαιροειδῇ ὄντα ἐπίπεδα φαίνεται; ἢ ὅτι πάντων ὅσων τὸ ἀπόστημα ἄδηλον, ὅτε πλεῖον ἢ ἔλαττον ἀφῆσθηκεν, ἐξ ἴσου φαίνονται; ὥστε καὶ ἐφ' ἐνὸς μὲν μόρια δ' ἔχοντος, ἂν μὴ τῇ χροᾷ διαφέρῃ, ἀνάγκη τὰ μόρια ἐξ ἴσου φαίνεσθαι. τὸ δ' ἐξ ἴσου ὁμαλὸν καὶ ἐπίπεδον ἀνάγκη δοκεῖν εἶναι.

Διὰ τί τὰς σκιάς ποιεῖ ὁ ἥλιος ἀνίσχων καὶ δύνων μακράς, αἰρόμενος δὲ ἐλάττους, ἐπὶ τῆς μεσημβρίας δ' ἐλαχίστας; ἢ ὅτι ἀνίσχων τὸ μὲν πρῶτον παράλληλον ποιήσει τὴν σκιὰν τῇ γῇ, καὶ ἄπειρον ὡς ἄνισον ὑπερτείνει, ἔπειτα μακράν· αἰεὶ δ' ἐλάττω διὰ τὸ αἰεὶ τὴν ἀπὸ τοῦ ἀνωτέρου σημείου εὐθεῖαν ἐντὸς πίπτειν. γνῶμων τὸ ΑΒ, ἥλιος οὗ τὸ Γ καὶ οὗ τὸ Δ· ἡ δὲ ἀπὸ τοῦ Γ ἀκτίς, ἐφ' ἧς τὸ ΓΖ, ἐξωτέρω [912b] ἔσται τῆς ΓΕ. ἔστι δὲ σκιά ἡ μὲν ΒΕ ἀνωτέρω ὄντος τοῦ ἡλίου, ἡ δὲ ΒΖ κατωτάτω· ἐλαχίστη δέ, ὅσῳ ἀνωτάτω, ἥ καὶ ὑπὲρ τῆς κεφαλῆς.

Διὰ τί αἱ ἀπὸ τῆς σελήνης σκιαὶ μείζους τῶν ἀπὸ τοῦ ἡλίου, ὅταν ἀπὸ τῆς αὐτῆς ὥσι καθέτου; ἢ διότι ἀνώτερος ὁ ἥλιος τῆς σελήνης; ἀνάγκη οὖν ἐντὸς πίπτειν τὴν ἀπὸ τοῦ ἀνωτέρω ἀκτῖνα. γνῶμων ἐφ' ᾧ ΑΔ, σελήνη Β, ἥλιος Γ. ἡ μὲν οὖν ἀπὸ τῆς σελήνης ἀκτίς ΒΖ, ὥστε ἔσται σκιά ἡ τὸ ΔΖ· ἡ δὲ ἀπὸ τοῦ ἡλίου ἡ τὸ ΓΕ, ὥστε ἔσται σκιά ἐξ ἀνάγκης ἥττων· ἔσται γὰρ τὸ ΔΕ.

Διὰ τί ἐν ταῖς τοῦ ἡλίου ἐκλείψεσιν, ἐάν τις θεωρῇ διὰ κοσκίνου ἢ φύλλων, οἷον πλατάνου ἢ ἄλλου πλατυφύλλου, ἢ τοὺς δακτύλους τῆς ἐτέρας χειρὸς ἐπὶ τὴν ἐτέραν ἐπιζεύξας, μηνίσκοι αἱ αὐγαὶ ἐπὶ τῆς γῆς γίνονται; ἢ ὅτι ὥσπερ δι' ὀπῆς ἐὰν λάμπῃ εὐγωνίου τὸ φῶς, στρογγύλον καὶ κῶνος γίνεται; αἴτιον δὲ ὅτι δύο γίνονται κῶνοι, ὃ τε ἀπὸ τοῦ ἡλίου πρὸς τὴν ὀπὴν καὶ ὁ ἐντεῦθεν πρὸς τὴν γῆν, καὶ συγκόρυφοι. ὅταν οὖν ἐχόντων οὕτως ἄνωθεν κύκλω ἀποτέμνηται, ἔσται μηνίσκος ἐξ ἐναντίας ἐπὶ τῆς γῆς τοῦ φωτός. ἀπὸ

τοῦ μηνίσκου γὰρ τῆς περιφερείας γίνονται αἱ ἀκτῖνες, αἱ δὲ ἐν τοῖς δακτύλοις καὶ κοσκίνοις οἷον ὅπαι γίνονται· διὸ ἐπιδηλότερον γίνεται ἢ διὰ μεγάλων ὀπῶν. ἀπὸ δὲ τῆς σελήνης οὐ γίνονται, οὔτε ἐκλειπούσης οὔτε ἐν αὐξήσει οὔσης ἢ φθίσει, διὰ τὸ μὴ ἀκριβεῖς τὰς ἀπὸ τῶν ἄκρων αὐγάς εἶναι, ἀλλὰ τῷ μέσῳ φαίνειν· ὁ δὲ μηνίσκος μικρὸν τὸ μέσον ἔχει.

Διὰ τί παρήλιος οὐ γίνεται οὔτε μεσουρανοῦντος τοῦ ἡλίου οὔθ' ὑπὲρ τὸν ἥλιον οὔθ' ὑπὸ τὸν ἥλιον, ἀλλ' ἐκ πλαγίων μόνον; ἢ διότι παρήλιος γίνεται κλωμένης τῆς ὄψεως πρὸς τὸν ἥλιον, αὕτη δὲ τοῦ ἀέρος ἢ στάσις, ἐφ' ἧς ἀνακλᾶται ἢ ὄψις, οὔτ' ἐγγὺς ἂν γένοιτο τοῦ ἡλίου οὔτε πόρρω. ἐγγὺς μὲν γὰρ οὔσαν ὁ ἥλιος διαλύσει, πόρρω δὲ οὔσης ἢ ὄψις οὐκ ἀνακλασθήσεται· ἀπὸ γὰρ μικροῦ ἐνόπτρου πόρρω ἀνατεινομένη ἀσθενὴς γίνεται. διὸ καὶ ἄλως οὐ γίνεται. ἐξ ἐναντίας τοῦ ἡλίου μὲν οὖν ἐὰν γίνηται καὶ ἐγγὺς, διαλύσει ὁ ἥλιος, ἐὰν δὲ πόρρω, ἐλάττων ἢ ὄψις προσπεσεῖται. ἐὰν δὲ ἐν τῷ πλαγίῳ, ἔστι τοσοῦτον ἀποστῆναι τὸ ἐνοπτρον ὥστε μήτε τὸν ἥλιον διαλύσαι μήτε τὴν ὄψιν ἀθρόαν ἀνελθεῖν, διὰ τὸ ὑπὸ τὴν γῆν φέρεσθαι. ὑπὸ δὲ τὸν ἥλιον οὐ γίνεται διὰ τὸ πλησίον μὲν τῆς γῆς ὄντος διαλύεσθαι ἂν ὑπὸ [913a] τοῦ ἡλίου, ἄνω δὲ μεσουρανίου τὴν ὄψιν διασπᾶσθαι. καὶ ὅλως οὐδὲ ἐκ πλαγίας μεσουρανίου γίνεται, ὅτι ἢ ὄψις ὑπὸ τὴν γῆν ἐὰν λίαν φέρηται, ὀλίγη ἤξει εἰς τὸ ἐνοπτρον, ὥστε ἀνακλωμένη πᾶν ἔσται ἀσθενής.

Διὰ τί τῆς σκιᾶς τὸ ἄκρον τοῦ ἡλίου τρέμειν φαίνεται; οὐ γὰρ δὴ διὰ τὸ φέρεσθαι τὸν ἥλιον· ἀδύνατον γὰρ κινεῖσθαι εἰς τάναντία, ὁ δὲ τρόμος τοιοῦτος. ἔτι δὲ ἄδηλος ἢ μετάβασις, ὥσπερ καὶ τοῦ ἡλίου αὐτοῦ. ἢ διὰ τὸ κινεῖσθαι τὰ ἐν τῷ ἀέρι; καλεῖται δὲ ζύσματα. φανερὰ δὲ ἔσται ἐν ταῖς ἀκτῖσι ταῖς διὰ τῶν θυρίδων· ταῦτα γὰρ κινεῖται κἂν νηνεμία. ἔκ τε οὖν τῆς σκιᾶς εἰς τὸ φῶς ἔκ τε τοῦ φωτὸς εἰς τὴν σκιὰν φερομένων ἀεί, καὶ ὁ ὅρος ὁ κοινὸς τοῦ φωτὸς καὶ τῆς σκιᾶς φαίνεται κινούμενος παρεγγύς. ἢ γὰρ οἷον σκιὰν ποιοῦσιν, ἢ δὲ φῶς, ἐκατέρωθεν μεταβάλλονται ταῦτα. ὥστε ἢ σκιὰ φαίνεται κινεῖσθαι, οὐ κινουμένη αὐτὴ οὔτως, ἀλλ' ἐκεῖνα.

ΙΣ. ΟΣΑ ΠΕΡΙ ΤΑ ΑΨΥΧΑ.

Διὰ τί αἱ μὲν βάσεις τῶν πομφολύγων λευκαὶ ἐν τοῖς ὕδασι· καὶ ἐὰν ἐν ἡλίῳ τεθῶσι, σκιὰν οὐ ποιοῦσιν, ἀλλ' ἡ μὲν ἄλλη πομφόλυξ σκιὰν ποιεῖ, ἡ δὲ βάσις οὐ ποιεῖ, ἀλλ' ἡλίωται κύκλῳ. τὸ δὲ ἔτι θαυμασιώτερον, ὅτι οὐδ' ἐάν τι τεθῇ ξύλον εἰς τὸ ὕδωρ ἐν τῷ ἡλίῳ, τέμνεται ὑπὸ τοῦ ὕδατος ταῦτα. ἢ οὐ γίνεται σκιά, ἀλλ' ἡλίῳ διήρηται ἡ σκιά; εἰ οὖν σκιά ἐστι τὸ μὴ ὁρώμενον, καὶ ὑπὸ τοῦ ἡλίου κύκλῳ ἂν ὁρῶτο ὁ ὄγκος. τοῦτο δὲ ὅτι ἀδύνατον, δείκνυται ἐν τοῖς ὀπτικοῖς· οὐδὲ γὰρ τὸ ἐλάχιστον ὑπὸ τοῦ μεγίστου ἐνδέχεται ὅλον περιοφθῆναι.

Διὰ τί αἱ πομφόλυγες ἡμισφαίρια; ἢ διὰ τὸ ὡς ἀπὸ κέντρου πρὸς τὸν ἀέρα φέρεσθαι ἄνω ὁμοίως πάντῃ; ἀνάγκη δὲ τοῦτο ἡμισφαίριον εἶναι. τὸ κάτω δὲ ἡμισφαίριον ἀποτεμένεται ὑπὸ τοῦ ἐπιπέδου τοῦ ὕδατῶδους, ἐν ᾧ τὸ κέντρον ἐστίν.

Διὰ τί τοῖς ἄνισον τὸ βάθος ἔχουσι μεγέθεσιν, ἐάν τις τὸ κουφότερον κινῇ, κύκλῳ περιφέρεται τὸ βαλλόμενον, οἷον τοῖς μεμολιβδωμένοις ἀστραγάλοις συμβαίνει, ἂν τις βάλλῃ τὸ κουφότερον πρὸς αὐτὸν στρέψας μέρος; ἢ ὅτι τὸ βαρύτερον ἀδύνατον ἰσοδρομεῖν τῷ κουφοτέρῳ, ἀπὸ τῆς αὐτῆς ἰσχύος ριφθέν; ἐπεὶ δὲ ἀνάγκη μὲν ἀμπαν κινεῖσθαι, [913b] ἐξ ἴσου δὲ ἀδύνατον, ὁμοταχῶς μὲν φερόμενα τὴν αὐτὴν οἰσθήσεται γραμμὴν, θάττον δὲ θατέρου φερομένου κύκλον ἀνάγκη φέρεσθαι, ἐπειδὴ ἐν τούτῳ μόνῳ τῷ σχήματι ταῦτα αἰεὶ κατάλληλα ὄντα σημεῖα ἐν ταύτῳ χρόνῳ ἀνίσους διέρχεται γραμμάς.

Διὰ τί τὰ πίπτοντα ἐπὶ τὴν γῆν καὶ ἀφαλλόμενα ὁμοίας γωνίας ποιεῖ πρὸς τὸ ἐπίπεδον ἐφ' ἐκάτερα τοῦ σημείου ᾧ ἤψατο τοῦ ἐπιπέδου; ἢ ὅτι πάντα μὲν φύσει φέρεται πρὸς ὀρθήν; τὰ μὲν οὖν εἰς ὁμαλὲς πεσόντα, τῇ καθέτῳ καὶ τῇ διαμέτρῳ προσκρούσαντα τῷ ἐπιπέδῳ, τοσαύτας ποιεῖ γωνίας ἀφαλλόμενα διὰ τὸ τὴν μὲν διάμετρον ἴσα διαιρεῖν· τὰ δὲ εἰς τὰ πλάγια πίπτοντα, οὐ τῇ καθέτῳ προσκρούοντα τῷ χωρίῳ ἀλλὰ τῷ ἀνωτέρῳ τῆς καθέτου σημείῳ, συμβαίνει πάλιν ἀνωσθέντα ὑπὸ τοῦ πληγέντος τόπου εἰς τοῦναντίον φέρεσθαι, τὰ μὲν στρογγύλα, ὅτι ἐν αὐτῷ φερόμενα εἰς τοῦναντίον τῆς ἀπώσεως ἐξελλίττεται, ἐάν τε ἡρεμῇ τὸ μέσον αὐτῶν ἐάν τε καὶ τόπον διαλλάττῃ· τὰ δ' εὐθύγραμμα διὰ τε τὴν κάθετον αὐτὴν εἰς

τοῦμπροσθεν προσηνέχθη ἐκκρούεσθαι, καθάπερ τοῖς τε
ξυρουμένοις τὰ σκέλη συμβαίνει, καὶ ὧν τοὺς κολύθρους
ὕφαρπάζουσιν. πάντες γὰρ οὗτοι εἰς τοῦναντίον καὶ ὀπισθεν
ἐπιπίπτουσι, διὰ τὸ ἰσάζειν αὐτὰ τὴν κάθετον, μετέωρόν τε εἶναι καὶ
εἰς τοῦμπροσθεν ἐκκρούεσθαι· τὰ γὰρ ἐναντία δηλονότι αὐτῆς
ὀπισθεν τε καὶ κάτω συμβαίνει γίνεσθαι, κάτω δὲ φερόμενα
βαρύτερα ἂν εἴη. ὁ οὖν τούτοις πτώμα, τοῖς ἀφαλλομένοις φορὰν
συμβαίνει γίνεσθαι. πρὸς ὀρθὴν μὲν οὖν οὐδέτερα αὐτῶν ἀφάλλεται
διὰ τὸ τὴν μὲν κάθετον δίχα τῷ βάρει διαιρεῖν τὰ φερόμενα,
καθέτους δὲ πλείους πρὸς ταὐτὸ ἐπίπεδον μὴ γίνεσθαι τεμνούσας
αὐτάς· ὁ τούτοις συμβήσεται καθέτου γινομένης κατὰ τὴν ἔφασιν, ἣ
προσέκρουσε τῷ ἐπιπέδῳ τὸ φερόμενον, διχοτομεῖσθαι πάλιν ὑπ’
αὐτῆς αὐτὸ συμβήσεται, ὥστε ἀναγκαῖον τέμνεσθαι ὑπ’ αὐτῆς τὴν
πρώτην κάθετον ὑφ’ ἧς ἐφέρετο. ἐπεὶ δ’ εἰς τοῦναντίον μὲν
οἰσθήσεται, πρὸς ὀρθὴν δὲ οὐκ οἰσθήσεται, λοιπὸν ὀξεῖαν γίνεσθαι
γωνίαν τὴν ἐπὶ θατέρῳ τοῦ προσπεσόντος τῷ ἐπιπέδῳ σημείου· ὅρος
γάρ ἐστιν ἡ ὀρθὴ τῶν ἐναντίων γωνιῶν.

Διὰ τί ὁ μὲν κύλινδρος ὥσθεις εἰς εὐθὺ τε φέρεται καὶ γράφει
εὐθείας τοῖς ὀρίζουσιν αὐτὸν κύκλοις, ὁ δὲ κῶνος κύκλῳ
περιφέρεται, τῆς κορυφῆς μενούσης, καὶ γράφει [914a] τὸν κύκλον
τῷ ὀρίζοντι; κύκλῳ μὲν ἀμφοτέρα φέρεται, γράφει δ’ ἐν τῷ ἐπιπέδῳ
ὁ μὲν κύλινδρος εὐθείας, ὁ δὲ κῶνος κύκλους, διὰ τὸ τοὺς μὲν ἐν τῷ
κῶνῳ ἀνίσους εἶναι κύκλους, φέρεσθαι δὲ ἀεὶ θᾶπτον τὸν μείζονα
τῶν περὶ τὸ αὐτὸ κέντρον. φερομένων δὲ ἀνίσως πάντων ἅμα τῶν ἐν
τῷ κῶνῳ κύκλων, συμβαίνει τοὺς ἐξωτάτω πλείστον ἐν ταὐτῷ χρόνῳ
τόπον καὶ γραμμὴν φέρεσθαι· διὸ καὶ κύκλῳ φέρονται, γράφονται τε
γὰρ πάντες τῇ αὐτῇ εὐθείᾳ, καὶ τῆς εὐθείας κύκλῳ μὲν φερομένης οὐ
πάντα τὰ ἐν αὐτῇ σημεῖα ἴσην ἐν ταὐτῷ χρόνῳ γράφει γραμμὴν, εἰς
εὐθὺ δὲ φέρει τὴν ἴσην. τοῦ δὲ κυλίνδρου πάντων ἴσων ὄντων τῶν
κύκλων καὶ περὶ ταὐτὸ κέντρον, συμβαίνει τὰ ἅμα τοῦ ἐπιπέδου ἐν
αὐτοῖς πάνθ’ ἄπτομένοις σημεῖα, φέρεσθαι τε ἰσοταχεῖς κυλιομένους
διὰ τὸ τοὺς κυλίνδρους ἴσους εἶναι, καὶ ἥκειν ἐπὶ τὸ ἐπίπεδον πάλιν
ἅμα ἐκκυλισθέντα ἕκαστον τὸν αὐτοῦ κύκλον, ὥστε καὶ τὰς ἐν τῷ
ἐπιπέδῳ εὐθείας ἴσας γίνεσθαι· τῇ γὰρ αὐτῶν ἀφῆ αὐτάς ἔγραψαν,
ὄντες ἴσοι τε καὶ ἰσοταχεῖς, ἐγίνοντο δὲ εὐθεῖαι αἱ ὑπὸ τῆς αὐτῆς
γραφεῖσαι γραμμῆς εἰς εὐθὺ φερομένης, ὥστε διὰ ταύτας εἰς εὐθὺ
ἀναφέροιτο ὁ κύλινδρος. διαφέρει γὰρ οὐθέν, ἣ ἢ πρώτη ἤψατο ὁ

κύλινδρος τοῦ ἐπιπέδου γραμμῇ, ταύτη ἔλκειν ἐν τῷ ἐπιπέδῳ, ἢ ἐγκυλίειν αὐτό· αἰεὶ γὰρ ἴσην καὶ ὁμοίαν γραμμὴν τῶν ἐν τῷ κυλίνδρῳ συμβήσεται ἄπτεσθαι τοῦ ἐπιπέδου, ἐλκομένου τε καὶ κυλιομένου τοῦ κυλίνδρου.

Διὰ τί τῶν βιβλίων ἡ τομὴ οὕσα ἐπίπεδος καὶ εὐθεῖα, ἐὰν μὲν τις τέμῃ παρὰ τὴν βάσιν, γίνεται εὐθεῖα ἀνελιττομένη, ἐὰν δὲ ἐγκλίνας, σκολιά; ἢ ὅτι συμβαίνει τῶν ἐν τῇ ἐτέρᾳ τομῇ κύκλων ἐν ταύτῳ ἐπιπέδῳ ὄντων τὴν ἐγκεκλιμένην τομὴν μὴ παρακειμένην εἶναι, ἀλλ' ἐν τῇ μὲν πλεῖον τῇ δὲ ἔλαττον αὐτῆς ἀπέχειν, ὥστε ἐξελιττομένου οἱ μὲν ἐν ταύτῳ ἐπιπέδῳ ὄντες κύκλοι, καὶ τὴν ἀρχὴν ἔχοντες ἐν ταύτῳ ἐπιπέδῳ, τὴν ἐξ αὐτῶν ποιήσουσι γραμμὴν ἐξελιττόμενοι. ἔστι γὰρ ἡ γιγνομένη γραμμὴ ἐκ τῶν κύκλων οἱ εἰσιν ἐν ταύτῳ ἐπιπέδῳ· ὥστε καὶ εὐθεῖα οὕσα ἐν ἐπιπέδῳ. ἢ τε τῆς λοξῆς τομῆς ἐξελιττομένη γραμμὴ οὐκ οὕσα παρὰ τὴν πρώτην, ἀλλὰ τῇ μὲν πλεον τῇ δὲ ἔλαττον αὐτῆς διεστηκυῖα διὰ τὸ καὶ τὴν τομὴν οὕτως ἔχειν πρὸς αὐτήν, οὐκ ἐν ἐπιπέδῳ ἔσται, ὥστε οὐδ' εὐθεῖα· τῆς γὰρ εὐθείας οὐκ ἔστι τὸ μὲν ἐν ἄλλῳ τὸ δὲ ἐν ἄλλῳ ἐπιπέδῳ.

[914b] Διὰ τί διαιρούμενα τὰ μεγέθη ἐλάττω φαίνεται πάντα τοῦ ὅλου; ἢ ὅτι διαιρούμενα μὲν ἀριθμὸν ἔχει πάντα, μεγέθει δὲ ἐλάττω ἐστὶ τοῦ ἑνός; τὸ μὲν γὰρ μέγα τῷ κατὰ συνέχειαν εἶναι καὶ ποσόν τι μέγα λέγεται, ὁ δὲ ἀριθμὸς τε πᾶς παντὸς μεγέθους ἀριθμοῦ μείζων. διόπερ εἰκὸς τὸ ὅλον διαιρεθέντων τῶν μερῶν μείζον φαίνεσθαι· τῶν αὐτῶν γὰρ ὄντων αὐτῶν τὸ μὲν ὅλον τὴν τοῦ μεγέθους ἔχει μᾶλλον φύσιν, συνεχὲς ὄν, τὰ δὲ μέρη τὴν τοῦ ἀριθμοῦ.

Τῶν περὶ τὴν κλεψύδραν συμβαινόντων τὸ μὲν ὅλον ἔοικεν εἶναι αἷτιον καθάπερ Ἀναξαγόρας λέγει· ὁ γὰρ ἀήρ ἐστὶν αἷτιος, ἐναπολαμβανόμενος ἐν αὐτῇ, τοῦ μὴ εἰσιέναι τὸ ὕδωρ ἐπιληφθέντος τοῦ ἄλλου. οὐ μὴν ἀπλῶς γε αἷτιος· κἂν γὰρ τις αὐτὴν πλαγίαν ἐνῇ εἰς τὸ ὕδωρ, ἐπιλαβὼν τὸν αὐλόν, εἴσεισι τὸ ὕδωρ. διόπερ οὐ λέγεται ὑπ' αὐτοῦ ἰκανῶς ἢ αἷτιόν ἐστιν. ἔστι δὲ αἷτιον μὲν, καθάπερ εἴρηται, ὁ ἀήρ· οὗτος δὲ ὠθούμενός τε καὶ καθ' ἑαυτὸν φερόμενος καὶ μὴ βιαζόμενος ἐπ' εὐθείας πέφυκε φέρεσθαι, καθάπερ καὶ ἄλλα στοιχεῖα. πλαγίας μὲν οὖν βαφείσης τῆς κλεψύδρας, διὰ τῶν ἐναντίων τοῖς ἐν τῷ ὕδατι τρυπημάτων ἐπ' εὐθείας μένων ὑπὸ τοῦ ὕδατος ἐξέρχεται, ὑποχωροῦντος δὲ αὐτοῦ τὸ ὕδωρ εἰσέρχεται· ὀρθῆς δὲ εἰς τὸ ὕδωρ βαφείσης τῆς κλεψύδρας, οὐ δυνάμενος πρὸς ὀρθὴν ὑποχωρεῖν διὰ τὸ πεφρᾶσθαι τὰ ἄνω, μένει περὶ τὰ πρῶτα

τρυπήματα· ἄπτεσθαι γὰρ εἰς αὐτὸν οὐ πέφυκεν. σημεῖον δ' ἐστὶ τοῦ εἶργειν δύνασθαι τὸ ὕδωρ ἀκινήτιζοντα τὸν ἀέρα τὸ ἐπ' αὐτῆς γινόμενον τῆς κλεψύδρας. ἐὰν γάρ τις αὐτῆς αὐτὴν τὴν κωδίαν ἐμπλήσας ὕδατος, ἐπιλαβὼν τὸν αὐλὸν, καταστρέψῃ ἐπὶ τὸν αὐλόν, οὐ φέρεται τὸ ὕδωρ διὰ τοῦ αὐλοῦ ἐπὶ στόμα. ἀνοιχθέντος δὲ τοῦ στόματος οὐκ εὐθὺς ἐκρεῖ κατὰ τὸν αὐλόν, ἀλλὰ μικροτέρῳ ὕστερον, ὥς οὐκ ὄν ἐπὶ τῷ στόματι τοῦ αὐλοῦ, ἀλλ' ὕστερον διὰ τούτου φερόμενον ἀνοιχθέντος. πλήρους τε καὶ ὀρθῆς οὐσης τῆς κλεψύδρας, ἀνοιχθέντος τοῦ αὐλοῦ εὐθὺς ρεῖ διὰ τοῦ ἡθμοῦ, διὰ τὸ ἐκεῖνου μὲν ἄπτεσθαι, τῶν δὲ ἄκρων τοῦ αὐλοῦ μὴ ἄπτεσθαι. οὐκ εἰσέρχεται μὲν οὖν τὸ ὕδωρ εἰς τὴν κλεψύδραν διὰ τὴν προειρημένην αἰτίαν, ἐξέρχεται δὲ ἀνοιχθέντος τοῦ αὐλοῦ διὰ τὸ τὸν ἐν αὐτῷ ἀέρα κινούμενον ἄνω καὶ κάτω πολλὴν κένωσιν ποιεῖν τοῦ ἐν τῇ κλεψύδρᾳ ὕδατος. ὠθούμενον δὲ κάτω καὶ αὐτὸ ρέπον εἰς αὐτὸ εἰκότως ἐκρεῖ, βιαζόμενον τὸν ἐκτὸς [915a] τῆς κλεψύδρας ἀέρα κινούμενόν τε καὶ ὄντα ἴσον τῇ δυνάμει τῷ ἐπωθοῦντι αὐτὸν ἀέρι, τῇ δὲ ἀντερείσει ἀσθενέστερον ἐκεῖνου διὰ τὸ διὰ στενοῦ αὐτὸν τοῦ αὐλοῦ ρέοντα θάττον καὶ σφοδρότερον ρεῖν, καὶ προσπίπτειν τῷ ὕδατι. τοῦ δὲ πωμασθέντος τοῦ αὐλοῦ μὴ συρρεῖν τὸ ὕδωρ αἴτιον, ὅτι τὸ ὕδωρ εἰσιὼν εἰς τὴν κλεψύδραν ἐξωθεῖ βίᾳ τὸν ἀέρα ἐξ αὐτῆς. σημεῖον δέ ἐστι τὸ γινόμενον ἐν ταύτῃ πνεῦμα καὶ ἐρυγμός. εἰσιόντος δὲ τοῦ ὕδατος, βίᾳ ὠθοῦν συνεισπίπτει εἰς τὸν αὐλὸν αὐτοῦ, καθάπερ τὰ ἐκπιεστὰ ξύλα ἢ χαλκὸς τῇ διαιρέσει πιεζούμενος, μένει ἄνευ παντὸς ἄλλου συνδέσμου ... ἐκκρουσθῇ ἐκ τοῦ ἐναντίου, καθάπερ τοὺς κατεαγότας ὀπιούρους ἐν τοῖς ξύλοις ἐκκρούουσιν. συμβαίνει δὲ τοῦτο ἀνοιχθέντος τοῦ αὐλοῦ γίνεσθαι διὰ τὰ προειρημένα. ἢ οὖν διὰ ταῦτα εἰκὸς ἐστὶν αὐτὸν μὴ ἐκρεῖν, ἢ ἐξιόντος βιαίου ἀέρος καὶ πνευματουμένου. δηλοῖ δὲ ὁ ψόφος ἐπισπᾶσθαι τῷ πνεύματι τὸ ὕδωρ ἄνω, ὥσπερ ἐπὶ πολλῶν συμβαίνει γίνεσθαι. ἐπισπώμενον δὲ καὶ συνεχῆς ὄν αὐτῷ πᾶν τὸ ὕδωρ μένει πιεζούμενον ὑπὸ τοῦ ἀέρος, ἕως ἂν ἀπωσθῇ πάλιν ὑπ' αὐτοῦ. τῆς δὲ ἀρχῆς μενούσης, καὶ τὸ ἄλλο ἐξ αὐτῆς κρέμαται ὕδωρ ἐν καὶ συνεχῆς. εὐλογον δὲ τοῦτο γίνεσθαι· τοῦ γὰρ αὐτοῦ ἐστὶ κινήσαι τε ἐκ τῆς οἰκείας χώρας τι, καὶ τοῦτο ἴσχειν, ὥς ἐκείνης, ἐν πλείονι δὲ χρόνῳ, ἐὰν ᾗ ὅμοια τῇ δυνάμει τό τε ἔχον καὶ τὸ ἐχόμενον, ἢ τὸ ἴσον κρεῖττον, ὅπερ ἐνταῦθα συμβαίνει· πνεῦμα γὰρ ὕδατος ἐστὶ κρεῖττον τῇ δυνάμει.

Διὰ τί τὰ μόρια τῶν φυτῶν καὶ τῶν ζώων, ὅσα μὴ ὀργανικά, πάντα περιφερῇ, τῶν μὲν φυτῶν τὸ στέλεχος καὶ οἱ πτόρθοι, τῶν δὲ ζώων κνήμαι, μηροί, βραχίονες, θώραξ· τρίγωνον δὲ οὐδὲ πολύγωνον οὔτε ὅλον οὔτε μόριόν ἐστιν; πότερον, ὥσπερ Ἀρχύτας ἔλεγε, διὰ τὸ ἐν τῇ κινήσει τῇ φυσικῇ ἐνεῖναι τὴν τοῦ ἴσου ἀναλογίαν (κινεῖσθαι γὰρ ἀνάλογον πάντα), ταύτην δὲ μόνην εἰς αὐτὴν ἀνακάμπτειν, ὥστε κύκλους ποιεῖν καὶ στρογγύλα, ὅταν ἐγγένηται;

Διὰ τί ἐν τοῖς ἐσχάτοις αἰεὶ γίνεται περιφερῇ; ἢ ὅτι ἡ φύσις ἐκ τῶν ἐνδεχομένων πάντα ποιεῖ ὡς δυνατόν ἄριστα καὶ κάλλιστα, τὸ δὲ σχῆμα τοῦτο κάλλιστον, τὸ αὐτὸ αὐτῷ ὁμοιότατον.

Διὰ τί, ἐὰν κύκλος ριφθῇ, τὸ μὲν πρῶτον εὐθεῖαν γράφει, παυόμενος δὲ ἔλικα, ἕως ἂν πέσῃ; ἢ εὐθεῖαν μὲν τὸ πρῶτον, ὅτι ὁμοίως ἔνθεν καὶ ἔνθεν ὁ ἀῆρ ἀπορθοῖ; ἴσης [915b] οὖν οὔσης τῆς ῥοπῆς ἔνθεν καὶ ἔνθεν, ἀνάγκη καὶ τὴν γραμμὴν τοιαύτην εἶναι, ἢ ἴσον διαιρεῖ τὸν τόπον ἔνθεν καὶ ἔνθεν· τοιαύτη δὲ ἐστὶν εὐθεῖα. ὅταν δὲ βρίσῃ ἐπὶ θάτερον μέρος δι' ἀνωμαλίαν τοῦ περισταμένου ἀέρος, οὐκέτι ἴσην γράφει τό τε ἐντὸς καὶ τὸ ἐκτὸς μέρος, ἀλλ' ἀνάγκη περιφερῇ.

Διὰ τί τοῖς ἄνισον τὸ βάθος ἔχουσι μεγέθεσιν, ἐὰν τις κουφότερον κινῇ τῶν μερῶν, κύκλῳ περιφέρεται τὸ βαλλόμενον, οἷον τοῖς μεμολιβδωμένοις ἀστραγάλοις συμβαίνει, ἐὰν τις βάλλῃ τὸ κουφότερον πρὸς αὐτὸν στρέψας μέρος; ἢ ὅτι τὸ βαρύτερον ἀδύνατον ἰσοδρομεῖν τῷ κουφοτέρῳ ἀπὸ τῆς αὐτῆς ἰσχύος ριφθέν; ἐπεὶ δὲ ἀνάγκη μὲν κινεῖσθαι, ἐξ ἴσου δὲ καὶ ἐπ' εὐθείας ἀδύνατον, ἀνάγκη εἰς τὸ ἐντὸς φερόμενον κύκλῳ φέρεσθαι· οἷον εἰ ὅλως τι ἦν αὐτοῦ ἀκίνητον διὰ βάρος ἐν μέσῳ, τὸ μὲν πρὸς τῷ ἀφιέντι εἰς τὸ πρόσθεν ἂν ἐκινήθῃ αὐτοῦ μέρος, τὸ δὲ ὑπ' ἐκεῖνα πρὸς τὸν ἀφιέντα. ἐπεὶ δὲ κινεῖται μὲν τὸ πᾶν, ἔχει δὲ ἐν μέσῳ τὸ βάρος φερόμενον, ἀνάγκη ταῦτο τοῦτο ποιεῖν.

Διὰ τί τὰ φερόμενα ὅταν ἀντιπέσῃ, ἀφάλλεται εἰς τὸ ὑναντίον ἢ πέφυκε φέρεσθαι, καὶ πρὸς ὁμοίας γωνίας; ἢ ὅτι οὐ μόνον ἐκείνην φέρεται τὴν φορὰν ἣν φέρεται κατὰ τὸ οἰκεῖον μέρος, ἀλλὰ καὶ τὴν ὑπὸ τοῦ ἀφιέντος γινομένην; ἢ μὲν οὖν οἰκεῖα παύεται, ὅταν εἰς τὸν οἰκεῖον ἔλθῃ τόπον (ἅπαν γὰρ ἡρεμεῖ ἐλθὼν εἰς ὃν φέρεται τόπον κατὰ φύσιν), καθ' ἣν δ' ἔχει ἀλλοτρίαν, ἀνάγκη ἔτι κινεῖσθαι, οὐκ εἰς τὸ πρόσθεν δὲ διὰ τὸ κωλύεσθαι, ἀλλ' ἢ εἰς τὸ πλάγιον ἢ εἰς τὸ ὀρθόν. ἅπαντα δὲ ἀποπηδᾷ πρὸς ὁμοίας γωνίας διὰ τὸ φέρεσθαι μὲν

ἐνταῦθα οὐ ἡ κίνησις φέρει, ἣν ἐποίησεν ὁ ἀφείς· ἐκεῖ δὲ πρὸς ὀξεῖαν ἢ πρὸς ὀρθὴν φέρεσθαι συμβαίνει. ἐπεὶ οὖν τὸ ἀντικροῦσαν κωλύει τὴν εἰς εὐθὺ κίνησιν, ὁμοίως κωλύει τὸ φερόμενον καὶ τὴν φορὰν αὐτοῦ. ὥσπερ οὖν ἐν τοῖς κατόπτροις τὸ ἄκρον τῆς εὐθείας οὐ ξυνέπεσεν ἢ ὅψις φαίνεται, καὶ ἐν τοῖς φερομένοις οὕτω τὸ ἐναντίον γίνεται· τοσαύτην γὰρ γωνίαν ἀπέωσται ὅση γίνεται ἢ κατὰ κορυφὴν. δεῖ γὰρ νοῆσαι μετακινουμένην τὴν γωνίαν καὶ τὴν φορὰν. τούτου δὲ γενομένου φανερόν ὅτι πρὸς ὁμοίας γωνίας ἀνάγκη ἀφάλλεσθαι.

ΙΖ. ΟΣΑ ΠΕΡΙ ΕΜΨΥΧΑ.

Διὰ τί οἱ ἀσύμμετροι παρ' ἀλλήλους θεωρούμενοι μείζους φαίνονται ἢ καθ' αὐτοὺς μόνους; ἢ ὅτι τὸ σύμμετρόν ἐστιν [916a] ἔν, καὶ ἡ συμμετρία ὅτι μάλιστα ἐν ποιεῖ, τὸ δὲ ἐν ἀδιαίρετον βούλεται εἶναι, τὸ δὲ ἀδιαίρετον ἑλαττόν ἐστιν, ἡ δὲ συμμετρία κατὰ τὴν διαφορὰν πολλὰ ποιεῖ. καθ' αὐτὰ μὲν οὖν θεωρούμενα μᾶλλον λανθάνει ποῖα ἅττα τὰ μεγέθη ἐστί, παρ' ἄλληλα δὲ οὐ. τὸ μὲν οὖν ἀδιαίρετον ἐν φαίνεται, καὶ ἡ θεωρία μία ἐστὶν αὐτοῦ διὰ τὴν συμμετρίαν· τὸ δὲ ἀσύμμετρον ὡς πολλὰ ὄν θεωρίαν ποιεῖ πλείω, καὶ μείζω φαίνεται τῷ ἐν ὃν πολλὰ φαίνεσθαι· ἔχει γὰρ τὴν τε τοῦ μεγέθους κατὰ τὴν συνέχειαν φύσιν, καὶ τὴν τοῦ ἀριθμοῦ κατὰ τὸ ἀνώμαλον τῶν μερῶν, διόπερ εἰκότως τὴν ἐξ ἀμφοῖν αὖξην ἔχον μείζον φαίνεται παρὰ τὸ ἀπλοῦν καὶ ἔν.

Διὰ τί ἐπὶ μῆκος μᾶλλον τὰ ζῶα καὶ τὰ φυτὰ φύεται; ἢ ὅτι τὸ μῆκος μὲν τρις αὖξεται, τὸ δὲ πλάτος δις, τὸ δὲ βάθος ἅπαξ; ἐστι γὰρ μῆκος τὸ ἀπὸ τῆς ἀρχῆς πρῶτον, ὥστε μόνον τε αὖξεται, καὶ ἅμα τῷ πλάτει πάλιν γινόμενον, καὶ τρίτον ἅμα τῷ βάθει. τὸ δὲ πλάτος δις, καθ' ἑαυτό τε καὶ ἅμα τῷ μεγέθει.

Πῶς τὸ πρότερον καὶ τὸ ὕστερον δεῖ λαβεῖν; πότερον ὥσπερ ἡμῶν οἱ ἐπὶ Τροίας καὶ ἐκείνων οἱ πρὸ αὐτῶν καὶ ἀεὶ οἱ ἐπάνω πρότεροί εἰσιν; ἢ εἴπερ ἀρχὴ τίς ἐστι καὶ μέσον καὶ τέλος τοῦ παντός, καὶ ὅταν γηράσκων τις ἐπὶ τὸ πέρας ἔλθῃ καὶ πάλιν ἐπαναστρέψῃ ἐπὶ τὴν ἀρχήν, τὰ δὲ ἐγγυτέρω τῆς ἀρχῆς πρότερα, τί κωλύει ἡμᾶς ἐν τῷ πρὸς τὴν ἀρχὴν εἶναι μᾶλλον; εἰ δὲ τοῦτο, κἂν πρότεροι εἴημεν. ὥσπερ ἐπὶ τοῦ οὐρανοῦ καὶ ἐκάστου τῶν ἄστρον φορᾷ κύκλος τίς ἐστι, τί κωλύει καὶ τὴν γένεσιν καὶ τὴν ἀπώλειαν τῶν φθαρτῶν τοιαύτην εἶναι, ὥστε πάλιν ταῦτα γίνεσθαι καὶ φθεῖρεσθαι; καθάπερ καὶ φασὶ κύκλον εἶναι τὰ ἀνθρώπινα. τὸ μὲν δὴ τῷ ἀριθμῷ τοὺς αὐτοὺς ἀξιοῦν εἶναι ἀεὶ τοὺς γινομένους εὐηθες, τὸ δὲ τῷ εἶδει μᾶλλον ἂν τις ἀποδέξαιτο· ὥστε κἂν αὐτοὶ πρότεροι εἴημεν, καὶ θείῃ ἂν τις τὴν τοῦ εἰρμού τάξιν τοιαύτην εἶναι ὡς πάλιν ἐπανακάμπτειν ἐπὶ τὴν ἀρχὴν καὶ συνεχῆς ποιεῖν καὶ ἀεὶ κατὰ ταῦτα ἔχειν. τοὺς γὰρ ἀνθρώπους φησὶν Ἀλκμαίων διὰ τοῦτο ἀπόλλυσθαι, ὅτι οὐ δύνανται τὴν ἀρχὴν τῷ τέλει προσάψαι, κομψῶς εἰρηκῶς, εἴ τις ὡς τύφω φράζοντος αὐτοῦ ἀποδέχοιτο καὶ μὴ διακριβοῦν ἐθέλοι τὸ λεχθέν. εἰ

δὴ κύκλος ἐστί, τοῦ δὲ κύκλου μήτε ἀρχὴ μήτε πέρας, οὐδ' ἂν
πρότεροι εἶεν τῷ ἐγγυτέρῳ τῆς ἀρχῆς εἶναι, οὔθ' ἡμεῖς ἐκείνων οὔτ'
ἐκεῖνοι ἡμῶν.

ΙΗ. ΟΣΑ ΠΕΡΙ ΦΙΛΟΛΟΓΙΑΝ.

[916b] Διὰ τί τοὺς μὲν, ἐὰν ἄρξωνται ἀναγινώσκειν, ὕπνος λαμβάνει καὶ μὴ βουλομένους, τοὺς δὲ βουλομένους προσεγρηγορέναι, ὅταν λάβωσι τὸ βιβλίον; ἢ ὅσοις μὲν εἰσι πνευματικαὶ κινήσεις διὰ ψυχρότητα φύσεως ἢ μελαγχολικῶν χυμῶν, δι' οὓς περίττωμα γίνεται πνευματικὸν ἄπεπτον διὰ ψυχρότητα, τούτοις ὅταν μὲν κινήται ἡ διάνοια καὶ μὴ νοήσῃ ἐπιστήσασά τι, ἐκκρούεται τῇ ἐτέρᾳ κινήσει οὕσῃ καταψυκτικῇ, διὸ μᾶλλον καθεύδουσιν. ὅταν δὲ ἐρείσωσι πρὸς τι ἐν τῇ διανοίᾳ, ὅπερ ἡ ἀνάγνωσις ποιεῖ, κινεῖνται ὑπὸ τῆς θερμαντικῆς κινήσεως οὐκ ἐκκρουομένης ὑπ' οὐδενός, ὥστε οὐ δύνανται καθεύδειν. τῶν δὲ κατὰ φύσιν ἐχόντων ὅταν στῇ πρὸς ἐν ἡ διάνοια καὶ μὴ μεταβάλλῃ πολλαχῇ ἰσχυροτάτῃ οὕσα, ἴσχεται καὶ τὰ ἄλλα ὅσα ἐστὶ περὶ τὸν τόπον τοῦτον, ὧν ἡρέμησις ὁ ὕπνος ἐστίν. ὅταν δὲ στῇ καὶ οἶον κοπιάσῃ ὁ νοῦς, βαρύνει τὴν κεφαλὴν ὧν ἐν αὐτῇ καὶ ποιεῖ τὸν ὕπνον. κινουμένης δὲ τῆς ψυχῆς κατὰ φύσιν οὐ καθεύδει· ζῇ γὰρ τότε μάλιστα. τὸ δ' ἐγρηγορέναι τοῦ ζῆν αἰτίον ἐστὶν ἢ τὸ καθεύδειν.

Διὰ τί οἱ ἐριστικοὶ λόγοι γυμναστικοὶ εἰσιν; ἢ ὅτι ἔχουσι τὸ νικᾶν ἢ ἡττᾶσθαι πυκνόν. φιλονεῖκους οὖν εὐθὺς ποιοῦσιν· καὶ γὰρ νικῶντες διὰ τὸ χαίρειν προάγονται μᾶλλον ἐρίζειν καὶ ἡττώμενοι ὡς ἀναμαχοῦμενοι. καὶ οἱ ἐν τοῖς ἄλλοις ἀγῶσι ταυτό· διὸ καὶ μαχόμενοι καὶ ἡττους ὄντες πολλάκις οὐ βούλονται διαλύεσθαι.

Διὰ τί τοῖς παραδείγμασι χαίρουσιν ἄνθρωποι ἐν ταῖς ῥητορείαις καὶ τοῖς λόγοις μᾶλλον τῶν ἐνθυμημάτων; ἢ ὅτι τῷ τε μανθάνειν χαίρουσι καὶ τῷ ταχύ, ῥᾶον δὲ διὰ τῶν παραδειγμάτων καὶ τῶν λόγων μανθάνουσιν· ἃ γὰρ ἴσασι, ἔστι ταῦτα καὶ ἐπὶ μέρους, τὰ δὲ ἐνθυμήματα ἀπόδειξις ἐστὶν ἐκ τῶν καθόλου, ἃ ἥττον ἴσμεν ἢ τὰ μέρη. ἔτι οἷς ἂν μαρτυρῶσι πλείους, μᾶλλον πιστεύομεν, τὰ δὲ παραδείγματα καὶ οἱ λόγοι μαρτυρίαις εἰκόασιν· αἱ δὲ διὰ τῶν μαρτύρων ῥάδιοι πίστεις. ἔτι τὸ ὅμοιον μανθάνουσιν ἡδέως, τὸ δὲ παράδειγμα καὶ οἱ μῦθοι τὸ ὅμοιον δεικνύουσιν.

Διὰ τί ῥήτορα μὲν καὶ στρατηγὸν καὶ χρηματιστὴν λέγομεν δεινόν, αὐλητὴν δὲ καὶ ὑποκριτὴν οὐ λέγομεν; ἢ ὅτι τῶν μὲν ἡ δύναμις ἄνευ πλεονεξίας (ἡδονῆς γὰρ στοχαστικὴ ἐστὶ), τῶν δὲ πρὸς τὸ πλεονεκτεῖν· ῥήτωρ γὰρ καὶ στρατηγὸς [917a] καὶ χρηματιστής

ἀγαθός ἐστιν ὁ δυνάμενος πλεόν ἔχειν, ἡ δὲ δεινότης μάλιστα ἐν τῷ πλεονεκτεῖν ἐστίν.

Διὰ τί τὸν φιλόσοφον τοῦ ῥήτορος οἴονται διαφέρειν; ἢ ὅτι ὁ μὲν τί ἐστιν ἀδικία, ὁ δὲ ὡς ἄδικος ὁ δεῖνα, καὶ ὁ μὲν ὅτι τύραννος, ὁ δὲ οἷον ἡ τυραννίς.

Διὰ τί, ἅπερ ἂν τίνες προέλωνται, ἐνδιατρίβουσι τούτοις ἐνίστε φαύλοις οὔσι μᾶλλον ἢ ἐν τοῖς σπουδαιοτέροις, οἷον θαυματοποιὸς ἢ μῆμος ἢ συρικτῆς μᾶλλον ἢ ἀστρονόμος ἢ ῥήτωρ εἶναι ἂν βούλοιοτο ὁ ταῦτα προελόμενος. ἢ ὅτι βούλονται μὲν ἐνιοὶ τὰ σπουδαιότατα μεταχειρίζεσθαι, διὰ δὲ τὸ μὴ πιστεύειν ἑαυτοῖς ὡς δυνησομένοις, διὰ τοῦτο οὐ πράττουσιν; ἢ ὅτι ἐν οἷς οἶεται ἕκαστος κρατιστεύειν, ταῦτα προαιρεῖται· ὁ δὲ αἰρεῖται, καὶ ἐπὶ τοῦτ' ἐπείξεται, νέμων τὸ πλεῖστον ἡμέρας αὐτῷ μέρος, ἵνα αὐτὸς αὐτοῦ τυγχάνει κράτιστος ὢν. ὅ τι δὲ ἂν τινες ἐξ ἀρχῆς προέλωνται καὶ οἷς ἂν συνεθισθῶσιν, οὐδὲ κρίνειν ἔτι δύνανται τὰ βελτίω· διέφθαρται γὰρ ἡ διάνοια διὰ φαύλας προαιρέσεις.

Διὰ τί τοὺς μὲν, ἂν ἄρξωνται ἀναγινώσκειν, ὕπνος λαμβάνει καὶ μὴ βουλομένους, τοὺς δὲ οὐ βουλομένους ποιεῖ δύνασθαι, ὅταν λάβωσι βιβλίον; ἢ ὅσοις μὲν εἰσι πνευματικαὶ κινήσεις διὰ ψυχρότητα φύσεως ἢ μελαγχολικῶν χυμῶν, δι' οὓς περίττωμα γίνεται πνευματικὸν ἄπεπτον διὰ ψυχρότητα, τούτοις ὅταν μὲν κινῆται ἡ διάνοια καὶ μὴ νοῇ ἐπιστήσασά τι, ἐκκρούεται ἡ ἐτέρα κίνησις, διὸ μᾶλλον μεταβάλλοντες πολλὴν τὴν διάνοιαν καθεύδουσιν· ἡττάται γὰρ ἡ πνευματική. ὅταν δὲ ἐρείσωσι πρὸς τι τὴν διάνοιαν, ὅπερ ἡ ἀνάγνωσις ποιεῖ, κινοῦνται ὑπὸ τῆς πνευματικῆς κινήσεως, οὐκ ἐκκρουομένης ὑπ' οὐδενός, ὥστε οὐ δύνανται καθεύδειν. τῶν δὲ κατὰ φύσιν ἐχόντων ὅταν στῇ πρὸς ἓν ἡ διάνοια καὶ μὴ μεταβάλλῃ πολλαχῇ, ἴσταται καὶ τὰ ἄλλα ὅσα περὶ τὸν τόπον, ὧν ἡρέμησις ὁ ὕπνος ἐστίν. ἐνὸς γὰρ κυρίου στάντος, ὥσπερ ἐν τροπῇ, καὶ τὰ ἄλλα μόρια ἴστασθαι πέφυκεν. φύσει γὰρ ἄνω τὸ κοῦφον φέρεται, τὸ δὲ βαρὺ κάτω. ὅταν οὖν ἡ ψυχὴ κινῆται κατὰ φύσιν, οὐ καθεύδει· οὕτω γὰρ ἔχει. ὅταν δὲ στῇ καὶ οἷον κοπιάσῃ, ὁ μὲν νοῦς μεταβάλλει, καὶ ἄνω τὰ σωματώδη πρὸς τὴν κεφαλὴν ἰόντα ποιεῖ τὸν ὕπνον. δόξειε δ' ἂν ἡ ἀνάγνωσις κωλύειν καθεύδειν. ἔστι δὲ οὐ διὰ τὸ νοεῖν (ὥρισται γὰρ τότε μᾶλλον ἡ ψυχὴ) ἀλλὰ διὰ τὸ μεταβάλλειν ἡ ἀγρυπνία, ἐπεὶ καὶ νοήσεις αἱ τοιαῦται [917b] ἀγρυπνοὶ εἰσιν, ἐν αἷς ζητεῖ ἡ ψυχὴ καὶ ἀπορεῖ, ἀλλ' οὐκ ἐν αἷς ἀεὶ θεωρεῖ· ἐκεῖνα μὲν γὰρ ἀοριστεῖν

ποιοῦσιν, αὐται δὲ οὐ.

Διὰ τί ἐν τοῖς ἐριστικοῖς οὐκ ἔνεστιν ἀδολεσχία; ἢ ὅτι συλλογισμός ἐστι φαινόμενος, ἐν ὀλίγοις δὲ ὁ συλλογισμός· καὶ ἐὰν μηκύνῃ, χρόνου γινομένου ὁ παραλογισμὸς δῆλος, καὶ ἔστιν ὃ ἔδωκεν ἀναλαβεῖν.

Διὰ τί ποτε τῶν ἱστοριῶν ἥδιον ἀκούομεν τῶν περὶ ἐν συνεστηκυῶν ἢ τῶν περὶ πολλὰ πραγματευομένων; ἢ διότι τοῖς γνωριμωτέροις μᾶλλον προσέχομεν καὶ ἥδιον αὐτῶν ἀκούομεν· γνωριμώτερον δὲ ἐστὶ τὸ ὠρισμένον τοῦ ἀορίστου. τὸ μὲν οὖν ἐν ὥρισται, τὰ δὲ πολλὰ τοῦ ἀπείρου μετέχει.

Διὰ τί ἡδόμεθα ἀκούοντες τὰ μήτε λίαν παλαιὰ μήτε κομιδῇ νέα; ἢ διότι τοῖς μὲν πόρρω ἀφ' ἡμῶν ἀπιστοῦμεν, ἐφ' οἷς δὲ ἀπιστοῦμεν, οὐχ ἡδόμεθα· τὰ δὲ ὥσπερ ἔτι αἰσθανόμεθα, καὶ περὶ τούτων ἀκούοντες οὐχ ἡδόμεθα.

ΙΘ. ΟΣΑ ΠΕΡΙ ΑΡΜΟΝΙΑΝ.

Διὰ τί οἱ πονοῦντες καὶ οἱ ἀπολαύοντες αὐλοῦνται; ἢ ἵνα οἱ μὲν ἤττον λυπῶνται, οἱ δὲ μᾶλλον χαίρωσιν.

Διὰ τί πορρωτέρω ὁ αὐτὸς τῇ αὐτῇ φωνῇ γεγωνεῖ μετ' ἄλλων ἄδων καὶ βοῶν ἢ μόνος; ἢ ὅτι τὸ ἀθρόως τι ποιεῖν ἢ θλίβειν ἢ ὠθεῖν οὐ τοσαυταπλάσιόν ἐστιν ὅσος ὁ ἀριθμός, ἀλλ' ὥσπερ ἡ γραμμὴ ἡ δίπους οὐ διπλάσιον ἀλλὰ τετραπλάσιόν τι γράφει, οὕτω τὰ συντιθέμενα πλέον ἰσχύει κατὰ τὸν ἀριθμὸν ἢ ὅταν ἡ διηρημένα. ἀθρόων οὖν ὄντων μία γίνεται ἡ τῆς φωνῆς ἰσχύς καὶ ἅμα ὠθεῖ τὸν ἀέρα, ὥστε πολλαπλάσιον προΐεναι· καὶ γὰρ ἡ ἐκ πάντων φωνῇ μιᾶς ἐκάστης πολλαπλάσιος.

Διὰ τί τὴν παρυπάτην ἄδοντες μάλιστα ἀπορρήγνυνται, οὐχ ἤττον ἢ τὴν νήτην καὶ τὰ ἄνω, μετὰ δὲ διαστάσεως πλείονος; ἢ ὅτι χαλεπώτατα ταύτην ἄδουσι, καὶ αὕτη ἀρχή; τὸ δὲ χαλεπὸν διὰ τὴν ἐπίτασιν καὶ πίεσιν τῆς φωνῆς· ἐν τούτοις δὲ πόνος· πονοῦντα δὲ μᾶλλον διαφθείρεται.

Διὰ τί δὲ ταύτην χαλεπῶς, τὴν δὲ ὑπάτην ῥαδίως; καίτοι διέσεις ἐκατέρας. ἢ ὅτι μετ' ἀνέσεως ἡ ὑπάτη, καὶ ἅμα μετὰ τὴν σύστασιν ἐλαφρόν τὸ ἄνω βάλλειν; διὰ ταῦτ' οὐκ ἔοικε καὶ τὰ πρὸς μίαν λεγόμενα πρὸς ταύτην ἢ παρανήτην. δεῖ γὰρ μετὰ συννοίας καὶ καταστάσεως οἰκειοτάτης [918a] τῷ ἡθελῆσαι πρὸς τὴν βούλησιν. τοῦ δὲ δὴ μετὰ συμφωνίας τίς ἡ αἰτία;

Διὰ τί ἡδίων ἀκούουσιν ἄδόντων ὅσα ἂν προεπιστάμενοι τυγχάνωσι τῶν μελῶν, ἢ ὧν μὴ ἐπίστανται; πότερον ὅτι μᾶλλον δηλὸς ὁ τυγχάνων ὥσπερ σκοποῦ, ὅταν γνωρίζωσι τὸ ἀδόμενον; τοῦτο δὲ ἡδὺ θεωρεῖν. ἢ ὅτι ἡδὺ τὸ μανθάνειν; τούτου δὲ αἴτιον ὅτι τὸ μὲν λαμβάνειν τὴν ἐπιστήμην, τὸ δὲ χρῆσθαι καὶ ἀναγνωρίζειν ἐστίν. ἔτι καὶ τὸ σύνηθες ἡδὺ μᾶλλον τοῦ ἀσυνήθους.

Διὰ τί ἡ παρακαταλογὴ ἐν ταῖς ᾠδαῖς τραγικόν; ἢ διὰ τὴν ἀνωμαλίαν; παθητικὸν γὰρ τὸ ἀνωμαλὲς καὶ ἐν μεγέθει τύχης ἢ λύπης. τὸ δὲ ὁμαλὲς ἔλαττον γοῶδες.

Διὰ τί οἱ ἀρχαῖοι ἑπταχόρδους ποιοῦντες ἀρμονίας τὴν ὑπάτην ἀλλ' οὐ τὴν νήτην κατέλιπον; πότερον τοῦτο ψεῦδος (ἀμφοτέρας γὰρ κατέλιπον, τὴν δὲ τρίτην ἐξήρουν) ἢ οὐ; ἀλλ' ὅτι ἡ βαρυτέρα ἰσχύει τὸν τῆς ὀξυτέρας φθόγγον, ὥστε μᾶλλον ἢ ὑπάτῃ ἀπεδίδου τὸ

ἀντίφωνον ἢ ἡ νήτη, ἐπεὶ τὸ ὀξύ δυνάμεως μᾶλλον, τὸ δὲ βαρὺ ῥᾶον φθέγγασθαι.

Διὰ τί ἡ βαρεῖα τὸν τῆς ὀξεΐας ἰσχύει φθόγγον; ἢ ὅτι μεῖζον τὸ βαρὺ; τῇ γὰρ ἀμβλείᾳ ἔοικε, τὸ δὲ τῇ ὀξείᾳ γωνία.

Διὰ τί ἥδιον τῆς μονωδίας ἀκούομεν, ἐὰν τις πρὸς αὐλὸν ἢ λύραν ᾄδῃ; καίτοι πρὸς χορδὰς καὶ τὸ αὐτὸ μέλος ἄδουσιν ἀμφοτέρως· εἰ γὰρ ἔτι μᾶλλον τὸ αὐτό, πλεον ἔδει πρὸς πολλοὺς αὐλητάς, καὶ ἔτι ἥδιον εἶναι. ἢ ὅτι τυγχάνων δηλὸς τοῦ σκοποῦ μᾶλλον, ὅταν πρὸς αὐτὸν ἢ λύραν; τὸ δὲ πρὸς πολλοὺς αὐλητάς ἢ λύρας πολλὰς οὐχ ἥδιον, ὅτι ἀφανίζει τὴν ᾠδὴν.

Διὰ τί, εἰ ἥδιον ἡ ἀνθρώπου φωνή, ἢ ἄνευ λόγου ἄδοντος οὐχ ἡδίων ἐστίν, οἷον τερετιζόντων, ἀλλ' αὐλὸς ἢ λύρα; ἢ οὐδ' ἐκεῖ, ἐὰν μὴ μιμῆται, ὁμοίως ἡδύ; οὐ μὴν ἀλλὰ καὶ διὰ τὸ ἔργον αὐτό. ἢ μὲν γὰρ φωνὴ ἡδίων ἢ τοῦ ἀνθρώπου, κρουστικά δὲ μᾶλλον τὰ ὄργανα τοῦ στόματος. διὸ ἥδιον ἀκούειν ἢ τερετίζειν.

Διὰ τί ἡ ἀπηχοῦσα ὀξύτερα; ἢ ὅτι ἔλαττον, ἀσθενεστέρα γινομένη;

Διὰ τί τῶν χορδῶν ἡ βαρυτέρα ἀεὶ τὸ μέλος λαμβάνει; ἂν γὰρ δέηται ἄσαι τὴν παραμέσσην σὺν ψιλῇ τῇ μέσῃ, γίνεται τὸ μέσον οὐθὲν ἦττον· ἐὰν δὲ τὴν μέσσην δέον ἄμφω, ψιλὰ οὐ γίνεται. ἢ ὅτι τὸ βαρὺ μέγα ἐστίν, ὥστε κρατερόν; [918b] καὶ ἔνεστιν ἐν τῷ μεγάλῳ τὸ μικρόν· καὶ τῇ διαλήψει δύο νῆται ἐν τῇ ὑπάτῃ γίνονται.

Διὰ τί ἐν τῇ διὰ πασῶν τοῦ μὲν ὀξέος ἀντίφωνον γίνεται τὸ βαρὺ, τούτου δὲ τὸ ὀξύ οὐ; ἢ ὅτι μάλιστα μὲν ἐν ἀμφοῖν ἐστὶ τὸ ἀμφοῖν μέλος, εἰ δὲ μὴ, ἐν τῷ βαρεῖ· μεῖζον γάρ.

Διὰ τί λανθάνει τὸ διὰ πασῶν, καὶ δοκεῖ ὁμόφωνον εἶναι, οἷον ἐν τῷ φοινικίῳ καὶ ἐν τῷ ἀνθρώπῳ; τὰ γὰρ ἐν τοῖς ὀξέσιν ὄντα οὐχ ὁμόφωνα, ἀλλ' ἀνάλογον ἀλλήλοις διὰ πασῶν. ἢ ὅτι ὥσπερ ὁ αὐτὸς εἶναι δοκεῖ φθόγγος, διὰ τὸ ἀνάλογον ἰσότης ἐπὶ φθόγγων; τὸ δὲ ἴσον τοῦ ἐνός. ταῦτ' οὖν καὶ ἐν ταῖς σύριγγιν ἐξαπατῶνται.

Διὰ τί οἱ μὲν νόμοι οὐκ ἐν ἀντιστροφῇ ἐποιοῦντο, αἱ δὲ ἄλλαι ᾠδαὶ αἱ χορικά; ἢ ὅτι οἱ μὲν νόμοι ἀγωνιστῶν ἦσαν, ὧν ἡδὴ μιμεῖσθαι δυναμένων καὶ διατείνεσθαι ἢ ᾠδὴ ἐγίνετο μακρὰ καὶ πολυειδής; καθάπερ οὖν καὶ τὰ ῥήματα, καὶ τὰ μέλη τῇ μιμήσει ἠκολούθει ἀεὶ ἕτερα γινόμενα. μᾶλλον γὰρ τῷ μέλει ἀνάγκη μιμεῖσθαι ἢ τοῖς ῥήμασιν. διὸ καὶ οἱ διθύραμβοι, ἐπειδὴ μιμητικοὶ ἐγένοντο, οὐκέτι ἔχουσιν ἀντιστrophους, πρότερον δὲ εἶχον. αἴτιον δὲ

ὅτι τὸ παλαιὸν οἱ ἐλεύθεροι ἐχόρευον αὐτοί· πολλοὺς οὖν ἀγωνιστικῶς ᾄδεν χαλεπὸν ἦν, ὥστε ἐναρμόνια μέλη ἐνῆδον. μεταβάλλειν γὰρ πολλὰς μεταβολὰς τῷ ἐνὶ ῥαῶν ἢ τοῖς πολλοῖς, καὶ τῷ ἀγωνιστῇ ἢ τοῖς τὸ ἦθος φυλάττουσιν. διὸ ἀπλούτερα ἐποίουν αὐτοῖς τὰ μέλη. ἡ δὲ ἀντίστροφος ἀπλοῦν· ἀριθμὸς γὰρ ἐστὶ καὶ ἐνὶ μετρεῖται. τὸ δ' αὐτὸ αἴτιον καὶ διότι τὰ μὲν ἀπὸ τῆς σκηνῆς οὐκ ἀντίστροφα, τὰ δὲ τοῦ χοροῦ ἀντίστροφα· ὁ μὲν γὰρ ὑποκριτὴς ἀγωνιστὴς καὶ μιμητής, ὁ δὲ χορὸς ἦττον μιμεῖται.

Διὰ τί ἥδιον τὸ ἀντίφωνον τοῦ συμφώνου; ἢ ὅτι μᾶλλον διάδηλον γίνεται τὸ συμφωνεῖν ἢ ὅταν πρὸς τὴν συμφωνίαν ᾄδῃ; ἀνάγκη γὰρ τὴν ἐτέραν ὁμοφωνεῖν, ὥστε δύο πρὸς μίαν φωνὴν γινόμεναι ἀφανίζουσι τὴν ἐτέραν.

Διὰ τί πέντε οὐκ ᾄδουσιν ἀντίφωνα; ἢ ὅτι οὐχ ἡ αὐτὴ ἡ σύμφωνος τῇ συμφωνίᾳ, ὥσπερ ἐν τῷ διὰ πασῶν; ἐκείνη γὰρ ἐν τῷ βαρεῖ ἀνάλογον, ὡς ἡ ὀξεῖα ἐν τῷ ὀξεῖ. ὥσπερ οὖν ἡ αὐτὴ ἐστὶν ἅμα καὶ ἄλλη. αἱ δὲ ἐν τῷ διὰ πέντε καὶ διὰ τεττάρων οὐκ ἔχουσιν οὕτως, ὥστε οὐκ ἐμφαίνεται ὁ τῆς ἀντιφώνου φθόγγος· οὐ γὰρ ἐστὶν ὁ αὐτός.

Διὰ τί ἡ διὰ πασῶν συμφωνία ᾄδεται μόνῃ; μαγαδίζουσι [919a] γὰρ ταύτην, ἄλλην δὲ οὐδεμίαν. ἢ ὅτι μόνῃ ἐξ ἀντιφώνων ἐστὶ χορδῶν, ἐν δὲ τοῖς ἀντιφώνοις καὶ τὴν ἐτέραν ἐὰν ᾄδῃ, τὸ αὐτὸ ποιεῖ; ἢ γὰρ μία τρόπον τινὰ τὰς ἀμφοτέρων ἔχει φωνάς, ὥστε καὶ μιᾶς ἄδομένης ἐν ταύτῃ τῇ συμφωνίᾳ ᾄδεται ἡ συμφωνία, καὶ ἄμφω ᾄδοντες· ἢ τῆς μὲν ἄδομένης τῆς δὲ αὐλουμένης ὥσπερ μίαν ἄμφω ᾄδουσιν. διὸ μόνῃ μελωδεῖται, ὅτι μιᾶς ἔχει χορδῆς φωνὴν τὰ ἀντίφωνα.

Διὰ τί δὲ ταῖς ἀντιφώνοις τοῦτο μόναις ὑπάρχει; ἢ ὅτι μόναι ἴσον ἀπέχουσι τῆς μέσης; ἢ οὖν μεσότης ὁμοιότητά τινα ποιεῖ τῶν φθόγγων, καὶ ἔοικεν ἡ ἀκοὴ λέγειν ὅτι ἡ αὐτὴ καὶ ὅτι ἀμφοτέραι ἔσχαται.

Διὰ τί, ἐὰν μὲν τις τὴν μέσῃν κινήσῃ ἡμῶν, ἀρμόσας τὰς ἄλλας χορδάς, καὶ χρῆται τῷ ὀργάνῳ, οὐ μόνον ὅταν κατὰ τὸν τῆς μέσης γένηται φθόγγον, λυπεῖ καὶ φαίνεται ἀνάρμοστον, ἀλλὰ καὶ κατὰ τὴν ἄλλην μελωδίαν· ἐὰν δὲ τὴν λιχανὸν ἢ τινα ἄλλον φθόγγον, τότε φαίνεται διαφέρειν μόνον, ὅταν κἀκείνη τις χρῆται; ἢ εὐλόγως τοῦτο συμβαίνει; πάντα γὰρ τὰ χρηστὰ μέλη πολλάκις τῇ μέσῃ χρῆται, καὶ πάντες οἱ ἀγαθοὶ ποιηταὶ πυκνὰ πρὸς τὴν μέσῃν ἀπαντῶσι, καὶ

ἀπέλθωσι, ταχὺ ἐπανέρχονται, πρὸς δὲ ἄλλην οὕτως οὐδεμίαν. καθάπερ ἐκ τῶν λόγων ἐνίων ἐξαιρεθέντων συνδέσμων οὐκ ἔστιν ὁ λόγος Ἑλληνικός, οἷον τὸ τέ καὶ τὸ καί, ἔνιοι δὲ οὐθὲν λυποῦσι διὰ τὸ τοῖς μὲν ἀναγκαῖον εἶναι χρῆσθαι πολλάκις, εἰ ἔστι λόγος, τοῖς δὲ μή, οὕτω καὶ τῶν φθόγγων ἢ μέση ὥσπερ σύνδεσμός ἐστι, καὶ μάλιστα τῶν καλῶν, διὰ τὸ πλειστάκις ἐνυπάρχειν τὸν φθόγγον αὐτῆς.

Διὰ τί τῶν ἁδόντων οἱ βαρύτερον ἄδοντες τῶν ὀξὺ ἁδόντων, ἐὰν ἀπάδωσι, μᾶλλον κατάδηλοι γίνονται; ὁμοίως δὲ καὶ τῷ ῥυθμῷ οἱ ἐν τῷ βαρυτέρῳ πλημμελοῦντες κατάδηλοι μᾶλλον. πότερον ὅτι πλείων ὁ χρόνος ὁ τοῦ βαρέος, οὗτος δὲ μᾶλλον αἰσθητός; ἢ ὅτι ἐν πλείονι χρόνῳ πλείω αἰσθησιν παρέχει, τὸ δὲ ταχὺ καὶ ὀξὺ λανθάνει διὰ τὸ τάχος.

Διὰ τί οἱ πολλοὶ μᾶλλον ἄδοντες τὸν ῥυθμὸν σώζουσιν ἢ οἱ ὀλίγοι; ἢ ὅτι μᾶλλον πρὸς ἓνα τε καὶ ἡγεμόνα βλέπουσι, καὶ βαρύτερον ἄρχονται, ὥστε ῥᾶον τοῦ αὐτοῦ τυγχάνουσιν; ἐν γὰρ τῷ τάχει ἡ ἁμαρτία πλείων.

[919b] Διὰ τί διπλασία ἡ νήτη τῆς ὑπάτης; ἢ πρῶτον μὲν ὅτι ἐκ τοῦ ἡμίσεος ἡ χορδὴ ψαλλομένη καὶ ὅλη συμφωνοῦσα διὰ πασῶν; ὁμοίως δὲ ἔχει καὶ ἐπὶ τῶν συρίγγων· ἡ γὰρ διὰ τοῦ μέσου τῆς σύριγγος τρήματος φωνὴ τῇ δι' ὅλης τῆς σύριγγος συμφωνεῖ διὰ πασῶν. ἔτι ἐν τοῖς ἄλλοις τῷ διπλασίῳ διαστήματι λαμβάνεται τὸ διὰ πασῶν, καὶ οἱ αὐλοτρῦπαι οὕτω λαμβάνουσιν. ὁμοίως δὲ καὶ τὸ διὰ πέντε τῷ ἡμιολίῳ, ὅτι οἱ τὰς σύριγγας ἀρμοττόμενοι εἰς μὲν τὴν ὑπάτην ἄκραν τὸν κηρὸν ἐμπλάττουσι, τὴν δὲ νήτην μέχρι τοῦ ἡμίσεος ἀναπληροῦσιν. ὁμοίως δὲ καὶ τὴν διὰ πέντε τῷ ἡμιολίῳ καὶ τὴν διὰ τεττάρων τῷ ἐπιτρίτῳ διαστήματι λαμβάνουσιν. ἔτι οἱ ἐν τοῖς τριγώνοις ψαλτηρίοις τῆς ἴσης ἐπιτάσεως γινομένης συμφωνοῦσι διὰ πασῶν, ἡ μὲν διπλασία οὖσα, ἡ δὲ ἡμίσεια τῷ μήκει.

Διὰ τί, ἐὰν τις ψήλας τὴν νήτην ἐπιλάβῃ, ἡ ὑπάτη μόνη δοκεῖ ἀντηχεῖν; ἢ ὅτι συμφυῆς μάλιστα γίνεται τῷ φθόγγῳ ὁ ἀπὸ ταύτης ἦχος διὰ τὸ σύμφωνος εἶναι; τῷ οὖν συναυξάνεσθαι τῷ ὁμοίῳ φαίνεται μόνος, οἱ δὲ ἄλλοι διὰ μικρότητα ἀφανεῖς.

Διὰ τί μέση καλεῖται ἐν ταῖς ἀρμονίαις, τῶν δὲ ὀκτὼ οὐκ ἔστι μέσον; ἢ ὅτι ἐπτάχορδοι ἦσαν αἱ ἀρμονίαι τὸ παλαιόν, τὰ δὲ ἐπτὰ ἔχει μέσον.

Διὰ τί ἐπὶ τὸ ὀξὺ ἀπάδουσιν οἱ πλεῖστοι; πότερον ὅτι ῥᾶον ὀξὺ

ἄσαι ἢ βαρὺ; ἢ ὅτι χειρόν τοῦ βαρέος; ἁμαρτία δέ ἐστι τοῦ χειρόνος πρᾶξις.

Διὰ τί τὸ ἀκουστὸν μόνον ἦθος ἔχει τῶν αἰσθητῶν; καὶ γὰρ ἐὰν ἦ ἄνευ λόγου μέλος, ὅμως ἔχει ἦθος· ἀλλ' οὐ τὸ χρῶμα οὐδὲ ἡ ὁσμὴ οὐδὲ ὁ χυμὸς ἔχει. ἢ ὅτι κίνησιν ἔχει μόνον οὐχί, ἣν ὁ ψόφος ἡμᾶς κινεῖ; τοιαύτη μὲν γὰρ καὶ τοῖς ἄλλοις ὑπάρχει· κινεῖ γὰρ καὶ τὸ χρῶμα τὴν ὄψιν· ἀλλὰ τῆς ἐπομένης τῷ τοιοῦτῳ ψόφῳ αἰσθανόμεθα κινήσεως. αὕτη δὲ ἔχει ὁμοιότητα ἐν τε τοῖς ῥυθμοῖς καὶ ἐν τῇ τῶν φθόγγων τάξει τῶν ὀξέων καὶ βαρέων, οὐκ ἐν τῇ μίξει. ἀλλ' ἡ συμφωνία οὐκ ἔχει ἦθος. ἐν δὲ τοῖς ἄλλοις αἰσθητοῖς τοῦτο οὐκ ἔστιν. αἱ δὲ κινήσεις αὗται πρακτικαὶ εἰσιν, αἱ δὲ πράξεις ἦθους σημασία ἐστίν.

Διὰ τί νόμοι καλοῦνται οὓς ἄδουσιν; ἢ ὅτι πρὶν ἐπίστασθαι γράμματα, ἦδον τοὺς νόμους, ὅπως μὴ ἐπιλάθωνται, [920a] ὥσπερ ἐν Ἀγαθύρσοις ἐτι εἰώθασιν; καὶ τῶν ὑστέρων οὖν ὠδῶν τὰς πρώτας τὸ αὐτὸ ἐκάλεσαν ὅπερ τὰς πρώτας.

Διὰ τί οἱ ῥυθμοὶ καὶ τὰ μέλη φωνῇ οὔσα ἡθεσιν ἔοικεν, οἱ δὲ χυμοὶ οὐ, ἀλλ' οὐδὲ τὰ χρώματα καὶ αἱ ὁσμαί; ἢ ὅτι κινήσεις εἰσιν ὥσπερ καὶ αἱ πράξεις; ἦδη δὲ ἡ μὲν ἐνέργεια ἠθικὸν καὶ ποιεῖ ἦθος, οἱ δὲ χυμοὶ καὶ τὰ χρώματα οὐ ποιοῦσιν ὁμοίως.

Διὰ τί οὐδὲ ὑποδωριστί οὐδὲ ὑποφρυγιστί οὐκ ἔστιν ἐν τραγωδίᾳ χορικόν; ἢ ὅτι οὐκ ἔχει ἀντίστροφον. ἀλλ' ἀπὸ σκηνῆς· μιμητικὴ γάρ.

Διὰ τί οἱ περὶ Φρύνιχον ἦσαν μᾶλλον μελοποιοί; ἢ διὰ τὸ πολλαπλάσια εἶναι τότε τὰ μέλη ἐν ταῖς τραγωδίαις τῶν μέτρων;

Διὰ τί διὰ πασῶν καλεῖται, ἀλλ' οὐ κατὰ τὸν ἀριθμὸν δι' ὀκτώ, ὥσπερ καὶ διὰ τεττάρων καὶ διὰ πέντε; ἢ ὅτι ἐπτὰ ἦσαν αἱ χορδαὶ τὸ ἀρχαῖον, εἴτ' ἐξελὼν τὴν τρίτην Τέρπανδρος τὴν νήτην προσέθηκε, καὶ ἐπὶ τούτου ἐκλήθη διὰ πασῶν ἀλλ' οὐ δι' ὀκτώ· δι' ἐπτὰ γὰρ ἦν.

Διὰ τί εὐαρμωστότερον ἀπὸ τοῦ ὀξέος ἐπὶ τὸ βαρὺ ἢ ἀπὸ τοῦ βαρέος ἐπὶ τὸ ὀξύ; πότερον ὅτι τὸ ἀπὸ τῆς ἀρχῆς γίνεται ἄρχεσθαι; ἢ γὰρ μέση καὶ ἡγεμὼν ὀξυτάτη τοῦ τετραχόρδου. τὸ δὲ οὐκ ἀπ' ἀρχῆς ἀλλ' ἀπὸ τελευτῆς. ἢ ὅτι τὸ βαρὺ ἀπὸ τοῦ ὀξέος γενναιότερον καὶ εὐφωνότερον;

Διὰ τί δις μὲν δι' ὀξειῶν καὶ δις διὰ τεττάρων οὐ συμφωνεῖ, δις διὰ πασῶν δέ; ἢ ὅτι ἡ δις δι' ὀξειῶν οὐ δις διὰ τεττάρων ἐστίν, τὸ δὲ διὰ τεττάρων καὶ διὰ πέντε.

Διὰ τί ἡ διὰ πασῶν καλλίστη συμφωνία; ἢ ὅτι ἐν ὅλοις ὄροις οἱ ταύτης λόγοι εἰσίν, οἱ δὲ τῶν ἄλλων οὐκ ἐν ὅλοις; ἐπεὶ γὰρ διπλασία ἡ νήτη τῆς ὑπάτης, οἷα ἡ νήτη δύο, ἡ ὑπάτη ἓν, καὶ οἷα ἡ ὑπάτη δύο, ἡ νήτη τέσσαρα, καὶ ἀεὶ οὕτως. τῆς δὲ μέσης ἡμιόλια. τὸ γὰρ διὰ πέντε ἡμιόλιον οὐκ ἐν ὅλοις ἀριθμοῖς ἐστίν· οἷον γὰρ ἐν τὸ ἔλαττον, τὸ μείζον τοσοῦτον δὲ καὶ ἔτι τὸ ἥμισυ. ὥστε οὐχ ὅλα πρὸς ὅλα συγκρίνεται, ἀλλ' ἔπεστι μέρη. ὁμοίως δὲ καὶ ἐν τῷ διὰ τεττάρων ἔχει· τὸ γὰρ ἐπίτριτόν ἐστιν ὅσον τεμεῖν ὃ καὶ ἔτι ἐν τῶν τεττάρων ἐπίτριτόν ἐστιν. ἢ ὅτι τελεωτάτη ἐξ ἀμφοτέρων οὖσα, καὶ ὅτι μέτρον τῆς μελωδίας διὰ παντὸς τοῦ φερομένου ἢ κατὰ μέσον κίνησις σφοδροτάτη, [920b] ἀρχομένου δὲ καὶ λήγοντος μαλακωτέρα; ὅτε δὲ σφοδροτάτη ἡ κίνησις, καὶ ἡ φωνὴ ὀξύτερα τοῦ φερομένου. διὸ καὶ χορδαὶ ἐπιτεινόμεναι ὀξύτερον φθέγγονται· θάπτον γὰρ ἡ κίνησις γίνεται. ἢ δὲ φωνὴ ἢ ἀέρος ἢ ἄλλου τινὸς φορὰ· τὴν ἀνὰ μέσον τὸν πόρον ὀξυτάτην δεῖ γίνεσθαι. ὥστε εἰ τοῦτο μὴ συμβαίνει, οὐκ ἂν εἴη φορὰ τινος. Διὰ τί, ἐὰν μὲν ἡ μέση κινηθῇ, καὶ αἱ ἄλλαι χορδαὶ ἠχοῦσι φθεγγόμεναι, ἐὰν δὲ αὐτὴ μὲν μένη τῶν δ' ἄλλων τις κινηθῇ, κινηθεῖσα μόνη φθέγγεται; ἢ ὅτι τὸ ἡρμόσθαι ἐστὶν ἀπάσαις, τὸ δὲ ἔχειν πῶς πρὸς τὴν μέσην ἀπάσαις, καὶ ἡ τάξις ἡ ἐκάστης ἤδη δι' ἐκείνην; ἀρθέντος οὖν τοῦ αἰτίου τοῦ ἡρμόσθαι καὶ τοῦ συνέχοντος οὐκέτι ὁμοίως φαίνεται ὑπάρχειν. μιᾶς δὲ ἀναρμόστου οὔσης, τῆς δὲ μέσης μενούσης, εὐλόγως τὸ κατ' αὐτὴν ἐκλείπόμενον· ταῖς γὰρ ἄλλαις ὑπάρχει τὸ ἡρμόσθαι.

Διὰ τί τοῦ ἐν φωνῇ ὀξέος ὄντος κατὰ τὸ ὀλίγον, τοῦ δὲ βαρέος κατὰ τὸ πολὺ (τὸ μὲν γὰρ βαρὺ διὰ τὸ πλῆθος βαρὺ, τὸ δὲ ὀξὺ δι' ὀλιγότητα ταχὺ), ἔργον μᾶλλον ἄδειν τὰ ὀξέα ἢ τὰ βαρέα, καὶ ὀλίγοι τὰ ἄνω δύνανται ἄδειν, καὶ οἱ νόμοι ὀρθιοὶ καὶ οἱ ὀξεῖς χαλεποὶ ἄσαι διὰ τὸ ἀνατεταμένοι εἶναι; καίτοι ἔλαττον ἔργον τὸ ὀλίγον κινεῖν ἢ τὸ πολὺ, ὥστε καὶ ἀέρα. ἢ οὐ ταυτό γε ὀξύφωνον εἶναι φύσει καὶ τὸ ὀξὺ ἄδειν, ἀλλὰ φύσει μὲν ὀξύφωνα ἅπαντα δι' ἀσθένειαν, τῷ μὴ δύνασθαι πολλὴν κινεῖν ἀέρα ἀλλ' ὀλίγον, ὃ δ' ὀλίγος ταχὺ φέρεται, ἐν δὲ τῷ ἄδειν τὸ ὀξὺ δυνάμεως σημεῖον. τὸ μὲν γὰρ σφοδρῶς φερόμενον ταχὺ φέρεται, διὸ τὸ ὀξὺ δυνάμεως σημεῖον. διὸ καὶ οἱ ἐκτικοὶ ὀξύφωνοι. καὶ ἔργον τὰ ἄνω ἄδειν· τὰ δὲ βαρέα κάτω.

Διὰ τί ρυθμῷ καὶ μέλει καὶ ὅλως ταῖς συμφωνίαις χαίρουσι πάντες; ἢ ὅτι ταῖς κατὰ φύσιν κινήσεσι χαίρομεν κατὰ φύσιν; σημεῖον δὲ τὸ τὰ παιδία εὐθύς γενόμενα χαίρειν αὐτοῖς. διὰ δὲ τὸ

ἔθος τρόποις μελῶν χαίρομεν. ῥυθμῷ δὲ χαίρομεν διὰ τὸ γνῶριμον καὶ τεταγμένον ἀριθμὸν ἔχειν, καὶ κινεῖν ἡμᾶς τεταγμένως· οἰκειότερα γὰρ ἢ τεταγμένη κίνησις φύσει τῆς ἀτάκτου, ὥστε καὶ κατὰ φύσιν μᾶλλον. σημεῖον δέ· πονοῦντες γὰρ καὶ πίνοντες καὶ ἐσθίωντες τεταγμένα σῶζομεν καὶ αὖξομεν τὴν φύσιν καὶ τὴν δύναμιν, ἄτακτα δὲ φθείρομεν καὶ ἐξίσταμεν αὐτήν· [921a] αἱ γὰρ νόσοι τῆς τοῦ σώματος οὐ κατὰ φύσιν τάξεως κινήσεις εἰσίν. συμφωνία δὲ χαίρομεν, ὅτι κρᾶσίς ἐστι λόγον ἐχόντων ἐναντίων πρὸς ἄλληλα. ὁ μὲν οὖν λόγος τάξις, ὃ ἦν φύσει ἡδύ. τὸ δὲ κεκραμένον τοῦ ἀκράτου πᾶν ἡδιον, ἄλλως τε κἂν αἰσθητὸν ὃν ἀμφοῖν τοῖν ἄκροισι ἐξ ἴσου τὴν δύναμιν ἔχοι ἐν τῇ συμφωνίᾳ ὁ λόγος.

Διὰ τί ἡδίων ἐστι τὸ σύμφωνον τοῦ ὁμοφώνου; ἢ καὶ τὸ μὲν ἀντίφωνον σύμφωνόν ἐστι διὰ πασῶν; ἐκ παίδων γὰρ νέων καὶ ἀνδρῶν γίνεται τὸ ἀντίφωνον, οἱ διεστᾶσι τοῖς τόνοις ὥς νήτη πρὸς ὑπάτην. συμφωνία δὲ πᾶσα ἡδίων ἀπλοῦ φθόγγου (δι' ἧς δέ, εἴρηται), καὶ τούτων ἢ διὰ πασῶν ἡδίστη· τὸ ὁμόφωνον δὲ ἀπλοῦν ἔχει φθόγγον. μαγαδίζουσι δὲ ἐν τῇ διὰ πασῶν συμφωνίᾳ, ὅτι καθάπερ ἐν τοῖς μέτροις οἱ πόδες ἔχουσι πρὸς αὐτοὺς λόγον ἴσον πρὸς ἴσον ἢ δύο πρὸς ἓν ἢ καὶ τινα ἄλλον, οὕτω καὶ οἱ ἐν τῇ συμφωνίᾳ φθόγγοι λόγον ἔχουσι κινήσεως πρὸς αὐτούς. τῶν μὲν οὖν ἄλλων συμφωνιῶν ἀτελεῖς αἱ θατέρου καταστροφαὶ εἰσιν, εἰς ἥμισυ τελευτῶσαι· διὸ τῇ δυνάμει οὐκ ἴσαι εἰσίν. οὕσαι δὲ ἄνισοι, διαφορὰ τῇ αἰσθήσει, καθάπερ ἐν τοῖς χοροῖς, ἐν τῷ καταλύειν μεῖζον ἄλλων φθεγγομένοις ἐστίν. ἔτι δὲ ὑπάτη συμβαίνει τὴν αὐτὴν τελευτὴν τῶν ἐν τοῖς φθόγγοις περιόδων ἔχειν. ἢ γὰρ δευτέρα τῆς νεάτης πληγὴ τοῦ ἀέρος ὑπάτη ἐστίν. τελευτώσας δ' εἰς ταὐτόν, οὐ ταὐτὸν ποιούσας, ἐν καὶ κοινὸν τὸ ἔργον συμβαίνει γίνεσθαι, καθάπερ τοῖς ὑπὸ τὴν ψῆδην κρούουσιν· καὶ γὰρ οὗτοι τὰ ἄλλα οὐ προσαυλοῦντες, ἐὰν εἰς ταὐτόν καταστρέφωσιν, εὐφραίνουσι μᾶλλον τῷ τέλει ἢ λυποῦσι ταῖς πρὸ τοῦ τέλους διαφοραῖς, τῷ τὸ ἐκ διαφόρων τὸ κοινόν, ἡδιστον ἐκ τοῦ διὰ πασῶν γίνεσθαι. τὸ δὲ μαγαδίζειν ἐξ ἐναντίων φωνῶν. διὰ ταῦτα ἐν τῇ διὰ πασῶν μαγαδίζουσιν.

Διὰ τί ἡδιον ἀκούουσιν ᾄδόντων ὅσα ἂν προεπιστάμενοι τύχῳσι τῶν μελῶν, ἢ ἐὰν μὴ ἐπιστῶνται; πότερον ὅτι μᾶλλον δηλός ἐστιν ὁ τυγχάνων ὥσπερ σκοποῦ, ὅταν γνωρίζωσι τὸ ᾄδόμενον; γνωρίζοντων δὲ ἡδὺ θεωρεῖν. ἢ ὅτι συμπαθὴς ἐστιν ὁ ἀκροατῆς τῷ τὸ γνῶριμον ᾄδοντι; συνάδει γὰρ αὐτῷ. ᾄδει δὲ πᾶς γεγηθὼς ὁ μὴ διὰ

τινα ἀνάγκην ποιῶν τοῦτο.

[921b] Διὰ τί δις μὲν δι' ὀξειῶν ἢ δις διὰ τεττάρων οὐ συμφωνεῖ, δις διὰ πασῶν δέ; ἢ ὅτι τὸ μὲν διὰ πέντε ἐστὶν ἐν ἡμιολίῳ λόγῳ, τὸ δὲ διὰ τεττάρων ἐν ἐπιτρίτῳ; ὄντων δὲ ἡμιολίων τριῶν ἐξῆς ἀριθμῶν ἢ ἐπιτρίτων, οἱ ἄκροι πρὸς ἀλλήλους οὐδένα λόγον ἔξουσιν· οὔτε γὰρ ἐπιμόριοι οὔτε πολλαπλάσιοι ἔσονται. τὸ δὲ διὰ πασῶν ἐπειδὴ ἐστὶν ἐν διπλασίῳ λόγῳ, δις τούτου γινομένου ἐν τετραπλασίῳ λόγῳ ἂν εἶεν οἱ ἄκροι πρὸς ἀλλήλους. ὥστ' ἐπεὶ συμφωνία εὐλογον ἐχόντων φθόγγον πρὸς ἀλλήλους ἐστί, λόγον δὲ οἱ μὲν τὸ δις διὰ πασῶν διάλειμμα ἔχοντες πρὸς ἀλλήλους φθόγγοι ἔχουσιν, οἱ δὲ τὸ δις διὰ τεττάρων ἢ δις διὰ πέντε οὐκ ἔχουσιν, οἱ μὲν δις διὰ πασῶν σύμφωνοι εἶεν ἂν, οἱ δ' ἕτεροι οὐ, διὰ τὰ εἰρημένα.

Διὰ τί, ἐάν τις ψήλας τὴν νήτην ἐπιλάβῃ, ἡ ὑπάτη μόνῃ δοκεῖ ὑπηχεῖν; ἢ ὅτι ἡ νεάτη λήγουσα καὶ μαραινομένη ὑπάτη γίνεται; σημεῖον δὲ τὸ ἀπὸ τῆς ὑπάτης τὴν νεάτην δύνασθαι ἄδειν· ὥς γὰρ οὔσης αὐτῆς ᾠδῆς νεάτης, τὴν ὁμοιότητα λαμβάνουσιν ἀπ' αὐτῆς. ἐπεὶ δὲ καὶ ἡχώ ᾠδῇ τίς ἐστίν, ἀφή ἐστί φωνῆς τῆς νεάτης ληγούσης, ἡχος ὢν ὁ αὐτὸς τῷ τῆς ὑπάτης φθόγγῳ κινεῖ, εἰκότως τῇ ὁμοιότητι τὴν ὑπάτην ἢ νήτην δοκεῖ κινεῖν. τὴν μὲν γὰρ νεάτην ἴσμεν οὗ κινεῖται ἐπιληφθεῖσα· τὴν δὲ ὑπάτην αὐτὴν ὀρώντες ἀκατάληπτον οὔσαν, καὶ φθόγγου αὐτῆς ἀκούοντες, ταύτην οἰόμεθα ἡχεῖν· ὅπερ ἐπὶ πολλῶν ἡμῖν συμβαίνει, ἐφ' ὧν μήτε τῷ λογισμῷ μήτε τῇ αἰσθήσει δυνάμεθα εἰδῆσαι τὸ ἀκριβές. ἔτι εἰ πληγείσης τῆς νεάτης μάλιστα ἐντεταμένης συμβαίνει τὸν ζυγὸν κινεῖσθαι, οὐθὲν ἂν εἴη θαυμαστόν. κινηθέντος δὲ πάσας τὰς χορδὰς συγκινεῖσθαι καὶ τιν' ἡχον ποιεῖν οὐκ ἄλογον. ταῖς μὲν οὖν ἄλλαις ὁ τῆς νεάτης φθόγγος ἀλλότριός ἐστι καὶ λήγων καὶ ἀρχόμενος, τῇ δὲ ὑπάτῃ λήγων ὁ αὐτός. οὗ προστεθέντος τῇ ἰδίᾳ αὐτῆς κινήσει, ἐκείνης δόξα πάντ' αὐτὸν εἶναι οὐθὲν ἄτοπον. ἔσται δὲ μείζων ἢ ὁ κοινὸς τῶν λοιπῶν χορδῶν ἡχος, ὅτι αἱ μὲν ὑπὸ τῆς νεάτης καθάπερ ὠσθεῖσαι μαλακῶς ἡχησαν, ἡ δὲ νεάτη πάσῃ τῇ αὐτῆς δυνάμει, οὔσα αὐτῶν σφοδροτάτη. ὥστε εἰκότως καὶ τὸ δευτερεῖον αὐτῆς κρεῖττον ἂν εἴη ἢ τὸ τῶν ἄλλων· ὥστε καὶ βραχείας κινεῖσθαι, ὡς αὐτῆς τε γεγεννημένης.

[922a] Διὰ τί ἥδιον τῆς μονωδίας ἐστὶν ἐάν τις πρὸς αὐλὸν ἢ λύραν ᾄδῃ; ἢ ὅτι πᾶν τὸ ἥδιον μιχθὲν ἡδίονι ἐν ἐστίν; ὁ δὲ αὐλὸς ἡδίων τῆς λύρας, ὥστε καὶ ἡ ᾠδὴ τούτῳ μιχθεῖσα ἢ λύρα ἡδίων ἂν εἴη, ἐπεὶ τὸ μεμιγμένον τοῦ ἀμίκτου ἡδίων ἐστίν, ἐὰν ἀμφοῖν ἅμα τὴν

αἰσθησίν τις λαμβάνη. οἶνος γὰρ ἡδίων τοῦ ὀξυμέλιτος διὰ τὸ μεμιῆσθαι μᾶλλον αὐτοῖς τὰ ὑπὸ τῆς φύσεως मिथέντα ἢ ὑφ' ἡμῶν. ἔστι γὰρ καὶ ὁ οἶνος μικτὸς ἐξ ὀξέος καὶ γλυκέος χυμοῦ. δηλοῦσι δὲ καὶ αἱ οἰνώδεις ῥοαὶ καλούμεναι. ἡ μὲν οὖν ὥδῃ καὶ ὁ αὐλὸς μίγνυνται αὐτοῖς δι' ὁμοιότητα (πνεύματι γὰρ ἄμφω γίνεται)· ὁ δὲ τῆς λύρας φθόγγος, ἐπεὶ οὐ πνεύματι γίνεται ἢ ἦττον αἰσθητὸν ἢ ὁ τῶν αὐλῶν, ἀμικτότερός ἐστι τῇ φωνῇ· ποιῶν δὲ διαφορὰν τῇ αἰσθήσει ἦττον ἡδύνει, καθάπερ ἐπὶ τῶν χυμῶν εἴρηται. ἔτι ὁ μὲν αὐλὸς πολλὰ τῷ αὐτοῦ ἤχῳ καὶ τῇ ὁμοιότητι συγκρύπτει τῶν τοῦ ὥδοῦ ἁμαρτημάτων, οἱ δὲ τῆς λύρας φθόγγοι ὄντες ψιλοὶ καὶ ἀμικτότεροι τῇ φωνῇ, καθ' ἑαυτοὺς θεωρούμενοι καὶ ὄντες αὐτοῖς συμφανῇ ποιοῦσι τὴν τῆς ὥδῃς ἁμαρτίαν, καθάπερ κανόνες ὄντες αὐτῶν. πολλῶν δὲ ἐν τῇ ὥδῃ ἁμαρτανομένων, τὸ κοινὸν ἐξ ἀμφοῖν ἀναγκαῖον χειρόν γίνεσθαι.

Διὰ τί τῶν μὲν ἐπτὰ μέση καλεῖται, τῶν δὲ ὀκτὼ οὐκ ἔστι μέσον; ἢ ὅτι ἐπτάχορδοι ἦσαν αἱ ἁρμονίαι τὸ παλαιόν, τὰ δὲ ἐπτὰ ἔχει μέσον; ἔτι ἐπειδὴ τῶν μεταξὺ τῶν ἄκρων τὸ μέσον μόνον ἀρχὴ τίς ἐστιν (ἔστι γὰρ τῶν θάτερον τῶν ἄκρων νευόντων ἐν τινι διαστήματι ἀνὰ μέσον ὃν ἀρχή), τοῦτ' ἔσται μέσον. ἐπεὶ δ' ἔσχατα μέσον ἐστὶν ἁρμονίας νεάτη καὶ ὑπάτη, τούτων δὲ ἀνὰ μέσον οἱ λοιποὶ φθόγγοι, ὧν ἡ μέση καλουμένη μόνη ἀρχὴ ἐστὶ θατέρου τετραχόρδου, δικαίως μέση καλεῖται. τῶν γὰρ μεταξύ τινων ἄκρων τὸ μέσον ἦν ἀρχὴ μόνον.

Διὰ τί οἱ πολλοὶ ἄδοντες σώζουσι μᾶλλον τὸν ῥυθμὸν ἢ οἱ ὀλίγοι; ἢ ὅτι μᾶλλον πρὸς ἓνα τε καὶ ἡγεμόνα βλέπουσι, καὶ βραδύτερον ἄρχονται, ὥστε ῥᾶον τοῦ αὐτοῦ τυγχάνουσιν; ἐν μὲν γὰρ τῷ τάχει πλείων γίνεται ἡ ἁμαρτία, συμβαίνει δὲ τῷ ἡγεμόνι προσέχειν τοὺς πολλοὺς· ἰδιαζόμενος δὲ οὐδεὶς ἂν αὐτῶν διαλάμπειεν ὑπεράρας τὸ πλῆθος. ἐν δὲ τοῖς ὀλίγοις μᾶλλον διαλάμπουσιν· διὸ καθ' αὐτοὺς ἐν αὐτοῖς μᾶλλον ἀγωνίζονται ἢ πρὸς τὸν ἡγεμόνα.

Διὰ τί ἐπὶ τὸ ὀξὺ ἀπάδουσιν οἱ πλείστοι; ἢ ὅτι ῥᾶον [922b] ὀξὺ ἄσαι ἢ βαρὺ; ἄδουσι γοῦν ὀξὺ μᾶλλον, καὶ ἐν ᾧ ἄδουσιν, ἁμαρτάνουσιν.

Διὰ τί οἱ ἀρχαῖοι ἐπταχόρδους ποιοῦντες τὰς ἁρμονίας τὴν ὑπάτην ἀλλ' οὐ τὴν νήτην κατέλιπον; ἢ οὐ τὴν ὑπάτην ἀλλὰ τὴν νῦν παραμέσῃν καλουμένην ἀφήρουν καὶ τὸ τονιαῖον διάστημα; ἐχρῶντο

δὲ τῇ ἐσχάτῃ μέσῃ τοῦ ἐπὶ τὸ ὀξὺ πυκνοῦ· διὸ καὶ μέσῃν αὐτὴν προσηγόρευσαν. ἢ ὅτι ἦν τοῦ μὲν ἄνω τετραχόρδου τελευτή, τοῦ δὲ κάτω ἀρχή, καὶ μέσον εἶχε λόγον τόνῳ τῶν ἄκρων;

Διὰ τί οἱ ἐν τραγῳδίᾳ χοροὶ οὐθ' ὑποδωριστὶ οὐθ' ὑποφρυγιστὶ ᾄδουσιν; ἢ ὅτι μέλος ἦκιστα ἔχουσιν αὐταὶ αἱ ἀρμονίαι, οὗ δειμάλιστα τῷ χορῷ; ἦθος δὲ ἔχει ἢ μὲν ὑποφρυγιστὶ πρακτικόν, διὸ καὶ ἐν τε τῷ Γηρυόνη ἢ ἐξοδος καὶ ἢ ἐξόπλισις ἐν ταύτῃ πεποιήται, ἢ δὲ ὑποδωριστὶ μεγαλοπρεπὲς καὶ στάσιμον, διὸ καὶ κιθαρωδικωτάτῃ ἐστὶ τῶν ἀρμονιῶν. ταῦτα δ' ἄμφω χορῷ μὲν ἀνάρμοστα, τοῖς δὲ ἀπὸ σκηνῆς οἰκειότερα. ἐκεῖνοι μὲν γὰρ ἡρώων μιμηταί· οἱ δὲ ἡγεμόνες τῶν ἀρχαίων μόνοι ἦσαν ἥρωες, οἱ δὲ λαοὶ ἄνθρωποι, ὧν ἐστὶν ὁ χορὸς. διὸ καὶ ἀρμόζει αὐτῷ τὸ γοερὸν καὶ ἡσύχιον ἦθος καὶ μέλος· ἀνθρωπικὰ γάρ. ταῦτα δ' ἔχουσιν αἱ ἄλλαι ἀρμονίαι, ἦκιστα δὲ αὐτῶν ἡ ὑποφρυγιστί· ἐνθουσιαστικὴ γὰρ καὶ βακχικὴ. κατὰ μὲν οὖν ταύτην ἀσχομένῃ· παθητικοὶ δὲ οἱ ἀσθενεῖς μᾶλλον τῶν δυνατῶν εἰσὶ, διὸ καὶ αὕτη ἀρμόττει τοῖς χοροῖς· κατὰ δὲ τὴν ὑποδωριστὶ καὶ ὑποφρυγιστὶ πράττομεν, ὃ οὐκ οἰκεῖόν ἐστι χορῷ. ἔστι γὰρ ὁ χορὸς κηδευτῆς ἄπρακτος· εὐνοίαν γὰρ μόνον παρέχεται οἷς πάρεσιν.

Διὰ τί τῶν τὴν συμφωνίαν ποιούντων φθόγγων ἐν τῷ βαρυτέρῳ τὸ μαλακώτερον; ἢ ὅτι τὸ μέλος τῇ μὲν αὐτοῦ φύσει μαλακὸν ἐστὶ καὶ ἡρεμαῖον, τῇ δὲ τοῦ ῥυθμοῦ μίξει τραχὺ καὶ κινητικόν; ἐπεὶ δὲ ὁ μὲν βαρὺς φθόγγος μαλακὸς καὶ ἡρεμαῖός ἐστιν, ὁ δὲ ὀξὺς κινητικός, καὶ τῶν ταῦτ' ὁ μέλος ἐχόντων εἴη ἂν μαλακώτερος ὁ βαρύτερος ἐν ταῦτ' ὁ μέλει μᾶλλον· ἦν γὰρ τὸ μέλος αὐτῷ μαλακόν.

Διὰ τί ἴσων πίθων καὶ ὁμοίων ἐὰν μὲν ὁ ἕτερος κενὸς ᾖ, ὁ δὲ ἕτερος εἰς τὸ ἡμισυ διάμεστος, διὰ πασῶν συμφωνεῖ ἡ ἡχώ; ἢ ὅτι διπλασία γίνεται καὶ ἡ ἐκ τοῦ ἡμίσεος τῆς ἐκ τοῦ κενοῦ; τί γὰρ διαφέρει τοῦτο ἢ ἐπὶ τῶν συρίγγων; δοκεῖ γὰρ ἡ θάττων κίνησις ὀξυτέρα εἶναι, ἐν δὲ τοῖς μείζουσι [923a] βραδύτερον ὁ ἀήρ ἀπαντᾷ, καὶ ἐν τοῖς διπλασίσις τοσοῦτ' ὅσον, καὶ ἐν τοῖς ἄλλοις ἀνάλογον. συμφωνεῖ δὲ διὰ πασῶν καὶ ὁ διπλασίον ἀσκός πρὸς τὸν ἡμισυν.

Κ. ΟΣΑ ΠΕΡΙ ΘΑΜΝΟΥΣ ΚΑΙ ΛΑΧΑΝΩΔΗ.

Διὰ τί τὸ ἀλυκὸν ὕδωρ τὰ μὲν σέλινα δέχεται, τὸ δὲ πρᾶσον οὐ;
ἢ ὅτι τοῦ μὲν ἀσθενεῖς αἱ ρίζαι, τοῦ δὲ ἰσχυραί; τὸ δὲ ἰσχυρότερον
ἀπαθέστερον.

Διὰ τί λέγεται “μίνθην ἐν πολέμῳ μῆτ’ ἔσθιε μῆτε φύτευε;” ἢ
ὅτι καταψύχει τὰ σώματα; δηλοῖ δὲ ἡ τοῦ σπέρματος φθορά. τοῦτο

Διὰ τί ἔνια ἄνθος ἔχοντα ἄκαρπά ἐστίν, οἷον σίκυος καὶ
κολόκυνθα καὶ ρόα; ἢ οὐκ ἄκαρπα, ἀλλὰ ταῦτα καρπὸς ἐστίν;
περικάρπιον γοῦν ἐστὶ τὸ ἀνθοῦν, ὃ δὲ σίκυος περικάρπιον.

Διὰ τί τῶν φυομένων τὰ μὲν ἐσανά, τὰ δὲ ὠμὰ βρωτά; ἢ ὅσων
οἱ χυμοὶ μὴ εὐθύς ἐδώδιμοι, τούτων πυρωθέντων γλυκύτεροι
γίνονται ὑπὸ τοῦ θερμοῦ, ὅσων δὲ εὐθύς, καὶ ὠμὰ ἐδώδιμα;

Διὰ τί τὰ μὲν ἐσανά, τὰ δὲ ὀπτανά; ἢ ὅτι τὰ μὲν ὑγρότερα οὐ
τοσοῦτον, τὰ δὲ ξηρότερα οὐ μᾶλλον ξηρανθῆναι δεῖ; ἐψόμενα δὲ
πάντα ὑγρότερα καὶ μαλακώτερα. τὰ δὲ ἦττον ὑγρὰ ἂν πυρωθῇ,
γίνεται ξηρά.

Διὰ τί δὲ τὰ μὲν ἄβρωτά ἐστὶ τὰ δὲ βρωτά; ἢ διὰ τοὺς χυμούς;
ὅσα γὰρ καὶ ὠμὰ ἀπέπτους ἔχει καὶ πυρούμενα μὴ μεταβάλλει,
ἄβρωτα. ὅσων δὲ βρωτὸς μὲν ὁ χυμὸς ἰσχυρότερος δέ, ταῦτα
ἡδύσματά ἐστίν· τὰ γὰρ ἐν μικρῷ ἔχοντα πολλὴν δύναμιν τῶν
βρωτῶν ἡδυντικά τῶν ἐν πολλῷ.

Διὰ τίνα αἰτίαν τὰ μὲν μέχρι σπέρματος τῶν φυτῶν ζῇ, εἴτα
ἐνεγκόντα αὐαίνεται, οἷον ἡ πόα καὶ τὰ καλούμενα λάχανα, τὰ δὲ οὐ,
ἀλλὰ πολλάκις φέρει; καὶ τῶν μέχρι σπέρματος ζώντων τὰ μὲν πολλὰ
ἐπέτεια, τὸ δὲ ἵπποσέλινον τῷ ὑστέρῳ ἔτει φέρει καρπὸν, καὶ
ἐνέγκαν ἐξαυαίνεται; ἢ ἅπαντα μὲν μέχρι τούτου ἀκμάζει, ἕως ἂν
κατὰ τὸ σπέρμα ἀκμάζη; ἐπεὶ καὶ οἱ ἄνθρωποι μέχρι τριάκοντα ἐτῶν
ἐπιδιδόασιν, ὅτε μὲν τῷ πλήθει ὅτε δὲ τῇ παχύτητι. ὅταν δὲ μηκέτι
δύνηται φέρειν, ὥσπερ ἐκεῖ, [923b] αὐαίνεται καὶ καταγρηράσκει· τὰ
δὲ βραδέως καὶ κατὰ λόγον. δι’ ἣν μὲν οὖν αἰτίαν τὰ μὲν βραχύβια τὰ
δὲ μακρόβια ἐστίν, ἄλλος ἔστω λόγος· ἐπεὶ δ’ ἐστὶ πᾶσιν ὅρος ἡ τοῦ
σπέρματος τελείωσις, ἀνάγκη τοῖς μὲν βραχυβίοις ἅπαξ ἢ ὀλιγάκις
ἐνεγκεῖν καρπὸν, τοῖς δὲ μακροβίοις πολλάκις, ὥστε τὰ μὲν
ἀσθενέστατα ἅπαξ ἐνέγκοι (διὸ ἀνάγκη αὐαίνεσθαι)· καὶ τούτων τὰ

μὲν δυνάμενα ἐνιαυτῷ ἐπέτεια εἶναι, τὰ δέ, ὥσπερ τὸ ἵπποσέλινον, τῷ ὑστερῷ ἔτει, ὥσπερ τὰ δένδρα καὶ τὰ φυτά.

Διὰ τί σελίνου, ἐάν τις περιορύζας μέχρι κάτω πρὸς τὰς ρίζας περιβάλλῃ τῶν καχυρδίων, εἴτα ἄνωθεν τὴν γῆν, καὶ οὕτως ἄρδῃ, παμμεγέθεις γίνονται αἱ ρίζαι; ἢ διότι τὸ καχυρδίων θερμὸν ὄν καὶ σομφὸν κατέχει μὲν σύνολκον τὴν τροφήν καὶ οὐ προίεται ἄνω, πέττει δὲ θερμὸν ὄν, ὥστε πολλὴν τὴν αὐξησιν γίνεσθαι;

Διὰ τί, ἐάν τις τὰς κολοκύνθας εὐθὺς μικρὰς οὖσας κρύψῃ τῇ γῇ ἢ τοὺς σικύους, μείζους γίνονται; ἢ διότι τὰ πνεύματα καὶ ὁ ἥλιος ξηραίνοντα ἀφαιροῦνται τὴν αὐξησιν, καὶ τοὺς ὄγκους ἐλάττους μὲν ποιοῦσι πάντων, στιφροτέρους δέ, ὥσπερ καὶ τῶν δένδρων τὰ τε ἐν προσηγμένοις καὶ ἐλώδεσι καὶ τὰ ἐν κοίλοις καὶ ἐφύδροις (τὰ μὲν γὰρ μεγάλα γίνονται καὶ σομφά, τὰ δὲ μικρά καὶ πυκνά)· ἐν δὲ τῇ γῇ κρυφθέντα ἐναντία πάσχοντα ἐναντίως ἀποβαίνει. ὁμοίως δὲ καὶ τὰ εἰς ἀγγεῖα τιθέμενα, σίκυοι εἰς νάρθηκας κοίλους ἢ καλυπτῆρας καὶ ῥοιαὶ καὶ μῆλα εἰς χύτρας, τὰ μὲν μεγάλα σομφά δέ, οἱ δὲ μικροὶ στεργοὶ αὐξανόμενοι, μὴ εἰς ἀντίτυπον. αἰτία δὲ ἡ τροφή πλείων γινομένη διὰ τὸ μῆτε ἀποπνεῖσθαι μῆτε ξηραίνεσθαι· τὸ γὰρ ἀποστέγον κωλύει ταῦτα πάσχειν.

Διὰ τί τὰ σπέρματα τῶν δριμύων φυτῶν δριμύτερά ἐστιν ἢ αἱ ρίζαι καὶ τὰ φύλλα; ἢ διότι ἐκ τοῦ σπέρματος γίνεται ἅπαντα, καὶ εἰς τὰ ἄλλα δίδοται μέρη ἐκ τούτου, οἷον ἐνυπάρχοντα, ὥς φασί τινες, καὶ οἱ χυμοὶ καὶ αἱ ὀσμαὶ, ἐπεὶ καὶ αἱ ὀσμαὶ ἴδιοι γίνονται ἅμα τοῖς σπέρμασιν ἅπασιν. εἰ οὖν ἐκ τούτου καὶ τοῖς ἄλλοις ἡ δριμύτης ὑπάρχει, εὐλογον καὶ αὐτὸ ὑπάρχειν μάλιστα.

Διὰ τί αἱ ῥαφανίδες αἱ λεπταὶ δριμύτεραι; ἢ ὅτι αἱ μείζους διὰ τὸν χρόνον πεπεμμέναι μᾶλλον;

[924a] Διὰ τί ἡ κάππαρις οὐκ ἐθέλει ῥαδίως ἐν τοῖς ἐργασίμοις γίνεσθαι χωρίοις (πολλοὶ γὰρ πεπειράνται καὶ ρίζας μεταφέροντες καὶ σπέρματα καταβάλλοντες· ἐνιαχοῦ γὰρ λυσιτελεῖ μᾶλλον τῶν ῥόδων), ἀλλὰ φύεται μάλιστα ἐπὶ τῶν τάφων, ὅτι ἀβατώτατος ὁ τόπος ἐστίν. περὶ δὲ διὰ τούτου καὶ ὅσα ἄλλα τοιαῦτα, δεῖ λαβεῖν ὅτι οὐχ ἅπαντα ἐκ τῆς αὐτῆς ὕλης γίνεται οὐδ' αὖξεται, ἀλλ' ἔνια ἐξ ἄλλων φθορᾶς καὶ ἐξ ἀρχῆς γίνεται καὶ αὐξάνεται, οἷον οἱ φθεῖρες καὶ αἱ τρίχες ἐν τῷ σώματι διαφθειρομένης τῆς τροφῆς, καὶ ἀεὶ τὸ χεῖρον ἔχοντος. ὥσπερ οὖν καὶ τῶν ἐν σώματι ἔνια γίνεται ἐκ περιπτώματος τροφῆς, τοῦτο δ' ἐστὶν ἀπεψία, καὶ οὗ μὴ ἐδύνατο

κρατῆσαι ἢ φύσις, τὰ μὲν προχειρότατα εἰς κύστιν καὶ κοιλίαν ἀποκρίνεται, ἐξ ἐνίων δὲ ζῶα γίνεται, διὸ καὶ αὐξάνονται ταῦτα ἐν γήρᾳ καὶ νόσοις, οὕτως ἐν τῇ γῇ τὰ μὲν ἐκ πεπεμμένης τῆς τροφῆς γίνεται καὶ αὐξάνεται, τὰ δὲ ἐκ περιττωμάτων καὶ ἐναντίως ἐχόντων. ἡ δὲ γεωργία πέττει καὶ ἐνεργὸν ποιεῖ τὴν τροφήν· ἐξ ἧς συνίστανται οἱ ἡμεροὶ καρποί. ἃ μὲν οὖν ἐκ τοιαύτης γίνεται ἡμερότητος, ἡμερα καλεῖται διὰ τὸ ἀπὸ τέχνης ὠφελεῖσθαι ὥσπερ παιδευόμενα· ὅσα δὲ μὴ δύναται ἡ καὶ ἐξ ἐναντίως ἔχοντος συνίσταται, ταῦτα ἄγρια ἐστὶ καὶ οὐκ ἐθέλει γίνεσθαι ἐν γεωργησίμῳ. ἡ γὰρ γεωργία φέρει αὐτὰ παιδεύουσα· ἐκ γὰρ φθορᾶς γίνεται. ὧν καὶ ἡ κάππαρίς ἐστίν.

Διὰ τί, ἐάν τις ραφανίδων, ὅταν μάλιστα ἀκμάζωσι τοῦ χειμῶνος, ἀποτεμῶν τὰ φύλλα περισάξῃ τὴν γῆν καὶ καταπατήσῃ ὥστε ἀποστεγῆναι τὸ ὕδωρ, αὐταὶ ἐν τῷ θέρει γίνονται ἄπλετοι τὸ πάχος; ἢ ὅτι τοῦ μὲν μὴ φθείρεσθαι τὸ περισσεύεσθαι αἴτιον, κωλῶν τὸ ὕδωρ σῆπειν; ἡ δὲ τροφή, ἣν ἄνω ἀφίει εἰς τὸν βλαστόν, εἰσέρχεται εἰς αὐτήν, ὥστε ἀνάγκη αὐτὴν μείζω γίνεσθαι ἢ ἀφίεναι παραβλαστάνουσιν ἄλλας ρίζας, ὥσπερ τὰ κρόμμυα; καὶ γὰρ ταῦτα, ἐὰν μὴ τις ἐκτίλῃ ἐπέτεια ἀλλ' ἐάσῃ τὸν χειμῶνα, πολλαπλάσια γίνεται. τὰ μὲν οὖν κρόμμυα τῶν παραβλαστανόντων ἐστίν, ἡ δὲ ράφανος οὐ, ὥστε ἀνάγκη αὐτὴν γίνεσθαι παχεῖαν διὰ τὸ πᾶσαν λαμβάνειν τὴν τροφήν.

Διὰ τί, ἐάν τις σικύους ἢ κολοκύνθας περὶ φρέαρ φυτεύσας, ὅταν ὥραϊοι ὦσι, καθεὶς εἰς τὸ φρέαρ ἀποστεγάσῃ, γίνονται δι' ἔτους χλωροί; ἢ διότι ἢ τε ἀπὸ τοῦ ὕδατος ἀτμῖς ψύχουσα κωλύει ξηραίνεσθαι καὶ παρέχει θάλλοντα, καὶ [924b] τὸ ἀποστεγῆναι τούτους καὶ τὰ πνεύματα τρέφει τὰ ηὔξημένα; τοῦ δὲ διαμένειν αἴτιον τὸ ἔχειν τροφήν ἐωμένων τῶν ριζῶν. καὶ γὰρ ἐάν τις ἀφελὼν τὴν βλάστην, ὅταν καρποφορήσωσι, καὶ ἀποτεμῶν περισάξῃ καὶ καταπατήσῃ τὴν γῆν περὶ τὰς ρίζας, πρῶϊμους οἶσει σικύους, ὡς δυναμένων σῶζεσθαι τῶν ριζῶν· οὐ γὰρ ἔσται σίκυος τῶν προετείων. θᾶττον δὲ αὐτοὶ τῶν σπειρομένων οἶσουσι καρπὸν διὰ τὸ πολὺ προϋπάρχειν τοῦ ἔργου τῇ φύσει τὰς ρίζας, τοῖς δὲ σπειρομένοις δεῖν γίνεσθαι τοῦτο πρῶτον, ἐν ᾗ περισάξεις ἀλέαν ποιεῖν, ὥστε σῶζεσθαι καὶ θᾶττον ἐνιέναι βλαστόν. διὸ καὶ ἐάν τις χειμῶνος φυτεύσῃ σπέρμα σικύου ἐν ταλαρίσκοις καὶ ἄρδῃται θερμῷ καὶ εἰς τὸν ἥλιον ἐκφέρῃ καὶ παρὰ πυρὶ τιθῇ, πρῶϊμοὶ σφόδρα ἔσσονται, ἐὰν ὡς ἔχει ἐν τοῖς ταλάροις εἰς τὴν ἰκνουμένην ὥραν εἰς

τὴν γῆν φυτεύσῃ.

Διὰ τί ἀρδεύουσιν ἔωθεν ἢ νυκτὸς ἢ δείλης; πότερον ἵνα μὴ ὁ ἥλιος ἀναλώσῃ; ἢ ὅτι, ἐὰν ἦ θερμὸν τὸ ὕδωρ, διαφθείρει τὰ ἀρδόμενα;

Διὰ τί τὰ εὐώδη οὖρητικά, καὶ σπέρματα καὶ φυτά; ἢ ὅτι θερμὰ καὶ εὐπεπτα, τὰ δὲ τοιαῦτα οὖρητικά· ταχὺ γὰρ λεπτύνει ἢ ἐνοῦσα θερμότης, καὶ ἡ ὁσμὴ οὐ σωματώδης, ἐπεὶ καὶ τὰ μὴ εὐώδη, οἷον σκόροδα, διὰ τὴν θερμότητα οὖρητικά, μᾶλλον μέντοι συντηκτικά. θερμὰ δὲ τὰ εὐώδη σπέρματα, διότι ὅλως ἡ ὁδμὴ διὰ θερμότητά τινα γίνεται· ἀλλὰ τὰ δυσώδη ἄπεπτά ἐστιν. δεῖ δὲ μὴ μόνον εἶναι θερμὰ ἀλλὰ καὶ εὐπεπτα, εἰ ἔσται οὖρητικά, ὅπως συγκατιόντα λεπτύνῃ τὰ ὑγρά.

Διὰ τί θᾶπτον ἐκκαυλεῖ τῶν λαχάνων τὰ ἐκ παλαιότερου σπέρματος, οἷον τριετοῦς ἢ διετοῦς, ἢ τὰ ἐκ τῶν προσφάτων; ἢ ὅτι ὡς ἐπὶ τῶν ζώων θᾶπτον σπέρμα φέρει τὸ ἀκμάζον, οὕτω καὶ τῶν σπερμάτων τὰ μὲν λίαν παλαιὰ ἐξίκμασται τὴν δύναμιν, τὰ δὲ ἀσθενέστερα διὰ τὸ ἔτι ἔχειν περίττωμα μὴ οἰκεῖον, τὰ δὲ μέσα τῷ χρόνῳ ἰσχυρότατα ἀπεληλυθότος τοῦ ὑγροῦ· θᾶπτον οὖν σπέρμα φέρει. τὸ δὲ ἐκκαυλεῖν τοῦτό ἐστιν· ἐκ γὰρ τοῦ καυλοῦ τὸ σπέρμα.

Διὰ τί πήγανον κάλλιστον καὶ πλεῖστον γίνεται, ἐὰν τις ἐκφυτεύσῃ εἰς συκῆν; ἐκφυτεύεται δὲ περὶ τὸν φλοιὸν καὶ περιπλάττεται πηλῷ. ἢ ὅτι θερμότητος δέονται αἱ ρίζαι τοῦ πηγάνου καὶ ἀλέας (διὸ καὶ τὴν τέφραν ἐὰν τις περιβάλλῃ, ὀνίνανται), ἡ δὲ συκὴ θερμὴ ἐστίν. δηλοῖ δὲ καὶ ὁ [925a] ἀπὸς πάντων δριμύτατος ὢν, καὶ ὁ πολὺς καπνός. ἔχει οὖν τοιαύτην θερμότητα καὶ ἰκμάδα οἷαν καὶ ἡ τέφρα, ὥστε εἰ ἐκείνην ὀνίνησιν, ἀναγκαῖον καὶ ἐν τῇ συκῇ μάλιστα εὐσθενεῖν, ὅσῳ ἡ μὲν τέφρα οὐκ ἐπιρρεῖ, τὸ δ' ἀπὸ τῆς συκῆς αἰεὶ ἐπιρρεῖ, οὐκ ἀναλίσκομένου τοῦ ὑγροῦ τῇ συκῇ.

Διὰ τί ἔνια τῶν φυτῶν αἰεὶ κενὸν φέρει τὸν καυλόν; ἢ ὧν ἀνάγκη ἄλλο φύειν

Διὰ τί ἐν τῇ Ἀττικῇ οἱ μὲν ἄλλοι καρποὶ γλυκύτατοι γίνονται, τὸ δὲ θύμον δριμύτατον; καίτοι καὶ τοῦτο καρπός τίς ἐστίν ... ὥστε οὐ πολὺ ὑγρὸν τὰ φυόμενα ἔχει. ὅσα μὲν οὖν φύσει γλυκέα ἐστί, διὰ μετριότητα τοῦ ἐνυπάρχοντος ὑγροῦ, ὅταν ἀπάγῃ ὁ ἥλιος τὸ πλεῖστον, τὸ ὑπολειπόμενον ῥαδίως πέττεται· τὸ γὰρ πολὺ ἔργον πεπάνθαι, τὸ δὲ μέτριον ῥᾶον. ὥστε γίνονται οἱ φύσει γλυκεῖς γλυκύτεροι. ἐν δὲ τοῖς φύσει ξηροῖς τε καὶ μὴ γλυκέσι καρποῖς

λείπεται δι' ὀλιγότητα τὸ οἰκεῖον, τοῦτο δ' ἐστὶν ἥκιστα γλυκύ· ἀφαιρεῖται γὰρ ὁ ἥλιος τὸ γλυκύτατον καὶ κουφότατον· οὗτοι δὲ οὐκ ἔχουσι περιττὸν ὑγρὸν, ὥσπερ οἱ ἄλλοι καρποί.

Διὰ τί γλήχων καὶ τὰ λείρια καὶ τὰ κρόμμυα τὰ κρεμάμενα ὑπὸ τὰς τροπὰς ἀνθεῖ; ἡ ἐνυπάρχει αὐτοῖς τροφή ἄπεπτος, ἡ τοῦ μὲν χειμῶνος οὐ πέττεται διὰ τὸ ψυχρός, ὑπὸ δὲ τὰς τροπὰς πεττομένης διὰ τὴν ὥραν ἡ αὐξησις γίνεται; αὕτη δὲ διὰ τὸ μὴ ἔχειν ἐπίρρυσιν ταχὺ μαραίνεται. οὐ γάρ τινα ἔχουσα ἀρχὴν οὐδέ τινα ἐπίρρυσιν ἀποξηραίνεται, ὥσπερ Σκύθαις διὰ τὸ πολλὴν τὴν χιόνα γίνεσθαι συμβαίνει τὸν σῖτον μένειν καὶ ταχὺ ἀνατρέχειν.

Διὰ τί τὸ κρόμμυον μόνον οὕτως περιττῶς δάκνει τὸ ὀφθαλμῷ (διὸ καὶ τοῦνομά φασι τοῦτ' ἔχειν αὐτό, ὡς τὴν κόρην ποιεῖν συμμύειν), ἡ δὲ ὀρίγανος οὐ, οὐδ' ἄλλα δριμέα ὄντα; καὶ γὰρ τὸ ἀνάρρινον μᾶλλον δάκνον οὐ ποιεῖ ὁμοίως δακρύνειν προσφερόμενον, τὸ δὲ προσφερόμενον καὶ κατατρωγόμενον. ἡ ὅτι διαφοραὶ πολλαὶ ἀκολουθοῦσιν ἐκάστοις τῶν δριμέων, ἃ ποιεῖ τὴν ἰδίαν ἐκάστου δύναμιν; τὸ μὲν οὖν ἀνάρρινον διὰ τὸ θερμότερον εἶναι ξηραντικώτερόν ἐστι τῆς γινομένης ὑπ' αὐτοῦ συντήξεως, ἐπεὶ ποιεῖ γε δάκρυον ἐσθίοντι· προσφερόμενον δὲ οὐ, ὅτι οὐκ ἀπατμίζει ἀπ' αὐτοῦ λεπτὸν τι· ξηρότερον γάρ ἐστι καὶ θερμότερον. ἡ δὲ ὀρίγανος [925b] καὶ τὰ τοιαῦτα θερμὰ ξηρά ἐστὶν ἡρέμα. δεῖ δὲ τὸ μέλλον δάκρυον ποιήσῃν δηκτικὸν καὶ ὑγρὸν εἶναι καὶ γλίσχρον. διὸ καὶ τὸ ἔλαιον ποιεῖ δακρύνειν, ἀσθενῇ ἔχον δῆξιν· διὰ γλίσχρότητα γὰρ καὶ λεπτότητα παραδῶνον ποιεῖ τὸν πόνον, καὶ τὴν σύντηξιν διὰ τὸν πόνον. τὸ δὲ κρόμμυον τοιαύτην ἔχει τὴν δύναμιν ὥστε καὶ τὸ ὑγρὸν καὶ τὴν ἀτμίδα αὐτοῦ θερμὴν καὶ λεπτὴν καὶ γλίσχραν εἶναι. ὥστε προσφερόμενον μὲν, διὰ τὸ τὴν ἀτμίδα τοιαύτην εἶναι καὶ συναφιέναι ὑγρότητα λεπτὴν, ποιεῖ δακρύνειν, ἐσθιομένου δὲ ἡ ἀναθυμίασις διουῖσα ... τὸ δὲ σκόροδον θερμὸν μὲν καὶ δριμύ ἐστι καὶ ὑγρότητα ἔχει, ἀλλ' οὐ γλίσχρον· διὸ οὐ ποιεῖ δακρύνειν.

Διὰ τί τὰ μύρτα ἐν τῇ χειρὶ θλιβέντα γλυκύτερα ἡμῖν δοκεῖ εἶναι τῶν μὴ τεθλιμμένων; ἡ καθάπερ καὶ αἱ ῥᾶγες τετρυγημένοι τῶν βοτράων γλυκύτεραι εἰσι τῶν ἀτρυγῆτων; ὑπὸ γὰρ τοῦ γλεύκου ὄντος φύσει ἡδέος αἱ μὲν τετρυγημένοι ῥᾶγες ὥσπερ εἰκόασιν ἡδυσμέναι (ἀνάπλεω γὰρ εἰσι καὶ ἔξωθεν), αἱ δ' ἐπὶ τῶν βοτράων ἀνήδυντοι. ὁμοίως οὖν καὶ ἐπὶ τῶν μύρτων φύσει γλυκέων καὶ τὴν γλυκύτητα ἐχόντων ἐντός. ὥσπερ αἱ ῥᾶγες οὖν, ὅταν θλιφθῇ,

ἀναπίμπλαται ἀπὸ τῆς ἐντὸς γλυκύτητος καὶ ἔξωθεν διαφαίνεται γλυκύτερα ὄντα.

Διὰ τί τῶν τε μύρτων τὰ ἐλάττω ἀπυρηνότερά ἐστι, καὶ ἐν τοῖς φοίνιξι καὶ ἐπὶ τῶν βοτρυῶν, ἔνθα δ' αἱ μικραὶ ῥᾶγες οὐκ ἔχουσιν ἢ ἐλάττους πυρῆνας; ἢ διὰ τὸ ἀτελέστερα εἶναι οὐκ ἔχει ἀποκεκριμένον; τέλος γὰρ ὁ πυρὴν ἔχει τὸ σπέρμα. διὰ τοῦτο δὲ καὶ ἐλάττους εἰσὶν, ὥς ὄντα παραφυάδες καὶ ἀτελεῖ. καὶ ἦττον δὲ γλυκέα τῶν ἐχόντων πυρῆνας· ἀπεπτότερα γάρ ἐστιν, ἢ δὲ πέψις τελείωσίς ἐστιν.

Διὰ τί τῶν περικαρπίων τὰ μὲν πικρότερα τὰ πρὸς τὴν ρίζαν ἔχει, οἷον σίκυοι, τὰ δὲ πρὸς τὸ ἄκρον τὸ ἄνω, οἷον αἱ βάλανοι; ἢ ὅτι τῶν μὲν ταύτῃ ἄπεπτος ἡ τροφή διὰ τὸ ἐπιρρεῖν κατὰ τὴν ρίζαν ἀεί· τὰ δὲ ξηρὰ φύσει ἐστίν, ὥστε ἀπαγομένου τοῦ γλυκέος ἐκ τοῦ ἄκρου καὶ πεπεμμένου ἤδη ξηραίνεται, καὶ λείπεται τὸ πικρὸν ὥσπερ οἱ ἄλεις; ξηραίνόμενον δὲ μᾶλλον πικρὸν γίνεται, καθάπερ ἐλαῖαι καὶ βάλανοι παλαιούμεναι πικραὶ γίνονται.

[926a] Διὰ τί ἔνια βλαστάνει οὐκ ἐν τῇ γῇ ὄντα ἀλλ' ἐκτετμημένα, τὰ δὲ κείμενα, οἷον οἱ τῶν κρίνων καυλοὶ καὶ σκόροδα καὶ κρόμμυα; ἢ ὅτι ἔχουσι τροφήν ἅπαντα ἐν αὐτοῖς, ἀλλ' οὐκ ἐν ἀφωρισμένῳ τόπῳ οὐθὲν φυτόν; ἢ περιουσία οὖν ἐστὶ τῆς τροφῆς ἢ ποιοῦσα βλαστάνειν. δῆλον δέ· καὶ γὰρ καὶ αἱ σκίλλαι καὶ οἱ βολβοὶ ταὐτὸ ποιοῦσιν. αὖξεται δ' ἕκαστον οὐ τῷ ἔχειν, ἀλλ' ὅταν πεφθῇ καὶ διανεμηθῇ. ἔχει μὲν οὖν καὶ ἔμπροσθεν, αὖξεται δέ, ὅταν ἡ ὥρα ἔλθῃ ἐν ᾗ τοῦτο γίνεται πεττούσης ὥρας, οἷον καὶ τὰ τῶν κροκοδείλων φά. συνεχὲς δὲ οὐκέτι, ὅτι οὐκ ἐπιρρεῖ ἄλλῃ τροφή.

Διὰ τί ποτε τὰ σκόροδα καὶ τὰ κρόμμυα ὅσῳ ἂν ξηρότερα φυτεύηται, τοσοῦτῳ βελτίῳ γίνεται, τὰ δὲ ἄλλα χειρῶ; ἢ ὅτι πάντα τὰ τοιαῦτα μάλιστα ὑγρασίας ἐστὶ πλήρη; εὐκρατα οὖν γίνεται τοῦτον τὸν τρόπον φυτευθέντα. καὶ ὅτι ἦττον σήπεται, ὅταν ξηρανθέντα φυτευθῇ.

Διὰ τί ποτε τὰ σκόροδα καὶ τὰ κρόμμυα μόνα τῶν φυτῶν κείμενα βλαστάνει; ἢ διότι ὑγρασίας ἐστὶ πλήρη καὶ τροφῆς; ἢ περιουσία οὖν ἐστὶ τῆς τροφῆς ἢ ποιοῦσα βλαστάνειν. δῆλον δέ· καὶ γὰρ αἱ σκίλλαι καὶ οἱ βολβοὶ ταὐτὸ ποιοῦσιν. αὖξεται δέ, ὅταν ἡ ὥρα ἔλθῃ ἐκάστῳ.

Διὰ τί τὰ τῷ ψυχρῷ ὕδατι ἀρδόμενα γλυκύτερα ἢ τὰ τῷ θερμῷ; πότερον ὅτι ἐγκατακλειόμενον τὸ θερμὸν ἀλμυρώτερον, ὥσπερ καὶ

τὸ ἀλμυρώτερον θερμότερον, τὸ δὲ γλυκὺ ἐναντίον, ὥσπερ ψυχρόν. τροφή δὲ τοῖς λαχάνοις τὸ ὑγρόν, καὶ οἱ χυμοὶ ἐντεῦθεν.

Διὰ τί τὰ σκόροδα ὄζει μᾶλλον ἐγκαυλοῦντα ἢ νέα ὄντα; ἢ ὅτι νέων μὲν ὄντων ἔτι πολὺ ὑγρὸν ἀλλότριον ἐνὸν ἀφαιρεῖται τὴν δύναμιν αὐτῶν; ὅταν δὲ πεπανθῇ, ἐκκεκριμένου ἤδη τούτου, τότε τὴν οἰκείαν ἔχει ὁδμήν. αὕτη δὲ ἐστὶ φύσει. ὁμοίως δὲ καὶ οἱ ἄλλοι καρποὶ οἱ πρόσφατοι ὄντες ὑδαρέστεροι. διὸ καὶ τὰ κρόμμυα ἤττον δριμέα τὰ νεώτερα.

Διὰ τί τῶν μυρρινῶν μὲν μὴ τεταριχευμένων τὰ μύρτα ἀπορρεῖ μᾶλλον τῶν φύλλων, ταριχευομένων δὲ τῷ φύκει τὰ μὲν φύλλα ἀπορρεῖ, τὰ δὲ μύρτα οὐκ ἀπορρεῖ; ἢ ἀταριχεύτων μὲν ὄντων οὕτως ἔχει διὰ τὴν φύσιν; ὅταν γὰρ πεπανθῇ, ἀπορρεῖν πέφυκε τὰ μύρτα. τοῦτο δὲ οὐ συμβαίνει κειμένων, ἀλλὰ μόνον κωλύει ἢ ἱκμᾶς τοῦ φύκους μεταβάλλειν τὸ ἐν τῷ μύρτῳ ὑγρόν. τὰ δὲ φύλλα ἀποπίπτει [926b] τοῦναντίον αὐτῶν ξηραινομένων, τὸ δὲ φύκος ξηραίνει ἀλμυρὸν ὄν. οὐ ταῦτο οὖν συμβαίνει ἐπὶ τε τῆς μυρρίνης οὖσι καὶ κειμένοις τοῖς φύλλοις.

Διὰ τί οἱ σίκυοι πέπονες ἄριστοι γίνονται ἐν τοῖς ἐλώδεσι πεδίοις, οὗσιν ἐνύγροις, οἷον περὶ Ὀρχομενὸν καὶ ἐν Αἰγύπτῳ; δοκεῖ δ' ἐνυδρὸς αὕτη ἡ χώρα εἶναι. ἔστι δὲ τὰ ἐλώδη ἐνυδρα· οἱ δὲ σίκυοι αὐτοὶ ὑγρότεροι· διὸ καὶ οἱ κηπαῖοι φαῦλοι εἰσίν. πότερον ὅτι εἰς βάθος διὰ σκληρότητα τῆς γῆς ἀναγκάζονται φυτεῦσθαι; ἢ γὰρ πηλώδης καὶ πεδιάς μάλιστα γίνεται σκληρά, οἱ δὲ εἰς βάθος φυτευθέντες βελτίους. ἢ διότι ξηρὰν δεῖ εἶναι τὴν γῆν διὰ τὸ αὐτὸ εἶναι ὑγρὸν φύσει; οὕτω γὰρ ἀντισπώμενον ἐπὶ τὸ μέσον ἤξει. ἢ δὲ ἐλωδεστέρα μὲν βαθεῖα δὲ τροφήν ἴσχει καὶ διὰ τὸ βάθος τῆς γῆς καὶ διὰ τὸν τόπον, καὶ οὐχ ὑπερβάλλουσιν διὰ τὸ ξηραίνεσθαι τὴν γῆν πάλιν.

Διὰ τί τὸ πῆγανον δυσώδεις τοὺς ἰδρωτάς ποιεῖ, καὶ ἔνια τῶν μύρων; ἢ ὅτι ὅσων ἐν τῇ ὁσμῇ βαρύτης ἐνὶ καὶ δριμύτης, ταῦτα κεραννύμενα ταῖς περιττωματικαῖς ὑγρότησι κακωδεστέραν ποιεῖ τὴν ὁσμήν;

Διὰ τί τὸ πῆγανον βασκανίας φασὶ φάρμακον εἶναι; ἢ διότι βασκαίνεσθαι δοκοῦσι λάβρως ἐσθίοντες; ἢ ὑφορώμενοί τινας δυσχερείας καὶ περὶ τὰ προσφερόμενα ὑπόπτως ἔχοντες; ἐπιλέγουσι γοῦν, ὅταν τῆς αὐτῆς τραπέζης ἰδίᾳ τι προσφέρονται, μεταδιδόντες, “ἵνα μὴ βασκάνης με.” ἅπαντες οὖν μετὰ ταραχῆς τῶν βρωμάτων

προσοίσονται τὸ διδόμενον ὑγρὸν ἢ σιτίον, ὅφ' ὧν ἡ καταλαμβανομένων ἢ ἀπεμουμένων μετεωρισθέντα τὰ σιτία συνεξέπεσε καὶ τὰ πνεύματα ὑπὸ τῶν ὑγρῶν πόνους καὶ στρόφους παρέχει. τὸ πήγανον οὖν προεδεσθὲν, θερμαντικὸν ὄν τῇ φύσει, ἡραίωσε τὸ δεχόμενον ἄγγειον τὰ σιτία καὶ τὸ ἄλλο σῶμα. διὸ ἔξωθεν τὸ ἐγκαταλαμβανόμενον πνεῦμα συμβαίνει.

Διὰ τί ἡ ὀρίγανος ἐμβαλλομένη τῷ γλεύκει γλυκὺν ποιεῖ τὸν οἶνον; ἐμβάλλονται δὲ δύο κοτύλαι εἰς τὸν ἀμφορέα. ἡ ὅτι ἐξαίρει δι' ὧν ἡ αὐστηρότης γίνεται, τὸ ὕδατῶδες καὶ τὸ τρυγῶδες ἀναδεχομένη τῇ ξηρότητι εἰς αὐτήν; σημεῖον δὲ ὅτι ἐκ τούτων τὸ αὐστηρόν· οἱ γὰρ οἶνοι ἦττον μαλακοί, ἐὰν ὕδωρ παραχέθῃ, καὶ ἐὰν ἐν τῇ τρυγί πλείω χρόνον ἐάσῃ τις. καὶ ὅταν ποιῶσι γλυκύ, ἡλιῶσι τὰς σταφυλὰς πολὺν χρόνον, καὶ ὁ ἥλιος ἀφαιρεῖ τὸ ὕδατῶδες καὶ [927a] τὸ λοιπὸν συμπέττει. ταῦτό δὲ τοῦτο ποιεῖ καὶ ἡ ὀρίγανος· ξηρὰ γὰρ καὶ θερμή, ὥστε εἰκότως διαμένει.

Διὰ τί αἱ μέλαιναι μυρρίναι πυκνοφυλλότεροί εἰσι τῶν λευκῶν μυρρινῶν; ἡ ὅτι ἀγριώτεραι τὸ γένος; σημεῖον δὲ ὅτι γίνονται ἐν τοῖς ἀγροῖς καὶ ἥκιστα μεταβάλλουσιν ὑπὸ τῆς ἐπιμελείας. τὰ δὲ ἄγρια πάντα πυκνοφυλλότερα· διὰ γὰρ τὸ ἦττον πέττειν τὸν καρπὸν εἰς τὰ φύλλα ἢ τροφήν τρέπεται.

ΚΑ. ΟΣΑ ΠΕΡΙ ΑΛΦΙΤΑ ΚΑΙ ΜΑΖΑΝ ΚΑΙ ΤΑ ΟΜΟΙΑ.

Διὰ τί ἡ πτισάνη καὶ τὸ ἄλευρον ἐλαίου ἐπιχειομένου λευκότερα γίνεται; καίτοι τὸ ἔλαιον πυρρόν. ἢ ὅτι πέφυκε μιγνύμενον τῷ ὑγρῷ ἀφρίζειν; τοῦτο δὲ ἡ λευκότης. ἡ δὲ μῆξις τρίψει καὶ κινήσει. μίγνυται δὲ μᾶλλον τοῖς σωματικοῖς· ἐν δὲ τοῖς ἐνήμασι τοῦτο συμβαίνει, διὸ καὶ λευκότερα ποιεῖ.

Διὰ τί ἡ ἐκ τοῦ πυροῦ τροφὴ μάλιστα ἀρμόττει τοῖς σώμασι καὶ μᾶλλον τρόφιμος ἢ ἡ ἐκ τῶν κριθῶν; ἢ διότι μετρίαν ἔχει γλίσχρότητα; δεῖ δὲ τὴν τροφήν ἔχειν τοῦτο· προσφῦναι γὰρ δεῖ καὶ προσκολληθῆναι τῷ σώματι· οὗ αἴτιον τὸ γλίσχρον. ἀλλὰ ψαθυρότερον· διὸ αἱ τετριμμέναι σφόδρα μᾶζαι τροφιμώτεραι τῶν ἀτρίπτων.

Διὰ τί τῶν μὲν ἀλεύρων τὰ πρῶτα, τῶν δὲ ἀλφίτων τὰ τελευταῖα λαμπρότερα; ἢ διότι τὸ μὲν καπυρόν ὃν περιθραύεται, τὸ δὲ μαλακὸν ἐνθλίβεται; λαμπρότερον δὲ ἐν ἀμφοτέροις τὸ ἐντός.

Διὰ τί οἱ ἄρτοι λευκότεροι φαίνονται ψυχροὶ ὄντες ἢ θερμοὶ; ἢ διὰ τὴν αὐτὴν αἰτίαν τρόπον τινὰ καὶ τὸ ἔλαιον λευκότερον τοῦ προσφάτου τὸ παλαιόν; αἴτιον γὰρ τῆς μελανίας τὸ ὕδωρ, τοῦτο δὲ ἐν ἀμφοτέροις πλείον προσφάτοις οὖσιν· χρονιζομένοις δὲ διὰ τὸ ἐξατμίζειν λείπεται ἔλαττον τὸ ἐπιπολῆς. ἐξατμίζει δὲ τοῦ μὲν ἐλαίου ἢ ὁ χρόνος ἢ ὁ ἥλιος· ἐκ δὲ τῶν ἄρτων ψυχομένων τὸ θερμὸν ἐξίον ψυχρῶν μὲν ὄντων ἐξελήλυθεν, ἐν δὲ θερμοῖς οὖσιν ἔτι ἔνεστιν.

Διὰ τί οἱ ἀναλοι ἄρτοι πλείονα σταθμὸν ἔχουσι τῶν ἡλισμένων, τῶν ἀλῶν αὐτοῖς ἴσων ὑπαρχόντων; εἰκὸς δὲ ἦν τοῦναντίον· οἱ γὰρ ἄλες πρόσκεινται τε καὶ βαρύτεροι τοῦ ὕδατός εἰσιν. ἢ ὅτι ξηραίνουν οἱ ἄλες; διὸ καὶ σώζεται ἄσηπτα τὰ τεταριγευμένα· ἀναλίσκεται γὰρ καὶ ξηραίνεται [927b] τὸ ὑγρὸν ὑπ' αὐτῶν, ὃ σήπεται ὑπὸ τοῦ θερμοῦ. καὶ ἐν τῷ ἄρτῳ οὖν ἀναλίσκεται τὸ ὑγρὸν ὑπὸ τοῦ ἀλός, καὶ ἀποπνεῖ ἔξω. διὸ καὶ οἱ ἔωλοι ἄρτοι κουφότεροί εἰσι τῶν θερμῶν, ψυχρότεροι ὄντες. ἐν δὲ τοῖς μὴ ἡλισμένοις τοῦτο τὸ ὑγρὸν πλείον ἐνυπάρχον ποιεῖ βαρυτέρους αὐτούς.

Διὰ τί οἱ μὲν ψυχροὶ ἄρτοι ἂν βρεχθέντες ἄψωνται ἀλλήλων, οὐ συνέχονται, οἱ δὲ θερμοὶ; ἢ ὅτι οἱ μὲν ψυχροὶ μετὰ τῆς ἀτμίδος ἀφιάσι τὸ ἐν αὐτοῖς γλίσχρον ὑγρὸν, οὗ ἐξελθόντος οὐ κολλῶνται (τὸ

γὰρ ὕδωρ ᾧ ἐβρέχθησαν, ψαθυρότερόν ἐστιν), οἱ δὲ θερμοὶ ἔχουσιν
τινα γλισχρότητα. ὅταν μὲν οὖν βεβρεγμένων αὐτῶν ἡ ἀτμίς ἐξίῃ, τὸ
μὲν θερμὸν διαπνεῖ διὰ λεπτότητα, τὸ δὲ κολλῶδες συνεξίον αὐτῷ
καὶ μινύμενον τῷ ὑγρῷ προσέρχεσθαι ποιεῖ ἐν αὐτοῖς.

Διὰ τί τῶν ἀλευρῶν τὰ ἄλφιστα λαμπρότερα ἐστὶ, τῶν δὲ
ἀλφίτων τὰ τελευταῖα; ἢ ὅτι τὸ μὲν ἄλφιτον καπυρὸν ὃν
περιθραύεται, οἷον μάλιστα πάσχει πλεῖστον χρόνον κοπτόμενον, τὸ
δὲ μαλακὸν καὶ λεπτὸν ἄλευρον, ὃ ἐστὶν ἐντὸς τοῦ πυροῦ, ἐκθλίβεται
πρῶτον. λαμπρότατον δὲ ἐστὶν ἐν ἀμφοτέροις τὸ ἐντός.

Διὰ τί ἡ μὲν μᾶζα ὅσῳ ἂν μᾶλλον τριφθῇ, δυσδιαχωρητοτέρα
γίνεται, ὁ δὲ ἄρτος εὐδιαχωρητότερος; ἢ διὰ τὸ τριφθῆναι σφόδρα τὸ
σταῖς μικρότερον γίνεται; τὸ δὲ γλίσχρον τοιοῦτόν ἐστιν, ὑπὸ δὲ τοῦ
πυρὸς πάντοθεν ἐξήρηται τὸ ὑγρὸν τοῦ ἄρτου, ὥστε ψαθυρότερον
γίνεται τοῦ ὑγροῦ ἐξαιρεθέντος ὅλως, ὅσῳ ἂν μᾶλλον τριφθῇ, διὰ τὸ
ἐν τῇ τρίψει μικρομερέστερον γεγενέαι· τὸ δὲ ψαθυρὸν
εὐπεπτότερόν ἐστιν. ἢ δὲ μᾶζα ὅσῳ ἂν μᾶλλον τριφθῇ, γλισχροτέρα
γίνεται τοῦ ὑγροῦ μεμιγμένου· τὸ δὲ γλίσχρον οὐκ εὐδιαίρετον. τὰ δὲ
τοιαῦτα δύσπεπτά ἐστιν· δεῖ γὰρ τὸ πεφθισόμενον διαιρεθῆναι εἰς
μικρά.

Διὰ τί ἡ μὲν μᾶζα τριβομένη ἐλάττων γίνεται, τὸ δὲ σταῖς
μεῖζον; ἢ ὅτι τὸ μὲν ἄλφιτον βρεχθὲν καὶ τριβόμενον συνίζει τῇ τοῦ
ὑγροῦ κολλήσει διὰ τὸ ἀραιὸν εἶναι καὶ χονδρόν, τὸ δὲ ἄλευρον
μετεωρίζεται διὰ τὸ πυκνὸν εἶναι σφόδρα; τὰ γὰρ πυκνὰ τριβόμενα
θερμαίνεται, θερμαινόμενα δὲ καὶ πνευματούμενα μετεωρίζεται,
καθάπερ καὶ ἡ σάρξ.

Διὰ τί δὲ πυρούμενον τὸ σταῖς μεῖζον γίνεται ἢ ἡ [928a] μᾶζα;
ἢ ὅτι ἔχει ὑγρὸν οὐ κεχωρισμένον, ὥστε ἐξίεναι θερμαινόμενον διὰ
τὴν τρίψιν· ἐξ οὗ θερμαινόμενου πνεῦμα γίνεται, ἐκ δὲ τοῦ πλείονος
ὑγροῦ ἀνάγκη γίνεσθαι πλεῖον πνεῦμα.

Διὰ τί τοῦ μέλιτος κολλητικωτέρου ὄντος ἢ τοῦ ὕδατος, τὸ τῷ
μελικράτῳ φυραθὲν ἄλευρον ψαθυρότερον γίνεται, ὅταν ἐψηθῇ ἢ
ὀπηθῇ, ἢ τὸ τῷ ὕδατι; ἢ διότι τὸ μὲν ὑπὸ τοῦ πυρὸς πήγνυται καὶ
συνίσταται, τὸ ὕδωρ, τὸ δὲ μέλι συνιστᾷ μὲν ἀλλ' ἐπιξηραίνει, διὸ
μᾶλλον ψαθυρὸν ποιεῖ· ἢ γὰρ ψαθυρότης ὑπὸ ξηρασίας γίνεται.

Διὰ τί οἱ δίπυροι ἄρτοι ψυχθέντες οὐ γίνονται σκληροί; ἢ ὅτι
ἔχει τινὰ ἐν αὐτῷ ὁ πυρὸς γλυκὺν καὶ γλίσχρον χυμόν, ὅς ἐστιν
αὐτοῦ καθάπερ ψυχῇ; σημεῖον δέ· ξηραίνόμενος μὲν γὰρ ὅλως

κενοῦται, νοτιῶν δὲ ἐκφύεται. τοῦ οὖν χυμοῦ τούτου ἐνυπάρχοντος καὶ ἐν τῷ ἀλεύρῳ καὶ μάλιστα τῷ καθαρωτάτῳ, σταιτὸς γενομένου τοῦ ἀλεύρου καὶ τριβομένου συμβαίνει αὐτό. σημεῖον δέ· ἐψόμενον γὰρ διαχωρητικώτερον γίνεται, ὁπτωμένου μὲν οὖν τὸ πρῶτον τοῦ ἄρτου, τὸ ψαθυρὸν καὶ ἐλαφρὸν τοῦ δὲ ὑγροῦ τοῦ ἐκ τοῦ ἄρτου ἀπατμίζει, καὶ τοῦ ἀλεύρου τὸ ἀχυρωδέστατον ἀποκαίεται. ἐξαيرهθέντος δὲ καὶ τριβομένου πάλιν τοῦ σταιτός, τό τε τοῦ ἀλεύρου λειότατον καὶ τοῦ ὑγροῦ γλισχρότατον λειπόμενα μίγνυται μᾶλλον ἑαυτοῖς, διὰ τε τὸ τοιαῦτα καὶ μᾶλλον γεγενέσθαι, καὶ διὰ τὴν πύρωσιν· βαφῇ γὰρ ἢ μῖξις αὐτῶν ὁμοία γίνεται, ὥστε γίνεσθαι τὸ ὕστερον τριφθὲν σταῖς ὅμοιον τῷ ἐψομένῳ ἀλεύρῳ. καὶ γὰρ ἐκεῖνο, τριφθέντος τοῦ σταιτός καὶ λειφθέντος τοῦ λεπτοτάτου ἀλεύρου καὶ τοῦ γλισχροτάτου ὑγροῦ, πυρῳθὲν κολλῶδες γίνεται καὶ ἀνεξίκμαστον· τό τε γὰρ γλίσχρον δυσδιαίρετον, καὶ τὸ πυκνὸν οὐθὲν δι' αὐτοῦ προίεται. ὑγρότατον οὖν τοῦτο, καὶ διὰ πυρὸς πάσχει ἄρτος διὰ τὰ εἰρημένα· ἔχων δὲ αἰεὶ ὑγρότητα οὐ γίνεται σκληρός.

Διὰ τί τῆς τροφῆς καὶ τῆς ξηρᾶς καὶ τῆς ὑγρᾶς ἐνίοις δυνάμεθα πολὺν χρόνον χρῆσθαι, οἷον τῇ γινομένη τροφῇ ἐξ ἀλφίτων καὶ ἀλεύρων καὶ τοῖς οἴνοις τοῖς αὐστηροῖς καὶ ὕδατι, τοῖς δὲ οὐ δυνάμεθα, καὶ ταῦτα ἡδίοισιν οὖσιν; ἢ ὅτι τὰ μὲν ἐστὶ τῶν προσφερομένων ἐπιπολαστικά καὶ τρόφιμα, ὥστε καὶ ὅταν κενωθῶσι, τῆς πρώτης τροφῆς ἀναλωθείσης ἔτι ἔνεστιν ἐν τῷ σώματι πολλὴ δύναμις, ὥς [928b] μὲν πρὸς τὴν πρώτην ἐργασίαν τοῦ σώματος πεφθεῖσα, ὥς δὲ πρὸς τὸ τέλος καὶ τὴν ἐκ διαδοχῆς γινομένην ἄπεπτος; τοιαῦτα δὲ ἐστὶ καὶ τῶν ἡδέων τὰ πλεῖστα. τὰ μὲν γὰρ λιπαρὰ καὶ γλυκέα καὶ πίονα ἡδιστα δοκεῖ εἶναι γενομένοις ἡμῖν, ταῦτα δὲ ἐστὶ πάντα τὰ τρόφιμα καὶ οὐκ ἄπεπτα καὶ ἐπιπολαστικά, ἐν ἧ ἂν ἡ διαφορᾷ· ὥστε ἔναυλον εἶναι τὴν δύναμιν, ἐάν τις αὐτῶν πληρωθῇ καὶ μὴ ταχὺ ἐκλίπῃ τὴν αἴσθησιν. οὐ γὰρ μόνον ἐν τῇ κοιλίᾳ ἐνόντων γίνεται ἡ πλήρωσις, ἀλλὰ καὶ διαδοθείσης τῆς τροφῆς ἐν ἄλλοις μέρεσιν. ἢ οὐ μόνον τοῦτο αἴτιον, ἀλλὰ καὶ τὸ τῇ φύσει ἔνια σύμμετρα εἶναι καὶ οἰκεῖα ἡμῖν; πάντα γὰρ τὰ τοιαῦτα διὰ τὸ κατὰ φύσιν εἶναι μᾶλλον προσίεται τὰ σώματα, τὰ δὲ παρὰ φύσιν ἥττον. ἄλλα τε ἄλλη κράσει ἀρμόττει, οἷον τὸ μέλι ταῖς μελίτταις κατὰ φύσιν ἐστὶν ὥστε προσφέρεσθαι μόνον· καίτοι ἀσθενεῖς γέ εἰσι τὴν δύναμιν. ὥστε δεῖ λείπειν τὸ ἀναλίσκόμενον, ἀλλ' εἶναι ἀνάλογον τὸ πλῆθος πρὸς τὴν ἰσχὺν τὴν ἀπὸ τῶν

ἀνθρώπων· ὥστε ὅσα τῶν ἡδέων τοιαῦτά ἐστι, διὰ μὲν τὸ ἐν τῇ φύσει ἦττον ὑπάρχειν ἡδέα φαίνεται, ὀλίγον δὲ χρόνον· εἶτα πληροῖ ταχύ. τῶν δὲ κατὰ φύσιν ἀεὶ δέονται, ὥστε καὶ προσφερομένων συνεχῶς δι' αὐτὰ οὐ τῶν ἡδίστων, ἀλλ' ἐτέρων ἦττον πληροῦνται.

Διὰ τί τὰ αὐτὰ συνεθιζόμενοις τε ἡδέα φαίνεται καὶ λίαν συνεχῶς προσφερομένοις οὐχ ἡδέα; τὸ δὲ ἔθος ἐστὶ τὸ πολλάκις καὶ συνεχῶς τι ποιεῖν. ἢ ὅτι τὸ μὲν ἔθος ἔξιν δεκτικὴν τινος ἐν ἡμῖν ποιεῖ, οὐ πλήρωσιν, τὸ δὲ συνεχῶς προσφέρεσθαι τι πληροῖ τὴν ἐπιθυμίαν, καὶ καθάπερ αἴτιον; ἔστι γάρ τι καὶ ἡ ἐπιθυμία. αἱ μὲν οὖν ἔξεις γυμναζόμεναι αὖξονται καὶ ἐπιδιδόασιν· τὰ δὲ ἀγγεῖα σαττόμενα οὐδὲν μείζω γίνεται. διόπερ τὸ μὲν ἔθος ὃν γυμνάσιον αὖξει τὴν δεκτικὴν ἔξιν· τὸ δὲ συνεχῶς προσφερόμενον σάττει μὲν καὶ πληροῖ τὴν ἐπιθυμίαν, ἥς πληρωθείσης οὐκέτι προσιέμεθα, αὖξει δὲ οὐθὲν αὐτὴν διὰ τὰ προειρημένα ἐπὶ τῆς σάξεως. ἔτι τὸ ἔθος οὐ τῷ ἀεὶ ἡδύνειν ἡδύ ἐστι (λυπεῖ γὰρ καὶ τὰ τοιαῦτα, ἐάν τις συνεχῶς ποιῇ) ἀλλὰ τῷ τὴν ἀρχὴν τοῦ ἔργου ἡδέως ἡμᾶς προσιέσθαι, καὶ πλείω χρόνον δύνασθαι ταῦτόν ποιεῖν ἢ ἀσυνήθεις ὄντας. ἐν ᾧ οὖν καὶ τοῦτο λυπεῖ ἡδὺ ὄν, ἐν ταῦτῳ καὶ τὰ ἄλλα ἡδέα. συνεχῶς γὰρ γινόμενα ἢ προσφερόμενα ἀμφοτέρω λυπεῖ. [929a] αἴτιον δὲ τὸ μὴ ἀπείρους ἡμᾶς ἐν αὐτοῖς δυνάμεις ἔχειν τὰς δεκτικὰς καὶ ποιητικὰς, ἀλλὰ πεπερασμένας, αἱ τυγχάνουσιν τοῦ συμμέτρου αὐταῖς (τοῦτο γὰρ συνεχῶς ἐστὶν αἰσθητὸν εἰς ἐπίδοσιν) αἱ μὲν πληροῦνται, αἱ δὲ ἀδυνατοῦσιν ἐνεργεῖν.

Διὰ τί τὸ μὲν σταῖς γίνεται τριβόμενον λευκόν, ἡ δὲ μᾶζα μελαντέρα; πότερον ὅτι ξηραίνεται μᾶλλον τὸ ἐπιτολῆς ἐν τῷ ἀλφίτῳ, οἷον ἐν ὑγρῷ θερμόν, ὃ ποιεῖ τὴν λευκότητα; ἢ διὰ τὸ πεπυρῶσθαι ἔλκει τὸ ὑγρὸν εἰς αὐτό, μεγαλομερέστερον ὄν.

Διὰ τί τὰ ἄλφιστα μᾶλλον τῷ ὕδατι συμφύεται φυρόμενα ἢ τῷ ἐλαίῳ, ὄντι γλισχροτέρω; καίτοι κολλητικώτερον τὸ γλίσχρον, τὸ δὲ ἔλαιον τοῦ ὕδατος γλισχρότερον, ἢ ὅτι λεπτότερον τὸ ὕδωρ, ὥστε εἰσέρχεται εἰς ἅπαν καὶ μαλακὰ ποιεῖ, συμφύεται τε μᾶλλον καὶ συνθλίβεται πρὸς ἄλληλα, καίτοι θλιβόμενα καὶ χωρὶς τῆς τρίψεως.

Διὰ τί οἱ ἄτριπτοι ἄρτοι καὶ οἱ σφόδρα τετριμμένοι ρήγνυνται; ἢ ὅτι οἱ μὲν ἄτριπτοι διὰ τὸ ἀσύνδετοι εἶναι; ἢ γὰρ τρίψις συνδεῖ· προωδοποιοῦνται οὖν τὸ ρήγνυσθαι. ἔτι ἀμιγῆς καὶ πολὺ ἔχουσι τὸ ὑγρόν. οἱ δὲ τετριμμένοι σφόδρα λίαν εἰσὶ ξηροὶ διὰ τὸ ὀλίγον ἔχειν ὑγρόν· θερμαινομένων γὰρ πᾶν ἐξέρχεται. ὥστε ἅμφω διὰ τὸ πολὺ

ὕγρὸν ἐξιέναι ῥήγνυνται· πολὺ γὰρ ἐν μὲν τοῖς ἀτρίπτοις ἀπλῶς ἔνεστιν, ἐν δὲ τοῖς τετριμμένοις πρὸς τὸ ὑπόλοιπον.

Διὰ τί κουφότερον τὸ φύραμα γίνεται ἢ ἄμφω, τό τε ὑγρὸν καὶ τὸ ἄλφιτον; πότερον ὅτι μιγνυμένων πνεῦμα συγκατακλείεται; ἢ ὅτι ὑπὸ τοῦ θερμοῦ τοῦ ἐν τοῖς ἀλφίτοις ἐξατμίζεται τοῦ ὕδατος, ὥστε ἔλαττον γίνεται τὸ μεμιγμένον; ὁ δὲ ἀήρ, εἰ καὶ μίγνυται, οὐθὲν ἂν κουφότερον ποιοῖ· ἔχει γὰρ βάρος καὶ ὁ ἀήρ ἐν τῷ ἀέρι.

Διὰ τί μετὰ τοῦ ἀλφίτου πινόμενον τὸ γάλα καὶ ὁ γλυκὺς φαίνεται γλυκύτερα; πότερον παρὰ τὸ μὴ γλυκὺ μᾶλλον φαίνεται; τὸ γὰρ ἄλφιτον οὐ γλυκύ. ἢ ὅτι ἐνδιατρίβει τὸ ἄλφιτον ἔχον γλυκύτητα, ὥστε πλείονι χρόνῳ ἢ αἰσθησις.

Διὰ τί ἦττον ἄκρατον φαίνεται τὸ αὐτὸ πόμα μετὰ τοῦ ἀλφίτου πινόμενον; πότερον ἢ ὅτι κεράννυσιν ἄλλο ἔχον μετ' ἄλλου; ἢ ὅτι ἀντιφράττει τῷ πόματι καὶ ἀφανίζει, ἀντισπῶν εἰς αὐτό;

[929b] Διὰ τί ὁ χόνδρος πλεῖον ὕδωρ δέχεται ἢ οἱ πυροὶ ἐξ ὧν ὁ τοιοῦτος ἐγένετο χόνδρος; ἢ ὅτι ἄλευρά πῶς ἐστὶν ὁ χόνδρος, τὰ δὲ ἄλευρα πλεῖον δέχεται. καὶ γὰρ γίνεται ὁ ὄγκος πλείων ἢ ὁ τῶν πυρῶν· σέσακται γὰρ καὶ τὰ ἐν τοῖς πυροῖς. τὰ δὲ πλείω χωρεῖ πλεῖον. καὶ τοῦτο καὶ ὅτι ἔχει θερμότητα καὶ τὰ ἄλευρα καὶ ὁ χόνδρος. τὸ δὲ θερμὸν καὶ ἔλκει μᾶλλον τὸ ὑγρὸν, καὶ ἐξαναλίσκει ἐξατμίζον.

Διὰ τί τὸ ἄλευρον τριβόμενον μεῖζον πολὺ γίνεται ἢ τὸ ἄλφιτον κατὰ λόγον; ἢ ὅτι τὸ μὲν πολὺ ὕδωρ δέχεται, τὸ δὲ ὀλίγον; διὰ τί δὲ δέχεται πλεῖον; μᾶλλον γὰρ εἰκὸς τὸ ἄλφιτον· πεπύρωται γάρ, τὸ δὲ ἄπυρον· μᾶλλον δὲ ξηρὸν τὸ πεπυρωμένον. ἢ διότι τρῖψιν μᾶλλον δέχεται τὸ ἄλευρον; τούτου δὲ αἴτιον τὸ μικρομερέστερον εἶναι. ὥσπερ οὖν ὁσαπλάσιόν ἐστι δυνάμει τῇ μικρότητι, τοσαυταπλάσιον δέχεται τὸ ὕδωρ. κόλλη γὰρ χρῆται τῷ ὕδατι, ὥσπερ καὶ Ἐμπεδοκλῆς μετήνεγκεν ἐν τοῖς Περσικοῖς εἰπὼν “ἄλφιτον ὕδατι κολλήσας.” καὶ ἀναλίσκει πολὺ διὰ τοῦτο.

Διὰ τί δὲ καὶ πεπυρωμένον τὸ σταῖς μεῖζον γίνεται ἢ ἡ μᾶζα; ἢ ὅτι ἔχει ὑγρὸν οὐ κεχωρισμένον, ὥστε ἐξιέναι θερμαινόμενον, οὐ πνεῦμα γινόμενον, καὶ οὐ δυνάμενον ἐξιέναι ὁμοίως καὶ ἐν τῇ μάξῃ διὰ τὴν πυκνότητα τοῦ σταιτός; πυκνὸν γὰρ τὸ ἐκ μικρομερεστέρων. αἶρει οὖν, καὶ ποιεῖ τὸν ὄγκον. ἔτι δὲ καὶ πλεῖον ἔχει τὸ ὑγρὸν, ἐξ οὗ θερμαινόμενου πνεῦμα γίνεται· ἐκ δὲ τοῦ πλείονος ἀνάγκη γίνεσθαι πλεῖον.

Διὰ τί οἱ περὶ τὴν τῶν σιτίων ἐργασίαν, οἱ μὲν περὶ τὰς κριθὰς ἄχροοι γίνονται καὶ καταρροϊκοί, οἱ δὲ περὶ τοὺς πυροὺς εὐεκτικοί; ἢ διότι εὐπεπτότερος ὁ πυρὸς τῆς κριθῆς, διόπερ καὶ αἱ ἀπόρροιαι;

Διὰ τί ὁ ἄρτος, ἐὰν μὲν τις αὐτὸν ὀπτᾷ, σκληρότερος γίνεται, ἐὰν δέ τις αὐτὸν χλιαίνει, ὑγρότερος ἄχρι τινός; ἢ ὅτι ὀπτωμένου αὐτοῦ τὸ ὑγρὸν ἐκπορεύεται; σκληρότερος οὖν γίνεται· ἐπιθερμαινομένου δὲ τὸ ὑγρὸν συσταθὲν διαχεῖται ὑπὸ τοῦ πυρός, διὸ ὑγρότεροι γίνονται.

Διὰ τί τὰ μὲν ἄλευρα ψυχόμενα ἥττον σάττεται, τὰ δὲ ἄλφита μᾶλλον; ἢ ὅτι τὰ μὲν μικρομερῇ οὐ διαλείπει χώραν, καὶ τὰ βαρέα τῇ θλίψει τὰ πλείω ἐλάττω κατέχει τὸ ἴσον; τὰ μὲν οὖν ἄλφита ἀδρά ἐστιν. ψυχόμενα οὖν ἐλάττω γίνεται, ὥστε τὸ ἔλαττον συμπίεζει τὸ πλεόν. τὰ [930a] δὲ ἄλευρα ὑπάρχει μὲν μικρομερῇ ὄντα, ὥστε οὐ διὰ τοῦτο ψύχεται, ἀλλ' ἵνα ἢ κουφότερα καὶ μὴ σάττηται διὰ τὴν θλίψιν· βαρύτερον γὰρ φύσει τὸ ἄλευρον τοῦ ἀλφίτου ἐστίν.

ΚΒ. ΟΣΑ ΠΕΡΙ ΟΠΩΡΑΝ.

Διὰ τί τὴν ὀπώραν ὕστερον ἢ πρότερον φαγοῦσιν οὐκ ἀνάλογον τοῖς αὐτοῖς ὁ ὄγκος τῆς πληρώσεως γίνεται; ἢ ὅτι βαρυτέρα ἐστὶν ἡ ὀπώρα τῶν σιτίων πολὺ. δηλοῖ δὲ καὶ τὰ σῦκα, ἐὰν ὕστατα βρωθῇ· τελευταῖα γὰρ ἐμεῖται. ἐὰν μὲν οὖν πρῶτα, διὰ βάρος κάτω πορευόμενα εὐρυχωρίαν ἄνω ποιεῖ, ὥστε ῥαδίως δέχεσθαι τὸν ὄγκον τῶν σιτίων. ἀνάπαλιν δὲ εἰσελθόντα τὰ σιτία, διὰ τὸ μὴ κάτω φέρεσθαι, ταχὺ τοῦ ἄνω κενοῦ προσλαμβάνει.

Διὰ τί τῶν γλυκέων ὄντων ὁμοιοτέρων ἡμῖν ἢ τῶν δριμέων, θᾶπτον πληρούμεθα ὑπὸ τῶν γλυκέων; εἰκὸς δὲ ἦν ἥττον· ὑπὸ γὰρ τῶν ὁμοίων ἥττον ἦν εἰκὸς πληροῦσθαι. ἢ ὅτι οὐχ ὁμοίως τό τε ἀγγεῖον πληροῦται ταχὺ, ἐξ οὗ πληρούμεθα, καὶ τὸ τρεφόμενον, ἀλλ' ἐνίοτε ἡ μὲν κοιλία πλήρης ἐστίν, οἷον τῶν διψῶντων, τὸ δὲ δίψος οὐδὲν ἥττον ἐστίν. οὐ γὰρ τῷ ταύτην εἶναι πλήρη παυόμεθα διψῶντες, ἀλλὰ τῷ ἕκαστον τῶν τοῦ σώματος τὸ αὐτῷ οἰκεῖον ἐσπακέσαι, καὶ ὅταν ἐκεῖνα ἀπολάβῃ ἱκανῶς, τότε παυόμεθα διψῶντες. καὶ πεινῶντες δὲ ὡσαύτως.

Διὰ τί θᾶπτον πληρούμεθα ἀπὸ τῶν γλυκέων ἢ ἀπὸ τῶν δριμέων; ἢ ὅτι θᾶπτον παυόμεθα ἐπιθυμοῦντες τῶν γλυκέων; ἢ ὡς μὲν ἡ κοιλία πληροῦται, οὕτω καὶ ἡμεῖς ὑπὸ τῶν γλυκέων; οὐχ ὁμολογεῖται· ὅτι δὲ ἡ ἐπιθυμία θᾶπτον ὑπ' αὐτῶν πληροῦται, τοῦτ' ἂν εἴη λεκτέον. ἢ ὅτι ἡ μὲν ἐπιθυμία ὡς ἀπλῶς εἰπεῖν ἔστι μὲν ἔνδεια, καὶ ὅταν μηκέτι ἔχωμεν τροφήν ἢ ὀλίγην; τὰ μὲν οὖν δριμέα οὐκ ἔστι τρόφιμα, ἀλλὰ τροφήν μὲν ὀλίγην ἔχει, τὸ δὲ περίττωμα πολὺ. εἰκότως οὖν πολλὰ ταῦτα ζητοῦμεν ἐσθίειν, καὶ οὐκ ἐμπιπλάμεθα αὐτῶν τὴν ἐπιθυμίαν, διὰ τὸ ἔτι προσδεῖσθαι τροφῆς, ταῦτα δὲ μὴ ἔχειν τροφήν. τὰ δὲ γλυκέα ἅπαντά ἐστι τροφή, καὶ ἀπὸ μικρῶν τοιούτων πολλὴν λαμβάνει τὸ σῶμα. ὅταν οὖν ἀπολάβῃ πολλὴν τροφήν, οὐκέτι δύναται ἐσθίειν διὰ τὸ μὴ ὑποφέρειν. εἰκότως οὖν θᾶπτον ὑπὸ τῶν γλυκέων πληρούμεθα.

Διὰ τί τὰ περικάρπια καὶ τὰ κρέα, καὶ ὅσα τοιαῦτα, [930b] ἐν τοῖς ἀσκοῖς ἄσηπτα γίνεται, ὅταν σφόδρα φυσηθῶσι, καὶ τὰ ἐν τοῖς ἀκριβῶς περιτωματιζομένοις ὡσαύτως; ἢ διότι σήπεται μὲν κινούμενα πάντα, τὰ δὲ πλήρη ἀκίνητα· ἀδύνατον γὰρ ἄνευ κενοῦ κινήθῃναι, ταῦτα δὲ πλήρη.

Διὰ τί μετὰ τὰ σαπρὰ τῶν περικαρπίων ὁ οἶνος πικρὸς φαίνεται πινόμενος; ἢ ὅτι τὴν πικρότητα ἔχει ἡ σαπρότης ἡ τοιαύτη; τὸ οὖν ἐπιμένον ἐπὶ τῇ γλώττῃ, μιγνύμενον τῷ πόματι καὶ διαχεόμενον, πικρὸν ποιεῖ τὸ πόμα. αὐτὸ δὲ καθ' αὐτὸ ἥττον φαίνεται ἐσθιόμενον διὰ τὸ πολλῶν ἅπτεσθαι καὶ εἰς μικρὰ διανενεμηθῆαι τὸν τοιοῦτον χυμόν.

Διὰ τί τὰ τραγήματα ἐδεστέον; ἢ ἔνεκα τοῦ πιεῖν ἱκανόν; οὐ γὰρ μόνον ποτέον τῆς δίψης χάριν τῆς ἐπὶ τοῖς σιτίοις, ἀλλὰ καὶ μετὰ τὸ σιτίον.

Διὰ τί τὰ ὀπτὰ κάρυα ψυχθέντα χεῖρω γίνεται, καὶ ὁ ἄρτος δὲ καὶ ὁ βάλανος καὶ πολλὰ τῶν τοιούτων, θερμανθέντα δὲ πάλιν βελτίω; ἢ διότι ψυχθέντος μὲν πέπηγεν ὁ χυμός, ἀναχλιανθέντος δὲ πάλιν χεῖται; ἢ δὲ ἡδονὴ γίνεται διὰ τὸν χυμόν.

Διὰ τί ἐπὶ τῇ ἀπολαύσει τῆς ὀπώρας, οἶον σύκων καὶ τῶν τοιούτων, ἢ οἶνον ἄκρατον δεῖ ἐπιπίνειν ἢ ὕδωρ; ταῦτα δὲ ἐναντία. ἢ ὅτι ἡ ὀπώρα καὶ θερμὴ ἐστὶ καὶ ὑγρὰ διὰ τὴν γένεσιν; ἔχει γὰρ πολὺ πῦρ καὶ ὑγρότητα, ὥστε διὰ μὲν τὸ πῦρ οἶον ζέσιν ποιεῖ ὁ χυμός εἴσω, ὅπερ ἔξω τὸ γλεῦκος ποιεῖ. ἥττον δὲ ἔχει δύναμιν καὶ τὰ ἄλλα τὰ ἀκρόδρυα. τὸ δὲ τῆς ὑγρότητος πλῆθος ἀπεψίαν ποιεῖ. τὸ μὲν οὖν ὕδωρ διὰ τὴν ψυχρότητα σβεννύει τὴν ζέσιν, ὁ δὲ οἶνος διὰ τὴν θερμότητα ὡς ἐπὶ τὸ πολὺ· ὥσπερ γὰρ πῦρ ἐνίστε πυρός, ἐὰν ἢ ἔλαττον, ἀφαιρεῖται τὴν ἰσχύν. μᾶλλον δὲ τῇ θερμότητι πεπτικός ἐστὶ τῆς ὑγρότητος, καὶ διὰ βάρος κατακρατεῖ τὸν τῆς ζέσεως ἐπιπολασμόν.

Διὰ τί τῶν ἰσχάδων γλυκύταται αἱ δίχα ἐσχισμένα, οὔτε δὲ αἱ πολυσχιδεῖς οὔτε αἱ ἀσχιδεῖς; ἢ διότι ἐκ μὲν τῶν πολυσχιδῶν διαπέπνευκε καὶ ἐξίκμακε μετὰ τοῦ ὑγροῦ τὸ πλεῖστον τοῦ γλυκέος, ἐν δὲ ταῖς μεμυκυῖαις πολὺ τὸ ὕδατῶδες ἐστὶ διὰ τὸ μὴ ἡτμικέναι. αἱ δ' ἐσχισμέναι μὲν, μὴ εἰς πολλὰ δέ, ἀμφοτέρων τούτων ἐκτός εἰσι τῶν παθημάτων.

Διὰ τί ταῖς καμίνοις ξηραίνόμενα τὰ σῦκα σκληρότερα [931a] γίνεται, ἐὰν ψυχθῇ ἐν τῇ καμίνῳ, ἢ ἂν ἐξαيرهθέντα ψυχθῇ; ἢ ὅτι ἐν μὲν τῇ καμίνῳ ἐξατμίζει πᾶν τὸ ὑγρὸν ὑπὸ τοῦ θερμοῦ, ἔξω δὲ περιεστηκὼς ὁ ἀῆρ ψύχων κωλύει τὸ ὑγρὸν ἐξίέναι καὶ συνίστασθαι; μᾶλλον γὰρ ἐξατμίζει. ἐστὶ δὲ τὰ μὲν ξηρὰ σκληρά, τὰ δὲ ὑγρὰ μαλακά.

Διὰ τί παρὰ τὰ στρυφνὰ ὁ οἶνος καὶ τὸ ὕδωρ φαίνεται

γλυκύτερα, οἷον ἐάν τις βαλάνους ἢ μύρτα ἢ τι τῶν τοιούτων διατράγη; ἢ εἰκότως, καθάπερ καὶ ἐπὶ τῶν ἄλλων; πᾶν γὰρ τὸ αὐτὸ παρὰ τὸ ἐναντίον μᾶλλον φαίνεται, οἱ δὲ τῶν ἐναντίων χυμοὶ ἀντικείμενοί πῶς εἰσιν. ἢ ὅτι, καθάπερ ἐπὶ τῶν βαπτομένων, ὑπὸ τῶν στρυφνῶν ἢ γλῶττα προδιεργάζεται καὶ τοὺς πόρους ἀνοίγεται, ὥστε μᾶλλον διέναι τὸ γλυκύν; καὶ γὰρ τὰ βαπτόμενα τούτου ἔνεκεν προβρέχουσιν ἐν τοῖς στρυφνοῖς, τῷ διεργασθὲν μᾶλλον δέχεσθαι τὴν βαφήν.

Διὰ τί τὰ γλυκέα ἥττον δοκεῖ γλυκέα εἶναι θερμὰ ὄντα ἢ ὅταν ψυχθῇ; πότερον ὅτι ἅμα δύο αἰσθήσεις γίνονται ἀμφοῖν, ὥστε ἢ τοῦ θερμοῦ ἐκκρούει τὴν ἐτέραν; ἢ ὅτι καὶ τὸ γλεῦκος θερμόν· ὥσπερ οὖν πῦρ γίνεται ἐπὶ πῦρ. κωλύει οὖν ἢ θερμότης. ἢ ὅτι τὸ πῦρ ἀφαιρεῖται τὰς δυνάμεις ἀπάντων διὰ τὸ κινητικὸν εἶναι. ἐγγυτέρω οὖν τοῦ μεταβάλλειν ἐστὶ θερμὰ ὄντα, ἀποψυχθέντα δὲ ἔστηκεν.

Διὰ τί ποτε τὰ ἄχυρα τὰ μὲν σκληρὰ πέττει, τὰ δὲ πεπεμμένα οὐ σήπει; ἢ ὅτι τὰ ἄχυρα θερμόν τε καὶ ὀλκόν ἐστίν; τῇ μὲν οὖν θερμότητι πέττει, τῷ δὲ ὀλκὸν εἶναι τὸν ἰχῶρα τὸν σηπόμενον δέχεται, διὸ οὐ σήπει.

Διὰ τί τὰ σῦκα μαλακὰ καὶ γλυκέα ὄντα λυμαίνεται τοὺς ὀδόντας; ἢ διὰ τὴν γλισχρότητα προσέρχεται τοῖς οὖλοις, καὶ παρεμπίπτει διὰ τῶν ὀδόντων εἰς τὰ διὰ μέσου διὰ τὸ μαλακὰ εἶναι, καὶ σῆψιν ποιεῖ ταχέως ἅτε θερμὰ ὄντα; τάχα δὲ ἴσως καὶ διὰ τὴν σκληρότητα τῶν κεγχαμίδων ἐν τῇ τούτων κατεργασίᾳ πονοῦσι ταχέως οἱ ὀδόντες.

ΚΓ. ΟΣΑ ΠΕΡΙ ΤΟ ΑΛΜΥΡΟΝ ΥΔΩΡ ΚΑΙ ΘΑΛΑΤΤΑΝ

Διὰ τί τὸ κῦμα οὐκ ἐπιγελᾷ ἐν τοῖς βαθέσι πελάγεσιν ἀλλ' ἐν τοῖς μικροῖς καὶ βραχέσιν; ἢ ὅτι τὸ μικρὸν ὑγρὸν φερόμενον μᾶλλον διαιρεῖται ὑπὸ τοῦ πνεύματος ἢ τὸ πολὺ;

Διὰ τί τὰ κύματα πρότερον φοιτᾷ ἐνίοτε τῶν ἀνέμων; ἢ ὅτι πρὸς τῇ ἀρχῇ τοῦ πνεύματος ἡ θάλαττα ὥσθεῖσα [931b] πρώτη τὴν ἐχομένην ἀεὶ ταυτὸν ποιεῖ; διόπερ οὔσης αὐτῆς συνεχοῦς καθάπερ μιᾷ πληγῇ συνεχεῖ πάσαις γίνεται. τὸ δὲ ἐν ἐνὶ χρόνῳ γίνεται, ὥστε συμβαίνει τὴν τε πρώτην καὶ τὴν ἐσχάτην ἅμα κινεῖσθαι. ὁ δὲ ἄῤῥ οὐ πάσχει τοῦτο, ὅτι οὔτ' ἐστὶν ἐν σῶμα συνεχές, τῷ πολλὰς πάντοθεν ἀντικρούσεις λαμβάνειν, αἱ πολλάκις κωλύουσι τὴν πρώτην καὶ νεανικωτάτην κίνησιν, τὴν τε θάλασσαν οὐ ποιοῦσι τοῦτο διὰ τὸ βαρυτέραν καὶ δυσκινητοτέραν αὐτοῦ εἶναι.

Διὰ τί τὰ πλοῖα γέμειν δοκεῖ μᾶλλον ἐν τῷ λιμένι ἢ ἐν τῷ πελάγει, καὶ θεῖ δὲ θᾶπτον ἐκ τοῦ πελάγους πρὸς τὴν γῆν ἢ ἀπὸ τῆς γῆς εἰς τὸ πέλαγος; ἢ ὅτι τὸ πλεόν ὕδωρ ἀντερείδει μᾶλλον ἐκ τοῦ ὀλίγου, ἐν δὲ τῷ ὀλίγῳ δέδυκε, διὰ τὸ κρατεῖν αὐτοῦ μᾶλλον; ὡθεῖ γὰρ κάτω τὸ ὕδωρ ἄνωθεν. ἐν μὲν οὖν τῷ λιμένι ὀλίγη ἐστὶν ἡ θάλασσα, ἐν δὲ τῷ πελάγει βαθεῖα. ὥστε καὶ ἄγειν πλέον δόξει ἐν τῷ λιμένι καὶ κινήσεται χαλεπώτερον διὰ τὸ δεδυκέναι μᾶλλον καὶ ἥττον ἀντερείδειν τὸ ὕδωρ. ἐν τῷ πελάγει δὲ τὰναντία τούτων ἐστίν.

Διὰ τί, ὅταν τι ῥιφθῇ εἰς τὴν θάλατταν κυμαίνουσιν, οἶον ἢ ἄγκυρα, γαλήνη γίνεται; ἢ διότι ἴσταται ἡ θάλαττα τῷ φερομένῳ, μεθ' οὗ ἄῤῥ συγκαταφέρεται, ὃς ἐπ' εὐθείας κάτω φερόμενος καὶ ἐνταῦθα ἐπισπασθεὶς συνεπισπᾶται τὸ ἐκ πλαγίου κινοῦν τὴν θάλατταν; ὁ δὲ κλύδων τῆς θαλάττης οὐκ ἄνωθεν κάτω γίνεται ἀλλ' ἐπιπολῆς· οὗ λήξαντος γαλήνη γίνεται. ἔτι συνιοῦσα ἡ θάλασσα εἰς τὰ διαστάντα τῷ φερομένῳ δίνην ποιεῖ. ἡ δὲ δίνη κύκλῳ φέρεται. ἐπεὶ δὲ ἡ εὐθεῖα τοῦ κύκλου κατὰ σημεῖον ἅπτεται, τὰ δὲ κύματα ἐπ' εὐθείας λοξῆς φέρεται, συμβαίνοι ἂν αὐτὰ τοῦ ἐξωτάτου τῆς δίνης κατὰ σημεῖον ἅπτεσθαι, διὰ τε τὰ εἰρημένα καὶ διὰ τὴν τῆς δίνης φοράν, ἢ προσιοῦσα ἀπωθεῖται αὐτά. ἀκύμου δὲ ὄντος τοῦ κατ' αὐτὴν τόπου, γαλήνην ἐν τῇ ῥήξει αὐτῆς συμβαίνει γίνεσθαι, ὅτι συγκαταβὰς ὁ ἄῤῥ τῷ ἐνεχθέντι κάτω, ἀναφερόμενος καὶ ὠθὼν ἄνω

τὴν θάλατταν ὥσπερ πομφολυγοὶ αὐτήν· ἡ γὰρ πομφόλυξ ὑγροῦ ὑπ' αἱρέος κάτωθεν ἀνωθουμένου ἐστίν. πομφόλυξ δὲ πᾶσα λεία καὶ γαληνός ἐστιν. σημεῖα δὲ τῶν εἰρημένων ἐστί· μετέωρος γὰρ ἡ κατὰ τὸ ἐνεχθὲν κάτω θάλαττα τῆς πέριξ γίνεται μικρὸν ὕστερον.

Διὰ τί ἐνίοτε πλοῖα θεόντα ἐν τῇ θαλάττῃ εὐδίας καταπίνεται [932a] καὶ ἀφανῆ γίνεται, ὥστε μηδὲ ναυάγιον ἀναπλεῖν; ἢ ὅταν ἀνθρώδης τόπος ἐν τῇ ὑπὸ τὴν θάλατταν γῇ ῥαγῇ, ἅμα εἰς τὴν θάλατταν καὶ ἔσω ἀκολουθεῖ τῇ τοῦ πνεύματος φορᾷ; ὁμοίως δὲ καὶ πάντῃ φερομένη κύκλῳ φέρεται κάτω. τοῦτο δ' ἐστὶ δῖνος. τὰ δὲ περὶ Μεσσηνὴν ἐν τῷ πορθμῷ πάσχει μὲν τοῦτο διὰ τὸν ῥοῦν (γίνονται γὰρ αἱ δῖναι ὑπὸ τούτου) καὶ καταπίνεται εἰς βυθὸν διὰ ταῦτά τε, καὶ ὅτι θάλαττά τε βαθεῖα καὶ γῆ ὑπαντρος μέχρι πόρρω. φέρουσιν οὖν εἰς ταῦτα ἀποβιαζόμεναι αἱ δῖναι· διὸ οὐκ ἀναπλεῖ αὐτόθι τὰ ναυάγια. ὁ δὲ ῥοῦς γίνεται, ὅταν παυσαμένου τοῦ προτέρου ἀντιπνεύση ἐπὶ τῆς θαλάττης ῥεύσης τῷ προτέρῳ πνεύματι, μάλιστα δὲ ὅταν νότος ἀντιπνεύση. ἀντιπνέοντα γὰρ ἀλλήλοις τὰ ῥεύματα παρεκθλίβεται ὥσπερ ἐν τοῖς ποταμοῖς, καὶ γίνονται αἱ δῖναι. φέρεται δὲ ἐλιττομένη ἡ ἀρχὴ τῆς κινήσεως ἄνωθεν ἰσχυρὰ οὔσα. ἐπεὶ οὖν εἰς πλάγιον οὐκ ἔστιν ὁρμᾶν (ἀντωθεῖται γὰρ ὑπ' ἀλλήλων), ἀνάγκη εἰς βάθος ὠθεῖσθαι, ὥστε καὶ ὁ ἂν ληφθῇ ὑπὸ τῆς δίνης, ἀνάγκη συγκαταφέρεσθαι. διὸ ἀνάσιμα τὰ πλοῖα ποιοῦνται ἤδη γὰρ ὀρθόν ποτε μνημονεύεται καταποθέν.

Διὰ τί ἡ θάλαττα λευκότερα ἢ ἐν τῷ Πόντῳ ἢ ἢ ἐν τῷ Αἰγαίῳ; πότερον διὰ τὴν ἀνάκλασιν τῆς ὀψεως τὴν γινομένην ἀπὸ τῆς θαλάττης εἰς τὸν ἀέρα; ὁ μὲν γὰρ περὶ τὸν Πόντον ἀῆρ παχὺς καὶ λευκός, ὥστε καὶ τῆς θαλάττης ἡ ἐπιφάνεια τοιαύτη φαίνεται, ὁ δὲ ἐν τῷ Αἰγαίῳ κυανοῦς διὰ τὸ μέχρι πόρρω εἶναι καθαρός, ὥστε καὶ ἡ θάλαττα ἀνταυγοῦσα τοιαύτη φαίνεται. ἢ ὅτι πᾶσαι αἱ λίμναι λευκότεραι τῆς θαλάττης; ὁ δὲ Πόντος ἐστὶ λιμνώδης διὰ τὸ πολλοὺς ποταμοὺς εἰς αὐτὸν ῥεῖν. αἱ δὲ λίμναι διαλευκότεραι τῆς θαλάττης καὶ τῶν ποταμῶν· γράφουσι γοῦν οἱ γραφεῖς τοὺς μὲν ποταμοὺς ὠχροῦς, τὴν δὲ θάλατταν κυανέαν. ἢ ὅτι διὰ μὲν τοῦ ποτίμου διέρχεται ταχὺ ἡ ὄψις, καὶ οὐκ ἀνακλᾶται πρὸς τὸν ἀέρα, ἀπὸ δὲ τῆς θαλάσσης οὐ; οὐτ' ἄνω ἀνακλᾶται διὰ τὸ μὴ λεῖον εἶναι τὸ ὕδωρ· κάτω δὲ ἀποκάμνει βαδίζουσα· διὸ μέλαινα φαίνεται. ἐν δὲ τοῖς λιμνώδεσιν ἐπιπολῆς ὄντος τοῦ ποτίμου, κάτω δὲ τοῦ ἄλμυροῦ, οὐ διέρχεται, ἀλλ' ἀνακλᾶται πρὸς τὴν αὐγὴν· διὸ φαίνεται λευκὴ ἢ

ἐπιφάνεια αὐτῆς.

Διὰ τί ἡ θάλαττα τοῦ ποτίμου ὕδατος ἦττον ψυχρά, [932b] καὶ τὰ ἀλυκὰ τῶν γλυκέων; πότερον ὅτι πυκνότερον ἢ θάλαττα καὶ μᾶλλον σῶμα; τὰ δὲ τοιαῦτα ἦττον ψύχεται, ὥσπερ καὶ θερμαίνεται μᾶλλον· σωστικωτέρα γὰρ τοῦ θερμοῦ διὰ τὴν πυκνότητα. ἢ ὅτι λιπαρώτερα ἢ θάλαττα; διὸ καὶ οὐ σβέννυσι τὴν φλόγα. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων. τὸ δὲ λιπαρότερον θερμότερον. ἢ ὅτι γῆς πολὺ ἔχει, ὥστε ξηρότερον; τὸ δὲ ξηρότερον θερμότερον.

Διὰ τί ἡ θάλαττα εὐδιοπτοτέρα τοῦ ποτίμου, παχυτέρα οὖσα; λεπτότερον γὰρ τὸ πότιμον τοῦ ἀλμυροῦ. ἢ οὐ τὸ λεπτὸν αἴτιον, ἀλλ' εὐθυωρίαί τῶν πόρων πλεῖσται καὶ μέγισταί εἰσιν; τὸ μὲν οὖν πότιμον πυκνὸν διὰ λεπτομέρειάν ἐστι, τὸ δὲ ἀλμυρὸν μέγала ἔχει τὰ διάκενα. ἢ ὅτι καθαρώτερον ἢ θάλαττα; γῆ μὲν γὰρ οὐκ ἔστιν, ἡ δὲ ἄμμος βαρεῖα οὖσα ὑφίσταται. τὰ δὲ πότιμα γεώδη. αὐτὴ δὲ ἐν τῷ μεταξὺ φερομένη ἀναθολοῦται ταχύ.

Διὰ τί ἐν τοῖς βορείοις εὐδιοπτοτέρα ἢ θάλαττα ἢ ἐν τοῖς νοτίοις; ἢ ὅτι ἐν τῇ γαλήνῃ χρῶμα ἔχει ἢ θάλαττα; λιπαρὸν γὰρ ἔνεστιν ἐν τῷ ἀλμυρῷ χυμῷ. σημεῖον δέ· ἐκκρίνεται γὰρ ἔλαιον ἐν ταῖς ἀλέαις. εὐδίας οὖν οὔσης καὶ ἀλεεινότερας τῆς θαλάττης διὰ κουφότητα, ἐπανθεῖ ἄνω ὁ τοιοῦτος χυμός. τοῖς δὲ βορείοις ἦττον διὰ τὸ ψῦχος. ἔστι δὲ τὸ ὕδωρ εὐδιοπτότερον τοῦ ἐλαίου· τὸ γὰρ ἔλαιον χρῶμα ἔχει, τὸ δὲ ὕδωρ ἄχροον παρεμφαινόμενον σαφεστέραν ποιεῖ τὴν ἔμφασιν.

Διὰ τί λουσάμενοι τῇ θαλάττῃ θάττον ξηραίνονται, βαρυτέρα οὔση τῶν ποτίμων; ἢ ὅτι παχυτέρα καὶ γεώδης ἢ θάλαττα; ὀλίγον οὖν ἔχουσα τὸ ὑγρὸν ξηραίνεται θάττον.

Διὰ τί τὰ κύματα ἀνεμώδη; ἢ ὅτι σημειά ἐστι πνεύματος ἐσομένου; ἔστι γὰρ τὸ πνεῦμα σύνωσις ἀέρος. ἢ διὰ τὸ αἰεὶ προωθεῖσθαι γίνεται; προωθεῖ δὲ οὐ συνεχές πῶ ὃν τὸ πνεῦμα, ἀλλὰ ἀρχόμενον. τὸ μὲν δὴ πρῶτον ὥσπερ προεμαράνθη, ἄλλο δὲ τοῦτο προέωσε καὶ ἄλλην πυκνότητα ἤγαγεν καὶ ἀπεμαράνθη. ὥστε δῆλον, ὅταν ἦδη τὸ προωθούμενον παρῇ, ὅτι ἤξει καὶ τὸ κινεῖν· ἀρχόμενον γὰρ τοῦτο ποιεῖ.

Διὰ τί τὸ κύμα προεκκίπτει τοῦ πνεύματος; ἢ ὅτι οὐχ ἅμα παύεται τὸ πνεῦμα [τὸ] πνέον καὶ ἡ θάλαττα κυμαίνουσα, ἀλλ' ὕστερον ἢ θάλαττα, ἐνδέχεται τὸ κινήσαν [933a] πνεῦμα φθαρῆναι πρὸ τοῦ γενέσθαι αἰσθητόν. ὥστε οὐ πρότερον τὸ κύμα πνεύματος,

ἀλλὰ τὸ μὲν λανθάνει τὸ δὲ οὐ. ἢ οὐχὶ τὰ πνεύματα ἅμα πανταχοῦ πνεῖ, ἀλλ' ὅθεν ἡ ἀρχὴ πρότερον; ἅμα δὲ πνεῖ καὶ τὴν πλησίον θάλατταν κινεῖ, αὕτη δὲ τὴν ἐχομένην· καὶ οὕτως ἂν ἐνδέχοιτο πρότερον τὸ κῦμα ἐκπίπτειν. ὑπὸ γὰρ τῆς θαλάσσης καὶ οὐχ ὑπὸ τοῦ πνεύματος ἡ κίνησις ἢ θάττων τοῦ ἀέρος ἢ τῆς θαλάττης.

Διὰ τί ἐν τῇ θαλάττῃ μᾶλλον νεῖν δύνανται ἢ ἐν τοῖς ποταμοῖς; ἢ ὅτι ὁ νέων ἀεὶ ἐπιστηριζόμενος ἐν τῷ ὕδατι νεῖ, ἐν δὲ τῷ σωματωδεστέρῳ μᾶλλον ἀποστηρίζεσθαι δυνάμεθα, σωματωδέστερον δὲ ἐστὶ τὸ θαλάττιον ὕδωρ τοῦ ποταμίου· παχύτερον γάρ ἐστι καὶ μᾶλλον ἀντερείδειν δυνάμενον.

Διὰ τί ποτε ἐν τῇ θαλάττῃ πλείω χρόνον διατελεῖν δύνανται ἢ ἐν τῷ ποταμῷ; ἢ διότι τὸ ποτάμιον ὕδωρ λεπτόν ἐστιν; μᾶλλον οὖν παρεισδύμενον πνίγει.

Διὰ τί ἡ μὲν θάλαττα κάεται, τὸ δὲ ὕδωρ οὐ; ἢ κάεται μὲν κάκεῖνο, ἡ δὲ θάλαττα ἥττον σβέννυσι τὸ πῦρ διὰ τὸ λιπαρωτέρα εἶναι; σημεῖον δὲ ὅτι λιπαρωτέρα· ἀπὸ γὰρ τῶν ἁλῶν ἔλαιον ἀφαιρεῖται. ἢ καὶ ἥττον δύνανται οἱ πόροι ἀρμόττειν τῷ πυρὶ διὰ τὸ παχύτεροι εἶναι, καὶ μᾶλλον γε δὴ, ἅτε καὶ τῶν ἁλῶν ἐνυπαρχόντων; ὥσπερ οὖν τὸ ξηρὸν τοῦ ὕγρου ἥττον σβεστικόν, καὶ τὸ ξηρὸν μᾶλλον κατὰ λόγον καυστικόν ἐστὶ, καὶ ἕτερον ἐτέρου μᾶλλον, τῷ ἐγγυτέρῳ τοῦ θερμοῦ εἶναι, τὸ ξηρότερον δὲ τῇ θαλάττῃ· ἄμφω δὲ ταῦτα μᾶλλον ὑπάρχει.

Διὰ τί ἀπὸ μὲν τῆς θαλάττης οὐκ ἀποπνεῖ ἔωθεν ψυχρόν, ἀπὸ δὲ τῶν ποταμῶν; ἢ ὅτι ἡ μὲν θάλαττα ἐστὶν ἐν ἀναπεπταμένοις τόποις, οἱ δὲ ποταμοὶ ἐν στενοῖς; ἡ μὲν οὖν ἀπὸ τῆς θαλάττης αὔρα εἰς πολὺν τόπον σκίδνεται, ὥστε εἶναι ἀσθενής, ἡ δὲ ἀπὸ τῶν ποταμῶν ἀθρόως φέρεται καὶ μᾶλλον ἰσχύει, διὸ μᾶλλον εἰκότως φαίνεται ψυχρά. ἢ οὐ τοῦτό ἐστιν αἴτιον, ἀλλ' οἱ μὲν ποταμοὶ ψυχροὶ εἰσιν, ἡ δὲ θάλαττα οὔτε θερμὴ οὔτε ψυχρά; γίνεται δὲ ἡ αὔρα καὶ ἡ ἀναπνοὴ θερμαινομένων ἢ ψυχομένων τῶν ὑγρῶν· ὁπότερον γὰρ ἂν τούτων πάσχη, ἐξαερούται, ἐξαερουμένου δὲ τοῦ ὕδατος ὁ ἀήρ ὁ γινόμενος φέρεται, ὃ ἐστὶν αὔρα. τὸ μὲν οὖν ἀπὸ τῶν ψυχρῶν ψυχρὸν εἰκότως ἀποπνεῖ, τὸ δὲ ἀπὸ τῶν σφόδρα θερμῶν ἀποπνέον ψύχεται καὶ γίνεται ψυχρόν. τοὺς μὲν οὖν ποταμοὺς ψυχροὺς [933b] ἅπαντας εὔροι τις ἂν, ἡ δὲ θάλαττα οὔτε ψυχρά οὔτε θερμὴ σφόδρα ἐστίν. οὔτε οὖν τὸ ἀποπνέον ψυχρὸν ἀπ' αὐτῆς ἐστί, διὰ τὸ μὴ ψυχρὰν εἶναι, οὔτε ψύχεται ταχύ, διὰ τὸ μὴ θερμὴν εἶναι σφόδρα.

Διὰ τί ἐν τοῖς μείζοσι πελάγεσι βραδύτερον καθίσταται κύματα ἢ ἐν τοῖς βραχέσιν; ἢ ὅτι ἐκ τῆς πολλῆς κινήσεως βραδύτερον καθίσταται πᾶν ἢ ἐκ τῆς ὀλίγης; ἐν δὲ τοῖς μεγάλοις πελάγεσι πλείων ἢ ἄμπωτις γίνεται ἢ ἐν τοῖς βραχέσιν. οὐθὲν οὖν ἄλογον τὸ πλείον βραδύτερον καθίστασθαι.

Διὰ τί τὸ ἄλμυρὸν ὕδωρ ψυχρὸν μὲν οὐ πότιμον, θερμαινόμενον δὲ μᾶλλον γίνεται πότιμον, καὶ θερμὸν δὲ ὄν καὶ ἀποψυχόμενον; ἢ διότι εἰς τὸ ἐναντίον ἀπὸ τοῦ ἐναντίου πέφυκε μεταβάλλειν; ἔστι δὲ τὸ πότιμον τῷ ἄλμυρῷ ἀντικείμενον· καὶ θερμαινόμενον μὲν ἀφένεται τὸ ἄλμυρὸν, ψυχομένου δὲ ὑφίσταται.

Διὰ τί τὰ πρὸς τῇ θαλάττῃ ὥς ἐπὶ τὸ πολὺ ὕδατα γλυκέα [ὕδατα] ἀλλ' οὐχ ἄλμυρά; ἢ διὰ τὸ ποτιμώτερα διηθούμενα γίνεσθαι; διηθεῖται δὲ τὸ ἐγγύτερον τῆς θαλάττης μᾶλλον.

Διὰ τί τὸ ἄλμυρὸν ὕδωρ οὐκ ἀπόρρυτόν ἐστιν; ἢ διότι τὸ μὲν βαρὺ στάσιμον, τὸ δὲ ἄλμυρὸν βαρὺ; διὸ καὶ τὰ θερμὰ μόνα τῶν ἄλμυρῶν ὑδάτων ἀπόρρυτά ἐστιν. ἔχει γὰρ κουφότητα ἐν αὐτοῖς, ἢ κρατεῖ τῆς κατὰ τὴν ἄλμυρίδα βαρύτητος· τὸ γὰρ θερμὸν κουφότερόν ἐστιν. ἔτι τὰ μὲν ἀπόρρυτα διηθεῖται διὰ τῆς γῆς· ἡθουμένων δὲ ἀεὶ μάλιστα ὑφίσταται τὸ παχύτατον καὶ βαρύτατον, ἐκκρίνεται δὲ τὸ κοῦφον καὶ καθαρόν· ἔστι γὰρ τὸ μὲν ἄλμυρὸν βαρὺ, τὸ δὲ γλυκὺ κοῦφον. διόπερ ἐστὶ γλυκέα τὰ ἀπόρρυτα. τὸ δ' αὐτὸ αἰτιὸν ἐστὶ καὶ διὰ τί τὸ ἄλμυρὸν ὕδωρ κινούμενον καὶ μεταβάλλον γλυκύτερον γίνεται· κουφότερον γὰρ καὶ ἀσθενέστερον διὰ τὴν κίνησιν γίνεται.

Διὰ τί ἐν τῇ Λιβύῃ ἐὰν ὀρύξῃ τις παρὰ τὴν θάλατταν, τὸ πρῶτον πότιμον, εἴθ' ἄλμυρὸν γίνεται ταχύ, ἐν δὲ τοῖς ἄλλοις τόποις ἤττον ποιεῖ τοῦτο; πότερον ὅτι τὸ μὲν πρῶτον τὸ ὑπάρχον ὕδωρ ἐν τῷ τόπῳ καὶ τὸ πεπεμμένον ὑπὸ τῆς γῆς ἐστίν, ὅταν δὲ χρονισθῇ, ἢ θάλαττα προσδιηθουμένη διὰ τὸ πρόσφατον εἶναι ποιεῖ ἄλμυρώτερον; ἐν δὲ τοῖς ἄλλοις ἢ οὐκ ἔχει ἢ πολὺ ὕδωρ διὰ τὸ μὴ ξηραίνεσθαι τὸν τόπον.

[934a] Διὰ τί τοὺς ἄλας θάπτον τήκει τὸ ἄλμυρὸν ὕδωρ ἢ τὸ πότιμον; ἢ διότι τὸ μὲν τήκεσθαι ἐστὶ τὸ ὑπὸ τοῦ ὑγροῦ θερμοῦ εἰσιόντος διαιρεῖσθαι, ὥστε ὑγρὸν εἶναι; οὐ τήκει δὲ ἢ τὰ ὅλως μὴ δυνάμενα εἰσιέναι, ἢ τὰ οὕτως ὥστε μὴ θιγγάνειν. μόλις δὲ τήκει τὰ ῥαδίως διεξιόντα· τὰ δ' ἐπιόντα βιαζόμενα, ταῦτα τάχιστα διαιρεῖ. οὐκ εἰσέρχεται δὲ τὰ λίαν μεγαλομερῇ· ὑπερέχει γὰρ τῶν πόρων. τὰ

δὲ μικρομερέστερα διέρχεται οὐ ψαυόμενα. ἔστι δὲ τὸ μὲν πότιμον λεπτόν, τὸ δὲ ἀλμυρὸν παχύτερον. ὥστε τὸ μὲν ῥαδίως διὰ τὴν λεπτότητα διαδύνον μόλις τήκει, τὸ δὲ εἰσέρχεται μὲν ἦττον δὲ διὰ τὸ μεγαλομερέστερον εἶναι διαιρεῖ, καὶ βιάζεται θάττον.

Διὰ τί τὸ ὕδωρ ἦττον φαίνεται λευκόν, ἐὰν κινήται, οἶον καὶ ἡ φρίκη; διὸ καὶ Ὁμηρος ἀρχομένου φησὶ τοῦ πνεύματος “μελάνει δέ τε πόντος ὑπ’ αὐτοῦ.” ἢ διὰ δύο αἰτίας, ἐγγύθεν μὲν τῆς ὀψεως οὔσης, διὰ τὸ διέναι τὴν ἄψιν μᾶλλον ἡρεμοῦντος, κινουμένου δὲ μὴ εὐθυπορεῖν· τὸ δὲ διαφανὲς λευκόν φαίνεται. δι’ οὗ γὰρ μὴ διέρχεται ἡ ὄψις, μέλαν φησὶν εἶναι. διὸ καὶ ὁ ἀῆρ πόρρωθεν μέλας φαίνεται, ὁ δὲ ἐγγὺς λευκός, καὶ θαλάττης τὸ μὲν ἐγγὺς λευκόν, τὸ δὲ πόρρωθεν κυανοῦν καὶ μέλαν. πόρρωθεν δέ, κινουμένης πῶς τῆς ὀψεως, καὶ τῷ διανακλᾶσθαι ἀθρόον τὴν ὄψιν, ἐὰν ἡρεμῇ πρὸς τὸ φῶς, κινουμένου δὲ μὴ δύνασθαι.

Διὰ τί ἐν τοῖς βαθέσι πελάγεσι τὸ κύμα οὐκ ἐπιγελᾷ, ἀλλ’ ἐν τοῖς μικροῖς; πότερον ὅτι τὸ μικρὸν φερόμενον ὕδωρ διαιρεῖται ὑπὸ τοῦ ἀέρος μᾶλλον ἢ τὸ πολὺ; διὸ θραύεται πατάξαν μᾶλλον. ἐν μὲν οὖν τῷ βαθεῖ πολὺ τὸ κινούμενον, ἐν δὲ τῷ βραχεῖ ὀλίγον.

Διὰ τί οἱ πρὸς νότον τόποι ἀλυκώτερα τὰ ὕδατα ἔχουσιν; ἢ διὰ τὸ τὴν θάλατταν ὑπὸ νότου ὠθεῖσθαι ὑπὸ τὴν γῆν κεράννυται;

Διὰ τί τῶν ὑδάτων τὸ ἀλμυρὸν ἐπὶ τῷ γλυκεῖ οἶνῳ μᾶλλον ἐπιπολάζει ἢ ἐπὶ τῷ αὐστηρῷ; πότερον ὅτι μᾶλλον ἔχει γῆν ὁ γλυκύς, ὥσπερ ἡ ἀσταφίς; ἢ ὅτι βαρύτερος καὶ γλισχρότερος ὁ γλυκύς, ὥσθ’ ἦττον μίγνυται, μὴ μιγνύμενος δὲ ἐφίσταται.

Διὰ τί ὅλως ἐφίσταται γεῶδες ὄν; ἢ γὰρ οἰκεία φορὰ κάτω. πότερον ὅτι μᾶλλον ἔχει γῆν ὁ γλυκύς; ἢ διὰ τὴν [934b] θερμότητα, καθάπερ οἱ ἄλεις; ὅμοιον γὰρ ἐξανθήματι. ἢ δι’ ἄλλην αἰτίαν; εἰ γὰρ οὐ διὰ τοῦτο καὶ ἐπὶ τῷ γλυκεῖ μᾶλλον, οὐκ ἄλογον· θερμότητος γάρ.

Διὰ τί τὰ κύματα πρότερον φοιτᾷ ἐνίοτε τῶν ἀνέμων; ἢ διότι καὶ τελευτᾷ ὕστερον; τὸ γὰρ πρῶτον πνεῦμα ὥσανει προδιαλύεται τοῦ ὥσθέντος κύματος· ἀφικνεῖται δὲ οὐκ αὐτὸ τὸ πρῶτον ὥσθέν, ἀλλ’ αἰεὶ ἢ ὥσις γίνεται τοῦ ἐχομένου.

Διὰ τί αἱ κυματωδέστεραι γαῖ στερραὶ γίνονται πολλάκις οὕτω σφόδρα ὥσπερ ἡδαφισμένοι; καὶ ἡ μὲν κυματώδης γῆ στερρά, ἡ δὲ ἄποθεν χαῦνος. ἢ διότι ἡ μικρὰ ἄμμος οὐ πόρρωθεν ἐκβάλλεται ὑπὸ τοῦ κύματος, ἀλλὰ ἡ μείζων μᾶλλον; ὥσπερ καὶ τῇ χειρὶ βάλλειν πόρρω οὐ τὸ ἐλάχιστον μάλιστα δυνατόν. ἔπειτα πολλῶν κυκωμένων

τὰ ἐλάχιστα ἐμπίπτοντα πυκνοῖ. ἡ δὲ τοῦ κύματος λωφῶντος κίνησις ἐδαφίζει, κινεῖ δὲ οὐκέτι. διὰ μὲν οὖν τὸ τὰ μικρότατα μὴ πόρρω δύνασθαι πηδᾶν, ἐκ μικρῶν σφόδρα συντέθεται· διὰ δὲ τὸ πολλάκις κινεῖσθαι συνεχῆς γίνεται πιπτούσης ἄμμου, ἕως ἂν συναρμόσῃ· διὰ δὲ τὸ κῦμα τὸ τελευταῖον ἐδαφίζεται, καὶ τὸ ἡρέμα ὑγρὸν συγκολλᾷ. ἡ δὲ πόρρω ξηρὰ τε οὕσα διίσταται, καὶ ἐκ μειζόνων ἐστὶ λιθιδίων καὶ ἀνεδάφιστος.

Διὰ τί τῆς θαλάσσης τὰ ἄνω τῶν ἐν τῷ βάθει ἀλμυρώτερα καὶ θερμότερα; ὁμοίως δὲ καὶ ἐν τοῖς φρέασι τοῖς ποτίμοις τὸ ἐπιπολῆς ἀλμυρώτερον τοῦ εἰς βάθος· καίτοι ἔδει τὸ κατωτέρω· βαρύτερον γὰρ τὸ ἀλμυρόν. ἢ διότι ὁ ἥλιος καὶ ὁ ἀήρ ἀνάγει αἰεὶ τὸ ἐλαφρότατον ἀπὸ τῶν ὑγρῶν; τὸ δὲ ποτιμώτερον αἰεὶ κουφότερον, μᾶλλον δὲ ἀπάγει ἀπὸ τῶν ἐγγυτέρω τόπων. ὥστε καὶ τῆς θαλάττης ἀπὸ τῶν ἐπιπολῆς καὶ τῶν ποτίμων ἀνάγκη τὸ λειπόμενον ἀλμυρώτερον εἶναι, ἀφ' ὧν ἀνῆκται, ἢ ἀφ' ὧν μὴθὲν ἢ ἔλαττον τὸ γλυκύ. διὰ τοῦτο δὲ καὶ θερμότερα τὰ ἄνω· τὸ γὰρ ἀλμυρὸν θερμότερον τοῦ ποτίμου. διὸ καὶ φασὶν τινες τῶν ἡρακλειτιζόντων ἐκ μὲν τοῦ ποτίμου ξηρανομένου καὶ πηγνυμένου λίθους γίνεσθαι καὶ γῆν, ἐκ δὲ τῆς θαλάττης τὸν ἥλιον ἀναθυμιᾶσθαι.

Διὰ τί τῆς θαλάττης τὰ πρὸς τῇ γῇ γλυκύτερά ἐστιν; ἢ διότι ἐν τῇ κινήσει μᾶλλον ἐστίν; κινούμενον δὲ τὸ ἀλμυρὸν γλυκύτερον γίνεται. ἢ ὅτι καὶ ἐν τῷ βάθει ἀλμυρώτερόν [935a] ἐστὶ τὸ ὕδωρ, τὰ δὲ πρὸς τῇ γῇ ἥττον ἐστὶ βαθέα. διὸ καὶ τὰ γχιβαθῇ ἀλμυρά ἐστὶ καὶ οὐχ ὁμοίως γλυκέα. τούτου δ' αἴτιον ὅτι βαρὺ ὄν τὸ ἀλμυρὸν φέρεται μᾶλλον εἰς βάθος.

Διὰ τί ἡ θάλαττα μόνον τῶν ὑδάτων κάεται, τὰ δὲ πόσιμα καὶ ποτάμια οὐ; πότερον ὅτι γῆν πολλὴν ἔχει; δηλοῦσι δὲ οἱ ἅλεις. ἢ διότι λιπαρά; δηλοῖ δὲ τὸ ἐν τοῖς ἅλασιν ὑφιστάμενον ἔλαιον.

Διὰ τί ἐν ταῖς λίμναις ἄμμος οὐ γίνεται ἢ ἥττον ἢ ἐν τῇ θαλάττῃ καὶ τοῖς ποταμοῖς; ἢ ὅτι ἐν τῇ θαλάττῃ πέτραι γίνονται, καὶ ἡ γῆ ἐκκέκασται μάλιστα; ἢ δὲ ἄμμος ἐστὶ πέτρα ἐψηγμένη εἰς μικρὰ καὶ ἐλάχιστα μόρια. ψήχεται δὲ διὰ τὴν πληγὴν τῶν κυμάτων. ἐν δὲ ταῖς λίμναις οὐ γίνονται ὁμοίως πέτραι καθαραί, οὐδὲ θραύονται ὁμοίως διὰ τὸ μὴ γίνεσθαι κύματα ὁμοίως. ἐν δὲ τοῖς ποταμοῖς μᾶλλον, ὅτι τὴν μὲν γῆν καταφέρουσι, τὰς δὲ πέτρας τῇ πληγῇ θραύουσιν.

Διὰ τί, ὅταν ἡ λίμνη ἢ κοπάσῃ ἢ ξηρὰ γένηται, ἀποκάεται ὁ

σῖτος ἐν τῷ πεδίῳ μᾶλλον; πότερον ὅτι τὸ ὑγρὸν τὸ ἐν τῇ λίμνῃ ἀπατμίζον τῇ ἀτμίδι θερμαίνει τὸν ἀέρα, ὥστε ἐλάττους καὶ ἀσθενεστεροὺς ποιεῖ τοὺς πάγους ἢ ἐν τοῖς κοίλοις καὶ προσελώδεσι τόποις; ἢ ἐκ τῆς γῆς, ὥσπερ λέγεται, τὰ ψύχη ἄρχεται καὶ λανθάνει εἰσδυόμενα; ξηρᾶς οὖν οὕσης τῆς λίμνης, διὰ πλείονος τόπου ἢ ψυχρότης πλείων προσπίπτουσα πήγνυσι καὶ ἀποκάει μᾶλλον. ἐν δὲ ταῖς τοιαύταις χώραις τὰ ψύχη κάτωθεν γίνεται, ὥσπερ καὶ δοκεῖ. καίτοι ἡ γῆ θερμὴ τοῦ χειμῶνος· ἀλλὰ διὰ τὸ ἔφυγρον εἶναι κατέψυκται τὸ ἐπιπολῆς θερμὸν τὸ ἐν τῇ γῇ. τὸ γὰρ ὑγρὸν οὔτε οὕτω πόρρω ἐστὶν ὥστε μὴ ψύχεσθαι, διὰ τὴν ἐνοῦσαν θερμότητα ἐν τοῖς ὑγροῖς, οὔτε οὕτως ὀλίγον ὥστε μὴθὲν ἰσχύειν, διὰ τὸ διάβροχον εἶναι τὴν γῆν. οἶον οὖν διὰ τὴν ψύξιν αὐτοῦ συμβαίνει ἐπὶ κρυστάλλου περιπατεῖν καὶ οἰκεῖν.

Διὰ τί ἡ θάλαττα ἄλμυρά καὶ πικρά ἐστίν; ἢ ὅτι ἐν τῇ θαλάττῃ πλείους εἰσὶν οἱ χυμοί; καὶ γὰρ τὸ ἄλμυρὸν καὶ τὸ πικρὸν ἅμα φαίνεται.

Διὰ τί τὰ ἐν τῇ θαλάττῃ ὄστρακα καὶ λίθοι στρογγύλα γίνεται; ἢ ὅτι ὁμοίως περιθραυόμενα τὰ ἔσχατα εἰς [935b] τὸ στρογγύλον σχῆμα ἔρχεται; τούτου γὰρ τὸ ἔσχατον ὅμοιον, ἢ δὲ θάλαττα πάντῃ κινουσα ὁμοίως περιθραύει.

Διὰ τί ἐνιαχοῦ, ἐάν τις ὀρύξῃ παρὰ τὴν θάλατταν, τὸ μὲν πρῶτον πότιμόν ἐστιν ὕδωρ, εἰθ' ἄλμυρὸν γίνεται; ἢ ὅτι αὐτῆς ἐστὶ τῆς θαλάττης τῆς διηθούσης ὑπὸ τὴν γῆν τὸ ὕδωρ; εἰκότως οὖν τὸ πρῶτόν ἐστι γλυκύ· ἐλαφρότερον γὰρ ἐστὶ τὸ γλυκὺ τοῦ ἄλμυροῦ, καὶ ἡ θάλαττα ἔχει τι τοῦ γλυκέος, ὃ μίχθὲν τῇ γῇ μᾶλλον ἐπιπολάζει. τὸ δὲ ἄλμυρὸν διὰ τὸ βάρος καὶ διὰ τὸ τμητικὸν εἶναι κάτω φέρεται. εἴτε οὖν οὕτως εἴτε κατὰ τὰς φλέβας ἐκ τῆς ἡπείρου ρεῖ ἐπὶ τὴν θάλατταν τὸ γλυκὺ ὕδωρ, εἰκότως ἂν ἐπιπολῆς εἴη τῆς θαλάττης, ἢ μίγνυται αὐτῇ. ἀνοιχθέντων δὲ τῶν πόρων, ὕστερον διὰ πλῆθος τὸ ἄλμυρὸν κρατοῦν τοιοῦτο πᾶν ποιεῖ. συμβαίνει γὰρ πεφραγμένων τῶν ἄνω πόρων ἄλλην ὁδὸν ζητεῖν τὸ ἐπιρρέον· ἀνοιχθέντων δὲ ἐνταῦθα πᾶν φέρεται, καθάπερ ἐπὶ τῶν τοῦ σώματος φλεβῶν.

Διὰ τί ἡ θάλαττα οὖσα βαρυτέρα τοῦ ποτίμου ὕδατος μᾶλλον ἐστὶν εὐδίοπος; πότερον ὅτι λιπαρωτέρα; τὸ δὲ ἔλαιον ἐπιχυθὲν ποιεῖ μᾶλλον εὐδίοπον. ἔχουσα δὲ ἐν αὐτῇ λίπος εἰκότως μᾶλλον εὐδίοπτός ἐστιν. ἢ οὐχ ἅπαν τὸ ἐλαφρότερον καὶ εὐδιοπτότερον; αὐτὸ γὰρ τὸ ἔλαιον ἐλαφρότερον τοῦ ὕδατος, εὐδιοπτότερον δὲ οὐ. ἢ

οὐκ εὐδίοπτότερόν ἐστιν, ἀλλὰ φαίνεται; τὸ γὰρ πότιμον ὕδωρ ἀπὸ τῆς γῆς ἢ ἀπὸ ρευμάτων ἐστίν, ἢ δὲ πηγὴ συναφίησι μετὰ τοῦ ὕδατος καὶ γῆν, ὥστε τῷ μὴ καθαρὰ εἶναι τὰ ρεύματα συγκατάγει τὴν γῆν καὶ ἰλύν. αὕτη οὖν ἐστίν ἡ αἰτία τοῦ ἥττον εἶναι εὐδίοπτον.

Διὰ τί οἱ νέοντες ἐν τῇ θαλάττῃ λαπαροὶ γίνονται; εἰ γὰρ ὅτι πονοῦσι, καὶ οἱ τροχιζόμενοι ἰσχυρὸν πονοῦσι πόνον καὶ οὐ λαπάττονται. ἢ ὅτι οὐ πᾶς πόνος ποιεῖ λάπαξιν, ἀλλ' ὁ μὴ ποιῶν σύντηξιν; ἢ δὲ ἐν τῇ θαλάττῃ διατριβὴ καὶ ὅλως δοκεῖ βρωτικωτέρους ποιεῖν καὶ λαπαρούς· θερμὴ τε γάρ ἐστι καὶ ξηρὰ ἢ ἀπ' αὐτῆς ἀτμίς.

Διὰ τί Πᾶσα λίμνη πότιμος οὔσα πλύνει καὶ ρύπτει τὰ ἱμάτια; πλύνει μὲν γὰρ τὸ γλυκύ, ρύπτει δὲ τὸ πικρὸν, ἅμα δὲ οὐχ οἷόν τε ἔχειν ταῦτα. ἢ οὐ τῷ πικρὸν εἶναι οὐθὲν ρύπτει, ἀλλ' ἡ γλίσχρότης ρυπτικόν; διὸ καὶ τὰ ἀκροκώλια καὶ ὅσα μυζώδη τοιαῦτα. ὥστε καὶ τῶν πικρῶν [936a] ὅσα τούτου μετέχει. ἐν δὲ τῇ λίμνῃ ταύτῃ συμβέβηκε τοῦτο, ὥστε τῆς νιτρώδους δυνάμεως τὸ μὲν πικρὸν ἐκκεκαῦσθαι, ἐμμένειν δὲ τὸ λιπαρὸν καὶ γλίσχρον. τούτῳ μὲν οὖν ρύπτει, πλύνει δὲ τῷ ποτίμῳ αὐτῆς.

Διὰ τί τὸ γαληνίζον τῆς θαλάττης λευκὸν φαίνεται, τὸ δὲ κατάφορον μέλαν; ἢ ὅτι τὸ ἥττον ὁρώμενον μελάντερον μᾶλλον φαίνεται; ἥττον δὲ φαίνεται τὸ κινούμενον τοῦ ἡρεμοῦντος. ἢ διότι τὸ μὲν διαφαινόμενον λευκόν, τὸ δὲ μὴ διαφαινόμενον μέλαν; ἥττον δὲ διαφαίνεται τὸ κινούμενον.

ΚΔ. ΟΣΑ ΠΕΡΙ ΤΑ ΘΕΡΜΑ ΥΔΑΤΑ.

Διὰ τί τὸ θερμὸν ὕδωρ, ἐὰν ἐπικεχρισμένοι ὦσιν ἐλαίῳ, ἥττον θερμὸν ἐστὶ καταχερόμενον, τοῦ ἐλαίου θερμοῦ ὄντος; ἢ διὰ τὸ λεαίνειν ὀλισθαίνει καὶ ἥττον ἐνδύνει;

Διὰ τί τὰ ὕδατα ἐν τοῖς φρέασι μετὰ μεσημβρίαν γίνεται τοῦ θέρους θερμά; ἢ διότι τηνικαῦτα ἤδη κεκράτηκε τὸ θερμὸν τὸν ἀέρα; πρὸ μεσημβρίας δὲ τὸ θερμὸν λύει τὸ ψυχρὸν καὶ παύει· οὐχ ἅμα δὲ πέπαιται καὶ κρατεῖ, ἀλλ' ὅταν ἐπιχρονίσῃ.

Διὰ τί τὸ ὕδωρ θερμότερον ἐνίστε τῆς φλογὸς γινόμενον οὐ κατακάει τὰ ξύλα, ἢ δὲ φλόξ κατακάει; ἢ ὅτι ἡ μὲν φλόξ λεπτομερές, καὶ τὸ ἀπ' αὐτῆς πνεῦμα, τὸ δὲ ὕδωρ μεγαλομερές, ὥστε οὐκ εἰσδύεται; ἢ δὲ φλόξ καὶ τὸ ἀπὸ τῶν ἀνθράκων διὰ λεπτότητα εἰσιὼν διαλύει.

Διὰ τί τὸ μὲν ὕδωρ τὸ ζέον οὐ τήκει, ἢ δὲ κοιλία τήκει; πότερον ὅτι τὸ μὲν θερμὸν τὸ ἐν τῇ κοιλίᾳ εἰσέρχεται διὰ λεπτότητα, τὸ δὲ ὕδωρ οὐκ εἰσέρχεται διὰ παχύτητα; ἢ διότι καὶ τὰ ἄλλα κωλύει τήκεσθαι τὸ ὑγρὸν; οὐθὲν γὰρ ἐν ὑγρῷ τήκεται. ἐν δὲ τῇ κοιλίᾳ τὸ ὑγρὸν εἰς τὴν κύστιν ὑπονοστοῦν οὕτω λύει.

Διὰ τί τῶν ἀγγείων ὁ πυθμὴν οὐ κάει ἐνόντος τοῦ ὕδατος καὶ ζέοντος, ἀλλὰ καὶ φέρουσι τοῦ πυθμένος ἐχόμενοι, ἐξαιρεθέντος δὲ κάει; ἢ ὅτι σβέννυται τὸ ἐγγινόμενον θερμὸν ἐν τῷ πυθμένι ὑπὸ τοῦ ὕδατος; διὸ καὶ οὐ τήκεται τὰ τηκτά, ἂν μὴ ψόφος ἐμπέσῃ.

Διὰ τί οὐχ ὑπερζει τοῦ χειμῶνος ὁμοίως καὶ τοῦ θέρους τὸ ὕδωρ, οὐ μόνον ὁμοίως θερμαινόμενον, ἀλλὰ καὶ μᾶλλον καὶ ὁμοίως θερμὸν ὄν, καὶ ἔτι μᾶλλον; ἢ διότι ἡ [936b] ὑπέρζεσις ἐστὶν ἡ ἀναβολὴ τῶν πομοφολύγων; τὸ μὲν οὖν ὕδωρ αὐτὸ θερμαίνεται τότε οὐθὲν ἥττον ἢ τοῦ ψύχους, αἱ δὲ πομοφώλυγες αἶρεσθαι οὐ δύνανται ὁμοίως διὰ τὸ τὸν περιέχοντα ἀέρα εἶναι ψυχρὸν, ἀλλ' ἐλάττους τε τὰ μεγέθη αἶρονται ὑπὸ τοῦ ψύχους θλιβόμεναι, καὶ διακόπτοντος τοῦ ἀέρος ταχὺ διαπίπτουσιν. ὥστε ἐλάττους τε τῷ ὄγκῳ καὶ τῷ πλήθει γίνονται τοῦ χειμῶνος, τοῦ δὲ θέρους τοῦναντίον. ἢ δὲ ὑπέρζεσις γίνεται διὰ τὸ πλῆθος καὶ τὸ μέγεθος τοῦ ἀφροῦ.

Διὰ τί τὸ μὲν θερμὸν ὕδωρ ῥυτιδοῖ, τὸ δὲ πῦρ θερμὸν ὄν οὐ; ἢ ὅτι τὸ μὲν πῦρ ποιεῖ πνεῦμα, ὥστε ὀγκοῖ; περιτείνεται γὰρ τὸ δέρμα. ἢ δὲ κάμψις ῥυτίς ἐστίν.

Διὰ τί τῶν ἀγγείων οἱ πυθμένες θερμαινομένου τοῦ ὕδατος, ἕως ἂν ἡ ψυχρὸν τὸ ὕδωρ, θερμότεροί εἰσιν; ἢ διότι ψυχροῦ μὲν ἔτι ὄντος τοῦ ὕδατος ἐγκατακλείεται τὸ θερμὸν καὶ ἀντιπερίσταται εἴσω, κωλυόμενον ἐξιέναι, ὅταν δὲ διαθερμανθῇ τὸ ἐνὸν ὕδωρ, οὐκέτι ἀποστέγοντος ἀλλὰ διαπνέοντος καὶ ἐλάττονος γινομένου τοῦ πυρὸς ψυχρότερος γίνεται ὁ πυθμὴν, ὁμοίως ὥσπερ καὶ τὰ βαλανεῖα· καὶ γὰρ ταῦτα τοῦ χειμῶνος θερμότερα ἢ τοῦ θέρους διὰ τὸ ἐγκατακλείεσθαι τὸ θερμὸν ἐν τῷ χειμῶνι μᾶλλον ἢ ἐν τῷ θέρει ὑπὸ τοῦ περιέχοντος ἀέρος ὄντος ψυχροῦ.

Διὰ τί τὸ μὲν ὕδωρ ζέον οὐκ ἐκπαφλάζει, τὸ δὲ ἔτνος καὶ ἡ φακῆ; καίτοι κουφότερον τὸ ὕδωρ τούτων, τὰ δὲ κουφα ῥᾶον ῥῖψαι πόρρω. ποιεῖ δὲ καὶ τὸ ἀργύριον ταῦτό, καὶ τοῦτο καθαιρόμενον· διὸ οἱ ἐν τῷ ἀργυροκοπεῖω καλλύνοντες κερδαίνουσιν· τὸ γὰρ διαρριπτούμενον συγκαλλύνοντες λαμβάνουσι τὰ λείψανα. ἢ διότι ποιεῖ μὲν τὸν ἐκπαφλασμὸν τὸ θερμὸν ἐξατμίζον καὶ βιαζόμενον τὰ ἀντικρούοντα τῇ κατὰ φύσιν αὐτοῦ φορᾷ; τὸ μὲν οὖν ὕδωρ διὰ κουφότητα καὶ λεπτότητα οὐκ ἀποβιάζεται, ὥστε οὐκ ἀθροίζεται πολὺ θερμὸν, ἀλλὰ πρὶν ἀλισθῆναι φθάνει διακόψαν τὸ ἀεὶ προσελθόν. τὰ δὲ ἔχοντα ἐν αὐτοῖς σῶμα, οἷον τὰ ροφήματα ἢ ὁ ἄργυρος, διὰ βάρους τὸ σωματοειδὲς ἔχοντα πολὺ, καὶ ἀνταπωθούντα διὰ τὸ ἀποβιάζεσθαι βίᾳ, ἐξιόντος ἀποσφαιρίζεται ἢ ἂν κρατήσῃ τὸ θερμὸν· οὐ γὰρ δίδεισι διὰ πυκνότητα, ἀλλὰ κρατεῖ, ἕως ἂν ὑπὸ τοῦ ἐπιρρέοντος θερμοῦ ἀπορριφθῇ. γίνεται δὲ πληγὴ, οὐκ ὥσις, διὰ τὸ ταχὺ φέρεσθαι τὸ θερμὸν κάτωθεν ἂνω.

[937a] Διὰ τί τὰ μὲν ὀλίγον χρόνον ἐν τῷ θερμῷ βρεχόμενα ἀνοιδεῖ, τὰ δὲ πολὺν συμπίπτει καὶ γίνεται ῥυσά; ἢ διότι τὸ θερμὸν ἐκ πεπηγότος ὑγρὸν ποιεῖ, ἐκ δὲ ὑγροῦ πνεῦμα, τὰ δὲ πυκνὰ ἀραιοῖ; τὸ μὲν οὖν πρῶτον θερμαῖνον τὰ πεπηγότα ὑγρότερα ποιεῖ, καὶ ἐξ ὑγρῶν πνευματοποιοῦν ὀγκηρὰ ποιεῖ διαχέον· ὅταν δὲ μᾶλλον θερμαίνῃ τὸ περίξ, ἀραιὸν ποιεῖ, ὥστε ἀποπνεῖται ἡ ἀτμίς, καὶ τὸ ὑγρὸν ξηραίνόμενον συμπίπτειν ποιεῖ τοὺς ὄγκους. συμπιπτόντων δὲ ῥυσοῦνται τὸ περίξ δέρμα πάντων. ἢ δὲ ἀνωμάλως, ταύτη ῥυσὸν γίνεται.

Διὰ τί ὑπὸ τῶν θερμῶν ὑδάτων μᾶλλον ἢ ὑπὸ τῶν ψυχρῶν πήγνυνται λίθοι; πότερον ὅτι τῇ τοῦ ὑγροῦ ἐκλείψει γίνεται λίθος, μᾶλλον δὲ ὑπὸ τοῦ θερμοῦ ἢ τοῦ ψυχροῦ ἐκλείπει τὸ ὑγρὸν, καὶ ἀπολιθοῦνται διὴ διὰ τὸ θερμὸν, καθάπερ καὶ Ἐμπεδοκλῆς φησὶ τάς τε

πέτρας καὶ τοὺς λίθους καὶ τὰ θερμὰ τῶν ὑδάτων γίνεσθαι. ἢ τὸ θερμὸν ἀπολιθοῖ· καὶ ὑπὸ τοῦ ψυχροῦ δὲ λιθοῦται διὰ τὸ τὴν ὑπερβολὴν τοῦ πάγου τὸ ὑγρὸν ἀναλίσκουσαν σκληρύνειν; δῆλον οὖν ἐκ τῆς ὑπερβολῆς καὶ τὸ ἀπλῶς.

Διὰ τί ἐν τῷ θερμῷ ὕδατι ἐὰν τὸν πόδα ἔχη τις, ἡρεμοῦντος μὲν ἥσσον δοκεῖ εἶναι θερμόν, ἐὰν δὲ κινηθῇ, θερμότερον; ἢ ὥσπερ καὶ ἐπὶ τοῦ σώματος, ἐὰν ἐν τῷ πνεύματι τροχάξῃ τις, αἰεὶ ὁ προϊστάμενος ἀῆρ ψυχρότερος· εἰς δὲ τὸ πορρώτερον εἰσιὼν μᾶλλον ἀσθάνεται.

Διὰ τί ἐν τῷ ἡλίῳ μᾶλλον ἢ τῇ σκιᾷ τὰ θερμὰ ψύχεται; πότερον ὅτι τὸ θερμὸν τὸ ἔλαττον ὑπὸ τοῦ πλείονος φθείρεται; ἢ ὅτι ἐν μὲν τῇ σκιᾷ τὸ ψυχρὸν περιεσθηκὸς θλίβει τὸ ἐνὸν θερμὸν καὶ οὐκ ἐᾷ ἐπεξιέναι, ὥσπερ καὶ τοῖς θνήσκουσι ποιεῖ τὸ ψυχρὸν προσχεόμενον· ἐγκατακλείει γὰρ τὸ θερμὸν καὶ κωλύει ἐξιέναι· καὶ ὅλως τοῦ χειμῶνος ἅπασι συμβαίνει τὰ ἔσωθεν θερμότερα· ἐν δὲ τῷ ἡλίῳ οὐδενὸς ἀντιφράττοντος φέρεται καὶ θᾶττον ἀπολείπει.

Διὰ τί τὸ ἐν τῷ ἡλίῳ θερμαινόμενον ὕδωρ ὥστε λούεσθαι οὐκ ἔστιν ὑγιεινότερον; πότερον ὅτι διὰ τὸ ψύχεσθαι; καὶ ἔτι ἐπεὶ τὸ σωματίον φρίττειν ποιεῖ; ἢ ποιεῖ μὲν καὶ τοῦτο, ἀλλὰ κἂν πολλάκις λούηται τις, νοσερόν ἐστιν; τὸ μὲν γὰρ θερμὸν ὅλως πεπτικόν ἐστι καὶ ξηραντικόν, τὸ δὲ ψυχρὸν σταλτικόν, ὥστε ἅμφω ποιεῖ τι ἀγαθόν. διὸ καὶ [937b] τὸ ὕδωρ καὶ τὸ ψυχρὸν λουομένοις καὶ τὸ θερμὸν τὸ ὑπὸ τοῦ πυρὸς χρήσιμον· τὸ δὲ ὑπὸ τοῦ ἡλίου διὰ τὴν ἀσθένειαν τῆς θερμότητος οὐδέτερον τούτων ποιεῖ, ἀλλὰ ὑγραίνει ὥσπερ τὸ τῆς σελήνης φῶς.

Διὰ τί τὸ ἐν τῷ ἡλίῳ θερμανθὲν ὕδωρ οὐκ ἀγαθόν; ἢ ὅτι τὰ ψυχόμενα ῥιγοῦν ποιεῖ;

Διὰ τί τὰ ἐν Μαγνησίᾳ καὶ τὰ ἐν Ἀταρνεῖ θερμὰ πότιμά ἐστιν; ἢ διότι ἐμβάλλει ὕδωρ πλεῖον ἀπορρέοντι τῷ θερμῷ, οὗ ἢ μὲν ἀλμυρότης ἀφανίζεται, ἢ δὲ θερμότης διαμένει;

Διὰ τί ἐν Μαγνησίᾳ τὰ θερμὰ τοῦ μὲν θερμὰ εἶναι ἐπαύσατο, ἀλμυρὸν δὲ ἦν τὸ ὕδωρ; ἢ πλεῖον ἐπεχύθη ἅμα ψυχρὸν ἐπὶ τὰς πηγὰς ἀλλότριον, καὶ ἐναπέσβεσε τὴν θερμότητα; ἢ δὲ γῆ ἀλμυρὰ μὲν ἦν, θερμὴ δὲ οὐ, διὰ τὸ πλῆθος τοῦ ὕδατος τοῦ ἐμβάλλοντος. ὅμοιον οὖν συνέβη τῷ διὰ τῆς τέφρας ὕδατι ἡθουμένῳ· καὶ γὰρ τοῦτο διὰ θέρμης ἡθούμενον ἐκείνην μὲν καταψύχει, καὶ αὐτὸ ψυχρὸν γίνεται, ἀλμυρόν τε καὶ πικρὸν διὰ τὴν τέφραν ἐστίν. ἐπεὶ δὲ τὸ προσιὸν

ἡλλοτριωμένον ἐστί, δι' ἄλλην αἰτίαν ἐκράτησεν ἡ θερμότης ἐνοῦσα ἐν τῇ γῇ τῆς ψυχρότητος τοῦ ὕδατος δι' ὀλιγότητα, καὶ ἐγένετο πάλιν θερμά.

Διὰ τί τὰ ὅλα τῶν θερμῶν ὑδάτων ἀλμυρά; ἢ διότι τὰ πολλὰ διὰ γῆς ἠθεῖται στυπτηριώδους (δηλοῖ δὲ ἡ ὁσμὴ αὐτῶν) κεκαυμένης δέ; ἢ δὲ τέφρα πάντων ἀλμυρὰ καὶ θείου ὄξει. διὸ καὶ συγκάει οὕτως ὥσπερ ὁ κεραυνός. πολλὰ οὖν θερμά ἐστιν ἀπὸ ἐπισημάνσεως κεραυνῶν.

Διὰ τί τὰ θερμὰ λουτρὰ ἱερά; ἢ ὅτι ἀπὸ τῶν ἱερωτάτων γίνονται, θείου καὶ κεραυνοῦ;

ΚΕ. ΟΣΑ ΠΕΡΙ ΤΟΝ ΑΕΡΑ.

Διὰ τί ἐν τοῖς ἀσκοῖς τοῖς πεφουσημένοις ἐναπολαμβάνόμενα τὰ μέλη πόνον παρέχει; πότερον διὰ τὴν πίεσιν τοῦ ἀέρος; ὥσπερ γὰρ οὐδὲ τοῖς ἔξωθεν πέζουσι τὸν ἀσκὸν ἐνδίδωσιν ὁ ἀήρ, ἀλλ' ἀπωθεῖ, οὕτω καὶ τὰ ἐντὸς ἐναπολαμβάνόμενα θλίβει ὁ ἀήρ. ἢ διότι βία κατέχεται καὶ πεπίληται; ἔξω οὖν πάντη ὁρμῶν κατὰ φύσιν προσαπεριδίδεται πρὸς τὸ ἐντὸς ἀπειλημμένον σῶμα.

Διὰ τί ἐν τοῖς ἔλεσι τοῖς παρὰ τοὺς ποταμοὺς γίνονται οἱ καλούμενοι βούμυκοι, οὓς μυθολογοῦσι ταύρους ἱεροὺς [938a] εἶναι τοῦ θεοῦ; ἔστι δὲ τὸ γινόμενον ψόφος ὁμοιος φωνῇ ταύρου, ὥστε αἱ βόες οὕτω διατίθενται ἀκούουσαι ὥσπερ ταύρου μυκωμένου. ἢ ὅτι ὅσοι ποταμοὶ λιμνάζουσιν εἰς ἔλη, ἢ ὅσα ἔλη λιμνάζονται, ἢ ὑπὸ θαλάττης ἀντικρούονται, ἢ τὸ πνεῦμα ἀφιάσιν ἀθροώτερον, ἐν τοῖς τοιούτοις γίνεται τοῦτο; αἴτιον δὲ ὅτι αἱ κοιλίαι τῆς γῆς γίνονται. οὕτως οὖν κλυζόμενον τὸ ὕδωρ, διὰ τὸ ἐνεῖναι ῥεῦμα ἐν τῇ τοιαύτῃ λιμνασίᾳ, ἀπωθεῖται τὸν ἀέρα διὰ στενοῦ εἰς εὐρυτέραν κοιλίαν, οἷον εἴ τις εἰς ἀμφορέα κενὸν κατὰ τὸ στόμιον ποιοῖ ψόφον, μυκήματι ὅμοιον γίνεται· καὶ γὰρ ἡ μύκησις διὰ τοῦτο γίνεται τὸ σχῆμα τοῖς βουσίν. πολλὰς δὲ καὶ ἀτόπους φωνὰς ποιοῦσι τὰ σχήματα τῶν κοιλιῶν ἀνώμαλα ὄντα, ἐπεὶ καὶ ἀμφορέως τὸν πύνδακα ἐάν τις ἀφελὼν διὰ τοῦ πυθμένου τρίβῃ ἔλκων ἔσω καὶ ἔξω, εἰ τρίβει διὰ τοῦ καταδήματος, ψόφον ποιεῖ, ὥστε φεύγειν τὰ θηρία, ὅταν οἱ ὀπωροφύλακες κατασκευάσωσιν αὐτό.

Διὰ τί ὁ ἀήρ οὐχ ὑγρός, ἀπτόμενος τοῦ ὕδατος; τῶν γὰρ ἄλλων οὐθὲν ὅ τι οὐχ ὑγρόν, ἂν ᾗπται. ἢ διότι τὸ ἔσχατον αὐτῶν ἅμα, τὸ δὲ ἐπίπεδον ἐκατέρου οὐχ ἕτερον; τὰ μὲν οὖν ἄλλα βαρύτερα, ὁ δὲ ἀήρ οὐ ῥέπει κατωτέρω τοῦ ἐσχάτου. ἅπτεται μὲν οὖν, ὅτι οὐθὲν μεταξύ, οὐ βρέχεται δέ, ὅτι ἀεὶ ἄνωθεν τοῦ ὕδατος.

Διὰ τί μέσων νυκτῶν καὶ μεσημβρίας μάλιστα εὐδία γίνεται; ἢ διότι ἡ νηνεμία ἐστὶν ἀέρος στάσις, ἔστηκε δὲ μάλιστα, ὅταν κρατῇ ἢ κρατῇται, μαχόμενος δὲ κινεῖται. κρατεῖ μὲν οὖν μάλιστα μέσων νυκτῶν, κρατεῖται δὲ μεσημβρίας· τότε μὲν γὰρ ὁ ἥλιος πορρωτάτω, τότε δὲ ἐγγυτάτω γίνεται. ἔτι ἄρχεται τὰ πνεύματα ἢ περὶ ἑὸ ἢ περὶ δυσμᾶς, λήγει δὲ τὸ μὲν ἔωθεν, ὅταν κρατηθῇ, τὸ δὲ ἀπὸ δυσμῶν, ὅταν παύσῃται κρατῶν. συμβαίνει οὖν τὰ μὲν μεσημβρίας παύεσθαι,

τὰ δὲ μέσων νυκτῶν.

Διὰ τί ὑποφωσκούσης ἔω καὶ ἤδη πρωὶ μᾶλλον ἐστὶ ψυχὸς ἢ τῆς νυκτός, ἐγγυτέρω ὄντος τοῦ ἡλίου ἡμῶν; ἢ ὅτι πρὸς ἡμέραν δρόσος καὶ πάχνη πίπτει, ταῦτα δὲ ἐστὶ ψυχρά· ὥσπερ οὖν ρανθέντος τοῦ παντός τόπου ὑγρῷ ψυχρῷ γίνεται κατάψυξις.

Διὰ τί ἐν τῷ Πόντῳ καὶ ψυχὴ μάλιστα καὶ πνίγη; ἢ διὰ τὴν παχύτητα τοῦ ἀέρος; τοῦ μὲν γὰρ χειμῶνος οὐ δύναται διαθερμαίνεσθαι, τοῦ δὲ θέρους, ὅταν θερμανθῇ, [938b] κάει διὰ τὴν παχύτητα. ἢ δὲ αὐτὴ αἰτία καὶ διότι τὰ ἐλώδη τοῦ μὲν χειμῶνος ψυχρά, τοῦ δὲ θέρους θερμά. ἢ διὰ τὴν τοῦ ἡλίου φοράν; τοῦ μὲν γὰρ χειμῶνος πόρρω γίνεται, τοῦ δὲ θέρους ἐγγύς.

Διὰ τί τῆς νυκτός αἰθρία μᾶλλον ἢ μεθ' ἡμέραν; ἢ καὶ τοῦ πνεύματος καὶ τῆς ταραχῆς ὁ ἥλιος αἴτιος; ταῦτα γὰρ κινήσεώς τινος γενομένης συμβαίνει γίνεσθαι. αἴτιον τοίνυν τὸ θερμόν. ὅταν οὖν τοῦτο μὴ παρῇ, ἡρεμεῖ τὸ πᾶν, καὶ αἰρομένου τοῦ ἡλίου μᾶλλον ἢ τοῦναντίον· καὶ τὸ “μήποτ’ ἀπ’ ἡπείρου” τοῦτ’ ἐστίν, ὅτι οὗ πλείστη κίνησις, ἐκεῖ ἥκιστα ἄν τι μένοι καὶ συσταίῃ, μὴ ὁμαλοῦ ὄντος καὶ κρατοῦντος τοῦ συνισταμένου. τοῦ μὲν δὴ χειμῶνος ἡ θάλαττα τοιοῦτον, τοῦ δὲ θέρους ἡ γῆ.

Διὰ τί, ὅταν διαχυθῇ τὸ ὑγρὸν εἰς ἀσκούς, οὐ μόνον τὸ ὑγρὸν δέχεται ὁ πίθος μετὰ τῶν ἀσκῶν, ἀλλὰ καὶ ἄλλο προσλαμβάνει; ἢ ὅτι ἐν τῷ ὑγρῷ ἐνυπάρχει ὁ ἀήρ; οὗτος οὖν ὅταν μὴ ἐν τῷ πίθῳ ἐνῇ, οὐ δύναται ἐκκρίνεσθαι διὰ τὸ μέγεθος τοῦ πίθου· ἐκ γὰρ τοῦ μείζονος χαλεπώτερον ἐκθλίψαι ὅτιοῦν καὶ ὑγρὸν καὶ πνεῦμα, ὥσπερ καὶ ἐκ τῶν σπόγγων. ὅταν δὲ μερίζηται εἰς μικρά, ἐκθλίβεται ἐκ τοῦ ἀσκοῦ μετὰ τοῦ ἐνόντος, ὥσθ’ ἢ τοῦ ἀέρος χώρα κενὴ γίνεται, διὸ καὶ τοὺς ἀσκούς καὶ ἔτι ἄλλο ὑγρὸν δέχεται ὁ πίθος. καὶ μᾶλλον ἐπὶ τοῦ οἴνου τοῦτο γίνεται, ὅτι πλείων ἀήρ ἐν τῷ οἴνῳ ἔνεστιν ἢ ἐν τῷ ὕδατι. ὅμοιον δὲ τούτῳ καὶ τὸ ταῦτὸ ἀγγεῖον τὴν τε κονίαν καὶ τὸ ὕδωρ χωρεῖν ἅμα, ὅσον ἐκάτερον χωρὶς ἐγγεόμενον. εἴκει γὰρ πολλὰ εἶναι τὰ διάκενα τῆς τέφρας. ἅτε οὖν λεπτότερον τὸ ὕδωρ διαδύνει μᾶλλον καὶ συσπάττει ἤδη ὥστε πυκνοῦσθαι, καὶ διὰ τὸ παρ’ ἑκαστον τῶν μερῶν εἶναι τὴν σάξιν (μᾶλλον γὰρ σάπτεται κατὰ μικρὸν σαπτόμενον ἅπαν ἢ ἀθρόον), τούτου δὲ γινομένου ὑποκαταβαίνειν τὴν κονίαν· ἅμα δὲ καὶ ἡ τέφρα εἰς αὐτὴν δέχεται τὸ ὑγρὸν διὰ τὸ ἔχειν κοιλίας. ἢ δὲ βαλλομένη τέφρα εἰς τὸ ὕδωρ θερμὴ οὖσα τέμνει αὐτὸ καὶ ἐξαεροῖ. καὶ πρότερον δὲ ὕδατος ἐγχυθέντος καὶ ὕστερον

κονίας ἐμπίπτουσης τὸ αὐτὸ γίνεται, ὥστε καὶ τὸ ὕδωρ ἔχει ἂν κοιλίας καὶ διάκενα αὐτὸ ἐν αὐτῷ. ἢ οὐ τὸ ὕδωρ τὸ δεχόμενον τὴν κονίαν, ἀλλ' ἡ κονία τὸ ὕδωρ; τὸ γὰρ λεπτομερέστερον εἰκὸς εἶναι τὸ εἰσιόν. ἔτι καὶ ἐκ τῆς πείρας δῆλον. ὅταν γὰρ ἐπιπάττηται ἡ τέφρα, καθ' ὃν ἂν [939a] τόπον ἐπιπάττηται, εἰς τοῦτον συρρεῖ τὸ ἄλλο ὕδωρ· ἔδει δὲ τὸ ἐναντίον, εἴπερ ἦν τὸ ὕδωρ τὸ δεχόμενον. ἢ οὐ συμβαίνει τοῦτο, ἐὰν πρότερον ἐγχυθῇ τὸ ὕδωρ καὶ σφόδρα διαμεστώσῃ· ἀλλ' ἐὰν ὅτιοῦν ἐπιβληθῇ, ὑπερχεῖται. ἐὰν δ' ἅπαξ ὑπερχυθῇ καὶ ἐπιπέσῃ ἡ τέφρα, ἤδη συμβαίνει· ἡ γὰρ τέφρα ἦν δεχομένη. ταῦτὸ δὲ τοῦτο καὶ ὅτι οἱ βόθυνοι τὴν ἐκβληθεῖσαν ἐξ αὐτῶν γῆν οὐ δέχονται· ἔοικε γὰρ δὴ ἀήρ τις προκαταλαμβάνων τὸν τόπον καὶ διὰ τοῦτο μὴ δέχεσθαι.

Διὰ τί ὁ ἀήρ παχύτερος ὢν τοῦ φωτὸς διέρχεται διὰ τῶν στερεῶν; ἢ διότι τὸ μὲν φῶς κατ' εὐθεῖαν φέρεται μόνον, διὸ καὶ διὰ τῶν ἀραιῶν οὐ διορᾷ ἡ ὄψις, οἷον κισήριδος; ἐπαλλάττουσι γὰρ οἱ πόροι· ἀλλ' οὐκ ἐν τῇ ὕαλω. ὁ δὲ ἀήρ οὐ κωλύεται διὰ τὸ μὴ εὐθυπορεῖν οὐ διέρχεται.

Διὰ τί ὁ ἀήρ ψυχρὸς μὲν γίνεται διὰ τὸ ἄπτεσθαι τοῦ ὕδατος, δίυγρος δὲ οὐ, κἂν σφόδρα τις φουσᾷ εἰς τὸ ὕδωρ ὥστε κυμαίνειν; ὅτι δὲ ψυχρὸς, δηλοῖ μεθιστάμενος· ψύχει γὰρ ἀπὸ τῶν ὑδάτων. ἢ ὅτι ψυχρὸς μὲν πέφυκεν εἶναι καὶ θερμὸς, ὥστε μεταβάλλει τῇ ἀφῇ οὐ ἂν τινος ἄπτηται, ὑγρὸς δὲ οὐκέτι διὰ τὸ κουφότερος εἶναι· καὶ οὐδέ ποτε εἰς τὸ βάθος τοῦ ὕδατος ἔρχεται, ἀλλ' αἰὶ τοῦ ἐπιπέδου ἄπτεται, κἂν βιάζεται κάτω· καὶ τὸ ὕδωρ ἔτι κατωτέρω φέρεται, ὥστε μήποτε εἰς βάθος ἰέναι.

Διὰ τί ὁ ἐκ τῶν πομφολύγων καὶ κάτωθεν ἀνιῶν οὐ διερὸς ἐξέρχεται; ἢ διότι οὐκ ἐπιμένει τὸ ὑγρόν, ἀλλ' ὀλισθαίνει τὸ ὕδωρ; τὸ δ' ἐπὶ τῇ πομφόλυγι καὶ ἔλαττον ἐστὶν ἢ ὥστε διαιρεῖν.

Διὰ τί ὁ ἀήρ οὐκ ἀναπίμπλησι, τὸ δὲ ὕδωρ; καὶ εἰς τὸν ἀέρα γὰρ μετατιθέμενον διερόν. ἢ ὅτι ὥσπερ οὐδὲ ὁ λίθος; οὐ γὰρ πᾶν ἐστὶν ἀναπληστικόν, ἀλλὰ τὸ γλίσχρον ἢ ὑγρόν.

ἢ ὅτι ὁ ἀήρ ἄνω φέρεται; ὁ γὰρ ἀσκός ὅταν μὲν κενὸς ᾖ, κάτω φέρεται, ὅταν δὲ φουσηθῇ, ἄνω ἐπιμένει διὰ τὸ τοῦτον ἀναφέρειν. εἰ δὲ ὁ ἀήρ ἀνακουφίζει καὶ κωλύει κάτω φέρεσθαι, διὰ τί βαρύτεροι γίνονται φουσηθέντες; καὶ πῶς, ὅτε μὲν βαρύτερός ἐστὶν, ἐπιμένει, κουφότερος δὲ γενόμενος καταφέρεται;

Διὰ τί ὁ ἀήρ οὐκ ἄνω φέρεται; εἰ γὰρ τὰ πνεύματα [939b]

τούτου κινουμένου ὑπὸ τοῦ θερμοῦ γίνεται, πέφυκε δὲ τὸ πῦρ ἄνω φέρεσθαι, καὶ τὸ πνεῦμα εἰς τὸ ἄνω ἐβάδιζεν, εἶπερ τό τε κινεῖν εἰς τὸ ἄνω θεῖ καὶ τὸ κινούμενον οὕτω πέφυκε φέρεσθαι. νῦν δὲ φαίνεται λοξὴν τὴν φορὰν ποιοῦμενος.

Διὰ τί τὸ ἀφ' ἑῷ ψυχρότερον ἢ τὸ ἀφ' ἐσπέρας; ἢ ὅτι τὸ μὲν ἐγγύτερον μέσων νυκτῶν, τὸ δὲ μεσημβρίας; ἔστι δὲ ἡ μεσημβρία θερμότατον διὰ τὸ εἶναι ἐγγύτατον ἡλίου, αἱ δὲ μέσαι νύκτες ψυχρότεραι διὰ τὸ ἐναντίον.

Διὰ τί αἱ νύκτες τῶν ἡμερῶν ἐν ταῖς ἀλέαις πνιγρότεραι; ἢ διὰ τὴν ἄπνοιαν; οἱ γὰρ ἐτησῖαι καὶ πρόδρομοι τὰς νύκτας ἤττον πνέουσιν.

Διὰ τί τὰ ἐν τοῖς ἀσκοῖς ἄσηπτα φυσηθεῖσι, καὶ ἐν τοῖς περιπωματιζομένοις; ἢ διότι σήπεται μὲν κινούμενα, ἅπαντα δὲ τὰ πλήρη ἀκίνητα, ταῦτα δὲ πλήρη.

Διὰ τί τῆς αἰθρίας μᾶλλον ψυχὸς γίνεται ἢ ἐπινεφέλων ὄντων; τὰ δὲ ἄστρα καὶ ὁ οὐρανὸς θερμός. ἢ ὅτι οὐθὲν ἀποστέγει ἐν τῇ αἰθρίᾳ τὴν ἀτμίδα, ἀλλὰ διαχεῖται· ἐν δὲ τοῖς ἐπινεφέλοις ἀποστέγεται; καὶ βορείων γε ἢ νοτίων διὰ τὸ αὐτό· ὁ μὲν γὰρ νότος ἄγει τὸ τοιοῦτον, ὁ δὲ ἀπωθεῖ. καὶ ἀτμίζειν δὲ φαίνεται βορείοις μᾶλλον ἢ νοτίοις, καὶ χειμῶνος ἢ θερύους. ἢ παρὰ τὸ ἀνόμοιον; ἢ ὅτι θερμοῦ ψυχομένου ἐστὶν ἡ ἀτμίς;

Διὰ τί ἀῆρ ὁ ἐλάττων θερμότερος τοῦ πλείονος; αἱ γὰρ στενοχωρίαι ἀλεεινότεραι. ἢ διότι κινεῖται μᾶλλον ὁ πολὺς, ἢ δὲ κίνησις ποιεῖ ψυχρόν; σημεῖον δὲ τούτου, ὅτι κινούμενα ψύχεται τὰ θερμά.

Διὰ τί ὕδωρ μὲν καὶ γῆ σήπεται, ἀῆρ δὲ καὶ πῦρ οὐ σήπεται; ἢ ὅτι θερμότατον γίνεται τὸ σηπόμενον ἅπαν, πυρὸς δὲ οὐθὲν θερμότερον; ἢ ὅτι ψυχθῆναι δεῖ πρότερον, τὸ δὲ πῦρ αἰεὶ θερμόν, ὁ δὲ ἀῆρ πυρὸς πλήρης. σήπεται δὲ οὐθὲν θερμόν, ἀλλὰ ψυχθέν· γῆ δὲ καὶ ὕδωρ καὶ ἀῆρ καὶ θερμὰ καὶ ψυχρὰ γίνεται.

Διὰ τί τὰ ἐπινέφελα ἀλεεινότερα τῶν αἰθρίων; πότερον ὥς οἱ ἀρχαῖοι ἔλεγον, ὅτι τὰ ἄστρα ψυχρά; ἢ λίαν τοῦτο γε ἄτοπον, ἀλλὰ διότι ἀτμίζει; ἐπισημαντέον δὲ ὅτι ἐν νηνεμία ἡ δρόσος καὶ ἡ πάχνη γίνεται. ὅταν μὲν οὖν αἰθρία ᾗ, διαπνέει τὸ θερμόν, ὑφ' οὗ ἀνάγεται τὸ ὑγρόν, ὥστε ψυχρὸς ὁ ἀῆρ· διὸ καὶ δροσίζει ἀφιέμενον τὸ ὑγρὸν ἀπὸ τοῦ θερμοῦ. ὅταν δὲ ἐπινέφελον ᾗ, ἀποστέγεται, διὸ οὐ [940a] γίνεται δρόσος οὐδὲ πάχνη ὄντων ἐπινεφέλων. περὶ οὖν τὴν γῆν

ὑπομένον τὸ θερμὸν ποιεῖ τὴν ἀλέαν.

Διὰ τί ἐν τοῖς ὑψηλοῖς τῶν οἴκων ὁ ἀήρ διευριπίζει, καὶ μάλιστα ταῖς εὐδαίαις; ἢ διότι ὁ ἀήρ πολύκενός τις ἐστὶ τὴν σύγκρισιν. ὅταν οὖν ἄρξηται εἴσω ρεῖν, συγχωρεῖ ὁ ἐν τῷ οἰκήματι ἀήρ καὶ συστέλλεται. τούτου δὲ συμπίπτοντος τῷ χρόνῳ πολυκενώτερος γίνεται ὁ ἔξωθεν, καὶ χώραν πολλὴν ἴσχει. εἰς ταύτην οὖν τὴν χώραν πίπτει ὁ ἐκ τοῦ οἰκήματος ἀήρ, ὦν πλησίον, καὶ φέρεται εἰς ταύτην τὴν χώραν διὰ τὸ κρέμασθαι καὶ τὴν τοῦ κενοῦ φύσιν μὴ δύνασθαι ἀντιστηρίζειν. κατὰ πολλὰ δὲ αὐτοῦ μέρη τούτου συμβαίνοντος, ἔπεται αὐτῷ ὁ πλησίον διὰ τὴν πρόσοψιν· εἴτα πολλοῦ ἔξωθεν φερομένου ὁ μὲν ἔσω τόπος πολύκενος γίνεται, ὁ δὲ ἔξω πυκνότερος, καὶ πάλιν ἔξωθεν εἴσω φέρεται. καὶ ταῦτα ἀλλάσσονται.

ΚΣ. ΟΣΑ ΠΕΡΙ ΤΟΥΣ ΑΝΕΜΟΥΣ.

Διὰ τί ὁ καικίας μόνος τῶν ἀνέμων ἐφ' ἑαυτὸν ἄγει τὰ νέφη; ἢ ὅτι ἀφ' ὑψηλοτέρων τόπων πνεῖ; ἔστι γὰρ τὰ πρὸς ἑὸ ὑψηλότερα τῶν πρὸς ἐσπέραν· σημεῖον δὲ τὸ τῆς πρὸς ἐσπέραν θαλάττης μέγεθος καὶ βάθος. πνέων δὲ ἄνωθεν εἰς τοῦναντίον γραμμὴν ποιεῖ τῇ φορᾷ τὰ κοῖλα πρὸς τὴν γῆν ἔχουσιν. προσπίπτων δέ, ὡς εἴρηται, τοῖς πρὸς ἐσπέραν τῆς γῆς τόποις, καὶ συστέλλων τὰ νέφη διὰ τὸ τῆς γραμμῆς σχῆμα, τῇ ἐκεῖθεν ἀνακλάσει ἐπ' αὐτὸν ὠθεῖ αὐτά. ποιεῖ δὲ μόνος τοῦτο τῶν λοιπῶν τῷ τοὺς μὲν ὑψηλοτέρους τοὺς δ' ἐναντίους εἶναι τόπους, πρὸς οὓς ἐκ τοῦ κάτωθεν ἢ ἐπ' εὐθείας τὴν φορὰν γίνεσθαι συμβαίνει, τὰ κυρτὰ πρὸς τὴν γῆν ἐχούσης, ὥστε ἀνάκλασιν μὴ γίνεσθαι τοῦ πνεύματος τῷ μὴ πρὸς τὴν γῆν ἐχούσης ἀέρα ἔχειν τὴν τελευτήν τῆς φορᾶς, ἐν ᾧ οὐδὲ νέφη ἐστὶ περὶ τὴν γῆν· τοῖς δὲ ἥττον κοίλοις καὶ τῷ ἀπηλιώτῃ τῷ μὴ εἶναι ὑγρόν. ὥστε οὐ συνιστὰς ἥττον καταφανὲς ἐστὶν αὐτοῦ ποιῶν τοῦτο ὃ ποιεῖ.

Διὰ τί βορέαι μὲν ἐτήσιοι γίνονται, νότοι δὲ οὐ; ἢ γίνονται μὲν καὶ νότοι, ἀλλ' οὐ συνεχεῖς, ὅτι πόρρω ἡμῶν ἡ ἀρχὴ τοῦ νότου ἐστίν, ὑπὸ δὲ τῷ βορέᾳ οἰκοῦμεν; ἔτι οἱ μὲν ἐτησίου βορέαι καθεστηκότος τοῦ ἀέρος πνέουσι (θέρους [940b] γὰρ πνέουσιν), οἱ δὲ νότοι ἥρος, ὅθ' ἥττον ἔστηκε τὰ περὶ τὸν ἀέρα. πρὸς δὲ τούτοις ὁ μὲν νότος ὑγρός, τῷ δ' ὑγρῷ ὁ ἄνω τόπος ἀλλότριός ἐστιν· διὸ ταχὺ διαλύεται τὰ ἐν αὐτῷ συνιστάμενα ὑγρά. καὶ τὰ ὑγρά πλανητικά ἐστιν, ὥστε οὐ μένων ἐν ταύτῳ τόπῳ συμμεθίστησι καὶ τὴν τοῦ ἀέρος κίνησιν. κινουμένου δὲ μὴ ἐν ταύτῳ πνεύματα ἄλλα συμβαίνει γίνεσθαι· ἔστι γὰρ πνεῦμα ἀέρος κίνησις.

Διὰ τί νότος πνεῖ μετὰ πάχνην; ἢ διότι ἡ μὲν πάχνη γίνεται πέψεως γινομένης, μετὰ δὲ τὴν πέψιν καὶ τὴν ἀποκάθαρσιν ἡ μεταβολὴ εἰς τοῦναντίον γίνεται; ἐναντίον δὲ τῷ βορρᾷ νότος ἐστίν. διὰ ταῦτο δὲ καὶ μετὰ τὴν χιόνα πνεῖ νότος. ὅλως δὲ καὶ ἡ χιών καὶ ἡ χάλαζα καὶ τὸ ὕδωρ καὶ πᾶσα ἡ τοιαύτη ἀποκάθαρσις πέψεως σημείον ἐστίν. διὸ καὶ μετὰ τὸν ὑετὸν καὶ τὰς τοιαύτας χειμασίας πίπτει τὰ πνεύματα.

Διὰ τί αἱ τροπαὶ πνέουσιν; ἢ διὰ τὸ αὐτὸ ὃ καὶ οἱ εὐριπιοί ρέουσιν; μέχρι γὰρ τοῦ ρεῖν καὶ ἡ θάλαττα φέρεται καὶ ὁ ἀήρ· εἴθ' ὅταν ἀντιπέσῃ καὶ μηκέτι δύνηται τὰ ἀπόγεια προάγειν διὰ τὸ μὴ

ἰσχυρὰν ἔχειν τὴν ἀρχὴν τῆς κινήσεως καὶ φορᾶς, πάλιν ἀνταποδίδωσιν.

Διὰ τί αἱ τροπαὶ ἐκ τῆς θαλάττης εἰσίν; ἢ ὅτι ἡ θάλαττα πλησίον; ἢ ὅτι ἐναντίον ἐστὶ τῇ ἀπογείᾳ ἢ τροπαίᾳ, καὶ ἔστιν ἡ τροπαία οἷον ἀναστροφή ἀπογείας. ἡ δὲ ἀπογεία τὸ ἐκ τῆς γῆς πρὸς τὴν θάλατταν πνεῦμα γινόμενον, ἡ δὲ τροπαία ἢ τούτου παλίσροια. ὥστε ἀνάγκη ἐκ θαλάττης εἶναι. [ἢ ἡ θάλαττά ἐστι] διὰ τὸ εἰς τὴν θάλατταν ἀθροισθῆναι τὸν ῥυέντα ἀέρα; τοῦ δὲ μὴ εἰς τὴν γῆν τοῦτο συνίστασθαι καὶ τοῦ ἀνακάμπειν ἀπὸν αἴτιον, ὅτι ἡ θάλαττα ἐν κοίλῳ ἐστίν· ὁ δὲ ἀήρ, ὥσπερ τὸ ὕδωρ, ῥεῖ αἰεὶ εἰς τὸ κοιλότατον.

Διὰ τί οἱ ἐκνεφίαι ὕδατος γενομένου θάττον παύονται; ἢ ὅτι αἱ κοιλίαι συμπίπτουσι τοῦ νέφους, ὕδατος γενομένου, ἐν αἷς ἡ ἀρχὴ τοῦ πνεύματος συνίσταται;

Διὰ τί οὐχ οἱ αὐτοὶ ἄνεμοι πανταχοῦ ὑέτιοί εἰσιν; ἢ ὅτι οὐχ οἱ αὐτοὶ πανταχοῦ πρὸς ὅρη ἀντιπνέουσιν, ἀλλ’ ἕτεροι κεῖνται πρὸς ἕτερα ὄρη; οἷον γὰρ πρὸς ἀνάντη μόλις ῥεόντων, ἐνταῦθα ὑφίσταται μᾶλλον τὰ νέφη, οὗ ἀδυνατεῖ ἐτι προωθεῖν αὐτὰ ἄνεμος. ὑφιστάμενα δὲ καὶ πιεζόμενα ῥήγνυται.

[941a] Διὰ τί αἱ μὲν καθαραὶ δύσεις εὐδαινὸν σημεῖον, αἱ δὲ τεταραγμέναι χειμερινόν; ἢ ὅτι χειμῶν γίνεται συνισταμένου καὶ πυκνουμένου τοῦ ἀέρος; ὅταν μὲν οὖν κρατῇ ὁ ἥλιος, διακρίνει καὶ αἰθριάζει αὐτόν, ὅταν δὲ κρατῇται, ἐπινεφεῖ ποιεῖ. ἐὰν μὲν οὖν ἰσχυρὰ ἦ ἡ σύστασις, εὐθὺς ἡμέρας γίνεται χειμῶν· ἐὰν δὲ ἀσθενεστέρα, μὴ παντάπασιν δὲ κρατουμένη, τὸ συνιστάμενον ἐξωθεῖται πρὸς τὰς δύσεις. ἐνταῦθα δὲ μένει διὰ τὸ παχύτατον εἶναι τὸν περὶ τὴν γῆν ἀέρα τοῦ χειμῶνος. ταχὺ δὲ συνίσταται καὶ ὁ ἄλλος διὰ τὸ ἔχειν ἀρχὴν καὶ ἔρρισμα, ὃ δέξεται καὶ ἀθροίσει τὸ προσιὸν καθάπερ ὄρθρος· ὥσπερ γὰρ ἐν τροπῇ ἐνὸς ἀντιστάντος καὶ οἱ ἄλλοι μένουσιν, οὕτω καὶ ἐπὶ τοῦ ἀέρος. διὸ ταχὺ καὶ ἐξαίφνης ἐνίστε γίνεται καὶ ἐπινέφελα. ὅταν οὖν αἱ δύσεις τεταραγμέναι ᾖσι, σημεῖον ἐστὶν ἰσχυρὸν ὅτι οὐ κεκράτηκεν ὁ ἥλιος τῆς συστάσεως, πολὺν χρόνον ἐναντιούμενος αὐτῇ, ὥστε εἰκότως ἔστι συστῆναι πλέον. καὶ ἦττον δὲ ἐστὶ φοβερὸν, ὅταν προχειμάσαντος ἢ ὅταν ἐξ εὐδίας τοῦτο συμβῇ. ἐκείνως μὲν γὰρ ἔοικεν ὥσπερ ὑπόλειμμά τι εἶναι, οὕτω δὲ ἀρχὴ συστάσεως.

Διὰ τί λέγεται “οὐ ποτε νυκτερινὸς βορέας τρίτον ἴκετο φέγγος;” ἢ διότι ἀσθενῇ τὰ πνεύματα τὰ ἀπὸ τῆς ἄρκτου, ὅταν ἦ

νυκτερινά; σημείον γὰρ ὅτι οὐ πολὺς ὁ κινηθεὶς ἀήρ, τὸ τηνικαῦτα πνεῦσαι, ὅτε ὀλίγη θερμότης ὑπῆρχεν· ἡ δὲ ὀλίγη ὀλίγον ἐκίνει ἀέρα. τελευτᾷ δὲ ἐν τρισὶ πάντα, καὶ τὰ ἐλάχιστα ἐν τῇ πρώτῃ τριάδι, ὥστε καὶ τοῦτο τὸ πνεῦμα.

Διὰ τί ὁ βορέας πυκνότερον πνεῖ ἢ ὁ νότος; ἢ ὅτι ὁ μὲν βορέας γειτνιῶν τῇ οἰκουμένη οὐ λανθάνει ὀλιγοχρόνιος ὢν (ἅμα γὰρ πνεῖ καὶ πάρεστιν), ὁ δὲ νότος οὐκ ἀφικνεῖται διὰ τὸ πόρρωθεν πνεῖν.

Διὰ τί ὁ νότος ἦττον μετὰ χειμερινὰς νύκτας πνεῖ ἢ μεθ' ἡμέρας; ἢ ὅτι καὶ τῆς νυκτὸς ὁ ἥλιος ἐγγύς ἐστι τῇ πρὸς νότον χώρα, καὶ ἀλεεινότεραι αἱ νύκτες ἐκεῖ ἢ πρὸς ἄρκτον αἱ ἡμέραι; ὥστε πολὺς κινεῖται ὁ ἀήρ, καὶ οὐθὲν ἐλάττων ἢ μεθ' ἡμέραν· ἀλλ' αἱ θερμότεραι ἡμέραι κωλύουσι μᾶλλον πνεῖν, ξηραίνουσαι τὰς ὑγρότητας.

Διὰ τί ἐπὶ κυνὶ ὁ νότος πνεῖ, καὶ τοῦτο ὥσπερ τι ἄλλο γίνεται τεταγμένως; ἢ διότι θερμὰ τὰ κάτω, τοῦ ἡλίου πόρρω ὄντος, ὥστε πολλή ἡ ἀτμὶς γίνεται; καὶ πολλοὶ δὴ ἔπνεον, [941b] εἰ μὴ διὰ τοὺς ἐτησίαις. νῦν δὲ οὗτοι κωλύουσιν. ἢ ὅτι ἐπὶ πᾶσι μὲν σημαίνει τοῖς ἄστροις δυομένοις ἢ ἐπιτέλλουσιν, οὐχ ἥκιστα δὲ ἐπὶ τούτῳ; δηλον οὖν ὅτι πνεύματα μάλιστα ἐπὶ τούτῳ καὶ μετ' αὐτόν. ἐπεὶ δὲ πνίγει, καὶ πνεύματα εἰκότως ἐπ' αὐτῷ τὰ θερμότερα κινεῖται· ὁ δὲ νότος θερμός ἐστιν. ἐπεὶ δὲ εἴθισται μάλιστα ἐκ τῶν ἐναντίων εἰς τὰ ἐναντία μεταβάλλειν, πρὸ κυνὸς δὲ οἱ πρόδρομοι πνέουσιν ὄντες βορέαι, εἰκότως μετὰ κύνα νότος πνεῖ, ἐπειδὴ ἐπισημαίνει μὲν, ἐπιτέλλουσι δὲ τοῖς ἄστροις. τὸ δὲ ἐπισημαίνειν ἐστὶ μεταβολὴν τοῦ ἀέρος ποιεῖν· μεταβάλλει δὲ πάντα εἰς τοὺς ἐναντίους ἢ τοὺς ἐπὶ δεξιὰ ἀνέμους τὰ πνεύματα. ἐπεὶ δὲ βορέας εἰς τοὺς ἐπιδεξιούς μεταβάλλει, εἴη ἂν αὐτῷ λοιπὸν εἰς νότον μεταβάλλειν. ἔστι δὲ καὶ ἡ μετὰ τὰς χειμερινὰς τροπὰς πεντεκαδεκάτη νότιος, διὰ τὸ τὰς μὲν τροπὰς ἀρχὴν τινα εἶναι, κινεῖν δὲ τὸν κατ' αὐτὴν μάλιστα ἀέρα τὸν ἥλιον, εἶναι δὲ ἐν ταύταις ταῖς τροπαῖς πρὸς νότον. καθάπερ οὖν καὶ τὰ ἀπ' ἀνατολῆς κινῶν ἀπηλιώτας ἀνέμους ἡγείρειν, οὕτω καὶ τὰ ἀπὸ μεσημβρίας κινῶν νότους ἐγείρει. οὐκ εὐθὺ δὲ ἀπὸ τροπῶν ποιεῖ τοῦτο διὰ τὸ βραχυτάτας ποιεῖσθαι τὰς μεταστάσεις τότε, ἀλλ' ἐν τῇ πεντεκαδεκάτῃ διὰ τὸ τὸν χρόνον τοῦτον συμμετρῶς ἔχειν τῇ κατὰ τὴν μετάστασιν πρώτη φαντασίᾳ· ὅλου γάρ ἐστι μέρος εὐσημότατον ὁ εἰρημένος χρόνος.

Διὰ τί ἐπὶ Ὠρίωνι γίνονται αἰόλοι μάλιστα αἱ ἡμέραι καὶ

ἀκαιρίαι τῶν πνευμάτων; ἢ ὅτι ἐν μεταβολῇ αἰεὶ πάντα ἀοριστεῖ μάλιστα, ὁ δ' Ὠρίων ἀνατέλλει μὲν ἐν ἀρχῇ ὁπώρας, δύνει δὲ χειμῶνος, ὥστε διὰ τὸ μήπω καθεστάναι μίαν ὥραν, ἀλλὰ τὴν μὲν γίνεσθαι τὴν δὲ παύεσθαι, διὰ ταῦτα ἀνάγκη καὶ τὰ πνεύματα ἀκατάστατα εἶναι διὰ τὸ ἐπαμφοτερίζειν τὰ ἐξ ἑκατέρας. καὶ χαλεπὸς δὴ λέγεται καὶ δύνων καὶ ἀνατέλλων ὁ Ὠρίων διὰ τὴν ἀοριστίαν τῆς ὥρας· ἀνάγκη γὰρ παραχῶδη εἶναι καὶ ἀνώμαλον.

Διὰ τί ὁ νυκτερινὸς βορέας τριταῖος λήγει; πότερον ὅτι ἀπὸ μικρᾶς καὶ ἀσθενοῦς ἀρχῆς, ἢ τρίτη δὲ κρίσιμος; ἢ ὅτι ἀθρόος ἢ ἔκχυσις, ὥσπερ τῶν ἐκνεφιδῶν; ταχεῖα οὖν ἢ παῦλα.

Διὰ τί βορέαι πλείστοι πνέουσι τῶν ἀνέμων; ἢ διὰ τὸ πρὸς τούτῳ τὴν οἰκουμένην τῷ τόπῳ ὑποκεῖσθαι ὄντι ὑψηλῷ [942a] καὶ ἔξω τροπῶν καὶ πλήρει χιόνος, ἢ οὐδέποτε ἔνια ὄρη λείπει; τὸ πολὺ οὖν ὑγραينوμένων τῶν πεπηγότων πολλάκις πνεῦμα γίνεται. τοῦτο δέ ἐστι βορέας, τὸ ἐκ τῶν ἀπὸ τῆς ἄρκτου τόπων πνεῦμα.

Διὰ τί οἱ νότοι πνέουσι μὲν χειμῶνος καὶ ἥαρος ἀρχομένου καὶ μετοπώρου λήγοντος, εἰσὶ δὲ κυματοειδεῖς καὶ συνεστραμμένοι, καὶ τοῖς ἐν Λιβύῃ ὁμοίως ψυχροὶ ὥς οἱ βορέαι ἐνταῦθα; ἢ διότι πλησίον τοῦ ἡλίου ὄντος ἀνάγκη κινεῖσθαι τὰ πνεύματα; ὁ δὲ ἥλιος τοῦ χειμῶνος πρὸς νότον φέρεται, καὶ τοῦ μὲν ἥαρος ἀρχομένου τοῦ δὲ μετοπώρου τελευτῶντος ἤδη θερμαίνει, τὸ δὲ θέρος πρὸς βορέαν φέρεται, ἐκείνους δὲ ἀπολείπει τοὺς τόπους. θερμὸς δὲ ἐστὶ διὰ τὸ μίγνυσθαι τὸ πνεῦμα τῷ κατὰ Λιβύην ἀέρι θερμῷ ὄντι· καὶ διὰ τοῦτο μεγαλοκύμων νοτίζειν ποιεῖ τὸ θέρος, ἐμπίπτων εἰς τὴν θάλατταν.

Διὰ τί ὁ νότος δυσώδης; ἢ ὅτι ὑγρὰ καὶ θερμὰ ποιεῖ τὰ σώματα, ταῦτα δὲ σήπεται μάλιστα; οἱ δὲ ἐκ τῆς θαλάττης νότοι ἀγαθοὶ φυτοῖς· ἐκ θαλάττης γὰρ αὐτοῖς προσπίπτει. καὶ τῆς Ἀττικῆς τῷ Θριασίῳ πεδίῳ αἴτιον, διότι ἀπεψυγμένος ἀφικνεῖται. αἱ δ' ἐρυσίβαι γίνονται ὑπὸ ὑγρότητος θερμῆς μὲν ἀλλοτρίας δέ.

Διὰ τί ἄνεμος γίνεται πρὸ τῶν ἐκλείψεων ὥς τὰ πολλά, ἀκρόνυχον μὲν πρὸ τῶν μεσονυκτίων ἐκλείψεων, μεσονύκτιον δὲ πρὸ τῶν ἑώων; ἢ διότι ἀμαυροῦται τὸ θερμὸν τὸ ἀπὸ τῆς σελήνης διὰ τὸ πλησίον ἤδη φορὰν εἶναι, ἐν ᾧ γενομένῳ ἔσται ἢ ἐκλειψις; ἀνιεμένου οὖν ᾧ κατείχετο ὁ ἄηρ καὶ ἡρέμει, πάλιν κινεῖται καὶ γίνεται πνεῦμα τῆς ὀψιαίτερον ἐκλείψεως ὀψιαίτερον.

Διὰ τί ὁ νότος οὐκ ἀρχόμενος ἀλλὰ λήγων ὑέτιος; πότερον ὅτι πόρρωθεν συνάγει τὸν ἀέρα; γίνεται δὲ συνιστάντος τὸ ὕδωρ,

συνίσταται δὲ ὕστερον ἢ ἄρχεται. ἢ ὅτι ἀρχομένου θερμός ἐστιν ὁ ἀήρ ἔτι διὰ τὸ ἐκ τοιούτου ἐληλυθέναι, ἐπιχρονιζόμενος δὲ ψυχθεὶς συνίσταται μᾶλλον εἰς ὕδωρ.

Διὰ τί ὁ νότος, ὅταν μὲν ἐλάττων ᾖ, αἰθριὸς ἐστιν, ὅταν δὲ μέγας, νεφώδης καὶ χρονώτερος; πότερον, ὥσπερ τινὲς λέγουσι, διὰ τὴν ἀρχήν; ἐὰν μὲν γὰρ ἀπ' ἐλάττονος, αἰθριος, ἐὰν δὲ ἀπὸ πλείονος ὀρμήσῃ, νεφελώδης. ἢ ὅτι ἐλάττων ἀρχόμενός ἐστιν, ὥστε οὐ πολὺν ἀέρα ὠθεῖ, ἐπὶ [942b] τέλει δὲ εἴωθε γίνεσθαι μέγας. διὸ καὶ παροιμιάζονται “ἀρχομένου γε νότου καὶ λήγοντος βορέαο.”

Διὰ τί προίεται τοῦ χειμῶνος ἀπὸ τῆς ἑω τὰ πνεύματα, τοῦ θέρους δὲ καὶ ἀφ' ἐσπέρας; ἢ ὅτι ὅταν μηκέτι κρατῇ ὁ ἥλιος, ἀφιέμενος ὁ ἀήρ ῥεῖ; δύνων τε οὖν καταλείπει νέφη, ἀφ' ὧν οἱ ζέφυροι· καὶ ὅσον ἂν ἐπαγάγῃ ἐκείνοις τοῖς ἐν τῷ κάτω ἡμισφαιρίῳ οἰκοῦσιν, ἐωθινὸν πνεῦμα γίνεται. τάναντία δέ, ὅταν δύνῃ ἐν τῷ κάτω μέρει, ἐκείνοις τε ζεφύρους ποιήσῃ καὶ ἐνταῦθα ἐωθινὸν πνεῦμα ἀπὸ τοῦ ἐπομένου ἀέρος αὐτῷ. διὰ τοῦτο καὶ καταλάβῃ ἄλλον ἄνεμον, μείζων γίνεται αἰρομένου, ὅτι προσέθηκεν.

Διὰ τί οἱ κύνες τὰ ἔχνη ἥκιστα εὐρίσκουσι ζεφύρου πνέοντος; ἢ διότι μάλιστα συγχεῖ διὰ τὸ συνεχέστατος εἶναι τῶν ἀνέμων καὶ μάλιστα ὑπὸ τὴν γῆν πνεῖν;

Διὰ τί, ὅταν ἀστέρες διάττωσιν, ἀνέμου σημεῖον; ἢ ὅτι ὑπὸ τοῦ πνεύματος φέρονται, καὶ πρότερον ἐκεῖ γίνεται πνεῦμα ἢ παρ' ἡμῖν; διὸ καὶ ἀφ' οὗ ἂν τόπου φέρονται οἱ ἀστέρες, ἐν τούτῳ καὶ τὸ πνεῦμα γίνεται.

Διὰ τί μεγίστας νεφέλας τῶν ἀνέμων ὁ ζέφυρος ἄγει; ἢ διότι ἐκ πελάγους πνεῖ καὶ κατὰ τὴν θάλατταν; ἐκ πολλοῦ οὖν καὶ συνάγει.

Διὰ τί οἱ ἐπὶ τέλει ἄνεμοι μέγιστοι; ἢ ὅτι ὅταν ἀθρόοι ἐκπνεύσωσιν, ὀλίγον τὸ θερμόν;

Διὰ τί, ἐὰν περὶ ἰσημερίαν λίψ πνεύσῃ, ὕδωρ γίνεται; ἢ ὅτι καθ' ὃν ἂν ᾖ ὁ ἥλιος τόπον τοῦ κόσμου, τὰ ἐντεῦθεν πνεύματα κινεῖ; διὸ καὶ ἡ τῶν πνευμάτων περίστασις κατὰ τὴν τοῦ ἡλίου φορὰν γίνεται. ἐπεὶ δ' ἡ ἰσημερία μεθόριόν ἐστι χειμῶνος καὶ θέρους, ὅταν συμβῇ τὸν ἥλιον κατὰ τὴν ἡμῖν φαινομένην ἰσημερίαν ὑπερβεβληκέναι ἢ ἐκλείπειν τοῦ ἀκριβοῦς ὅρου καὶ εἶναι μᾶλλον ἐν τοῖς χειμερίοις, συμβαίνει τοὺς ἐκ τούτου τοῦ μέρους ἀνέμους πνεῖν, ὧν ἐστὶ πρῶτος λίψ, ὧν ὑγρὸς φύσει. ὄντος δὲ τοῦ ἡλίου μᾶλλον ἐν τῷ χειμερίῳ μέρει τοῦ κόσμου, καὶ κινουντος τὰ ἐν αὐτῷ πνεύματα,

τὰ χειμῶνος ἔργα συμβαίνει γίνεσθαι· τούτων δέ ἐστιν ὁ ὄμβρος. ἔτι δὲ ἐπειδὴ ἡ ἰσημερία ἐστὶ καθάπερ χειμῶν καὶ θέρος ἰσοκρατῆς, ἐὰν ὁποτέρωδὺν αὐτῶν τι προστεθῇ, εὖσημον τὴν ρόπην ποιεῖ, καθάπερ ἐπὶ τῶν [943a] ἰσαζόντων ζυγῶν. ἐπεὶ δὲ ὁ λιψ ἔκ τε τῆς χειμερίου τάξεώς ἐστι καὶ ὑγρὸς φύσει, προστεθείς ἐν τῇ ἰσημερία ρόπην χειμῶνος ἐποίησε καὶ ὄμβρον· ὁ γὰρ ὄμβρος χειμῶν ἐστιν οἰκειότατος τῷ πνεύσαντι πνεύματι.

Διὰ τί ὁ νότος καὶ ὁ εὖρος θερμότεροι ὄντες τῶν ἐναντίων, ὁ μὲν τοῦ βορέου, ὁ δὲ τοῦ ζεφύρου, ὑδατωδέστεροί εἰσιν; καίτοι διὰ ψυχρότητα ὕδωρ ἐξ ἀέρος γίνεται. οὐ γὰρ διὰ τὸ ἀπωθεῖν τὸν βορέαν ἐντεῦθεν γίνεται τὰ νέφη· ὁ γὰρ ζέφυρος καὶ ὁ εὖρος ἀπάγουσιν ἅμφω (ὁμοίως γὰρ πλάγιοι), καὶ οἱ ἄλλοι δὲ πάντες, ὅθεν πνέουσιν. πότερον ὅτι ἀντιπερίσταται τὸ ψυχρὸν εἴσω μᾶλλον, ὅταν ἢ ἔξω τὸ θερμὸν μᾶλλον; ἢ ἔστι μὲν τι καὶ διὰ τὸ ὅθεν πνέουσιν, αἰθρίους εἶναι; καὶ γὰρ εὖρος ἀπ' ἠοῦς ἐστίν. ἦδε δὲ ἡ χώρα πρὸς ἐσπέραν κεῖται, καὶ ζέφυρος. ἀλλὰ καὶ διότι πρότερον θερμαινόμενος ὁ ἀήρ, ὥσπερ καὶ τὰ ὕδατα, τάχιστα καὶ μάλιστα ψύχεται. φέρεται οὖν ὁ μὲν ἀπὸ τοῦ εὖρου ἀπ' ἀνατολῆς ἀήρ θερμός, ὁ δὲ ἀπὸ τοῦ νότου ἀπὸ μεσημβρίας. ὅταν οὖν ἔλθωσιν εἰς τὸν ψυχρότερον τόπον, ταχὺ πηγνύνται καὶ συνίστανται εἰς ὕδωρ. καὶ μᾶλλον ὁ εὖρος ποιεῖ ὕδωρ, ὅτι ἀπὸ τοῦ ἡλίου μᾶλλον φέρει τὸν ἀέρα, καὶ ὁμοίως θερμόν. ὁ δὲ νότος λήγων ὑδατώδης, ὅτι ψυχρὸς ὁ πρῶτος φερόμενος ἀήρ ἀπὸ τῆς θαλάττης, ὁ δὲ τελευταῖος διάθερμος ὢν ἀπὸ τῆς γῆς κομίζει. ἢ οὐ μόνον τοῦτ' αἴτιον, ἀλλ' ὅτι καὶ μεῖζων λήγων ὁ νότος γίνεται; διὸ καὶ ἡ παροιμία εἰς αὐτὸν “ἀρχομένου τε νότου.” οἱ δὲ μεῖζους ψυχρότεροι. ὥστε πηγνύει ὕστερον τὰ νέφη. ἢ διὰ τοῦτο ὑδατωδέστερος ἢ ἀρχόμενος;

Διὰ τί οἱ ἄνεμοι ξηραίνουν ψυχροὶ ὄντες; ἢ διότι ἀτμίζειν ποιοῦσιν οἱ ψυχρότεροι; διὰ τί δὲ μᾶλλον ἢ ὁ ἥλιος; ἢ διότι ἀπάγουσι τὴν ἀτμίδα, ὁ δὲ ἥλιος καταλείπει; ὑγραίνει μὲν οὖν μᾶλλον, ξηραίνει δὲ ἥττον.

Διὰ τί ὁ καικίας μόνος τῶν ἀνέμων ἐφ' ἑαυτὸν ἄγει τὰ νέφη, ὥσπερ καὶ ἡ παροιμία λέγει “ἔλκων ἐφ' αὐτὸν ὥσπερ καικίας νέφος.” οἱ γὰρ ἄλλοι, ὅθεν ἂν πνέωσιν, ἐνταῦθα ἀναστέλλουσιν. πότερον αἴτιον ὅτι ἅμα ὁ ἐναντίος πνεῖ; ἢ οὐκ ἂν ἐλάνθανεν, ἀλλὰ πέφυκε τὸ πνεῦμα κύκλου γραμμὴν φέρεσθαι; οἱ μὲν οὖν ἄλλοι περὶ τὴν γῆν πνέουσιν· [943b] τοῦτο δὲ τὸ κοῖλον τῆς γραμμῆς πρὸς τὸν

οὐρανὸν καὶ οὐκ ἐπὶ τὴν γῆν ἐστίν, ὥστε ἐπὶ τὴν ἀρχὴν πνέων ἐφ' ἑαυτὸν τὰ νέφη ἄγει.

Διὰ τί ἀπὸ μὲν τῆς θαλάττης οὐκ ἀποπνεῖ ἔωθεν ψυχρόν, ἀπὸ δὲ τῶν ποταμῶν; ἢ ὅτι ἡ μὲν θάλαττά ἐστιν ἐν ἀναπεπταμένοις τόποις, οἱ δὲ ποταμοὶ ἐν στενοῖς; ἢ οὖν ἀπὸ τῆς θαλάττης αὔρα εἰς πολὺν τόπον σκίδνεται, ὥστε εἶναι ἀσθενῆς, ἡ δὲ ἀπὸ τῶν ποταμῶν ἀθρόως φέρεται καὶ μᾶλλον ἰσχύει, διὸ μᾶλλον εἰκότως φαίνεται ψυχρά. ἢ οὐ τοῦτ' ἐστὶν αἴτιον, ἀλλ' οἱ μὲν ποταμοὶ ψυχροὶ εἰσιν, ἡ δὲ θάλαττα οὔτε θερμὴ οὔτε ψυχρά; γίνεται δὲ ἡ αὔρα καὶ ἀποπνοὴ θερμαινομένων ἢ ψυχομένων· ὁπότερον γὰρ ἂν τούτων πάσχη, ἐξαερούται, ἐξαερουμένου δὲ τοῦ ὕδατος ὁ ἀήρ γινόμενος φέρεται, ὃ ἐστὶν αὔρα. τὸ μὲν οὖν ἀπὸ τῶν ψυχρῶν ψυχρὸν εἰκότως ἀποπνεῖ, τὰ δὲ ἀπὸ τῶν σφόδρα θερμῶν ἀποπνέοντα ψύχεται καὶ γίνεται ψυχρά. τοὺς μὲν οὖν ποταμοὺς ψυχροὺς ἅπαντας εὔροι τις ἂν, ἡ δὲ θάλαττα οὔτε ψυχρά οὔτε θερμὴ σφόδρα ἐστίν. οὔτε οὖν τὸ ἀποπνέον ψυχρὸν ἀπ' αὐτῆς ἐστί, διὰ τὸ μὴ ψυχρὰν εἶναι σφόδρα, οὔτε ψύχεται ταχύ, διὰ τὸ μὴ θερμὴν εἶναι σφόδρα.

Διὰ τί ὁ ζέφυρος εὐδιεινὸς καὶ ἡδιστος δοκεῖ εἶναι τῶν ἀνέμων, καὶ οἶον καὶ Ὅμηρος ἐν τῷ Ἡλυσίῳ πεδίῳ, “ἀλλ' αἰεὶ ζεφύριοιο διαπνεύουσιν ἀῆται;” ἢ πρῶτον μὲν ὅτι ἔχει τὴν τοῦ ἀέρος κρᾶσιν; οὔτε γὰρ θερμὸς ὥσπερ οἱ ἀπὸ μεσημβρίας καὶ ἔω, οὔτε ψυχρὸς ὥσπερ οἱ ἀπὸ τῆς ἄρκτου, ἀλλ' ἐν μεθορίῳ ἐπὶ τῶν ψυχρῶν καὶ θερμῶν πνευμάτων· γειννῶν δὲ ἀμφοῖν τῆς δυνάμεως αὐτῶν κοινωνεῖ, διὸ καὶ εὐκρατός ἐστι καὶ πνεῖ ἕαρος μάλιστα. ἔτι τὰ πνεύματα περιίσταται ἢ εἰς τὰναντία ἢ εἰς τὰ δεξιά. μετὰ οὖν τὸν βορέαν πνέων (ἐπὶ δεξιὰ γὰρ ὁ τόπος) εὐδοκιμεῖ, ὥσπερ παρὰ χαλεπὸν πρᾶος. καὶ ἅμα ὅταν ἀποχειμᾶση, εὐδία εἴωθε γίνεσθαι ὡς ἐπὶ τὸ πολὺ. ὁ δὲ βορέας χειμέριος ἄνεμος. [καὶ ὁ ἀπηλιώτης δὲ ἐν τῷ μέσῳ ὦν τῶν θερμῶν καὶ τῶν ψυχρῶν πνευμάτων ἦττον αὐτοῖς κοινωνεῖ. ἀπηλιώτης μὲν γὰρ πνέων τὰ πρὸς νότου πνεύματα κινεῖ (ἐνταῦθα γὰρ ἡ μετάστασις αὐτοῦ ἐστίν), κινῶν δὲ οὐ μίγνυται αὐτοῖς. ὁ δὲ ζέφυρος καὶ κινεῖται ὑπὸ τῶν νοτίων, καὶ [944a] πνέων κινεῖ τὰ βόρεια· τελευτᾷ γὰρ ἐνταῦθα ἡ περίοδος τῶν πνευμάτων. διὸ τῶν μὲν τὴν τελευτὴν τῶν δὲ τὴν ἀρχὴν ἔχων ἐν αὐτῷ δικαίως ἡδύς ἐστι καὶ δοκεῖ εἶναι.]

Διὰ τί ἐπὶ κυνὶ νότος πνεῖ; ἢ ὅτι ἐπὶ πᾶσι μὲν σημαίνει τοῖς ἄστροις δυομένοις ἢ ἐπιτέλλουσιν, οὐχ ἥκιστα δὲ ἐπὶ τούτῳ; δηλὸν

οὖν ὅτι πνεύματα μάλιστα ἐπὶ τούτῳ καὶ μετ' αὐτόν. ἐπεὶ δὲ πνίγει, καὶ πνεύματα εἰκότως ἐπ' αὐτῷ τὰ θερμότερα κινεῖται· ὁ δὲ νότος θερμός ἐστιν. ἐπεὶ δὲ - χρόνος. (p. 941b 423.)

Διὰ τί ὁ ζέφυρος πρὸς τὴν δείλην πνεῖ, πρωὶ δὲ οὐ; ἢ αἴτιος μὲν ἐστὶν ὡς ἐπὶ τὸ πολὺ τῶν πνευμάτων ὁ ἥλιος ἀνατέλλων καὶ δύνων; ὅταν γὰρ ὑγρὸν ὄντα τὸν ἀέρα διαθερμαίνων πέττη καὶ διακρίνη, εἰς πνεῦμα διακρίνει· ἐὰν δὲ ἡ πνευματώδης ὁ ἀήρ, ἔτι μᾶλλον ἐκπνευματοῦται ὑπὸ τοῦ ἡλίου. ὅταν μὲν οὖν ἐπ' ἀνατολῇ ἡ ὁ ἥλιος, πόρρω ἐστὶ τοῦ ζεφύρου· ἀπὸ γὰρ δυσμῶν πνεῖ. ὅταν δὲ περὶ τὸ δύνειν ἦδη, τότε διακεκριμένον ἐστὶ τὸ πνεῦμα τελῶς. ἀπὸ δὲ μέσου ἡμέρας καὶ πρὸς τὴν δείλην συμμετρότατα ἔχει πρὸς τὸ διαθερμᾶναι καὶ διακρίναι. διὰ ταῦτα δὲ καὶ ὁ ἀπηλιώτης πρωὶ ἄρχεται πνεῖν· τοῦ γὰρ ὑπὲρ γῆς ἀέρος τῆς νυκτὸς ἐξυγραιομένου καὶ τῇ γῇ πλησιάσαντος διὰ βάρος, ἔωθεν διακρίνων αὐτόν ὁ ἥλιος τὸν καθ' αὐτόν κινεῖ πρῶτον. τὸ δὲ ἀπὸ τοῦ ἡλίου πνεῦμα ἀνατέλλοντος ἐντεῦθεν ἀπηλιώτης καλεῖται.

Διὰ τί αἰρομένου τοῦ ἡλίου καὶ αὐξάνεται καὶ πίπτει τὰ πνεύματα; ἢ ὅτι τὸ πνεῦμά ἐστιν ἡτοι τοῦ ἀέρος ἢ τοῦ ἀναχυθέντος ὑγροῦ κίνησις; αὕτη δὲ ὅταν μὲν ἐλάττων ἦ, ταχὺ καταναλίσκεται ὑπὸ τοῦ ἡλίου, ὥστε οὐ γίνεται πνεῦμα· ὅταν δὲ πλείων, κινεῖται μᾶλλον τοῦ ἡλίου ἀνατείλαντος· ὁ γὰρ ἥλιος ἀρχὴ τῶν κινήσεών ἐστιν.

Διὰ τί ὁ ζέφυρος τῆς δείλης πνεῖ; ἢ ἅπαντα τὰ πνεύματα τοῦ ἡλίου διαχέοντος τὸ ὑγρὸν γίνεται; τότε γὰρ συνεστηκός, ὅταν ἢ τοῦ θερμοῦ δύναμις πλησιάζῃ, ἐξάπτει. ὁ δὲ ζέφυρος ἀφ' ἐσπέρας πνεῖ. εἰκότως οὖν τῆς δείλης γίνεται· τότε γὰρ ὁ ἥλιος εἰς τὸν τόπον αὐτοῦ ἀφικνεῖται. καὶ ὁ βορέας καὶ ὁ νότος διὰ τοῦτο πλειστάκις πνέουσιν, ὅτι τὸ ἐναντίον ὑπὸ τοῦ ἐναντίου κρατούμενον κατ' εὐθυωρίαν ἥκιστα δύναται διαμένειν, ἀλλὰ μᾶλλον ἐκ τοῦ πλαγίου. [944b] ὁ μὲν οὖν νότος καὶ βορέας ἐκ τῶν ἐφ' ἐκάτερα τόπων τῆς τοῦ ἡλίου φορᾶς πνέουσιν, οἱ δὲ ἄλλοι μᾶλλον ἐκ τοῦ κατ' ἀντικρύ.

Πότερον τὸ πνεῦμα ἀπὸ πηγῆς τινὸς φέρεται ὥσπερ τὸ ὕδωρ, καὶ ταύτης οὐκ ἔστιν ἀνωτέρω αὐτὸ ἐνεχθῆναι, ἢ οὐ; καὶ πότερον ἀπὸ ἐνὸς σημείου ἢ ἀπὸ πλείονος τόπου; ἔνια μὲν οὖν ἐστὶν ὅμοια ἃ καὶ ἐπὶ τῶν ὑδάτων συμβαίνει γίνεσθαι. τό τε γὰρ ὕδωρ, ὅταν εἰς τὸ κάταντες φέρηται, θᾶπτον ρεῖ ἢ ὅταν ἐν τῷ ἐπιπέδῳ καὶ ὁμαλῷ λιμνάξῃ. ὁμοίως δὲ καὶ τὰ πνεύματα· ἐπὶ μὲν γὰρ τοῖς ἄκροις καὶ τοῖς

ὕψηλοῖς αἰεὶ ἐν κινήσει ὁ ἀήρ, ἐν δὲ τοῖς κοίλοις ἡρεμεῖ πολλάκις καὶ ἄπνοια γίνεται. ἔτι ἐπὶ τοῖς σφόδρα ὑψηλοῖς ὄρεσιν οὐ γίνεται τὰ πνεύματα, οἷον ἐπὶ τῷ Ἄθῳ καὶ τοῖς ἄλλοις τοῖς τοιούτοις. σημεῖον δέ· ἃ γὰρ ἂν καταλείπωσιν οἱ τῷ προτέρῳ ἔτει θύοντες, εὐρίσκεσθαι φασὶ διαμένοντα τῷ ὑστέρῳ. δῆλον οὖν ὅτι ὥσπερ ἀπὸ πηγῆς τινὸς καὶ ἡ τοῦ πνεύματος φορὰ γίνεται. εἰς τὸ ἄνω οὖν οὐκέτι δύναται διικνεῖσθαι. διὰ τοῦτο οὖν ἐπὶ τοῖς ὑψηλοῖς τοῦτο συμβαίνει. ὁμοίως δ' ἂν καὶ ἐπὶ τοῦ ὕδατος εἴη· οὔτε γὰρ ὕδωρ λάβρον οὔτε πνεῦμα ἐξαίσιον ἐν τοῖς ὑψηλοῖς φαίνεται γίνεσθαι.

Διὰ τί ποτε τοῦ μὲν νότου πνέοντος ἡ θάλαττα κυανέα γίνεται, τοῦ δὲ βορέου ζοφώδης; ἢ ὅτι ὁ βορέας ἤττον τὴν θάλατταν ταράττει, τὸ δὲ ἀτακτότερον ἅπαν μέλαν φαίνεται.

Διὰ τί οἱ νότοι μικρὰ μὲν πνέοντες οὐ ποιοῦσιν ἐπίνεψιν [ἤτοι συννέφειαν], μεγάλοι δὲ γενόμενοι ἐπινεφοῦσιν; ἢ διότι μικροὶ μὲν πνέοντες οὐ δύνανται πολλὰ νέφη ποιεῖν; ὀλίγον οὖν τόπον κατίσχουσιν. ὅταν δὲ μεγάλοι γίνωνται, πολλὰ ἀπωθοῦσι, διὸ καὶ δοκοῦσι μᾶλλον ἐπινεφεῖν.

Διὰ τί ὁ μὲν βορέας ἀρχόμενος μέγας, λήγων δὲ μικρός, ὁ δὲ νότος ἀρχόμενος μὲν μικρός, λήγων δὲ μέγας; ἢ ὅτι ὁ μὲν βορέας ἐγγὺς ἡμῶν, ὁ δὲ νότος πόρρω; ὁ μὲν οὖν ὅταν ἄρξηται, εὐθὺς παρ' ἡμῖν, τοῦ δὲ ἅτε διὰ πολλοῦ χρόνου ἡ ἀρχὴ διασκεδάννυται, καὶ πρὸς ἡμᾶς μικρὸν ἐξικνεῖται αὐτῆς τὸ πρῶτον· τῆς δὲ τελευτῆς τοῦ μὲν αἰσθανόμεθα, τοῦ δὲ ὅλως οὐκ αἰσθανόμεθα. ὥστε εἰκότως ὁ μὲν ἀσθενὴς παυόμενος (ἀσθενὴς γὰρ ἡ τελευτὴ πάντων), ὁ δὲ οὐ· τῆς γὰρ τελευτῆς οὐκέτι αἰσθανόμεθα αὐτοῦ.

[945a] Διὰ τί οὗ μὲν κόλποι εἰσὶ, τροπαῖαι γίνονται, οὗ δὲ ἀναπεπταμένα πελάγη, οὐ γίνονται; ἢ διότι εἰς μὲν τοὺς κόλπους ῥέον οὐ διασπᾶται τὸ πνεῦμα μᾶλλον, ἀλλ' ἀθρόον ἐπὶ πολὺ φέρεται, ἐν δὲ τοῖς ἀναπεπταμένοις ἐξ ἀρχῆς τε αἱ ἀπογέαι εὐθὺς διασπῶνται μᾶλλον, καὶ ὅταν ῥέωσι, ταῦτο πάσχουσι διὰ τὸ πολλαχῇ ἐξεῖναι ὀρμησαι· ἔστι γὰρ ἡ τροπαία ἀπόγεος ἀνάκλασις.

Διὰ τί λέγεται “ἀρχομένου τε νότου καὶ λήγοντος βορέας;” ἢ διότι ὁ μὲν βορέας, διὰ τὸ ὑπεῖκειν ἡμᾶς αὐτῷ καὶ εἶναι τὴν οἴκησιν πρὸς ἄρκτον, εὐθὺς μέγα πνεῖ; ἅμα γὰρ ἄρχεται καὶ πάρεστιν. διὸ παυόμενος ἡδὺ πνεῖ· τότε γὰρ ἀσθενὴς πνεῖ. ὁ δὲ νότος διὰ τὸ πόρρωθεν ὕστερον μεῖζων ἀφικνεῖται.

Διὰ τί ἐν τοῖς νοτίοις βαρύτερον ἔχουσι καὶ ἀδυνατώτερον οἱ

ἄνθρωποι; ἢ διότι ἐξ ὀλίγου πολὺ ὑγρὸν γίνεται, διατηκόμενον διὰ τὴν ἀλέαν, καὶ ἐκ πνεύματος κούφου ὑγρὸν βαρὺ· εἴτα ἡ δύναμις ἀτονεῖ.

Διὰ τί ἐν τοῖς βορείοις βρωτικώτεροι ἢ ἐν τοῖς νοτίοις; ἢ διότι ψυχρότερα τὰ βόρεια;

Διὰ τί ὁ νότος οὐ πνεῖ κατ' αὐτὴν τὴν Αἴγυπτον τὰ πρὸς θάλατταν, οὐδ' ὅσον ἡμέρας δρόμον καὶ νυκτός· τὰ δὲ ὑπὲρ Μέμφεως καὶ ἀποσχόντι δρόμον ἡμέρας καὶ νυκτός λαμπρός· καὶ πρὸς ἐσπέραν οὐ πνεῖ, ὅσον δύο ἡμερῶν καὶ νυκτῶν δρόμον, τὰ δὲ πρὸς ἕω λίβες πνέουσιν; ἢ διότι κοίλῃ τὰ κάτω ἢ Αἴγυπτός ἐστι, διὸ ὑπερπίπτει αὐτῆς, ἄνω δὲ καὶ πόρρω ὑψηλότεροι οἱ τόποι.

Διὰ τί ὁ νότος ἀρχόμενος μὲν μικρός ἐστι, λήγων δὲ μείζων γίνεται, ὁ δὲ βορέας ἀνάπαλιν, διὸ καὶ ἡ παροιμία λέγει εὖ πλεῖν ἀρχομένου τε νότου καὶ λήγοντος βορέαο; ἢ διότι πρὸς ἄρκτον μᾶλλον ἢ πρὸς μεσημβρίαν οἰκοῦμεν, πνεῖ δὲ ὁ μὲν βορέας ἀπὸ τῆς ἄρκτου, ὁ δὲ νότος ἀπὸ τῆς μεσημβρίας. εἰκότως οὖν ὁ μὲν ἀρχόμενος εὐθὺς σφοδρὸς πρόσκειται τοῖς πλησίον τόποις μᾶλλον, καὶ μετὰ ταῦτα μεταλλάττει τὸ σφοδρὸν πρὸς ἐκείνους. ὁ δὲ νότος τούναντίον ἀρχόμενος μὲν τοῖς πρὸς μεσημβρίαν οἰκοῦσιν ἔγκειται, ἐπειδὴν δὲ παραλλάξῃ, τοῖς πρὸς ἄρκτον λαμπρὸς καταπνεῖ.

Διὰ τί λέγεται “εἰ δ' ὁ νότος βορέαν προκαλέσσεται, αὐτίκα χειμῶν;” ἢ διότι ὁ νότος τοιοῦτός ἐστιν οἷος νεφέλας καὶ ὕδωρ πολὺ συναίρειν; ὅταν οὖν τοιαύτης τῆς καταστάσεως [945b] οὔσης ἐπιπνεύσῃ ὁ βορέας, πολλῆς αὐτῷ ὕλης ὑπαρχούσης πηγνυσι καὶ χειμῶνα ποιεῖ. διὸ λέγεται “εἰ βορρᾶς πηλὸν καταλήγεται, αὐτίκα χειμῶν.” ὁ δὲ πηλὸς καὶ ὅλως τὰ ὕδατα ὑπὸ τοῦ νότου ἢ μάλιστα ἢ πλειστάκις γίνεται.

Διὰ τί ἐπὶ μὲν τῷ νότῳ ταχὺς ὁ βορέας, ἐπὶ δὲ τούτῳ ὁ νότος οὐ ταχὺς ἐπιπίπτει; ἢ ὅτι τῷ μὲν ἐγγύθεν τῷ δὲ πόρρωθεν ἡ ἀφίξις; ἢ γὰρ οἴκησις πρὸς βορέαν ἡμῶν.

Διὰ τί τὰ πνεύματα ψυχρά ἐστίν, ὄντα ἀπὸ τῆς τοῦ θερμοῦ συγκινήσεως; ἢ οὐ πάντως ἡ ὑπὸ τοῦ θερμοῦ κίνησις θερμὴ γίνεται, ἐὰν μὴ τρόπον τινὰ γίνηται; ἀλλ' ἐὰν μὲν ἀθρόως ἐμπίπτῃ, καίει αὐτὸ τὸ ἀφιέν θερμὴ· ἐὰν δὲ διὰ στενοῦ καὶ κατὰ μικρόν, αὐτὴ μὲν θερμὴ, ὁ δὲ ὑπὸ τούτου κινούμενος ἀήρ, οἷος ἂν ποτε τυγχάνῃ προϋπάρχων, τοιαύτην καὶ τὴν κίνησιν ἀπετέλεσεν, ὥσπερ καὶ ἐπὶ τοῦ σώματος. φασὶ γὰρ ἐκ τοῦ αὐτοῦ θερμὸν καὶ ψυχρὸν ἡμᾶς πνεῖν,

τοῦτο δὲ οὐκ ἀληθές, ἀλλὰ τὸ μὲν ἐξὶὸν θερμὸν αἰεί. σημεῖον δὲ τὸ ἐγγὺς προσαγαγόντι τοιοῦτον φαίνεσθαι. διαφέρει δὲ ἡ ἔκπτωσις αὐτοῦ. ἐὰν μὲν γὰρ διὰ πολλοῦ ἀφίωμεν χανόντες, θερμὸν φαίνεται διὰ τὸ αὐτοῦ αἰσθάνεσθαι, ἐὰν δὲ διὰ στενοῦ, σφοδρότερον γινόμενον ὥθεϊ τὸν πλησίον ἄερα, κάκεϊνος τὸν ἐχόμενον. ψυχροῦ δὲ ὄντος τοῦ ἄερος καὶ ἡ κίνησις αὐτοῦ ψυχρὰ γίνεται. μήποτε δὲ καὶ ἐπὶ τῶν πνευμάτων τὸ αὐτὸ συμβαίνει, καὶ διὰ στενοῦ ἡ πρώτη κίνησις· εἴτ' ἐκεῖνον μὲν διήνεγκεν, ἕτερος δὲ ἄηρ ἐπιρρεῖ. διὸ καὶ τοῦ μὲν θέρους θερμά, τοῦ δὲ χειμῶνος ψυχρὰ τὰ πνεύματα, ὅτι ἐν ἑκατέρῳ τοιοῦτος ὁ ἄηρ ὁ προϋπάρχων· ἐπεὶ ὅτι γε οὔτε αὐτὸς ὑφ' ἑαυτοῦ κινούμενος ὁ ἄηρ οὔτε ὑπὸ τοῦ θερμοῦ κρατούμενος φέρεται ταύτην τὴν φοράν, δηλὸν οὐ μόνον τούτῳ ὅτι θερμαίνει τὰ πνεύματα πλείονος τοῦ θερμοῦ ἐνόντος, ἀλλὰ καὶ ἄνω ἐφέρετο. τὸ γὰρ πῦρ τοιοῦτον, τὸ δὲ ψυχρὸν κάτω πέφυκε φέρεσθαι. τὰ δὲ πνεύματα πλάγια εἰκότως· ἐπεὶ γὰρ τὸ μὲν ἄνω τὸ δὲ κάτω βιάζεται, καὶ οὐδέτερον κρατεῖ, μένειν δὲ οὐχ οἷόν τε, λοξὴν τὴν φοράν εἰκότως γίνεσθαι.

Διὰ τί οἱ νότοι ἐν τῇ Λιβύῃ ψυχροί, ὥσπερ παρ' ἡμῖν οἱ βορέαι; ἢ πρῶτον μὲν διὰ τὸ ἐγγυτέρω εἶναι ἡμῖν τε κάκεϊνοις τὰς ἀρχὰς τῶν πνευμάτων. εἰ γάρ, ὥσπερ εἵπομεν, διὰ στενοῦ γίνεται τὰ πνεύματα, τοῖς ἐγγυτέρω ψυχρότερα ἔσται διὰ τὴν σφοδρότητα τῆς κινήσεως· εἰς [946a] γὰρ τὸ πόρρω προιούσης διαχεῖται. διὸ καὶ παρ' ἡμῖν οἱ βορέαι ψυχροί, ὅτι ἐγγυτέρω καὶ παντελῶς πρὸς τῇ ἄρκτῳ οἰκοῦμεν.

Διὰ τί οἱ νότοι οἱ ξηροὶ καὶ μὴ ὑδατώδεις πυρετώδεις; ἢ ὅτι ὑγρότητα θερμὴν ἀλλοτρίαν ἐμποιοῦσι τοῖς σώμασιν; εἰσὶ γὰρ ὑγροὶ καὶ θερμοὶ φύσει, τοῦτο δ' ἐστὶ πυρετώδες· ὁ γὰρ πυρετὸς ὑπ' ἀμφοτέρων τούτων ἐστὶν ὑπερβολῆς. ὅταν μὲν οὖν ὑπὸ τοῦ ἡλίου ἄνευ ὕδατος πνέωσι, ταύτην τὴν τάξιν, ὅταν δὲ ἅμα τῷ ὕδατι, τὸ ὕδωρ καταψύχει.

Διὰ τί οἱ ἐτησῖαι ταύτην δὴ τὴν ὥραν αἰεὶ καὶ τοσοῦτοι πνέουσιν; καὶ διὰ τί ληγούσης τῆς ἡμέρας λήγουσι καὶ τῆς νυκτὸς οὐ πνέουσιν; ἢ τοῦτο μὲν διὰ τὸ τὴν χιόνα τηκομένην παύεσθαι ὑπὸ τοῦ ἡλίου πρὸς ἐσπέραν καὶ τὴν νύκτα; ὅλως δὲ πνέουσιν, ὅταν ὁ ἥλιος κρατεῖν καὶ λύειν ἄρξηται τὸν πρὸς βορέαν πάγον. ἀρχομένου μὲν οὖν οἱ πρόδρομοι, ἥδη δὲ λυομένου οἱ ἐτησῖαι.

Διὰ τί ὁ ζέφυρος λειότατός τε τῶν ἀνέμων καὶ ψυχρός, καὶ δύο

ώρας πνεῖ μάλιστα, ἔαρ τε καὶ μετόπωρον, καὶ πρὸς ἐσπέραν τῆς ἡμέρας, καὶ ἐπὶ τὴν γῆν μάλιστα; ἢ ψυχρὸς μὲν διὰ τὸ πνεῖν ἀπὸ τῆς θαλάττης καὶ πεδίων ἀναπεπταμένων; ἥττον μὲν οὖν ψυχρὸς τοῦ βορέου διὰ τὸ ἀφ' ὕδατος πνευματουμένου καὶ μὴ χιόνος πνεῖν, ψυχρὸς δὲ διὰ τὸ μετὰ χειμῶνα, ἄρτι τοῦ ἡλίου κρατοῦντος, πνεῖν. καὶ μετοπώρου, ὅτι οὐκέτι κρατεῖ ὁ ἥλιος· οὐ γὰρ ὥσπερ ἐν γῇ ὑπομένει τὴν ὕλην, ἀλλὰ πλανᾶται διὰ τὸ ἐφ' ὕγρου βεβηκέναι. καὶ ὁμαλὸς διὰ τὸ αὐτό· οὐ γὰρ ἀπὸ ὀρέων πνεῖ, οὐδὲ βία τηκομένου, ἀλλὰ ῥαδίως ὥσπερ δι' αὐλῶνος ῥέων. τὰ μὲν γὰρ πρὸς βορέαν καὶ νότον ὀρεινά· πρὸς ἐσπέραν δὲ οὔτε ὄρος οὔτε γῆ ἐστίν, ἀλλὰ τὸ Ἀτλαντικὸν πέλαγος, ὥστε ἐπὶ τῆς γῆς φέρεται. καὶ πρὸς ἐσπέραν δὲ τῆς ἡμέρας πνεῖ διὰ τὸν τόπον· τότε γὰρ ὁ ἥλιος πλησιάζει τῷ τόπῳ. καὶ τῆς νυκτὸς παύεται διὰ τὸ ἐκλείπειν τὴν τοῦ ἡλίου κίνησιν.

Διὰ τί, ὅταν ὁ εὖρος πνεῖ, μείζω φαίνεται τὰ πάντα; ἢ ὅτι ζοφωδέστατον τὸν ἀέρα ποιεῖ;

Διὰ τί τὸν μὲν χειμῶνα πρῶτ' ἀπὸ τῆς ἑω τὰ πνεύματα πνεῖ, τὸ δὲ θέρος δείλης καὶ ἀπὸ δυσμῶν ἡλίου; ἢ ὅτι ἂ ἡμῖν συμβαίνει τοῦ θέρους, ταῦτα τοῦ χειμῶνος τοῖς τὸ ἐναντίον τῆς γῆς ἡμισφαίριον οἰκοῦσιν, ἡμῖν δὲ τοῦ χειμῶνος πρῶτ' καὶ ἀφ' ἑω τὰ πνεύματα πνεῖ διὰ τὸ τὸν ἀέρα κάθυγρον [946b] ἐν τῇ νυκτὶ διακρίνεσθαι καὶ κινεῖσθαι τὸ πρῶτ' ὑπὸ τοῦ ἡλίου, καὶ πρῶτον τὸν ἔγγιστα τοῦ ἡλίου. ποιεῖ δὲ τοῦτο ὁ ἥλιος καὶ πρὸ ἀνατολῆς· διὸ αὖραι οὐχ ἥττον πρὸ ἀνατολῆς πνέουσιν. ἐπειδὴ οὖν καὶ ἐφ' ἑαυτὸν ἔλκει ὁ ἥλιος τὰ ὑγρά καὶ κινεῖ πρὸ ἀνατολῆς τοῦ χειμῶνος ὑγρὸν ὄντα τὸν παρ' ἡμῖν ἀέρα, δῆλον ὡς καὶ ἐφ' ἑαυτὸν ἂν ἔλκοι, ὦν ἐν τῷ κάτω ἡμισφαιρίῳ, καὶ δείλη ἐκείνοις ὃ ἡμῖν ἐστὶν ὀρθρος. ὥστε συμβαίνοι ἂν τὸν ὑπὸ τοῦ ἡλίου πρὸ ἀνατολῆς παρ' ἡμῶν ἐφ' ἑαυτὸν ἐλκόμενον ἀέρα, τοῦτον τοῖς κάτω γενέσθαι ζέφυρον καὶ δείλης πνεῖν. ὃ δὲ ἐν τῷ παρ' ἡμῖν χειμῶνι, τῆς ἑω ἐκείνοις συμβαίνει, ὃ δὲ ἐν τῷ θέρει, τῆς δείλης ἡμῖν. ὅτε γὰρ παρ' ἡμῖν θέρος, ἐκεῖ χειμῶν ἐστι, καὶ ἡ ἡμετέρα δείλη ἐκείνοις ὀρθρος. καθ' ἣν ἐκείνοις μὲν αὖρας ἐξ ἑώας συμβαίνει πνεῖν, ἡμῖν δὲ ζεφύρους διὰ ταῦτα τοῖς προειρημένοις. τοῦ δὲ θέρους καὶ ἑῶαι μὲν οὐ πνέουσιν, ὅτι εἰς ξηρότερον ἔτι τὸν παρ' ἡμῖν ἀέρα ὁ ἥλιος ἀνατέλλει διὰ τὸ ὀλίγον χρόνον αὐτοῦ ἀπογεγονέναι· ζέφυροι δὲ οὐ πνέουσι δείλης τοῦ χειμῶνος, ὅτι οὐδ' ἐν τῷ κάτω ἡμισφαιρίῳ ἑῶοι ταύτην τὴν ὥραν διὰ τὰ προειρημένα, ὅθεν ὁ ἥλιος ἐφ' ἑαυτὸν ἔλκων τὰ ὑγρά τὸν παρ' ἡμῖν ζέφυρον ποιεῖ.

Διὰ τί ὁ ζέφυρος εὐδαινὸς καὶ ἡδιστος δοκεῖ εἶναι τῶν ἀνέμων; ἢ ὅτι ἐν μεθορίῳ ἐστὶ τῶν θερμῶν καὶ ψυχρῶν πνευμάτων, γειτνιῶν δὲ ἀμφοῖν τῆς δυνάμεως αὐτῶν κοινωνεῖ· διὸ εὐκρατὸς ἐστίν. ὁ δὲ ἀπηλιώτης ἤττον κοινωνεῖ, ὢν ἐν τῷ μέσῳ τῶν αὐτῶν. ἀπηλιώτης μὲν γὰρ πνέων τὰ πρὸς νότον πνεύματα κινεῖ (ἐνταῦθα γὰρ ἡ μετὰστασις αὐτοῦ ἐστίν), κινῶν δὲ οὐ μίγνυται αὐτοῖς. ὁ δὲ ζέφυρος καὶ κινεῖται ὑπὸ τῶν νότων καὶ πνέων κινεῖ τὰ βόρεια· τελευτᾷ γὰρ ἐνταῦθα ἡ περίοδος τῶν πνευμάτων. διὸ τῶν μὲν τὴν τελευτῆν τῶν δὲ τὴν ἀρχὴν ἔχων ἐν ἑαυτῷ δικαίως ἡδύς ἐστι καὶ δοκεῖ εἶναι.

Διὰ τί ἄλλοις ἄλλοι τῶν ἀνέμων ὑέτιοι, οἷον ἐν μὲν τῇ Ἀττικῇ καὶ ταῖς νήσοις ὁ Ἑλλησποντίας, ἐν Ἑλλησπόντῳ δὲ ὁ βορέας καὶ ἐν Κυρήνῃ, περὶ Λέσβον δὲ νότος; ἢ ὅπου ἂν ἄθροισις νεφῶν, ἐνταῦθα ὕδωρ; ἐνταῦθα γὰρ ἡ πύκνωσις ἀθροίζεται, ὅπου ἂν προκαθίζεσθαι ἔχη. διὸ καὶ ἐν τοῖς ὄρεσι μᾶλλον ὕει ἢ ὅπου ἂν τὸ πλῆθος ὑπεξάγειν δύνηται· περικαταλαμβάνομενον γὰρ πυκνοῦται· δεῖ δὲ τοῦτο γενέσθαι. καὶ ἐν ταῖς εὐδίαις μᾶλλον ὕει. ἐν Ἑλλησπόντῳ [947a] μὲν οὖν ἄνωθεν ὁ βορέας πολλὰ συνωθεῖ νέφη, πρὸς δὲ τὴν Ἀττικὴν καὶ τὰς νήσους ὁ Ἑλλησποντίας, ὥσπερ ὕλην ἔχων· καὶ γὰρ περιίσταται τὰ πολλὰ ἐκ τοῦ βορέου. περὶ δὲ Λέσβον ὁ εὖρος καὶ ὁ νότος ἐκ τοῦ πελάγους φέροντες πολλὰ νέφη προσβάλλει τῇ χώρᾳ. τὸν αὐτὸν τρόπον καὶ ἐπὶ τῶν ἄλλων.

Διὰ τί λέγεται “μή ποτ’ ἀπ’ ἡπείρου δείσης νέφος ἄλλ’ ἀπὸ πόντου χειμῶνος, θέρεος δὲ ἀπ’ ἡπείροιο μελαίνης;” ἢ διότι τοῦ μὲν χειμῶνος ἡ θάλαττα θερμότερα, ὥστε εἴ τι συνέστη, δῆλον ὅτι ἀπ’ ἀρχῆς ἰσχυρᾶς συνέστηκεν· ἐλύθη γὰρ ἂν διὰ τὸ ἀλεεινὸν εἶναι τὸν τόπον. τοῦ δὲ θέρους ἡ μὲν θάλαττα ψυχρά, καὶ τὰ πόντια πνεύματα, ἡ δὲ γῆ θερμή, ὥστε εἴ τι ἀπὸ τῆς γῆς φέρεται, διὰ μείζονος ἀρχῆς συνέστη· διελύθη γὰρ ἂν, εἰ ἀσθενὲς ἦν.

Διὰ τί ἐν τῇ Ἀρκαδίᾳ ὑψηλῇ οὕση τὰ μὲν πνεύματα οὐθὲν ψυχρότερα τῶν παρὰ τοῖς ἄλλοις, ὅταν δὲ νηνεμία ᾗ καὶ ἐπινέφελα, ψυχρά, ὥσπερ ἐν τοῖς ὀμαλέσι τοῖς ἐλώδεσιν; ἢ ὅτι καὶ ἡ Ἀρκαδία ὁμοία γίνεται τοῖς ἐλώδεσιν· οὐ γὰρ ἔχει ἐξόδους τοῖς ὕδασι εἰς θάλατταν, διὸ καὶ βάραθρα πολλὰ αὐτόθι ἐστίν. ὅταν μὲν οὖν ἦ ἄνεμος, ἀπορριπίζει τὴν ἐκ τῆς γῆς ἀναθυμίασιν, οὔσαν ψυχράν· αὐτὰ δὲ τὰ πνεύματα οὐ ψυχρά διὰ τὸ ἀπὸ τῆς θαλάττης προσβάλλειν· ἐν δὲ ταῖς νηνεμίαις ἀνιοῦσα ἡ ἀτμίς ἀπὸ τοῦ

ἐμμένοντος ὕδατος ποιεῖ τὸ ψῦχος.

Διὰ τί, ἂν ἔωθεν πνεῖν ἄρξῃται, διημερεύει μᾶλλον; ἢ διότι ἀρχομένου τοῦ ἡλίου σφοδροτάτη ἡ φορά, διὸ ἐκτείνεται τοιαύτη οὐσα. σημεῖον δὲ ὅτι ἰσχυρὰ ἡ σύστασις.

Διὰ τί βορέας τὴν ἡμέραν μὲν λαμπρὸς, τὴν δὲ νύκτα πίπτει; ἢ διότι γίνεται ἀπὸ πεπηγότος ὕετοῦ, ὅταν ἀναθυμιᾶται διὰ τὸν ἥλιον; πίπτει δὲ νυκτός, ὅτι οὐχ ἡ αὐτὴ γένεσις, ἀλλὰ τοῦναντίον ποιεῖ· τὰς γὰρ νύκτας ἐκπνεῖ, τὰς δὲ ἡμέρας ἥττον.

Διὰ τί τὰ ἀράχνια τὰ πολλὰ ὅταν φέρῃται, πνεύματός ἐστι σημεῖα; πότερον ὅτι ἐργάζεται ὁ ἀράχνης ἐν ταῖς εὐδαίαις, φέρεται δὲ διὰ τὸ ψυχόμενον τὸν ἀέρα συνιέναι πρὸς τὴν γῆν, τὸ δὲ ψύχεσθαι ἀρχὴ χειμῶνος· σημεῖον οὖν ἡ φορά τῶν ἀραχνίων. ἢ ὅτι μετὰ τὰ ὕδατα καὶ τοὺς χειμῶνας γίνεται τῶν ἀραχνίων ἀθρόα ἡ φορά, ἐν ταῖς εὐδαίαις ἐργαζομένων, διὰ τὸ ἐν τῷ χειμῶνι μὴ φαίνεσθαι; [947b] δύσριγον γὰρ τόδε. καὶ φερόμενοι ὑπὸ τοῦ πνεύματος πολὺ ἐκπηνίζονται. μετὰ δὲ τὰ ὕδατα εἶωθε πνεύματα γίνεσθαι ὥς τὰ πολλὰ.

Διὰ τί οἱ βορέαι μεγάλοι τοῦ χειμῶνος ἐν τοῖς ψυχροῖς τόποις ἐπινέφελαι, ἔξω δὲ αἶθριοι; ἢ ὅτι ἅμα ψυχροὶ εἰσι καὶ μεγάλοι, ἐγγὺς δὲ μᾶλλον ψυχροί, ὥστε φθάνουσι πηγνύντες πρὶν ἀπῶσαι τὰ νέφη· ὅταν δὲ παγῇ, μένουσι διὰ βάρος. ἔξω δὲ τῷ μεγέθει ἐργάζονται μᾶλλον ἢ τῷ ψυχρῷ.

ΚΖ. ΟΣΑ ΠΕΡΙ ΦΟΒΟΝ ΚΑΙ ΑΝΔΡΕΙΑΝ.

Διὰ τί οἱ φοβούμενοι τρέμουσιν; ἢ διὰ τὴν κατάψυξιν; ἐκλείπει γὰρ τὸ θερμὸν καὶ συστέλλεται· διὸ καὶ αἱ κοιλίαι λύονται τοῖς πολλοῖς.

Διὰ τί οὖν καὶ διψῶσιν ἔνιοι, καθάπερ οἱ μέλλοντες κολάζεσθαι; οὐ γὰρ ἔδει καταψυχομένων. ἢ οὐκ ἐν ταυτῷ τόπῳ ἡ κατάψυξις καὶ ἡ θερμότης, ἀλλ' ἡ μὲν ἐν τῷ ἐπιπολῆς, ἔνθεν ἐκλείπει τὸ θερμὸν, ἡ δὲ ἐν τῷ ἐντὸς, ὥστε ἐκθερμαίνει; σημεῖον δὲ καὶ τὸ λύεσθαι τὰς κοιλίας. ἀναξηραίνονμένου δὴ τοῦ κυρίου τόπου τὸ δίψος. ὅμοιον δὲ ἔοικεν ὥσπερ τοῖς ἡπιαλοῦσιν, οἱ ἅμα τῷ ῥίγῳ διψῶσιν· οὐδὲ γὰρ ὁ αὐτὸς οὐδ' ἐκεῖ τόπος ψύχεται καὶ θερμαίνεται.

Διὰ τί ἐν μὲν τοῖς θυμοῖς εἰς τὸ ἐντὸς ἀθροιζομένου τοῦ θερμοῦ διάθερμοι καὶ θαρραλέοι, ἐν δὲ τοῖς φόβοις ἀνάπαλιν; ἢ οὐκ εἰς τὸν αὐτὸν τόπον, ἀλλὰ τοῖς μὲν ὀργιζομένοις περὶ τὴν καρδίαν, διὸ καὶ θαρρητικοὶ καὶ ἐν ἐρυθρήματι καὶ πνεύματος πλήρεις, ἄνω τῆς φορᾶς οὔσης, τοῖς δὲ φοβουμένοις κάτω συμφευσγόντων τοῦ αἵματος καὶ τοῦ θερμοῦ, διὸ καὶ ἡ λύσις τῶν κοιλιῶν· ἐπεὶ καὶ ἡ τῆς καρδίας πήδησις οὐχ ὁμοία, ἀλλὰ τοῖς μὲν ὡς ἂν διὰ τὴν ἐκλειψιν πυκνὴ καὶ νυγματώδης, τοῖς δὲ ὡς ἂν ἀθροιζομένου πλείονος θερμοῦ· διὸ καὶ τὸ ἀναζεῖν καὶ τὸ ὀρίνεσθαι τὸν θυμὸν καὶ ταράττεσθαι, καὶ ὅσα τοιαῦτα λέγουσιν οὐ κακῶς ἀλλ' οἰκείως. ἄρ' οὖν καὶ διὰ τοῦτο τὸ δίψος, ἐπεὶ τό γε ξηρὸν πτύειν καὶ ὁ σαυσαρισμὸς καὶ τὰ τοιαῦτα γίνεται διὰ τὴν ἀναφορὰν τοῦ πνεύματος ἅμα καὶ θερμοῦ. καὶ τὸ δίψος δὲ δῆλον ὡς ἐκθερμαινομένου τοῦ σώματος. πῶς οὖν ὁ αὐτὸς τόπος ἀναξηραίνεται ἀμφοῖν, ᾧ διψῶμεν, καὶ τῷ φοβουμένῳ καὶ τῷ ὀργιζομένῳ; ὁ δὲ φόβος ὅτι διψητικόν, καὶ [948a] οἱ ἐν ταῖς τροπαῖς δηλοῦσιν· οὐδαμοῦ γὰρ οὕτω διψῶσιν. καὶ οἱ ἀγωνιῶντες δὲ σφόδρα· διὸ καὶ διακλύζονται καὶ ἐπιρροφοῦσι, καθάπερ Παρμένων ὁ ὑποκριτής. ἢ τούτοις μὲν οὐκ ἔστι δίψος, ἀλλὰ ξηρότης πεφευγότος τοῦ αἵματος, ὅθεν καὶ ὠχροί; σημεῖον δὲ τὸ μὴ πίνειν πολὺ, ἀλλὰ καὶ βροχθίσαι. οἱ δ' ἐν ταῖς τροπαῖς μετὰ πόνου. διὸ διψῶσι καὶ οἱ μέλλοντες κολάζεσθαι· καὶ οὐθὲν ἄτοπον. ἐν δὲ τοῖς πολεμικοῖς ἔνιοι καὶ τῶν ἀνδρείων, ὅταν διασκευασθῶσι, καὶ τρέμουσιν οὐκ ἐξεστηκότες ἀλλὰ θαρροῦντες· ὧν εἰώθασι μαστιγοῦν τὸ σῶμα πλατεῖ νάρθηκι, εἰ δὲ μή, ταῖς χερσὶν ἀναθερμανθέντες. ἔοικε δὴ διὰ

τὴν ὀξύτητα καὶ τὴν φορὰν τοῦ θερμοῦ ἀνωμαλία τις εἶναι περὶ τὸ σῶμα παραχώδης.

Διὰ τί οἱ ἀνδρεῖοι ὥς ἐπὶ τὸ πολὺ φίλοινοι; ἢ ὅτι οἱ ἀνδρεῖοι θερμοί, ἢ δὲ θερμότης περὶ τὰ στήθη. ἐνταῦθα γὰρ καὶ ὁ φόβος φαίνεται, γινόμενος κατάψυξις τις. ὥστε περὶ τὴν καρδίαν ἤττον μὲν μένει, τοῖς δὲ πηδᾷ ψυχομένη. ὅσοι οὖν τὸν πνεύμονα ἔχουσιν ἔναιμον, θερμὸν ἔχουσι τοῦτον ὥσπερ οἰνωμένοι, ὥστε οὐ ψύχει ἢ φαντασία τοῦ δεινοῦ. οἱ δὲ τοιοῦτοι καὶ φιλοπόται. ἢ τε γὰρ τοῦ ποτοῦ ἐπιθυμία διὰ τὴν τούτου τοῦ μορίου θερμότητά ἐστιν (εἴρηται δὲ περὶ αὐτοῦ ἐν ἄλλοις) καὶ τοῦ παυστικοῦ ἢ ἐπιθυμία. ὁ δὲ οἶνος θερμὸς μὲν τὴν φύσιν, παύει δὲ τὴν δίψαν μᾶλλον τοῦ ὕδατος, καὶ μάλιστα τῶν αὐτῶν· δι' ἣν αἰτίαν, εἴρηται ἐν ἄλλοις. διὸ καὶ οἱ ἐν τῇ περιπνευμονίᾳ καὶ οἱ μαινόμενοι ἀμφοτέροι ἐπιθυμοῦσιν οἴνου· καίτοι τῶν μὲν διὰ τὴν θερμασίαν θερμὸς ὁ πνεύμων, τῶν δὲ διὰ τὴν παραχῇν. ἐπεὶ οὖν οἱ αὐτοὶ ὥς ἐπὶ τὸ πολὺ τῷ γένει διψητικοὶ καὶ ἀνδρεῖοι, οἴνου δὲ οἱ διψητικοὶ ἐπιθυμητικοί, οἱ δὲ τοιοῦτοι φιλοπόται, ἀναγκαῖον ὥς ἐπὶ τὸ πολὺ παρακολουθεῖν ἀλλήλοις τὰς φύσεις, διὸ καὶ οἱ οἰνωμένοι ἀνδρεῖότεροι τῶν μῆ.

Διὰ τί μάλιστα τὴν ἀνδρείαν τιμῶσιν αἱ πόλεις, οὐ βελτίστην οὔσαν τῶν ἀρετῶν; ἢ ὅτι διατελοῦσιν ἢ πολεμοῦντες ἢ πολεμούμενοι, αὕτη δὲ ἐν ἀμφοῖν χρησιμωτάτη ἐστίν. τιμῶσι δὲ οὐ τὰ βέλτιστα, ἀλλὰ τὰ αὐτοῖς βέλτιστα.

Διὰ τί οἱ φοβούμενοι μάλιστα τρέμουσι τὴν φωνὴν καὶ τὰς χεῖρας καὶ τὸ κάτω χεῖλος; ἢ διότι ἐκλειψίς ἐστι τὸ πάθος θερμοῦ ἐκ τῶν ἄνω τόπων· διὸ καὶ ὠχρῶσιν. διὰ μὲν οὖν τὸ ἐκ τοῦ στήθους ἢ φωνὴ τρέμει, ψυχομένου ᾧ κινεῖται. ὁμοίως δὲ καὶ αἱ χεῖρες· ἐκ τοῦ στήθους γὰρ ἤρτηνται. τὸ δὲ [948b] κάτω χεῖλος, ἀλλ' οὐ τὸ ἄνωθεν, κάτω κρέμαται ἢ ῥέπει· τὸ δὲ κάτωθεν ἄνω παρὰ φύσιν, ἀλλ' ὑπὸ τοῦ θερμοῦ ἄνω ἤρεμεῖ· οὗ ὑφαιρουμένου διὰ τὸ ψύχεσθαι τρέμει. καὶ ἐν τοῖς θυμοῖς δὲ διὰ τὸ αὐτὸ ἀποκρεμάννυται τὸ χεῖλος. δηλὸν δὲ ἐπὶ τῶν παιδίων· συνθεῖ γὰρ εἰς τὴν καρδίαν τὸ θερμόν.

Διὰ τί οἱ φοβούμενοι τρέμουσι, καὶ μάλιστα τὴν φωνὴν καὶ τοῦ σώματος τὰς χεῖρας καὶ τὸ κάτω χεῖλος; ἢ διότι ἐκ τούτου τοῦ τρόπου ἐκλείπει τὸ θερμόν ἐν ᾧ ἡ φωνή; τὸ δὲ χεῖλος καὶ τὰς χεῖρας, ὅτι εὐκινήτοτατα καὶ ἥκιστα ἔναιμα. καὶ προίενται μὲν τὴν χολήν, συσπῶσι δὲ τὰ αἰδοῖα, προίενται μὲν διὰ τὸ συντήκειν τὸ καταβαῖνον θερμόν, ἀνασπῶσι δέ, ὅτι ἐξῶθεν φόβος· εἰς τὸναντίον οὖν ἡ φυγή.

Διὰ τί οἱ φοβούμενοι καὶ διψῶσι καὶ ῥιγῶσιν; ταῦτα δὲ ἐναντία τὰ πάθη. ἢ ῥιγοῦσι μὲν ψυχόμενοι, διψῶσι δὲ θερμαινόμενοι; διότι ἐν τῷ φοβεῖσθαι τὸ θερμὸν ἐκλείπει καὶ τὸ ὑγρὸν ἐκ τῶν ἄνω τόπων. δηλοῖ δὲ τὸ χρῶμα καὶ αἱ κοιλίαι· τὸ μὲν γὰρ πρόσωπον ὠχρόν, αἱ δὲ κοιλίαι ἐνίοτε λύνονται. διὰ μὲν οὖν τὸ ἐκλείπειν τὸ θερμὸν ἐκ τῶν ἄνωθεν τὸ ῥίγος γίνεται, διὰ δὲ τὸ ὑγρὸν ἡ δίψα.

Διὰ τί τοῦ τε φόβου λύτης τινὸς ὄντος καὶ τῆς ἀλγηδόνης, οἱ μὲν ἀλγοῦντες ἀναβοῶσιν, οἱ δὲ φοβούμενοι σιωπῶσιν; ἢ οἱ μὲν ἀλγοῦντες κατέχουσι τὸ πνεῦμα (διὸ ἀθρόον ἐξιδὼν μετὰ φωνῆς ἐξέρχεται), τῶν δὲ φοβουμένων κατένυκται τὸ σῶμα καὶ τὸ θερμὸν κάτω ἐνήνεκται, ὃ ποιεῖ πνεύματα. ἢ οὖν ἐνήνεκται μάλιστα, ἐνταῦθα καὶ ποιεῖ αὐτά. διὸ καὶ ἀποποφοῦσιν οἱ φοβούμενοι. ἡ δὲ φωνὴ ἐστὶ φορὰ πνεύματος ἄνω πῶς καὶ διὰ τινων γινομένη. τοῦ δὲ τοὺς ἀλγοῦντας κατέχειν τὸ πνεῦμα αἴτιον, ὅτι ταῖς ἐνυπαρχούσαις ἡμῖν βοηθείαις φύσει εὐθὺς πάντες παθόντες ἄνευ λογισμοῦ χρώμεθα, καθάπερ καὶ τὰ ἄλλα ζῷα· τὰ μὲν γὰρ κέρασι, τὰ δὲ ὀδοῦσι, τὰ δὲ ὄνυξιν ἀμύνεται. πρὸς δὲ τὰ ἀλγήματα πάντα ἢ τὰ πλεῖστα βοηθεῖ ἡ θερμότης. ὃ ποιεῖ ὁ κατέχων τὸ πνεῦμα· θερμαίνει γὰρ καὶ ἐκπέττει τὸ ἄλγημα, συστέλλων ἐντὸς τὸ θερμὸν τῷ πνεύματι.

Διὰ τί τοῖς φοβουμένοις αἱ κοιλίαι λύνονται καὶ οὖρητιῶσιν; ἢ τὸ θερμὸν τὸ ἐν ἡμῖν ἐστὶν ὥσπερ ζῶον; τοῦτ' οὖν φεύγει ὃ τι ἂν φοβηθῇ. ἐξωθεν οὖν γινομένων τῶν τε ὑπὸ τῆς ἀγωνίας φόβων καὶ τῶν τοιούτων, καὶ ἐκ τῶν ἄνωθεν εἰς τὰ κάτω καὶ ἐκ τῶν ἐπιπολῆς εἰς τὰ ἐντὸς, ἐκθερμαινόμενοι [949a] δὲ οἱ περὶ τὴν κοιλίαν τόποι καὶ τὴν κύστιν διαλύονται, καὶ ποιοῦσιν αὐτὰς εὐτρεπεῖς. καὶ γὰρ τὰ ἄνηθα καὶ τὰ ἀψίνθια, καὶ ὅσα οὖρητικά, θερμαντικά. ὁμοίως δὲ καὶ τὰ πρὸς τὴν κοιλίαν φάρμακα, τὰ κάτω θερμαντικά· καὶ τὰ μὲν τῶν εἰσνεχθέντων μόνων λυτικά, τὰ δὲ καὶ ἐτέραν σύντηξιν ποιεῖ, οἷον τὸ σκόροδον εἰς τὸ οὔρον. τὸ αὐτὸ δὲ τοῖς τοιούτοις ἢ ἐκ τῶν ἐπιπολῆς θερμασία εἰς τούτους τοὺς τόπους συνιοῦσα δρᾷ.

Διὰ τί οἱ φοβούμενοι συσπῶσι τὰ αἰδοῖα; εἰκὸς γὰρ ἦν τοῦναντίον, τοῦ θερμοῦ εἰς τοῦτον τὸν τόπον ἀθροιζομένου τῶν φοβουμένων, ἀνίσθαι αὐτά. ἢ οἱ φοβούμενοι σχεδὸν ἅπαντες ὥσπερ ῥιγοῦντές εἰσιν; ἐκλελοιπότης οὖν ἐκ τῶν ἐπιπολῆς τοῦ θερμοῦ συσπῶσιν. διὸ καὶ βομβυλιάζουσιν οἱ δεινῶς δεδιότες. δοκεῖ δὲ συσπᾶν τὸ ἐπιπολῆς καὶ τὸ δέρμα τῶν ῥιγούντων, ἅτε τοῦ θερμοῦ

ἐκκεκριμένου· διὸ καὶ φρίττουσιν. συσπᾶται δὲ καὶ ἡ ὁσχέα τοῦ αἰδοίου ἄνω, καὶ συνεφέλκονται καὶ οἱ ὄρχεις αὐτοῖς συστελλομένων. θᾶπτον δὲ φαίνεται ἐπὶ τῶν ἀφροδισίων· ὁ γὰρ φόβος ἐκκρίνει, καὶ πολλοῖς τῶν ἀγωνιόντων καὶ τῶν περιφόβων συγκινεῖ ἡ τῆς γονῆς πρόεσις.

ΚΗ. ΟΣΑ ΠΕΡΙ ΣΩΦΡΟΣΥΝΗΝ ΚΑΙ ΑΚΟΛΑΣΙΑΝ, ΚΑΙ ΕΓΚΡΑΤΕΙΑΝ ΚΑΙ ΑΚΡΑΣΙΑΝ.

Διὰ τί ἔνιοι κάμνουσιν, ὅταν ἐθισθέντες ἀκολάστως ζῇν μὴ ἀκολάστως διαιτῶνται, οἷον Διονύσιος ὁ τύραννος, ἐπεὶ ἐν τῇ πολιορκίᾳ ἐπαύσατο πίνων ὀλίγον τινὰ χρόνον, εὐθὺς ἐφθισίασεν, ἕως πάλιν εἰς τὴν μέθην μετέβαλεν. ἡ μέγα μὲν τι καὶ τὸ ἔθος ἐστὶν ἐκάστοις· φύσις γὰρ ἥδη γίνεται. καθάπερ ἂν ἰχθὺς ἐν ἁέρι ἢ ἄνθρωπος ἐν ὕδατι διατελῶν φαύλως ἂν ἴσχοι, οὕτω καὶ οἱ τὰ ἔθη μεταβάλλοντες χαλεπῶς ἀπαλλάττουσιν, καὶ τὸ πάλιν εἰς τὰ εἰωθότα ἐλθεῖν σωτηρία γίνεται αὐτοῖς ὥσπερ εἰς φύσεως κατάστασιν. ἔτι δὲ καὶ συντηκτικοὶ γίνονται, εἰωθότες τροφῇ χρῆσθαι δαψιλεῖ τῇ ἰδίᾳ· μὴ λαμβάνοντες γὰρ τὴν εἰωθυῖαν ὥσπερ ὅλως μὴ λαμβάνοντες διατίθενται. οὐ μὴν ἀλλὰ καὶ τὰ περιττώματα τροφῇ μεμιγμένα πολλῇ ἀφανίζεται, αὐτὰ δὲ ἐπιπολάζει μόνα ὄντα, καὶ φέρεται εἰς ὄμματα ἢ πνεύμονα· προσενεγκαμένοις δὲ τροφὴν κατακεραυννύμενα ὕδαρῇ [949b] γίνεται καὶ ἀβλαβῇ. γίνεται δὲ τοῖς ἀκολάστως ζῶσι πλείω τὰ περιττώματα ἄχρι τινὸς λήξαςι τοῦ εἰωθότος βίου, διὰ τὸ πολλὴν ἀκαταχώριστον ἐν αὐτοῖς ὕλην ὑπάρχειν ἐκ τοῦ προτέρου βίου, ἧς τηκομένης ὑπὸ τοῦ συμφύτου θερμοῦ, καθάπερ χιόνος πολλῆς, ρεύματα ἀδρὰ συμβαίνει γίνεσθαι.

Διὰ τί κατὰ δύο μόνας αἰσθήσεις ἀκρατεῖς λέγομεν, οἷον ἀφὴν καὶ γεῦσιν; ἢ διὰ τὰς ἀπὸ τούτων γινομένας ἡδονὰς ἡμῖν καὶ τοῖς ἄλλοις ζώοις; ἅτε οὖν κοινὰ οὕσαι ἀτιμότηταί εἰσι, διὸ καὶ μάλιστα ἡ μόναι ἐπονείδιστοί εἰσιν. ὥστε τὸν ὑπὸ τούτων ἡττώμενον ψέγομεν καὶ ἀκρατὴ καὶ ἀκόλαστον εἶναι φαμέν, διὰ τὸ ὑπὸ τῶν χειρίστων ἡδονῶν ἡττᾶσθαι.

Διὰ τί ἀκρατεῖς λέγονται κατὰ τὰς ἐπιθυμίας μόνον, οὕσης τῆς ἀκрасίας καὶ περὶ τὴν ὀργήν; ἢ ὅτι ἀκρατὴς μὲν ἐστὶν ὁ παρὰ τὸν λόγον τι πράττων καὶ ἀκрасία ἢ παρὰ τὸν λόγον ἀγωγή, εἰσὶ δὲ αἱ μὲν ἐπιθυμίαι ὥς ἐπίπαν εἰπεῖν παρὰ τὸν λόγον, αἱ δὲ ὀργαὶ μετὰ λόγου, οὐχ ὥς κελεύσαντος τοῦ λόγου, ἀλλ' ὥς δηλώσαντος τὸν προπηλακισμόν ἢ τὴν αἰτίαν.

Διὰ τί τὴν μὲν ἐγκράτειαν καὶ τὴν σωφροσύνην ἐπὶ τῶν νέων καὶ πλουσίων μάλιστα ἐξετάζομεν, τὴν δὲ δικαιοσύνην ἐπὶ τῶν πενήτων; ἢ ὅτι οὐ μάλιστα δεῖται τις, εἰ τούτου ἀπέχεται, μᾶλλον

θαυμάζοιτ' ἂν ἢ τῶν ἐναντίων; ὁ μὲν οὖν πένης εὐπορίας δεῖται, ὁ δὲ νέος καὶ πλούσιος ἀπολαύσεως.

Διὰ τί ἤττον ἀνέχονται διψῶντες ἢ πεινῶντες; πότερον ὅτι λυπηρότερον; σημεῖον δὲ τοῦ λυπηροτέρου, ὅτι ἥδιον τὸ διψῶντα πιεῖν ἢ πεινῶντα φαγεῖν. τὸ δὲ ἐναντίον τῷ ἡδεῖ λυπηρότερον. ἢ διότι μᾶλλον δεῖται τὸ θερμὸν τοῦ ὑγροῦ ἢ τὸ ξηρὸν ὧς ζῶμεν; ἢ ὅτι δυοῖν ἢ δίψα ἐπιθυμία, ποτοῦ καὶ τροφῆς, ἢ δὲ πείνα ἐνὸς μόνου, τροφῆς;

Διὰ τί ἤττον καρτεροῦμεν διψῶντες ἢ πεινῶντες; ἢ διότι λυπούμεθα μᾶλλον; σημεῖον δὲ τῆς λύπης ἢ ἡδονὴ σφοδροτέρα. εἴτα ὁ μὲν διψῶν δυοῖν ἐνδεής, τροφῆς τε καὶ καταψύξεως (ἄμφω γὰρ ἔχει τὸ ποτόν), ὁ δὲ πεινῶν θατέρου μόνον.

Διὰ τί οἱ κατὰ τὴν τῆς ἀφῆς ἢ γεύσεως ἡδονήν, οὗ ἂν ὑπερβάλλωσιν, ἀκρατεῖς λέγονται; οἳ τε γὰρ περὶ τὰ [950a] ἀφροδίσια ἀκόλαστοι, οἳ τε περὶ τὰς τῆς τροφῆς ἀπολαύσεις. τῶν δὲ κατὰ τὴν τροφήν ἀπ' ἐνίων μὲν ἐν τῇ γλώττῃ τὸ ἡδύ, ἀπ' ἐνίων δὲ ἐν τῷ λάρυγγι, διὸ καὶ Φιλόξενος γεράνου φάρυγγα εὖχετο ἔχειν. οἱ δὲ κατὰ τὴν ὄψιν καὶ τὴν ἀκοὴν οὐκέτι. ἢ διὰ τὸ τὰς ἀπὸ τούτων γινομένας ἡδονὰς κοινὰς εἶναι ἡμῖν καὶ τοῖς ἄλλοις ζώοις; ἅτε οὖν οὕσαι κοινὰι ἀτιμόταταί εἰσι καὶ μάλιστα ἢ μόναι ἐπονείδιστοι, ὥστε τὸν ὑπὸ τούτων ἡττώμενον ψέγομεν καὶ ἀκρατῇ καὶ ἀκόλαστον λέγομεν διὰ τὸ ὑπὸ τῶν χειρίστων ἡδονῶν ἡττᾶσθαι. οὕσων δὲ τῶν αἰσθήσεων πέντε, τὰ τε ἄλλα ζῶα ἀπὸ δύο μόνων τῶν προειρημένων ἡδεται, κατὰ δὲ τὰς ἄλλας ἢ ὅλως οὐχ ἡδεται ἢ κατὰ συμβεβηκὸς τοῦτο πάσχει. ὁρῶν μὲν γὰρ ὁ ὁρῶν, ἢ καὶ ὁσφραινόμενος, χαίρει ὅτι ἀπολαύει· καὶ ὅταν πληρωθῇ, οὐδὲ τὰ τοιαῦτα ἡδέα αὐτῷ, ὥσπερ οὐδὲ ἡμῖν ἢ τοῦ ταρίχου ὁδμή, ὅταν ἄδην ἔχωμεν τοῦ φαγεῖν. ὅταν δὲ ἐνδεεῖς ὦμεν, ἡδέα. ἢ δὲ τοῦ ρόδου ἀεὶ ἡδεῖα.

Διὰ τί ἤττον κατέχουσι τὸν γέλωτα παρόντων τῶν γνωρίμων; ἢ ὅταν σφόδρα ἐξηρημένον ἦ τι, εὐκίνητόν ἐστιν; ἢ δ' εὐνοια εἰπεῖν μᾶλλον γελοῖον, ὥστε κινεῖ.

ΚΘ. ΟΣΑ ΠΕΡΙ ΔΙΚΑΙΟΣΥΝΗΝ ΚΑΙ ΑΔΙΚΙΑΝ.

Διὰ τί μείζονος ὄντος ἀδικήματος, ἐάν τις βλάβη εἰς τὸ μείζον ἀγαθόν, τῆς δὲ τιμῆς οὐσης μείζονος ἀγαθοῦ, ἢ τῶν χρημάτων ἀδικία μᾶλλον δοκεῖ, καὶ οἱ ἄδικοι μᾶλλον εἶναι δοκοῦσι περὶ τὰ χρήματα; ἢ διότι αἰροῦνται τὰ χρήματα μᾶλλον τῆς τιμῆς, καὶ πᾶσιν ἐστὶ κοινότατον, ἢ δὲ τιμὴ ὀλίγοις, καὶ ὀλιγάκις συμβαίνει ἢ χρῆσις αὐτῆς.

Διὰ τί παρακαταθήκην δεινότερον ἀποστερεῖν ἢ δάνειον; ἢ ὅτι αἰσχροὺς ἀδικεῖν φίλον. ὁ μὲν οὖν τὴν παρακαταθήκην ἀποστερῶν φίλον ἀδικεῖ· οὐδεὶς γὰρ παρακατατίθεται μὴ πιστεύων. οὗ δὲ τὸ χρέος, οὐ φίλος· οὐ γὰρ δανεῖζει, ἐὰν ἢ φίλος, ἀλλὰ δίδωσιν. ἢ ὅτι μείζον τὸ ἀδίκημα· πρὸς γὰρ τῇ ζημίᾳ καὶ τὴν πίστιν παραβαίνει, δι' ἣν, εἰ καὶ μηδὲν ἕτερον, δεῖ ἀπέχεσθαι τοῦ ἀδικεῖν. ἔτι τὸ μὴ τοῖς ἴσοις ἀμύνεσθαι φαῦλον· ὁ μὲν οὖν ἔδωκεν ὡς φίλῳ, ὁ δὲ ἀπεστέρησεν ὡς ἐχθρόν· ὁ δὲ δανείζων οὐχ ὡς φίλος ἔδωκεν. ἔτι τῶν μὲν ἢ δόσις φυλακῆς καὶ ἀποδόσεως χάριν, τῶν δὲ καὶ ὠφελείας· ἥττον δὲ ἀγανακτοῦμεν ἀποβάλλοντες, εἰ κέρδος θηρεύομεν, [950b] οἷον οἱ ἄλιεῖς τὰ δελέατα· προφανῆς γὰρ ὁ κίνδυνος. ἔτι παρακατατίθενται μὲν ὡς ἐπὶ τὸ πολὺ οἱ ἐπιβουλεύομενοι καὶ ἀτυχοῦντες, δανείζουσι δὲ οἱ εὐποροῦντες· δεινότερον δὲ ἐστὶ τὸν ἀτυχοῦντα ἢ τὸν εὐτυχοῦντα ἀδικεῖν.

Διὰ τί ἐνίοις δικαστηρίοις τοῖς γένεσι μᾶλλον ἢ ταῖς διαθήκαις ψηφιοῦνται; ἢ ὅτι γένους μὲν οὐκ ἐστὶ καταψεύσασθαι, ἀλλὰ τὸ ὄν ἀποφαίνεῖν· διαθήκαι δὲ πολλαὶ ψευδεῖς ἤδη ἐξηλέγχθησαν οὔσαι.

Διὰ τί ἡ πενία παρὰ τοῖς χρηστοῖς τῶν ἀνθρώπων μᾶλλον ἢ παρὰ τοῖς φαύλοις ἐστίν; ἢ διὰ τὸ ὑπὸ πάντων μισεῖσθαι καὶ ἐξελαύνεσθαι πρὸς τοὺς ἐπιεικεῖς καταφεύγει, οἰομένη μάλιστα παρὰ τούτοις σωτηρίας τυχεῖν καὶ διαμεῖναι· εἰ δὲ πρὸς πονηροὺς ἔλθοι, οὐκ ἂν διαμεῖναι ἐν τῇ αὐτῇ δυνάμει αὐτοῦς, ἀλλ' ἢ κλέπτειν ἢ ληΐζεσθαι, ὧν γινομένων οὐκ ἂν ἔτι εἶναι αὐτὴν παρ' αὐτοῖς. ἢ ὅτι τοὺς ἐπιεικεῖς οἶται τῶν ἀνθρώπων ἄριστα ἂν αὐτῇ χρῆσθαι, καὶ ἥκιστα ἂν ὑβρισθῆναι ὑπ' αὐτῶν. καθάπερ οὖν τὰς τῶν χρημάτων παρακαταθήκας πρὸς τοὺς ἐπιεικεῖς τιθέμεθα, οὕτω καὶ αὐτὴ ὑπὲρ αὐτῆς διατάσσεται. ἢ ὅτι θήλεια οὔσα ἀπορωτέρα ἐστίν, ὥστε τῶν ἐπιεικῶν δεῖται. ἢ ὅτι αὐτὴ κακὸν οὔσα πρὸς τὸ κακὸν οὐκ ἂν ἔλθοι·

εἰ γὰρ τὸ κακὸν ἔλοιτο, παντάπασιν ἂν δυσίατον εἴη.

Διὰ τί οὐχ ὁμοίως αἱ ἀδικίαι μείζους περὶ τὰ ῥήματα καὶ τὰ ἄλλα, οἷον ὁ μικρὸν εἰπὼν οὐκ ἂν καὶ τὸ ἀπόρρητον εἴποι, ἀλλ' ὁ ἕνα προδοὺς καὶ πόλιν, ὥσπερ ὁ ὀβολὸν ἀποστερήσας καὶ τάλαντον; ἢ ὅτι ἀπὸ μείζονος ἀδικίας ἕνια ἐλάττω ἐστὶ δι' ἀδυναμίαν.

Διὰ τί παρακαταθήκην αἰσχροὺς ἀποστερεῖσαι μικρὰν ἢ πολλὴν δανεισάμενον; ἢ ὅτι ὁ τὴν παρακαταθήκην ἀποστερῶν τὸν ὑπολαβόντα εἶναι αὐτὸν ἐπιεικῇ ἐξαπατᾷ; ἢ ὅτι ὁ τοῦτο κἂν ἐκεῖνο ποιήσειεν;

Διὰ τί ἄνθρωπος μάλιστα παιδείας μετέχων ζῶων ἀπάντων ἀδικώτατός ἐστιν; ἢ ὅτι πλείστου λογισμοῦ κεκοινώνηκεν; μάλιστα οὖν τὰς ἡδονὰς καὶ τὴν εὐδαιμονίαν ἐξήτακεν· ταῦτα δ' ἄνευ ἀδικίας οὐκ ἔστιν.

Διὰ τί ὁ πλοῦτος ὥς ἐπὶ τὸ πολὺ παρὰ τοῖς φαύλοις μᾶλλον ἢ τοῖς ἐπιεικέσιν ἐστίν; ἢ διότι τυφλὸς ὢν τὴν διάνοιαν οὐ δύναται κρίνειν οὐδὲ αἰρεῖσθαι τὸ βέλτιστον;

[951a] Διὰ τί δικαιότερον εἶναι νενόμισται τοῖς τετελευτηκόσιν ἢ τοῖς ζῶσιν ἐπαμύνειν; ἢ ὅτι οἱ μὲν ζῶντες δύναιнт' ἂν αὐτοῖς ἐπαρκέσαι, ὁ δὲ τετελευτηκῶς οὐκέτι;

Διὰ τί ὑγιαίνουντι μὲν ὁ συνὼν οὐδὲν ὑγιέστερος γίνεται, οὐδὲ ἰσχυρῶ ἢ καλῶ εἰς τὰς ἔξεις ἐπιδίδωσιν οὐθέν, δικαίῳ δὲ καὶ σώφρονι καὶ ἀγαθῷ; ἢ διότι τὰ μὲν ἀμίμητα τὰ δὲ μιμητὰ τῇ ψυχῇ; ἀγαθὸς δὲ τῇ ψυχῇ, ὑγίης δὲ τῷ σώματι· ἐθίζεται οὖν χαίρειν ὀρθῶς καὶ λυπεῖσθαι. ὁ δὲ ὑγιεῖ συνὼν οὐκέτι· οὐ γὰρ ἐν τῷ τισὶ χαίρειν ἢ μὴ ὁ ὑγιής· οὐθέν γὰρ τούτων ποιεῖ ὑγίειαν.

Διὰ τί δεινότερον γυναῖκα ἀποκτεῖναι ἢ ἄνδρα; καίτοι βέλτιον τὸ ἄρρεν τοῦ θήλεος φύσει. ἢ διότι ἀσθενέστερον, ὥστε ἐλάττω ἀδικεῖ. ἢ ὅτι οὐ νεανικὸν τὸ ἰσχυρίζεσθαι πρὸς τὸ πολὺ ἥττον;

Διὰ τί ποτε τῷ φεύγοντι ἐν τῷ δικαστηρίῳ τὴν δεξιὰν στάσιν διδόασιν; ἢ διότι ἐπανισοῦν βούλονται; πλεονεκτοῦντος οὖν τοῦ διώκοντος τὴν στάσιν τῷ φεύγοντι διδόασιν. εἴθ' ὥς ἐπὶ τὸ πολὺ οἱ φεύγοντες παραφυλάττονται· ἐπὶ δεξιὰ δὲ ἡ φυλακὴ γίνεται, ἐὰν ὁ φεύγων ἔχη τὴν ἐν δεξιᾷ στάσιν.

Διὰ τί ποτε, ὅταν τῷ φεύγοντι καὶ τῷ διώκοντι φαίνωνται αἱ ψῆφοι ἴσαι, ὁ φεύγων νικᾷ; ἢ ὅτι ὁ μὲν φεύγων ἐν τῷ ἀγῶνι μόνον ἀκήκοεν αὐτοῦ πρὸς ἃ δεῖ αὐτὸν ἀπηγορεῖσθαι, καὶ τοὺς μάρτυρας παρασχέσθαι πρὸς τὰ κατηγορημένα ἔχεσθαι, εἴ τι μέλλουσιν

ὠφελῆσθαι; οὐ ράδιον δὲ τὸ μαντεύσασθαι τινα ὧν δεῖ αὐτὸν παρασκευάσασθαι ἢ μάρτυρας ἢ ἄλλο τεκμήριον ὅτι οὐθὲν ἀδικεῖ. τῷ δὲ διώκοντι ἔστιν ὅπως βούλεται, καὶ πρὸ τοῦ τὴν δίκην κλητεύσασθαι, ἐνστήσασθαι τὸ πρᾶγμα, καὶ ἤδη κεκληκότα, πλασάμενον ὃ τι βούλεται πιθανόν, κατηγορεῖν αὐτοῦ. ὁρῶν δὲ κατὰ πάντα ταῦτα ἐλαττούμενον ὁ νομοθέτης τὸν φεύγοντα, προσέθετο τῷ φεύγοντι ὃ τι ἂν οἱ δικασταὶ ἀμφιδοξήσωσιν. ἀλλὰ μὴν καὶ τοῦτ' ἂν τις ἴδοι. ἐν γὰρ τοῖς φόβοις ὄντες πολλὰ παραλιμπάνουσιν ὧν αὐτοὺς ἔδει εἰπεῖν ἢ πρᾶξαι, οἱ δὲ φεύγοντες ἀεὶ ἐν μείζοσι κινδύνοις ὥς ἐπὶ τὸ πολὺ τυγχάνουσιν ὄντες, ὥστ' εἰ παραλιμπάνουσιν ὧν δεῖ αὐτούς, εἴπερ ἐξισοῦνται τοῖς δικαίοις, δηλὸν ὅτι εἰ μὴ παρελίμπανον, ἐκράτουν ἂν. ἔτι δὲ ἕκαστος ἡμῶν μᾶλλον ἂν προέλοιτο τοῦ [951b] ἀδικοῦντος ἀποψηφίσασθαι ὥς οὐκ ἀδικεῖ ἢ τοῦ μὴ ἀδικοῦντος καταψηφίσασθαι ὥς ἀδικεῖ, οἷον εἴ τις φεύγει δουλείας ἢ ἀνδροφονίας. τούτων γὰρ ἑκάστου ὄντων, ἃ κατηγορεῖ αὐτῶν, μᾶλλον ἂν ἀποψηφίσασθαι ἐλοίμεθα ἢ μὴ ὄντων καταψηφίσασθαι. ἔστι γάρ, ὅταν τις ἀμφιδοξῇ, τὰ ἐλάττω τῶν ἀμαρτημάτων αἰρετέον. δεινὸν γὰρ καὶ τὸ τοῦ δούλου ὥς ἐλευθερός ἐστι καταγνῶναι· πολὺ δὲ δινότερον, ὅταν τις τοῦ ἐλευθέρου ὥς δούλου καταψηφίσῃται. ἔτι δὲ ἐὰν ὁ μὲν τύχῃ ἐγκαλῶν ὁ δὲ ἀμφισβητῶν ὑπὲρ ὅτου οὖν, οὐκ εὐθὺς οἰόμεθα δεῖν ἀποδοῦναι τῷ ἐγκαλοῦντι, ἀλλὰ νέμεσθαι τὸν κεκτημένον, ἕως ἂν κριθῇ. τὸν αὐτὸν δὲ τρόπον καὶ ἐπὶ τῶν πλειόνων, ὅταν ἰσάζῃ τὸ πλῆθος τῶν τε φασκόντων ἀδικεῖν καὶ τῶν μὴ ὁμολογούντων, ὥσπερ ὅτε ἐξ ἀρχῆς ὁ μὲν ἐνεκάλει ὁ δὲ ἀπηρεῖτο, οὐκ οἰόμεθα δεῖν τὸν νομοθέτην προστιθέναι τῷ ἐγκαλοῦντι, ἀλλὰ τὸν φεύγοντα κύριον εἶναι, ἕως ἂν ὑπεροχὴν τινα ἔχῃ ὁ ἀδικῶν. ὁμοίως δὲ καὶ ἐπὶ τῶν κριτῶν, ἐπειδὴ οὐδεμίαν ὑπεροχὴν ἴσασθαισῶν τῶν ψήφων, κατὰ χώραν εἵασεν ὁ νομοθέτης ἔχειν. ἔτι δὲ τῶν μὲν ἀξιολόγων ἀμαρτημάτων μεγάλαι καὶ αἱ κολάσεις εἰσίν, ὥστε ἀδίκως μὲν καταψηφισαμένοις καὶ μὴ γνοῦσιν οὐκ ἔστιν ἐπανορθοῦσθαι καιρὸν λαβόντας· ἀπολύσασι δὲ παρὰ τὸ προσῆκον, εἰ μὲν οὕτως εὐλαβῶς ὥστε μηθὲν ἔτι ποτὲ ἀμαρτεῖν, τί ἂν καὶ μέγα ἡμαρτηκότες οἱ κριταὶ εἴησαν, τοιοῦτον ἄνθρωπον ἀπολύσαντες θανάτου; εἰ δέ τι ἐξ ὑστέρου ἀμαρτάνοι, δι' ἀμφοτέρω ἂν αὐτὸν κολάζεσθαι ἀξιοῖ. ἢ ὅτι ἀδικωτέρου μὲν ἐστὶν ἀνδρὸς ταῦτα ἀδικεῖν ἢ ἥττον εἰκὸς ἐστὶν ἀδίκως ἐγκαλεῖσθαι; τὸ μὲν γὰρ ἀδικεῖν καὶ δι' ὀργὴν καὶ διὰ φόβον καὶ δι' ἐπιθυμίαν καὶ δι' ἄλλα πολλὰ

γίνεται, καὶ οὐ μόνον ἐκ προνοίας· τὸ δὲ ἀδίκως ἐγκαλεῖν ὡς τὸ πολὺ ἐκ προνοίας ἐστίν. ὥστε ἐπεὶ ἴσαι αἱ ψῆφοι γεγόνασι, τὸ δὲ ἀδίκως τὸν ἐγκαλοῦντα ἐγκαλεῖν καὶ τὸν φεύγοντα ἀδικεῖν, φαύλου κριθέντος τοῦ ἀδίκως ἐγκαλοῦντος τὸ νικᾶν τῷ φεύγοντι ὁ νομοθέτης ἀπένειμεν. ἔτι δὲ καὶ αὐτοὶ οὕτως ἔχομεν πρὸς τοὺς θεράποντας, ὥστε ὅταν ὑποπτεύσωμέν τι αὐτοὺς ἡμαρτηκέναι καὶ μηθὲν ἀκριβὲς ἔχωμεν, ἀλλ' ὅμως αὐτοὺς ὑπολαμβάνωμεν πεπραχέναι, οὐκ εὐθὺς ἐπὶ τὸ κολάζειν ἐρχόμεθα· καὶ ἐὰν μηθὲν μᾶλλον [952a] δυνώμεθα ἐξετάσαι, ἀφίεμεν ταύτης τῆς αἰτίας. ἔτι μείζω μὲν ἀδικεῖ ὁ ἐκ προνοίας ἀδικῶν ἢ ὁ μὴ ἐκ προνοίας. ὁ μὲν δὴ συκοφαντῶν αἰεὶ ἐκ προνοίας ἀδικεῖ, ὁ δὲ ἕτερόν τι ἀδικῶν τὰ μὲν δι' ἀνάγκην τὰ δὲ δι' ἄγνοίαν, τὰ δὲ ὅπως ἔτυχεν ἀδικεῖν αὐτῷ συμπίπτει. ὅταν δὲ ἴσαι γένωνται αἱ ψῆφοι, ὁ μὲν διώκων κέκριται ὑπὸ τῶν ἡμίσεων ἐκ προνοίας ἀδικεῖν, ὁ δὲ φεύγων ὑπὸ τῶν λοιπῶν αὐτὸ ἀδικεῖν μὲν οὐ μέντοι γε ἐκ προνοίας, ὥστε ἐπεὶ ἀδικεῖν μείζω κέκριται ὁ διώκων τοῦ φεύγοντος, εἰκότως ὁ νομοθέτης νικᾶν ἔκρινε τὸν τὰ ἐλάττω ἀδικοῦντα. ἔτι δὲ αἰεὶ μὲν ἀδικώτερός ἐστίν ὁ μὴ οἰόμενος λανθάνειν ὃν ἀδικεῖ καὶ ὅμως ἀδικῶν, ἢ ὁ οἰόμενος λανθάνειν. ὁ μὲν γὰρ ἀδίκως τινὶ ἐγκαλῶν οὐκ οἶεται λανθάνειν τοῦτον ὃν συκοφαντεῖ, οἱ δ' ἄλλο τι ἀδικοῦντες ὡς ἐπὶ τὸ πολὺ οἰόμενοι λανθάνειν ὃν ἀδικοῦσιν ἐπιχειροῦσιν ἀδικεῖν, ὥστε ἀδικώτεροι ἂν κρίνοιντο οἱ διώκοντες ἢ οἱ φεύγοντες.

Διὰ τί ποτε, ἐὰν μὲν τις ἐκ βαλανείου κλέψῃ ἢ ἐκ παλαιστρας ἢ ἐξ ἀγορᾶς ἢ τῶν τοιούτων τινός, θανάτῳ ζημιοῦται, ἐὰν δὲ τις ἐξ οἰκίας, διπλοῦν τῆς ἀξίας τοῦ κλέμματος ἀποτίνει; ἢ ὅτι ἐν μὲν ταῖς οἰκίαις φυλάξαι ὅπως οὖν ἔστιν· καὶ γὰρ ὁ τοίχος ἰσχυρὸς καὶ κλεῖς ἐστί, καὶ οἰκέταις τοῖς ἐν τῇ οἰκίᾳ πᾶσιν ἐπιμελὲς ἐστίν ὅπως σώζηται τὰ ἐνόντα. ἐν δὲ τῷ βαλανείῳ, καὶ ἐν τοῖς οὕτω κοινοῖς οὔσιν ὥσπερ τὸ βαλανεῖον, ῥάδιον τῷ βουλομένῳ κακοურγεῖν· οὐδὲν γὰρ ἰσχυρὸν ἔχουσι πρὸς τὴν φυλακὴν οἱ τιθέντες ἀλλ' ἢ τὸ αὐτῶν ὄμμα, ὥστε ἂν μόνον τις παραβλέψῃ, ἐπὶ τῷ κλέπτοντι ἤδη γίνεται. διὸ ὁ νομοθέτης οὐχ ἱκανοὺς ὄντας ἡγησάμενος εἶναι φύλακας, τὸν νόμον αὐτοῖς ἐπέστησεν ἀπειλοῦντα σφοδρῶς ὡς οὐ βιωσομένοις ἐὰν τι σφετερίζονται τῶν ἀλλοτρίων. ἔτι δὲ εἰς μὲν τὴν οἰκίαν ἐπὶ τῷ κεκτημένῳ ἐστίν ὃν τινα ἂν βούληται εἰσδέχεσθαι, καὶ ᾧ μὴ πιστεύει εἰσφέρεισθαι· τῷ δὲ ἐν τῷ βαλανείῳ θεμένῳ τι οὐκ ἔξεστιν οὐθένα κωλῦσαι οὔτε εἰσιέναι, οὔτε εἰσελθόντα μὴ παρὰ κλέπτην τὸ αὐτοῦ

ἱμάτιον θέσθαι ἀποδύντα ἄν· ἀλλ' ὥς οὐ βούλεται, ἐν τῷ αὐτῷ ἢ τε τοῦ κλέπτου ἐσθῆς καὶ ἢ τοῦ μέλλοντος ἀπολλύναι ἀναμεμιγμένοι κεῖνται. διὸ ὁ νομοθέτης τῷ μὲν ἐκόντι εἰσδεξαμένῳ τὸν κλέπτην καὶ αὐτῷ ἡματηρότι [952b] οὐ λίαν μεγάλας τιμωρίας βεβοήθηκεν, τοῖς δὲ ἐξ ἀνάγκης κοινωνοῦσι τῆς εἰς τὸ βαλανεῖον εἰσόδου καὶ τῆς ἀναμίξεως μεγάλας τιμωρίας φανερός ἐστι καθιστὰς τοῖς κλέπτουσιν. ἔτι δὲ οἱ μὲν ἐν τοῖς οὕτω κοινοῖς οὖσι τῷ βουλομένῳ εἰσιέναι κλέπτοντες καταφανεῖς ἅπασι γίνονται ὅτι φανεροὶ εἰσιν, ὥστε περιγενόμενοι οὐδὲ καρπισμοῦ ἔτι χάριν ἐπιεικεῖς εἶναι δοκεῖν βούλονται, ὥς μάτην αὐτοῖς ὄν πρὸς τοὺς γνόντας πλάττεσθαι ὅτι ἐπιεικεῖς εἰσίν· καταφανῶς οὖν ἤδη πονηροὶ διατελοῦσιν ὄντες. οἱ δὲ ἐνὶ μόνῳ φανεροὶ γενόμενοι πρὸς τοὺς ἄλλους ἐπιχειροῦσι πείθειν, ἀποτίσαντές τι, ὅπως μὴ καταφανεῖς αὐτοὺς ποιήσῃ· διὸ οὐ παντελῶς ἄν εἶεν πονηροὶ διὰ τέλους, ἀνθ' ὧν ὁ νομοθέτης ἐλάττω αὐτοῖς τὰ ἐπιζήμια ἐποίησεν. ἔτι δὲ τῶν ἁμαρτιῶν μάλιστα αἰσχύνουσι τὴν πόλιν αἱ ἐν τοῖς κοινοτάτοις συλλόγοις τε καὶ συνόδοις γινόμεναι, ὥσπερ καὶ τιμὴν φέρουσι πολὺ μάλιστα αἱ ἐν τῷ κοινῷ εὐταξίαι· καταφανεῖς γὰρ μάλιστα διὰ τῶν τοιούτων καὶ αὐτοῖς καὶ τοῖς ἄλλοις. συμβαίνει οὖν οὐ μόνον ἰδίᾳ τὸν ἀπολέσαντα βλάπτεσθαι ἐκ τῶν τοιούτων τινός, ἀλλὰ καὶ πρὸς τὴν πόλιν λαιδορίας γίνεσθαι. διὸ καὶ τὸν κλέψαντα ταῖς μείζουσι ζημίαις ἐκόλασε τῶν ἐξ οἰκίας τινὸς ἀφελομένων. ἔτι δὲ καὶ ὁ ἐξ οἰκίας τινὸς ἀπολέσας ἐν τοιούτῳ τόπῳ τυγχάνει ὦν, ὅθεν ῥάδιον μῆτε παθόντα μῆτε χλευασθέντα ὑπὸ τινων, οἵκοι ὄντα τὸ ἀτύχημα φέρειν. τῷ δ' ἢ τε ἀποχώρησις ἐργώδης γεγυμνωμένῳ, προσέτι δὲ χλευάζεσθαι ὑπὸ τινων ὑπάρχει τοῖς πολλοῖς, ὃ πολὺ δυσχερέστερόν ἐστι τῆς ἀπωλείας. διὸ καὶ ὁ νομοθέτης μείζους αὐτοῖς ζημίας ἐνέγραψεν. ἔτι δὲ παραπλήσια τούτοις πολλὰ φαίνονται νενομοθετηκότες, οἷον καὶ ἐὰν μὲν τις ἄρχοντα κακῶς εἴπῃ, μέγала τὰ ἐπιτίμια, ἐὰν δὲ τις ἰδιώτην, οὐθέν. καὶ καλῶς· οἶεται γὰρ τότε οὐ μόνον εἰς τὸν ἄρχοντα ἐξαμαρτάνειν τὸν κακηγοροῦντα, ἀλλὰ καὶ εἰς τὴν πόλιν ὑβρίζειν. τὸν αὐτὸν δὲ τρόπον καὶ τὸν ἐν τῷ λιμένι κλέπτοντα οὐ μόνον τὸν ἰδιώτην βλάπτειν, ἀλλὰ καὶ τὴν πόλιν αἰσχύνειν. ὁμοίως δὲ καὶ ἐν τοῖς ἄλλοις, οὗ κοινῇ που συνερχόμεθα.

Διὰ τί ἐν τοῖς δικαστηρίοις ἐὰν ἴσαι γένωνται ψῆφοι τοῖς ἀντιδίκοις, ὁ φεύγων νικᾷ; ἢ ὅτι ὁ φεύγων ὑπὸ τοῦ [953a] διώκοντος οὐθὲν πέπονθεν, ἀλλ' ἐν τοῖς ἴσοις αὐτῷ ἤδη ἔμελλε νικᾶν;

Διὰ τί ἐπὶ μὲν κλοπῇ θάνατος ἢ ζημία, ἐπὶ δὲ ὕβρει, μείζονι οὕσῃ ἀδικία, τίμησις τί χρὴ παθεῖν ἢ ἀποτιῆσαι; ἢ διότι τὸ μὲν ὑβρίζειν ἀνθρώπινόν ἐστι πάθος, καὶ πάντες πλέον ἢ ἕλαττον αὐτοῦ μετέχουσι, τὸ δὲ κλέπτειν οὐ τῶν ἀναγκαίων; καὶ ὅτι ὁ κλέπτειν ἐπιχειρῶν καὶ ὑβρίζειν ἂν προέλοιτο.

Λ. ΟΣΑ ΠΕΡΙ ΦΡΟΝΗΣΙΝ ΚΑΙ ΝΟΥΝ ΚΑΙ ΣΟΦΙΑΝ.

Διὰ τί πάντες ὅσοι περιττοὶ γεγόνασιν ἄνδρες ἢ κατὰ φιλοσοφίαν ἢ πολιτικὴν ἢ ποιήσιν ἢ τέχνας φαίνονται μελαγχολικοὶ ὄντες, καὶ οἱ μὲν οὕτως ὥστε καὶ λαμβάνεσθαι τοῖς ἀπὸ μελαίνης χολῆς ἄρρωσθήμασιν, οἷον λέγεται τῶν τε ἡρωϊκῶν τὰ περὶ τὸν Ἡρακλέα. καὶ γὰρ ἐκεῖνος ἔοικε γενέσθαι ταύτης τῆς φύσεως, διὸ καὶ τὰ ἄρρωσθήματα τῶν ἐπιληπτικῶν ἀπ' ἐκείνου προσηγόρευον οἱ ἀρχαῖοι ἱερὰν νόσον. καὶ ἡ περὶ τοὺς παῖδας ἔκστασις καὶ ἡ πρὸ τῆς ἀφανίσεως ἐν Οἴτῃ τῶν ἐλκῶν ἔκφυσις γενομένη τοῦτο δηλοῖ· καὶ γὰρ τοῦτο γίνεται πολλοῖς ἀπὸ μελαίνης χολῆς. συνέβη δὲ καὶ Λυσάνδρῳ τῷ Λάκωνι πρὸ τῆς τελευτῆς γενέσθαι τὰ ἔλκη ταῦτα. ἔτι δὲ τὰ περὶ Αἴαντα καὶ Βελλεροφόντην, ὧν ὁ μὲν ἐκστατικὸς ἐγένετο παντελῶς, ὁ δὲ τὰς ἐρημίας ἐδίωκεν, διὸ οὕτως ἐποίησεν Ὅμηρος “αὐτὰρ ἐπεὶ καὶ κείνος ἀπήχθετο πᾶσι θεοῖσιν, ἦτοι ὁ καππεδίον τὸ Ἀλῆϊον οἷος ἀλᾶτο, ὃν θυμὸν κατέδων, πάτον ἀνθρώπων ἀλεείνων.” καὶ ἄλλοι δὲ πολλοὶ τῶν ἡρώων ὁμοιοπαθεῖς φαίνονται τούτοις. τῶν δὲ ὕστερον Ἑμπεδοκλῆς καὶ Πλάτων καὶ Σωκράτης καὶ ἕτεροι συχνοὶ τῶν γνωρίμων. ἔτι δὲ τῶν περὶ τὴν ποιήσιν οἱ πλείστοι. πολλοῖς μὲν γὰρ τῶν τοιούτων γίνεται νοσήματα ἀπὸ τῆς τοιαύτης κράσεως τῷ σώματι, τοῖς δὲ ἡ φύσις δῆλη ῥέπουσα πρὸς τὰ πάθη. πάντες δ' οὖν ὡς εἰπεῖν ἀπλῶς εἰσί, καθάπερ ἐλέχθη, τοιοῦτοι τὴν φύσιν. δεῖ δὴ λαβεῖν τὴν αἰτίαν πρῶτον ἐπὶ παραδείγματος προχειρισαμένους. ὁ γὰρ οἶνος ὁ πολὺς μάλιστα φαίνεται παρασκευάζειν τοιούτους οἶους λέγομεν τοὺς μελαγχολικοὺς εἶναι, καὶ πλείστα ἦθη ποιεῖν πινόμενος, οἷον ὀργίλους, φιλανθρώπους, ἐλεήμονας, ἰταμούς· ἀλλ' οὐχὶ τὸ μέλι οὐδὲ τὸ γάλα οὐδὲ τὸ ὕδωρ οὐδ' ἄλλο τῶν τοιούτων οὐδέν. ἴδοι δ' ἂν τις ὅτι παντοδαποὺς ἀπεργάζεται, θεωρῶν ὡς μεταβάλλει τοὺς πίνοντας ἐκ προσαγωγῆς· παραλαβὼν [953b] γὰρ ἀπεψυγμένους ἐν τῷ νήφειν καὶ σιωπηλοὺς μικρῷ μὲν πλείων ποθεῖς λαλιστέρους ποιεῖ, ἔτι δὲ πλείων ῥητορικοὺς καὶ θαρραλέους, προϊόντας δὲ πρὸς τὸ πράττειν ἰταμούς, ἔτι δὲ μᾶλλον πινόμενος ὕβριστάς, ἔπειτα μανικοὺς, λίαν δὲ πολὺς ἐκλύει καὶ ποιεῖ μωρούς, ὥσπερ τοὺς ἐκ παίδων ἐπιλήπτους ἢ καὶ ἐχομένους τοῖς μελαγχολικοῖς ἄγαν. ὥσπερ οὖν ὁ εἷς ἄνθρωπος μεταβάλλει τὸ ἦθος πίνων καὶ χρώμενος τῷ οἴνῳ ποσῷ τινί, οὕτω

καθ' ἕκαστον τὸ ἦθος εἰσὶ τινες ἄνθρωποι. οἷος γὰρ οὗτος μεθύων νῦν ἐστίν, ἄλλος τις τοιοῦτος φύσει ἐστίν, ὁ μὲν λάλος, ὁ δὲ κεκινημένος, ὁ δὲ ἀρίδακρυς· ποιεῖ γάρ τινας καὶ τοιούτους, διὸ καὶ Ὅμηρος ἐποίησε “καὶ μέ φησι δάκρυ πλώειν βεβαρημένον οἶνω.” καὶ γὰρ ἐλεήμονές ποτε γίνονται καὶ ἄγριοι καὶ σιωπηλοί· ἔνιοι γὰρ αὖ ἀποσιωπῶσι, καὶ μάλιστα τῶν μελαγχολικῶν ὅσοι ἐκστατικοί. ποιεῖ δὲ καὶ φιλητικούς ὁ οἶνος· σημεῖον δὲ ὅτι προάγεται ὁ πίνων καὶ τῷ στόματι φιλεῖν, οὓς νήφων οὐδ' ἂν εἷς φιλήσειεν ἢ διὰ τὸ εἶδος ἢ διὰ τὴν ἡλικίαν. ὁ μὲν οὖν οἶνος οὐ πολὺν χρόνον ποιεῖ περιττόν, ἀλλ' ὀλίγον, ἡ δὲ φύσις ἀεί, ἕως τις ἂν ἦ· οἱ μὲν γὰρ θρασεῖς, οἱ δὲ σιωπηλοί, οἱ δὲ ἐλεήμονες, οἱ δὲ δειλοὶ γίνονται φύσει. ὥστε δῆλον ὅτι διὰ τὸ αὐτὸ ποιεῖ ὁ τε οἶνος καὶ ἡ φύσις ἐκάστου τὸ ἦθος· πάντα γὰρ κατεργάζεται τῇ θερμότητι ταμιευόμενα. ὁ τε δὴ χυμὸς καὶ ἡ κρᾶσις ἡ τῆς μελαίνης χολῆς πνευματικά ἐστιν· διὸ καὶ τὰ πνευματώδη πάθη καὶ τὰ ὑποχόνδρια μελαγχολικὰ οἱ ἱατροὶ φασιν εἶναι. καὶ ὁ οἶνος δὲ πνευματώδης τὴν δύναμιν. διὸ δὴ ἐστὶ τὴν φύσιν ὁμοία ὁ τε οἶνος καὶ ἡ κρᾶσις. δηλοῖ δὲ ὅτι πνευματώδης ὁ οἶνός ἐστιν ὁ ἀφρός· τὸ μὲν γὰρ ἔλαιον θερμὸν ὃν οὐ ποιεῖ ἀφρόν, ὁ δὲ οἶνος πολὺν, καὶ μᾶλλον ὁ μέλας τοῦ λευκοῦ, ὅτι θερμότερος καὶ σωματωδέστερος. καὶ διὰ τοῦτο ὁ τε οἶνος ἀφροδισιαστικούς ἀπεργάζεται, καὶ ὀρθῶς Διόνυσος καὶ Ἀφροδίτη λέγονται μετ' ἀλλήλων εἶναι, καὶ οἱ μελαγχολικοὶ οἱ πλείστοι λάγνοι εἰσίν. ὁ τε γὰρ ἀφροδισιασμὸς πνευματώδης. σημεῖον δὲ τὸ αἰδοῖον, ὥς ἐκ μικροῦ ταχεῖαν ποιεῖται τὴν αὔξησιν διὰ τὸ ἐμφυσᾶσθαι. καὶ ἔτι πρὶν δύνασθαι προῖεσθαι σπέρμα, γίνεται τις ἡδονὴ ἐπὶ παισὶν οὔσιν, ὅταν ἐγγὺς ὄντες τοῦ ἡβᾶν ζύωνται τὰ αἰδοῖα δι' ἀκολασίαν· γίνεται δὲ δῆλον διὰ τὸ πνεῦμα διεξιέναι διὰ τῶν πόρων, δι' ὧν ὕστερον τὸ ὑγρὸν φέρεται. ἢ τε ἔκχυσις τοῦ [954a] σπέρματος ἐν ταῖς ὁμιλίαις καὶ ἡ ῥίψις ὑπὸ τοῦ πνεύματος ὠθοῦντος φανερόν γίνεσθαι. ὥστε καὶ τῶν ἐδεσμάτων καὶ ποτῶν εὐλόγως ταῦτ' ἐστὶν ἀφροδισιαστικά, ὅσα πνευματώδη τὸν περὶ τὰ αἰδοῖα ποιεῖ τόπον. διὸ καὶ ὁ μέλας οἶνος οὐδενὸς ἥττον τοιούτους ἀπεργάζεται, οἷοι καὶ οἱ μελαγχολικοὶ πνευματώδεις. δῆλοι δ' εἰσὶν ἐπ' ἐνίων· σκληροὶ γὰρ οἱ πλείους τῶν μελαγχολικῶν, καὶ αἱ φλέβες ἐξέχουσιν· τούτου δ' αἷτιον οὐ τὸ τοῦ αἵματος πλῆθος, ἀλλὰ τοῦ πνεύματος. διότι δὲ οὐδὲ πάντες οἱ μελαγχολικοὶ σκληροὶ οὐδὲ μέλανες, ἀλλ' οἱ μᾶλλον κακόχυμοι, ἄλλος λόγος· περὶ οὗ δὲ ἐξ ἀρχῆς προειλόμεθα διελθεῖν, ὅτι ἐν τῇ

φύσει εὐθὺς ὁ τοιοῦτος χυμὸς ὁ μελαγχολικὸς κεράννυται· θερμοῦ γὰρ καὶ ψυχροῦ κρᾶσις ἐστίν· ἐκ τούτων γὰρ τῶν δυοῖν ἡ φύσις συνέστηκεν. διὸ καὶ ἡ μέλαινα χολὴ καὶ θερμότερον καὶ ψυχρότερον γίνεται. τὸ γὰρ αὐτὸ πάσχειν πέφυκε ταῦτ' ἄμφω, οἷον καὶ τὸ ὕδωρ ὃν ψυχρόν, ὅμως ἐὰν ἱκανῶς θερμανθῇ, οἷον τὸ ζέον, τῆς φλογὸς αὐτῆς θερμότερόν ἐστι, καὶ λίθος καὶ σίδηρος διάπυρα γενόμενα μᾶλλον θερμὰ γίνεται ἄνθρακος, ψυχρὰ ὄντα φύσει. εἴρηται δὲ σαφέστερον περὶ τούτων ἐν τοῖς περὶ πυρός. καὶ ἡ χολὴ δὲ ἡ μέλαινα φύσει ψυχρὰ καὶ οὐκ ἐπιπολαίως οὔσα, ὅταν μὲν οὕτως ἔχη ὡς εἴρηται, ἐὰν ὑπερβάλλῃ ἐν τῷ σώματι, ἀποπληξίας ἢ νάρκας ἢ ἀθυμίας ποιεῖ ἢ φόβους, ἐὰν δὲ ὑπερθερμανθῇ, τὰς μετ' ὥδης εὐθυμίας καὶ ἐκστάσεις καὶ ἐκζέσεις ἐλκῶν καὶ ἄλλα τοιαῦτα. τοῖς μὲν οὖν πολλοῖς ἀπὸ τῆς καθ' ἡμέραν τροφῆς ἐγγινομένη οὐδὲν τὸ ἥθος ποιεῖ διαφόρους, ἀλλὰ μόνον νόσημά τι μελαγχολικὸν ἀπειργάσατο. ὅσοις δὲ ἐν τῷ φύσει συνέστη κρᾶσις τοιαύτη, εὐθὺς οὗτοι τὰ ἥθη γίνονται παντοδαποί, ἄλλος κατ' ἄλλην κρᾶσιν· οἷον ὅσοις μὲν πολλὴ καὶ ψυχρὰ ἐνυπάρχει, νωθοὶ καὶ μωροὶ, ὅσοις δὲ λίαν πολλὴ καὶ θερμή, μανικοὶ καὶ εὐφυεῖς καὶ ἐρωτικοὶ καὶ εὐκίνητοι πρὸς τοὺς θυμοὺς καὶ τὰς ἐπιθυμίας, ἔνιοι δὲ καὶ λάλοι μᾶλλον. πολλοὶ δὲ καὶ διὰ τὸ ἐγγὺς εἶναι τοῦ νοεροῦ τόπου τὴν θερμότητα ταύτην νοσήμασιν ἀλίσκονται μανικοῖς ἢ ἐνθουσιαστικοῖς, ὅθεν Σίβυλλαι καὶ Βάκιδες καὶ οἱ ἔνθεοι γίνονται πάντες, ὅταν μὴ νοσήματι γένωνται ἀλλὰ φυσικῇ κράσει. Μαρακὸς δὲ ὁ Συρακούσιος καὶ ἀμείνων ἦν ποιητής, ὅτ' ἐκσταίῃ. ὅσοις δ' ἂν ἐπανθῇ τὴν ἄγαν θερμότητα [954b] πρὸς τὸ μέσον, οὗτοι μελαγχολικοὶ μὲν εἰσι, φρονιμώτεροι δέ, καὶ ἥττον μὲν ἔκτοποι, πρὸς πολλὰ δὲ διαφέροντες τῶν ἄλλων, οἱ μὲν πρὸς παιδείαν, οἱ δὲ πρὸς τέχνας, οἱ δὲ πρὸς πολιτείαν. πολλὴν δὲ καὶ εἰς τοὺς κινδύνους ποιεῖ διαφορὰν ἡ τοιαύτη ἕξις τοῦ ἐνίοτε ἀνωμάλους εἶναι μὲν τοῖς φόβοις πολλοὺς τῶν ἀνδρῶν. ὥς γὰρ ἂν τύχῃσι τὸ σῶμα ἔχοντες πρὸς τὴν τοιαύτην κρᾶσιν, διαφέρουσιν αὐτοὶ αὐτῶν. ἡ δὲ μελαγχολικὴ κρᾶσις, ὥσπερ καὶ ἐν ταῖς νόσοις ἀνωμάλους ποιεῖ, οὕτω καὶ αὐτὴ ἀνώμαλός ἐστιν· ὅτε μὲν γὰρ ψυχρὰ ἐστίν ὥσπερ ὕδωρ, ὅτε δὲ θερμή. ὥστε φοβερόν τι ὅταν εἰσαγγελθῇ, ἐὰν μὲν ψυχροτέρας οὔσης τῆς κράσεως τύχῃ, δειλὸν ποιεῖ· προωδοπεποίηκε γὰρ τῷ φόβῳ, καὶ ὁ φόβος καταψύχει. δηλοῦσι δὲ οἱ περίφοβοι· τρέμουσι γάρ. ἐὰν δὲ μᾶλλον θερμή, εἰς τὸ μέτριον κατέστησεν ὁ φόβος, καὶ ἐν αὐτῷ καὶ

ἀπαθῆ. ὁμοίως δὲ καὶ πρὸς τὰς καθ' ἡμέραν ἀθυμίας· πολλάκις γὰρ οὕτως ἔχομεν ὥστε λυπεῖσθαι, ἐφ' ὅτῳ δέ, οὐκ ἂν ἔχοιμεν εἰπεῖν· ὅτε δὲ εὐθύμως, ἐφ' ᾧ δ', οὐ δῆλον. τὰ δὲ τοιαῦτα πάθη καὶ τὰ παλαιὰ λεχθέντα κατὰ μὲν τι μικρὸν πᾶσι γίνεται· πᾶσι γὰρ μέμικταί τι τῆς δυνάμεως· ὅσοις δ' εἰς βάθος, οὗτοι δ' ἤδη ποιοῖ τινές εἰσι τὰ ἥθη. ὥσπερ γὰρ τὸ εἶδος ἔτεροι γίνονται οὐ τῷ πρόσωπον ἔχειν, ἀλλὰ τῷ ποιόν τι τὸ πρόσωπον, οἱ μὲν καλόν, οἱ δὲ αἰσχρόν, οἱ δὲ μηθὲν ἔχοντες περιττόν, οὗτοι δὲ μέσοι τὴν φύσιν, οὕτω καὶ οἱ μὲν μικρὰ μετέχοντες τῆς τοιαύτης κράσεως μέσοι εἰσίν, οἱ δὲ πλήθους ἤδη ἀνόμοιοι τοῖς πολλοῖς. ἐὰν μὲν γὰρ σφόδρα κατακορῆς ἦ ἡ ἔξις, μελαγχολικοὶ εἰσι λίαν, ἐὰν δὲ πως κραθῶσι, περιττοί. ῥέπουσι δ', ἂν ἀμελῶσιν, ἐπὶ τὰ μελαγχολικὰ νοσήματα, ἄλλοι περὶ ἄλλο μέρος τοῦ σώματος· καὶ τοῖς μὲν ἐπιληπτικά ἀποσημαίνει, τοῖς δὲ ἀποπληκτικά, ἄλλοις δὲ ἀθυμίαι ἰσχυραὶ ἢ φόβοι, τοῖς δὲ θάρρη λίαν, οἶον καὶ Ἀρχελάῳ συνέβαινε τῷ Μακεδονίας βασιλεῖ. αἴτιον δὲ τῆς τοιαύτης δυνάμεως ἡ κρᾶσις, ὅπως ἂν ἔχη ψύξεώς τε καὶ θερμότητος. ψυχροτέρα μὲν γὰρ οὕσα τοῦ καιροῦ δυσθυμίας ποιεῖ ἀλόγους· διὸ αἱ τ' ἀγχνόαι μάλιστα τοῖς νέοις, ἐνίοτε δὲ καὶ πρεσβυτέροις. πολλοὶ δὲ καὶ μετὰ τὰς μέθας διαφθείρουσιν ἑαυτούς. ἐνιοὶ δὲ τῶν μελαγχολικῶν ἐκ τῶν πότων ἀθύμως διάγουσιν· σβέννυσι γὰρ ἡ τοῦ οἴνου θερμότης τὴν φυσικὴν θερμότητα. τὸ δὲ θερμὸν τὸ περὶ [955a] τὸν τόπον ᾧ φρονοῦμεν καὶ ἐλπίζομεν ποιεῖ εὐθύμους. καὶ διὰ τοῦτο πρὸς τὸ πίνειν εἰς μέθην πάντες ἔχουσι προθύμως, ὅτι πάντας ὁ οἶνος ὁ πολὺς εὐέλπιδας ποιεῖ, καθάπερ ἡ νεότης τοὺς παῖδας· τὸ μὲν γὰρ γῆρας δύσελπί ἐστιν, ἡ δὲ νεότης ἐλπίδος πλήρης. εἰσὶ δὲ τινες ὀλίγοι οὓς πίνοντας δυσθυμίαι λαμβάνουσι, διὰ τὴν αὐτὴν αἰτίαν δι' ἣν καὶ μετὰ τοὺς πότους ἐνίου. ὅσοις μὲν οὖν μαραινόμενου τοῦ θερμοῦ αἱ ἀθυμίαι γίνονται, μᾶλλον ἀπάγχονται. διὸ καὶ οἱ νέοι ἢ καὶ οἱ πρεσβῦται μᾶλλον ἀπάγχονται· τὸ μὲν γὰρ γῆρας μαραίνει τὸ θερμόν, τῶν δὲ τὸ πάθος φυσικὸν ὄν καὶ αὐτὸ τὸ μαραινόμενον θερμόν. ὅσοις δὲ σβεννυμένου, ἐξαίφνης οἱ πλεῖστοι διαχρῶνται ἑαυτούς, ὥστε θαυμάζειν πάντας διὰ τὸ μηθὲν ποιῆσαι σημεῖον πρότερον. ψυχροτέρα μὲν οὖν γινομένη ἡ κρᾶσις ἢ ἀπὸ τῆς μελαίνης χολῆς, ὥσπερ εἴρηται, ποιεῖ ἀθυμίας παντοδαπὰς, θερμότερα δὲ οὕσα εὐθυμίας. διὸ καὶ οἱ μὲν παῖδες εὐθυμότεροι, οἱ δὲ γέροντες δυσθυμότεροι. οἱ μὲν γὰρ θερμοί, οἱ δὲ ψυχροί· τὸ γὰρ γῆρας κατὰψυξίς τις. συμβαίνει δὲ σβέννυσθαι ἐξαίφνης ὑπὸ τε τῶν ἐκτὸς

αἰτιῶν, ὥς καὶ παρὰ φύσιν τὰ πυρωθέντα, οἶον ἄνθρακα ὕδατος ἐπιχυθέντος. διὸ καὶ ἐκ μέθης ἔνιοι ἑαυτοὺς διαχρῶνται· ἡ γὰρ ἀπὸ τοῦ οἴνου θερμότης ἐπείσακτός ἐστιν, ἥς σβεννυμένης συμβαίνει τὸ πάθος. καὶ μετὰ τὰ ἀφροδίσια οἱ πλεῖστοι ἀθυμότεροι γίνονται, ὅσοι δὲ περιττώμα πολὺ προίενται μετὰ τοῦ σπέρματος, οὗτοι εὐθυμότεροι· κουφίζονται γὰρ περιττώματός τε καὶ πνεύματος καὶ θερμοῦ ὑπερβολῆς. ἐκεῖνοι δὲ ἀθυμότεροι πολλάκις· καταψύχονται γὰρ ἀφροδισιάσαντες διὰ τὸ τῶν ἱκανῶν τι ἀφαιρεθῆναι· δηλοῖ δὲ τοῦτο τὸ μὴ πολλὴν τὴν ἀπορροὴν γεγονέναι. ὥς οὖν ἐν κεφαλαίῳ εἰπεῖν, διὰ μὲν τὸ ἀνώμαλον εἶναι τὴν δύναμιν τῆς μελαίνης χολῆς ἀνώμαλοί εἰσιν οἱ μελαγχολικοί· καὶ γὰρ ψυχρὰ σφόδρα γίνεται καὶ θερμῇ. διὰ δὲ τὸ ἡθοποιὸς εἶναι (ἡθοποιὸν γὰρ τὸ θερμὸν καὶ ψυχρὸν μάλιστα τῶν ἐν ἡμῖν ἐστίν) ὥσπερ ὁ οἶνος πλείων καὶ ἐλάττων κεραννύμενος τῷ σώματι ποιεῖ τὸ ἥθος ποιούς τινας ἡμᾶς. ἄμφω δὲ πνευματικά, καὶ ὁ οἶνος καὶ ἡ μέλαινα χολή. ἐπεὶ δ' ἔστι καὶ εὐκρατον εἶναι τὴν ἀνωμαλίαν καὶ καλῶς πως ἔχειν, καὶ ὅπου δεῖ θερμότεραν εἶναι τὴν διάθεσιν καὶ πάλιν ψυχράν, ἢ τοῦναντίον διὰ τὸ ὑπερβολὴν ἔχειν, περιττοὶ μὲν εἰσι πάντες οἱ μελαγχολικοί, οὐ διὰ νόσον, ἀλλὰ διὰ φύσιν.

[955b] Διὰ τί κατ' ἐνίας μὲν τῶν ἐπιστημῶν ἔξιν ἔχειν λέγομεν, κατ' ἐνίας δὲ οὐ; ἢ καθ' ὅσας εὐρετικοὶ ἐσμεν, ἔξιν ἔχειν λεγόμεθα; τὸ γὰρ εὐρίσκειν ἀπὸ ἔξεως.

Διὰ τί τῶν ζώων ὁ ἄνθρωπος φρονιμώτατος; πότερον ὅτι μικροκεφαλώτατος κατὰ λόγον τοῦ σώματος; ἢ ὅτι ἀνωμάλως ἐλάχιστος; διὰ γὰρ τοῦτο καὶ μικροκέφαλον, καὶ αὐτῶν οἱ τοιοῦτοι μᾶλλον τῶν μεγαλοκεφάλων φρονιμώτεροι.

Διὰ τί δοκεῖ ἡμῖν πλείων εἶναι ἡ ὁδός, ὅταν μὴ εἰδότες πόση τίς ἐστὶ βαδίζωμεν, μᾶλλον ἢ ὅταν εἰδότες, ἐὰν τὰ ἄλλα ὁμοίως τύχωμεν ἔχοντες; ἢ ὅτι τὸ εἰδέναι [πόση] ἐστὶν εἰδέναι τὸν ἀριθμὸν; τὸ γὰρ ἄπειρον καὶ ἀναρίθμητον ταυτόν, καὶ πλεόν ἀεὶ τὸ ἄπειρον τοῦ ὀρισμένου. ὥσπερ οὖν εἰ ἦδει ὅτι τοσῆδε ἐστί, πεπερασμένην αὐτὴν ἀνάγκη εἶναι, οὕτως εἰ μὴ οἶδε πόση τίς ἐστίν, ὥς ἀντιστρέφοντος παραλογίζεται ἡ ψυχὴ, καὶ φαίνεται αὕτη εἶναι ἄπειρος, ἐπεὶ τὸ ποσὸν ὀρισμένον ἐστὶ καὶ τὸ ὀρισμένον ποσόν. ὅταν τοίνυν μὴ φαίνεται ὀρισμένον, ὥσπερ ἄπειρον δόξει εἶναι, διὰ τὸ τὸ πεφυκὸς ὀρίσθαι, ἂν μὴ ἦ ὀρισμένον, ἄπειρον εἶναι, καὶ τὸ φαινόμενον μὴ ὀρίσθαι φαίνεσθαι ἀνάγκη πως ἀπέραντον.

Διὰ τί πρεσβύτεροι μὲν γινόμενοι μᾶλλον νοῦν ἔχομεν, νεώτεροι δὲ ὄντες θάπτον μανθάνομεν; ἢ ὅτι ὁ θεὸς ὄργανα ἐν ἑαυτοῖς ἡμῖν δέδωκε δύο, ἐν οἷς χρησόμεθα τοῖς ἐκτὸς ὀργάνοις, σώματι μὲν χεῖρα, ψυχῇ δὲ νοῦν. ἔστι γὰρ καὶ ὁ νοῦς τῶν φύσει ἐν ἡμῖν ὥσπερ ὄργανον ὑπάρχων· αἱ δὲ ἄλλαι ἐπιστήμαι καὶ τέχναι τῶν ὑφ' ἡμῶν ποιητῶν εἰσὶν, ὁ δὲ νοῦς τῶν φύσει. καθάπερ οὖν τῇ χειρὶ οὐκ εὐθὺς γενόμενοι χρώμεθα βέλτιστα, ἀλλ' ὅταν ἡ φύσις αὐτὴν ἐπιτελέσῃ (προϊούσης γὰρ τῆς ἡλικίας ἡ χεὶρ μάλιστα δύναται ἀποτελεῖν τὸ ἑαυτῆς ἔργον), τὸν αὐτὸν τρόπον καὶ ὁ νοῦς τῶν φύσει οὐ εὐθὺς ἀλλ' ἐπὶ γήρως ἡμῖν μάλιστα παραγίνεται καὶ τότε ἀποτελεῖται μάλιστα, ἂν μὴ ὑπὸ τινος πηρωθῇ, καθάπερ καὶ τὰ ἄλλα τὰ φύσει ὑπάρχοντα. ὕστερον δὲ τῆς τῶν χειρῶν δυνάμεως ὁ νοῦς παραγίνεται ἡμῖν, ὅτι καὶ τὰ τοῦ νοῦ ὄργανά ἐστι τῶν τῆς χειρός. ἔστι γὰρ νοῦ μὲν ὄργανον ἐπιστήμη (τούτῳ γὰρ ἐστι χρήσιμος, καθάπερ αὐλοὶ αὐλητῇ), χειρῶν δὲ πολλὰ τῶν φύσει ὄντων· ἡ δὲ φύσις αὐτὴ τε ἐπιστήμης πρότερον, καὶ τὰ ὑπ' αὐτῆς γινόμενα. ὣν δὲ τὰ ὄργανα πρότερα, καὶ τὰς δυνάμεις πρότερον εἰκὸς [956a] ἐγγίνεσθαι ἡμῖν· τούτοις γὰρ χρώμενοι ἔξιν λαμβάνομεν, καὶ ἔχει ὁμοίως τὸ ἐκάστου ὄργανον πρὸς αὐτό· καὶ ἀνάπαλιν, ὥς τὰ ὄργανα πρὸς ἄλληλα, οὕτω τὰ ὄργανα πρὸς αὐτά. ὁ μὲν οὖν νοῦς διὰ ταύτην τὴν αἰτίαν πρεσβυτέροις οὕσιν ἡμῖν μᾶλλον ἐγγίνεται. μανθάνομεν δὲ θάπτον νεώτεροι ὄντες διὰ τὸ μηδὲν πω ἐπίστασθαι. ὅταν δὲ ἐπιστώμεθα, οὐκέτι ὁμοίως δυνάμεθα. δυνάμεθα δὲ ἔχεσθαι, καθάπερ καὶ μνημονεύομεν μᾶλλον οἷς ἂν ἔωθεν πρῶτον ἐντυγχάνωμεν, ἔπειτα προϊούσης τῆς ἡμέρας οὐκέτι ὁμοίως διὰ τὸ πολλοῖς ἐντετυχηκέναι.

Διὰ τί ἀνθρώπῳ πειστέον μᾶλλον ἢ ἄλλῳ ζῳῷ; πότερον ὥσπερ Πλάτων Νεοκλεῖ ἀπεκρίνατο, ὅτι ἀριθμεῖν μόνον ἐπίσταται τῶν ἄλλων ζῳων; ἢ ὅτι θεοὺς νομίζει μόνον; ἢ ὅτι μιμητικώτατον; μανθάνειν γὰρ δύναται διὰ τοῦτο.

Διὰ τί οὐ χαίρομεν θεώμενοι οὐδὲ ἐλπίζοντες ὅτι τὸ τρίγωνον δύο ὀρθαῖς ἴσας ἔχει τὰς ἐντὸς γωνίας, οὐδὲ τῶν ἄλλων τῶν τοιούτων οὐθέν, εἰ μὴ τῇ θεωρίᾳ, αὕτη δὲ ὁμοίως ἐστὶν ἡδεῖα καὶ εἰ τρισὶν ὀρθαῖς ἢ πλείοσιν ἴσας ἔσχεν. ἀλλ' ὅτι Ὀλυμπία ἐνικῶμεν, καὶ περὶ τῆς ναυμαχίας τῆς ἐν Σαλαμῖνι, χαίρομεν καὶ μεμνημένοι καὶ ἐλπίζοντες τοιαῦτα, ἀλλ' οὐ τάναντία τοῖς τοιούτοις. ἢ ὅτι ἐπὶ μὲν τοῖς τοιούτοις χαίρομεν ὥς γενομένοις ἢ οὕσιν, ἐπὶ δὲ τοῖς κατὰ

φύσιν ὡς κατὰ ἀλήθειαν θεωρίας ἡδονήν, ὡς ἔχει, μόνην ἡμῖν ποιεῖν, τὰς δὲ πράξεις τὴν ἀπὸ τῶν συμβαινόντων ἀπ' αὐτῶν. ἀνομοίων οὖν οὐσῶν τῶν πράξεων, καὶ τὰ ἀποβαίνοντα ἀπ' αὐτῶν γίνεται τὰ μὲν λυπηρὰ τὰ δὲ ἡδέα· φεύγομεν δὲ καὶ διώκομεν καθ' ἡδονήν καὶ λύπην ἅπαντα.

Διὰ τί μέχρι ὑγείας πραγματεύονται οἱ ἰατροί; ἰσχυαίνει γάρ, εἴτα ἐκ τούτου ξηραίνει, εἴτα ὑγίαν ἐποίησεν, εἴτα ἐνταῦθα ἔστη. πότερον οὐκ ἔστι δυνατόν ἐκ τούτου γενέσθαι ἄλλο; ἢ εἰ δυνατόν, ἄλλης ἐπιστήμης, καὶ ἔσται ὁ τις ἐξ ὑγείας ποιήσει ἄλλο τι; εἰ δὴ γίνεται ἐκ τῶν ἐναντίων καὶ τῶν μεταξύ, δῆλον ὅτι ἀρρωστεῖ, ἢ ξηρότερος ἢ ὑγρότερος ἢ τι τοιοῦτον. ποιεῖ δὴ ἐκ ψύχους ἤττον σφόδρα, καὶ τέλεον ὠδὶ θερμὸν καὶ ὠδὶ ξηρὸν ἢ ὑγρὸν μεταβαῖνον ἐκ τῶν ἐναντίων, ἢ μεταξύ, ἕως ἂν ἔλθῃ εἰς τὸ οὕτως ἔχειν, ὃ ἦν τοῦ ὑγιαίνειν· ἐκ τε τούτου οὐ πέφυκεν ἄλλο τι ὄν ἢ τὸ μεταξύ. δύναται μὲν οὖν ποιῆσαι ὁ ἔχων. ὡς γὰρ ἦλθεν, ἀναλῦσαι δύναται καὶ ἀπελθεῖν, οὐ μὴν ἢ γε τέχνη τούτου ἐστίν. αἰεὶ γὰρ βέλτιον. ὥστε οὐδὲ ἄλλη, οὔτε αὐτὴ ποιήσει [956b] ἐξ ὑγείας ἄλλο τι· οὐθὲν γὰρ ἐγίνετο ἢ τὸ ἐναντίον τούτου, εἴπερ ἡ αὐτὴ ἐπιστήμη. οὕτω καὶ ἐπὶ οἰκίας οὐδὲν ποιήσειεν ἂν τούναντίον· οὐκ ἔστιν ἐν ἄλλῃ τέχνῃ ἐκ τούτου ποιήσουσα, πλὴν ὡς μέρους, οἷον ἢ σκυτικὴ ὑπόδημα ἐκ προσχίσματος. ἐξ ἑκατέρου γὰρ γίνεται διττῶς, ἢ συντιθεμένου ἢ φθειρομένου.

Διὰ τί τὸν φιλόσοφον τοῦ ῥήτορος οἴονται διαφέρειν; ἢ ὅτι ὁ μὲν φιλόσοφος περὶ αὐτὰ τὰ εἶδη τῶν πραγμάτων διατρίβει, ὁ δὲ περὶ τὰ μετέχοντα, οἷον ὁ μὲν τί ἐστὶν ἀδικία, ὁ δὲ ὡς ἀδικος ὁ δεῖνα, καὶ ὁ μὲν τί ἡ τυραννίς, ὁ δὲ οἷόν τι ὁ τύραννος.

Διὰ τί οἱ Διονυσιακοὶ τεχνῖται ὡς ἐπὶ τὸ πολὺ πονηροὶ εἰσιν; ἢ ὅτι ἥκιστα λόγου σοφίας κοινωνοῦσι διὰ τὸ περὶ τὰς ἀναγκαίας τέχνας τὸ πολὺ μέρος τοῦ βίου εἶναι, καὶ ὅτι ἐν ἀκρασίαις τὸ πολὺ τοῦ βίου εἰσίν, τὰ δὲ καὶ ἐν ἀπορίαις; ἀμφοτέρω δὲ φαυλότητος παρασκευαστικά.

Διὰ τί οἱ ἐξ ἀρχῆς τῆς μὲν κατὰ τὸ σῶμα ἀγωνίας ἄθλόν τι προὔταξαν, σοφίας δὲ οὐθὲν ἔθηκαν; ἢ ὅτι ἐπιεικῶς δεῖ τοὺς κριτάς, ἃ παρὰ διάνοιάν ἐστιν, ἢ μὴθὲν χεῖρους τῶν ἀγωνιστῶν εἶναι ἢ κρείττους; εἰ δὲ ἔδει σοφία τοὺς πρωτεύοντας ἀγωνίζεσθαι καὶ ἄθλον προὔτέτακτο, κριτῶν ἂν ἠπόρουν αὐτοῖς. ἐπὶ δὲ τῶν γυμνικῶν ἀγώνων ἅπαντός ἐστι κρῖναι, τῇ ὅψει μόνῃ θεασάμενον. ἔτι δὲ ὁ ἐξ

ἀρχῆς κατασκευάζων οὐκ ἐβούλετο τοιαύτην ἀγωνίαν προθεῖναι τοῖς Ἑλλησιν, ἐξ ὧν ἔμελλον στάσεις καὶ ἔχθραι μεγάλαι ἔσεσθαι· οἷον οἱ ἄνθρωποι, ὅταν τις ἢ ἐκκριθῇ ἢ προσδεχθῇ εἰς τι τῶν κατὰ τὸ σῶμα ἀθλημάτων, οὐ πάντῃ χαλεπῶς φέρουσιν οὐδὲ εἰς ἔχθραν καθίστανται τοῖς κρίνουσιν, ὑπὲρ δὲ τοῦ φρονιμωτέρους ἢ μοχθηροτέρους εἶναι τοῖς κρίνουσι μάλιστα ὀργίζονται καὶ ἀγανακτοῦσιν. στασιῶδες δὲ καὶ μοχθηρὸν τὸ τοιοῦτόν ἐστιν. ἔτι δὲ δεῖ τῆς ἀγωνίας τὸ ἄθλον κρεῖττον εἶναι. ἐπὶ μὲν γὰρ τῶν γυμνικῶν ἀθλημάτων τὸ ἄθλον αἰρετώτερον καὶ βέλτιον τῆς ἀγωνίας· σοφίας δὲ τί ἂν ἄθλον βέλτιον γένοιτο;

Διὰ τί ἄλλο νοεῖ καὶ ποιεῖ ἄνθρωπος μάλιστα; ἢ ὅτι τῶν ἐναντίων ἡ αὐτὴ ἐπιστήμη; ἢ ὅτι ὁ μὲν νοῦς πολλῶν ἐστίν, ἡ δὲ ὀρεξις ἑνός; ὁ μὲν οὖν ἄνθρωπος τῷ νῷ τὰ πλεῖστα ζῇ, τὰ δὲ θηρία ὀρέξει καὶ θυμῷ καὶ ἐπιθυμίᾳ.

Διὰ τί φρόνιμοί τινες κτώμενοι οὐ χρώμενοι διατελοῦσιν; πότερον ὅτι τῷ ἔθει χρώνται; ἢ διὰ τὸ ἐν ἐλπίδι ἡδύ;

ὅτι ἡ αἴσθησις καὶ ἡ διάνοια τῷ ἡρεμεῖν τὴν ψυχὴν ἐνεργεῖ· ὁ καὶ ἡ ἐπιστήμη δοκεῖ εἶναι, ὅτι τὴν ψυχὴν ἴστησιν. [957a] κινουμένης γὰρ καὶ φερομένης οὔτε αἰσθῆσθαι οὔτε διανοηθῆναι δυνατόν. διὸ καὶ τὰ παιδιά καὶ οἱ μεθύοντες καὶ οἱ μαινόμενοι ἀνόητοι· διὰ γὰρ τὸ πλῆθος τοῦ θερμοῦ τοῦ ἐνυπάρχοντος πλείστη κίνησις αὐτοῖς καὶ σφοδροτάτῃ συμβαίνει, ληγούσης δὲ ταύτης ἐμφρονέστεροι γίνονται· ἀταράχου γὰρ οὔσης τῆς διανοίας μᾶλλον ἐφιστάναι δύνανται αὐτήν. οἳ τ' ἐν τῷ καθεύδειν ἐνυπνιαζόμενοι ἵσταμένης τῆς διανοίας, καὶ καθ' ὅσον ἡρεμεῖ, ὄνειρώττουσιν. μάλιστα γὰρ ἐν τοῖς ὕπνοις ἡ ψυχὴ κινεῖται. περισταμένου γὰρ τοῦ θερμοῦ ἐκ τοῦ ἄλλου σώματος εἰς τὸν ἐντὸς τόπον, τότε πλείστη καὶ σφοδροτάτῃ κίνησις ὑπάρχει, οὐχ ὥσπερ οἱ πολλοὶ ὑπολαμβάνουσι τότε ἡρεμεῖν καὶ καθ' αὐτὴν εἶναι, καὶ μάλιστα ὅταν μηδὲν ἴδωσιν ἐνύπνιον. συμβαίνει δὲ τούναντίον· διὰ γὰρ τὸ ἐν πλείστη κινήσει εἶναι καὶ μηδὲ κατὰ μικρὸν ἡρεμεῖν, οὐδὲ διανοεῖσθαι δύναται. ἐν πλείστη δὲ κινήσει, ὅταν ἥδιστα καθεύδῃ, εἰκότως ἐστίν, ὅτι τότε μάλιστα καὶ πλείστον θερμὸν ἀθροίζεται εἰς τὸν εἶσω τόπον. ὅτι δὲ ἐν τῇ κινήσει οὔσα ἡ ψυχὴ οὐ μόνον ὕπαρ ἄλλ' οὐδ' ἐν τοῖς ὕπνοις δύναται διανοεῖσθαι, κάκεῖνο σημεῖον· ἐν γὰρ τοῖς μετὰ τὴν πρόσεσιν τῶν σιτίων ὕπνοις ἥκιστα ἔστιν ἐνύπνια ὀρᾶν. τότε δὲ μάλιστα συμβαίνει κινεῖσθαι αὐτὴν διὰ τὴν ἐπεισενεχθεῖσαν τροφήν.

τό τε ἐνύπνιον ἐστίν, ὅταν διανοουμένοις καὶ πρὸ ὁμμάτων
τιθεμένοις ὕπνος ἐπέλθῃ. διὸ καὶ ταῦτα μάλιστα ὀρῶμεν ἃ πράττομεν
ἢ μέλλομεν ἢ βουλόμεθα· περὶ γὰρ τούτων μάλιστα πλειστάκις
λογισμοὶ καὶ φαντασίαι ἐπιγίνονται. καὶ οἱ βελτίους βελτίῳ τὰ
ἐνύπνια ὀρῶσι διὰ ταῦτα, ὅτι καὶ ἐγρηγορότερες περὶ βελτιόνων
διανοοῦνται, οἱ δὲ χεῖρον ἢ τὴν διάνοιαν ἢ τὸ σῶμα διακείμενοι
χείρῳ. καὶ γὰρ ἡ τοῦ σώματος διάθεσις πρὸς τὴν τῶν ἐνυπνίων
φαντασίαν συμβλητικόν· τοῦ γὰρ νοσοῦντος καὶ αἱ τῆς διανοίας
προθέσεις φαῦλαι, καὶ ἔτι διὰ τὴν ἐν τῷ σώματι ταραχὴν ἐνοῦσαν ἡ
ψυχὴ οὐ δύναται ἡρεμεῖν. οἱ δὲ μελαγχολικοὶ διὰ τοῦτο ἐξάπτουσιν
ἐν τοῖς ὕπνοις, ὅτι πλείονος τῆς θερμασίας οὔσης μᾶλλον τοῦ
μετρίου ἡ ψυχὴ ἐν κινήσει, σφοδροτέρας δὲ τῆς κινήσεως οὔσης οὐ
δύνανται καθεύδειν.

ΛΑ. ΟΣΑ ΠΕΡΙ ΟΦΘΑΛΜΟΥΣ.

Διὰ τί τρίψαντες τὸν ὀφθαλμὸν παυόμεθα τῶν παρμῶν; ἢ ὅτι ἀναπνοὴ ταύτη γίνεται τῷ ὑγρῷ; δακρύει γὰρ ὁ ὀφθαλμὸς μετὰ τὴν τριψίν· ὁ δὲ παρμὸς διὰ πλῆθος [957b] ὑγροῦ. ἢ ὅτι τὸ ἔλαττον θερμὸν φθείρεται ὑπὸ τοῦ πλείονος; ὁ δὲ ὀφθαλμὸς τριφθεὶς πλείω λαμβάνει θερμότητα τῆς ἐν τῇ ῥίνι. διὰ τοῦτο δὲ κἂν τις αὐτὴν τὴν ῥίνα τρίψῃ, παύεται ὁ παρμὸς.

Διὰ τί τῷ ἐνὶ ὀφθαλμῷ ἀκριβέστερον ὁρῶσιν ἢ τοῖν δυοῖν; ἢ ὅτι πλείους οὖσαι κινήσεις τοῖν δυοῖν γίνονται, οἷον τοῖς διεστραμμένοις; οὐκουν μία ἢ κίνησις, τοῦ δὲ ἐνὸς ἀπλῆ. ἤττον οὖν ὁρῶσιν ἀκριβέστερον.

Διὰ τί ὀργιζόμενοι μὲν τοὺς ὀφθαλμοὺς μᾶλλον ἐπιδιδόασιν πρὸς τὸ ἐρυθριᾶν, αἰσχνόμενοι δὲ τὰ ὄντα; ἢ διότι οἱ μὲν καταπύχονται ἐν τῇ αἰδοῖ (ἐν ὀφθαλμοῖς γὰρ αἰδώς) ἀντιβλέπειν οὐ δύνανται; καὶ ἡ δειλία κατάψυξις τίς ἐστὶν ἐνταῦθα. μεθίσταται δὲ εἰς τοῦναντίον τῷ ἔμπροσθεν τὸ ὀπισθεν. τὰ δὲ ὄντα ἀντίκειται· διὸ καὶ μάλιστα ἐρυθριῶσιν αἰσχνόμενοι. ἐν δὲ τῷ κνήθεσθαι ἐπὶ τὸ αἰσθητικώτερον καὶ κινητικώτερον ἢ βοήθεια ὡς ἀδικουμένου· φοβούμενοις γὰρ ἐνταῦθα ἐκλείπει μάλιστα.

Διὰ τί θατέρου καταληφθέντος ὀφθαλμοῦ ὁ ἕτερος ἀτενίζει μᾶλλον; ἢ διότι ἐκ ταύτου ἡρτηνται αἱ ἀρχαὶ τῶν ὀφθαλμῶν; θατέρου οὖν κινουμένου καὶ ἡ κοινὴ ἀρχὴ κινεῖται, ἐκείνης δὲ κινουμένης καὶ ὁ ἕτερος. ληφθέντος οὖν θατέρου ἡ κίνησις κινήσει αὐτόν, ὥστε δύναται ἀτενίζειν μᾶλλον.

Διὰ τί οἱ ἐκ γενετῆς τυφλοὶ οὐ γίνονται φαλακροί; ἢ ὅτι πημαίνει τὰ ὄμματα ὑγρότης οὖσα πολλὴ ἐν τῷ περὶ τὴν κεφαλὴν τόπῳ; διὸ τῶν ρευματικῶν εἰς τοὺς ὀφθαλμοὺς τάς τε περὶ τοὺς κροτάφους φλέβας κάουσι, πυκνοῦντες τοὺς τῶν ὑγρῶν πόρους, καὶ ξύουσι τὴν κεφαλὴν, διατέμνοντες τὸ ἐν αὐτῇ δέρμα. ἐπεὶ οὖν πημαίνει τοὺς ὀφθαλμοὺς τὸ ἐν αὐτῇ περίττωμα γινόμενον, κωλύει ἂν αὐτοὺς ταὐτὸ τοῦτο ἐξ ἀρχῆς γίνεσθαι, πλεόν συνιστάμενον ἐν αὐτῇ. ἐπεὶ δὲ ἐκ περιττωμάτων θριξ φύεται, τοῦτο δὲ ἐν τῇ τῶν τυφλῶν κεφαλῇ ἐκ γενετῆς ἐστὶ πολὺ, εἰκότως οὐκ εἰσὶ φαλακροί.

Διὰ τί οἱ ἐξόφθαλμοι καπνίζονται μᾶλλον; ἢ ὅτι τάχιστα προσπίπτει πρὸς τὰ προέχοντα;

Διὰ τί εἰς μὲν τὰ δεξιὰ ἀμφοτέρας τὰς ὄψεις ἅμα διαστρέφειν
δυνάμεθα, καὶ εἰς τὰ ἀριστερὰ καὶ πρὸς τὴν ῥίνα, καὶ εἰς τὸ
ἀριστερὸν δὲ ἢ τὸ δεξιὸν τὴν ἑτέραν, ἅμα δὲ εἰς τὸ δεξιὸν καὶ
ἀριστερὸν ἀδυνατοῦμεν; ὁμοίως δὲ καὶ εἰς τὸ κάτω καὶ εἰς τὸ ἄνω·
ἅμα μὲν γὰρ ἐπὶ ταὐτὸ δυνάμεθα, χωρὶς δὲ οὐ. ἢ ὅτι αἱ ὄψεις δύο
οὔσαι ὁμοίως ἐξ ἑνὸς συνήρτηνται; [958a] ὅσα δὲ τοιαῦτα, ἄκρου
θατέρου κινουμένου ἀνάγκη θάτερον ἀκολουθεῖν ἐπὶ ταυτό. τῷ γὰρ
ἐτέρῳ ἄκρῳ ἢ ἀρχῇ θάτερον ἄκρον. εἰ οὖν τὸ ἐν ἀδύνατον ἅμα εἰς
τάναντία κινεῖσθαι, ἀδύνατον καὶ τὰς ὄψεις. τὰ μὲν γὰρ ἄκρα εἰς
τάναντία ἂν κινοῖτο, εἰ τὸ μὲν ἄνω τὸ δὲ κάτω κινοῖτο, ἢ δὲ ἀρχῇ
ἀμφοῖν ἂν ἀκολουθοίη· ὅπερ ἀδύνατον. ἢ δὲ διαστροφή ἐστὶ τῶν
ὀμμάτων διὰ τὸ ἀρχὴν ἔχειν τὰς σφαῖρας, καὶ μέχρι τοῦ στρέφεσθαι
εἰς τὰ ἄνω καὶ κάτω καὶ εἰς πλάγιον. ὅταν οὖν ἔχουσιν ὥς ἂν ὁμοίως
ἔχοιεν τῇ θέσει ἀλλήλαις, καὶ ἐν μέσῳ τοῦ ἐπὶ τὸ ἄνω καὶ κάτω
κινεῖσθαι, καὶ εἰς πλάγιον ἐπὶ τοῦ αὐτοῦ σημείου ἐαυτῶν λάβωσι τὴν
ὄψιν, αὗται μὲν ἀδιάστροφοί τε καὶ μάλιστα ἀκίνητοι τῇ θέσει· ὅσαι
δὲ ἐπὶ ταυτοῦ σημείου λάβωσι τὰς ὄψεις, ἀδιάστροφοι μὲν εἰσι,
διαφέρουσι δὲ ἀλλήλων. καίτοι κρύπτεται τοῦ μέλανός τι καὶ τοῖς
ἄνω βάλλουσι τὰ λευκά, οἷον μελλέπταρμοι· ἕτεροι δὲ εἰς τὸ
πλάγιον, ὥσπερ οἱ μανικοί, οἱ δὲ εἰς τοὺς μυκτῆρας, ὥσπερ τὰ
τραγικὰ πρόσωπα καὶ οἱ στρυφνοί· σύννουν γὰρ τὸ βλέμμα. ὅσοι δὲ
μὴ ὁμοίως κειμένων τῶν σφαιρῶν ἐπὶ ταυτῷ σημείῳ ἔχουσιν τὰς
ὄψεις, ἢ ὁμοίως μὲν κειμένων μὴ ἐπὶ τῷ αὐτῷ δέ, οὗτοι
διεστραμμένοι εἰσὶν· διὸ ὑποβλέπουσι καὶ συνάγουσι τὰ ὄμματα.
πειρῶνται γὰρ ἐπὶ ταυτὸν καταστῆσαι σχῆμα τὴν σφαῖραν. ὥστε τὸν
μὲν ἑῷσι, τὸν δὲ σχηματίζουσι τῶν ὀφθαλμῶν. ἐὰν γὰρ μὴ κατ' αὐτὸ
σημεῖον τεθῶσιν αἱ ὄψεις, ἀνάγκη διεστράφθαι. ὥσπερ γὰρ τοῖς
ὑποβάλλουσιν ὑπὸ τὸν ὀφθαλμὸν [τὸ ἐν] δύο φαίνεται (καὶ γὰρ
ἐκείνοις κεκίνηται ἢ ἀρχῇ), καὶ τούτοις ὁμοίως. ἐὰν μὲν οὖν ἄνω
κινήῃ ὁ ὀφθαλμός, τὸ πέρας κάτω τῆς ὄψεως γίνεται, ἐὰν δὲ κάτω,
ἄνω τὸ πέρας. ἐν ἐνὶ δὲ ὀφθαλμῷ μεθισταμένῳ κινεῖσθαι μὲν τὸ
ὀρώμενον δοκεῖ διὰ ταῦτα ἄνω ἢ κάτω, ὅτι καὶ ἡ ὄψις, δύο δὲ οὐ
φαίνεται, ἂν μὴ δύο αἱ ὄψεις ᾖσι, καὶ διαστρέφει. τοιαύτη μὲν τῷ
ἐτεροφθάλμῳ γίνεται, ὥστε δύο φαίνεσθαι· κατὰ τὴν θέσιν δὲ γίνεται
τῷ μὴ κατὰ μέσον τοῦ ὀμματος κεῖσθαι.

ἀ τί οἱ μύωπες μικρὰ γράμματα γράφουσιν; ἄτοπον γὰρ τὸ μὴ
ὀξὺ ὀρῶντας ποιεῖν ἔργον ὀξὺ ὀρῶντων. πότερον ὅτι μεγάλα

φαίνεται τὰ μικρά, ἐὰν ἡ ἐγγύς· οἱ δὲ προσάγοντες γράφουσιν; ἢ διὰ τὸ συνάγοντας τὰ βλέφαρα γράφειν; δι' ἀσθένειαν γὰρ τῆς ὄψεως, ἂν μὲν ἀναπεπταμένοις [958b] γράφωσι τοῖς ὄμμασι, διασπωμένη ἡ ὄψις ἀμβλὺ ὄρᾳ, οὕτω δὲ ἀθρόως προσπίπτει· γωνίαν δὲ μικρὰν ποιοῦσα ἐξ ἀνάγκης ποιεῖ μικρὰ γράφειν.

Διὰ τί ὀφθαλμιάσαντες ἔνιοι ὀξύτερον ὀρῶσιν; ἢ διὰ τὸ ἀποκεκαθάρθαι τὰ ὄμματα; πολλάκις γὰρ ἡ ἔξω πυκνότης ἀποστέγει τὴν ὄψιν, ἀποδακρύσαντι δὲ λύεται. διὸ καὶ τὸ ἀποδάκνεσθαι συμφέρει, οἷον κρόμμυον· θάτερον δὲ πολέμιον, οἷον ὀρίγανον.

Διὰ τί τῇ μιᾷ ὄψει ἀπαθέστεροι; ἢ διότι ἔλαττον ἡ ψυχὴ πάσχει, ὥστε ἔλαττον τὸ πάθος.

Διὰ τί τοῖς δισταμένοις δύο φαίνεται; ἢ διότι οὐκ ἀφικνεῖται ἐπὶ τὸ αὐτὸ σημεῖον ἑκατέρου τῶν ὀμμάτων ἡ κίνησις; ὥσπερ οὖν δύο ὀρᾶν τὸ δις ὀρᾶν οἶται ἡ ψυχὴ. ὅμοιον καὶ ἐπὶ τῶν δακτύλων τῆς ἐπαλλάξεως· δύο γὰρ τὸ ἐν δοκεῖ ὡς δις ἀπτομένη ἐνί.

Διὰ τί οὐ διαφέρουσιν αἱ αἰσθήσεις αἱ ἐν τοῖς δεξιοῖς τῶν ἀριστερῶν, ἐν δὲ τοῖς ἄλλοις πᾶσι κρεῖττω τὰ δεξιά; πότερον διὰ τὸ ἔθος, ὅτι εὐθὺς ὁμοίως ἀμφοῖν ἐθιζόμεθα αἰσθάνεσθαι; τὰ δὲ δεξιά τῷ ἔθει δοκεῖ διαφέρειν, ἐπεὶ ἐθισθεῖσιν ἀμφιδέξιοι γίνονται. ἢ ὅτι τὸ μὲν αἰσθάνεσθαι πάσχειν τί ἐστὶ, τὰ δὲ δεξιά διαφέρει τῷ ποιητικώτερα εἶναι καὶ ἀπαθέστερα τῶν ἀριστερῶν.

Διὰ τί ἐν μὲν τοῖς ἄλλοις κρεῖττω τὰ δεξιά, ἐν δὲ ταῖς αἰσθήσεσιν ὅμοια; ἢ διότι ταῦτα μὲν ὁμοίως ἐθιζόμεθα κατ' ἀμφοτέρα τῷ ἔθει; ἔτι τὸ μὲν αἰσθάνεσθαι πάσχειν τί ἐστίν, ἡ δὲ τῶν δεξιῶν διαφορὰ τῷ εἰς τὸ ποιεῖν καὶ οὐκ εἰς τὸ πάσχειν.

Διὰ τί τὸ γυμνάζεσθαι ἀσύμφορον πρὸς ὀξυωπίαν; ἢ ὅτι ξηρὸν ποιεῖ τὸ ὄμμα ἢ γυμνασία, ὥσπερ καὶ τὸ ἄλλο σῶμα; ἡ δὲ ξηρότης σκληρύνει τὸ δέρμα πᾶν, ὥστε καὶ τὸ ἐπὶ τῇ κόρῃ. διὸ καὶ οἱ πρεσβῦται οὐκ ὀξὺ ὀρῶσιν· καὶ γὰρ τῶν γερόντων σκληρόδερμα, ἅμα δὲ καὶ ῥυσά, ὥστε ἐπικαλύπτεται ἡ ὄψις.

Διὰ τί οἱ μύωπες βλέπουσι μὲν οὐκ ὀξὺ, γράφουσιν δὲ μικρά; καίτοι τὸ μικρὸν ὀξὺ βλέποντος καθορᾶν ἐστίν. ἢ διότι ἀσθενῇ ἔχοντες τὴν ὄψιν συνάγουσι τὰ βλεφαρὰ εἰς μικρόν; ἀθρόα γὰρ ἐξιοῦσα ἡ ὄψις μᾶλλον ὄρᾳ, ἀναπεπταμένου δὲ τοῦ ὀμματος διασπᾶται. διὰ μὲν οὖν τὴν ἀσθένειαν συνάγουσι τὸ βλέφαρον, διὰ δὲ τὸ ἐκ μικροῦ ὀρᾶν μικρὸν [959a] μέγεθος ὀρῶσιν. ὅσον δὲ ὀρῶσι μέγεθος, τοσοῦτον καὶ γράφουσιν.

Διὰ τί οἱ μύωπες συνάγοντες τὰ βλέφαρα ὀρῶσιν; ἢ δι' ἀσθένειαν τῆς ὄψεως, ὥσπερ καὶ οἱ πρὸς τὰ πόρρω τὴν χεῖρα προσάγοντες, οὕτω καὶ τὰ βλέφαρα πρὸς τὰ ἐγγὺς προστίθενται ὥσπερ χεῖρα; τοῦτο δὲ ποιοῦσιν, ἵνα ἀθροωτέρα ἢ ὄψις ἐξίη, δι' ἐλάττονος ἐξιοῦσα, καὶ μὴ εὐθὺς ἐξ ἀναπεπταμένου ἐξιοῦσα διασπασθῇ. ὀρᾷ δὲ ἡ πλείων μεῖζον.

Διὰ τί εἰς τὸ πλάγιον κινοῦσι τὸν ὀφθαλμὸν οὐ φαίνεται δύο τὸ ἓν; ἢ ὅτι ἐπὶ τῆς αὐτῆς γίνεται γραμμῆς ἡ ἀρχή; δύο δὲ φαίνεται ταύτης μεταβαλλούσης ἄνω ἢ κάτω. εἰς δὲ πλάγιον οὐδὲν διαφέρει, εἴαν μὴ ἅμα καὶ ἄνω. τί δὴ ἐπὶ μὲν τῆς ὄψεως ἔστιν ὥστε φαίνεσθαι τὸ ἓν δύο, ἂν πως τεθῶσιν οἱ ὀφθαλμοὶ πρὸς ἀλλήλους, ἐπὶ δὲ τῶν ἄλλων αἰσθήσεων οὐκ ἔστιν; ἢ καὶ ἐπὶ τῆς ἀφῆς γίνεται τῇ ἐπαλλάξει τῶν δακτύλων τὸ ἓν δύο; ἐπὶ δὲ τῶν ἄλλων οὐ γίνεται, ὅτι οὔτε ἔξω ἀποτεινομένων αἰσθάνεται, οὐδὲ δύο. γίνεται δὲ διὰ τοῦτο διόπερ καὶ ἐπὶ τῶν δακτύλων· μιμεῖται γὰρ τὴν ὄψιν.

Διὰ τί τοῦ μὲν ἄλλου σώματος τὰ ἀριστερὰ ἀσθενέστερα, τῶν δὲ ὀφθαλμῶν οὐ, ἀλλ' ὁμοίως ὀξύ; ἢ ὅτι τὰ μὲν δεξιὰ τῷ ποιητικᾷ εἶναι διαφέρουσι, τῷ δὲ παθητικᾷ οὐ διαφέρουσιν; αἱ δὲ ὄψεις παθητικά.

Διὰ τί τῇ ὄψει πρὸς μὲν τὰ ἄλλα ἀτενίζοντες χεῖρον διατιθέμεθα, πρὸς δὲ τὰ χλωρὰ καὶ ποώδη, οἷον λάχανα καὶ τὰ τούτοις ὅμοια, βέλτιον; ἢ ὅτι πρὸς μὲν τὸ λευκὸν καὶ μέλαν ἥκιστα δυνάμεθα ἀτενίζειν (ἅμφω γὰρ λυμαίνεται τὴν ὄψιν), τὰ δὲ τοιαῦτα τῶν χρωμάτων μέσον ἔχει τούτων· διὸ μετρίως τῆς ὄψεως διατιθεμένης οὐδὲ ἐξαδυνατοῦμεν αὐτῇ, βέλτιον δὲ διατιθέμεθα. τάχα δὲ ἴσως καθάπερ ἐπὶ τῶν σωμάτων σφοδρότερον πονοῦντες χεῖρον ἔχομεν, τὸ μέσον δὲ βέλτιστα διατίθῃσι, τὸν αὐτὸν τρόπον καὶ τὴν ὄψιν. πρὸς μὲν γὰρ στερεὰ ἀτενίζοντες πονοῦμεν αὐτήν, πρὸς δὲ τὰ ὑγρὰ μηδενὸς ἀντιφράττοντος οὐ διαπονοῦμεν. τὰ δὲ χλωρὰ στερεὰ τε μετρίως, καὶ ὑγρὸν ἐν αὐτοῖς ἱκανόν. διὸ βλάπτει τε οὐθέν, καὶ διαναγκάζει τὴν ὄψιν πρὸς τούτοις εἶναι διὰ τὸ τὴν τοῦ χρώματος κρᾶσιν σύμμετρον ἔχειν πρὸς τὴν ὄψιν.

Διὰ τί τὰ μὲν ἄλλα ἀμφοτέροις τοῖς ὀφθαλμοῖς μᾶλλον ὀρῶμεν, τὸ δὲ εὐθὺ τὸ ἐπὶ τῶν στίχων τῷ ἐνὶ προσάγοντες πρὸς τὰ γράμματα μᾶλλον καθορῶμεν; ἢ ἀμφοτέραι [959b] μὲν αἱ ὄψεις συμπίπτουσαι, καθάπερ λέγουσιν οἱ περὶ τὰ ὀπτικά, ταραχὴν παρέχουσιν, ἐπειδὴν δὲ τῇ μιᾷ θεωρῶμεν, πρὸς εὐθεῖαν τὴν ὄψιν,

ὥσπερ πρὸς κανόνα, μᾶλλον φαίνεται τὸ εὐθύ.

Διὰ τί ὁ καπνὸς τοὺς ὀφθαλμοὺς μᾶλλον δάκνει; ἢ ὅτι μόνοι ἀσθενέστατοι; ἀεὶ γὰρ τὰ ἔσω τοῦ σώματος ἀσθενέστατα. σημεῖον δὲ ὅτι καὶ τὸ ὄξος καὶ ἕκαστον τῶν δριμέων τὴν μὲν ἔξω σάρκα οὐ δάκνει, τὴν δὲ ἐντός, ὅτι ἀραιοτάτη τοῦ σώματος καὶ μάλιστα ἔχει πόρους· αἱ γὰρ ὕψεις διὰ τινων πόρων ἐκπίπτουσιν, ὥστε τὸ ἔσω δηκτικώτατον ἀπὸ τῆς σαρκὸς ἀποπίπτει. ὁμοίως δὲ καὶ τὸ κρόμμυον, καὶ ὅσα ἄλλα δάκνει τοὺς ὀφθαλμούς. τὸ δὲ ἔλαιον μάλιστα τῶν ὑγρῶν, ὅτι λεπτομερέστατον· τοιοῦτον δ' ὄν εἰσδύνει διὰ τῶν πόρων· τὸ δ' ὄξος ἐν φαρμάκῳ τῇ ἄλλῃ σαρκί.

Διὰ τί ὁ ὀφθαλμὸς μόνον τοῦ σώματος, ἀσθενέστατος ὢν, οὐ ῥιγοῖ; ἢ ὅτι πῖον ἐστὶν ὁ ὀφθαλμός, σαρκὸς δὲ οὐθέν; τὰ δὲ τοιαῦτα ἄριγά ἐστιν. οὐ γὰρ δὴ ὅτι γε πῦρ ἐστὶν ἡ ὄψις, διὰ τοῦτο οὐ ῥιγοῖ· οὐ γὰρ τοιοῦτόν γε ἐστὶ τὸ πῦρ ὥστε θερμαίνειν.

Διὰ τί δάκρυα, ἐὰν μὲν κλαίοντες ἀφίωμεν, θερμά ἐστίν, ἐὰν δὲ πονοῦντες τοὺς ὀφθαλμοὺς δακρύωμεν, ψυχρά; ἢ ὅτι τὸ μὲν ἄπεπτον ψυχρόν, τὸ δὲ πεπεμμένον θερμόν; ἡ δὲ μαλακία ὅλως πᾶσά ἐστιν ἐξ ἀπεψίας, καὶ τῶν τοὺς ὀφθαλμοὺς πονούντων ἄπεπτόν ἐστι τὸ δάκρυον· διὸ ψυχρόν. διὰ τοῦτο καὶ οἱ ἱατροὶ οἶονται σημεῖον εἶναι μεγάλης νόσου τοὺς ψυχροὺς ἰδρῶτας, τοὺς δὲ θερμοὺς τοῖναντίον ἀπαλλακτικούς. ὅταν μὲν γὰρ ᾗ τὸ περίττωμα πολὺ, οὐ δύναται τὸ ἐντὸς θερμὸν πέττειν, ὥστε ἀνάγκη ψυχρὸν εἶναι· ὅταν δὲ ὀλίγον, κρατεῖ. γίνονται δὲ ἐκ τῶν περιττωμάτων αἱ ἀρρωστίαί.

Διὰ τί ποτε εὐκινήτων ὄντων τῶν δεξιῶν μερῶν ὁ ὀφθαλμὸς ὁ ἀριστερὸς μᾶλλον τοῦ δεξιοῦ συνάγεται; ἢ ὅτι τὰ ἀριστερὰ πάντα ὑγρότερα τῶν δεξιῶν ἐστί, τὰ δὲ ὑγρότερα μᾶλλον συνάγεσθαι πέφυκεν· εἴτα εἰς τὸ δεξιὸν μᾶλλον ἀποτελεῖν δύναται, τοῦ ἀριστεροῦ δυναμένου καὶ καθ' αὐτό.

Διὰ τί ἀμφοτέροι κατὰ ἀσθένειάν τινα τῶν ὀφθαλμῶν διακείμενοι, ὃ τε μύωψ καὶ ὁ πρεσβύτης, ὁ μὲν ἐγγὺς προσάγει, ἂν τι βούληται ἰδεῖν, ὁ δὲ πόρρω ἀπάγει; ἢ ὅτι οὐχ ὁμοία ἡ ἀσθένεια παρέπεται αὐτοῖς; ὁ μὲν γὰρ πρεσβύτης [960a] αὐτὸ ἰδεῖν ἀδύνατός ἐστιν· οὗ δὲ συμπίπτει ἡ ὄψις αὐτῷ, ἀπάγει τὸ θεώμενον, ἅτε καὶ μάλιστα μέλλων ὀψεσθαι· πόρρω δὲ συμπίπτει. ὁ δὲ αὐτὸ μὲν ὁρᾷ, ποῖα δὲ κοῖλα καὶ ποῖα ἐξέχοντα τοῦ ὁρωμένου, οὐκέτι δύναται κρίνειν, ἀλλὰ περὶ ταῦτα ἀπατᾶται. τὰ δὲ κοῖλα καὶ τὰ ἐξέχοντα μάλιστα τῇ αὐγῇ κρίνεται. πόρρωθεν μὲν οὖν οὐ δύναται τῇ αὐγῇ

καταμαθεῖν πῶς ἐπιβάλλει ἐπὶ τὸ ὁρατόν· ἐγγύθεν δὲ μᾶλλον καταφανής ἐστιν.

Διὰ τί τῶν ζώων ἄνθρωπος ἢ μόνον ἢ μάλιστα διαστρέφεται; ἢ ὅτι ἢ μόνον ἢ μάλιστα ἐπίληπτον ἐν τῇ νεότητι γίνεται, ὅτε καὶ διαστρέφεσθαι συμβαίνει πᾶσιν;

Διὰ τί οἱ ἄνθρωποι μόνον τῶν ἄλλων ζώων τὰ ὄμματα διαστρέφονται; πότερον διὰ τὸ ἐλάχιστον διάστημα εἶναι τῶν ὀμμάτων, καὶ ἐπ' εὐθείας, ὥστε εὐδηλον σφόδρα γίνεται τὸ μὴ κατωρθωμένον. ἢ διότι τῶν ἄλλων μονόχροα τὰ ὄμματά ἐστι μᾶλλον· εἰ δ' ἦν ἐν χρωμά τι τοῦ ὀμματος, οὐκ ἦν διαστροφή. ἢ διότι μόνον ἐν τῷ γένει ἐπίληπτοι γίνονται τῶν ζώων, ἢ δ' ἐπίληψις διαστροφήν ποιεῖ, ὅταν γένηται, ὥσπερ καὶ τῶν ἄλλων μορίων· ἀλλ' ἐνίοις ὁψὲ παντελῶς γίνεται ἡ διαστροφή, ὅσοις τὸ ἀρρώστημα.

Διὰ τί πρὸς τὸν λύχνον καὶ πρὸς τὸν ἥλιον προστησάμενοι τὴν χεῖρα πρὸ τοῦ φωτὸς μᾶλλον ὀρῶμεν; ἢ ὅτι τὸ ἀπὸ τοῦ ἡλίου καὶ λύχνου φῶς προσπίπτον μὲν ἡμῶν πρὸς τὴν ὄψιν ἀσθενεστεράν ποιεῖ δι' ὑπερβολήν; φθείρει γὰρ αὐτὰ καὶ τὰ συγγενῇ τῇ ὑπερβολῇ. εἰρχθέντα δὲ ὑπὸ τῆς χειρὸς τὴν μὲν ὄψιν οὐ πημαίνει, τὸ δὲ ὀρώμενον ὁμοίως ἐστὶν ἐν φωτί. διὸ ἡ μὲν μᾶλλον δρᾷ, τὸ δὲ ὀρώμενον οὐδὲν ἥττον ὀρᾷται.

Διὰ τί χεῖρ μὲν καὶ ποὺς διαφορὰν ἔχει πρὸς τὰ δεξιὰ τὰ ἀριστερά, ὄμμα δὲ καὶ ἀκοὴ οὐ; ἢ ὅτι τὰ στοιχεῖα τὰ εἰλικρινῇ ἀδιάφορα, ἐν δὲ τοῖς ἐκ τῶν στοιχείων ἡ διαφορά; αὗται δὲ αἰ αἰσθήσεις εἰσὶν ἐξ εἰλικρινῶν, ἡ μὲν ὄψις πυρός, ἡ δ' ἀκοὴ ἀέρος.

ΛΒ. ΟΣΑ ΠΕΡΙ ΩΤΑ.

Διὰ τί τὰ ὦτα ὄντα ἀναιμότατα τοῦ προσώπου, ὅταν αἰσχύνωνται, ἐρυθριᾷ μάλιστα; πότερον ὅτι εἰς τὸ κενὸν μάλιστα πορεύεσθαι πέφυκε τὸ ἀλλότριον ὑγρὸν, ὥστε ὅταν διαλυθῇ ὑπὸ τῆς θερμότητος, ἢ γίνεται αἰσχυνομένοις, συνέρχεται εἰς ταῦτα; ἢ διότι ἐπὶ τοῖς κροτάφοις ἐπικέινται, [960b] εἰς οὓς τὸ ὑγρὸν ἀθροίζεται μάλιστα; αἰσχυνομένων δὲ εἰς τὸ πρόσωπον ἔρχεται ἡ ὑγρότης· διὸ καὶ ἐρυθριῶσιν. τοῦ δὲ προσώπου ἥκιστα βάθος ἔχει τὰ ὦτα· καὶ φύσει θερμότατα καὶ εὐχροα, ἐὰν μὴ ἀπηρητημένα πόρρωθεν ἢ τῷ ψύχει. διὸ καὶ εὐχρούστατον τῶν ἐν τῷ προσώπῳ μορίων. ὥστε ὅταν σκεδασθῇ ἡ θερμότης, μάλιστα ἐπιπολῆς οὖσα ἐν τούτοις ποιεῖ ἐρυθριᾶν.

Διὰ τί τὰ ὦτα ἐν τῇ θαλάττῃ ῥήγνυται τοῖς κολυμβῶσιν; πότερον διὰ τὸ κατέχειν τὸ πνεῦμα πληρούμενον βιάζεται; ἢ εἰ τοῦτ' αἴτιον, ἔδει καὶ ἐν τῷ ἀέρι. ἢ ὅτι μὴ ὑπεῖκον διακόπτεται θᾶπτον, καὶ ἀπὸ σκληροτέρου ἢ μαλακοῦ; τὸ οὖν πεφυσημένον ἤττον ὑπέικει. τὰ δὲ ὦτα, ὥσπερ εἴρηται, ὑπὸ τοῦ κατέχεσθαι τὸ πνεῦμα ἐμφυσᾶται, ὥστε τὸ ὕδωρ, σκληρότερον ὄν τοῦ ἀέρος, προσπίπτον διακόπτει.

Διὰ τί οἱ κολυμβηταὶ σπόγγους περὶ τὰ ὦτα καταδοῦνται; ἢ ἵνα ἡ θάλαττα βίᾳ ἰοῦσα μὴ ῥηγνύῃ τὰ ὦτα. οὕτω μὲν γὰρ οὐ γίνεται, ὥσπερ ἀφηρημένων, πλήρη.

Διὰ τί ὁ ἐν τοῖς ὠσὶ ῥύπος πικρός ἐστιν; ἢ διότι ἰδρώς ἐστι σαπρός; ἔστιν οὖν ἄλμυρὸν σαπρόν. τὸ δὲ σαπρὸν ἄλμυρὸν πικρόν.

Διὰ τί οἱ σπογγεῖς διατέμνονται τὰ ὦτα καὶ τοὺς μυκτῆρας; ἢ ὅπως εὐπνοῦστεροι ὦσι; ταύτῃ γὰρ ἐξιέναι δοκεῖ τὸ πνεῦμα. ἀνατέμνουσι δὲ καὶ τὸν τόπον καὶ πρὸς εὐπνοίαν· πονεῖν γὰρ δὴ φασι μᾶλλον αὐτοὺς ἐν τῇ δυσπνοίᾳ, τῷ μὴ δύνασθαι προΐεσθαι θύραζε· ὅταν δὲ ὥσπερ ἐξεράσωσι, κουφίζονται. ἄτοπον οὖν εἰ μὴ δύνανται τυγχάνειν ἀναπνοῆς καταψύξεως χάριν· ἀλλ' ἔοικε τοῦτο ἀναγκαιότερον εἶναι. ἢ εὐλόγως ὁ πόνος πλείων κατέχουσιν, ὀγκουμένων καὶ διατεινομένων; φαίνεται δὲ καὶ αὐτόματός τις εἶναι φορὰ τοῦ πνεύματος ἔξω· εἰ δὲ καὶ εἴσω, σκεπτέον. ἔοικε δέ· ὁμοίως γὰρ ἀναπνοὴν ποιοῦσι τοῖς κολυμβηταῖς λέβητα καταφέντες. οὐ πίμπλαται γὰρ οὗτος τοῦ ὕδατος, ἀλλὰ τηρεῖ τὸν ἀέρα. μετὰ βίας γὰρ ἢ κάθεσις. ὀρθὸν γὰρ ὅτιοῦν παρεγκλιθὲν εἰσρεῖ.

Διὰ τί ἔνιοι τὰ ὄτα σκαλεύοντες βήττουσιν; ἢ ὅτι ἐπὶ τοῦ αὐτοῦ πόρου τῷ πνεύμονι καὶ τῇ ἀρτηρίᾳ ἡ ἀκοή; σημεῖον δέ, ὅτι ἀναπηροῦνται καὶ γίνονται ἐνεοί. θερμαινομένου οὖν τῇ τρίψει συντήκεται ἐπὶ τὴν ἀρτηρίαν ἀπὸ τοῦ πόνου κάτωθεν ὑγρόν· ὃ ποιεῖ τὴν βῆχα.

Διὰ τί τὸ ἀριστερόν οὖς θάπτον συμφύεται ὡς ἐπὶ τὸ [961a] πολὺ, ὅταν τρυπηθῇ; διὸ καὶ αἱ γυναῖκες τὸ μὲν ἄρρεν τὸ δὲ θῆλυ καλοῦσι τῶν ὠτων. ἢ ὅτι τὰ ἀριστερὰ ὑγρὰ καὶ θερμὰ μᾶλλον, συμφύεται δὲ τὰ τοιαῦτα μάλιστα. διὸ καὶ ἐν φυτοῖς τοῖς χλωροῖς ἢ σύμφυσις· καὶ τὰ τῶν νέων δὲ ἔλκη μᾶλλον συμφύεται ἢ τὰ τῶν πρεσβυτέρων. σημεῖον δὲ ὅτι ὑγρὰ μᾶλλον καὶ ὅλως θηλυκώτερα τὰ ἀριστερά.

Διὰ τί τοῖς μὲν αἰσχυνομένοις ἄκρα τὰ ὄτα ἐπιφοινίσσεται, τοῖς δὲ ὀργιζομένοις οἱ ὀφθαλμοί; ἢ ὅτι ἡ μὲν αἰδῶς ἐν ὀφθαλμοῖς κατὰνυξις τις μετὰ φόβου, ὥστε εἰκότως ἀπολείπει τὸ θερμόν τοὺς ὀφθαλμούς· χωριζόμενον δὲ εἰς τὸν δεκτικώτατον φέρεται τόπον. τοιοῦτος δὲ ὁ ἐν τοῖς ἄκροις τῶν ὠτων· ὁ γὰρ ἄλλος ὀστώδης. ὀργιζομένοις δ' ἐπανέρχεται τὸ θερμόν. μάλιστα δὲ γίνεται φανερόν ἐν τοῖς ὀφθαλμοῖς διὰ τὴν χροάν οὖσαν λευκὴν.

Διὰ τί ὁ ἥχος ὁ ἐν τοῖς ὠσίν, ἐάν τις ψοφήσῃ, παύεται; ἢ ὅτι ὁ μείζων ψόφος τὸν ἐλάττω ἐκκρούεται;

Διὰ τί, ἐάν εἰς τὸ οὖς ὕδωρ ἐγχυθῇ, ἔλαιον προσεγγέονται, οὐ δυναμένου τοῦ ἐνόντος ὑγροῦ ἐξελθεῖν δι' ἄλλου ὑγροῦ; πότερον διὰ τὸ ἐπιπολῆς γίνεσθαι τὸ ἔλαιον τοῦ ὕδατος, καὶ διὰ γλίσχρότητα αὐτοῦ ἔχεσθαι τὸ ὕδωρ ἐξιόντος τοῦ ἐλαίου, ἵνα συνεξίῃ τὸ ὕδωρ; ἢ ἵνα ὀλισθηροῦ τοῦ ὠτὸς γενομένου ἐξέλθῃ τὸ ὕδωρ; τὸ γὰρ ἔλαιον λεῖον ὃν ποιεῖ ὀλισθαίνειν.

Διὰ τί ἦττον ὄτα ρήγνυται τοῖς κολυμβῶσιν, ἐὰν προσεγγέωσιν εἰς τὰ ὄτα ἔλαιον; ἢ τοῦ μὲν ρήγνυσθαι τὰ ὄτα εἴρηται πρότερον ἢ αἰτία, τὸ δὲ ἔλαιον ἐγχυθὲν εἰς τὰ ὄτα τὴν ὕστερον θάλατταν ἀπολισθαίνειν ποιεῖ, καθάπερ ἐπὶ τῶν ἔξω τοῦ σώματος συμβαίνει τοῖς ἀληλιμμένοις. ὀλισθαίνουσα δὲ πληγὴν οὐ ποιεῖ εἰς τὸ ἐντὸς τοῦ ὠτὸς, διόπερ οὐ ρήγνυσιν.

Διὰ τί τῶν ὠτων ἀναίμων ὄντων μάλιστα οἱ αἰσχυνόμενοι ἐρυθριῶσιν; ἢ ἕκαστον εἰς τὸ κενὸν ἐκάστου μάλιστα φέρεται; δοκεῖ δὲ τοῦ αἰσχυνομένου ἄνω θερμόν φέρεσθαι τὸ αἷμα. εἰς οὖν τὸ κενώτατον ἐρυθριᾷν ποιεῖ. τὸ δ' αὐτὸ τοῦτο καὶ ἐπὶ τῶν γνάθων. ἔτι

δὲ καὶ ὅτι λεπτότατον τὸ δέρμα τὸ περιτεταμένον, μάλιστα δὴ φαίνεται δι' αὐτά.

Διὰ τί οὐδεὶς χασμώμενος τὸ οὖς σκαλεύει; ἢ ὅτι ὅτε χασμᾶται, ἐμφυσᾶται καὶ ἡ μῆνιγξ, δι' ἧς ἀκούει; σημεῖον δέ· ἥκιστα γὰρ ἀκούουσι χασμώμενοι. τὸ γὰρ πνεῦμα, ὥσπερ καὶ κατὰ τὸ στόμα, καὶ εἰς τὰ ὦτα ἐντὸς πορευόμενον, ἐξωθεῖται [961b] τὸν ὑμένα καὶ κωλύει τὸν ψόφον εἰσιέναι. ἐὰν οὖν οὕτως ἔχοντος ἄνηται τῆς ἀκοῆς ὥς σκαλεύειν, μάλιστ' ἂν βλάβηεν· πρὸς ἀντιπίπτον γὰρ ἡ πληγὴ γίνεται, καὶ οὐ πρὸς ὑπεῖκον τὸ τοῦ πνεύματος. τὸ δὲ δέρμα καὶ τὴν μῆνιγγα ἀφεστάναι τῶν στερεῶν δῆλον. ὥστε πόνον μάλιστα οὕτω ποιεῖ, καὶ τραυματίζοι ἄν.

ΛΓ. ΟΣΑ ΠΕΡΙ ΜΥΚΤΗΡΑ.

Διὰ τί ὁ παρμὸς λυγμὸν μὲν παύει, ἐρυγμὸν δὲ οὐ παύει; ἢ διότι οὐ τοῦ αὐτοῦ τόπου τὸ πάθος ἐκάτερον, ἀλλ' ὁ μὲν ἐρυγμὸς κοιλίας, ὁ δὲ λυγμὸς τοῦ περὶ τὸν πνεύμονα κατάψυξις καὶ ἀπεψία πνεύματος καὶ ὑγροῦ; κοινωνοῦσι δὲ οἱ περὶ τὸν ἐγκέφαλον τόποι τῷ πνεύμονι, οἷον τοῖς ὠσίν. φανερόν δέ· ἅμα γὰρ ἐνεοὶ καὶ κωφοὶ γίνονται, καὶ αἱ νόσοι ἀντιπερίστανται αἱ τοῦ ὠτός εἰς τὰ τοῦ πνεύμονος πάθη. ἐνίοις δὲ σκαλεύουσι τὸ οὖς βήχες ἐγγίνονται. τὸ δὲ περὶ τὸν παρνύμενον τόπον εἶναι τῆς ῥίνος κοινωνίαν τῷ πνεύμονι δηλοῖ ἡ ἀναπνοὴ κοινὴ οὖσα. ὥστε πτάρνυται μὲν θερμαινομένου αὐτοῦ· τῷ δὲ συμπάσχειν ὁ κάτω τόπος, ἐν ᾧ ἐστὶν ὁ λυγμός. ἡ δὲ θερμασία πέττει. διὸ ὅξος τε παύει λυγμὸν καὶ ἡ ἀπνευστία, ἐὰν ἡρεμαία ᾖ ἡ λύγξ. ἐκθερμαίνει γὰρ τὸ πνεῦμα κατεχόμενον. ὥστε καὶ ἐν τῷ παρμῷ ἡ ἀντικατάσχεσις γενομένη τοῦ πνεύματος τοῦτο ποιεῖ, καὶ οἰκείως ἡ ἐκπνευσις γίνεται, καὶ ἐκ τοῦ ἄνω τόπου· ἀδύνατον γὰρ πτάρειν μὴ ἐκπνέοντα. ἡ οὖν ὁρμὴ ῥήγνυσι τὸ ἐγκατελιημμένον πνεῦμα, ὃ ποιεῖ τὸν λυγμὸν.

Διὰ τί, ἐάν τις μέλλων πτάρνυσθαι τρίψῃ τὸν ὀφθαλμόν, ἤττον πτάρνυται; ἢ διότι τὸ ποιοῦν τὸν παρμὸν θερμότης τίς ἐστίν, ἡ δὲ τριψὶς θερμότητα ποιεῖ, ἢ διὰ τὸ πλησίον εἶναι τῶν ὀφθαλμῶν τὸν τόπον ᾧ πτάρνυται, ἀφανίζει τὴν ἑτέραν, ὥσπερ τὸ ἔλαττον πῦρ ὑπὸ τοῦ πλείονος μαραινόμενον.

Διὰ τί δις πτάρνυται ὡς ἐπὶ τὸ πολὺ, καὶ οὐχ ἅπαξ ἢ πλεονάκις; ἢ διότι δύο εἰσὶ μυκτῆρες; καθ' ἕτερον οὖν διέσχισται τὸ φλέβιον, δι' οὗ πνεῦμα ῥεῖ.

Διὰ τί πρὸς τὸν ἥλιον βλέψαντες πτάρνυνται μᾶλλον; ἢ διότι κινεῖ θερμαίνων· καθάπερ οὖν πτεροῖς θιγγάνοντες. ἀμφοτέροι γὰρ τὸ αὐτὸ ποιοῦσιν· τῇ γὰρ κινήσει θερμαίνοντες ἐκ τοῦ ὑγροῦ θάττον πνεῦμα ποιοῦσιν. τούτου δὲ ἡ ἐξοδος παρμὸς.

[962a] Διὰ τί λύγγα παύει παρμὸς καὶ πνεύματος ἐπίσχεσις καὶ ὅξος; ἢ ὅτι ὁ μὲν παρμὸς, διότι ἀντιπερίστασις ἐστὶ τοῦ κάτω πνεύματος, ὥσπερ αἱ ἄνω φαρμακεῖαι πρὸς τὴν κάτω κοιλίαν; ἡ δὲ ἀπνευστία τὰς ἀσθενεῖς λύγγας, ὅτι ἡ μικρὰ ὁρμὴ τοῦ πνεύματος ἡ ἀνιοῦσα, ὥσπερ περὶ τὴν βήχα, ἐάν τις κατάσχῃ, παύεται, οὕτω καὶ ἐνταῦθα κατέσπασε καὶ κατέπνιξε καὶ συναπεβιάσατο. τὸ δὲ ὅξος

παύει, ὅτι τὸ περιστὸς ὑγρὸν καὶ κωλύον ἀπερυγεῖν ἐπνευμάτωσε τῇ θερμασίᾳ. ἔστι γὰρ ἐρυγμὸς μὲν, ὅταν πνευματωθῇ τὸ ἐν τῇ ἄνω κοιλίᾳ ὑγρὸν καὶ πεφθῇ, ἡ δὲ λύγξ, ὅταν ὑπὸ ὑγροῦ κατέχεται πνεῦμα περιττὸν περὶ τὸν πνευματικὸν τόπον. τοῦτο γὰρ ὁρμῶν καὶ μὴ δυνάμενον διακόψαι σπασμὸν ποιεῖ, ὁ δὲ σπασμὸς οὗτος καλεῖται λύγξ. καὶ διὰ τοῦτο ῥιγώσαντας λυγξ λαμβάνει, ὅτι τὸ ψῦχος τὸ ὑγρὸν ποιεῖ συστὰν ἐκ τοῦ πνεύματος ἔτι· περιλαμβανόμενον δὲ τὸ ἄλλο πηδᾷ· οὗ ἡ κίνησις λυγμός ἐστιν. Διὰ τί ἐνίοις ὕδωρ ψυχρὸν προσχέομεν [καὶ] πρὸς τὸ πρόσωπον, ἡνίκα αἷμα ῥεῖ ἐκ τῶν μυκτῆρων; ἡ ἀντιπερίσταται εἴσω τὸ θερμόν; ἂν οὖν ἐπιτολῆς τύχη αἷμα, ἐξυγραίνει μᾶλλον.

Διὰ τί τὸν μὲν παρμὸν θεὸν ἡγούμεθα εἶναι, τὴν δὲ βῆλχα ἢ τὴν κόρυζαν οὐ; ἢ διότι ἐκ τοῦ θειοτάτου τῶν περὶ ἡμᾶς τῆς κεφαλῆς, ὅθεν ὁ λογισμὸς ἐστι, γίνεται; ἢ ὅτι τὰ μὲν ἄλλα ἀπὸ νοσοῦντων γίνεται, τοῦτο δὲ οὐ;

Διὰ τί τρίψαντες τὸν ὀφθαλμὸν πανόμεθα τῶν παρμῶν; ἢ ὅτι ἀνάπνοια ταύτῃ γίνεται τῷ ὑγρῷ; δακρύει γὰρ ὁ ὀφθαλμὸς μετὰ τριψίν, ὁ δὲ παρμὸς διὰ πληθος ὑγρότητος. ἢ ὅτι τὸ ἔλαττον θερμὸν φθείρεται ὑπὸ τοῦ πλείονος, ὁ δὲ ὀφθαλμὸς τριφθεὶς πλείω λαμβάνει θερμότητα τῆς ἐν τῇ ῥινί. διὰ ταῦτα δὲ κἂν τις αὐτὴν τὴν ῥῖνα τρίψῃ, παύεται ὁ παρμὸς.

Διὰ τί τῶν μὲν ἄλλων πνευμάτων αἱ ἐξοδοὶ, οἷον φύσης καὶ ἐρυγμοῦ, οὐχ ἱεραὶ, ἡ δὲ τοῦ παρμοῦ ἱερά; πότερον ὅτι τριῶν τόπων ὄντων, κεφαλῆς καὶ θώρακος καὶ τῆς κάτω κοιλίας, ἡ κεφαλὴ θειότατον; ἔστι δὲ φῦσα μὲν ἀπὸ τῆς κάτω κοιλίας πνεῦμα, ἐρυγμὸς δὲ τῆς ἄνω, ὁ δὲ παρμὸς τῆς κεφαλῆς. διὰ τὸ ἱερώτατον οὖν εἶναι τὸν τόπον καὶ τὸ πνεῦμα τὸ ἐντεῦθεν ὡς ἱερὸν προσκυνοῦσιν. ἢ ὅτι ἅπαντα τὰ πνεύματα σημαίνει τοὺς εἰρημένους τόπους βέλτιον ἔχειν ὡς ἐπὶ τὸ πολὺ; μὴ διαχωρούντων γὰρ κουφίζει τὸ πνεῦμα διεξιόν, [962b] ὥστε καὶ ὁ παρμὸς τὸν περὶ τὴν κεφαλὴν τόπον, ὅτι ὑγιαίνει καὶ δύναται πέττειν. ὅταν γὰρ κρατήσῃ ἡ ἐν τῇ κεφαλῇ θερμότης τὴν ὑγρότητα, τὸ πνεῦμα τότε γίνεται παρμὸς. διὸ καὶ τοὺς ἐκθνήσκοντας κινουσι παρμικῶ, ὡς ἐὰν μὴ τούτῳ δύνωνται πάσχειν, ἀσώτους ὄντας. ὥστε ὡς σημεῖον ὑγείας τοῦ ἀρρώστου καὶ ἱερωτάτου τόπου προσκυνοῦσιν ὡς ἱερὸν, καὶ φήμην ἀγαθὴν ποιοῦνται.

Διὰ τί ἄνθρωπος πτάρνυται μάλιστα τῶν ἄλλων ζώων; πότερον

ὅτι τοὺς πόρους εὐρεῖς ἔχει, δι' ὧν τὸ πνεῦμα καὶ ἡ ῥύμη εἰσέρχεται; τούτοις γὰρ πληρουμένοις πνεύματος πάρνυνται. ὅτι δ' εὐρεῖς, σημεῖον ὅτι ἥκιστα ὀσφραντικὸν τῶν ζώων. ἀκριβέστεροι δὲ οἱ λεπτοὶ πόροι. εἰ οὖν εἰς μὲν τοὺς εὐρεῖς πλεῖον καὶ πλεονάκις εἰσέρχεται τὸ ὑγρὸν, οὗ πνευματουμένου ὁ παρμὸς γίνεται, τοιούτους δὲ μάλιστα τῶν ζώων οἱ ἄνθρωποι ἔχουσι, πλειστάκις ἂν πάρνυντο εἰκότως, ὅσοις ἐλάχιστοι οἱ μυκτῆρες, ὥστε τὸ θερμανθὲν ὑγρὸν ταχὺ ἐξίναί δύναται πνεῦμα γενόμενον· ἐν δὲ τοῖς ἄλλοις διὰ μῆκος καταψύχεται πρότερον.

Διὰ τί οἱ μὲν ἀπὸ μέσων νυκτῶν ἄχρι μέσης ἡμέρας οὐκ ἀγαθοὶ παρμοί, οἱ δὲ ἀπὸ μέσης ἡμέρας ἄχρι μέσων νυκτῶν; ἢ ὅτι ὁ μὲν παρμὸς μᾶλλον δοκεῖ ἐπισχεῖν τοὺς ἀρχομένους καὶ ἐν τῇ ἀρχῇ; διὸ ὅταν μέλλωσιν ἀρχομένοις συμβῆναι, μάλιστα ἀποτρεπόμεθα τοῦ πράττειν. ἢ μὲν οὖν ἡὼς καὶ τὸ ἀπὸ μέσων νυκτῶν οἶον ἀρχή τις· διὸ εὐλαβούμεθα πᾶρειν, μὴ κωλύσωμεν ὠρμημένον. πρὸς δείλης δὲ καὶ ἐπὶ μέσας νύκτας οἶον τελευτή τις καὶ ἐναντίον ἐκείνῳ, ὥστε ἐν τῷ ἐναντίῳ ταῦτόν αἰρετέον.

Διὰ τί οἱ πρεσβῦται χαλεπῶς πάρνυνται; πότερον οἱ πόροι συμπεπτώκασιν δι' ὧν τὸ πνεῦμα; ἢ ὅτι αἶρειν τὰ ἄνω οὐκέτι δυνάμενοι ῥαδίως, εἴτα βία ἀφιάσι κάτω;

Διὰ τί, ἐάν τις ἀπνευστιάζη, ἡ λυγξ παύεται; ἢ διότι ἡ μὲν ὑπὸ καταψύξεως γίνεται (διὸ καὶ οἱ φοβούμενοι καὶ οἱ ῥιγοῦντες λύζουσιν), κατεχόμενον δὲ τὸ πνεῦμα ἐκθερμαίνει τὸν ἐντὸς τόπον;

Διὰ τί οἱ κωφοὶ ἐκ τῶν μυκτῆρων διαλέγονται ὡς ἐπὶ τὸ πολὺ; ἢ ὅτι ὁ πνεύμων ἐστὶ τούτοις πεπονηκώς; τοῦτο γὰρ ἐστὶν ἡ κωφότης, πλήρωσις τοῦ τόπου τοῦ πνευμονικοῦ. οὐκ οὐν ῥαδίως ἡ φωνὴ φέρεται, ἀλλ' ὥσπερ τὸ πνεῦμα τῶν πνευστιῶντων ἢ ἀσθμαίνόντων δι' ἀδυναμίαν ἀθρόον, οὕτως ἐκείνοις ἡ φωνή. βιάζεται οὖν καὶ διὰ τῶν μυκτῆρων. βιαζομένη [963a] δὲ τῇ τρίψει ποιεῖ τὸν ἥχον. ἔστι γὰρ ἡ διὰ τῶν ῥινῶν διάλεκτος γινομένη, ὅταν τὸ ἄνω τῆς ῥινὸς εἰς τὸν οὐρανόν, ἢ συντέτρηται, κοῖλον γένηται· ὥσπερ κώδων γὰρ ὑπηγεῖ, τοῦ κάτωθεν στενοῦ ὄντος.

Διὰ τί μόνον ὁ παρμὸς ἡμῖν καθεύδουσιν οὐ γίνεται, ἀλλ' ὡς εἰπεῖν ἅπαντα ἐγρηγορόσιν; ἢ ὅτι ὁ μὲν παρμὸς γίνεται καὶ ὑπὸ θερμοῦ τινὸς κινήσαντος τὸν τόπον τοῦτον ἀφ' οὗ γίνεται· διὸ καὶ ἀνακύπτομεν πρὸς τὸν ἥλιον, ὅταν βουλώμεθα πᾶρειν· ὅτι καθευδόντων ἡμῶν ἀντιπερίσταται τὸ θερμὸν ἐντός. διὸ καὶ γίνεται

τὰ κάτω θερμὰ τῶν καθευδόντων, καὶ τὸ πνεῦμα τὸ πολὺ αἰτίον ἐστὶ τοῦ ἐξονειρώττειν ἡμᾶς. εἰκότως οὖν οὐ πταρνύμεθα· ἀπαλλαγέντος γὰρ τοῦ θερμοῦ τοῦ ἐκ τῆς κεφαλῆς, ὃ κινεῖν πέφυκε τὸ ἐνταῦθα ὑγρόν, οὗ ἐξαερουμένου γίνεται ὁ πταρμός, καὶ τὸ συμβαῖνον πάθος εἰκὸς μὴ γίνεσθαι. ἀποψοφοῦσι δὲ μᾶλλον ἢ πτάρνυνται, καὶ ἐρεύγονται καθεύδοντες ἢ ἐγρηγορότες, ὅτι ἐκθερμαινομένου τοῦ περὶ τὴν κοιλίαν τόπου ἐν τοῖς ὕπνοις μᾶλλον ἐκπνευματουῖσθαι συμβαίνει τὰ περὶ αὐτὴν ὑγρά, πνευματούμενα δὲ εἰς τοὺς ἔγγιστα τόπους φέρεσθαι. ἐνταῦθα γὰρ καὶ συναπωθεῖται ὑπὸ τοῦ ἐν τῷ ὕπνῳ γινομένου πνεύματος. καθεκτικώτερος γὰρ ἐστὶν ἢ προεκτικώτερος ὁ καθεύδων τοῦ πνεύματος, διὸ καὶ συστέλλει τὸ θερμὸν ἐντός. ὁ δὲ κατέχων τὸ πνεῦμα ὠθεῖ κάτω αὐτό· παρὰ φύσιν γὰρ ἐστὶ τῷ πνεύματι ἢ κάτω φορὰ, διὸ καὶ χαλεπὸν ἐστὶ κατέχειν τὸ πνεῦμα. τὸ δ' αὐτὸ αἰτίον καὶ τοῦ καθεύδειν ἡμῖν ἐστίν. οὕσης γὰρ τῆς ἐγρηγόρσεως κινήσεως, ταύτης δ' ἐν τοῖς αἰσθητηρίοις ἡμῶν γινομένης μάλιστα ἐν τῷ ἐγρηγορέναι ἡμᾶς, δῆλον ὡς καὶ ἡρεμούντων ἡμῶν καθεύδοιμεν ἄν. ἐπεὶ δὲ τὸ μὲν πῦρ κινητικόν ἐστὶ τῶν ἐν ἡμῖν μορίων, τοῦτο δ' ἐν τῷ ὕπνῳ ἐντός περιίσταται, λιπὼν τὸν περὶ τὴν κεφαλὴν τόπον οὗ ἐστὶ τὸ αἰσθητήριον, ἡρεμοίῃ ἄν μάλιστα ἡμῶν τότε τὰ αἰσθητήρια· ὃ εἴη ἄν αἰτίον τοῦ καθεύδειν.

Διὰ τί πτάραντες καὶ οὐρήσαντες φρίττουσιν; ἢ ὅτι κενοῦνται αἱ φλέβες ἀμφοτέροις τούτοις τοῦ πρότερον ἐνυπάρχοντος ἀέρος θερμοῦ, κενωθέντων δὲ ἄλλος ἀῆρ ἐξωθεν εἰσέρχεται ψυχρότερος τοῦ προυπάρχοντος ἐν ταῖς φλεψίν· τοιοῦτος δ' εἰσιὼν ποιεῖ φρίττειν.

Διὰ τί τοὺς λυγμοὺς οἱ πταρμοὶ παύουσιν; ἢ ὅτι ὁ λυγμὸς οὐχ ὥσπερ οἱ ἐρυγμοὶ ἀπὸ τῆς τὰ σιτία δεχομένης κοιλίας ἐστὶν ἀλλ' ἀπὸ τοῦ πνεύματος, συμβαίνει δὲ μάλιστα [963b] ἀπὸ καταψύξεως ἐκ ῥίγους καὶ λύπης καὶ φαρμακείας τῆς ἄνω μάλιστα γίνεσθαι. θερμὸς γὰρ ὢν φύσει ὁ τόπος, ὅταν καταψυχθῇ, οὐ προσίεται τὸ πνεῦμα πᾶν, ἀλλ' ὥσπερ πομόφλυγας ποιεῖ· διὸ καὶ τὸ πνεῦμα κατασχοῦσι παύεται (ἐκθερμαίνεται γὰρ ὁ τόπος), καὶ τὸ ὄξος, θερμαντικὸν ὄν, προσφερόμενον. τοῦ δὴ θερμοῦ συμβαίνοντος ἀπὸ θερμασίας καὶ τοῦ ἐγκεφάλου, τῶν ἄνω τόπων εἰς τὸν πνεύμονα συντετρημένων, θερμοῦ τοῦ πνεύμονος ὄντος, ἢ τε πρὸ τοῦ πταρμοῦ κατοχὴ καὶ ἢ ἄνωθεν κατάκρουσις λύει τὸ πάθος.

Διὰ τί οἱ οὐλότριχες, καὶ οἷς ἐπέστραπται τὸ τρίχιον, ὡς ἐπὶ τὸ πολὺ σιμότεροι; ἢ εἵπερ ἡ οὐλότης ἐν παχύτῃ, ἢ δὲ παχύτης μετὰ

σκληρότης, σκληρὸν δ' ὄν τὸ αἷμα θερμόν, ἡ δὲ θερμότης οὐ ποιεῖ
περίπτωσιν, τὸ δὲ ὀστοῦν ἐκ περιπτώματος, ὁ δὲ χόνδρος ὀστοῦν,
εὐλόγως ἂν ἔκλειψις εἴη τοῦ μορίου; σημεῖον δὲ τὸ τὰ παιδιά πάντα
εἶναι σιμά.

ΛΔ. ΟΣΑ ΠΕΡΙ ΤΟ ΣΤΟΜΑ ΚΑΙ ΤΑ ΕΝ ΑΥΤΩ.

Διὰ τί οἱ μανοὺς ἔχοντες τοὺς ὀδόντας οὐ μακρόβιοι; ἢ ὅτι τὰ μακρόβια πλείους ἔχουσιν, οἷον τὰ ἄρσενά τῶν θηλειῶν, ἄνδρες γυναικῶν, πρόβατα προβάτων. οἱ οὖν ἀραιώδοντες ὥσπερ ἂν ἐλάττονας ἔχουσιν ὀδόντας ἐοίκασιν.

Διὰ τί οἱ ὀδόντες ἰσχυρότεροι τῶν σαρκῶν ὄντες ὁμως τοῦ ψυχροῦ αἰσθάνονται μᾶλλον; ἢ ὅτι ἐπὶ τοὺς πόρους προσπεφύκασιν, ἐν οἷς ὀλίγον ὂν τὸ θερμὸν ταχὺ ὑπὸ τοῦ ψυχροῦ κρατούμενον ποιεῖ τὴν ἀληθόνα;

Διὰ τί τοῦ ψυχροῦ μᾶλλον αἰσθάνονται οἱ ὀδόντες ἢ τοῦ θερμοῦ, ἡ δὲ σὰρξ τοὺναντίον; πότερον ὅτι ἡ μὲν σὰρξ τοῦ μέσου καὶ εὐκρατος, οἱ δὲ ὀδόντες ψυχροί, ὥστε τοῦ ἐναντίου μᾶλλον αἰσθητικοί; ἢ διότι λεπτῶν πόρων εἰσίν, ἐν οἷς μικρὸν τὸ θερμόν, ὥστε ταχὺ πάσχουσιν ὑπὸ τοῦ ἐναντίου; ἡ δὲ σὰρξ θερμόν, ὥστε οὐδὲν πάσχει ὑπὸ τοῦ ψυχροῦ, τοῦ δὲ θερμοῦ ταχὺ αἰσθάνεται ὥσπερ γὰρ πῦρ ἐπὶ πυρὶ γίνεται.

Διὰ τί ἡ γλῶττα σημαντικὸν πολλῶν; καὶ γὰρ τῶν πυρετῶν ἐν τοῖς ὀξέσι νοσήμασι, καὶ ἐὰν χάλασαι ἐνῶσιν· καὶ τῶν ποικίλων προβάτων ποικίλαι. ἢ ὅτι ὑγρότητος δεκτικόν, καὶ ἐπὶ τῷ πνεύμονι ἐπίκειται, οὗ ἡ ἀρχὴ ἐπὶ τῶν πυρετῶν. πολύχροα δὲ πάντα διὰ τὴν πολύχροιαν τῶν ὑγρῶν· βάπτεται δὲ πρῶτον δι' οὗ πρῶτον ἡθεῖται· ἡ δὲ γλῶττα τοιοῦτον. αἱ τε χάλασαι διὰ τὸ σομφὴν εἶναι συλλέγονται· ἔστι γὰρ ἡ χάλασα οἷονεῖ ἰονθος ἄπεπτος ἐν τοῖς ἐντός.

[964a] Διὰ τί ἡ γλῶττα γλυκεῖα μὲν οὐ γίνεται, πικρὰ δὲ καὶ ἀλμυρὰ καὶ ὀξεῖα; ἢ ὅτι διαφθοραὶ ταῦτ' ἐστί, τῆς δὲ φύσεως οὐκ αἰσθάνεται;

Διὰ τί, ὅσας ἂν χροὰς ἔχη τὸ δέρμα, τοσαύτας ἔχει καὶ ἡ γλῶττα; πότερον ὅτι ἐν μέρος ἐστὶν ὥσπερ ἄλλο τι τῶν ἔξωθεν, ἀλλ' ἐντὸς περιεῖληπται; διὰ δὲ τὸ λεπτὸν εἶναι ταύτῃ τὸ δέρμα καὶ ἡ μικρὰ ποικιλία ἐμφαίνεται. ἢ διότι τὸ ὕδωρ ἐστὶν ὃ ποιεῖ μεταβάλλειν τὰς χροὰς; ἡ δὲ γλῶττα μάλιστα πάσχει ὑπὸ τοῦ πόματος.

Διὰ τί ἐκ τοῦ στόματος καὶ θερμὸν καὶ ψυχρὸν πνέουσιν; φυσῶσι μὲν γὰρ ψυχρόν, ἀάζουσι δὲ θερμόν. σημεῖον δὲ ὅτι θερμαίνει, ἐὰν πλησίον προσάγῃ τις τὴν χεῖρα τοῦ στόματος. ἢ ἀμφοτέρως ὁ ἀήρ κινούμενος ψυχρός· ὁ δὲ φυσῶν κινεῖ τὸν ἀέρα

οὐκ ἀθρόως, ἀλλὰ διὰ στενοῦ τοῦ στόματος· ὀλίγον οὖν ἐκπνέων πολλὸν κινεῖ τὸν θύραθεν, ἐν ᾧ τὸ θερμὸν ὃν τὸ ἐκ τοῦ στόματος οὐ φαίνεται δι' ὀλιγότητα. ὁ δὲ ἀάζων ἀθρόον ἐκπνεῖ· διὸ θερμόν. ἔστι γὰρ φυσασμοῦ τῷ διαφέρειν τῇ συστροφῇ· ὁ δ' ἀασμὸς ἀθρόου ἔκπνευσις.

Διὰ τί, ἐὰν σφόδρα καὶ ἀθρόον ἐκπνεύσωσιν, ἀδυνατοῦσι πάλιν ἐκπνεῦσαι; ὁμοίως δὲ ἔχει καὶ ἐπὶ τοῦ ἀναπνεῦσαι· ἀδυνατοῦσι γὰρ δις ἐφεξῆς ποιεῖν αὐτό. ἢ ὅτι τὸ μὲν δίδωσις τίς ἐστι, τὸ δὲ συναγωγή τόπου· ἃ ἄχρι τινός ἐστι δυνατόν γίνεσθαι. φανερόν οὖν ὅτι ἐναλλαξὶ ἀνάγκη ἅμφω γίνεσθαι, καὶ ἀδύνατον δις ἐφεξῆς.

Διὰ τί ἐτέρου τόπου ὄντος ἢ τὰ σῖτα καὶ τὸ ποτὸν διεξέρχεται καὶ ἢ ἀναπνέομεν, ἐὰν μείζω ψωμὸν καταπίωμεν, πνιγόμεθα; οὐδὲν δὴ ἄτοπον· οὐ γὰρ μόνον ἐάν τι ἐμπέσῃ εἰς τὸν τόπον τοῦτον, ἀλλὰ καὶ ἔτι φραχθῇ, οὕτω μᾶλλον πνιγόμεθα. ταῦτα δὲ παράλληλά ἐστι, καθ' ὃ τε τὰ σιτία δεχόμεθα καὶ καθ' ὃ ἀναπνέομεν. ὅταν οὖν ἐμπέσῃ μείζων ψωμός, καὶ ἡ ἀναπνοὴ συμφράττει, ὥστε μὴ εἶναι τῷ πνεύματι ἔξοδον.

Διὰ τί, ὅσοι τὴν διὰ χειρὸς τομὴν ἔχουσι δι' ὅλης, μακροβιώτατοι; ἢ διότι τὰ ἀναρθρα βραχύβια καὶ ἀσθενῆ; σημεῖον δὲ τῆς μὲν ἀσθενείας τὰ νέα, τῆς δὲ βραχυβιότητος τὰ ἔνυγρᾱ. δηλὸν ἄρα ὅτι τὰ ἡρθρωμένα τούναντίον. τοιαῦτα δέ, ὧν καὶ τὰ φύσει ἀναρθρα μάλιστα ἡρθρωται. τῆς δὲ χειρὸς τὸ ἔσω ἀναρθρότατον.

Διὰ τί ἐν τῷ μακρὸν ἀναπνεῖν ἐλκόντων μὲν εἴσω τὸ [964b] πνεῦμα συμπίπτει ἢ κοιλία, ἐκπνεόντων δὲ πληροῦται; πιθανὸν δ' ἐστὶ τούναντίον συμβαίνειν. ἢ ὅτι τῶν μὲν ἀναπνεόντων συμπιεζομένη ταῖς πλευραῖς κάτω, καθάπερ αἱ φῦσαι, προσογκεῖν φαίνεται;

Διὰ τί ἀναπνέομεν; ἢ καθάπερ τὸ ὕγρον εἰς πνεῦμα διαλύεται, οὕτω καὶ τὸ πνεῦμα εἰς τὸ πῦρ; τὸ τῆς φύσεως οὖν θερμὸν ὅταν τὸ πολὺ τοῦ πνεύματος πῦρ ποιήσῃ, ἀλγηδόνα ἐμποιεῖ, τοῖς δὲ πόροις καὶ ὄγκον· διόπερ ἐξωθοῦμεν τὸ πῦρ μετὰ τοῦ πνεύματος. ὅταν δὲ ἐξέλθῃ τὸ πνεῦμα καὶ τὸ πῦρ, συμπιπτόντων τῶν πόρων καὶ καταψυχομένων ἀλγηδόνες γίνονται· ἔλκομεν οὖν τὸ πνεῦμα πάλιν. εἴτα ἀνοίξαντες τοῦ σώματος τοὺς πόρους καὶ βοηθήσαντες, πάλιν γίνεται τὸ πῦρ, καὶ πάλιν ἀλγοῦντες ἐκπέμπομεν, καὶ διὰ τέλους τοῦτο πράττομεν, καθάπερ καὶ σκαρδαμύσσομεν κατὰ τὸ καταψύχεσθαι τὸ περὶ τὸν ὀφθαλμὸν σῶμα καὶ ξηραίνεσθαι. καὶ

βαδίζομεν οὖν προσέχοντες τῇ βαδίσει τὸν νοῦν, κυβερνωμένης δὲ
τῆς διανοίας αὐτοῖς τοῦτον οὖν τὸν τρόπον καὶ τὰ περὶ τὴν
ἀναπνοὴν ποιοῦμεν· μηχανώμενοι γὰρ τὸν ἀέρα ἔλκειν ἀναπνέομεν,
καὶ πάλιν ἔλκομεν.

ΛΕ. ΟΣΑ ΠΕΡΙ ΤΑ ΥΠΟ ΤΗΝ ΑΦΗΝ.

Διὰ τί μᾶλλον φρίττομεν ἐτέρου θιγόντος πως ἢ αὐτοὶ ἡμῶν; ἢ ὅτι αἰσθητικωτέρα ἡ ἀφή τοῦ ἄλλοτρίου ἢ ἡ τοῦ οἰκείου; τὸ γὰρ συμφυρὲς ἀναίσθητον. καὶ φοβερώτερον τὸ λάθρα καὶ ἐξαπιναιῶς γινόμενον, ὃ δὲ φόβος κατάψυξις· ἡ δὲ ἄλλοτρία ἀφή πρὸς τὴν οἰκείαν ἄμφω ταῦτα ἔχει καὶ ὅλως δὲ παθητικὸν ἕκαστον πέφυκεν ἢ μᾶλλον ἢ μόνον ὑπ' ἄλλου ἢ ὑφ' αὐτοῦ, οἷον καὶ ἐπὶ τοῦ γαργαλίζεσθαι συμβαίνει.

Διὰ τί γαργαλίζονται τὰς μασχάλας καὶ τὰ ἐντὸς τῶν ποδῶν; ἢ διὰ τὴν λεπτότητα τοῦ δέρματος; καὶ ὧν ἀσυνήθης ἡ ἀφή, οἷον τούτων καὶ τοῦ ὠτός;

Διὰ τί φρίττουσιν οὐκ ἐπὶ τοῖς αὐτοῖς πάντες; ἢ ὅτι οὐδ' ἐπὶ τοῖς αὐτοῖς πάντες ἡδόμεθα, ὥσπερ οὐδὲ λυπούμεθα ἐπὶ τοῖς αὐτοῖς πάντες; ὁμοίως δὴ οὐ φρίττομεν ἐπὶ τοῖς αὐτοῖς· ἔστι γὰρ ἡ αὐτὴ κατάψυξις τις. διὸ οἱ μὲν τοῦ ἱματίου δακνομένου φρίττουσιν, οἱ δὲ πρίονος ἀκονομένου ἢ ἐλκομένου, οἱ δὲ κισήρεως τεμνομένης, οἱ δὲ ὄνου λίθον ἀλοῦντος.

Διὰ τί τοῦ μὲν θέρους ὄντος θερμοῦ, τοῦ δὲ χειμῶνος ψυχροῦ, [965a] τὰ σώματα θιγγανόντων ψυχρινότερά ἐστι τοῦ θέρους ἢ τοῦ χειμῶνος; πότερον ὅτι ὁ ἰδρῶς καὶ ἡ ἰδισις καταψύχει τὰ σώματα, τοῦτο δ' ἐν μὲν τῷ θέρει γίνεται, ἐν δὲ τῷ χειμῶνι οὐ. ἢ ὅτι ἀντιπεριίσταται ἐναντίως τὸ ψυχρὸν καὶ τὸ θερμὸν τῇ ὥρᾳ, καὶ ἔσω φεύγει ἐν τῷ θέρει, διὸ καὶ ἰδρῶτα ἀνίησιν· ἐν δὲ τῷ χειμῶνι ἀποστέγει τὸ ψῦχος καὶ ἀτμίζει τὸ σῶμα ὥσπερ ἡ γῆ;

Διὰ τί φρίττουσιν αἱ τρίχες ἐν τῷ δέρματι; ἢ ὅταν σπάσωσι τὸ δέρμα, εἰκότως ἐξανέστησαν; συσπῶσι δὲ καὶ ὑπὸ ρίγους καὶ ὑπ' ἄλλων παθῶν.

Διὰ τί αὐτὸς αὐτὸν οὐθεις γαργαλίζει; ἢ ὅτι καὶ ὑπ' ἄλλου ἥττον, ἐὰν προαίσθηται, μᾶλλον δ', ἂν μὴ ὀρᾷ; ὥσθ' ἡκιστα γαργαλισθῆσεται, ὅταν μὴ λανθάνῃ τοῦτο πάσχων. ἔστι δὲ ὁ γέλως παρακοπή τις καὶ ἀπάτη. διὸ καὶ τυπτόμενοι εἰς τὰς φρένας γελῶσιν· οὐ γὰρ ὁ τυχὼν τόπος ἐστὶν ᾧ γελῶσιν. τὸ δὲ λαθραῖον ἀπατητικόν. διὰ τοῦτο καὶ γίνεται ὁ γέλως καὶ οὐ γίνεται ὑπ' αὐτοῦ.

Διὰ τί ποτε τὰ χεῖλη μάλιστα γαργαλιζόμεθα; ἢ διότι δεῖ τὸ γαργαλιζόμενον μὴ πρόσω τοῦ αἰσθητικοῦ εἶναι; ἔστι δὲ τὰ χεῖλη

περὶ τὸν τόπον τοῦτον μάλιστα. διὰ τοῦτο δὲ γαργαλίζεται τὰ χεῖλη τῶν περὶ τὴν κεφαλὴν τόπων, ἃ ἐστὶν εὐσαρκα. εὐκινητότατα οὖν μάλιστα ἐστὶν.

Διὰ τί, ἐὰν τις τὸν περὶ τὰς μασχάλας τόπον κνήσῃ, ἐκγελῶσιν, ἐὰν δέ τινα ἄλλον, οὐ; ἢ διὰ τί πτερῶ τὰς ῥίνας κνήσαντες πτάρνυνται; ἢ τόποι εἰσὶ τῶν φλεβίων, ὧν καταψυχομένων ἢ τοῦναντίον πασχόντων ὑγραίνονται; ἢ εἰς πνεῦμα ἐκ τοῦ ὑγροῦ διαλύεται; ὥσπερ ἐὰν τὰς ἐπὶ τοῦ τραχήλου πίεσῃ τις φλέβας, καθεύδουσιν. ἢ μὲν ἡδονὴ θερμασία τίς ἐστὶν· τοῦτο δέ, ὅταν πλεόν τὸ πνεῦμα ἐγγένηται, ἀθρόον ἔξω ἀφίεμεν. ὡσαύτως καὶ ἐπὶ πταρμῶ τῷ πτερῶ διαθερμάναντες καὶ κινήσαντες διελύσαμεν εἰς πνεῦμα· πλεόνος δὲ γενομένου ἐξέώσαμεν.

Διὰ τί μετὰ τὰ σιτία φρίττομεν πολλάκις; ἢ ὅτι ψυχρὰ εἰσπορευόμενα ἀπὸ πρώτης κρατεῖ μᾶλλον τοῦ φυσικοῦ θερμοῦ ἢ κρατεῖται;

Διὰ τί τὸ περιαγόμενον ἐναλλάξ τοῖς δακτύλοις δύο φαίνεται; ἢ διότι δυσὶν αἰσθητηρίοις ἀπτόμεθα; τοῖς γὰρ ἐντὸς τῶν δακτύλων, κατὰ φύσιν ἔχοντες τὴν χεῖρα, ἀμφοτέροις οὐ δυνατόν εἰπεῖν.

ΛΣ. ΟΣΑ ΠΕΡΙ ΠΡΟΣΩΠΟΝ.

[965b] Διὰ τί τοῦ προσώπου τὰς εἰκόνας ποιοῦνται; πότερον ὅτι τοῦτο δηλοῖ ποιοί τινες; ἢ ὅτι μάλιστα γινώσκεται;

Διὰ τί τὸ πρόσωπον ιδίουσι μάλιστα, ἀσαρκότατον ὄν; ἢ διότι εὐΐδρωτα μὲν ὅσα ὕφυγρα καὶ ἀραιά, ἡ δὲ κεφαλὴ τοιαύτη; ὑγρότητα γὰρ οἰκείαν ἔχει πλείστην. δηλοῦσι δ' αἱ φλέβες τείνουσαι ἐντεῦθεν, καὶ οἱ κατάρροι γινόμενοι ἐξ αὐτῆς, καὶ ὁ ἐγκέφαλος ὑγρός, καὶ οἱ πόροι πολλοί· σημεῖον δ' αἱ τρίχες, ὅτι πολλοὶ πόροι εἰσὶ περαίνοντες ἔξω. οὐκ οὖν ἐκ τῶν κάτω ὁ ἰδρώς, ἀλλ' ἐκ τῆς κεφαλῆς γίνεται. διὸ ιδίουσι καὶ πρῶτον μάλιστα τὸ μέτωπον· ὑπόκειται γὰρ τὸ πρῶτον. τὸ δ' ὑγρὸν κάτω ῥεῖ, ἀλλ' οὐκ ἄνω.

Διὰ τί ἐν τῷ προσώπῳ μάλιστα οἱ ἰονθοὶ; ἢ διότι μανὸς ὁ τόπος καὶ ὑγρότητα ἔχει; σημεῖον δὲ ἢ τε τῶν τριχῶν ἔκφυσις καὶ ἡ τῶν αἰσθήσεων δύναμις· ὁ δὲ ἰονθος ὥσπερ ἐξάνθημα ὑγρότητός τινος ἀπέπτου.

ΛΖ. ΟΣΑ ΠΕΡΙ ΟΛΟΝ ΤΟ ΣΩΜΑ.

Διὰ τί ἀεὶ τοῦ σώματος ῥέοντος, καὶ τῆς ἀπορροῆς γινομένης ἐκ τῶν περιττωμάτων, οὐ κουφίζεται τὸ σῶμα, ἐὰν μὴ ἰδίῃ; ἢ διότι ἐλάττων ἢ ἔκκρισις γίνεται; ὅταν γὰρ ἐξ ὑγροῦ μεταβάλλῃ εἰς ἄερα, πλεον γίνεται ἐξ ἐλάττονος· τὸ γὰρ διακρινόμενον πλεον, ὥστε ἐν πλείονι χρόνῳ ἢ ἔκκρισις.

Διὰ τί δὲ τοῦτο; ἢ διότι δι' ἐλαττόνων πόρων ἢ ἐξοδός ἐστιν; τὸ γὰρ γλίσχρον καὶ τὸ κολλῶδες μετὰ μὲν τοῦ ὑγροῦ ἐκκρίνεται διὰ τὴν κατάμιξιν, μετὰ δὲ τοῦ πνεύματος ἀδυνατεῖ. μάλιστα δὲ τοῦτ' ἐστὶ τὸ λυποῦν. διὸ καὶ οἱ ἔμετοι τῶν ἰδρώτων κουφίζουσι μᾶλλον, ὅτι συνεξάγουσι τοῦτο, ἅτε παχύτεροι καὶ σωματωδέστεροι ὄντες. ἢ καὶ ὅτι τῇ μὲν σαρκὶ πόρρω οὗτος ὁ τόπος, ἐν ᾧ τὸ γλίσχρον καὶ κολλῶδες, ὥστε ἔργον μεταστῆσαι, τῇ δὲ κοιλίᾳ ἐγγύς; ἢ γὰρ ἐν ταύτῃ γίνεται ἡ πλησίον· διὸ καὶ δυσσεξάγωγος ἄλλως.

Διὰ τί αἱ τρίψεις σαρκουσιν; ἢ ὅτι αὐξητικώτατον τῶν ἐν τῷ σώματι τὸ θερμόν ἐστιν; τοῦ μὲν γὰρ ἐνυπάρχοντος μείζους οἱ ὄγκοι γίνονται διὰ τὸ ἀεὶ αὐτὸ ἐν κινήσει εἶναι καὶ εἰς τὸ ἄνω φέρεσθαι καὶ πνευματοῦν τὰ ἐν [966a] ἡμῖν ὑγρά, ὃ ἐν τῇ τρίψει γίνεται· ἐκλείποντος δὲ φθίνει καὶ ἐλαττοῦται τὸ σῶμα. ἢ ὅτι ὀγκότερα τῆς τροφῆς γίνεται ἡ σὰρξ διὰ τὴν θερμασίαν; ἅπαν γὰρ τὸ θερμόν ἐπισπαστικὸν τοῦ ὑγροῦ ἐστίν, ἢ δ' εἰς τὴν σάρκα διαδιδομένη τροφή ὑγρά ἐστὶ, καὶ ἐπιδέχεται τὴν τροφήν μᾶλλον διὰ τὴν ἀραιώσιν· ἀραιότερα γὰρ γινομένη μᾶλλον δύναται δέχεσθαι ὥσπερ σπογγία. ἢ δὲ τρῖψις εὐπνουν καὶ ἀραιὰν ποιεῖ τὴν σάρκα, καὶ κωλύει συστάσεις γίνεσθαι κατὰ τὸ σῶμα. τούτου δὲ μὴ ὄντος οὐδὲ συντήξεις γίνονται· αἱ γὰρ ἀτροφίαι καὶ αἱ συντήξεις ἐκ τῶν ἀθροισθέντων εἰσίν. εὐπνούστερα δὲ καὶ ἀραιότερα καὶ ὁμαλέστερα γινόμενα εἰκὸς μᾶλλον ὀγκοῦσθαι. τῆς τε γὰρ τροφῆς δεκτικώτερα καὶ τῶν ἐκκρίσεων προετικώτερα γίνεται, ὅτι οὐ δεῖ πυκνοῦν τὴν σάρκα πρὸς ὑγίειαν, ἀλλ' ἀραιοῦν· ὥσπερ γὰρ πόλις ὑγιεινὴ ἐστὶ καὶ τόπος εὐπνους (διὸ καὶ ἡ θάλαττα ὑγιεινὴ), οὕτω καὶ σῶμα τὸ εὐπνουν μᾶλλον ὑγιεινόν ἐστὶ τοῦ ἐναντίως ἔχοντος. δεῖ γὰρ ἢ μὴ ὑπάρχειν μηδέν, ἢ τούτου ὡς τάχιστα ἀπαλλάττεσθαι· καὶ δεῖ οὕτως ἔχειν τὸ σῶμα ὥστε λαμβάνον εὐθὺς ἐκκρίνειν τὴν περίττωσιν, καὶ εἶναι ἐν κινήσει ἀεὶ καὶ μηδέποτε ἡρεμεῖν. τὸ μὲν γὰρ μένον σήπεται,

ὥσπερ καὶ ὕδωρ τὸ μὴ κινούμενον· σηπόμενον δὲ νόσον ποιεῖ· τὸ δὲ ἐκκρινόμενον πρὸ τοῦ διαφθαῖναι χωρίζεται. τοῦτο οὖν πυκνουμένης μὲν τῆς σαρκὸς οὐ γίνεται (ὥσπερ γὰρ ἐμφράττονται οἱ πόροι), ἀραιουμένης δὲ συμβαίνει. διὸ καὶ οὐ δεῖ ἐν τῷ ἡλίῳ γυμνὸν βαδίζειν (συνίσταται γὰρ ἡ σὰρξ καὶ κομιδῇ ἀποσαρκοῦται· τὸ μὲν γὰρ ἐντὸς ὑγρὸν διαμένει, τὸ δ' ἐπιπολῆς ἀπαλλάττεται ἐξατμιζόμενον, ὥσπερ καὶ τὰ κρέα τὰ ὀπτὰ τῶν ἐφθῶν μᾶλλον τὰ ἐντὸς ὑγρά ἐστιν) οὐδὲ τὰ στήθη γυμνά ἔχοντα βαδίζειν ἐν ἡλίῳ (ἀπὸ γὰρ τῶν ἄριστα ὠκοδομημένων τοῦ σώματος ὁ ἥλιος φέρει, ὃ ἥκιστα δεῖται ἀφαιρέσεως), ἀλλὰ μᾶλλον τὰ ἐντὸς ξηραντέον. ἐκεῖθεν μὲν οὖν διὰ τὸ πόρρω εἶναι, ἐὰν μὴ μετὰ πόνου, οὐκ ἔστιν ἰδρῶτα ἄγειν· ἀπὸ τούτων δὲ διὰ τὸ πρόχειρα εἶναι ράδιον ἀναλῶσαι τὸ ὑγρὸν.

Διὰ τί ψυχθέντες ἀπὸ τῆς αὐτῆς θερμασίας καιόμεθα μᾶλλον καὶ ἀλγοῦμεν; πότερον διὰ τὴν πυκνότητα στέγει ἡ σὰρξ τὸ προσπίπτον θερμόν; διὸ μόλιβδος ἐρίου θερμότερος. ἢ βίαιος γίνεται τοῦ θερμοῦ ἢ δίοδος διὰ τὸ πεπηγέναι ὑπὸ ψυχροῦ τὸ σῶμα;

[966b] Διὰ τί αἱ ξηροτριβίαι στερεὰν τὴν σάρκα παρασκευάζουσιν; ἢ ὅτι διὰ τὴν τρίψιν τῆς θερμασίας ἐπιγινομένης τὸ ὑγρὸν καταναλίσκεται. πρὸς δὲ τούτοις ἡ σὰρξ τριβομένη πυκνοῦται· ἅπαντα δὲ ὅσα πλείονος τρίψεως τυγχάνει πυκνοῦται καὶ στερεὰ γίνεται. θεωρῆσαι δὲ τὸ τοιοῦτον ἔστιν ἐπὶ πολλῶν· τὸ γὰρ σταῖς ἢ πηλὸς ἢ ἄλλο τι τῶν τοιούτων, ἐὰν μὲν ὕδωρ ἐπιχέας ἔλκης, ὑγρά καὶ κλυδῶντα διαμένει, ἐὰν δὲ πλείω τρίψιν προσάγῃς, πυκνοῦταί τε καὶ στερεοῦται ταχέως καὶ γλίσχρα γίνεται.

Διὰ τί αἱ τρίψεις μᾶλλον σαρκοῦσι τῶν δρόμων; ἢ ὅτι οἱ μὲν δρόμοι περιψύχουσι τὴν σάρκα καὶ οὐ δεκτικὴν τροφῆς παρασκευάζουσιν, ἀλλὰ τὰ μὲν συσσεύεται κάτω, τὰ δ' ἐπὶ πολλοῦ τοῦ φυσικοῦ θερμοῦ ἐπιτελουμένου παντελῶς λεπτυνόμενα εἰς πνεῦμα διακρίνεται; ἢ δὲ παλάμη τῇ τρίψει τὴν σάρκα ἀραιὰν καὶ δεκτικὴν αὐτῆς παρασκευάζει. καὶ ἡ ἐξῶθεν δὲ ἀφή ἐναντιουμένη διὰ τῆς πιλήσεως τῇ φορᾷ αὐτὸν συνέχει μᾶλλον, καὶ ἀνάκλασιν τῆς σαρκὸς ποιεῖται.

ΛΗ. ΟΣΑ ΠΕΡΙ ΧΡΟΑΝ.

Διὰ τί τὸν μὲν κηρὸν καὶ τοῦλαιον λευκαίνει ὁ ἥλιος, τὴν δὲ σάρκα μελαίνει; ἢ ὅτι τὰ μὲν λευκαίνει ἀπάγων τὸ ὕδωρ (φύσει γὰρ τὸ ὑγρὸν μέλαν διὰ τὴν μῖξιν τοῦ γεώδους ὕδατος), τὴν δὲ σάρκα ἐπικαίει;

Διὰ τί οἱ ἀλιεῖς καὶ πορφυρεῖς καὶ ἀπλῶς οἱ τὴν θάλατταν ἐργαζόμενοι πυρροὶ εἰσιν; πότερον ὅτι ἡ θάλαττα θερμὴ καὶ αὐχμώδης ἐστὶ διὰ τὴν ἄλμην; τὸ δὲ τοιοῦτον πυρρὰς ποιεῖ τὰς τρίχας, καθάπερ ἡ τε κονία καὶ τὸ ἀρσενικόν. ἢ τὰ μὲν ἐκτὸς γίνονται θερμότεροι, τὰ δ' ἐντὸς περιψύχονται διὰ τὸ βρεχομένων αὐτῶν ἀεὶ ξηραίνεσθαι ὑπὸ τοῦ ἡλίου τὰ πέριξ; τούτων δὲ τοῦτο πασχόντων αἱ τρίχες ξηραίνόμεναι λεπτύνονται καὶ πυρροῦνται. καὶ πάντες δὲ οἱ πρὸς ἄρκτον πυρρότριχες καὶ λεπτότριχες εἰσιν.

Διὰ τί οἱ μὲν ἐν ἱματίῳ δρόμοι καὶ ἡ τοῦ ἐλαίου εἰς ἱμάτιον χρίσις εὐχρους ποιεῖ, οἱ δὲ γυμνοὶ δρόμοι ἄχρους; ἢ ὅτι ἡ μὲν εὐπνοια εὐχροίαν ποιεῖ, ἡ δὲ κατάπνιξις τούναντίον. διὰ δὴ τὸ συνθερμαινόμενον τὸ ἐπιπολῆς ὑγρὸν μὴ διαψύχεσθαι ἄχροίαν ποιεῖ. ἄμφω δὲ ταῦτόν ποιεῖ, ἢ ἐν τῷ ἱματίῳ ἴδισις καὶ ἡ εἰς τὸ ἱμάτιον ἄλειψις· ἐγκατακλείεται [967a] γὰρ ἡ θερμότης. οἱ δὲ γυμνοὶ δρόμοι ἄχρουν ποιοῦσι διὰ τούναντίον, ὅτι καταψύχει ὁ ἀῆρ τὰς συνισταμένας ἐκκρίσεις καὶ διαπνεῖ τὸ σῶμα. ἔτι τὸ ἐλαῖον ὑγρὸν ὄν καὶ λεπτόν, ὑπαλειφθὲν καὶ τοὺς πόρους ἐμφρᾶττον, οὔτε τὸ ἐκ τοῦ σώματος ὑγρὸν καὶ πνεῦμα ἔξω ῥεῖν ἐᾷ, οὔτε τὸ ἐκτὸς πνεῦμα ἐντός. διὸ καταπνιγόμενα ἐν τῷ σώματι ὑγρὰ περιττώματα σηπόμενα ἄχροίαν ποιεῖ.

Διὰ τί ἡ εὐπνοια εὐχρους ποιεῖ; ἢ ὅτι ἄχροια ἔοικεν εἶναι οἶον σῆψις τις χρωτός; ὅταν οὖν τὸ ἐπιπολῆς ὑγρὸν καὶ θερμὸν ᾖ, τοῦτο συμβαίνει χλωρὸν γίνεσθαι, ἐὰν μὴ ψυχθῇ καὶ ἀποπνεύσῃ τὸ θερμόν.

Διὰ τί οἱ μὲν ἰδρώσαντες ἐκ τῶν γυμνασίων εὐχροοὶ εἰσιν εὐθύς, οἱ δὲ ἀθληταὶ ἄχροοι; ἢ διότι ὑπὸ μὲν τοῦ μετρίου πόνου τὸ θερμόν ἐκκάεται καὶ ἐπιπολάζει, ὑπὸ δὲ τῶν πολλῶν ἐξηθεῖται μετὰ τοῦ ἰδρώτος καὶ τοῦ πνεύματος, ἀραιουμένου τοῦ σώματος ἐν τῷ πονεῖν; ὅταν μὲν οὖν ἐπιπολάσῃ τὸ θερμόν, εὐχροοὶ γίνονται, καθάπερ οἱ τε θερμαινόμενοι καὶ αἰσχνόμενοι· ὅταν δὲ ἐκλίπῃ, ἄχροοι. οἱ μὲν οὖν ἰδιῶται μέτρια γυμνάζονται, οἱ δὲ ἀθληταὶ πολλά.

Διὰ τί μᾶλλον καίονται ὑπὸ τοῦ ἡλίου οἱ καθεζόμενοι τῶν γυμναζομένων; ἢ ὅτι οἱ ἐν κινήσει ὄντες ὥσπερ ῥιπίζονται ὑπὸ τοῦ πνεύματος διὰ τὸ κινεῖν τὸν ἀέρα, οἱ δὲ καθήμενοι οὐ πάσχουσι τοῦτο;

Διὰ τί ὁ μὲν ἥλιος ἐπικάει, τὸ δὲ πῦρ οὐ; ἢ διότι λεπτότερός ἐστιν ὁ ἥλιος, καὶ μᾶλλον δύναται διαδύεσθαι εἰς τὴν σάρκα; τὸ δὲ πῦρ, ἐὰν καὶ ἐπικαύσῃ, ἄνω μόνον ποιεῖ τὸ χρῶμα, τὰς φοῖδας καλουμένας· εἴσω δὲ οὐκ εἰσδύεται.

[967b] Διὰ τί τὸ πῦρ οὐ ποιεῖ μέλανας, ὁ δὲ ἥλιος ποιεῖ· τὸν δὲ κέραμον ποιεῖ, ὁ δὲ ἥλιος οὐ; ἢ οὐχ ὁμοίως ἐκάτερον ποιεῖ, ἀλλ' ὁ μὲν ἐπικάων τὴν χροάν μελαίνει, τὸ δὲ πῦρ τὸν κέραμον ἀναπιμπλᾷ, ἢ ἀναφέρει ἀσβόλῳ. τοῦτο δ' ἐστὶ λεπτῆς μαρίλης, ἀποθραυομένων ἅμα καὶ καομένων τῶν ἀνθρώπων. τοὺς δ' ἀνθρώπους ὁ μὲν ἥλιος μελαίνει, τὸ δὲ πῦρ οὐ, ὅτι τοῦ μὲν μαλθακῇ ἢ θερμότης, καὶ διὰ μικρομέρειαν δύναται τὸ δέρμα αὐτὸ κάειν· ὥστε διὰ μὲν τὸ τῆς σαρκὸς μὴ ἄπτεσθαι οὐκ ἀλγεινόν, διὰ δὲ τὸ κάειν μέλαν ποιεῖ. τὸ δὲ πῦρ ἢ οὐχ ἄπτεται ἢ εἴσω διέρχεται, ἐπεὶ μέλανα καὶ τὰ πυρίκαυστα γίνεται, ἀλλ' οὐ μόνον ἐκεῖνον τὸν τόπον κάει οὐδ' ἡ χροιά.

Διὰ τί οἱ γηράσκοντες μελάντεροι γίνονται; ἢ ὅτι πᾶν σηπόμενον μελάντερον γίνεται, πλὴν εὐρώτος; τοῦτο δ' ἐστὶ γῆρας καὶ σαπρότης. ἔτι ἐπειδὴ τὸ αἷμα ξηραίνόμενον μελάντερον γίνεται, εἰκότως ἂν μελάντεροι εἶεν οἱ πρεσβύτεροι· τοῦτο γάρ ἐστι τὸ χρῶζον ἡμῶν τὰ σώματα φυσικῶς.

Διὰ τί περὶ τὴν τῶν σιτίων ἐργασίαν, οἱ μὲν περὶ τὰς κριθὰς ἄχροοι γίνονται καὶ καταρροϊκοί, οἱ δὲ περὶ τοὺς πυροὺς εὐεκτικοί; ἢ διότι εὐπεπτότερος ὁ πυρὸς τῆς κριθῆς, ὥστε καὶ αἱ ἀπόρροιαι;

Διὰ τί ὁ μὲν ἥλιος τὸ μὲν ἔλαιον λευκαίνει, τὴν δὲ σάρκα μελαίνει; ἢ ὅτι τοῦ μὲν ἐλαίου ἀπάγει τὸ γεῶδες; τοῦτο δὲ ἦν τὸ μέλαν, ὥσπερ τὸ γεῶδες τοῦ οἴνου. τὴν δὲ σάρκα μελαίνει, ὅτι κάει· τὸ γὰρ γεῶδες καόμενον ἅπαν γίνεται μέλαν.

Περί Ατομῶν Γραμμῶν (968a) On Indivisible Lines

[968a] Ἄρα γ' εἰσὶν ἄτομοι γραμμαί, καὶ ὅλως ἐν ἅπασιν τοῖς ποσοῖς ἐστὶ τι ἄμερές, ὥσπερ ἔνιοί φασιν; εἰ γὰρ ὁμοίως ὑπάρχει τό τε πολὺ καὶ τὸ μέγα καὶ τὰ ἀντικείμενα τούτοις, τό τε ὀλίγον καὶ τὸ μικρόν, τὸ δ' ἀπείρους σχεδὸν διαιρέσεις ἔχον οὐκ ἔστιν ὀλίγον ἀλλὰ πολὺ, φανερόν ὅτι πεπερασμένως ἔξει τὰς διαιρέσεις τὸ ὀλίγον καὶ τὸ μικρόν· εἰ δὲ πεπερασμέναι αἱ διαιρέσεις, ἀνάγκη τι εἶναι ἄμερές μέγεθος, ὥστε ἐν ἅπασιν ἐνυπάρξει τι ἄμερές, ἐπεὶ περ καὶ τὸ ὀλίγον καὶ τὸ μικρόν. ἔτι εἰ ἔστιν ἰδέα γραμμῆς, ἢ δ' ἰδέα πρώτη τῶν συνωνύμων, τὰ δὲ μέρη πρότερα τοῦ ὅλου τὴν φύσιν, διαιρετὴ ἂν εἴη αὐτὴ ἢ γραμμὴ, τὸν αὐτὸν δὲ τρόπον καὶ τὸ τετράγωνον καὶ τὸ τρίγωνον καὶ τὰ ἄλλα σχήματα, καὶ ὅλως ἐπίπεδον αὐτὸ καὶ σῶμα· συμβήσεται γὰρ πρότερ' ἅττα εἶναι τούτων. ἔτι εἰ σώματός ἐστι στοιχεῖα, τῶν δὲ στοιχείων μηδὲν πρότερον, τὰ δὲ μέρη τοῦ ὅλου πρότερα, ἀδιαίρετον ἂν εἴη τὸ πῦρ καὶ ὅλως τῶν τοῦ σώματος στοιχείων ἕκαστον, ὥστ' οὐ μόνον ἐν τοῖς νοητοῖς ἀλλὰ καὶ ἐν τοῖς αἰσθητοῖς ἐστὶ τι ἄμερές. ἔτι δὲ κατὰ τὸν Ζήνωνος λόγον ἀνάγκη τι μέγεθος ἄμερές εἶναι, εἴπερ ἀδύνατον μὲν ἐν πεπερασμένῳ χρόνῳ ἀπείρων ἄψασθαι, καθ' ἕκαστον ἀπτόμενον, ἀνάγκη δ' ἐπὶ τὸ ἥμισυ πρότερον ἀφικνεῖσθαι τὸ κινούμενον, τοῦ δὲ μὴ ἀμεροῦς πάντως ἔστιν ἥμισυ. εἰ δὲ καὶ ἄπτεται τῶν ἀπείρων ἐν πεπερασμένῳ χρόνῳ τὸ ἐπὶ τῆς γραμμῆς φερόμενον, τὸ δὲ θάπτον ἐν τῷ ἴσῳ χρόνῳ πλεῖον διανύει, ταχίστη δ' ἢ τῆς διανοίας κίνησις, κἂν ἢ διάνοια τῶν ἀπείρων ἐφάπτοιτο καθ' ἕκαστον [968b] ἐν πεπερασμένῳ χρόνῳ, ὥστε εἰ τὸ καθ' ἕκαστον ἄπτεσθαι τὴν διάνοιαν ἀριθμεῖν ἐστίν, ἐνδέχεται ἀριθμεῖν τὰ ἄπειρα ἐν πεπερασμένῳ χρόνῳ. εἰ δὲ τοῦτο ἀδύνατον, εἴη ἂν τις ἄτομος γραμμὴ. ἔτι καὶ ἐξ ὧν αὐτοὶ οἱ ἐν τοῖς μαθήμασι λέγουσιν, εἴη ἂν τις ἄτομος γραμμὴ, ὥς φασίν, εἰ σύμμετροί εἰσιν αἱ τῷ αὐτῷ μέτρῳ μετρούμεναι· ὅσαι δ' εἰσὶ σύμμετροι, πᾶσαι εἰσι μετρούμεναι. εἴη γὰρ ἂν τι μῆκος ᾧ πᾶσαι μετρηθῇσονται. τοῦτο δ' ἀνάγκη ἀδιαίρετον εἶναι. εἰ γὰρ διαιρετόν,

καὶ τὰ μέρη μέτρου τινὸς ἔσται· σύμμετρα γὰρ τῷ ὅλῳ. ὥστε μέρους τινὸς εἶη διπλασία τὴν ἡμίσειαν, ἐπειδὴ τοῦτ' ἀδύνατον ἂν εἶη μέτρον. ὡσαύτως δὲ καὶ αἱ μετρούμεναι ἅπαξ ὑπ' αὐτοῦ, ὥσπερ πᾶσαι αἱ ἐκ τοῦ μέτρου σύνθετοι γραμμαί, ἐξ ἡμερῶν σύγκεινται. τὸ δ' αὐτὸ συμβήσεται καὶ τοῖς ἐπιπέδοις· πάντα γὰρ τὰ ἀπὸ τῶν ῥητῶν γραμμῶν σύμμετρα ἀλλήλοις, ὥστε ἔσται τὸ μέτρον αὐτῶν ἡμέρες. ἀλλὰ μὴν εἴ τι τμηθήσεται μέτρον τινὰ τεταγμένην καὶ ὠρισμένην γραμμὴν, οὐκ ἔσται οὔτε ῥητὴ οὔτ' ἄλογος, οὔτε τῶν ἄλλων οὐδεμία ὧν νῦν δὴ εἴρηται, οἷον ἀποτομὴν ἐκ δυοῖν ὀνομάτοιν· ἀλλὰ καθ' αὐτὰς μὲν οὐδὲ τινὰς ἔξουσιν φύσεις, πρὸς ἀλλήλας δὲ ἔσονται ῥηταὶ καὶ ἄλογοι. ἢ πρῶτον μὲν οὐκ ἀνάγκη τὸ ἀπείρους ἔχον διαιρέσεις μὴ εἶναι μικρὸν καὶ ὀλίγον· καὶ γὰρ τόπον καὶ μέγεθος καὶ ὅλως τὸ συνεχὲς μικρὸν μὲν λέγομεν, καὶ ἐφ' ὧν μὲν ἀρμόττει τὸ ὀλίγον, οὐ μὴν ἄλλ' ἀπείρους διαιρέσεις φαμὲν ἔχειν. ἔτι δ' εἰ ἐν τῷ συνθέτῳ γραμμαί, κατὰ τούτων τῶν ἀτόμων λέγεται [969a] τὸ μικρόν, καὶ ἄπειροι στιγμαὶ ἐνυπάρχουσιν. ἢ δὲ γραμμὴ, διαίρεσις κατὰ στιγμὴν, καὶ ὁμοίως καθ' ὅποιαν οὖν ἀπείρους ἂν ἔχοι διαιρέσεις ἅπαντα ἢ μὴ ἄτομος. ἔναι δὲ τούτων εἰς μακρὰ καὶ ἄπειροι οἱ λόγοι. πᾶσαν δὲ τμηθῆναι τὸν ἐπιταχθέντα δυνατόν τὴν μὴ ἄτομον. ἔτι εἰ τὸ μέγα ἐκ μικρῶν τινῶν σύγκειται, ἢ οὐθὲν ἔσται τὸ μέγα, ἢ τὸ πεπερασμένως ἔχον διαιρέσεις οὐ μέγα ἔσται. τὸ γὰρ ὅλον τὰς τῶν μερῶν ἔχει διαιρέσεις ὁμοίως. εὐλογον δ' ἐστὶ τό τε σμικρὸν πεπερασμένως ἔχειν διαιρέσεις καὶ τὸ μέγα ἀπείρους, οὕτως ἀξιοῦσιν. ὥστε φανερόν ὅτι οὐκ ἐν τούτῳ λέγοιτο τὸ μέγα καὶ τὸ μικρόν, τῷ πεπερασμένως ἔχειν καὶ ἀπείρους διαιρέσεις. εἰ δ' ὅτι καὶ ἐν ἀριθμοῖς τὸ ὀλίγον πεπερασμένως ἔχει διαιρέσεις, καὶ ἐν γραμμαῖς τις ἀξιοίῃ τὸ μικρόν, εὐηθες. ἐκεῖ μὲν γὰρ ἐξ ἡμερῶν τε ἢ γενεσις, καὶ ἐστὶ τι ὁ τῶν ἀριθμῶν ἀρχὴ ἐστὶ, καὶ πᾶς ὁ μὴ ἄπειρος πεπερασμένως ἔχει διαιρέσεις· ἐπὶ δὲ τῶν μεγεθῶν οὐχ ὁμοίως. οἱ δ' ἐν τοῖς εἶδεσι τὰς ἀτόμους κατασκευάζοντες τοῦλαττον ἴσως ἀξίωμα λαμβάνουσι τοῦ προκειμένου, τὸ τιθῆναι τούτων ἰδέας· καὶ τρόπον τινὰ ταῦτ' ἀναιροῦσι δι' ὧν δεικνύουσιν. καὶ γὰρ διὰ τούτων τῶν λόγων ἀναιρεῖται τὰ εἶδη. πάλιν δὲ τῶν σωματικῶν στοιχείων εὐηθες τὸ ἡμερῇ ἀξιοῦν. εἰ γὰρ αὐτὰ καὶ ἀποφαίνονται τινες οὕτως, ἀλλὰ πρὸς γε τὴν ὑποκειμένην σκέψιν αὐτὸ τὸ ἐξ ἀρχῆς λαμβάνουσιν. μᾶλλον δὲ ὅσῳ μᾶλλον τὸ ἐξ ἀρχῆς δόξειαν ἀναλαμβάνεσθαι, τόσῳ μᾶλλον δοκεῖ διαιρετὸν εἶναι σῶμα καὶ μῆκος καὶ τοῖς ὅγκοις καὶ τοῖς

διαστήμασιν. ὁ δὲ τοῦ Ζήνωνος λόγος οὐ συμβιβάζει οὐ
συμπεπερασμένῳ χρόνῳ τῶν ἀπείρων ἄπτεσθαι τὸ φερόμενον ὡδὶ
τὸν αὐτὸν τρόπον. ὁ γὰρ χρόνος καὶ τὸ μήκος ἄπειρον καὶ
πεπερασμένον λέγεται, καὶ τόσας ἔχει διαιρέσεις. οὐδὲ δὴ τὸ καθ’
ἕκαστον ἄπτεσθαι τῶν ἀπείρων τὴν διάνοιαν οὐκ ἔστιν ἀριθμεῖν, εἰ
ἄρα τις καὶ νοήσειεν οὕτως ἐφάπτεσθαι τῶν ἀπείρων τὴν διάνοιαν.
ὅπερ ἴσως ἀδύνατον· οὐ γὰρ ἐν συνεχέσι καὶ [969b] ὑποκειμένοις ἡ
τῆς διανοίας κίνησις, ὥσπερ ἡ τῶν φερομένων. εἰ δ’ οὖν καὶ ἐγχωρεῖ
κινεῖσθαι οὕτως, οὐκ ἔστι τοῦτο ἀριθμεῖν· τὸ γὰρ ἀριθμεῖν ἐστὶ τὸ
μετὰ ἐπιστάσεως. ἀλλ’ ἄτοπον ἴσως τὸ μὴ δυναμένους λύειν τὸν
λόγον δουλεύειν τῇ ἀσθενείᾳ, καὶ προσεξαπατᾶν ἑαυτοὺς μείζους
ἀπάτας, βοηθοῦντας τῇ ἀδυναμίᾳ. τὸ δ’ ἐπὶ τῶν συμμετρῶν
γραμμῶν, ὡς ὅτι αἱ πᾶσαι τῷ αὐτῷ τινὶ καὶ ἐνὶ μετροῦνται, κομιδῇ
σοφιστικὸν καὶ ἥκιστα κατὰ τὴν ὑπόθεσιν τὴν ἐν τοῖς μαθήμασιν·
οὔτε γὰρ ὑποτίθενται οὕτως, οὔτε χρήσιμον αὐτοῖς ἐστίν. ἅμα δὲ καὶ
ἐναντίον πᾶσαν μὲν γραμμὴν σύμμετρον γίνεσθαι, πασῶν δὲ τῶν
συμμετρῶν κοινὸν μέτρον εἶναι ἀξιοῦν. ὥστε γελοῖον τὸ κατὰ τὰς
ἐκείνων δόξας καὶ ἐξ ὧν αὐτοὶ λέγουσι φάσκοντες δεῖξαι, εἰς
ἐριστικὸν ἅμα καὶ σοφιστικὸν ἐκκλίνειν λόγον, καὶ ταῦθ’ οὕτως
ἀσθενῆ. πολλαχῇ γὰρ ἀσθενὴς ἐστὶ καὶ πάντα τρόπον διαφυγεῖν καὶ
τὰ παράδοξα καὶ τοὺς ἐλέγχους. ἔτι δ’ ἄτοπον ἂν εἴη διὰ μὲν τὸν
Ζήνωνος λόγον παραπεπεισθαι τινὰς ἀτόμους ποιεῖν γραμμάς, τῷ μὴ
ἔχειν ἀντειπεῖν, διὰ δὲ τῆς εὐθείας εἰς τὴν ἡμιόλιον κίνησιν, ἣν
ἀναγκαῖον εὐθὺς τέμνειν ἀπείρων μεταξὺ πιπτουσῶν περιφερειῶν
καὶ διαστημάτων ὄντων, καὶ πάλιν διὰ τὴν τῶν ἴσων κύκλων
εὐπειστον, ὅτι ἀνάγκη ἂν ὅτι κινηθῇ, μείζον ἡμικύκλιον κινεῖσθαι,
καὶ ὅσα ἄλλα τοιαῦτα τεθεώρηται περὶ τὰς γραμμάς μὴ οἷόν τε
ἐνδέχεσθαι τοιαύτην δὴ τινα γενέσθαι κίνησιν ὥστ’ ἐφ’ ἐκάστην τῶν
μεταξὺ μὴ πίπτειν πρότερον· πολὺ γὰρ ταῦτα μᾶλλον ὁμολογούμενα
ἐκείνων. ὅτι μὲν οὖν ἐκ γε τῶν εἰρημένων λόγων οὐτ’ ἀναγκαῖον
ἀτόμους εἶναι γραμμάς οὔτε πιθανόν, φανερόν. ἔτι δὲ καὶ ἐκ τῶνδε
γένοιτ’ ἂν φανερώτερον. πρῶτον μὲν ἐκ τῶν ἐν τοῖς μαθήμασι
δεικνυμένων καὶ τιθεμένων, ἃ οὐ δίκαιον ἢ πιστοτέροις λόγοις
κινεῖν. οὔτε γὰρ ὁ τῆς γραμμῆς οὔτε ὁ τῆς εὐθείας ὅρος ἐφαρμόσει
τῇ ἀτόμῳ διὰ τὸ μήτε μεταξὺ τινῶν εἶναι μήτ’ ἔχειν μέσον. ἔπειτα
πᾶσαι αἱ γραμμαὶ [970a] σύμμετροι ἔσονται. πᾶσαι γὰρ ὑπὸ τῶν
ἀτόμων μετρηθήσονται, αἱ τε μήκει σύμμετροι καὶ αἱ δυνάμει. αἱ δὲ

ἄτομοι σύμμετροι πᾶσαι μήκει· ἴσαι γάρ· ὥστε καὶ δυνάμει. εἰ δὲ τοῦτο, διαιρετὸν ἔσται τὸ τετράγωνον. ἔτι εἰ ἡ περὶ τὴν μείζω τὸ πλάτος ποιεῖ παραβαλλομένη, τὸ ἴσον τῶν ἀπὸ τῆς ἀτόμου καὶ τῆς ποδιαίας παραβαλλομένων περὶ τὴν δίπουν ἔλαττον ποιήσει τὸ πλάτος τῆς ἀμεροῦς· ἔσται ἔλαττον τὸ περὶ τῆς ἀτόμου. ἔτι εἰ ἐκ τριῶν δοθεισῶν εὐθειῶν συνίσταται τρίγωνον, καὶ ἐκ τῶν ἀτόμων συσταθήσεται. ἐν ἅπαντι δὲ ἰσοπλεύρῳ ἡ κάθετος ἐπὶ μέσῃ πίπτει, ὥστε καὶ ἐπὶ τὴν ἄτομον. ἔτι εἰ τὸ τετράγωνον τῶν ἀμερῶν διὰ μέσου ἐμπεσούσης καὶ καθέτου ἀχθείσης, ἡ τοῦ τετραγώνου πλευρὰ τὴν κάθετον δύναται καὶ τὴν ἡμίσειαν τῆς διαμέτρου, ὥστε οὐκ ἐλάχιστη. οὐδὲ διπλάσιον τὸ ἀπὸ τῆς διαμέτρου χωρίον ἔσται τοῦ ἀπὸ τῆς ἀτόμου. ἀφαιρεθέντος γὰρ τοῦ ἴσου ἡ λοιπὴ ἔσται ἐλάσσων τῆς ἀμεροῦς. εἰ γὰρ ἴσως τετραπλάσιον ἂν ἔγραψεν ἡ διάμετρος, ἄλλα δ' ἂν τις καὶ ἕτερα τοιαῦτα συνάγοι· πᾶσι γὰρ ὡς εἰπεῖν ἐναντιοῦται τοῖς ἐν τοῖς μαθήμασιν. πάλιν τοῦ μὲν ἀμεροῦς μία ἡ σύναψις, γραμμῆς δὲ δύο· καὶ γὰρ ὅλη ὅλης ἄπτεται, καὶ κατὰ τὸ πέρας ἐξ ἐναντίας. ἔτι γραμμὴ προστεθεῖσα οὐ ποιεῖ μείζω τὴν ὅλην· τὰ γὰρ ἀμερῇ συντιθέμενα οὐ ποιήσει μείζον. ἔτι ἐκ δυοῖν ἀμεροῖν μηδὲν γίνεσθαι συνεχές διὰ τὸ πλείους διαιρέσεις ἔχειν ἅπαν τὸ συνεχές· ἅπαντα δὲ γραμμὴ παρὰ τὴν ἄτομον συνεχῆς οὐκ ἂν εἴη γραμμὴ ἄτομος. ἔτι εἰ ἅπαντα γραμμὴ παρὰ τῆς ἀτόμου καὶ ἴσα καὶ ἄνισα διαιρεῖται, καὶ μὴ ἐκ τριῶν ἀτόμων καὶ ὅλως περιττῶν, ὥστ' ἀδιαίρετος ἡ ἄτομος. ὁμοίως δὲ καὶ εἰ δίχα τέμνεται· πᾶσα γὰρ ἡ ἐκ τῶν περιττῶν. εἰ δὲ δίχα μὲν μὴ πᾶσα τέμνεται ἀλλ' ἡ ἐκ τῶν ἀρτίων, τὴν δὲ δίχα διαιρουμένην καὶ ὅσα δυνατόν τέμνειν, διαιρεθήσεται καὶ οὕτως ἡ ἄτομος, ὅταν ἡ ἐκ τῶν ἀρτίων εἰς ἄνισα διαιρῇται. πάλιν εἰ τὸ κεινημένον ἐν ᾧ [970b] χρόνῳ κινεῖται τὴν ὅλην ἐν τῷ ἡμίσει τὴν ἡμίσειαν κινηθήσεται, καὶ ἐν τῷ ἐλάττονι ἔλαττον ἢ τὴν ἡμίσειαν, ὥστ' εἰ μὲν περιττῶν σύγκειται τῶν ἀτόμων τὸ μῆκος, ἀναιρεθήσεται ἡ μέση τομὴ τῶν ἀτόμων, εἴπερ ἐν τῷ ἡμίσει χρόνῳ τὸ ἥμισυ δίδεισιν· ὁμοίως γὰρ ὁ τε χρόνος καὶ ἡ γραμμὴ τμηθήσεται. ὥστε οὐδεμία τῶν συγκειμένων τμηθήσεται εἰς ἴσα καὶ ἄνισα, οὐδ' ὁμοίως τοῖς χρόνοις τμηθήσονται. οὐκ ἔσονται ἄτομοι γραμμαί. τὰ δὲ τοῦ αὐτοῦ λόγου ἐστί, καθάπερ ἐλέχθη, τὸ πάντα ταῦτα ποιεῖν ἐξ ἀμερῶν. ἔτι ἅπαντα ἢ μὴ ἄπειρος δύο ἔχει πέρατα· γραμμὴ γὰρ ὠρίσται τούτοις. ἡ δὲ ἄτομος οὐκ ἄπειρος, ὥστε ἔξει πέρας. διαιρετὴ ἄρα· τὸ γὰρ πέρας ἄλλο καὶ οὐ πέρας. ἢ ἔσται τις οὐτ' ἄπειρος οὔτε

πεπερασμένη γραμμὴ παρὰ ταύτας. ἔτι οὐκ ἐν ἀπάσῃ γραμμῇ στιγμή ἔσται. ἐν μὲν γὰρ τῇ ἀτόμῳ οὐκ ἔστιν· εἰ μὲν γὰρ μία μόνη, ὑπάρξει γραμμὴ, εἴτα στιγμή· εἰ δὲ πλείους, διαιρετὴ ἡ γραμμὴ. εἰ μὲν οὖν ἐν τῇ ἀτόμῳ μὴ ἐνυπάρχει στιγμή, οὐδ' ὅλως ἐν γραμμῇ ἔσται· αἱ γὰρ ἄλλαι ἐκ τῶν ἀτόμων. ἔτι ἢ μηθὲν τῶν στιγμῶν ἔσται μεταξύ ἢ γραμμῇ· εἰ δὲ μεταξύ γραμμῇ, ἐν ἀπάσαις δὲ πλείους στιγμαί, οὐκ ἔσται ἄτομος. ἔτι οὐχ ἀπάσης ἔσται γραμμῆς τετράγωνον· ἔξει γὰρ μῆκος καὶ πλάτος, ὥστε διαιρετόν, ἐπεὶ τὸ μὲν, τὸ δέ τι. εἰ δὲ τὸ τετράγωνον, καὶ ἡ γραμμὴ. ἔτι τὸ πέρας τῆς γραμμῆς στιγμή ἔσται, ἀλλ' οὐ γραμμὴ. πέρας μὲν γάρ, τὸ ἔσχατον δὲ ἡ ἄτομος. εἰ γὰρ στιγμή, τὸ πέρας τῇ ἀτόμῳ ἔσται στιγμή, καὶ ἔσται γραμμὴ γραμμῆς στιγμή μείζων. εἰ δ' ἐνυπάρχει τῇ ἀτόμῳ ἡ στιγμή, διὰ τὸ ταυτὸ πέρας τῶν συνεχουσῶν γραμμῶν, ἔσται τι πέρας τῆς ἀμεροῦς. ὅλως τε τί διοίσει στιγμή γραμμῆς; οὐδὲν γὰρ ἴδιον ἔξει ἢ ἄτομος γραμμὴ παρὰ τὴν στιγμήν πλην τοῦνομα. ἔτι ὁμοίως μένει ἐπίπεδον καὶ σῶμά ἐστιν ἄτομον. ἐνὸς γὰρ ὄντος ἀδιαιρέτου καὶ τᾶλλα συνακολουθήσει διὰ τὸ θάτερον διηρηθῆαι κατὰ θάτερον. σῶμα οὐκ ἔσται ἀδιαίρετον διὰ τὸ [971a] εἶναι ἐν αὐτῷ βάθος καὶ πλάτος, οὐδ' ἂν γραμμὴ εἴη ἀδιαίρετος· σῶμα μὲν γὰρ κατ' ἐπίπεδον, ἐπίπεδον δὲ κατὰ γραμμὴν. ἐπεὶ δὲ οἱ τε λόγοι δι' ὧν ἐπιχειροῦσι πείθειν ἀσθενεῖς εἰσὶ, καὶ ψευδεῖς ἐναντία δόξαι πᾶσαι τοῖς ἰσχύουσι πρὸς πίστιν, φανερόν ὅτι οὐκ ἂν εἴη γραμμὴ ἄτομος. δηλὸν δ' ἐκ τούτων ὅτι οὐδ' ἂν ἐκ στιγμῶν εἴη γραμμὴ. σχεδὸν γὰρ οἱ πλεῖστοι τῶν λόγων οἱ αὐτοὶ ἀρμόσουσιν. ἀνάγκη γὰρ διαιρεῖσθαι τὴν στιγμήν, ὅταν ἢ ἐκ περιττῶν τέμνηται ἴσα ἢ ἐξ ἀρτίων τὰ ἄνισα. καὶ τὸ τῆς γραμμῆς μέρος μὴ εἶναι γραμμὴν, μηδὲ τὸ τοῦ ἐπιπέδου ἐπίπεδον. καὶ γραμμὴ δὲ γραμμῆς στιγμή εἶναι μείζων· ἐξ ὧν γὰρ σύγκειται, τούτοις καὶ ὑπερέξει. τοῦτο δ' ὅτι ἀδύνατον, ἔκ τε τῶν ἐν τοῖς μαθήμασι δηλόν, καὶ ἔτι συμβήσεται τὴν στιγμήν ἐν χρόνῳ δὴ εἶναι τὸ φερόμενον, εἴπερ τὴν μείζω μὲν ἐν πλείονι χρόνῳ, τὴν δ' ἴσην ἐν ἴσῳ, ἢ δὲ τοῦ χρόνου ὑπεροχὴ χρόνος. ἀλλ' ἴσως καὶ ὁ χρόνος ἐστὶν ἐκ τῶν νῦν, καὶ τοῦ αὐτοῦ λόγου λέγειν ἄμφω. εἰ δὴ τὸ νῦν ἀρχὴ καὶ πέρας τοῦ χρόνου καὶ ἡ γραμμὴ στιγμῆς, μὴ ἐστὶ δὲ συνεχῆς ἡ ἀρχὴ καὶ τὸ πέρας ἀλλ' ἔχουσί τι μεταξύ, οὐκ ἂν εἴη οὔτε τὰ νῦν οὔτε στιγμαὶ ἀλλήλοις συνεχεῖς. ἔτι ἢ μὲν γραμμὴ μέγεθος τι, ἢ δὲ τῶν στιγμῶν σύνθεσις οὐδὲν ποιεῖ μέγεθος διὰ τὸ μηδ' ἐπὶ πλείῳ τόπον ἔχειν. ὅταν γὰρ ἐπὶ γραμμὴν γραμμὴ τεθῇ καὶ ἐφαρμόσῃ, οὐδὲν γίνεται

μείζον τὸ πλάτος. ἐν δὲ τῇ γραμμῇ καὶ στιγμαὶ ἐνυπάρχουσιν, οὐδ' ἂν αἱ στιγμαὶ πλείω κατέχοιεν τόπον, ὥστε οὐκ ἂν ποιοῖεν μέγεθος. ἔτι εἰ ἅπαντα ἄπτεται παντὸς ἢ ὅλον ὅλου ἢ τινὶ τινὸς ἢ ὅλον τινός, ἢ δὲ στιγμή ἀμερῆς ὅλως ἄπτοιτο. τὸ δ' ὅλον ὅλου ἀπτόμενον ἀνάγκη ἐν εἶναι. εἰ γάρ τι ἐστὶν ἢ θάτερον μὴ ἐστίν, οὐκ ἂν ὅλον ὅλου ἄπτοιτο. εἰ δ' ἅμα ἐστὶ τὰ ἀμερῇ, τὸν αὐτὸν κατέχει τόπον πλείων ὢν καὶ πρότερον τὸ ἐν· τῶν γὰρ ἅμα [971b] ὄντων καὶ μὴ ἐχόντων ἐπέκτασιν κατὰ ταυτὰ ὁ αὐτὸς ἀμφοῖν τόπος. τὸ δ' ἀμερὲς οὐκ ἔχει διάστασιν, ὥστ' οὐκ ἂν εἴη μέγεθος συνεχὲς ἐξ ἀμερῶν. οὐκ ἄρα οὐθ' ἡ γραμμὴ ἐκ στιγμῶν οὐθ' ὁ χρόνος ἐκ τῶν νῦν. ἔτι εἰ ἔστιν ἐκ στιγμῶν, ἄψεται στιγμή στιγμής· ἐὰν οὖν ἐκ τοῦ Κ ἐκβληθῇ ἡ ΑΒ καὶ ΓΔ, ἄψεται τοῦ Κ καὶ ἡ ἐν τῇ ΚΔ στιγμή. ὥστε καὶ ἄλλω τινί· τὸ γὰρ ἀμερὲς τοῦ ἀμεροῦς ὅλον ὅλου ἐφάπτεται. ὥστε τὸν αὐτὸν ἐφέξει τόπον τοῦ Κ, καὶ ἀπτόμεναι στιγμαὶ ἐν τῷ αὐτῷ τόπῳ ἀλλήλαις. εἰ δ' ἐν τῷ αὐτῷ, καὶ ἄπτονται· τὰ γὰρ ἐν τῷ αὐτῷ τόπῳ ὄντα πρῶτα ἄπτεσθαι ἀναγκαῖον, εἴθ' οὕτως εὐθείᾳ εὐθείας ἄψεται κατὰ δύο στιγμάς. ἡ γὰρ ἐν τῇ ΑΚ στιγμή καὶ τῇ ΚΓ καὶ ἐτέρας ἄπτεται στιγμής. ὥστε ἡ ἐκ τῆς ΓΔ κατὰ πλείους ἄπτεται στιγμάς. ὁ αὐτὸς δὲ λόγος καὶ εἰ μὴ δι' ἀλλήλων ἀλλ' ὅπως οὖν ἦψατο γραμμῆς. ἔτι καὶ ἡ τοῦ κύκλου τῆς εὐθείας ἄψεται κατὰ πλείω. τῆς γὰρ συναφῆς καὶ ἡ ἐν τῷ κύκλῳ καὶ ἡ ἐν τῇ εὐθείᾳ ἄπτεται καὶ ἀλλήλων. εἰ δὲ τοῦτο μὴ δυνατόν, οὐδὲ τὸ ἄπτεσθαι στιγμήν στιγμής· εἰ δὲ μὴ ἄπτεσθαι, οὐδ' εἶναι τὴν γραμμὴν στιγμήν· οὐδὲ γὰρ ἄπτεσθαι ἀναγκαῖον. ἔτι πῶς ποτὲ ἔσται εὐθεῖα γραμμὴ καὶ περιφερής; οὐδὲν γὰρ διοίσει ἡ σύναψις τῶν στιγμῶν ἐν τῇ εὐθείᾳ καὶ τῇ περιφερεῖ. τὸ γὰρ ἀμερὲς τοῦ ἀμεροῦς ὅλον ὅλου ἄπτεται, καὶ οὐκ ἔστιν ὅλως ἄπτεσθαι. εἰ οὖν αἱ μὲν γραμμαὶ διάφοροι, ἡ δὲ σύναψις ἀδιάφορος, οὐκ ἔσται δὴ γραμμὴ ἐκ τῆς συνάψεως, ὥστ' οὐδ' ἐκ στιγμῶν. ἔτι ἀναγκαῖον ἢ ἄπτεσθαι ἢ μὴ ἄπτεσθαι τὰς στιγμάς ἀλλήλων. εἰ μὲν οὖν τὸ ἐφεξῆς ἄπτεσθαι ἀνάγκη, ὁ αὐτὸς ἔσται λόγος· εἰ δὲ ἐνδέχεται ἐφεξῆς τι εἶναι μὴ ἀπτόμενον, τὸ δὲ συνεχὲς οὐδὲν ἄλλο λέγομεν ἢ τὸ ἐξ ὧν ἐστὶν ἀπτομένων· ὥστε καὶ οὕτως ἀνάγκη τὰς στιγμάς ἄπτεσθαι ἀλλήλων, ἢ εἶναι γραμμὴν συνεχῇ. [972a] ἔτι εἰ ἄτοπον στιγμή ἐπὶ στιγμής, ἴν' ἢ γραμμὴ καὶ ἐπὶ στιγμή, ἐπεὶ ἡ γραμμὴ ἐπίπεδον, ἀδύνατον τὰ εἰρημένα εἶναι. εἴτε γὰρ ἐφεξῆς αἱ στιγμαὶ εἰσι, τμηθήσεται ἡ γραμμὴ κατ' οὐδετέραν τῶν στιγμῶν, ἀλλ' ἀνά μέσον· εἴθ' ἄπτονται, γραμμὴ ἔσται τῆς μιᾶς στιγμῆς χώρα. τοῦτο δ'

ἀδύνατον. ἔτι διαιροῖτ' ἂν ἅπαντα καὶ ἀναλύοιτο εἰς στιγμάς, καὶ ἡ στιγμή μέρος σώματος, εἶπερ τὸ μὲν σῶμα ἐξ ἐπιπέδων, τὸ δ' ἐπίπεδον ἐκ γραμμῶν, αἱ δὲ γραμμαὶ ἐκ στιγμῶν. εἰ δ' ἐξ ὧν πρῶτων ἐνυπαρχόντων ἕκαστά ἐστι, στοιχεῖά ἐστι ταῦτα, αἱ στιγμαὶ ἂν εἴησαν στοιχεῖα σωμάτων. ὥστε συνώνυμα στοιχεῖα οὐδέτερα τῷ εἶδει. φανερόν οὖν ἐκ τῶν εἰρημένων ὅτι οὐκ ἔστι γραμμὴ ἐκ στιγμῶν. ἀλλ' οὐδ' ἀφαιρεθῆναι οἷόν τε στιγμήν ἀπὸ γραμμῆς. εἰ γὰρ ἐνδέχεται ἀφαιρεθῆναι, καὶ προστεθῆναι δυνατόν· προστεθέντος δέ τινος τὸ προστεθὲν μείζον ἔσται τοῦ ἐξ ἀρχῆς, ἐὰν τοιοῦτον ἢ τὸ προστιθέμενον ὥστε ἐν ὅλον ποιεῖν. ἔσται γραμμὴ γραμμῆς στιγμή μείζων. τοῦτο δ' ἀδύνατον. ἀλλὰ καθ' ἑαυτὴν μὲν οὐχ οἷόν τε, κατὰ συμβεβηκὸς δ' ἐνδέχεται στιγμήν ἀπὸ γραμμῆς ἀφελεῖν, τῷ ἐνυπάρχειν ἐν τῇ ἀφαιρουμένῃ γραμμῇ. εἰ τοῦ ὅλου ἀφαιρουμένου καὶ ἡ ἀρχὴ καὶ τὸ πέρας ἀφαιρεῖται, γραμμῆς δ' ἦν ἡ ἀρχὴ καὶ τὸ πέρας στιγμή, καὶ γραμμῆς ἐγγωρεῖ ἀφαιρεῖν καὶ στιγμήν ἐνδέχοιτο. αὕτη δ' ἡ ἀφαίρεσις κατὰ συμβεβηκός. εἰ δὲ τὸ πέρας ἅπτεται, οὔτε πέρας ἢ αὐτοῦ ἢ τῶν ἐκείνου τινός. ἡ δὲ στιγμή, ἢ πέρας γραμμῆς, ἅπτεται. ἢ μὲν οὖν γραμμῆς ἔσται στιγμή μείζων, ἡ δὲ στιγμή ἐκ στιγμῶν· τῶν γὰρ ἀπτομένων οὐδὲν ἀνὰ μέσον. ὁ αὐτὸς λόγος καὶ ἐπὶ τῆς τομῆς, εἰ ἡ τομὴ στιγμῆς καὶ ἡ τομὴ ἅπτεται τινος καὶ ἐπὶ στερεοῦ καὶ ἐπιπέδου· ὡσαύτως δὲ καὶ τὸ στερεὸν ἐξ ἐπιπέδων καὶ γραμμῶν. οὐκ ἀληθές δὲ κατὰ στιγμήν εἰπεῖν, οὐδ' ὅτι ἐλάχιστον τῶν ἐκ γραμμῆς εἰς τὸ ἐλάχιστον τῶν ἐνυπαρχόντων εἴρηται. τὸ δὲ ἐλάχιστον, ὧν ἐστὶν ἐλάχιστον, καὶ ἑλαττόν ἐστιν. [972b] ἐν δὲ τῇ γραμμῇ οὐδὲν ἄλλο ἢ στιγμαὶ καὶ γραμμαὶ ἐνυπάρχουσιν. ἡ δὲ γραμμὴ τῆς στιγμῆς οὐκ ἔστι μείζων· οὐδὲ γὰρ αὗτὸ ἐπίπεδον τῆς γραμμῆς. ὥστ' οὐκ ἔσται στιγμή τὸ ἐν γραμμῇ ἐλάχιστον. εἰ δὲ συμβλητὸν τῇ γραμμῇ ἡ στιγμή, τὸ δὲ ἐλάχιστον ἐν τρισὶ προσώποις, οὐκ ἔσται ἡ στιγμή τῶν ἐν τῇ γραμμῇ ἐλάχιστον. καὶ ἄλλ' ἅττα ἐνυπάρχει παρὰ τὰς στιγμάς καὶ τὰς γραμμάς ἐν τῷ μήκει· οὐ γὰρ ἐκ στιγμῶν. εἰ δὲ τὸ ἐν τόπῳ ὃν ἡ στιγμή μῆκος ἢ ἐπίπεδον ἢ στερεὸν ἐκ τούτων τι, ἐξ ὧν δ' ἐστὶν ἡ γραμμὴ, ἐκεῖνα ἐν τόπῳ (καὶ γὰρ ἡ γραμμὴ), καὶ μήτε σῶμα μήτ' ἐπίπεδον μήτε ἐκ τούτων τι ἐνυπάρχει τῇ γραμμῇ, οὐκ ἔσται οὐθὲν ὅλως παρὰ τὰς στιγμάς καὶ τὰς γραμμάς ἐν τῷ μήκει. ἔτι εἰ τοῦ ἐν τόπῳ ὄντος τὸ μείζον λεγόμενον μῆκος ἢ ἐπιφάνεια στερεόν, ἡ δὲ στιγμή ἐν τόπῳ, τὸ δ' ἐν τῷ μήκει ὑπάρχον παρὰ τὰς στιγμάς καὶ τὰς γραμμάς οὐθὲν τῶν προειρημένων, ὥστ'

οὐκ ἔσται ἡ στιγμή τῶν ἐνυπαρχόντων ἐλάχιστον. ἔτι εἰς ὃ ἐλάχιστόν τι τῶν ἐν τῇ οἰκίᾳ, μήτε τῆς οἰκίας συμβαλλομένης πρὸς αὐτὸ λέγεται· ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων· οὐδὲ τὸ ἐν γραμμῇ ἐλάχιστον πρὸς γραμμὴν συγκρινόμενον ἔσται. ὥστε οὐχ ἀρμόσει τὸ ἐλάχιστον, ἐπεὶ τὸ μὴ ὂν ἐν τῇ οἰκίᾳ μὴ ἔστι τῶν ἐν τῇ οἰκίᾳ ἐλάχιστον. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων. ἐνδέχεται γὰρ στιγμήν αὐτὴν καθ' αὐτὴν εἶναι. οὐκ ἔσται κατὰ ταύτης ἀληθὲς εἰπεῖν ὅτι τὸ ἐν γραμμῇ ἐλάχιστον, ὅτι οὐκ ἔστιν ἡ στιγμή ἄρθρον ἀδιαίρετον. τὸ μὲν γὰρ ἄρθρον ἀεὶ δυοῖν ὄρος, ἡ δὲ στιγμή καὶ μιᾶς γραμμῆς ὄρος ἐστίν. ἔτι ἡ μὲν πέρας, τὸ δὲ διαίρεσίς ἐστι μᾶλλον. ἔτι ἡ γραμμὴ καὶ τὸ ἐπίπεδον ἄρθρα ἔσονται· ἀνάλογον γὰρ ἔχουσιν, ὅτι τὸ ἄρθρον διάφορόν πως ἐστίν, διὸ καὶ Ἐμπεδοκλῆς ἐποίησε διὸ δεῖ ὀρθῶς. ἡ δὲ στιγμή καὶ τὸ ἐν τοῖς ἀκινήτοις, ἔτι οὐδεὶς ἔχει ἄπειρα ἄρθρα ἐν τῷ σώματι ἢ τῇ χειρί, στιγμάς δ' ἀπείρους. ἔτι λίθου ἄρθρον οὐκ ἔστιν, οὐδ' ἔχει, στιγμάς δὲ ἔχει.

[974a] Αἴδιον εἶναι φησιν εἴ τί ἐστιν, εἴπερ μὴ ἐνδέχεται γενέσθαι μηδὲν ἐκ μηδενός. εἴτε γὰρ ἅπαντα γέγονεν εἴτε μὴ πάντα αἴδι' ἀμφοτέρως. ἐξ οὐδενός γὰρ αὐτῶν ἂν γινόμενα. ἀπάντων τε γὰρ γινομένων οὐδὲν προϋπάρχειν· εἴτ' ὄντων τινῶν ἀεὶ ἕτερα προσγίνοιτο, πλεόν ἂν καὶ μεῖζον τὸ ἐν γεγονέναι. ὃ δὴ πλεόν καὶ μεῖζον, τοῦτο γενέσθαι ἂν ἐξ οὐδενός· τῷ γὰρ ἐλάττονι τὸ πλεόν, ἢ δ' ἐν τῷ μικροτέρῳ τὸ μεῖζον οὐχ ὑπάρχειν. αἴδιον δὲ ὃν ἅπειρον εἶναι, ὅτι οὐκ ἔχει ἀρχὴν ὅθεν ἐγένετο, οὐδὲ τελευτὴν εἰς ὃ γινόμενον ἐτελεύτησέ ποτε· πᾶν δὲ καὶ ἅπειρον ὃν εἶναι. εἰ γὰρ πλεόν ἢ δύο εἴη, πέρατ' ἂν εἶναι ταῦτα πρὸς ἄλληλα. ἐν δὲ ὅμοιον εἶναι πάντα· εἰ γὰρ ἀνόμοια πλείω ὄντα, οὐκ ἂν ἔτι ἐν θεῖναι ἀλλὰ πολλά. αἴδιον δὲ ὃν μέτριόν τε καὶ ὅμοιον πάντη ἀκίνητον εἶναι τὸ ἐν. οὐ γὰρ ἂν κινήσθαι μὴ ἔς τι ὑποχωρῆσαν. ὑποχωρῆσαι δὲ ἀνάγκη εἶναι ἥτοι εἰς πληρὲς ἰὸν ἢ κενόν. τούτων δὲ τὸ μὲν οὐκ ἂν δέξασθαι τὸ πληρὲς, τὸ δὲ οὐκ εἶναι οὐδὲν [ἢ] τὸ κενόν. τοιοῦτο δὲ ὃν τὸ ἐν ἀνώδυνόν τε καὶ ἀνάλητον ὑγιές τε καὶ ἄνοσον εἶναι, οὔτε μετακοσμούμενον θέσει, οὔτε ἑτεροιούμενον εἶδει, οὔτε μιγνύμενον ἄλλῳ. κατὰ πάντα γὰρ ταῦτα πολλά τε τὸ ἐν γίνεσθαι καὶ τὸ μὴ ὃν τεκνοῦσθαι καὶ τὸ ὃν φθεῖρεσθαι ἀναγκάζεσθαι. ταῦτα δὲ ἀδύνατα εἶναι. καὶ γὰρ εἰ τὸ μεμιχθῆαι τι ἐν ἐκ πλειόνων λέγοιτο, καὶ εἴη πολλά κινούμενα εἰς ἄλληλα τὰ πράγματα, καὶ ἢ μῖξις ἢ ὥς ἐν ἐνὶ σύνθεσις εἴη τῶν πλειόνων, ἢ τῇ ἀπαλλάξει οἷον ἐπιπρόσθησις γίνοιτο τῶν μιχθέντων, ἐκείνους μὲν ἂν δι' ἀλλήλων χωριζόντων εἶναι τὰ μιχθέντα, ἐπιπροσθήσεως δ' οὔσης ἐν τῇ τρίψει γίνεσθαι ἂν ἕκαστον φανερόν, ἀφαιρουμένων [974b] τῶν πρώτων τὰ ὑπ' ἄλληλα τεθέντα τῶν μιχθέντων· ὧν οὐδέτερον συμβαίνειν. διὰ τοῦτον δὲ τὸν τρόπον κἂν εἶναι πολλά κἂν ἡμῖν, ὥς τὸ φαίνεσθαι μόνως. ὥστ' ἐπειδὴ οὐχ οἷόν θ' οὕτως, οὐδὲ πολλά δυνατόν εἶναι τὰ ὄντα, ἀλλὰ ταῦτα δοκεῖν οὐκ ὀρθῶς. πολλά γὰρ καὶ ἄλλα κατὰ τὴν αἴσθησιν φαντάζεσθαι ἅπασαν. λόγον δ' οὗτ' ἀναιρεῖ τὰ αὐτὰ γίνεσθαι, οὔτε πολλά εἶναι τὸ ὄν, ἀλλ' αἴδιόν τε καὶ ἅπειρον καὶ πάντη ὅμοιον αὐτὸ αὐτῷ. ἄρ' οὖν δεῖ πρῶτον μὲν μὴ πᾶσαν λαβόντα δόξαν ἄρχεσθαι, ἀλλ' ἀεὶ μάλιστα ὃν βέβαιον. ὥστ' εἰ μὲν ἅπαντα τὰ δοκοῦντα μὴ ὀρθῶς ὑπολαμβάνεται, οὐθὲν ἴσως προσήκει οὐδὲ τούτῳ προχρησθαι τῷ δόγματι, οὐκ ἂν

Πρῶτον μὲν οὖν λαμβάνει καὶ οὗτος τὸ γινόμενον γίνεσθαι ἐξ ὄντος, ὥσπερ ὁ Μέλισσος. καίτοι τί κωλύει μῆτ' ἐξ ὁμοίου τὸ γινόμενον γίνεσθαι, ἀλλ' ἐκ μὴ ὄντος; ἔτι οὐδὲν μᾶλλον ὁ θεὸς ἀγέννητος ἢ καὶ τᾶλλα πάντα, εἴπερ ἅπαντα ἐξ ὁμοίου ἢ ἀνομοίου γέγονεν· ὅπερ ἀδύνατον. ὥστε ἢ οὐδὲν ἐστὶ παρὰ τὸν θεόν, ἢ καὶ τᾶλλα αἰδία πάντα. ἔτι κράτιστον τὸν θεὸν λαμβάνει, τοῦτο δυνατώτατον καὶ βέλτιστον λέγων. οὐ δοκεῖ δὲ τοῦτο κατὰ τὸν νόμον, ἀλλὰ πολλὰ κρείττους εἶναι ἀλλήλων οἱ θεοί. οὐκ οὖν ἐκ τοῦ δοκοῦντος εἴληφε ταύτην κατὰ τοῦ θεοῦ τὴν ὁμολογίαν. τό τε κράτιστον εἶναι τὸν θεὸν οὐχ οὕτως ὑπολαμβάνων λέγεται ὡς πρὸς ἄλλο τι τοιαύτη ἢ τοῦ θεοῦ φύσις, ἀλλὰ πρὸς τὴν αὐτοῦ διάθεσιν, ἐπεὶ τοί γε πρὸς ἕτερον οὐδὲν ἂν κωλύοι μὴ τῇ αὐτοῦ ἐπιεικείᾳ καὶ ῥώμῃ ὑπερέχειν, ἀλλὰ διὰ τὴν τῶν ἄλλων ἀσθένειαν. θέλοι δ' ἂν οὐδεὶς οὕτω τὸν θεὸν φάναι κράτιστον εἶναι, ἀλλ' ὅτι αὐτὸς ἔχει ὡς οἶόν τε ἄριστα, καὶ οὐδὲν ἐκλείπει καὶ εὖ καὶ καλῶς ἔχειν αὐτῷ· ἅμα γὰρ ἴσως ἔχοντι κάκεῖνο ἂν συμβαίῃ. οὕτω δὲ διακεῖσθαι καὶ πλείους αὐτοὺς ὄντας οὐδὲν κωλύει, ἅπαντας ὡς [978a] οἶόν τε ἄριστα διακειμένους, καὶ κρατίστους τῶν ἄλλων, οὐχ αὐτῶν ὄντας. ἐστὶ δ', ὡς ἔοικε, καὶ ἄλλα. κράτιστον γὰρ εἶναι τὸν θεόν φησι, τοῦτο δὲ τι εἶναι ἀνάγκη, ἓνα τὰ πάντα ὁρᾶν καὶ ἀκούειν οὐδὲν προσήκει· οὐ γὰρ εἰ μὴ καὶ τῇδ' ὁρᾷ, χεῖρον ὁρᾷ ταύτῃ, ἀλλ' οὐχ ὁρᾷ. ἀλλ' ἴσως τοῦτο βούλεται τὸ πάντῃ αἰσθάνεσθαι, ὅτι οὕτως ἂν βέλτιστα ἔχοι, ὅμοιος ὢν πάντῃ. ἔτι τοιοῦτος ὢν διὰ τί σφαιροειδῆς ἂν εἴῃ, ἀλλ' οὐχ ὅτι ἐτέραν τινὰ μᾶλλον ἔχων ιδέαν, ὅτι πάντῃ ἀκούει καὶ πάντῃ κρατεῖ; ὥσπερ γὰρ ὅταν λέγωμεν τὸ ψιμνύθιον ὅτι πάντα ἐστὶ λευκόν, οὐδὲν ἄλλο τι σημαίνομεν ἢ ὅτι ἐν ἅπασιν αὐτοῦ τοῖς μέρεσιν ἐγκέχρωσται ἢ λευκότης· τί δὴ κωλύει οὕτω κάκεῖ τὸ πάντῃ ὁρᾶν καὶ ἀκούειν καὶ κρατεῖν λέγεσθαι, ὅτι ἅπαν ὃ ἂν τις αὐτοῦ λαμβάνῃ μέρος, τοῦτ' ἐστὶ πεπονθός; ὥσπερ δὲ οὐδὲ τὸ ψιμνύθιον, οὐδὲ τὸν θεὸν ἀνάγκη διὰ τοῦτο εἶναι σφαιροειδῆ. ἔτι μήτε ἄπειρον

μήτε πεπεράνθαι σῶμα γε ὃν καὶ ἔχον μέγεθος πῶς οἶόν τε, εἴπερ τοῦτ' ἐστὶν ἄπειρον ὃ ἂν μὴ ἔχη πέρας δεκτικὸν ὃν πέρατος. πέρας δ' ἐν μεγέθει καὶ πλήθει ἐγγίνεται, καὶ ἐν ἅπαντι τῷ ποσῷ, ὥστε ἂν μὴ ἔχη πέρας μέγεθος ὃν, ἄπειρόν ἐστιν. ἔτι δὲ σφαιροειδῇ ὄντα ἀνάγκη πέρας ἔχειν. ἔσχατα γὰρ ἔχει, εἴπερ μέσον ἔχει αὐτοῦ τοῦ πλεῖστον ἀπέχειν. μέσον δ' ἔχει, σφαιροειδὲς ὃν· τοῦτο γάρ ἐστι σφαιροειδὲς ὃ ἐκ τοῦ μέσου ὁμοίως πρὸς τὰ ἔσχατα. σῶμα ἔσχατα ἢ πέρατα ἔχειν, οἶον διαφορεῖ. εἰ γὰρ καὶ τὸ μὴ ὃν ἀπλοῦν, οὐκ ἂν καὶ τὸ ὃν ἄπειρον. τί γὰρ κωλύει ἕνια ταῦτά λεχθῆναι κατὰ τοῦ ὄντος καὶ μὴ ὄντος; τό τε γὰρ ὃν οὐκ ὃν οὐδείς νῦν αἰσθάνεται, καὶ ὃν δέ τις οὐκ ἂν αἰσθάνοιτο νῦν· ἄμφω δὲ λεκτά, ὅπως διανοητά. οὐ λευκὸν δὲ τὸ μὴ ὃν· εἰ οὖν διὰ τοῦτο τὰ ὄντα πάντα λευκά, ὅπως μὴ τι ταῦτο κατὰ τοῦ ὄντος σημαίνωμεν καὶ μὴ ὄντος, ἢ οὐδὲν κωλύει καὶ τῶν ὄντων τι μὴ ὃν εἶναι λευκόν; οὕτω δὲ καὶ ἄλλην ἂν ἀπόφασιν δέξαιτο τὸ ἄπειρον, εἰ μὴ τὸ πάλαι λεχθέντι μᾶλλον, παρὰ τὸ μὴ ἔχειν ἢ μὴ ἔχειν ἐστὶν ἅπαν. ὥστε καὶ τὸ ὃν ἢ ἄπειρον ἢ πέρας ἔχον ἐστίν. ἴσως δὲ ἄτοπον καὶ τὸ προσάπτειν τῷ μὴ ὄντι ἀπειρίαν. οὐ γὰρ πᾶν, εἰ μὴ ἔχει πέρας, ἄπειρον λέγομεν, ὥσπερ οὐδ' ἄνισον οὐκ ἂν φαῖμεν εἶναι τὸ μὴ ὃν. ἔτι οὐκ ἂν ἔχοι ὁ θεὸς πέρας εἰς ὧν, ἀλλ' οὐ πρὸς θεόν. εἰ δὲ ἐν μόνον ἐστίν, ὁ θεὸς ἂν εἴη [978b] μόνον καὶ τὰ τοῦ θεοῦ μέρη. ἐπεὶ καὶ τοῦτ' ἄτοπον, εἰ τοῖς πολλοῖς συμβέβηκε πεπεράνθαι πρὸς ἄλληλα, διὰ τοῦτο τὸ ἐν μὴ ἔχειν πέρας. πολλὰ γὰρ τοῖς πολλοῖς καὶ τῷ ἐνὶ ὑπάρχει ταῦτά, ἐπεὶ καὶ τὸ εἶναι κοινὸν αὐτοῖς ἐστίν. ἄτοπον οὖν ἴσως ἂν εἴη, εἰ διὰ τοῦτο μὴ φαῖμεν εἶναι τὸν θεόν, εἰ τὰ πολλὰ ἐστίν, ὅπως μὴ ὁμοιον ἔσται αὐτοῖς ταύτη. ἔτι τί κωλύει πεπεράνθαι καὶ ἔχειν πέρατα ἐν ὄντα τὸν θεόν; ὥς καὶ ὁ Παρμενίδης λέγει ἐν ὃν εἶναι αὐτὸν πάντοθεν εὐκύκλου σφαίρας ἐναλίγκιον ὄγκῳ, μεσσόθεν ἰσοπαλές. τὸ γὰρ πέρας τινὸς μὲν ἀνάγκη ἴσως εἶναι, οὐ μέντοι πρὸς τι γε, οὐδὲ ἀνάγκη τὸ ἔχον πέρας πρὸς τι ἔχειν πέρας, ὥς πεπερασμένον πρὸς τὸ μὴ ἐφεξῆς ἀπείρου, ἀλλ' ἐστὶ τὸ πεπεράνθαι ἔσχατα ἔχειν, ἔσχατα δ' ἔχον οὐκ ἀνάγκη πρὸς τι ἔχειν. ἐνίοις μὲν οὐ συμβαίνει πᾶν καὶ πεπεράνθαι. πάλιν περὶ τοῦ ἀκίνητον εἶναι τὸ ἐν καὶ τὸ ὃν, ὅτι καὶ τὸ ὃν κινεῖται, ἴσως ὁμοίως τοῖς ἔμπροσθεν ἄτοπον. καὶ ἔτι ἄρά γε οὐ ταῦτο ἂν τις ὑπολάβοι τὸ μὴ κινεῖσθαι καὶ τὸ ἀκίνητον εἶναι, ἀλλὰ τὸ μὲν ἀπόφασιν τοῦ κινεῖσθαι, ὥσπερ τὸ μὴ ἴσον, ὅπερ καὶ κατὰ τοῦ μὴ ὄντος, εἴπερ ἀληθές, τὸ δὲ ἀκίνητον τῷ ἔχειν πῶς ἤδη λέγεσθαι, ὥσπερ τὸ ἄνισον, καὶ ἐπὶ τῷ ἐναντίῳ τοῦ

κινεῖσθαι τῷ ἡρεμεῖν, ὥς καὶ σχεδὸν οἱ ἀπὸ τοῦ α ἀποφάσεις ἐπὶ ἐναντίοις λέγονται. τὸ μὲν οὖν μὴ κινεῖσθαι ἀληθὲς ἐπὶ τοῦ μὴ ὄντος, τὸ δὲ ἡρεμεῖν οὐχ ὑπάρχει τῷ μὴ ὄντι. ὁμοίως δὲ οὐδὲ ἀκίνητον εἶναι σημαίνει ταυτόν. ἀλλ' οὗτος ἐπὶ τῷ ἡρεμεῖν αὐτῷ χρῆται, καὶ φησὶ τὸ μὴ ὄν ἡρεμεῖν, ὅτι οὐκ ἔχει μεταβάσιν. ὅπερ τε καὶ ἐν τοῖς ἄνω εἵπομεν, ἄτοπον ἴσως, εἴ τι τῷ μὴ ὄντι προσάπτομεν, τοῦτο μὴ ἀληθὲς εἶναι κατὰ τοῦ ὄντος εἰπεῖν, ἄλλως τε κἂν ἀπόφασις ἢ τὸ λεχθέν, των καὶ τὸ μὴ κινεῖσθαι μηδὲ μεταλαμβάνειν ἐστίν. πολλὰ γὰρ ἂν, καθάπερ καὶ ἐλέχθη, ἀφαιροῖτο τῶν ὄντων κατηγορεῖ. οὐδὲ γὰρ ἂν πολλὰ ἀληθὲς εἰπεῖν εἴη μὴ ἔν, εἴπερ καὶ τὸ μὴ ὄν ἐστὶ μὴ ἔν, εἴτε ἐπ' ἐνίων τάναντία ξυμβαίνειν δοκεῖ κατὰ τοσαύτας ἀποφάσεις· ὦν ἀνάγκη ἢ ἴσον ἢ ἄνισον, ἂν τι πλῆθος ἢ, καὶ μὴ ὥς ἢ καὶ ἄρτιον ἢ περιττόν, ἂν ἀριθμὸς ἢ. ὁμοίως δὲ ὥς καὶ τὸ ἡρεμεῖν ἢ κινεῖσθαι ἀνάγκη, ἂν σῶμα ἢ. ἔτι εἰ καὶ διὰ τοῦτο μὴ κινεῖται ὁ θεός τε καὶ τὸ ἔν, ὅτι τὰ πολλὰ κινεῖται τῷ [979a] εἰς ἄλληλα ἰέναι, τί κωλύει καὶ τὸν θεὸν κινεῖσθαι εἰς ἄλλο; οὐδα τι μόνον, ἀλλ' ὅτι εἷς μόνος θεός. εἰ δὲ καὶ αὐτός, τί κωλύει εἰς ἄλληλα κινουμένων τῶν μερῶν τοῦ ... κύκλῳ φε... θεόν; οὐ γὰρ δὴ τὸ τοιοῦτον ἔν, ὥσπερ ὁ Ζήνων πολλὰ εἶναι φύσει. αὐτὸς γὰρ σῶμα λέγει εἶναι τὸν θεόν, εἴτε τόδε τὸ πᾶν, εἴτε ὃ τι δήποτε αὐτὸ λέγων. ἀσώματος γὰρ ὦν πῶς ἂν σφαιροειδὲς εἴη ἐπιμόνως, ὅταν οὕτως οὕτ' ἂν κινοῖτο οὕτ' ἂν ἡρεμοῖ μηδαμοῦ γε ὦν; ἐπεὶ δὲ σῶμά ἐστι, τί ἂν αὐτὸ κωλύοι κινεῖσθαι ὥς ἐλέχθη;

ΠΕΡΙ ΓΟΡΓΙΟΥ.

Οὐκ εἶναί φησιν οὐδέν· εἰ δ' ἔστιν, ἄγνωστον εἶναι· εἰ δὲ καὶ ἔστι καὶ γνωστόν, ἄλλ' οὐ δηλωτὸν ἄλλοις. καὶ ὅτι μὲν οὐκ ἔστι, συνθεῖς τὰ ἐτέροις εἰρημένα, ὅσοι περὶ τῶν ὄντων λέγοντες τὰναντία, ὡς δοκοῦσιν, ἀποφαίνονται αὐτοῖς, οἱ μὲν ὅτι ἐν καὶ οὐ πολλά, οἱ δὲ αὖ ὅτι πολλά καὶ οὐχ ἓν, καὶ οἱ μὲν ὅτι ἀγέννητα, οἱ δ' ὡς γενόμενα ἐπιδεικνύντες ταῦτα, συλλογίζεται κατ' ἀμφοτέρων. ἀνάγκη γάρ, φησίν, εἴ τί ἐστι, μήτε ἐν μήτε πολλά εἶναι, μήτε ἀγέννητα μήτε γενόμενα, οὐδὲν ἂν εἴη. εἰ γὰρ μὴ εἴη τι, τούτων ἂν θάτερα εἴη. ὅτι οὐκ ἔστιν οὔτε ἐν οὔτε πολλά, οὔτε ἀγέννητα οὔτε γενόμενα, τὰ μὲν ὡς Μέλισσος, τὰ δὲ ὡς Ζήνων ἐπιχειρεῖ δεικνύειν μετὰ τὴν πρώτην ἴδιον αὐτοῦ ἀποδείξιν, ἐν ἧ λέγει ὅτι οὐκ ἔστιν οὔτε εἶναι οὔτε μὴ εἶναι. εἰ μὲν γὰρ τὸ μὴ εἶναι ἔστι μὴ εἶναι, οὐδὲν ἂν ἦττον, τὸ μὴ ὄν τοῦ ὄντος εἴη. τό τε γὰρ μὴ ὄν ἐστι μὴ ὄν, καὶ τὸ ὄν ὄν, ὥστε οὐδὲν μᾶλλον ἢ εἶναι ἢ οὐκ εἶναι τὰ πράγματα. εἰ δ' ὅμως τὸ μὴ εἶναί ἐστι, τὸ εἶναι, φησίν, οὐκ ἔστι τὸ ἀντικείμενον. εἰ γὰρ τὸ μὴ εἶναί ἐστι, τὸ εἶναι [ἢ] μὴ εἶναι προσήκει. ὥστε οὐκ ἂν οὕτως, φησίν, οὐδὲν ἂν εἴη, εἰ μὴ ταυτόν ἐστιν εἶναί τε καὶ μὴ εἶναι. εἰ δὲ ταυτό, καὶ οὕτως οὐκ ἂν εἴη οὐδέν· τό τε γὰρ μὴ ὄν οὐκ ἔστι καὶ τὸ ὄν, ἐπείπερ ταὐτὸ τῷ μὴ ὄντι. οὗτος μὲν οὖν ὁ αὐτὸς λόγος ἐκείνου.

Οὐδαμῶθεν δὲ συμβαίνει ἐξ ὧν εἴρηκεν, μηδὲν εἶναι. ἃ γὰρ καὶ ἀποδείκνυσιν, οὕτως διαλέγεται. εἰ τὸ μὴ ὄν ἐστιν ἢ ἔστιν, ἀπλῶς εἰπεῖν εἴη, καὶ ἔστιν ὅμοιον μὴ ὄν. τοῦτο δὲ οὔτε φαίνεται οὕτως οὔτε ἀνάγκη, ἀλλ' ὥσπερ εἰ δυοῖν, ὄντος, τοῦ δ' οὐκ ὄντος, τὸ μὲν ἔστι, τὸ δ' οὐκ ἀληθές, ὅτι ἐστὶ [979b] τὸ μὲν μὴ ὄν. διότι οὖν οὐκ ἔστιν, οὔτε εἶναι οὔτε μὴ εἶναι τὰ ἄμφω οὐθ' ἕτερον οὐκ ἔστιν. οὐδὲν γάρ, φησίν, εἴη ἂν τὸ μὴ εἶναι τοῦ εἶναι, εἴπερ εἴη τι καὶ τὸ μὴ εἶναι. οὐδεὶς φησιν εἶναι τὸ μὴ εἶναι οὐδαμῶς. εἰ δὲ καὶ ἔστι τὸ μὴ ὄν μὴ ὄν, οὐδ' οὕτως ὁμοίως ἂν εἴη τὸ μὴ ὄν τῷ ὄντι· τὸ μὲν γὰρ ἐστι μὴ ὄν, τὸ δὲ καὶ ἔστιν ἔτι. εἰ δὲ καὶ ἀπλῶς εἰπεῖν ἀληθές, ὡς δὴ θαυμάσιόν τ' ἂν εἴη τὸ μὴ ὄν ἐστιν. ἀλλ' εἰ δὴ οὕτω, πότερον μᾶλλον ξυμβαίνει τὰ πάντα εἶναι ἢ μὴ εἶναι; αὐτὸ γὰρ οὕτω γε τοῦναντίον ἔοικε γίνεσθαι. εἰ γὰρ τό τε μὴ ὄν ἐστι καὶ τὸ ὄν ὄν ἐστιν, ἅπαντά ἐστιν. καὶ γὰρ τὰ ὄντα καὶ τὰ μὴ ὄντα ἐστίν. οὐκ ἀνάγκη γάρ, εἰ τὸ μὴ ὄν ἐστι, καὶ τὸ ὄν μὴ εἶναι. εἰ δὴ καὶ οὕτω τις συγχωρεῖ, καὶ τὸ

μὲν μὴ ὄν εἶη, τὸ δὲ ὄν μὴ εἶη, ὅμως οὐδὲν ἦττον εἶη ἂν· τὰ γὰρ μὴ ὄντα εἶη κατὰ τὸν ἐκείνου λόγον. εἰ δὲ ταυτὸν ἐστὶ καὶ τὸ εἶναι καὶ τὸ μὴ εἶναι, οὐδ’ οὕτως μᾶλλον οὐκ [εἶη] ἂν τι εἶη. ὥς γὰρ κάκεῖνος λέγει, ὅτι εἰ ταυτὸν μὴ ὄν καὶ ὄν, τό τε ὄν οὐκ ἔστι καὶ τὸ μὴ ὄν. ὥστε οὐδὲν ἐστίν, ἀντιστρέψαντι ἔστιν ὁμοίως φάναι ὅτι πάντα ἐστίν. τό τε γὰρ μὴ ὄν ἐστὶ καὶ τὸ ὄν, ὥστε πάντα ἐστίν. μετὰ δὲ τοῦτον τὸν λόγον φησίν· εἰ δὲ ἔστιν, ἦτοι ἀγέννητον ἢ γενόμενον εἶναι. καὶ εἰ μὲν ἀγέννητον, ἄπειρον αὐτὸ τοῖς τοῦ Μελίσσου ἀξιώμασι λαμβάνει· τὸ δ’ ἄπειρον οὐκ ἂν εἶναι ποτε. οὔτε γὰρ ἐν αὐτῷ οὐτ’ ἂν ἐν ἄλλῳ εἶναι· δύο γὰρ ἂν οὕτως ἢ πλείω εἶναι, τό τε ἐνὸν καὶ τὸ ἐν ᾧ, μηδαμοῦ δὲ ὄν οὐδὲ εἶναι κατὰ τὸν Ζήνωνος λόγον περὶ τῆς χώρας. ἀγέννητον μὲν οὖν διὰ ταῦτ’ οὐκ εἶναι, οὐ μὴν οὐδὲ γενόμενον. γενέσθαι γοῦν οὐδὲν ἂν οὐτ’ ἐξ ὄντος οὐτ’ ἐκ μὴ ὄντος. εἰ γὰρ τὸ ὄν μεταπέσοι, οὐκ ἂν ἔτ’ εἶναι τὸ ὄν, ὥσπερ γ’ εἰ καὶ τὸ μὴ ὄν γένοιτο, οὐκ ἂν ἔτι εἶη μὴ ὄν. οὐδὲ μὴν οὐδ’ ἐξ ὄντος ἂν γενέσθαι. εἰ μὲν γὰρ μὴ ἐστὶ τὸ μὴ ὄν, οὐδὲν ἂν ἐκ μηδενὸς ἂν γενέσθαι· εἰ δ’ ἔστι τὸ μὴ ὄν, δι’ ἅπερ οὐδ’ ἐκ τοῦ ὄντος, διὰ ταῦτα οὐδ’ ἐκ τοῦ μὴ ὄντος γενέσθαι. εἰ οὖν ἀνάγκη μὲν, εἵπερ ἔστι τι, ἦτοι ἀγέννητον εἶναι ἢ γενόμενον, ταῦτα δὲ ἀδύνατόν τι καὶ εἶναι. ἔτι εἵπερ ἔστιν, ἐν ἢ πλείω, φησίν, ἐστίν· εἴτε μήτε ἐν μήτε πολλά, οὐδὲν ἂν εἶη. καὶ ἐν μὲν ... καὶ ὅτι ἀσώματον ἂν εἶη τὸ ἐν ἢ ἐνσυχονμέν γε τῷ τοῦ Ζήνωνος λόγου. ἐνὸς δὲ ὄντος οὐδ’ ἂν ... εἶναι οὐδὲ μὴ ... μήτε πολλά. εἰ γὰρ μήτε ἐν μήτε [980a] πολλά ἐστίν, οὐδ’ ἂν κινηθῆναί φησιν. οὐδενὶ γὰρ κινηθεῖν, ἢ οὐκ ἂν ἔτι, ἢ ὡσαύτως ἔχον, ἀλλὰ τὸ μὲν οὐκ ἂν εἶη, τὸ δ’ οὐκ ὄν γεγονὸς εἶη. ἔτι δὲ ἢ κινεῖ ἢ κινεῖται, καὶ εἰ μεταφέρεται οὐ συνεχές ὄν, διήρηται τὸ ὄν, οὔτε τι ταύτῃ· ὥστε πάντῃ κινεῖται, πάντῃ διήρηται. εἰ δ’ οὕτως, πάντα οὐκ ἔστιν. ἐκλιπὲς γὰρ ταύτῃ, φησίν, ἢ διήρηται, τοῦ ὄντος, ἀντὶ τοῦ κενοῦ τὸ διηρῆσθαι λέγων, καθάπερ ἐν τοῖς Λευκίππου καλουμένοις λόγοις γέγραπται. εἰ μὲν οὖν οὐδέν, τὰς ἀποδείξεις λέγειν ἅπαντα. δεῖ γὰρ τὰ φρονούμενα εἶναι, καὶ τὸ μὴ ὄν, εἵπερ μὴ ἐστὶ, μηδὲ φρονεῖσθαι. εἰ δ’ οὕτως, οὐδὲν ἂν εἶναι ψεῦδος οὐδεὶς φησιν, οὐδ’ εἰ ἐν τῷ πελάγει φαίη ἀμιλλᾶσθαι ἄρματα. πάντα γὰρ ἂν ταῦτα εἶη. καὶ γὰρ τὰ ὁρώμενα καὶ ἀκουόμενα διὰ τοῦτό ἐστιν, ὅτι φρονεῖται ἕκαστα αὐτῶν· εἰ δὲ μὴ διὰ τοῦτο, ἀλλ’ ὥσπερ οὐδὲν μᾶλλον ἢ ὁρῶμεν ἐστίν, οὕτω μᾶλλον ἢ ὁρῶμεν ἢ διανοούμεθα. καὶ γὰρ ὥσπερ ἐκεῖ πολλοὶ ἂν ταῦτα ἴδοιεν, καὶ ἐνταῦθα πολλοὶ ἂν ταῦτα διανοηθεῖμεν. τὸ οὖν μᾶλλον δὴ

τοιᾷδ' ἐστί, ποῖα δὲ τάληθῃ, ἄδηλον. ὥστε καὶ εἰ ἔστιν, ἡμῖν γε ἄγνωστα εἶναι τὰ πράγματα. εἰ δὲ καὶ γνωστά, πῶς ἂν τις, φησί, δηλώσειεν ἄλλω; ὁ γὰρ εἶδε, πῶς ἂν τις, φησί, τοῦτο εἴποι λόγῳ; ἢ πῶς ἂν ἐκείνῳ δῆλον ἀκούσαντι γίγνοιτο, μὴ ἰδόντι; [980b] ὥσπερ γὰρ οὐδὲ ἡ ὄψις τοὺς φθόγγους γινώσκει, οὕτως οὐδὲ ἡ ἀκοὴ τὰ χρώματα ἀκούει, ἀλλὰ φθόγγους· καὶ λέγει ὁ λέγων, ἀλλ' οὐ χρῶμα οὐδὲ πρᾶγμα. ὁ οὖν τις μὴ ἐννοεῖ, πῶς αἰτεῖ παρ' ἄλλου λόγῳ ἢ σημείῳ τινὶ ἐτέρου πράγματος ἐννοήσειεν, ἀλλ' ἢ ἐὰν μὲν χρῶμα ἰδὼν, ἐὰν δὲ μος. ἀρχὴν γὰρ οὐ λέγε γοεὶ δὲ χρῶμα, ἀλλὰ λόγον, ὥστ' οὐδὲ διανοεῖσθαι χρῶμα ἔστιν, ἀλλ' ὁρᾶν, οὐδὲ ψόφον, ἀλλ' ἀκούειν. εἰ δὲ καὶ ἐνδέχεται, γινώσκει τε καὶ ἀναγινώσκει λέγων. ἀλλὰ πῶς ὁ ἀκούων τὸ αὐτὸ ἐννοήσει; οὐ γὰρ οἷόν τε τὸ αὐτὸ ἅμα ἐν πλείοσι καὶ χωρὶς οὖσιν εἶναι· δύο γὰρ ἂν εἴη τὸ ἓν. εἰ δὲ καὶ εἴη, φησὶν, ἐν πλείοσι καὶ ταυτόν, οὐδὲν κωλύει μὴ ὅμοιον φαίνεσθαι αὐτοῖς, μὴ πάντῃ ὁμοίοις ἐκείνοις οὖσιν καὶ ἐν τῷ αὐτῷ, εἴ τι ἐν τοιούτου εἴησαν, ἀλλ' οὐ δύο εἶεν. φαίνεται δὲ οὐδ' αὐτὸς αὐτῷ ὅμοια αἰσθανόμενος ἐν τῷ αὐτῷ χρόνῳ, ἀλλ' ἕτερα τῇ ἀκοῇ καὶ τῇ ὄψει, καὶ νῦν τε καὶ πάλαι διαφόρως. ὥστε σχολῇ ἄλλῳ πᾶν ταῦτ' αἰσθητόν τις. οὕτως οὐκ ἔστιν, ἓν ἔστι γνωστόν, οὐδεὶς ἂν αὐτὸ ἐτέρῳ δηλώσειεν, διὰ τε τὸ μὴ εἶναι τὰ πράγματα λεκτά, καὶ ὅτι οὐδεὶς ἕτερον ἐτέρῳ ταυτόν ἐννοεῖ. ἅπαντες δὲ καὶ οὕτως ἐτέρων ἀρχαιοτέρων εἰσὶν ἀπορίαι, ὥστε ἐν τῇ περὶ ἐκείνων σκέψει καὶ ταῦτα ἐξεταστέον.

[980a] Πάντες ἄνθρωποι τοῦ εἰδέναι ὀρέγονται φύσει. σημεῖον δ' ἡ τῶν αἰσθήσεων ἀγάπησις· καὶ γὰρ χωρὶς τῆς χρείας ἀγαπῶνται δι' αὐτάς, καὶ μάλιστα τῶν ἄλλων ἢ διὰ τῶν ὁμμάτων. οὐ γὰρ μόνον ἵνα πράττωμεν ἀλλὰ καὶ μηθὲν μέλλοντες πράττειν τὸ ὄραν αἰρούμεθα ἀντὶ πάντων ὥς εἰπεῖν τῶν ἄλλων. αἴτιον δ' ὅτι μάλιστα ποιεῖ γνωρίζειν ἡμᾶς αὕτη τῶν αἰσθήσεων καὶ πολλὰς δηλοῖ διαφοράς. φύσει μὲν οὖν αἴσθησιν ἔχοντα γίνεταί τὰ ζῶα, ἐκ δὲ ταύτης τοῖς μὲν αὐτῶν οὐκ ἐγγίγνεται μνήμη, τοῖς δ' ἐγγίγνεται.

[980b] καὶ διὰ τοῦτο ταῦτα φρονιμώτερα καὶ μαθητικώτερα τῶν μὴ δυναμένων μνημονεύειν ἐστί, φρόνιμα μὲν ἄνευ τοῦ μανθάνειν ὅσα μὴ δύναται τῶν ψόφων ἀκούειν (οἷον μέλιττα κἂν εἴ τι τοιοῦτον ἄλλο γένος ζώων ἔστι), μανθάνει δ' ὅσα πρὸς τῇ μνήμῃ καὶ ταύτην ἔχει τὴν αἴσθησιν. τὰ μὲν οὖν ἄλλα ταῖς φαντασίαις ζῇ καὶ ταῖς μνήμαις, ἐμπειρίας δὲ μετέχει μικρόν· τὸ δὲ τῶν ἀνθρώπων γένος καὶ τέχνη καὶ λογισμοῖς. γίγνεται δ' ἐκ τῆς μνήμης ἐμπειρία τοῖς ἀνθρώποις· αἱ γὰρ πολλαὶ μνήμαι τοῦ αὐτοῦ πράγματος [981a] μιᾶς ἐμπειρίας δύναμιν ἀποτελοῦσιν. καὶ δοκεῖ σχεδὸν ἐπιστήμη καὶ τέχνη ὅμοιον εἶναι καὶ ἐμπειρία, ἀποβαίνει δ' ἐπιστήμη καὶ τέχνη διὰ τῆς ἐμπειρίας τοῖς ἀνθρώποις· ἡ μὲν γὰρ ἐμπειρία τέχνην ἐποίησεν, ὥς φησὶ Πῶλος, ἡ δ' ἀπειρία τύχην. γίγνεται δὲ τέχνη ὅταν ἐκ πολλῶν τῆς ἐμπειρίας ἐννοημάτων μία καθόλου γένηται περὶ τῶν ὁμοίων ὑπόληψις. τὸ μὲν γὰρ ἔχειν ὑπόληψιν ὅτι Καλλία κάμνοντι τὴνδὲ τὴν νόσον τοδὶ συνήνεγκε καὶ Σωκράτει καὶ καθ' ἕκαστον οὕτω πολλοῖς, ἐμπειρίας ἐστίν· τὸ δ' ὅτι πᾶσι τοῖς τοιοῖσδε κατ' εἶδος ἐν ἀφορισθεῖσι, κάμνουσι τὴνδὲ τὴν νόσον, συνήνεγκεν, οἷον τοῖς φλεγματώδεσιν ἢ χολώδεσι [ἢ] πυρέττουσι καύσῳ, τέχνης. - πρὸς μὲν οὖν τὸ πράττειν ἐμπειρία τέχνης οὐδὲν δοκεῖ διαφέρειν, ἀλλὰ καὶ μᾶλλον ἐπιτυχᾶνουσιν οἱ ἐμπειροὶ τῶν ἄνευ τῆς ἐμπειρίας λόγον ἐχόντων (αἴτιον δ' ὅτι ἡ μὲν ἐμπειρία τῶν καθ' ἕκαστόν ἐστι γνῶσις ἡ δὲ τέχνη τῶν καθόλου, αἱ δὲ πράξεις καὶ αἱ γενέσεις πᾶσαι περὶ τὸ καθ' ἕκαστόν εἰσιν· οὐ γὰρ ἄνθρωπον ὑγιάζει ὁ ἰατροῦ ἄλλ' ἢ κατὰ συμβεβηκός, ἀλλὰ Καλλίαν ἢ Σωκράτην ἢ τῶν ἄλλων τινὰ τῶν οὕτω λεγομένων ᾧ συμβέβηκεν ἀνθρώπῳ εἶναι· ἐὰν οὖν ἄνευ τῆς ἐμπειρίας ἔχη τις τὸν λόγον, καὶ τὸ καθόλου μὲν γνωρίζῃ τὸ

ἐν ἀλλ' αὐτό τι ἔν, ἂν διδῷ τις πάντα· καὶ οὐδὲ τοῦτο, εἰ μὴ γένος δώσῃ τὸ καθόλου εἶναι· τοῦτο δ' ἐν ἐνίοις ἀδύνατον. οὐθένα δ' ἔχει λόγον οὐδὲ τὰ μετὰ τοὺς ἀριθμοὺς μήκη τε καὶ ἐπίπεδα καὶ στερεά, οὔτε ὅπως ἔστιν ἢ ἔσται οὔτε τίνα ἔχει δύναμιν· ταῦτα γὰρ οὔτε εἶδη οἷόν τε εἶναι (οὐ γὰρ εἰσιν ἀριθμοί) οὔτε τὰ μεταξύ (μαθηματικὰ γὰρ ἐκεῖνα) οὔτε τὰ φθαρτά, ἀλλὰ πάλιν τέταρτον ἄλλο φαίνεται τοῦτό τι γένος. ὅλως τε τὸ τῶν ὄντων ζητεῖν στοιχεῖα μὴ διελόντας, πολλαχῶς λεγομένων, ἀδύνατον εὐρεῖν, ἄλλως τε καὶ τοῦτον τὸν τρόπον ζητοῦντας ἐξ οἷων ἐστὶ στοιχείων. ἐκ τίνων γὰρ τὸ ποιεῖν ἢ πάσχειν ἢ τὸ εὐθύ, οὐκ ἔστι δήπου λαβεῖν, ἀλλ' εἴπερ, τῶν οὐσιῶν μόνον ἐνδέχεται· ὥστε τὸ τῶν ὄντων ἀπάντων τὰ στοιχεῖα ἢ ζητεῖν ἢ οἶεσθαι ἔχειν οὐκ ἀληθές. πῶς δ' ἂν τις καὶ μάθοι τὰ τῶν πάντων στοιχεῖα; δηλον γὰρ ὡς οὐθὲν οἷόν τε προϋπάρχειν γνωρίζοντα πρότερον. ὥσπερ γὰρ τῷ γεωμετρεῖν μανθάνοντι ἄλλα μὲν ἐνδέχεται προειδέναι, ὧν δὲ ἡ ἐπιστήμη καὶ περὶ ὧν μέλλει μανθάνειν οὐθὲν προγιγνώσκει, οὕτω δὴ καὶ ἐπὶ τῶν ἄλλων, ὥστ' εἰ τις τῶν πάντων ἔστιν ἐπιστήμη, οἷαν δὴ τινὲς φασιν, οὐθὲν ἂν προϋπάρχοι γνωρίζων οὗτος. καίτοι πᾶσα μάθησις διὰ προγιγνώσκομένων ἢ πάντων ἢ τινῶν ἐστί, καὶ ἡ δι' ἀποδείξεως «καὶ» ἢ δι' ὀρισμῶν (δεῖ γὰρ ἐξ ὧν ὁ ὀρισμὸς προειδέναι καὶ εἶναι γνώριμα)· ὁμοίως δὲ καὶ ἡ δι' ἐπαγωγῆς. ἀλλὰ μὴν [993a] εἰ καὶ τυγχάνοι σύμφυτος οὕσα, θαυμαστὸν πῶς λανθάνομεν ἔχοντες τὴν κρατίστην τῶν ἐπιστημῶν. ἔτι πῶς τις γνωριεῖ ἐκ τίνων ἐστί, καὶ πῶς ἔσται δηλον; καὶ γὰρ τοῦτ' ἔχει ἀπορίαν· ἀμφισβητήσῃε γὰρ ἂν τις ὥσπερ καὶ περὶ ἐνίας συλλαβάς· οἱ μὲν γὰρ τὸ ζα ἐκ τοῦ σ καὶ δ καὶ α φασὶν εἶναι, οἱ δὲ τινες ἕτερον φθόγγον φασὶν εἶναι καὶ οὐθένα τῶν γνωρίμων. ἔτι δὲ ὧν ἐστὶν αἰσθησις, ταῦτα πῶς ἂν τις μὴ ἔχων τὴν αἰσθησιν γνοίῃ; καίτοι ἔδει, εἴγε πάντων ταῦτα στοιχεῖα ἐστὶν ἐξ ὧν, ὥσπερ αἱ σύνθετοι φωναὶ εἰσιν ἐκ τῶν οἰκείων στοιχείων.

Ὅτι μὲν οὖν τὰς εἰρημένους ἐν τοῖς φυσικοῖς αἰτίας ζητεῖν ἐοίκασι πάντες, καὶ τούτων ἐκτὸς οὐδεμίαν ἔχοιμεν ἂν εἰπεῖν, δηλον καὶ ἐκ τῶν πρότερον εἰρημένων· ἀλλ' ἀμυδρῶς ταύτας, καὶ τρόπον μὲν τινα πᾶσαι πρότερον εἴρηνται τρόπον δὲ τινα οὐδαμῶς. ψελλιζομένη γὰρ ἔοικεν ἡ πρώτη φιλοσοφία περὶ πάντων, ἅτε νέα τε καὶ κατ' ἀρχὰς οὕσα [καὶ τὸ πρῶτον], ἐπεὶ καὶ Ἐμπεδοκλῆς ὁστοῦν τῷ λόγῳ φησὶν εἶναι, τοῦτο δ' ἐστὶ τὸ τί ἦν εἶναι καὶ ἡ οὐσία τοῦ πράγματος. ἀλλὰ μὴν ὁμοίως ἀναγκαῖον καὶ σάρκας καὶ τῶν ἄλλων

ἕκαστον εἶναι τὸν λόγον, ἢ μηδὲ ἓν· διὰ τοῦτο γὰρ καὶ σὰρξ καὶ ὀστοῦν ἔσται καὶ τῶν ἄλλων ἕκαστον καὶ οὐ διὰ τὴν ὕλην, ἣν ἐκεῖνος λέγει, πῦρ καὶ γῆν καὶ ὕδωρ καὶ ἀέρα. ἀλλὰ ταῦτα ἄλλου μὲν λέγοντος συνέφησεν ἂν ἐξ ἀνάγκης, σαφῶς δὲ οὐκ εἴρηκεν. περὶ μὲν οὖν τούτων δεδήλωται καὶ πρότερον· ὅσα δὲ περὶ τῶν αὐτῶν τούτων ἀπορήσειεν ἂν τις, ἐπανέλθωμεν πάλιν· τάχα γὰρ ἂν ἐξ αὐτῶν εὐπορήσαιμὲν τι πρὸς τὰς ὕστερον ἀπορίας.

Α ΕΛΑΤΤΟΝ

Ἡ περὶ τῆς ἀληθείας θεωρία τῇ μὲν χαλεπῇ τῇ δὲ ῥαδία. σημεῖον δὲ τὸ μήτ' ἀξίως μηδὲνα δύνασθαι θιγεῖν [993b] αὐτῆς μήτε πάντας ἀποτυγχάνειν, ἀλλ' ἕκαστον λέγειν τι περὶ τῆς φύσεως, καὶ καθ' ἓνα μὲν ἢ μηθὲν ἢ μικρὸν ἐπιβάλλειν αὐτῇ, ἐκ πάντων δὲ συναθροισζομένων γίνεσθαι τι μέγεθος· ὥστ' εἴπερ ἔοικεν ἔχειν καθάπερ τυγχάνομεν παροιμιαζόμενοι, τίς ἂν θύρας ἀμάρτοι; ταύτη μὲν ἂν εἴη ῥαδία, τὸ δ' ὅλον τι ἔχειν καὶ μέρος μὴ δύνασθαι δηλοῖ τὸ χαλεπὸν αὐτῆς. ἴσως δὲ καὶ τῆς χαλεπότητος οὕσης κατὰ δύο τρόπους, οὐκ ἐν τοῖς πράγμασιν ἀλλ' ἐν ἡμῖν τὸ αἴτιον αὐτῆς· ὥσπερ γὰρ τὰ τῶν νυκτερίδων ὄμματα πρὸς τὸ φέγγος ἔχει τὸ μεθ' ἡμέραν, οὕτω καὶ τῆς ἡμετέρας ψυχῆς ὁ νοῦς πρὸς τὰ τῇ φύσει φανερώτατα πάντων. οὐ μόνον δὲ χάριν ἔχειν δίκαιον τούτοις ὧν ἂν τις κοινώσαιτο ταῖς δόξαις, ἀλλὰ καὶ τοῖς ἐπιπολαιότερον ἀποφηναμένοις· καὶ γὰρ οὗτοι συνεβάλλοντό τι· τὴν γὰρ ἔξιν προήσκησαν ἡμῶν· εἰ μὲν γὰρ Τιμόθεος μὴ ἐγένετο, πολλὴν ἂν μελοποιῖαν οὐκ εἶχομεν· εἰ δὲ μὴ Φρῦνις, Τιμόθεος οὐκ ἂν ἐγένετο. τὸν αὐτὸν δὲ τρόπον καὶ ἐπὶ τῶν περὶ τῆς ἀληθείας ἀποφηναμένων· παρὰ μὲν γὰρ ἐνίων παρειλήφαμέν τινας δόξας, οἱ δὲ τοῦ γενέσθαι τούτους αἴτιοι γεγόνασιν. ὀρθῶς δ' ἔχει καὶ τὸ καλεῖσθαι τὴν φιλοσοφίαν ἐπιστήμην τῆς ἀληθείας. θεωρητικῆς μὲν γὰρ τέλος ἀλήθεια πρακτικῆς δ' ἔργον· καὶ γὰρ ἂν τὸ πῶς ἔχει σκοπῶσιν, οὐ τὸ αἶδιον ἀλλ' ὃ πρὸς τι καὶ νῦν θεωροῦσιν οἱ πρακτικοί. οὐκ ἴσμεν δὲ τὸ ἀληθὲς ἄνευ τῆς αἰτίας· ἕκαστον δὲ μάλιστα αὐτὸ τῶν ἄλλων καθ' ὃ καὶ τοῖς ἄλλοις ὑπάρχει τὸ συνώνυμον (οἷον τὸ πῦρ θερμότατον· καὶ γὰρ τοῖς ἄλλοις τὸ αἴτιον τοῦτο τῆς θερμότητος)· ὥστε καὶ ἀληθέστατον τὸ τοῖς ὑστέροις αἴτιον τοῦ ἀληθέσιν εἶναι. διὸ τὰς τῶν ἀεὶ ὄντων ἀρχὰς ἀναγκαῖον ἀεὶ εἶναι ἀληθεστάτας (οὐ γάρ ποτε ἀληθεῖς, οὐδ' ἐκεῖναις αἰτιόν τί ἐστι τοῦ εἶναι, ἀλλ' ἐκεῖναι τοῖς ἄλλοις), ὥστ' ἕκαστον ὡς ἔχει τοῦ εἶναι, οὕτω καὶ τῆς ἀληθείας.

[994a] Ἀλλὰ μὴν ὅτι γ' ἔστιν ἀρχὴ τις καὶ οὐκ ἄπειρα τὰ αἴτια τῶν ὄντων οὐτ' εἰς εὐθυωρίαν οὔτε κατ' εἶδος, δηλόν. οὔτε γὰρ ὡς ἐξ ὕλης τόδ' ἐκ τοῦδε δυνατόν ἰέναι εἰς ἄπειρον (οἷον σάρκα μὲν ἐκ γῆς, γῆν δ' ἐξ ἀέρος, ἀέρα δ' ἐκ πυρός, καὶ τοῦτο μὴ ἴστασθαι), οὔτε ὅθεν ἢ ἀρχὴ τῆς κινήσεως (οἷον τὸν μὲν ἄνθρωπον ὑπὸ τοῦ ἀέρος

κινηθῆναι, τοῦτον δ' ὑπὸ τοῦ ἡλίου, τὸν δὲ ἡλίον ὑπὸ τοῦ νείκου, καὶ τούτου μηδὲν εἶναι πέρας)· ὁμοίως δὲ οὐδὲ τὸ οὗ ἔνεκα εἰς ἄπειρον οἶόν τε ἰέναι, βάδισιν μὲν ὑγιείας ἔνεκα, ταύτην δ' εὐδαιμονίας, τὴν δ' εὐδαιμονίαν ἄλλου, καὶ οὕτως ἀεὶ ἄλλο ἄλλου ἔνεκεν εἶναι· καὶ ἐπὶ τοῦ τί ἦν εἶναι δ' ὡσαύτως. τῶν γὰρ μέσων, ὧν ἐστὶ τι ἔσχατον καὶ πρότερον, ἀναγκαῖον εἶναι τὸ πρότερον αἴτιον τῶν μετ' αὐτό. εἰ γὰρ εἰπεῖν ἡμᾶς δέοι τί τῶν τριῶν αἴτιον, τὸ πρῶτον ἐροῦμεν· οὐ γὰρ δὴ τό γ' ἔσχατον, οὐδενὸς γὰρ τὸ τελευταῖον· ἀλλὰ μὴν οὐδὲ τὸ μέσον, ἐνὸς γάρ (οὐθὲν δὲ διαφέρει ἐν ἡ πλείω εἶναι, οὐδ' ἄπειρα ἢ πεπερασμένα). τῶν δ' ἀπείρων τοῦτον τὸν τρόπον καὶ ὅλως τοῦ ἀπείρου πάντα τὰ μόρια μέσα ὁμοίως μέχρι τοῦ νῦν· ὥστ' εἴπερ μηδὲν ἐστὶ πρῶτον, ὅλως αἴτιον οὐδὲν ἐστίν. - ἀλλὰ μὴν οὐδ' ἐπὶ τὸ κάτω οἶόν τε εἰς ἄπειρον ἰέναι, τοῦ ἄνω ἔχοντος ἀρχήν, ὥστ' ἐκ πυρὸς μὲν ὕδωρ, ἐκ δὲ τούτου γῆν, καὶ οὕτως ἀεὶ ἄλλο τι γίνεσθαι γένος. διχῶς γὰρ γίνεταί τὸδε ἐκ τοῦδε - μὴ ὡς τὸδε λέγεται μετὰ τὸδε, οἶον ἐξ Ἰσθμίων Ὀλύμπια, ἀλλ' ἢ ὡς ἐκ παιδὸς ἀνὴρ μεταβάλλοντος ἢ ὡς ἐξ ὕδατος ἀήρ. ὡς μὲν οὖν ἐκ παιδὸς ἄνδρα γίνεσθαι φαμεν, ὡς ἐκ τοῦ γιγνομένου τὸ γεγονὸς ἢ ἐκ τοῦ ἐπιτελουμένου τὸ τετελεσμένον (ἀεὶ γὰρ ἐστὶ μεταξύ, ὥσπερ τοῦ εἶναι καὶ μὴ εἶναι γενεσις, οὕτω καὶ τὸ γιγνόμενον τοῦ ὄντος καὶ μὴ ὄντος· ἐστὶ γὰρ ὁ μανθάνων γιγνόμενος ἐπιστήμων, καὶ τοῦτ' ἐστὶν ὃ λέγεται, ὅτι γίνεταί ἐκ μανθάνοντος ἐπιστήμων)· τὸ δ' ὡς ἐξ ἀέρος ὕδωρ, φθειρομένου θατέρου. διὸ ἐκεῖνα μὲν οὐκ ἀνακάμπει εἰς ἄλληλα, οὐδὲ γίνεταί ἐξ ἀνδρὸς παῖς (οὐ γὰρ γίνεταί [994b] ἐκ τῆς γενέσεως τὸ γιγνόμενον ἀλλ' <ὃ> ἐστὶ μετὰ τὴν γένεσιν· οὕτω γὰρ καὶ ἡμέρα ἐκ τοῦ πρωῒ, ὅτι μετὰ τοῦτο· διὸ οὐδὲ τὸ πρωὶ ἐξ ἡμέρας)· θάτερα δὲ ἀνακάμπει. ἀμφοτέρως δὲ ἀδύνατον εἰς ἄπειρον ἰέναι· τῶν μὲν γὰρ ὄντων μετὰξὺ ἀνάγκη τέλος εἶναι, τὰ δ' εἰς ἄλληλα ἀνακάμπει· ἢ γὰρ θατέρου φθορὰ θατέρου ἐστὶ γένεσις. - ἅμα δὲ καὶ ἀδύνατον τὸ πρῶτον αἰδίον ὃν φθαρῆναι· ἐπεὶ γὰρ οὐκ ἄπειρος ἢ γένεσις ἐπὶ τὸ ἄνω, ἀνάγκη ἐξ οὗ φθαρέντος πρώτου τι ἐγένετο μὴ αἰδίον εἶναι. ἔτι δὲ τὸ οὗ ἔνεκα τέλος, τοιοῦτον δὲ ὃ μὴ ἄλλου ἔνεκα ἀλλὰ τᾶλλα ἐκείνου, ὥστ' εἰ μὲν ἔσται τοιοῦτόν τι ἔσχατον, οὐκ ἔσται ἄπειρον, εἰ δὲ μὴτὲν τοιοῦτον, οὐκ ἔσται τὸ οὗ ἔνεκα, ἀλλ' οἱ τὸ ἄπειρον ποιοῦντες λανθάνουσιν ἐξαιροῦντες τὴν τοῦ ἀγαθοῦ φύσιν (καίτοι οὐθεὶς ἂν ἐγχειρήσειεν οὐδὲν πράττειν μὴ μέλλων ἐπὶ πέρας ἥξειν)· οὐδ' ἂν εἴη νοῦς ἐν τοῖς οὖσιν· ἔνεκα γάρ τινος ἀεὶ

πράττει ὁ γε νοῦν ἔχων, τοῦτο δέ ἐστι πέρας· τὸ γὰρ τέλος πέρας ἐστίν. ἀλλὰ μὴν οὐδὲ τὸ τί ἦν εἶναι ἐνδέχεται ἀνάγεσθαι εἰς ἄλλον ὀρισμὸν πλεονάζοντα τῷ λόγῳ· αἰεὶ τε γὰρ ἔστιν ὁ ἔμπροσθεν μᾶλλον, ὁ δ' ὕστερος οὐκ ἔστιν, οὗ δὲ τὸ πρῶτον μὴ ἔστιν, οὐδὲ τὸ ἐχόμενον· ἔτι τὸ ἐπίστασθαι ἀναιροῦσιν οἱ οὕτως λέγοντες, οὐ γὰρ οἷόν τε εἰδέναι πρὶν εἰς τὰ ἅτομα ἐλθεῖν· καὶ τὸ γινώσκειν οὐκ ἔστιν, τὰ γὰρ οὕτως ἄπειρα πῶς ἐνδέχεται νοεῖν; οὐ γὰρ ὅμοιον ἐπὶ τῆς γραμμῆς, ἢ κατὰ τὰς διαιρέσεις μὲν οὐχ ἴσταται, νοῆσαι δ' οὐκ ἔστι μὴ στήσαντα (διόπερ οὐκ ἀριθμήσει τὰς τομὰς ὁ τὴν ἄπειρον διεξίτων), ἀλλὰ καὶ τὴν ὅλην οὐ κινουμένῳ νοεῖν ἀνάγκη. καὶ ἀπείρῳ οὐδενὶ ἔστιν εἶναι· εἰ δὲ μή, οὐκ ἄπειρόν γ' ἐστὶ τὸ ἀπείρῳ εἶναι. - ἀλλὰ μὴν καὶ εἰ ἄπειρά γ' ἦσαν πλήθει τὰ εἶδη τῶν αἰτίων, οὐκ ἂν ἦν οὐδ' οὕτω τὸ γινώσκειν· τότε γὰρ εἰδέναι οἰόμεθα ὅταν τὰ αἷτια γνωρίσωμεν· τὸ δ' ἄπειρον κατὰ τὴν πρόσθεσιν οὐκ ἔστιν ἐν πεπερασμένῳ διεξελθεῖν.

Αἱ δ' ἀκροάσεις κατὰ τὰ ἔθη συμβαίνουσιν· ὥς γὰρ [995a] εἰώθαμεν οὕτως ἀξιοῦμεν λέγεσθαι, καὶ τὰ παρὰ ταῦτα οὐχ ὅμοια φαίνεται ἀλλὰ διὰ τὴν ἀσυνήθειαν ἀγνωστότερα καὶ ξενικώτερα· τὸ γὰρ σὺνηθες γνώριμον. ἡλικίην δὲ ἰσχὺν ἔχει τὸ σὺνηθες οἱ νόμοι δηλοῦσιν, ἐν οἷς τὰ μυθώδη καὶ παιδαριώδη μείζον ἰσχύει τοῦ γινώσκειν περὶ αὐτῶν διὰ τὸ ἔθος. οἱ μὲν οὖν ἂν μὴ μαθηματικῶς λέγῃ τις οὐκ ἀποδέχονται τῶν λεγόντων, οἱ δ' ἂν μὴ παραδειγματικῶς, οἱ δὲ μάρτυρα ἀξιοῦσιν ἐπάγεσθαι ποιητὴν. καὶ οἱ μὲν πάντα ἀκριβῶς, τοὺς δὲ λυπεῖ τὸ ἀκριβὲς ἢ διὰ τὸ μὴ δύνασθαι συνείρειν ἢ διὰ τὴν μικρολογίαν· ἔχει γάρ τι τὸ ἀκριβὲς τοιοῦτον, ὥστε, καθάπερ ἐπὶ τῶν συμβολαίων, καὶ ἐπὶ τῶν λόγων ἀνελεύθερον εἶναι τισι δοκεῖ. διὸ δεῖ πεπαιδεῦσθαι πῶς ἕκαστα ἀποδεκτέον, ὥς ἅτοπον ἅμα ζητεῖν ἐπιστήμην καὶ τρόπον ἐπιστήμης· ἔστι δ' οὐδὲ θάτερον ῥάδιον λαβεῖν. τὴν δ' ἀκριβολογίαν τὴν μαθηματικὴν οὐκ ἐν ἅπασιν ἀπαιτητέον, ἀλλ' ἐν τοῖς μὴ ἔχουσιν ὕλην. διόπερ οὐ φυσικὸς ὁ τρόπος· ἅπαντα γὰρ ἴσως ἢ φύσις ἔχει ὕλην. διὸ σκεπτέον πρῶτον τί ἐστὶν ἡ φύσις· οὕτω γὰρ καὶ περὶ τίνων ἡ φυσικὴ δῆλον ἔσται [καὶ εἰ μίᾳς ἐπιστήμης ἢ πλειόνων τὰ αἷτια καὶ τὰς ἀρχὰς θεωρησαί ἐστιν].

B

Ανάγκη πρὸς τὴν ἐπιζητουμένην ἐπιστήμην ἐπελθεῖν ἡμᾶς πρῶτον περὶ ὧν ἀπορῆσαι δεῖ πρῶτον· ταῦτα δ' ἐστὶν ὅσα τε περὶ αὐτῶν ἄλλως ὑπεilhάσιν τινες, κἂν εἴ τι χωρὶς τούτων τυγχάνει παρεωραμένον. ἔστι δὲ τοῖς εὐπορῆσαι βουλομένοις προὔργου τὸ διαπορῆσαι καλῶς· ἡ γὰρ ὕστερον εὐπορία λύσις τῶν πρότερον ἀπορουμένων ἐστὶ, λύειν δ' οὐκ ἔστιν ἀγνοοῦντας τὸν δεσμόν, ἀλλ' ἡ τῆς διανοίας ἀπορία δηλοῖ τοῦτο περὶ τοῦ πράγματος· ἡ γὰρ ἀπορεῖ, ταύτη παραπλήσιον πέπονθε τοῖς δεδεμένοις· ἀδύνατον γὰρ ἀμφοτέρως προελθεῖν εἰς τὸ πρόσθεν. διὸ δεῖ τὰς δυσχερείας θεωρηκέναι πάσας πρότερον, τούτων τε χάριν καὶ διὰ τὸ τοὺς ζητοῦντας ἄνευ τοῦ διαπορῆσαι πρῶτον ὁμοίους εἶναι τοῖς ποῖ δεῖ βαδίζειν ἀγνοοῦσι, καὶ πρὸς τούτοις οὐδ' εἴ ποτε τὸ ζητούμενον [995b] εὔρηκεν ἢ μὴ γινώσκειν· τὸ γὰρ τέλος τούτῳ μὲν οὐ δῆλον τῷ δὲ προηπορηκότι δῆλον. ἔτι δὲ βέλτιον ἀνάγκη ἔχειν πρὸς τὸ κρῖναι τὸν ὥσπερ ἀντιδίκων καὶ τῶν ἀμφισβητούντων λόγων ἀκηκοότα πάντων. - ἔστι δ' ἀπορία πρώτη μὲν περὶ ὧν ἐν τοῖς πεφρομισασμένοις διηπορήσαμεν, πότερον μᾶς ἢ πολλῶν ἐπιστημῶν θεωρῆσαι τὰς αἰτίας· καὶ πότερον τὰς τῆς οὐσίας ἀρχὰς τὰς πρώτας ἐστὶ τῆς ἐπιστήμης ἰδεῖν μόνον ἢ καὶ περὶ τῶν ἀρχῶν ἐξ ὧν δεικνύουσι πάντες, οἷον πότερον ἐνδέχεται ταῦτόν καὶ ἐν ἅμα φάναι καὶ ἀποφάναι ἢ οὐ, καὶ περὶ τῶν ἄλλων τῶν τοιούτων· εἴ τ' ἐστὶ περὶ τὴν οὐσίαν, πότερον μία περὶ πάσας ἢ πλείονές εἰσι, κἂν εἰ πλείονες πότερον ἅπασαι συγγενεῖς ἢ τὰς μὲν σοφίας τὰς δὲ ἄλλο τι λεκτέον αὐτῶν. καὶ τοῦτο δ' αὐτὸ τῶν ἀναγκαίων ἐστὶ ζητῆσαι, πότερον τὰς αἰσθητὰς οὐσίας εἶναι μόνον φατέον ἢ καὶ παρὰ ταύτας ἄλλας, καὶ πότερον μοναχῶς ἢ πλείονα γένη τῶν οὐσιῶν, οἷον οἱ ποιοῦντες τὰ τε εἶδη καὶ τὰ μαθηματικὰ μεταξὺ τούτων τε καὶ τῶν αἰσθητῶν. περὶ τε τούτων οὖν, καθάπερ φαμέν, ἐπισκεπτέον, καὶ πότερον περὶ τὰς οὐσίας ἢ θεωρία μόνον ἐστὶν ἢ καὶ περὶ τὰ συμβεβηκότα καθ' αὐτὰ ταῖς οὐσίαις, πρὸς δὲ τούτοις περὶ ταύτου καὶ ἐτέρου καὶ ὁμοίου καὶ ἀνομοίου καὶ ἐναντιότητος, καὶ περὶ προτέρου καὶ ὑστέρου καὶ τῶν ἄλλων ἀπάντων τῶν τοιούτων περὶ ὧν οἱ διαλεκτικοὶ πειρῶνται σκοπεῖν ἐκ τῶν ἐνδόξων μόνων ποιούμενοι τὴν σκέψιν, τίνος ἐστὶ θεωρῆσαι περὶ πάντων· ἔτι δὲ τούτοις αὐτοῖς ὅσα καθ' αὐτὰ

συμβέβηκεν, καὶ μὴ μόνον τί ἐστὶ τούτων ἕκαστον ἀλλὰ καὶ ἄρα ἐν ἐνὶ ἐναντίον· καὶ πότερον αἱ ἀρχαὶ καὶ τὰ στοιχεῖα τὰ γένη ἐστὶν ἢ εἰς ἃ διαιρεῖται ἐνυπάρχοντα ἕκαστον· καὶ εἰ τὰ γένη, πότερον ὅσα ἐπὶ τοῖς ἀτόμοις λέγεται τελευταῖα ἢ τὰ πρῶτα, οἷον πότερον ζῶον ἢ ἄνθρωπος ἀρχή τε καὶ μᾶλλον ἔστι παρὰ τὸ καθ' ἕκαστον. μάλιστα δὲ ζητητέον καὶ πραγματευτέον πότερον ἔστι τι παρὰ τὴν ὕλην αἴτιον καθ' αὐτὸ ἢ οὐ, καὶ τοῦτο χωριστὸν ἢ οὐ, καὶ πότερον ἐν ἢ πλείω τὸν ἀριθμόν, καὶ πότερον ἔστι τι παρὰ τὸ σύνολον (λέγω δὲ τὸ σύνολον, ὅταν κατηγορηθῇ τι τῆς ὕλης) ἢ οὐθέν, ἢ τῶν μὲν τῶν δ' οὐ, καὶ ποῖα τοιαῦτα τῶν ὄντων.

[996a] ἔτι αἱ ἀρχαὶ πότερον ἀριθμῷ ἢ εἶδει ὀρισμέναι, καὶ αἱ ἐν τοῖς λόγοις καὶ αἱ ἐν τῷ ὑποκειμένῳ; καὶ πότερον τῶν φθαρτῶν καὶ ἀφθάρτων αἱ αὐταὶ ἢ ἕτεραι, καὶ πότερον ἀφθαρτοὶ πᾶσαι ἢ τῶν φθαρτῶν φθαρταί; ἔτι δὲ τὸ πάντων χαλεπώτατον καὶ πλείστην ἀπορίαν ἔχον, πότερον τὸ ἐν καὶ τὸ ὄν, καθάπερ οἱ Πυθαγόρειοι καὶ Πλάτων ἔλεγεν, οὐχ ἕτερόν τί ἐστὶν ἀλλ' οὐσία τῶν ὄντων; ἢ οὐ, ἀλλ' ἕτερόν τι τὸ ὑποκείμενον, ὥσπερ Ἐμπεδοκλῆς φησὶ φιλίαν ἄλλος δὲ τις πῦρ ὁ δὲ ὕδωρ ἢ ἀέρα· καὶ πότερον αἱ ἀρχαὶ καθόλου εἰσὶν ἢ ὥς τὰ καθ' ἕκαστα τῶν πραγμάτων, καὶ δυνάμει ἢ ἐνεργείᾳ· ἔτι πότερον ἄλλως ἢ κατὰ κίνησιν· καὶ γὰρ ταῦτα ἀπορίαν ἂν παράσχοι πολλήν. πρὸς δὲ τούτοις πότερον οἱ ἀριθμοὶ καὶ τὰ μήκη καὶ τὰ σχήματα καὶ αἱ στιγμαὶ οὐσίαι τινές εἰσιν ἢ οὐ, καὶ εἰ οὐσίαι πότερον κεχωρισμέναι τῶν αἰσθητῶν ἢ ἐνυπάρχουσαι ἐν τούτοις; περὶ γὰρ τούτων ἀπάντων οὐ μόνον χαλεπὸν τὸ εὐπορεῖσθαι τῆς ἀληθείας ἀλλ' οὐδὲ τὸ διαπορεῖσθαι τῷ λόγῳ ῥᾶδιον καλῶς.

Πρῶτον μὲν οὖν περὶ ὧν πρῶτον εἵπομεν, πότερον μιᾶς ἢ πλειόνων ἐστὶν ἐπιστημῶν θεωρεῖσθαι πάντα τὰ γένη τῶν αἰτίων. μιᾶς μὲν γὰρ ἐπιστήμης πῶς ἂν εἴη μὴ ἐναντίας οὐσας τὰς ἀρχὰς γνωρίζειν; ἔτι δὲ πολλοῖς τῶν ὄντων οὐχ ὑπάρχουσι πᾶσαι· τίνα γὰρ τρόπον οἷόν τε κινήσεως ἀρχὴν εἶναι τοῖς ἀκινήτοις ἢ τὴν ἀγαθοῦ φύσιν, εἶπερ ἅπαν ὃ ἂν ἢ ἀγαθὸν καθ' αὐτὸ καὶ διὰ τὴν αὐτοῦ φύσιν τέλος ἐστὶν καὶ οὕτως αἴτιον ὅτι ἐκείνου ἔνεκα καὶ γίγνεται καὶ ἔστι τᾶλλα, τὸ δὲ τέλος καὶ τὸ οὗ ἔνεκα πράξεώς τινός ἐστὶ τέλος, αἱ δὲ πράξεις πᾶσαι μετὰ κινήσεως; ὥστ' ἐν τοῖς ἀκινήτοις οὐκ ἂν ἐνδέχοιτο ταύτην εἶναι τὴν ἀρχὴν οὐδ' εἶναι τι αὐτοαγαθόν. διὸ καὶ ἐν τοῖς μαθήμασιν οὐθὲν δεικνυταὶ διὰ ταύτης τῆς αἰτίας, οὐδ' ἔστιν ἀπόδειξις οὐδεμία διότι βέλτιον ἢ χεῖρον, ἀλλ' οὐδὲ τὸ παράπαν

μέμνηται οὐθείς οὐθενὸς τῶν τοιούτων, ὥστε διὰ ταῦτα τῶν σοφιστῶν τινὲς οἷον Ἀρίστιππος προεπηλάκιζεν αὐτάς· ἐν μὲν γὰρ ταῖς ἄλλαις τέχναις, καὶ ταῖς βαναύσοις, οἷον ἐν τεκτονικῇ καὶ σκυτικῇ, διότι βέλτιον ἢ χειρόν λέγεσθαι πάντα, τὰς δὲ μαθηματικὰς [996b] οὐθένα ποιεῖσθαι λόγον περὶ ἀγαθῶν καὶ κακῶν. - ἀλλὰ μὴν εἴ γε πλείους ἐπιστῆμαι τῶν αἰτίων εἰσὶ καὶ ἑτέρα ἑτέρας ἀρχῆς, τίνα τούτων φατέον εἶναι τὴν ζητουμένην, ἢ τίνα μάλιστα τοῦ πράγματος τοῦ ζητουμένου ἐπιστήμονα τῶν ἐχόντων αὐτάς; ἐνδέχεται γὰρ τῷ αὐτῷ πάντας τοὺς τρόπους τοὺς τῶν αἰτίων ὑπάρχειν, οἷον οἰκίας ὅθεν μὲν ἡ κίνησις ἡ τέχνη καὶ ὁ οἰκοδόμος, οὗ δ' ἕνεκα τὸ ἔργον, ὕλη δὲ γῆ καὶ λίθοι, τὸ δ' εἶδος ὁ λόγος. ἐκ μὲν οὖν τῶν πάλαι διωρισμένων τίνα χρή καλεῖν τῶν ἐπιστημῶν σοφίαν ἔχει λόγον ἐκάστην προσαγορεύειν· ἢ μὲν γὰρ ἀρχικωτάτη καὶ ἡγεμονικωτάτη καὶ ἢ ὥσπερ δούλας οὐδ' ἀντειπεῖν τὰς ἄλλας ἐπιστήμας δίκαιον, ἢ τοῦ τέλους καὶ ἀγαθοῦ τοιαύτη (τούτου γὰρ ἕνεκα τᾶλλα), ἢ δὲ τῶν πρώτων αἰτίων καὶ τοῦ μάλιστα ἐπιστητοῦ διωρίσθῃ εἶναι, ἢ τῆς οὐσίας ἂν εἴη τοιαύτη· πολλαχῶς γὰρ ἐπισταμένων τὸ αὐτὸ μᾶλλον μὲν εἰδέναι φαμὲν τὸν τῷ εἶναι γνωρίζοντα τί τὸ πρᾶγμα ἢ τῷ μὴ εἶναι, αὐτῶν δὲ τούτων ἕτερον ἑτέρου μᾶλλον, καὶ μάλιστα τὸν τί ἐστὶν ἀλλ' οὐ τὸν πόσον ἢ ποῖον ἢ τί ποιεῖν ἢ ἀσχεῖν πέφυκεν. ἔτι δὲ καὶ ἐν τοῖς ἄλλοις τὸ εἰδέναι ἕκαστον καὶ ὧν ἀποδείξεις εἰσὶ, τότε οἴομεθα ὑπάρχειν ὅταν εἰδῶμεν τί ἐστὶν (οἷον τί ἐστὶ τὸ τετραγωνίζειν, ὅτι μέσης εὐρεσις· ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων), περὶ δὲ τὰς γενέσεις καὶ τὰς πράξεις καὶ περὶ πᾶσαν μεταβολὴν ὅταν εἰδῶμεν τὴν ἀρχὴν τῆς κινήσεως· τοῦτο δ' ἕτερον καὶ ἀντικείμενον τῷ τέλει, ὥστ' ἄλλης ἂν δόξειεν ἐπιστήμης εἶναι τὸ θεωρῆσαι τῶν αἰτίων τούτων ἕκαστον. - ἀλλὰ μὴν καὶ περὶ τῶν ἀποδεικτικῶν ἀρχῶν, πότερον μιᾷ ἐστὶν ἐπιστήμης ἢ πλειόνων, ἀμφισβητήσιμόν ἐστιν (λέγω δὲ ἀποδεικτικὰς τὰς κοινὰς δόξας ἐξ ὧν ἅπαντες δεικνύουσιν) οἷον ὅτι πᾶν ἀναγκαῖον ἢ φάναι ἢ ἀποφάναι, καὶ ἀδύνατον ἅμα εἶναι καὶ μὴ εἶναι, καὶ ὅσαι ἄλλαι τοιαῦται προτάσεις, πότερον μία τούτων ἐπιστήμη καὶ τῆς οὐσίας ἢ ἑτέρα, κἂν εἰ μὴ μία, ποτέραν χρή προσαγορεύειν τὴν ζητουμένην νῦν. μιᾷ μὲν οὖν οὐκ εὐλόγον εἶναι· τί γὰρ μᾶλλον γεωμετρίας ἢ ὅποιασοῦν περὶ τούτων ἐστὶν ἴδιον τὸ ἐπαίειν; εἴπερ οὖν ὁμοίως μὲν ὅποιασοῦν ἐστίν, ἀπασῶν δὲ μὴ ἐνδέχεται, [997a] ὥσπερ οὐδὲ τῶν ἄλλων οὕτως οὐδὲ τῆς γνωριζούσης τὰς οὐσίας ἰδιὸν ἐστὶ τὸ γινώσκειν περὶ αὐτῶν.

ἅμα δὲ καὶ τίνα τρόπον ἔσται αὐτῶν ἐπιστήμη; τί μὲν γὰρ ἕκαστον τούτων τυγχάνει ὄν καὶ νῦν γνωρίζομεν (χρῶνται γοῦν ὡς γινωσκομένοις αὐτοῖς καὶ ἄλλαι τέχναι). εἰ δὲ ἀποδεικτικὴ περὶ αὐτῶν ἐστὶ, δεῖξει τι γένος εἶναι ὑποκείμενον καὶ τὰ μὲν πάθη τὰ δ' ἀξιώματ' αὐτῶν (περὶ πάντων γὰρ ἀδύνατον ἀπόδειξιν εἶναι), ἀνάγκη γὰρ ἕκ τινων εἶναι καὶ περὶ τι καὶ τινῶν τὴν ἀπόδειξιν. ὥστε συμβαίνει πάντων εἶναι γένος ἓν τι τῶν δεικνυμένων, πᾶσαι γὰρ αἱ ἀποδεικτικαὶ χρῶνται τοῖς ἀξιώμασιν. - ἀλλὰ μὴν εἰ ἑτέρα ἢ τῆς οὐσίας καὶ ἡ περὶ τούτων, ποτέρα κυριωτέρα καὶ προτέρα ἐφύκεν αὐτῶν; καθόλου γὰρ μάλιστα καὶ πάντων ἀρχαὶ τὰ ἀξιιώματά ἐστιν, εἴ τ' ἐστὶ μὴ τοῦ φιλοσόφου, τίνος ἔσται περὶ αὐτῶν ἄλλου τὸ θεωρῆσαι τὸ ἀληθὲς καὶ ψεῦδος; - ὅλως τε τῶν οὐσιῶν πότερον μία πασῶν ἐστὶν ἢ πλείους ἐπιστῆμαι; εἰ μὲν οὖν μὴ μία, ποίας οὐσίας θετέον τὴν ἐπιστήμην ταύτην; τὸ δὲ μίαν πασῶν οὐκ εὐλογον. καὶ γὰρ ἂν ἀποδεικτικὴ μία περὶ πάντων εἴη τῶν συμβεβηκότων, εἴπερ πᾶσα ἀποδεικτικὴ περὶ τι ὑποκείμενον θεωρεῖ τὰ καθ' αὐτὰ συμβεβηκότα ἐκ τῶν κοινῶν δοξῶν. περὶ οὖν τὸ αὐτὸ γένος τὰ συμβεβηκότα καθ' αὐτὰ τῆς αὐτῆς ἐστὶ θεωρῆσαι ἐκ τῶν αὐτῶν δοξῶν. περὶ τε γὰρ ὁ μιᾶς καὶ ἐξ ὧν μιᾶς, εἴτε τῆς αὐτῆς εἴτε ἄλλης, ὥστε καὶ τὰ συμβεβηκότα, εἴθ' αὗται θεωροῦσιν εἴτ' ἐκ τούτων μία. - ἔτι δὲ πότερον περὶ τὰς οὐσίας μόνον ἢ θεωρία ἐστὶν ἢ καὶ περὶ τὰ συμβεβηκότα ταύταις; λέγω δ' οἶον, εἰ τὸ στερεὸν οὐσία τίς ἐστι καὶ γραμμαὶ καὶ ἐπίπεδα, πότερον τῆς αὐτῆς ταῦτα γνωρίζειν ἐστὶν ἐπιστήμης καὶ τὰ συμβεβηκότα περὶ ἕκαστον γένος περὶ ὧν αἱ μαθηματικαὶ δεικνύουσιν, ἢ ἄλλης. εἰ μὲν γὰρ τῆς αὐτῆς, ἀποδεικτικὴ τις ἂν εἴη καὶ ἡ τῆς οὐσίας, οὐ δοκεῖ δὲ τοῦ τί ἐστὶν ἀπόδειξις εἶναι. εἰ δ' ἑτέρας, τίς ἔσται ἡ θεωροῦσα περὶ τὴν οὐσίαν τὰ συμβεβηκότα; τοῦτο γὰρ ἀποδοῦναι παγχάλεπον. - ἔτι δὲ πότερον τὰς αἰσθητὰς οὐσίας μόνας εἶναι φατέον ἢ καὶ παρὰ ταύτας ἄλλας, καὶ πότερον μοναχῶς ἢ [997b] πλείω γένη τετύχηκεν ὄντα τῶν οὐσιῶν, οἶον οἱ λέγοντες τά τε εἶδη καὶ τὰ μεταξύ, περὶ ἃ τὰς μαθηματικὰς εἶναι φασιν ἐπιστήμας; ὥς μὲν οὖν λέγομεν τὰ εἶδη αἰτία τε καὶ οὐσίας εἶναι καθ' ἑαυτὰς εἴρηται ἐν τοῖς πρώτοις λόγοις περὶ αὐτῶν. πολλαχῇ δὲ ἐχόντων δυσκολίαν, οὐθενὸς ἤττον ἄτοπον τὸ φάναι μὲν εἶναι τινὰς φύσεις παρὰ τὰς ἐν τῷ οὐρανῷ, ταύτας δὲ τὰς αὐτὰς φάναι τοῖς αἰσθητοῖς πλην ὅτι τὰ μὲν αἴδια τὰ δὲ φθαρτά. αὐτὸ γὰρ ἄνθρωπόν φασιν εἶναι καὶ ἵππον καὶ ὑγίειαν, ἄλλο δ' οὐδέν,

παραπλήσιον ποιούντες τοῖς θεοῖς μὲν εἶναι φάσκουσιν ἀνθρωποειδεῖς δέ· οὔτε γὰρ ἐκεῖνοι οὐδὲν ἄλλο ἐποιοῦν ἢ ἀνθρώπους ἀϊδίους, οὐθ' οὗτοι τὰ εἶδη ἄλλ' ἢ αἰσθητὰ αἶδια. ἔτι δὲ εἰ τις παρὰ τὰ εἶδη καὶ τὰ αἰσθητὰ τὰ μεταξὺ θήσεται, πολλὰς ἀπορίας ἔξει· δῆλον γὰρ ὡς ὁμοίως γραμμαί τε παρὰ τ' αὐτὰς καὶ τὰς αἰσθητὰς ἔσονται καὶ ἕκαστον τῶν ἄλλων γενῶν· ὥστ' ἐπείπερ ἡ ἀστρολογία μία τούτων ἐστίν, ἔσται τις καὶ οὐρανὸς παρὰ τὸν αἰσθητὸν οὐρανὸν καὶ ἥλιός τε καὶ σελήνη καὶ τᾶλλα ὁμοίως τὰ κατὰ τὸν οὐρανόν. καίτοι πῶς δεῖ πιστεῦσαι τούτοις; οὐδὲ γὰρ ἀκίνητον εὐλογον εἶναι, κινούμενον δὲ καὶ παντελῶς ἀδύνατον· ὁμοίως δὲ καὶ περὶ ὧν ἡ ὀπτική πραγματεύεται καὶ ἡ ἐν τοῖς μαθήμασιν ἀρμονική· καὶ γὰρ ταῦτα ἀδύνατον εἶναι παρὰ τὰ αἰσθητὰ διὰ τὰς αὐτὰς αἰτίας· εἰ γὰρ ἔστιν αἰσθητὰ μεταξὺ καὶ αἰσθήσεις, δῆλον ὅτι καὶ ζῶα ἔσονται μεταξὺ αὐτῶν τε καὶ τῶν φθαρτῶν. ἀπορήσειε δ' ἂν τις καὶ περὶ ποῖα τῶν ὄντων δεῖ ζητεῖν ταύτας τὰς ἐπιστήμας. εἰ γὰρ τούτῳ διοίσει τῆς γεωδαισίας ἡ γεωμετρία μόνον, ὅτι ἡ μὲν τούτων ἐστίν ὧν αἰσθανόμεθα ἡ δ' οὐκ αἰσθητῶν, δῆλον ὅτι καὶ παρ' ἱατρικὴν ἔσται τις ἐπιστήμη καὶ παρ' ἐκάστην τῶν ἄλλων μεταξὺ αὐτῆς τε ἱατρικῆς καὶ τῆσδε τῆς ἱατρικῆς· καίτοι πῶς τοῦτο δυνατόν; καὶ γὰρ ἂν ὑγιέν' ἅττα εἴη παρὰ τὰ αἰσθητὰ καὶ αὐτὸ τὸ ὑγιεινόν. ἅμα δὲ οὐδὲ τοῦτο ἀληθές, ὡς ἡ γεωδαισία τῶν αἰσθητῶν ἐστὶ μεγεθῶν καὶ φθαρτῶν· ἐφθείρετο γὰρ ἂν φθειρομένων. - ἀλλὰ μὴν οὐδὲ τῶν αἰσθητῶν ἂν εἴη μεγεθῶν οὐδὲ περὶ τὸν οὐρανὸν ἡ ἀστρολογία τόνδε. οὔτε γὰρ αἱ αἰσθηταὶ [998a] γραμμαὶ τοιαῦταί εἰσιν οἷας λέγει ὁ γεωμέτρης (οὐθὲν γὰρ εὐθὺ τῶν αἰσθητῶν οὕτως οὐδὲ στρογγύλον· ἅπτεται γὰρ τοῦ κανόνος οὐ κατὰ στιγμήν ὁ κύκλος ἄλλ' ὥσπερ Πρωταγόρας ἔλεγεν ἐλέγχων τοὺς γεωμέτρους), οὐθ' αἱ κινήσεις καὶ ἕλικες τοῦ οὐρανοῦ ὅμοιαι περὶ ὧν ἡ ἀστρολογία ποιεῖται τοὺς λόγους, οὔτε τὰ σημεῖα τοῖς ἄστροις τὴν αὐτὴν ἔχει φύσιν. εἰσὶ δὲ τινες οἱ φασιν εἶναι μὲν τὰ μεταξὺ ταῦτα λεγόμενα τῶν τε εἰδῶν καὶ τῶν αἰσθητῶν, οὐ μὴν χωρὶς γε τῶν αἰσθητῶν ἄλλ' ἐν τούτοις· οἷς τὰ συμβαίνοντα ἀδύνατα πάντα μὲν πλείονος λόγου διελθεῖν, ἱκανὸν δὲ καὶ τὰ τοιαῦτα θεωρῆσαι. οὔτε γὰρ ἐπὶ τούτων εὐλογον ἔχειν οὕτω μόνον, ἀλλὰ δῆλον ὅτι καὶ τὰ εἶδη ἐνδέχονται ἂν ἐν τοῖς αἰσθητοῖς εἶναι (τοῦ γὰρ αὐτοῦ λόγου ἀμφοτέρω ταῦτά ἐστιν), ἔτι δὲ δύο στερεὰ ἐν τῷ αὐτῷ ἀναγκαῖον εἶναι τόπῳ, καὶ μὴ εἶναι ἀκίνητα ἐν κινουμένοις γε ὄντα τοῖς αἰσθητοῖς. ὅλως δὲ τίνος ἔνεκ' ἂν τις θεΐη

Περὶ τε τούτων οὖν ἀπορία πολλὴ πῶς δεῖ θέμενον τυχεῖν τῆς ἀληθείας, καὶ περὶ τῶν ἀρχῶν πότερον δεῖ τὰ γένη στοιχεῖα καὶ ἀρχὰς ὑπολαμβάνειν ἢ μᾶλλον ἐξ ὧν ἐνυπαρχόντων ἐστὶν ἕκαστον πρῶτων, οἷον φωνῆς στοιχεῖα καὶ ἀρχαὶ δοκοῦσιν εἶναι ταῦτ' ἐξ ὧν σύγκεινται αἱ φωναὶ πρῶτων, ἀλλ' οὐ τὸ κοινὸν ἢ φωνή· καὶ τῶν διαγραμμάτων ταῦτα στοιχεῖα λέγομεν ὧν αἱ ἀποδείξεις ἐνυπάρχουσιν ἐν ταῖς τῶν ἄλλων ἀποδείξεσιν ἢ πάντων ἢ τῶν πλείστων, ἔτι δὲ τῶν σωμάτων καὶ οἱ πλείω λέγοντες εἶναι στοιχεῖα καὶ οἱ ἓν, ἐξ ὧν σύγκειται καὶ ἐξ ὧν συνέστηκεν ἀρχὰς λέγουσιν εἶναι, οἷον Ἐμπεδοκλῆς πῦρ καὶ ὕδωρ καὶ τὰ μετὰ τούτων στοιχεῖά φησιν εἶναι ἐξ ὧν ἐστὶ τὰ ὄντα ἐνυπαρχόντων, ἀλλ' οὐχ ὥς γένη λέγει ταῦτα τῶν ὄντων. πρὸς δὲ [998b] τούτοις καὶ τῶν ἄλλων εἴ τις ἐθέλει τὴν φύσιν ἀθρεῖν, οἷον κλίνην ἐξ ὧν μορίων συνέστηκε καὶ πῶς συγκειμένων, τότε γνωρίζει τὴν φύσιν αὐτῆς. - ἐκ μὲν οὖν τούτων τῶν λόγων οὐκ ἂν εἴησαν αἱ ἀρχαὶ τὰ γένη τῶν ὄντων· εἰ δ' ἕκαστον μὲν γνωρίζομεν διὰ τῶν ὁρισμῶν, ἀρχαὶ δὲ τὰ γένη τῶν ὁρισμῶν εἰσὶν, ἀνάγκη καὶ τῶν ὁριστῶν ἀρχὰς εἶναι τὰ γένη. καὶν εἰ ἔστι τὴν τῶν ὄντων λαβεῖν ἐπιστήμην τὸ τῶν εἰδῶν λαβεῖν καθ' ἃ λέγονται τὰ ὄντα, τῶν γε εἰδῶν ἀρχαὶ τὰ γένη εἰσὶν. φαίνονται δὲ τινες καὶ τῶν λεγόντων στοιχεῖα τῶν ὄντων τὸ ἐν ἢ τὸ ὄν ἢ τὸ μέγα καὶ μικρὸν ὥς γένεσιν αὐτοῖς χρῆσθαι. - ἀλλὰ μὴν οὐδὲ ἀμφοτέρως γε οἷόν τε λέγειν τὰς ἀρχάς. ὁ μὲν γὰρ λόγος τῆς οὐσίας εἷς· ἕτερος δ' ἔσται ὁ διὰ τῶν γενῶν ὁρισμὸς καὶ ὁ λέγων ἐξ ὧν ἔστιν ἐνυπαρχόντων. - πρὸς δὲ τούτοις εἰ καὶ ὅτι μάλιστα ἀρχαὶ τὰ γένη εἰσί, πότερον δεῖ νομίζειν τὰ πρῶτα τῶν γενῶν ἀρχὰς ἢ τὰ ἔσχατα κατηγορούμενα ἐπὶ τῶν ἀτόμων; καὶ γὰρ τοῦτο ἔχει ἀμφισβήτησιν. εἰ μὲν γὰρ ἀεὶ τὰ καθόλου μᾶλλον ἀρχαί, φανερόν ὅτι τὰ ἀνωτάτω τῶν γενῶν· ταῦτα γὰρ λέγεται κατὰ πάντων. τοσαῦται οὖν ἔσονται ἀρχαὶ τῶν ὄντων ὅσαπερ τὰ πρῶτα γένη, ὥστ' ἔσται τό τε ὄν καὶ τὸ ἐν ἀρχαὶ καὶ οὐσίαι· ταῦτα γὰρ κατὰ πάντων μάλιστα λέγεται τῶν ὄντων. οὐχ οἷόν τε δὲ τῶν ὄντων ἐν εἶναι γένος οὔτε τὸ ἐν οὔτε τὸ ὄν· ἀνάγκη μὲν γὰρ τὰς διαφορὰς ἐκάστου γένους καὶ εἶναι καὶ μίαν εἶναι ἐκάστην, ἀδύνατον δὲ κατηγορεῖσθαι ἢ τὰ εἶδη τοῦ γένους ἐπὶ τῶν οἰκείων διαφορῶν ἢ τὸ γένος ἄνευ τῶν αὐτοῦ εἰδῶν, ὥστ' εἶπερ

Γ

Ἔστιν ἐπιστήμη τις ἥ θεωρεῖ τὸ ὄν ἢ ὄν καὶ τὰ τούτῳ ὑπάρχοντα καθ' αὐτό. αὕτη δ' ἐστὶν οὐδεμιᾶ τῶν ἐν μέρει λεγομένων ἢ αὕτη· οὐδεμία γὰρ τῶν ἄλλων ἐπισκοπεῖ καθόλου περὶ τοῦ ὄντος ἢ ὄν, ἀλλὰ μέρος αὐτοῦ τι ἀποτεμόμεναι περὶ τούτου θεωροῦσι τὸ συμβεβηκός, οἷον αἱ μαθηματικαὶ τῶν ἐπιστημῶν. ἐπεὶ δὲ τὰς ἀρχὰς καὶ τὰς ἀκροτάτας αἰτίας ζητοῦμεν, δηλὸν ὥς φύσεώς τινος αὐτὰς ἀναγκαῖον εἶναι καθ' αὐτήν. εἰ οὖν καὶ οἱ τὰ στοιχεῖα τῶν ὄντων ζητοῦντες ταύτας τὰς ἀρχὰς ἐζήτουν, ἀνάγκη καὶ τὰ στοιχεῖα τοῦ ὄντος εἶναι μὴ κατὰ συμβεβηκός ἀλλ' ἢ ὄν· διὸ καὶ ἡμῖν τοῦ ὄντος ἢ ὄν τὰς πρώτας αἰτίας ληπτέον.

Τὸ δὲ ὄν λέγεται μὲν πολλαχῶς, ἀλλὰ πρὸς ἓν καὶ μίαν τινὰ φύσιν καὶ οὐχ ὁμωνύμως ἀλλ' ὥσπερ καὶ τὸ ὑγιεινὸν ἅπαν πρὸς ὑγίειαν, τὸ μὲν τῷ φυλάττειν τὸ δὲ τῷ ποιεῖν τὸ δὲ τῷ σημεῖον εἶναι τῆς ὑγείας τὸ δ' ὅτι [1003b] δεκτικὸν αὐτῆς, καὶ τὸ ἱατρικὸν πρὸς ἱατρικὴν (τὸ μὲν γὰρ τῷ ἔχειν ἱατρικὴν λέγεται ἱατρικὸν τὸ δὲ τῷ εὐφυὲς εἶναι πρὸς αὐτήν τὸ δὲ τῷ ἔργον εἶναι τῆς ἱατρικῆς), ὁμοιοτρόπως δὲ καὶ ἄλλα ληψόμεθα λεγόμενα τούτοις, - οὕτω δὲ καὶ τὸ ὄν λέγεται πολλαχῶς μὲν ἀλλ' ἅπαν πρὸς μίαν ἀρχήν· τὰ μὲν γὰρ ὅτι οὐσίαι, ὄντα λέγεται, τὰ δ' ὅτι πάθη οὐσίας, τὰ δ' ὅτι ὁδὸς εἰς οὐσίαν ἢ φθοραὶ ἢ στερήσεις ἢ ποιότητες ἢ ποιητικὰ ἢ γεννητικὰ οὐσίας ἢ τῶν πρὸς τὴν οὐσίαν λεγομένων, ἢ τούτων τινὸς ἀποφάσεις ἢ οὐσίας· διὸ καὶ τὸ μὴ ὄν εἶναι μὴ ὄν φαμεν. καθάπερ οὖν καὶ τῶν ὑγιεινῶν ἀπάντων μία ἐπιστήμη ἔστιν, ὁμοίως τοῦτο καὶ ἐπὶ τῶν ἄλλων. οὐ γὰρ μόνον τῶν καθ' ἓν λεγομένων ἐπιστήμης ἐστὶ θεωρῆσαι μιᾶς ἀλλὰ καὶ τῶν πρὸς μίαν λεγομένων φύσιν· καὶ γὰρ ταῦτα τρόπον τινὰ λέγονται καθ' ἓν. δηλὸν οὖν ὅτι καὶ τὰ ὄντα μιᾶς θεωρῆσαι ἢ ὄντα. πανταχοῦ δὲ κυρίως τοῦ πρώτου ἢ ἐπιστήμης, καὶ ἐξ οὗ τὰ ἄλλα ἡρτῆται, καὶ δι' ὃ λέγονται. εἰ οὖν τοῦτ' ἐστὶν ἡ οὐσία, τῶν οὐσιῶν ἂν δέοι τὰς ἀρχὰς καὶ τὰς αἰτίας ἔχειν τὸν φιλόσοφον. - ἅπαντος δὲ γένους καὶ αἰσθησις μία ἐνὸς καὶ ἐπιστήμη, οἷον γραμματικὴ μία οὕσα πάσας θεωρεῖ τὰς φωνάς· διὸ καὶ τοῦ ὄντος ἢ ὄν ὅσα εἶδη θεωρῆσαι μιᾶς ἐστὶν ἐπιστήμης τῷ γένει, τὰ τε εἶδη τῶν εἰδῶν. εἰ δὴ τὸ ὄν καὶ τὸ ἐν ταὐτὸν καὶ μία φύσις τῷ ἀκολουθεῖν ἀλλήλοις ὥσπερ ἀρχὴ καὶ αἴτιον, ἀλλ' οὐχ ὥς ἐνὶ λόγῳ δηλούμενα

(διαφέρει δὲ οὐθὲν οὐδ' ἂν ὁμοίως ὑπολάβωμεν, ἀλλὰ καὶ πρὸ ἔργου μᾶλλον)· ταὐτὸ γὰρ εἰς ἄνθρωπος καὶ ἄνθρωπος, καὶ ὦν ἄνθρωπος καὶ ἄνθρωπος, καὶ οὐχ ἕτερόν τι δηλοῖ κατὰ τὴν λέξιν ἐπαναδιπλούμενον τὸ εἰς ἄνθρωπος καὶ εἰς ὦν ἄνθρωπος (δῆλον δ' ὅτι οὐ χωρίζεται οὐτ' ἐπὶ γενέσεως οὐτ' ἐπὶ φθορᾷ), ὁμοίως δὲ καὶ ἐπὶ τοῦ ἐνός, ὥστε φανερόν ὅτι ἡ πρόσθεσις ἐν τούτοις ταὐτὸ δηλοῖ, καὶ οὐδὲν ἕτερον τὸ ἐν παρὰ τὸ ὄν, ἔτι δ' ἡ ἐκάστου οὐσία ἐν ἐστίν οὐ κατὰ συμβεβηκός, ὁμοίως δὲ καὶ ὅπερ ὄν τι· - ὥσθ' ὅσα περ τοῦ ἐνός εἶδη, τοσαῦτα καὶ τοῦ ὄντος· περὶ ὦν τὸ τί ἐστὶ τῆς αὐτῆς ἐπιστήμης τῷ γένει θεωρῆσαι, λέγω δ' οἷον περὶ ταυτοῦ καὶ ὁμοίου καὶ τῶν ἄλλων τῶν τοιούτων. σχεδὸν δὲ [1004a] πάντα ἀνάγεται τάναντία εἰς τὴν ἀρχὴν ταύτην· τεθεωρήσθω δ' ἡμῖν ταῦτα ἐν τῇ ἐκλογῇ τῶν ἐναντίων. καὶ τοσαῦτα μέρη φιλοσοφίας ἔστιν ὅσαι περ αἱ οὐσίαι· ὥστε ἀναγκαῖον εἶναί τινα πρώτην καὶ ἐχομένην αὐτῶν. ὑπάρχει γὰρ εὐθὺς γένη ἔχον τὸ ὄν [καὶ τὸ ἐν]· διὸ καὶ αἱ ἐπιστῆμαι ἀκολουθήσουσι τούτοις. ἔστι γὰρ ὁ φιλόσοφος ὥσπερ ὁ μαθηματικὸς λεγόμενος· καὶ γὰρ αὕτη ἔχει μέρη, καὶ πρώτη τις καὶ δευτέρα ἔστιν ἐπιστήμη καὶ ἄλλαι ἐφεξῆς ἐν τοῖς μαθήμασιν. - ἐπεὶ δὲ μιᾷς τάντικείμενα θεωρῆσαι, τῷ δὲ ἐνὶ ἀντίκειται πλῆθος - ἀπόφασιν δὲ καὶ στερῆσιν μιᾷς ἐστὶ θεωρῆσαι διὰ τὸ ἀμφοτέρως θεωρεῖσθαι τὸ ἐν οὐ ἢ ἀπόφασιν ἢ ἢ στερῆσιν (ἢ γὰρ) ἀπλῶς λέγομεν ὅτι οὐχ ὑπάρχει ἐκεῖνο, ἢ τινι γένει· ἐνθα μὲν οὖν τῷ ἐνὶ ἢ διαφορὰ πρόσσεστι παρὰ τὸ ἐν τῇ ἀποφάσει, ἀπουσία γὰρ ἢ ἀπόφασιν ἐκεῖνου ἐστίν, ἐν δὲ τῇ στερῇ καὶ ὑποκειμένη τις φύσις γίγνεται καθ' ἣς λέγεται ἢ στερῆσις) [τῷ δ' ἐνὶ πλῆθος ἀντίκειται] - ὥστε καὶ τάντικείμενα τοῖς εἰρημένοις, τό τε ἕτερον καὶ ἀνόμοιον καὶ ἄνισον καὶ ὅσα ἄλλα λέγεται ἢ κατὰ ταῦτα ἢ κατὰ πλῆθος καὶ τὸ ἐν, τῆς εἰρημένης γνωρίζειν ἐπιστήμης· ὦν ἐστὶ καὶ ἡ ἐναντιότης· διαφορὰ γὰρ τις ἢ ἐναντιότης, ἢ δὲ διαφορὰ ἐτερότης. ὥστ' ἐπειδὴ πολλαχῶς τὸ ἐν λέγεται, καὶ ταῦτα πολλαχῶς μὲν λεχθήσεται, ὅμως δὲ μιᾷς ἅπαντά ἐστι γνωρίζειν· οὐ γὰρ εἰ πολλαχῶς, ἐτέρας, ἀλλ' εἰ μήτε καθ' ἐν μήτε πρὸς ἐν οἱ λόγοι ἀναφέρονται. ἐπεὶ δὲ πάντα πρὸς τὸ πρῶτον ἀναφέρεται, οἷον ὅσα ἐν λέγεται πρὸς τὸ πρῶτον ἐν, ὡσαύτως φατέον καὶ περὶ ταυτοῦ καὶ ἐτέρου καὶ τῶν ἐναντίων ἔχειν· ὥστε διελόμενον ποσαχῶς λέγεται ἕκαστον, οὕτως ἀποδοτέον πρὸς τὸ πρῶτον ἐν ἐκάστη κατηγορίᾳ πῶς πρὸς ἐκεῖνο λέγεται· τὰ μὲν γὰρ τῷ ἔχειν ἐκεῖνο τὰ δὲ τῷ ποιεῖν τὰ δὲ κατ' ἄλλους λεχθήσεται

τοιούτους τρόπους. - φανερόν οὖν [ὅπερ ἐν ταῖς ἀπορίαις ἐλέχθη] ὅτι μιᾷς περὶ τούτων καὶ τῆς οὐσίας ἐστὶ λόγον ἔχειν (τοῦτο δ' ἦν ἐν τῶν ἐν τοῖς ἀπορήμασιν), καὶ ἔστι τοῦ φιλοσόφου περὶ πάντων [1004b] δύνασθαι θεωρεῖν. εἰ γὰρ μὴ τοῦ φιλοσόφου, τίς ἔσται ὁ ἐπισκεψόμενος εἰ ταῦτὸ Σωκράτης καὶ Σωκράτης καθήμενος, ἢ εἰ ἐν ἐνὶ ἐναντίον, ἢ τί ἐστι τὸ ἐναντίον ἢ ποσαχῶς λέγεται; ὁμοίως δὲ καὶ περὶ τῶν ἄλλων τῶν τοιούτων. ἐπεὶ οὖν τοῦ ἐνὸς ἢ ἐν καὶ τοῦ ὄντος ἢ ὄν ταῦτα καθ' αὐτά ἐστι πάθη, ἀλλ' οὐχ ἢ ἀριθμοὶ ἢ γραμμαὶ ἢ πῦρ, δῆλον ὡς ἐκείνης τῆς ἐπιστήμης καὶ τί ἐστι γνωρίσαι καὶ τὰ συμβεβηκότ' αὐτοῖς. καὶ οὐ ταύτη ἀμαρτάνουσιν οἱ περὶ αὐτῶν σκοπούμενοι ὡς οὐ φιλοσοφοῦντες, ἀλλ' ὅτι πρότερον ἢ οὐσία, περὶ ἧς οὐθὲν ἐπαίουσιν, ἐπεὶ ὥσπερ ἔστι καὶ ἀριθμοῦ ἢ ἀριθμὸς ἴδια πάθη, οἷον περιττότης ἀρτιότης, συμμετρία ἰσότης, ὑπεροχὴ ἔλλειψις, καὶ ταῦτα καὶ καθ' αὐτοὺς καὶ πρὸς ἀλλήλους ὑπάρχει τοῖς ἀριθμοῖς (ὁμοίως δὲ καὶ στερεῶ καὶ ἀκινήτῳ καὶ κινουμένῳ ἀβαρεῖ τε καὶ βάρος ἔχοντι ἔστιν ἕτερα ἴδια), οὕτω καὶ τῷ ὄντι ἢ ὄν ἐστι τινὰ ἴδια, καὶ ταῦτ' ἐστὶ περὶ ὧν τοῦ φιλοσόφου ἐπισκέψασθαι τὸ ἀληθές. σημεῖον δέ· οἱ γὰρ διαλεκτικοὶ καὶ σοφισταὶ τὸ αὐτὸ μὲν ὑποδύονται σχῆμα τῷ φιλοσόφῳ· ἢ γὰρ σοφιστικὴ φαινομένη μόνον σοφία ἐστὶ, καὶ οἱ διαλεκτικοὶ διαλέγονται περὶ ἀπάντων, κοινὸν δὲ πᾶσι τὸ ὄν ἐστίν, διαλέγονται δὲ περὶ τούτων δῆλον ὅτι διὰ τὸ τῆς φιλοσοφίας ταῦτα εἶναι οἰκεῖα. περὶ μὲν γὰρ τὸ αὐτὸ γένος στρέφεται ἡ σοφιστικὴ καὶ ἡ διαλεκτικὴ τῇ φιλοσοφίᾳ, ἀλλὰ διαφέρει τῆς μὲν τῷ τρόπῳ τῆς δυνάμεως, τῆς δὲ τοῦ βίου τῇ προαιρέσει· ἔστι δὲ ἡ διαλεκτικὴ πειραστικὴ περὶ ὧν ἡ φιλοσοφία γνωριστικὴ, ἡ δὲ σοφιστικὴ φαινομένη, οὕσα δ' οὐ.

Ἔτι τῶν ἐναντίων ἢ ἑτέρα συστοιχία στέρησις, καὶ πάντα ἀνάγεται εἰς τὸ ὄν καὶ τὸ μὴ ὄν, καὶ εἰς ἐν καὶ πλῆθος, οἷον στάσις τοῦ ἐνὸς κίνησις δὲ τοῦ πλήθους· τὰ δ' ὄντα καὶ τὴν οὐσίαν ὁμολογοῦσιν ἐξ ἐναντίων σχεδὸν ἅπαντες συγκεῖσθαι· πάντες γοῦν τὰς ἀρχὰς ἐναντίας λέγουσιν· οἱ μὲν γὰρ περιττὸν καὶ ἄρτιον, οἱ δὲ θερμὸν καὶ ψυχρόν, οἱ δὲ πέρας καὶ ἄπειρον, οἱ δὲ φιλίαν καὶ νεῖκος. πάντα δὲ καὶ τᾶλλα ἀναγόμενα φαίνεται εἰς τὸ ἐν καὶ πλῆθος (εἰλήφθω γὰρ [1005a] ἡ ἀναγωγὴ ἡμῖν), αἱ δ' ἀρχαὶ καὶ παντελῶς αἱ παρὰ τῶν ἄλλων ὡς εἰς γένη ταῦτα πίπτουσιν. φανερόν οὖν καὶ ἐκ τούτων ὅτι μιᾷς ἐπιστήμης τὸ ὄν ἢ ὄν θεωρεῖσθαι. πάντα γὰρ ἢ ἐναντία ἢ ἐξ ἐναντίων, ἀρχαὶ δὲ τῶν ἐναντίων τὸ ἐν καὶ πλῆθος. ταῦτα δὲ

μιᾶς ἐπιστήμης, εἴτε καθ' ἓν λέγεται εἴτε μή, ὥσπερ ἴσως ἔχει καὶ τάληθές. ἀλλ' ὅμως εἰ καὶ πολλαχῶς λέγεται τὸ ἓν, πρὸς τὸ πρῶτον τᾶλλα λεχθήσεται καὶ τὰ ἐναντία ὁμοίως, [καὶ διὰ τοῦτο] καὶ εἰ μὴ ἔστι τὸ ὄν ἢ τὸ ἓν καθόλου καὶ ταῦτ' ἐπὶ πάντων ἢ χωριστόν, ὥσπερ ἴσως οὐκ ἔστιν ἀλλὰ τὰ μὲν πρὸς ἓν τὰ δὲ τῷ ἐφεξῆς. καὶ διὰ τοῦτο οὐ τοῦ γεωμέτρου θεωρῆσαι τί τὸ ἐναντίον ἢ τέλειον ἢ ἓν ἢ ὄν ἢ ταῦτόν ἢ ἕτερον, ἀλλ' ἢ ἐξ ὑποθέσεως. ὅτι μὲν οὖν μιᾶς ἐπιστήμης τὸ ὄν ἢ ὄν θεωρῆσαι καὶ τὰ ὑπάρχοντα αὐτῷ ἢ ὄν, δηλόν, καὶ ὅτι οὐ μόνον τῶν οὐσιῶν ἀλλὰ καὶ τῶν ὑπαρχόντων ἢ αὐτῇ θεωρητικῇ, τῶν τε εἰρημένων καὶ περὶ προτέρου καὶ ὑστέρου, καὶ γένους καὶ εἶδους, καὶ ὅλου καὶ μέρους καὶ τῶν ἄλλων τῶν τοιούτων.

Λεκτέον δὲ πότερον μιᾶς ἢ ἐτέρας ἐπιστήμης περὶ τε τῶν ἐν τοῖς μαθήμασι καλουμένων ἀξιομάτων καὶ περὶ τῆς οὐσίας. φανερόν δὴ ὅτι μιᾶς τε καὶ τῆς τοῦ φιλοσόφου καὶ ἡ περὶ τούτων ἐστὶ σκέψις· ἅπασι γὰρ ὑπάρχει τοῖς οὗσιν ἀλλ' οὐ γένει τινὶ χωρὶς ἰδία τῶν ἄλλων. καὶ χρῶνται μὲν πάντες, ὅτι τοῦ ὄντος ἐστὶν ἢ ὄν, ἕκαστον δὲ τὸ γένος ὄν· ἐπὶ τοσοῦτον δὲ χρῶνται ἐφ' ὅσον αὐτοῖς ἱκανόν, τοῦτο δ' ἔστιν ὅσον ἐπέχει τὸ γένος περὶ οὗ φέρουσι τὰς ἀποδείξεις· ὥστ' ἐπεὶ δηλόν ὅτι ἢ ὄντα ὑπάρχει πᾶσι (τοῦτο γὰρ αὐτοῖς τὸ κοινόν), τοῦ περὶ τὸ ὄν ἢ ὄν γνωρίζοντος καὶ περὶ τούτων ἐστὶν ἡ θεωρία. διόπερ οὐθεὶς τῶν κατὰ μέρος ἐπισκοπούντων ἐγχειρεῖ λέγειν τι περὶ αὐτῶν, εἰ ἀληθὴ ἢ μή, οὔτε γεωμέτρης οὔτ' ἀριθμητικός, ἀλλὰ τῶν φυσικῶν ἔνιοι, εἰκότως τοῦτο δρῶντες· μόνοι γὰρ ὄντο περὶ τε τῆς ὅλης φύσεως σκοπεῖν καὶ περὶ τοῦ ὄντος. ἐπεὶ δ' ἔστιν ἔτι τοῦ φυσικοῦ τις ἀνωτέρω (ἓν γάρ τι γένος τοῦ ὄντος ἢ φύσις), τοῦ καθόλου καὶ τοῦ περὶ τὴν πρώτην οὐσίαν θεωρητικοῦ καὶ ἡ [1005b] περὶ τούτων ἂν εἴη σκέψις· ἔστι δὲ σοφία τις καὶ ἡ φυσικὴ, ἀλλ' οὐ πρώτη. ὅσα δ' ἐγχειροῦσι τῶν λεγόντων τινὲς περὶ τῆς ἀληθείας ὄν τρόπον δεῖ ἀποδέχεσθαι, δι' ἀπαιδευσίαν τῶν ἀναλυτικῶν τοῦτο δρῶσιν· δεῖ γὰρ περὶ τούτων ἡκεῖν προεπισταμένους ἀλλὰ μὴ ἀκούοντας ζητεῖν. - ὅτι μὲν οὖν τοῦ φιλοσόφου, καὶ τοῦ περὶ πάσης τῆς οὐσίας θεωροῦντος ἢ πέφυκεν, καὶ περὶ τῶν συλλογιστικῶν ἀρχῶν ἐστὶν ἐπισκέψασθαι, δηλόν· προσήκει δὲ τὸν μάλιστα γνωρίζοντα περὶ ἕκαστον γένος ἔχειν λέγειν τὰς βεβαιότητας ἀρχὰς τοῦ πράγματος, ὥστε καὶ τὸν περὶ τῶν ὄντων ἢ ὄντα τὰς πάντων βεβαιότητας. ἔστι δ' οὗτος ὁ φιλόσοφος. βεβαιωτάτη δ' ἀρχὴ πασῶν περὶ ἣν διαψευσθῆναι ἀδύνατον· γνωριμωτάτην τε γὰρ ἀναγκαῖον εἶναι τὴν τοιαύτην (περὶ

Αἷτιον λέγεται ἓνα μὲν τρόπον ἐξ οὗ γίγνεται τι ἐνυπάρχοντος, οἷον ὁ χαλκὸς τοῦ ἀνδριάντος καὶ ὁ ἄργυρος τῆς φιάλης καὶ τὰ τούτων γένη· ἄλλον δὲ τὸ εἶδος καὶ τὸ παράδειγμα, τοῦτο δ' ἐστὶν ὁ λόγος τοῦ τί ἦν εἶναι καὶ τὰ τούτου γένη (οἷον τοῦ διὰ πασῶν τὸ δύο πρὸς ἓν καὶ ὅλως ὁ ἀριθμὸς) καὶ τὰ μέρη τὰ ἐν τῷ λόγῳ. ἔτι ὅθεν ἡ ἀρχὴ τῆς μεταβολῆς ἢ πρώτη ἢ τῆς ἡρεμίσεως, οἷον ὁ βουλευσας αἷτιος, καὶ ὁ πατήρ τοῦ τέκνου καὶ ὅλως τὸ ποιοῦν τοῦ ποιουμένου καὶ τὸ μεταβλητικὸν τοῦ μεταβάλλοντος. ἔτι ὡς τὸ τέλος· τοῦτο δ' ἐστὶ τὸ οὗ ἔνεκα, οἷον τοῦ περιπατεῖν ἢ ὑγίεια. διὰ τί γὰρ περιπατεῖ; φαιμέν. ἵνα ὑγιαίνει. καὶ εἰπόντες οὕτως οἰόμεθα ἀποδεδωκέναι τὸ αἷτιον. καὶ ὅσα δὴ κινήσαντος ἄλλου μεταξὺ γίγνεται τοῦ τέλους, οἷον τῆς [1013b] ὑγιείας ἢ ἰσχυασίας ἢ ἡ κάθαρσις ἢ τὰ φάρμακα ἢ τὰ ὄργανα· πάντα γὰρ ταῦτα τοῦ τέλους ἔνεκά ἐστι, διαφέρει δὲ

ἀλλήλων ὥς ὄντα τὰ μὲν ὄργανα τὰ δ' ἔργα. τὰ μὲν οὖν αἰτία σχεδὸν τοσαυταχῶς λέγεται, συμβαίνει δὲ πολλαχῶς λεγομένων τῶν αἰτίων καὶ πολλὰ τοῦ αὐτοῦ αἰτία εἶναι οὐ κατὰ συμβεβηκός (οἶον τοῦ ἀνδριάντος καὶ ἡ ἀνδριαντοποιητικὴ καὶ ὁ χαλκὸς οὐ καθ' ἕτερόν τι ἀλλ' ἢ ἀνδριάς· ἀλλ' οὐ τὸν αὐτὸν τρόπον ἀλλὰ τὸ μὲν ὥς ὕλη τὸ δ' ὥς ὄθεν ἡ κίνησις), καὶ ἀλλήλων αἰτία (οἶον τὸ πονεῖν τῆς εὐεξίας καὶ αὕτη τοῦ πονεῖν· ἀλλ' οὐ τὸν αὐτὸν τρόπον ἀλλὰ τὸ μὲν ὥς τέλος τὸ δ' ὥς ἀρχὴ κινήσεως). ἔτι δὲ ταῦτ' ὁ τῶν ἐναντίων ἐστίν· ὁ γὰρ παρὸν αἴτιον τουδί, τοῦτ' ἄπὸν αἰτιώμεθα ἐνίστε τοῦ ἐναντίου, οἶον τὴν ἀπουσίαν τοῦ κυβερνήτου τῆς ἀνατροπῆς, οὗ ἦν ἡ παρουσία αἰτία τῆς σωτηρίας· ἄμφω δέ, καὶ ἡ παρουσία καὶ ἡ στέρησις, αἰτία ὥς κινουῦντα. - ἅπαντα δὲ τὰ νῦν εἰρημένα αἰτία εἰς τέτταρας τρόπους πίπτει τοὺς φανερωτάτους. τὰ μὲν γὰρ στοιχεῖα τῶν συλλαβῶν καὶ ἡ ὕλη τῶν σκευαστῶν καὶ τὸ πῦρ καὶ ἡ γῆ καὶ τὰ τοιαῦτα πάντα τῶν σωμάτων καὶ τὰ μέρη τοῦ ὅλου καὶ αἱ ὑποθέσεις τοῦ συμπεράσματος ὥς τὸ ἐξ οὗ αἰτία ἐστίν· τούτων δὲ τὰ μὲν ὥς τὸ ὑποκείμενον, οἶον τὰ μέρη, τὰ δὲ ὥς τὸ τί ἦν εἶναι, τό τε ὅλον καὶ ἡ σύνθεσις καὶ τὸ εἶδος. τὸ δὲ σπέρμα καὶ ὁ ἱατρὸς καὶ ὁ βουλευσας καὶ ὅλως τὸ ποιοῦν, πάντα ὄθεν ἡ ἀρχὴ τῆς μεταβολῆς ἢ στάσεως. τὰ δ' ὥς τὸ τέλος καὶ τάγαθόν τῶν ἄλλων· τὸ γὰρ οὗ ἕνεκα βέλτιστον καὶ τέλος τῶν ἄλλων ἐθέλει εἶναι· διαφερέτω δὲ μηδὲν αὐτὸ εἰπεῖν ἀγαθὸν ἢ φαινόμενον ἀγαθόν. - τὰ μὲν οὖν αἰτία ταῦτα καὶ τοσαῦτά ἐστι τῷ εἶδει, τρόποι δὲ τῶν αἰτίων ἀριθμῷ μὲν εἰσι πολλοί, κεφαλαιούμενοι δὲ καὶ οὗτοι ἐλάττους. λέγονται γὰρ αἰτία πολλαχῶς, καὶ αὐτῶν τῶν ὁμοειδῶν προτέρως καὶ ὑστέρως ἄλλο ἄλλου, οἶον ὑγιείας ὁ ἱατρὸς καὶ ὁ τεχνίτης, καὶ τοῦ διὰ πασῶν τὸ διπλάσιον καὶ ἀριθμός, καὶ ἀεὶ τὰ περιέχοντα ὅτιοῦν τῶν καθ' ἕκαστα. ἔτι δ' ὥς τὸ συμβεβηκός καὶ τὰ τούτων γένη, οἶον ἀνδριάντος ἄλλως Πολύκλειτος καὶ ἄλλως ἀνδριαντοποιός, ὅτι συμβέβηκε τῷ ἀνδριαντοποιῷ [1014a] Πολυκλείτῳ εἶναι· καὶ τὰ περιέχοντα δὲ τὸ συμβεβηκός, οἶον ἄνθρωπος αἴτιος ἀνδριάντος, ἢ καὶ ὅλως ζῶον, ὅτι ὁ Πολύκλειτος ἄνθρωπος ὁ δὲ ἄνθρωπος ζῶον. ἔστι δὲ καὶ τῶν συμβεβηκόντων ἄλλα ἄλλων πορρώτερον καὶ ἐγγύτερον, οἶον εἰ ὁ λευκὸς καὶ ὁ μουσικὸς αἴτιος λέγοιτο τοῦ ἀνδριάντος, ἀλλὰ μὴ μόνον Πολύκλειτος ἢ ἄνθρωπος. παρὰ πάντα δὲ καὶ τὰ οἰκείως λεγόμενα καὶ τὰ κατὰ συμβεβηκός, τὰ μὲν ὥς δυνάμενα λέγεται τὰ δ' ὥς ἐνεργοῦντα, οἶον τοῦ οἰκοδομεῖσθαι οἰκοδόμος ἢ οἰκοδομῶν οἰκοδόμος. ὁμοίως δὲ

λεχθήσεται καὶ ἐφ' ὧν αἷτια τὰ αἷτια τοῖς εἰρημένοις, οἷον τοῦδε τοῦ ἀνδριάντος ἢ ἀνδριάντος ἢ ὅλως εἰκόνας, καὶ χαλκοῦ τοῦδε ἢ χαλκοῦ ἢ ὅλως ὕλης· καὶ ἐπὶ τῶν συμβεβηκότων ὡσαύτως. ἔτι δὲ συμπλεκόμενα καὶ ταῦτα κάκεῖνα λεχθήσεται, οἷον οὐ Πολύκλειτος οὐδὲ ἀνδριαντοποιὸς ἀλλὰ Πολύκλειτος ἀνδριαντοποιός. ἀλλ' ὅμως ἅπαντά γε ταῦτ' ἐστὶ τὸ μὲν πλῆθος ἕξ, λεγόμενα δὲ διχῶς· ἢ γὰρ ὡς τὸ καθ' ἕκαστον ἢ ὡς τὸ γένος, ἢ ὡς τὸ συμβεβηκὸς ἢ ὡς τὸ γένος τοῦ συμβεβηκότος, ἢ ὡς συμπλεκόμενα ταῦτα ἢ ὡς ἀπλῶς λεγόμενα, πάντα δὲ ἢ ὡς ἐνεργοῦντα ἢ κατὰ δύναμιν. διαφέρει δὲ τοσοῦτον, ὅτι τὰ μὲν ἐνεργοῦντα καὶ τὰ καθ' ἕκαστον ἅμα ἔστι καὶ οὐκ ἔστι καὶ ὧν αἷτια, οἷον ὁδε ὁ ἰατρεύων τῷδε τῷ ὑγιαζομένῳ καὶ ὁδε ὁ οἰκοδόμος τῷδε τῷ οἰκοδομουμένῳ, τὰ δὲ κατὰ δύναμιν οὐκ αἰεὶ· φθείρεται γὰρ οὐχ ἅμα ἢ οἰκία καὶ ὁ οἰκοδόμος.

Στοιχεῖον λέγεται ἕξ οὗ σύγκειται πρώτου ἐνυπάρχοντος ἀδιαιρέτου τῷ εἶδει εἰς ἕτερον εἶδος, οἷον φωνῆς στοιχεῖα ἕξ ὧν σύγκειται ἡ φωνή καὶ εἰς ἃ διαιρεῖται ἔσχατα, ἐκεῖνα δὲ μηκέτ' εἰς ἄλλας φωνὰς ἐτέρας τῷ εἶδει αὐτῶν, ἀλλὰ κἂν διαιρῇται, τὰ μόρια ὁμοειδῆ, οἷον ὕδατος τὸ μόριον ὕδωρ, ἀλλ' οὐ τῆς συλλαβῆς. ὁμοίως δὲ καὶ τὰ τῶν σωμάτων στοιχεῖα λέγουσιν οἱ λέγοντες εἰς ἃ διαιρεῖται τὰ σώματα ἔσχατα, ἐκεῖνα δὲ μηκέτ' εἰς ἄλλα εἶδει διαφέροντα· καὶ εἴτε ἐν εἴτε πλείω τὰ τοιαῦτα, ταῦτα στοιχεῖα λέγουσιν. παραπλησίως δὲ καὶ τὰ τῶν διαγραμμάτων στοιχεῖα λέγεται, καὶ ὅλως τὰ τῶν ἀποδείξεων· αἱ γὰρ πρῶται ἀποδείξεις καὶ ἐν πλείοσιν ἀποδείξεσιν [1014b] ἐνυπάρχουσιν, αὗται στοιχεῖα τῶν ἀποδείξεων λέγονται· εἰσὶ δὲ τοιοῦτοι συλλογισμοὶ οἱ πρῶτοι ἐκ τῶν τριῶν δι' ἐνὸς μέσου. καὶ μεταφέροντες δὲ στοιχεῖον καλοῦσιν ἐντεῦθεν ὁ ἂν ἐν ὄν καὶ μικρὸν ἐπὶ πολλὰ ἢ χρήσιμον, διὸ καὶ τὸ μικρὸν καὶ ἀπλοῦν καὶ ἀδιαίρετον στοιχεῖον λέγεται. ὅθεν ἐλήλυθε τὰ μάλιστα καθόλου στοιχεῖα εἶναι, ὅτι ἕκαστον αὐτῶν ἐν ὄν καὶ ἀπλοῦν ἐν πολλοῖς ὑπάρχει ἢ πᾶσιν ἢ ὅτι πλείστοις, καὶ τὸ ἐν καὶ τὴν στιγμὴν ἀρχάς τισι δοκεῖν εἶναι. ἐπεὶ οὖν τὰ καλούμενα γένη καθόλου καὶ ἀδιαίρετα (οὐ γὰρ ἔστι λόγος αὐτῶν), στοιχεῖα τὰ γένη λέγουσιν τινες, καὶ μᾶλλον ἢ τὴν διαφορὰν ὅτι καθόλου μᾶλλον τὸ γένος· ὃ μὲν γὰρ ἢ διαφορὰ ὑπάρχει, καὶ τὸ γένος ἀκολουθεῖ, ὃ δὲ τὸ γένος, οὐ παντὶ ἢ διαφορά. ἀπάντων δὲ κοινὸν τὸ εἶναι στοιχεῖον ἐκάστου τὸ πρῶτον ἐνυπάρχον ἐκάστῳ.

Φύσις λέγεται ἓνα μὲν τρόπον ἢ τῶν φυομένων γενεσις, οἷον εἰ

τις ἐπεκτείνας λέγοι τὸ υ, ἓνα δὲ ἐξ οὗ φύεται πρώτου τὸ φύομενον ἐνυπάρχοντος· ἔτι ὅθεν ἡ κίνησις ἡ πρώτη ἐν ἐκάστῳ τῶν φύσει ὄντων ἐν αὐτῷ ἢ αὐτὸ ὑπάρχει· φύεσθαι δὲ λέγεται ὅσα αὖξῃσιν ἔχει δι' ἐτέρου τῷ ἄπτεσθαι καὶ συμπεφυκέναι ἢ προσπεφυκέναι ὥσπερ τὰ ἔμβρυα· διαφέρει δὲ σύμφυσις ἀφῆς, ἐνθα μὲν γὰρ οὐδὲν παρὰ τὴν ἀφήν ἕτερον ἀνάγκη εἶναι, ἐν δὲ τοῖς συμπεφυκόσιν ἔστι τι ἐν τῷ αὐτῷ ἐν ἀμφοῖν ὃ ποιεῖ ἀντὶ τοῦ ἄπτεσθαι συμπεφυκέναι καὶ εἶναι ἐν κατὰ τὸ συνεχὲς καὶ ποσόν, ἀλλὰ μὴ κατὰ τὸ ποιόν. ἔτι δὲ φύσις λέγεται ἐξ οὗ πρώτου ἢ ἔστιν ἢ γίνεταί τι τῶν φύσει ὄντων, ἀρρυθμίστου ὄντος καὶ ἀμεταβλήτου ἐκ τῆς δυνάμεως τῆς αὐτοῦ, οἷον ἀνδριάντος καὶ τῶν σκευῶν τῶν χαλκῶν ὁ χαλκὸς ἡ φύσις λέγεται, τῶν δὲ ξυλίνων ξύλον· ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων· ἐκ τούτων γὰρ ἔστιν ἕκαστον διασωζομένης τῆς πρώτης ὕλης· τοῦτον γὰρ τὸν τρόπον καὶ τῶν φύσει ὄντων τὰ στοιχεῖα φασιν εἶναι φύσιν, οἱ μὲν πῦρ οἱ δὲ γῆν οἱ δ' ἀέρα οἱ δ' ὕδωρ οἱ δ' ἄλλο τι τοιοῦτον λέγοντες, οἱ δ' ἓνα τούτων οἱ δὲ πάντα ταῦτα. ἔτι δ' ἄλλον τρόπον λέγεται ἡ φύσις ἡ τῶν φύσει ὄντων οὐσία, οἷον οἱ λέγοντες τὴν φύσιν εἶναι τὴν πρώτην σύνθεσιν, ἢ ὥσπερ Ἐμπεδοκλῆς [1015a] λέγει ὅτι “φύσις οὐδενὸς ἔστιν ἐόντων, ἀλλὰ μόνον μῖξις τε διάλλαξις τε μιγέντων ἔστι, φύσις δ' ἐπὶ τοῖς ὀνομάζεται ἀνθρώποισιν”. διὸ καὶ ὅσα φύσει ἔστιν ἢ γίνεταί, ἤδη ὑπάρχοντος ἐξ οὗ πέφυκε γίνεσθαι ἢ εἶναι, οὐπω φαιμέν τὴν φύσιν ἔχειν ἐὰν μὴ ἔχη τὸ εἶδος καὶ τὴν μορφήν. φύσει μὲν οὖν τὸ ἐξ ἀμφοτέρων τούτων ἐστίν, οἷον τὰ ζῷα καὶ τὰ μόρια αὐτῶν· φύσις δὲ ἢ τε πρώτη ὕλη (καὶ αὕτη διχῶς, ἢ ἡ πρὸς αὐτὸ πρώτη ἢ ἡ ὅλως πρώτη, οἷον τῶν χαλκῶν ἔργων πρὸς αὐτὰ μὲν πρῶτος ὁ χαλκός, ὅλως δ' ἴσως ὕδωρ, εἰ πάντα τὰ τηκτὰ ὕδωρ) καὶ τὸ εἶδος καὶ ἡ οὐσία· τοῦτο δ' ἐστὶ τὸ τέλος τῆς γενέσεως. μεταφορᾷ δ' ἤδη καὶ ὅλως πᾶσα οὐσία φύσις λέγεται διὰ ταύτην, ὅτι καὶ ἡ φύσις οὐσία τίς ἐστίν. ἐκ δὲ τῶν εἰρημένων ἡ πρώτη φύσις καὶ κυρίως λεγομένη ἐστίν ἡ οὐσία ἡ τῶν ἐχόντων ἀρχὴν κινήσεως ἐν αὐτοῖς ἢ αὐτά· ἡ γὰρ ὕλη τῷ ταύτης δεκτικὴ εἶναι λέγεται φύσις, καὶ αἱ γενέσεις καὶ τὸ φύεσθαι τῷ ἀπὸ ταύτης εἶναι κινήσεις. καὶ ἡ ἀρχὴ τῆς κινήσεως τῶν φύσει ὄντων αὕτη ἐστίν, ἐνυπάρχουσά πως ἢ δυνάμει ἢ ἐντελεχείᾳ.

Ἀναγκαῖον λέγεται οὗ ἄνευ οὐκ ἐνδέχεται ζῆν ὥς συναιτίου (οἷον τὸ ἀναπνεῖν καὶ ἡ τροφή τῷ ζῷῳ ἀναγκαῖον, ἀδύνατον γὰρ ἄνευ τούτων εἶναι), καὶ ὧν ἄνευ τὸ ἀγαθὸν μὴ ἐνδέχεται ἢ εἶναι ἢ

γενέσθαι, ἢ τὸ κακὸν ἀποβαλεῖν ἢ στερηθῆναι (οἷον τὸ πιεῖν τὸ φάρμακον ἀναγκαῖον ἵνα μὴ κάμνη, καὶ τὸ πλεῦσαι εἰς Αἴγιναν ἵνα ἀπολάβῃ τὰ χρήματα). ἔτι τὸ βίαιον καὶ ἡ βία· τοῦτο δ' ἐστὶ τὸ παρὰ τὴν ὁρμὴν καὶ τὴν προαίρεσιν ἐμποδίζον καὶ κωλυτικόν, τὸ γὰρ βίαιον ἀναγκαῖον λέγεται, διὸ καὶ λυπηρόν (ὥσπερ καὶ Εὐηνός φησι “πᾶν γὰρ ἀναγκαῖον πρᾶγμ' ἀνιαρὸν ἔφυ”), καὶ ἡ βία ἀνάγκη τις (ὥσπερ καὶ Σοφοκλῆς λέγει “ἀλλ' ἡ βία με ταῦτ' ἀναγκάζει ποιεῖν”), καὶ δοκεῖ ἡ ἀνάγκη ἀμετάπειστόν τι εἶναι, ὀρθῶς· ἐναντίον γὰρ τῇ κατὰ τὴν προαίρεσιν κινήσει καὶ κατὰ τὸν λογισμόν. ἔτι τὸ μὴ ἐνδεχόμενον ἄλλως ἔχειν ἀναγκαῖόν φαμεν οὕτως ἔχειν· καὶ κατὰ τοῦτο τὸ ἀναγκαῖον καὶ τᾶλλα λέγεται πως ἅπαντα ἀναγκαῖα· τό τε γὰρ βίαιον ἀναγκαῖον λέγεται [1015b] ἢ ποιεῖν ἢ πάσχειν τότε, ὅταν μὴ ἐνδέχεται κατὰ τὴν ὁρμὴν διὰ τὸ βιαζόμενον, ὡς ταύτην ἀνάγκην οὕσαν δι' ἣν μὴ ἐνδέχεται ἄλλως, καὶ ἐπὶ τῶν συναιτίων τοῦ ζῆν καὶ τοῦ ἀγαθοῦ ὡσαύτως· ὅταν γὰρ μὴ ἐνδέχεται ἔνθα μὲν τὸ ἀγαθὸν ἔνθα δὲ τὸ ζῆν καὶ τὸ εἶναι ἄνευ τινῶν, ταῦτα ἀναγκαῖα καὶ ἡ αἰτία ἀνάγκη τίς ἐστίν αὕτη. ἔτι ἡ ἀπόδειξις τῶν ἀναγκαίων, ὅτι οὐκ ἐνδέχεται ἄλλως ἔχειν, εἰ ἀποδεδεικται ἀπλῶς· τούτου δ' αἰτία τὰ πρῶτα, εἰ ἀδύνατον ἄλλως ἔχειν ἐξ ὧν ὁ συλλογισμός. τῶν μὲν δὴ ἕτερον αἴτιον τοῦ ἀναγκαῖα εἶναι, τῶν δὲ οὐδέν, ἀλλὰ διὰ ταῦτα ἕτερά ἐστιν ἐξ ἀνάγκης. ὥστε τὸ πρῶτον καὶ κυρίως ἀναγκαῖον τὸ ἀπλοῦν ἐστίν· τοῦτο γὰρ οὐκ ἐνδέχεται πλεοναχῶς ἔχειν, ὥστ' οὐδὲ ἄλλως καὶ ἄλλως· ἥδη γὰρ πλεοναχῶς ἂν ἔχοι. εἰ ἄρα ἔστιν ἅττα αἰδία καὶ ἀκίνητα, οὐδὲν ἐκείνοις ἐστὶ βίαιον οὐδὲ παρὰ φύσιν.

Ἐν λέγεται τὸ μὲν κατὰ συμβεβηκὸς τὸ δὲ καθ' αὐτό, κατὰ συμβεβηκὸς μὲν οἷον Κορίσκος καὶ τὸ μουσικόν, καὶ Κορίσκος μουσικός (ταὐτὸ γὰρ εἰπεῖν Κορίσκος καὶ τὸ μουσικόν, καὶ Κορίσκος μουσικός), καὶ τὸ μουσικὸν καὶ τὸ δίκαιον, καὶ μουσικὸς <Κορίσκος> καὶ δίκαιος Κορίσκος· πάντα γὰρ ταῦτα ἐν λέγεται κατὰ συμβεβηκὸς, τὸ μὲν δίκαιον καὶ τὸ μουσικὸν ὅτι μιᾷ οὐσίᾳ συμβέβηκεν, τὸ δὲ μουσικὸν καὶ Κορίσκος ὅτι θάτερον θατέρῳ συμβέβηκεν· ὁμοίως δὲ τρόπον τινὰ καὶ ὁ μουσικὸς Κορίσκος τῷ Κορίσκῳ ἐν ὅτι θάτερον τῶν μορίων θατέρῳ συμβέβηκε τῶν ἐν τῷ λόγῳ, οἷον τὸ μουσικὸν τῷ Κορίσκῳ· καὶ ὁ μουσικὸς Κορίσκος δικαίῳ Κορίσκῳ ὅτι ἐκατέρου μέρος τῷ αὐτῷ ἐνὶ συμβέβηκεν ἐν. ὡσαύτως δὲ κἂν ἐπὶ γένους κἂν ἐπὶ τῶν καθόλου τινὸς ὀνομάτων λέγεται τὸ συμβεβηκὸς, οἷον ὅτι ἄνθρωπος τὸ αὐτὸ καὶ μουσικὸς

ἄνθρωπος· ἡ γὰρ ὅτι τῷ ἀνθρώπῳ μιᾷ οὕσῃ οὐσίᾳ συμβέβηκε τὸ μουσικόν, ἡ ὅτι ἄμφω τῶν καθ' ἕκαστόν τινι συμβέβηκεν, οἷον Κορίσκῳ. πλὴν οὐ τὸν αὐτὸν τρόπον ἄμφω ὑπάρχει, ἀλλὰ τὸ μὲν ἴσως ὡς γένος καὶ ἐν τῇ οὐσίᾳ τὸ δὲ ὡς ἕξις ἡ πάθος τῆς οὐσίας. - ὅσα μὲν οὖν κατὰ συμβεβηκὸς λέγεται ἓν, τοῦτον τὸν τρόπον λέγεται· τῶν δὲ καθ' ἑαυτὰ ἐν λεγομένων τὰ μὲν λέγεται τῷ [1016a] συνεχῇ εἶναι, οἷον φάκελος δεσμῷ καὶ ξύλα κόλλη· καὶ γραμμῇ, κἂν κεκαμμένη ἦ, συνεχῆς δέ, μία λέγεται, ὥσπερ καὶ τῶν μερῶν ἕκαστον, οἷον σκέλος καὶ βραχίον. αὐτῶν δὲ τούτων μᾶλλον ἐν τὰ φύσει συνεχῇ ἢ τέχνῃ. συνεχὲς δὲ λέγεται οὗ κίνησις μία καθ' αὐτὸ καὶ μὴ οἷόν τε ἄλλως· μία δ' οὗ ἀδιαίρετος, ἀδιαίρετος δὲ κατὰ χρόνον. καθ' αὐτὰ δὲ συνεχῇ ὅσα μὴ ἀφῇ ἓν· εἰ γὰρ θεῖς ἀπτόμενα ἀλλήλων ξύλα, οὐ φήσεις ταῦτα εἶναι ἐν οὔτε ξύλον οὔτε σῶμα οὔτ' ἄλλο συνεχὲς οὐδέν. τά τε δὴ ὅλως συνεχῇ ἐν λέγεται κἂν ἔχη κάμψιν, καὶ ἔτι μᾶλλον τὰ μὴ ἔχοντα κάμψιν, οἷον κνήμη ἢ μηρὸς σκέλους, ὅτι ἐνδέχεται μὴ μίαν εἶναι τὴν κίνησιν τοῦ σκέλους. καὶ ἡ εὐθεΐα τῆς κεκαμμένης μᾶλλον ἓν· τὴν δὲ κεκαμμένην καὶ ἔχουσαν γωνίαν καὶ μίαν καὶ οὐ μίαν λέγομεν, ὅτι ἐνδέχεται καὶ μὴ ἅμα τὴν κίνησιν αὐτῆς εἶναι καὶ ἅμα· τῆς δ' εὐθείας ἀεὶ ἅμα, καὶ οὐδέν μόριον ἔχον μέγεθος τὸ μὲν ἡρεμεῖ τὸ δὲ κινεῖται, ὥσπερ τῆς κεκαμμένης. ἔτι ἄλλον τρόπον ἐν λέγεται τῷ τὸ ὑποκείμενον τῷ εἶδει εἶναι ἀδιάφορον· ἀδιάφορον δ' ὦν ἀδιαίρετον τὸ εἶδος κατὰ τὴν αἴσθησιν· τὸ δ' ὑποκείμενον ἢ τὸ πρῶτον ἢ τὸ τελευταῖον πρὸς τὸ τέλος· καὶ γὰρ οἶνος εἷς λέγεται καὶ ὕδωρ ἓν, ἡ ἀδιαίρετον κατὰ τὸ εἶδος, καὶ οἱ χυμοὶ πάντες λέγονται ἓν (οἷον ἔλαιον οἶνος) καὶ τὰ τηκτά, ὅτι πάντων τὸ ἔσχατον ὑποκείμενον τὸ αὐτό· ὕδωρ γὰρ ἢ ἀἷρ πάντα ταῦτα. λέγεται δ' ἐν καὶ ὦν τὸ γένος ἐν διαφέρον ταῖς ἀντικειμέναις διαφοραῖς - καὶ ταῦτα λέγεται πάντα ἐν ὅτι τὸ γένος ἐν τὸ ὑποκείμενον ταῖς διαφοραῖς (οἷον ἵππος ἄνθρωπος κύων ἐν τι ὅτι πάντα ζῷα), καὶ τρόπον δὴ παραπλήσιον ὥσπερ ἡ ὕλη μία. ταῦτα δὲ ὅτε μὲν οὕτως ἐν λέγεται, ὅτε δὲ τὸ ἄνω γένος ταῦτόν λέγεται - ἂν ἡ τελευταῖα τοῦ γένους εἶδη - τὸ ἀνωτέρω τούτων, οἷον τὸ ἰσοσκελὲς καὶ τὸ ἰσόπλευρον ταῦτό καὶ ἐν σχῆμα ὅτι ἄμφω τρίγωνα· τρίγωνα δ' οὐ ταῦτά. ἔτι δὲ ἐν λέγεται ὅσων ὁ λόγος ὁ τὸ τί ἦν εἶναι λέγων ἀδιαίρετος πρὸς ἄλλον τὸν δηλοῦντα [τί ἦν εἶναι] τὸ πρᾶγμα (αὐτὸς γὰρ καθ' αὐτὸν πᾶς λόγος διαιρετός). οὕτω γὰρ καὶ τὸ ηὑξημένον καὶ φθίνον ἐν ἐστίν, ὅτι ὁ λόγος εἷς, ὥσπερ ἐπὶ τῶν ἐπιπέδων ὁ τοῦ

[1016b] εἶδους. ὅλως δὲ ὧν ἡ νόησις ἀδιαίρετος ἡ νοοῦσα τὸ τί ἦν εἶναι, καὶ μὴ δύναται χωρίσαι μήτε χρόνῳ μήτε τόπῳ μήτε λόγῳ, μάλιστα ταῦτα ἔν, καὶ τούτων ὅσα οὐσίαι· καθόλου γὰρ ὅσα μὴ ἔχει διαίρεσιν, ἢ μὴ ἔχει, ταύτη ἔν λέγεται, οἷον εἰ ἢ ἄνθρωπος μὴ ἔχει διαίρεσιν, εἷς ἄνθρωπος, εἰ δ' ἢ ζῶον, ἔν ζῶον, εἰ δὲ ἢ μέγεθος, ἔν μέγεθος. τὰ μὲν οὖν πλεῖστα ἔν λέγεται τῷ ἑτερόν τι ἢ ποιεῖν ἢ ἔχειν ἢ πάσχειν ἢ πρὸς τι εἶναι ἔν, τὰ δὲ πρῶτως λεγόμενα ἔν ὧν ἡ οὐσία μία, μία δὲ ἡ συνεχεῖα ἡ εἶδει ἢ λόγῳ· καὶ γὰρ ἀριθμοῦμεν ὡς πλείω ἢ τὰ μὴ συνεχῆ ἢ ὧν μὴ ἔν τὸ εἶδος ἢ ὧν ὁ λόγος μὴ εἷς. ἔτι δ' ἔστι μὲν ὡς ὅτιοῦν ἔν φαμεν εἶναι ἂν ἢ ποσὸν καὶ συνεχές, ἔστι δ' ὡς οὐ, ἂν μὴ τι ὅλον ἦ, τοῦτο δὲ ἂν μὴ τὸ εἶδος ἔχη ἔν· οἷον οὐκ ἂν φαίμεν ὁμοίως ἔν ιδόντες ὁπωσοῦν τὰ μέρη συγκείμενα τοῦ ὑποδήματος, ἐὰν μὴ διὰ τὴν συνέχειαν, ἀλλ' ἐὰν οὕτως ὥστε ὑπόδημα εἶναι καὶ εἶδος τι ἔχειν ἤδη ἔν· διὸ καὶ ἡ τοῦ κύκλου μάλιστα μία τῶν γραμμῶν, ὅτι ὅλη καὶ τέλειός ἐστιν. - τὸ δὲ ἐνὶ εἶναι ἀρχῇ τινί ἐστιν ἀριθμοῦ εἶναι· τὸ γὰρ πρῶτον μέτρον ἀρχῇ, ὃ γὰρ πρῶτον γνωρίζομεν, τοῦτο πρῶτον μέτρον ἐκάστου γένους· ἀρχῇ οὖν τοῦ γνωστοῦ περὶ ἕκαστον τὸ ἔν. οὐ ταῦτο δὲ ἔν πᾶσι τοῖς γένεσι τὸ ἔν. ἔνθα μὲν γὰρ δίεσις ἔνθα δὲ τὸ φωνῆεν ἢ ἄφωνον· βάρους δὲ ἕτερον καὶ κινήσεως ἄλλο. πανταχοῦ δὲ τὸ ἔν ἢ τῷ ποσῷ ἢ τῷ εἶδει ἀδιαίρετον. τὸ μὲν οὖν κατὰ τὸ ποσὸν ἀδιαίρετον, τὸ μὲν πάντη καὶ ἄθετον λέγεται μονάς, τὸ δὲ πάντη καὶ θέσιν ἔχον στιγμή, τὸ δὲ μοναχῇ γραμμῇ, τὸ δὲ διχῇ ἐπίπεδον, τὸ δὲ πάντη καὶ τριχῇ διαιρετὸν κατὰ τὸ ποσὸν σῶμα· καὶ ἀντιστρέψαντι δὴ τὸ μὲν διχῇ διαιρετὸν ἐπίπεδον, τὸ δὲ μοναχῇ γραμμῇ, τὸ δὲ μηδαμῇ διαιρετὸν κατὰ τὸ ποσὸν στιγμή καὶ μονάς, ἢ μὲν ἄθετος μονάς ἢ δὲ θετὸς στιγμή. ἔτι δὲ τὰ μὲν κατ' ἀριθμὸν ἐστιν ἔν, τὰ δὲ κατ' εἶδος, τὰ δὲ κατὰ γένος, τὰ δὲ κατ' ἀναλογίαν, ἀριθμῷ μὲν ὧν ἡ ὕλη μία, εἶδει δ' ὧν ὁ λόγος εἷς, γένει δ' ὧν τὸ αὐτὸ σχῆμα τῆς κατηγορίας, κατ' ἀναλογίαν δὲ ὅσα ἔχει ὡς ἄλλο πρὸς ἄλλο. αἰεὶ δὲ τὰ ὕστερα τοῖς ἐμπροσθεν ἀκολουθεῖ, οἷον ὅσα ἀριθμῷ καὶ εἶδει ἔν, ὅσα δ' εἶδει οὐ πάντα ἀριθμῷ· [1017a] ἀλλὰ γένει πάντα ἔν ὅσαπερ καὶ εἶδει, ὅσα δὲ γένει οὐ πάντα εἶδει ἀλλ' ἀναλογίᾳ· ὅσα δὲ ἀναλογίᾳ οὐ πάντα γένει. φανερόν δὲ καὶ ὅτι τὰ πολλὰ ἀντικειμένως λεχθήσεται τῷ ἐνί· τὰ μὲν γὰρ τῷ μὴ συνεχῇ εἶναι, τὰ δὲ τῷ διαιρετῇ ἔχειν τὴν ὕλην κατὰ τὸ εἶδος, ἢ τὴν πρῶτην ἢ τὴν τελευταίαν, τὰ δὲ τῷ τοὺς λόγους πλείους τοὺς τί ἦν εἶναι λέγοντας.

Τὸ ὃν λέγεται τὸ μὲν κατὰ συμβεβηκὸς τὸ δὲ καθ' αὐτό, κατὰ συμβεβηκὸς μὲν, οἷον τὸν δίκαιον μουσικὸν εἶναι φαμεν καὶ τὸν ἄνθρωπον μουσικὸν καὶ τὸν μουσικὸν ἄνθρωπον, παραπλησίως λέγοντες ὥσπερ εἰ τὸν μουσικὸν οἰκοδομεῖν ὅτι συμβέβηκε τῷ οἰκοδόμῳ μουσικῷ εἶναι ἢ τῷ μουσικῷ οἰκοδόμῳ (τὸ γὰρ τότε εἶναι τότε σημαίνει τὸ συμβεβηκέναι τῷδε τότε), - οὕτω δὲ καὶ ἐπὶ τῶν εἰρημένων· τὸν γὰρ ἄνθρωπον ὅταν μουσικὸν λέγωμεν καὶ τὸν μουσικὸν ἄνθρωπον, ἢ τὸν λευκὸν μουσικὸν ἢ τοῦτον λευκόν, τὸ μὲν ὅτι ἅμφω τῷ αὐτῷ συμβεβήκασι, τὸ δ' ὅτι τῷ ὄντι συμβέβηκε, τὸ δὲ μουσικὸν ἄνθρωπον ὅτι τούτῳ τὸ μουσικὸν συμβέβηκεν (οὕτω δὲ λέγεται καὶ τὸ μὴ λευκὸν εἶναι, ὅτι ᾧ συμβέβηκεν, ἐκεῖνο ἔστιν)· - τὰ μὲν οὖν κατὰ συμβεβηκὸς εἶναι λεγόμενα οὕτω λέγεται ἢ διότι τῷ αὐτῷ ὄντι ἅμφω ὑπάρχει, ἢ ὅτι ὄντι ἐκεῖνῳ ὑπάρχει, ἢ ὅτι αὐτὸ ἔστιν ᾧ ὑπάρχει οὗ αὐτὸ κατηγορεῖται· καθ' αὐτὰ δὲ εἶναι λέγεται ὅσαπερ σημαίνει τὰ σχήματα τῆς κατηγορίας· ὅσαχῶς γὰρ λέγεται, τοσαυταχῶς τὸ εἶναι σημαίνει. ἐπεὶ οὖν τῶν κατηγορουμένων τὰ μὲν τί ἐστὶ σημαίνει, τὰ δὲ ποιόν, τὰ δὲ ποσόν, τὰ δὲ πρὸς τι, τὰ δὲ ποιεῖν ἢ πάσχειν, τὰ δὲ πού, τὰ δὲ ποτέ, ἐκάστῳ τούτων τὸ εἶναι ταῦτο σημαίνει· οὐθὲν γὰρ διαφέρει τὸ ἄνθρωπος ὑγιαίνων ἐστὶν ἢ τὸ ἄνθρωπος ὑγιαίνει, οὐδὲ τὸ ἄνθρωπος βαδίζων ἐστὶν ἢ τέμνων τοῦ ἄνθρωπος βαδίζει ἢ τέμνει, ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων. ἔτι τὸ εἶναι σημαίνει καὶ τὸ ἔστιν ὅτι ἀληθές, τὸ δὲ μὴ εἶναι ὅτι οὐκ ἀληθές ἀλλὰ ψεῦδος, ὁμοίως ἐπὶ καταφάσεως καὶ ἀποφάσεως, οἷον ὅτι ἔστι Σωκράτης μουσικός, ὅτι ἀληθές τοῦτο, ἢ ὅτι ἔστι Σωκράτης οὐ λευκός, ὅτι ἀληθές· τὸ δ' οὐκ ἔστιν ἢ διάμετρος σύμμετρος, ὅτι ψεῦδος. ἔτι τὸ εἶναι σημαίνει [1017b] καὶ τὸ ὃν τὸ μὲν δυνάμει ρητὸν τὸ δ' ἐντελεχεῖα τῶν εἰρημένων τούτων· ὁρῶν τε γὰρ εἶναι φαμεν καὶ τὸ δυνάμει ὁρῶν καὶ τὸ ἐντελεχεῖα, καὶ [τὸ] ἐπίστασθαι ὡσαύτως καὶ τὸ δυνάμενον χρῆσθαι τῇ ἐπιστήμῃ καὶ τὸ χρώμενον, καὶ ἡρεμοῦν καὶ ᾧ ἤδη ὑπάρχει ἡρεμία καὶ τὸ δυνάμενον ἡρεμεῖν. ὁμοίως δὲ καὶ ἐπὶ τῶν οὐσιῶν· καὶ γὰρ Ἑρμῆν ἐν τῷ λίθῳ φαμέν εἶναι, καὶ τὸ ἥμισυ τῆς γραμμῆς, καὶ σῖτον τὸν μήπω ἄδρόν. πότε δὲ δυνατόν καὶ πότε οὐπω, ἐν ἄλλοις διοριστέον.

Οὐσία λέγεται τὰ τε ἀπλᾶ σώματα, οἷον γῆ καὶ πῦρ καὶ ὕδωρ καὶ ὅσα τοιαῦτα, καὶ ὅλως σώματα καὶ τὰ ἐκ τούτων συνεστῶτα ζῷά τε καὶ δαιμόνια καὶ τὰ μόρια τούτων· ἅπαντα δὲ ταῦτα λέγεται οὐσία ὅτι οὐ καθ' ὑποκειμένου λέγεται ἀλλὰ κατὰ τούτων τὰ ἄλλα. ἄλλον

δὲ τρόπον ὃ ἂν ἦ αἴτιον τοῦ εἶναι, ἐνυπάρχον ἐν τοῖς τοιούτοις ὅσα μὴ λέγεται καθ' ὑποκειμένου, οἷον ἡ ψυχὴ τῷ ζῳῳ. ἔτι ὅσα μόρια ἐνυπάρχοντά ἐστιν ἐν τοῖς τοιούτοις ὀρίζοντά τε καὶ τόδε τι σημαίνοντα, ὧν ἀναιρουμένων ἀναιρεῖται τὸ ὅλον, οἷον ἐπιπέδου σῶμα, ὡς φασί τινες, καὶ ἐπίπεδον γραμμῆς· καὶ ὅλως ὁ ἀριθμὸς δοκεῖ εἶναί τισι τοιούτους (ἀναιρουμένου τε γὰρ οὐδὲν εἶναι, καὶ ὀρίζειν πάντα)· ἔτι τὸ τί ἦν εἶναι, οὗ ὁ λόγος ὀρισμός, καὶ τοῦτο οὐσία λέγεται ἐκάστου. συμβαίνει δὴ κατὰ δύο τρόπους τὴν οὐσίαν λέγεσθαι, τό θ' ὑποκείμενον ἔσχατον, ὃ μηκέτι κατ' ἄλλου λέγεται, καὶ ὃ ἂν τόδε τι ὄν καὶ χωριστὸν ἦ· τοιούτον δὲ ἐκάστου ἡ μορφή καὶ τὸ εἶδος.

Ταῦτά λέγεται τὰ μὲν κατὰ συμβεβηκός, οἷον τὸ λευκὸν καὶ τὸ μουσικὸν τὸ αὐτὸ ὅτι τῷ αὐτῷ συμβέβηκε, καὶ ἄνθρωπος καὶ μουσικὸν ὅτι θάτερον θατέρῳ συμβέβηκεν, τὸ δὲ μουσικὸν ἄνθρωπος ὅτι τῷ ἀνθρώπῳ συμβέβηκεν· ἐκατέρῳ δὲ τοῦτο καὶ τούτῳ ἐκάτερον ἐκείνων, καὶ γὰρ τῷ ἀνθρώπῳ τῷ μουσικῷ καὶ ὁ ἄνθρωπος καὶ τὸ μουσικὸν ταῦτό λέγεται, καὶ τούτοις ἐκεῖνο (διὸ καὶ πάντα ταῦτα καθόλου οὐ λέγεται· οὐ γὰρ ἀληθὲς εἰπεῖν ὅτι πᾶς ἄνθρωπος ταῦτό καὶ τὸ μουσικόν· τὰ γὰρ καθόλου καθ' αὐτὰ ὑπάρχει, τὰ [1018a] δὲ συμβεβηκότα οὐ καθ' αὐτά· ἀλλ' ἐπὶ τῶν καθ' ἕκαστα ἀπλῶς λέγεται· ταῦτό γὰρ δοκεῖ Σωκράτης καὶ Σωκράτης εἶναι μουσικός· τὸ δὲ Σωκράτης οὐκ ἐπὶ πολλῶν, διὸ οὐ πᾶς Σωκράτης λέγεται ὥσπερ πᾶς ἄνθρωπος)· - καὶ τὰ μὲν οὕτως λέγεται ταῦτά, τὰ δὲ καθ' αὐτὰ ὁσαυχῶσπερ καὶ τὸ ἓν· καὶ γὰρ ὧν ἡ ὕλη μία ἢ εἶδει ἢ ἀριθμῷ ταῦτά λέγεται καὶ ὧν ἡ οὐσία μία, ὥστε φανερόν ὅτι ἡ ταυτότης ἐνότης τίς ἐστιν ἢ πλείονων τοῦ εἶναι ἢ ὅταν χρῆται ὡς πλείοσιν, οἷον ὅταν λέγῃ αὐτὸ αὐτῷ ταυτόν· ὡς δυσὶ γὰρ χρῆται αὐτῷ. - ἕτερα δὲ λέγεται ὧν ἢ τὰ εἶδη πλείω ἢ ἡ ὕλη ἢ ὁ λόγος τῆς οὐσίας· καὶ ὅλως ἀντικειμένως τῷ ταῦτῳ λέγεται τὸ ἕτερον.

Διάφορα δὲ λέγεται ὅς' ἕτερα ἐστὶ τὸ αὐτό τι ὄντα, μὴ μόνον ἀριθμῷ ἀλλ' ἢ εἶδει ἢ γένει ἢ ἀναλογίᾳ· ἔτι ὧν ἕτερον τὸ γένος, καὶ τὰ ἐναντία, καὶ ὅσα ἔχει ἐν τῇ οὐσίᾳ τὴν ἑτερότητα. ὅμοια λέγεται τά τε πάντῃ ταῦτό πεπονθότα, καὶ τὰ πλείω ταῦτά πεπονθότα ἢ ἕτερα, καὶ ὧν ἡ ποιότης μία· καὶ καθ' ὅσα ἀλλοιοῦσθαι ἐνδέχεται τῶν ἐναντίων, τούτων τὸ πλείω ἔχον ἢ κυριώτερα ὅμοιον τούτῳ. ἀντικειμένως δὲ τοῖς ὁμοίοις τὰ ἀνόμοια.

Ἀντικείμενα λέγεται ἀντίφασις καὶ τὰναντία καὶ τὰ πρὸς τι καὶ στέρησις καὶ ἕξις καὶ ἐξ ὧν καὶ εἰς ἃ ἔσχατα αἱ γενέσεις καὶ φθοραί· καὶ ὅσα μὴ ἐνδέχεται ἅμα παρεῖναι τῷ ἀμφοῖν δεκτικῷ, ταῦτα ἀντικεῖσθαι λέγεται ἢ αὐτὰ ἢ ἐξ ὧν ἐστίν. φαιὸν γὰρ καὶ λευκὸν ἅμα τῷ αὐτῷ οὐχ ὑπάρχει· διὸ ἐξ ὧν ἐστὶν ἀντίκειται. ἐναντία λέγεται τὰ τε μὴ δυνατὰ ἅμα τῷ αὐτῷ παρεῖναι τῶν διαφερόντων κατὰ γένος, καὶ τὰ πλεῖστον διαφέροντα τῶν ἐν τῷ αὐτῷ γένει, καὶ τὰ πλεῖστον διαφέροντα τῶν ἐν ταυτῷ δεκτικῷ, καὶ τὰ πλεῖστον διαφέροντα τῶν ὑπὸ τὴν αὐτὴν δύναμιν, καὶ ὧν ἡ διαφορὰ μεγίστη ἢ ἀπλῶς ἢ κατὰ γένος ἢ κατ' εἶδος. τὰ δ' ἄλλα ἐναντία λέγεται τὰ μὲν τῷ τὰ τοιαῦτα ἔχειν, τὰ δὲ τῷ δεκτικῷ εἶναι τῶν τοιούτων, τὰ δὲ τῷ ποιητικῷ ἢ παθητικῷ εἶναι τῶν τοιούτων, ἢ ποιοῦντα ἢ πάσχοντα, ἢ ἀποβολαὶ ἢ λήψεις, ἢ ἕξεις ἢ στερήσεις εἶναι τῶν τοιούτων. ἐπεὶ δὲ τὸ ἐν καὶ τὸ ὄν πολλαχῶς λέγεται, ἀκολουθεῖν ἀνάγκη καὶ τᾶλλα ὅσα κατὰ ταῦτα λέγεται, ὥστε καὶ τὸ ταὐτὸν καὶ τὸ ἕτερον καὶ τὸ ἐναντίον, ὥστ' εἶναι ἕτερον καθ' ἐκάστην κατηγορίαν. - ἕτερα δὲ τῷ εἶδει [1018b] λέγεται ὅσα τε ταυτοῦ γένους ὄντα μὴ ὑπάλληλά ἐστι, καὶ ὅσα ἐν τῷ αὐτῷ γένει ὄντα διαφορὰν ἔχει, καὶ ὅσα ἐν τῇ οὐσίᾳ ἐναντίωσιν ἔχει· καὶ τὰ ἐναντία ἕτερα τῷ εἶδει ἀλλήλων ἢ πάντα ἢ τὰ λεγόμενα πρῶτως, καὶ ὅσων ἐν τῷ τελευταίῳ τοῦ γένους εἶδει οἱ λόγοι ἕτεροι (οἷον ἄνθρωπος καὶ ἵππος ἄτομα τῷ γένει οἱ δὲ λόγοι ἕτεροι αὐτῶν), καὶ ὅσα ἐν τῇ αὐτῇ οὐσίᾳ ὄντα ἔχει διαφοράν. ταῦτα δὲ τῷ εἶδει τὰ ἀντικειμένως λεγόμενα τούτοις.

Πρότερα καὶ ὕστερα λέγεται ἓνια μὲν, ὡς ὄντος τινὸς πρώτου καὶ ἀρχῆς ἐν ἐκάστῳ γένει, τῷ ἐγγύτερον «εἶναι» ἀρχῆς τινὸς ὀρισμένης ἢ ἀπλῶς καὶ τῇ φύσει ἢ πρὸς τι ἢ πού ἢ ὑπὸ τινων, οἷον τὰ μὲν κατὰ τόπον τῷ εἶναι ἐγγύτερον ἢ φύσει τινὸς τόπου ὀρισμένου (οἷον τοῦ μέσου ἢ τοῦ ἐσχάτου) ἢ πρὸς τὸ τυχόν, τὸ δὲ πορρώτερον ὕστερον· τὰ δὲ κατὰ χρόνον (τὰ μὲν γὰρ τῷ πορρώτερον τοῦ νῦν, οἷον ἐπὶ τῶν γενομένων, πρότερον γὰρ τὰ Τρωϊκὰ τῶν Μηδικῶν ὅτι πορρώτερον ἀπέχει τοῦ νῦν· τὰ δὲ τῷ ἐγγύτερον τοῦ νῦν, οἷον ἐπὶ τῶν μελλόντων, πρότερον γὰρ Νέμεα Πυθίων ὅτι ἐγγύτερον τοῦ νῦν τῷ νῦν ὡς ἀρχῇ καὶ πρώτῳ χρησαμένων)· τὰ δὲ κατὰ κίνησιν (τὸ γὰρ ἐγγύτερον τοῦ πρώτου κινήσαντος πρότερον, οἷον παῖς ἀνδρός· ἀρχὴ δὲ καὶ αὕτη τις ἀπλῶς)· τὰ δὲ κατὰ δύναμιν (τὸ γὰρ ὑπερέχον τῇ δυνάμει πρότερον, καὶ τὸ δυνατότερον· τοιοῦτον δ' ἐστὶν οὗ κατὰ τὴν προαίρεσιν ἀνάγκη ἀκολουθεῖν

θάτερον καὶ τὸ ὕστερον, ὥστε μὴ κινουῖντός τε ἐκείνου μὴ κινεῖσθαι καὶ κινουῖντος κινεῖσθαι· ἡ δὲ προαίρεσις ἀρχή· τὰ δὲ κατὰ τάξιν (ταῦτα δ' ἐστὶν ὅσα πρὸς τι ἐν ὠρισμένον διέστηκε κατὰ τινα λόγον, οἷον παραστάτης τριτοστάτου πρότερον καὶ παρανήτη νήτης· ἐνθα μὲν γὰρ ὁ κορυφαῖος ἐνθα δὲ ἡ μέση ἀρχή)· - ταῦτα μὲν οὖν πρότερα τοῦτον λέγεται τὸν τρόπον, ἄλλον δὲ τρόπον τὸ τῇ γνώσει πρότερον ὡς καὶ ἀπλῶς πρότερον. τούτων δὲ ἄλλως τὰ κατὰ τὸν λόγον καὶ τὰ κατὰ τὴν αἴσθησιν. κατὰ μὲν γὰρ τὸν λόγον τὰ καθόλου πρότερα κατὰ δὲ τὴν αἴσθησιν τὰ καθ' ἕκαστα· καὶ κατὰ τὸν λόγον δὲ τὸ συμβεβηκὸς τοῦ ὅλου πρότερον, οἷον τὸ μουσικὸν τοῦ μουσικοῦ ἀνθρώπου· οὐ γὰρ ἔσται ὁ λόγος ὅλος ἄνευ τοῦ μέρους· καίτοι οὐκ ἐνδέχεται μουσικὸν εἶναι μὴ ὄντος μουσικοῦ τινός. ἔτι πρότερα λέγεται τὰ τῶν προτέρων πάθη, οἷον εὐθύτης λειότητος· τὸ μὲν [1019a] γὰρ γραμμῆς καθ' αὐτὴν πάθος τὸ δὲ ἐπιφανείας. τὰ μὲν δὴ οὕτω λέγεται πρότερα καὶ ὕστερα, τὰ δὲ κατὰ φύσιν καὶ οὐσίαν, ὅσα ἐνδέχεται εἶναι ἄνευ ἄλλων, ἐκεῖνα δὲ ἄνευ ἐκείνων μὴ· ἡ διαιρέσει ἐχρήσατο Πλάτων. (ἐπεὶ δὲ τὸ εἶναι πολλαχῶς, πρῶτον μὲν τὸ ὑποκείμενον πρότερον, διὸ ἡ οὐσία πρότερον, ἔπειτα ἄλλως τὰ κατὰ δύναμιν καὶ κατ' ἐντελέχειαν· τὰ μὲν γὰρ κατὰ δύναμιν πρότερά ἐστι τὰ δὲ κατὰ ἐντελέχειαν, οἷον κατὰ δύναμιν μὲν ἡ ἡμίσεια τῆς ὅλης καὶ τὸ μόριον τοῦ ὅλου καὶ ἡ ὕλη τῆς οὐσίας, κατ' ἐντελέχειαν δ' ὕστερον· διαλυθέντος γὰρ κατ' ἐντελέχειαν ἔσται.) τρόπον δὲ τινα πάντα τὰ πρότερον καὶ ὕστερον λεγόμενα κατὰ ταῦτα λέγεται· τὰ μὲν γὰρ κατὰ γένεσιν ἐνδέχεται ἄνευ τῶν ἐτέρων εἶναι, οἷον τὸ ὅλον τῶν μορίων, τὰ δὲ κατὰ φθοράν, οἷον τὸ μόριον τοῦ ὅλου. ὁμοίως δὲ καὶ τᾶλλα.

Δύναμις λέγεται ἡ μὲν ἀρχὴ κινήσεως ἡ μεταβολῆς ἡ ἐν ἐτέρῳ ἢ ἢ ἕτερον, οἷον ἡ οἰκοδομικὴ δύναμις ἐστὶν ἡ οὐχ ὑπάρχει ἐν τῷ οἰκοδομουμένῳ, ἀλλ' ἡ ἱατρικὴ δύναμις οὕσα ὑπάρχει ἂν ἐν τῷ ἱατρευομένῳ, ἀλλ' οὐχ ἡ ἱατρευόμενος. ἡ μὲν οὖν ὅλως ἀρχὴ μεταβολῆς ἡ κινήσεως λέγεται δύναμις ἐν ἐτέρῳ ἢ ἢ ἕτερον, ἡ δ' ὑφ' ἐτέρου ἢ ἢ ἕτερον (καθ' ἣν γὰρ τὸ πάσχον πάσχει τι, ὅτε μὲν ἔαν ὅτιοῦν, δυνατὸν αὐτὸ φαμεν εἶναι παθεῖν, ὅτε δ' οὐ κατὰ πᾶν πάθος ἀλλ' ἂν ἐπὶ τὸ βέλτιον)· ἔτι ἡ τοῦ καλῶς τοῦτ' ἐπιτελεῖν ἢ κατὰ προαίρεσιν· ἐνίστε γὰρ τοὺς μόνον ἂν πορευθέντας ἢ εἰπόντας, μὴ καλῶς δὲ ἢ μὴ ὡς προείλοντο, οὐ φαμεν δύνασθαι λέγειν ἢ βαδίζειν· ὁμοίως δὲ καὶ ἐπὶ τοῦ πάσχειν. ἔτι ὅσαι ἔξεις καθ' ἃς ἀπαθῇ ὅλως ἢ

ἀμετάβλητα ἢ μὴ ῥαδίως ἐπὶ τὸ χειρόν εὐμετακίνητα, δυνάμεις λέγονται· κλᾶται μὲν γὰρ καὶ συντριβεται καὶ κάμπτεται καὶ ὅλως φθείρεται οὐ τῷ δύνασθαι ἀλλὰ τῷ μὴ δύνασθαι καὶ ἐλλείπειν τινός· ἀπαθῇ δὲ τῶν τοιούτων ἂ μόνις καὶ ἡρέμα πάσχει διὰ δυνάμιν καὶ τῷ δύνασθαι καὶ τῷ ἔχειν πῶς, λεγομένης δὲ τῆς δυνάμεως τοσαυταχῶς, καὶ τὸ δυνατόν ἓνα μὲν τρόπον λεχθήσεται τὸ ἔχον κινήσεως ἀρχὴν ἢ μεταβολῆς (καὶ γὰρ τὸ στατικὸν δυνατόν τι) ἐν ἐτέρῳ ἢ ἢ ἑτερον, ἓνα δ' ἐὰν ἔχη [1019b] τι αὐτοῦ ἄλλο δυνάμιν τοιαύτην, ἓνα δ' ἐὰν ἔχη μεταβάλλειν ἐφ' ὅτιοῦν δυνάμιν, εἴτ' ἐπὶ τὸ χειρόν εἴτ' ἐπὶ τὸ βέλτιον (καὶ γὰρ τὸ φθειρόμενον δοκεῖ δυνατόν εἶναι φθίρεισθαι, ἢ οὐκ ἂν φθαρήναι εἰ ἦν ἀδύνατον· νῦν δὲ ἔχει τινὰ διάθεσιν καὶ αἰτίαν καὶ ἀρχὴν τοῦ τοιούτου πάθους· ὅτε μὲν δὴ τῷ ἔχειν τι δοκεῖ, ὅτε δὲ τῷ ἐστερηῆσθαι τοιοῦτον εἶναι· εἰ δ' ἢ στέρησις ἐστὶν ἕξις πῶς, πάντα τῷ ἔχειν ἂν εἴη τι, [εἰ δὲ μὴ] ὥστε τῷ τε ἔχειν ἕξιν τινὰ καὶ ἀρχὴν ἐστὶ δυνατόν [ὁμωνύμως] καὶ τῷ ἔχειν τὴν τούτου στέρησιν, εἰ ἐνδέχεται ἔχειν στέρησιν· <εἰ δὲ μὴ, ὁμωνύμως>· ἓνα δὲ τῷ μὴ ἔχειν αὐτοῦ δυνάμιν ἢ ἀρχὴν ἄλλο ἢ ἢ ἄλλο φθαρτικὴν. ἔτι δὲ ταῦτα πάντα ἢ τῷ μόνον ἂν συμβῆναι γενέσθαι ἢ μὴ γενέσθαι, ἢ τῷ καλῶς. καὶ γὰρ ἐν τοῖς ἀψύχοις ἔνεστιν ἢ τοιαύτη δύναμις, οἷον ἐν τοῖς ὀργάνοις· τὴν μὲν γὰρ δύνασθαι φασὶ φθέγγεσθαι λύραν, τὴν δ' οὐδέν, ἂν ἢ μὴ εὖφωνος. ἀδυναμία δὲ ἐστὶ στέρησις δυνάμεως καὶ τῆς τοιαύτης ἀρχῆς οἷα εἴρηται, ἢ ὅλως ἢ τῷ πεφυκότι ἔχειν, ἢ καὶ ὅτε πέφυκεν ἤδη ἔχειν· οὐ γὰρ ὁμοίως ἂν φαῖεν ἀδύνατον εἶναι γεννᾶν παῖδα καὶ ἄνδρα καὶ εὐνοῦχον. ἔτι δὲ καθ' ἑκατέραν δυνάμιν ἐστὶν ἀδυναμία ἀντικειμένη, τῇ τε μόνον κινητικῇ καὶ τῇ καλῶς κινητικῇ. καὶ ἀδύνατα δὴ τὰ μὲν κατὰ τὴν ἀδυναμίαν ταύτην λέγεται, τὰ δὲ ἄλλον τρόπον, οἷον δυνατόν τε καὶ ἀδύνατον, ἀδύνατον μὲν οὗ τὸ ἐναντίον ἐξ ἀνάγκης ἀληθές (οἷον τὸ τὴν διάμετρον σύμμετρον εἶναι ἀδύνατον ὅτι ψεῦδος τὸ τοιοῦτον οὗ τὸ ἐναντίον οὐ μόνον ἀληθές ἀλλὰ καὶ ἀνάγκη [ἀσύμμετρον εἶναι]· τὸ ἄρα σύμμετρον οὐ μόνον ψεῦδος ἀλλὰ καὶ ἐξ ἀνάγκης ψεῦδος)· τὸ δ' ἐναντίον τούτῳ, τὸ δυνατόν, ὅταν μὴ ἀναγκαῖον ἢ τὸ ἐναντίον ψεῦδος εἶναι, οἷον τὸ καθῆσθαι ἄνθρωπον δυνατόν· οὐ γὰρ ἐξ ἀνάγκης τὸ μὴ καθῆσθαι ψεῦδος. τὸ μὲν οὖν δυνατόν ἓνα μὲν τρόπον, ὥσπερ εἴρηται, τὸ μὴ ἐξ ἀνάγκης ψεῦδος σημαίνει, ἓνα δὲ τὸ ἀληθές [εἶναι], ἓνα δὲ τὸ ἐνδεχόμενον ἀληθές εἶναι. κατὰ μεταφορὰν δὲ ἢ ἐν γεωμετρίᾳ λέγεται δυνάμεις. ταῦτα μὲν οὖν τὰ δυνατόν οὐ κατὰ δυνάμιν· τὰ δὲ λεγόμενα κατὰ

δύναμιν πάντα λέγεται πρὸς [1020a] τὴν πρώτην [μίαν]· αὕτη δ' ἐστὶν ἀρχὴ μεταβολῆς ἐν ἄλλῳ ἢ ἢ ἄλλο. τὰ γὰρ ἄλλα λέγεται δυνατὰ τῷ τὰ μὲν ἔχειν αὐτῶν ἄλλο τι τοιαύτην δύναμιν τὰ δὲ μὴ ἔχειν τὰ δὲ ὠδὶ ἔχειν. ὁμοίως δὲ καὶ τὰ ἀδύνατα. ὥστε ὁ κύριος ὅρος τῆς πρώτης δυνάμεως ἂν εἴη ἀρχὴ μεταβλητικὴ ἐν ἄλλῳ ἢ ἢ ἄλλο.

Ποσὸν λέγεται τὸ διαιρετὸν εἰς ἐνυπάρχοντα ὧν ἐκάτερον ἢ ἑκαστον ἐν τι καὶ τότε τι πέφυκεν εἶναι. πλῆθος μὲν οὖν ποσὸν τι ἐὰν ἀριθμητὸν ἦ, μέγεθος δὲ ἂν μετρητὸν ἦ. λέγεται δὲ πλῆθος μὲν τὸ διαιρετὸν δυνάμει εἰς μὴ συνεχῇ, μέγεθος δὲ τὸ εἰς συνεχῇ· μεγέθους δὲ τὸ μὲν ἐφ' ἐν συνεχὲς μήκος τὸ δ' ἐπὶ δύο πλάτος τὸ δ' ἐπὶ τρία βάθος. τούτων δὲ πλῆθος μὲν τὸ πεπερασμένον ἀριθμὸς μήκος δὲ γραμμὴ πλάτος δὲ ἐπιφάνεια βάθος δὲ σῶμα. ἔτι τὰ μὲν λέγεται καθ' αὐτὰ ποσά, τὰ δὲ κατὰ συμβεβηκός, οἷον ἢ μὲν γραμμὴ ποσὸν τι καθ' ἑαυτό, τὸ δὲ μουσικὸν κατὰ συμβεβηκός. τῶν δὲ καθ' αὐτὰ τὰ μὲν κατ' οὐσίαν ἐστίν, οἷον ἢ γραμμὴ ποσὸν τι (ἐν γὰρ τῷ λόγῳ τῷ τί ἐστὶ λέγοντι τὸ ποσὸν τι ὑπάρχει), τὰ δὲ πάθη καὶ ἕξεις τῆς τοιαύτης ἐστὶν οὐσίας, οἷον τὸ πολὺ καὶ τὸ ὀλίγον, καὶ μακρὸν καὶ βραχύ, καὶ πλατὺ καὶ στενόν, καὶ βαθὺ καὶ ταπεινόν, καὶ βαρὺ καὶ κοῦφον, καὶ τὰ ἄλλα τὰ τοιαῦτα. ἐστὶ δὲ καὶ τὸ μέγα καὶ τὸ μικρὸν καὶ μεῖζον καὶ ἔλαττον, καὶ καθ' αὐτὰ καὶ πρὸς ἄλληλα λεγόμενα, τοῦ ποσοῦ πάθη καθ' αὐτά· μεταφέρονται μέντοι καὶ ἐπ' ἄλλα ταῦτα τὰ ὀνόματα. τῶν δὲ κατὰ συμβεβηκός λεγομένων ποσῶν τὰ μὲν οὕτως λέγεται ὥσπερ ἐλέχθη ὅτι τὸ μουσικὸν ποσὸν καὶ τὸ λευκὸν τῷ εἶναι ποσὸν τι ὧ ὑπάρχουσι, τὰ δὲ ὡς κίνησις καὶ χρόνος· καὶ γὰρ ταῦτα πόσ' ἅττα λέγεται καὶ συνεχῇ τῷ ἐκεῖνα διαιρετὰ εἶναι ὧν ἐστὶ ταῦτα πάθη. λέγω δὲ οὐ τὸ κινούμενον ἀλλ' ὃ ἐκινήθη· τῷ γὰρ ποσὸν εἶναι ἐκεῖνο καὶ ἢ κίνησις ποσῇ, ὃ δὲ χρόνος τῷ ταύτην.

[Τὸ] ποιὸν λέγεται ἓνα μὲν τρόπον ἢ διαφορὰ τῆς οὐσίας, οἷον ποιόν τι ἄνθρωπος ζῶον ὅτι δίπουν, ἵππος δὲ τετράπουν, καὶ κύκλος ποιόν τι σχῆμα ὅτι ἀγώνιον, ὡς τῆς διαφορᾶς [1020b] τῆς κατὰ τὴν οὐσίαν ποιότητος οὐσης· - ἓνα μὲν δὴ τρόπον τοῦτον λέγεται ἢ ποιότης διαφορὰ οὐσίας, ἓνα δὲ ὡς τὰ ἀκίνητα καὶ τὰ μαθηματικά, ὥσπερ οἱ ἀριθμοὶ ποιοὶ τινες, οἷον οἱ σύνθετοι καὶ μὴ μόνον ἐφ' ἐν ὄντες ἀλλ' ὧν μίμημα τὸ ἐπίπεδον καὶ τὸ στερεόν (οὗτοι δ' εἰσὶν οἱ ποσάκις ποσοὶ ἢ ποσάκις ποσάκις ποσοί), καὶ ὅλως ὃ παρὰ τὸ ποσὸν ὑπάρχει ἐν τῇ οὐσίᾳ· οὐσία γὰρ ἐκάστου ὃ ἅπαξ, οἷον τῶν ἕξ οὐχ ὃ δις ἢ τρίς εἰσὶν ἀλλ' ὃ ἅπαξ· ἕξ γὰρ ἅπαξ ἕξ. ἔτι ὅσα πάθη τῶν

κινουμένων οὐσιῶν, οἷον θερμότης καὶ ψυχρότης, καὶ λευκότης καὶ μελανία, καὶ βαρύτης καὶ κουφότης, καὶ ὅσα τοιαῦτα, καθ' ἃ λέγονται καὶ ἀλλοιοῦσθαι τὰ σώματα μεταβαλλόντων. ἔτι κατ' ἀρετὴν καὶ κακίαν καὶ ὅλως τὸ κακὸν καὶ ἀγαθόν. σχεδὸν δὴ κατὰ δύο τρόπους λέγοιτ' ἂν τὸ ποιόν, καὶ τούτων ἓνα τὸν κυριώτατον· πρώτη μὲν γὰρ ποιότης ἢ τῆς οὐσίας διαφορὰ (ταύτης δέ τι καὶ ἢ ἐν τοῖς ἀριθμοῖς ποιότης μέρος· διαφορὰ γὰρ τις οὐσιῶν, ἀλλ' ἢ οὐ κινουμένων ἢ οὐχ ἢ κινούμενα), τὰ δὲ πάθη τῶν κινουμένων ἢ κινούμενα, καὶ αἱ τῶν κινήσεων διαφοραί. ἀρετὴ δὲ καὶ κακία τῶν παθημάτων μέρος τι· διαφορὰς γὰρ δηλοῦσι τῆς κινήσεως καὶ τῆς ἐνεργείας, καθ' ἃς ποιοῦσιν ἢ πάσχουσι καλῶς ἢ φαύλως τὰ ἐν κινήσει ὄντα· τὸ μὲν γὰρ ὡδὶ δυνάμενον κινεῖσθαι ἢ ἐνεργεῖν ἀγαθὸν τὸ δ' ὡδὶ καὶ ἐναντίως μοχθηρόν. μάλιστα δὲ τὸ ἀγαθὸν καὶ τὸ κακὸν σημαίνει τὸ ποιὸν ἐπὶ τῶν ἐμψύχων, καὶ τούτων μάλιστα ἐπὶ τοῖς ἔχουσι προαίρεσιν.

Πρὸς τι λέγεται τὰ μὲν ὡς διπλάσιον πρὸς ἡμισυ καὶ τριπλάσιον πρὸς τριτημόριον, καὶ ὅλως πολλαπλάσιον πρὸς πολλοστημόριον καὶ ὑπερέχον πρὸς ὑπερεχόμενον· τὰ δ' ὡς τὸ θερμαντικὸν πρὸς τὸ θερμαντὸν καὶ τὸ τμητικὸν πρὸς τὸ τμητόν, καὶ ὅλως τὸ ποιητικὸν πρὸς τὸ παθητικόν· τὰ δ' ὡς τὸ μετρητὸν πρὸς τὸ μέτρον καὶ ἐπιστητὸν πρὸς ἐπιστήμην καὶ αἰσθητὸν πρὸς αἴσθησιν. λέγεται δὲ τὰ μὲν πρῶτα κατ' ἀριθμὸν ἢ ἀπλῶς ἢ ὠρισμένως, πρὸς αὐτοὺς ἢ πρὸς ἓν (οἷον τὸ μὲν διπλάσιον πρὸς ἓν ἀριθμὸς ὠρισμένος, τὸ δὲ πολλαπλάσιον κατ' ἀριθμὸν πρὸς ἓν, οὐχ ὠρισμένον δέ, οἷον τόνδε [1021a] ἢ τόνδε· τὸ δὲ ἡμιόλιον πρὸς τὸ ὑφημιόλιον κατ' ἀριθμὸν πρὸς ἀριθμὸν ὠρισμένον· τὸ δ' ἐπιμόριον πρὸς τὸ ὑπεπιμόριον κατὰ ἀόριστον, ὥσπερ τὸ πολλαπλάσιον πρὸς τὸ ἓν· τὸ δ' ὑπερέχον πρὸς τὸ ὑπερεχόμενον ὅλως ἀόριστον κατ' ἀριθμόν· ὁ γὰρ ἀριθμὸς σύμμετρος, κατὰ μὴ συμέτρου δὲ ἀριθμὸς οὐ λέγεται, τὸ δὲ ὑπερέχον πρὸς τὸ ὑπερεχόμενον τοσοῦτόν τέ ἐστὶ καὶ ἔτι, τοῦτο δ' ἀόριστον· ὁπότερον γὰρ ἔτυχεν ἐστίν, ἢ ἴσον ἢ οὐκ ἴσον)· ταῦτά τε οὖν τὰ πρὸς τι πάντα κατ' ἀριθμὸν λέγεται καὶ ἀριθμοῦ πάθη, καὶ ἔτι τὸ ἴσον καὶ ὅμοιον καὶ ταῦτ' ἄλλον τρόπον (κατὰ γὰρ τὸ ἓν λέγεται πάντα, ταῦτά μὲν γὰρ ὧν μία ἡ οὐσία, ὅμοια δ' ὧν ἡ ποιότης μία, ἴσα δὲ ὧν τὸ ποσὸν ἓν· τὸ δ' ἓν τοῦ ἀριθμοῦ ἀρχὴ καὶ μέτρον, ὥστε ταῦτα πάντα πρὸς τι λέγεται κατ' ἀριθμὸν μὲν, οὐ τὸν αὐτὸν δὲ τρόπον)· τὰ δὲ ποιητικὰ καὶ παθητικὰ κατὰ δύναμιν

ποιητικήν καὶ παθητικήν καὶ ἐνεργείας τὰς τῶν δυνάμεων, οἷον τὸ θερμαντικὸν πρὸς τὸ θερμαντὸν ὅτι δύναται, καὶ πάλιν τὸ θερμαῖνον πρὸς τὸ θερμαινόμενον καὶ τὸ τέμνον πρὸς τὸ τεμνόμενον ὡς ἐνεργοῦντα. τῶν δὲ κατ' ἀριθμὸν οὐκ εἰσὶν ἐνέργειαι ἀλλ' ἢ ὃν τρόπον ἐν ἑτέροις εἴρηται· αἱ δὲ κατὰ κίνησιν ἐνέργειαι οὐχ ὑπάρχουσιν. τῶν δὲ κατὰ δύναμιν καὶ κατὰ χρόνους ἤδη λέγονται πρὸς τι οἷον τὸ πεποιηκὸς πρὸς τὸ πεποιημένον καὶ τὸ ποιῆσον πρὸς τὸ ποιησόμενον. οὕτω γὰρ καὶ πατήρ υἱοῦ λέγεται πατήρ· τὸ μὲν γὰρ πεποιηκὸς τὸ δὲ πεπονθὸς τί ἐστίν. ἔτι ἕνια κατὰ στέρησιν δυνάμεως, ὥσπερ τὸ ἀδύνατον καὶ ὅσα οὕτω λέγεται, οἷον τὸ ἀόρατον. τὰ μὲν οὖν κατ' ἀριθμὸν καὶ δύναμιν λεγόμενα πρὸς τι πάντα ἐστὶ πρὸς τι τῷ ὅπερ ἐστὶν ἄλλου λέγεσθαι αὐτὸ ὃ ἐστίν, ἀλλὰ μὴ τῷ ἄλλο πρὸς ἐκεῖνο· τὸ δὲ μετρητὸν καὶ τὸ ἐπιστητὸν καὶ τὸ διανοητὸν τῷ ἄλλο πρὸς αὐτὸ λέγεσθαι πρὸς τι λέγονται. τό τε γὰρ διανοητὸν σημαίνει ὅτι ἔστιν αὐτοῦ διάνοια, οὐκ ἔστι δ' ἡ διάνοια πρὸς τοῦτο οὗ ἐστὶ διάνοια (δὺς γὰρ ταυτὸν εἰρημένον ἂν εἴη), ὁμοίως δὲ καὶ τινός ἐστιν ἡ ὄψις ὄψις, οὐχ [1021b] οὗ ἐστὶν ὄψις (καίτοι γ' ἀληθές τοῦτο εἰπεῖν) ἀλλὰ πρὸς χρῶμα ἢ πρὸς ἄλλο τι τοιοῦτον. ἐκείνως δὲ δὺς τὸ αὐτὸ λεχθήσεται, ὅτι ἐστὶν οὗ ἐστὶν ἡ ὄψις. τὰ μὲν οὖν καθ' ἑαυτὰ λεγόμενα πρὸς τι τὰ μὲν οὕτω λέγεται, τὰ δὲ ἂν τὰ γένη αὐτῶν ἢ τοιαῦτα, οἷον ἡ ἱατρικὴ τῶν πρὸς τι ὅτι τὸ γένος αὐτῆς ἡ ἐπιστήμη δοκεῖ εἶναι πρὸς τι· ἔτι καθ' ὅσα τὰ ἔχοντα λέγεται πρὸς τι, οἷον ἰσότης ὅτι τὸ ἴσον καὶ ὁμοιότης ὅτι τὸ ὅμοιον· τὰ δὲ κατὰ συμβεβηκός, οἷον ἄνθρωπος πρὸς τι ὅτι συμβέβηκεν αὐτῷ διπλασίῳ εἶναι, τοῦτο δ' ἐστὶ τῶν πρὸς τι· ἢ τὸ λευκόν, εἰ τῷ αὐτῷ συμβέβηκε διπλασίῳ καὶ λευκῷ εἶναι.

Τέλειον λέγεται ἐν μὲν οὗ μὴ ἔστιν ἔξω τι λαβεῖν μηδὲ ἐν μόριον (οἷον χρόνος τέλειος ἐκάστου οὗτος οὗ μὴ ἔστιν ἔξω λαβεῖν χρόνον τινὰ ὃς τούτου μέρος ἐστὶ τοῦ χρόνου), καὶ τὸ κατ' ἀρετὴν καὶ τὸ εὖ μὴ ἔχον ὑπερβολὴν πρὸς τὸ γένος, οἷον τέλειος ἱατρός καὶ τέλειος αὐλητῆς ὅταν κατὰ τὸ εἶδος τῆς οἰκείας ἀρετῆς μηθὲν ἐλλείπωσιν (οὕτω δὲ μεταφέροντες καὶ ἐπὶ τῶν κακῶν λέγομεν συκοφάντην τέλειον καὶ κλέπτην τέλειον, ἐπειδὴ καὶ ἀγαθοὺς λέγομεν αὐτούς, οἷον κλέπτην ἀγαθὸν καὶ συκοφάντην ἀγαθόν· καὶ ἡ ἀρετὴ τελειώσις τις· ἕκαστον γὰρ τότε τέλειον καὶ οὐσία πᾶσα τότε τελεία, ὅταν κατὰ τὸ εἶδος τῆς οἰκείας ἀρετῆς μηδὲν ἐλλείπη μόριον τοῦ κατὰ φύσιν μεγέθους)· ἔτι οἷς ὑπάρχει τὸ τέλος, σπουδαῖον <ὄν>,

ταῦτα λέγεται τέλεια· κατὰ γὰρ τὸ ἔχειν τὸ τέλος τέλεια, ὥστ' ἐπεὶ τὸ τέλος τῶν ἐσχάτων τί ἐστι, καὶ ἐπὶ τὰ φαῦλα μεταφέροντες λέγομεν τελείως ἀπολωλέναι καὶ τελείως ἐφθάρθαι, ὅταν μηδὲν ἐλλείπη τῆς φθορᾶς καὶ τοῦ κακοῦ ἀλλ' ἐπὶ τῷ ἐσχάτῳ ἦ· διὸ καὶ ἡ τελευτὴ κατὰ μεταφορὰν λέγεται τέλος, ὅτι ἄμφω ἐσχάτα· τέλος δὲ καὶ τὸ οὗ ἕνεκα ἐσχάτον. τὰ μὲν οὖν καθ' αὐτὰ λεγόμενα τέλεια τοσαυταχῶς λέγεται, τὰ μὲν τῷ κατὰ τὸ εὖ μηδὲν ἐλλείπειν μηδ' ἔχειν ὑπερβολὴν μηδὲ ἕξω τι λαβεῖν, τὰ δ' ὅλως κατὰ τὸ μὴ ἔχειν ὑπερβολὴν ἐν ἐκάστῳ γένει μηδ' εἶναι τι ἕξω· τὰ δὲ ἄλλα ἤδη κατὰ ταῦτα τῷ ἢ ποιεῖν τι τοιοῦτον ἢ ἔχειν ἢ ἀρμόττειν τούτῳ ἢ ἀμῶς γέ πως λέγεσθαι πρὸς τὰ πρῶτως λεγόμενα τέλεια.

Πέρας λέγεται τὸ τε ἐσχάτον ἐκάστου καὶ οὗ ἕξω μηδὲν ἔστι λαβεῖν πρώτου καὶ οὗ ἕσω πάντα πρώτου, καὶ ὁ ἂν ἦ εἶδος μεγέθους ἢ ἔχοντος μέγεθος, καὶ τὸ τέλος ἐκάστου (τοιοῦτον δ' ἐφ' ὃ ἡ κίνησις καὶ ἡ πρᾶξις, καὶ οὐκ ἂφ' οὗ - ὅτε δὲ ἄμφω, καὶ ἂφ' οὗ καὶ ἐφ' ὃ καὶ τὸ οὗ ἕνεκα), καὶ ἡ οὐσία ἢ ἐκάστου καὶ τὸ τί ἦν εἶναι ἐκάστῳ· τῆς γνώσεως γὰρ τοῦτο πέρας· εἰ δὲ τῆς γνώσεως, καὶ τοῦ πράγματος. ὥστε φανερόν ὅτι ὁσαυχὼς τε ἡ ἀρχὴ λέγεται, τοσαυταχῶς καὶ τὸ πέρας, καὶ ἔτι πλεοναχῶς· ἡ μὲν γὰρ ἀρχὴ πέρας τι, τὸ δὲ πέρας οὐ πᾶν ἀρχή.

Τὸ καθ' ὃ λέγεται πολλαχῶς, ἓνα μὲν τρόπον τὸ εἶδος καὶ ἡ οὐσία ἐκάστου πράγματος, οἷον καθ' ὃ ἀγαθός, αὐτὸ ἀγαθόν, ἓνα δὲ ἐν ᾧ πρώτῳ πέφυκε γίγνεσθαι, οἷον τὸ χρῶμα ἐν τῇ ἐπιφανείᾳ. τὸ μὲν οὖν πρῶτως λεγόμενον καθ' ὃ τὸ εἶδος ἐστι, δευτέρως δὲ ὡς ἡ ὕλη ἐκάστου καὶ τὸ ὑποκείμενον ἐκάστῳ πρῶτον. ὅλως δὲ τὸ καθ' ὃ ἰσαχῶς καὶ τὸ αἴτιον ὑπάρξει· κατὰ τί γὰρ ἐλήλυθεν ἢ οὗ ἕνεκα ἐλήλυθε λέγεται, καὶ κατὰ τί παραλελόγισται ἢ συλλελόγισται, ἢ τί τὸ αἴτιον τοῦ συλλογισμοῦ ἢ παραλογισμοῦ. ἔτι δὲ τὸ καθ' ὃ τὸ κατὰ θέσιν λέγεται, καθ' ὃ ἔστηκεν ἢ καθ' ὃ βαδίζει· πάντα γὰρ ταῦτα τόπον σημαίνει καὶ θέσιν. ὥστε καὶ τὸ καθ' αὐτὸ πολλαχῶς ἀνάγκη λέγεσθαι. ἐν μὲν γὰρ καθ' αὐτὸ τὸ τί ἦν εἶναι ἐκάστῳ, οἷον ὁ Καλλίας καθ' αὐτὸν Καλλίας καὶ τὸ τί ἦν εἶναι Καλλία· ἐν δὲ ὅσα ἐν τῷ τί ἐστιν ὑπάρχει, οἷον ζῶον ὁ Καλλίας καθ' αὐτόν· ἐν γὰρ τῷ λόγῳ ἐνυπάρχει τὸ ζῶον· ζῶον γάρ τι ὁ Καλλίας. ἔτι δὲ εἰ ἐν αὐτῷ δέδεκται πρώτῳ ἢ τῶν αὐτοῦ τινί, οἷον ἡ ἐπιφάνεια λευκὴ καθ' ἑαυτήν, καὶ ζῆ ὁ ἄνθρωπος καθ' αὐτόν· ἡ γὰρ ψυχὴ μέρος τι τοῦ ἀνθρώπου, ἐν ἣ πρώτῃ τὸ ζῆν. ἔτι οὗ μὴ ἔστιν ἄλλο αἴτιον· τοῦ γὰρ

ἀνθρώπου πολλὰ αἷτια, τὸ ζῶον, τὸ δίπουν, ἀλλ' ὅμως καθ' αὐτὸν ἄνθρωπος ὁ ἄνθρωπός ἐστιν. ἔτι ὅσα μόνῳ ὑπάρχει καὶ ἡ μόνον δι' αὐτὸ κεχωρισμένον καθ' αὐτό.

[1022b] Διάθεσις λέγεται τοῦ ἔχοντος μέρη τάξις ἢ κατὰ τόπον ἢ κατὰ δύναμιν ἢ κατ' εἶδος· θέσιν γὰρ δεῖ τινὰ εἶναι, ὥσπερ καὶ τοῦνομα δηλοῖ ἡ διάθεσις.

Ἐξίς δὲ λέγεται ἓνα μὲν τρόπον οἷον ἐνέργειά τις τοῦ ἔχοντος καὶ ἐχομένου, ὥσπερ πρᾶξις τις ἢ κίνησις (ὅταν γὰρ τὸ μὲν ποιῇ τὸ δὲ ποιῆται, ἔστι ποιήσις μεταξὺ· οὕτω καὶ τοῦ ἔχοντος ἐσθῆτα καὶ τῆς ἐχομένης ἐσθῆτος ἔστι μεταξὺ ἐξίς)· - ταύτην μὲν οὖν φανερόν ὅτι οὐκ ἐνδέχεται ἔχειν ἑξίς (εἰς ἄπειρον γὰρ βαδιεῖται, εἰ τοῦ ἐχομένου ἔσται ἔχειν τὴν ἑξίς), ἄλλον δὲ τρόπον ἑξίς λέγεται διάθεσις καθ' ἣν ἢ εὖ ἢ κακῶς διακείμενον, καὶ ἢ καθ' αὐτὸ ἢ πρὸς ἄλλο, οἷον ἡ υἷς ἑξίς τις· διάθεσις γὰρ ἐστὶ τοιαύτη. ἔτι ἑξίς λέγεται ἂν ἡ μῶριον διαθέσεως τοιαύτης· διὸ καὶ ἡ τῶν μερῶν ἀρετὴ ἑξίς τίς ἐστιν.

Πάθος λέγεται ἓνα μὲν τρόπον ποιότης καθ' ἣν ἀλλοιοῦσθαι ἐνδέχεται, οἷον τὸ λευκὸν καὶ τὸ μέλαν, καὶ γλυκὺ καὶ πικρὸν, καὶ βαρὺ καὶ κουφότης, καὶ ὅσα ἄλλα τοιαῦτα· ἓνα δὲ αἱ τούτων ἐνέργειαι καὶ ἀλλοιώσεις ἥδη. ἔτι τούτων μᾶλλον αἱ βλαβεραὶ ἀλλοιώσεις καὶ κινήσεις, καὶ μάλιστα αἱ λυπηραὶ βλάβαι. ἔτι τὰ μεγέθη τῶν συμφορῶν καὶ λυπηρῶν πάθη λέγεται.

Στέρησις λέγεται ἓνα μὲν τρόπον ἂν μὴ ἔχη τι τῶν πεφυκότων ἔχεσθαι, κἂν μὴ αὐτὸ ἡ πεφυκὸς ἔχειν, οἷον φυτὸν ὀμμάτων ἐστερηθῆσθαι λέγεται· ἓνα δὲ ἂν πεφυκὸς ἔχειν, ἢ αὐτὸ ἢ τὸ γένος, μὴ ἔχη, οἷον ἄλλως ἄνθρωπος ὁ τυφλὸς ὄψεως ἐστέρηται καὶ ἀσπάλαξ, τὸ μὲν κατὰ τὸ γένος τὸ δὲ καθ' αὐτό. ἔτι ἂν πεφυκὸς καὶ ὅτε πέφυκεν ἔχειν μὴ ἔχη· ἢ γὰρ τυφλότης στέρησίς τις, τυφλὸς δ' οὐ κατὰ πᾶσαν ἡλικίαν, ἀλλ' ἐν ἡ πέφυκεν ἔχειν, ἂν μὴ ἔχη. ὁμοίως δὲ καὶ ἐν ᾧ ἂν ἡ <πεφυκὸς> καὶ καθ' ὃ καὶ πρὸς ὃ καὶ ὥς, ἂν μὴ ἔχη [πεφυκός]. ἔτι ἡ βίαία ἐκάστου ἀφαιρέσεις στέρησις λέγεται. καὶ ὁσαυτὸς δὲ αἱ ἀπὸ τοῦ α ἀποφάσεις λέγονται, τοσαυταυτὸς καὶ αἱ στερήσεις λέγονται· ἄνισον μὲν γὰρ τῷ μὴ ἔχειν ἰσότητα πεφυκὸς λέγεται, ἀόρατον δὲ καὶ τῷ ὅλως μὴ ἔχειν χρῶμα καὶ τῷ φαύλως, καὶ ἄπουν καὶ τῷ μὴ ἔχειν ὅλως πόδας καὶ τῷ φαύλους. ἔτι καὶ τῷ [1023a] μικρὸν ἔχειν, οἷον τὸ ἀπύρηνον· τοῦτο δ' ἐστὶ τὸ φαύλως πῶς ἔχειν. ἔτι τῷ μὴ ῥαδίως ἢ τῷ μὴ καλῶς, οἷον τὸ ἄτμητον οὐ

μόνον τῷ μὴ τέμνεσθαι ἀλλὰ καὶ τῷ μὴ ῥαδίως ἢ μὴ καλῶς. ἔτι τῷ πάντῃ μὴ ἔχειν· τυφλὸς γὰρ οὐ λέγεται ὁ ἐτερόφθαλμος ἀλλ' ὁ ἐν ἀμφοῖν μὴ ἔχων ὄψιν· διὸ οὐ πᾶς ἀγαθὸς ἢ κακός, ἢ δίκαιος ἢ ἀδίκος, ἀλλὰ καὶ τὸ μεταξύ.

Τὸ ἔχειν λέγεται πολλαχῶς, ἓνα μὲν τρόπον τὸ ἄγειν κατὰ τὴν αὐτοῦ φύσιν ἢ κατὰ τὴν αὐτοῦ ὁρμὴν, διὸ λέγεται πυρετός τε ἔχειν τὸν ἄνθρωπον καὶ οἱ τύραννοι τὰς πόλεις καὶ τὴν ἐσθῆτα οἱ ἀμπεχόμενοι· ἓνα δ' ἐν ᾧ ἂν τι ὑπάρχῃ ὡς δεκτικῷ, οἷον ὁ χαλκὸς ἔχει τὸ εἶδος τοῦ ἀνδριάντος καὶ τὴν νόσον τὸ σῶμα· ἓνα δὲ ὡς τὸ περιέχον τὰ περιεχόμενα· ἐν ᾧ γάρ ἐστι περιέχοντι, ἔχεσθαι ὑπὸ τούτου λέγεται, οἷον τὸ ἀγγεῖον ἔχειν τὸ ὑγρὸν φαιμεν καὶ τὴν πόλιν ἀνθρώπους καὶ τὴν ναῦν ναύτας, οὕτω δὲ καὶ τὸ ὅλον ἔχειν τὰ μέρη. ἔτι τὸ κωλύον κατὰ τὴν αὐτοῦ ὁρμὴν τι κινεῖσθαι ἢ πράττειν ἔχειν λέγεται τοῦτο αὐτό, οἷον καὶ οἱ κίονες τὰ ἐπικείμενα βάρη, καὶ ὡς οἱ ποιηταὶ τὸν Ἀτλαντα ποιοῦσι τὸν οὐρανὸν ἔχειν ὡς συμπεσόντ' ἂν ἐπὶ τὴν γῆν, ὥσπερ καὶ τῶν φυσιολόγων τινὲς φασιν· τοῦτον δὲ τὸν τρόπον καὶ τὸ συνέχον λέγεται ἃ συνέχει ἔχειν, ὡς διαχωρισθέντα ἂν κατὰ τὴν αὐτοῦ ὁρμὴν ἕκαστον. καὶ τὸ ἐν τινι δὲ εἶναι ὁμοτρόπως λέγεται καὶ ἐπομένως τῷ ἔχειν.

Τὸ ἐκ τίνος εἶναι λέγεται ἓνα μὲν τρόπον ἐξ οὗ ἐστὶν ὡς ὕλης, καὶ τοῦτο διχῶς, ἢ κατὰ τὸ πρῶτον γένος ἢ κατὰ τὸ ὕστατον εἶδος, οἷον ἔστι μὲν ὡς ἅπαντα τὰ τηκτὰ ἐξ ὕδατος, ἔστι δ' ὡς ἐκ χαλκοῦ ὁ ἀνδριάς· ἓνα δ' ὡς ἐκ τῆς πρώτης κινήσεως ἀρχῆς (οἷον ἐκ τίνος ἡ μάχη· ἐκ λοιδορίας, ὅτι αὕτη ἀρχὴ τῆς μάχης)· ἓνα δ' ἐκ τοῦ συνθέτου ἐκ τῆς ὕλης καὶ τῆς μορφῆς, ὥσπερ ἐκ τοῦ ὅλου τὰ μέρη καὶ ἐκ τῆς Ἰλιάδος τὸ ἔπος καὶ ἐκ τῆς οἰκίας οἱ λίθοι· τέλος μὲν γάρ ἐστιν ἡ μορφή, τέλειον δὲ τὸ ἔχον τέλος. τὰ δὲ ὡς ἐκ τοῦ μέρους τὸ εἶδος, οἷον ἄνθρωπος ἐκ τοῦ δίποδος καὶ ἡ συλλαβὴ ἐκ τοῦ στοιχείου· ἄλλως γὰρ τοῦτο [1023b] καὶ ὁ ἀνδριάς ἐκ χαλκοῦ· ἐκ τῆς αἰσθητῆς γὰρ ὕλης ἡ συνθετὴ οὐσία, ἀλλὰ καὶ τὸ εἶδος ἐκ τῆς τοῦ εἶδους ὕλης. τὰ μὲν οὖν οὕτω λέγεται, τὰ δ' εἰάν κατὰ μέρος τι τούτων τις ὑπάρχῃ τῶν τρόπων, οἷον ἐκ πατρὸς καὶ μητρὸς τὸ τέκνον καὶ ἐκ γῆς τὰ φυτά, ὅτι ἐκ τίνος μέρους αὐτῶν. ἓνα δὲ μεθ' ὃ τῷ χρόνῳ, οἷον ἐξ ἡμέρας νύξ καὶ ἐξ εὐδίας χειμῶν, ὅτι τοῦτο μετὰ τοῦτο· τούτων δὲ τὰ μὲν τῷ ἔχειν μεταβολὴν εἰς ἄλληλα οὕτω λέγεται, ὥσπερ καὶ τὰ νῦν εἰρημένα, τὰ δὲ τῷ κατὰ τὸν χρόνον ἐφεξῆς μόνον, οἷον ἐξ ἰσημερίας ἐγένετο ὁ πλοῦς ὅτι μετ' ἰσημερίαν

ἐγένετο, καὶ ἐκ Διονυσίων Θαργήλια ὅτι μετὰ τὰ Διονύσια.

Μέρος λέγεται ἓνα μὲν τρόπον εἰς ὃ διαιρεθεῖν ἂν τὸ ποσὸν ὅπως οὖν (ἀεὶ γὰρ τὸ ἀφαιρούμενον τοῦ ποσοῦ ἢ ποσὸν μέρος λέγεται ἐκείνου, οἷον τῶν τριῶν τὰ δύο μέρος λέγεται πῶς), ἄλλον δὲ τρόπον τὰ καταμετροῦντα τῶν τοιούτων μόνον· διὸ τὰ δύο τῶν τριῶν ἔστι μὲν ὡς λέγεται μέρος, ἔστι δ' ὡς οὐ. ἔτι εἰς ἃ τὸ εἶδος διαιρεθεῖν ἂν ἄνευ τοῦ ποσοῦ, καὶ ταῦτα μόρια λέγεται τούτου· διὸ τὰ εἶδη τοῦ γένους φασὶν εἶναι μόρια. ἔτι εἰς ἃ διαιρεῖται ἢ ἐξ ὧν σύγκειται τὸ ὅλον, ἢ τὸ εἶδος ἢ τὸ ἔχον τὸ εἶδος, οἷον τῆς σφαίρας τῆς χαλκῆς ἢ τοῦ κύβου τοῦ χαλκοῦ καὶ ὁ χαλκὸς μέρος (τοῦτο δ' ἐστὶν ἡ ὕλη ἐν ἣ τὸ εἶδος) καὶ ἡ γωνία μέρος. ἔτι τὰ ἐν τῷ λόγῳ τῷ δηλοῦντι ἕκαστον, καὶ ταῦτα μόρια τοῦ ὅλου· διὸ τὸ γένος τοῦ εἶδους καὶ μέρος λέγεται, ἄλλως δὲ τὸ εἶδος τοῦ γένους μέρος.

Ὅλον λέγεται οὗ τε μὴθὲν ἄπεστι μέρος ἐξ ὧν λέγεται ὅλον φύσει, καὶ τὸ περιέχον τὰ περιεχόμενα ὥστε ἓν τι εἶναι ἐκεῖνα· τοῦτο δὲ διχῶς· ἢ γὰρ ὡς ἕκαστον ἐν ἡ ὡς ἐκ τούτων τὸ ἓν. τὸ μὲν γὰρ καθόλου, καὶ τὸ ὅλως λεγόμενον ὡς ὅλον τι ὄν, οὕτως ἐστὶ καθόλου ὡς πολλὰ περιέχον τῷ κατηγορεῖσθαι καθ' ἑκάστου καὶ ἐν ἅπαντα εἶναι ὡς ἕκαστον, οἷον ἄνθρωπον ἵππον θεόν, διότι ἅπαντα ζῶα· τὸ δὲ συνεχὲς καὶ πεπερασμένον, ὅταν ἓν τι ἐκ πλειόνων ἦ, ἐνυπαρχόντων μάλιστα μὲν δυνάμει, εἰ δὲ μή, ἐνεργείᾳ. τούτων δ' αὐτῶν μᾶλλον τὰ φύσει ἢ τέχνῃ τοιαῦτα, ὥσπερ καὶ ἐπὶ τοῦ ἐνὸς ἐλέγομεν, ὡς οὕσης τῆς ὁλότητος ἐνότητός τινος.

[1024a] ἔτι τοῦ ποσοῦ ἔχοντος δὲ ἀρχὴν καὶ μέσον καὶ ἔσχατον, ὅσων μὲν μὴ ποιεῖ ἡ θέσις διαφορὰν, πᾶν λέγεται, ὅσων δὲ ποιεῖ, ὅλον. ὅσα δὲ ἄμφω ἐνδέχεται, καὶ ὅλα καὶ πάντα· ἔστι δὲ ταῦτα ὅσων ἢ μὲν φύσις ἢ αὐτὴ μένει τῇ μεταθέσει, ἢ δὲ μορφῇ οὐ, οἷον κηρὸς καὶ ἱμάτιον· καὶ γὰρ ὅλον καὶ πᾶν λέγεται· ἔχει γὰρ ἄμφω. ὕδωρ δὲ καὶ ὅσα ὕγρα καὶ ἀριθμὸς πᾶν μὲν λέγεται, ὅλος δ' ἀριθμὸς καὶ ὅλον ὕδωρ οὐ λέγεται, ἂν μὴ μεταφορᾷ. πάντα δὲ λέγεται ἐφ' οἷς τὸ πᾶν ὡς ἐφ' ἐνί, ἐπὶ τούτοις τὸ πάντα ὡς ἐπὶ διηρημένοις· πᾶς οὗτος ὁ ἀριθμὸς, πᾶσαι αὗται αἱ μονάδες.

Κολοβὸν δὲ λέγεται τῶν ποσῶν οὐ τὸ τυχόν, ἀλλὰ μεριστόν τε δεῖ αὐτὸ εἶναι καὶ ὅλον. τά τε γὰρ δύο οὐ κολοβά θατέρου ἀφαιρουμένου ἐνός (οὐ γὰρ ἴσον τὸ καλόβωμα καὶ τὸ λοιπὸν οὐδέποτε· ἐστίν) οὐδ' ὅλως ἀριθμὸς οὐδεὶς· καὶ γὰρ τὴν οὐσίαν δεῖ μένειν· εἰ κύλιξ κολοβός, ἔτι εἶναι κύλικα· ὁ δὲ ἀριθμὸς οὐκέτι ὁ

αὐτός. πρὸς δὲ τούτοις κἂν ἀνομοιομερῇ ἦ, οὐδὲ ταῦτα πάντα (ὁ γὰρ ἀριθμὸς ἔστιν ὡς καὶ ἀνόμοια ἔχει μέρη, οἷον δυάδα τριάδα), ἀλλ' ὅλως ὧν μὴ ποιεῖ ἡ θέσις διαφορὰν οὐδὲν κολοβόν, οἷον ὕδωρ ἢ πῦρ, ἀλλὰ δεῖ τοιαῦτα εἶναι ἃ κατὰ τὴν οὐσίαν θέσιν ἔχει. ἔτι συνεχῇ· ἡ γὰρ ἀρμονία ἐξ ἀνομοίων μὲν καὶ θέσιν ἔχει, κολοβὸς δὲ οὐ γίγνεται. πρὸς δὲ τούτοις οὐδ' ὅσα ὅλα, οὐδὲ ταῦτα ὅτουσιν μορίου στερήσει κολοβά. οὐ γὰρ δεῖ οὔτε τὰ κύρια τῆς οὐσίας οὔτε τὰ ὅπουσιν ὄντα· οἷον ἂν τρυπηθῇ ἡ κύλιξ, οὐ κολοβός, ἀλλ' ἂν τὸ οὖς ἢ ἀκρωτήριόν τι, καὶ ὁ ἄνθρωπος οὐκ ἔαν σάρκα ἢ τὸν σπλῆνα, ἀλλ' ἔαν ἀκρωτήριόν τι, καὶ τοῦτο οὐ πᾶν ἀλλ' ὁ μὴ ἔχει γένεσιν ἀφαιρεθὲν ὅλον. διὰ τοῦτο οἱ φαλακροὶ οὐ κολοβοί.

Γένος λέγεται τὸ μὲν ἐὰν ἦ ἡ γένεσις συνεχῆς τῶν τὸ εἶδος ἐχόντων τὸ αὐτό, οἷον λέγεται ἕως ἂν ἀνθρώπων γένος ἦ, ὅτι ἕως ἂν ἦ ἡ γένεσις συνεχῆς αὐτῶν· τὸ δὲ ἀφ' οὗ ἂν ὥσι πρῶτου κινήσαντος εἰς τὸ εἶναι· οὕτω γὰρ λέγονται Ἑλληνες τὸ γένος οἱ δὲ Ἴωνες, τῷ οἱ μὲν ἀπὸ Ἑλληνος οἱ δὲ ἀπὸ Ἴωνος εἶναι πρῶτου γεννήσαντος· καὶ μᾶλλον οἱ ἀπὸ τοῦ γεννήσαντος ἢ τῆς ὕλης (λέγονται γὰρ καὶ ἀπὸ τοῦ θήλεος τὸ γένος, οἷον οἱ ἀπὸ Πύρρας). ἔτι δὲ ὡς τὸ ἐπίπεδον [1024b] τῶν σχημάτων γένος τῶν ἐπιπέδων καὶ τὸ στερεὸν τῶν στερεῶν· ἕκαστον γὰρ τῶν σχημάτων τὸ μὲν ἐπίπεδον τοιονδὶ τὸ δὲ στερεὸν ἐστὶ τοιονδὶ· τοῦτο δ' ἐστὶ τὸ ὑποκείμενον ταῖς διαφοραῖς. ἔτι ὡς ἐν τοῖς λόγοις τὸ πρῶτον ἐνυπάρχον, ὃ λέγεται ἐν τῷ τί ἐστὶ, τοῦτο γένος, οὗ διαφοραὶ λέγονται αἱ ποιότητες. τὸ μὲν οὖν γένος τοσαυταχῶς λέγεται, τὸ μὲν κατὰ γένεσιν συνεχῇ τοῦ αὐτοῦ εἶδους, τὸ δὲ κατὰ τὸ πρῶτον κινήσαν ὁμοειδές, τὸ δ' ὡς ὕλη· οὗ γὰρ ἡ διαφορὰ καὶ ἡ ποιότης ἐστί, τοῦτ' ἐστὶ τὸ ὑποκείμενον, ὃ λέγομεν ὕλην. ἕτερα δὲ τῷ γένει λέγεται ὧν ἕτερον τὸ πρῶτον ὑποκείμενον καὶ μὴ ἀναλύεται θάτερον εἰς θάτερον μηδ' ἄμφω εἰς ταυτόν, οἷον τὸ εἶδος καὶ ἡ ὕλη ἕτερον τῷ γένει, καὶ ὅσα καθ' ἕτερον σχῆμα κατηγορίας τοῦ ὄντος λέγεται (τὰ μὲν γὰρ τί ἐστὶ σημαίνει τῶν ὄντων τὰ δὲ ποιόν τι τὰ δ' ὡς διήρηται πρότερον)· οὐδὲ γὰρ ταῦτα ἀναλύεται οὗτ' εἰς ἄλληλα οὗτ' εἰς ἓν τι.

Τὸ ψεῦδος λέγεται ἄλλον μὲν τρόπον ὡς πρᾶγμα ψεῦδος, καὶ τούτου τὸ μὲν τῷ μὴ συγκεῖσθαι ἢ ἀδύνατον εἶναι συντεθῆναι (ὥσπερ λέγεται τὸ τὴν διάμετρον εἶναι σύμμετρον ἢ τὸ σὲ καθῆσθαι· τούτων γὰρ ψεῦδος τὸ μὲν ἀεὶ τὸ δὲ ποτέ· οὕτω γὰρ οὐκ ὄντα ταῦτα), τὰ δὲ ὅσα ἐστὶ μὲν ὄντα, πέφυκε μέντοι φαίνεσθαι ἢ μὴ οἷά ἐστιν ἢ ἃ

μη ἔστιν (οἶον ἢ σκιαγραφία καὶ τὰ ἐνύπνια· ταῦτα γὰρ ἔστι μὲν τι, ἀλλ' οὐχ ὧν ἐμποιεῖ τὴν φαντασίαν)· - πράγματα μὲν οὖν ψευδῇ οὕτω λέγεται, ἢ τῷ μὴ εἶναι αὐτὰ ἢ τῷ τὴν ἀπ' αὐτῶν φαντασίαν μὴ ὄντος εἶναι· λόγος δὲ ψευδῆς ὁ τῶν μὴ ὄντων, ἢ ψευδῆς, διὸ πᾶς λόγος ψευδῆς ἑτέρου ἢ οὗ ἔστιν ἀληθείας, οἶον ὁ τοῦ κύκλου ψευδῆς τριγώνου. ἐκάστου δὲ λόγος ἔστι μὲν ὡς εἷς, ὁ τοῦ τί ἦν εἶναι, ἔστι δ' ὡς πολλοί, ἐπεὶ ταυτό πως αὐτὸ καὶ αὐτὸ πεπονθός, οἶον Σωκράτης καὶ Σωκράτης μουσικός (ὁ δὲ ψευδῆς λόγος οὐθενός ἐστιν ἀπλῶς λόγος)· διὸ Ἀντισθένης ὥτετο εὐήθως μὴθὲν ἀξιῶν λέγεσθαι πλὴν τῷ οἰκείῳ λόγῳ, ἐν ἐφ' ἑνός· ἐξ ὧν συνέβαινε μὴ εἶναι ἀντιλέγειν, σχεδὸν δὲ μὴδὲ ψεύδεσθαι. ἔστι δ' ἕκαστον λέγειν οὐ μόνον τῷ αὐτοῦ λόγῳ ἀλλὰ καὶ τῷ ἑτέρου, ψευδῶς μὲν καὶ παντελῶς, ἔστι δ' ὡς καὶ ἀληθῶς, [1025a] ὥσπερ τὰ ὀκτὼ διπλάσια τῷ τῆς δυάδος λόγῳ. τὰ μὲν οὖν οὕτω λέγεται ψευδῇ, ἄνθρωπος δὲ ψευδῆς ὁ εὐχερῆς καὶ προαιρετικὸς τῶν τοιούτων λόγων, μὴ δι' ἕτερόν τι ἀλλὰ δι' αὐτό, καὶ ὁ ἄλλοις ἐμπειρητικὸς τῶν τοιούτων λόγων, ὥσπερ καὶ τὰ πράγματά φαμεν ψευδῇ εἶναι ὅσα ἐμποιεῖ φαντασίαν ψευδῇ. διὸ ὁ ἐν τῷ Ἰππία λόγος παρακρούεται ὡς ὁ αὐτὸς ψευδῆς καὶ ἀληθῆς. τὸν δυνάμενον γὰρ ψεύσασθαι λαμβάνει ψευδῇ (οὗτος δ' ὁ εἰδὼς καὶ ὁ φρόνιμος)· ἔτι τὸν ἐκόντα φαῦλον βελτίῳ. τοῦτο δὲ ψεῦδος λαμβάνει διὰ τῆς ἐπαγωγῆς - ὁ γὰρ ἐκὼν χωλαίνων τοῦ ἄκοντος κρείττων - τὸ χωλαίνειν τὸ μιμεῖσθαι λέγων, ἐπεὶ εἴ γε χωλὸς ἐκὼν, χεῖρων ἴσως, ὥσπερ ἐπὶ τοῦ ἦθους, καὶ οὗτος.

Συμβεβηκὸς λέγεται ὁ ὑπάρχει μὲν τινι καὶ ἀληθὲς εἰπεῖν, οὐ μέντοι οὐτ' ἐξ ἀνάγκης οὔτε <ὡς> ἐπὶ τὸ πολὺ, οἶον εἴ τις ὀρύττων φυτῷ βόθρον εὗρε θησαυρόν. τοῦτο τοίνυν συμβεβηκὸς τῷ ὀρύττοντι τὸν βόθρον, τὸ εὗρεῖν θησαυρόν· οὔτε γὰρ ἐξ ἀνάγκης τοῦτο ἐκ τούτου ἢ μετὰ τοῦτο, οὐθ' ὡς ἐπὶ τὸ πολὺ ἂν τις φυτεύῃ θησαυρόν εὐρίσκει. καὶ μουσικός γ' ἂν τις εἴη λευκός· ἀλλ' ἐπεὶ οὔτε ἐξ ἀνάγκης οὐθ' ὡς ἐπὶ τὸ πολὺ τοῦτο γίγνεται, συμβεβηκὸς αὐτὸ λέγομεν. ὥστ' ἐπεὶ ἔστιν ὑπάρχον τι καὶ τινί, καὶ ἔνια τούτων καὶ ποὺ καὶ ποτέ, ὅ τι ἂν ὑπάρχη μὲν, ἀλλὰ μὴ διότι τοδὶ ἦν ἢ νῦν ἢ ἐνταῦθα, συμβεβηκὸς ἔσται. οὐδὲ δὴ αἴτιον ὠρισμένον οὐδὲν τοῦ συμβεβηκότος ἀλλὰ τὸ τυχόν· τοῦτο δ' ἀόριστον. συνέβη τῷ εἰς Αἴγιναν ἐλθεῖν, εἰ μὴ διὰ τοῦτο ἀφίκετο ὅπως ἐκεῖ ἔλθῃ, ἀλλ' ὑπὸ χειμῶνος ἐξωσθεῖς ἢ ὑπὸ ληστῶν ληφθεῖς. γέγονε μὲν δὴ ἢ ἔστι τὸ συμβεβηκός, ἀλλ' οὐχ ἢ αὐτὸ ἀλλ' ἢ ἕτερον· ὁ γὰρ χειμὼν αἴτιος τοῦ

μὴ ὅπου ἔπλει ἐλθεῖν, τοῦτο δ' ἦν Αἴγινα. λέγεται δὲ καὶ ἄλλως συμβεβηκός, οἷον ὅσα ὑπάρχει ἐκάστῳ καθ' αὐτὸ μὴ ἐν τῇ οὐσίᾳ ὄντα, οἷον τῷ τριγώνῳ τὸ δύο ὀρθὰς ἔχειν. καὶ ταῦτα μὲν ἐνδέχεται αἰΐδια εἶναι, ἐκείνων δὲ οὐδέν. λόγος δὲ τούτου ἐν ἑτέροις.

Ε

[1025b] Αἱ ἀρχαὶ καὶ τὰ αἷτια ζητεῖται τῶν ὄντων, δῆλον δὲ ὅτι ἢ ὄντα. ἔστι γάρ τι αἷτιον ὑγείας καὶ εὐεξίας, καὶ τῶν μαθηματικῶν εἰσὶν ἀρχαὶ καὶ στοιχεῖα καὶ αἷτια, καὶ ὅλως δὲ πᾶσα ἐπιστήμη διανοητικὴ ἢ μετέχουσά τι διανοίας περὶ αἷτίας καὶ ἀρχάς ἐστιν ἢ ἀκριβεστεράς ἢ ἀπλουστεράς. ἀλλὰ πᾶσαι αὐταὶ περὶ ὄν τι καὶ γένος τι περιγραφάμεναι περὶ τούτου πραγματεύονται, ἀλλ' οὐχὶ περὶ ὄντος ἀπλῶς οὐδὲ ἢ ὄν, οὐδὲ τοῦ τί ἐστὶν οὐθένα λόγον ποιοῦνται, ἀλλ' ἐκ τούτου, αἱ μὲν αἰσθήσει ποιήσασαι αὐτὸ δῆλον αἱ δ' ὑπόθεσιν λαβοῦσαι τὸ τί ἐστὶν, οὕτω τὰ καθ' αὐτὰ ὑπάρχοντα τῷ γένει περὶ ὃ εἰσὶν ἀποδεικνύουσιν ἢ ἀναγκαιότερον ἢ μαλακώτερον· διόπερ φανερόν ὅτι οὐκ ἔστιν ἀπόδειξις οὐσίας οὐδὲ τοῦ τί ἐστὶν ἐκ τῆς τοιαύτης ἐπαγωγῆς, ἀλλὰ τις ἄλλος τρόπος τῆς δηλώσεως. ὁμοίως δὲ οὐδ' εἰ ἔστιν ἢ μὴ ἔστι τὸ γένος περὶ ὃ πραγματεύονται οὐδὲν λέγουσι, διὰ τὸ τῆς αὐτῆς εἶναι διανοίας τό τε τί ἐστὶ δῆλον ποιεῖν καὶ εἰ ἔστιν. - ἐπεὶ δὲ καὶ ἡ φυσικὴ ἐπιστήμη τυγχάνει οὕσα περὶ γένος τι τοῦ ὄντος (περὶ γὰρ τὴν τοιαύτην ἐστὶν οὐσίαν ἐν ἣ ἡ ἀρχὴ τῆς κινήσεως καὶ στάσεως ἐν αὐτῇ), δῆλον ὅτι οὔτε πρακτικὴ ἐστὶν οὔτε ποιητικὴ (τῶν μὲν γὰρ ποιητῶν ἐν τῷ ποιοῦντι ἡ ἀρχή, ἢ νοῦς ἢ τέχνη ἢ δυνάμεις τις, τῶν δὲ πρακτῶν ἐν τῷ πράττοντι, ἢ προαίρεσις· τὸ αὐτὸ γὰρ τὸ πρακτὸν καὶ προαιρετόν), ὥστε εἰ πᾶσα διάνοια ἢ πρακτικὴ ἢ ποιητικὴ ἢ θεωρητικὴ, ἢ φυσικὴ θεωρητικὴ τις ἂν εἴη, ἀλλὰ θεωρητικὴ περὶ τοιοῦτον ὄν ὃ ἐστὶ δυνατόν κινεῖσθαι, καὶ περὶ οὐσίαν τὴν κατὰ τὸν λόγον ὡς ἐπὶ τὸ πολὺ ὡς οὐ χωριστὴν μόνον. δεῖ δὲ τὸ τί ἦν εἶναι καὶ τὸν λόγον πῶς ἐστὶ μὴ λανθάνειν, ὡς ἄνευ γε τούτου τὸ ζητεῖν μηδὲν ἐστὶ ποιεῖν. ἔστι δὲ τῶν ὀριζομένων καὶ τῶν τί ἐστὶ τὰ μὲν ὡς τὸ σιμὸν τὰ δ' ὡς τὸ κοῖλον. διαφέρει δὲ ταῦτα ὅτι τὸ μὲν σιμὸν συνειλημμένον ἐστὶ μετὰ τῆς ὕλης (ἐστὶ γὰρ τὸ σιμὸν κοίλη ρίς), ἢ δὲ κοιλότης ἄνευ ὕλης αἰσθητῆς. εἰ δὴ πάντα τὰ φυσικὰ ὁμοίως τῷ [1026a] σιμῷ λέγονται, οἷον ρίς ὀφθαλμὸς πρόσωπον σὰρξ ὅστουν, ὅλως ζῶον, φύλλον ρίζα φλοιός, ὅλως φυτόν (οὐθενὸς γὰρ ἄνευ κινήσεως ὁ λόγος αὐτῶν, ἀλλ' ἅει ἔχει ὕλην), δῆλον πῶς δεῖ ἐν τοῖς φυσικοῖς τὸ τί ἐστὶ ζητεῖν καὶ ὀρίζεσθαι, καὶ διότι καὶ περὶ ψυχῆς ἐνίας θεωρῆσαι τοῦ φυσικοῦ, ὅση μὴ ἄνευ τῆς ὕλης ἐστίν. ὅτι μὲν οὖν ἡ φυσικὴ θεωρητικὴ ἐστὶ, φανερόν ἐκ

τούτων· ἀλλ' ἔστι καὶ ἡ μαθηματικὴ θεωρητικὴ· ἀλλ' εἰ ἀκινήτων καὶ χωριστῶν ἐστὶ, νῦν ἄδηλον, ὅτι μέντοι ἔνια μαθήματα ἢ ἀκίνητα καὶ ἢ χωριστὰ θεωρεῖ, δῆλον. εἰ δέ τί ἐστιν αἰδίδιον καὶ ἀκίνητον καὶ χωριστόν, φανερόν ὅτι θεωρητικῆς τὸ γινῶναι, οὐ μέντοι φυσικῆς γε (περὶ κινήτων γὰρ τινων ἢ φυσικῇ) οὐδὲ μαθηματικῆς, ἀλλὰ προτέρας ἀμφοῖν. ἡ μὲν γὰρ φυσικὴ περὶ χωριστὰ μὲν ἀλλ' οὐκ ἀκίνητα, τῆς δὲ μαθηματικῆς ἔνια περὶ ἀκίνητα μὲν οὐ χωριστὰ δὲ ἴσως ἀλλ' ὥς ἐν ὕλῃ· ἡ δὲ πρώτη καὶ περὶ χωριστὰ καὶ ἀκίνητα. ἀνάγκη δὲ πάντα μὲν τὰ αἷτια αἰδία εἶναι, μάλιστα δὲ ταῦτα· ταῦτα γὰρ αἷτια τοῖς φανεροῖς τῶν θείων. ὥστε τρεῖς ἂν εἶεν φιλοσοφαὶ θεωρητικαί, μαθηματικὴ, φυσικὴ, θεολογικὴ (οὐ γὰρ ἄδηλον ὅτι εἴ που τὸ θεῖον ὑπάρχει, ἐν τῇ τοιαύτῃ φύσει ὑπάρχει), καὶ τὴν τιμιωτάτην δεῖ περὶ τὸ τιμιώτατον γένος εἶναι. αἱ μὲν οὖν θεωρητικαὶ τῶν ἄλλων ἐπιστημῶν αἰρετώταται, αὕτη δὲ τῶν θεωρητικῶν. ἀπορήσειε γὰρ ἂν τις πότερόν ποθ' ἡ πρώτη φιλοσοφία καθόλου ἐστὶν ἢ περὶ τι γένος καὶ φύσιν τινὰ μίαν (οὐ γὰρ ὁ αὐτὸς τρόπος οὐδ' ἐν ταῖς μαθηματικαῖς, ἀλλ' ἡ μὲν γεωμετρία καὶ ἀστρολογία περὶ τινα φύσιν εἰσίν, ἡ δὲ καθόλου πασῶν κοινὴ)· εἰ μὲν οὖν μὴ ἔστι τις ἐτέρα οὐσία παρὰ τὰς φύσει συνεστηκυίας, ἢ φυσικὴ ἂν εἴη πρώτη ἐπιστήμη· εἰ δ' ἔστι τις οὐσία ἀκίνητος, αὕτη προτέρα καὶ φιλοσοφία πρώτη, καὶ καθόλου οὕτως ὅτι πρώτη· καὶ περὶ τοῦ ὄντος ἢ ὄν ταύτης ἂν εἴη θεωρῆσαι, καὶ τί ἐστι καὶ τὰ ὑπάρχοντα ἢ ὄν.

Ἀλλ' ἐπεὶ τὸ ὄν τὸ ἀπλῶς λεγόμενον λέγεται πολλαχῶς, ὧν ἐν μὲν ἦν τὸ κατὰ συμβεβηκός, ἕτερον δὲ τὸ ὡς ἀληθές, καὶ τὸ μὴ ὄν ὡς τὸ ψεῦδος, παρὰ ταῦτα δ' ἐστὶ τὰ σχήματα τῆς κατηγορίας (οἷον τὸ μὲν τί, τὸ δὲ ποιόν, τὸ δὲ ποσόν, τὸ δὲ πού, τὸ δὲ ποτέ, καὶ εἴ τι ἄλλο [1026b] σημαίνει τὸν τρόπον τοῦτον), ἔτι παρὰ ταῦτα πάντα τὸ δυνάμει καὶ ἐνεργείᾳ· - ἐπεὶ δὴ πολλαχῶς λέγεται τὸ ὄν, πρῶτον περὶ τοῦ κατὰ συμβεβηκός λεκτέον, ὅτι οὐδεμία ἐστὶ περὶ αὐτὸ θεωρία. σημεῖον δέ· οὐδεμιᾷ γὰρ ἐπιστήμῃ ἐπιμελὲς περὶ αὐτοῦ οὔτε πρακτικῇ οὔτε ποιητικῇ οὔτε θεωρητικῇ. οὔτε γὰρ ὁ ποιῶν οἰκίαν ποιεῖ ὅσα συμβαίνει ἅμα τῇ οἰκίᾳ γιγνομένη (ἄπειρα γάρ ἐστιν· τοῖς μὲν γὰρ ἡδεῖαν τοῖς δὲ βλαβεράν τοῖς δ' ὠφέλιμον οὐθὲν εἶναι κωλύει τὴν ποιηθεῖσαν, καὶ ἐτέραν ὡς εἰπεῖν πάντων τῶν ὄντων· ὧν οὐθενός ἐστιν ἢ οἰκοδομικὴ ποιητικὴ), τὸν αὐτὸν δὲ τρόπον οὐδ' ὁ γεωμέτρης θεωρεῖ τὰ οὕτω συμβεβηκότα τοῖς σχήμασιν, οὐδ' εἰ ἕτερόν ἐστι τρίγωνον καὶ τρίγωνον δύο ὀρθὰς ἔχον. καὶ τοῦτ'

εὐλόγως συμπίπτει· ὥσπερ γὰρ ὄνομά τι μόνον τὸ συμβεβηκὸς ἐστίν. διὸ Πλάτων τρόπον τινὰ οὐ κακῶς τὴν σοφιστικὴν περὶ τὸ μὴ ὄν ἔταξεν. εἰσὶ γὰρ οἱ τῶν σοφιστῶν λόγοι περὶ τὸ συμβεβηκὸς ὡς εἰπεῖν μάλιστα πάντων, πότερον ἕτερον ἢ ταὐτὸν μουσικὸν καὶ γραμματικόν, καὶ μουσικὸς Κορίσκος καὶ Κορίσκος, καὶ εἰ πᾶν ὃ ἂν ᾗ, μὴ ἀεὶ δέ, γέγονεν, ὥστ' εἰ μουσικὸς ὢν γραμματικὸς γέγονε, καὶ γραμματικὸς ὢν μουσικὸς, καὶ ὅσοι δὴ ἄλλοι τοιοῦτοι τῶν λόγων εἰσὶν· φαίνεται γὰρ τὸ συμβεβηκὸς ἐγγύς τι τοῦ μὴ ὄντος. δῆλον δὲ καὶ ἐκ τῶν τοιούτων λόγων· τῶν μὲν γὰρ ἄλλον τρόπον ὄντων ἔστι γένεσις καὶ φθορά, τῶν δὲ κατὰ συμβεβηκὸς οὐκ ἔστιν. ἀλλ' ὅμως λεκτέον ἔτι περὶ τοῦ συμβεβηκότος ἐφ' ὅσον ἐνδέχεται, τίς ἢ φύσις αὐτοῦ καὶ διὰ τί· αἰτίαν ἔστιν· ἅμα γὰρ δῆλον ἴσως ἔσται καὶ διὰ τί ἐπιστήμη οὐκ ἔστιν αὐτοῦ. - ἐπεὶ οὖν ἐστὶν ἐν τοῖς οὗσι τὰ μὲν ἀεὶ ὡσαύτως ἔχοντα καὶ ἐξ ἀνάγκης, οὐ τῆς κατὰ τὸ βίαιον λεγομένης ἀλλ' ἦν λέγομεν τῷ μὴ ἐνδέχεσθαι ἄλλως, τὰ δ' ἐξ ἀνάγκης μὲν οὐκ ἔστιν οὐδ' ἀεὶ, ὡς δ' ἐπὶ τὸ πολὺ, αὕτη ἀρχὴ καὶ αὕτη αἰτία ἐστὶ τοῦ εἶναι τὸ συμβεβηκός· ὁ γὰρ ἂν ᾗ μήτ' ἀεὶ μήθ' ὡς ἐπὶ τὸ πολὺ, τοῦτο φαμεν συμβεβηκὸς εἶναι. οἷον ἐπὶ κυνὶ ἂν χειμῶν γένηται καὶ ψῡχος, τοῦτο συμβῆναί φαμεν, ἀλλ' οὐκ ἂν πνίγος καὶ ἀλέα, ὅτι τὸ μὲν ἀεὶ ἢ ὡς ἐπὶ τὸ πολὺ τὸ δ' οὐ. καὶ τὸν ἄνθρωπον λευκὸν εἶναι συμβέβηκεν (οὔτε γὰρ ἀεὶ οὐθ' ὡς ἐπὶ τὸ πολὺ), ζῶον δ' οὐ κατὰ συμβεβηκός. καὶ τὸ ὑγιάζειν δὲ τὸν οἰκοδόμον [1027a] συμβεβηκός, ὅτι οὐ πέφυκε τοῦτο ποιεῖν οἰκοδόμος ἀλλὰ ἱατρός, ἀλλὰ συνέβη ἱατρὸν εἶναι τὸν οἰκοδόμον. καὶ ὀψοποιὸς ἡδονῆς στοχαζόμενος ποιήσειεν ἂν τι ὑγιεινόν, ἀλλ' οὐ κατὰ τὴν ὀψοποιητικὴν· διὸ συνέβη, φασκέν, καὶ ἔστιν ὡς ποιεῖ, ἀπλῶς δ' οὐ. τῶν μὲν γὰρ ἄλλων [ἐνίοτε] δυνάμεις εἰσὶν αἱ ποιητικαί, τῶν δ' οὐδεμία τέχνη οὐδὲ δύναμις ὠρισμένη· τῶν γὰρ κατὰ συμβεβηκὸς ὄντων ἢ γιγνομένων καὶ τὸ αἰτίον ἐστὶ κατὰ συμβεβηκός. ὥστ' ἐπεὶ οὐ πάντα ἐστὶν ἐξ ἀνάγκης καὶ ἀεὶ ἢ ὄντα ἢ γιγνόμενα, ἀλλὰ τὰ πλεῖστα ὡς ἐπὶ τὸ πολὺ, ἀνάγκη εἶναι τὸ κατὰ συμβεβηκὸς ὄν· οἷον οὐτ' ἀεὶ οὐθ' ὡς ἐπὶ τὸ πολὺ ὁ λευκὸς μουσικὸς ἐστίν, ἐπεὶ δὲ γίγνεται ποτε, κατὰ συμβεβηκὸς ἔσται (εἰ δὲ μή, πάντ' ἔσται ἐξ ἀνάγκης)· ὥστε ἡ ὕλη ἔσται αἰτία ἢ ἐνδεχομένη παρὰ τὸ ὡς ἐπὶ τὸ πολὺ ἄλλως τοῦ συμβεβηκότος. ἀρχὴν δὲ τῇ διὰ ληπτέον, πότερον οὐδέν ἐστιν οὐτ' αἰεὶ οὐθ' ὡς ἐπὶ τὸ πολὺ. ἢ τοῦτο ἀδύνατον; ἔστιν ἄρα τι παρὰ ταῦτα τὸ ὁπότερ' ἔτυχε καὶ κατὰ συμβεβηκός. ἀλλὰ πότερον τὸ ὡς ἐπὶ τὸ πολὺ, τὸ δ' ἀεὶ οὐθενί

ὑπάρχει, ἢ ἔστιν ἅττα αἰδία; περὶ μὲν οὖν τούτων ὕστερον σκεπτέον, ὅτι δ' ἐπιστήμη οὐκ ἔστι τοῦ συμβεβηκότος φανερόν· ἐπιστήμη μὲν γὰρ πᾶσα ἢ τοῦ αἰεὶ ἢ τοῦ ὥς ἐπὶ τὸ πολὺ - πῶς γὰρ ἢ μαθήσεται ἢ διδάξει ἄλλον; δεῖ γὰρ ὀρίσθαι ἢ τῷ αἰεὶ ἢ τῷ ὥς ἐπὶ τὸ πολὺ, οἷον ὅτι ὠφέλιμον τὸ μελίκρατον τῷ πυρέττοντι ὥς ἐπὶ τὸ πολὺ - τὸ δὲ παρὰ τοῦτο οὐχ ἔξει λέγειν, πότε οὖ, οἷον νουμηνία· ἢ γὰρ αἰεὶ ἢ ὥς ἐπὶ τὸ πολὺ καὶ τὸ τῇ νουμηνία· τὸ δὲ συμβεβηκός ἐστι παρὰ ταῦτα. τί μὲν οὖν ἐστὶ τὸ συμβεβηκός καὶ διὰ τίν' αἰτίαν καὶ ὅτι ἐπιστήμη οὐκ ἔστιν αὐτοῦ, εἴρηται.

Ὅτι δ' εἰσὶν ἀρχαὶ καὶ αἰτία γενητὰ καὶ φθαρτὰ ἄνευ τοῦ γίνεσθαι καὶ φθεῖρεσθαι, φανερόν. εἰ γὰρ μὴ τοῦτ', ἐξ ἀνάγκης πάντ' ἔσται, εἰ τοῦ γιγνομένου καὶ φθειρομένου μὴ κατὰ συμβεβηκός αἰτίον τι ἀνάγκη εἶναι. πότερον γὰρ ἔσται τοδὶ ἢ οὐ; ἐάν γε τοδὶ γένηται· εἰ δὲ μή, οὐ. τοῦτο δὲ ἐάν ἄλλο. καὶ οὕτω δῆλον ὅτι αἰεὶ χρόνου ἀφαιρουμένου [1027b] ἀπὸ πεπερασμένου χρόνου ἥξει ἐπὶ τὸ νῦν, ὥστε ὁδὶ ἀποθανεῖται [νόσφ ἢ] βία, ἐάν γε ἐξέλθῃ· τοῦτο δὲ ἐάν διψήσῃ· τοῦτο δὲ ἐάν ἄλλο· καὶ οὕτως ἥξει εἰς ὃ νῦν ὑπάρχει, ἢ εἰς τῶν γεγονότων τι. οἷον ἐάν διψήσῃ· τοῦτο δὲ εἰ ἐσθίει δριμέα· τοῦτο δ' ἦτοι ὑπάρχει ἢ οὐ· ὥστ' ἐξ ἀνάγκης ἀποθανεῖται ἢ οὐκ ἀποθανεῖται. ὁμοίως δὲ κἂν ὑπερπηδήσῃ τις εἰς τὰ γενόμενα, ὁ αὐτὸς λόγος· ἥδη γὰρ ὑπάρχει τοῦτο ἔν τινι, λέγω δὲ τὸ γεγονός· ἐξ ἀνάγκης ἄρα πάντα ἔσται τὰ ἐσόμενα, οἷον τὸ ἀποθανεῖν τὸν ζῶντα· ἥδη γάρ τι γέγονεν, οἷον τὰ ἐναντία ἐν τῷ αὐτῷ. ἀλλ' εἰ νόσφ ἢ βία, οὐπω, ἀλλ' ἐάν τοδὶ γένηται. δῆλον ἄρα ὅτι μέχρι τινὸς βαδίζει ἀρχῆς, αὕτη δ' οὐκέτι εἰς ἄλλο. ἔσται οὖν ἢ τοῦ ὁπότερ' ἔτυχεν αὕτη, καὶ αἴτιον τῆς γενέσεως αὐτῆς ἄλλο οὐθέν. ἀλλ' εἰς ἀρχὴν ποίαν καὶ αἴτιον ποῖον ἢ ἀναγωγὴ ἢ τοιαύτη, πότερον ὥς εἰς ὕλην ἢ ὥς εἰς τὸ οὗ ἔνεκα ἢ ὥς εἰς τὸ κινήσαν, μάλιστα σκεπτέον.

Περὶ μὲν οὖν τοῦ κατὰ συμβεβηκός ὄντος ἀφείσθω (διώρισται γὰρ ἱκανῶς)· τὸ δὲ ὥς ἀληθές ὄν, καὶ μὴ ὄν ὥς ψεῦδος, ἐπειδὴ παρὰ σύνθεσιν ἐστὶ καὶ διαίρεσιν, τὸ δὲ σύνολον περὶ μερισμὸν ἀντιφάσεως (τὸ μὲν γὰρ ἀληθές τὴν κατάφασιν ἐπὶ τῷ συγκειμένῳ ἔχει τὴν δ' ἀπόφασιν ἐπὶ τῷ διηρημένῳ, τὸ δὲ ψεῦδος τούτου τοῦ μερισμοῦ τὴν ἀντίφασιν· πῶς δὲ τὸ ἅμα ἢ τὸ χωρὶς νοεῖν συμβαίνει, ἄλλος λόγος, λέγω δὲ τὸ ἅμα καὶ τὸ χωρὶς ὥστε μὴ τὸ ἐφεξῆς ἀλλ' ἔν τι γίνεσθαι)· οὐ γάρ ἐστὶ τὸ ψεῦδος καὶ τὸ ἀληθές ἐν τοῖς πράγμασιν, οἷον τὸ μὲν ἀγαθὸν ἀληθές τὸ δὲ κακὸν εὐθὺς ψεῦδος,

ἀλλ' ἐν διανοίᾳ, περὶ δὲ τὰ ἀπλᾶ καὶ τὰ τί ἐστὶν οὐδ' ἐν διανοίᾳ· - ὅσα μὲν οὖν δεῖ θεωρῆσαι περὶ τὸ οὕτως ὄν καὶ μὴ ὄν, ὕστερον ἐπισκεπτέον· ἐπεὶ δὲ ἡ συμπλοκὴ ἐστὶν καὶ ἡ διαίρεσις ἐν διανοίᾳ ἀλλ' οὐκ ἐν τοῖς πράγμασι, τὸ δ' οὕτως ὄν ἕτερον ὄν τῶν κυρίως (ἢ γὰρ τὸ τί ἐστὶν ἢ ὅτι ποιὸν ἢ ὅτι ποσὸν ἢ τι ἄλλο συνάπτει ἢ ἀφαιρεῖ ἢ διάνοια), τὸ μὲν ὡς συμβεβηκὸς καὶ τὸ ὡς ἀληθὲς ὄν ἀφετέον - τὸ γὰρ αἴτιον τοῦ μὲν ἀόριστον τοῦ δὲ τῆς [1028a] διανοίας τι πάθος, καὶ ἀμφοτέρω περὶ τὸ λοιπὸν γένος τοῦ ὄντος, καὶ οὐκ ἔξω δηλοῦσιν οὐδ' ἂν τινα φύσιν τοῦ ὄντος - διὸ ταῦτα μὲν ἀφείσθω, σκεπτέον δὲ τοῦ ὄντος αὐτοῦ τὰ αἴτια καὶ τὰς ἀρχὰς ἢ ὄν. [φανερὸν δ' ἐν οἷς διωρισάμεθα περὶ τοῦ ποσαχῶς λέγεται ἕκαστον, ὅτι πολλαχῶς λέγεται τὸ ὄν.]

Τὸ ὃν λέγεται πολλαχῶς, καθάπερ διειλόμεθα πρότερον ἐν τοῖς περὶ τοῦ ποσαχῶς· σημαίνει γὰρ τὸ μὲν τί ἐστι καὶ τόδε τι, τὸ δὲ ποιὸν ἢ ποσὸν ἢ τῶν ἄλλων ἕκαστον τῶν οὕτω κατηγορουμένων. τοσαυταχῶς δὲ λεγόμενου τοῦ ὄντος φανερόν ὅτι τούτων πρῶτον ὃν τὸ τί ἐστιν, ὅπερ σημαίνει τὴν οὐσίαν (ὅταν μὲν γὰρ εἴπωμεν ποῖόν τι τόδε, ἢ ἀγαθὸν λέγομεν ἢ κακόν, ἀλλ' οὐ τρίτην ἢ ἄνθρωπον· ὅταν δὲ τί ἐστιν, οὐ λευκὸν οὐδὲ θερμὸν οὐδὲ τρίπηχυν, ἀλλὰ ἄνθρωπον ἢ θεόν), τὰ δ' ἄλλα λέγεται ὄντα τῷ τοῦ οὕτως ὄντος τὰ μὲν ποσότητες εἶναι, τὰ δὲ ποιότητες, τὰ δὲ πάθη, τὰ δὲ ἄλλο τι. διὸ καὶ ἀπορήσειέ τις πότερον τὸ βαδίζειν καὶ τὸ ὑγιαίνειν καὶ τὸ καθῆσθαι ἕκαστον αὐτῶν ὃν σημαίνει, ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων ὁτουοῦν τῶν τοιούτων· οὐδὲν γὰρ αὐτῶν ἐστὶν οὔτε καθ' αὐτὸ πεφυκὸς οὔτε χωρίζεσθαι δυνατόν τῆς οὐσίας, ἀλλὰ μᾶλλον, εἴπερ, τὸ βαδίζον τῶν ὄντων καὶ τὸ καθήμενον καὶ τὸ ὑγιαῖνον. ταῦτα δὲ μᾶλλον φαίνεται ὄντα, διότι ἐστι τι τὸ ὑποκείμενον αὐτοῖς ὠρισμένον (τοῦτο δ' ἐστὶν ἢ οὐσία καὶ τὸ καθ' ἕκαστον), ὅπερ ἐμφαίνεται ἐν τῇ κατηγορίᾳ τῇ τοιαύτῃ· τὸ ἀγαθὸν γὰρ ἢ τὸ καθήμενον οὐκ ἄνευ τούτου λέγεται. δῆλον οὖν ὅτι διὰ ταύτην κἀκείνων ἕκαστον ἐστὶν, ὥστε τὸ πρῶτως ὃν καὶ οὐ τί ὃν ἀλλ' ὃν ἀπλῶς ἢ οὐσία ἂν εἴη. πολλαχῶς μὲν οὖν λέγεται τὸ πρῶτον· ὅμως δὲ πάντως ἢ οὐσία πρῶτον, καὶ λόγῳ καὶ γνώσει καὶ χρόνῳ. τῶν μὲν γὰρ ἄλλων κατηγορημάτων οὐθεν χωριστόν, αὕτη δὲ μόνη· καὶ τῷ λόγῳ δὲ τοῦτο πρῶτον (ἀνάγκη γὰρ ἐν τῷ ἐκάστου λόγῳ τὸν τῆς οὐσίας ἐνυπάρχειν)· καὶ εἰδέναι δὲ τότε οἰόμεθα ἕκαστον μάλιστα, ὅταν τί ἐστιν ὁ ἄνθρωπος γινώμεν ἢ τὸ πῦρ, μᾶλλον ἢ τὸ ποιὸν ἢ τὸ [1028b] ποσὸν ἢ τὸ πού, ἐπεὶ καὶ αὐτῶν τούτων τότε ἕκαστον ἴσμεν, ὅταν τί ἐστι τὸ ποσὸν ἢ τὸ ποιὸν γινώμεν. καὶ δὴ καὶ τὸ πάλαι τε καὶ νῦν καὶ αἰεὶ ζητούμενον καὶ αἰεὶ ἀπορούμενον, τί τὸ ὄν, τοῦτό ἐστι τίς ἢ οὐσία (τοῦτο γὰρ οἱ μὲν ἐν εἶναι φασιν οἱ δὲ πλείω ἢ ἐν, καὶ οἱ μὲν πεπερασμένα οἱ δὲ ἄπειρα), διὸ καὶ ἡμῖν καὶ μάλιστα καὶ πρῶτον καὶ μόνον ὡς εἰπεῖν περὶ τοῦ οὕτως ὄντος θεωρητέον τί ἐστὶν.

Δοκεῖ δ' ἡ οὐσία ὑπάρχειν φανερώτατα μὲν τοῖς σώμασιν (διὸ τά τε ζῷα καὶ τὰ φυτὰ καὶ τὰ μόρια αὐτῶν οὐσίας εἶναι φαμεν, καὶ τὰ φυσικὰ σώματα, οἷον πῦρ καὶ ὕδωρ καὶ γῆν καὶ τῶν τοιούτων

ἕκαστον, καὶ ὅσα ἢ μόρια τούτων ἢ ἐκ τούτων ἐστίν, ἢ μορίων ἢ πάντων, οἷον ὃ τε οὐρανὸς καὶ τὰ μόρια αὐτοῦ, ἄστρα καὶ σελήνη καὶ ἥλιος)· πότερον δὲ αὗται μόναι οὐσίαι εἰσὶν ἢ καὶ ἄλλαι, ἢ τούτων τινὲς ἢ καὶ ἄλλαι, ἢ τούτων μὲν οὐθὲν ἕτεραι δὲ τινες, σκεπτέον. δοκεῖ δὲ τισὶ τὰ τοῦ σώματος πέρατα, οἷον ἐπιφάνεια καὶ γραμμὴ καὶ στιγμή καὶ μονάς, εἶναι οὐσίαι, καὶ μᾶλλον ἢ τὸ σῶμα καὶ τὸ στερεόν. ἔτι παρὰ τὰ αἰσθητὰ οἱ μὲν οὐκ οἴονται εἶναι οὐδὲν τοιοῦτον, οἱ δὲ πλείω καὶ μᾶλλον ὄντα αἰδία, ὥσπερ Πλάτων τά τε εἶδη καὶ τὰ μαθηματικὰ δύο οὐσίας, τρίτην δὲ τὴν τῶν αἰσθητῶν σωμάτων οὐσίαν, Σπεύσιππος δὲ καὶ πλείους οὐσίας ἀπὸ τοῦ ἐνὸς ἀρξάμενος, καὶ ἀρχὰς ἐκάστης οὐσίας, ἄλλην μὲν ἀριθμῶν ἄλλην δὲ μεγεθῶν, ἔπειτα ψυχῆς· καὶ τοῦτον δὴ τὸν τρόπον ἐπεκτείνει τὰς οὐσίας. ἔνιοι δὲ τὰ μὲν εἶδη καὶ τοὺς ἀριθμοὺς τὴν αὐτὴν ἔχειν φασὶ φύσιν, τὰ δὲ ἄλλα ἐχόμενα, γραμμὰς καὶ ἐπίπεδα, μέχρι πρὸς τὴν τοῦ οὐρανοῦ οὐσίαν καὶ τὰ αἰσθητά. περὶ δὲ τούτων τί λέγεται καλῶς ἢ μὴ καλῶς, καὶ τίνες εἰσὶν οὐσίαι, καὶ πότερον εἰσὶ τινες παρὰ τὰς αἰσθητάς ἢ οὐκ εἰσὶ, καὶ αὗται πῶς εἰσὶ, καὶ πότερον ἔστι τις χωριστὴ οὐσία, καὶ διὰ τί καὶ πῶς, ἢ οὐδεμία, παρὰ τὰς αἰσθητάς, σκεπτέον, ὑποτυπωσαμένοις τὴν οὐσίαν πρῶτον τί ἐστίν.

Λέγεται δ' ἡ οὐσία, εἰ μὴ πλεοναχῶς, ἀλλ' ἐν τέτταρσί γε μάλιστα· καὶ γὰρ τὸ τί ἦν εἶναι καὶ τὸ καθόλου καὶ τὸ γένος οὐσία δοκεῖ εἶναι ἐκάστου, καὶ τέταρτον τούτων τὸ ὑποκείμενον. τὸ δ' ὑποκείμενόν ἐστι καθ' οὗ τὰ ἄλλα λέγεται, ἐκεῖνο δὲ αὐτὸ μηκέτι κατ' ἄλλου· διὸ πρῶτον περὶ τούτου [1029a] διοριστέον· μάλιστα γὰρ δοκεῖ εἶναι οὐσία τὸ ὑποκείμενον πρῶτον. τοιοῦτον δὲ τρόπον μὲν τινα ἢ ὕλη λέγεται, ἄλλον δὲ τρόπον ἢ μορφή, τρίτον δὲ τὸ ἐκ τούτων (λέγω δὲ τὴν μὲν ὕλην οἷον τὸν χαλκόν, τὴν δὲ μορφήν τὸ σχῆμα τῆς ιδέας, τὸ δ' ἐκ τούτων τὸν ἀνδριάντα τὸ σύνολον), ὥστε εἰ τὸ εἶδος τῆς ὕλης πρότερον καὶ μᾶλλον ὄν, καὶ τοῦ ἐξ ἀμφοῖν πρότερον ἔσται διὰ τὸν αὐτὸν λόγον. νῦν μὲν οὖν τύπῳ εἴρηται τί ποτ' ἐστὶν ἡ οὐσία, ὅτι τὸ μὴ καθ' ὑποκειμένου ἀλλὰ καθ' οὗ τὰ ἄλλα· δεῖ δὲ μὴ μόνον οὕτως· οὐ γὰρ ἰκανόν· αὐτὸ γὰρ τοῦτο ἄδηλον, καὶ ἔτι ἡ ὕλη οὐσία γίγνεται. εἰ γὰρ μὴ αὕτη οὐσία, τίς ἐστὶν ἄλλη διαφεύγει· περιαιρουμένων γὰρ τῶν ἄλλων οὐ φαίνεται οὐδὲν ὑπομένον· τὰ μὲν γὰρ ἄλλα τῶν σωμάτων πάθη καὶ ποιήματα καὶ δυνάμεις, τὸ δὲ μῆκος καὶ πλάτος καὶ βάθος ποσότητές τινες ἀλλ' οὐκ οὐσίαι (τὸ γὰρ ποσὸν οὐκ οὐσία), ἀλλὰ μᾶλλον ὃ ὑπάρχει ταῦτα

πρώτῳ, ἐκεῖνό ἐστιν οὐσία. ἀλλὰ μὴν ἀφαιρουμένου μήκους καὶ πλάτους καὶ βάθους οὐδὲν ὀρθῶμεν ὑπολειπόμενον, πλὴν εἴ τί ἐστι τὸ ὀριζόμενον ὑπὸ τούτων, ὥστε τὴν ὕλην ἀνάγκη φαίνεσθαι μόνην οὐσίαν οὕτω σκοπούμενοις. λέγω δ' ὕλην ἢ καθ' αὐτὴν μήτε τι μήτε ποσὸν μήτε ἄλλο μηδὲν λέγεται οἷς ὥριστα τὸ ὄν. ἔστι γάρ τι καθ' οὗ κατηγορεῖται τούτων ἕκαστον, ὃ τὸ εἶναι ἕτερον καὶ τῶν κατηγοριῶν ἐκάστη (τὰ μὲν γὰρ ἄλλα τῆς οὐσίας κατηγορεῖται, αὕτη δὲ τῆς ὕλης), ὥστε τὸ ἔσχατον καθ' αὐτὸ οὔτε τι οὔτε ποσὸν οὔτε ἄλλο οὐδὲν ἐστίν· οὐδὲ δὴ αἱ ἀποφάσεις, καὶ γὰρ αὗται ὑπάρξουσι κατὰ συμβεβηκός. ἐκ μὲν οὖν τούτων θεωροῦσι συμβαίνει οὐσίαν εἶναι τὴν ὕλην· ἀδύνατον δέ· καὶ γὰρ τὸ χωριστὸν καὶ τὸ τότε τι ὑπάρχειν δοκεῖ μάλιστα τῇ οὐσίᾳ, διὸ τὸ εἶδος καὶ τὸ ἐξ ἀμφοῖν οὐσία δόξειεν ἂν εἶναι μᾶλλον τῆς ὕλης. τὴν μὲν τοίνυν ἐξ ἀμφοῖν οὐσίαν, λέγω δὲ τὴν ἐκ τε τῆς ὕλης καὶ τῆς μορφῆς, ἀφετέον, ὥστε γὰρ καὶ δήλη· φανερά δέ πως καὶ ἡ ὕλη· περὶ δὲ τῆς τρίτης σκεπτέον, αὕτη γὰρ ἀπορωτάτη. ὁμολογοῦνται δ' οὐσῖαι εἶναι τῶν αἰσθητῶν τινές, ὥστε ἐν ταύταις ζητητέον πρῶτον.

[1029b] πρὸ ἔργου γὰρ τὸ μεταβαίνειν εἰς τὸ γνωριμώτερον. ἡ γὰρ μάθησις οὕτω γίγνεται πᾶσι διὰ τῶν ἥττον γνωρίμων φύσει εἰς τὰ γνώριμα μᾶλλον· καὶ τοῦτο ἔργον ἐστίν, ὥσπερ ἐν ταῖς πράξεσι τὸ ποιῆσαι ἐκ τῶν ἐκάστῳ ἀγαθῶν τὰ ὅλως ἀγαθὰ ἐκάστῳ ἀγαθὰ, οὕτως ἐκ τῶν αὐτῶ γνωριμωτέρων τὰ τῇ φύσει γνώριμα αὐτῶ γνώριμα. τὰ δ' ἐκάστοις γνώριμα καὶ πρῶτα πολλάκις ἡρέμα ἐστὶ γνώριμα, καὶ μικρὸν ἢ οὐθὲν ἔχει τοῦ ὄντος· ἀλλ' ὅμως ἐκ τῶν φαύλως μὲν γνωστῶν αὐτῶ δὲ γνωστῶν τὰ ὅλως γνωστὰ γινῶναι πειρατέον, μεταβαίνοντας, ὥσπερ εἴρηται, διὰ τούτων αὐτῶν.

Ἐπεὶ δ' ἐν ἀρχῇ διειλόμεθα πόσοις ὀρίζομεν τὴν οὐσίαν, καὶ τούτων ἓν τι ἐδόκει εἶναι τὸ τί ἦν εἶναι, θεωρητέον περὶ αὐτοῦ. καὶ πρῶτον εἰπωμεν ἓνια περὶ αὐτοῦ λογικῶς, ὅτι ἐστὶ τὸ τί ἦν εἶναι ἐκάστου ὃ λέγεται καθ' αὐτό. οὐ γὰρ ἐστὶ τὸ σοὶ εἶναι τὸ μουσικῶ εἶναι· οὐ γὰρ κατὰ σαυτὸν εἶ μουσικός. ὃ ἄρα κατὰ σαυτόν. οὐδὲ δὴ τοῦτο πᾶν· οὐ γὰρ τὸ οὕτως καθ' αὐτὸ ὡς ἐπιφανεία λευκόν, ὅτι οὐκ ἔστι τὸ ἐπιφανεία εἶναι τὸ λευκῶ εἶναι. ἀλλὰ μὴν οὐδὲ τὸ ἐξ ἀμφοῖν, τὸ ἐπιφανεία λευκῇ, ὅτι πρόσεστιν αὐτό. ἐν ᾧ ἄρα μὴ ἐνέσται λόγῳ αὐτό, λέγοντι αὐτό, οὗτος ὁ λόγος τοῦ τί ἦν εἶναι ἐκάστῳ, ὥστ' εἰ τὸ ἐπιφανεία λευκῇ εἶναί ἐστι τὸ ἐπιφανεία εἶναι λεία, τὸ λευκῶ καὶ λείῳ εἶναι τὸ αὐτὸ καὶ ἓν. ἐπεὶ δ' ἔστι καὶ κατὰ τὰς ἄλλας κατηγορίας

σύνθετα (ἔστι γάρ τι ὑποκείμενον ἐκάστω, οἷον τῷ ποιῶ καὶ τῷ ποσῶ καὶ τῷ ποτὲ καὶ τῷ πού καὶ τῇ κινήσει), σκεπτέον ἄρ' ἔστι λόγος τοῦ τί ἦν εἶναι ἐκάστω αὐτῶν, καὶ ὑπάρχει καὶ τούτοις τὸ τί ἦν εἶναι, οἷον λευκῷ ἀνθρώπῳ [τί ἦν λευκῷ ἀνθρώπῳ]. ἔστω δὴ ὄνομα αὐτῷ ἱμάτιον. τί ἐστὶ τὸ ἱματίῳ εἶναι; ἀλλὰ μὴν οὐδὲ τῶν καθ' αὐτὸ λεγομένων οὐδὲ τοῦτο. ἢ τὸ οὐ καθ' αὐτὸ λέγεται διχῶς, καὶ τούτου ἐστὶ τὸ μὲν ἐκ προσθέσεως τὸ δὲ οὐ. τὸ μὲν γὰρ τῷ αὐτὸ ἄλλω προσκεῖσθαι λέγεται ὃ ὀρίζεται, οἷον εἰ τὸ λευκῷ εἶναι ὀριζόμενος λέγοι λευκοῦ ἀνθρώπου λόγον· τὸ δὲ τῷ ἄλλο αὐτῷ, οἷον εἰ σημαίνει τὸ ἱμάτιον λευκὸν ἀνθρωπον, ὃ δὲ ὀρίζοιτο ἱμάτιον ὡς λευκόν. τὸ [1030a] δὴ λευκὸς ἀνθρωπος ἔστι μὲν λευκόν, οὐ μέντοι <τὸ> τί ἦν εἶναι λευκῷ εἶναι. - ἀλλὰ τὸ ἱματίῳ εἶναι ἄρα ἐστὶ τί ἦν εἶναι τι [ἦ] ὅλως; ἢ οὐ; ὅπερ γάρ τί ἐστὶ τὸ τί ἦν εἶναι· ὅταν δ' ἄλλο κατ' ἄλλου λέγεται, οὐκ ἔστιν ὅπερ τόδε τι, οἷον ὁ λευκὸς ἀνθρωπος οὐκ ἔστιν ὅπερ τόδε τι, εἴπερ τὸ τόδε ταῖς οὐσίαις ὑπάρχει μόνον· ὥστε τὸ τί ἦν εἶναι ἐστὶν ὅσων ὁ λόγος ἐστὶν ὀρισμός. ὀρισμὸς δ' ἐστὶν οὐκ ἂν ὄνομα λόγῳ ταῦτὸ σημαίνει (πάντες γὰρ ἂν εἶεν οἱ λόγοι ὅροι· ἔσται γὰρ ὄνομα ὀνομαζόμενος λόγῳ, ὥστε καὶ ἡ Ἰλιάς ὀρισμὸς ἔσται), ἀλλ' ἐὰν πρώτου τινὸς ἦ· τοιαῦτα δ' ἐστὶν ὅσα λέγεται μὴ τῷ ἄλλο κατ' ἄλλου λέγεσθαι. οὐκ ἔσται ἄρα οὐδενὶ τῶν μὴ γένους εἰδῶν ὑπάρχον τὸ τί ἦν εἶναι, ἀλλὰ τούτοις μόνον (ταῦτα γὰρ δοκεῖ οὐ κατὰ μετοχὴν λέγεσθαι καὶ πάθος οὐδ' ὡς συμβεβηκός)· ἀλλὰ λόγος μὲν ἔσται ἐκάστου καὶ τῶν ἄλλων τί σημαίνει, ἐὰν ἦ ὄνομα, ὅτι τόδε τῷδε ὑπάρχει, ἢ ἀντὶ λόγου ἀπλοῦ ἀκριβέστερος· ὀρισμὸς δ' οὐκ ἔσται οὐδὲ τὸ τί ἦν εἶναι. ἢ καὶ ὁ ὀρισμὸς ὥπερ καὶ τὸ τί ἐστὶ πλεοναχῶς λέγεται; καὶ γὰρ τὸ τί ἐστὶν ἓνα μὲν τρόπον σημαίνει τὴν οὐσίαν καὶ τὸ τόδε τι, ἄλλον δὲ ἕκαστον τῶν κατηγορουμένων, ποσὸν ποιὸν καὶ ὅσα ἄλλα τοιαῦτα. ὥπερ γὰρ καὶ τὸ ἔστιν ὑπάρχει πᾶσιν, ἀλλ' οὐχ ὁμοίως ἀλλὰ τῷ μὲν πρώτῳ τοῖς δ' ἐπομένως, οὕτω καὶ τὸ τί ἐστὶν ἀπλῶς μὲν τῇ οὐσίᾳ πῶς δὲ τοῖς ἄλλοις· καὶ γὰρ τὸ ποιὸν ἐροίμεθ' ἂν τί ἐστὶν, ὥστε καὶ τὸ ποιὸν τῶν τί ἐστὶν, ἀλλ' οὐχ ἀπλῶς, ἀλλ' ὥπερ ἐπὶ τοῦ μὴ ὄντος λογικῶς φασὶ τινες εἶναι τὸ μὴ ὄν, οὐχ ἀπλῶς ἀλλὰ μὴ ὄν, οὕτω καὶ τὸ ποιόν. - δεῖ μὲν οὖν σκοπεῖν καὶ τὸ πῶς δεῖ λέγειν περὶ ἕκαστον, οὐ μὴν μάλλον γε ἢ τὸ πῶς ἔχει· διὸ καὶ νῦν ἐπεὶ τὸ λεγόμενον φανερόν, καὶ τὸ τί ἦν εἶναι ὁμοίως ὑπάρξει πρώτῳ μὲν καὶ ἀπλῶς τῇ οὐσίᾳ, εἴτα καὶ τοῖς ἄλλοις, ὥπερ καὶ τὸ τί ἐστὶν, οὐχ ἀπλῶς τί ἦν εἶναι ἀλλὰ ποιῶ ἢ ποσῶ τί ἦν εἶναι. δεῖ γὰρ ἢ ὁμωνύμως

ταῦτα φάναι εἶναι ὄντα, ἢ προστιθέντας καὶ ἀφαιροῦντας, ὥσπερ καὶ τὸ μὴ ἐπιστητὸν ἐπιστητόν, ἐπεὶ τό γε ὀρθόν ἐστὶ μήτε ὁμωνύμως φάναι μήτε ὡσαύτως ἀλλ' ὥσπερ τὸ ἱατρικὸν τῷ πρὸς τὸ αὐτὸ [1030b] μὲν καὶ ἓν, οὐ τὸ αὐτὸ δὲ καὶ ἓν, οὐ μέντοι οὐδὲ ὁμωνύμως· οὐδὲ γὰρ ἱατρικὸν σῶμα καὶ ἔργον καὶ σκευὸς λέγεται οὔτε ὁμωνύμως οὔτε καθ' ἓν ἀλλὰ πρὸς ἓν. ἀλλὰ ταῦτα μὲν ὁποτέρως τις ἐθέλει λέγειν διαφέρει οὐδέν· ἐκεῖνο δὲ φανερόν ὅτι ὁ πρῶτος καὶ ἀπλῶς ὀρισμὸς καὶ τὸ τί ἦν εἶναι τῶν οὐσιῶν ἐστίν. οὐ μὴν ἀλλὰ καὶ τῶν ἄλλων ὁμοίως ἐστὶ, πλην οὐ πρῶτος. οὐ γὰρ ἀνάγκη, ἂν τοῦτο τιθῶμεν, τούτου ὀρισμὸν εἶναι ὃ ἂν λόγῳ τὸ αὐτὸ σημαίνει, ἀλλὰ τινὶ λόγῳ· τοῦτο δὲ ἐὰν ἐνὸς ἦ, μὴ τῷ συνεχεῖ ὥσπερ ἡ Ἰλιάς ἢ ὅσα συνδέσμων, ἀλλ' ἐὰν ὁσαυχῶς λέγεται τὸ ἓν· τὸ δ' ἐν λέγεται ὥσπερ τὸ ὄν· τὸ δὲ ὄν τὸ μὲν τόδε τι τὸ δὲ ποσὸν τὸ δὲ ποιόν τι σημαίνει. διὸ καὶ λευκοῦ ἀνθρώπου ἔσται λόγος καὶ ὀρισμὸς, ἄλλον δὲ τρόπον καὶ τοῦ λευκοῦ καὶ οὐσίας.

Ἔχει δ' ἀπορίαν, ἐὰν τις μὴ φῇ ὀρισμὸν εἶναι τὸν ἐκ προσθέσεως λόγον, τίνας ἔσται ὀρισμὸς τῶν οὐχ ἀπλῶν ἀλλὰ συνδεδυασμένων· ἐκ προσθέσεως γὰρ ἀνάγκη δηλοῦν. λέγω δὲ οἷον ἔστι ρίς καὶ κοιλότης, καὶ σιμότης τὸ ἐκ τῶν δυοῖν λεγόμενον τῷ τόδε ἐν τῷδε, καὶ οὐ κατὰ συμβεβηκός γε οὐθ' ἡ κοιλότης οὐθ' ἡ σιμότης πάθος τῆς ρίνος, ἀλλὰ καθ' αὐτήν· οὐδ' ὥς τὸ λευκὸν Καλλία, ἢ ἀνθρώπῳ, ὅτι Καλλίας λευκὸς ᾧ συμβέβηκεν ἀνθρώπῳ εἶναι, ἀλλ' ὥς τὸ ἄρρεν τῷ ζῷῳ καὶ τὸ ἴσον τῷ ποσῷ καὶ πάντα ὅσα λέγεται καθ' αὐτὰ ὑπάρχειν. ταῦτα δ' ἐστὶν ἐν ὅσοις ὑπάρχει ἢ ὁ λόγος ἢ τοῦνομα οὗ ἐστὶ τοῦτο τὸ πάθος, καὶ μὴ ἐνδέχεται δηλῶσαι χωρὶς, ὥσπερ τὸ λευκὸν ἄνευ τοῦ ἀνθρώπου ἐνδέχεται ἀλλ' οὐ τὸ θῆλυ ἄνευ τοῦ ζώου· ὥστε τούτων τὸ τί ἦν εἶναι καὶ ὀρισμὸς ἢ οὐκ ἔστιν οὐδενὸς ἢ, εἰ ἔστιν, ἄλλως, καθάπερ εἰρήκαμεν. ἔστι δὲ ἀπορία καὶ ἐτέρα περὶ αὐτῶν. εἰ μὲν γὰρ τὸ αὐτὸ ἐστὶ σιμὴ ρίς καὶ κοίλη ρίς, τὸ αὐτὸ ἔσται τὸ σιμὸν καὶ τὸ κοῖλον· εἰ δὲ μή, διὰ τὸ ἀδύνατον εἶναι εἰπεῖν τὸ σιμὸν ἄνευ τοῦ πράγματος οὗ ἐστὶ πάθος καθ' αὐτό (ἔστι γὰρ τὸ σιμὸν κοιλότης ἐν ρίνι), τὸ ρῖνα σιμὴν εἰπεῖν ἢ οὐκ ἔστιν ἢ δις τὸ αὐτὸ ἔσται εἰρημένον, ρίς ρίς κοίλη (ἢ γὰρ ρίς ἢ σιμὴ ρίς ρίς κοίλη ἔσται), διὸ ἄτοπον τὸ ὑπάρχειν τοῖς τοιούτοις τὸ τί ἦν εἶναι· εἰ δὲ μή, εἰς ἅπειρον εἰσιν· ρίνι γὰρ ρίνι σιμῇ ἔτι [1031a] ἄλλο ἐνέσται. δηλὸν τοίνυν ὅτι μόνης τῆς οὐσίας ἐστὶν ὁ ὀρισμὸς. εἰ γὰρ καὶ τῶν ἄλλων κατηγοριῶν, ἀνάγκη ἐκ προσθέσεως εἶναι, οἷον τοῦ ποιουῦ καὶ

περιττοῦ· οὐ γὰρ ἄνευ ἀριθμοῦ, οὐδὲ τὸ θῆλυ ἄνευ ζώου (τὸ δὲ ἐκ προσθέσεως λέγω ἐν οἷς συμβαίνει δις τὸ αὐτὸ λέγειν ὥσπερ ἐν τούτοις). εἰ δὲ τοῦτο ἀληθές, οὐδὲ συνδυαζομένων ἔσται, οἷον ἀριθμοῦ περιττοῦ· ἀλλὰ λανθάνει ὅτι οὐκ ἀκριβῶς λέγονται οἱ λόγοι. εἰ δ' εἰσὶ καὶ τούτων ὅροι, ἥτοι ἄλλον τρόπον εἰσὶν ἢ καθάπερ ἐλέχθη πολλαχῶς λεκτέον εἶναι τὸν ὀρισμὸν καὶ τὸ τί ἦν εἶναι, ὥστε ὡδὶ μὲν οὐδενὸς ἔσται ὀρισμὸς οὐδὲ τὸ τί ἦν εἶναι οὐδενὶ ὑπάρξει πλὴν ταῖς οὐσίαις, ὡδὶ δ' ἔσται. ὅτι μὲν οὖν ἐστὶν ὁ ὀρισμὸς ὁ τοῦ τί ἦν εἶναι λόγος, καὶ τὸ τί ἦν εἶναι ἢ μόνων τῶν οὐσιῶν ἐστὶν ἢ μάλιστα καὶ πρώτως καὶ ἀπλῶς, δῆλον.

Πότερον δὲ ταῦτόν ἐστιν ἢ ἕτερον τὸ τί ἦν εἶναι καὶ ἕκαστον, σκεπτέον. ἔστι γάρ τι πρὸ ἔργου πρὸς τὴν περὶ τῆς οὐσίας σκέψιν· ἕκαστόν τε γὰρ οὐκ ἄλλο δοκεῖ εἶναι τῆς ἑαυτοῦ οὐσίας, καὶ τὸ τί ἦν εἶναι λέγεται εἶναι ἢ ἐκάστου οὐσία. ἐπὶ μὲν δὴ τῶν λεγομένων κατὰ συμβεβηκὸς δόξειεν ἂν ἕτερον εἶναι, οἷον λευκὸς ἄνθρωπος ἕτερον καὶ τὸ λευκῷ ἀνθρώπῳ εἶναι (εἰ γὰρ τὸ αὐτό, καὶ τὸ ἀνθρώπῳ εἶναι καὶ τὸ λευκῷ ἀνθρώπῳ τὸ αὐτό· τὸ αὐτὸ γὰρ ἄνθρωπος καὶ λευκὸς ἄνθρωπος, ὡς φασίν, ὥστε καὶ τὸ λευκῷ ἀνθρώπῳ καὶ τὸ ἀνθρώπῳ· ἢ οὐκ ἀνάγκη ὅσα κατὰ συμβεβηκὸς εἶναι ταῦτά, οὐ γὰρ ὡσαύτως τὰ ἅκρα γίγνεται ταῦτά· ἀλλ' ἴσως γε ἐκεῖνο δόξειεν ἂν συμβαίνειν, τὰ ἅκρα γίγνεσθαι ταῦτά τὰ κατὰ συμβεβηκός, οἷον τὸ λευκῷ εἶναι καὶ τὸ μουσικῷ· δοκεῖ δὲ οὐ). ἐπὶ δὲ τῶν καθ' αὐτὰ λεγομένων ἄρ' ἀνάγκη ταῦτό εἶναι, οἷον εἴ τινες εἰσὶν οὐσίαι ὧν ἕτεραι μὴ εἰσὶν οὐσίαι μὴδὲ φύσεις ἕτεραι πρότεραι, οἷας φασὶ τὰς ιδέας εἶναί τινες; εἰ γὰρ ἔσται ἕτερον αὐτὸ τὸ ἀγαθὸν καὶ τὸ ἀγαθῷ εἶναι, καὶ ζῶον καὶ τὸ ζῶον, καὶ τὸ ὄντι καὶ τὸ [1031b] ὄν, ἔσονται ἄλλαι τε οὐσίαι καὶ φύσεις καὶ ιδέαι παρὰ τὰς λεγομένας, καὶ πρότεραι οὐσίαι ἐκεῖναι, εἰ τὸ τί ἦν εἶναι οὐσία ἐστίν. καὶ εἰ μὲν ἀπολελυμένοι ἀλλήλων, τῶν μὲν οὐκ ἔσται ἐπιστήμη τὰ δ' οὐκ ἔσται ὄντα (λέγω δὲ τὸ ἀπολελυθῆναι εἰ μήτε τῷ ἀγαθῷ αὐτῷ ὑπάρχει τὸ εἶναι ἀγαθῷ μήτε τούτῳ τὸ εἶναι ἀγαθόν). ἐπιστήμη τε γὰρ ἐκάστου ἔστιν ὅταν τὸ τί ἦν ἐκεῖνον εἶναι γινώμεν, καὶ ἐπὶ ἀγαθοῦ καὶ τῶν ἄλλων ὁμοίως ἔχει, ὥστε εἰ μὴδὲ τὸ ἀγαθῷ εἶναι ἀγαθόν, οὐδὲ τὸ ὄντι ὄν οὐδὲ τὸ ἐνὶ ἑν· ὁμοίως δὲ πάντα ἔστιν ἢ οὐθὲν τὰ τί ἦν εἶναι, ὥστ' εἰ μὴδὲ τὸ ὄντι ὄν, οὐδὲ τῶν ἄλλων οὐδέν. ἔτι ὃ μὴ ὑπάρχει ἀγαθῷ εἶναι, οὐκ ἀγαθόν. ἀνάγκη ἄρα ἐν εἶναι τὸ ἀγαθὸν καὶ ἀγαθῷ εἶναι καὶ καλὸν καὶ καλῷ εἶναι, «καὶ» ὅσα μὴ κατ' ἄλλο λέγεται, ἀλλὰ καθ' αὐτὰ καὶ

(ένυπάρχει [1033a] γὰρ καὶ γίγνεται αὕτη). ἀλλ' ἄρα καὶ τῶν ἐν τῷ λόγῳ; ἀμφοτέρως δὴ λέγομεν τοὺς χαλκοὺς κύκλους τί εἰσι, καὶ τὴν ὕλην λέγοντες ὅτι χαλκός, καὶ τὸ εἶδος ὅτι σχῆμα τοιόνδε, καὶ τοῦτο ἐστὶ τὸ γένος εἰς ὃ πρῶτον τίθεται. ὁ δὴ χαλκοὺς κύκλος ἔχει ἐν τῷ λόγῳ τὴν ὕλην. - ἐξ οὗ δὲ ὡς ὕλης γίγνεται ἓνια λέγεται, ὅταν γένηται, οὐκ ἐκεῖνο ἀλλ' ἐκείνινον, οἷον ὁ ἀνδριάς οὐ λίθος ἀλλὰ λίθινος, ὁ δὲ ἄνθρωπος ὁ ὑγιαίνων οὐ λέγεται ἐκεῖνο ἐξ οὗ· αἴτιον δὲ ὅτι γίγνεται ἐκ τῆς στερήσεως καὶ τοῦ ὑποκειμένου, ὃ λέγομεν τὴν ὕλην (οἷον καὶ ὁ ἄνθρωπος καὶ ὁ κάμνων γίγνεται ὑγιής), μᾶλλον μέντοι λέγεται γίνεσθαι ἐκ τῆς στερήσεως, οἷον ἐκ κάμνοντος ὑγιής ἢ ἐξ ἀνθρώπου, διὸ κάμνων μὲν ὁ ὑγιής οὐ λέγεται, ἄνθρωπος δέ, καὶ ὁ ἄνθρωπος ὑγιής· ὧν δ' ἡ στέρησις ἀδηλος καὶ ἀνώνυμος, οἷον ἐν χαλκῷ σχήματος ὁποιοῦσιν ἢ ἐν πλίνθοις καὶ ξύλοις οἰκίας, ἐκ τούτων δοκεῖ γίνεσθαι ὡς ἐκεῖ ἐκ κάμνοντος· διὸ ὥσπερ οὐδ' ἐκεῖ ἐξ οὗ τοῦτο, ἐκεῖνο οὐ λέγεται, οὐδ' ἐνταῦθα ὁ ἀνδριάς ξύλον, ἀλλὰ παράγεται ξύλινος, [οὐ ξύλον,] καὶ χαλκοὺς ἀλλ' οὐ χαλκός, καὶ λίθινος ἀλλ' οὐ λίθος, καὶ ἡ οἰκία πλινθίνη ἀλλ' οὐ πλίνθοι, ἐπεὶ οὐδὲ ὡς ἐκ ξύλου γίγνεται ἀνδριάς ἢ ἐκ πλίνθων οἰκία, ἐάν τις ἐπιβλέπη σφόδρα, οὐκ ἂν ἀπλῶς εἴπειεν, διὰ τὸ δεῖν μεταβάλλοντος γίνεσθαι ἐξ οὗ, ἀλλ' οὐχ ὑπομένοντος. διὰ μὲν οὖν τοῦτο οὕτως λέγεται.

Ἐπεὶ δὲ ὑπὸ τινός τε γίγνεται τὸ γιγνόμενον (τοῦτο δὲ λέγω ὅθεν ἡ ἀρχὴ τῆς γενέσεώς ἐστὶ) καὶ ἕκ τινος (ἔστω δὲ μὴ ἡ στέρησις τοῦτο ἀλλ' ἡ ὕλη· ἥδη γὰρ διώριστα ὅν τρόπον τοῦτο λέγομεν) καὶ τί γίγνεται (τοῦτο δ' ἐστὶν ἢ σφαῖρα ἢ κύκλος ἢ ὃ τι ἔτυχε τῶν ἄλλων), ὥσπερ οὐδὲ τὸ ὑποκείμενον ποιεῖ, τὸν χαλκόν, οὕτως οὐδὲ τὴν σφαῖραν, εἰ μὴ κατὰ συμβεβηκός ὅτι ἡ χαλκὴ σφαῖρα σφαῖρά ἐστιν ἐκείνην δὲ ποιεῖ. τὸ γὰρ τόδε τι ποιεῖν ἐκ τοῦ ὅλως ὑποκειμένου τόδε τι ποιεῖν ἐστίν (λέγω δ' ὅτι τὸν χαλκόν στρογγύλον ποιεῖν ἐστὶν οὐ τὸ στρογγύλον ἢ τὴν σφαῖραν ποιεῖν ἀλλ' ἕτερόν τι, οἷον τὸ εἶδος τοῦτο ἐν ἄλλῳ· εἰ γὰρ ποιεῖ, ἕκ [1033b] τινος ἂν ποιοίῃ ἄλλου, τοῦτο γὰρ ὑπέκειτο· οἷον ποιεῖ χαλκὴν σφαῖραν, τοῦτο δὲ οὕτως ὅτι ἐκ τουδί, ὃ ἐστὶ χαλκός, τοδί ποιεῖ, ὃ ἐστὶ σφαῖρα· εἰ οὖν καὶ τοῦτο ποιεῖ αὐτό, δῆλον ὅτι ὡσαύτως ποιήσει, καὶ βαδιοῦνται αἱ γενέσεις εἰς ἅπειρον. φανερόν ἄρα ὅτι οὐδὲ τὸ εἶδος, ἢ ὅτιδήποτε χρὴ καλεῖν τὴν ἐν τῷ αἰσθητῷ μορφήν, οὐ γίγνεται, οὐδ' ἐστὶν αὐτοῦ γενέσις, οὐδὲ τὸ τί ἦν εἶναι (τοῦτο γάρ

ἐστὶν ὁ ἐν ἄλλῳ γίγνεται ἢ ὑπὸ τέχνης ἢ ὑπὸ φύσεως ἢ δυνάμεως). τὸ δὲ χαλκὴν σφαῖραν εἶναι ποιεῖ· ποιεῖ γὰρ ἐκ χαλκοῦ καὶ σφαίρας· εἰς τοδὶ γὰρ τὸ εἶδος ποιεῖ, καὶ ἔστι τοῦτο σφαῖρα χαλκῇ. τοῦ δὲ σφαίρα εἶναι ὅλως εἰ ἔσται γένεσις, ἔκ τινος τὶ ἔσται. δεῖσει γὰρ διαιρετὸν εἶναι αἰετὸ γιγνόμενον, καὶ εἶναι τὸ μὲν τότε τὸ δὲ τότε, λέγω δ' ὅτι τὸ μὲν ὕλην τὸ δὲ εἶδος. εἰ δὴ ἔστι σφαῖρα τὸ ἐκ τοῦ μέσου σχῆμα ἴσον, τούτου τὸ μὲν ἐν ᾧ ἔσται ὁ ποιεῖ, τὸ δ' ἐν ἐκείνῳ, τὸ δὲ ἅπαν τὸ γεγονός, οἷον ἡ χαλκῇ σφαῖρα. φανερόν δὴ ἐκ τῶν εἰρημένων ὅτι τὸ μὲν ὡς εἶδος ἢ οὐσία λεγόμενον οὐ γίγνεται, ἡ δὲ σύνολος ἡ κατὰ ταύτην λεγομένη γίγνεται, καὶ ὅτι ἐν παντὶ τῷ γεννωμένῳ ὕλη ἔνεστι, καὶ ἔστι τὸ μὲν τότε τὸ δὲ τότε. - πότερον οὖν ἔστι τις σφαῖρα παρὰ τάσδε ἢ οἰκία παρὰ τὰς πλίνθους; ἢ οὐδ' ἂν ποτε ἐγίγνετο, εἰ οὕτως ἦν, τότε τι, ἀλλὰ τὸ τοιόνδε σημαίνει, τότε δὲ καὶ ὠρισμένον οὐκ ἔστιν, ἀλλὰ ποιεῖ καὶ γεννᾷ ἐκ τοῦδε τοιόνδε, καὶ ὅταν γεννηθῇ, ἔστι τότε τοιόνδε; τὸ δὲ ἅπαν τότε, Καλλίας ἢ Σωκράτης, ἐστὶν ὥσπερ ἡ σφαῖρα ἢ χαλκῇ ἡδί, ὁ δ' ἄνθρωπος καὶ τὸ ζῶον ὥσπερ σφαῖρα χαλκῇ ὅλως. φανερόν ἄρα ὅτι ἡ τῶν εἰδῶν αἰτία, ὡς εἰώθασι τινες λέγειν τὰ εἶδη, εἰ ἔστιν ἅττα παρὰ τὰ καθ' ἕκαστα, πρὸς γε τὰς γενέσεις καὶ τὰς οὐσίας οὐθὲν χρησίμη· οὐδ' ἂν εἶεν διὰ γε ταῦτα οὐσίαι καθ' αὐτάς. ἐπὶ μὲν δὴ τινων καὶ φανερόν ὅτι τὸ γεννῶν τοιοῦτον μὲν οἷον τὸ γεννώμενον, οὐ μέντοι τὸ αὐτό γε, οὐδὲ ἐν τῷ ἀριθμῷ ἀλλὰ τῷ εἶδει, οἷον ἐν τοῖς φυσικοῖς - ἄνθρωπος γὰρ ἄνθρωπον γεννᾷ - ἂν μή τι παρὰ φύσιν γένηται, οἷον ἵππος ἡμίονον (καὶ ταῦτα δὲ ὁμοίως· ὁ γὰρ ἂν κοινὸν εἶη ἐφ' ἵππου καὶ ὄνου [1034a] οὐκ ὠνόμασται, τὸ ἐγγύτατα γένος, εἶη δ' ἂν ἄμφω ἴσως, οἷον ἡμίονος)· ὥστε φανερόν ὅτι οὐθὲν δεῖ ὡς παράδειγμα εἶδος κατασκευάζειν (μάλιστα γὰρ ἂν ἐν τούτοις ἐπεζητοῦντο· οὐσίαι γὰρ αἱ μάλιστα αὗται) ἀλλὰ ἱκανὸν τὸ γεννῶν ποιῆσαι καὶ τοῦ εἶδους αἷτιον εἶναι ἐν τῇ ὕλῃ. τὸ δ' ἅπαν ἤδη, τὸ τοιόνδε εἶδος ἐν ταῖσδε ταῖς σαρκὶ καὶ ὀστοῖς, Καλλίας καὶ Σωκράτης· καὶ ἕτερον μὲν διὰ τὴν ὕλην (ἐτέρα γάρ), ταῦτο δὲ τῷ εἶδει (ἄτομον γὰρ τὸ εἶδος).

Ἀπορήσειε δ' ἂν τις διὰ τί τὰ μὲν γίγνεται καὶ τέχνη καὶ ἀπὸ ταῦτομάτου, οἷον ὑγίεια, τὰ δ' οὐ, οἷον οἰκία. αἷτιον δὲ ὅτι τῶν μὲν ἡ ὕλη ἢ ἄρχουσα τῆς γενέσεως ἐν τῷ ποιεῖν καὶ γίγνεσθαι τι τῶν ἀπὸ τέχνης, ἐν ᾗ ὑπάρχει τι μέρος τοῦ πράγματος, - ἡ μὲν τοιαύτη ἐστὶν οἷα κινεῖσθαι ὑφ' αὐτῆς ἢ δ' οὐ, καὶ ταύτης ἡ μὲν ὠδὶ οἷα τε ἡ δὲ ἀδύνατος· πολλὰ γὰρ δυνατὰ μὲν ὑφ' αὐτῶν κινεῖσθαι ἀλλ' οὐχ ὠδί,

οἶον ὀρχήσασθαι. ὅσων οὖν τοιαύτη ἡ ὕλη, οἶον οἱ λίθοι, ἀδύνατον ὠδὶ κινηθῆναι εἰ μὴ ὑπ' ἄλλου, ὠδὶ μέντοι ναί - καὶ τὸ πῦρ. διὰ τοῦτο τὰ μὲν οὐκ ἔσται ἄνευ τοῦ ἔχοντος τὴν τέχνην τὰ δὲ ἔσται· ὑπὸ γὰρ τούτων κινηθήσεται τῶν οὐκ ἐχόντων τὴν τέχνην, κινεῖσθαι δὲ δυναμένων αὐτῶν ὑπ' ἄλλων οὐκ ἐχόντων τὴν τέχνην ἢ ἐκ μέρους. δῆλον δ' ἐκ τῶν εἰρημένων καὶ ὅτι τρόπον τινὰ πάντα γίνεται ἐξ ὁμωνύμου, ὥσπερ τὰ φύσει, ἢ ἐκ μέρους ὁμωνύμου (οἶον ἡ οἰκία ἐξ οἰκίας, ἢ ὑπὸ νοῦ· ἡ γὰρ τέχνη τὸ εἶδος) [ἢ ἐκ μέρους] ἢ ἔχοντός τι μέρος, - ἐὰν μὴ κατὰ συμβεβηκὸς γίγνηται· τὸ γὰρ αἷτιον τοῦ ποιεῖν πρῶτον καθ' αὐτὸ μέρος. θερμότης γὰρ ἢ ἐν τῇ κινήσει θερμότητα ἐν τῷ σώματι ἐποίησεν· αὕτη δὲ ἐστὶν ἡ ὑγεία ἢ μέρος, ἢ ἀκολουθεῖ αὐτῇ μέρος τι τῆς ὑγείας ἢ αὐτὴ ἡ ὑγεία· διὸ καὶ λέγεται ποιεῖν, ὅτι ἐκεῖνο ποιεῖ [τὴν ὑγείαν] ὃ ἀκολουθεῖ καὶ συμβέβηκε [θερμότης]. ὥστε, ὥσπερ ἐν τοῖς συλλογισμοῖς, πάντων ἀρχὴ ἡ οὐσία· ἐκ γὰρ τοῦ τί ἐστὶν οἱ συλλογισμοὶ εἰσιν, ἐνταῦθα δὲ αἱ γενέσεις. ὁμοίως δὲ καὶ τὰ φύσει συνιστάμενα τούτοις ἔχει. τὸ μὲν γὰρ σπέρμα ποιεῖ ὥσπερ τὰ ἀπὸ τέχνης (ἔχει γὰρ δυνάμει [1034b] τὸ εἶδος, καὶ ἀφ' οὗ τὸ σπέρμα, ἐστὶ πῶς ὁμώνυμον - οὐ γὰρ πάντα οὕτω δεῖ ζητεῖν ὡς ἐξ ἀνθρώπου ἄνθρωπος· καὶ γὰρ γυνὴ ἐξ ἀνδρός - ἐὰν μὴ πῆρωμα ἢ· διὸ ἡμίονος οὐκ ἐξ ἡμίονου)· ὅσα δὲ ἀπὸ ταυτομάτου ὥσπερ ἐκεῖ γίνεται, ὅσων ἡ ὕλη δύναται καὶ ὑφ' αὐτῆς κινεῖσθαι ταύτην τὴν κίνησιν ἦν τὸ σπέρμα κινεῖ· ὅσων δὲ μή, ταῦτα ἀδύνατα γίνεσθαι ἄλλως πῶς ἢ ἐξ αὐτῶν. - οὐ μόνον δὲ περὶ τῆς οὐσίας ὁ λόγος δηλοῖ τὸ μὴ γίνεσθαι τὸ εἶδος, ἀλλὰ περὶ πάντων ὁμοίως τῶν πρώτων κοινὸς ὁ λόγος, οἶον ποσοῦ ποιοῦ καὶ τῶν ἄλλων κατηγοριῶν. γίνεται γὰρ ὥσπερ ἡ χαλκῇ σφαῖρα ἀλλ' οὐ σφαῖρα οὐδὲ χαλκός, καὶ ἐπὶ χαλκοῦ, εἰ γίνεται (αἰεὶ γὰρ δεῖ προϋπάρχειν τὴν ὕλην καὶ τὸ εἶδος), οὕτως καὶ ἐπὶ τοῦ τί ἐστὶ καὶ ἐπὶ τοῦ ποιοῦ καὶ ποσοῦ καὶ τῶν ἄλλων ὁμοίως κατηγοριῶν· οὐ γὰρ γίνεται τὸ ποιὸν ἀλλὰ τὸ ποιὸν ξύλον, οὐδὲ τὸ ποσὸν ἀλλὰ τὸ ποσὸν ξύλον ἢ ζῶον. ἀλλ' ἴδιον τῆς οὐσίας ἐκ τούτων λαβεῖν ἔστιν ὅτι ἀναγκαῖον προϋπάρχειν ἑτέραν οὐσίαν ἐντελεχεῖα οὖσαν ἢ ποιεῖ, οἶον ζῶον εἰ γίνεται ζῶον· ποιὸν δ' ἢ ποσὸν οὐκ ἀνάγκη ἀλλ' ἢ δυνάμει μόνον.

Ἐπεὶ δὲ ὁ ὀρισμὸς λόγος ἐστὶ, πᾶς δὲ λόγος μέρη ἔχει, ὡς δὲ ὁ λόγος πρὸς τὸ πρᾶγμα, καὶ τὸ μέρος τοῦ λόγου πρὸς τὸ μέρος τοῦ πράγματος ὁμοίως ἔχει, ἀπορεῖται ἤδη πότερον δεῖ τὸν τῶν μερῶν λόγον ἐνυπάρχειν ἐν τῷ τοῦ ὅλου λόγῳ ἢ οὐ. ἐπ' ἐνίων μὲν γὰρ

φαίνονται ἐνόντες ἐνίων δ' οὐ. τοῦ μὲν γὰρ κύκλου ὁ λόγος οὐκ ἔχει τὸν τῶν τμημάτων, ὁ δὲ τῆς συλλαβῆς ἔχει τὸν τῶν στοιχείων· καίτοι διαιρεῖται καὶ ὁ κύκλος εἰς τὰ τμήματα ὥσπερ καὶ ἡ συλλαβὴ εἰς τὰ στοιχεῖα. ἔτι δὲ εἰ πρότερα τὰ μέρη τοῦ ὅλου, τῆς δὲ ὀρθῆς ἢ ὀξεῖα μέρος καὶ ὁ δάκτυλος τοῦ ζώου, πρότερον ἂν εἴη ἢ ὀξεῖα τῆς ὀρθῆς καὶ ὁ δάκτυλος τοῦ ἀνθρώπου. δοκεῖ δ' ἐκεῖνα εἶναι πρότερα· τῷ λόγῳ γὰρ λέγονται ἐξ ἐκείνων, καὶ τῷ εἶναι δὲ ἄνευ ἀλλήλων πρότερα. - ἢ πολλαχῶς λέγεται τὸ μέρος, ὧν εἷς μὲν τρόπος τὸ μετροῦν κατὰ τὸ ποσόν - ἀλλὰ τοῦτο μὲν ἀφείσθω· ἐξ ὧν δὲ ἡ οὐσία ὡς μερῶν, τοῦτο σκεπτέον.

λεγόντων οἱ μὲν αὐτογραμμὴν τὴν δυάδα, οἱ δὲ τὸ εἶδος τῆς γραμμῆς, ἓνια μὲν γὰρ εἶναι τὸ αὐτὸ τὸ εἶδος καὶ οὐ τὸ εἶδος (οἷον δυάδα καὶ τὸ εἶδος δυάδος), ἐπὶ γραμμῆς δὲ οὐκέτι. συμβαίνει δὲ ἔν τε πολλῶν εἶδος εἶναι ὣν τὸ εἶδος φαίνεται ἕτερον (ὅπερ καὶ τοῖς Πυθαγορείοις συνέβαινεν), καὶ ἐνδέχεται ἐν πάντων ποιεῖν αὐτὸ εἶδος, τὰ δ' ἄλλα μὴ εἶδη· καίτοι οὕτως ἐν πάντα ἔσται.

Ὅτι μὲν οὖν ἔχει τινὰ ἀπορίαν τὰ περὶ τοὺς ὁρισμούς, καὶ διὰ τίν' αἰτίαν, εἴρηται· διὸ καὶ τὸ πάντα ἀνάγειν οὕτω καὶ ἀφαιρεῖν τὴν ὕλην περιεργον· ἓνια γὰρ ἴσως τόδ' ἐν τῷδ' ἐστὶν ἢ ὡδὶ ταδὶ ἔχοντα. καὶ ἢ παραβολὴ ἢ ἐπὶ τοῦ ζῶου, ἣν εἰώθει λέγειν Σωκράτης ὁ νεώτερος, οὐ καλῶς ἔχει· ἀπάγει γὰρ ἀπὸ τοῦ ἀληθοῦς, καὶ ποιεῖ ὑπολαμβάνειν ὡς ἐνδεχόμενον εἶναι τὸν ἄνθρωπον ἄνευ τῶν μερῶν, ὥσπερ ἄνευ τοῦ χαλκοῦ τὸν κύκλον. τὸ δ' οὐχ ὅμοιον· αἰσθητὸν γάρ τι τὸ ζῶον, καὶ ἄνευ κινήσεως οὐκ ἔστιν ὀρίσασθαι, διὸ οὐδ' ἄνευ τῶν μερῶν ἔχόντων πῶς. οὐ γὰρ πάντως τοῦ ἀνθρώπου μέρος ἢ χεῖρ, ἀλλ' ἢ δυναμένη τὸ ἔργον ἀποτελεῖν, ὥστε ἔμψυχος οὕσα· μὴ ἔμψυχος δὲ οὐ μέρος. περὶ δὲ τὰ μαθηματικὰ διὰ τί οὐκ εἰσὶ μέρη οἱ λόγοι τῶν λόγων, οἷον τοῦ κύκλου τὰ ἡμικύκλια; οὐ γάρ ἐστιν αἰσθητὰ ταῦτα. ἢ οὐθὲν διαφέρει; ἔσται γὰρ ὕλη ἐνίων καὶ μὴ αἰσθητῶν. [1037a] καὶ παντὸς γὰρ ὕλη τις ἐστὶν ὃ μὴ ἔστι τί ἦν εἶναι καὶ εἶδος αὐτὸ καθ' αὐτὸ ἀλλὰ τόδε τι. κύκλου μὲν οὖν οὐκ ἔσται τοῦ καθόλου, τῶν δὲ καθ' ἕκαστα ἔσται μέρη ταῦτα, ὥσπερ εἴρηται πρότερον· ἔστι γὰρ ὕλη ἢ μὲν αἰσθητὴ ἢ δὲ νοητή. δῆλον δὲ καὶ ὅτι ἢ μὲν ψυχὴ οὐσία ἢ πρώτη, τὸ δὲ σῶμα ὕλη, ὃ δ' ἄνθρωπος ἢ τὸ ζῶον τὸ ἐξ ἀμοφοῖν ὡς καθόλου· Σωκράτης δὲ καὶ Κορίσκος, εἰ μὲν καὶ ἢ ψυχὴ Σωκράτης, διττόν (οἱ μὲν γὰρ ὡς ψυχὴν οἱ δ' ὡς τὸ σύνολον), εἰ δ' ἀπλῶς ἢ ψυχὴ ἥδε καὶ <τὸ> σῶμα τόδε, ὥσπερ τὸ καθόλου [τε] καὶ τὸ καθ' ἕκαστον. πότερον δὲ ἔστι παρὰ τὴν ὕλην τῶν τοιούτων οὐσιῶν τις ἄλλη, καὶ δεῖ ζητεῖν οὐσίαν ἑτέραν τινὰ οἷον ἀριθμοὺς ἢ τι τοιοῦτον, σκεπτέον ὕστερον. τούτου γὰρ χάριν καὶ περὶ τῶν αἰσθητῶν οὐσιῶν πειρώμεθα διορίζειν, ἐπεὶ τρόπον τινὰ τῆς φυσικῆς καὶ δευτέρας φιλοσοφίας ἔργον ἢ περὶ τὰς αἰσθητὰς οὐσίας θεωρία· οὐ γὰρ μόνον περὶ τῆς ὕλης δεῖ γνωρίζειν τὸν φυσικὸν ἀλλὰ καὶ τῆς κατὰ τὸν λόγον, καὶ μᾶλλον. ἐπὶ δὲ τῶν ὁρισμῶν πῶς μέρη τὰ ἐν τῷ λόγῳ, καὶ διὰ τί εἷς λόγος ὁ ὁρισμὸς (δῆλον γὰρ ὅτι τὸ πρᾶγμα ἓν, τὸ δὲ πρᾶγμα τίνι ἓν, μέρη γε ἔχον;), σκεπτέον ὕστερον.

Τί μὲν οὖν ἐστὶ τὸ τί ἦν εἶναι καὶ πῶς αὐτὸ καθ' αὐτό, καθόλου

περί παντὸς εἴρηται, καὶ διὰ τί τῶν μὲν ὁ λόγος ὁ τοῦ τί ἦν εἶναι ἔχει τὰ μόρια τοῦ ὀριζομένου τῶν δ' οὐ, καὶ ὅτι ἐν μὲν τῷ τῆς οὐσίας λόγῳ τὰ οὕτω μόρια ὡς ὕλη οὐκ ἐνέσται - οὐδὲ γὰρ ἔστιν ἐκείνης μόρια τῆς οὐσίας ἀλλὰ τῆς συνόλου, ταύτης δέ γ' ἔστι πως λόγος καὶ οὐκ ἔστιν· μετὰ μὲν γὰρ τῆς ὕλης οὐκ ἔστιν (ἀόριστον γάρ), κατὰ τὴν πρώτην δ' οὐσίαν ἔστιν, οἷον ἀνθρώπου ὁ τῆς ψυχῆς λόγος· ἡ γὰρ οὐσία ἐστὶ τὸ εἶδος τὸ ἐνόν, ἐξ οὗ καὶ τῆς ὕλης ἡ σύνολος λέγεται οὐσία, οἷον ἡ κοιλότης (ἐκ γὰρ ταύτης καὶ τῆς ῥίνος σιμὴ ῥίς καὶ ἡ σιμότης ἐστὶ [δὲς γὰρ ἐν τούτοις ὑπάρξει ἡ ῥίς]) - ἐν δὲ τῇ συνόλῳ οὐσία, οἷον ῥινὶ σιμὴ ἢ Καλλία, ἐνέσται καὶ ἡ ὕλη· καὶ ὅτι τὸ τί ἦν [1037b] εἶναι καὶ ἕκαστον ἐπὶ τινῶν μὲν ταυτό, ὥσπερ ἐπὶ τῶν πρώτων οὐσιῶν, οἷον καμπυλότης καὶ καμπυλότητι εἶναι, εἰ πρώτη ἐστὶν (λέγω δὲ πρώτην ἢ μὴ λέγεται τῷ ἄλλο ἐν ἄλλῳ εἶναι καὶ ὑποκειμένῳ ὡς ὕλη), ὅσα δὲ ὡς ὕλη ἢ ὡς συνειλημμένα τῇ ὕλῃ, οὐ ταυτό, οὐδ' «εἰ» κατὰ συμβεβηκὸς ἔν, οἷον Σωκράτης καὶ τὸ μουσικόν· ταῦτα γὰρ ταῦτα κατὰ συμβεβηκός.

Νῦν δὲ λέγωμεν πρῶτον ἐφ' ὅσον ἐν τοῖς ἀναλυτικοῖς περὶ ὀρισμοῦ μὴ εἴρηται· ἡ γὰρ ἐν ἐκείνοις ἀπορία λεχθεῖσα πρὸ ἔργου τοῖς περὶ τῆς οὐσίας ἐστὶ λόγοις. λέγω δὲ ταύτην τὴν ἀπορίαν, διὰ τί ποτε ἐν ἔστιν οὗ τὸν λόγον ὀρισμὸν εἶναι φαμεν, οἷον τοῦ ἀνθρώπου τὸ ζῶον δῖπουν· ἔστω γὰρ οὗτος αὐτοῦ λόγος. διὰ τί δὲ τοῦτο ἐν ἔστιν ἀλλ' οὐ πολλά, ζῶον καὶ δῖπουν· ἐπὶ μὲν γὰρ τοῦ ἄνθρωπος καὶ λευκὸν πολλά μὲν ἔστιν ὅταν μὴ ὑπάρχη θατέρῳ θάτερον, ἐν δὲ ὅταν ὑπάρχη καὶ πάθῃ τι τὸ ὑποκείμενον, ὁ ἄνθρωπος (τότε γὰρ ἐν γίγνεται καὶ ἔστιν ὁ λευκὸς ἄνθρωπος)· ἐνταῦθα δ' οὐ μετέχει θατέρου θάτερον· τὸ γὰρ γένος οὐ δοκεῖ μετέχειν τῶν διαφορῶν (ἅμα γὰρ ἂν τῶν ἐναντίων τὸ αὐτὸ μετεῖχεν· αἱ γὰρ διαφοραὶ ἐναντίαι αἷς διαφέρει τὸ γένος). εἰ δὲ καὶ μετέχει, ὁ αὐτὸς λόγος, εἴπερ εἰσὶν αἱ διαφοραὶ πλείους, οἷον πεζὸν δῖπουν ἅπτερον. διὰ τί γὰρ ταῦθ' ἐν ἀλλ' οὐ πολλά; οὐ γὰρ ὅτι ἐνυπάρχει· οὕτω μὲν γὰρ ἐξ ἀπάντων ἔσται ἔν. δεῖ δὲ γε ἐν εἶναι ὅσα ἐν τῷ ὀρισμῷ· ὁ γὰρ ὀρισμὸς λόγος τίς ἐστιν εἷς καὶ οὐσίας, ὥστε ἐνός τινος δεῖ αὐτὸν εἶναι λόγον· καὶ γὰρ ἡ οὐσία ἐν τι καὶ τόδε τι σημαίνει, ὡς φαμέν. - δεῖ δὲ ἐπισκοπεῖν πρῶτον περὶ τῶν κατὰ τὰς διαιρέσεις ὀρισμῶν. οὐδὲν γὰρ ἕτερόν ἐστιν ἐν τῷ ὀρισμῷ πλὴν τὸ πρῶτον λεγόμενον γένος καὶ αἱ διαφοραί· τὰ δ' ἄλλα γένη ἐστὶ τό τε πρῶτον καὶ μετὰ τούτου αἱ συλλαμβανόμεναι διαφοραί, οἷον τὸ πρῶτον ζῶον, τὸ δὲ

ἐχόμενον ζῶον δίπουν, καὶ πάλιν ζῶον δίπουν ἄπτερον· ὁμοίως δὲ [1038a] κἂν διὰ πλειόνων λέγηται. ὅλως δ' οὐδὲν διαφέρει διὰ πολλῶν ἢ δι' ὀλίγων λέγεσθαι, ὥστ' οὐδὲ δι' ὀλίγων ἢ διὰ δυοῖν· τοῖν δυοῖν δὲ τὸ μὲν διαφορὰ τὸ δὲ γένος, οἷον τοῦ ζῶον δίπουν τὸ μὲν ζῶον γένος διαφορὰ δὲ θάτερον. εἰ οὖν τὸ γένος ἀπλῶς μὴ ἔστι παρὰ τὰ ὡς γένους εἶδη, ἢ εἰ ἔστι μὲν ὡς ὕλη δ' ἐστίν (ἢ μὲν γὰρ φωνὴ γένος καὶ ὕλη, αἱ δὲ διαφοραὶ τὰ εἶδη καὶ τὰ στοιχεῖα ἐκ ταύτης ποιοῦσιν), φανερόν ὅτι ὁ ὀρισμός ἐστιν ὁ ἐκ τῶν διαφορῶν λόγος. ἀλλὰ μὴν καὶ δεῖ γε διαιρεῖσθαι τῇ τῆς διαφορᾶς διαφορᾷ, οἷον ζῶου διαφορὰ τὸ ὑπόπουν· πάλιν τοῦ ζῶου τοῦ ὑπόποδος τὴν διαφορὰν δεῖ εἶναι ἢ ὑπόπουν, ὥστ' οὐ λεκτέον τοῦ ὑπόποδος τὸ μὲν πτερωτὸν τὸ δὲ ἄπτερον, ἐάνπερ λέγῃ καλῶς (ἀλλὰ διὰ τὸ ἀδυνατεῖν ποιήσει τοῦτο), ἀλλ' ἢ τὸ μὲν σχιζόπουν τὸ δ' ἄσχιστον· αὗται γὰρ διαφοραὶ ποδός· ἢ γὰρ σχιζοποδία ποδότης τις. καὶ οὕτως ἀεὶ βούλεται βαδίζειν ἕως ἂν ἔλθῃ εἰς τὰ ἀδιάφορα· τότε δ' ἔσονται τοσαῦτα εἶδη ποδὸς ὅσαιπερ αἱ διαφοραί, καὶ τὰ ὑπόποδα ζῶα ἴσα ταῖς διαφοραῖς. εἰ δὴ ταῦτα οὕτως ἔχει, φανερόν ὅτι ἡ τελευταία διαφορὰ ἢ οὐσία τοῦ πράγματος ἔσται καὶ ὁ ὀρισμός, εἴπερ μὴ δεῖ πολλάκις ταῦτ' ἀλέγειν ἐν τοῖς ὅροις· περιέργον γάρ. συμβαίνει δέ γε τοῦτο· ὅταν γὰρ εἴπῃ ζῶον ὑπόπουν δίπουν, οὐδὲν ἄλλο εἴρηκεν ἢ ζῶον πόδας ἔχον, δύο πόδας ἔχον· κἂν τοῦτο διαιρῇ τῇ οἰκείᾳ διαιρέσει, πλεονάκις ἐρεῖ καὶ ισάκις ταῖς διαφοραῖς. ἐὰν μὲν δὴ διαφορᾶς διαφορὰ γίγνηται, μία ἔσται ἡ τελευταία τὸ εἶδος καὶ ἡ οὐσία· ἐὰν δὲ κατὰ συμβεβηκός, οἷον εἰ διαιροῖ τοῦ ὑπόποδος τὸ μὲν λευκὸν τὸ δὲ μέλαν, τοσαῦται ὅσαι ἂν αἱ τομαὶ ᾖσιν. ὥστε φανερόν ὅτι ὁ ὀρισμὸς λόγος ἐστίν ὁ ἐκ τῶν διαφορῶν, καὶ τούτων τῆς τελευταίας κατὰ γε τὸ ὀρθόν. δῆλον δ' ἂν εἴῃ, εἴ τις μετατάξειε τοὺς τοιοῦτους ὀρισμούς, οἷον τὸν τοῦ ἀνθρώπου, λέγων ζῶον δίπουν ὑπόπουν· περιέργον γὰρ τὸ ὑπόπουν εἰρημένου τοῦ δίποδος. τάξις δ' οὐκ ἔστιν ἐν τῇ οὐσίᾳ· πῶς γὰρ δεῖ νοῆσαι τὸ μὲν ὕστερον τὸ δὲ πρότερον; περὶ μὲν οὖν τῶν κατὰ τὰς διαιρέσεις ὀρισμῶν τοσαῦτα εἰρήσθω τὴν πρώτην, ποιοί τινές εἰσιν.

[1038b] Ἐπεὶ δὲ περὶ τῆς οὐσίας ἡ σκέψις ἐστί, πάλιν ἐπανέλθωμεν. λέγεται δ' ὥσπερ τὸ ὑποκείμενον οὐσία εἶναι καὶ τὸ τί ἦν εἶναι καὶ τὸ ἐκ τούτων, καὶ τὸ καθόλου. περὶ μὲν οὖν τοῖν δυοῖν εἴρηται (καὶ γὰρ περὶ τοῦ τί ἦν εἶναι καὶ τοῦ ὑποκειμένου, ὅτι διχῶς ὑπόκειται, ἢ τόδε τι ὄν, ὥσπερ τὸ ζῶον τοῖς πάθεσιν, ἢ ὡς ἡ ὕλη τῇ

έντελεχεία), δοκεῖ δὲ καὶ τὸ καθόλου αἰτιὸν τισιν εἶναι μάλιστα, καὶ εἶναι ἀρχὴ τὸ καθόλου· διὸ ἐπέλθωμεν καὶ περὶ τούτου. ἔοικε γὰρ ἀδύνατον εἶναι οὐσίαν εἶναι ὅτιοῦν τῶν καθόλου λεγομένων. πρῶτον μὲν γὰρ οὐσία ἐκάστου ἢ ἴδιος ἐκάστῳ, ἢ οὐχ ὑπάρχει ἄλλῳ, τὸ δὲ καθόλου κοινόν· τοῦτο γὰρ λέγεται καθόλου ὃ πλείοσιν ὑπάρχειν πέφυκεν. τίνος οὖν οὐσία τοῦτ' ἔσται; ἢ γὰρ πάντων ἢ οὐδενός, πάντων δ' οὐχ οἷόν τε· ἐνός δ' εἰ ἔσται, καὶ ἄλλα τοῦτ' ἔσται· ὦν γὰρ μία ἢ οὐσία καὶ τὸ τί ἦν εἶναι ἓν, καὶ αὐτὰ ἓν. ἔτι οὐσία λέγεται τὸ μὴ καθ' ὑποκειμένου, τὸ δὲ καθόλου καθ' ὑποκειμένου τινὸς λέγεται ἀεὶ. ἀλλ' ἄρα οὕτω μὲν οὐκ ἐνδέχεται ὥς τὸ τί ἦν εἶναι, ἐν τούτῳ δὲ ἐνυπάρχειν, οἷον τὸ ζῶον ἐν τῷ ἀνθρώπῳ καὶ ἵππῳ; οὐκοῦν δῆλον ὅτι ἔστι τις αὐτοῦ λόγος. διαφέρει δ' οὐθὲν οὐδ' εἰ μὴ πάντων λόγος ἔστι τῶν ἐν τῇ οὐσίᾳ· οὐδὲν γὰρ ἦττον οὐσία τοῦτ' ἔσται τινός, ὥς ὁ ἄνθρωπος τοῦ ἀνθρώπου ἐν ᾧ ὑπάρχει, ὥστε τὸ αὐτὸ συμβήσεται πάλιν· ἔσται γὰρ ἐκείνου οὐσία, οἷον τὸ ζῶον, ἐν ᾧ ὥς ἴδιον ὑπάρχει. ἔτι δὲ καὶ ἀδύνατον καὶ ἄτοπον τὸ τόδε καὶ οὐσίαν, εἰ ἔστιν ἐκ τινων, μὴ ἐξ οὐσιῶν εἶναι μηδ' ἐκ τοῦ τόδε τι ἄλλ' ἐκ ποιοῦ· πρότερον γὰρ ἔσται μὴ οὐσία τε καὶ τὸ ποιὸν οὐσίας τε καὶ τοῦ τόδε. ὅπερ ἀδύνατον· οὔτε λόγῳ γὰρ οὔτε χρόνῳ οὔτε γενέσει οἷόν τε τὰ πάθη τῆς οὐσίας εἶναι πρότερα· ἔσται γὰρ καὶ χωριστά. ἔτι τῷ Σωκράτει ἐνυπάρξει οὐσία οὐσία, ὥστε δυοῖν ἔσται οὐσία. ὅλως δὲ συμβαίνει, εἰ ἔστιν οὐσία ὁ ἄνθρωπος καὶ ὅσα οὕτω λέγεται, μηθὲν τῶν ἐν τῷ λόγῳ εἶναι μηδενὸς οὐσίαν μηδὲ χωρὶς ὑπάρχειν αὐτῶν μηδ' ἐν ἄλλῳ, λέγω δ' οἷον οὐκ εἶναί τι ζῶον παρὰ τὰ τινά, οὐδ' ἄλλο τῶν ἐν τοῖς λόγοις οὐδέν. ἐκ τε δὴ τούτων θεωροῦσι φανερόν ὅτι οὐδὲν τῶν καθόλου ὑπαρχόντων οὐσία ἐστί, καὶ [1039a] ὅτι οὐδὲν σημαίνει τῶν κοινῇ κατηγορουμένων τόδε τι, ἀλλὰ τοιόνδε. εἰ δὲ μή, ἄλλα τε πολλὰ συμβαίνει καὶ ὁ τρίτος ἄνθρωπος. ἔτι δὲ καὶ ὧδε δῆλον. ἀδύνατον γὰρ οὐσίαν ἐξ οὐσιῶν εἶναι ἐνυπαρχουσῶν ὥς ἐντελεχεία· τὰ γὰρ δύο οὕτως ἐντελεχεία οὐδέποτε ἐν ἐντελεχείᾳ, ἀλλ' ἐὰν δυνάμει δύο ἦ, ἔσται ἓν (οἷον ἢ διπλασία ἐκ δύο ἡμίσεων δυνάμει γε· ἢ γὰρ ἐντελέχεια χωρίζει), ὥστ' εἰ ἡ οὐσία ἓν, οὐκ ἔσται ἐξ οὐσιῶν ἐνυπαρχουσῶν καὶ κατὰ τοῦτον τὸν τρόπον, ὃν λέγει Δημόκριτος ὀρθῶς· ἀδύνατον γὰρ εἶναί φησιν ἐκ δύο ἐν ἢ ἐξ ἐνός δύο γενέσθαι· τὰ γὰρ μεγέθη τὰ ἄτομα τὰς οὐσίας ποιεῖ. ὁμοίως τοῖνυν δῆλον ὅτι καὶ ἐπ' ἀριθμοῦ ἔξει, εἴπερ ἐστὶν ὁ ἀριθμὸς σύνθεσις μονάδων, ὥσπερ λέγεται ὑπὸ τινων· ἢ γὰρ οὐχ ἓν ἢ δυὰς ἢ

οὐκ ἔστι μονὰς ἐν αὐτῇ ἐντελεχεία. - ἔχει δὲ τὸ συμβαῖνον ἀπορίαν. εἰ γὰρ μήτε ἐκ τῶν καθόλου οἷόν τ' εἶναι μηδεμίαν οὐσίαν διὰ τὸ τοιόνδε ἀλλὰ μὴ τότε τι σημαίνειν, μήτ' ἐξ οὐσιῶν ἐνδέχεται ἐντελεχεία εἶναι μηδεμίαν οὐσίαν σύνθετον, ἀσύνθετον ἂν εἴη οὐσία πᾶσα, ὥστ' οὐδὲ λόγος ἂν εἴη οὐδεμιᾶς οὐσίας. ἀλλὰ μὴν δοκεῖ γε πᾶσι καὶ ἐλέχθη πάλαι ἢ μόνον οὐσίας εἶναι ὅρον ἢ μάλιστα· νῦν δ' οὐδὲ ταύτης. οὐδενὸς ἄρ' ἔσται ὀρισμός· ἢ τρόπον μὲν τινα ἔσται τρόπον δέ τινα οὐ. δῆλον δ' ἔσται τὸ λεγόμενον ἐκ τῶν ὕστερον μάλλον.

Φανερόν δ' ἐξ αὐτῶν τούτων τὸ συμβαῖνον καὶ τοῖς τὰς ιδέας λέγουσιν οὐσίας τε χωριστὰς εἶναι καὶ ἅμα τὸ εἶδος ἐκ τοῦ γένους ποιοῦσι καὶ τῶν διαφορῶν. εἰ γὰρ ἔστι τὰ εἶδη, καὶ τὸ ζῶον ἐν τῷ ἀνθρώπῳ καὶ ἵππῳ, ἥτοι ἐν καὶ ταὐτὸν τῷ ἀριθμῷ ἐστὶν ἢ ἕτερον· τῷ μὲν γὰρ λόγῳ δῆλον ὅτι ἔν· τὸν γὰρ αὐτὸν διέξεισι λόγον ὁ λέγων ἐν ἑκατέρῳ. εἰ οὖν ἐστὶ τις ἄνθρωπος αὐτὸς καθ' αὐτὸν τότε τι καὶ κεχωρισμένον, ἀνάγκη καὶ ἐξ ὧν, οἷον τὸ ζῶον καὶ τὸ δίπουν, τότε τι σημαίνειν καὶ εἶναι χωριστὰ καὶ οὐσίας· ὥστε καὶ τὸ ζῶον. εἰ μὲν οὖν τὸ αὐτὸ καὶ ἐν τῷ ἐν τῷ ἵππῳ καὶ τῷ ἀνθρώπῳ, ὥσπερ σὺ σαυτῷ, πῶς τὸ ἐν [1039b] ἐν τοῖς οὐσι χωρὶς ἐν ἔσται, καὶ διὰ τί οὐ καὶ χωρὶς αὐτοῦ ἔσται τὸ ζῶον τοῦτο; ἔπειτα εἰ μὲν μεθέξει τοῦ δίποδος καὶ τοῦ πολύποδος, ἀδύνατόν τι συμβαίνει, τάναντία γὰρ ἅμα ὑπάρξει αὐτῷ ἐνὶ καὶ τῷδὲ τινι ὄντι· εἰ δὲ μή, τίς ὁ τρόπος ὅταν εἴπῃ τις τὸ ζῶον εἶναι δίπουν ἢ πεζόν; ἀλλ' ἴσως σύγκειται καὶ ἅπτεται ἢ μέμικται· ἀλλὰ πάντα ἄτοπα. ἀλλ' ἕτερον ἐν ἑκάστῳ· οὐκοῦν ἅπειρα ὡς ἔπος εἰπεῖν ἔσται ὧν ἡ οὐσία ζῶον· οὐ γὰρ κατὰ συμβεβηκὸς ἐκ ζώου ἄνθρωπος. ἔτι πολλὰ ἔσται αὐτὸ τὸ ζῶον· οὐσία τε γὰρ τὸ ἐν ἑκάστῳ ζῶον (οὐ γὰρ κατ' ἄλλο λέγεται· εἰ δὲ μή, ἐξ ἐκείνου ἔσται ὁ ἄνθρωπος καὶ γένος αὐτοῦ ἐκεῖνο), καὶ ἔτι ιδέαι ἅπαντα ἐξ ὧν ὁ ἄνθρωπος· οὐκοῦν οὐκ ἄλλου μὲν ιδέα ἔσται ἄλλου δ' οὐσία (ἀδύνατον γάρ)· αὐτὸ ἄρα ζῶον ἐν ἑκαστῷ ἔσται τῶν ἐν τοῖς ζώοις. ἔτι ἐκ τίνος τοῦτο, καὶ πῶς ἐξ αὐτοῦ ζῶου; ἢ πῶς οἷόν τε εἶναι τὸ ζῶον, ᾧ οὐσία τοῦτο αὐτό, παρ' αὐτὸ τὸ ζῶον; ἔτι δ' ἐπὶ τῶν αἰσθητῶν ταῦτά τε συμβαίνει καὶ τούτων ἀτοπώτερα. εἰ δὴ ἀδύνατον οὕτως ἔχειν, δῆλον ὅτι οὐκ ἔστιν εἶδη αὐτῶν οὕτως ὥς τινὲς φασιν.

Ἐπεὶ δ' ἡ οὐσία ἑτέρα, τό τε σύνολον καὶ ὁ λόγος (λέγω δ' ὅτι ἢ μὲν οὕτως ἐστὶν οὐσία, σὺν τῇ ὕλῃ συνειλημμένος ὁ λόγος, ἢ δ' ὁ λόγος ὅλως), ὅσαι μὲν οὖν οὕτω λέγονται, τούτων μὲν ἔστι φθορά

(καὶ γὰρ γένεσις), τοῦ δὲ λόγου οὐκ ἔστιν οὕτως ὥστε φθείρεσθαι (οὐδὲ γὰρ γένεσις, οὐ γὰρ γίγνεται τὸ οἰκία εἶναι ἀλλὰ τὸ τῇδε τῇ οἰκίᾳ), ἀλλ' ἄνευ γενέσεως καὶ φθορᾶς εἰσὶ καὶ οὐκ εἰσίν· δέδεικται γὰρ ὅτι οὐδεὶς ταῦτα γεννᾷ οὐδὲ ποιεῖ. διὰ τοῦτο δὲ καὶ τῶν οὐσιῶν τῶν αἰσθητῶν τῶν καθ' ἕκαστα οὔτε ὁρισμὸς οὔτε ἀπόδειξις ἔστιν, ὅτι ἔχουσιν ὕλην ἧς ἡ φύσις τοιαύτη ὥστ' ἐνδέχεσθαι καὶ εἶναι καὶ μὴ· διὸ φθαρτὰ πάντα τὰ καθ' ἕκαστα αὐτῶν. εἰ οὖν ἢ τ' ἀπόδειξις τῶν ἀναγκαίων καὶ ὁ ὁρισμὸς ἐπιστημονικόν, καὶ οὐκ ἐνδέχεται, ὥσπερ οὐδ' ἐπιστήμην ὅτε μὲν ἐπιστήμην ὅτε δ' ἄγνοιαν εἶναι, ἀλλὰ δόξα τὸ τοιοῦτόν ἐστιν, οὕτως οὐδ' ἀπόδειξιν οὐδ' ὁρισμόν, ἀλλὰ δόξα [1040a] ἐστὶ τοῦ ἐνδεχομένου ἄλλως ἔχειν, δηλὸν ὅτι οὐκ ἂν εἴη αὐτῶν οὔτε ὁρισμὸς οὔτε ἀπόδειξις. ἀδηλὰ τε γὰρ τὰ φθειρόμενα τοῖς ἔχουσι τὴν ἐπιστήμην, ὅταν ἐκ τῆς αἰσθήσεως ἀπέλθῃ, καὶ σωζομένων τῶν λόγων ἐν τῇ ψυχῇ τῶν αὐτῶν οὐκ ἔσται οὔτε ὁρισμὸς ἔτι οὔτε ἀπόδειξις. διὸ δεῖ, τῶν πρὸς ὅρον ὅταν τις ὀρίζηται τι τῶν καθ' ἕκαστον, μὴ ἀγνοεῖν ὅτι αἰεὶ ἀναιρεῖν ἔστιν· οὐ γὰρ ἐνδέχεται ὀρίσασθαι.

Οὐδὲ δὴ ιδέαν οὐδεμίαν ἔστιν ὀρίσασθαι. τῶν γὰρ καθ' ἕκαστον ἢ ιδέα, ὡς φασί, καὶ χωριστή· ἀναγκαῖον δὲ ἐξ ὀνομάτων εἶναι τὸν λόγον, ὄνομα δ' οὐ ποιήσει ὁ ὀριζόμενος (ἄγνωστον γὰρ ἔσται), τὰ δὲ κείμενα κοινὰ πᾶσιν· ἀνάγκη ἄρα ὑπάρχειν καὶ ἄλλω ταῦτα· οἷον εἴ τις σὲ ὀρίσαιτο, ζῶον ἐρεῖ ἰσχνὸν ἢ λευκὸν ἢ ἕτερόν τι ὃ καὶ ἄλλω ὑπάρξει. εἰ δὲ τις φαίῃ μηδὲν κωλύειν χωρὶς μὲν πάντα πολλοῖς ἅμα δὲ μόνῳ τούτῳ ὑπάρχειν, λεκτέον πρῶτον μὲν ὅτι καὶ ἀμφοῖν, οἷον τὸ ζῶον δίπουν τῷ ζῳῷ καὶ τῷ δίποδι (καὶ τοῦτο ἐπὶ μὲν τῶν αἰδίων καὶ ἀνάγκη εἶναι, πρότερά γ' ὄντα καὶ μέρη τοῦ συνθέτου· ἀλλὰ μὴν καὶ χωριστά, εἴπερ τὸ ἄνθρωπος χωριστόν· ἢ γὰρ οὐθὲν ἢ ἄμφω· εἰ μὲν οὖν μηθέν, οὐκ ἔσται τὸ γένος παρὰ τὰ εἶδη, εἰ δ' ἔσται, καὶ ἡ διαφορά)· εἴθ' ὅτι πρότερα τῷ εἶναι· ταῦτα δὲ οὐκ ἀνταναιρεῖται. ἔπειτα εἰ ἐξ ιδεῶν αἱ ιδέαι (ἀσυνθετώτερα γὰρ τὰ ἐξ ὧν), ἔτι ἐπὶ πολλῶν δεήσει κάκεῖνα κατηγορεῖσθαι ἐξ ὧν ἡ ιδέα, οἷον τὸ ζῶον καὶ τὸ δίπουν. εἰ δὲ μή, πῶς γνωρισθήσεται; ἔσται γὰρ ιδέα τις ἣν ἀδύνατον ἐπὶ πλείονων κατηγορεῖσθαι ἢ ἐνός. οὐ δοκεῖ δέ, ἀλλὰ πᾶσα ιδέα εἶναι μεθεκτὴ. ὥσπερ οὖν εἴρηται, λανθάνει ὅτι ἀδύνατον ὀρίσασθαι ἐν τοῖς αἰδίοις, μάλιστα δὲ ὅσα μοναχά, οἷον ἥλιος ἢ σελήνη. οὐ μόνον γὰρ διαμαρτάνουσι τῷ προστιθέναι τοιαῦτα ὧν ἀφαιρουμένων ἔτι ἔσται ἥλιος, ὥσπερ τὸ περὶ γῆν ἰὸν ἢ

νυκτικρυφές (ἂν γὰρ στῇ ἢ φανῇ, οὐκέτι ἔσται ἥλιος· ἀλλ' ἄτοπον εἰ μὴ· ὁ γὰρ ἥλιος οὐσίαν τινὰ σημαίνει)· ἔτι ὅσα ἐπ' ἄλλου ἐνδέχεται, οἷον ἐὰν ἕτερος γένηται τοιοῦτος, δηλὸν ὅτι ἥλιος ἔσται· κοινὸς [1040b] ἄρα ὁ λόγος· ἀλλ' ἦν τῶν καθ' ἕκαστα ὁ ἥλιος, ὥσπερ Κλέων ἢ Σωκράτης· ἐπεὶ διὰ τί οὐδεὶς ὅρον ἐκφέρει αὐτῶν ιδέας; γένοιτο γὰρ ἂν δηλὸν πειρωμένων ὅτι ἀληθές τὸ νῦν εἰρημένον.

Φανερόν δὲ ὅτι καὶ τῶν δοκουσῶν εἶναι οὐσιῶν αἱ πλεῖσται δυνάμεις εἰσὶ, τὰ τε μόρια τῶν ζώων (οὐθέν γὰρ κεχωρισμένον αὐτῶν ἐστίν· ὅταν δὲ χωρισθῇ, καὶ τότε ὄντα ὡς ὕλη πάντα) καὶ γῆ καὶ πῦρ καὶ ἀήρ· οὐδὲν γὰρ αὐτῶν ἓν ἐστίν, ἀλλ' οἷον σωρός, πρὶν ἢ πεφθῇ καὶ γένηται τι ἐξ αὐτῶν ἓν. μάλιστα δ' ἂν τις τὰ τῶν ἐμψύχων ὑπολάβοι μόρια καὶ τὰ τῆς ψυχῆς πάρεγγυς ἅμφω γίνεσθαι, ὄντα καὶ ἐντελεχεία καὶ δυνάμει, τῷ ἀρχὰς ἔχειν κινήσεως ἀπὸ τινος ἐν ταῖς καμπαῖς· διὸ ἓνια ζῶα διαιρούμενα ζῆ. ἀλλ' ὅμως δυνάμει πάντ' ἔσται, ὅταν ἡ ἐν καὶ συνεχές φύσει, ἀλλὰ μὴ βία ἢ συμφύσει· τὸ γὰρ τοιοῦτον πῆρως. ἐπεὶ δὲ τὸ ἐν λέγεται ὥσπερ καὶ τὸ ὄν, καὶ ἡ οὐσία ἢ τοῦ ἐνὸς μία, καὶ ὧν μία ἀριθμῷ ἐν ἀριθμῷ, φανερόν ὅτι οὔτε τὸ ἐν οὔτε τὸ ὄν ἐνδέχεται οὐσίαν εἶναι τῶν πραγμάτων, ὥσπερ οὐδὲ τὸ στοιχείῳ εἶναι ἢ ἀρχῇ· ἀλλὰ ζητοῦμεν τίς οὖν ἢ ἀρχή, ἵνα εἰς γνωριμώτερον ἀναγάγωμεν. μᾶλλον μὲν οὖν τούτων οὐσία τὸ ὄν καὶ ἐν ἢ ἡ τε ἀρχὴ καὶ τὸ στοιχείον καὶ τὸ αἷτιον, οὐπω δὲ οὐδὲ ταῦτα, εἴπερ μὴδ' ἄλλο κοινὸν μὴδὲν οὐσία· οὐδενὶ γὰρ ὑπάρχει ἡ οὐσία ἀλλ' ἢ αὐτῇ τε καὶ τῷ ἔχοντι αὐτήν, οὗ ἐστὶν οὐσία. ἔτι τὸ ἐν πολλαχῇ οὐκ ἂν εἴη ἅμα, τὸ δὲ κοινὸν ἅμα πολλαχῇ ὑπάρχει· ὥστε δηλὸν ὅτι οὐδὲν τῶν καθόλου ὑπάρχει παρὰ τὰ καθ' ἕκαστα χωρὶς. ἀλλ' οἱ τὰ εἶδη λέγοντες τῇ μὲν ὀρθῶς λέγουσι χωρίζοντες αὐτά, εἴπερ οὐσαὶ εἰσὶ, τῇ δ' οὐκ ὀρθῶς, ὅτι τὸ ἐν ἐπὶ πολλῶν εἶδος λέγουσιν. αἷτιον δ' ὅτι οὐκ ἔχουσιν ἀποδοῦναι τίνες αἱ τοιαῦται οὐσαὶ αἱ ἄφθαρτοι παρὰ τὰς καθ' ἕκαστα καὶ αἰσθητάς· ποιοῦσιν οὖν τὰς αὐτάς τῷ εἶδει τοῖς φθαρτοῖς (ταύτας γὰρ ἴσμεν), αὐτοάνθρωπον καὶ αὐτόϊππον, προστιθέντες τοῖς αἰσθητοῖς τὸ ῥῆμα τὸ “αὐτό”. καίτοι κἂν εἰ μὴ [1041a] ἐωράκειμεν τὰ ἄστρα, οὐδὲν ἂν ἦττον, οἶμαι, ἦσαν οὐσαὶ αἰδίιοι παρ' ἃς ἡμεῖς ἥδειμεν· ὥστε καὶ νῦν εἰ μὴ ἔχομεν τίνες εἰσὶν, ἀλλ' εἶναί γέ τινας ἴσως ἀναγκαῖον. ὅτι μὲν οὖν οὔτε τῶν καθόλου λεγομένων οὐδὲν οὐσία οὔτ' ἐστὶν οὐσία οὐδεμία ἐξ οὐσιῶν, δηλὸν.

[1047b] τῶν γὰρ μὴ ὄντων ἓν αὐτῷ δυνάμει ἐστίν· οὐκ ἔστι δέ, ὅτι οὐκ ἐντελεχεῖα ἐστίν.

Εἰ δὲ ἐστὶ τὸ εἰρημένον τὸ δυνατόν ἢ ἀκολουθεῖ, φανερόν ὅτι οὐκ ἐνδέχεται ἀληθὲς εἶναι τὸ εἰπεῖν ὅτι δυνατόν μὲν τοδί, οὐκ ἔσται δέ, ὥστε τὰ ἀδύνατα εἶναι ταύτῃ διαφεύγειν· λέγω δὲ οἶον εἴ τις φαίη δυνατόν τὴν διάμετρον μετρηθῆναι οὐ μέντοι μετρηθῆσθαι - ὁ μὴ λογιζόμενος τὸ ἀδύνατον εἶναι - ὅτι οὐθὲν κωλύει δυνατόν τι ὃν εἶναι

ἢ γενέσθαι μὴ εἶναι μὴδ' ἔσεσθαι. ἀλλ' ἐκεῖνο ἀνάγκη ἐκ τῶν κειμένων, εἰ καὶ ὑποθούμεθα εἶναι ἢ γεγονέναι ὃ οὐκ ἔστι μὲν δυνατόν δέ, ὅτι οὐθὲν ἔσται ἀδύνατον· συμβήσεται δέ γε, τὸ γὰρ μετρεῖσθαι ἀδύνατον. οὐ γὰρ δὴ ἔστι ταὐτὸ τὸ ψεῦδος καὶ τὸ ἀδύνατον· τὸ γὰρ σε ἐστάναι νῦν ψεῦδος μὲν, οὐκ ἀδύνατον δέ. ἅμα δὲ δῆλον καὶ ὅτι, εἰ τοῦ Α ὄντος ἀνάγκη τὸ Β εἶναι, καὶ δυνατοῦ ὄντος εἶναι τοῦ Α καὶ τὸ Β ἀνάγκη εἶναι δυνατόν· εἰ γὰρ μὴ ἀνάγκη δυνατόν εἶναι, οὐθὲν κωλύει μὴ εἶναι δυνατόν εἶναι. ἔστω δὴ τὸ Α δυνατόν. οὐκοῦν ὅτε τὸ Α δυνατόν εἴη εἶναι, εἰ τεθείη τὸ Α, οὐθὲν ἀδύνατον εἶναι συνέβαινεν· τὸ δέ γε Β ἀνάγκη εἶναι. ἀλλ' ἦν ἀδύνατον. ἔστω δὴ ἀδύνατον. εἰ δὴ ἀδύνατον [ἀνάγκη] εἶναι τὸ Β, ἀνάγκη καὶ τὸ Α εἶναι. ἀλλ' ἦν ἄρα τὸ πρῶτον ἀδύνατον· καὶ τὸ δεύτερον ἄρα. ἂν ἄρα ἦ τὸ Α δυνατόν, καὶ τὸ Β ἔσται δυνατόν, εἴπερ οὕτως εἶχον ὥστε τοῦ Α ὄντος ἀνάγκη εἶναι τὸ Β. ἐὰν δὴ οὕτως ἐχόντων τῶν Α Β μὴ ἦ δυνατόν τὸ Β οὕτως, οὐδὲ τὰ Α Β ἔξει ὡς ἐτέθη· καὶ εἰ τοῦ Α δυνατοῦ ὄντος ἀνάγκη τὸ Β δυνατόν εἶναι, εἰ ἔστι τὸ Α ἀνάγκη εἶναι καὶ τὸ Β. τὸ γὰρ δυνατόν εἶναι ἐξ ἀνάγκης τὸ Β εἶναι, εἰ τὸ Α δυνατόν, τοῦτο σημαίνει, ἐὰν ἦ τὸ Α καὶ ὅτε καὶ ὡς ἦν δυνατόν εἶναι, κάκεῖνο τότε καὶ οὕτως εἶναι ἀναγκαῖον.

Ἀπασῶν δὲ τῶν δυνάμεων οὐσῶν τῶν μὲν συγγενῶν οἶον τῶν αἰσθήσεων, τῶν δὲ ἔθει οἶον τῆς τοῦ αὐλεῖν, τῶν δὲ μαθήσει οἶον τῆς τῶν τεχνῶν, τὰς μὲν ἀνάγκη προενεργήσαντας ἔχειν, ὅσαι ἔθει καὶ λόγῳ, τὰς δὲ μὴ τοιαύτας καὶ τὰς ἐπὶ τοῦ πάσχειν οὐκ ἀνάγκη. ἐπεὶ δὲ τὸ δυνατόν [1048a] τί δυνατόν καὶ ποτὲ καὶ πῶς καὶ ὅσα ἄλλα ἀνάγκη προσεῖναι ἐν τῷ διορισμῷ, καὶ τὰ μὲν κατὰ λόγον δύναται κινεῖν καὶ αἱ δυνάμεις αὐτῶν μετὰ λόγου, τὰ δὲ ἄλογα καὶ αἱ δυνάμεις ἄλογοι, κάκεῖνας μὲν ἀνάγκη ἐν ἐμπύχῳ εἶναι ταύτας δὲ ἐν ἀμφοῖν, τὰς μὲν τοιαύτας δυνάμεις ἀνάγκη, ὅταν ὡς δύνανται τὸ ποιητικὸν καὶ τὸ παθητικὸν πλησιάζωσι, τὸ μὲν ποιεῖν τὸ δὲ πάσχειν, ἐκεῖνας δ' οὐκ ἀνάγκη· αὗται μὲν γὰρ πᾶσαι μία ἐνὸς ποιητική, ἐκεῖναι δὲ τῶν ἐναντίων, ὥστε ἅμα ποιήσει τὰ ἐναντία· τοῦτο δὲ ἀδύνατον. ἀνάγκη ἄρα ἕτερόν τι εἶναι τὸ κύριον· λέγω δὲ τοῦτο ὀρεξιν ἢ προαίρεσιν. ὁποτέρου γὰρ ἂν ὀρέγηται κυρίως, τοῦτο ποιήσει ὅταν ὡς δύναται ὑπάρχει καὶ πλησιάζῃ τῷ παθητικῷ· ὥστε τὸ δυνατόν κατὰ λόγον ἅπαν ἀνάγκη, ὅταν ὀρέγηται οὗ ἔχει τὴν δύναμιν καὶ ὡς ἔχει, τοῦτο ποιεῖν· ἔχει δὲ παρόντος τοῦ παθητικοῦ καὶ ὡδὶ ἔχοντος [ποιεῖν]· εἰ δὲ μή, ποιεῖν οὐ δυνήσεται (τὸ γὰρ

μηθενὸς τῶν ἔξω κωλύοντος προσδιορίζεσθαι οὐθὲν ἔτι δεῖ· τὴν γὰρ δύναμιν ἔχει ὥς ἔστι δύναμις τοῦ ποιεῖν, ἔστι δ' οὐ πάντως ἀλλ' ἐχόντων πῶς, ἐν οἷς ἀφορισθήσεται καὶ τὰ ἔξω κωλύοντα· ἀφαιρεῖται γὰρ ταῦτα τῶν ἐν τῷ διορισμῷ προσόντων ἕνια)· διὸ οὐδ' ἐὰν ἅμα βούληται ἢ ἐπιθυμῇ ποιεῖν δύο ἢ τὰ ἐναντία, οὐ ποιήσει· οὐ γὰρ οὕτως ἔχει αὐτῶν τὴν δύναμιν οὐδ' ἔστι τοῦ ἅμα ποιεῖν ἢ δύναμις, ἐπεὶ ὧν ἐστὶν οὕτως ποιήσει.

Ἐπεὶ δὲ περὶ τῆς κατὰ κίνησιν λεγομένης δυνάμεως εἴρηται, περὶ ἐνεργείας διορίσωμεν τί τέ ἐστιν ἢ ἐνέργεια καὶ ποῖόν τι. καὶ γὰρ τὸ δυνατόν ἅμα δῆλον ἔσται διαιρουσιν, ὅτι οὐ μόνον τοῦτο λέγομεν δυνατόν ὃ πέφυκε κινεῖν ἄλλο ἢ κινεῖσθαι ὑπ' ἄλλου ἢ ἀπλῶς ἢ τρόπον τινά, ἀλλὰ καὶ ἐτέρως, διὸ ζητοῦντες καὶ περὶ τούτων διήλθομεν. ἔστι δὲ ἐνέργεια τὸ ὑπάρχειν τὸ πρᾶγμα μὴ οὕτως ὥσπερ λέγομεν δυνάμει· λέγομεν δὲ δυνάμει οἷον ἐν τῷ ξύλῳ Ἑρμῆν καὶ ἐν τῇ ὄλῃ τὴν ἡμίσειαν, ὅτι ἀφαιρεθεῖ ἄν, καὶ ἐπιστήμονα καὶ τὸν μὴ θεωροῦντα, ἂν δυνατός ᾤ θεωρῆσαι· τὸ δὲ ἐνεργεῖα· δῆλον δ' ἐπὶ τῶν καθ' ἕκαστα τῇ ἐπαγωγῇ ὃ βουλόμεθα λέγειν, καὶ οὐ δεῖ παντὸς ὅρον ζητεῖν ἀλλὰ καὶ τὸ ἀνάλογον συνορᾶν, ὅτι ὥς τὸ οἰκοδομοῦν [1048b] πρὸς τὸ οἰκοδομικόν, καὶ τὸ ἐγρηγορὸς πρὸς τὸ καθεῦδον, καὶ τὸ ὀρῶν πρὸς τὸ μῦον μὲν ὅψιν δὲ ἔχον, καὶ τὸ ἀποκεκριμένον ἐκ τῆς ὕλης πρὸς τὴν ὕλην, καὶ τὸ ἀπειργασμένον πρὸς τὸ ἀνέργαστον. ταύτης δὲ τῆς διαφορᾶς θατέρῳ μορίῳ ἔστω ἢ ἐνέργεια ἀφωρισμένη θατέρῳ δὲ τὸ δυνατόν. λέγεται δὲ ἐνεργεῖα οὐ πάντα ὁμοίως ἀλλ' ἢ τῷ ἀνάλογον, ὥς τοῦτο ἐν τούτῳ ἢ πρὸς τοῦτο, τόδ' ἐν τῷδε ἢ πρὸς τόδε· τὰ μὲν γὰρ ὥς κίνησις πρὸς δύναμιν τὰ δ' ὥς οὐσία πρὸς τινα ὕλην. ἄλλως δὲ καὶ τὸ ἄπειρον καὶ τὸ κενόν, καὶ ὅσα τοιαῦτα, λέγεται δυνάμει καὶ ἐνεργεῖα <ἢ> πολλοῖς τῶν ὄντων, οἷον τῷ ὀρῶντι καὶ βαδίζοντι καὶ ὀρωμένῳ. ταῦτα μὲν γὰρ ἐνδέχεται καὶ ἀπλῶς ἀληθεύεσθαι ποτε (τὸ μὲν γὰρ ὀρώμενον ὅτι ὀρᾶται, τὸ δὲ ὅτι ὀρᾶσθαι δυνατόν)· τὸ δ' ἄπειρον οὐχ οὕτω δυνάμει ἔστιν ὥς ἐνεργεῖα ἐσόμενον χωριστόν, ἀλλὰ γνώσει. τὸ γὰρ μὴ ὑπολείπειν τὴν διαίρεσιν ἀποδίδωσι τὸ εἶναι δυνάμει ταύτην τὴν ἐνέργειαν, τὸ δὲ χωρίζεσθαι οὐ.

Ἐπεὶ δὲ τῶν πράξεων ὧν ἔστι πέρας οὐδεμία τέλος ἀλλὰ τῶν περὶ τὸ τέλος, οἷον τὸ ἰσχυαίνειν ἢ ἰσχυασία [αὐτό], αὐτὰ δὲ ὅταν ἰσχυαίνῃ οὕτως ἐστὶν ἐν κινήσει, μὴ ὑπάρχοντα ὧν ἕνεκα ἢ κίνησις, οὐκ ἔστι ταῦτα πρᾶξις ἢ οὐ τελεία γε (οὐ γὰρ τέλος)· ἀλλ' ἐκεῖνη <ἢ>

ἐνυπάρχει τὸ τέλος καὶ [ἡ] πρᾶξις. οἷον ὁρᾷ ἅμα «καὶ ἐώρακε,» καὶ φρονεῖ «καὶ πεφρόνηκε,» καὶ νοεῖ καὶ νενόηκεν, ἀλλ' οὐ μανθάνει καὶ μεμάθηκεν οὐδ' ὑγιάζεται καὶ υγιάσται· εὖ ζῇ καὶ εὖ ἔζηκεν ἅμα, καὶ εὐδαιμονεῖ καὶ εὐδαιμόνηκεν. εἰ δὲ μή, ἔδει ἂν ποτε παύεσθαι ὥσπερ ὅταν ἰσχυαίνῃ, νῦν δ' οὐ, ἀλλὰ ζῇ καὶ ἔζηκεν. τούτων δὴ «δεῖ» τὰς μὲν κινήσεις λέγειν, τὰς δ' ἐνεργείας. πᾶσα γὰρ κίνησις ἀτελής, ἰσχυασία μάθησις βάδισις οἰκοδόμησις· αὗται δὴ κινήσεις, καὶ ἀτελεῖς γε. οὐ γὰρ ἅμα βαδίζει καὶ βεβάδικεν, οὐδ' οἰκοδομεῖ καὶ ὠκοδόμηκεν, οὐδὲ γίγνεται καὶ γέγονεν ἢ κινεῖται καὶ κεκίνηται, ἀλλ' ἕτερον, καὶ κινεῖ καὶ κεκίνηκεν· ἐώρακε δὲ καὶ ὁρᾷ ἅμα τὸ αὐτό, καὶ νοεῖ καὶ νενόηκεν. τὴν μὲν οὖν τοιαύτην ἐνέργειαν λέγω, ἐκείνην δὲ κίνησιν. τὸ μὲν οὖν ἐνεργεῖα τί τέ ἐστι καὶ ποῖον, ἐκ τούτων καὶ τῶν τοιούτων δῆλον ἡμῖν ἔστω.

Πότε δὲ δυνάμει ἔστιν ἕκαστον καὶ πότε οὐ, διοριστέον· [1049a] οὐ γὰρ ὅποτεοῦν. οἷον ἡ γῆ ἄρ' ἐστὶ δυνάμει ἄνθρωπος; ἢ οὐ, ἀλλὰ μᾶλλον ὅταν ἤδη γένηται σπέρμα, καὶ οὐδὲ τότε ἴσως; ὥσπερ οὖν οὐδ' ὑπὸ ἰατρικῆς ἅπαν ἂν υγιασθεῖν οὐδ' ἀπὸ τύχης, ἀλλ' ἔστι τι ὃ δυνατόν ἐστι, καὶ τοῦτ' ἔστιν υγιαῖνον δυνάμει. ὅρος δὲ τοῦ μὲν ἀπὸ διανοίας ἐντελεχείᾳ γιγνομένου ἐκ τοῦ δυνάμει ὄντος, ὅταν βουληθέντος γίγνηται μηθενὸς κωλύοντος τῶν ἐκτός, ἐκεῖ δ' ἐν τῷ υγιαζομένῳ, ὅταν μηθὲν κωλύῃ τῶν ἐν αὐτῷ· ὁμοίως δὲ δυνάμει καὶ οἰκία· εἰ μηθὲν κωλύει τῶν ἐν τούτῳ καὶ τῇ ὕλῃ τοῦ γίνεσθαι οἰκίαν, οὐδ' ἔστιν ὃ δεῖ προσγενέσθαι ἢ ἀπογενέσθαι ἢ μεταβαλεῖν, τοῦτο δυνάμει οἰκία· καὶ ἐπὶ τῶν ἄλλων ὡσαύτως ὅσων ἔξωθεν ἡ ἀρχὴ τῆς γενέσεως. καὶ ὅσων δὴ ἐν αὐτῷ τῷ ἔχοντι, ὅσα μηθενὸς τῶν ἔξωθεν ἐμποδίζοντος ἔσται δι' αὐτοῦ· οἷον τὸ σπέρμα οὐπω (δεῖ γὰρ ἐν ἄλλῳ «πεσεῖν» καὶ μεταβάλλειν), ὅταν δ' ἤδη διὰ τῆς αὐτοῦ ἀρχῆς ἢ τοιοῦτον, ἤδη τοῦτο δυνάμει· ἐκεῖνο δὲ ἐτέρας ἀρχῆς δεῖται, ὥσπερ ἡ γῆ οὐπω ἀνδριᾶς δυνάμει (μεταβαλοῦσα γὰρ ἔσται χαλκός). ἔοικε δὲ ὃ λέγομεν εἶναι οὐ τότε ἀλλ' ἐκείνινον - οἷον τὸ κιβώτιον οὐ ξύλον ἀλλὰ ξύλινον, οὐδὲ τὸ ξύλον γῆ ἀλλὰ γῆνινον, πάλιν ἡ γῆ εἰ οὕτως μὴ ἄλλο ἀλλὰ ἐκείνινον - ἀεὶ ἐκεῖνο δυνάμει ἀπλῶς τὸ ὕστερόν ἐστιν. οἷον τὸ κιβώτιον οὐ γῆνινον οὐδὲ γῆ ἀλλὰ ξύλινον· τοῦτο γὰρ δυνάμει κιβώτιον καὶ ὕλη κιβωτίου αὕτη, ἀπλῶς μὲν τοῦ ἀπλῶς τουδὶ δὲ τοδὶ τὸ ξύλον. εἰ δὲ τί ἐστι πρῶτον ὃ μηκέτι κατ' ἄλλο λέγεται ἐκείνινον, τοῦτο πρώτη ὕλη· οἷον εἰ ἡ γῆ ἀερίνη, ὃ δ' ἀήρ μὴ πῦρ ἀλλὰ πύρινος, τὸ πῦρ ὕλη πρώτη οὐ τότε τι οὔσα.

τούτῳ γὰρ διαφέρει τὸ καθ' οὗ καὶ τὸ ὑποκείμενον, τῷ εἶναι τότε τι ἢ μὴ εἶναι· οἷον τοῖς πάθεσι τὸ ὑποκείμενον ἄνθρωπος καὶ σῶμα καὶ ψυχὴ, πάθος δὲ τὸ μουσικὸν καὶ λευκόν (λέγεται δὲ τῆς μουσικῆς ἐγγενομένης ἐκεῖνο οὐ μουσικὴ ἀλλὰ μουσικόν, καὶ οὐ λευκότης ὁ ἄνθρωπος ἀλλὰ λευκόν, οὐδὲ βάδισις ἢ κίνησις ἀλλὰ βαδίζον ἢ κινούμενον, ὡς τὸ ἐκείνινον)· - ὅσα μὲν οὖν οὕτω, τὸ ἔσχατον οὐσία· ὅσα δὲ μὴ οὕτως ἀλλ' εἰδός τι καὶ τότε τι τὸ κατηγορούμενον, τὸ ἔσχατον ὕλη καὶ οὐσία ὑλική. καὶ ὀρθῶς δὴ συμβαίνει τὸ [1049b] ἐκείνινον λέγεσθαι κατὰ τὴν ὕλην καὶ τὰ πάθη· ἅμφω γὰρ ἀόριστα. πότε μὲν οὖν λεκτέον δυνάμει καὶ πότε οὐ, εἴρηται.

Ἐπεὶ δὲ τὸ πρότερον διώριστα ποσαχῶς λέγεται, φανερόν ὅτι πρότερον ἐνέργεια δυνάμεως ἐστίν. λέγω δὲ δυνάμεως οὐ μόνον τῆς ὀρισμένης ἢ λέγεται ἀρχὴ μεταβλητικὴ ἐν ἄλλῳ ἢ ἢ ἄλλο, ἀλλ' ὅλως πάσης ἀρχῆς κινητικῆς ἢ στατικῆς. καὶ γὰρ ἡ φύσις ἐν ταυτῷ [γίνεται· ἐν ταυτῷ γὰρ] γένει τῇ δυνάμει· ἀρχὴ γὰρ κινητικὴ, ἀλλ' οὐκ ἐν ἄλλῳ ἀλλ' ἐν αὐτῷ ἢ αὐτό. - πάσης δὲ τῆς τοιαύτης προτέρα ἐστὶν ἡ ἐνέργεια καὶ λόγῳ καὶ τῇ οὐσίᾳ· χρόνῳ δ' ἐστὶ μὲν ὥς, ἐστὶ δὲ ὡς οὐ. τῷ λόγῳ μὲν οὖν ὅτι προτέρα, δῆλον (τῷ γὰρ ἐνδέχεσθαι ἐνεργῆσαι δυνατόν ἐστὶ τὸ πρώτως δυνατόν, οἷον λέγω οἰκοδομικόν τὸ δυνάμενον οἰκοδομεῖν, καὶ ὁρατικόν τὸ ὁρᾶν, καὶ ὁρατὸν τὸ δυνατόν ὁρᾶσθαι· ὁ δ' αὐτὸς λόγος καὶ ἐπὶ τῶν ἄλλων, ὥστ' ἀνάγκη τὸν λόγον προϋπάρχειν καὶ τὴν γνῶσιν τῆς γνώσεως)· τῷ δὲ χρόνῳ πρότερον ὧδε· τὸ τῷ εἶδει τὸ αὐτὸ ἐνεργοῦν πρότερον, ἀριθμῷ δ' οὐ. λέγω δὲ τοῦτο ὅτι τοῦδε μὲν τοῦ ἀνθρώπου τοῦ ἤδη ὄντος κατ' ἐνέργειαν καὶ τοῦ σίτου καὶ τοῦ ὀρώντος πρότερον τῷ χρόνῳ ἢ ὕλη καὶ τὸ σπέρμα καὶ τὸ ὁρατικόν, ἃ δυνάμει μὲν ἐστὶν ἄνθρωπος καὶ σῖτος καὶ ὀρῶν, ἐνεργείᾳ δ' οὐπω· ἀλλὰ τούτων πρότερα τῷ χρόνῳ ἕτερα ὄντα ἐνεργείᾳ ἐξ ὧν ταῦτα ἐγένετο· αἰεὶ γὰρ ἐκ τοῦ δυνάμει ὄντος γίγνεται τὸ ἐνεργείᾳ ὃν ὑπὸ ἐνεργείᾳ ὄντος, οἷον ἄνθρωπος ἐξ ἀνθρώπου, μουσικὸς ὑπὸ μουσικοῦ, αἰεὶ κινουντός τινος πρώτου· τὸ δὲ κινοῦν ἐνεργείᾳ ἤδη ἐστίν. εἴρηται δὲ ἐν τοῖς περὶ τῆς οὐσίας λόγοις ὅτι πᾶν τὸ γινόμενον γίγνεται ἐκ τινος τι καὶ ὑπὸ τινος, καὶ τοῦτο τῷ εἶδει τὸ αὐτό. διὸ καὶ δοκεῖ ἀδύνατον εἶναι οἰκοδόμον εἶναι μὴ οἰκοδομήσαντα μηθὲν ἢ καθαριστὴν μηθὲν καθαρίσαντα· ὁ γὰρ μανθάνων καθαρίζειν καθαρίζων μανθάνει καθαρίζειν, ὁμοίως δὲ καὶ οἱ ἄλλοι. ὅθεν ὁ σοφιστικὸς ἔλεγχος ἐγένετο ὅτι οὐκ ἔχων τις τὴν ἐπιστήμην ποιήσει οὐ ἢ ἡ ἐπιστήμη· ὁ γὰρ μανθάνων οὐκ ἔχει. ἀλλὰ

διὰ τὸ τοῦ γιγνομένου γεγενῆσθαι τι καὶ τοῦ ὅλως κινουμένου κεκινήσθαι τι (δῆλον δ' ἐν τοῖς περὶ κινήσεως [1050a] τοῦτο) καὶ τὸν μανθάνοντα ἀνάγκη ἔχειν τι τῆς ἐπιστήμης ἴσως. ἀλλ' οὖν καὶ ταύτη γε δῆλον ὅτι ἡ ἐνέργεια καὶ οὕτω προτέρα τῆς δυνάμεως κατὰ γένεσιν καὶ χρόνον.

Ἀλλὰ μὴν καὶ οὐσία γε, πρῶτον μὲν ὅτι τὰ τῇ γενέσει ὕστερα τῷ εἶδει καὶ τῇ οὐσίᾳ πρότερα (οἷον ἀνὴρ παιδὸς καὶ ἄνθρωπος σπέρματος· τὸ μὲν γὰρ ἤδη ἔχει τὸ εἶδος τὸ δ' οὐ), καὶ ὅτι ἅπαν ἐπ' ἀρχὴν βαδίζει τὸ γιγνόμενον καὶ τέλος (ἀρχὴ γὰρ τὸ οὗ ἔνεκα, τοῦ τέλους δὲ ἔνεκα ἢ γένεσις), τέλος δ' ἡ ἐνέργεια, καὶ τούτου χάριν ἡ δύναμις λαμβάνεται. οὐ γὰρ ἵνα ὅψιν ἔχουσιν ὁρῶσι τὰ ζῶα ἀλλ' ὅπως ὁρῶσιν ὅψιν ἔχουσιν, ὁμοίως δὲ καὶ οἰκοδομικὴν ἵνα οἰκοδομῶσι καὶ τὴν θεωρητικὴν ἵνα θεωρῶσιν· ἀλλ' οὐ θεωροῦσιν ἵνα θεωρητικὴν ἔχουσιν, εἰ μὴ οἱ μελετῶντες· οὗτοι δὲ οὐχὶ θεωροῦσιν ἀλλ' ἢ ὡδί, ἢ ὅτι οὐδὲν δέονται θεωρεῖν. ἔτι ἡ ὕλη ἔστι δύναμις ὅτι ἔλθοι ἂν εἰς τὸ εἶδος· ὅταν δέ γε ἐνεργεῖα ᾖ, τότε ἐν τῷ εἶδει ἐστίν. ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων, καὶ ὧν κίνησις τὸ τέλος, διὸ ὥσπερ οἱ διδάσκοντες ἐνεργοῦντα ἐπιδείξαντες οἷονται τὸ τέλος ἀποδεδωκέναι, καὶ ἡ φύσις ὁμοίως. εἰ γὰρ μὴ οὕτω γίγνεται, ὁ Παύσωνος ἔσται Ἑρμῆς· ἄδηλος γὰρ καὶ ἡ ἐπιστήμη εἰ ἔσω ἢ ἔξω, ὥσπερ κάκεῖνος. τὸ γὰρ ἔργον τέλος, ἡ δὲ ἐνέργεια τὸ ἔργον, διὸ καὶ τοῦνομα ἐνέργεια λέγεται κατὰ τὸ ἔργον καὶ συντείνει πρὸς τὴν ἐντελέθειαν. ἐπεὶ δ' ἐστὶ τῶν μὲν ἔσχατον ἢ χρῆσις (οἷον ὄψεως ἢ ὄρασις, καὶ οὐθὲν γίγνεται παρὰ ταύτην ἕτερον ἀπὸ τῆς ὄψεως), ἀπ' ἐνίων δὲ γίγνεται τι (οἷον ἀπὸ τῆς οἰκοδομικῆς οἰκία παρὰ τὴν οἰκοδόμησιν), ὅμως οὐθὲν ἦττον ἔνθα μὲν τέλος, ἔνθα δὲ μᾶλλον τέλος τῆς δυνάμεως ἐστίν· ἡ γὰρ οἰκοδόμησις ἐν τῷ οἰκοδομουμένῳ, καὶ ἅμα γίγνεται καὶ ἔστι τῇ οἰκίᾳ. ὅσων μὲν οὖν ἕτερόν τί ἐστὶ παρὰ τὴν χρῆσιν τὸ γιγνόμενον, τούτων μὲν ἡ ἐνέργεια ἐν τῷ ποιουμένῳ ἐστίν (οἷον ἢ τε οἰκοδόμησις ἐν τῷ οἰκοδομουμένῳ καὶ ἡ ὕφανσις ἐν τῷ ὕφαινομένῳ, ὁμοίως δὲ καὶ ἐπὶ τῶν ἄλλων, καὶ ὅλως ἡ κίνησις ἐν τῷ κινουμένῳ)· ὅσων δὲ μὴ ἔστιν ἄλλο τι ἔργον παρὰ τὴν ἐνέργειαν, ἐν αὐτοῖς ὑπάρχει ἡ ἐνέργεια (οἷον ἡ ὄρασις ἐν τῷ ὁρῶντι καὶ ἡ θεωρία ἐν τῷ θεωροῦντι καὶ ἡ [1050b] ζωὴ ἐν τῇ ψυχῇ, διὸ καὶ ἡ εὐδαιμονία· ζωὴ γὰρ ποιά τίς ἐστίν). ὥστε φανερόν ὅτι ἡ οὐσία καὶ τὸ εἶδος ἐνέργειά ἐστίν. κατὰ τε δὴ τοῦτον τὸν λόγον φανερόν ὅτι πρότερον τῇ οὐσίᾳ ἐνέργεια δυνάμεως, καὶ ὥσπερ εἵπομεν, τοῦ

χρόνου ἀεὶ προλαμβάνει ἐνέργεια ἑτέρα πρὸ ἑτέρας ἕως τῆς τοῦ ἀεὶ κινουντος πρώτως. - ἀλλὰ μὴν καὶ κυριωτέρως· τὰ μὲν γὰρ αἴδια πρότερα τῇ οὐσίᾳ τῶν φθαρτῶν, ἔστι δ' οὐθὲν δυνάμει αἴδιον. λόγος δὲ ὁδε· πᾶσα δύναμις ἅμα τῆς ἀντιφάσεώς ἐστιν· τὸ μὲν γὰρ μὴ δυνατόν ὑπάρχειν οὐκ ἂν ὑπάρξειεν οὐθενί, τὸ δυνατόν δὲ πᾶν ἐνδέχεται μὴ ἐνεργεῖν. τὸ ἄρα δυνατόν εἶναι ἐνδέχεται καὶ εἶναι καὶ μὴ εἶναι· τὸ αὐτὸ ἄρα δυνατόν καὶ εἶναι καὶ μὴ εἶναι. τὸ δὲ δυνατόν μὴ εἶναι ἐνδέχεται μὴ εἶναι· τὸ δὲ ἐνδεχόμενον μὴ εἶναι φθαρτόν, ἢ ἀπλῶς ἢ τοῦτο αὐτὸ ὃ λέγεται ἐνδέχεσθαι μὴ εἶναι, ἢ κατὰ τόπον ἢ κατὰ τὸ ποσὸν ἢ ποιόν· ἀπλῶς δὲ τὸ κατ' οὐσίαν. οὐθὲν ἄρα τῶν ἀφθάρτων ἀπλῶς δυνάμει ἔστιν ἀπλῶς (κατὰ τι δὲ οὐδὲν κωλύει, οἷον ποιὸν ἢ πού)· ἐνεργεῖα ἄρα πάντα· οὐδὲ τῶν ἐξ ἀνάγκης ὄντων (καίτοι ταῦτα πρῶτα· εἰ γὰρ ταῦτα μὴ ἦν, οὐθὲν ἂν ἦν)· οὐδὲ δὴ κίνησις, εἴ τίς ἐστιν αἴδιος· οὐδ' εἴ τι κινούμενον αἴδιον, οὐκ ἔστι κατὰ δύνάμιν κινούμενον ἄλλ' ἢ ποθὲν ποί (τούτου δ' ὕλην οὐδὲν κωλύει ὑπάρχειν), διὸ ἀεὶ ἐνεργεῖ ἥλιος καὶ ἄστρα καὶ ὄλος ὁ οὐρανός, καὶ οὐ φοβερὸν μὴ ποτε στῇ, ὃ φοβοῦνται οἱ περὶ φύσεως. οὐδὲ κάμνει τοῦτο δρῶντα· οὐ γὰρ περὶ τὴν δύναμιν τῆς ἀντιφάσεως αὐτοῖς, οἷον τοῖς φθαρτοῖς, ἢ κίνησις, ὥστε ἐπίπονον εἶναι τὴν συνέχειαν τῆς κινήσεως· ἢ γὰρ οὐσία ὕλη καὶ δύναμις οὔσα, οὐκ ἐνέργεια, αἰτία τούτου. μιμεῖται δὲ τὰ ἀφθαρτα καὶ τὰ ἐν μεταβολῇ ὄντα, οἷον γῆ καὶ πῦρ. καὶ γὰρ ταῦτα ἀεὶ ἐνεργεῖ· καθ' αὐτὰ γὰρ καὶ ἐν αὐτοῖς ἔχει τὴν κίνησιν. αἱ δὲ ἄλλαι δυνάμεις, ἐξ ὧν διώρισται, πᾶσαι τῆς ἀντιφάσεώς εἰσιν· τὸ γὰρ δυνάμενον ὡδὶ κινεῖν δύναται καὶ μὴ ὡδί, ὅσα γε κατὰ λόγον· αἱ δ' ἄλλοι τῷ παρεῖναι καὶ μὴ τῆς ἀντιφάσεως ἔσονται αἱ αὐταί. εἰ ἄρα τινὲς εἰσὶ φύσεις τοιαῦται ἢ οὐσίαι οἷας λέγουσιν οἱ ἐν τοῖς λόγοις τὰς ιδέας, πολὺ μᾶλλον ἐπιστήμον ἂν τι εἴη ἢ αὐτὸ ἐπιστήμη [1051a] καὶ κινούμενον ἢ κίνησις· ταῦτα γὰρ ἐνέργειαι μᾶλλον, ἐκεῖναι δὲ δυνάμεις τούτων. ὅτι μὲν οὖν πρότερον ἢ ἐνέργεια καὶ δυνάμεως καὶ πάσης ἀρχῆς μεταβλητικῆς, φανερόν.

Ὅτι δὲ καὶ βελτίων καὶ τιμιωτέρα τῆς σπουδαίας δυνάμεως ἢ ἐνέργεια, ἐκ τῶνδε δηλόν. ὅσα γὰρ κατὰ τὸ δύνασθαι λέγεται, ταυτὸν ἔστι δυνατόν τάναντία, οἷον τὸ δύνασθαι λεγόμενον ὑγιαίνειν ταυτὸν ἔστι καὶ τὸ νοσεῖν, καὶ ἅμα· ἢ αὐτὴ γὰρ δύναμις τοῦ ὑγιαίνειν καὶ κάμνειν, καὶ ἡρεμεῖν καὶ κινεῖσθαι, καὶ οἰκοδομεῖν καὶ καταβάλλειν, καὶ οἰκοδομεῖσθαι καὶ καταπίπτειν. τὸ μὲν οὖν δύνασθαι τάναντία

ἅμα ὑπάρχει· τὰ δ' ἐναντία ἅμα ἀδύνατον, καὶ τὰς ἐνεργείας δὲ ἅμα ἀδύνατον ὑπάρχειν (οἷον ὑγιαίνειν καὶ κάμνειν), ὥστ' ἀνάγκη τούτων θάτερον εἶναι τὰγαθόν, τὸ δὲ δύνασθαι ὁμοίως ἀμφότερον ἢ οὐδέτερον· ἢ ἄρα ἐνέργεια βελτίων. ἀνάγκη δὲ καὶ ἐπὶ τῶν κακῶν τὸ τέλος καὶ τὴν ἐνέργειαν εἶναι χεῖρον τῆς δυνάμεως· τὸ γὰρ δυνάμενον ταῦτ' ἄμφω τάναντία. δῆλον ἄρα ὅτι οὐκ ἔστι τὸ κακὸν παρὰ τὰ πράγματα· ὕστερον γὰρ τῇ φύσει τὸ κακὸν τῆς δυνάμεως. οὐκ ἄρα οὐδ' ἐν τοῖς ἐξ ἀρχῆς καὶ τοῖς αἰδίοις οὐθὲν ἔστιν οὔτε κακὸν οὔτε ἀμάρτημα οὔτε διεφθαρμένον (καὶ γὰρ ἡ διαφθορὰ τῶν κακῶν ἐστίν). εὐρίσκεται δὲ καὶ τὰ διαγράμματα ἐνεργείᾳ· διαιροῦντες γὰρ εὐρίσκουσιν. εἰ δ' ἦν διηρημένα, φανερὰ ἂν ἦν· νῦν δ' ἐνυπάρχει δυνάμει. διὰ τί δύο ὀρθαὶ τὸ τρίγωνον; ὅτι αἱ περὶ μίαν στιγμὴν γωνίαι ἴσαι δύο ὀρθαῖς. εἰ οὖν ἀνήκτο ἡ παρὰ τὴν πλευράν, ἰδόντι ἂν ἦν εὐθύς δῆλον διὰ τί. ἐν ἡμικυκλίῳ ὀρθὴ καθόλου διὰ τί; ἐὰν ἴσαι τρεῖς, ἢ τε βάσις δύο καὶ ἡ ἐκ μέσου ἐπισταθεῖσα ὀρθή, ἰδόντι δῆλον τῷ ἐκείνῳ εἰδότε. ὥστε φανερόν ὅτι τὰ δυνάμει ὄντα εἰς ἐνέργειαν ἀγόμενα εὐρίσκεται· αἴτιον δὲ ὅτι ἡ νόησις ἐνέργεια· ὥστ' ἐξ ἐνεργείας ἢ δυνάμεις, καὶ διὰ τοῦτο ποιοῦντες γινώσκουσιν (ὕστερον γὰρ γενέσει ἢ ἐνέργεια ἢ κατ' ἀριθμόν).

Ἐπεὶ δὲ τὸ ὄν λέγεται καὶ τὸ μὴ ὄν τὸ μὲν κατὰ τὰ σχήματα τῶν κατηγοριῶν, τὸ δὲ κατὰ δύναμιν ἢ ἐνέργειαν [1051b] τούτων ἢ τάναντία, τὸ δὲ [κυριώτατα ὄν] ἀληθὲς ἢ ψεῦδος, τοῦτο δ' ἐπὶ τῶν πραγμάτων ἐστὶ τῷ συγκεῖσθαι ἢ διηρηῆσθαι, ὥστε ἀληθεύει μὲν ὁ τὸ διηρημένον οἰόμενος διηρηῆσθαι καὶ τὸ συγκείμενον συγκεῖσθαι, ἔψευσται δὲ ὁ ἐναντίως ἔχων ἢ τὰ πράγματα, πότε ἔστιν ἢ οὐκ ἔστι τὸ ἀληθὲς λεγόμενον ἢ ψεῦδος; τοῦτο γὰρ σκεπτέον τί λέγομεν. οὐ γὰρ διὰ τὸ ἡμᾶς οἶεσθαι ἀληθῶς σε λευκὸν εἶναι εἰ σὺ λευκός, ἀλλὰ διὰ τὸ σὲ εἶναι λευκὸν ἡμεῖς οἱ φάντες τοῦτο ἀληθεύομεν. εἰ δὴ τὰ μὲν ἀεὶ σύγκειται καὶ ἀδύνατα διαιρεθῆναι, τὰ δ' ἀεὶ διήρηται καὶ ἀδύνατα συντεθῆναι, τὰ δ' ἐνδέχεται τάναντία, τὸ μὲν εἶναι ἐστὶ τὸ συγκεῖσθαι καὶ ἐν εἶναι, τὸ δὲ μὴ εἶναι τὸ μὴ συγκεῖσθαι ἀλλὰ πλείω εἶναι· περὶ μὲν οὖν τὰ ἐνδεχόμενα ἢ αὐτὴ γίγνεται ψευδὴς καὶ ἀληθὴς δόξα καὶ ὁ λόγος ὁ αὐτός, καὶ ἐνδέχεται ὅτε μὲν ἀληθεύειν ὅτε δὲ ψεῦδεσθαι· περὶ δὲ τὰ ἀδύνατα ἄλλως ἔχειν οὐ γίγνεται ὅτε μὲν ἀληθὲς ὅτε δὲ ψεῦδος, ἀλλ' ἀεὶ ταυτὰ ἀληθὴ καὶ ψευδῆ. - περὶ δὲ δὴ τὰ ἀσύνθετα τί τὸ εἶναι ἢ μὴ εἶναι καὶ τὸ ἀληθὲς καὶ τὸ ψεῦδος; οὐ γὰρ ἐστὶ σύνθετον, ὥστε εἶναι μὲν ὅταν συγκέηται, μὴ εἶναι δὲ

ἐὰν διηρημένον ἦ, ὥσπερ τὸ λευκὸν <τὸ> ξύλον ἢ τὸ ἀσύμμετρον τὴν διάμετρον· οὐδὲ τὸ ἀληθὲς καὶ τὸ ψεῦδος ὁμοίως ἔτι ὑπάρξει καὶ ἐπ' ἐκείνων. ἢ ὥσπερ οὐδὲ τὸ ἀληθὲς ἐπὶ τούτων τὸ αὐτό, οὕτως οὐδὲ τὸ εἶναι, ἀλλ' ἔστι τὸ μὲν ἀληθὲς ἢ ψεῦδος, τὸ μὲν θιγεῖν καὶ φάναι ἀληθές (οὐ γὰρ ταῦτο κατάφασις καὶ φάσις), τὸ δ' ἀγνοεῖν μὴ θιγγάνειν (ἀπατηθῆναι γὰρ περὶ τὸ τί ἐστὶν οὐκ ἔστιν ἀλλ' ἢ κατὰ συμβεβηκός· ὁμοίως δὲ καὶ περὶ τὰς μὴ συνθετάς οὐσίας, οὐ γὰρ ἔστιν ἀπατηθῆναι· καὶ πᾶσαι εἰσὶν ἐνεργεῖα, οὐ δυνάμει, ἐγίγνοντο γὰρ ἂν καὶ ἐφθείροντο, νῦν δὲ τὸ ὄν αὐτὸ οὐ γίγνεται οὐδὲ φθείρεται, ἐκ τινος γὰρ ἂν ἐγίγνετο· - ὅσα δὴ ἐστὶν ὅπερ εἶναί τι καὶ ἐνέργειαι, περὶ ταῦτα οὐκ ἔστιν ἀπατηθῆναι ἀλλ' ἢ νοεῖν ἢ μὴ· ἀλλὰ τὸ τί ἐστὶ ζητεῖται περὶ αὐτῶν, εἰ τοιαῦτά ἐστὶν ἢ μὴ)· τὸ δὲ εἶναι ὡς τὸ ἀληθές, καὶ τὸ μὴ εἶναι τὸ ὡς τὸ ψεῦδος, ἐν μὲν ἐστὶν, εἰ σύγκειται, ἀληθές, τὸ δ' εἰ μὴ σύγκειται, ψεῦδος· τὸ δὲ ἔν, εἴπερ ὄν, οὕτως ἐστίν, [1052a] εἰ δὲ μὴ οὕτως, οὐκ ἔστιν· τὸ δὲ ἀληθὲς τὸ νοεῖν ταῦτα· τὸ δὲ ψεῦδος οὐκ ἔστιν, οὐδὲ ἀπάτη, ἀλλὰ ἄγνοια, οὐχ οἷα ἡ τυφλότης· ἢ μὲν γὰρ τυφλότης ἐστὶν ὡς ἂν εἰ τὸ νοητικὸν ὅλως μὴ ἔχοι τις. φανερόν δὲ καὶ ὅτι περὶ τῶν ἀκινήτων οὐκ ἔστιν ἀπάτη κατὰ τὸ ποτέ, εἴ τις ὑπολαμβάνει ἀκίνητα. οἷον τὸ τρίγωνον εἰ μὴ μεταβάλλειν οἶεται, οὐκ οἰήσεται ποτὲ μὲν δύο ὀρθὰς ἔχειν ποτὲ δὲ οὐ (μεταβάλλοι γὰρ ἄν), ἀλλὰ τὶ μὲν τὶ δ' οὐ, οἷον ἄρτιον ἀριθμὸν πρῶτον εἶναι μηθέν, ἢ τινὰς μὲν τινὰς δ' οὐ· ἀριθμῷ δὲ περὶ ἓνα οὐδὲ τοῦτο· οὐ γὰρ ἔτι τινὰ μὲν τινὰ δὲ οὐ οἰήσεται, ἀλλ' ἀληθεύσει ἢ ψεύσεται ὡς ἀεὶ οὕτως ἔχοντος.

Τὸ ἐν ὅτι μὲν λέγεται πολλαχῶς, ἐν τοῖς περὶ τοῦ ποσαχῶς διηρημένοις εἴρηται πρότερον· πλεοναχῶς δὲ λεγομένου οἱ συγκεφαλαιούμενοι τρόποι εἰσὶ τέτταρες τῶν πρώτων καὶ καθ' αὐτὰ λεγομένων ἐν ἀλλὰ μὴ κατὰ συμβεβηκός. τό τε γὰρ συνεχές ἢ ἀπλῶς ἢ μάλιστά γε τὸ φύσει καὶ μὴ ἀφῆ μηδὲ δεσμῷ (καὶ τούτων μᾶλλον ἐν καὶ πρότερον οὗ ἀδιαιρετωτέρα ἢ κίνησις καὶ μᾶλλον ἀπλῆ). ἔτι τοιοῦτον καὶ μᾶλλον τὸ ὅλον καὶ ἔχον τινὰ μορφήν καὶ εἶδος, μάλιστα δ' εἴ τι φύσει τοιοῦτον καὶ μὴ βία, ὥσπερ ὅσα κόλλη ἢ γόμφῳ ἢ συνδέσμῳ, ἀλλὰ ἔχει ἐν αὐτῷ τὸ αἷτιον αὐτῷ τοῦ συνεχές εἶναι. τοιοῦτον δὲ τῷ μίαν τὴν κίνησιν εἶναι καὶ ἀδιαίρετον τόπῳ καὶ χρόνῳ, ὥστε φανερόν, εἴ τι φύσει κινήσεως ἀρχὴν ἔχει τῆς πρώτης τὴν πρώτην, οἷον λέγω φορᾶς κυκλοφορίαν, ὅτι τοῦτο πρῶτον μέγεθος ἐν. τὰ μὲν δὴ οὕτως ἐν ἢ συνεχές ἢ ὅλον, τὰ δὲ ὧν ἂν ὁ λόγος εἴς ἢ, τοιαῦτα δὲ ὧν ἢ νόησις μία, τοιαῦτα δὲ ὧν ἀδιαίρετος, ἀδιαίρετος δὲ τοῦ ἀδιαίρετου εἶδει ἢ ἀριθμῷ· ἀριθμῷ μὲν οὖν τὸ καθ' ἕκαστον ἀδιαίρετον, εἶδει δὲ τὸ τῷ γνωστῷ καὶ τῇ ἐπιστήμῃ, ὥσθ' ἐν ἂν εἴη πρῶτον τὸ ταῖς οὐσίαις αἷτιον τοῦ ἐνός. λέγεται μὲν οὖν τὸ ἐν τοσαυταχῶς, τό τε συνεχές φύσει καὶ τὸ ὅλον, καὶ τὸ καθ' ἕκαστον καὶ τὸ καθόλου, πάντα δὲ ταῦτα ἐν τῷ ἀδιαίρετον εἶναι τῶν μὲν [1052b] τὴν κίνησιν τῶν δὲ τὴν νόησιν ἢ τὸν λόγον. - δεῖ δὲ κατανοεῖν ὅτι οὐχ ὡσαύτως ληπτέον λέγεσθαι ποῖά τε ἐν λέγεται, καὶ τί ἐστι τὸ ἐν εἶναι καὶ τίς αὐτοῦ λόγος. λέγεται μὲν γὰρ τὸ ἐν τοσαυταχῶς, καὶ ἕκαστον ἔσται ἐν τούτων, ᾧ ἂν ὑπάρχη τις τούτων τῶν τρόπων· τὸ δὲ ἐν εἶναι ὅτε μὲν τούτων τινὲς ἔσται, ὅτε δὲ ἄλλῳ ὃ καὶ μᾶλλον ἐγγὺς τῷ ὀνόματί ἐστι, τῇ δυνάμει δ' ἐκεῖνα, ὥσπερ καὶ περὶ στοιχείου καὶ αἰτίου εἰ δέοι λέγειν ἐπὶ τε τοῖς πράγμασι διορίζοντα καὶ τοῦ ὀνόματος ὅρον ἀποδιδόντα. ἔστι μὲν γὰρ ὡς στοιχεῖον τὸ πῦρ (ἔστι δ' ἴσως καθ' αὐτὸ καὶ τὸ ἄπειρον ἢ τι ἄλλο τοιοῦτον), ἔστι δ' ὡς οὐ· οὐ γὰρ τὸ αὐτὸ πυρὶ καὶ στοιχείῳ εἶναι, ἀλλ' ὡς μὲν πρᾶγμά τι καὶ φύσις τὸ πῦρ στοιχεῖον, τὸ δὲ ὄνομα σημαίνει τὸ τοδὶ συμβεβηκέναι αὐτῷ, ὅτι ἐστὶ τι ἐκ τούτου ὡς πρώτου ἐνυπάρχοντος. οὕτω καὶ ἐπὶ αἰτίου καὶ ἐνός καὶ τῶν τοιούτων ἀπάντων, διὸ καὶ τὸ ἐν εἶναι τὸ ἀδιαίρετόν ἐστιν εἶναι, ὅπερ τότε ὄντι καὶ ἰδία χωριστῷ ἢ τόπῳ ἢ εἶδει ἢ διανοίᾳ, ἢ καὶ τὸ ὅλῳ καὶ

Ἀντίκειται δὲ τὸ ἐν καὶ τὰ πολλὰ κατὰ πλείους τρόπους, ὧν ἓνα τὸ ἐν καὶ τὸ πλῆθος ὡς ἀδιαίρετον καὶ διαιρετόν· τὸ μὲν γὰρ ἡ διηρημένον ἢ διαιρετὸν πλῆθος τι λέγεται, τὸ δὲ ἀδιαίρετον ἢ μὴ διηρημένον ἐν. ἐπεὶ οὖν αἱ ἀντιθέσεις τετραχῶς, καὶ τούτων κατὰ στέρησιν λέγεται θάτερον, ἐναντία ἂν εἴη καὶ οὔτε ὡς ἀντίφασις οὔτε ὡς τὰ πρὸς τι λεγόμενα. λέγεται δὲ ἐκ τοῦ ἐναντίου καὶ δηλοῦται τὸ ἐν, ἐκ τοῦ διαιρετοῦ τὸ ἀδιαίρετον, διὰ τὸ μᾶλλον αἰσθητὸν τὸ πλῆθος εἶναι καὶ τὸ διαιρετὸν ἢ τὸ ἀδιαίρετον, ὥστε τῷ λόγῳ πρότερον τὸ πλῆθος τοῦ ἀδιαιρέτου διὰ τὴν αἴσθησιν. ἔστι δὲ τοῦ μὲν ἐνός, ὥσπερ καὶ ἐν τῇ διαιρέσει τῶν ἐναντίων διεγράψαμεν, τὸ ταῦτο καὶ ὅμοιον καὶ ἴσον, τοῦ δὲ πλῆθους τὸ ἕτερον καὶ ἀνόμοιον καὶ ἄνισον. λεγομένου δὲ τοῦ ταύτου πολλαχῶς, ἓνα μὲν τρόπον κατ' ἀριθμὸν λέγομεν ἐνίστε αὐτό, τὸ δ' ἐὰν καὶ λόγῳ καὶ ἀριθμῷ ἐν ἦ, οἷον σὺ σαυτῷ καὶ τῷ εἶδει καὶ τῇ ὕλῃ ἐν· ἐτι δ' ἐὰν ὁ λόγος [1054b] ὁ τῆς πρώτης οὐσίας εἷς ἦ, οἷον αἱ ἴσαι γραμμαὶ εὐθεῖαι αἱ αὐταί, καὶ

τὰ ἴσα καὶ ἰσογώνια τετράγωνα, καίτοι πλείω· ἀλλ' ἐν τούτοις ἡ ἰσότης ἐνότης. ὅμοια δὲ ἐὰν μὴ ταῦτ' ἀπλῶς ὄντα, μηδὲ κατὰ τὴν οὐσίαν ἀδιάφορα τὴν συγκειμένην, κατὰ τὸ εἶδος ταῦτ' ἦ, ὥσπερ τὸ μεῖζον τετράγωνον τῷ μικρῷ ὁμοιον, καὶ αἱ ἄνισοι εὐθεΐαι· αὗται γὰρ ὅμοιαι μὲν, αἱ αὐταὶ δὲ ἀπλῶς οὐ. τὰ δὲ ἐὰν τὸ αὐτὸ εἶδος ἔχοντα, ἐν οἷς τὸ μᾶλλον καὶ ἥττον ἐγγίγνεται, μήτε μᾶλλον ἢ μήτε ἥττον. τὰ δὲ ἐὰν ἢ τὸ αὐτὸ πάθος καὶ ἐν τῷ εἶδει, οἷον τὸ λευκόν, σφόδρα καὶ ἥττον, ὁμοιά φασιν εἶναι ὅτι ἐν τὸ εἶδος αὐτῶν. τὰ δὲ ἐὰν πλείω ἔχη ταῦτ' ἢ ἕτερα, ἢ ἀπλῶς ἢ τὰ πρόχειρα, οἷον καττίτερος ἀργύρῳ ἢ λευκόν, χρυσὸς δὲ πυρὶ ἢ ξανθόν καὶ πυρρόν. ὥστε δηλον ὅτι καὶ τὸ ἕτερον καὶ τὸ ἀνόμοιον πολλαχῶς λέγεται. καὶ τὸ μὲν ἄλλο ἀντικειμένως καὶ τὸ ταῦτό, διὸ ἅπαν πρὸς ἅπαν ἢ ταῦτό ἢ ἄλλο· τὸ δ' ἐὰν μὴ καὶ ἡ ὕλη καὶ ὁ λόγος εἷς, διὸ σὺ καὶ ὁ πλησίον ἕτερος· τὸ δὲ τρίτον ὡς τὰ ἐν τοῖς μαθηματικοῖς. τὸ μὲν οὖν ἕτερον ἢ ταῦτό διὰ τοῦτο πᾶν πρὸς πᾶν λέγεται, ὅσα λέγεται ἐν καὶ ὄν· οὐ γὰρ ἀντίφασίς ἐστι τοῦ ταυτοῦ, διὸ οὐ λέγεται ἐπὶ τῶν μὴ ὄντων (τὸ δὲ μὴ ταῦτό λέγεται), ἐπὶ δὲ τῶν ὄντων πάντων· ἢ γὰρ ἐν ἢ οὐχ ἐν πέφυχ' ὅσα ὄν καὶ ἔν. τὸ μὲν οὖν ἕτερον καὶ ταῦτόν οὕτως ἀντίκειται, διαφορὰ δὲ καὶ ἐτερότης ἄλλο. τὸ μὲν γὰρ ἕτερον καὶ οὐ ἕτερον οὐκ ἀνάγκη εἶναι τινὶ ἕτερον· πᾶν γὰρ ἢ ἕτερον ἢ ταῦτό ὃ τι ἂν ἢ ὄν· τὸ δὲ διάφορον τινὸς τινὶ διάφορον, ὥστε ἀνάγκη ταῦτό τι εἶναι ᾧ διαφέρουσιν. τοῦτο δὲ τὸ ταῦτό γένος ἢ εἶδος· πᾶν γὰρ τὸ διαφέρειν διαφέρει ἢ γένει ἢ εἶδει, γένει μὲν ὧν μὴ ἔστι κοινὴ ἡ ὕλη μηδὲ γένεσις εἰς ἄλληλα, οἷον ὅσων ἄλλο σχῆμα τῆς κατηγορίας, εἶδει δὲ ὧν τὸ αὐτὸ γένος (λέγεται δὲ γένος ὃ ἅμφω τὸ αὐτὸ λέγονται κατὰ τὴν οὐσίαν τὰ διάφορα). τὰ δ' ἐναντία διάφορα, καὶ ἡ ἐναντίωσις διαφορὰ τις. ὅτι δὲ καλῶς τοῦτο ὑποτιθέμεθα, δηλον ἐκ τῆς ἐπαγωγῆς· πάντα γὰρ διαφέροντα φαίνεται καὶ ταῦτα, οὐ μόνον ἕτερα ὄντα ἀλλὰ τὰ μὲν τὸ γένος ἕτερα τὰ δ' ἐν τῇ αὐτῇ συστοιχίᾳ [1055a] τῆς κατηγορίας, ὥστ' ἐν ταυτῷ γένει καὶ ταῦτ' αὐτῷ γένει. διώριστα δ' ἐν ἄλλοις ποῖα τῷ γένει ταῦτ' ἢ ἕτερα.

Ἐπεὶ δὲ διαφέρειν ἐνδέχεται ἀλλήλων τὰ διαφέροντα πλείον καὶ ἔλαττον, ἔστι τις καὶ μεγίστη διαφορὰ, καὶ ταύτην λέγω ἐναντίωσιν. ὅτι δ' ἡ μεγίστη ἐστὶ διαφορὰ, δηλον ἐκ τῆς ἐπαγωγῆς. τὰ μὲν γὰρ γένει διαφέροντα οὐκ ἔχει ὁδὸν εἰς ἄλληλα, ἀλλ' ἀπέχει πλέον καὶ ἀσύμβλητα· τοῖς δ' εἶδει διαφέρουσιν αἱ γενέσεις ἐκ τῶν ἐναντίων εἰσὶν ὡς ἐσχάτων, τὸ δὲ τῶν ἐσχάτων διάστημα μέγιστον,

ὥστε καὶ τὸ τῶν ἐναντίων. ἀλλὰ μὴν τό γε μέγιστον ἐν ἐκάστῳ γένει τέλειον. μέγιστόν τε γὰρ οὐ μὴ ἔστιν ὑπερβολή, καὶ τέλειον οὐ μὴ ἔστιν ἔξω λαβεῖν τι δυνατόν· τέλος γὰρ ἔχει ἡ τελεία διαφορά (ὥσπερ καὶ τᾶλλα τῷ τέλει ἔχειν λέγεται τελεία), τοῦ δὲ τέλους οὐθὲν ἔξω· ἔσχατον γὰρ ἐν παντὶ καὶ περιέχει, διὸ οὐδὲν ἔξω τοῦ τέλους, οὐδὲ προσδεῖται οὐδενὸς τὸ τέλειον. ὅτι μὲν οὖν ἡ ἐναντιότης ἐστὶ διαφορὰ τέλειος, ἐκ τούτων δῆλον· πολλαχῶς δὲ λεγομένων τῶν ἐναντίων, ἀκολουθήσει τὸ τελείως οὕτως ὡς ἂν καὶ τὸ ἐναντίοις εἶναι ὑπάρχη αὐτοῖς. τούτων δὲ ὄντων φανερόν ὅτι οὐκ ἐνδέχεται ἐνὶ πλείῳ ἐναντία εἶναι (οὔτε γὰρ τοῦ ἐσχάτου ἐσχατώτερον εἶη ἂν τι, οὔτε τοῦ ἐνὸς διαστήματος πλείῳ δυοῖν ἔσχατα), ὅλως τε εἰ ἔστιν ἡ ἐναντιότης διαφορά, ἡ δὲ διαφορὰ δυοῖν, ὥστε καὶ ἡ τέλειος, ἀνάγκη δὲ καὶ τοὺς ἄλλους ὅρους ἀληθεῖς εἶναι τῶν ἐναντίων. καὶ γὰρ πλείστον διαφέρει ἡ τέλειος διαφορά (τῶν τε γὰρ γένει διαφερόντων οὐκ ἔστιν ἐξωτέρῳ λαβεῖν καὶ τῶν εἶδει· δέδεικται γὰρ ὅτι πρὸς τὰ ἔξω τοῦ γένους οὐκ ἔστι διαφορά, τούτων δ' αὕτη μεγίστη), καὶ τὰ ἐν ταύτῳ γένει πλείστον διαφέροντα ἐναντία (μεγίστη γὰρ διαφορὰ τούτων ἡ τέλειος), καὶ τὰ ἐν τῷ αὐτῷ δεκτικῷ πλείστον διαφέροντα ἐναντία (ἡ γὰρ ὕλη ἡ αὕτη τοῖς ἐναντίοις) καὶ τὰ ὑπὸ τὴν αὐτὴν δύναμιν πλείστον διαφέροντα (καὶ γὰρ ἡ ἐπιστήμη περὶ ἓν γένος ἡ μία)· ἐν οἷς ἡ τελεία διαφορὰ μεγίστη. - πρώτη δὲ ἐναντιώσις ἕξις καὶ στέρησις ἐστίν· οὐ πᾶσα δὲ στέρησις (πολλαχῶς γὰρ λέγεται ἡ στέρησις) ἀλλ' ἥτις ἂν τελεία ᾖ. τὰ δ' ἄλλα ἐναντία κατὰ ταῦτα λεχθήσεται, τὰ μὲν τῷ ἔχειν τὰ δὲ τῷ ποιεῖν ἢ ποιητικᾷ εἶναι τὰ δὲ τῷ λήψει εἶναι καὶ ἀποβολαὶ τούτων ἢ ἄλλων ἐναντίων. εἰ δὴ ἀντίκειται μὲν ἀντίφασις καὶ στέρησις καὶ [1055b] ἐναντιότης καὶ τὰ πρὸς τι, τούτων δὲ πρῶτον ἀντίφασις, ἀντιφάσεως δὲ μηδὲν ἐστὶ μεταξύ, τῶν δὲ ἐναντίων ἐνδέχεται, ὅτι μὲν οὐ ταυτὸν ἀντίφασις καὶ τὰναντία δῆλον· ἡ δὲ στέρησις ἀντίφασις τίς ἐστίν· ἢ γὰρ τὸ ἀδύνατον ὅλως ἔχειν, ἢ ὃ ἂν πεφυκὸς ἔχειν μὴ ἔχη, ἐστέρηται ἢ ὅλως ἢ πὼς ἀφορισθέν (πολλαχῶς γὰρ ἤδη τοῦτο λέγομεν, ὥσπερ διήρηται ἡμῖν ἐν ἄλλοις), ὥστ' ἐστὶν ἡ στέρησις ἀντίφασις τις ἢ ἀδυναμία διορισθεῖσα ἢ συνειλημμένη τῷ δεκτικῷ· διὸ ἀντιφάσεως μὲν οὐκ ἔστι μεταξύ, στερήσεως δὲ τινος ἔστιν· ἴσον μὲν γὰρ ἢ οὐκ ἴσον πᾶν, ἴσον δ' ἢ ἀνισον οὐ πᾶν, ἀλλ' εἴπερ, μόνον ἐν τῷ δεκτικῷ τοῦ ἴσου. εἰ δὴ αἱ γενέσεις τῇ ὕλῃ ἐκ τῶν ἐναντίων, γίνονται δὲ ἢ ἐκ τοῦ εἶδους καὶ τῆς τοῦ εἶδους ἕξεως ἢ ἐκ στερήσεώς τινος τοῦ εἶδους καὶ

τῆς μορφῆς, δηλον ὅτι ἡ μὲν ἐναντίωσις στέρησις ἂν εἴη πᾶσα, ἡ δὲ στέρησις ἴσως οὐ πᾶσα ἐναντιότης (αἴτιον δ' ὅτι πολλαχῶς ἐνδέχεται ἐστερηῆσθαι τὸ ἐστερημένον). ἐξ ὧν γὰρ αἱ μεταβολαὶ ἐσχάτων, ἐναντία ταῦτα. φανερόν δὲ καὶ διὰ τῆς ἐπαγωγῆς. πᾶσα γὰρ ἐναντίωσις ἔχει στέρησιν θάτερον τῶν ἐναντίων, ἀλλ' οὐχ ὁμοίως πάντα. ἀνισότης μὲν γὰρ ἰσότητος ἀνομοιότης δὲ ὁμοιότητος κακία δὲ ἀρετῆς, διαφέρει δὲ ὥσπερ εἴρηται. τὸ μὲν γὰρ ἐὰν μόνον ἦ ἐστερημένον, τὸ δ' ἐὰν ἦ ποτὲ ἢ ἐν τινι, οἷον ἂν ἐν ἡλικίᾳ τινὶ ἢ τῷ κυρίῳ, ἢ πάντῃ. διὸ τῶν μὲν ἔστι μεταξύ, καὶ ἔστιν οὔτε ἀγαθὸς ἄνθρωπος οὔτε κακός, τῶν δὲ οὐκ ἔστιν, ἀλλ' ἀνάγκη εἶναι ἢ περιττὸν ἢ ἄρτιον. ἔτι τὰ μὲν ἔχει τὸ ὑποκείμενον ὠρισμένον, τὰ δ' οὐ. ὥστε φανερόν ὅτι ἀεὶ θάτερον τῶν ἐναντίων λέγεται κατὰ στέρησιν. ἀπόχρη δὲ κἂν τὰ πρῶτα καὶ τὰ γένη τῶν ἐναντίων, οἷον τὸ ἐν καὶ τὰ πολλά. τὰ γὰρ ἄλλα εἰς ταῦτα ἀνάγεται.
